The percentage change clutters the data and is not always helpful. Possibly highlight when there are large changes. A percentage of change would need to be identified to use in the highlighting logic.

Market Share

Jo LeDuc:

It would be helpful if there was some sort of benchmark market share or market share change that could be used in determining if there is a significant change.

(Review the company's Market Share information for the state under review over the last five years. Identify and describe significant changes in the company's Market Share for the line(s) of business under review.

how to rev	iew a	d document findings.
Add data s	howin	g trends for percentage of complaints by complaint code.

Discussion: Add data to compare claim related complaints to total number of complaints (by coverage type). (MCAS data will be used as the source.)

Discussion: automating expected CY complaints

Discussion: Graph complaints by quarter for trending purposes

M

arket Conduct Annual Statement
Jo LeDuc:
Do we want the group data to be presented as well - similar to the premium and market share?
I would advocate that we do the review on an individual ratio approach rather than in the groupings. Since the analysts has to look at the individual ratios to make a determination at the higher grouped level, why not guide them through the analysis ratio by ratio? I think it would be simpler and also provide more information.
(13a1 and 13a2), (13b1 and 13b2) and (13c1 and 13c2) - This appears to be essentially the exact same question as the one before it. If there is a difference, it needs to be explained in the guidance. If there isn't really a difference, the questions should be combined.
Is there a reason we aren't having the analyst look at the coverage type data on a national basis?
MCAS state averages and national values will change as data is received and amended. Please

note that using national values and state averages for analysis purposes is not recommended until 60 days after the MCAS filing deadline. Prior to 60 days from the filing date, MCAS data

should be considered unaudited by the state department of insurance or the NAIC.

13 Does your state participate in the Market Conduct Annual Statement? Yes **Autofill** If yes, did the company file a Market Conduct Annual Statement for the data year under review? Yes **Autofill** 13a1 Review the ratio and rank results at the state level for the state being reviewed. Conclusion

What is your recommended next step?

- Incomplete Review
- Direct contact with the company is scheduled-recommended
- Investigation is scheduled recommended
- Examination is scheduled recommended
- Enforcement is scheduled-recommended
- Recommend We will-contacting the Collaborative Action Designee (CAD) of other states with similar concerns regarding possible collaborative activity.
- Recommend We will-proceeding with another option on the Continuum of regulatory responses. (If known, please explain the option to be used along with the rationale description.)

Jo LeDuc:

blue.

These are recommended next

steps. As such, the list of

choices should reflect that. Suggestions appear below in

- No further analysis is necessary recommended
- No further analysis this year, but recommend reviewing again next year.
- Level 2 analysis is scheduled (Remove this option if a stand-alone level 2 is no longer available)

Please develop and document your overall conclusion regarding the insurer's market activities based on the procedures performed. The analyst should consider the responses above and any other factors which, in the analyst's judgment, are relevant.

Describe the rationale for this recommendation. Please be as specific as	possible.
Describe the state's action plan.	

Contact Information:

USER Form 10074 - Allow for comments to be added to a Level 1 review after it has been approved. USER Form 10078 - Add links for reviewer.

Allow updates to document follow-up information received from the company Add option to join a continuum plan that already exists

Other General Updates:

_ 1	Add an "Other" option for reviewing lines of business not found in MARS
	Add a text box for the analyst to identify the line of business being reviewed
2	
	Have the ability to add multiple companies to a review to assist with the review of groups.
	Show data for each company, total for selected companies and a total of all companies
	within the group being reviewed.
3	Have the ability to add attachments to each area of review
4	Ensure that tables of data are readily available to reviewer in addition to any graphical
	displays.
5	Allow reviewer to select the states that they would like to see data for.
6	For all areas of review, display graphical (Tableau) representations of data in addition to
	the current table views. (Notes are added within the document where specific graphical
	suggestions were made.)
