Accessing and Utilizing Health Insurance for Underserved Populations

Presented to

Maryland Insurance Administration and Health Workstream of NAIC’s Special Committee on Race and Insurance

October 14, 2022
Meet the Speaker

JOHN GORMAN

Chairman and Founder, Nightingale Partners

Founder and Chairman of Gorman Health Group and former Clinton appointed Asst. Director of the Health Care Financing Administration (now CMS). Board member at Health Alliance Plan in Detroit, MI and advisor for Premier Health, Nations Benefits, and Icario. Serial health care entrepreneur with 12+ successful ventures and exits. Active investor and innovator. Nationally recognized thought leader on federally funded health programs and social determinants of health investing.

Introduction and Overview

- Precision engagement is key to improving enrollment and benefit utilization.
- Commercial insurance in steady decline; Medicare Advantage, Medicaid and Exchange remain the sole sources of revenue growth.
- Medicare Advantage and Medicaid are the biggest laboratories for social determinants of health (SDOH) supplemental benefits and innovation in member outreach and engagement.
- The lower the population income, the more engagement requires texting and people.
- Expiration of Public Health Emergency and Medicaid redetermination is biggest threat to insurance coverage.
TAKEAWAY: Precision Engagement is Key to Expanding Coverage and Benefit Utilization

- Website Portals
- "Snail Mail"
- Texting
- Community/ Mobile Events
- In-Person/At Home CHW

Income:

High
Median
Low
Commercial Insurance Declining; Gov. Programs Surging

Distribution of health insurance premiums
Share insurers collect, 2007-17

- Commercial: 57.7% → 38.0%
- Medicare Advantage: 16.6% → 27.1%
- Managed Medicaid: 10.2% → 24.5%

Biggest Threat to Coverage: Medicaid Redetermination

Between **5.3 million and 14.2 million people** could lose Medicaid coverage following the end of the continuous enrollment requirement, according to a KFF survey from May 2022.

States expect an average of **13% of Medicaid enrollees to be disenrolled** following the end of the continuous enrollment requirement (with estimates ranging from 8% to over 30%), a KFF survey from January 2022 found.

A MACPAC report from 2021 found that **8% of Medicaid and CHIP beneficiaries disenrolled and reenrolled** within a year (churn).

The unwinding of the Public Health Emergency is an opportunity for states to minimize enrollment loss and churn with better data and coordination with Health Insurance Exchanges.
# State Approaches to Unwinding the PHE

**CMS guidance:** States must adopt a “risk-based approach” when prioritizing pending eligibility and enrollment actions

<table>
<thead>
<tr>
<th>Approach</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time or Age-Based</td>
<td>Prioritize based on the length of time the case has been pending</td>
</tr>
<tr>
<td>Population-Based</td>
<td>Prioritize based on characteristics of cohorts likely to remain eligible, become eligible for greater Medicaid benefits, or become ineligible</td>
</tr>
<tr>
<td>Hybrid</td>
<td>Combination of the population and time-based approaches</td>
</tr>
<tr>
<td>State-Developed Approach</td>
<td>Requirements: Maintain coverage of eligible individuals, minimize ineligible individuals remaining enrolled, achieve a sustainable renewal schedule, and meet the 12-month unwinding timeline</td>
</tr>
</tbody>
</table>

Most states pursuing a **hybrid approach** by planning for a time/age-based approach while layering on a population-based approach flagging specific populations for early or late renewal.
Actions to Take to Minimize Enrollment Loss and Churn

CMS views Medicaid continuous enrollment unwinding as two phases:

**Phase 1**
- Prepare for the renewal process and educate Medicaid & CHIP enrollees about the upcoming changes

**Phase 2**
- Ensure Medicaid beneficiaries take the necessary steps to renew coverage, and transition to other coverage if they lose eligibility

In **Phase 1**, what does *prepare* mean for actions to take now?
- Ensure beneficiary contact information is up-to-date
- Drive awareness and educate beneficiaries on the redetermination process

Work with providers, care navigators, engagement experts, and utilize outreach channels to help spread the word.
General Approach to Risk Stratification and Mitigation

1. Identify groups at risk for gaps in care with coverage loss
2. Use data to understand those who may be going through a course of treatment (ex: cancer care) or are receiving services and support that require continuation
3. Understand which states have extended coverage for pregnant and postpartum
4. Stratify population to understand communication needs and requirements (language, race, ethnicity, culture), especially with high-risk populations
5. Allow appropriate periods of time for people to respond depending on health literacy needs

Enrollees with LEP and/or disabilities at greatest risk of coverage loss and benefit underutilization
Verifying Member Contact Information

- States may update the beneficiary record if they verify the accuracy of the new contact information.

- Encouraged to contact the beneficiary via other modalities such as email, text message, and telephone.

- Managed care plans can only provide updated contact information received directly from or verified by the beneficiary, and not from a third party or other source.

It is the states, not managed care plans, that need to verify the accuracy of the contact information.
Identify, Activate, Optimize Member Engagement

1. IDENTIFY: Shore Up Your Contact Database

- Identify Stakeholders
- Assess Communication Barriers To Access
- Update Contact Information
Identify, Activate, Optimize Member Engagement

2. ACTIVATE: Build Trust Through Education

- Develop Staged Messages
- Establish a Cadence of Regular Outreach
- Introduce Topic, Then Dive Deeper Later To Build Trust
- Rules For Successful Outreach: Multiple Attempts, Multiple Modalities
Identify, Activate, Optimize Member Engagement

3. OPTIMIZE:
Track Results & Preferences

- Track Opens/Clicks To See What Channels Work Best
- Monitor Which Messages Resonate To Hone Experience/Minimize Abrasion
How One Health Plan is Taking Action

Overview
A health plan wants to connect with members ahead of the 60 days' notice from CMS

Challenges
Some members have undeliverable addresses
Some members speak English as their second language
Some members are new to Medicaid since COVID

Approach
Tailored multi-channel outreach

- Work with external partners to develop multi-channel outreach strategy that builds trust without abrasion
- Leverage multiple data sources to fill in contact info gaps
- Use tailored content that addresses the specific needs of individuals with different backgrounds and SDoH barriers

Progress
Entire population receiving first notice to update contact information

5 different communication channels used
5 languages/content sets
50%+ members receiving outreach
Mitigating Coverage Losses

States should coordinate with the federally facilitated marketplace (FFM) or engage their state-based marketplace (SBM) to facilitate coverage transitions:

- Coordinating with local entities including exchanges to help smooth coverage transitions and minimize coverage loss
- Reinforcing important messages, such as availability of affordable and comprehensive coverage alternatives to Medicaid

Plans should:

- Understand who newly qualifies for or is on Medicare and connect to an available D-SNP plan for better benefit coordination
- Continue education on available plans and alternatives to Medicaid for those that no longer qualify
Medicaid to Exchange Workflow

**Notice**
Consumer receives notice of Medicaid termination and 60-day window to apply for marketplace plan.

**Tax Credit**
Consumer applies for premium tax credits via the marketplace.

**Review**
Marketplace reviews application, checks account transfer to confirm Medicaid ineligibility.

**Enrolls**
Consumer pays premium binder payment (if needed) and enrolls.

**Selection**
Consumer must compare and select a marketplace plan.

**Determination**
Consumer receives determination of eligibility for premium tax credits.

Medicare Advantage’s Stunning Growth

Dual Eligibles: The Insurance Industry’s Biggest Opportunity

**Dual Eligible**

- People enrolled in Medicare and Medicaid.
- 12.2 million people
- Medicare pays covered dually eligible beneficiaries' medical services first, because Medicaid is generally the payer of last resort. Medicaid may cover medical costs Medicare may not cover or only partially covers.
Special Needs Plan

1) People who live in certain institutions (like nursing homes) or who live in the community but require nursing care at home

2) People who are eligible for both Medicare and Medicaid (duals)

3) People who have specific chronic or disabling conditions (like diabetes, End-Stage Renal Disease (ESRD), HIV/AIDS, chronic heart failure, or dementia).

SDOH Benefit Landscape

Health Related Supplemental Benefits

- 2016: Medicare Advantage plans can offer additional primarily health-related medical services, i.e., dental, vision, and hearing.

Supplemental Non-Medical Benefit Expansion

- 2019: Broader MA and Part D benefits are considered primarily health related, i.e., transport, meals, adult day care.

Flexibility in Uniformity Requirements

- 2020: MA plans can offer disease-tailored benefit designs, including lower cost sharing for certain services or supplemental benefits not available to all enrollees.

Special Supplemental Benefits for the Chronically Ill (SSBCI)

- 2020: Plans can offer disease-tailored benefits design, including lower cost sharing for certain services or supplemental benefits not available to all members.
Supplemental Benefits Must Be

- Clear and easy to understand
- Equitable and targeted to those with greatest need
- Designed to be manageable and sustainable
- Evolve with experience and data supporting their effectiveness

Funding SDOH Programs and SSBCI

Benefit Financing

- **On-Benefit**
  - Paid by plan and included in bid.

- **Mid-Year Benefit Enhancement**
  - Paid by plan and/or external financing.

- **Off-Benefit**
  - Administrative benefit. Paid by plan and/or external financing.

- **SSBCI**
  - Paid by plan and/or external financing and included in bid.

External Financing Sources

- **Federal Government**
  - e.g. COVID relief bill

- **State Government**
  - State program funded.

- **Private**
  - Funded by local stakeholders, foundations, philanthropy, and/or private investors.

• 5-10% of the US population are transportation disadvantaged. Elderly: 20-30%. Duals: 40-50%.

• $37.5 billion in health care expenses are caused by patient no-shows in the US, with seniors and the low-income most likely to miss appointments and to use the emergency department as a source of primary care.

• $2200-6000 PMPY savings consistently found for NEMT

• $4.5-18 billion could be saved by widely-available NEMT benefits
## SDOH Market Summary

### Key SDOH Savings

- **Non-Emergency Transportation**: $570 pmpm
- **Healthy Meals Delivery**: $570 pmpm
- **Community Health Workers**: $210 pmpm
- **Affordable Housing**: $1,300 pmpm
- **Benefit Enrollment**: $338 pmpm
- **Companionship**: $134 pmpm
The Role of Private Capital in Member Engagement

- Direct Intervention
- SDOH Benefits
- Data Management
- Innovation
Conclusions

• Precision engagement is key to improving insurance enrollment and benefit utilization
• Lower-income populations require emphasis on texting, mobile events, and in-person intervention (navigators, community health workers/promotores)
• End of PHE presents greatest threat to Medicaid coverage
• Medicare Advantage is biggest laboratory on member engagement and poverty-related benefits
• Private capital has distinct role in financing innovations and interventions in member engagement and social welfare benefits

A final thought: SDOH benefits and interventions should be counted under the Medical Loss Ratio as quality improvement expenses. CMS has existing authority to do so and NAIC should support.
Thank you!
