The Aggregation Method Implementation (G) Working Group met March 23, 2026. During this meeting, the Working Group:

1. Adopted its 2025 Fall National Meeting minutes.
2. Discussed its activities. Specifically, the Working Group discussed a potential timeline of its review of U.S. group solvency regulation. This includes a 45-day exposure period and meetings to discuss comments received. The Working Group expects to consider adoption of the updated review, and its recommendations, in June and then refer it to the International Insurance Relations (G) Committee for approval. Once approved, recommendations will be referred to the Financial Condition (E) Committee for implementation.
3. Considered exposure of its draft review of U.S. group solvency regulation. The Working Group received an overview of the review and discussed recommendations for implementation of the insurance capital standard (ICS) in the U.S. via the Aggregation Method. The review addressed issues raised during the comparability assessment conducted by the International Association of Insurance Supervisors (IAIS).
