The investment income yield was incorporated into the Comprehensive (Hospital \& Medical) individual \& group, Medicare Supplement and Dental \& Vision lines of business. The purpose was to incorporate an offset to reduce the underwriting risk factor for investment income earned by the insurer. The Working Group incorporated a $0.5 \%$ income yield that was based on the yield of a 6 -month US Treasury Bond. Each year, the Working Group will identify the yield of the 6-month Treasury bond (U.S. Department of the Treasury) on each Monday through the month of January and determine if further modifications to the $5.50 \%$ adjustment is needed. Any adjustments will be rounded up to the nearest $0.5 \%$.
