On March 16, 2024, the Statutory Accounting Principles (E) Working Group adopted new statutory accounting guidance for “Debt Securities that Do Not Qualify as Bonds” and for “Residual Tranches or Interests/Loss Positions” within SSAP No. 21—Other Admitted Assets. The new sections are shown below. (Existing guidance from SSAP No. 21, paragraph 22 under ‘Effective Date and Transition” is duplicated within and becomes paragraph 40 after the revisions.) The revisions are effective Jan. 1, 2025. Reporting entities may elect to adopt the residual guidance (detailed in paragraphs 28-37) for year-end 2024.

Debt Securities That Do Not Qualify as Bonds

20. The guidance within paragraphs 20-27 of this statement shall apply for any security, as defined in SSAP No. 26R—Bonds, whereby there is a fixed schedule for one or more future payments (referred to herein as debt securities), but for which the security does not qualify for bond reporting under SSAP No. 26R as an issuer credit obligation or an asset backed security. Investments in scope of this guidance are limited to:

   a. Debt securities for which the investment does not reflect a creditor relationship in substance.

   b. Debt securities that do not qualify for bond reporting due to a lack of substantive credit enhancement.

   c. Debt securities that do not qualify for bond reporting due solely to a lack of meaningful cash flows.

21. Debt securities as described in this statement meet the definition of assets as defined in SSAP No. 4 and are admitted assets to the extent they conform to the requirements of this statement. The guidance in these paragraphs shall not be inferred to other securities or investment structures that are not otherwise addressed in statutory accounting, nor shall it be applied to any investments that are captured within other statutory accounting guidance.

22. Debt securities in scope of this standard that do not qualify as bonds under SSAP No. 26R and for which the primary source of repayment is derived through rights to underlying collateral, qualify as admitted assets if the underlying collateral primarily qualify as admitted invested assets. As detailed in paragraph 31, in the section pertaining to residual tranches, any residual tranches or first loss positions held from the same securitization that did not qualify as a bond under SSAP No. 26R also only qualify as admitted assets to the extent the underlying collateral primarily qualifies as admitted invested assets.

23. Debt securities in scope of this statement shall be initially reported at acquisition at cost, including brokerage and other related fees on Schedule BA: Other Long-Term Invested Assets.

24. Debt securities captured in scope of this statement shall be reported at the lower of amortized cost or fair value. Changes in measurement to reflect a lower value or to reflect changes in fair value shall be recorded as unrealized gains or losses.
25. Debt securities that do not qualify as bonds in the scope of this statement shall follow the guidance in SSAP No. 43R—Asset-Backed Securities for calculating amortized cost, for determining and recognizing other-than-temporary impairments and for allocating unrealized and realized gains and losses between the asset valuation reserve (AVR) and interest maintenance reserve (IMR).

26. Investment income shall be recorded, with assessments for collectability and nonadmittance completed and recognized, pursuant to SSAP No. 34—Investment Income Due and Accrued.

27. Securities captured within this section shall be included in all invested asset disclosures, along with the following disclosures:

   a. Fair values in accordance with SSAP No. 100R—Fair Value.
   b. Concentrations of credit risk in accordance with SSAP No. 27;
   c. Basis at which the securities are stated;
   d. The adjustment methodology used for each type of security (prospective or retrospective);
   e. Descriptions of sources used to determine prepayment assumptions.
   f. All securities within the scope of this statement with a recognized other-than-temporary impairment, disclosed in the aggregate, classified on the basis for the other-than-temporary impairment: (1) intent to sell, (2) inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis, or (3) present value of cash flows expected to be collected is less than the amortized cost basis of the security.
   g. For each security with an other-than-temporary impairment, recognized in the current reporting period by the reporting entity, as the present value of cash flows expected to be collected is less than the amortized cost basis of the securities:
      i. The amortized cost basis, prior to any current-period other-than-temporary impairment.
      ii. The other-than-temporary impairment recognized in earnings as a realized loss.
      iii. The fair value of the security.
      iv. The amortized cost basis after the current-period other-than-temporary impairment.
   h. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):
      v. The aggregate amount of unrealized losses (that is, the amount by which cost or amortized cost exceeds fair value) and
      vi. The aggregate related fair value of securities with unrealized losses.
   i. The disclosures in (i) and (ii) above should be segregated by those securities that have been in a continuous unrealized loss position for less than 12 months and those that have been
in a continuous unrealized loss position for 12 months or longer using fair values
determined in accordance with SSAP No. 100R.

j. Additional information should be included describing the general categories of information
that the investor considered in reaching the conclusion that the impairments are not other-
than-temporary.

k. When it is not practicable to estimate fair value, the investor should disclose the following
additional information, if applicable:

i. The aggregate carrying value of the investments not evaluated for impairment, and

ii. The circumstances that may have a significant adverse effect on the fair value.

l. For securities sold, redeemed, or otherwise disposed as a result of a callable feature
(including make whole call provisions), disclose the number of CUSIPs sold, disposed or
otherwise redeemed and the aggregate amount of investment income generated as a result
of a prepayment penalty and/or acceleration fee.

Residual Tranches or Interests/Loss Positions

28. A residual interest or a residual security tranche (collectively referred to as residuals) exists in
investment structures that issue one or more classes of debt securities created for the primary purpose of
raising debt capital backed by collateral assets. The primary source of debt repayment is derived through
rights to the cash flows of a discrete pool of collateral assets. These designs could be backed directly or
indirectly through a feeder fund. The collateral assets generate cash flows that provide interest and principal
payments to debt holders through a contractually prescribed distribution methodology (e.g., waterfall
dictating the order and application of all collateral cash flows). Once those contractual requirements are
met, the remaining cash flows generated by (or with the sale of) the collateral assets are provided to the
holder of the residual security/residual interest holder. When an asset within the discrete pool of assets does
not perform as expected, it impacts the extent to which cash flows will be generated and distributed. The
residual holders in the structure continue to receive payments from the collateral so long as there are cash
flows in excess of the debt obligations. The payments to the residual holder may vary significantly, both in
timing and amount, based on the underlying collateral performance.

29. The structural design of a residual interest or residual security tranche can vary, but the overall
concept is that they receive the remaining cash flows after all debt holders receive contractual interest and
principal payments. Determining whether an investment in a structure reflects a residual interest or tranche
shall be based on the substance of the investment held rather than its legal form. Common characteristics
of residual interests/residual security tranches include the items noted below, but the presence or absence
of any of these factors should not be definitive in determination. Classification as a residual should be based
on the substance of the investment and how cash flows to the holder are determined. Additionally, it would
be expected that the equity position in an ABS Issuer, as defined in SSAP 26R, would be classified as a
residual tranche.

a. Residuals often do not have contractual principal or interest.

b. Residuals may be structured with terms that appear to be stated principal or interest but
that lack substance, and result in receiving the residual cash flows of the underlying
collateral. The terms allow for significant variation in the timing and amount of cash flows
without triggering a default of the structure.
The Revisions Shown in this Document are Effective January 1, 2025

c. Residuals do not have credit ratings or NAIC assigned designations. Rather, they are first loss positions that provide subordination to support the credit quality of the typically rated debt tranches.

d. Residuals may provide payment throughout the investment duration (and not just at maturity), but the payments received continue to reflect the residual amount permitted after debt tranche holders receive contractual principal and interest payments.

e. Frequently, there are contractual triggers that divert cash flows from the residual holders to the debt tranches if the structure becomes stressed.

30. Residual tranches or interests do not qualify for bond reporting. Residuals shall follow the accounting and admittance guidance within this statement and are required to be reported on Schedule BA: Other Long-Term Invested Assets.

31. As stated in paragraph 22, residuals are permitted to be admitted assets if debt securities from the same structure qualify (or would qualify) as admitted assets. If the debt security from a structure is (or would be) nonadmitted due to the requirements under paragraph 22, then any residual interests or first loss positions held from the same structure also do not qualify as admitted assets and shall be reported as nonadmitted assets.

32. Residuals shall be initially reported at cost, or allocated cost (using proportional fair values if acquired along with debt tranches from the securitization). Subsequent to initial acquisition, residuals shall be reported at either 1) the lower of amortized cost or fair value under the Allowable Earned Yield method detailed in paragraphs 33-34, with temporary reductions in fair value reported as an unrealized loss, or 2) at the calculated practical expedient method detailed in paragraph 35.

33. For purposes of this statement for residuals only, amortized cost shall be defined as the cost to acquire the residual reduced for distributions in excess of the Allowable Earned Yield and other-than-temporary impairments (OTTI). The Allowable Earned Yield shall be established at acquisition as the discount rate that equates the initial best estimate of the residual’s cash flows to its acquisition cost. The Allowable Earned Yield is not to be updated after acquisition.

34. Interest income shall be recorded under the effective yield method using the Allowable Earned Yield, capped by the amount of cash distributions received. To the extent that the Allowable Earned Yield, applied to the current amortized cost, exceeds the cash distributions received, such unrecognized interest income may be carried forward to future periods to be recognized when sufficient cash distributions are received. To the extent cash distributions exceed the Allowable Earned Yield (including any unrecognized interest carried forward), the amortized cost shall be reduced by the excess. As a result of this method, the amortized cost shall not be increased unless there is a subsequent investment (i.e., an additional purchase with additional consideration remitted).

35. Reporting entities may elect a practical expedient in lieu of the Allowable Earned Yield detailed in paragraphs 33-34 and calculate Book/Adjusted Carrying Value (BACV) such that all distributions received are treated as a reduction in BACV. With this approach, the reporting entity will not recognize any interest or investment income until the residual tranche has a BACV of zero. Once the residual has a zero BACV, distributions received shall be recognized as interest income.

a. Reporting entities applying the practical expedient shall continue to report residuals on Schedule BA, including those with a zero BACV. Any subsequent distributions shall be reported as interest income until the structure matures/terminates, is unwound, or no longer meets the definition of a residual.
b. Reporting entities are required to apply the practical expedient to all residuals held.

c. Reporting entities that wish to discontinue use of the practical expedient approach and move towards the Allowable Earned Yield method are required to specify and disclose an explicit transition date, and only apply the Allowable Earned Yield method to residuals acquired after that date. Residuals held prior to the disclosed accounting method transition date shall continue to follow the practical expedient until those residuals mature/terminate or are unwound.

36. Residuals shall be assessed for other-than-temporary impairment (OTTI) on an ongoing basis, with required assessment anytime that fair value is less than the reported value.

a. For residuals measured using the Allowable Earned Yield method, as detailed in paragraphs 33-34, an OTTI shall be considered to have occurred if the present value of expected cash flows discounted by the Allowable Earned Yield, is less than amortized cost. Upon identification of an OTTI, the reporting entity shall recognize a realized loss equal to the difference between the amortized cost and the present value of expected cash flows, with the present value of expected cash flows becoming the new amortized cost to which the Allowable Earned Yield is applied. After the OTTI is recognized, distributions received from the residual shall continue to be recorded in accordance with paragraphs 33-34. Subsequent recoveries in cash flows shall not result in increases to the amortized cost.

b. For residuals measured under the practical expedient, as detailed in paragraph 35, an OTTI shall be considered to have occurred if the fair value of the residual is less than the BACV. The reporting entity shall recognize a realized loss equal to the difference between the fair value and the BACV, with the fair value becoming the new BACV. After the OTTI is recognized, distributions received from the residual shall continue to be recorded in accordance with paragraph 35. Subsequent recoveries in cash flows shall not result in increases to the BACV.

37. Residuals recognized on Schedule BA as of December 31, 2024, and accounted for under a different SSAP, shall follow the following measurement transition guidance as of January 1, 2025:

a. Reporting entity shall determine whether they will follow the Allowable Earned Yield method detailed in paragraphs 33-34, or the practical expedient detailed in paragraph 35, for all residuals.

b. Residuals previously accounted for under SSAP No. 26R or SSAP No. 43R shall prospectively apply the Allowable Earned Yield measurement method elected under this Statement using the amortized cost as of December 31, 2024 as the starting point in the calculation. Residuals that will follow the practical expedient shall be recognized on January 1, 2025 at the lower of amortized cost or fair value as of December 31, 2024, realizing any unrealized loss existing at that date.

c. Residuals reported under the equity method or fair value as of December 31, 2024 (as they were previously captured in scope of SSAP No. 30R, 32R or 48) with unrealized gains or losses recognized, shall recognize any unrealized position as realized, with the reported value as of December 31, 2024 becoming the January 1, 2025 cost basis for subsequent measurement under this statement.

Effective Date and Transition

40. This statement is effective for years beginning January 1, 2001. A change resulting from the adoption of this statement shall be accounted for as a change in accounting principle in accordance with SSAP No. 3—Accounting Changes and Corrections of Errors. The guidance for structured settlements
when the reporting entity acquires the legal right to receive payments is effective December 31, 2018. The clarification regarding audits of qualifying collateral pledged for collateral loans in the footnote 2 to paragraph 4 requires applicable audits to be obtained for the 2023 reporting period in the subsequent year. In periods after year-end 2023, the audits of equity collateral pledged for collateral loans are required to be obtained for the reporting year in which it was pledged and annually thereafter. The annual audit lag shall be consistent from period to period.

41. Revisions adopted March 16, 2024, to add guidance for “Debt Securities That Do Not Qualify as Bonds” and for “Residual Tranches or Interests/Loss Positions” are initially effective Jan. 1, 2025, to correspond with the effective date of the principles-based bond definition. The guidance for residual tranches is permitted for early application. Reporting entities that apply this guidance in 2024 shall continue to follow the transition guidance in paragraph 37 using the modified dates that correspond to the reporting entity’s application date.
