This NAIC Insurance Data Security Model Law was developed in response to high-profile data breaches of insurers and other institutions. The model requires insurers and other entities licensed by the department of insurance to develop, implement and maintain an information security program, investigate any cybersecurity events and notify the state insurance commissioner of such events. The federal government has urged states to adopt the model law.
Implementation of Model Act #668
Insurance Data Security Model Law
[status as of December 16, 2020]

This map represents state action or pending state action addressing the topic of the model. This map does not reflect a determination as to whether the pending or enacted legislation contains all elements of the model or whether a state meets any applicable accreditation standards.
