Revised 7/18/2018

IDENTIFICATION OF ITEM(S) TO CHANGE

Add a new annual statement supplement to the Property and Casualty annual statement to capture “Direct Exposures Written” and “Direct Exposures Earned” which will be reported, initially only for Annual Statement Lines 2.5 (Private Flood), 4 (Homeowners), 19.1 (PPA No Fault), 19.2 (PPA Liability) and 21.1 (PPA Physical Damage).

Add one column to property casualty quarterly statement Part 1 Loss experience between current columns 1 and 2 for “Direct Exposures Earned” only for only for lines 2.5 (Private Flood) 4 (Homeowners), 19.1 (PPA No Fault), 19.2 (PPA Liability) and 21.1 (PPA Physical Damage).

Add one column to property casualty quarterly statement Part 2 Direct Premium Written between current columns 1 and 2 for “Direct Exposures Written” only for only for lines 2.5 (Private Flood) 4 (Homeowners), 19.1 (PPA No Fault), 19.2 (PPA Liability) and 21.1 (PPA Physical Damage).

Add instructions for reporting the additional data elements, consisting of definitions and examples for the new data elements.

REASON, JUSTIFICATION FOR AND/OR BENEFIT OF CHANGE**

The average written and average earned premium per exposure is an important metric for a variety of regulatory and public policy purposes. The NAIC annually produces reports of average personal auto and homeowners premiums, but the data in these reports are old and stale for timely assessment of absolute average premium and changes in average premium over time. Both reports are typically produced 24 months after the end of the experience period and 36 months after the beginning of the experience period. Homeowners average premiums for 2018 was published in January 2021 in the “Dwelling Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owners’ Insurance Report: Data for 2018.” Personal auto average premiums for 2018 was published in March 2021 in the “Auto Database Report.” While there are valid reasons for the length of time needed to produce these reports – primarily because these reports contain information beyond average premium – the average premium numbers lose significant relevance because of their age.

This AS and QS Blanks proposals would allow the calculation of average written and average earned premium for residential property and personal auto coverages in a far more timely fashion – within three to four months following the reporting year instead of 24 months and would provide timely and useful quarterly information. The benefits of timelier average premium data are considerable. Timely average premium data would permit financial analysts to utilize changes in average premium as part of financial analysis. Similarly, the more-timely average premium data would become a valuable tool for market regulation analysts, including, but not limited to, an added data point for use with the Market Conduct Annual Statement. Last, but not least, this proposal would allow the NAIC to calculate and publish average annual premium data for residential property and personal auto insurance by state in a time frame to both make the data meaningful for describing market conditions and to inform individual state regulators and policymakers of actual changes in personal lines average premiums – as opposed to expected changes gleaned from rate filings.

Consider how valuable timely average premium values would have been for personal lines as the pandemic unfolded. Consider also the value of quarterly data for average premium for personal lines versus only an annual average. The lack of timeliness of the average premium values means that these data have very limited or no use for either financial or market analysis. The lack of timeliness also means that the data are no use in informing public policy debates about personal lines insurance costs. In addition, the severe time lag between actual experience and reporting fails to inform the public or policymakers of recent trends or outcomes and can, consequently, mislead the public and policymakers.

ASL 2.5 (Private Flood)

ASL 4 (Homeowners)

ASL 19.1 (Private Passenger Auto No-Fault – Personal Injury Protection)

ASL 19.2 (Other Private Passenger Auto Liability)

ASL 21.1 (Private Passenger Auto Physical Damage).

Column 1 – Direct Premiums Written

The amounts reported for each line should agree with the amounts reported for the corresponding Annual Statement Line in Column 1, Line 35 of the Exhibit of Premiums and Losses for that state.

Column 2 – Direct Written Exposures

A Written Exposure for Annual Statement Lines 2.5 and 4 is defined as a single residential property for which coverage was written at any time during the calendar reporting period and remained in force through the end of the calendar reporting year. If the coverage was written and cancelled within the calendar reporting year, the written exposure is the fraction of the year the coverage was in force.

Examples. Assume a homeowners policy is written on July 1 during the reporting year and remains in force through the end of the reporting year. This activity would be reported as one (1.0) written exposure.

Assume a private passenger policy with No-Fault, Liability and Physical Damage coverages was written on April 1 and cancelled by the insured on July 1. This activity would be reported as 0.25 written exposure.

Column 3 – Direct Premiums Earned

The amounts reported for each line should agree with the amounts reported for the corresponding Annual Statement Line in Column 2, Line 35 of the Exhibit of Premiums and Losses for each state.

Column 4 – Direct Earned Exposures

An Earned Exposure for Annual Statement Lines 2.5 and 4 is defined as the fraction of the calendar reporting year for which a single residential property had coverage in force.

An Earned Exposure for Annual Statement Lines 19.1, 19.2 and 21.2 is defined as the fraction of the calendar reporting year for which a single motor vehicle had coverage in force.

Examples. Assume a homeowners policy is written on July 1 during the reporting year and remains in force through the end of the reporting year. This activity would be reported as 0.5 earned exposure.

Assume a private passenger policy with No-Fault, Liability and Physical Damage coverages was written on April 1 and cancelled by the insured on July 1. This activity would be reported as 0.25 earned exposure.
