FirstTrack
Product Background

Jeff Grimmer
First Insurance Co of Hawaii
Vice President & Treasurer

James Doona
Munich Reinsurance America, Inc.
Managing Director - Capital Partners
First Insurance Goals

- FICOH founded in 1911, largest commercial insurer in Hawaii
- Tokio Marine founded in 1879, largest/leading insurer in Japan
- Munich Re founded in 1880, largest reinsurer in the world

FICOH goals for this product:
- Community resiliency – FICOH is very tied in with the local community; resiliency and recovery are strongly in our interest
- “Creating the future” of insurance thru innovation and new technology in products, delivery/distribution, payments, etc.
  – Increase policyholder benefits with controlled expenses
- Distribute local Hawaii risk efficiently to global markets
The Goal for Parametric Insurance

- To supplement traditional insurance:
  - to infuse liquidity quickly into the community, by covering immediate post-disaster expenses
- To address the protection gap and enhance community resilience
  - uninsured and underinsured
- Parametric solutions have been developed for earthquake, wind, fire, and flood risks
Uninsured Losses

- Less than half (41%) of catastrophic economic losses from Harvey, Irma, and Maria were insured*
- Hurricane cat deductibles are large; a 2% deductible on a typical $350K insured limit home is $7,000 per homeowner, or approximately half the cost of a roof replacement
- Coverage Gaps or Existing Limitations
  - Debris Removal, Water Damage, Mold, Preparedness and other expenses

[*2017 events, per Swiss Re “Sigma 1/2018”]
FirstTrack is a low-cost insurance option designed to assist with hurricane preparation and immediate post-hurricane expenses.

FirstTrack is a policy for homeowners and renters alike, covering the sudden expenses we all face...

Lost Wages  Debris Removal  Emergency Supplies  Minor Repairs  Groceries

FirstTrack fills the insurance gap by offering coverage for expenses that fall below most standard hurricane policy deductibles.
FirstTrack

How does it work?

1. **PROXIMITY**: Payouts are determined by where your property falls within the storm track radius claim zone

2. **CATEGORY**: Payouts are also determined by the wind speed level as defined by the National Hurricane Center

If a hurricane enters a designated claim zone radius, you’ll receive a notification with details on next steps regarding your policy.
Limit of liability defined in each policy is tied to proximity and wind speed

Each policyholder is eligible for a recovery of storm-related damage and other related expenses.
Hurricane Douglas (2020)

1. Hurricane Douglas approaches from SE as cat2
2. Downgraded to cat1 but proximity triggers policyholder storm warning
3. As Douglas departs Hawaii as a weakened tropical storm, FICOH notifies policyholders of potential eligibility for recovery

Schematic: FirstTrack imposed on an NHC map of Hurricane Douglas (July, 2020)
Claim Submission

- Proactive communication
  - Warning of impending storm activity
  - Near real-time updates
  - Information about claims process for affected policyholders
- Attestation for quick payment
- Proof of loss process follows
