- b. For each statement of financial position presented, regardless of when the transfer occurred:
  - 1. Qualitative and quantitative information about the transferor's continuing involvement with transferred financial assets that provides financial statement users with sufficient information to assess the reasons for the continuing involvement and the risks related to the transferred financial assets to which the transferor continues to be exposed after the transfer and the extent that the transferor's risk profile has changed as a result of the transfer (including, but not limited to, credit risk, interest rate risk and other risks), including:
    - (a) The total principal amount outstanding, the amount that has been derecognized and the amount that continues to be recognized in the statement of financial position.
    - (b) The terms of any arrangements that could require the transferor to provide financial support (for example, liquidity arrangements and obligations to purchase assets) to the transferee or its beneficial interest holders, including a description of any events or circumstances that could expose the transferor to loss and the amount of the maximum exposure to loss.
    - (c) Whether the transferor has provided financial or other support during the periods presented that it was not previously contractually required to provide to the transferee or its beneficial interest holders, including when the transferor assisted the transferee or its beneficial interest holders in obtaining support, including:
      - The type and amount of support.
      - The primary reasons for providing the support.
    - (d) Information is encouraged about any liquidity arrangements, guarantees and/or other commitments provided by third parties related to the transferred financial assets that may affect the transferor's exposure to loss or risk of the related transferor's interest.
  - 2. The entity's accounting policies for subsequently measuring assets and liabilities that relate to the continuing involvement with the transferred financial assets.
  - 3. The key inputs and assumptions used in measuring the fair value of assets or liabilities that relate to the transferor's continuing involvement (including, at a minimum, but not limited to, and if applicable, quantitative information about discount rates; expected prepayments, including the expected weighted-average life of pre-payable financial assets; and anticipated credit losses, including expected static pool losses).
  - 4. For the transferor's interests in the transferred financial assets, a sensitivity analysis or stress test showing the hypothetical effect on the fair value of those interests (including any servicing assets or servicing liabilities) of two or more unfavorable variations from the expected levels for each key assumption that is reported per *SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, independently from any change in another key assumption, and a description of the objectives, methodology and limitations of the sensitivity analysis or stress test.
  - 5. Information about the asset quality of transferred financial assets and any other assets that it manages together with them. This information shall be separated between assets that have been derecognized and assets that continue to be recognized in the statement of financial position. This information is intended to provide financial statement users with an understanding of the risks inherent in the transferred financial assets, as well as in other assets and liabilities that it manages together with transferred financial assets. For example, information for receivables shall include, but is not limited to:
    - Delinquencies at the end of the period
    - Credit losses, net of recoveries, during the period.

(The disclosures shall be made for the current quarter in the quarterly statement and for the year in the annual statement.)
