

2026 SPRING NATIONAL MEETING
SAN DIEGO, CA

Draft date: 3/3/26

*2026 Spring National Meeting
San Diego, California*

HEALTH RISK-BASED CAPITAL (E) WORKING GROUP

Monday, March 23, 2026

2:15 – 3:15 p.m.

Manchester Grand Hyatt—Grand Hall C—Level 1

ROLL CALL

Steve Drutz, Chair	Washington	Margaret Otto	Nebraska
Danielle Smith, Vice Chair	Missouri	Michel Laverdiere	New York
Wanchin Chou	Connecticut	Diana Sherman	Pennsylvania
Kyle Collins	Florida	Bing Wu/Sean Fulton	Texas
Tish Becker	Kansas		

NAIC Committee Support: Derek Noe/Maggie Chang

AGENDA

- | | |
|---|--------------|
| 1. Consider Adoption of its Feb. 13 Minutes— <i>Steve Drutz (WA)</i> | Attachment A |
| 2. Consider Referral of Proposal 2025-15-CA MOD to the Capital Adequacy (E) Task Force— <i>Steve Drutz (WA)</i> | Attachment B |
| 3. Consider Exposure of Proposal 2026-03-CA (Underwriting Risk Inv Income Update)— <i>Steve Drutz (WA)</i> | Attachment C |
| 4. Discuss Underwriting Factor Three-Year Phase-In Analysis — <i>Steve Drutz (WA)</i> | Attachment D |
| 5. Discuss Any Other Matters Brought Before the Working Group — <i>Steve Drutz (WA)</i> | Attachment E |
| 6. Adjournment | |

Draft: 3/3/26

Health Risk-Based Capital (E) Working Group
Virtual Meeting
February 13, 2026

The Health Risk-Based Capital (E) Working Group of the Capital Adequacy (E) Task Force met Feb. 13, 2026. The following Working Group members participated: Steve Drutz, Chair (WA); Danielle Smith, Vice Chair (MO); Wanchin Chou (CT); Kyle Collins (FL); Tish Becker (KS); Margaret Otto (NE); and Bing Wu (TX).

1. Adopted its Nov. 6, 2025, Minutes

The Working Group met Nov. 6, 2025. During the meeting, the Working Group took the following action: 1) adopted its Sept. 29, 2025, and June 20, 2025, minutes; 2) adopted its revised 2026 working agenda; 3) exposed proposal 2025-15-CA for a 75-day comment period ending Jan. 20, 2026; and 4) requested comments on a conceptual draft for managed care credit.

Chou made a motion, seconded by Smith, to adopt the Working Group's Nov. 6, 2025, minutes (see *NAIC Proceedings – Fall 2025, Capital Adequacy (E) Task Force, Attachment One*). The motion passed unanimously.

2. Received Comments on the Referral from the Risk-Based Capital Investment Risk and Evaluation (E) Working Group

The Working Group received a referral from the Risk-Based Capital Investment Risk and Evaluation (E) Working Group on the alignment of bond fund implementation in the health risk-based capital (RBC) formula. Drutz said that the referral asked the Working Group to consider aligning bond fund implementation with the bond ETF and private funds, noting that during the September meeting, in the health RBC formula, neither registered bond mutual fund nor private bond funds are currently assigned factors by designation. The Working Group exposed the referral for comments during its Sept. 29 meeting, which were due Dec. 3, 2025, and it received two comment letters.

Helen Ramirez (PineBridge Investments) said PineBridge Investments had been acquired by MetLife Investment Management since submitting the comment letter, and the comments are on behalf of both entities. Ramirez said that many insurers may find it challenging to source a diverse portfolio given the scale needed. PineBridge believes the solution could be diversified funds tailored to risk, and that the NAIC designation process is a robust framework for assessing them. Ramirez said that currently the funds carry a 20% risk charge for being Schedule BA assets, which is much higher than the charges on comparably designated bonds. This treatment is inconsistent with life RBC, as they currently treat private NAIC-designated bond funds the same as directly held bonds. Ramirez said that the discussion was timely, as the Risk-Based Capital Model Governance (EX) Task Force had recently requested comments on possible differences in risk treatment across the formulas, and PineBridge believes this is an example and strongly supports all lines of business treating bond funds like directly held bonds. Chou asked whether, in the future, PineBridge could comment on the risks associated with private bond funds and exchange-traded funds, and on how these funds performed during the 2008 crisis. Ramirez replied that PineBridge would be happy to collaborate with the NAIC on any future analysis and that the NAIC designations are focused on the credit risk of the underlying bonds that make up the fund.

David Ratliff (Premera Blue Cross) said that Premera Blue Cross was a smaller health insurer but still has \$3 billion in assets. There are significant differences in the risk-based charge for the NAIC-designated bond funds between the different RBC formulas, and health companies are experiencing utilization and other cost pressures that are

negatively impacting surplus. Premera Blue Cross believes the bond funds help with diversification and reduce risk, and asks for similar RBC treatment to that of life companies. Drutz asked whether Premera Blue Cross was aware of the impact of granting the bond funds bond-like treatment on the company's RBC, as a percentage-point difference. Ratliff did not know the amount but could calculate the change. He also added that the company used bond funds through separate accounts and in smaller portions of the investment portfolio to increase diversification.

Drutz said that during the Risk-Based Capital Investment Risk and Evaluation (E) Working Group meeting on Nov. 4, 2025, the Working Group decided to table the proposal to incorporate this treatment into the life formula. The discussion brought to the Working Group's attention the accounting difference between accounting treatment of individual bonds, which is amortized cost, and bond funds using fair market value, and the likelihood that the impact on the health RBC formula would be minimal, as investment risk tends to be much less than underwriting risk in the formula. He asked whether the Working Group would object to tabling the discussion until the issues could be addressed. Chou agreed that tabling the subject would be appropriate and echoed the request for Premera Blue Cross to demonstrate the impact of changing the bond fund reporting on their RBC. Drutz tabled the discussion and requested NAIC committee support to perform an impact analysis for the Working Group once the annual statement filings are available.

3. Received Comments on Proposal 2025-15-CA

The Working Group exposed Proposal 2025-15-CA on Nov. 6, 2025, with comments due Jan. 20, 2026. The proposal incorporated the structural changes and alternate risk charge changes presented in the American Academy of Actuaries' (Academy's) H2—Underwriting Risk Component and Managed Care Credit Calculation in the Health Risk-Based Capital Formula Report. The Working Group received three comment letters.

Ray Nelson (AHIP) said AHIP had a small number of comments regarding the proposal, specifically that the description of the alternate risk charge did not appear to match the implementation. AHIP also believed that the implementation of the alternate risk charge had unintended consequences that differed from those expected. He noted that the materials included a modified proposal that appears to incorporate the comments from the letter.

Carl Labus (Blue Cross Blue Shield Association—BCBSA) said that the comments presented in the letter were addressed in the modified proposal included in the meeting materials.

James Braue (UnitedHealth Group—UHG) said the main point of the comment letter was the alternate risk charge. UHG believes the implementation of the alternate risk charge in the proposal differed from that presented in the Academy's report and noted that the question was included in the letter to the Academy, which was included in the materials. The rest of the comments were technical corrections that appeared to be addressed in the modified proposal included in the materials.

Drutz asked NAIC committee support to discuss the changes included in Proposal 2025-15-CA modified. Derek Noe (NAIC) said many of the changes were line numbers to align the instructions and blanks. The description of the alternate risk charge was revised to the wording suggested by UHG in its comment letter, and commentors were requested to confirm that the description matches the alternate risk charge implementation. The modified proposal aligned the "Dental Only" and "Vision Only" naming throughout the proposal and clarified the term "Investment Income Adjustment Factor." The proposal also included updated formulas based on the comments received. All changes were highlighted in yellow. Drutz asked if there were any objections to exposing the modified proposal. Hearing none, the modified proposal was exposed with comments due March 11, 2026.

4. Received Comments on the Managed Care Credit Draft

The Working Group exposed a draft on Nov. 6, 2025, to collect information to use in updating the Managed Care Credit, with comments due Jan. 20. The draft was based on a request from the Academy in its H2—Underwriting Risk Component and Managed Care Credit Calculation in the Health Risk-Based Capital Formula Report. The Working Group received four comment letters.

Nelson said that AHIP had three main comments. The first comment is the need to clarify the instructions for the added exhibit. He said that the exhibit included tables for direct business, ceded reinsurance, and net business but excluded a table for assumed business. This would exclude assumed business from the data collection, but given that the exhibit was for data collection rather than RBC reporting, the exclusion of assumed business may be appropriate. He also asked that the Working Group add language to the proposed exhibit acknowledging that companies may estimate amounts in each category and include an indicator to identify which categories have exact data and which have estimated data.

Labus said most of the BCBSA comments were addressed in the letter to the Academy included in the materials. He also said that the companies would need time to appropriately categorize the transactions and asked for the Working Group to increase the clarity of the instructions to help companies file.

Connie Jasper Woodroof (CJW Associates) said she had similar comments on the reinsurance topics as the other commentators and that they are addressed in the Academy letter included in the meeting materials. She noted that the title of the exhibit should be changed to “Exhibit 7 Part 1A” to maintain consistency in blanks formatting, as well as the structures called “tables” in the draft should be titled “section” for similar reasons. She also asked for more clarification on the lines of business, as the included lines are similar but do not directly match those included in the Analysis of Operations by Line of Business. The comment also asked for clarity on lines 7, 7.1, and 7.2, and she wants clarification on whether line 7 was a single line for 7.1 and 7.2, or whether all three lines were independent. She also noted that some of the lines ask for paid amounts and some ask for incurred amounts, and would like clarification on what is actually being reported. She also said that the timeline to get the draft exhibit through the Blanks (E) Working Group so that it could be included in the 2026 annual statement was very tight, as the exhibit would need to be exposed during the Blanks (E) Working Group's meeting in May.

Braue said that UHG is concerned about providing data on a ceded basis, noting that the current managed care credit is based on direct business and that it does not believe this is an oversight. Producing data for reinsurance can be very difficult, depending on the type of reinsurance used, and companies must review claims in great detail to accurately categorize payment types. UHG was also unsure what the Academy could use the collected reinsurance data for regarding the managed care credit and recommended that the new exhibit collect only direct business. Braue also said that UHG would like clearer line-of-business definitions, for the Academy to clarify the risk-sharing arrangements, and to include an example of how to complete the new exhibit. There may also be a timing issue, as the contract terms may not align with the calendar year, and he would like clarification on how to report those arrangements. Braue also asked for clarification on whether the total for the proposed exhibit should equal the total in the current Exhibit 7, Part 1.

Chou agreed with the need for an example of how to fill out the proposed exhibit, emphasizing the importance of a proper cost-benefit analysis when requesting new information from the industry. Drutz said that the Working Group has reached out to the Academy for help with a redraft and asked interested parties to consider if they would be willing to help with the redraft if requested.

5. Discussed the Working Group's Letter to the Academy

Drutz said that the Working Group sent a letter to the Academy requesting that it address comments on the H2 report, proposal 2025-15-CA, and the managed care credit draft, as well as any potential problems with a three-year phase-in of the proposed factors. He said the letter was sent in a timely manner to give the Academy ample opportunity to respond to the request, but additional questions could be sent if interested parties had any. Braue asked if the Working Group could add a question for the Academy to ask if the confidence levels are too high, given the more granular reporting and the lack of a diversification credit. Drutz said that the Academy would most likely say the confidence-level decision was a Working Group decision, and the Academy would provide the analysis, but that the question would be sent to the Academy. Braue said that the Working Group's request for additional confidence levels, as discussions of the factors continue, seemed reasonable.

6. Discussed H2 Risk Factor Implementation

Drutz said that, with work currently underway on the structural changes, the Working Group should begin discussions on implementing the factors presented in the Academy's H2 report. Taking into account comments from the interested parties, a way forward might be a three-year phase-in approach starting in 2027. Drutz said he believed this was a similar approach that the Property and Casualty Risk-Based Capital (E) Working Group has used for significant changes in the past, and suggested starting the discussion by using 87.5% risk level and one year duration factors from the Academy's report and noted that this does not lock the Working Group into these parameters in the future, and the discussions would include the Academy's proposed premium tier changes. Drutz asked NAIC committee support to start on impact analysis for the approach and stated that the goal of the Working Group is to let interested parties know the thinking of the regulators, as the changes could be significant.

7. Discussed Other Matters

Drutz informed attendees that the Working Group will be meeting at the Spring National Meeting. He also said the Academy's long-term care working group has been formed, and it contacted the NAIC. The NAIC is currently gathering data for the Academy's stop-loss working group.

Having no further business, the Health Risk-Based Capital (E) Working Group adjourned.

Steve Drutz
Chair, Health Risk-Based Capital (E) Working Group
National Association of Insurance Commissioners (NAIC)

Re: Request for feedback on Proposal 2025-15-CA

Dear Chair Drutz:

On behalf of the Health Underwriting Risk Factors Analysis Work Group of the Health Solvency & Risk Management Committee of the American Academy of Actuaries,¹ I appreciate the opportunity to provide an initial response to the Health Risk-Based Capital (E) Working Group's exposed Proposal 2025-15-CA.

The Academy has reviewed the implementation in Proposal 2025-15-CA and believes the implementation is consistent with our recommendation. This implementation approach both simplifies and streamlines the calculation without losing the intent of the charge.

If you have any questions, please contact Michelle Anaba (anaba@actuary.org), the Academy's health policy project manager, and Katie Dzurec (dzurec@actuary.org), the Academy's director for state public policy outreach.

Sincerely,

Derek Skoog, MAAA, FSA
Chairperson, Health Underwriting Risk Factors Analysis Work Group
American Academy of Actuaries

Cc: Derek Noe, Health RBC Analyst, Financial Regulatory Services, NAIC

¹ The American Academy of Actuaries is a 20,000-member professional association whose mission is to serve the public and the U.S. actuarial profession. For 60 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

DESCRIPTION/REASON OR JUSTIFICATION OF CHANGE(S)

Changes to the structure of pages XR013, XR014, PR019, PR020, PR022, PR025, LR019, and LR020 based on the recommendations from the Academy's H-2 Underwriting Risk Report.

The Academy presented their *H2-Underwriting Risk Component and Managed Care Credit Calculation in the Health Risk-Based Capital Formula Report* to the Health Risk-Based Capital Working Group at their April 30, 2025 meeting. The report presented a revised structure to more closely align the underwriting risk pages with the lines of business as presented in the Analysis of Operations of the Health Annual Statement. The report also advised to change the implementation in the Life and Property and Casualty RBC to mirror the line of business changes in Health.

This proposal also implements a new alternative risk charge based on the recommendation from the Academy that the multiple of maximum individual risk be eliminated.

Additional Staff Comments:

LR029 Line (42) and PR022 Line (5) now include Title XVIII Medicare and Title XIX Medicaid as part of total health premium.

Income adjustment factor instructions and values will be updated during the annual Investment Income Adjustment review.

03/11/26 Revisions

Split line 12 into lines 12.1 and 12.2 for more accurate implementation of the standalone investment income factor and updated formulas for line 13.

02/10/26 Revisions

Changes are highlighted in yellow.

Changed numeric references in the health instructions and blanks to match the renumbered lines.

Updated line reference for PR019 to match renumbered lines.

Added description to the PR020 and LR020 line 12 instructions.

Changed verbiage in the instructions for the Alternate Risk Charge

Did not remove lines 1.1, 1.2, and 1.3 from PR020 and LR020 as those lines are used for calculations on other pages. LR019 individual and Group comprehensive were already separated.

**** This section must be completed on all forms.**

Revised 2-2023

UNDERWRITING RISK - L(1) THROUGH L(1921) XR013

Underwriting Risk is the largest portion of the risk-based capital charge for most reporting entities. The Underwriting Risk page generates the RBC requirement for the risk of fluctuations in underwriting experience. The credit that is allowed for managed care in this page comes from the Managed Care Credit Calculation page.

Underwriting risk is present when the next dollar of unexpected claim payments comes directly out of the reporting entity's capital and surplus. It represents the risk that the portion of premiums intended to cover medical expenses will be insufficient to pay such expense. For example, a reporting entity may charge an individual \$100 in premium in exchange for a guaranty that all medical costs will be paid by that reporting entity. If the individual incurs \$101 in claims costs, the reporting entity's surplus will decline because it did not charge a sufficient premium to pick up the additional risk for that individual.

There are other arrangements where the reporting entity is not at risk for excessive claims payments, such as when an HMO agrees to serve as a third-party administrator for a self-insured employer. The self-insured employer pays for actual claim costs, so the risk of excessive claims experience is borne by the self-insured employer, not the reporting entity. The underwriting risk section of the formula, therefore, requires some adjustments to remove non-underwriting risk business (both premiums and claims) before the RBC requirement is calculated. Appendix 1 contains commonly used terms for general types of health insurance. Refer to INT 05-05: Accounting for Revenue under Medicare Part D Cover for terms specifically used with respect to Medicare Part D coverage of prescription drugs.

Claims Experience Fluctuation

The RBC requirement for claims experience fluctuation is based on the greater of the following calculations:

A. Underwriting risk revenue, times the underwriting risk claims ratio, times a set of tiered factors. The tiered factors are determined by the underwriting risk revenue volume.

or

B. An **alternate** risk charge that addresses the risk of catastrophic claims on any single individual. ~~The alternative risk charge is equal to multiple of the maximum retained risk on any single individual in a claims year. The alternate risk charge maximum retained risk (level of potential claim exposure) is capped at \$750,000 per individual and \$1,500,000 per line total for medical coverage, \$25,000 per individual and \$50,000 each total for all other coverage except Medicare Part D coverage, and \$25,000 per individual and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e.g., writing more than one coverage type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive – Individual, Comprehensive – Group, Title XVIII – Medicare, Title XIX – Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health. For example, if an organization writes Comprehensive – Individual, Comprehensive – Group, Vision Only, and Dental Only, the alternate risk charge is \$1,000,000 (the cumulative charge for Comprehensive – Individual and Comprehensive – Group, which is higher than the \$100,000 cumulative charge for Vision Only and Dental Only).~~ ~~For each subsequent line of business is reduced by the amount of the highest cap. For example, if an organization is writing both comprehensive (hospital & medical) individual & group (with a cap of \$1,500,000) and dental (with a cap of \$50,000), then only the larger alternative risk charge is considered when calculating the RBC requirement (i.e., the alternative risk charges for each line of business are not cumulative).~~

For RBC reports to be filed by a health organization commencing operations in this reporting year, the health organization shall estimate the initial RBC levels using operating (revenue and expense) projections (considering managed care arrangements) for its first full year (12 months) of managed care operations. The projections, including the risk-based capital requirement, should be the same as those filed as part of a comprehensive business plan that is submitted as part of the application for

licensure. The Underwriting, Credit (capitation risk only), and Business Risk sections of the first RBC report submitted shall be completed using the health organization's actual operating data for the period from the commencement of operations until year-end, plus projections for the number of months necessary to provide 12 months of data. The affiliate, asset and portions of the credit risk section that are based on balance sheet information shall be reported using actual data. For subsequent years' reports, the RBC results for all of the formula components shall be calculated using actual data.

L(1) through L(1921)

There are ~~tensix~~ lines of business used in the formula for calculating the RBC requirement for this risk: (1) Comprehensive (Hospital & Medical) individual-~~& group~~; (2) Comprehensive (Hospital & Medical) group; (3) Title XVIII Medicare; (4) Title XIX Medicaid; (52) Medicare Supplement; (63) Dental/Vision Only; (7) Dental Only; (84) Stand-Alone Medicare Part D Coverage; (95) Other Health; and (106) Other Non-Health. Each of these lines of business has its own column in the Underwriting Risk – Experience Fluctuation Risk table. The categories listed in the columns of this page include all risk revenue and risk revenue that is received from another reporting entity in exchange for medical services provided to its members. These categories DO NOT include administrative services contracts (ASC), administrative services only (ASO) contracts, or any non-underwritten business. These programs are reported in the Business Risk section of the formula. The descriptions of the items are described as follows:

Column (1) – Comprehensive (Hospital & Medical) Individual-~~& Group~~. Includes policies providing for medical coverages including hospital, surgical, and major medical, ~~Medicare risk coverage (but NOT Medicare Supplement), and Medicaid risk coverage. This category DOES NOT include administrative services contracts (ASC), administrative services only (ASO) contracts, or any non-underwritten business. These programs are reported in the Business Risk section of the formula. Neither does~~ it does not include Federal Employees Health Benefit Plan (FEHBP) or TRICARE, which are handled in Line 224 of this section. ~~Medicaid Pass-Through Payments reported as premiums should also be excluded from this category and should be reported in Line 25.2 of this section. The alternative risk charge, which is twice the maximum retained risk after reinsurance on any single individual, cannot exceed \$1,500,000. Prescription drug benefits included in major medical insurance plans (including Medicare Advantage plans with prescription drug coverage) should be reported in this line. These benefits should also be included in the Managed Care Credit calculation.~~

Column (2) – Comprehensive (Hospital & Medical) Group Includes policies providing for medical coverages including hospital, surgical, and major medical. Prescription drug benefits included in major medical insurance plans should be reported in this line. These benefits should also be included in the Managed Care Credit calculation.

Column (3) – Title XVIII Medicare Business where the reporting entity, for a fee, agrees to cover the full medical costs of Medicare subscribers. This includes the beneficiary premium and federal government's direct subsidy for prescription drug coverage under MA-PD plans

Column (4) – Title XIX Medicaid Business where the reporting entity, for a fee, agrees to cover the full medical costs of Medicaid subscribers.

Column (52) – Medicare Supplement. This is business reported in the Medicare Supplement Insurance Experience Exhibit of the annual statement and includes Medicare Select. Medicare risk business is reported ~~under Comprehensive (Hospital & Medical) Individual & Group, under Title XVIII Medicare.~~

Column (63) – Dental-~~& Vision~~ Only. This is limited to policies providing for ~~dental-only or vision-only~~ coverage issued as a stand-alone policy or as a rider to a medical policy, which is not related to the medical policy through deductibles or out-of-pocket limits.

Column (7) – Dental Only This is limited to policies providing for dental-only coverage issued as a stand-alone policy or as a rider to a medical policy, which is not related to the medical policy through deductibles or out-of-pocket limits.

Column (84) – Stand-Alone Medicare Part D Coverage. This includes both individual coverage and group coverage of Medicare Part D coverage where the plan sponsor has risk corridor protection. See INT 05-05: Accounting for Revenue under Medicare Part D Coverage for definition of these terms. Medicare drug benefits included in major medical plans or benefits that do not meet the above criteria are not to be included in this line. Supplemental benefits within Medicare Part D (benefits in excess of the standard benefit design) are addressed separately on page XR015. Employer-based Part D coverage that is in an uninsured plan as defined in *SSAP No. 47—Uninsured Plans* is not to be included here.

Column (95) – Other Health Coverages. This includes other health coverages such as other stand-alone prescription drug benefit plans, that have not been specifically addressed in Columns (1) through (84) listed above and those lines of business addressed separately on page XR015, such as stop loss. Stop-loss premiums are addressed separately in Line (235) on page XR015.

Column (106) – Other Non-Health Coverages. This includes life and property and casualty coverages.

The following paragraphs explain the meaning of each line of the table for computing the experience fluctuation underwriting risk RBC.

Line (1) Premium. This is the amount of money charged by the reporting entity for the specified benefit plan. It is the earned amount of prepayments (usually on a per member per month basis) made by a covered group, or individual, CMS, or state agency to the reporting entity in exchange for services to be provided or offered by such organization. However, it does not include receipts under administrative services only (ASO) contracts; or administrative services contracts (ASC); or any non-underwritten business. Nor does it include federal employees health benefit programs (FEHBP) and TRICARE. Report premium net of payments for stop-loss or other reinsurance. The amounts reported in the individual columns should come directly from Analysis of Operations by Lines of Business, Page 7, Lines 1 and 2 of the annual statement. For Stand-Alone Medicare Part D Coverage the premium includes beneficiary premium (standard coverage portion), direct subsidy, low-income subsidy (premium portion), Part D payment demonstration amounts and risk corridor payment adjustments. See INT 05-05: Accounting for Revenue under Medicare Part D Coverage for definition of these terms. It does not include revenue received for reinsurance payments or low-income subsidy (cost-sharing portion), which are considered funds received for uninsured plans in accordance with Emerging Accounting Issues Working Group (EAIWG) INT. No. 05-05. Also exclude the beneficiary premium (supplemental benefit portion) for Stand-Alone Medicare Part D coverage.

NOTE: Where premiums are paid on a monthly basis, they are generally fully earned at the end of the month for which coverage is provided. In cases where the mode of payment is less frequent than monthly, a portion of the premium payment will be unearned at the end of any given reporting period.

~~Line (2) Title XVIII Medicare. This is the earned amount of money charged by the reporting entity (net of reinsurance) for Medicare risk business where the reporting entity, for a fee, agrees to cover the full medical costs of Medicare subscribers. This includes the beneficiary premium and federal government's direct subsidy for prescription drug coverage under MA PD plans. The total of this line will tie to the Analysis of Operations by Lines of Business, Page 7, Lines 1 and 2 of the annual statement.~~

~~Line (3) Title XIX Medicaid. This is the earned amount of money charged by the reporting entity for Medicaid risk business where the reporting entity, for a fee, agrees to cover the full medical costs of Medicaid subscribers. The total of this line will tie to the Analysis of Operations by Lines of Business, Page 7, Lines 1 and 2 of the annual statement. Stand Alone Medicare Part D coverage of low income enrollees is not included in this line.~~

Line (24) Other Health Risk Revenue. This is earned amounts charged by the reporting entity as a provider or intermediary for specified medical (e.g., full professional, dental, radiology, etc.) services provided to the policyholders, or members of another insurer or health entity. Unlike premiums, which are collected from an employer group or individual member, risk revenue is the prepaid (usually on a capitated basis) payments, made by another insurer or health entity to the reporting entity in exchange for services to be provided or offered by such organization. Payments to providers under risk revenue arrangements are included in the RBC calculation as underwriting risk revenue and are included in the calculation of managed care credits. Exclude fee-for-service revenue received by the reporting entity from another

reporting entity. This revenue is reported in the Business Risk section of the formula as non-underwritten and limited risk revenue. The amounts reported in the individual columns will come directly from Page 7, Line 4 of the annual statement.

Line (35) Medicaid Pass-Through Payments Reported as Premiums. Medicaid Pass-Through Payments that are included as premiums in the Analysis of Operations by Lines of Business, Page 7, Lines 1 and 2 should be reported in this line.

Line (46) Underwriting Risk Revenue. The sum of Lines (1) ~~through and~~ (24) minus Line (35).

Line (57) Net Incurred Claims. Claims incurred (paid claims + change in unpaid claims) during the reporting year (net of reinsurance) that are arranged for or provided by the reporting entity. Paid claims include capitation and all other payments to providers for services to members of the reporting entity, as well as reimbursement directly to members for covered services. Paid claims also include salaries paid to reporting entity employees that provide medical services to members and related expenses. Do not include ASC payments or Federal Employees Health Benefits Program (FEHBP) and TRICARE claims. These amounts are found on Page 7, Line 17 of the annual statement.

For Stand-Alone Medicare Part D Coverage, net incurred claims should reflect claims net of reinsurance coverage (as defined in INT 05-05: Accounting for Revenue under Medicare Part D Coverage). Where there has been prepayment under the reinsurance coverage, paid claims should be offset from the cumulative deposits. Unpaid claims liabilities should reflect expected recoveries from the reinsurance coverage, for claims unpaid by the PDP or for amounts covered under the reinsurance coverage that exceed the cumulative deposits. Where there has not been any prepayment under the reinsurance coverage, unpaid claim liabilities should reflect expected amounts still due from CMS. Exclude the beneficiary incurred claims (supplemental benefit portion) for Stand-Alone Medicare Part D coverage and report the incurred claims amount (supplemental benefit portion) on Line (245.1) of page XR015.

Line (68) Medicaid Pass-Through Payments Reported as Claims. Medicaid Pass-Through Payments that are included as claims in the Analysis of Operations by Lines of Business, Page 7, Line 17 should be reported in this line.

~~Line (9) Total Net Incurred Claims Less Medicaid Pass-Through Payments Reported as Claims. Line (7) minus Line (8).~~

Line (749) Fee-for-Service Offset. Report fee for service revenue that is directly related to medical expense payments. The fee for service line does not include revenue where there is no associated claim payment (e.g., fees from non-member patients where the provider receives no additional compensation from the reporting entity) and when such revenue was excluded from the pricing of medical benefits. The amounts reported in the individual columns should come directly from Page 7, Line 3 of the annual statement.

Line (844) Underwriting Risk Incurred Claims. Line (59) minus Lines (640) and (7).

Line (942) Underwriting Risk Claims Ratio. For Columns (1) through (95), Line (844)/Line (46). If either Line (46) or Line (844) is zero or negative, Line (942) is zero.

~~Line (10) Underwriting Risk Factor for Initial Amounts of Premium. Factor applied to the first \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to the first \$3,000,000 in premium for columns (5), (6), (7).~~

~~Line (11) Underwriting Risk Factor for Excess of Initial Amount. Factor applied to premium in excess of \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to premium in excess of \$3,000,000 in premium for columns (5), (6), (7).~~

Line (12) Investment Income Adjustment Factor. The investment income yield was incorporated into the Comprehensive (Hospital & Medical) individual & group, Medicare Supplement and Dental & Vision lines of business. The purpose was to incorporate an offset to reduce the underwriting risk factor for investment income earned

by the insurer. The Working Group incorporated a 4.5% income yield that was based on the yield of a 6-month U.S. Treasury bond. Each year, the Working Group will identify the yield of the 6-month U.S. Treasury bond (U.S. Department of the Treasury) on each Monday through the month of January and determine if further modification to the 4.5% adjustment is needed. Any adjustments will be rounded up to the nearest 0.5%.

Line (13) Composite Underwriting Risk Factor. A weighted average factor based on the amount reported in Line (46), Underwriting Risk Revenue. Includes the Investment Income Adjustment Factor The factors for Column (1) through (3) have incorporated an investment income yield of 4.5%.

	\$0 - \$3 Million	\$3 - \$25 Million	Over \$25 Million
Comprehensive (Hospital & Medical) Individual & Group	0.1440	0.1440	0.0844
Medicare Supplement	0.0987	0.0609	0.0609
Dental & Vision	0.1153	0.0716	0.0716
Stand-Alone Medicare Part D Coverage	0.251	0.251	0.151
Other Health	0.130	0.130	0.130
Other Non-Health	0.130	0.130	0.130

The investment income yield was incorporated into the Comprehensive (Hospital & Medical) individual & group, Medicare Supplement and Dental & Vision lines of business. The purpose was to incorporate an offset to reduce the underwriting risk factor for investment income earned by the insurer. The Working Group incorporated a 0.5% income yield that was based on the yield of a 6-month U.S. Treasury bond. Each year, the Working Group will identify the yield of the 6-month U.S. Treasury bond (U.S. Department of the Treasury) on each Monday through the month of January and determine if further modification to the 4.5% adjustment is needed. Any adjustments will be rounded up to the nearest 0.5%.

Line (14) Base Underwriting Risk RBC. Line (46) x Line (912) x Line (13).

Line (15) Managed Care Discount. For Comprehensive (Hospital & Medical) individual & group, Title XVIII Medicare, Title XIX Medicaid, Medicare Supplement (including Medicare Select), and Dental/Vision, a managed care discount, based on the type of managed care arrangements an organization has with its providers, is included to reflect the reduction in the uncertainty about future claim payments attributable to the managed care arrangements. The discount factor is from Column (3), Line (17) of the Managed Care Credit Calculation page. An average factor based on the combined results of these ~~three categories~~ is used for all three.

For Stand-Alone Medicare Part D Coverage, a separate managed care discount (or federal program credit) is included to reflect only the reduction in uncertainty about future claims payments attributable to federal risk arrangements. The discount factor is from Column (4), Line (17) of the Managed Care Credit Calculation page.

There is no discount given for the Other Health and Other Non-Health lines of business.

Line (16) RBC After Managed Care Discount. Line (14) x Line (15).

Line (17) Maximum Per Individual Risk After Reinsurance. This is the maximum after reinsurance loss for any single individual. Where specific stop-loss reinsurance protection is in place, the maximum per individual risk after reinsurance is equal to the highest attachment point on such stop-loss reinsurance, subject to the following:

- Where coverage under the stop-loss protection (plus retention) with the highest attachment point is capped at less than \$750,000 per member, the maximum retained loss will be equal to such attachment point plus the difference between the coverage (plus retention) and \$750,000.

- Where the stop loss layer is subject to participation by the reporting entity, the maximum retained risk as calculated above will be increased by the reporting entity's participation in the stop loss layer (up to \$750,000 less retention).

If there is no specific stop loss or reinsurance in place, enter \$9,999,999.

Examples of the calculation are presented below:

EXAMPLE 1 (Reporting entity provides Comprehensive Care):

Highest Attachment Point (Retention)	\$100,000
Reinsurance Coverage	90% of \$500,000 in excess of \$100,000
Maximum reinsured coverage	\$600,000 (\$100,000 + \$500,000)
Maximum Ret. Risk =	\$100,000 deductible
	+ \$150,000 (\$750,000 - \$600,000)
	+ \$ 50,000 (10% of (\$600,000 - \$100,000) coverage layer)
	= \$300,000

EXAMPLE 2 (Reporting entity provides Comprehensive Care):

Highest Attachment Point (Retention)	\$75,000
Reinsurance Coverage	90% of \$1,000,000 in excess of \$75,000
Maximum reinsured coverage	\$1,075,000 (\$75,000 + \$1,000,000)
Maximum Ret. Risk =	\$ 75,000 deductible
	+ 0 (\$750,000 - \$1,075,000)
	+ \$ 67,500 (10% of (\$750,000 - \$75,000) coverage layer)
	= \$142,500

Line (178) Alternate Risk Charge. This is twice the amount in Line (17) for columns (1), (2), (3) and (5) and Column (4) is six times the amount in Line (17), subject to a maximum of \$1,500,000 for Column (1), \$50,000 for Columns (2), (3) and (5) and \$150,000 for Column (4). Column (6) is excluded from this calculation. \$500,000 for Columns (1), (2), (3), and (4); \$50,000 for Columns (5), (6), (7), and (9); and \$150,000 for Column (8).

Line (19) Alternate Risk Adjustment. This line shows the largest value in Line (18) for the column and all columns left of the column. Column (6) is excluded from this calculation.

Line (1820) Net Alternate Risk Charge. This is the amount in Line (18), less the amount in the previous column of Line (19), but not less than zero. Column (6) is excluded from this calculation. The alternate risk charge is \$500,000 per line for medical coverage, \$50,000 total for all other coverage except Medicare Part D coverage, and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e., writing more than one coverage type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive - Individual, Comprehensive - Group, Title XVIII - Medicare, Title XIX - Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health.

Line (2119) Net Underwriting Risk RBC. This is the maximum of Line (16) and Line (1820) for each of columns (1) through (95). This is the amount in Line (14) **for** Column (610). The amount in Column (117) is the sum of the values in Columns (1) through (106).

OTHER UNDERWRITING RISK – L(202) THROUGH L(445) XR015–XR017

In addition to the general risk of fluctuations in the claims experience, there is an additional risk generated when reporting entities guarantee rates for extended periods beyond one year. If rate guarantees are extended between 15 and 36 months from policy inception, a factor of 0.024 is applied against the direct premiums earned for those guaranteed policies. Where a rate guaranty extends beyond 36 months, the factor is increased to 0.064. This calculation only applies to those lines of accident and health business, which include a medical trend risk, (i.e., Comprehensive (Hospital & Medical) individual & group, Medicare Supplement, Dental/Vision, Stand-Alone Medicare Part D Coverage, Supplemental benefits within Medicare Part D Coverage, Stop-Loss, and Minimum Premium). Premiums entered should be earned premium for the current calendar year period and not for the entire period of the rate guarantees. Premium amounts should be shown net of reinsurance only when the reinsurance ceded premium is also subject to the same rate guarantee.

A separate risk factor has been established to recognize the reduced risk associated with safeguards built into the Federal Employees Health Benefit Program (FEHBP) created under Section 8909(f)(1) of Title 5 of the United States Code and TRICARE business. Claims incurred are multiplied by 2% to determine total underwriting RBC on this business.

The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group in 2016 to apply a tiered risk factor approach to the Stop-Loss Premium. The premiums for this coverage should not be included within Comprehensive (Hospital & Medical) individual & group or Other Health Coverages (Page XR013). It is not expected that the transfer of risk through the various managed care credits will reduce the risk of stop-loss coverage. Medical Stop-Loss exhibits a much higher variability than Comprehensive Medical. A factor of 35% will be applied to the first \$25,000,000 in premium and a factor of 25% will be applied to premium in excess of \$25,000,000. Stop-loss premiums should be reported on a net basis.

Line (245.1) Supplemental Benefits within Stand-Alone Medicare Part D Coverage. A separate risk factor has been established to recognize the different risk (as described in INT 05-05: Accounting for Revenue under Medicare Part D Coverage) for the incurred claims associated with the beneficiaries for these supplemental drug benefits.

Line (245.2) Medicaid Pass-Through Payments Reported as Premium. The treatment of Medicaid Pass-Through Payments varies from state to state, and in some instances is treated as premium. The Health Risk-Based Capital (E) Working Group, however, determined that the risk associated with these payments is more administrative in nature and similar to uninsured plans. As such, the Working Group determined that the charge should follow that of the uninsured plans (ASC and ASO) and apply a 2% factor charge to those Medicaid Pass-Through Payments reported as premiums. This amount should be equal to the amount reported on page XR013, Column (41), Line (35).

Lines (256) through (312) Disability Income. Disability Income Premiums are to be separately entered depending upon category (Individual and Group). For Individual Disability Income, a further split is between noncancellable (NC) or other (guaranteed renewable, etc.). For Group Disability Income, the further splits are between Credit Monthly Balance, Credit Single Premium (with additional reserves), Credit Single Premium (without additional reserves), Group Long-Term (benefit periods of two years or longer) and Group Short-Term (benefit periods less than two years). The RBC factors vary by the amount of premium reported such that a higher factor is applied to amounts below \$50,000,000 for similar types. In determining the premiums subject to the higher factors, Individual Disability Income NC and Other are combined. All types of Group and Credit Disability Income are combined in a different category from Individual.

STOP-LOSS ELECTRONIC-ONLY TABLES

The Health Risk-Based Capital (E) Working Group revised the stop-loss factors in 2017. The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group and suggested that the factors be revised based on data from 1998-2008. The Health Risk-Based Capital (E) Working Group agreed to continue analyzing the stop-loss factors as a result of the changes to life-time maximum amounts included in the Federal Affordable Care Act.

Electronic Table 1 – Stop-Loss Interrogatories

The interrogatories are designed to gather the information by product type and will be reviewed on a go-forward basis. The data will be used in the continued evaluation of the factors. The data collected will be collected on a one-year run-out basis. For example, the RBC filed at year-end 2019, will reflect the incurred data for calendar year 2018 run-out through December 31, 2019.

For those insurers where the stop-loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer's total gross premium written are exempt from completing Table 1.

The categories used in the interrogatories are separated as follows:

Product Type

Specific Stop Loss (including aggregating specific) = This coverage was included in the 1998 to 2008 factor development.

Aggregate Stop Loss = This coverage was included in the 1998 to 2008 factor development.

HMO Reinsurance = Specific reinsurance of an HMO's commercial, Medicare, Medicaid or Point of Service products. This coverage was not included in the 1998 to 2008 factor development.

Provider Excess = Specific excess written on Providers including IPAs, hospitals, clinics. This coverage was not included in the 1998 to 2008 factor development.

Medical Excess Reinsurance = Specific reinsurance of an insurance company's medical business (first dollar or self-insured). This coverage was not included in the 1998 to 2008 factor development.

Do not include quota share or excess reinsurance written on stop-loss business.

Calendar Year - Submit experience information for the calendar year preceding the year for which the RBC report is being filed, e.g., the RBC report filed for 2019 should provide experience information for calendar year 2018 with run-out through December 31, 2019. If the contract year does not follow a calendar year (e.g. 7/1-6/30), the impact on the interrogatories would be spread across two years in the same manner it would be reported in two annual statements (i.e., half of premium and the applicable portion of the liability/expense would hit the first year, the remainder would hit the second year). Report based on the calendar year even if the calendar year includes two separate contracts (For example: Contract 1 started on 7/1/2017 and ran through 6/30/2018. Contract 2 started on 7/1/2018 and ran through 6/30/2019. The 2018 calendar year experience information would be comprised of the experience information in Contract 1 from 1/1/2018 through 6/30/2018 AND Contract 2 from 7/1/2018 to 12/31/2018.). Contracts that do not follow a calendar year should NOT be excluded.

Total [Gross/Net] Premium - This is the [gross/net] premium revenue, [before/after] ceded reinsurance and including commissions. Report the data as reported for the prior calendar year including amounts paid for the prior year through the end of the current calendar year. Do not adjust for any anomalies in the experience.

Total Gross Claims + Expenses =

Total Gross Claims – These are the gross incurred claims, before ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining gross claim liability.

+

Expenses – These are the gross incurred expense during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Gross Combined Ratio – This is equal to (Total Gross Claims + Expenses)/Total Gross Premium.

Premiums Net of Reinsurance – This is the net premium revenue, net of reinsurance. Report data as reported in the annual statement and do not adjust for any anomalies in the experience.

Total Net Claims + Expenses =

Total Net Claims – These are the net incurred claims after ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining net claim liability.

+

Expenses – These are the net incurred expenses during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Net Combined Ratio – This is equal to (Total Net Claims + Expenses)/Premiums Net of Reinsurance.

Electronic Table 2a – Calendar Year Specific Stop-Loss Contracts by Group Size and Table 2b – Calendar Year Aggregate Stop-Loss Contracts by Group Size

For those insurers where the stop-loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer's total gross premium written are exempt from completing Table 2.

Table 2a should reflect the specific stop-loss data and Table 2b should reflect the aggregate stop-loss data.

Report the number of groups, average specific attachment point and average aggregate attachment as of December 31st of the calendar (reporting) year. If the contract does not follow a calendar year (e.g. 7/1-6/30), report the policies written during the year of the annual statement and in effect at the end of the calendar year.

The number of covered lives in a group (group size) should be based on the size of the group as of December 31 of the calendar year. The number of covered lives counted should include all enrolled members (that is, total number of lives insured, including dependents).

Number of Groups – list the number of groups for each stop-loss contract based on the number of covered lives in the group.

Average Specific Attachment Point (Table 2a) – The average should be weighted by the number of covered lives in the respective group size bracket, excluding the count of covered lives within the denominator where specific/aggregate coverage was not provided.

Example: Average Specific Attachment Point (\$) (Table 2a, 50-99 Covered Lives in Group) =
 (Sum of Specific Attachment Points X Reported Lives)/(Sum of Reported Lives)

Insured Group	Specific Att Point (\$)	Aggregate Att (%)	Number of Lives	Include/Exclude	Reason to Exclude
1	\$200,000	115%	90	Include	
2	\$100,000	120%	60	Include	
3	\$50,000	140%	40	Exclude	Not in Group Size Band
4	\$120,000	N/A	50	Include	

Calculation: $(200,000 \times 90 + 100,000 \times 60 + 120,000 \times 50) / (90 + 60 + 50) = \$150,000$

Average Aggregate Attachment Percentage (Table 2b) – Is based on expected claims. Subgroups that have separate stop-loss contracts should be aggregated in terms of determining the group size. The average should be weighted by expected claims in the respective group size bracket, excluding the expected claims within the denominator where aggregate coverage was not provided.

Example: Average Aggregate Attachment Percentage (%) (Table 2b, 50-99 Covered Lives in Group) =
 (Sum of Expected Claims x Attachment Percentage %)/(Sum of Expected Claims)

Insured Group	Specific Att Point (\$)	Aggregate Att (%)	Expected Claims	Number of Lives	Include/Exclude	Reason to Exclude
1	\$200,000	115%	\$ 500,000	90	Include	
2	\$100,000	120%	\$ 300,000	60	Include	
3	\$50,000	140%	\$ 200,000	40	Exclude	Not in Group Size Band
4	\$120,000	N/A	\$ 400,000	50	Exclude	Aggregate not purchased by group

Calculation: $(500,000 \times 115\% + 300,000 \times 120\%) / (500,000 + 300,000) = 116.7\%$

Footnote – The number of covered lives for stop-loss coverage is reported in the Accident and Health Policy Experience Exhibit for Year (April 1st filing) in Column 13, Section C. Other Business, Line 2.

If stop-loss policies are sold on a Per Employee Per Month basis and the actual number of covered lives is unknown, it would be reasonable to estimate the number of covered lives if the exact information is not administratively available to the reporting entity. This method of estimation may be similar to estimations provided for the Accident and Health Policy Experience Exhibit for Year. If estimated, an explanation of the method used to estimate the number of covered lives should be provided in the footnote.

Lines (323) through (401) Long Term Care. Long-Term Care Insurance (LTCI) Premiums are used to determine both a rate risk and the morbidity risk. The rate risk relates to all Noncancellable LTCI premiums. The morbidity risk is partially applied directly to premium with a higher factor (10%) applied to amounts up to \$50,000,000 and a lower factor (3%) applied to premiums in excess of \$50,000,000. In addition, the earned premiums and incurred claims for the last two years are used to determine an average loss ratio (incurred claims divided by earned premiums). This average loss ratio times the current year's premium is called Adjusted LTCI Claims for RBC. A higher factor (25%) is applied to claims up to \$35,000,000 and a lower factor (8%) is applied to claims above \$35,000,000. In certain situations where loss ratios cannot

be used because one of the values is zero or negative, the current year's incurred claims are used. In a situation where the current year's premium is not positive, higher factors are applied to current year's incurred claims to reflect the lack of a premium-based RBC. The RBC for LTCI is the sum of these three calculations.

Line (412) Limited Benefit Plans. There is a factor for certain types of Limited Benefit coverage (Hospital Indemnity, which includes a per diem for intensive care facility stays, and Specified Disease) which includes both a percent of earned premium on such insurance (3.5%) and a flat dollar amount (\$50,000) to reflect the higher variability of small amounts of business.

Line (423) Accidental Death and Dismemberment. There is a factor for Accidental Death and Dismemberment (AD&D) insurance (where a single lump sum is paid) which depends on several items:

1. Three times the maximum amount of retained risk for any single claim;
2. \$300,000 if 3 times the maximum amount of retained risk is larger than \$300,000;
3. 5.5% of earned premium to the extent the premium for AD&D is less than or equal to \$10,000,000; and
4. 1.5% of earned premium in excess of \$10,000,000.

There are places for reporting the total amount of earned premium and maximum retained risk on any single claim. The actual RBC amount will be calculated automatically as the lesser of 1 and 2. That result is then added to 3 and 4.

Line (434) Other Accident. There is a factor for Other Accident coverage that provides for any accident-based contingency other than those contained in Line 43. For example, this line should contain all the premium for policies that provide coverage for accident only disability or accident only hospital indemnity. The premium for policies that contain AD&D in addition to other accident only benefits should be shown on this line.

Line (445) Premium Stabilization Reserves. Premium stabilization reserves are funds held by the company in order to stabilize the premium a group policyholder must pay from year to year. Usually experience-rating refunds are accumulated in such a reserve so that they can be drawn upon in the event of poor future experience. This reduces the insurer's risk.

For health insurance, 50% of the premium stabilization reserves held in the annual statement as a liability (not as appropriated surplus) are permitted as an offset up to the amount of risk-based capital. The 50% factor was chosen to approximate the portion of premium stabilization reserves that would be an appropriate offset if the formula were applied on a contract-by-contract basis, and the reserve offset were limited to the amount of risk-based capital required for each contract.

Companies must list each group having 5% or more of the total premium stabilization reserve of the reporting entity. All other groups may be summarized on one line and labeled as various.

No credit is given here for premium stabilization reserves held for FEHBP and TRICARE coverage, because that coverage is already subject to a lesser percentage of premium in the underwriting risk calculation to reflect its reduced level of risk. Similarly, no credit is given here for any amounts held in connection with stand-alone Medicare Part D Coverage (i.e., amounts held as liabilities to the federal government under the risk-corridor mechanism), since Medicare Part D Coverage premium is already subject to a lesser factor in the underwriting risk calculation to reflect the reduced net level of risk. Amounts held as prepayments from the federal government for reinsurance coverage or low-income subsidy (cost-sharing portion) under Medicare Part D Coverage are not considered premium stabilization reserves as they relate to an uninsured plan.

As such, the company must exclude all amounts relating to FEHBP, TRICARE or stand-alone Medicare Part D Coverage in determining the amount of reserves to be reported.

HEALTH PREMIUMS and HEALTH CLAIMS RESERVES

LR019, LR023 and LR024

Basis of Factors

Risk-based capital factors for health insurance are applied to medical and disability income, long-term care insurance and other types of health insurance premiums and Exhibit 6 claim reserves with an offset for premium stabilization reserves. For health coverage that does not fit into one of the defined categories for risk-based capital, the “Other Health” category is to be used.

Medical Insurance Premium

The business is subdivided by product into categories for individual coverages and for group and credit coverages depending on the risk related to volatility of claims. The factors were developed from a model that determines the minimum amount of surplus needed to protect the company against a worst-case scenario for each type of coverage. The results of the model were then translated into either a uniform percentage or a two-tier formula to be applied to premium. The two-tier formula reflects the decreased risk of a larger in-force block. The formula includes several changes starting in 1998 for some types of health insurance. These changes add several worksheets and are designed to keep the RBC amounts for health coverage consistent regardless of the RBC formula used. If the company has comprehensive medical business (Individual & Group), Title XVIII Medicare, Title XIX Medicaid, Medicare Supplement, Vision, Dental business, or Stand-Alone Medicare Part D coverage through a PDP arrangement, it will be directed to these additional worksheets. The instructions for including paid health claims in the various categories of the Managed Care Discount Factor Calculation can be found in the instructions to LR022 Underwriting Risk – Managed Care Credit. Appendix 32 of these instructions lists commonly used health insurance terms. Appendix 43 of these instructions lists commonly used terms specific to Stand-Alone Medicare Part D coverage. If the company has any of the ~~four~~ mentioned types of medical insurance, it will also be required to complete additional parts of the formula for C-3 Health Credit Risk and C-4 Health Administrative Expenses Risk portion of the Business Risk.

Disability Income Premium

Prior to 2001, the individual disability income factors were based on models of the disability risk completed by several companies with significant experience in this line. The group long-term disability income risk was modeled based on methodology similar to that used by one of the largest writers of this business. The pricing risk was addressed principally as the delayed reaction to increases in incidence of new claims and to the lengthening of claims from slower recoveries than assumed.

Starting in 2001, new categories and new factors are applicable to all types of disability income premiums. These factors are based on new data and apply a model similar to that used for other health premium risk to that data.

Long-Term Care Insurance Premium

Prior to 2005, factors equal to the original disability income factors were used. Starting in 2005, factors based on LTC experience replaced those factors. The difference in the factors used in 2004 and prior years for noncancellable LTC versus other LTC has been retained as a rate risk factor applied to the NC premium. The morbidity risk is partially applied directly to premium with a higher factor applied to amounts up to \$50,000,000 and a lower factor applied to premiums in excess of \$50,000,000. In addition, the earned premiums and incurred claims for the last two years are used to determine an average loss ratio (incurred claims divided by earned premiums). This average loss ratio times the current year’s premium is called Adjusted LTC Claims for RBC. A higher factor is applied to claims up to \$35,000,000 and a lower factor is applied to claims above \$35,000,000.

Claim Reserves

Additional risk-based capital of 5% of claim reserves for both individual and group and credit is required to recognize the risk of the level of recoveries and other claim terminations falling below that assumed in the development of claim reserves. However, claims reserves for workers’ compensation carve-out are excluded from this charge and are separately assessed risk-based capital on page LR021 Underwriting Risk – Other, Line (5); reserves entered for this exclusion should be reported in net balance sheet reserves in Schedule P, Part 1 of the Workers Compensation Carve-Out Supplement.

Pre-Tax and Post-Tax Factors

The formula uses pre-tax factors for all types of health insurance. Because many insurers of some types of health insurance write very little other business, it was determined that there would be no difference between pre-tax and post-tax factors except where substantial investment income is assumed as part of the product pricing. Thus, for disability income, the pre-tax factors in the table below and in LR023 Long-Term Care will be adjusted to post-tax by applying a tax-effect change to RBC in LR030 Calculation of Tax Effect for Life and Fraternal Risk-Based Capital. For reasons of practicality and simplicity, credit disability is included with other disability income and adjusted to post-tax. The pre-tax RBC values for other types of health insurance will not be adjusted.

Specific Instructions for Application of the Formula

The total of all earned premium categories LR019 Health Premiums, Line ~~(3141)~~, (Column (1) should equal Health Supplement Analysis of Operations Part 1 Columns 2 through 13 Line 1 + 2) Column (1) should equal the total in Schedule H, Part 1, Line 2, Column 1 of the annual statement. Earned premium for each of these coverages should be from underlying company records. Earned premium may be reported in Health Supplement Analysis of Operations Schedule H for Administrative Services Contracts (ASC) and/or the Federal Employees Health Benefits Plan (FEHBP) and/or Workers Compensation Carve-Out, which are included in order that Line ~~(3141)~~ will equal the total in Schedule H Health Supplement Analysis of Operations. As such, there is no RBC factor applied to any premium reported on Lines ~~(1826), (2836), (38)~~ or ~~(2939)~~. For some of the coverages, two-tier formulas apply. The calculations for these coverages shown below will not appear on the RBC filing software but will automatically be calculated by the software.

Lines ~~13, 16, 17, 18, 19, 23-26, 29-33, 39, 42~~ and ~~343~~ are not applicable to Fraternal Benefit Societies.

Line (1)

Health premiums for usual and customary major medical and hospital (including comprehensive major medical and expense reimbursement hospital/medical coverage) written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (1), Line (1.1).

Line (2)

Health premiums for Title XVIII Medicare written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (3), Line (1.1).

Line (3)

Health premiums for Title XIX Medicaid written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (4), Line (1.1).

Line (42)

Health premiums for Medicare supplement written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column ~~(52)~~, Line (1.1).

Line (53)

Health premiums for ~~dental or~~ vision only coverage written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column ~~(63)~~, Line (1.1).

Line (56)

Health premiums for dental only coverage written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (7), Line (1.1).

Line (74)

Health premium for Stand-Alone Medicare Part D coverage written on individual contracts - includes beneficiary premium (standard coverage portion), direct subsidy, low-income subsidy (premium portion), Part D Payment Demonstration amounts and risk corridor payment adjustments. See Appendix 43 for definition of these terms. This does not include Medicare-Advantage prescription drug coverage (MA-PD) premiums which are to be included in Line (31). No RBC requirement is calculated in Column (2). The premium is carried forward to page LR020 Underwriting Risk – Experience Fluctuation Risk Column (84) Line (1.1).

Line (85)

Health incurred claims for Supplemental benefits within Stand-Alone Medicare Part D coverage written on individual contracts that is beneficiary payment (supplemental benefit portion) – e.g., coverage in the coverage gap, use of co-pays of less value than the minimum regulatory coinsurance and reduced deductible. This does not include the low-income subsidy (cost sharing portion), which is not a component of reported revenue. RBC is calculated for Supplemental benefits within Stand-Alone Medicare Part D Coverage on LR019.

Line (96) and (2216)

Medicaid pass-through payments reported as premium ~~and excluded from Line (1) should be reported in Line (6) or (16).~~

Line (107) and Line (2347)

There is a factor for certain types of limited benefit coverage (hospital indemnity, which includes a per diem for intensive care facility stays, and specified disease) which includes both a percent of earned premium on such insurance (3.5%) and a flat dollar amount (\$50,000) to reflect the higher variability of small amounts of business.

Line (118) and Line (2418)

The factor for accidental death and dismemberment (AD&D) insurance (where a single lump sum is paid) depends on several items:

1. Three times the maximum amount of retained risk for any single claim;
2. \$300,000 if three times the maximum amount of retained risk is larger than \$300,000;
3. 5.5% of earned premium to the extent the premium for AD&D is less than or equal to \$10,000,000; and
4. 1.5% of earned premium in excess of \$10,000,000.

There are places for reporting the total amount of earned premium and the maximum retained risk on any single claim. The actual RBC Requirement will be calculated automatically as the sum of (a) the lesser of items 1 and 2 plus (b) items 3 plus 4.

Line (129) and Line (2519)

The factor for Other Accident coverage provides for any accident-based contingency other than those contained in Lines (811) or (4824). For example, this line should contain all the premium for policies that provide coverage for accident-only disability or accident-only hospital indemnity. The premium for policies that contain AD&D in addition to other accident-only benefits should also be shown on this line.

Line (130)

Health premiums for usual and customary major medical and hospital (including comprehensive major medical and expense reimbursement hospital/medical coverage) written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (24), Line (1.2).

Line (14)

Health premiums for Title XVIII Medicare written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (3), Line (1.2).

Line (15)

Health premiums for Title XIX Medicaid written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (4), Line (1.2).

Line (16+)

Health premiums for ~~dental or~~ vision only coverage written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (63), Line (1.2).

Line (17)

Health premiums for dental only coverage written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (7), Line (1.2).

Line (182)

The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group in 2016 to apply a tiered risk factor approach to the Stop-Loss Premium. The premiums for this coverage should not be included within Comprehensive Medical or Other Health Coverages (Line (3240)). It is not expected that the transfer of risk through the

various managed care credits will reduce the risk of stop-loss coverage. Medical Stop Loss exhibits a much higher variability than Comprehensive Medical. A factor of 35% will be applied to the first \$25,000,000 in premium and a factor of 25% will be applied to the premium in excess of \$25,000,000. Stop loss premiums should be reported on a net basis.

Line (193)
Health premiums for Medicare supplement written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to LR020 Underwriting Risk – Experience Fluctuation Risk, Column (52), Line (1.2).

Line (204)
Health premium for Stand-Alone Medicare Part D coverage written on group contracts only if the plan sponsor has risk corridor protection for the contracts - includes beneficiary premium (standard coverage portion), direct subsidy, low-income subsidy (premium portion), Part D Payment Demonstration amounts and risk corridor protection payments. See Appendix 3-4 for definition of these terms. Stand-Alone Medicare Part D coverage written on group contracts without risk corridor protection is reported in Line (340) Other Health. This does not include Medicare-Advantage prescription drug coverage (MA-PD) premiums which are to be included in Line (1429). No RBC requirement is calculated in Column (2). The premium is carried forward to page LR020 Underwriting Risk – Experience Fluctuation Risk Column (84) Line (1.2).

Line (22145)
Health incurred claims for Supplemental benefits within Stand-Alone Medicare Part D coverage written on group contracts that is beneficiary payment (supplemental benefit portion) – e.g., coverage in the coverage gap, use of co-pays of less value than the minimum regulatory coinsurance and reduced deductible where the plan sponsor has risk corridor protection for the group contract’s standard benefit design coverage. This does not include the low-income subsidy (cost-sharing portion) which is not a component of reported revenue. RBC is calculated for Supplemental benefits within Part D Coverage on LR019.

Lines (21627) through (22733)
Disability income premiums are to be separately entered depending upon category (individual and group). For Individual, a further split is between noncancellable (NC) or other (GR, etc.) For group, the further splits are between Credit Monthly Balance, Credit Single Premium (with additional reserves), Credit Single Premium (without additional reserves), Group Long-Term (benefit periods of two years or longer) and Group Short-Term (benefit periods less than two years). The RBC factors vary by the amount of premium reported such that a higher factor is applied to amounts below \$50,000,000 for similar types. Starting in 2001, in determining the premiums subject to the higher factors, individual disability income noncancellable and other is combined. All types of group and credit are combined in a different category from individual.

The following table describes the calculation process used to assign RBC charges to disability income business. The reference to line numbers (e.g., Line 19) represent the actual line numbers used in the formula page, but the subdivisions of those lines [e.g., a), b) etc.] do not exist in the formula page. The total RBC Requirement shown in the last (Total) subdivision of each line will be included in Column (2) for that line in the formula page.

	<u>Disability Income Premium</u>	<u>Annual Statement Source</u>	(1) <u>Statement Value</u>	<u>Factor</u>	(2) <u>RBC Requirement</u>

Lines (3528) and (3629)

Premiums for noncancellable long-term care insurance are included on Line (3528) to reflect the additional risk when rate increases are not permitted. Line (3629) includes premiums for Other LTC coverage but with no RBC value on this page (the RBC is determined on LR023 Long-Term Care) so that the validation check to [Schedule H Health Supplement Analysis of Operations](#) can still be performed.

Line (394)

Premiums for Workers’ Compensation Carve-Out are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The RBC Requirement assessed on these premiums can be found on page LR021 Underwriting Risk – Other, Line (4).

Line (4032)

It is anticipated that most health premium will have been included in one of the other lines. In the event that some coverage does not fit into any of these categories, the “Other Health” category continues the RBC factor from the 1998 and prior formula for Other Limited Benefits Anticipating Rate Increases. Stop loss premiums are addressed separately in Line (182).

Stop Loss Electronic Only Tables

The Health Risk-Based Capital (E) Working Group revised the stop loss factors in 2017. The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group and suggested that the factors be revised based on data from 1998-2008. The Health Risk-Based Capital (E) Working Group agreed to continue analyzing the stop loss factors as a result of the changes to life time maximum amounts included in the Federal Affordable Care Act.

Electronic Table 1 – Stop Loss Interrogatories

The interrogatories are designed to gather the information by product type and will be reviewed on a go forward basis. The data will be used in the continued evaluation of the factors. The data collected will be collected on a one-year run-out basis. For example, the RBC filed at year-end 2018, will reflect the incurred data for calendar year 2017 run-out through December 31st, 2018.

For those insurers where the stop loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer's total gross premium written are exempt from completing Table 1.

The categories used in the interrogatories are separated as follows:

Product Type

Specific Stop Loss = (including aggregating specific). This coverage was included in the 1998 to 2008 factor development.

Aggregate Stop Loss = This coverage was included in the 1998 to 2008 factor development.

HMO Reinsurance = specific reinsurance of an HMO's commercial, Medicare, Medicaid or Point of Service products. This coverage was not included in the 1998 to 2008 factor development.

Provider Excess = specific excess written on Providers including IPAs, hospitals, clinics. This coverage was not included in the 1998 to 2008 factor development.

Medical Excess Reinsurance = specific reinsurance of an insurance company's medical business (first dollar or self-insured). This coverage was not included in the 1998 to 2008 factor development.

Please do not include quota share or excess reinsurance written on Stop Loss business.

Calendar Year - Submit experience information for the calendar year preceding the year for which the RBC report is being filed; e.g., the RBC report filed for 2018 should provide experience information for calendar year 2017 with run-out through December 31st, 2018. If the contract year does not follow a calendar year (i.e. 7/1- 6/30), the impact on the interrogatories would be spread across two years in the same manner it would be reported in two annual statements (i.e., half of premium and the applicable portion of the liability/expense would hit the first year, the remainder would hit the second year). Report based on the calendar year even if the calendar year includes two separate contracts (For example: Contract 1 started on 7/1/2017 and ran through 6/30/2018. Contract 2 started on 7/1/2018 and ran through 6/30/2019. The 2018 calendar year experience information would be comprised of the experience information in Contract 1 from 1/1/2018 through 6/30/2018 AND Treaty 2 from 7/1/2018 to 12/31/2018.). Contracts that do not follow a calendar year should NOT be excluded.

Total [Gross/Net] Premium - This is the [gross/net] premium revenue, [before/after] ceded reinsurance and including commissions. Report the data as reported for the prior calendar year including amounts paid for the prior year through the end of the current calendar year. Do not adjust for any anomalies in the experience.

Total Gross Claims + Expenses =

Total Gross Claims - These are the gross incurred claims, before ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining gross claim liability.

+

Expenses - These are the gross incurred expense during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Gross Combined Ratio - This is equal to (Total Gross Claims + Expenses) / Total Gross Premium.

Premiums Net of Reinsurance - This is the net premium revenue, net of reinsurance. Report data as reported in the annual statement and do not adjust for any anomalies in the experience.

Total Net Claims + Expenses =

Total Net Claims - These are the net incurred claims after ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining net claim liability.

+ Expenses – These are the net incurred expenses during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Net Combined Ratio – This is equal to I(Total Net Claims + Expenses)/Premiums Net of Reinsurance.

Table 2a – Calendar Year Specific Stop Loss Contracts By Group Size and Table 2b – Calendar Year Aggregate Stop Loss Contracts by Group Size

For those insurers where the stop loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer’s total gross premium written are exempt from completing Table 2.

Table 2a should reflect the specific stop loss data and Table 2b should reflect the aggregate stop loss data.

Report the number of groups, average specific attachment point and average aggregate attachment as of December 31st of the calendar (reporting) year. If the contract does not follow a calendar year (i.e. 7/1-6/30), report the policies written during the year of the annual statement and in effect at the end of the calendar year.

The number of covered lives in a group (group size) should be based on the size of the group as of December 31 of the calendar year. The number of covered lives counted should include all enrolled members (that is, total number of lives insured, including dependents).

Number of Groups – list the number of groups for each stop loss contract based on the number of covered lives in the group.

Average Specific Attachment Point (Table 2a) - The average should be weighted by the number of covered lives in the respective group size bracket, excluding the count of covered lives within the denominator where specific/aggregate coverage was not provided.

Example: Average Specific Attachment Point (\$) (Table 2a, 50-99 Covered Lives in Group) =
 (Sum of Specific Attachment Points X Reported Lives) / (Sum of Reported Lives)

Insured Group	Specific Att Point (\$)	Aggregate Att (%)	Number of Lives	Include Exclude	Reason to Exclude
1	\$ 200,000	115%	90	Include	
2	\$ 100,000	120%	60	Include	
3	\$ 50,000	140%	40	Exclude	Not in Group Size Band
4	\$ 120,000	N/A	50	Include	

Calculation: (200,000 x 90 + 100,000 x 60 + 120,000 x 50) / (90 + 60 + 50) = \$150,000

Average Aggregate Attachment Percentage (Table 2b) – Is based on expected claims. Subgroups that have separate stop loss contracts should be aggregated in terms of determining the group size. The average should be weighted by expected claims in the respective group size bracket, excluding the count of covered lives within the denominator where aggregate coverage was not provided.

Example: Average Aggregate Attachment Percentage (%) (Table 2b, 50-99 Covered Lives in Group) =

(Sum of Expected Claims x Attachment Percentage %) / (Sum of Expected Claims)

<u>Insured Group</u>	<u>Specific Att Point (\$)</u>	<u>Aggregate Att (%)</u>	<u>Expected Claims</u>	<u>Number of Lives</u>	<u>Include Exclude</u>	<u>Reason to Exclude</u>
1	\$ 200,000	115%	\$ 500,000	90	Include	
2	\$ 100,000	120%	\$ 300,000	60	Include	
3	\$ 50,000	140%	\$ 200,000	40	Exclude	Not in Group Size Band
4	\$ 120,000	N/A	\$ 400,000	50	Exclude	Aggregate not purchased by group

Calculation: $(500,000 \times 115\% + 300,000 \times 120\%) / (500,000 + 300,000) = 116.7\%$

Footnote – The number of covered lives for stop loss coverage is reported in the Accident and Health Policy Experience Exhibit for Year (April 1st filing) in Column 6, Section C. Other Business, Line 2.

If stop loss policies are sold on a Per Employee Per Month basis and the actual number of covered lives is unknown, it would be reasonable to estimate the number of covered lives if the exact information is not administratively available to the reporting entity. This method of estimation may be similar to estimations provided for the Accident and Health Policy Experience Exhibit for Year. If estimated, an explanation of the method used to estimate the number of covered lives should be provided in the footnote.

UNDERWRITING RISK – EXPERIENCE FLUCTUATION RISK

LR020

The underwriting risk generates the RBC requirement for the risk of fluctuations in underwriting experience. The credit that is allowed for managed care in this worksheet comes from LR022 Underwriting Risk – Managed Care Credit.

Underwriting risk is present when the next dollar of unexpected claims payments comes directly out of the company's capital and surplus. It represents the risk that the portion of premiums intended to cover medical expenses will be insufficient to pay such expense. For example, an insurer may charge an individual \$100 in premium in exchange for a guaranty that all medical costs will be paid by the insurer. If the individual incurs \$101 in claims costs, the company's surplus will decline because it did not charge a sufficient premium to pick up the additional risk for that individual.

There are other arrangements where the insurer is not at risk for excessive claims payments, such as when an insurer agrees to serve as a third-party administrator for a self-insured employer. The self-insured employer pays for actual claims costs, so the risk of excessive claims experience is borne by the self-insured employer, not the insurer. The underwriting risk section of the RBC formula, therefore, requires some adjustments to remove non-risk business (premiums and claims) before the RBC requirement is calculated.

For Stand-Alone Medicare Part D Coverage, the reduction in uncertainty comes from two federal supports. The reinsurance coverage is optional in that a plan sponsor may elect to participate in the Part D Payment Demonstration. The risk corridor protection is expected to have less impact after the first few years. To allow flexibility within the RBC formula, Lines (10) through (13) of LR022 will be used to give credit for the programs in which the plan sponsor participates. While all PDPs will have formularies and may utilize other methods to reduce uncertainty, for the near future no other managed care credits are allowed for this coverage.

Claims Experience Fluctuation

The RBC requirement for claims experience fluctuation is based on the greater of the following calculations:

- A. Underwriting risk revenue times the underwriting risk claims ratio times a set of factors.

or

- B. An alternate risk charge that addresses the risk of catastrophic claims on any single individual. The alternate risk charge is \$500,000 per line for medical coverage, \$50,000 total for all other coverage except Medicare Part D coverage, and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e., writing more than one coverage type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive – Individual, Comprehensive – Group, Title XVIII – Medicare, Title XIX – Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health. For example, if an organization writes Comprehensive – Individual, Comprehensive – Group, Vision Only, and Dental Only, the alternate risk charge is \$1,000,000 (the cumulative charge for Comprehensive – Individual and Comprehensive – Group, which is higher than the \$100,000 cumulative charge for Vision Only and Dental Only.) ~~The alternate risk charge is calculated for each type of health coverage, but only the largest value is compared to the value from A. above for that type. The alternate risk charge is equal to a multiple of the maximum retained risk on any single individual in a claims year. The maximum retained risk (level of potential claim exposure) is capped at two times the maximum or \$1,500,000 for Comprehensive Medical; two times the maximum or \$50,000 for each of Medicare Supplement business and dental coverage and six times the maximum or \$150,000 for Stand Alone Medicare Part D coverage.~~

Line (1) through Line (198)

There are ~~eight~~four lines of business used in the life and fraternal RBC formula for calculating the RBC requirement in this worksheet. Other health coverages will continue to use the factors on LR019 Health Premiums. The ~~four~~eight lines of business are: Column (1) Comprehensive Medical and Hospital - Individual; Column (2) Comprehensive Medical and Hospital - Group; Column (3) Title XVIII Medicare; Column (4) Title XIX Medicaid; Column (52) Medicare Supplement; Column (63) Dental & Vision Only; Column (7) Dental Only; and Column (84) Stand-Alone Medicare Part D coverage. Each of the ~~four~~eight lines of business has its own column in the Underwriting Risk - Experience Fluctuation Risk table. The

categories listed in the columns of this worksheet include premiums plus all risk revenue that is received from another reporting entity in exchange for medical services provided to its members.

For details of each category refer to LR019 instructions.

~~The descriptions of the items are as follows:~~

~~Comprehensive Medical & Hospital~~

~~Includes policies providing for medical coverages, including hospital, surgical, major medical, Medicare risk coverage (but NOT Medicare supplement) and Medicaid risk coverage. This includes Medicare Advantage, with or without prescription drug benefits. This category DOES NOT include administrative services contracts (ASC) or administrative services only (ASO) contracts. These programs are reported in the Business Risk section of the formula. Neither does it include Federal Employees Health Benefits Program (FEHBP) business, which is reported on LR021 Underwriting Risk – Other, Line (3). The alternative risk charge, which is twice the maximum retained risk after reinsurance on any single individual, cannot exceed \$1,500,000.~~

~~Medical Only (non-hospital professional services)~~

~~Include in Comprehensive Medical.~~

~~Medicare Supplement~~

~~This is business reported in the Medicare Supplement Insurance Experience Exhibit of the annual statement. Medicare risk business is reported under comprehensive medical and hospital.~~

~~Dental & Vision~~

~~These are premiums for policies providing for dental or vision only coverage issued as stand-alone dental or as a rider to a medical policy that is not related to the medical policy through deductibles or out-of-pocket limits.~~

~~Stand-Alone Medicare Part D Coverage~~

~~Includes policies and contracts providing the standard coverage for individuals enrolled in Stand-Alone Medicare Part D and the insurance is a federally approved PDP with risk corridor protection. It does not include risk revenue for Supplemental benefits within Stand-Alone Medicare Part D coverage that is a portion of the PDP's approved package. It does not include employer coverage unless the coverage meets the above criteria. Where there is a federal subsidy to the employer in lieu of risk corridor protection, the premiums are to be reported as "Other Health."~~

~~Other Health Coverages~~

~~Include in the appropriate line on LR019 Health Premiums.~~

The following paragraphs explain the meaning of each line of the worksheet table for computing the experience fluctuation underwriting risk RBC.

Line (1) Premium

This is the amount of money charged by the insurer for the specified benefit plan. It is the earned premium, net of reinsurance. It does not include receipts under administrative services only (ASO) contracts; or administrative services contracts (ASC); or any non-risk business; or premium for the Federal Employees Health Benefit Programs (FEHBP), which has a risk factor relating to incurred claims reported separately under LR021 Underwriting Risk – Other, Line (3).

NOTE: Where premiums are paid on a monthly basis, they are generally fully earned at the end of the month for which coverage is provided. In cases where the mode of payment is less frequent than monthly, a portion of the premium payment will be unearned at the end of any given reporting period.

For Stand-Alone Medicare Part D Coverage, this will include only certain amounts paid by the individual, an employer or CMS. See Appendix 3-4 for details of what is and is not premium income.

Line (2) Title XVIII Medicare

~~This is the earned amount of money charged by the insurer (net of reinsurance) for Medicare risk business where the insurer, for a fee, agrees to cover the full medical costs of Medicare subscribers. This includes the premium and federal government's direct subsidy for prescription drug coverage under MA-PD plans.~~

Line (3) Title XIX Medicaid

~~This is the earned amount of money charged by the insurer for Medicaid risk business where the insurer, for a fee, agrees to cover the full medical costs of Medicaid subscribers. Revenue from Stand-Alone Medicare Part D coverage under the low-income subsidy (cost sharing portion) and low-income subsidy (premium portion) are not included in this line.~~

Line (242) Other Health Risk Revenue

Earned amounts charged by the reporting company as a provider or intermediary for specified medical (e.g., full professional, dental, radiology, etc.) services provided to the policyholders or members of another insurer or managed care organization (MCO). Unlike premiums, which are collected from an employer group or individual member, risk revenue is the prepaid (usually on a capitated basis) payments, made by another insurer or MCO to the company in exchange for services to be provided or offered by such organization. Payments to providers under risk revenue arrangements are included in the RBC calculation as underwriting risk revenue and are included in the calculation of managed care credits. Exclude fee-for-service revenue received by the company from another reporting entity. This revenue is reported in the business risk section of the formula as health ASO/ASC and limited risk revenue.

Line (3) Medicaid Pass-Through Payments Reported as Premiums

Medicaid Pass-Through Payments that are included as premiums. Equals the total of LR019 Lines (9) and (22)

Line (45) Underwriting Risk Revenue

~~The sum of Lines (1.3) through + (24) - (3).~~

Line (56) Net Incurred Claims

Claims incurred (paid claims + change in unpaid claims) during the reporting year (net of reinsurance) that are arranged for or provided by the insurer. Paid claims ~~includes~~include capitation and all other payments to providers for services to covered lives, as well as reimbursement directly to insureds (or their providers) for covered services. Paid claims also include salaries paid to company employees that provide medical services to covered lives and related expenses. Line (56) does not include ASC payments or Federal Employees Health Benefit Program (FEHBP) claims.

~~Column (1) claims come from Schedule H, Part 5, Columns 1 and 2 Line 13 less the amounts reported as incurred claims for administrative services contracts (ASC) in Line (54) of LR029 Business Risk and Federal Employee Health Benefit Program (FEHBP) in Line (3) of LR021 Underwriting Risk—Other. Column (2) for Medicare supplement should be net of reinsurance, the same as the other columns. Column (2) for Medicare supplement should use the direct claims from General Interrogatories Part 2, Line 1.5 after adjusting them for reinsurance. Column (3) dental claims come from Schedule H, Part 5, Column 5, Line 13.~~

For Stand-Alone Medicare Part D Coverage, net incurred claims should reflect claims net of reinsurance coverage (as defined in Appendix 34). Where there has been prepayment under the reinsurance coverage, paid claims should be offset from the cumulative deposits. Unpaid claim liabilities should reflect expected recoveries from the reinsurance coverage – for claims unpaid by the PDP or for amounts covered under the reinsurance coverage that exceed the cumulative deposits. Where there has not been any prepayment under the reinsurance coverage, unpaid claim liabilities should reflect expected amounts still due from CMS.

Line (6) Medicaid Pass-Through Payments Reported as Claims.

Medicaid Pass-Through Payments that are included as claims.Line (7) Fee-for-Service Offset

Report fee-for-service revenue that is directly related to medical expense payments. The fee-for-service line does not include revenue where there is no associated claim payment (e.g., fees or charges to non-member/insured of the company where the provider of the service receives no additional compensation from the company) and when such revenue was excluded from the pricing of medical benefits.

Line (8) Underwriting Risk Incurred Claims

Lines ~~(56)~~ – ~~minus Line (67)~~ – ~~(7)~~.

Line (9) Underwriting Risk Claims Ratio

Line (8) / Line ~~(45)~~. If either Line ~~(45)~~ or Line (8) is zero or negative, Line (9) is zero.

Line (10) ~~Underwriting Risk Factor~~ Underwriting Risk Factors for Initial Amounts of Premium

~~Factor applied to the first \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to the first \$3,000,000 in premium for columns (5), (6), (7),~~

~~A weighted average factor based on the amount reported in Line (5), Underwriting Risk Revenue. The factors for Column 1-3 have incorporated investment income.~~

	\$0 - \$3 Million	\$3 - \$25 Million	Over \$25 Million
Comprehensive Medical	0.14341440	0.14341440	0.08380844
Medicare Supplement	0.09800987	0.06030609	0.06030609
Dental	0.11481153	0.07110716	0.07110716
Stand Alone Medicare Part D Coverage	0.251	0.251	0.151

Line (11) Underwriting Risk Factors for Excess of Initial Amount

~~Factor applied to premium in excess of \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to premium in excess of \$3,000,000 in premium for columns (5), (6), (7),~~

Line (12) Investment Income Adjustment Factor

~~The investment income yield was incorporated into the Comprehensive (Hospital & Medical) individual & group, Medicare Supplement and Dental & Vision lines of business. The purpose was to incorporate an offset to reduce the underwriting risk factor for investment income earned by the insurer. The Working Group incorporated a 4.5% income yield that was based on the yield of a 6-month U.S. Treasury bond. Each year, the Working Group will identify the yield of the 6-month U.S. Treasury bond (U.S. Department of the Treasury) on each Monday through the month of January and determine if further modification to the 4.5% adjustment is needed. Any adjustments will be rounded up to the nearest 0.5%.~~

Line (13) Composite Underwriting Risk Factor.

~~A weighted average factor based on the amount reported in Line (4), Underwriting Risk Revenue. Includes the Investment Income Adjustment Factor.~~

Line (14) Base Underwriting Risk RBC

Line ~~(45)~~ x Line (9) x Line ~~(130.3)~~.

Line (15) Managed Care Discount Factor

For Comprehensive Medical & Hospital Individual, Comprehensive Medical & Hospital Group, Title XVIII Medicare, Title XIX Medicaid, Medicare Supplement (including Medicare Select), Vision, and Dental, a managed care discount, based on the type of managed care arrangements an organization has with its providers, is included to reflect the reduction in the

uncertainty about future claims payments attributable to the managed care arrangements. The discount factor is from Column (3) Line (17) of LR022 Underwriting Risk – Managed Care Credit. An average factor based on the combined results of these ~~three~~ categories is used ~~for all three~~.

For Stand-Alone Medicare Part D Coverage, a separate managed care discount (or federal program credit) is included to reflect only the reduction in uncertainty about future claims payments attributable to federal risk arrangements. The discount factor is from Column (4), Line (17) of LR022 Underwriting Risk – Managed Care Credit.

Line (163) Base RBC After Managed Care Discount

Line (141) x Line (152).

Line (14) RBC Adjustment for Individual

~~The average experience fluctuation risk charge is increased by 20% for the portion relating to individual medical expense premiums in Column (1). Other types of health coverage do not differentiate individual and group. The additional time necessary to develop sufficient data to make a premium filing with states and then to implement the premium increase was modeled to calculate this factor.~~

Line (15) Maximum Per Individual Risk After Reinsurance

~~This is the maximum loss after reinsurance for any single individual. Where specific stop loss reinsurance protection is in place, the maximum per individual risk after reinsurance is equal to the highest attachment point on such stop loss reinsurance, subject to the following:~~

- ~~• Where coverage under non-proportional reinsurance or stop loss protection with the highest attachment point is capped at less than \$750,000 per insured for comprehensive medical and \$25,000 for the other three lines, the maximum retained loss will be equal to such attachment point plus the difference between the coverage maximum per claim and \$750,000 or \$25,000, whichever is applicable.~~
- ~~• Where the non-proportional reinsurance or stop loss protection is subject to participation by the company, the maximum retained risk as calculated above will be increased by the company's participation in claims in excess of the attachment point, but not to exceed \$750,000 for comprehensive medical and \$25,000 for the other three coverages.~~

~~If there is no specific stop loss or reinsurance in place, enter the largest amount payable (within a calendar year), or \$9,999,999 if there is no limit.~~

~~Examples of the calculation are presented below:~~

EXAMPLE 1 (Insurer provides Comprehensive Care):

_____ Highest Attachment Point (Retention)	_____ \$100,000
_____ Reinsurance Coverage	_____ 90% of \$500,000 in excess of \$100,000
_____ Maximum Reinsured Coverage	_____ \$600,000 (\$100,000 + \$500,000)
_____ Maximum Retained Risk =	_____ \$100,000 deductible
	_____ +\$150,000 (\$750,000 – \$600,000)
	_____ +\$50,000 (10% of \$500,000 coverage layer)
	_____ = \$300,000

EXAMPLE 2 (Insurer provides Comprehensive Care):

_____ Highest Attachment Point (Retention)	_____ \$75,000
---	---------------------------

Reinsurance Coverage	90% of \$1,000,000 in excess of \$75,000
Maximum Reinsured Coverage	\$1,075,000 (\$75,000 + \$1,000,000)
Maximum Retained Risk =	\$75,000 deductible
	+ 0 (\$750,000 - \$1,075,000)
	+\$67,500 (10% of \$675,000 coverage layer)
	-\$142,500

Line (176) Alternate Risk Charge

~~Twice the amount in Line (15), subject to a maximum of \$1,500,000 for comprehensive medical and \$50,000 for Medicare Supplement and Dental. Six times the amount in Line (15), subject to a maximum of \$150,000 for Stand-Alone Medicare Part D Coverage. \$500,000 for Columns (1), (2), (3), and (4); \$50,000 for Columns (5), (6), and (7); and \$150,000 for Column (8).~~

Line (187) Net Alternate Risk Charge

~~The largest value from Line (16) is retained for that column in Line (17) and all others are ignored. The alternate risk charge is \$500,000 per line for medical coverage, \$50,000 total for all other coverage except Medicare Part D coverage, and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e., writing more than one coverage type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive – Individual, Comprehensive – Group, Title XVIII – Medicare, Title XIX – Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health.~~

Line (198) Net Underwriting Risk RBC

The maximum of Line (164) and Line (187).

**LRBC FORMULA APPLICATION FOR P&C COMPANY'S A&H BUSINESS
PR019 – PR026**

If the reporting company writes 5% or more of its premiums in A&H lines in 20243, 20254 or 20265, this section of the formula must be completed. To determine if that applies, take the sum of Lines 13, 14 and 15 of the Underwriting and Investment Exhibit Part 1B Column 6 and divide by Line 35 Column 6, and round to three decimals for each individual year. If the result is at least 0.050 in any year, this exhibit and the appropriate Schedule P adjustment must be completed.

If the company writes less than 5% of its premiums in A&H lines in 20243, 20254 and 20265, disregard this section.

PR019 - Health Premiums

Basis of Factors

Risk-based capital factors for health insurance are applied to medical, disability income, long-term care insurance and other types of health insurance premiums and claim reserves with an offset for premium stabilization reserves. For health coverage that does not fit into one of the defined categories for risk-based capital, the “Other Health” category is to be used.

Medical Insurance Premium

The business is subdivided by product into categories for individual coverages and for group and credit coverages depending on the risk related to volatility of claims. The factors were developed from a model that determines the minimum amount of surplus needed to protect the company against a worst-case scenario for each type of coverage. The results of the model were then translated into either a uniform percentage or a two-tier formula to be applied to premium. The two-tier formula reflects the decreased risk of a larger in-force block. The formula includes several changes starting in 1999 for some types of health insurance. These changes add several additional worksheets and are designed to keep the RBC amounts for health coverage consistent regardless of the RBC formula used. If the company has Comprehensive Medical business, Medicare Supplement, Dental & Vision business, or Stand-Alone Medicare Part D coverage through a PDP arrangement, it will be directed to these additional worksheets. The instructions for including paid health claims in the various categories of the Managed Care Discount Factor Calculation can be found in the instructions to PR021 Underwriting Risk – Managed Care Credit. Appendix 1 - Commonly Used Health Insurance Terms haves been added to these instructions. Appendix 2 of these instructions lists commonly used terms of Stand-Alone Medicare Part D coverage. If the company has any of the three mentioned types of medical insurance, it will also be required to complete additional parts of the formula for Health Credit Risk (PR013) and Health Administrative Expenses portion in PR022.

Disability Income Premium

Prior to 2001, the individual disability income factors were based on models of the disability risk completed by several companies with significant experience in this line. The group long-term disability income risk was modeled based on methodology similar to that used by one of the largest writers of this business. The pricing risk was addressed principally as the delayed reaction to increases in incidence of new claims and to the lengthening of claims from slower recoveries than assumed.

Starting in 2001, new categories and new factors are applicable to all types of disability income premiums. These factors are based on new data and apply a model similar to that used for other health premium risk to that data.

All premium should be reported on a net of reinsurance basis.

Specific Instructions for Application of the Formula

The total of all earned premium categories PR019 Health Premiums, Line (3626), Column (1) should equal the total in ~~Schedule H Underwriting and Investment Exhibit~~, Part 1, Line 13.1 through 15.92, Column 41 of the Annual Statement. Earned premium for each of these coverages should be from underlying company records. Earned premium may be reported in ~~Schedule H Underwriting and Investment Exhibit~~ for Administrative Services Contract (ASC) and/or the Federal Employees Health Benefit Program (FEHBP) which are included in order that Line (3626) will equal the total in ~~Schedule H Underwriting and Investment Exhibit~~. As such, there is no RBC factor applied to any premium reported on lines (2244), (3223)

or (3424). For some of the coverages, two tier formulas apply. The calculations for these coverages shown below will not appear on the RBC filing software but will automatically be calculated by the software.

Line (1)

Health premiums for comprehensive (medical and hospital), which includes expense reimbursement hospital/medical coverage) written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (1) Line (1.1). ~~Medicaid Pass Through Payments reported as premium in the annual statement filing should be excluded from the premium amounts reported in Line 1 and reported in Line (3.3) and (10.3), respectively.~~

Line (2)

~~Health premiums for Title XVIII Medicare written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (3) Line (1.1).~~

Line (3)

~~Health premiums for Title XIX Medicaid written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (4) Line (1.1).~~

Line (42)

Health premiums for Medicare supplement written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (52) Line (1.1).

Line (53)

Health premiums for ~~dental or~~ vision **only** coverage written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (63) Line (1.1).

Line (6)

~~Health premiums for dental **only** coverage written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (7) Line (1.1).~~

Line (73.1)

Health premium for Stand-Alone Medicare Part D coverage written on individual contracts - includes beneficiary premium (standard coverage portion), direct subsidy, low-income subsidy (premium portion), Part D Payment Demonstration amounts and risk corridor payment adjustments. See Appendix 2 for definition of these terms. This does not include Medicare-Advantage prescription drug coverage (MA-PD) premiums which are to be included in Line (21). No RBC requirement is calculated in Column (2). The premium is carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (84) Line (1.1).

Line (73.2)

Health incurred claims for Supplemental benefits within Stand-Alone Medicare Part D coverage written on individual contracts that is beneficiary payment (supplemental benefit portion) – e.g., coverage in the coverage gap, use of co-pays of less value than the minimum regulatory coinsurance and reduced deductible. This does not include the low-income subsidy (cost sharing portion) which is not a component of reported revenue. RBC is calculated for Supplemental benefits within Stand-Alone Medicare Part D Coverage on PR019.

Line (73.3)

Medicaid pass-through payments reported as premium ~~and excluded from Line (1) should be reported in Line (3.3).~~

Line (84) and Line (191)

There is a factor for certain types of limited benefit coverage (Hospital Indemnity, which includes a per diem for intensive care facility stays, and Specified Disease) which includes both a percent of earned premium on such insurance (3.5%) and a flat dollar amount (\$50,000) to reflect the higher variability of small amounts of business.

Line (95) and Line (2012)

There is a factor for accidental death and dismemberment (AD&D) insurance (where a single lump sum is paid) which depends on several items:

1. The maximum amount of retained risk for any single claim;
2. \$300,000 if three times the maximum amount of retained risk is larger than \$300,000;
3. 5.5% of earned premium to the extent the premium for AD&D is less than or equal to \$10,000,000; and
4. 1.5% of earned premium in excess of \$10,000,000.

There are places for reporting the total amount of earned premium and the maximum retained risk on any single claim. The actual RBC amount will be calculated automatically as the sum of (a) the lesser of items 1 and 2; plus (b) items 3 plus 4.

Line (106) and Line (2143)

A 5% factor for Other Accident coverage provides for any accident based contingency other than those contained in Lines (95) or (2012). For example, this line should contain all the premium for policies that provide coverage for accident only disability or accident only hospital indemnity. The premium for policies that contain AD&D in addition to other accident only benefits should be shown on this line.

Line (117)

Health premiums for comprehensive (medical and hospital), which includes expense reimbursement hospital/medical coverage) written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (24) Line (1.2).

Line (12)

Health premiums for Title XVIII Medicare written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (3) Line (1.2).

Line (13)

Health premiums for Title XIX Medicaid written on individual contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (4) Line (1.2).

Line (148)

Health premiums for ~~dental or~~ vision **only** coverage written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (63) Line (1.2).

Line (15)

Health premiums for dental **only** coverage written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (7) Line (1.2).

Line (169)

The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group in 2016 to apply a tiered risk factor approach to the Stop-Loss Premium. The premiums for this coverage should not be included within Comprehensive Medical or Other Health Coverages (Line (325)). It is not expected that the transfer of risk through the various managed care credits will reduce the risk of stop-loss coverage. Medical Stop-Loss exhibits a much higher variability than Comprehensive Medical. A factor of 35% will be applied to the first \$25,000,000 in premium and a factor of 25% will be applied to the premium in excess of \$25,000,000. Stop-loss premiums should be reported on a net basis.

Line (170)

Health premiums for Medicare supplement written on group contracts are entered in Column (1) for this line, but no RBC Requirement is calculated in Column (2). The premiums are carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (52) Line (1.2).

Line (180.1)

Health premium for Stand-Alone Medicare Part D coverage written on group contracts only if the plan sponsor has risk corridor protection for the contracts - includes beneficiary premium (standard coverage portion), direct subsidy, low-income subsidy (premium portion), Part D Payment Demonstration amounts and risk corridor protection payments. See Appendix 2 for definition of these terms. Stand-Alone Medicare Part D coverage written on group contracts without risk corridor protection is reported in Line (~~325~~) Other Health. This does not include Medicare-Advantage prescription drug coverage (MA-PD) premiums which are to be included in Line (~~169~~). No RBC requirement is calculated in Column (2). The premium is carried forward to page PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental & Vision, Column (~~84~~) Line (1.2).

Line (180.2)

Health Incurred Claims for Supplemental benefits within Stand-Alone Medicare Part D coverage written on group contracts that is beneficiary payment (supplemental benefit portion) – e.g., coverage in the coverage gap, use of co-pays of less value than the minimum regulatory coinsurance and reduced deductible where the plan sponsor has risk corridor protection for the group contract's standard benefit design coverage. This does not include the low-income subsidy (cost-sharing portion) which is not a component of reported revenue. RBC is calculated for Supplemental benefits within Part D Coverage on PR019.

Line (180.3)

Medicaid pass-through payments reported as premium ~~and excluded from Line (7) should be reported in Line (10.3).~~

Lines (2315) through (3424)

Disability income premiums are to be separately entered depending on category (Individual and Group). For Individual, a further split is between noncancellable (NC) or other (GR, etc.) For Group, the further splits are between Credit Monthly Balance, Credit Single Premium (with additional reserves), Credit Single Premium (without additional reserves), Group Long-Term (benefit periods of two years or longer) and Group Short-Term (benefit periods less than two years). For long-term care insurance, premiums are reported separately for Individual noncancellable, Individual (other than NC) and Group LTCI. The RBC factors vary by the amount of premium reported such that a higher factor is applied to amounts below \$50,000,000 for similar types. Starting in 2001, in determining the premiums subject to the higher factors, individual disability income noncancellable and other is combined. All types of Group and Credit are combined in a different category from Individual. For long-term care, all types (Individual and Group) are combined.

The following table describes the calculation process used to assign RBC charges to disability income business. The reference to line numbers (e.g., Line 2315) represent the actual line numbers used in the formula page, but the subdivisions of those lines [e.g., a), b), etc.] do not exist in the formula page. The total RBC Requirement shown in the last (Total) subdivision of each line will be included in Column (2) for that line in the formula page.

		<u>Annual Statement Source</u>	<u>Statement Value</u>	<u>Factor</u>	<u>RBC Requirement</u>
<u>Line</u>	<u>Disability Income Premium</u>

Line (235)
Most Health Premium will have been included in one of the prior lines. In the event that some coverage does not fit into any of these categories, “Other Health” category is applied with a 12% factor, which is from 1998 formula for Other Limited Benefits Anticipating Rate Increases. Stop-loss premiums are addressed separately in Line (169).

Stop-Loss Electronic-Only Tables

The Health Risk-Based Capital (E) Working Group revised the stop-loss factors in 2017. The American Academy of Actuaries submitted a report to the Health Risk-Based Capital (E) Working Group and suggested that the factors be revised based on data from 1998-2008. The Health Risk-Based Capital (E) Working Group agreed to continue analyzing the stop-loss factors as a result of the changes to life-time maximum amounts included in the Federal Affordable Care Act.

Electronic Table 1 – Stop-Loss Interrogatories

The interrogatories are designed to gather the information by product type and will be reviewed on a go-forward basis. The data will be used in the continued evaluation of the factors. The data collected will be collected on a one-year run-out basis. For example, the RBC filed at year-end **2018**, will reflect the incurred data for calendar year **2017** run-out through December 31, **2018**.

For those insurers where the stop-loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer's total gross premium written are exempt from completing Table 1.

The categories used in the interrogatories are separated as follows:

Product Type

Specific Stop-Loss (including aggregating specific) = This coverage was included in the 1998 to 2008 factor development.

Aggregate Stop-Loss = This coverage was included in the 1998 to 2008 factor development.

HMO Reinsurance = Specific reinsurance of an HMO's commercial, Medicare, Medicaid or Point of Service products. This coverage was not included in the 1998 to 2008 factor development.

Provider Excess = Specific excess written on Providers including IPAs, hospitals, clinics. This coverage was not included in the 1998 to 2008 factor development.

Medical Excess Reinsurance = Specific reinsurance of an insurance company's medical business (first dollar or self-insured). This coverage was not included in the 1998 to 2008 factor development.

Please do not include quota share or excess reinsurance written on stop-loss business.

Calendar Year - Submit experience information for the calendar year preceding the year for which the RBC report is being filed; e.g., the RBC report filed for **2019** should provide experience information for calendar year **2018** with run-out through December 31, **2019**. If the contract year does not follow a calendar year (e.g., 7/1-6/30), the impact on the interrogatories would be spread across two years in the same manner it would be reported in two annual statements (i.e., half of premium and the applicable portion of the liability/expense would hit the first year, the remainder would hit the second year). Report based on the calendar year even if the calendar year includes two separate contracts (For example: Contract 1 started on 7/1/2017 and ran through 6/30/2018. Contract 2 started on 7/1/2018 and ran through 6/30/2019. The 2018 calendar year experience information would be comprised of the experience information in Contract 1 from 1/1/2018 through 6/30/2018 AND Contract 2 from 7/1/2018 to 12/31/2018.). Contracts that do not follow a calendar year should NOT be excluded.

Total [Gross/Net] Premium - This is the [gross/net] premium revenue, [before/after] ceded reinsurance and including commissions. Report the data as reported for the prior calendar year including amounts paid for the prior year through the end of the current calendar year. Do not adjust for any anomalies in the experience.

Total Gross Claims + Expenses =

Total Gross Claims - These are the gross incurred claims, before ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining gross claim liability.

+ Expenses – These are the gross incurred expense during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Gross Combined Ratio - This is equal to (Total Gross Claims + Expenses) / Total Gross Premium.

Premiums Net of Reinsurance – This is the net premium revenue, net of reinsurance. Report data as reported in the annual statement and do not adjust for any anomalies in the experience.

Total Net Claims + Expenses =

Total Net Claims - These are the net incurred claims after ceded reinsurance. Do not adjust for any anomalies in the experience. Claims are defined as claims incurred during prior calendar year and paid through the end of the current calendar (reporting) year, plus any remaining net claim liability.

+

Expenses – These are the net incurred expenses during the prior calendar year and paid through the end of the current reporting year plus any incurred expenses that are unpaid as of the end of the run-out period. Premium tax amounts should be included in the expense amounts; however, income taxes would be excluded.

Net Combined Ratio – This is equal to (Total Net Claims + Expenses)/Premiums Net of Reinsurance.

Table 2a – Calendar Year Specific Stop-Loss Contracts by Group Size and Table 2b – Calendar Year Aggregate Stop-Loss Contract by Group Size

For those insurers where the stop-loss gross premium written is both under \$2,000,000 and is less than 10% of the insurer's total gross premium written are exempt from completing Table 2.

Table 2a should reflect the specific stop-loss data and Table 2b should reflect the aggregate stop-loss data.

Report the number of groups, average specific attachment point and average aggregate attachment as of December 31st of the calendar (reporting) year. If the contract does not follow a calendar year (e.g. 7/1-6/30), report the policies written during the year of the annual statement and in effect at the end of the calendar year.

The number of covered lives in a group (group size) should be based on the size of the group as of December 31 of the calendar year. The number of covered lives counted should include all enrolled members (that is, total number of lives insured, including dependents).

Number of Groups – list the number of groups for each stop-loss contract based on the number of covered lives in the group.

Average Specific Attachment Point (Table 2a) - The average should be weighted by the number of covered lives in the respective group size bracket, excluding the count of covered lives within the denominator where specific/aggregate coverage was not provided.

Example: Average Specific Attachment Point (\$) (Table 2a, 50-99 Covered Lives in Group) =

(Sum of Specific Attachment Points X Reported Lives) / (Sum of Reported Lives)

Insured Group	Specific Att Point (\$)	Aggregate Att (%)	Number of Lives	Include Exclude	Reason to Exclude
1	\$ 200,000	115%	90	Include	
2	\$ 100,000	120%	60	Include	
3	\$ 50,000	140%	40	Exclude	Not in Group Size Band
4	\$ 120,000	N/A	50	Include	

Calculation: $(200,000 \times 90 + 100,000 \times 60 + 120,000 \times 50) / (90 + 60 + 50)$
= \$150,000

Average Aggregate Attachment Percentage (Table 2b) – Is based on expected claims. Subgroups that have separate stop-loss contracts should be aggregated in terms of determining the group size. The average should be weighted by expected claims in the respective group size bracket, excluding the expected claims within the denominator where aggregate coverage was not provided.

Example: Average Aggregate Attachment Percentage (%) (Table 2b, 50-99 Covered Lives in Group) =

(Sum of Expected Claims x Attachment Percentage %) / (Sum of Expected Claims)

Insured Group	Specific Att Point (\$)	Aggregate Att (%)	Expected Claims	Number of Lives	Include Exclude
1	\$ 200,000	115%	\$ 500,000	90	Include
2	\$ 100,000	120%	\$ 300,000	60	Include
3	\$ 50,000	140%	\$ 200,000	40	Exclude
4	\$ 120,000	N/A	\$ 400,000	50	Exclude

Calculation: $(500,000 \times 115\% + 300,000 \times 120\%) / (500,000 + 300,000)$
= 116.7%

Footnote – The number of covered lives for stop-loss coverage is reported in the Accident and Health Policy Experience Exhibit for Year (April 1st filing) in Column 13, Section C. Other Business, Line 2.

If stop-loss policies are sold on a Per Employee Per Month basis and the actual number of covered lives is unknown, it would be reasonable to estimate the number of covered lives if the exact information is not administratively available to the reporting entity. This method of estimation may be similar to estimations provided for the Accident and Health Policy Experience Exhibit for Year. If estimated, an explanation of the method used to estimate the number of covered lives should be provided in the footnote.

PR020 - Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement and Dental and Vision

(Underwriting Risk – Experience Fluctuation Factor in the LRBC Formula)

The underwriting risk generates the RBC requirement for the risk of fluctuations in underwriting experience. The credit that is allowed for managed care in this worksheet comes from PR021 Underwriting Risk - Managed Care Credit.

The columns are as follows:

Column (1) – Comprehensive (Hospital & Medical) Individual Policies that provide fully insured indemnity, HMO, PPO, or Fee for Service coverage for hospital, medical, and surgical expenses. This category excludes Short-Term Medical Insurance, the Federal Employees Health Benefit Program and non-comprehensive coverage such as basic hospital only, medical only, hospital confinement indemnity, surgical, outpatient indemnity, specified disease, intensive care, and organ and tissue transplant coverage as well as any other coverage described in the other categories of this exhibit.

Column (2) – Comprehensive (Hospital & Medical) Group Policies that provide fully insured indemnity, HMO, PPO, or Fee for Service coverage for hospital, medical, and surgical expenses. This category excludes Short-Term Medical Insurance, the Federal Employees Health Benefit Program and non-comprehensive coverage such as basic hospital only, medical only, hospital confinement indemnity, surgical, outpatient indemnity, specified disease, intensive care, and organ and tissue transplant coverage as well as any other coverage described in the other categories of this exhibit.

Column (3) – Title XVIII Medicare Policies issued as Medicare Advantage Plans providing Medicare benefits to Medicare eligible beneficiaries created by title XVIII of the Social Security Act of 1965. This includes Medicare Managed Care Plans (i.e., HMO and PPO) and Medicare Private Fee-for-Service Plans. This also includes all Medicare Part D Prescription Drug Coverage through a Medicare Advantage product and whether sold directly to an individual or through a group.

Column (4) – Title XIX Medicaid Policies issued in association with the Federal/State entitlement program created by Title XIX of the Social Security Act of 1965 that pays for medical assistance for certain individuals and families with low incomes and resources.

Column (5) – Medicare Supplement. Policies that qualify as Medicare Supplement policy forms as defined in the NAIC Medicare Supplement Insurance Minimum Standards Model Act. This includes standardized plans, pre-standardized plans and Medicare select. Does not include Medicare (Title XVIII) or Medicaid (Title XIX) risk contracts.

Column (6) – Vision Only Policies providing for vision only coverage issued as stand-alone vision or as a rider to a medical policy that is not related to the medical policy through premiums, deductibles or out-of-pocket limits. Does not include self-insured business, federal employees health benefit plans (FEHBP), or Medicare and Medicaid programs.

Column (7) – Dental Only Policies providing for dental only coverage (dental treatment benefits such as routine dental examinations, preventive dental work, and dental procedures needed to treat tooth decay and diseases of the teeth and jaw) issued as stand-alone dental or as a rider to a medical policy that is not related to the medical policy through premiums, deductibles or out-of-pocket limits. If dental benefits are part of a comprehensive medical plan, then include data under comprehensive/major medical category. Does not include self-insured business, as well as federal employee's health benefits plans (FEHBP), or Medicare and Medicaid programs.

Column (8) – Stand-Alone Medicare Part D Coverage. This includes both individual coverage and group coverage of Medicare Part D coverage where the plan sponsor has risk corridor protection. See INT 05-05: Accounting for Revenue under Medicare Part D Coverage for definition of these terms. Medicare drug benefits included in major medical plans or benefits that do not meet the above criteria are not to be included in this line. Supplemental benefits within Medicare Part D (benefits in excess of the standard benefit design) are addressed separately on page PR019. Employer-based Part D coverage that is in an uninsured plan as defined in SSAP No. 47—Uninsured Plans is not to be included here

Description from *Life Risk-Based Capital Report Including Overview & Instructions*:

Underwriting risk is present when the next dollar of unexpected claims payments comes directly out of the company's capital and surplus. It represents the risk that the portion of premiums intended to cover medical expenses will be insufficient to pay such expense. For example, an insurer may charge an individual \$100 in premium in exchange for a guaranty that all medical costs will be paid by the insurer. If the individual incurs \$101 in claims costs, the company's surplus will decline because it did not charge a sufficient premium to pick up the additional risk for that individual.

There are other arrangements where the insurer is not at risk for excessive claims payments, such as when an insurer agrees to serve as a third-party administrator for a self-insured employer. The self-insured employer pays for actual claims costs, so the risk of excessive claims experience is borne by the self-insured employer, not the insurer. The underwriting risk section of the RBC formula, therefore, requires some adjustments to remove non-risk business (both premiums and claims) before the RBC requirement is calculated.

For Stand-Alone Medicare Part D Coverage, the reduction in uncertainty comes from two federal supports. The reinsurance coverage is optional in that a plan sponsor may elect to participate in the Part D Payment Demonstration. The risk corridor protection is expected to have less impact after the first few years. To allow flexibility within the RBC formula, Lines (10.1) through (10.4) of PR021 will be used to give credit for the programs in which the plan sponsor participates. While all PDPs will have formularies and may utilize other methods to reduce uncertainty, for the near future no other managed care credits are allowed for this coverage.

Claims Experience Fluctuation

The RBC requirement for claims experience fluctuation is based on the greater of the following calculations:

A. Underwriting risk revenue times the underwriting risk claims ratio times a set of factors.

or

B. An alternate risk charge that addresses the risk of catastrophic claims on any single individual. The alternate risk charge is \$500,000 per line for medical coverage, \$50,000 total for all other coverage except Medicare Part D coverage, and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e., writing more than one coverage type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive – Individual, Comprehensive – Group, Title XVIII – Medicare, Title XIX – Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health. For example, if an organization writes Comprehensive – Individual, Comprehensive – Group, Vision Only, and Dental Only, the alternate risk charge is \$1,000,000 (the cumulative charge for Comprehensive – Individual and Comprehensive – Group, which is higher than the \$100,000 cumulative charge for Vision Only and Dental Only.) ~~The alternate risk charge is calculated for each type of health coverage, but only the largest value is compared to the value from A. above for that type. The alternate risk charge is equal to a multiple of the maximum retained risk on any single individual in a claims year. The maximum retained risk (level of potential claim exposure) is capped at two times the maximum or \$1,500,000 for Comprehensive Medical; two times the maximum or \$50,000 for each of Medicare Supplement business and dental coverage and six times the maximum or \$1,500,000 for Stand Alone Medicare Part D coverage.~~

Line (1) through Line (198)

There are ~~four-eight~~ lines of business used in the property/casualty RBC formula for calculating the RBC requirement in this worksheet. Other health coverages will continue to use the factors on PR019 Health Premiums. The ~~four-eight~~ lines of business are Column (1) Comprehensive Medical and Hospital Individual; Column (2) Comprehensive Medical Group; Column (3) Title XVIII Medicare; Column (4) Title XIX Medicaid; Column (5) Medicare Supplement; Column (6) Dental & Vision; Column (7) Dental; and Column (8) Stand-Alone Medicare Part D coverage. Each of the ~~four-eight~~ lines of business has its own column in the Underwriting Risk – Premium Risk table. The categories listed in the columns of this worksheet include premiums plus all risk revenue that is received from another health entity in exchange for medical services provided to such Health entity's members. ~~The descriptions of the items are as follows:~~

Comprehensive Medical & Hospital

~~Includes policies providing for medical coverages including hospital, surgical, major medical, Medicare risk coverage (but NOT Medicare Supplement), and Medicaid risk coverage. This includes Medicare Advantage, with or without prescription drug benefits. This category DOES NOT include administrative services contracts (ASC) or administrative services only (ASO) contracts, or any non-underwritten business. These programs are reported in PR022 Underwriting Risk – Other, Business Risk section of the formula. Neither does it include Federal Employees Health Benefit Program (FEHBP) business, which is reported on Line (3) of PR022 Underwriting Risk – Other. The alternative risk charge, which is twice the maximum retained risk after reinsurance on any single individual, cannot exceed \$1,500,000.~~

Medical Only (non-hospital professional services)

~~Include in Comprehensive Medical.~~

Medicare Supplement

~~This is business reported in the Medicare Supplement Insurance Experience Exhibit of the annual statement. Medicare risk business is reported under comprehensive medical and hospital.~~

Dental & Vision

~~These are premiums for policies providing for dental or vision only coverage issued as stand-alone dental or vision or as a rider to a medical policy that is not related to the medical policy through deductibles or out-of-pocket limits.~~

Stand-Alone Medicare Part D Coverage

~~Includes policies and contracts providing the standard coverage for individuals enrolled in Stand-Alone Medicare Part D and the insurance is a federally approved PDP with risk corridor protection. It does not include risk revenue for Supplemental benefits within Stand-Alone Medicare Part D coverage that is a portion of the PDP's approved package. It does not include employer coverage unless the coverage meets the above criteria. Where there is a federal subsidy to the employer in lieu of risk corridor protection, the premiums are to be reported as "Other Health."~~

Other Health Coverages

~~Include in the appropriate line on PR019 Health Premiums.~~

The following paragraphs explain the meaning of each line of the worksheet table for computing the experience fluctuation underwriting risk RBC.

Line (1) Premium

This is the amount of money charged by the insurer for the specified benefit plan. It is the earned premium, net of reinsurance. It does not include receipts under administrative services only (ASO) contracts; or administrative services contracts (ASC); or any non-risk business; or premium for the Federal Employees Health Benefit Programs (FEHBP), which has a risk factor relating to incurred claims reported separately under PR022 Underwriting Risk – Other, Line (3).

NOTE: Where premiums are paid on a monthly basis, they are generally fully earned at the end of the month for which coverage is provided. In cases where the mode of payment is less frequent than monthly, a portion of the premium payment will be unearned at the end of any given reporting period.

For Stand-Alone Medicare Part D Coverage, this will include only certain amounts paid by the individual, an employer or CMS. See Appendix 2 for details of what is and is not premium income.

The Line 1.3 sources for each column are given in the table below:

PR020 Column

Comprehensive Medical Individual

Comprehensive Medical Group

Title XVIII Medicare

Title XIX Medicaid

Medicare Supplement

Vision

Dental

Stand-Alone Medicare Part D Coverage

Annual Statement Source

U&I Part 1, Column 4 Line 13.1

U&I Part 1, Column 4 Line 13.2

U&I Part 1, Column 4 Line 15.6

U&I Part 1, Column 4 Line 15.5

U&I Part 1, Column 4 Line 15.4

U&I Part 1, Column 4 Line 15.1

U&I Part 1, Column 4 Line 15.2

Company Records, Earned Premium Net of Reinsurance

Line (2) Title XVIII Medicare

~~This is the earned amount of money charged by the insurer (net of reinsurance) for Medicare risk business where the insurer, for a fee, agrees to cover the full medical costs of Medicare subscribers. This includes the premium and federal government's direct subsidy for prescription drug coverage under MA-PD plans.~~

Line (3) Title XIX Medicaid

~~This is the earned amount of money charged by the insurer for Medicaid risk business where the insurer, for a fee, agrees to cover the full medical costs of Medicaid subscribers. Revenue from Stand-Alone Medicare Part D coverage under the low-income subsidy (cost-sharing portion) and low-income subsidy (premium portion) are not included in this line.~~

Line (24) Other Health Risk Revenue

Earned amounts charged by the reporting company as a provider or intermediary for specified medical (e.g., full professional, dental, radiology, etc.) services provided to the policyholders or members of another insurer or health insurance company (Health). Unlike premiums, which are collected from an employer group or individual member, risk revenue is the prepaid (usually on a capitated basis) payments, made by another insurer or health insurance company to the company in exchange for services to be provided or offered by such organization. Payments to providers under risk revenue arrangements are included in the RBC calculation as underwriting risk revenue and are included in the calculation of managed care credits. Exclude fee-for-service revenue received by the company from a health entity. This revenue is reported in the business risk section of the formula as health ASO/ASC and limited risk revenue.

Line (3) Medicaid Pass-Through Payments Reported as Premiums.

Amount is equal to the total amount reported in PR019 Lines 7.3 and Line 18.3

Line (45) Underwriting Risk Revenue

~~The sum of Lines (1.3)+ Lines (2) – Line (3)through (4).~~

Line (56) Net Incurred Claims

Claims incurred (paid claims + change in unpaid claims) during the reporting year (net of reinsurance) that are arranged for or provided by the insurer. Paid claims include capitation and all other payments to providers for services to covered lives, as well as reimbursement directly to insureds (or their providers) for covered services. Paid claims also include salaries paid to company employees that provide medical services to covered lives and related expenses. This line does not include ASC payments or Federal Employees Health Benefit Program (FEHBP) claims.

PR020 ColumnComprehensive Medical IndividualComprehensive Medical GroupTitle XVIII MedicareTitle XIX MedicaidMedicare SupplementVisionDentalStand-Alone Medicare Part D CoverageAnnual Statement SourceU&I Part 2, Column 7 Line 13.1U&I Part 2, Column 7 Line 13.2U&I Part 2, Column 7 Line 15.6U&I Part 2, Column 7 Line 15.5U&I Part 2, Column 7 Line 15.4U&I Part 2, Column 7 Line 15.1U&I Part 2, Column 7 Line 15.2Company Records

~~Column (1) claims come from Annual Statement, Schedule H, Part 5 Column 1+2+7+8 Line D1 less the amounts reported as incurred claims for Administrative Services Contracts (ASC) in Line (8) of PR013 and Federal Employee Health Benefit Plan (FEHBP) in Line (3) of PR022. Column (2) claims come from Schedule H, Part 5, Column 3, Line D1. Column (3) dental and vision claims come from Schedule H, Part 5, Columns 4+5, Line D11.)~~

For Stand-Alone Medicare Part D Coverage, net incurred claims should reflect claims net of reinsurance coverage (as defined in Appendix 2). Where there has been prepayment under the reinsurance coverage, paid claims should be offset from the cumulative deposits. Unpaid claim liabilities should reflect expected recoveries from the reinsurance coverage – for claims unpaid by the PDP or for amounts covered under the reinsurance coverage that exceed the cumulative deposits. Where there has not been any prepayment under the reinsurance coverage, unpaid claim liabilities should reflect expected amounts still due from CMS.

Line (6) Medicaid Pass-Through Payments Reported as Claims.

Medicaid pass-through payments that were included as claims reported in Line (5)

Line (7) Fee-for-Service Offset

Report fee-for-service revenue that is directly related to medical expense payments. The fee-for-service line does not include revenue where there is no associated claim payment (e.g., fees or charges to nonmember/insured of the company where the provider of the service receives no additional compensation from the company) and when such revenue was excluded from the pricing of medical benefits.

Line (8) Underwriting Risk Incurred Claims

Line (56) – ~~Line (6)~~ minus Line (7).

Line (9) Underwriting Risk Claims Ratio

Line (8) / Line (45). If either Line (45) or Line (8) is zero or negative, Line (9) is zero.

Line (10) Underwriting Risk Factor for Initial Amounts of Premium. Factor applied to the first \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to the first \$3,000,000 in premium for columns (5), (6), (7).

Line (11) Underwriting Risk Factor for Excess of Initial Amount. Factor applied to premium in excess of \$25,000,000 in premium for columns (1), (2), (3), (4), and (8) and applied to premium in excess of \$3,000,000 in premium for columns (5), (6), (7).

Line (12) Investment Income Adjustment Factor

The investment income yield was incorporated into the Comprehensive (Hospital & Medical) individual & group, Medicare Supplement and Dental & Vision lines of business. The purpose was to incorporate an offset to reduce the underwriting risk factor for investment income earned by the insurer. The Working Group incorporated a 4.5% income yield that was based on the yield of a 6-month U.S. Treasury bond. Each year, the Working Group will identify the yield of the 6-month U.S. Treasury bond (U.S. Department of the Treasury) on each Monday through the month of January and determine if further modification to the 4.5% adjustment is needed. Any adjustments will be rounded up to the nearest 0.5%.

Line (10) Underwriting Risk Factor

A weighted average factor based on the amount reported in Line (5), Underwriting Risk Revenue.

	\$0 - \$3 Million	\$3 - \$25 Million	Over \$25 Million
Comprehensive Medical	0.14270.1440	0.14270.1440	0.08320.0844
Medicare Supplement	0.09730.0987	0.05960.0609	0.05960.0609
Dental & Vision	0.11430.1153	0.07060.0716	0.07060.0716
Stand Alone Medicare Part D Coverage	0.251	0.251	0.151

Line (13) Composite Underwriting Risk Factor

A weighted average factor based on the amount reported in Line (4), Underwriting Risk Revenue. Includes the Investment Income Adjustment Factor

Line (14) Base Underwriting Risk RBC

Line (4) x Line (9) x Line (13).

Line (15) Managed Care Discount

For Comprehensive Medical & Hospital Individual, Comprehensive Medical & Hospital Group, Title XVIII Medicare, Title XIX Medicaid, Medicare Supplement (including Medicare Select), Vision, and Dental, a managed care discount, based on the type of managed care arrangements an organization has with its providers, is included to reflect the reduction in the uncertainty about future claims payments attributable to the managed care arrangements. The discount factor is from Column (3), Line (12) of PR021 Underwriting Risk - Managed Care Credit. An average factor based on the combined results of these three categories is used for all three.

For Stand-Alone Medicare Part D Coverage, a separate managed care discount (or federal program credit) is included to reflect only the reduction in uncertainty about future claims payments attributable to federal risk arrangements. The discount factor is from Column (4), Line (12) of PR021 Underwriting Risk - Managed Care Credit.

Line (16) Base RBC After Managed Care Discount

Line (14) x Line (15).

Line (14) RBC Adjustment for Individual

The average Experience Fluctuation Risk charge is increased by 20% for the portion relating to Individual Medical Expense premiums in Column (1). Other types of health coverage do not differentiate between Individual and Group. The additional time necessary to develop sufficient data to make a premium filing with states and then to implement the premium increase was modeled to calculate this factor.

Line (15) Maximum Per Individual Risk After Reinsurance

This is the maximum loss after reinsurance for any single individual. Where specific stop loss reinsurance protection is in place, the maximum per individual risk after reinsurance is equal to the highest attachment point on such stop loss reinsurance, subject to the following:

- Where coverage under non-proportional reinsurance or stop loss protection with the highest attachment point is capped at less than \$750,000 per insured for Comprehensive Medical and \$25,000 for the other three lines, the maximum retained loss will be equal to such attachment point plus the difference between the coverage maximum per claim and \$750,000 or \$25,000, whichever is applicable.
- Where the non-proportional reinsurance or stop loss protection is subject to participation by the company, the maximum retained risk as calculated above will be increased by the company's participation in claims in excess of the attachment point, but not to exceed \$750,000 for Comprehensive Medical and \$25,000 for the other three coverages.

If there is no specific stop loss or reinsurance in place, enter the largest amount payable (within a calendar year) or \$9,999,999 if there is no limit.

Examples of the calculation are presented below:

EXAMPLE 1 (Insurer provides Comprehensive Care):

Highest Attachment Point (Retention)	\$100,000
Reinsurance Coverage	90% of \$500,000 in excess of \$100,000
Maximum Reinsured Coverage	\$600,000 (\$100,000 + \$500,000)
Maximum Retained Risk =	\$100,000 deductible
	+ \$150,000 (\$750,000 - \$600,000)
	+ \$50,000 (10% of \$500,000 coverage layer)
	= \$300,000

EXAMPLE 2 (Insurer provides Comprehensive Care):

Highest Attachment Point (Retention)	\$75,000
Reinsurance Coverage	90% of \$1,000,000 in excess of \$75,000
Maximum Reinsured Coverage	\$1,075,000 (\$75,000 + \$1,000,000)
Maximum Retained Risk =	\$75,000 deductible
	+ \$0 (\$750,000 - \$1,075,000)
	+ \$67,500 (10% of \$675,000 coverage layer)
	= \$142,500

Line (176) Alternate Risk Charge

\$500,000 for Columns (1), (2), (3), and (4); \$50,000 for Columns (5), (6), and (7); and \$150,000 for Column (8). Twice the amount in Line (15), subject to a maximum of \$1,500,000 for comprehensive medical and \$50,000 for Medicare Supplement and Dental. Six times the amount in Line (15), subject to maximum of \$150,000 for Stand Alone Medicare Part D Coverage.

Line (187) Net Alternate Risk Charge

The largest value from Line (16) is retained for that column in line (17) and all others are ignored. The alternate risk charge is \$500,000 per line for medical coverage, \$50,000 total for all other coverage except Medicare Part D coverage, and \$150,000 total for Medicare Part D coverage. Additionally, for multi-line organizations (i.e., writing more than one coverage

type), the total alternate risk charge is the highest of the cumulative alternate risk charges for each of the following: Comprehensive (Comprehensive – Individual, Comprehensive – Group, Title XVIII – Medicare, Title XIX – Medicaid); Medicare Supplement; Dental & Vision (Dental only, Vision Only); Medicare Part D; and Other Health.

Line (198) Net Underwriting Risk RBC

The maximum of Line (164) and Line (187).

(42) Additional Reserves for Credit Disability Plans	Exhibit 6, Column 10, Line 2		\$
(43) Additional Reserves for Credit Disability Plans, prior year	Exhibit 6, Column 10, Line 2, prior year		\$

† The premium amounts in these lines are transferred to LR020 Underwriting Risk – Experience Fluctuation Risk Lines (1.1) and (1.2) for the calculation of risk-based capital. The premium amounts are included here to assist in the balancing of total health premium. If managed care arrangements have been entered into, the company may also complete LR022 Underwriting Risk – Managed Care Credit. In which case, the company will also need to complete LR028 Health Credit Risk in the (C-3) portion of the formula. If there are amounts in any of lines (1) through (6), (13) through (17), or (19) on page LR019 Health Premiums, the company will also be directed to complete the Health Administrative Expense portion of LR029 Business Risk in the (C-4) portion of the formula.

‡ The two tiered calculation is illustrated in the risk-based capital instructions for LR019 Health Premiums.

‡‡ The balance of the RBC requirement for Long Term Care - Morbidity Risk is calculated on page LR023. The premium is shown to allow totals to check to Health Supplement Analysis of Operations.

* If there is premium included on either or both of these lines, the RBC requirement in Column (2) will include 3.5 percent of such premium and \$50,000 (included in the line with the larger premium).

** The factor applies to all Noncancellable premium.

§ These amounts are used to adjust the premium base for single premium credit disability plans that carry additional tabular reserves.

¥ A factor of .350 will be applied to the first \$25,000,000 in Column (1), Line (12) and a factor of .250 will be applied to the remaining premium in excess of \$25,000,000.

Denotes items that must be manually entered on the filing software.

(37) Additional Reserves for Credit Disability Plans	Company records	0	§	
(38) Additional Reserves for Credit Disability Plans, prior year	Company records	0	§	

† The premium amounts in these lines are transferred to PR020 Underwriting Risk – Premium Risk for Comprehensive Medical, Medicare Supplement, Dental & Vision and Stand-Alone Medicare Part D Coverage Lines (1.1) and (1.2) for the calculation of risk-based capital. The premium amounts are included here to assist in the balancing of total health premium. If managed care arrangements have been entered into, the company may also complete PR021 Underwriting Risk – Managed Care Credit. In which case, the company will also need to complete PR013 Health Credit Risk in the formula.

‡ If there are amounts in any of lines (1) through (6), (11) through (15), and (17) on page PR019 Health Premiums, the company will also be directed to complete the Health Administrative Expense portion of PR023.

‡ The two tiered calculation is illustrated in the risk-based capital instructions for PR019 Health Premiums.

‡ ‡ The balance of the RBC requirement for Long Term Care - Morbidity Risk is calculated on Page PR023. The premium is shown to allow totals to check to U&I Part 1.

* If there is premium included on either or both of these lines, the RBC value in Column (2) will include 3.5% of such premium and \$50,000 (included in the line with the larger premium).

** The factor applies to all Noncancellable premium.

§ These amounts are used to adjust the premium base for single premium credit disability plans that carry additional tabular reserves.

¥ A factor of .350 will be applied to the first \$25,000,000 in Column (1), Line (16) and a factor of .250 will be applied to the remaining premium in excess of \$25,000,000.

Denotes items that must be manually entered on the filing software.

DESCRIPTION/REASON OR JUSTIFICATION OF CHANGE(S)

Annual update of the underwriting factors for Comprehensive Medical, Medicare Supplement, and Dental & Vision for the investment income adjustment.

Update the Underwriting factors for Comprehensive Medical, Medicare Supplement, and Dental & Vision on pages XR013, LR019, LR020, PR019, and PR020 for the investment income adjustment.

Implements the stand-alone investment income factor.

Additional Staff Comments:

February 27, 2026

Steve Drutz
 Chair, Health Risk-Based Capital (E) Working Group
 National Association of Insurance Commissioners (NAIC)

Re: Request for a standalone Investment Income Adjustment factor to incorporate into the Underwriting Risk Component of the Health Risk-Based Capital (HRBC) Formula

Dear Mr. Drutz:

On behalf of the Health Underwriting Risk Factors Analysis Work Group of the Health Solvency Subcommittee of the American Academy of Actuaries (Academy),¹ I am writing in response to the Health Risk-Based Capital (E) Working Group's request for guidance on how to calculate a standalone Investment Income Adjustment (IIA) factor for use within the H2–Underwriting Risk component of the Health Risk-Based Capital (HRBC) formula.

Definition of a standalone IIA factor

Using the previously provided Investment Income Adjusted Tiered Risk-Based Capital (RBC) Factors table (reproduced in Attachment A), a standalone IIA factor for a given product and tier can be calculated as a ratio:

$$\text{IIA}_{p,t}(r) = \frac{F_{p,t}(r)}{F_{p,t}(0.0\%)}$$

where:

- p = product (e.g., Comprehensive Medical),
- t = tier (e.g., High Tier or Low Tier),
- r = assumed investment return, and
- $F_{p,t}(r)$ = the investment-income-adjusted tiered RBC factor from Attachment A at return r .

Under this approach, the IIA factor can be used as a multiplicative adjustment to reflect alternative investment return assumptions. If the working group elects to apply an IIA factor directly to an existing base underwriting factor (rather than re-basing to a 0.0% reference), the denominator should be aligned to the return assumption embedded in that base factor.

Calculation steps

1. Identify the applicable product and tier in Attachment A.
2. Select the assumed investment return r .

¹ The American Academy of Actuaries is a 20,000-member professional association whose mission is to serve the public and the U.S. actuarial profession. For 60 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

3. Obtain $F_{p,t}(r)$ from the table. If r falls between listed rows, a linear interpolation between the adjacent rows is likely reasonable.
4. Obtain the corresponding $F_{p,t}(0.0\%)$ from the 0.0% row for that same product and tier.
5. Compute $\text{IIA}_{p,t}(r) = F_{p,t}(r)/F_{p,t}(0.0\%)$.

Worked examples (from Attachment A)

- **Comprehensive Medical, High Tier, 4.0% return:**
 $F(4.0\%) = 14.47\%$ and $F(0.0\%) = 15.00\%$, so
 $\text{IIA} = 14.47\%/15.00\% = 0.965$.
- **Comprehensive Medical, Low Tier, 4.0% return:**
 $F(4.0\%) = 8.50\%$ and $F(0.0\%) = 9.00\%$, so
 $\text{IIA} = 8.50\%/9.00\% = 0.944$.

If you have any questions or would like to discuss further, please contact Katie Dzurec, the Academy's State Public Policy Outreach Director, at Dzurec@actuary.org.

Sincerely,

Derek Skoog, MAAA, FSA
Chairperson, Health Underwriting Risk Factors Analysis Work Group
American Academy of Actuaries

Dental Only	12.00%	16.40%	4.40%	1.47%	13.47%
Vision Only	12.00%	9.40%	-2.60%	-0.87%	11.13%

	Excess Factor				
	Original	New	Difference	1/3	Phase in
Comprehensive Ind	9.00%	13.80%	4.80%	1.60%	10.60%
Comprehensive Group	9.00%	4.80%	-4.20%	-1.40%	7.60%
Title XVIII Medicare	9.00%	4.40%	-4.60%	-1.53%	7.47%
Title XIX Medicaid	9.00%	8.30%	-0.70%	-0.23%	8.77%
Medicare Supplement	6.70%	0.50%	-6.20%	-2.07%	4.63%
Stand-Alone Part D	15.10%	6.00%	-9.10%	-3.03%	12.07%
Dental Only	7.60%	1.10%	-6.50%	-2.17%	5.43%
Vision Only	7.60%	-5.70%	-13.30%	-4.43%	3.17%

	Premium Tier (In Millions)				
	Original	New	Difference	1/3	Phase in
Comprehensive Ind	25.00	100.00	75.00	25.00	50.00
Comprehensive Group	25.00	100.00	75.00	25.00	50.00
Title XVIII Medicare	25.00	100.00	75.00	25.00	50.00
Title XIX Medicaid	25.00	100.00	75.00	25.00	50.00
Medicare Supplement	3.00	10.00	7.00	2.33	5.33
Stand-Alone Part D	25.00	100.00	75.00	25.00	50.00
Dental Only	3.00	10.00	7.00	2.33	5.33
Vision Only	3.00	10.00	7.00	2.33	5.33

The analysis was performed with both the current premium tiers and an increase to the tiers equal to a third of the increase the Academy included in the H2 Underwriting Risk Report.

The following assumptions were used:

- Investment Income Adjustment factors remain the same for new factors, utilizing the stand-alone factor methodology.
- Alternate Risk Change is implementation from 2025-15-CA MOD.
- 2024 uses a 5.5% investment yield, 2025 uses a 4.5% investment yield.

		2025						
Original vs No Tier Change	No Tier Change		CAL	RAL	ACL	MCL	Grand Total

Grand Total	970	32	9	6	0	8	1025	
Total Adverse:							40	

The 2025 data was pulled on March 10, 2026.

The number of Health Risk-Based Capital filings for 2025 is expected to increase through April 2026. Complete data for 2025 would be available during the early summer if additional analyses are requested.

2024

Original vs No Tier Change Original Filing	No Tier Change						Grand Total
	No Action	Trend Test	CAL	RAL	ACL	MCL	
No Action	1084	21					1105
Trend Test	3	8	5				16
CAL			7	1			8
RAL				3			3
ACL				1	6		7
MCL						4	4
Grand Total	1087	29	12	5	6	4	1143

Total Adverse: 27

Original vs Tier Change Original Filing	Tier Change						Grand Total
	No Action	Trend Test	CAL	RAL	ACL	MCL	
No Action	1062	39	4				1105
Trend Test	3	7	4	2			16
CAL			4	4			8
RAL				2	1		3
ACL				1	3	3	7
MCL						4	4
Grand Total	1065	46	12	9	4	7	1143

Total Adverse: 57

Increasing the tiers along with the factors approximately doubles the amount of companies who experience an adverse change in their RBC Action Level. In the initial analysis, the total number of companies that experienced adverse change to their RBC Action Level was 153 companies when utilizing the full factor change and full premium tier change from the Academy report, when using a third of the factor and tier increase for 2024 filings 57 companies experience adverse change to their RBC Action Level.

Discussion about the inclusion of a diversification factor for companies that write multiple lines of business reported on page XR013 of the Health Risk-Based Capital report has been part of the factor discussions. Included below is a table of 2024 filings with the number of lines of business written by each company that appear on XR013 if they were to report in the structure presented in 2025-15-CA MOD. As an example:

- A Company writing Comprehensive Group and Comprehensive Individual writes 2 lines of business.
- A company writing Title XIX Medicaid, Dental, and Stand-alone Medicare Part D writes 3 lines of business.

2024

Number of XR013 Business Lines	Number of Companies	% of Filers
0	130	11.4%
1	489	42.8%
2	200	17.5%
3	140	12.2%

About the Academy

Mission:

To serve the public and the U.S. actuarial profession

Community:

Serving over 20K MAAs & public stakeholders for 60 years

Standards:

Setting qualification, practice, and professionalism standards

Impact:

Delivering over 300 insight-driven publications & resources annually

Visit www.actuary.org to learn more.

BACKGROUND

Key Highlights From Previous Research

4

AUTHOR	YEAR	Title	Main Drivers of Impairment
Academy	2010	Property/Casualty Insurance Company Insolvencies	Inadequate loss reserves; inadequate pricing; rapid growth; mismanagement
CAS	2012	A Review of Historical Insurance Company Impairments	Middle-sized companies show highest impairment rates
SOA/CAS/ CIA	2018	Actuarial Review of Insurer Insolvencies and Future Preventions	Premium growth; profitability; liquidity; investment mix; leverage; RBC ratio

Observations about previous studies

5

1. Academy and CAS studies included only P&C firms
2. SOA/CAS/CIA study included 76 firms across Life, Health and P&C
3. None of the studies provided quantitative impacts for RBC ratios on the probability of impairment or insolvency
4. None of the studies examined all of the drivers in a multivariate analysis

Other Relevant Research

6

Canadian Property and Casualty Insurance Compensation Corporation (PACICC):

- [Global Failed Insurer Catalog](#) (including Life, P&C, Composite, and Reinsurance)
- [Research on Why P&C Insurers Fail](#)

Board of Governors of the Federal Reserve System. [Comparing Capital Requirements in Different Regulatory Frameworks](#) (2019). Including a careful analysis of the relationship between RBC ratios and defaults for U.S. Life and P&C insurers.

Definition of Impairment, from AM Best

7

"[S]ituations in which a company has been placed, via court order, into conservation, rehabilitation, or insolvent liquidation. Supervisory actions undertaken by state insurance department regulators without court order are not considered impairments, unless there are clear indications that policyholder payments may be delayed or otherwise limited in some manner through the regulatory oversight process."

- AM Best, [2023 U.S. Property/Casualty Impairments Update](#), Jan. 31, 2025, p1.

Data

8

Results of matching impairment data with RBC ratio data				
	Companies with RBC data (S&P)	Companies with impairment data (AM Best)	% Matched	% Impaired (total)
P&C	4218	433	87%	10%
Health	2147	105	82%	5%
Life	1805	88	82%	5%
Total	8170	626	86%	8%

1. Downloaded ACL RBC ratios from 1996 to 2023 from S&P Capital IQ Pro for all life, health, and P&C insurance companies that had data for those years
2. Downloaded impairment data from AM Best Impairment Reports for all life, health, and P&C insurance companies that experienced an impairment between 2000 to 2023
3. Matched impairment and ACL RBC ratios using state of domicile and the name of the company because AM Best does not use NAIC codes
4. Results only for 2011-2023.

Methods

9

- We assessed whether a meaningful relationship exists by looking at how closely differences in RBC ratios align with differences in the likelihood of impairment. This was done by analyzing max rescaled R-squared (RSQ) values from logistic regressions as an indicator of goodness of fit.
- We selected the “best” sample for each line of insurance by optimizing RSQ and the number of impaired companies in the filtered sample.
- We calculated the estimated probability of impairment by applying the parameters estimated in the logistic regression on the “best” sample to various levels of RBC ratios.

RESULTS

Extent of Variation in Impairments Accounted For by ACL RBC Ratios (R^2), by Line of Business (2011-2023)

11

**All Insurers Included:
Little correlation**

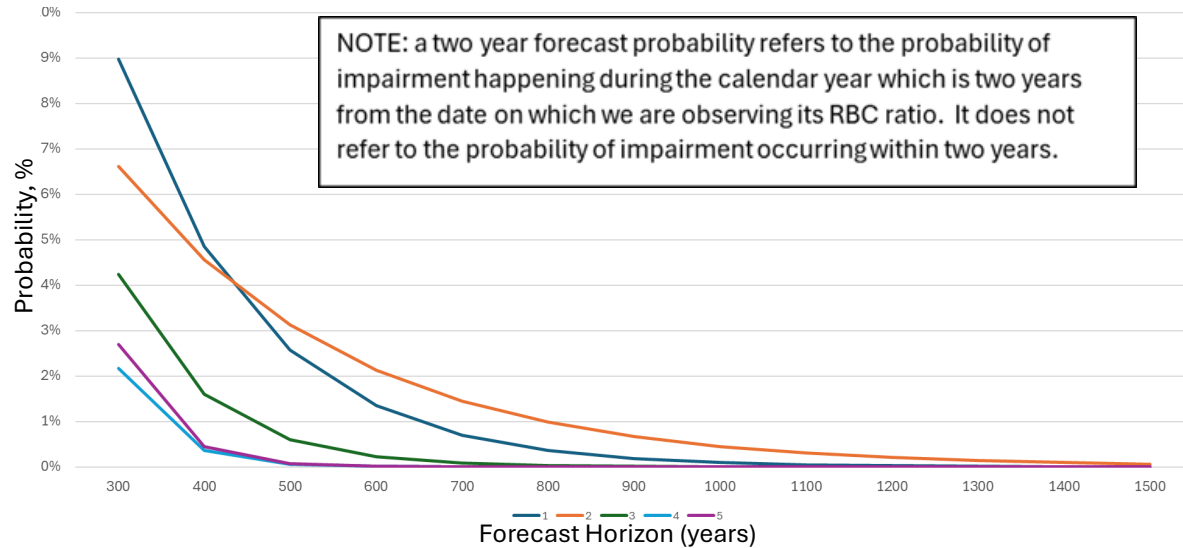

**Large RBC ratios (> 1000%-1500%) and
Small size (smallest 10%)
Insurers Excluded: More correlation**

Health Probability of Impairment (2011-2023)

12

Takeaways

- Probabilities of impairment forecast are much higher in years 1-2 than 3-5
- For RBC ratios of 600+, the probability of impairment is approximately 2% or less for all forecast periods
- With RBC ratios of 1000, all forecast probabilities approach 0

Probability of Impairment by RBC level and Forecast Horizon (years)

13

ACL RBC	Health				
	1	2	3	4	5
1500	0%	0%	0%	0%	0%
1400	0%	0%	0%	0%	0%
1300	0%	0%	0%	0%	0%

400	5%	5%	2%	0%	0%
300	9%	7%	4%	2%	3%
	1	2	3	4	5

Forecast Horizon (years)

Key Takeaways

14

- RBC ratios, on their own, show little meaningful relationship with impairment experience.
- Once we remove very small insurers and companies with extremely high capital levels, a much clearer and more stable predictive pattern emerges.
- In these filtered samples, RBC levels become materially less informative of impairment risk when ACL RBC ratios exceed 1000% - 1500%.

Next steps: In addition to sensitivity testing of the results presented here, the relationship between the RBC ratios and impairment risk when accounting for other factors, which are very likely also related, will be examined.
