2021 Proceedings of the
National Association of Insurance Commissioners

2021 Fall National Meeting
December 13 – 16, 2021

Held at the
Hilton San Diego Bayfront & Omni San Diego
San Diego, California
The NAIC is the authoritative source for insurance industry information. Our expert solutions support the efforts of regulators, insurers and researchers by providing detailed and comprehensive insurance information. The NAIC offers a wide range of publications in the following categories:

**Accounting & Reporting**
Information about statutory accounting principles and the procedures necessary for filing financial annual statements and conducting risk-based capital calculations.

**Special Studies**
Studies, reports, handbooks and regulatory research conducted by NAIC members on a variety of insurance related topics.

**Consumer Information**
Important answers to common questions about auto, home, health and life insurance — as well as buyer’s guides on annuities, long-term care insurance and Medicare supplement plans.

**Statistical Reports**
Valuable and in-demand insurance industry-wide statistical data for various lines of business, including auto, home, health and life insurance.

**Financial Regulation**
Useful handbooks, compliance guides and reports on financial analysis, company licensing, state audit requirements and receiverships.

**Supplementary Products**
Guidance manuals, handbooks, surveys and research on a wide variety of issues.

**Legal**
Comprehensive collection of NAIC model laws, regulations and guidelines; state laws on insurance topics; and other regulatory guidance on antifraud and consumer privacy.

**Capital Markets & Investment Analysis**
Information regarding portfolio values and procedures for complying with NAIC reporting requirements.

**Market Regulation**
Regulatory and industry guidance on market-related issues, including antifraud, product filing requirements, producer licensing and market analysis.

**White Papers**
Relevant studies, guidance and NAIC policy positions on a variety of insurance topics.

**NAIC Activities**
NAIC member directories, in-depth reporting of state regulatory activities and official historical records of NAIC national meetings and other activities.

CERTIFICATE OF INCORPORATION OF
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS
a Nonstock Corporation

I. Name

The name of the Corporation is: National Association of Insurance Commissioners (NAIC).

II. Duration

The period of duration of the NAIC is perpetual.

III. Registered Office and Agent

The NAIC’s Registered Office in the State of Delaware is to be located at: 1209 Orange St., in the City of Wilmington, Zip Code 19801. The registered agent in charge thereof is The Corporation Trust Company.

IV. Authority to Issue Stock

The NAIC shall have no authority to issue capital stock.

V. Incorporators

The name and address of the incorporator are as follows:
Catherine J. Weatherford
National Association of Insurance Commissioners
120 W. 12th St., Suite 1100
Kansas City, MO 64106

VI. Purpose

The NAIC is organized exclusively for charitable and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), including without limitation, to assist state insurance regulators, individually and collectively, in serving the public interest and achieving the following fundamental insurance regulatory goals in a responsive, efficient and cost-effective manner, consistent with the wishes of its members:

(a) Protect the public interest, promote competitive markets and facilitate the fair and equitable treatment of insurance consumers;

(b) Promote, in the public interest, the reliability, solvency and financial solidity of insurance institutions; and

(c) Support and improve state regulation of insurance.

VII. Restrictions

A. No substantial part of the activities of the Corporation shall be the carrying of propaganda, or otherwise attempting to influence legislation except as otherwise permitted by Section 501(h) of the Code and in any corresponding laws of the State of Delaware, and the Corporation shall not participate in or intervene in including the publishing or distribution of statements concerning any political campaign on behalf of or in opposition to any candidate for public office.

B. For any period for which the Corporation may be considered a private foundation, as defined in Section 509(a), the Corporation shall be subject to the following restrictions and prohibitions:

1. The Corporation shall not engage in any act of self-dealing as defined in section 4941(d) of the Code.

2. The Corporations shall make distributions for each taxable year at such time and in such manner so as not to become subject to the tax on undistributed income imposed by section 4942 of the Code.

3. The Corporation shall not retain any excess business holdings as defined in section 4943(c) of the Code.

4. The Corporation shall not make any investments in such manner as to subject it to tax under section 4944 of the Code.

5. The Corporation shall not make any taxable expenditures as defined in section 4945(d) of the Code.
VIII. Membership

The NAIC shall have one class of members consisting of the Commissioners, Directors, Superintendents, or other officials who by law are charged with the principal responsibility of supervising the business of insurance within each State, territory, or insular possession of the United States. Members only shall be eligible to hold office in and serve on the Executive Committee, Committees and Subcommittees of the NAIC. However, a member may be represented on a Committee or Subcommittee by the member’s duly authorized representative as defined in the Bylaws. Only one official from each State, territory or insular possession shall be a member and each member shall be limited to one vote. Any insurance supervisory official of a foreign government or any subdivision thereof, which has been diplomatically recognized by the United States government, may attend and participate in all meetings of this Congress but shall not be a member and shall not have the power to vote.

IX. Activities

The NAIC is a nonprofit charitable and educational organization and no part of the net earnings or property for the corporation will inure to the benefit of, or be distributable to its members, directors, officers or other private individuals, except that the NAIC shall be authorized and empowered to pay reasonable compensation for services rendered by employees and contractors, and to make payments and distributions in furtherance of the purposes set forth in Article VI hereof.

X. Powers

The NAIC shall have all of the powers conferred by the Delaware General Corporation Law for non-profit corporations, except that, any other provision of the Certificate to the contrary notwithstanding, the NAIC shall neither have nor exercise any power, nor carry on any other activities not permitted: (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); or (b) by a corporation contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986, as amended, (or the corresponding provision of any future United States Internal Revenue law).

XI. Immunity

All officers and members of the Executive Committee shall be immune from personal liability for any civil damages arising from acts performed in their official capacity, and shall not be compensated for their services as an officer or member of the Executive Committee on a salary or a prorated equivalent basis. The immunity shall extend to such actions for which the member of the Executive Committee or officer would not otherwise be liable, but for the Executive Committee member’s or officer’s affiliation with the NAIC. This immunity shall not apply to intentional conduct, wanton or willful conduct or gross negligence. Nothing herein shall be construed to create or abolish an immunity in favor of the NAIC itself. Nothing herein shall be construed to abolish any immunities held by the state officials pursuant to their individual state’s law.

XII. Exculpation and Indemnification

A member of the Executive Committee shall not be liable to the NAIC or its members for monetary damages for breach of fiduciary duty as a member of the Executive Committee, provided that this provision shall not eliminate or limit the liability of a member of the Executive Committee for any breach of the duty of loyalty to the NAIC or its members, for acts or omissions not in good faith, or which involve intentional misconduct or a knowing violation of law, or for any transaction from which the member of the Executive Committee involved derived an improper personal benefit. Any amendment, modification or repeal of the foregoing sentence shall not adversely affect any right or protection of a member of the Executive Committee of the Corporation hereunder in respect of any act or omission occurring prior to the time of such amendment, modification, or repeal. If the Delaware General Corporation Law hereafter is amended to authorize the further elimination or limitation of the liability of the members of the Executive Committee, then the liability of a member of the Executive Committee, in addition to the limitation provided herein, shall be limited to the fullest extent permitted by the amended Delaware General Corporation Law.

The NAIC shall indemnify to the full extent authorized or permitted by the laws of the State of Delaware, as now in effect or as hereafter amended, any person made or threatened to be made a party to any threatened, pending or completed action, suit or proceeding (whether civil, criminal, administrative or investigative, including an action by or in the right of the NAIC) by reason of the fact that the person is or was a member of the Executive Committee, officer, member, committee member, employee or agent of the NAIC or serves any other enterprise as such at the request of the NAIC.
The foregoing right of indemnification shall not be deemed exclusive of any other rights to which such person may be entitled apart from this Article XII. The foregoing right of indemnification shall continue as to a person who has ceased to be a member of the Executive Committee, officer, member, committee member, employee or agent and shall inure to the benefit of the heirs, the executors and administrators of such a person.

XIII. Dissolution

In the event of the dissolution of the NAIC, the Executive Committee shall, after paying or making provision for the payment of all of the liabilities of the NAIC, dispose of all the assets of the NAIC equitably to any state government which is represented as a member of the NAIC at the time of dissolution, provided that the assets are distributed upon the condition that they be used primarily and effectively to implement the public purpose of the NAIC, or to one or more such organizations organized and operated exclusively for religious, charitable, education, scientific, or literary purposes or similar purposes as shall at the time qualify: (a) as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); and (b) as an organization contributions to which are deductible under Section 170(c) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), as the Executive Committee shall determine.

XIV. Bylaws

The Bylaws of the NAIC may prescribe the powers and duties of the several officers, members of the Executive Committee and members and such rules as may be necessary for the work of the NAIC provided they are in conformity with the Certificate of Incorporation.

XV. Amendments

This Certificate of Incorporation may be altered or amended at any meeting of the full membership (Plenary Session) of the NAIC by an affirmative vote of two-thirds of the members qualified to vote, or their authorized representatives, provided that previous notice of the proposed amendment has been mailed to all members by direction of the Executive Committee at least thirty (30) days prior to the meeting.

IN WITNESS WHEREOF, this Certificate of Incorporation has been signed this 4th day of October 1999.

/signature/
Catherine J. Weatherford, Incorporator

ADOPTED 1999, Proc. Third Quarter
BYLAWS OF THE
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

ARTICLE I Name, Organization and Location

The name of this corporation is NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS (NAIC). The NAIC is organized under the General Corporation Law of the State of Delaware. The NAIC may have one (1) or more office locations within or without the State of Delaware as the Executive Committee may from time to time determine.

ARTICLE II Membership

The Membership of the NAIC shall be comprised of those persons designated as members in the Certificate of Incorporation. Each member of the NAIC shall have the power to vote and otherwise participate in the affairs of the NAIC as set forth herein or as required by applicable law. This power may be exercised through a duly authorized representative who shall be a person officially affiliated with the member’s department and who is wholly or principally employed by said department.

The organization may charge members an annual assessment, the amount of which shall be determined by the Executive Committee. Members failing to pay all NAIC assessments on a timely basis shall be placed in an inactive status. Members in an inactive status shall not have any voting rights and shall be denied membership on NAIC committees and task forces, access to mailings and services of the NAIC Offices, as well as access to zone examination processes and other benefits of membership in the NAIC.

The NAIC’s receipt of full payment from the inactive member of all current and past due assessments shall serve to immediately remove them from inactive status.

The Membership of the NAIC shall be subject to a conflict of interest policy and disclosure form as adopted by the members.

The Executive Committee is empowered to reinstate, in part or in whole, an inactive member’s participation on the committees and task forces, access to mailings and services of the NAIC Offices and satellite offices, as well as access to zone examination processes, and other benefits of membership in the NAIC upon good cause shown as determined by the Executive Committee.

ARTICLE III Officers

The officers of the NAIC shall be a President, a President-Elect, a Vice President, and a Secretary-Treasurer. Annual officer elections shall be held at the last regular National Meeting of each calendar year or at such other plenary session as agreed to by the members. The voting membership, by secret ballot, shall elect officers as provided in these Bylaws. Officers’ terms shall be for one year, beginning on January 1 following their election. The officers shall hold office until their death, resignation, removal or the election and qualification of their successors, whichever occurs first. Any Officer may resign at any time by giving notice thereof in writing to the President of the NAIC. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

If an interim vacancy occurs in the office of President, the President-Elect shall cease to hold his or her office effective immediately and shall assume the office of President. If an interim vacancy occurs in any one or more of the other officer positions, an interim election shall be held to fill the vacancy. No member may hold any office for more than two consecutive years. Notwithstanding the foregoing, at no time shall more than two officer positions be filled by members of the same Zone during the same term. Any officer may be removed from office by the affirmative vote of two-thirds (2/3) of the members, but only after a resolution for removal is adopted by two-thirds (2/3) of the Executive Committee whenever, in their judgment, the best interests of the NAIC would be served thereby.

The President shall serve as Chairman of the Executive Committee and shall preside at all special and regular meetings of the members. The President shall serve as the leader of the organization and its principal spokesperson. The President shall work closely with the Executive Committee to establish and achieve the strategic, business and operational goals of the organization; ensure appropriate policies and procedures for the organization are implemented and followed; and protect the integrity as well as the resources of the organization. After a member completes his or her term or terms as President, he or she shall not be able to hold another officer position for a period of twelve (12) months from the date such member completes his or her term or terms as President, which shall be referred to as a "waiting period"; provided however, the Executive Committee may waive the twelve month waiting period if warranted by exigent circumstances.
The President-Elect shall serve as Vice-Chairman of the Executive Committee. In the absence of the President at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, the President-Elect shall preside over such meeting to the extent of the President’s absence. The President-Elect shall perform such other duties and tasks as may be assigned by the President. Where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President’s term of office.

The Vice President, in the absence of the President and President-Elect at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, shall preside over such meeting to the extent of the President’s and the President-Elect’s absence; and shall perform such other duties as may be assigned by the President or President-Elect, or in the absence thereof, by the Executive Committee.

The Secretary-Treasurer shall assist the President and, as applicable, the President-Elect or the Vice President in the conduct of meetings of the Executive Committee and members. For member meetings, the Secretary-Treasurer shall call the roll of the membership and certify the presence of a quorum and shall receive, validate and maintain all proxies for elections held at member meetings. The Secretary-Treasurer shall also recommend to the Executive Committee such policies and procedures to maintain the history and continuity of the NAIC. The Secretary-Treasurer shall also assist the President and President-Elect in all matters relating to the budget, accounting, expenditure and revenue practices of the NAIC; including, but not limited to reviewing the financial information of the organization and consulting with NAIC management, independent auditors, and other necessary parties regarding the financial operations and condition of the organization.

**ARTICLE IV Executive Committee**

The business and affairs of the NAIC shall be managed by and under the direction of the Executive Committee. The Executive Committee shall be made up entirely of members of the NAIC. The Executive Committee shall consist of the following members: the officers of the NAIC; the most recent past president; the twelve (12) members of the zones as provided for in Article V of these Bylaws. The members of the Executive Committee shall be subject to a conflict of interest policy as adopted by the members. Any Executive Committee member may resign at any time by giving notice thereof in writing to the members of the NAIC. Resignation as an Executive Committee member also operates as resignation as a Zone officer. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

1. The Executive Committee shall have the authority and responsibility to:

   (a) manage the affairs of the NAIC in a manner consistent with the Certificate of Incorporation and Bylaws;

   (b) make recommendations to achieve the goals of the NAIC based upon either its own initiative or the recommendations of the Standing Committees or Subcommittees reporting to it, for consideration and action by the members at any NAIC Plenary Session;

   (c) create and terminate one or more Task Forces reporting to it to the extent needed and appropriate;

   (d) establish and allocate, from time to time, functions and responsibilities to be performed by each Zone;

   (e) to the extent needed and appropriate, oversee NAIC Offices to assist the NAIC and the individual members in achieving the goals of the NAIC;

   (f) submit to the NAIC at each National Meeting, during which a Plenary Session is held, its report and recommendations concerning the reports of the Standing Committees. All Standing Committee reports shall be included as part of the Executive Committee report;

   (g) plan, implement and coordinate communications and activities with other state, federal and local government organizations in order to advance the goals of the NAIC and promote understanding of state insurance regulation.
2. Duties and Operations of the Executive Committee.

(a) The Executive Committee shall hold at least two (2) regular meetings annually at a designated time and place. Special meetings may be held when called by the President, or by at least three (3) members of the Executive Committee in writing. In any case, the Executive Committee shall meet at least once per calendar month. At least five (5) days notice shall be given of all regular and special meetings. Meetings may be held in person or by means of conference telephone or other communication equipment by means of which all persons participating in the meeting can hear each other, and such participation in a meeting shall constitute presence in person at such meeting in accordance with applicable laws. The presiding member of the Executive Committee shall only cast his or her vote in order to break a tie vote. In addition, the Executive Committee may act by written consent as provided by law.

(b) The Executive Committee may, with the concurrence of two-thirds of the members of the Executive Committee, establish rules for its conduct that shall not conflict with the Certificate of Incorporation and Bylaws. Such rules may be changed only by a concurrence of two-thirds of the members of the Executive Committee after twenty-four (24) hours notice to all members of the Executive Committee.

(c) Any action required or permitted to be taken at any meeting of the Executive Committee or any committee thereof may be taken without a meeting if all members of the Executive Committee or such committee, as the case may be, consent thereto in writing in accordance with applicable law.

(d) The Executive Committee shall cause to be kept minutes of its meeting and have information of any action of a general character taken by it published to members qualified to vote.

(e) NAIC OFFICES

(i) The Executive Committee shall oversee an Executive Office and a Central Office with management and staff personnel and appropriate resources for performance of duties and assigned responsibilities. Additional satellite offices may be established as needed. The Executive Committee shall have the authority to select, employ and terminate a Chief Executive Officer who shall not be a member of the NAIC and who shall have the primary responsibility for the internal management and functioning of the NAIC Offices within the direction of the Executive Committee, as well as other duties assigned by the Executive Committee through execution of an Employment Agreement or other authorization. The Chief Executive Officer appointed by the Executive Committee pursuant to this section shall not be considered an officer for purposes of Article III hereof and shall not be a member of the Executive Committee. The Executive Committee, through the Internal Administration (EX1) Subcommittee, shall provide oversight and direction to the Chief Executive Officer regarding Office operations.

(ii) Consistent with the purposes of the NAIC, the role of the NAIC Offices is to: (1) provide services to the NAIC through support to the NAIC Committees, Subcommittees, Task Forces or otherwise; (2) provide services to individual State insurance departments; and (3) develop recommendations for consideration as to NAIC policy and administrative decisions of the NAIC.

(iii) In performing its role, subject to the oversight and direction specified in (paragraph i) the NAIC Offices may engage in a variety of functions including but not limited to the following: research; analysis; information gathering and dissemination; library services; data collection; data base building and maintenance; report generation and dissemination; government liaison; non-regulatory liaison; securities valuation; administration; litigation; legislative and regulatory drafting; and educational development.

(iv) The Chief Executive Officer shall prepare an annual budget, related to the priorities of the NAIC, for the NAIC Offices to be submitted through the EX1 Subcommittee to the Executive Committee, which shall make its recommendations to the members of the NAIC for action at the next Plenary Session of the NAIC.
3. Internal Administration (EX1) Subcommittee

The Internal Administration (EX1) Subcommittee shall be a Subcommittee reporting to the Executive Committee. Appointments of the Chair and Vice Chair of the Executive Subcommittee and members other than those specifically designated herein shall be made by the President and President-Elect.

This Subcommittee shall be comprised of the President, President-Elect, Vice President, the Secretary-Treasurer, the most recent past President, and three (3) other members of the Executive Committee. The presiding member of the Subcommittee shall only cast his or her vote in order to break a tie vote.

The Internal Administration (EX1) Subcommittee shall:

(a) Exercise such powers and authority as may be delegated to it by the Executive Committee.

(b) Generally oversee the NAIC Offices including, without limitation: (i) periodically monitor operations of the NAIC Offices, (ii) review and revise the budget of the NAIC, hold an annual hearing to receive public comments on the budget of the NAIC, and submit the revised budget to the Executive Committee, (iii) approve emergency expenditures which vary from the adopted budget and promptly certify its action in writing to the Executive Committee, (iv) evaluate the Chief Executive Officer and make appropriate recommendations to the Executive Committee, (v) assist the Chief Executive Officer in resolving competing demands for NAIC resources, (vi) review compensation of all senior management and (vii) quarterly prepare a report containing the current budget and expenditures which the Secretary-Treasurer shall present to the Executive Committee.

4. Audit Committee

The Executive Committee shall appoint an Audit Committee made up of at least four (4) members of the NAIC, including at least one member from each zone, in addition to the NAIC Secretary-Treasurer. The NAIC Secretary-Treasurer shall chair the Audit Committee. The Audit Committee shall report to the Executive Committee without any NAIC employees being present. The Audit Committee shall be directly responsible for the appointment, compensation, and oversight of the independent certified public accountant employed to conduct the audit. The Audit Committee shall also have the power, to the extent permitted by law, to: (i) initiate or review the results of an audit or investigation into the business affairs of the NAIC; (ii) review the NAIC’s financial accounts and reports; (iii) conduct pre-audit and post-audit reviews with NAIC staff, members and independent auditors; and (iv) exercise such other powers and authority as delegated to it by the Executive Committee.

ARTICLE V Zones

To accomplish the purposes of the NAIC in a timely and efficient manner, the United States, its territories and insular possessions shall be divided into four Zones. Each Zone shall consist of a group of at least eight States, located in the same geographical area, with each State being contiguous to at least one other State in the group so far as practicable, plus any territory or insular possession that may be deemed expedient, all as determined by majority of the Executive Committee. Members of each Zone shall annually elect a Chairman, a Vice Chairman and a Secretary from among themselves prior to or during the last regular National Meeting of each calendar year or at such time as agreed to by the Zone members. The Chairman, Vice Chairman and Secretary of each Zone shall be members of the Executive Committee with terms of office corresponding to that of the officers. Each Zone shall perform such functions as are designated by the Executive Committee of the NAIC or by the members of the NAIC as a whole or by the members of the Zone. Each Zone may hold Zone Meetings for such purposes as may be deemed appropriate by members of the Zone.

ARTICLE VI Standing Committees and Task Forces

1. General

The Standing Committees shall not be subcommittees of the Executive Committee and shall have no power or authority for the management of the business and affairs of the NAIC. Each Standing Committee shall be composed of not more than 15 members, including a Chair and one or more Vice Chairs, appointed by the President and President-Elect, and such appointments shall remain effective until the succeeding President and President-Elect appoint members for the following year. Standing Committees shall meet at least twice a year at National Meetings and may meet more often at the call of the Chair as required to complete its assignments from the Executive Committee in a timely manner.
The Executive Committee shall make all assignments of subject matter to the Standing Committees and shall require coordination between Committees and Task Forces of the subject matter if more than one Committee or Task Force is affected. The format of the Committee reports shall be prescribed by the Executive Committee. All appointments or elections of members of the NAIC to any office or Committee of the NAIC shall be deemed the appointment or election of a particular member and shall not automatically pass to a successor in office.

2. Specific Duties

The Standing Committees of the NAIC, their duties and responsibilities shall be as follows:

(a) Life Insurance and Annuities (A) Committee: This Standing Committee shall consider issues relating to life insurance and annuities.

(b) Health Insurance and Managed Care (B) Committee: This Standing Committee shall consider issues relating to health and accident insurance and managed care.

(c) Property and Casualty Insurance (C) Committee: This Standing Committee shall consider issues relating to personal and commercial lines of property and casualty insurance, worker’s compensation insurance, statistical information, surplus lines, and casualty actuarial matters.

(d) Market Regulation and Consumer Affairs (D) Committee: This Standing Committee shall consider issues involving market conduct in the insurance industry; competition in insurance markets; the qualifications and conduct of agents and brokers; market conduct examination practices; the control and management of insurance institutions; consumer services of State insurance departments; and consumer participation in NAIC activities.

(e) Financial Condition (E) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to accounting practices and procedures; blanks; valuation of securities; the Insurance Regulatory Information System (IRIS), as it relates to solvency and profitability; the call, monitoring and concluding report of Zone Examinations; and financial examinations and examiner training.

(f) Financial Regulation Standards and Accreditation (F) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to administration and enforcement of the NAIC Accreditation Program, including without limitation, consideration of standards and revisions of standards for accreditation, interpretation of standards, evaluation and interpretation of states’ laws and regulations, and departments’ practices, procedures and organizations as they relate to compliance with standards, examination of members for compliance with standards, development and oversight of procedures for examination of members for compliance with standards, qualification and selection of individuals to perform the examination of members for compliance with standards, and decisions regarding whether to accredit members.

(g) International Insurance Relations (G) Committee. This Standing Committee shall have the responsibility for issues relating to international insurance.

3. Task Forces

The Executive Committee, its Subcommittee and the Standing Committees may establish one or more Task Forces, subject to approval of the Executive Committee. The parent Committee or Subcommittee, subject to approval of the Executive Committee, may vote to discontinue a Task Force once its charge has been completed.

Vacancies in the positions of Chair or Vice Chair of any Task Force shall be filled by the parent Committee or Subcommittee from within or outside the present Task Force membership; provided, however, that the chief insurance regulatory official of the state of the former Chair or Vice Chair shall become a member of the Task Force. A vacancy in the position of member shall be filled by the chief insurance regulatory official of the vacating member’s state.

If an existing Task Force is dealing with insurance issues that require continuing study, the Executive Committee may adopt the recommendation of the parent Committee or Subcommittee that the Task Force be designated a Standing Task Force. A Standing Task Force shall continue in effect until terminated by the Executive Committee.
ARTICLE VII Meetings of the Membership

1. Regular Meetings.

The NAIC shall hold at least two (2) regular meetings of the members (“National Meetings”) each calendar year. Notice, stating the place, day and hour and any special purposes of the National Meeting, shall be delivered by the Executive Committee not less than ten (10) calendar days nor more than sixty (60) calendar days before the date on which the National Meeting is to be held, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

2. Special Meetings.

Special meetings of the members may be called by any five (5) members of the Executive Committee by giving all members notice of such meeting at least ten (10) but not more than sixty (60) days prior thereto, or by any twenty (20) members of the NAIC by giving all members notice of such meeting at least thirty (30) but not more than sixty (60) days prior thereto. Notice of the special meeting shall state the place, day and hour of the special meeting and the purpose or purposes for which the special meeting is called, and shall be delivered by the persons calling the meeting within the applicable time period set forth herein, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

3. Waiver of Notice; Postponement.

Member meetings may be held without notice if all members entitled to notice are present (except when members entitled to notice attend the meeting for the express purpose of objecting, at the beginning of the meeting, because the meeting is allegedly not lawfully called or convened), or if notice is waived by those not present. Any previously scheduled meeting of the members may be postponed by the Executive Committee (or members calling a special meeting, as the case may be) upon notice to members, in person or writing, given at least two (2) days prior to the date previously scheduled for such meeting.

4. Quorum.

Except as otherwise provided by law or by the Certificate of Incorporation, the presence, by person or proxy, of a majority of the members shall constitute a quorum at a member meeting, a meeting of a Standing Committee, Task Force or a working group. The chairman of the meeting may adjourn the meeting from time to time, whether or not there is such a quorum. The members present at a duly called member meeting at which a quorum is present may continue to transact business until adjournment, notwithstanding the withdrawal of enough members to leave less than a quorum.

5. Any meeting of the NAIC may be held in executive session as defined in the NAIC policy on open meetings. Any member may attend and participate in any meeting of the NAIC or any meeting of a Standing Committee or Task Force whether or not such member has the right to vote. All National Meetings shall provide for a Plenary Session of the NAIC as a whole in order to consider and take action upon the matters submitted to the NAIC.

ARTICLE VIII Elections

1. The election of officers of the NAIC shall be scheduled for the plenary session of the last National Meeting of the calendar year or at such other plenary session as agreed to by the members.

2. At the beginning of such Plenary Session, the Secretary-Treasurer shall ascertain and announce the presence of a quorum.

3. Upon the determination of a quorum, the chair shall briefly review the provisions of the Certificate of Incorporation and Bylaws in regard to voting.

4. The President shall ask for and announce all proxies. Proxies shall be held by the Secretary-Treasurer or a designee throughout the election session. Proxies shall be valid, subject to their term, until superseded by the member and shall be governed by ARTICLE IX of the Bylaws.

5. Every individual voting by proxy must meet the requirements of Article II of the Bylaws of the NAIC which requires that such a person be “...officially affiliated with the member’s (the member delegating authority to vote) department, and is wholly or principally employed by said department.”
6. Prior to opening the nominations for office, the Chair shall appoint three (3) members of the NAIC to act as voting inspectors. The voting inspectors shall distribute, collect, count and/or verify ballots, and report their findings to the Secretary-Treasurer. If a voting inspector is nominated for an office and does not withdraw as a candidate, he or she shall not be a voting inspector for the election of the office to which he or she is nominated and the chair shall appoint another voting inspector in his or her place.

7. The Chair shall announce the opening of nominations for offices in the following order:

   (a) President. Provided, however, where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President’s term of office. In those cases where the President runs for re-election or where a vacancy exists because the President-Elect fails or is otherwise unable to assume the Presidency, this office will be subject to an election.

   (b) President-Elect.

   (c) Vice President.

   (d) Secretary-Treasurer.

8. Only members or duly authorized proxyholders may make nominations.

9. One nominating speech, not to exceed three (3) minutes in duration, shall be allowed for each nominee.

10. After nominations are closed for each office, each nominee must indicate whether he or she accepts the nomination and, if he or she accepts, shall be permitted to address the membership for a period of up to seven (7) minutes. Such addresses shall be given in the order by which the nominations were made.

11. The votes of members, in person or by proxy, constituting a majority of the quorum present at the meeting shall be necessary for election to such office. If no candidate receives a majority, the two candidates with the most votes will participate in a run-off election. The candidate with the most votes in the run-off election shall win such election.

12. Voting need not be by written ballot, unless otherwise required by these Bylaws, the Certificate of Incorporation, or applicable law.

**ARTICLE IX Proxies; Waiver of Notice**

Where the delegation of power to vote or participate in the membership of the NAIC is required by ARTICLE II of these Bylaws to be in writing, such delegation must be effected by proxy. All proxies must be dated, give specific authority to a named individual who meets the requirements of ARTICLE II for duly authorized representatives, and meet any other applicable legal requirement. Documents such as electronic transmission, telegrams, mailgrams, etc. are acceptable as proxies if they otherwise meet the requirements contained herein and applicable law. Proxies should be maintained by NAIC Central Office staff. Notwithstanding the foregoing, a member may not vote by proxy in a meeting of the Executive Committee, Financial Regulation Standards and Accreditation (F) Committee in a vote concerning a state-specific item, Government Relations Leadership Council, or International Insurance Relations Leadership Group, or any respective subcommittees.

Whenever any notice is required to be given to any member (for a meeting of members or the Executive Committee) under the provisions of the Certificate of Incorporation, these Bylaws or applicable law, a written waiver, signed by the person entitled to notice, or a waiver by electronic transmission by person entitled to notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice. Neither the business to be transacted at, nor the purpose of, any annual or special meeting of the members or any committee, subcommittee or task force need be specified in any waiver of notice of such meeting.

Unless otherwise restricted by the Certificate of Incorporation or these Bylaws, Members may participate in a meeting by means of conference telephone or by any means by which all persons participating in the meeting are able to communicate with one another, and such participation shall constitute presence in person at the meeting.

Any notice required under these Bylaws may be provided by mail, facsimile, or electronic transmission.
ARTICLE X Procedures; Books and Records

The Executive Committee shall adopt policies and procedures for the conduct of meetings. In the event such policies and procedures conflict with the NAIC’s Certificate of Incorporation or Bylaws, the Certificate of Incorporation and Bylaws shall govern.

The books and records of the NAIC may be kept outside the State of Delaware at such place or places as may from time to time be designated by the Internal Administration Subcommittee (EX1) of the Executive Committee.

ARTICLE XI Amendments

These Bylaws may be altered or repealed and new Bylaws may be adopted at any regular or special meeting of the members by an affirmative vote, in person or by proxy, of a majority of the members entitled to vote at such meeting; provided, however, that any proposed alteration (except to correct typographical or grammatical errors or article, section or paragraph cross-references caused by other alterations, repeals, or adoptions) or repeal of, or the adoption of any Bylaw inconsistent with, Article II [Membership], Article VII, Paragraph 2 [Special Meetings of Members] and Paragraph 4 [Quorum], Article VIII [Elections], or this Article XI [Amendments] of these Bylaws (the “Supermajority Bylaws”) by the members shall require the affirmative vote, in person or by proxy, of at least two-thirds (2/3) of the members entitled to vote at such meeting and provided, further, that in the case of any such member action at a special meeting of members, notice of the proposed alteration, repeal or adoption of the new Bylaw or Bylaws must be contained in the notice of such special meeting. Corrections for typographical or grammatical errors or to article, section or paragraph cross-references caused by other alterations, repeals or adoption, shall only be made if approved by the affirmative vote of at least two-thirds (2/3) of the Executive Committee.

Adopted October 1999, see 1999 Proc., Third Quarter page 7
Amended November 2002, see 2002 Proc., Fourth Quarter page 25
Amended June 2003, see 2003 Proc., Second Quarter page 28
Amended March 2004, see 2004 Proc., First Quarter page 119
Amended December 2004, see 2004 Proc., Fourth Quarter page 58
Amended March 2009, see 2009 Proc., First Quarter pages 3–67
Amended September 2009, see 2009 Proc., Third Quarter
Amended October 2011, see Proc., Summer 2011
Amended December 2015, see Proc., Spring 2016
The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories. NAIC members are the elected and appointed state government officials who, along with their departments and staff, regulate the conduct of insurance companies and agents in their respective state or territory. The NAIC is committed to conducting its business openly. This policy statement applies to meetings of NAIC committees, subcommittees, task forces and working groups. It does not apply to Roundtable discussions, zone meetings, commissioners’ conferences, and other like meetings of the members. Applicable meetings will be open unless the discussion or action contemplated will include:

1. Potential or pending litigation or administrative proceedings which may involve the NAIC, any NAIC member, or their staffs, in any capacity involving their official or prescribed duties, requests for briefs of amicus curiae, or legal advice;

2. Pending investigations which may involve either the NAIC or any member in any capacity;

3. Specific companies, entities or individuals, including, but not limited to, collaborative financial and market conduct examinations and analysis;

4. Internal or administrative matters of the NAIC or any NAIC member, including budget, personnel and contractual matters, and including consideration of internal administration of the NAIC, including, but not limited to, by the Internal Administration (EX1) Subcommittee or any subgroup appointed thereunder;

5. Voting on the election of officers of the NAIC;

6. Consultations with NAIC staff members related to NAIC technical guidance, including, but not limited to, Annual and Quarterly Statement Blanks and Instructions, the Accounting Practices and Procedures Manual, and similar materials;

7. Consideration of individual state insurance department’s compliance with NAIC financial regulation standards by the Financial Regulation Standards and Accreditation (F) Committee or any subgroup appointed thereunder;

8. Consideration of strategic planning issues relating to federal legislative and regulatory matters or international regulatory matters; or

9. Any other subject required to be kept confidential under any Memorandum of Understanding or other agreement, state or federal law or under any judicial or administrative order.

Because not all situations requiring a regulator to regulator discussion can be anticipated at the time a meeting is scheduled, a meeting convened in open session can move into regulator to regulator session on motion by the chair or other member approved by a majority of the members present. Public notice will be provided of all applicable meetings. The reason for holding a meeting in regulator only session will be announced when the meeting notice is published, at the beginning of any regulator only session, and when an open meeting goes into regulator only session.

This revised policy statement shall take effect upon adoption by the membership.

[NOTE: (Effective Jan. 1, 1996, conference call meetings are included in the application of the policy statement, by action of the NAIC on June 4, 1995). This policy statement was originally adopted by the NAIC membership during the 1994 Fall National Meeting in Minneapolis, Minnesota, Sept. 18–20, 1994.]

\(^{39}\) Indicates a specific state.
2. Aug. 21, 1890: Charles B. Allan (Nebraska deputy auditor) was elected Secretary for the 1891 Convention; however, he resigned before the Convention assembled. Sept. 30, 1891: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1891 Convention.
3. Sept. 18, 1895: William M. Hahn (OH) was elected President for the 1896 Convention and James R. Waddill (MO) was elected Vice-President; however, Superintendent Hahn was out of office effective June 3, 1886. Sept. 22, 1896: Superintendent Waddill was elected President for the 1896 Convention and Stephen W. Carr (ME) was chosen to act as Vice-President.

4. Sept. 23, 1896: James R. Waddill (MO) was elected President for the 1897 Convention and Stephen W. Carr (ME) was elected Vice-President; however, Mr. Waddill was out of office effective March 1, 1897. Sept. 7, 1897: Commissioner Carr was elected President for the 1897 Convention. It is unknown who acted as Vice-President.

5. Sept. 23, 1896: Frederick L. ‘Fred’ Cutting (MA) was elected Secretary for the 1897 Convention; however, he was out of office at the date of the Convention. Sept. 7, 1897: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1897 Convention.

6. Sept. 7, 1897: Frederick L. ‘Fred’ Cutting (MA) was elected Secretary for the 1898 Convention; however, he declined the offer. Sept. 13, 1898: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1898 Convention.

7. Sept. 15, 1898: Elmer H. Dearth (MN) was elected President for the 1899 Convention; however, he was out of office at the date of the Convention. Sept. 5, 1899: Edward T. Orear (MO) was elected President for the 1899 Convention.

8. Sept. 20, 1900: John A. O’Shaughnessy (MN) was elected President for the 1901 Convention; however, he was out of office at the date of the Convention. September 1901: William H. Hart (IN) was elected President for the 1901 Convention.

9. Sept. 29, 1910: Theodore H. Macdonald (CT) was elected Vice-President for the 1911 Convention; however, he was out of office at the date of the Convention. It is unknown who acted as Vice-President.

10. Aug. 25, 1911: Harry R. Cunningham (MT) was elected Secretary for the 1912 Convention; however, he resigned before the Convention assembled. March 1912: Fitz Hugh McMaster (SC) was elected Secretary for the 1912 Convention.

11. Aug. 1, 1913: Willard Done (UT) was elected First Vice-President for the 1914 Convention; however, he resigned before the Convention assembled. It is unknown who acted as First Vice-President.

12. Aug. 31, 1917: Emory H. English (IA) was elected President for the 1918 Convention; Robert J. Merrill (NH) was elected First Vice-President; and Michael J. Cleary (WI) was elected Second Vice-President. November 1917: Mr. Merrill resigned as First Vice-President. Dec. 6, 1917: Mr. Cleary was elected First Vice-President for the 1918 Convention and Walter K. Chorn (MO) was elected Second Vice-President. Jan. 1, 1918: Mr. English resigned as President and Mr. Cleary was elected President for the 1918 Convention by the Executive (EX) Committee. It is unknown who acted as First Vice-President.

13. Aug. 31, 1917: Fitz Hugh McMaster (SC) was elected Secretary for the 1918 Convention; however, he resigned before the Convention assembled. Dec. 6, 1917: Joseph L. Buxton (VA) was elected Secretary for the 1918 Convention.

14. Sept. 12, 1919: John B. Sanborn (MN) was elected Second Vice-President for the 1920 Convention; however, he resigned before the Convention assembled. June 1920: Alfred L. Harty (MO) was chosen to act as Second Vice-President for the 1920 Convention.

15. Sept. 3, 1920: Frank H. Ellsworth (MI) was elected President for the 1921 Convention; Alfred L. Harty (MO) was elected First Vice-President; and Thomas B. Donaldson (PA) was elected Second Vice-President. Commissioner Ellsworth resigned effective April 30, 1921, as NAIC President and Michigan Insurance Commissioner. June 27, 1921: Superintendent Harty was elected President for the 1921 Convention by the Executive (EX) Committee; Commissioner Donaldson was elected First Vice-President; and Platt Whitman (WI) was elected Second Vice-President.

16. Sept. 8, 1922: Platt Whitman (WI) was elected President for the 1923 Convention; Herbert O. Fishback (WA) was elected First Vice-President; and John C. Luning (FL) was elected Second Vice-President. July 1, 1923: Commissioner Whitman resigned as President; Commissioner Fishback was elected President for the 1923 Convention by the Executive (EX) Committee; and Mr. Luning was elected First Vice-President by the Executive (EX) Committee. It is unknown who acted as Second Vice-President.
17. Sept. 18, 1925: William R. C. Kendrick (IA) was elected President for the 1926 Convention. January 1926: Commissioner Kendrick resigned as NAIC President and Harry L. Conn (OH) was elected President for the 1926 Convention. Commissioner Kendrick remained as Iowa Insurance Commissioner until March 1, 1926.

18. Nov. 19, 1926: Harry L. Conn (OH) was elected President for the 1927 Convention and Albert S. Caldwell (TN) was elected First Vice-President. April 15, 1927: Superintendent Conn resigned as NAIC President and Ohio Insurance Superintendent. May 3, 1927: Commissioner Caldwell was elected President for the 1927 Convention and James A. Beha (NY) was elected First Vice-President.

19. Sept. 26, 1928: Charles R. Detrick (CA) was elected President for the 1929 Convention; James A. Beha (NY) was elected First Vice-President; and Howard P. Dunham (CT) was elected Second Vice-President. Jan. 1, 1929: Superintendent Beha resigned as NAIC First Vice-President and New York Insurance Superintendent. Commissioner Dunham was elected First Vice-President for the 1929 Convention. April 24, 1929: Commissioner Detrick resigned as NAIC President and California Insurance Commissioner. Commissioner Dunham was elected President for the 1929 Convention; Clarence C. Wysong (IN) was elected First Vice-President; and Jess G. Read (OK) was elected Second Vice-President.

20. Sept. 19, 1929: Joseph L. Button (VA) was elected Secretary for the 1930 Convention; however, he resigned effective Oct. 15, 1929, as NAIC Secretary and Virginia Commissioner of Insurance and Banking. Dec. 10, 1929: Albert S. Caldwell (TN) was elected Secretary for the 1930 Convention.

21. Sept. 9, 1930: Clarence C. Wysong (IN) was elected President for the 1931 Convention; Jess G. Read (OK) was elected First Vice-President; and Clare A. Lee (OR) was elected Second Vice-President. January 1931: Commissioner Wysong resigned effective Jan. 1, 1931, as NAIC President and Indiana Insurance Commissioner; Commissioner Lee was no longer serving as Second Vice-President; and Commissioner Read was elected President by the Executive (EX) Committee for the 1931 Convention. June 17, 1931: Charles D. Livingston (MI) was elected First Vice-President by the Executive (EX) Committee for the 1931 Convention and William A. Tarver (TX) was elected Second Vice-President by the Executive (EX) Committee.

22. Oct. 20, 1932: William A. Tarver (TX) was elected President for the 1933 Convention; Garfield W. Brown (MN) was elected First Vice-President; and Daniel C. ‘Dan’ Boney (NC) was elected Second Vice-President. Commissioner Tarver resigned effective Feb. 10, 1933, as NAIC President and Texas Life Insurance Commissioner. Commissioner Brown was elected President for the 1933 Convention; Commissioner Boney was chosen to act as First Vice-President and George S. Van Schaick (NY) was chosen to act as Second Vice-President.

23. July 1935: It is unclear why no one acted as First Vice-President or Second Vice-President for the 1935 Convention.

24. June 23, 1939: J. Balch Moor (DC) was elected Vice-President; however, he died July 22, 1939, before the 1940 Convention assembled. John C. Blackall (CT) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

25. June 6, 1945: Edward L. Scheufler (MO) was elected Vice-President for the 1946 Convention; however, he resigned effective Oct. 15, 1945, as NAIC Vice-President and Missouri Insurance Superintendent. Dec. 3, 1945: Robert E. Dineen (NY) was elected Vice-President by the Executive (EX) Committee for the 1946 Convention.

26. June 11, 1946: Jess G. Read (OK) was elected Secretary for the 1947 Convention; however, he died July 20, 1946. Sept. 4, 1946: Nellis P. Parkinson (IL) was elected Secretary by the Executive (EX) Committee to fill the unexpired term.

27. June 1953: George B. Butler (TX) was elected Vice-President; however, he died Sept. 28, 1953. It is unknown who acted as Vice-President for the November 1953 Convention. Nov. 30, 1953: Donald Knowlton (NH) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

28. May 1956: George A. Bowles (VA) was elected Secretary; however, he died June 1, 1956. Paul A. Hammel (NV) was elected Secretary to fill the unexpired term.

29. June 1958: Arch E. Northington (TN) was elected President; however, he resigned effective Dec. 23, 1958, as NAIC President and Tennessee Insurance Commissioner. January 1959: Paul A. Hammel (NV) was elected President and Sam N. Beery (CO) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

30. June 1962: Joseph S. Gerber (IL) was elected Vice-President; however, he resigned effective Jan. 29, 1963, as NAIC Vice-President and Illinois Insurance Director. The office of Vice-President was vacant for the June 1963 Convention.
31. June 1968: Charles R. Howell (NJ) was elected President; however, he resigned effective Feb. 28, 1969, as NAIC President and New Jersey Commissioner of Banking and Insurance. Ned Price (TX) was elected by the Executive (EX) Committee to fill the unexpired term.

33. A constitutional amendment moved NAIC officer elections from June to December (commencing December 1974), President Johnnie L. Caldwell (GA) served a six-month term.

34. Kenneth E. ‘Ken’ DeShetler (OH) was elected President; however, he resigned effective Jan. 13, 1975, as NAIC President and Ohio Insurance Director. William H. Huff, III (IA) was elected by the Executive (EX) Committee to fill the unexpired term.

35. H. Peter ‘Pete’ Hudson (IN) was elected President; however, he resigned as NAIC President and Indiana Insurance Commissioner effective Nov. 15, 1979. It is unknown who presided over the December 1979 Convention.

36. John W. Lindsay resigned effective Sept. 3, 1981, as NAIC Vice-President and South Carolina Insurance Commissioner. Johnnie L. Caldwell (GA) was elected by the Executive (EX) Committee to fill the unexpired term.

37. David J. Lyons resigned effective June 17, 1994, as NAIC Vice President but remained as Iowa Insurance Commissioner until July 31, 1994. A special interim Plenary election was held June 12, 1994: Arkansas Insurance Commissioner Lee Douglass was elected Vice President to serve June 17, 1994, to Dec. 31, 1994.

38. September 2001: NAIC members unanimously agreed that the 2001 Fall National Meeting should be canceled in the wake of the tragic events that occurred Sept. 11, 2001. The meeting had been scheduled for Sept. 22–25, 2001, at the Marriott and Westin Copley Place hotels in Boston, Massachusetts.

39. Ernst N. ‘Ernie’ Csiszar resigned effective Aug. 18, 2004, as NAIC President and South Carolina Director of Insurance. Approximately two weeks later, James A. ‘Jim’ Poolman resigned as NAIC Vice President but remained as North Dakota Insurance Commissioner. A special interim Plenary election was held Sept. 13, 2004, during the Fall National Meeting in Anchorage, Alaska: Pennsylvania Insurance Commissioner M. Diane Koken was elected President; Oregon Insurance Administrator Joel S. Ario was elected Vice President; and Maine Insurance Superintendent Alessandro A. ‘Al’ Iuppa was elected Secretary-Treasurer to serve from Sept. 13, 2004, to Dec. 31, 2004.

40. December 2004: NAIC members voted at its 2004 Winter National Meeting to adopt amendments to the NAIC Bylaws, which included the creation of a President-Elect position as an NAIC officer.

41. September 2005: NAIC members agreed to cancel the 2005 Fall National Meeting due to the devastation caused by Hurricane Katrina on Aug. 29, 2005. The meeting had been scheduled for Sept. 10–13, 2005, at the Sheraton hotel in New Orleans, Louisiana.

42. Eric P. Serna resigned effective June 14, 2006, as NAIC Secretary-Treasurer and New Mexico Superintendent of Insurance. A special Plenary interim election was held during the 2006 Summer National Meeting: New Hampshire Insurance Commissioner Roger A. Sevigny was elected Secretary-Treasurer to serve from June 14, 2006, to Dec. 31, 2006.

43. Michael T. McRaith resigned effective May 31, 2011, as NAIC Secretary-Treasurer and Illinois Director of Insurance. A special Plenary interim election was held via conference call May 16, 2011: North Dakota Insurance Commissioner Adam Hamm was elected Secretary-Treasurer to serve from May 31, 2011, to Dec. 31, 2011.

45. Michael F. ‘Mike’ Consedine resigned effective Jan. 20, 2015, as NAIC President-Elect and Pennsylvania Insurance Commissioner. A special Plenary interim election was held via conference call Feb. 8, 2015: Missouri Insurance Director John M. Huff was elected President-Elect to serve from Feb. 8, 2015, to Dec. 31, 2015.
Sharon P. Clark resigned effective Jan. 11, 2016, as NAIC President-Elect and Kentucky Insurance Commissioner. A special Plenary interim election was held in Bonita Springs, Florida, on Feb. 7, 2016: Wisconsin Insurance Commissioner Theodore K. ‘Ted’ Nickel was elected President-Elect; Tennessee Insurance Commissioner Julie Mix McPeak was elected Vice President; and Maine Insurance Superintendent Eric A. Cioppa was elected Secretary-Treasurer to serve from Feb. 7, 2016, to Dec. 31, 2017.

David C. Mattax, NAIC Secretary-Treasurer and Texas Insurance Commissioner, died in office April 13, 2017. A special Plenary interim election was held via conference call on May 12, 2017: South Carolina Insurance Director Raymond G. Farmer was elected Secretary-Treasurer to serve from May 12, 2017, to Dec. 31, 2017.

Gordon I. Ito resigned effective Dec. 31, 2018, as NAIC Vice President and Hawaii Insurance Commissioner. A special Plenary interim election was held in La Quinta, California, on Feb. 4, 2019: Florida Insurance Commissioner David Altmaier was elected Vice President to serve from Feb. 4, 2019, to Dec. 31, 2019.

March 11, 2020: Due to concerns about the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Spring National Meeting in a virtual format. However, on March 23, 2020, the NAIC officers decided to suspend holding any further sessions of the virtual Spring National Meeting to allow NAIC members and staff more time to focus on the health emergency. The meeting had been scheduled for March 21–24, 2020, at the Phoenix Convention Center and the Sheraton Grand and Hyatt Regency hotels in Phoenix, Arizona.

June 10, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Summer National Meeting in a virtual format. The meeting had been scheduled for Aug. 8–11, 2020, at the Minneapolis Convention Center and the Hilton and Hyatt Regency hotels in Minneapolis, Minnesota.

Sept. 21, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Fall National Meeting in a virtual format. The meeting had been scheduled for Nov. 14–17, 2020, at the JW Marriott hotel in Indianapolis, Indiana.

Feb. 24, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Spring National Meeting in a virtual format. The meeting had been scheduled for April 10–13, 2021, at the Gaylord Texan Hotel and Convention Center in Grapevine, Texas.

June 1, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Summer National Meeting in a hybrid format. In-person meetings took place for NAIC members and interested parties as capacity allowed. Meetings were live-streamed for participants who attended virtually.

Oct. 27, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Fall National Meeting in a hybrid format. In-person meetings took place for NAIC members and interested parties as capacity allowed. Meetings were live-streamed for participants who attended virtually.

CALL TO ORDER

The 233rd session of the National Association of Insurance Commissioners (NAIC) will now come to order. Good afternoon, I’m NAIC President and Florida’s Commissioner of the Office of Insurance Regulation, David Altmaier. I am honored to open the NAIC Fall National Meeting.

INTRODUCTION OF HEAD TABLE

I’d like to introduce the members of our head table. Please hold your applause until the end, unless you are joining us virtually, in which case you should feel free to applaud at any time.

Honorable Ricardo Lara, Meeting Host and California Insurance Commissioner
Honorable James J. Donelon, NAIC Past President and Louisiana Insurance Commissioner
Honorable Eric A. Cioppa, NAIC Past President and Maine Insurance Superintendent
Honorable Raymond G. Farmer, NAIC Most Recent Past President and South Carolina Insurance Director
Honorable Dean L. Cameron, NAIC President-Elect and Idaho Insurance Director
Honorable Chlora Lindley-Myers, NAIC Vice President and Missouri Insurance Director
Honorable Andrew N. Mais, NAIC Secretary-Treasurer and Connecticut Insurance Commissioner
Andrew J. Beal, NAIC Chief Operating Officer (COO) and Chief Legal Officer (CLO)
Michael F. Consedine, NAIC Chief Executive Officer (CEO)

Please welcome the members of our NAIC Fall National Meeting head table.

New Member Video

Please join me in welcoming our newest members in this short video. [New Member Video Plays.] Let’s welcome the new members with a round of applause.

Introduction of Special Guests

We are pleased to welcome guests from the Federal Emergency Management Agency (FEMA), the U.S. Department of the Treasury (Treasury Department), the Federal Insurance Office (FIO), and legislators from across the country.

Introduction of Host Commissioner

It is my pleasure to introduce the commissioner of the California Department of Insurance, Ricardo Lara.

Commissioner Lara was elected by the state of California Jan. 7, 2019. Prior to becoming the insurance commissioner, he served in the California State Senate representing the 33rd Senate district. Before that, he served in the California State Assembly representing the 50th Assembly district. Commissioner Lara, welcome and thank you for serving as our host.

Host Commissioner’s Remarks

It is my pleasure to welcome all of you to San Diego for our 2021 NAIC Fall National Meeting; and for those of you who are joining virtually, I hope that you will get to experience beautiful California soon. Before I begin, I just want to thank all the hotel workers for making our conference possible. These men and women were some of the hardest hit workers during the pandemic.
We have gone through so much together—a global pandemic, economic shutdowns, civil unrest, and climate-intensified natural disasters. Today our thoughts are with families in Kentucky, Arkansas, Missouri, Tennessee, and Illinois who suffered deadly tornadoes this weekend. To our colleagues in these states, you have our sympathy and support as people start on the long road to recovery.

As my mom always says, “no hay mal que por bien no venga,” which translates to “every cloud has a silver lining.” When lives are lost during a natural disaster, that cloud comes with a heavy darkness. For me, the silver lining presents itself in how we consistently respond to that darkness and that we have stuck together, learned together, and kept focus on our collective mission: to protect consumers. When we met in Arizona, I was inspired by the unanimous dedication our members still hold dear through our 150 years of existence. We renewed our commitment to a simple but often elusive tenet of good governance: objective, nonpartisan policymaking. At the NAIC, we work together in partnerships that may seem uncommon in other public agencies and offices. For example, California and South Carolina: together we co-chair the Climate and Resiliency (EX) Task Force and have been able to find agreement on several issues. Maybe it’s that we both come from places that, despite our differences, love our beaches and our seafood; but let’s be real, it’s Director Farmer’s southern charm. Whatever it is, I challenge you to find that type of pairing among any other public officeholders.

As an organization, think of the geographic diversity of our recent past leaders: Montana; Missouri; Wisconsin; Tennessee; Maine; South Carolina; Florida; and now another great western state, Director Cameron from Idaho, who will lead us in 2022 as we continue to build on our foundation. Even when the issues are tough, we find common ground and we move forward. It is our diversity of laws and leaders, in fact, that rejuvenates our efforts to overcome complex obstacles. This is a strength of our state-based insurance regulatory approach, and we reinforce it through the work we do. We find ways to collaborate and merge many streams of thought into solutions for our shared challenges. I want to take a moment to thank the staff of the NAIC, who work hard all year to prepare for these meetings and drive forward our common vision. They have done remarkable work throughout the pandemic; let’s have a round of applause for our NAIC staff.

As a proud Californian and a San Diego State University Aztec, I am honored that the NAIC has chosen San Diego for this important event. My time as an undergrad student here brought perspective to my life experiences and motivated me to act and fight for equity and justice. California is home to 40 million people; i.e., 12% of the U.S. population. More than a quarter of California residents are immigrants, and nearly one in four households has a native-born U.S. citizen with at least one immigrant parent. That includes this dude, born and raised in East L.A. It’s only in the U.S. that my story is even possible—the first openly LGBTQ person to be elected to statewide office in our state’s history and the first Latino commissioner from the Golden State—and that is why, despite our faults, this is the greatest country on Earth.

I hope you all get a chance while you’re here—masked up of course—to experience one of the most ethnically and culturally diverse cities in the nation where nearly 41% of the population speak multiple languages. That proud heritage shapes who we are and why fairness and opportunity are at the center of the California dream. Like all of you, I have dedicated myself to public service. My focus is on those in need and those who have historically experienced systemic discrimination and racial or ethnic bias. The pandemic and civil unrest we witnessed both in 2020 and beyond have made plain for all to see the inequities that exist in our society. As insurance leaders, and as a national body, this is a challenge we must all take on; I am grateful to all the workstream co-chairs serving on the Special (EX) Committee on Race and Insurance for leading our work in this area.

Collectively, we face several types of climate change impacts. As you look to the west and talk with San Diegans, you will hear about the challenges of sea level rise and coastal flooding. Over the past 30 years—i.e., the common timeframe for a mortgage—every single county in California has been under a governor-declared flooding emergency. These are not unique challenges to California. All our coastal states and—as we all have recently witnessed—our Midwest face such threats, made worse by tornadoes, hurricanes in the east, and atmospheric rivers in the west. This has been a year of record-setting fires and record-setting temperatures right here in California and across the Western U.S.: 121° in Los Angeles County; 123° in the Coachella Valley and Palm Springs; and 130° in Death Valley, the hottest world temperature ever on record. Insurance is going to be critical to how we protect our communities after a disaster, and it also matters before a disaster happens. How we bring down these shared risks is essential to maintaining affordable and available insurance. I am particularly proud that, for the first time, the NAIC hosted a forum at the United Nations (UN) Climate Change Conference in Scotland to talk about our NAIC approach to climate resilience on the global stage. Insurance regulators must help address climate risks, and it is essential that the NAIC assert ourselves and demonstrate that we are the leader in this space.
As insurance regulators, we start with three powerful tools at our disposal: our regulatory actions, our advocacy for new protections with our state legislatures, and our engagement with consumers and businesses.

- **Regulatory Actions**

Our regulatory authority helps protect the public and build consistency in the insurance marketplace. Like many of you, I have taken executive actions in 2020 to expedite protections for consumers throughout the pandemic and used my authority to mandate insurance companies’ return over-collection of premium. My actions have saved California drivers more than $2.4 billion and counting through returned premiums for private passenger automobile (PPA) insurance alone.

- **Legislative Advocacy**

We work with our state legislatures on changes to statute that can clarify, strengthen, and create consumer protections. Currently, I am partnering with members of the California State Legislature to create a statewide early warning system for extreme heat waves to protect our most vulnerable residents and help calculate the costs of this threat. I often say, “diversity means business.” Over the past three years, we have gone from millions invested in affordable housing, small business pandemic relief, and green projects to billions through the California Department of Insurance’s (DOI’s) insurer investment program. This translates to new jobs, new homes, and new business opportunities exemplifying how insurance companies can do good and invest in our diverse communities.

- **Engagement with Residents and Businesses**

Engaging with the communities, we have the honor to serve as essential. After experiencing our deadly wildfires, I visited more than 36 counties and met with more than 10,000 people to hear first-hand from them. I have met with our farmers and wine-growers—essential businesses for our state’s economy and workforce—to learn about the challenges they are facing from wildfires. Our NAIC national meetings also give us the ability to hear from our consumer liaison representatives about what they are observing to heed their recommendations and take inspiration from the direct evidence of the challenges they face.

California might be the largest department in the country, but let me be clear: we are an equal partner with each and every one of you. Our DOI staff dedicate their time to NAIC committee work, rolling up their sleeves, getting into the details, and showing their commitment to this great organization. I am grateful for their dedication to our state and to you; and under my leadership, we hold paramount the value of building bridges and mutual respect toward our fellow member states and territories. Our outgoing president and my friend, David Altmaier, understands what I mean. David, you welcomed me as a new commissioner nearly three years ago, and I am deeply grateful. You model the values that are at the heart of this organization: the objective, nonpartisan policymaking that makes a difference for consumers.

As the NAIC celebrates 150 years, let us carry this nonpartisan unity forward and foster fair-minded policies. After all, it is our commitment to building consensus and consumer protection for all that will be our foundation in the years to come. We have a lot of work to do, and it is work worth doing. Bienvenidos a San Diego. Now let’s get down to business!

**David Altmaier’s Remarks**

Thank you, Commissioner Lara, and thank you again for hosting our Fall National Meeting. We are looking forward to our time here in San Diego, a city famous for its white sand beaches and beautiful weather. It is frequently referred to as “America’s Finest City,” and in my opinion, any city within close proximity of a Legoland should be considered among America’s finest cities.

Before I begin, I’d also like to acknowledge the retirement of Commissioner Mark Afable of Wisconsin. Commissioner Afable, thank you for all your contributions to the NAIC. Since your first day with us, you have proven yourself to be a compassionate thought-leader in areas such as race and insurance, innovation and technology, and pre-disaster mitigation. We appreciate your dedicated service and wish you all the best.
2021 Robert Dineen Award Recipients

As we come to the end of our year-long celebration of the NAIC’s 150-year anniversary, I would like to welcome you all to the NAIC Fall National Meeting. It is the NAIC’s 233rd national meeting, and I know I speak for many when I say it’s great to be back in person (and virtually) again.

I am especially pleased that two of this year’s Robert Dineen Award honorees are here in San Diego and that I will be able to recognize their achievements in person.

In June 1989, the NAIC established the Robert Dineen Award in honor of the founder of the NAIC’s Support and Services Office. The award honors a staff member of an insurance department who has made an outstanding contribution to state insurance regulation and regularly performs activities that advance the insurance regulatory profession.

This year, we will be honoring three Robert Dineen Award winners. When I call your name, please step up the podium to receive your award:

The first is Doug Slape, Chief Deputy Commissioner for the Texas Department of Insurance.

For more than 30 years, Mr. Slape has worked to improve solvency regulation and provided a powerful and reasoned voice to maintain the integrity of Texas’ state-based system of regulation. His service includes leadership positions in many NAIC groups. While chair of the NAIC’s Captive and Special Purpose Vehicle Use (E) Subgroup, he supported the writing of the NAIC’s first white paper on the use of captives in the U.S. Following the 2008 financial crisis, he was instrumental in developing enhancements to the solvency regulation framework, which have been included in the Accreditation Program. Among his achievements, he led an initiative at the Texas DOI to automate the review of quarterly financial filings to address the complexity of the risk-focused supervision process that was quickly evolving. This process is recognized in the NAIC’s Financial Analysis Handbook, and many other states have followed Texas’ approach.

Our second honoree is Judy Weaver, Senior Deputy Director at the Michigan Department of Insurance and Financial Services.

Ms. Weaver has served Michigan for more than 30 years. During her career, she has served as a field examiner examining insurance companies and worked in financial analysis, examination, company licensing and receivership of insurers, and market regulation of managed care entities. She has also served as deputy director and chief examiner. Her financial expertise and regulatory discipline have allowed her to contribute key insights across the financial arena and to several NAIC committees, including chairing the Financial Analysis Solvency Tools (E) Working Group and the Financial Analysis (E) Working Group. Congratulations on this well-deserved recognition.

Our last honoree is Nancy Cross, Statutory Compliance Director for the Mississippi Insurance Department.

Ms. Cross joined the Mississippi DOI in December 1958 as the administrative assistant to the deputy commissioner. She has served under four different insurance commissioners and has risen through the ranks to become the statutory compliance director, where she is responsible for issuing new and renewing licenses for all insurance companies, health maintenance organizations, societies, and associations doing business in Mississippi.

Nancy could not join us in San Diego this week. However, the Mississippi DOI provided us with this video.

Congratulations to all this year’s Robert Dineen Award Winners.

PRESIDENTIAL ADDRESS

David Altmaier, NAIC President

Good afternoon, I’m NAIC President and Florida’s Commissioner of the Office of Insurance Regulation, David Altmaier. I am honored to open the NAIC Fall National Meeting here in beautiful San Diego. Every NAIC meeting is an opportunity for stakeholders within the insurance sector to engage on matters critical to consumers all across our country, and to that end, we’re glad to welcome several of our federal partners, as well as state legislative partners to San Diego.
Before I go on, I’d like to take a moment to recognize several of my fellow colleagues who are responding to disasters in their states. We woke up Saturday morning to the devastating news of the impacts from storms and tornadoes across several states, including my home state of Kentucky. Events of this nature underscore the importance of our resiliency efforts and all we do to protect consumers. I am grateful for partnerships such as the ones made here to support one another in times like these.

As we come to the end of our year-long celebration of the NAIC’s 150-year anniversary, I would like to welcome you all to the NAIC Fall National Meeting. It is the NAIC’s 233rd national meeting, and I know I speak for many when I say it’s great to be back in person (and virtually) again.

Over the course of 150 years, the NAIC has navigated a tremendous amount of change, and its ability to adapt is remarkable in so many ways. We have shown time and time again that the source of strength of our state-based system is the connection between our members, particularly in challenging times. One thing is clear: the grit and perseverance of the NAIC and its members are as strong today as they ever were. These enduring characteristics helped lead us through so many challenges and guided the industry through an ever-evolving landscape. The NAIC’s history is well documented. For your enjoyment, and perhaps education, there’s a well-produced 150th anniversary timeline, video, and 150 years’ worth of meeting minutes that can be found on naic.org.

Let’s turn to our accomplishments and challenges in 2021.

We’ve been working very hard to respond to a global pandemic and the impacts of COVID-19 for nearly two years now. It has remained priority one for the NAIC as an important reminder to stay vigilant around these ever-evolving risks; but for a moment, let’s consider the big picture. There are many lessons and takeaways from what the COVID-19 pandemic has presented to us from a regulatory standpoint. Two are top of mind. The first is that no matter how much preparation we do ahead of time, we always need to be prepared to pivot to meet the next challenge. Second, even consumed by what feels to be a never-ending string of crisis situations, we remain focused on our fundamental objectives of consumer protection and market solvency.

That’s why thinking outside the box is so critical; but before I talk about what the sector has done well, I’d like to take a moment to acknowledge the toll the COVID-19 pandemic has had everywhere.

The number of U.S. citizens who perished from the pandemic this year surpassed 2020 numbers in November. We’ve seen an impact on communities and businesses as well. While we should be proud of our resiliency, we cannot ignore the pain that this pandemic has inflicted. We also realize that the pandemic may still deliver unexpected twists and turns ahead, but as availability of the vaccine and treatments continue to roll-out, we have cause for real optimism. The feeling that we’ve turned a corner was reflected in the engagement of NAIC members.

While 2020 was an obstacle course of cancelled meetings and evolving priorities, in 2021, our membership came together in person for the first time in over a year to discuss important regulatory issues like long-term care insurance (LTCI), the use of big data, rising cyber risks, and the impact of climate and race in exacerbating a protection gap for under-served communities.

The NAIC also held its first hybrid national meeting in August of this year in Columbus, OH. I think it’s fair to say based on the feedback we received, we set the bar when it comes to large-scale hybrid events, and our thanks again to Ohio Director Judith L. French for serving as our host. We look forward to returning one day to Columbus to fully experience what was an amazing venue. That meeting served as a great opportunity for us to continue our discussion on NAIC priorities and listen to industry and consumer advocate concerns.

In response to feedback we received, I am excited that this fall we have been able to expand our national meeting to include more working groups and task forces. So, let’s return to those two key historical lessons and apply them to our year. I’ll let our work speak for itself. We continue to adapt proactively to changing market conditions.

At this meeting, NAIC members will vote to create the first letter committee since 2004. It is important for members to stay current with the latest innovations and technological advancements. The Innovation, Cybersecurity, and Technology (H) Committee will elevate and unify our long-standing engagement in these areas to ensure that the NAIC continues to aggressively protect consumers while reducing barriers to positive innovation. One of the most significant areas of focus for
the new Committee will be on the industry’s use of data, particularly in the context of complex rating and underwriting models. Protecting the consumer’s data and privacy and ensuring the sector’s appropriate and ethical use of that data is a critical responsibility that all our members take seriously. We look forward to engaging with each other and stakeholders on these important issues in the future.

Another example of our ability to adapt and maintain focus on our core mission of protecting consumers is the work we are doing as part of our Special (EX) Committee on Race and Insurance formed in 2020. During the recent Summer National Meeting, we adopted new charges for the Special Committee and delved deeper into workstream deliverables. You will start to see some of that work emerging at this meeting. As our esteemed Most Recent Past President, Director Farmer observed when we started this journey a year ago that it is the duty of the insurance sector to address these issues while promoting diversity. We are committed to continuing the journey and completing our work, but this work will take time. I invite all interested parties to work with us to deliver on this commitment to consumers.

Let’s switch our focus on our work this year to some of the fundamentals critical to our state-based system. LTCI continues to present challenges for state insurance regulators as we look for ways to balance the tension between solvency regulation and consumer protection. The Long-Term Care Insurance (EX) Task Force is close to finalizing the development of a regulatory framework for a multistate rate review process. Additionally, it appointed a multistate rate review actuarial team, which completed its first regulator-only pilot project.

Other NAIC groups continue to make progress in achieving their goals related to long-term care (LTC), including: the Senior Issues (B) Task Force appointed the Long-Term Care Insurance Model Update (B) Working Group with the charge to examine the Long-Term Care Insurance Model Act (#640) and Long-Term Care Insurance Model Regulation (#641); the Valuation Analysis (E) Working Group conducted its third year of reviewing filings related to Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves (AG 51); and the Long-Term Care Actuarial (B) Working Group and its subgroups made progress on actuarial issues, addressing reserving standards and reporting requirements.

Another important area of focus for us is climate risks and mitigation. From our earliest days, NAIC members have responded to climate-driven natural catastrophes—both before and after disaster strikes. We play a crucial role in understanding the risks themselves and ensuring that companies are appropriately accounting for those risks. State insurance regulators are on the front lines of natural catastrophe preparedness and response, protecting policyholders and maintaining well-functioning insurance markets. The NAIC and state insurance regulators are addressing climate-related risks through the three main pillars of insurance regulation: financial risk analysis, insurance market availability and affordability, and consumer education and outreach.

Last month, the NAIC released a report on how the state-based insurance regulatory system is adaptable to emerging risks. The report summarizes past, present, and future programs and actions by the NAIC and state insurance regulators to help the insurance industry respond to increasing natural hazards, including flooding, wildfires, and extreme weather. Thanks to the coordination of Commissioner Lara, state insurance regulators participated as panelists during the recent COP26 Sustainable Insurance Series hosted by the UN Environment Programme’s (UNEP’s) Principles for Sustainable Insurance (PSI) Initiative.

I was fortunate to join Commissioner Lara, Maryland Insurance Commissioner Kathleen A. Birrane, Director Farmer, Washington Commissioner Mike Kreidler, and Commissioner Mais as panelists at this event. Our discussion focused on how U.S. insurance regulators are taking action.

We continue to work with our counterparts both domestically and internationally on the critical work of addressing climate risks and the protection gap. One year ago, the NAIC finalized and adopted the Group Capital Calculation (GCC), an effort I am very proud of. The GCC provides an additional analytical tool for state insurance regulators that complements other analytical mechanisms in place and helps quantify risk across the insurance group and gain a clear picture for the allocation of capital.

Over the course of 2021, we continued implementing post-financial crisis reforms, in particular, those focused on enhancing group supervision and addressing potential systemic risk in the insurance sector at an international level. At the same time, we took up a new generation of issues facing regulators across the globe, many of which mirror our domestic focus. As regulators of the largest single market in the world, it is critical for NAIC members to provide their perspective on these issues and ensure that any standard setting takes into account our viewpoints. As a result, the NAIC, group-wide supervisors across
several states, and a variety of volunteer insurers actively contribute to this work by providing data and input. This is particularly important in assessing the comparability of the Aggregation Method to the International Association of Insurance Supervisors (IAIS) insurance capital standard (ICS).

This year marked a landmark anniversary for us: an incredible 150 years of NAIC members working collaboratively to protect consumers and ensure fair, competitive, and healthy markets. In 2022, we’ll continue to respond to whatever issues come our way. A state insurance regulator’s job is never done.

As I prepare to pass the torch to Director Cameron and shift to the role of immediate past president, we will continue the tradition of finding ways to work together to advance solutions that help foster a robust and responsive insurance sector that provides consumers with safe and reliable insurance products. As we continue the journey, let me leave you with something from our start—that first meeting 150 years ago—in fact some of the closing remarks of essentially the first NAIC president. Here is how he characterized our state-based system, recognizing the momentous opportunity afforded by the creation of the NAIC:

This system of insurance is like a vast machine. Let the parts be constructed by independent artisans without any reference to the labors of each other, and you have no warrant that they will fit together and work in harmony or produce any kind of useful result; but let the artificers come together and unite their skill. Let the different parts be made for each other, and by connecting links be made to work together, and you will have a perfect machine. Let this method be applied to a common system of insurance supervision for the whole country, and we shall have a system like the mechanism of the clock, where every little wheel works in harmony with all the others, a system which shall move with regularity, the certainty, and the efficiency of the pendulum. When we accomplish this result, then, and not till then, will we see the reward of the efforts which we have bestowed in this first meeting to bring about this result.

I think it’s fair to say we have achieved, to a large degree, the vision set out by those first members; and while there is more work to do, we certainly continue to abide by the notion that we are stronger when we are connected, and we are better when we act in harmony. It has been a unique privilege and personal honor for me to have contributed in some small way to this grand design and legacy, as has every one of you sitting around the table. We are part of something larger than ourselves, and the work we do will extend well beyond our time here. Thank you for the opportunity to be a part of it.

Farmer Award

At the NAIC, we don’t hand out green or yellow blazers to mark achievements like they do in professional golf or football, respectively, to mark exceptional performance. However, we do celebrate a leader’s accomplishments with the NAIC’s President’s Award for Distinguished NAIC Leadership, otherwise known as the President’s Award.

The President’s Award was first announced at the 2008 Fall National Meeting. At that time, it was awarded to Commissioner Jim Long. This award was also given out in 2010 when Commissioner Alfred Gross was the recipient, followed by Commissioner Sandy Praeger in 2014, Superintendent Joseph Torti III in 2015, and the last time we gave the President’s Award to Commissioner Roger Sevigny in 2017.

Today, it is my distinct honor to present the President’s Award for Distinguished NAIC Leadership for the last time.

For his commitment as we navigated through a global pandemic; for his proactive stance on inclusion within the insurance industry; for the support he provided in standing up the Special (EX) Committee on Race and Insurance and co-chairing the Climate and Resiliency (EX) Task Force; and his leadership in the areas of technology, data, privacy, and cybersecurity. For his service on the Financial Stability Oversight Council (FSOC) and his work on the Reinsurance (E) Task Force, Long-Term Care Insurance (EX) Task Force, Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, Regulatory Framework (B) Task Force, Casualty Actuarial and Statistical (C) Task Force, Surplus Lines (C) Task Force, Title Insurance (C) Task Force, Workers’ Compensation (C) Task Force, Antifraud (D) Task Force, Market Regulation Certification (D) Working Group, Producer Licensing (D) Task Force, Financial Condition (E) Committee, Capital Adequacy (E) Task Force, Receivership and Insolvency (E) Task Force, Restructuring Mechanisms (E) Working Group, and Risk Retention Group (E) Task Force. Before the session times out, let’s just say that in short for consistently providing 53 years of exceptional leadership and service advancing consumer protection and regulation in the insurance industry.
I present the President’s Award for Distinguished NAIC Leadership to the Honorable Raymond G. Farmer, South Carolina Department of Insurance Director, 2020 NAIC President, and 2021 Immediate Past NAIC President. [Applause]

Congratulations Director Farmer. Please come up and receive the award.

As the president of the NAIC, I would like to make the following proclamation.

Whereas the NAIC lauds exemplary leadership, we will no longer recognize exceptional leadership with the presentation of the President’s Award for Distinguished NAIC Leadership.

Therefore, I, David Altmaier, President of the NAIC, on this 13th day of December of the year 2021, do hereby proclaim the Raymond G. Farmer Award for Exceptional Leadership to be the name of the award presented for exceptional NAIC leadership from this day forward.

THANK YOU/GIFT PRESENTATION

[Director Cameron thanked Director Altmaier].

ADJOURNMENT

Thank you. I look forward to meeting with state insurance regulators, industry leaders, and interested parties as we discuss the work being done at the NAIC. With that, I officially conclude this opening session of the 233rd meeting of the NAIC.
Synopsis of the NAIC Committee, Subcommittee and Task Force Meetings

2021 Fall National Meeting

December 11–16, 2021

TO: Members of the NAIC and Interested Parties
FROM: The Staff of the NAIC

Committee Action

NAIC staff have reviewed the committee, subcommittee, and task force reports and highlighted the actions taken by the committee groups during the 2021 Fall National Meeting. The purpose of this report is to provide NAIC members, state insurance regulators, and interested parties with a summary of these meeting reports.

EXECUTIVE (EX) COMMITTEE AND PLENARY (Joint Session)

December 16, 2021

1. Adopted the report of the Executive (EX) Committee. See the Committee listing for details.
2. Adopted the establishment of the Innovation, Cybersecurity, and Technology (H) Committee and its charges.
3. Adopted by consent the committee, subcommittee, and task force minutes of the Summer National Meeting.
4. Adopted the NAIC 2022 proposed budget.
5. Adopted the NAIC 2022 proposed committee charges.
6. Received the report of the Life Insurance and Annuities (A) Committee. See the Committee listing for details.
7. Received the report of the Health Insurance and Managed Care (B) Committee. See the Committee listing for details.
8. Received the report of the Property and Casualty Insurance (C) Committee. See the Committee listing for details.
9. Received the report of the Market Regulation and Consumer Affairs (D) Committee. See the Committee listing for details.
10. Received the report of the Financial Condition (E) Committee. See the Committee listing for details.
11. Received the report of the Financial Regulation Standards and Accreditation (F) Committee. See the Committee listing for details.
12. Received the report of the International Insurance Relations (G) Committee. See the Committee listing for details.
13. Adopted the 2022 Generally Recognized Expense Table (GRET).
15. Adopted the travel insurance Market Conduct Annual Statement (MCAS) blank.
16. Adopted the short-term limited-duration (STLD) MCAS blank.
17. Adopted the Regulatory Information Retrieval System (RIRS) coding structure.
20. Adopted exposure of the 2020 revisions to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) as an update to the accreditation standards.
21. Received a status report on state implementation of NAIC-adopted model laws and regulations.
22. Received the results of the 2022 zone officer elections:
   A. Midwest Zone: Commissioner Glen Mulready, Chair (OK); Commissioner Doug Ommen, Vice Chair (IA); and Director Anita G. Fox, Secretary (MI).
   B. Northeast Zone: Commissioner Gary D. Anderson, Chair (MA); Commissioner Kathleen A. Birrane, Vice Chair (MD); and Commissioner Trinidad Navarro, Secretary (DE).
   C. Southeast Zone: Commissioner Scott A. White, Chair (VA); Commissioner Carter Lawrence, Vice Chair (TN); and Commissioner James J. Donelon, Secretary (LA).
   D. Western Zone: Director Lori K. Wing-Heier, Chair (AK); Commissioner Michael Conway, Vice Chair (CO); and Commissioner Andrew R. Stolfi, Secretary (OR).
23. Elected the 2022 NAIC officers: Director Dean L. Cameron (ID), President; Director Chlora Lindley-Myers (MO), President-Elect; Commissioner Andrew N. Mais (CT), Vice President; and Commissioner Jon Godfread (ND), Secretary-Treasurer.
EXECUTIVE (EX) COMMITTEE
December 14, 2021

1. Adopted the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, which met Dec. 12 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings. During this meeting, the Committee and Subcommittee took the following action:
   A. Adopted its Dec. 7, Oct. 26, and Summer National Meeting minutes, which included the following action:
      i. Approved the proposed NAIC 2022 budget and recommended that it be considered by the full membership during the joint meeting of the Executive (EX) Committee and Plenary during the Fall National Meeting.
      ii. Held a public hearing on the NAIC 2022 proposed budget with interested parties.
      iii. Approved exposure of the NAIC 2022 proposed budget for a public comment period.
      iv. Approved the 2021 NAIC Staffing Request Fiscal.
   B. Adopted the report of the Audit Committee, including its Dec. 7 minutes. During this meeting, the Committee took the following action:
      i. Received an overview of the Oct. 31 financial statements.
      ii. Received an update on the 2021 financial audit and the 2021/2022 Service Organization Control (SOC) 1 and SOC 2 audits.
      iii. Received an update on database filing fee payments and the Zone financials.
      iv. Received an update on the Enterprise Resource Planning (ERP) project.
      v. Received an update on the Operating Reserve Analysis project.
   C. Adopted the report of the Internal Administration (EX1) Subcommittee, including its Nov. 22 minutes. During this meeting, the Subcommittee took the following action:
      i. Received the Sept. 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports.
      ii. Adopted a recommendation to increase the liability driven investment (LDI) percentage for the Defined Benefit Plan portfolio.
   D. Received the joint chief executive officer/chief operating officer (CEO/COO) report.
   E. Received an update on the System for Electronic Rates & Forms Filing (SERFF) modernization project.
   F. Received a cybersecurity update.

2. Adopted the report of the Executive (EX) Committee, which met Dec. 7, Oct. 26, and Oct. 12 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee took the following action:
   A. Approved the NAIC 2022 proposed budget and recommended that it be considered by the full membership during the joint meeting of the Executive (EX) Committee and Plenary during the Fall National Meeting.
   B. Approved the 2021 NAIC Staffing Request Fiscal.
   C. Approved the exposure of the NAIC 2022 proposed budget for public review and comment.
   D. Approved the exposure of the 2021 NAIC Staffing Request Fiscal for public comment.
   E. Reappointed Commissioner Andrew N. Mais (CT) to the International Association of Insurance Supervisors (IAIS) Executive Committee for a two-year term.

3. Adopted the report of the Climate and Resiliency (EX) Task Force. See the Task Force listing for details.
5. Adopted the report of the Innovation and Technology (EX) Task Force. See the Task Force listing for details.
6. Adopted the report of the Long-Term Care Insurance (EX) Task Force. See the Task Force listing for details.
7. Adopted the report of the Special (EX) Committee on Race and Insurance. See the Committee listing for details.
8. Adopted its 2022 proposed charges.
9. Received a status report on the NAIC State Ahead strategic plan implementation.
10. Received a status report on model law development efforts for amendments to: 1) the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); 2) the Life Insurance Disclosure Model Regulation (#580); 3) the Mortgage Guaranty Insurance Model Act (#630); 4) the Nonadmitted Insurance Model Act (#870); and 5) the Pet Insurance Model Act.
11. Received a report from the National Insurance Producer Registry (NIPR).
12. Received a report from the Interstate Insurance Product Regulation Commission (Compact).
Climate and Resiliency (EX) Task Force

December 14, 2021

1. Adopted its Summer National Meeting minutes
2. Received a report from the Technology Workstream recommending that the Center for Insurance Policy and Research (CIPR) create a Catastrophe Model Center of Excellence (COE) as a shared resource for state insurance regulators regarding catastrophe models.
3. Received a report from the Climate Risk Disclosure Workstream on its redesigned Climate Risk Disclosure Survey. The Workstream aligned its redesigned survey to the recommendations of the Financial Stability Board’s (FSB’s) Task Force on Climate-Related Financial Disclosure (TCFD).
4. Received a report from the Solvency Workstream, which plans to make its final recommendations regarding financial solvency tools to the Task Force in the first quarter of 2022.
5. Received a report from the Innovation Workstream, which has met twice since the Summer National Meeting to: 1) hear a presentation from Sola Insurance about a parametric product offered as an endorsement to a homeowners policy; and 2) hear a presentation from Guy Carpenter about community-based insurance for disaster resilience.
6. Received a report from the Pre-Disaster Mitigation Workstream, which has been focused on its charge to collect and share resources with consumers and other stakeholders and seeking out best practices to encourage consumer risk awareness.
7. Heard an update on federal activities, including President Joe Biden’s executive order on climate-related financial risk; the Financial Stability Oversight Council’s (FSOC’s) Report on Climate-Related Financial Risk; the U.S. Securities and Exchange Commission’s (SEC’s) development of a mandatory climate risk disclosure period for the Committee’s consideration; the Build Back Better Act; and the Disaster Mitigation and Tax Parity Act.
8. Heard an update on international activities, including the International Association of Insurance Supervisors’ (IAIS’) creation of a Climate Risk Steering Group; the NAIC’s participation in the COP26 Sustainable Insurance Series hosted by the UN Environment Programme’s (UNEP’s) Principles for Sustainable Insurance Initiative (PSI); and recent meetings of the Sustainable Insurance Forum (SIF) and the European Union (EU)-U.S. Insurance Dialogue Project.

Government Relations (EX) Leadership Council

The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting.

Innovation and Technology (EX) Task Force

December 13, 2021

1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Big Data and Artificial Intelligence (EX) Working Group, including its Dec. 13 minutes. During this meeting, the Working Group took the following action:
   A. Reviewed its 2022 proposed charges.
   B. Heard a presentation from an insurance regulatory advisor on how to leverage the lessons learned in developing the regulatory framework for cybersecurity to the development of a regulatory framework for artificial intelligence (AI).
   C. Heard a presentation from Monitaur on a possible AI regulatory path.
   D. Heard a presentation from SigmaRed on monitoring and mitigating AI bias and enabling transparency.
   E. Heard a presentation on the preliminary, aggregate analysis of industry responses to the private personal auto (PPA) AI/machine learning (ML) survey on insurers’ use and governance of big data, as used in an AI/ML model.
   F. Discussed the next line of insurance to survey.
   G. Discussed development of its 2022 work plan.
3. Adopted the report of the Speed to Market (EX) Working Group, including its Nov. 16 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 30 and June 29 minutes, which included the following action:
      i. Adopted its March 10 minutes.
      ii. Heard an update from the Information Technology Group (ITG).
      iii. Discussed and considered the suggestions received for updates to the product coding matrices (PCMs) and uniform transmittal documents (UTDs).
C. Reviewed its charge to provide information to states on contacts and resources for updates that may need to be made to the Product Requirements Locator (PRL) tool. A help document was posted on the Working Group’s web page.

4. Adopted the report of the E-Commerce (EX) Working Group, including its Oct. 7 minutes. During this meeting, the Working Group took the following action:
   A. Heard a presentation from the American Council of Life Insurers (ACLI) and the American Property Casualty Insurance Association (APCIA) on the e-commerce legal landscape, COVID-19 regulatory accommodations, and state adoption of e-commerce rules/guidance.
   B. Heard a suggestion from the ACLI that the NAIC develop a handbook that would capture the regulatory framework that exists with respect to e-commerce, including variations among jurisdictions.
   C. Heard a presentation from the Insured Retirement Institute (IRI), the Missouri Insurance Department, and the Center for Economic Justice (CEJ). All of these presentations informed three surveys that were circulated to state insurance regulators and interested parties on Dec. 10.

5. Heard an update on Colorado’s Restrict Insurers’ Use of External Consumer Data legislation (S.B. 21-169), which is related to big data and AI oversight.

6. Heard presentations from the American InsurTech Council (AITC) and the InsurTech Coalition.

7. Received an update from the ad hoc drafting group on proposed draft charges for a new NAIC “H” Committee.

8. Received updates from other NAIC committees and working groups on related activities, including the Special (EX) Committee on Race and Insurance, the Privacy Protections (D) Working Group, and the Accelerated Underwriting (A) Working Group.

9. Heard a presentation from the MIB Group on its algorithmic bias testing for life insurers.

10. Received an update on the System for Electronic Rates & Forms Filing (SERFF) modernization project.

Long-Term Care Insurance (EX) Task Force
December 12, 2021

1. Adopted its Oct. 29 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.

2. Heard an update on industry trends that could have an impact on the solvency of long-term care insurance (LTCI) companies and factors affecting reserves.

3. Received the report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, which met Dec. 12. During this meeting, the Subgroup took the following action:
   A. Adopted its Nov. 15 and Sept. 28 minutes, which included the following action:
      i. Received and discussed interested state insurance regulator and interested party comments on the LTCI multistate actuarial (MSA) rate review framework (MSA Framework) draft.
      ii. Exposed the revised MSA Framework for a 21-day public comment period ending Dec. 6.
   B. Received and discussed interested party comments on the MSA Framework and made a few revisions in response to the comments.
   C. Adopted the MSA Framework.

4. Adopted the MSA Framework.

5. Received the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, which met Dec. 7, Nov. 19, Oct. 19, Oct. 4, Sept. 27, and Aug. 23. During these meetings, the Subgroup took the following action:
   A. Adopted the “Issues Related to LTC Wellness Benefits” document.
   B. Adopted the “Checklist for Premium Increase Communications” document.
   C. Received and discussed comments from interested state insurance regulators and interested parties on the “Issues Related to LTC Wellness Benefits” document. Edits were made to the document to address comments.
   D. Received and discussed comments from interested state insurance regulators and interested parties on the “Checklist for Premium Increase Communications” document. Edits were made to the document to address comments.

7. Adopted the “Checklist for Premium Increase Communications” document.

Special (EX) Committee on Race and Insurance
December 14, 2021

1. Adopted its Summer National Meeting minutes.
2. Received a status report for the following workstreams:
   A. Workstream One: Research/analyze the level of diversity and inclusion within the insurance industry.
   B. Workstream Two: Research/analyze the level of diversity and inclusion within the NAIC and state insurance regulator community.
   C. Workstream Three: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the property/casualty (P/C) line of business.
   D. Workstream Four: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the life insurance and annuities line of business.
   E. Workstream Five: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the health insurance line of business.

3. Heard an update on Colorado’s Restrict Insurers’ Use of External Consumer Data legislation (S.B. 21-169). The act prohibits an insurer from unfairly discriminating based on an individual’s race, color, national or ethnic origin, religion, sex, sexual orientation, disability, gender identity, or gender expression in any insurance practice.

4. Heard a presentation from the American Property Casualty Insurance Association (APCIA) on its initiatives underway to promote and advance a more diverse and inclusive industry and on its diversity, equity, and inclusion (DE&I) catalog created in partnership with PlusUltre.

5. Heard a presentation from Blue Cross and Blue Shield of Illinois on its efforts related to DE&I for the organization’s 24,000 employees and nearly 17 million members.

6. Heard a presentation from Zurich North America on its DE&I structure and its analytics metrics insights.

INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE
See the Executive (EX) Committee listing for details.

Information Systems (EX1) Task Force
November 18, 2021
1. Adopted its Summer National Meeting minutes.
2. Received an operational report on the NAIC’s information technology (IT) activities, including: product highlights; innovation and technology; service and support; data collection metrics; team; project portfolio summary; and technology adoption and system usage. The report provides updates for upcoming improvements, impacts to new state technology offerings from the NAIC, and general updates on the activities of the NAIC technology team.

3. Received a project portfolio update, including project status reports for 21 active technical projects and a summary of two recently completed projects.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE
December 15, 2021
1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Accelerated Underwriting (A) Working Group, including its Dec. 6 minutes. During this meeting, the Working Group took the following action:
   A. Discussed comments received on the latest draft of the accelerated underwriting educational report.

3. Adopted the report of the Life Actuarial (A) Task Force. See the Task Force listing for details.
4. Received a memorandum from the Life Actuarial (A) Task Force and the Valuation Analysis (E) Working Group on the Financial Sector Assessment Program (FSAP) recommendation.

5. Adopted revisions to Actuarial Guide XXV—Calculation of Minimum Reserves and Minimum Nonforfeiture Values for Policies with Guaranteed Increasing Death Benefits Based on an Index (AG 25).

6. Adopted the 2022 Generally Recognized Expense Table (GRET)
7. Adopted the 2022 proposed charges of the Life Actuarial (A) Task Force.
Life Actuarial (A) Task Force
December 8, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Dec. 1, Nov. 18, Nov. 4, Oct. 21, Sept. 30, and Sept. 16 minutes, which included the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Adopted its 2022 proposed charges.
   C. Adopted the Society of Actuaries’ (SOA’s) 2022 Generally Recognized Expense Table (GRET).
   D. Adopted the SOA historical mortality improvement (HMI) recommendation and the HMI scale factors.
   E. Adopted amendment proposal 2021-13, which corrects language that allows the addition of prescribed mortality margins for some life/long-term care (LTC) combination products to decrease, rather than increase, modeled reserves.
   F. Adopted amendment proposal 2021-12, which corrects a reference error in VM-21, Requirements for Principle-Based Reserves for Variable Annuities, and clarifies the requirements for variable annuity contracts with no minimum guaranteed benefits under three prescribed assumptions in VM-21 Section 6C.
   G. Exposed amendment proposal 2021-11, which addresses items related to VM-21 information necessary for regulatory review that companies did not include in their VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation, reports for a public comment period ending Dec. 1.
   H. Adopted revisions to Actuarial Guideline XXV—Calculation of Minimum Reserves and Minimum Nonforfeiture Values for Policies with Guaranteed Increasing Death Benefits Based on an Index (AG 25), which remove the fixed 4% nonforfeiture rate floor to align the guideline with the VM-02, Minimum Nonforfeiture Mortality and Interest, changes implemented for the 2021 Valuation Manual.

2. Adopted the report of the Longevity Risk (E/A) Subgroup, which has not met since the Summer National Meeting.
3. Adopted the report of the Guaranteed Issue (GI) Life Valuation (A) Subgroup, which has not met since the Summer National Meeting.
4. Adopted the report of the Experience Reporting (A) Subgroup, which has not met since the Summer National Meeting.
5. Adopted the report of the Valuation Manual (VM)-22 (A) Subgroup, which met Dec. 1 and Nov. 18 in joint session with the Task Force. The Subgroup approved a request to the SOA and the American Academy of Actuaries (Academy) for the development of mortality factors for structured settlements.
6. Adopted the report of the Index-Linked Variable Annuity (A) Subgroup, including its Nov. 23 and Sept. 23 minutes. During these meetings, the Subgroup took the following action:
   A. Exposed the draft actuarial guideline for index-linked variable annuities (ILVAs) for a 60-day public comment period ending Jan. 27, 2022.
   B. Discussed establishing interim values for ILVAs.
7. Adopted the report of the Indexed Universal Life (IUL) Illustration (A) Subgroup. The Subgroup provided background on the IUL illustration issues that led to the development of Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest (AG 49) and Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold on or After December 14, 2020 (AG 49-A). Regulator reviews have revealed that while illustrated credited rates may have lowered, they have not lowered as much as was contemplated when AG 49-A was adopted.
9. Received an update on the development of the economic scenario generator (ESG).
10. Discussed comments received on the exposure of the asset adequacy testing (AAT) actuarial guideline.
11. Heard an update on experience reporting data collection.
12. Heard an update from the joint committee of the Academy and the SOA on future mortality improvement factors.
13. Heard an update from the SOA on research and education.
14. Heard an update on the activities of the Academy Life Practice Council, including recent webinars, a boot camp, its annual meeting, and a life policy update webinar scheduled for January 2022.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE
December 15, 2021

1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Consumer Information (B) Subgroup, including its Dec. 2, Oct. 20, Oct. 14, and Aug. 24 minutes. During these meetings, the Subgroup took the following action:
   A. Adopted claims process-related guides; i.e., appeals process, medical necessity, explanation of benefits (EOBs), claims filing, and billing codes and claims.

© 2021 National Association of Insurance Commissioners
B. Adopted updates to the *Frequently Asked Questions About Health Care Reform* document.
C. Adopted a “New Protections From Surprise Medical Bills” consumer-facing brief on balance billing.

3. Adopted the report of the Health Innovations (B) Working Group, including its Dec. 11 and Nov. 2 minutes. During these meetings, the Working Group took the following action:
   A. Heard presentations from Blue Cross and Blue Shield of North Carolina and from Anthem on health plan efforts to address health disparities.
   B. Received an update on findings of research conducted with the Center for Insurance Policy and Research (CIPR) on the health disparities impacts of the rise in telehealth services and the move to alternative payment models.
   C. Heard a presentation from Georgia State University on using state rate review authority to limit premium growth.
   D. Heard a presentation from State Health and Value Strategies on state policy considerations with enhanced premium tax credits.
   E. Discussed its work on race and insurance.

4. Adopted the report of the Health Actuarial (B) Task Force. See the Task Force listing for details.
5. Adopted the report of the Regulatory Framework (B) Task Force. See the Task Force listing for details.
6. Adopted the report of the Senior Issues (B) Task Force. See the Task Force listing for details.
7. Adopted its 2022 proposed charges.
8. Adopted the 2022 proposed charges of its task forces.
9. Heard an update from the Center for Consumer Information and Insurance Oversight (CCIIO) on Biden administration federal legislative and administrative initiatives and priorities. The update included a discussion of the administration’s plans on working with the states with respect to the implementation and enforcement of the provider provisions of the federal No Surprises Act (NSA).
10. Discussed its work on developing guidance documents for state insurance departments to use as part of their outreach efforts to providers and consumers on the NSA.
11. Heard a presentation on the Kaiser Family Foundation’s (KFF’s) summary findings from its 2021 Employer Health Benefits Survey (EHBS).
12. Received an update on the work of Workstream Five of the Special (EX) Committee on Race and Insurance since its last update to the Committee during its meeting at the Summer National Meeting. The Workstream met Dec. 3, Nov. 18, Oct. 14, Sept. 9, and Aug. 26. During these meetings, the Workstream discussed and considered revisions to its “Principles for Data Collection” document. The Workstream also discussed and exposed a draft outline for its proposed white paper on provider networks, provider directories, and cultural competency for a public comment period ending Nov. 8. The Workstream plans to meet Dec. 20 to consider final revisions to the “Principles for Data Collection” document and, if finalized, forward the document to the Special Committee for consideration.

**Health Actuarial (B) Task Force**

**November 29, 2021 (in lieu of the Fall National Meeting)**

1. Adopted its Sept. 14 minutes, which included the following action:
   A. Adopted its April 23 and April 6 minutes, and the May 17 and March 29 minutes of the Long-Term Care Actuarial (B) Working Group, which included the following action:
      i. Exposed a proposal to revise the instructions for the health Statement of Actuarial Opinion (SAO) for a public comment period ending May 7.
      ii. Discussed a long-term care insurance (LTIC) data call.
      iii. Heard a presentation from the Society of Actuaries (SOA) on COVID-19 impacts on LTIC.
   B. Adopted a motion to disband the Health Care Reform Actuarial (B) Working Group and the State Rate Review (B) Subgroup.
   C. Adopted its 2022 proposed charges.
2. Heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on a system connection between the System for Electronic Rates & Forms Filing (SERFF) and the Health Insurance Oversight System Unified Rate Review (HIOS URR) module
3. Heard an update on SOA health care trend research.
5. Heard an update from the Academy and the SOA Research Institute on an LTIC mortality and lapse study.
6. Discussed a proposal to revise instructions for the health SAO.
7. Discussed the impact of legislation adding dental, hearing, and vision benefits to Medicare Part B on Medicare supplement plans.
Regulatory Framework (B) Task Force

November 30, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Nov. 9 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.

2. Adopted the report of the Accident and Sickness Insurance Minimum Standards (B) Subgroup, including its Nov. 1, Oct. 4, Sept. 20, Aug. 23, Aug. 9, and July 26 minutes. During these meetings, the Subgroup took the following action:
   A. Continued discussion of revisions to Sections 1–7 of the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171) based on the comments received by the July 2 public comment deadline.
   B. Heard presentations on the products covered under Model #171. The presentations specifically discussed: 1) the different types of products covered under Model #171; 2) how they pay benefits; 3) what they are designed to do; 4) how they are marketed; and 5) how they are sold. The Subgroup also heard a consumer perspective on these products.

3. Adopted the report of the Employee Retirement Income Security Act (ERISA) (B) Working Group, including its Oct. 8 and July 30 minutes. During these meetings, the Working Group took the following action:
   A. Discussed potential updates to the Health and Welfare Plans Under the Employee Retirement Income Security Act: Guidelines for State and Federal Regulation (ERISA Handbook) related to the U.S. Supreme Court’s decision in Rutledge vs. Pharmaceutical Care Management Association (PCMA) with respect to any ERISA preemption. The Working Group also discussed the Rutledge decision in relation to the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup’s new 2021 charge to develop a white paper discussing state laws regulating pharmacy benefit manager (PBM) business practices. Following these discussions, the Working Group adjourned into regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
   B. Reviewed and discussed an initial draft summary of the Rutledge decision. The Working Group agreed that the initial draft summary needed to be revised. The Working Group plans to review and discuss a revised draft summary in early 2022.

4. Adopted the report of the Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group, which plans to meet at the Fall National Meeting. See the Working Group listing for details. The Working Group also met Aug. 5. During this meeting, the Working Group took the following action:
   A. Heard presentations discussing the provider perspective on mental health parity.

5. Adopted the report of the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup, which has not held an open meeting since October 2020 because it completed its initial work to develop a new NAIC model regulating PBMs. The proposed new NAIC model did not receive sufficient votes for adoption during the Executive (EX) Committee and Plenary meeting at the Summer National Meeting. The Subgroup met Nov. 8 and Sept. 5 in regulator-to-regulator session, pursuant to paragraph 2 (pending investigations which may involve either the NAIC or any member in any capacity), paragraph 3 (specific companies, entities or individuals), and paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to continue work on its goals. The Subgroup also plans to meet at the Fall National Meeting. See the Subgroup listing for details.

6. Heard a presentation on the federal No Surprises Act’s (NSA’s) interim final rules and implications for the states. The presentation provided an overview of the NSA and detailed the provisions included in the interim final rules and proposed rules issued to date implementing the NSA.

7. Discussed the expanded scope of external review under the NSA, the implications of this expanded scope on the Uniform Health Carrier External Review Model Act (#76), and possible steps the Task Force can take to address the issue. The Task Force decided to set up an ad hoc group to work with NAIC staff to discuss the possible steps to address the issue and make recommendations to the Task Force sometime in late January or early February 2022.

Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group

December 13, 2021

1. The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group met in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to assess state needs and plan work for 2022.
Pharmacy Benefit Manager Regulatory Issues (B) Subgroup
December 11, 2021

1. Heard an update of the recent ruling in the Pharmaceutical Care Management Association (PCMA) v. Wehbi case.
2. Heard presentations from Connecticut, Oklahoma, Virginia, and Wisconsin on their pharmacy benefit manager (PBM) laws.
3. Discussed moving forward with its next meeting to begin work to develop a white paper on issues related to the state regulation of certain PBM business practices. The white paper also will examine the role PBMs, pharmacy services administrative organizations (PSAOs), and other prescription drug supply chain entities play in the provision of prescription drug benefits. The Subgroup also plans to hear from a few states on the implementation of their PBM laws and regulations.

Senior Issues (B) Task Force
November 30, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Oct. 6 minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
   B. Heard a presentation on the WA Cares Fund.
2. Adopted the report of the Long-Term Care Insurance Model Update (B) Subgroup, including its Nov. 3 and Oct. 13 minutes. During these meetings, the Subgroup took the following action:
   A. Reviewed Sections 1–12 of the Long-Term Care Insurance Model Regulation (#641) to determine their flexibility to remain compatible with the evolving delivery of long-term care (LTC) services and the evolving long-term care insurance (LTCI) marketplace.
3. Discussed Medigap and durable medical equipment (DME), with a focus on excessive charges.
4. Heard a federal legislative update regarding funding for the State Health Insurance Assistance Program (SHIP) and the hearing benefit to be added to Medicare Part B.

PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE

December 15, 2021

1. Adopted its Nov. 10 minutes, which included the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Adopted the Pet Insurance Model Act.
2. Adopted the report of the Casualty Actuarial and Statistical (C) Task Force. See the Task Force listing for details.
3. Adopted the report of the Surplus Lines (C) Task Force. See the Task Force listing for details.
4. Adopted the report of the Title Insurance (C) Task Force. See the Task Force listing for details.
5. Adopted the report of the Workers’ Compensation (C) Task Force, which has not met since the Summer National Meeting.
6. Adopted the report of the Cannabis Insurance (C) Working Group, including its Dec. 1 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Oct. 21 minutes. During this meeting, the Working Group took the following action:
      i. Adopted its Summer National Meeting minutes.
      ii. Discussed the outline for the appendix to the Understanding the Market for Cannabis Insurance white paper.
      iii. Discussed its 2022 proposed charges.
   B. Received an update on the drafting of the Understanding the Market for Cannabis Insurance white paper appendix.
   C. Discussed the potential to collaborate with the Producer Licensing (D) Task Force to study, in states where cannabis is legalized for medical and/or recreational use, whether cannabis-related convictions are preventing individuals from being licensed as an agent or broker.
   D. Heard a presentation from the University of Colorado on emerging scientific issues in the cannabis space.
   E. Heard a presentation from the Cannabis Regulators Association (CANNRA) on cannabis policy and regulation trends.
7. Adopted the report of the Catastrophe Insurance (C) Working Group, including its Dec. 12 minutes. During this meeting, the Working Group met in joint session with the NAIC/Federal Emergency Management Agency (FEMA) (C) Advisory Group and took the following action:
   A. Adopted the Catastrophe Insurance (C) Working Group’s Summer National Meeting minutes.
   B. Adopted the NAIC/FEMA (C) Advisory Group’s Nov. 15 minutes. During this meeting the Advisory Group took the following action:
      i. Heard an update from FEMA on Risk Rating 2.0. Risk Rating 2.0 is meant to better align individual property rates with risk. Phase I began on Oct. 1 and included the selling of new flood insurance policies under the new rating
system, as well as allowing current National Flood Insurance Program (NFIP) policyholders to take advantage of premium decreases.

ii. Heard about Risk Rating 2.0 training opportunities that are available from FEMA.

iii. Heard from FEMA about joint messaging opportunities.

C. Heard a report from FEMA on Risk Rating 2.0 and implementation of the new rating system for the NFIP.

D. Heard a report from FEMA on the FEMA structure and FEMA regional flood insurance specialists. FEMA discussed the ways in which it can assist the various DOIs, including: 1) outreach, education, and training; 2) technical assistance; 3) NFIP claims, underwriting and coverage; 5) pre- and post-disaster support; and 6) public awareness events and activities.

E. Received an update on the NAIC Catastrophe Resource Center. NAIC staff updated the Working Group and Advisory Group of the items added to the resource center, including FEMA regional information and FEMA contact information.

F. Heard a report from Louisiana regarding Hurricane Ida. Topics covered included: 1) the scope of the hurricane; 2) the path of the storm; 3) the parishes affected; 4) storm damage; and 5) the Louisiana Department of Insurance (DOI) response to the hurricane.

G. Received an update on the Catastrophe Modeling Handbook (Handbook). NAIC staff discussed a survey that was sent out to the state DOIs. There was a discussion held regarding the evaluation of models for various perils, as well as information regarding the usefulness of each section in the current Handbook. The drafting group will meet in January 2022 to further discuss the survey and the drafting process.

H. Discussed future engagements with FEMA, including: 1) an NAIC/FEMA meeting for FEMA Region 6; 2) an earthquake event to be hosted by the Missouri DOI in spring 2022; and 3) the Cascadia Rising 2022 National Level Exercise (NLE).

8. Adopted the report of the Pet Insurance (C) Working Group, including its Dec. 1 minutes. During this meeting, the Working Group took the following action:

   A. Adopted its Oct. 21 minutes, which included the following action:
      i. Adopted its Oct. 7 minutes, which included the following action:
         a. Adopted its Sept. 8 minutes, which included the following action:
            1) Discussed the definition of “wellness plans” in the draft Pet Insurance Model Act.
         b. Discussed comments on the revised draft Pet Insurance Model Act.
      ii. Discussed comments on the revised draft Pet Insurance Model Act.
   B. Discussed the collection of pet insurance data.

9. Adopted the report of the Terrorism Insurance Implementation (C) Working Group, which has not met since the Summer National Meeting.

10. Adopted the report of the Transparency and Readability of Consumer Information (C) Working Group, including its Nov. 17 minutes. During this meeting, the Working Group took the following action:

A. Adopted its Summer National Meeting minutes.

B. Adopted the report of the Consumer Education Drafting Group. The Drafting Group has split into two subgroups to complete the drafting of consumer education materials about rating factors and discounts on automobile insurance policies. Once the information regarding automobile insurance is complete, the drafting group will draft documents about homeowners insurance.

C. Heard a presentation on disparities in insurance access. This presentation was based on a grassroots survey done through the lens of community organizations.

11. Adopted its 2022 proposed charges with the following revisions:

   A. Added a charge for the Title Insurance (C) Task Force to “[r]eview current rate regulation practices.”

   B. Added a charge for the Statistical Data (C) Working Group to “[i]mplement the expedited reporting and publication of average auto and average homeowners premium portions of the annual Auto Insurance Database Report (Auto Report) and Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance Report (Homeowners Report).

12. Heard presentations related to auto insurance premium refunds resulting from reduced driving during the pandemic.

13. Heard a federal update related to flood insurance, federal spending bills, auto insurance, and cannabis legislation.

Casualty Actuarial and Statistical (C) Task Force
December 7, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Nov. 17, Nov. 9, Oct. 19, Oct. 12, Aug. 20, and Summer National Meeting minutes, which included the following action:
B. Adopted a decision to discontinue requiring continuing education (CE) categorization by appointed actuaries in 2023.
C. Adopted its 2022 proposed charges.
E. Adopted a response to the Blanks (E) Working Group regarding proposal 2021-11BWG.
F. Heard a report on the NAIC rate model technical reviews.

2. Reported that it met Oct. 19, Sept. 21, and Aug. 17 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss rate filing issues.

3. Reported that it met Oct. 26 to hear a “Book Club” presentation about algorithmic accountability.

4. Adopted the report of the Actuarial Opinion (C) Working Group, including its Sept. 23, Sept. 8, and Sept. 2 minutes. During these meetings, the Working Group took the following action:
   A. Discussed and adopted the 2021 Regulatory Guidance.

5. Adopted the report of the Statistical Data (C) Working Group, which met Nov. 30 and Oct. 20 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings. The Working Group also met Oct. 7 and Sept. 23. During these meetings, the Working Group took the following action:
   A. Adopted the Auto Insurance Database Report (Auto Report), the Competition Database Report (Competition Report), and the Profitability Report.
   B. Researched the ability to collect and publish auto and home premium and exposures under an accelerated timeline.
   C. Reported that it is continuing to work on the Dwelling Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance Report (Homeowners Report).

7. Exposed NAIC staff’s proposed random forest information items and glossary for a 60-day public comment period ending Jan. 20, 2022.
8. Heard a presentation from the Academy on the activities of its Casualty Practice Council and the Committee on Property and Liability Financial Reporting (COPFLR).
9. Heard a presentation from the CAS on its research activity.

Surplus Lines (C) Task Force
November 29, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Surplus Lines (C) Working Group, including its Sept. 22 minutes. During this meeting, the Working Group took the following action:
   A. Discussed proposed modifications to the NAIC Standard Form Trust Agreement.
   B. Adopted revisions to the Quarterly Listing of Alien Insurers.
3. Received an update from the drafting group for the Nonadmitted Insurance Model Act (#870).
4. Heard an update on surplus lines industry results.

Title Insurance (C) Task Force
November 16, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Oct. 19 minutes, which included the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Discussed its 2022 proposed charges.
   C. Heard a presentation from Demotech on its Regional Title Underwriter Escrow Theft & Defalcation Prevention Measures report.
   D. Heard a presentation on the American Land Title Association’s (ALTA’s) new forms of Commitment, Owner’s Policy, and Loan Policy, effective July 1.
2. Adopted its 2022 proposed charges. Revisions from its 2021 charges include removing outdated or completed charges and minor editorial changes for clarification of intent.
3. Heard a presentation from AM Best on how the robust housing market has driven historic title industry performance.
4. Heard a presentation from ALTA on key changes to the homeowners policy of title insurance and ALTA endorsements.
Workers’ Compensation (C) Task Force
The Workers’ Compensation (C) Task Force did not meet at the Fall National Meeting.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE
December 15, 2021

1. Adopted its Summer National meeting minutes.
2. Adopted its 2022 proposed charges, which did not include any substantial changes from its 2021 charges. Its charges noted that further direction from the Executive (EX) Committee may result in the Privacy Protections (D) Working Group being moved to the new Innovation, Cybersecurity, and Technology (H) Committee.
3. Adopted new title in-force and title claims standardized data requests (SDRs) to be included in the reference documents of the Market Regulation Handbook (Handbook). A state may use these two SDRs to determine if a company follows appropriate procedures with respect to the issuance and underwriting of title policies and the handling of claims.
4. Adopted revisions to Chapter 24—Conducting the Health Examination of the Handbook to provide additional guidance that market conduct examiners should review complaints regarding quality of care.
5. Adopted revisions to Chapter 25—Conducting the Medicare Supplement Examination of the Handbook to provide more specific cross-references to the Model Regulation to Implement the NAIC Medicare Supplement Insurance Minimum Standards Model Act (#651).
6. Received the Privacy Protections (D) Working Group’s “Exposure Draft on Consumer Data Privacy Protections,” dated Dec. 7, which includes the following:
   A. A summary of consumer privacy protections provided by the Health Information Privacy Model Act (#55), the Insurance Information and Privacy Protection Model Act (#670), and the Privacy of Consumer Financial and Health Information Regulation (#672).
   B. A summary of the General Data Protection Regulation (GDPR) and recently adopted state consumer privacy protection laws.
   C. A summary of the Working Group’s discussion on data transparency, consumer control of data, consumer access to data, data accuracy, and data ownership and portability.
   D. A recommendation that Model #670 and Model #672 be revised to modernize their applicability to the current technology-based insurance market.
7. Received an update regarding the Market Conduct Examination Guidelines (D) Working Group’s coordination with the Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group to update the mental health parity-related chapter of the Handbook to ensure it reflects the current mental health parity compliance requirements set forth in federal guidance enacted in December 2020.
8. Adopted the report of the Antifraud (D) Task Force. See the Task Force listing for details.
10. Adopted the report of the Producer Licensing (D) Task Force. See the Task Force listing for details.
11. Adopted the report of the Market Conduct Annual Statement Blanks (D) Working Group, including its Nov. 22 minutes.
    During this meeting, the Working Group took the following action:
    A. Adopted its Summer National Meeting minutes.
    B. Received an update on the life Market Conduct Annual Statement (MCAS) draft edits for accelerated underwriting (AU).
    C. Received an update on the Other Health Drafting Group, which has not met recently.
    D. Received a proposal from the subject matter expert (SME) group on lawsuit definitions and placement of lawsuit data elements for the homeowners and private passenger auto (PPA) MCAS.
    E. Received a proposal from the SME group on reporting of the digital claims interrogatory question.
12. Adopted the report of the Market Conduct Examination Guidelines (D) Working Group, including its Nov. 4 minutes.
    During this meeting, the Working Group took the following action:
    A. Adopted its Oct. 7 minutes, which included the following action:
       i. Adopted its Sept. 2 minutes, which included the following action:
          b. Received updates from state insurance regulator volunteers reviewing models potentially affecting the Handbook.
          iii. Discussed a new draft Chapter 25—Conducting the Medicare Supplement Examination for inclusion in the Handbook.
          iv. Discussed a new draft Chapter 24—Conducting the Health Examination for inclusion in the Handbook.
v. Received updates from state insurance regulator volunteers reviewing models potentially affecting the Handbook.

B. Adopted revisions to Chapter 25—Conducting the Medicare Supplement Examination relating to Model #651.

C. Adopted revisions to Chapter 24—Conducting the Health Examination relating to the Health Maintenance Organization Model Act (#430).

D. Discussed proposed revisions to Chapter 21—Conducting the Property and Casualty Examination relating to the Real Property Lender-Placed Insurance Model Act (#631).

E. Discussed proposed revisions to Chapter 20—General Examination Standards relating to the Insurance Holding Company System Regulatory Act (#440).

F. Received updates from state insurance regulator volunteers who reviewed recently adopted models with the potential to affect the Handbook.

G. Received an update on the background of the Working Group’s group supervision charge.

13. Adopted the report of the Market Analysis Procedures (D) Working Group, including its Nov. 18 minutes. During this meeting, the Working Group took the following action:

A. Adopted its July 1 minutes, which included the following action:
   i. Adopted its March 19 minutes.
   ii. Discussed market analysis training.
   iii. Discussed the next line of business for the MCAS.
   iv. Discussed the initial aggregate analysis of MCAS data for 2020.
   v. Discussed residence/issuance reporting in the MCAS.

B. Discussed market analysis training.

C. Discussed standard MCAS ratios for travel insurance MCAS and short-term limited-duration (STLD) insurance MCAS.

D. Discussed market analysis tools.

E. Discussed the need for clarification on the MCAS reporting of multiyear guaranteed annuities (MYGA).

14. Adopted the report of the Privacy Protections (D) Working Group, including its Dec. 11 minutes. During this meeting, the Working Group took the following action:

A. Adopted its Nov. 22, Oct. 25, and Oct. 11 minutes, which included the following action:
   i. Heard an update on state privacy legislation.
   ii. Received comments on the right to data portability and the right to restrict the use of data in the privacy policy statement exposure draft.
   iii. Walked through the final exposure draft of the privacy report to the Market Regulation and Consumer Affairs (D) Committee on the privacy policy statement and the right to consumer ownership of data.
   iv. Received comments on the right to restrict the use of data, the right of portability, and the right of consumer data ownership.
   v. Reviewed an update to the Abbreviated Data Privacy Legislation Chart and to the State Privacy Law Comparison Chart.
   vi. Received comments on the right to delete information and the right to correct information.
   vii. Heard an update on state privacy legislation.
   viii. Adopted its Sept. 25, Sept. 13, and Aug. 30 minutes, which included the following action:
      a. Received comments on Segment One (the right to opt-out) and Segment Two (the right to opt-in) of the privacy policy statement exposure draft.
      b. Announced a format change to the policy statement exposure draft.
      c. Adopted its July 12 minutes as amended with a revision to change the phrase “credit card” to “debit card.”
      d. Received an update on the Summer National Meeting.
      e. Received an update from NAIC Legal Division staff on state privacy legislation.
      g. Exposed the first Working Group exposure draft of the privacy policy statement with comments incorporated.
      h. Received additional comments from a consumer perspective on data privacy.

B. Received comments on the final exposure draft of its report on consumer data privacy protections.

C. Adopted the final exposure draft of its report on consumer data privacy protections.
Market Actions (D) Working Group
December 11, 2021
The Market Actions (D) Working Group met in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to continue work on its goals.

Antifraud (D) Task Force
November 12, 2021 (in lieu of the Fall National Meeting)
1. Adopted its Oct. 27 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
2. Received an update from the Antifraud Education Enhancement (D) Working Group. The Working Group has been working with NAIC staff in preparation for the upcoming investigator safety training webinar that will take place in December. The Working Group advised its members to send any suggested training/webinar topics they would like to have provided.
3. Received an update from the Antifraud Technology (D) Working Group. The Working Group formed a subject matter expert (SME) group to create a template for industry to use when creating their Antifraud Plan. The SME group has been meeting since September to finalize this project. The final draft will be exposed to the Working Group for comment. Once adopted by the Working Group, it will be presented to the Task Force for consideration.
4. Received an update from the Improper Marketing of Health Insurance (D) Working Group. The Working Group has continued to meet monthly in regulator-to-regulator session. It is holding its first open meeting at the Fall National Meeting. See the Working Group listing for more details.
5. Heard an update from the Coalition Against Insurance Fraud on its work to fight insurance fraud.

Improper Marketing of Health Insurance (D) Working Group
December 12, 2021
2. Heard a presentation from Out2Enroll on the efforts being made to fight against improper marketing of health insurance.
3. Heard a presentation from the Alliance of Health Care Sharing Ministries (AHCSM). The presentation focused on the regulation of health care ministries and issues faced with improper marketing of health insurance. The AHCSM will be completing an accreditation process in 2022.
4. Heard a presentation from America’s Health Insurance Plans (AHIP). The presentation discussed the issues being faced concerning the improper marketing of health insurance plans. AHIP notified the Working Group of its interest in assisting with the development of a model or guideline to help regulate the marketing of health insurance.

Market Information Systems (D) Task Force
November 23, 2021 (in lieu of the Fall National Meeting)
1. Adopted its Oct. 29 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
2. Adopted the report of the Market Information Systems Research and Development (D) Working Group, including its Nov. 5 and Oct. 14 minutes. During these meetings, the Task Force took the following action:
   A. Adopted the artificial intelligence (AI) subject matter expert (SME) group’s recommendation, which included:
      i. Evaluate currently available market analysis data and assess its quality.
      ii. Adopt a more rigorously statistical approach to identify the predictive power of market scoring systems and integrate data into a single overall analysis.
      iii. Incorporate promising AI modes of analyses, as well as traditional statistical modeling.
      iv. Assess ways AI can improve the efficiency of qualitative analysis and facilitate pattern recognition across larger volumes of textual evidence.
      v. Explore potential data sources suitable for AI techniques.
   B. Reviewed and prioritized the outstanding Uniform System Enhancement Request (USER) forms.
   C. Reviewed the 2020 Market Information Systems (MIS) data analysis metric results. The Working Group will continue its analysis of the results and determine recommendations to improve data quality.
3. Discussed the Market Information Systems Research and Development (D) Working Group recommendations regarding the incorporation of AI in the NAIC MIS.
Producer Licensing (D) Task Force

November 29, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Oct. 29 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
2. Received the report of the Producer Licensing Uniformity (D) Working Group, including its Nov. 3 minutes. During this meeting, the Working Group took the following action:
   A. Reviewed the results of its survey addressing the appropriate producer licensing standard for the sell, solicitation, and negotiation of pet insurance. Seven states responded to the survey that the current uniform licensing standard for pet insurance is the correct policy direction; seven responded that the major lines of authority of property/casualty (P/C) should be required; one state responded that pet insurance should become a core limited line; and one state responded that a license for any major line of authority should be required.
3. Received the report of the Uniform Education (D) Working Group, including its Oct. 7 minutes. During this meeting, the Working Group took the following action:
   A. Discussed the distribution of a survey regarding state requirements for the approval of continuing education (CE) course instructors.
4. Discussed the draft procedures for amending the NAIC uniform producer licensing applications, which are being developed to ensure that the consideration of changes to the uniform applications support the NAIC members’ goal of providing stable, uniform applications and encourage the use of electronic technology for licensing.
5. Received comments from the American Council of Life Insurers (ACLI) on diversity, inclusion, and unnecessary barriers to individuals seeking an insurance producer license. The ACLI referenced the 1033 waiver process and the presence of unnecessary pre-licensing education mandates.
6. Discussed the elimination of cultural bias in producer licensing examinations, which included a review of preliminary feedback from two examination vendors on their internal training and industry standards for examination fairness.
7. Received a report from the National Insurance Producer Registry (NIPR) Board of Directors. October marked the NIPR’s 25th anniversary, and it is on track to have its highest transaction volume and review year in 2021. NIPR continues to implement the contact change request application for business entities. NIPR has implemented the application in 28 states and has processed more than 7,300 transactions. NIPR recently implemented a chat feature for customers, and from January to October, the customer service department handled more than 162,000 calls, more than 70,000 emails, and 20,000 chats. NIPR is also on track to complete its transition to the cloud before the end of the year.
8. Discussed how states could address errors or misstatements on producer licensing applications that were completed by third-party authorized submitters.

FINANCIAL CONDITION (E) COMMITTEE

December 13, 2021

1. Adopted its Nov. 19 and Summer National Meeting minutes, which included the following action:
   A. Adopted a response to a referral received from the Financial Regulation and Accreditation Standards (F) Committee regarding captive insurers.
   B. Received a response from the Valuation Analysis (E) Working Group chair related to principle-based reserving (PBR) and a recommendation from the International Monetary Fund (IMF) related to its Financial Sector Assessment Program (FSAP).
   C. Received a request from the Capital Adequacy (E) Task Force chair about a proposed new working group related to investment risks.
   D. Adopted its 2022 proposed charges.
3. Adopted the report of the Capital Adequacy (E) Task Force. See the Task Force listing for details.
4. Adopted the report of the Examination Oversight (E) Task Force. See the Task Force listing for details.
5. Adopted the report of the Financial Stability (E) Task Force. See the Task Force listing for details.
6. Adopted the report of the Receivership and Insolvency (E) Task Force. See the Task Force listing for details.
7. Adopted the report of the Reinsurance (E) Task Force. See the Task Force listing for details.
9. Adopted the report of the Valuation of Securities (E) Task Force. See the Task Force listing for details.
10. Adopted the report of the Group Capital Calculation (E) Working Group, including its Nov. 22 minutes. During this meeting, the Working Group took the following action:
    A. Adopted its Nov. 8, Sept. 8, and Summer National Meeting minutes, which included the following action:
i. Exposed a staff memorandum that includes possible group capital calculation (GCC) modifications for a public comment period ending Dec. 23.

ii. Exposed some clarifying changes to the GCC instructions that were previously provided to the Working Group and the public as part of the GCC Trial Implementation for a public comment period ending Dec. 8.

iii. Discussed comments on maintenance documents and proposed revisions.

iv. Discussed comments on a draft referral to the Capital Adequacy (E) Task Force.

B. Discussed the results of the GCC Trial Implementation.

11. Adopted the report of the Group Solvency Issues (E) Working Group, including its Nov. 30 minutes. During this meeting, the Working Group took the following action:

A. Adopted its Summer National Meeting minutes.

B. Discussed comments received during the re-exposure of proposed revisions to the Financial Analysis Handbook to incorporate elements of the International Association of Insurance Supervisors’ (IAIS’) Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) deemed appropriate for the U.S. system of solvency regulation.

C. Received updates from its ComFrame Examination Drafting Group and its ComFrame Own Risk and Solvency Assessment (ORSA) Drafting Group on the status of their efforts to develop proposed revisions to incorporate ComFrame elements into the Financial Condition Examiners Handbook and the NAIC Own Risk and Solvency Assessment Guidance Manual (ORSA Guidance Manual).

D. Heard an update on the status of IAIS group-related activities, including its recent adoption of its revised Application Paper on Supervisory Colleges.

12. Adopted the report of the Mutual Recognition of Jurisdictions (E) Working Group, including its Nov. 18 minutes. During this meeting, the Working Group took the following action:

A. Adopted the yearly due diligence reviews of the qualified jurisdictions and reciprocal jurisdictions.

B. Adopted the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation (GCC Process).

C. Provided an update on the Republic of Korea application to become a qualified jurisdiction.

13. Adopted the report of the NAIC/American Institute of Certified Public Accountants (AICPA) (E) Working Group, including its Sept. 13 minutes. During this meeting, the Working Group took the following action:

A. Discussed the premium threshold in the Annual Financial Reporting Model Regulation (#205).

B. Heard an update from PricewaterhouseCoopers (PwC) on recent auditing pronouncements affecting statutory audit reports.

C. Received an update on the results from a joint project between the NAIC and the AICPA on reserve data training for state insurance regulators that was conducted in 2020.

14. Adopted the report of the National Treatment and Coordination (E) Working Group, including its Dec. 1 minutes. During this meeting, the Working Group took the following action:

A. Adopted its Sept. 29 minutes, which included the following action:

i. Discussed its 2022 proposed charges.

ii. Adopted proposal 2021-06 (Request for Disclaimer).

iii. Received a referral from the Financial Analysis (E) Working Group requesting an addition to the Form A database to inform state insurance regulators when private equity firms are acquiring ownership of an insurer and to assist in maintaining a record of private equity-owned insurers.

iv. Discussed drafting guidance or frequently asked questions (FAQ) document for Form A applications.

v. Discussed non-domiciliary state notification of dissolution or mergers.

B. Exposed proposal 2021-07 (Application Instructions Regarding Company Responses) for a 45-day public comment period ending Jan. 14, 2022.

C. Exposed proposal 2021-08 (Voluntary Dissolution Best Practices) for a 45-day public comment period ending Jan. 14, 2022.

D. Discussed shell acquisitions.

15. Adopted the report of the Restructuring Mechanisms (E) Working Group, including its Dec. 6 minutes. During this meeting, the Working Group took the following action:

A. Discussed comments received on a co-chair draft white paper. The white paper is structured around the existing good practices within the NAIC’s 1997 Liability-Based Restructuring White Paper, as well as other best practices presented to the Working Group in 2019 from various organizations.
16. Adopted the report of the Risk-Focused Surveillance (E) Working Group, including its Nov. 9 minutes. During this meeting, the Working Group took the following action:
   A. Discussed comments received on the exposure of proposed revisions to the Financial Analysis Handbook and the Financial Condition Examiners Handbook to enhance guidance related to the review of affiliated service agreements.
   B. Adopted updated salary ranges for analysts and examiners, as well as legacy per diem rates for examiners.
   C. Discussed a referral received from the Chief Financial Regulator Forum regarding the need to update the standardized job descriptions for analyst and examiner positions maintained by the Working Group.

17. Reported that the Financial Analysis (E) Working Group met Dec. 11, Nov. 3, and Oct. 13 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss letter responses and financial results.

18. Reported that the Valuation Analysis (E) Working Group met Nov. 30, Nov. 10, Sept. 27, and July 26 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss valuation items related to specific companies.

21. Received and discussed a request from the Center for Economic Justice (CEJ) with regard to taking on a project to examine and identify investment practices of insurers that may disproportionately affect communities of color.

22. Discussed a proposed project to consider a revised approach to the risk-based capital (RBC) requirements for structured securities and other asset-backed securities (ABS).

Accounting Practices and Procedures (E) Task Force
December 11, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Summer National Meeting minutes.

2. Adopted the report of the Statutory Accounting Principles (E) Working Group, including its Dec. 11 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Nov. 10, Oct. 25, Sept. 10, Aug. 26, July 20, and July 12 minutes, which included the following action:
      i. During its Nov. 10 meeting, the Working Group took the following action:
         a. Adopted the following nonsubstantive revisions to statutory accounting guidance:
            1) Statement of Statutory Accounting Principles (SSAP) No. 43R—Loan-Backed and Structured Securities: Revisions direct that residual equity tranches shall be reported on Schedule BA: Other-Long Term Invested Assets for year-end 2022 reporting. However, for entities currently reporting on Schedule D-1, early application (and reclassification) is permitted. In addition, the Working Group directed that a joint memorandum with the Valuation of Securities (E) Task Force be provided to the Blanks (E) Working Group to clarify that a self-assigned NAIC 5GI is not permitted for residual tranches and that such items reported on Schedule D-1 for year-end 2021 are required to be reported with an NAIC 6 designation. (Ref #2021-15)
            2) Revisions clarify that salvage and subrogation estimates and recoveries should be reported as a reduction to both claims/losses and loss adjusting expenses, as appropriate. (Ref #2021-13)
         b. Adopted the following editorial revisions to statutory accounting; (Ref #2021-12EP):
            1) Preamble: Incorporates a paragraph number for the existing statutory hierarchy section.
            2) Updates designation codes for preferred stock as noted in Section 2 of Appendix A-001: Investments of Reporting Entities.
            3) Updates reference to the former Emerging Actuarial Issues (E) Working Group, in Appendix C, as well as add reference to the Valuation Analysis (E) Working Group’s use of included interpretations.
            4) Updates reference to the former Emerging Actuarial Issues (E) Working Group in Appendix C-2, as well as add reference to the Valuation Analysis (E) Working Group’s use of included interpretations.
            5) Updates improve the readability of SSAP No. 21R—Other Admitted Assets paragraph 9 regarding receivables for securities.
         c. Adopted Interpretation (INT) 21-02: Extension of the Ninety-Day Rule for the Impact of Hurricane Ida: This INT provides temporary options to the “90-day rule” in SSAP No. 6—Uncollected Premium Balances, Bills Receivable for Premiums, and Amounts Due from Agents and Brokers for policies affected by Hurricane Ida. The INT automatically nullifies Jan. 24, 2022. (Ref #2021-13)
      ii. During its Oct. 25 e-vote, the Working Group took the following action:

iii. During its Sept. 10 e-vote, the Working Group took the following action:

iv. During its Aug. 26 meeting, the Working Group:
   a. Adopted the following nonsubstantive revisions to statutory accounting guidance:
      1) Revisions clarify that the required adjustments directed in SSAP No. 97 —Investments in Subsidiary, Controlled and Affiliated Entities, paragraph 9, may result in a negative equity valuation. Revisions also clarify that foreign insurance subsidiary, controlled, and affiliated (SCA) entities, when applying paragraph 9 adjustments, may stop at zero if the entity does not provide services or hold assets on behalf of a U.S.-based reporting entity. (Ref #2021-04)
      2) Revisions clarify that the “effective call price” valuation ceiling in SSAP No. 32R —Preferred Stock shall only apply in cases where the issuer has announced that the instrument will be called, or the call is currently exercisable, by the issuer. (Ref #2021-10)
   b. Exposed the following nonsubstantive revisions for a public comment period ending Oct. 1:
      1) SSAP No. 43R: Revisions correspond with guidance adopted by the Valuation of Securities (E) Task Force to the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), which directs that mortgage loans in scope of SSAP No. 37 —Mortgage Loans will continue historical practice. However, for loans that have completed a structural assessment, as determined by the Securities Valuation Office (SVO), the mortgage loan may be reclassified from Schedule B: Mortgage Loans to Schedule D-1: Long-Term Bonds. Additional revisions included the removal of various examples of securities that may be in scope of SSAP No. 43R. In addition, the agenda item sought comment on whether INT 20-10 should be explicitly nullified and if agenda item 2020-24 should be disposed of without statutory revisions. (Ref #2021-11)
      2) Revisions clarify that salvage and subrogation estimates and recoveries should be reported as a reduction to both claims/losses and loss adjusting expenses, as appropriate. (Ref #2021-13)
      3) NAIC Policy Statement on Statutory Accounting Principles Maintenance Agenda: Revisions, in response to a referral received from the Financial Condition (E) Committee, modify the terminology of “substantive” and “nonsubstantive” to describe statutory accounting revisions being considered by the Working Group. (Ref #2021-14)
   c. Exposed Issue Paper No. 165 —Levelized Commission for a public comment period ending Oct. 1 to document the discussion of recent nonsubstantive revisions to SSAP No. 71 —Policy Acquisition Costs and Commissions. (Ref #2019-24)
   d. Received an update on the following projects and referrals:
      1) Received a referral from the Valuation of Securities (E) Task Force on proposed revisions that would permit the use of unrated and nonguaranteed subsidiary obligors in the evaluation of working capital finance investment (WCFI) programs. The Working Group directed a response that additional changes to SSAP No. 105R —Working Capital Finance Investments may be considered in the future, dependent upon Task Force actions.
      2) Ref #2019-21: The Working Group discussed the exposed principles-based bond definition and comments received. The Working Group directed NAIC staff to proceed with drafting an issue paper and proposed SSAP revisions to reflect the concepts reflected in the exposed principles, and it directed that the “43R Study Group” be repurposed to a “Bond Proposal Small Group” made up of additional state insurance regulators to work with dedicated interested party representatives and continue discussion on the application of the principles, as well as specific investment structures.
   v. During its July 20 e-vote, the Working Group exposed agenda item 2021-10: SSAP No. 32R – Clarification of Effective Call Price for a public comment period ending Aug 6.
   vi. During its July 12 e-vote, the Working Group adopted its May 20, April 20, and Spring National Meeting minutes.

B. Adopted the following substantive revisions to statutory accounting guidance:
   i. Issue Paper No. 165 —Levelized Commissions to document the discussion that led to the adoption of nonsubstantive revisions to SSAP No. 71 from agenda item 2019-24: Levelized and Persistency Commission. (Ref #2019-24)
   C. Adopted the following nonsubstantive revisions to statutory accounting guidance:
i. SSAP No. 32R: Revisions remove lingering references to clarify that historical cost is not a permitted valuation method. Other revisions ensure consistency with previously adopted language. (Ref #2021-17)

ii. SSAP No. 43R: Revisions capture SVO-identified credit tenant loans (CTLs) in scope of SSAP No. 43R. Revisions also remove examples of various securities from a non-scope paragraph. (Ref #2021-11)

iii. Appendix F – NAIC Policy Statements: NAIC Policy Statement on Maintenance of Statutory Accounting Principles: Revisions, in response to a referral received from the Financial Condition (E) Committee, modify the historical use of the terms “substantive” and “nonsubstantive.” Effective Jan. 1, 2022, substantive modifications will be identified as a “new SAP concept,” while nonsubstantive modifications will be a “SAP clarification.” (Ref #2021-14)

iv. Blanks proposal: Adopted an agenda item supporting supplemental reporting of Federal Home Loan Bank (FHLB) borrowings classified as a deposit-type contract and reported on Exhibit 7 – Deposit-Type Contracts. This agenda item did not result in statutory revisions. However, it reflected support for blanks proposal 2021-15BWG. (Ref #2021-16)

v. Adopted the following editorial revisions (Ref #2021-19EP):
   a. SSAP No. 16R—Electronic Data Processing Equipment and Software: Revisions correct various paragraph references.
   b. SSAP No. 43R: Revisions remove outdated references to previously deleted guidance.

vi. Nullified INT 20-10: Reporting Nonconforming Credit Tenant Loans as no longer applicable for statutory accounting. While the INT expired on Oct. 1, for historical documentation purposes, the Working Group nullified the reporting exceptions within the INT. The revisions adopted to the P&P Manual make this guidance no longer relevant. (INT 20-10 and Ref# 2021-11)

D. Exposed the following nonsubstantive revisions to statutory accounting guidance:
   i. SSAP No. 22R—Leases: Revisions clarify that in any scenario in which a lease terminates early, all remaining leasehold improvements shall be immediately expensed. (Ref #2021-25)
   ii. SSAP No. 22R: Revisions reject Accounting Standards Update (ASU) 2021-05, Leases (Topic 842), Lessors—Certain Leases with Variable Lease Payments for statutory accounting. (Ref #2021-29)
   iii. SSAP No. 25—Affiliates and Other Related Parties and SSAP No. 43R: Revisions clarify the identification and reporting requirements for affiliated transactions and incorporate new disclosures to identify investments held that involve related parties. The new disclosures will require identification when investments are acquired through, or in, related parties, regardless of if they meet the definition of an affiliate. (Ref #2021-21)
   iv. SSAP No. 43R: Revisions reflect updated NAIC designation and designation category guidance adopted by the Valuation of Securities (E) Task Force to the P&P Manual, for residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS). (Ref #2021-23)
   v. SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance: Revisions reflect 2021 clarifications to life and health reinsurance disclosures and provide a proposed guidance document to address auditor inquiries based on disclosures initially reported at year-end 2020. (Ref #2021-31)
   vi. SSAP No. 68—Business Combinations and Goodwill: Revisions reject ASU 2021-03, Intangibles – Goodwill and Other (Topic 350) – Accounting Alternative for Evaluating Triggering Events for statutory accounting. (Ref #2021-28)
   vii. SSAP No. 72—Surplus and Quasi-Reorganizations: Revisions reject ASU 2021-04, Earnings Per Share (Topic 260), Debt—Modifications and Extinguishments (Subtopic 470-50), Compensation—Stock Compensation (Topic 718), and Derivatives and Hedging—Contracts in Entity’s Own Equity (Subtopic 815-40)—Issuer’s Accounting for Certain Modifications or Exchanges of Freestanding Equity-Classified Written Call Options for statutory accounting. Revisions incorporate guidance on how to account for changes in fair values for written call options. (Ref #2021-27)
   viii. SSAP No. 86—Derivatives: Agenda item seeks public comment regarding possible SSAP No. 86 revisions if considering an expanded effective hedge relationship permitted under U.S. generally accepted accounting principles (GAAP) within ASU 2017-12: Derivatives and Hedging: Targeted Improvements to Accounting for Hedging Activities. (Ref #2021-20)
   ix. SSAP No. 108—Derivatives Hedging Variable Annuity Guarantees: Revisions remove reference to the “standard scenario” to ensure consistency with VM-21, Requirements for Principle-Based Reserves for Variable Annuities. (Ref #2021-18)
   x. Appendix D—Nonapplicable GAAP Pronouncements: Revisions reject ASU 2021-04, Presentation of Financial Statements (Topic 205), Financial Services— Depository and Lending (Topic 942), and Financial Services—Investment Companies (Topic 946), Amendments to SEC Paragraphs Pursuant to SEC Final Rule Releases No. 33-10786, Amendments to Financial Disclosures about Acquired and Disposed Businesses, and No. 33-10835,
Update of Statistical Disclosures for Bank and Savings and Loan Registrants as not applicable for statutory accounting. (Ref #2021-30)

xi. Bond Proposal Project: Exposed a discussion draft of potential reporting options to revise Schedule D, Part 1: Long-Term Bonds to capture more granularity and transparency of investments reported as bonds. Also exposed revisions to the proposed principle concepts in determining whether an asset-backed security (ABS) satisfies the credit enhancement criteria for reporting as a bond. (Ref #2019-21)

xii. Blanks referrals:
   a. Exposed and sponsored a proposal to the Blanks (E) Working Group to supplement reporting of SCA entities investments reported on Schedule D-6-1. (Ref #2021-22)
   b. Exposed and sponsored a referral to the Blanks (E) Working Group to add a new general interrogatory to require disclosure of when cryptocurrencies are directly held or permitted for the remittance of premiums. (Ref #2021-24)

xiii. Editorial revisions: Exposed revisions to terminology references of “substantive” and “nonsubstantive” to reflect “new SAP concept” and “SAP clarification.” (Ref #2021-26EP)

xiv. The public comment period for items exposed ends Feb. 18, 2022, except for agenda items 2021-18 and 2021-31, which have a Jan. 14, 2022, public comment deadline to allow for possible adoption prior to the filing of the 2021 financial statements and their audited reports.

E. Disposed agenda item 2020-24: Accounting and Reporting of Credit Tenant Loans without statutory revisions. (Ref #2020-24)

F. Received an update on the following items:
   ii. Working Group referral of agenda item 2019-49: Retroactive Reinsurance Exception regarding diversity in the reporting of companies applying the retroactive reinsurance exception, which allows certain contracts to be reported prospectively: The Casualty Actuarial and Statistical (C) Task Force discussed this item on Dec. 7 and exposed preliminary recommendations.
   iii. U.S. GAAP exposures: Pending items will be addressed during the normal maintenance process.

3. Adopted the report of the Blanks (E) Working Group, including its Nov. 16 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Adopted proposal: 2021-14BWG – Expand the number of lines of business reported on Schedule H to match the lines of business reported on the health statement. Modify the instructions so they will be uniform between life/fraternal and property.
   C. Adopted its editorial listing.
   D. Approved the State Filing Checklists content.
   E. Rejected proposal 2021-11BWG requesting to add a new annual statement supplement to the property/casualty (P/C) statement to capture exposure data for Annual Statement Lines 4, 19.1, 19.2, and 21.2 of the Exhibit of Premiums and Losses.
   F. Deferred for future discussion proposal 2021-13BWG for a public comment period ending March 4, 2022. Proposal 2021-13BWG adds a new supplement to capture premium and loss data for annual statement lines 17.1, 17.2, and 17.3 of the Exhibit of Premiums and Losses (State Page) – Other Liability by more granular lines of business.
   G. Exposed seven new proposals for a public comment period ending March 4, 2022.

Capital Adequacy (E) Task Force
November 17, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Sept. 30, minutes, which included the following action:
   A. Adopted its 2022 proposed charges.

2. Adopted the report of the Health Risk-Based Capital (E) Working Group, including its Nov. 4 minutes. During this meeting, the Working Group took the following action:
   A. Exposed proposal 2021-18-H (Benchmarking Guidelines for Investment Income Adjustment in the Underwriting Risk Factors) for a 30-day public comment period ending Dec. 3.
   B. Adopted its 2021 revised working agenda to add an item to review the investment income adjustment annually, and revised bond factors to a priority 3 with a completion date of year-end 2023 or later.
C. Received an update from the American Academy of Actuaries (Academy) regarding the H2 – Underwriting Risk Component Review.
D. Received an update on the Excessive Growth Charge Ad Hoc Group and the Health Test Ad Hoc Group.
E. Discussed incorporating pandemic risk into the health risk-based capital (RBC) formula.

3. Adopted the report of the Life Risk-Based Capital (E) Working Group, including its Nov. 9 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Exposed its guidance document on bond factor changes for a 30-day comment period ending Dec. 9.
   C. Exposed the Academy’s C2 Mortality Risk Work Group recommendation on mortality factor updates for a 60-day public comment period ending Jan. 10, 2022.

4. Adopted the report of the Catastrophe Risk (E) Subgroup, including its Oct. 27 minutes. During this meeting, the Subgroup took the following action:
   A. Adopted its Sept. 28 minutes, which included the following action:
      i. Discussed its 2021 working agenda.
      ii. Received an update from its Catastrophe Model Technical Review Ad Hoc Group.
      iii. Heard a presentation from Karen Clark & Company (KCC) on current wildfire trends and its KCC U.S. wildfire model.
      iv. Discussed the possibility of allowing additional third-party models or adjustments to the vendor models.
   B. Discussed allowing third-party models to calculate the catastrophe model losses.
   D. Received an update from its Catastrophe Model Technical Review Ad Hoc Group, which met Oct. 18 to discuss additional questions with Risk Management Solutions (RMS) on its wildfire model.

5. Adopted the report of the Property and Casualty Risk-Based Capital (E) Working Group, including its Oct. 25 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Adopted the report of the Catastrophe Risk (E) Subgroup, including its Sept. 28 minutes. During this meeting, the Subgroup took the following action:
      i. Discussed its 2021 working agenda.
      iii. Heard a presentation from KCC regarding the KCC U.S. wildfire model.
      iv. Discussed the possibility of allowing third-party models calculate the catastrophe model losses.
   C. Exposed a draft recommendation to the Restructuring Mechanism (E) Subgroup for a 30-day public comment period ending Nov. 24. The draft recommendation was developed by the Property and Casualty Risk-Based Capital (E) Working Group, which included the findings and recommendation of the runoff companies.
   D. Exposed proposal 2021-14-P (R3 Factor Adjustment) for a 30-day public comment period ending Nov. 24.
   E. Heard an update from the Academy on the status of the research on recommending adjustments to the formulas for premium and reserve risk to reflect the impact of interest rates.

7. Adopted its working agenda.
8. Discussed a memorandum to the Financial Condition (E) Committee requesting a new working group under the direction of the Capital Adequacy (E) Task Force.
9. Heard a presentation from RMS on its North America wildfire HD model.

**Examination Oversight (E) Task Force**

December 1, 2021 (in lieu of the Fall National Meeting)

1. Adopted its Sept. 30 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
2. Adopted the report of the Electronic Workpaper (E) Working Group, which met Nov. 16 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings, to continue work on its goals.
3. Adopted the report of the Financial Analysis Solvency Tools (E) Working Group, including its Nov. 15 and Oct. 12 minutes. During these meetings, the Working Group took the following action:
   A. Adopted the following revisions to the Financial Analysis Handbook:
      i. Included additional guidance and another procedure to the existing liquidity stress test (LST) framework and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) requesting
that the lead state review and determine if any concerns exist and, if necessary, seek further explanation from
the insurer.
ii. Included guidance to incorporate the group capital calculation (GCC) into the analysis process, specifically to be
used as an analysis tool, rather than a set of ratios.
4. Adopted the report of the Financial Examiners Coordination (E) Working Group, which met Nov. 29 in regulator-to-
regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on
Open Meetings, to continue work on its goals.
5. Adopted the report of the Financial Examiners Handbook (E) Technical Group, including its Nov. 17 and Oct. 5 minutes.
During these meetings, the Technical Group took the following action:
A. Adopted the following revisions to the Financial Condition Examiners Handbook:
   i. Coordination framework revisions to simplify the guidance and clarify the roles/responsibilities of each state
      that has a company in a holding company group.
   ii. Completeness and accuracy repository revisions, which include the addition of analytical procedures to mirror
      the testing approaches of external auditors and enhanced collaboration with the actuary to determine
      significant lines of business and data elements to focus on for testing purposes.
B. Exposed the above revisions to the Financial Condition Examiners Handbook for a 30-day public comment period
   ending Nov. 5.
6. Adopted the report of the Information Technology (IT) Examination (E) Working Group, including its Nov. 18 and Oct. 13
minutes. During these meetings, the Working Group took the following action:
A. Adopted the following guidance updates for inclusion in the Financial Condition Examiners Handbook:
   i. New guidance in Section 1-3 describing the importance of insurance companies maintaining data in a manner
      that would allow for timely and efficient transfer of policyholder data, as well as guidance referencing tools that
      may be used in conducting this assessment.
   ii. Updates to the Exhibit C – IT Planning Questionnaire and Instructional Notes to include inquiries regarding
      comingled data and the accessibility and transferability of significant company datasets, as well as references
      to procedures within the IT work program that could be used in addressing related risks.
   iii. Updates to Exhibit C – Work Program to include common controls, preliminary information requests, and
      possible test procedures regarding the accessibility and transferability of data.
   iv. New guidance in Section 1-3 describing ransomware and considerations for assessing an insurer’s overall cyber
      hygiene.
   v. Updates to Exhibit C – Work Program to include common controls, preliminary information requests, and
      possible test procedures regarding the nature of company backup systems and whether those backups are air-
      gapped and immutable.
B. Approved a new sound practices document that was developed in response to a referral from the Chief Financial
Regulator Forum requesting additional guidance for assessing cyber vulnerabilities.
C. Exposed two referrals sent to the Working Group for a 30-day public comment period ending Nov. 12. The first
referral was received from the Receivership Financial Analysis (E) Working Group asking the IT Examination (E)
Working Group to consider guidance for evaluating an insurer’s systems and data (as part of the IT review during an
examination). The second referral was received from the facilitator of the Chief Financial Regulator Forum asking
the Working Group to consider additional guidance for addressing cyber vulnerabilities, particularly in response to
emerging vulnerabilities arising outside of the full-scope examination.
D. Exposed ransomware revisions for inclusion in the Financial Condition Examiners Handbook for a 30-day public
comment period ending Nov. 12.

Financial Stability (E) Task Force
December 7, 2021 (in lieu of the Fall National Meeting)
1. Adopted its Sept. 30 and Summer National Meeting minutes, which included the following action:
   A. Adopted its 2022 proposed charges.
   B. Heard an update on private equity (PE).
   C. Heard a macroprudential risk assessment update.
2. Heard an update on Financial Stability Oversight Council (FSOC) developments.
3. Received the report of the Macroprudential (E) Working Group, which met Nov. 30 and Nov. 12 in regulator-to-regulator
session, pursuant to paragraph 3 (specific companies, entities or individuals), and Oct. 18 in regulator-to regulator
session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC staff) and
paragraph 8 (consideration of strategic planning issues), of the NAIC Policy Statement on Open Meetings. During these meetings, the Working Group took the following action:

A. Discussed PE/related party risks.
B. Received an initial high-level summary of 2020 liquidity stress test (LST) filing results.
C. Heard an update on macroprudential risk, including a macroprudential process overview, a public report concept, and a risk analysis concept.

4. Received the report of the Valuation Analysis (E) Working Group. The Working Group’s report included an update to the Task Force on its request to the Working Group to assess a potential concern related to economic scenario generators (ESGs) developed by the American Academy of Actuaries (Academy).

5. Heard an international update, which includes an update on the International Association of Insurance Supervisors’ (IAIS’) global monitoring exercise and the consultation on LST.

**Receivership and Insolvency (E) Task Force**

**Nov. 30, 2021 (in lieu of the Fall National Meeting)**

1. Adopted its Oct. 21 minutes, which included the following action:
   A. Adopted its Summer National Meeting minutes.
   B. Exposed a referral to the Financial Regulation Standards and Accreditation (F) Committee regarding receivership amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) for a 30-day public comment period ending Nov. 22.
   C. Exposed a draft memorandum to state insurance departments on receivership and guaranty fund laws for a 30-day public comment period ending Nov. 22.
   D. Heard an update on international resolution activities.

2. Adopted a referral to the Financial Regulation Standards and Accreditation (F) Committee recommending the receivership revisions to Model #440 and Model #450 be “Acceptable, but Not Required” to be adopted by states under Part A Standards, rather than identifying “substantially similar” provisions that would be required.

3. Adopted a memorandum to state insurance departments encouraging them to consider review of their laws and adopt updates, including the Model #440 and Model #450 receivership amendments, recently adopted guidelines, and the 2017 amendments to the Life and Health Insurance Guaranty Association Model Act (#520).

4. Adopted the report of the Receivership Financial Analysis (E) Working Group, which met Nov. 15 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss companies in receivership.

5. Adopted the report of the Receiver’s Handbook (E) Subgroup, including its Nov. 18 minutes. During this meeting, the Subgroup took the following action:
   A. Exposed revisions to Chapter 1 and Chapter 2 of the Receiver’s Handbook for Insurance Company Insolvencies (Receiver’s Handbook) for a 30-day public comment period ending Dec. 20. The Subgroup is currently working on revisions to the other chapters of the Receiver’s Handbook.
   B. Heard an update on federal activities. The NAIC’s proposed State Insurance Receivership Priority (SIRP) Act establishes a claims filing deadline in the Federal Priority Act (FPA) for the U.S. Department of Justice (DOJ) to file claims of the U.S. to insolvent insurance company estates and to ensure state insurance regulators are not held personally liable if claims of the government are not paid first. The SIRP Act is expected to be introduced to the U.S. House of Representatives in early 2022.

**Reinsurance (E) Task Force**

**December 13, 2021**

1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Reinsurance Financial Analysis (E) Working Group, which met Nov. 23, Oct. 13, and Aug. 25 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings. During these meetings, the Working Group took the following action:
   A. Completed the annual certified reinsurer reviews.
   B. Approved the first four reciprocal jurisdiction reinsurers for passporting.
   C. Discussed the comments received by the Task Force on the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers.

3. Adopted the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers.
4. Received an update on the reinsurance activities of the Mutual Recognition of Jurisdictions (E) Working Group.
5. Received an update on the states’ implementation of the 2019 revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786). As of Dec. 9, 46 U.S. jurisdictions have adopted the 2019 revisions to Model #785, and four jurisdictions have action under consideration. Additionally, 25 states have adopted the revisions to Model #786, and 11 states jurisdictions currently have action under consideration.
6. Received an update on the states’ implementation of the Term and Universal Life Insurance Reserve Financing Model Regulation (#787). As of Nov. 30, eight jurisdictions have adopted Model #787, with another 10 jurisdictions with action under consideration.

Risk Retention Group (E) Task Force
December 1, 2021 (in lieu of the Fall National Meeting)
1. Adopted its Summer National Meeting minutes.
2. Discussed a proposed preliminary memorandum template that can be prepared by a domiciliary risk retention group (RRG) state when a new RRG is chartered and an Insurer Profile Summary (IPS) is not available. The Preliminary Memorandum can then be shared with non-domiciliary regulators where the RRG is registering. An exposure of the Preliminary Memorandum is expected in spring 2022.
3. Discussed the impact of the proposed revisions to the Insurance Holding Company System Regulatory Act (#440) accreditation standard related to the group capital calculation (GCC) on RRGs. Discussion included the element of the proposed standard that does not require at least a one-time filing of the GCC before exemptions can be requested from the commissioner. The Task Force will consider this further in 2022 and provide a comment letter to the Financial Regulation Standards and Accreditation (F) Committee during the exposure period.
4. Discussed the Surplus Lines (C) Task Force’s work to update the Nonadmitted Insurance Model Act (#870) and its impact on the risk purchasing groups (RPGs), such as complications regarding how premium tax will be collected from RPGs.

Valuation of Securities (E) Task Force
December 12, 2021 (in lieu of the Fall National Meeting)
1. Adopted its Nov. 17, Sept. 30, and Summer National Meeting minutes, which included the following action:
   B. Adopted an amendment to the P&P Manual to include bank loans to the definition of “obligation.”
   C. Received a referral from the Statutory Accounting Principles (E) Working Group and exposed a related amendment to the P&P Manual to clarify the proper reporting and NAIC designation for residual tranches and interests for a 15-day public comment period ending Dec. 2.
   D. Exposed a proposed non-substantive technical correction amendment to the P&P Manual to clarify the mapping of NAIC 5GI to a designation category for a 15-day public comment period ending Dec. 2.
   E. Received a report from the Structured Securities Group (SSG) on the year-end process.
   F. Adopted its 2022 proposed charges.
   G. Exposed a proposed amendment to the P&P Manual to add the U.S. International DFC to the “U.S. Government Full Faith and Credit – Filing Exempt” list for a 30-day public comment period ending Oct. 30.
   H. Adopted an amendment to the P&P Manual to add Spanish generally accepted accounting principles (GAAP) to the list of Countries and Associated National Financial Presentation Standards after a technical procedural assessment and recommendation to adopt was submitted to the Task Force by the Securities Valuation Office (SVO).
   I. Exposed a proposed amendment to the P&P Manual to add bank loans to the definition of “obligation” for a 30-day public comment period ending Oct. 30.
   J. Exposed a proposed amendment to the P&P Manual to add zero-loss criteria for legacy-modeled residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS) for a 15-day public comment period ending Oct. 15.
   K. Discussed the status of private rating letters.
2. Adopted an amendment to the P&P Manual to remove residual tranches from receiving an NAIC designation.
3. Adopted an amendment to the P&P Manual clarifying 5GI mapping to a designation category in the recently amended Private Letter Rating section.
4. Exposed a proposed amendment to the P&P Manual to update the definition of “other non-payment risk” assigned a subscript “S” for a 60-day public comment period ending Feb. 11, 2022.
5. Exposed a proposed amendment to the P&P Manual to update the definition of “principal protected securities” (PPS) for a 60-day public comment period ending Feb. 11, 2022.
6. Exposed a proposed amendment to the P&P Manual to assign NAIC designations to investments with a fixed income component for reporting on Schedule BA for a 60-day public comment period ending Feb. 11, 2022.
7. Exposed a proposed amendment to the P&P Manual to permit the SVO to assign NAIC designations to unrated subsidiaries in working capital finance investment (WCFI) transactions for a 60-day public comment period ending Feb. 11, 2022.
8. Received a staff report on the use of NAIC designations by other jurisdictions in the regulation of insurers and exposed it for a 60-day public comment period ending Feb. 11, 2022.
9. Received a staff report on rating issues and proposed changes to the filing exemption (FE) process.
10. Received a staff report on projects of the Statutory Accounting Principles (E) Working Group.

FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE
December 12, 2021
The Financial Regulation Standards and Accreditation (F) Committee met in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards by the Financial Standards and Accreditation (F) Committee or any subgroup appointed thereunder) of the NAIC Policy Statement on Open Meetings, to continue work on its goals.

INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE
December 15, 2021
1. Adopted its Summer National Meeting minutes.
2. Adopted its 2022 proposed charges.
3. Discussed international efforts on insurer culture.
4. Heard an update on recent activities and priorities of the International Association of Insurance Supervisors (IAIS), including: 1) implementation assessment activities related to the holistic framework for systemic risk; 2) the comparability assessment process for the aggregation method (AM); 3) publication of the Global Monitoring Exercise (GME); and 4) publication of three supporting material documents: a) an Issues Paper on Insurer Culture; b) a revised Application Paper on Supervisory Colleges; and c) a revised Application Paper on Combating Money Laundering and Terrorist Financing.
5. Heard an update on international activities, including: 1) recent virtual meetings and events with international regulators; 2) plans for the 2022 NAIC International Fellows Programs; 3) recent meetings of the Organisation for Economic Co-operation and Development (OECD) Insurance and Private Pensions Committee; 4) recent meetings of the Sustainable Insurance Forum (SIF); and 5) a recently held virtual webinar of the European Union (EU)-U.S. Dialogue Project.

NAIC/CONSUMER LIAISON COMMITTEE
December 13, 2021
1. Announced that the Liaison Committee reaffirmed its mission statement for 2022 via e-vote that concluded Oct. 19.
2. Adopted its Summer National Meeting minutes.
3. Received a report from the NAIC/Consumer Board of Trustees on its activities. The Board met Dec. 13 to appoint consumer representatives to serve in 2022. Notifications of status to all applicants will be announced in February 2022.
5. Heard a presentation from the American Kidney Fund on federal health policy updates, developments, and recommendations. This is important for state insurance regulators, industry, and consumers to follow the change to the federal No Surprises Act (NSA) and upcoming vote on the Build Back Better Act.
6. Heard a presentation from a health care consumer advocate titled “Insurance Privacy Protection: Do the Right Thing – A Consumer Perspective.” This is important to help consumers understand how their data is being collected, used, and shared or sold by the insurance industry.
7. Heard a presentation from the Center for Economic Justice (CEJ) on regulatory failures in credit-related insurance. This is important because lower loss ratios experienced in this line of business lead to higher profit margins for insurers.
8. Heard a presentation from United Policyholders on when private options for insuring property shrink.
9. Heard a presentation from the California Western School of Law on the impact of demand surge post-disaster on the labor and material costs of reconstruction.

**NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE**

December 11, 2021

1. Announced that the Liaison Committee reaffirmed its 2022 mission statement via e-vote that concluded Oct. 15.

2. Heard a presentation from MIGIZI about the frustrations encountered by Native Americans in the organization regarding the trials of underinsurance and the claims process following fires during the riots in Minneapolis, MN. This presentation brought to light the necessity of fine art riders and the concerns with putting a value on priceless family and tribal heritage heirlooms, such as lost native languages.
EXECUTIVE (EX) COMMITTEE AND PLENARY

Executive (EX) Committee and Plenary Dec. 16, 2021, Minutes ................................................................. 3-2

Adopted the Establishment of the Innovation, Cybersecurity, and Technology (H) Committee and its Charges
(Attachment One) ..................................................................................................................................................... 3-11

Adopted the Proposed NAIC 2022 Budget (Attachment Two)........................................................................ 3-16

Adopted the Proposed NAIC 2022 Committee Charges (Attachment Three) .................................................... 3-30

Adopted the 2022 Generally Recognized Expense Table (GRET) (Attachment Four) ........................................ 3-77

Adopted Revisions to *Actuarial Guideline XXV—Calculation of Minimum Reserves and Minimum
Nonforfeiture Values for Policies with Guaranteed Increasing Death Benefits Based on an Index* (AG 25)
(Attachment Five) ........................................................................................................................................... 3-84

Adopted the Travel Insurance Market Conduct Annual Statement (MCAS) Blank (Attachment Six) ................ 3-88

Adopted the Short-Term, Limited-Duration (STLD) MCAS Blank (Attachment Seven) ..................................... 3-97

Adopted the Regulatory Information Retrieval System (RIRS) Coding Structure Changes (Attachment Eight) .... 3-107

Adopted the *Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation*
(Attachment Nine) ................................................................................................................................. 3-124

Adopted the *ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers*
(Attachment Ten) .............................................................................................................................. 3-138

Exposed the 2020 Revisions to the *Insurance Holding Company System Regulatory Act* (#440) and *Insurance
Holding Company System Model Regulation with Reporting Forms and Instructions* (#450)
(Attachment Eleven) ......................................................................................................................... 3-152

Report on States’ Implementation of NAIC-Adopted Model Laws and Regulations (Attachment Twelve) ........... 3-165
The Executive (EX) Committee and Plenary met in San Diego, CA, Dec. 16, 2021. The following members participated: David Altmaier, Chair (FL); Dean L. Cameron, Vice Chair (ID); Chlora Lindley-Myers, Vice President (MO); Andrew N. Mais, Secretary-Treasurer (CT); Raymond G. Farmer, Most Recent Past President (SC); Lori K. Wing-Heier (AK); Jim L. Ridling represented by Reyn Norman (AL); Alan McClain (AR); Peni Itula Sapini Teo (AS); Evan G. Daniels (AZ); Ricardo Lara (CA); Michael Conway (CO); Karima M. Woods (DC); Trinidad Navarro represented by Dave Lonchar (DE); John F. King (GA); Michelle B. Santos (GU); Colin M. Hayashida (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Eric A. Cioppa represented by Robert Wake (ME); Anita G. Fox (MI); Grace Arnold (MN); Edward M. Deleon Guerrero (MP); Mike Chaney (MS); Troy Downing (MT); Mike Causey represented by Michelle Osborne (NC); Jon Godfread (ND); Eric Dunning (NE); Chris Nicolopoulos (NH); Marlene Caride (NJ); Russell Toal represented by Jennifer Catechis (NM); Barbara D. Richardson (NV); Adrienne A. Harris represented by My Chi To (NY); Judith L. French (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry D. Deiter (SD); Carter Lawrence (TN); Cassie Brown represented by Doug Slape (TX); Jonathan T. Pike (UT); Scott A. White (VA); Tregenza Roach (VI); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler represented by Mark Dietzler (WA); Mark Afable (WI); Allan L. McVey represented by Tonya Gillespie (WV); and Jeff Rude (WY).

1. Adopted the Report of the Executive (EX) Committee

Commissioner Altmaier reported that the Executive (EX) Committee met Dec. 14 and adopted the Dec. 12 report from the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.

The Committee adopted the report of the Executive (EX) Committee, which met Dec. 7, Oct. 26, and Oct. 12 and took the following action: 1) approved the proposed NAIC 2022 budget and recommended that it be considered by the full membership during the joint meeting of the Executive (EX) Committee and Plenary during the Fall National Meeting; 2) approved the 2021 NAIC Staffing Request Fiscal; 3) approved the release of the proposed NAIC 2022 budget for public review and comment; 4) approved the release of the 2021 NAIC Staffing Request Fiscal for public comment; and 5) reappointed Commissioner Mais to the International Association of Insurance Supervisors (IAIS) Executive Committee for a two-year term.

The Committee adopted the reports of its task forces: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance.

The Committee adopted its 2022 proposed charges.

The Committee received a status report on the NAIC State Ahead strategic plan implementation.

The Committee received a status report on model law development efforts for amendments to: 1) the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); 2) the Life Insurance Disclosure Model Regulation (#580); 3) the Mortgage Guaranty Insurance Model Act (#630); 4) the Nonadmitted Insurance Model Act (#870); and 5) the new Pet Insurance Model Act.

The Committee heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).

Director Farmer made a motion, seconded by Director Lindley-Myers, to adopt the Dec. 14 report of the Executive (EX) Committee (see NAIC Proceedings – Fall 2021, Executive (EX) Committee). The motion passed unanimously.

2. Approved the Establishment of the Innovation, Cybersecurity, and Technology (H) Committee and its Charges

Commissioner Godfread reported that, in proposing the formation of a new committee, NAIC members recognized the importance of raising visibility and prioritizing and organizing the work of the NAIC and its Members, relating to innovation, technology and cybersecurity. The intention is to provide more consistency and collaboration and ensure the coordination of
related workstreams. Further, it will help to provide clarity and understanding regarding related activities taking place in other committees and workstreams.

In terms of process, an ad hoc drafting group put together proposed charges for a new NAIC letter committee, the Innovation, Cybersecurity, and Technology (H) Committee. Superintendent Dwyer chaired the ad hoc group and Commissioner Birrane and Director Daniels served as vice chairs.

The ad hoc group put out a draft for comment and held a public comment meeting on Nov. 19. The ad hoc drafting group considered another draft based on comments received on Nov. 30. The final version was completed and posted on the NAIC website.

Also included in the meeting materials is a bylaw amendment to include the new Committee in the NAIC structure.

Commissioner Godfread made a motion, seconded by Commissioner Lara, to amend the NAIC Bylaws to add an additional letter committee, the Innovation, Cybersecurity, and Technology (H) Committee and adopt its charges (Attachment One). The motion passed unanimously.

3. **Adopted by Consent the Committee, Subcommittee, and Task Force Minutes of the Summer National Meeting**

Director Lindley-Myers made a motion, seconded by Director Cameron, to adopt by consent the committee, subcommittee, and task force minutes of the Summer National Meeting. The motion passed unanimously.

4. **Adopted the Proposed NAIC 2022 Budget**

Director Cameron presented the proposed NAIC 2022 budget for approval by the membership. This is the final step of a process that began in May and included meetings with NAIC officers, the Executive (EX) Committee, members, and interested parties.

Director Cameron provided a brief overview of the budget as approved by the joint session of the Executive (EX) Committee and Internal Administration (EX1) Subcommittee held on Dec. 7, which immediately followed the 2022 Budget Public Hearing. The proposed budget includes $126.4 million in operating revenues and operating expenses of $136.3 million. The proposed budget also includes three fiscals, each representing an investment of at least $100,000 supporting a major regulatory or operational project. The proposed fiscals are in alignment with the members’ priorities as outlined in the NAIC’s strategic plan, *State Ahead*, and continue to enhance the important regulatory support the NAIC provides to its members. There were limited price changes in the budget.

After the inclusion of a forecasted $2.4 million in investment income, the proposed NAIC 2022 budget reflects a reduction in net assets of $7.5 million. At the end of 2022, the NAIC’s net asset balance is expected to be $169 million. Based on projected 2021 financial results and with approval of the proposed NAIC 2022 budget, the liquid operating reserve ratio will be approximately 120% at the end of 2021 and 117% at the end of 2022. These ratios are slightly higher than normal and reflect the lower travel and meeting costs the NAIC has experienced during the past 21 months.

During the public exposure period, the NAIC received one comment letter from the National Association of Mutual Insurance Companies (NAMIC). The nature of the comment letter was not financially oriented, but it was geared toward the regulatory policies maintained by the NAIC.

Director Cameron made a motion, seconded by Director Farmer, to adopt the proposed NAIC 2022 budget (Attachment Two). The motion passed unanimously.

5. **Adopted the Proposed NAIC 2022 Committee Charges**

Director Cameron reported that the proposed NAIC 2022 committee charges reflect the proposed work of the NAIC committee system. These charges should be viewed as a living document that will evolve as issues develop throughout the year. The charges have been exposed for public comment, discussed in open forum, and adopted by each of the letter committees. Amendments to previously posted committee charges are as follows: 1) on Dec. 15, the Life Insurance and Annuities (A) Committee voted to disband its Life Insurance Illustration Issues (A) Working Group; and 2) on Dec. 15, the Property and Casualty Insurance (C) Committee made two revisions to its original charges posted on Nov. 19. The first change adds a new charge for the Statistical Data (C) Working Group. The Working Group will implement the expedited reporting and publication
of average auto and homeowners premiums in the NAIC’s annual Auto and Homeowners Reports. The second change adds a new charge for the Title Insurance (C) Task Force to review current rate regulation practices.

Director Cameron made a motion, seconded by Commissioner Mais, to adopt the proposed NAIC 2022 committee charges (Attachment Three). The motion passed unanimously.

6. Received the Report of the Life Insurance and Annuities (A) Committee

Commissioner Caride reported that the Life Insurance and Annuities (A) Committee met Dec. 15. During this meeting, the Committee: 1) adopted its Summer National Meeting minutes; 2) adopted the report of the Life Actuarial (A) Task Force; and 3) adopted the report of the Accelerated Underwriting (A) Working Group, including its Dec. 6 minutes. During this meeting, the Working Group discussed comments received on the latest draft of the accelerated underwriting educational report.

The Committee received a memorandum from the Life Actuarial (A) Task Force and the Valuation Analysis (E) Working Group on the Financial Sector Assessment Program (FSAP) recommendation.

The Committee also: 1) adopted Actuarial Guide XXV—Calculation of Minimum Reserves and Minimum Nonforfeiture Values for Policies With Guaranteed Increasing Death Benefits Based on an Index (AG 25); 2) adopted the 2022 Generally Recognized Expense Table (GRET); 3) adopted the Life Actuarial (A) Task Force’s 2022 proposed charges; and 4) adopted its 2022 proposed charges, including removal of the Life Insurance Illustration Issues (A) Working Group and a charge through the adoption of the Working Group “chair report.”

7. Adopted the 2022 Generally Recognized Expense Table (GRET)

Commissioner Caride reported that as in previous years, the Society of Actuaries (SOA) Committee on Life Insurance Company Expenses submitted its GRET analysis to the Life Actuarial (A) Task Force for the upcoming year. The SOA followed the same methodology in developing the 2022 GRET as for the 2021 GRET.

Commissioner Caride also noted that the 2022 GRET was adopted by the Life Insurance and Annuities (A) Committee during its Dec. 15 meeting.

Commissioner Caride made a motion, seconded by Commissioner King, to adopt the 2022 GRET (Attachment Four). The motion passed unanimously.

8. Adopted Revisions to the Actuarial Guideline XXV—Calculation of Minimum Reserves and Minimum Nonforfeiture Values for Policies with Guaranteed Increasing Death Benefits Based on an Index (AG 25)

Commissioner Caride reported that the revisions to AG 25 include a fix that removes the fixed 4% nonforfeiture rate floor to align AG 25 with the NAIC Valuation Manual. The revisions apply to pre-need funeral policies and other small dollar policies, with guaranteed increasing death benefits tied to a cost-of-living index.

Commissioner Caride also noted that AG 25 was adopted by the Life Insurance and Annuities (A) Committee during its Dec. 15 meeting.

Commissioner Caride made a motion, seconded by Commissioner Mulready, to adopt the revisions to AG 25 (Attachment Five). The motion passed unanimously.

9. Received the Report of the Health Insurance and Managed Care (B) Committee

Commissioner Godfread reported that the Health Insurance and Managed Care (B) Committee met Dec. 15. During this meeting, the Committee adopted its Summer National Meeting minutes.

The Committee adopted the report of the Consumer Information (B) Subgroup, which met Dec. 2, Oct. 20, Oct. 14, and Aug. 24. During these meetings, the Subgroup took the following action: 1) adopted claims process-related guides; i.e., appeals process, medical necessity, explanation of benefits (EOBs), claims filing, and billing codes and claims; 2) adopted updates to the “Frequently Asked Questions about Health Care Reform” document; and 3) adopted a consumer-facing brief, “New Protections Against Surprise Medical Bills,” on balance billing.
The Committee adopted the report of the Health Innovations (B) Working Group, which met Dec. 11 and Nov. 7. During these meetings, the Working Group took the following action: 1) heard presentations related to its charges from the Special (EX) Committee on Race and Insurance on issues related to telehealth, alternative payment models, and their impacts on health disparities; 2) heard a presentation on using state rate review authority to limit premium growth; 3) heard a presentation on state policy considerations with enhanced premium tax credits; and 4) heard a presentation from Consumers’ Checkbook on ways to make health care price information relevant and understandable for consumers.

The Committee adopted the report of its task forces: 1) the Health Actuarial (B) Task Force; 2) the Regulatory Framework (B) Task Force; and 3) the Senior Issues (B) Task Force.

The Committee adopted its 2022 proposed charges and its task forces’ 2022 proposed charges.

The Committee heard an update from Jeff Wu (Center for Consumer Information & Insurance Oversight—CCIO) on the Biden administration’s federal legislative and administrative initiatives and priorities. The update included a discussion of the administration’s plans on working with the states with respect to the implementation and enforcement of the provider provisions of the federal No Surprises Act (NSA).

The Committee discussed its work on developing guidance documents for state insurance departments to use as part of their outreach efforts to providers and consumers on the NSA.

The Committee heard a presentation on the Kaiser Family Foundation’s (KFF’s) summary findings from its 2021 Employer Health Benefits Survey.

The Committee heard an update on the work of the Special (EX) Committee on Race and Insurance Workstream Five. The Workstream met Dec. 3, Nov. 18, Oct. 14, Sept. 9, and Aug. 26. During these meetings, the Workstream discussed and considered revisions to its “Principles for Data Collection” document. The Workstream also discussed and released a draft outline for its proposed white paper on provider networks, provider directories, and cultural competency for a public comment period ending Nov. 8. The Workstream plans to meet Dec. 20 to consider final revisions to the “Principles for Data Collection” document, and if finalized, it will forward the document to the Special Committee for its consideration.

10. Received the Report of the Property and Casualty Insurance (C) Committee

Commissioner Schmidt reported that the Property and Casualty Insurance (C) Committee met Dec. 15. During this meeting, the Committee: 1) adopted its Nov. 10 minutes, which included the following action: a) adopted its Summer National Meeting minutes; and 2) adopted the Pet Insurance Model Act.

The Committee adopted the reports of its task forces and working groups: the Casualty Actuarial and Statistical (C) Task Force; the Surplus Lines (C) Task Force; the Title Insurance (C) Task Force; the Workers’ Compensation (C) Task Force; the Cannabis Insurance (C) Working Group; the Catastrophe Insurance (C) Working Group; the Pet Insurance (C) Working Group; the Terrorism Insurance Implementation (C) Working Group; and the Transparency and Readability of Consumer Information (C) Working Group.

The Committee adopted its 2022 proposed charges with the following revisions: 1) an additional charge for the Title Insurance (C) Task Force to “[r]eview current rate regulation practices”; and 2) an additional charge for the Statistical Data (C) Working Group to “[i]mplement the expedited reporting and publication of average auto and average homeowners premium portions of the annual Auto Insurance Database and Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance.”

The Committee also: 1) heard a presentation related to auto insurance premium refunds resulting from reduced driving during the pandemic; and 2) heard a federal update related to flood insurance, federal spending bills, auto insurance, and cannabis legislation.

Commissioner Altmaier noted that due to the need for additional discussion, the Plenary would not be considering the Pet Insurance Model Act for adoption at this meeting.
11. Received the Report of the Market Regulation and Consumer Affairs (D) Committee

Commissioner Richardson reported that the Market Regulation and Consumer Affairs (D) Committee met Dec. 15. During this meeting, the Committee: 1) adopted its Summer National meeting minutes; 2) adopted its 2022 proposed charges, which did not include any substantial changes from the 2021 charges. Its charges noted that further direction from the Executive (EX) Committee may result in the Privacy Protections (D) Working Group being moved to the new Innovation, Cybersecurity, and Technology (H) Committee; 3) adopted new title in-force and title claims standardized data requests (SDRs) to be included in the reference documents of the Market Regulation Handbook (Handbook). A state may use these two SDRs to determine if a company follows appropriate procedures with respect to the issuance and underwriting of title policies and the handling of claims; 4) adopted revisions to Chapter 24—Conducting the Health Exam of the Handbook to provide additional guidance that market conduct examiners should review complaints regarding quality of care; and 5) adopted revisions to Chapter 25—Conducting the Medicare Supplement Exam of the Handbook to provide more specific cross-references to the Model Regulation to Implement the NAIC Medicare Supplement Insurance Minimum Standards Model Act (#651).

The Committee received the Privacy Protections (D) Working Group’s “Exposure Draft on Consumer Data Privacy Protections,” dated Dec. 7, which includes the following: 1) a summary of consumer privacy protections provided by the Health Information Privacy Model Act (#55), the NAIC Insurance Information and Privacy Protection Model Act (#670), and the Privacy of Consumer Financial and Health Information Regulation (#672); 2) a summary of the General Data Protection Regulation (GDPR) and recently adopted state consumer privacy protection laws; 3) a summary of the Working Group’s discussion on data transparency, consumer control of data, consumer access to data, data accuracy, and data ownership and portability; and 4) a recommendation that Model #670 and Model #672 be revised to modernize their applicability to the current technology-based insurance market.

The Committee received an update regarding the Market Conduct Examination Guidelines (D) Working Group’s coordination with the Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group to update the mental health parity-related chapter of the Handbook to ensure it reflects the current mental health parity compliance requirements set forth in federal guidance enacted in December 2020.

The Committee adopted the reports of its task forces and working groups: the Antifraud (D) Task Force; the Market Information Systems (D) Task Force; the Producer Licensing (D) Task Force; the Market Conduct Annual Statement Blanks (D) Working Group; the Market Conduct Examination Guidelines (D) Working Group; the Market Analysis Procedures (D) Working Group; and the Privacy Protections (D) Working Group.

12. Adopted the Travel Insurance Market Conduct Annual Statement (MCAS) Blank

Commissioner Richardson noted that on July 27, the Market Regulation and Consumer Affairs (D) Committee, adopted the Travel Insurance Market Conduct Annual Statement (MCAS) blank.

The Travel Insurance blank collects underwriting, claims, and lawsuit information on the Travel Insurance coverages of: trip cancellation; trip interruption; trip delay; baggage loss or delay; emergency medical and dental; and emergency transportation and repatriation.

Each of these coverages is broken out by domestic and international travel. For consistency purposes and, where possible, the definitions used in this MCAS blank were drawn from the Travel Insurance Model Act (#632).

Because travel insurance is represented by a small number of companies and the policies are generally small in amount, there is no premium threshold for reporting. All companies that are licensed for any travel insurance product within any of the participating MCAS jurisdictions are required to report.

Companies will report their travel insurance data beginning in 2023 for travel insurance activity during the 2022 data year.

Commissioner Richardson made a motion, seconded by Commissioner McClain, to adopt the Travel Insurance MCAS blank (Attachment Six). The motion passed with New York abstaining.
13. **Adopted the Short-Term, Limited-Duration (STLD) MCAS Blank**

Commissioner Richardson reported that on July 27, the Market Regulation and Consumer Affairs (D) Committee adopted the Short-Term Limited-Duration (STLD) MCAS blank. This is the product of a large group of state insurance regulators, industry, and consumer representatives who put in many hours of work.

This new blank collects data on policy administration; prior authorizations; claims administration; consumer complaints and lawsuits; and marketing and sales. The data will be reported in three categories according to whether the product is sold through an association and, if sold through an association, whether the association is situated in the jurisdiction where the product is sold. Additionally, data will be collected for products with a term of less than or equal to 90 days, less than or equal to 180 days, and 181–364 days.

The STLD MCAS has a reporting threshold of $50,000 in premium within the jurisdiction, and the product is reported according to the residency of the individual insured. Companies will report their data to participating MCAS states beginning in 2023 and will cover their STLD insurance activity for the 2022 data year.

Commissioner Richardson made a motion, seconded by Director Lindley-Myers, to adopt the STLD MCAS blank (Attachment Seven). The motion passed with New York abstaining.

14. **Adopted the Regulatory Information Retrieval System (RIRS) Coding Structure Changes**

Commissioner Richardson noted that during the Summer National Meeting, the Market Information Systems (D) Task Force and the Market Regulation and Consumer Affairs (D) Committee adopted Regulatory Information Retrieval System (RIRS) Coding Structure Changes. These coding changes address deficiencies of the current coding structure, are designed to render greater coherency to the data structure, and make the RIRS more compatible with other market information systems (MIS).

The RIRS Coding Structure Changes include: 1) a new field to distinguish routine administrative actions from actions that are a result of an infraction or financial impairment; 2) a new field to link related RIRS records; 3) a new Line of Business field; and 4) revisions to the Origin of Action, Reason for Action, and Disposition for Action codes to create a more logical data structure.

The coding changes were reviewed by representatives of the Financial Analysis Solvency Tools (E) Working Group and the state producer licensing directors. Their feedback was incorporated into the proposal. The proposal was also reviewed with the state “back-office” system vendors. The vendors do not anticipate any additional cost to states to implement the necessary system changes.

Commissioner Richardson made a motion, seconded by Director Cameron, to adopt the RIRS Coding Structure Changes (Attachment Eight). The motion passed unanimously.

15. **Received the Report of the Financial Condition (E) Committee**

Commissioner White reported that the Financial Condition (E) Committee met Dec. 13. During this meeting, the Committee adopted its Nov. 19 and Summer National Meeting minutes, which included the following action: 1) adopted a response to a referral received from the Financial Regulation and Accreditation Standards (F) Committee regarding captive insurers; 2) received a response from the chair of the Valuation Analysis (E) Working Group related to principle-based reserving (PBR) and a recommendation from the International Monetary Fund (IMF) related to its FSAP; 3) received a request from the chair of the Capital Adequacy (E) Task Force about a proposed new working group related to investment risks; and 4) adopted its 2022 proposed charges.

The Committee adopted the reports of the following task forces and working groups: the Accounting Practices and Procedures (E) Task Force; the Capital Adequacy (E) Task Force; the Examination Oversight (E) Task Force; the Financial Stability (E) Task Force; the Receivership and Insolvency (E) Task Force; the Reinsurance (E) Task Force; the Risk Retention Group (E) Task Force; the Valuation of Securities (E) Task Force; the Group Capital Calculation (E) Working Group; the Group Solvency Issues (E) Working Group; the Mutual Recognition of Jurisdictions (E) Working Group; the NAIC/American Institute of Certified Public Accountants (AICPA) (E) Working Group; the National Treatment and Coordination (E) Working Group; the Restructuring Mechanisms (E) Working Group; and the Risk-Focused Surveillance (E) Working Group.
The Committee also: 1) adopted the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation; and 2) adopted the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers.

The Committee received and discussed a request from a consumer representative to take on a project to examine and identify investment practices of insurers that may disproportionately affect communities of color.

The Committee discussed a proposed project to consider a revised approach to the risk-based capital (RBC) requirements for structured securities and other asset-backed securities (ABS).

16. **Adopted the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation**

Commissioner White noted that in late 2020, the NAIC adopted revisions to the Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). These revisions implemented Group Capital Calculation (GCC) filing requirements but also set forth the requirements for a group-wide capital assessment in accordance with the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement).

The GCC allows exemptions for certain insurance groups based on non-U.S. jurisdictions that do not require a GCC for U.S. groups in their countries or otherwise recognize the GCC in their country.

The Mutual Recognition of Jurisdictions (E) Working Group was charged by the Financial Condition (E) Committee with creating a process to determine whether other jurisdictions “recognize and accept” the NAIC GCC.

Commissioner White made a motion, seconded by Director Fox, to adopt the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation (Attachment Nine). The motion passed unanimously.

17. **Adopted the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers**

Commissioner White reported that the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers was created to aid in the implementation of the 2019 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786). Under this process, the Reinsurance Financial Analysis (E) Working Group will assist the states in reviewing reinsurers to determine whether they have met the requirements to be recognized as a Certified Reinsurer and/or a Reciprocal Jurisdiction Reinsurer.

The final document was initially exposed for public comment on June 17 and on Sept. 17. The comments received were discussed by the Reinsurance (E) Task Force at the Summer National Meeting and the Reinsurance Financial Analysis (E) Working Group on a regulator-only call on Aug. 25.

Additionally, NAIC staff communicated with staff from the Federal Insurance Office (FIO) during the drafting process. We incorporated certain non-substantive revisions suggested by the FIO into the final draft, which was exposed on Nov. 11 for 21 days, and no comments were received.

Commissioner White made a motion, seconded by Director Lindley-Myers, to adopt the ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers (Attachment Ten). The motion passed unanimously.

18. **Received the Report of the Financial Regulation Standards and Accreditation (F) Committee**

Superintendent Dwyer reported that the Financial Regulation Standards and Accreditation (F) Committee met Dec. 12 in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; and 2) vote to award continued accreditation to the insurance departments of Hawaii, Kansas, and South Carolina.

The Financial Regulation Standards and Accreditation (F) Committee did not meet in open session at the Fall National meeting.
19. **Exposes the 2020 Revisions to Model #440 and Model #450 as an Update to the Accreditation Standards**

Superintendent Dwyer reported that at the Summer National Meeting, the Financial Regulation Standards and Accreditation (F) Committee voted to recommend exposure of a referral to include the 2020 revisions to Model #440 and Model #450 as an update to the accreditation standards for all states effective Jan. 1, 2026. The revisions implement a GCC for the purpose of group solvency supervision and a liquidity stress test (LST) for macroprudential surveillance. After Committee approval at the Summer National Meeting, the next step in the process, consistent with the standard process outlined in the accreditation manual, is for the Executive (EX) Committee and Plenary to consider approval of the exposure during the subsequent Fall National Meeting.

The exposure includes a recommendation by the Committee for a revised approach to the GCC significant elements, which allows a commissioner to grant exemptions to qualifying groups meeting the standards set forth in Model #450, Sections 21A and 21B, without the requirement to file at least once. This revision was in response to comment letters received during an initial exposure period in the spring.

Consistent with the accreditation procedures for adoption of new Part A standards, the Committee recommends a one-year public exposure period beginning Jan. 1, 2022, and a proposed effective date of Jan. 1, 2026.

Superintendent Dwyer encourages all states with a group affected by the Covered Agreement to adopt the GCC revisions to Model #440 and Model #450 for those groups effective Nov. 7, 2022. The Committee also encourages states with a group affected by the LST to adopt the relevant revisions to Model #440 as soon as possible.

Superintendent Dwyer made a motion, seconded by Commissioner McClain, to expose the 2020 revisions to Model #440 and Model #450 as an update to the Accreditation Standards (Attachment Eleven). The motion passed with Texas dissenting.

20. **Received the Report of the International Insurance Relations (G) Committee**

Commissioner Anderson reported that the International Insurance Relations (G) Committee met Dec. 15. During this meeting, the Committee: 1) adopted its Summer National Meeting minutes; 2) adopted its 2022 proposed charges; and 3) discussed international efforts on insurer culture.

The Committee heard an update on recent activities and priorities of the IAIS, including: 1) implementation assessment activities related to the holistic framework for systemic risk; 2) the comparability assessment process for the aggregation method (AM); 3) publication of the Global Monitoring Exercise (GME); and 4) publication of three supporting material documents: a) an Issues Paper on Insurer Culture; b) a Revised Application Paper on Supervisory Colleges; and c) a Revised Application Paper on Combating Money Laundering and Terrorist Financing.

The Committee heard an update on international activities, including: 1) recent virtual meetings and events with international regulators; 2) plans for the 2022 NAIC International Fellows Programs; 3) recent meetings of the Organisation for Economic Co-operation and Development (OECD) Insurance and Private Pensions Committee; 4) recent meetings of the Sustainable Insurance Forum (SIF); and 5) a recently held virtual webinar of the European Union (EU)-U.S. Dialogue Project.

21. **Received a Report on the States’ Implementation of NAIC Adopted Model Laws and Regulations**

Commissioner Altmaier referred attendees to the written report for updates on the states’ implementation of NAIC-adopted model laws and regulations (Attachment Twelve).

22. **Heard the Results of the 2022 NAIC Zone Officer Election**

The Executive (EX) Committee and Plenary received the results of the 2022 zone officer elections. Midwest Zone: Commissioner Glen Mulready, Chair (OK); Commissioner Doug Ommen, Vice Chair (IA); and Director Anita G. Fox, Secretary (MI). Northeast Zone: Commissioner Gary D. Anderson, Chair (MA); Commissioner Kathleen A. Birrane, Vice Chair (MD); and Commissioner Trinidad Navarro, Secretary (DE). Southeast Zone: Commissioner Scott A. White, Chair (VA); Commissioner Carter Lawrence, Vice Chair (TN); and Commissioner James J. Donelon, Secretary (LA). Western Zone: Director Lori K. Wing-Heier, Chair (AK); Commissioner Michael Conway, Vice Chair (CO); and Commissioner Andrew R. Stolfi, Secretary (OR).
23. **Elected the 2022 NAIC Officers**

The Plenary adjourned into Executive Session to conduct NAIC officer elections for 2022. The membership elected the 2022 NAIC officers: Director Dean L. Cameron, President (ID); Director Chlora Lindley-Myers, President-Elect (MO); Commissioner Andrew N. Mais, Vice President (CT); and Commissioner Jon Godfread, Secretary-Treasurer (ND).

Having no further business, the Executive (EX) Committee and Plenary adjourned.
Innovation, Cybersecurity and Technology (H) Committee Draft Charges
Post-Public Comments Meeting
December 1, 2021

2022 Proposed Charges

INNOVATION, CYBERSECURITY, AND TECHNOLOGY (H) COMMITTEE

The mission of the Innovation, Cybersecurity, and Technology (H) Committee is to: 1) provide a forum for state insurance regulators to learn and have discussions regarding: cybersecurity, innovation, data security and privacy protections, and emerging technology issues; 2) monitor developments in these areas that affect the state insurance regulatory framework; 3) maintain an understanding of evolving practices and use of innovation technologies by insurers and producers in respective lines of business; 4) coordinate NAIC efforts regarding innovation, cybersecurity and privacy, and technology across other committees; and 5) make recommendations and develop regulatory, statutory or guidance updates, as appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Innovation, Cybersecurity, and Technology (H) Committee will:
   A. Provide forums, resources, and materials for the discussion of insurance sector developments in cybersecurity and data privacy to educate state insurance regulators on how these developments affect consumer protection, insurer and producer oversight, marketplace dynamics, and the state-based insurance regulatory framework.
   B. Discuss emerging issues related to cybersecurity, including cybersecurity event reporting, and consumer data privacy protections. Monitor and advise on the cybersecurity insurance market, including rating, underwriting, claims, product development, and loss control. Report on the cyber insurance market, including data reported within the Cybersecurity Insurance and Identity Theft Coverage Supplement.
   C. Coordinate with various subject matter expert (SME) groups on insurer and producer internal cybersecurity. Discuss emerging developments; best practices for risk management, internal control, and governance; and how state insurance regulators can best address industry cyber risks and challenges. Work with the Center for Insurance Policy and Research (CIPR) to analyze cybersecurity related information from various data sources.
   D. Provide forums, resources, and materials for the discussion of innovation and technology developments in the insurance sector, including the collection and use of data by insurers, producers, and state insurance regulators; as well as new products, services, and distribution platforms. Educate state insurance regulators on how these developments affect consumer protection, data privacy, insurer and producer oversight, marketplace dynamics, and the state-based insurance regulatory framework.
   E. Discuss emerging technologies and innovations related to insurance; and insurers, producers, state insurance regulators, licensees, or vendors; and the potential implications of these technologies for the state-based insurance regulatory structure—including reviewing new products and technologies affecting the insurance sector, and associated regulatory implications.
   F. Consider and coordinate the development of regulatory guidance and examination standards related to innovation, cybersecurity, data privacy, the use of big data and artificial intelligence (AI) including machine learning (ML) in the business of insurance, and technology, including drafting and revising model laws, white papers, and other recommendations as appropriate.
Consider best practices related to cybersecurity event tracking and coordination among state insurance regulators, and produce guidance related to regulatory response to cybersecurity events to promote consistent response efforts across state insurance departments.

G. Track the implementation of and issues related to all model laws pertaining to innovation, technology, data privacy, and cybersecurity including the Insurance Data Security Model Law (#668), the NAIC Insurance Information and Privacy and Privacy Protection Model Act (#670), the Privacy of Consumer Financial and Health Information Regulation (#672), and the Unfair Trade Practices Act (#880) rebating language and providing assistance to state insurance regulators as needed.

H. Coordinate with other NAIC committees and task forces, as appropriate, and evaluate and recommend certifications, continuing education, and training for regulatory staff related to technology, innovation, cybersecurity, and data privacy.

I. Follow the work of federal, state, and international governmental bodies to avoid conflicting standards and practices.

2. The Big Data and Artificial Intelligence (H) Working Group will:
   A. Research the use of big data and artificial intelligence (AI) including machine learning (ML) in the business of insurance and evaluate existing regulatory frameworks for overseeing and monitoring their use. Present findings and recommendations to the Innovation, Cybersecurity, and Technology (H) Committee including potential recommendations for development of model governance for the use of big data and AI including ML for the insurance industry.
   B. Review current audit and certification programs and/or frameworks that could be used to oversee insurers’ use of consumer and non-insurance data, and models using intelligent algorithms, including AI. If appropriate, issue recommendations and coordinate with the appropriate subject matter expert (SME) committees on the development of or modifications to model laws, regulations, handbooks, and regulatory guidance, regarding data analysis, marketing, rating, underwriting and claims, regulation of data vendors and brokers, regulatory reporting requirements, and consumer disclosure requirements.
   C. Assess data and regulatory tools needed for state insurance regulators to appropriately monitor the marketplace, and evaluate the use of big data, algorithms, and machine learning, including AI/ML in underwriting, rating, claims and marketing practices. This assessment shall include a review of currently available data and tools, as well as recommendations for development of additional data and tools, as appropriate. Based on this assessment, propose a means to include these tools in existing and/or new regulatory oversight and monitoring processes to promote consistent oversight and monitoring efforts across state insurance departments.

3. The Speed to Market (H) Working Group will:
   A. Consider proposed System for Electronic Rates and Forms Filing (SERFF) features or functionality presented to the Working Group by the SERFF Advisory Board (SAB), likely originating from the SERFF Product Steering Committee (PSC). Upon approval and acquisition of any needed funding, direct the SAB to implement the project. Receive periodic reports from the SAB, as needed.
   B. Provide feedback and recommendations concerning the SERFF modernization when requested by the Executive (EX) Committee and any group assigned oversight of the SERFF modernization by the Executive (EX) Committee.
   C. Discuss and oversee the implementation and ongoing maintenance/enhancement of speed to market operational efficiencies related to product filing needs, efficiencies, and effective consumer protection. This includes the following activities:
1. Provide a forum to gather information from the states and the industry regarding tools, policies, and resolutions to assist with common filing issues. Provide oversight in evaluating product filing efficiency issues for state insurance regulators and the industry, particularly regarding uniformity.

2. Use SERFF data to develop, refine, implement, collect, and distribute common filing metrics that provide a tool to measure the success of the speed to market modernization efforts, as measured by nationwide and individual state speed to market compliance, with an emphasis on monitoring state regulatory and insurer responsibilities for speed to market for insurance products.

3. Facilitate proposed changes to the product coding matrices (PCMs) and the uniform transmittal document (UTD) on an annual basis, including the review, approval, and notification of changes. Monitor, assist with and report on state implementation of any PCM changes.

4. Facilitate the review and revision of the *Product Filing Review Handbook*, which contains an overview of all the operational efficiency tools and describes best practices for industry filers and state reviewers regarding the rate and form filing and review process. Develop and implement a communication plan to inform the states about the *Product Filing Review Handbook*.

D. Provide direction to NAIC staff regarding SERFF functionality, implementation, development, and enhancements. Direct NAIC staff to provide individual state speed to market reports to each commissioner at each national meeting. Receive periodic reports from NAIC staff, as needed.

E. Conduct the following activities, as desired, by the Interstate Insurance Product Regulation Commission (Compact):
   1. Provide support to the Compact as the speed to market vehicle for asset-based insurance products, encouraging the states’ participation in, and the industry’s usage of, the Compact.
   2. Receive periodic reports from the Compact, as needed.

4. **The E-Commerce (H) Working Group** will:
   A. Examine e-commerce laws and regulations; survey states regarding federal Uniform Electronic Transactions Act (UETA) exceptions; and work toward meaningful, unified recommendations. The Working Group will also examine whether a model bulletin would be appropriate for addressing some of the identified issues and draft a proposed bulletin if determined appropriate.

5. **The Cybersecurity (H) Working Group** will:
   A. Monitor cybersecurity trends such as vulnerabilities, risk management, governance practices and breaches with the potential to affect the insurance industry.
   B. Interact with and support state insurance departments responding to insurance industry cybersecurity events.
   C. Promote communication across state insurance departments regarding cybersecurity risks and events.
   D. Oversee the development of a regulatory cybersecurity response guidance document to assist state insurance regulators in the investigation of insurance cyber events.
   E. Coordinate NAIC committee cybersecurity work including cybersecurity guidance developed by the Market Conduct Examination Guidelines (D) Working Group and the Information Technology Examination (E) Working Group.
   F. Advise on the development of cybersecurity training for state insurance regulators.
G. Work with the Center for Insurance Policy and Research (CIPR) to analyze publicly available cybersecurity related information.

H. Support the states with implementation efforts related to the adoption of Insurance Data Security Model Law (#668).

I. Engage with federal and international supervisors and agencies on efforts to manage and evaluate cybersecurity risk.
Adopted by the Executive (EX) Committee and Plenary, Dec. 16, 2021

Bylaw Amendment to Establish the Innovation, Cybersecurity, and Technology (H) Committee

Article VI, Section 2 (h):

(h) Innovation, Cybersecurity and Technology (H) Committee. This Standing Committee shall consider issues related to cybersecurity, innovation, data security and privacy, and emerging technology issues.
Executive Summary
NAIC 2022 Budget

The NAIC's annual budget supports the many valuable services and benefits provided to state insurance regulators, insurance consumers, and the insurance industry. Each year, the budget is developed with the goal of enabling the membership to accomplish its key strategic priorities.

As the year 2021 dawned, so too did the realization that the many challenges faced in 2020 remained, as well as their impact to the insurance industry. The NAIC remained focused on providing the necessary leadership, resources, and direction to assist its membership in addressing the largest health crisis of our time, in addition to natural disasters and economic uncertainty.

Over the past four years, the NAIC has utilized its strategic plan, State Ahead, as a compass. The plan articulated a comprehensive vision for the future of state insurance regulation and outlined how the NAIC could help the membership stay ahead of the curve in a rapidly evolving marketplace. Many of the initiatives identified in the plan have been implemented or are nearing completion, such as the migration of systems to the Cloud, improved analytical capabilities via regulatory dashboards, and the establishment of an enterprise data asset management program. The goal in 2022 is to evaluate and expand the plan as State Ahead 2.0, which will serve as a roadmap for initiatives planned in 2023 and beyond.

To accomplish this goal, the 2022 budget incorporates funding to complete current State Ahead initiatives and establish State Ahead 2.0. It recognizes the need for key internal resources to be added to ensure adequate staffing levels for important regulatory and operational needs. The budget also demonstrates a firm commitment to technology advancements and the modernization of insurance regulation in areas such as innovation, cybersecurity, and international standard-setting.

The budget continues the NAIC's commitment to support the variety of programs, products, and services in the financial solvency and market regulatory arenas. The NAIC offers a wide range of publications, data, and information systems; accreditation reviews; and many other services to assist state insurance regulators in achieving their fundamental insurance regulatory goals in a timely and cost-effective manner.
Support of the Membership

The mission of the NAIC is to assist the state insurance regulators in serving the public interest and achieving its goals of protecting the public interest; promoting a competitive marketplace; facilitating the fair and equitable treatment of insurance customers; ensuring the reliability, solvency, and financial stability of insurers; and supporting and improving state insurance regulation. Leveraging NAIC technology solutions, regulatory tools, and staff resources allow member states to achieve these goals at a significant cost savings. Without these options, many systems would be cost-prohibitive for the states to implement on their own. Without membership in the NAIC, the amount of state funding required to provide or access similar types of services and data the NAIC provides — often at no extra charge — would far exceed what a state pays in member dues to the NAIC.

A Focus on Consumers

The NAIC provides a multi-channel approach to reach and assist consumers in making informed decisions on insurance matters. These multi-pronged marketing communications campaigns include consumer education pieces, mobile apps, and targeted social campaigns. In 2022, the NAIC will expand its efforts to provide departments of insurance with greater access to these tools.

Valuable Products and Services

The NAIC seeks to support its mission through a wide variety of products and services offered to both the insurance industry and state regulators. NAIC web-based systems automate, standardize, and streamline regulatory processes by transmitting data and facilitating regulatory transactions between insurers, consumers, and state insurance regulators.

The NAIC is committed to maintaining and enhancing these systems to provide high-quality service to all stakeholders. The 2022 budget includes two technology-based fiscals, one of which allows additional states to take advantage of a proven back-office platform and the other to lay the foundation for a successful modernization of a critical data collection platform.

Building the Budget

The NAIC strives for transparency in its budget process as well as in its operations. The budget process gets underway in May each year, when department managers evaluate current-year revenues and expenses to assess the year-end picture, then propose a budget for the following year based on their operational objectives and member initiatives. Managers carefully focus on variances between the current year’s budget and projected results and anticipated business needs for the coming year. This process includes a review of all projects, products, programs, services, committee charges, and

---

**By the Numbers**

NAIC products and services make life easier.

- **System for Electronic Rates & Forms Filing (SERFF)** – 578,185 transactions processed in 2020
- **Online Premium Tax for Insurance (OPTins)** – 151,623 transactions processed in 2020
- **State Based Systems (SBS)** – back-office services licensed to 33 jurisdictions in 2020
- **Professional Designation Program** – 1,528 designations awarded since the program’s inception in October 2006 through year-end 2020
- **Center for Insurance Policy and Research (CIPR)**
  - **Key Research Issues** – 185 briefs currently available online including NAIC key initiatives and topics ranging from cybersecurity and innovation to natural catastrophe risk and resiliency

---
technology initiatives in light of the NAIC’s mission and the membership’s strategic priorities, particularly those outlined in *State Ahead*. NAIC senior management reviews each department budget in detail with its division director to adjust according to the strategic and financial needs of the association and ultimately consolidates all requests into a single, comprehensive budget.

Following the extensive development and internal review process, the budget is presented to the NAIC Officers, the Executive (EX) Committee and Internal Administration (EX1) Subcommittee, and the full NAIC membership before being released for public review and comment. To ensure transparency, a public hearing is held to receive public comments before final consideration and adoption by the NAIC Executive (EX) Committee and Plenary.

**Expected Results for 2021**

Based on actual operating results (before adding investment income) through June 30, 2021, the NAIC projects a net negative operating margin of $2.5 million compared to a budgeted net negative operating margin of $13.2 million, an improvement of nearly $10.8 million. Investment income is projected to be $11.9 million, resulting in a net asset increase of nearly $9.4 million.

As a result of the continuation of the COVID-19 pandemic, 2021 saw a virtual only or hybrid approach to several meetings, including the Summer National Meeting and the Insurance Summit, causing travel, meetings, and Grant/Zone spending to be significantly lower than budget.

Additional information regarding 2021 projected variances is included throughout the detailed footnotes of the budget.

**2022 Budget**

The 2022 budget demonstrates NAIC’s continued strong focus on prudent financial management, which is critically important in these unprecedented times. The 2022 budget also assumes the majority of meetings will be offered in a hybrid format.

The 2022 NAIC operating budget (before adding investment income) reflects revenues of $126.4 million and expenses of $136.3 million, which represent a 7.8% and a 4.4% increase, respectively, from the 2021 budget, resulting in nearly $10.0 million in projected expenses over revenues. Viewed in relation to the 2021 projected totals, which continue to be significantly impacted by the pandemic, the 2022 budget represents an operating revenue increase of 3.4% and operating expense increase of 9.3%. Additional information about the 2022 budget is included throughout the detailed footnotes of the budget.

**State Ahead 2.0 is on the horizon**

The next phase of *State Ahead* will support key regulatory priorities in upcoming years.

- Financial Solvency, including macroprudential surveillance and principle-based reserving
- Long-term care insurance
- Consumer data privacy protections
- Climate/natural catastrophes risk and resiliency
- Big data and artificial intelligence
- Race and Insurance
A fiscal impact statement (fiscal) is prepared for new or existing NAIC initiatives with revenue, expense, or capital impacts of $100,000 or more either in the current budget or within the following few years’ budgets or requires more than 1,150 hours of internal technical resources to accomplish. Each fiscal includes a detailed description of the initiative; impact on key stakeholders; financial and operational impact of the initiative; and an assessment of the risks. The total financial impact of the three fiscals included in the 2022 budget is $2.8 million in expenses with $312,627 in revenues. Additional information about each initiative is included in the various fiscal sections of the budget.

The 2022 budget includes $2.4 million in investment income from the NAIC’s Long-Term Investment Portfolio. Investment income is composed of interest and dividends earned reduced by investment management fees – investment gains and losses are not projected nor included in the budget.

Combining budgeted results from operations with budgeted investment income, the 2022 budget has a reduction in net assets of $7.5 million.

Preparing for the Unknown

The budget includes all known activities anticipated to occur in 2022. However, as 2021 has proven to be a year that deviated from the expected, situations will likely arise during 2022 that require additional funding. In such an event, a funding request is prepared and presented to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee for consideration. Funding for any approved project comes from the Regulatory Modernization and Initiatives Fund, established in 2005 to manage requests that arise following the adoption and implementation of an annual budget. The Fund is based on 1.5% of the NAIC’s projected consolidated net assets as of December 31, 2022, or $2.5 million with the inclusion of fiscals.

Ensuring Financial Stability

The NAIC’s operating reserve is designed to ensure the financial stability of the NAIC in the event of emerging business risks and uncertainties and to absorb new priority initiatives pursued by NAIC membership. The association’s reserve status is of paramount consideration in the budgeting process, as is strong and prudent financial management of the NAIC’s assets.
In July 2015, the Executive (EX) Committee and Internal Administration (EX1) Subcommittee approved a report from an independent financial advisory firm which established the NAIC’s liquid operating reserve target range of 83.4% to 108.2%. This range was the result of a comprehensive review of current and future identified risks and an evaluation of comparable organizations. This report recognized the increased level of uncertainty facing the NAIC and anticipated future investments which would be required to enhance the association’s information technology and technical infrastructure, represented by many elements of the 2022 budget. A review of the NAIC’s risk profile is currently in progress and is expected to be finalized in early 2022.

**Contact Information**

The NAIC appreciates the opportunity to present this 2022 budget and believes it provides a comprehensive review of the NAIC’s business and financial operations for the current and upcoming fiscal year. A summary of the 2022 budget’s key components is included in the budget overview.

Please feel free to contact Jim Woody, Chief Financial Officer, at jwoody@naic.org, or Carol Thompson, Senior Controller, at cthompson@naic.org, should you have any questions or need additional information.

Date: December 2, 2021

To: All NAIC Members and Interested Parties

From: Dean Cameron, Idaho Director of Insurance and NAIC-President Elect  
      Michael Consedine, NAIC Chief Executive Officer  
      Andy Beal, NAIC Chief Operating Officer and Chief Legal Officer  
      Jim Woody, NAIC Chief Financial Officer

Re: Summary of Comments on the Proposed 2022 NAIC Budget

In response to the Executive (EX) Committee’s and Internal Administration (EX1) Subcommittee’s request for comment on the NAIC’s proposed 2022 budget, the NAIC received one comment letter on the proposed budget after it was released for public comment on October 27, 2021, from the National Association of Mutual Insurance Companies (NAMIC) (Attachment One). This memorandum summarizes the letter’s comments and includes the NAIC’s response to each comment.

A Public Hearing will be held December 7th to discuss these comments. Participation instructions for public hearing teleconference can be accessed at http://www.naic.org/about_budget.htm.

**NAIC’s Commitment to Innovation, Cybersecurity, and Technology**

1. NAMIC noted the NAIC is focused on providing support to its members by modernizing its tools and systems by the largely implemented State Ahead initiatives and the focus on establishing State Ahead 2.0. NAMIC also noted approximately 50 percent of the NAIC’s staff is in information technology or technical services with a request for two additional staff members for the cybersecurity team. NAMIC agreed that protection of the sensitive data collected from states and industry participants is a high priority.

**NAIC Response:** The NAIC appreciates NAMIC’s support of the NAIC’s focus on continuing to provide outstanding service to state regulators by updating its tools and systems in a thoughtful and systematic manner. The two new cybersecurity positions as well as two technology-related fiscals – one to expand the NAIC’s State Based Systems platform to several new states and the other to lay the groundwork to modernize the Financial Data Repository system – are examples of the NAIC’s commitment to make prudent investments in technology that are of benefit to state-based insurance regulation. The NAIC will continue to make additional investments in its systems over the coming years to ensure the systems provide a high level of value to regulators, industry and consumers in a secure manner.
Consider Initiatives that Streamline Existing Regulatory Tools

2. NAMIC highlighted NAIC’s history of developing long-lasting model regulation and guidance with flexibility to be modified in response to changes in the insurance regulatory environment. NAMIC cited several instances of guidance brought forth decades before that have stood the test of time. However, NAMIC would like the NAIC to undertake an independent study to audit the current state of insurance regulations to identify opportunities to eliminate redundancies, resolve conflicting guidance, and gain efficiencies. The organization would also like the NAIC to consider making such a review an ongoing process. The reorganization of the Financial Analysis Handbook and Financial Condition Examiners Handbook, brought about from a systemic review of the pertinent regulation by the Risk-Focused Surveillance (E) Working Group between 2014 and 2018 was given as a positive example.

NAIC Response: NAMIC rightly notes that many companies are taking the opportunity, post-pandemic, to review their operations to determine the best path forward to doing business. The NAIC has begun its own review of internal operations, looking to preserve what worked well before the pandemic when staff worked collaboratively in the office and combine it with efficiencies gained during the pandemic as staff and regulators worked remotely. Turning attention to NAMIC’s recommendation of an independent review of NAIC model laws and guidance, along with a methodology for ongoing evaluation as new model laws and guidance are considered and adopted, would fit well with the plans to develop State Ahead 2.0 in 2022.

Embrace Collaborative Work to Promote Transparency and Create Efficiencies

3. NAMIC recognizes the significant value provided by the NAIC to its members by providing an organized and coordinated approach to the many challenges that occurred during the pandemic. However, NAMIC cautions the NAIC to continue to be collaborative and transparent as it seeks to address difficult and sensitive subjects, especially those that could be considered outside the bounds of insurance supervision. The organization asks the NAIC and the members to give all parties – including stakeholders such as NAMIC – the opportunity to participate in a meaningful way. One such way would be for the association to perform analysis exercises more frequently in joint sessions, with the goal of creating efficiencies.

NAIC Response: The NAIC values NAMIC’s thoughtful recommendation to work collaboratively, thereby promoting better transparency, developing deeper expertise, and utilizing regulators, industry, and staff more efficiently. The NAIC strives for transparency in its operations, budget process, and regulatory activities. Working collaboratively with stakeholders has long been a focus of the NAIC as well. One of the pillars of the State Ahead strategic plan was to put into place resources supporting a collaborative regulatory environment that fosters stable financial markets and reliable and affordable insurance products. As the members work in 2022 toward developing the next phase of the NAIC’s long-term strategic plan, State Ahead 2.0, NAMIC’s recommendation will be taken into account as collaboration and transparency continue to a high priority to the membership.
Concluding Comments

The NAIC takes a holistic approach to the development of its annual budget, which involves input from NAIC staff, NAIC officers, the Executive Committee, and all of the NAIC’s members. To provide transparency to the public, the NAIC publishes a copy of its proposed budget on its website before the budget is approved and welcomes input and comments from interested parties, which are addressed in writing and in an open Public Hearing. This process ensures that State insurance regulators, supported by the NAIC, are committed to protecting policyholders as well as ensuring the financial solvency of the insurance industry in a cost-effective and financially prudent manner, while minimizing the impact to industry where possible. The NAIC continuously seeks opportunities to reduce operating costs while providing world-class support to its members, regulators, interested parties, and insurance customers.

Re: NAMIC Comments – Proposed 2022 NAIC Budget

Dear Mr. Woody:

On behalf of the National Association of Mutual Insurance Companies (NAMIC),1 thank you for the opportunity to provide comments regarding the Proposed 2022 NAIC Budget. NAMIC is a long supporter of the NAIC in its efforts to develop regulatory tools and guidance, as well as to develop model regulations that promote a strong and stable state-based regulatory system. Our comments today focus on three central themes that harmonize around the notion that a focused state-based regulatory system remains the best path toward regulatory modernization. Those themes include: (1) support for NAIC’s commitment to innovation, cybersecurity, and technology; (2) consideration of initiatives that streamline existing regulatory tools; and (3) collaboration to promote transparency and create efficiencies.

Innovation, Cybersecurity, and Technology

All stakeholders have a responsibility to be good stewards of data governance. NAMIC commends the NAIC for their commitment in this area. As demonstrated by the largely implemented State Ahead initiatives and the additional investments that establish State Ahead 2.0, the NAIC is demonstrating their responsibility to support the states through the modernization of tools and technology to advance state insurance regulation. As noted in the budget, approximately 50% of NAIC staff is in the information technology group or in technical services, and two new cybersecurity full-time positions will be added to that count going forward. NAMIC shares the NAIC’s view in making the protection of the sensitive data they collect from states and industry participants a high priority.

1 The National Association of Mutual Insurance Companies is the largest property/casualty insurance trade group with a diverse membership of more than 1,500 local, regional, and national member companies, including seven of the top 10 property/casualty insurers in the United States. NAMIC members lead the personal lines sector representing 66 percent of the homeowner’s insurance market and 53 percent of the auto market. Through our advocacy programs NAMIC promotes public policy solutions that benefit NAMIC member companies and the policyholders they serve and foster greater understanding and recognition of the unique alignment of interests between management and policyholders of mutual companies.
In addition to the investments in State Ahead 2.0 and the addition of two new IT professionals, two technology-based fiscals are being proposed in the 2022 budget. This includes the modernization of the data collection tool that stores annual and quarterly financial statements and is leveraged by state financial analysts to conduct solvency reviews. This also includes significant investments in the State-Based System (SBS) to expand and transition to a new platform to improve the regulatory processes resulting in cost-savings for the states. NAMIC appreciates the support the NAIC provides to the states and continuous efforts to keep its systems and technology modernized for the future.

**Consider Initiatives That Streamline Existing Regulatory Tools**

The NAIC has an established track record for developing long-lasting model regulation and guidance. For example, the early stages of the development of the Insurance Holding Company System Regulatory Act dates back to 1966, and yet it was recently amended to incorporate the Group Capital Calculation in 2020. The Risk-Based Capital formula established its roots nearly 30 years ago and codification of statutory accounting was now 20 years ago. And while these regulations and guidance have stood the test of time, it is because the system that supports it is adaptable enough to continuously tweak, amend, and add to the regulations to respond to an evolving insurance regulatory environment.

However, what often gets overlooked when new regulations come online is a robust evaluation of what they are replacing or trying to improve upon. This results in years and layers of regulations piling-on top of other antiquated regulations. It is critical to regularly and systematically consider and eliminate the areas that have become redundant and/or conflicting with new or existing regulations. Not only could efficiencies be gained by going back to evaluate this situation, but a process should be put in place to consider the question of duplication/inconsistency as a matter of course. A concrete example of the NAIC systematically addressing redundancy in regulation occurred recently over a four-year time (2014-2018) when the Risk-Focused Surveillance (E) Working Group adopted a charge to “review existing examination and analysis procedures to identify and eliminate redundant efforts in collecting and reviewing insurer information for solvency monitoring purposes.” The result of this charge was a complete reorganization of the Financial Analysis Handbook and significant changes to the Financial Condition Examiners Handbook. The clarity gained through this deliberate process benefits regulators and insurers alike.

While we have certainly come a long way since the NAIC embarked upon the Solvency Modernization Initiative back in 2008; in fact, the aforementioned Holding Company Act has undergone three separate and significant amendment processes in that time, but what has not occurred in that time is a pause to take stock of everything that has changed. Again, NAMIC thinks now would be that appropriate time, given companies, regulators, and consumers are all currently doing a similar exercise themselves. Companies are looking throughout their operations at how they are going to do business going forward in a post-pandemic world. Regulators too are trying to navigate how best to do their jobs in an increasingly remote and technologically advanced world. Consumers as well are evaluating their choices and figuring out what they value, and we all know consumer demands are constantly evolving. Therefore, NAMIC suggests the NAIC embark upon a similar initiative as SMI where all NAIC model acts, regulations, workstreams and guidance manuals are independently surveyed and reviewed.
to determine their utility and to promote regulatory efficiency as we navigate together the next set of challenges on the horizon.

Our members would certainly appreciate an effort to look at all the good work that the NAIC has accomplished over the years and juxtapose that against where we have come from. An audit of what was trying to be solved back then versus what has been implemented since, such as ORSA, CGAD, MAR, GCC, group supervision, etc. and include an assessment of what was accomplished and what could have been done differently. The NAIC has an opportunity, as it has amassed significant resources since the adoption of these tools. Understanding that the NAIC has an outsized liquid operating reserve that exceeds the recommended range, NAMIC thinks it would be prudent to use the savings (from the reduced spending due to the pandemic) to conduct an independent study. It would be a prudent use of the significant reserves amassed and an investment in a more cohesive and understandable set of regulatory tools for the next generation.

Embrace Collaborative Work to Promote Transparency and Create Efficiencies

The NAIC certainly demonstrated its value throughout the pandemic, as we witnessed the association respond with the urgency and agility that was needed. NAMIC members appreciated how organized and coordinated the NAIC and its members were. NAIC Immediate Past President, Director Ray Farmer, often said about his year as NAIC President, “2020 has not been the year we planned, but it is the year we got.” This epitomizes how adaptive the NAIC has become. As we have all learned, it is entirely impossible to foresee every challenge or obstacle around the corner.

NAMIC respectfully shares a note of caution, particularly as the NAIC ventures into conversations that include difficult and sensitive subjects outside the bounds of insurance supervision. It is important for the NAIC to maintain the ability to be nimble while at the same time intentionally embracing a collaborative spirit and robust transparency. NAMIC encourages the NAIC and its members to work together to find common ground and to be as inclusive as possible – including with stakeholders – to give everyone an opportunity to participate meaningfully.

Again, as we move toward a post-pandemic world, it presents a unique opportunity for organizations to take stock of where they are going. Given the speed the NAIC has grown in recent years, analysis exercises should be more frequent and aimed at looking to create efficiencies. The NAIC has committed itself in years past to restructuring and/or reducing the number of subgroups, working groups, and task forces. On the other hand, with each new evolving risk seems to come more specialized and technical groups producing an environment that creates silos, potentially resulting in inefficient methods to solving common problems. These barriers can be overcome through a more collaborative effort, one that brings together various groups to solve common problems. By combining certain groups or conducting business in joint sessions, for example, this can result in better transparency, development of deeper expertise, and more efficient use of regulators, industry, and NAIC staff time. Further, new issues eventually mature and short-term ad hoc efforts accomplish their discrete purposes. While as new issues emerge, there may be a need for a limited deep dive on an aspect of an issue, after some initial understanding is gained, it may be worth asking whether less splintering of attention and more focused effectiveness may be achieved by consolidating and or sunsetting such narrow efforts.
Conclusion
As always NAMIC appreciates the opportunity to provide comments on the NAIC’s proposed budget. Being a strong supporter of the state-based system of insurance regulation, our intent is not to be critical but rather to offer constructive ideas, because NAMIC values the mission of the NAIC. NAMIC believes the NAIC is positioned very well and has an opportunity to make progress in a number of areas. NAMIC supports the commitments made to innovation, cybersecurity, and technology, and encourages NAIC leadership to consider streamlining existing regulatory tools and to embrace a more collaborative and transparent work environment.

Thank you for your consideration of these comments on this matter of importance to insurers and policyholders. NAMIC looks forward to the responses and discussions during the coming year.

Jonathan Rodgers
Director of Financial and Tax Policy
National Association of Mutual Insurance Companies
Executive (EX) Committee

The mission of the Executive (EX) Committee is to manage the affairs of the NAIC in a manner consistent with its Articles of Incorporation and its Bylaws.

Ongoing Support of NAIC Programs, Products or Services

1. The Executive (EX) Committee will:
   A. Identify the goals and priorities of the organization and make recommendations to achieve such goals and priorities based on input of the membership. Make recommendations by the 2022 Commissioners Conference.
   B. Create/terminate task force(s) and/or Executive (EX) Committee-level working groups to address special issues and monitor the work of these groups. Create necessary task force(s) and/or Executive (EX) Committee-level working groups throughout 2022 as necessary.
   C. Submit reports and recommendations to NAIC members concerning the activities of its subcommittee and the standing committees. Submit a report at each national meeting.
   D. Consider requests from NAIC members for friend-of-the-court briefs.
   E. Establish and allocate functions and responsibilities to be performed by each NAIC zone.
   F. Pursuant to the Bylaws, oversee the NAIC offices to assist the organization and the individual members in achieving the goals of the organization.
   G. Conduct strategic planning on an ongoing basis.
   H. Plan, implement and coordinate communications and activities with the Federal Insurance Office (FIO).
   I. Plan, implement and coordinate communications and activities with other state, federal, local and international government organizations to advance the goals of the NAIC and promote understanding of state insurance regulation.
   J. Review and approve requests for the development of model laws and/or regulations. Coordinate the review of existing model laws and/or regulations.
   K. Select NAIC national meeting sites five and six years in advance of the meeting date to ensure efficient and economical locations and facilities.
   L. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.

NAIC Support Staff: Andrew J. Beal/Kay Noonan
CLIMATE AND RESILIENCY (EX) TASK FORCE

The mission of the Climate and Resiliency (EX) Task Force is to serve as the coordinating NAIC body for discussion and engagement on climate-related risk and resiliency issues, including dialogue among state insurance regulators, industry, and other stakeholders.

Ongoing Support of NAIC Programs, Products or Services

1. The Climate and Resiliency (EX) Task Force will:
   A. Consider appropriate climate risk disclosures within the insurance sector, including:
      2. Evaluation of alignment with other sectors and international standards.
      3. Evaluation of financial regulatory approaches to climate risk and resiliency in coordination with other relevant committees, task forces, and working groups, such as the Financial Condition (E) Committee and the Financial Stability (E) Task Force.
      4. Evaluation of the use of modeling by carriers and their reinsurers concerning climate risk.
      5. Evaluation of how rating agencies incorporate climate risk into their analysis and governance.
      6. Evaluation of the potential solvency impact of insurers’ exposures, including both underwriting and investments, to climate-related risks.
      7. Evaluation and development of climate risk-related disclosure, stress testing, and scenario modeling.
   B. Consider innovative insurer solutions to climate risk and resiliency, including:
      1. Evaluation of how to apply technology and innovation to the mitigation of storm, wildfire, other climate risks, and earthquake.
      2. Evaluation of insurance product innovation directed at reducing, managing, and mitigating climate risk and closing protection gaps.
   C. Identify sustainability, resilience, and mitigation issues and solutions related to the insurance industry.
   D. Consider pre-disaster mitigation and resiliency and the role of state insurance regulators in resiliency.

NAIC Support Staff: Jennifer Gardner
**GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL**

The Government Relations (EX) Leadership Council coordinates the NAIC’s ongoing work with the federal government and state government officials on legislative and regulatory policy. The Leadership Council, in conjunction with the NAIC’s other standing committees, is responsible for quickly responding to federal legislative and regulatory developments that affect insurance regulation.

The mission of the Government Relations (EX) Leadership Council is to develop, coordinate, and implement the NAIC’s legislative, regulatory, and outreach initiatives. The Leadership Council will devise strategies for NAIC action and promote the participation of all NAIC members in the NAIC’s government relations initiatives.

**Ongoing Support of NAIC Programs, Products or Services**

1. The Government Relations (EX) Leadership Council will:
   A. Monitor, analyze, and respond to federal legislative and regulatory actions and other issues of importance to the NAIC membership.
   B. Work with other standing committees, task forces, and working groups to help develop and communicate the NAIC’s policy views to federal and state officials on pending legislation and regulatory issues by the involvement of NAIC members through testimony, correspondence, and other approaches.
   C. Develop a strategy and program for directly engaging NAIC members with the U.S. Congress (Congress) and federal agencies to advocate for NAIC objectives and the benefits and efficiencies of state-based insurance regulation.
   D. Secure broader participation from NAIC membership on all government affairs advocacy initiatives.
   E. Report to the Executive (EX) Committee on all activities and matters relating to the annual charges of the Leadership Council.

NAIC Support Staff: Ethan Sonnichsen/Brian R. Webb/Brooke Stringer
LONG-TERM CARE INSURANCE (EX) TASK FORCE

Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, the mission of the Long-Term Care Insurance (EX) Task Force is to: 1) further develop and implement a coordinated national approach for reviewing LTCI rates; 2) monitor and evaluate the rate review process; 3) evaluate and recommend options to help consumers manage the impact of rate increases; and 4) monitor work performed by other NAIC groups to review the financial solvency of long-term care (LTC) insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Long-Term Care Insurance (EX) Task Force will:
   A. Once adopted by the NAIC Executive (EX) Committee and Plenary, monitor, and evaluate the progress of the multistate actuarial (MSA) rate review process as outlined in the MSA Framework document. Monitor state insurance department rate review actions subsequent to implementation of the MSA Framework and MSA rate review recommendations.
   B. Complete an evaluation and recommend options to provide consumers with choices regarding modifications to LTCI contract benefits where policies are no longer affordable due to rate increases.
   C. Monitor the work performed by other NAIC solvency working groups and assist in the timely multi-state coordination and communication of the review of the financial condition of LTC insurers.

2. The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup will:
   A. Finalize the development of the MSA rate review process as outlined in the MSA Framework document which outlines a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Implement the MSA rate review process once adopted by the NAIC Executive (EX) Committee and Plenary.
   B. Evaluate the progress of the MSA rate review process and provide ongoing maintenance and enhancements, as deemed necessary.
   C. The Subgroup should complete its charges by the 2022 Fall National Meeting.

3. The Long-Term Care Reduced Benefit Options (EX) Subgroup will:
   A. Complete an evaluation and/or recommendation of options to help consumers manage the impact of rate increases. This includes:
      1. Finalizing development of a process to evaluate innovative options that allow for insurers to offer benefits that lessen the likelihood of an insured needing long-term care services, including evaluation of the suitability of and regulatory barriers to proposed options.
      2. The potential development of mechanisms to help regulators and consumers objectively compare reduced benefit options (RBOs), including comparison of accepting a rate increase and retaining current benefits to electing an offered RBOs.
      3. Finalizing the Consumer Notices Checklist for RBOs.
   B. Support and provide expertise to the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup regarding evaluation of RBOs.
   C. The Subgroup should complete its charges by the 2022 Fall National Meeting.

NAIC Support Staff: Jeff Johnston/Jane Koenigsman
SPECIAL (EX) COMMITTEE ON RACE AND INSURANCE

The mission of the Special (EX) Committee on Race and Insurance is to serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.

Ongoing Support of NAIC Programs, Products or Services

1. The Special (EX) Committee on Race and Insurance will:
   A. Serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.
   B. Coordinate with existing groups such as the Big Data and Artificial Intelligence (EX) Working Group and the Casualty Actuarial and Statistical (C) Task Force and encourage those groups to continue their work on issues affecting people of color and/or historically underrepresented groups, particularly in predictive modeling, price algorithms, and artificial intelligence (AI).
   C. (Workstream One) Continue research and analysis to identify issues and develop specific recommendations on action steps state insurance regulators and companies can take to improve the level of diversity and inclusion in the industry, including:
      1. Seek additional engagement from stakeholders to understand the efficacy of diversity-related programs, how companies measure their progress, and what state insurance regulators can do to support these efforts.
      2. Collect input on any existing gaps in available industry diversity-related data.
   D. (Workstream Two) In coordination with the Executive (EX) Committee, receive reports on NAIC diversity, equity, and inclusion (DE&I) efforts. Serve as the coordinating body for state requests for assistance from the NAIC related to DE&I efforts.
   E. (Workstream Two) Research best practices among state insurance departments on DE&I efforts and develop forums for sharing relevant information among states and with stakeholders, as appropriate.
   F. Continue research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. Make recommendations for statutory or regulatory changes and additional steps, including:
      1. (Workstream Four) The impact of traditional life insurance underwriting on traditionally underserved populations, considering the relationship between mortality risk and disparate impact.
      2. (Workstream Three) Developing analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance, including issues related to:
         a. Rating and underwriting variables, such as socioeconomic variables and criminal history, including:
            1. Identifying proxy variables for race.
            2. Correlation versus causation, including discussion of spurious correlation and rational explanation.
            3. Potential bias in underlying data.
            4. Proper use of third-party data.
         b. Disparate impact considerations.
   G. (Workstreams Three, Four, and Five) Consider enhanced data reporting and record-keeping requirements across product lines to identify race and other sociodemographic factors of insureds, including consideration of legal and privacy concerns. Consider a data call to identify insurance producer resources available and products sold in specific ZIP codes to identify barriers to access.
   H. Continue research and analysis related to insurance access and affordability issues, including:
      1. (Workstream Four) The marketing, distribution, and access to life insurance products in minority communities, including the role that financial literacy plays.
      2. (Workstream Four) Disparities in the number of cancellations/rescissions among minority policyholders.
SPECIAL (EX) COMMITTEE ON RACE AND INSURANCE (Continued)

3. (Workstream Five) Measures to advance equity through lowering the cost of health care and promoting access to care and coverage, with a specific focus on measures to remedy impacts on people of color, low income and rural populations, and historically marginalized groups, such as the LGBTQ+ community, individuals with disabilities, and Alaska Native and other Native and Indigenous people.

4. (Workstream Five) Examination of the use of network adequacy and provider directory measures (e.g., provider diversity, language, and cultural competence) to promote equitable access to culturally competent care.

5. (Workstream Five) Conduct additional outreach to educate consumers and collect information on health and health care complaints related to discrimination and inequities in accessing care.

6. (Workstream Three) Whether steps need to be taken to mitigate the impact of residual markets, premium financing, and nonstandard markets on historically underrepresented groups.

7. Make referrals for the development of consumer education and outreach materials, as appropriate.

I. Direct NAIC and Center for Insurance Policy & Research (CIPR) staff to conduct necessary research and analysis, including:

1. (Workstream Three) The status of studies concerning the affordability of auto and homeowners insurance, including a gap analysis of what has not been studied.

2. (Workstream Three) The availability of producer licensing exams in foreign languages, steps exam vendors have taken to mitigate cultural bias, and the number and locations of producers by company compared to demographics in the same area.

3. (Workstream Five) Aggregation of existing research on health care disparities and the collection of insurance responses to the COVID-19 pandemic and its impact across demographic populations.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE – NEW CHARGES

The Accelerated Underwriting (A) Working Group, as part of its ongoing work to consider the use of external data and data analytics in accelerated life underwriting, will include an assessment of and recommendations, as necessary, regarding the impact of accelerated underwriting on minority populations.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE – NEW CHARGES

1. The Health Insurance and Managed Care (B) Committee will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House, and federal agencies; analyze policy implications and the effect on the states of proposed and enacted federal legislation and regulations, including, where appropriate, an emphasis on equity considerations and the differential impact on underserved populations; and communicate the NAIC’s position through letters and testimony, when requested.

The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group of the Regulatory Framework (B) Task Force will develop model educational material for state departments of insurance (DOIs) and research disparities in and interplay between mental health parity and access to culturally competent care for people of color and/or historically underrepresented groups.

The Health Innovations (B) Working Group will evaluate mechanisms to resolve disparities through improving access to care, including the efficacy of telehealth as a mechanism for addressing access issues; the use of alternative payment models and value-based payments and their impact on exacerbating or ameliorating disparities and social determinants of health; and programs to improve access to historically underserved communities.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE – NEW CHARGES

The Producer Licensing (D) Task Force will receive a report on the availability of producer licensing exams in foreign languages, the steps exam vendors have taken to mitigate cultural bias, and the number and location of producers by company compared to demographics in the area.

NAIC Support Staff: Andrew J. Beal/Michael F. Consedine
 INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE

The mission of the Internal Administration (EX1) Subcommittee is to monitor the operations of the NAIC, including: 1) preparing a budget for Executive (EX) Committee review; 2) providing direction on personnel issues; 3) approving emergency expenditures; 4) evaluating the chief executive officer (CEO); and 5) assisting the CEO in resolving competing demands for NAIC staff resources.

Ongoing Support of NAIC Programs, Products or Services

1. The Internal Administration (EX1) Subcommittee will:
   A. Review and approve all expenditures of funds not included in the annual budget by considering any fiscal impact statements of unbudgeted resource requests and reporting its actions to the Executive (EX) Committee.
   B. Annually work with the CEO, chief operating officer/chief legal officer (COO/CLO), and chief financial officer (CFO) to review the business operations plan, which will incorporate the Executive (EX) Committee’s strategic management initiatives, and report its actions to the Executive (EX) Committee.
   C. Oversee a review of any management areas of the NAIC that should be designated for formal operational reviews by working with the CEO and COO/CLO.
   D. Oversee the development, revision, and delivery of all NAIC education programs, or the addition of new programs, by coordinating with other committees, as appropriate, and providing direction to the CEO and COO/CLO.
   E. Receive a report at each national meeting from the NAIC Audit Committee, which will be chaired by the secretary-treasurer. The NAIC Audit Committee will meet with NAIC management at or before each national meeting, or more frequently as necessary, to review the NAIC financial statements and hear reports from NAIC management on emerging financial issues for the NAIC, and it will report such information to the Internal Administration (EX1) Subcommittee. The NAIC Audit Committee shall also carry out the following activities pursuant to its charter:
      1. Engage the NAIC’s independent accountants with respect to the annual audit. This will include the appointment of an independent audit firm, a review of the results of the annual audit, and discussions with the independent auditors and NAIC management to ensure all audit comments or suggestions are addressed in a timely manner.
      2. Engage the NAIC’s service advisory firm. This will include the selection of an independent firm to provide Statement on Standards for Attestation Engagements (SSAE) services to the NAIC.
   F. Serve as the primary liaison between the NAIC membership and the NAIC investment advisor, or appoint a subcommittee to act in that capacity, including receiving reports on the performance of the NAIC’s investment portfolio and, from time to time, meeting directly with investment firm representatives to hear periodic reports and recommendations.
   G. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.
   H. Appoint the Information Systems (EX1) Task Force to provide regulator-based technology expertise.
   I. Conduct evaluations of the CEO and COO/CLO, and make appropriate recommendations to the Executive (EX) Committee. Consult with the CEO and COO/CLO on compensation of senior management.

NAIC Support Staff: Andrew J. Beal/Jim Woody
INFORMATION SYSTEMS (EX1) TASK FORCE

The mission of the Information Systems (EX1) Task Force is to: 1) provide regulator-based technology expertise to the Internal Administration (EX1) Subcommittee; and 2) support committee activities and objectives by monitoring projects that provide technical services or systems for state-based insurance regulation, as prioritized by the Executive (EX) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Information Systems (EX1) Task Force will:
   A. Serve as the Internal Administration (EX1) Subcommittee’s project-independent technology monitor and consultant. This involves monitoring the development, deployment and operation of NAIC information technology (IT) systems and services for state insurance regulators and, based on this effort, providing reports and recommendations to the Subcommittee, as appropriate. To achieve this, the Task Force will receive regular portfolio and technical operational reports.
   B. Provide consultation to NAIC technology staff, as well as the interpretation of intent and specific technology direction, where needed. For example, from time to time, NAIC technology staff may request approval of a specific technology approach, such as a proposal to drop support for a particular version of software. The Task Force will provide direction in such matters, either directly or through a working group. Task Force members will also communicate current and future state technology changes planned for their state to alert NAIC technology staff of potential impacts and requirements for NAIC systems and services used by state insurance regulators.
   C. Review, with technical recommendations for the Subcommittee: 1) Fiscal Impact Statements Appendix A for all State Ahead projects, as well as others involving a technology component exceeding $100,000 or 1,150 hours of technology staff development and which is not limited to the support of the internal operations; and 2) project requests that involve technology being submitted to the Subcommittee or directly to the Executive (EX) Committee.

NAIC Support Staff: Sherry Stevens/Keith Bollig
LIFE INSURANCE AND ANNUITIES (A) COMMITTEE

The mission of the Life Insurance and Annuities (A) Committee is to: 1) consider issues relating to life insurance and annuities; and 2) review new life insurance products.

Ongoing Support of NAIC Programs, Products or Services

1. The Life Insurance and Annuities (A) Committee will:
   A. Monitor the activities of the Life Actuarial (A) Task Force.

2. The Accelerated Underwriting (A) Working Group will:
   A. Consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue; and, if appropriate, draft guidance for the states.

3. The Annuity Suitability (A) Working Group will:
   A. Consider how to promote greater uniformity in the adoption of the Suitability in Annuity Transactions Model Regulation (#275) across NAIC member jurisdictions.

4. The Life Insurance Online Guide (A) Working Group will:
   A. Develop an online resource on life insurance, including the evaluation of existing content on the NAIC website, to be published digitally for the benefit of the public.

NAIC Support Staff: Jennifer R. Cook/Jolie H. Matthews
LIFE ACTUARIAL (A) TASK FORCE

The mission of the Life Actuarial (A) Task Force is to identify, investigate and develop solutions to actuarial problems in the life insurance industry.

Ongoing Support of NAIC Programs, Products and Services

1. The Life Actuarial (A) Task Force will:
   A. Work to keep reserve, reporting and other actuarial-related requirements current. This includes principle-based reserving (PBR) and other requirements in the Valuation Manual, actuarial guidelines, and recommendations for appropriate actuarial reporting in blanks. Respond to changes from the Life Insurance and Annuities (A) Committee and referrals from other groups or committees, as appropriate.
   B. Report progress on all work to the Life Insurance and Annuities (A) Committee and provide updates to the Financial Condition (E) Committee on matters related to life insurance company solvency. This work includes the following:
      1. Work with the American Academy of Actuaries (Academy) and the Society of Actuaries (SOA) to develop new mortality tables for valuation and minimum nonforfeiture requirements, as appropriate, for life insurance and annuities.
      2. Provide recommendations for guidance and requirements for accelerated underwriting, as needed.
      3. Evaluate and provide recommendations regarding the VM-21/AG 43 Standard Projection Amount, which may include continuing as a required floor or providing as disclosure. This evaluation is to be completed prior to year-end 2023.
      4. Work with the SOA on the annual development of the Generally Recognized Expense Table (GRET) factors.
      5. Provide recommendations and changes, as appropriate, to other reserve and nonforfeiture requirements to address issues, and provide actuarial assistance and commentary to other NAIC committees relative to their work on actuarial matters.
      6. Work with the selected vendor to develop and implement the new economic scenario generator (ESG) for use in regulatory reserve and capital calculations.
      7. Monitor international developments regarding life and health insurance reserving, capital and related topics. Compare and benchmark with PBR requirements.

2. The Variable Annuities Capital and Reserve (E/A) Subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and RBC calculation and determine if additional revisions need to be made.
   B. Develop and recommend appropriate changes, including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

3. The Experience Reporting (A) Subgroup will:
   A. Continue development of the experience reporting requirements within the Valuation Manual. Provide input, as appropriate, for the process regarding the experience reporting agent, data collection, and subsequent analysis and use of experience submitted.

4. The Indexed Universal Life (IUL) Illustration (A) Subgroup will:
   A. Monitor the results and practices of IUL illustrations following implementation of Actuarial Guideline XLIX-A—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest to Policies Sold On or After December 14, 2020 (AG 49-A). Provide recommendations for consideration of changes to Life Insurance Illustrations Model Regulation (#582) to the Life Actuarial (A) Task Force, as needed.

5. The Longevity Risk (E/A) Subgroup of the Life Actuarial (A) Task Force and the Life Risk-Based Capital (E) Working Group will:
   A. Provide recommendations for recognizing longevity risk in statutory reserves and/or risk-based capital (RBC), as appropriate. Complete by the 2022 Summer National Meeting.

6. The Valuation Manual (VM)-22 (A) Subgroup will:
   A. Recommend requirements, as appropriate, for non-variable (fixed) annuities in the accumulation and payout phases for consideration by the Life Actuarial (A) Task Force. Continue working with the Academy on a PBR methodology for non-variable annuities.
LIFE ACTUARIAL (A) TASK FORCE (Continued)

7. The Guaranteed Issue (GI) Life Valuation (A) Subgroup will:
   A. Provide recommendations regarding valuation requirements for GI life business, including any appropriate mortality table(s) for valuation as well as nonforfeiture. Initial recommendations are to be provided to the Life Actuarial (A) Task Force by the 2022 Summer National Meeting.

8. The Index-Linked Variable Annuity (A) Subgroup will:
   A. Provide recommendations and changes, as appropriate, to nonforfeiture, or interim value requirements related to index-linked variable annuities.

NAIC Support Staff: Reggie Mazyck/Jennifer Frasier
HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE

The mission of the Health Insurance and Managed Care (B) Committee is to consider issues relating to all aspects of health insurance.

Ongoing Support of NAIC Programs, Products or Services

1. The **Health Insurance and Managed Care (B) Committee** will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House, and federal agencies; analyze policy implications and their effect on the states of proposed and enacted federal legislation and regulations; and communicate the NAIC’s position through letters and testimony, when requested.
   B. Monitor the activities of the Health Actuarial (B) Task Force.
   C. Monitor the activities of the Regulatory Framework (B) Task Force.
   D. Monitor the activities of the Senior Issues (B) Task Force.
   E. Serve as the official liaison between the NAIC and the Joint Commission on Accreditation of Healthcare Organizations (Joint Commission), the National Committee for Quality Assurance (NCQA), and the Utilization Review Accreditation Commission (URAC).
   F. Examine factors that contribute to rising health care costs and insurance premiums. Review state initiatives to address cost drivers.
   G. Coordinate with appropriate Market Regulation and Consumer Affairs (D) Committee groups, as necessary, on health benefit plan and producer enforcement issues.
   H. Coordinate with the Market Regulation and Consumer Affairs (D) Committee, as necessary, to collect uniform data and monitor market conduct trends on plans that are not regulated under the federal Affordable Care Act (ACA), including short-term, limited-duration (STLD) insurance, association health plans (AHPs), and packaged indemnity health products.

2. The **Consumer Information (B) Subgroup** will:
   A. Develop information or resources, as needed, that would be helpful to state insurance regulators and others in assisting consumers to better understand health insurance.
   B. Review NAIC publications that touch on health insurance to determine if they need updating. If updates are needed, suggest specific revisions to the appropriate NAIC group or NAIC division to make the changes.

3. The **Health Innovations (B) Working Group** will:
   A. Gather and share information, best practices, experience, and data to inform and support health innovation at the state and national levels, including, but not limited to, state flexibility options through the ACA and other health insurance-related policy initiatives.
   B. Discuss state innovations related to health care—i.e., access, insurance plan designs, underlying medical and prescription drug costs, stability for health care and insurance as a whole, health insurer and provider consolidation or competition, the use of data in regulatory and policy decision-making, and health care delivery and financing models—to achieve better patient outcomes and lower spending trends.
   C. Explore sources and methods for state insurance regulators to obtain data to inform health reform initiatives.
   D. Disseminate materials and reports, via the NAIC, to the states and the U.S. territories wishing to utilize the information gathered by the Working Group.
   E. Take up other matters as directed by the Health Insurance and Managed Care (B) Committee.

NAIC Support Staff: Jolie H. Matthews/Brian R. Webb/Jennifer R. Cook
HEALTH ACTUARIAL (B) TASK FORCE

The mission of the Health Actuarial (B) Task Force is to identify, investigate, and develop solutions to actuarial problems in the health insurance industry.

Ongoing Support of NAIC Programs, Products or Services

1. The **Health Actuarial (B) Task Force** will:
   A. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary with respect to model requirements for appropriate long-term care insurance (LTCI) rates, rating practices, and rate changes.
   B. Provide support for issues related to implementation of, and/or changes to, the federal Affordable Care Act (ACA).
   C. Continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a principle-based reserving (PBR) framework.
   D. Develop LTCI experience reporting requirements in VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats, of the *Valuation Manual*.
   E. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary to other NAIC groups relative to their work on health actuarial matters.

2. The **Long-Term Care Actuarial (B) Working Group** will:
   A. Assist the Health Actuarial (B) Task Force in completing the following charges:
      1. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary with respect to model requirements for appropriate LTCI rates, rating practices, and rate changes.
      2. Continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a PBR framework.
      3. Develop LTCI experience reporting requirements in VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats, of the *Valuation Manual*.

3. The **Long-Term Care Pricing (B) Subgroup** will:
   A. Assist the Long-Term Care Actuarial (B) Working Group in completing the following charge:
      1. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary with respect to model requirements for appropriate LTCI rates, rating practices, and rate changes.

4. The **Long-Term Care Valuation (B) Subgroup** will:
   A. Assist the Long-Term Care Actuarial (B) Working Group in completing the following charges:
      1. Continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a PBR framework.
      2. Develop LTCI experience reporting requirements in VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats, of the *Valuation Manual*.

NAIC Support Staff: Eric King
REGULATORY FRAMEWORK (B) TASK FORCE

The mission of the Regulatory Framework (B) Task Force is to: 1) develop NAIC model acts and regulations for state health care initiatives; and 2) consider policy issues affecting state health insurance regulation.

Ongoing Support of NAIC Programs, Products and Services

1. The Regulatory Framework (B) Task Force will:
   A. Coordinate and develop the provision of technical assistance to the states regarding state-level implementation issues raised by federal health legislation and regulations.
   B. Review managed health care reforms, their delivery systems occurring in the marketplace, and other forms of health care delivery. Recommend appropriate revisions to regulatory jurisdiction, authority, and structures.
   C. Consider the development of new NAIC model laws and regulations and the revision of existing NAIC model laws and regulations, including those affected by federal legislation and final federal regulations promulgated pursuant to such legislation.
   D. Continue to review NAIC models recommended for revision by the former Affordable Care Act (ACA) Model Review (B) Working Group and, as appropriate, appoint a working group or subgroup to revise the NAIC model(s) prioritized for revision in 2022.
   E. At the direction of the Health Insurance and Managed Care (B) Committee, through the work of the Employee Retirement Income Security Act (ERISA) (B) Working Group, monitor, analyze, and report developments related to association health plans (AHPs).
   F. Monitor, analyze, and report, as necessary, developments related to short-term, limited-duration (STLD) coverage.

2. The Accident and Sickness Insurance Minimum Standards (B) Subgroup will:
   A. Review and consider revisions to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171).

3. The ERISA (B) Working Group will:
   A. Monitor, report, and analyze developments related to the federal ERISA, and make recommendations regarding NAIC strategy and policy with respect to those developments.
   B. Monitor, facilitate, and coordinate with the states and the U.S. Department of Labor (DOL) efforts related to sham health plans.
   C. Monitor, facilitate, and coordinate with the states and the DOL regarding compliance and enforcement efforts regarding the ACA that relate to ERISA.

4. The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group will:
   A. Monitor, report, and analyze developments related to the federal Paul Wellstone and Pete Domenici MHPAEA of 2008, and make recommendations regarding NAIC strategy and policy with respect to those developments.
   B. Monitor, facilitate, and coordinate best practices with the states, the DOL, and the U.S. Department of Health and Human Services (HHS) related to the MHPAEA.
   C. Monitor, facilitate, and coordinate with the states and the DOL regarding compliance and enforcement efforts regarding the ACA that relate to the MHPAEA.
   D. Provide supplemental resources to support documentation and reporting in the MHPAEA chapter of the NAIC Market Regulation Handbook.
   E. Coordinate with and provide input to Market Regulation and Consumer Affairs (D) Committee groups, as necessary, regarding mental health parity market conduct examinations.

5. The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup will:
   A. Develop a white paper to: 1) analyze and assess the role PBMs, pharmacy services administrative organizations (PSAOs), and other supply chain entities play in the provision of prescription drug benefits; 2) identify, examine, and describe current and emerging state regulatory approaches to PBM business practices, such as price transparency and reporting requirements, rebating, and spread pricing, including the implications of the Rutledge v. Pharmaceutical Care Management Association (PCMA) decision on such business practices; and 3) discuss any challenges, if any, the states have encountered in implementing such laws and/or regulations.
REGULATORY FRAMEWORK (B) TASK FORCE (Continued)

B. Consider developing a new NAIC model to establish a licensing or registration process for pharmacy benefit managers (PBMs). Based on issues identified in the white paper, the Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.

NAIC Support Staff: Jolie H. Matthews/Jennifer R. Cook
SENIOR ISSUES (B) TASK FORCE

The mission of the Senior Issues (B) Task Force is to: 1) consider policy issues; 2) develop appropriate regulatory standards; and 3) revise, as necessary, the NAIC models, consumer guides, and training material on Medicare supplement insurance, long-term care insurance (LTCI), senior counseling programs, and other insurance issues that affect older Americans.

Ongoing Support of NAIC Programs, Products or Services

1. The Senior Issues (B) Task Force will:
   A. Develop appropriate regulatory standards and revisions, as necessary, to the NAIC models, consumer guides, and training material on Medicare supplement insurance, senior counseling programs, and other insurance issues that affect older Americans. Work with federal agencies to advance appropriate regulatory standards for Medicare supplement and other forms of health insurance applicable to older Americans. Review the Medicare Supplement Insurance Minimum Standards Model Act (#650) and the Model Regulation to Implement the NAIC Medicare Supplement Insurance Minimum Standards Model Act (#651) to determine if amendments are required based on changes to federal law. Work with the federal Centers for Medicare & Medicaid Services (CMS) to revise the annual joint publication, Choosing a Medigap Policy: A Guide to Health Insurance for People with Medicare.
   B. Monitor the Medicare Advantage and Medicare Part D marketplace. Assist the states, as necessary, with regulatory issues. Maintain a dialogue and coordinate with the CMS on regulatory issues, including solvency oversight of waived plans and agent misconduct. Assist the states and serve as a clearinghouse for information on Medicare Advantage plan activity.
   C. Provide the perspective of state insurance regulators to the U.S. Congress (Congress), as appropriate, and the CMS on insurance issues, including those concerning the effect and result of federal activity on the senior citizen health insurance marketplace and regulatory scheme. Review and monitor state and federal relations with respect to senior health care initiatives and other impacts on the states.
   D. Monitor developments concerning State Health Insurance Assistance Programs (SHIPs), including information on legislation affecting the funding of SHIPs. Assist the states with issues relating to SHIPs and support a strong partnership between SHIPs and the CMS. Provide the perspective of state insurance regulators to federal officials, as appropriate, on issues concerning SHIPs.
   E. Monitor, maintain, and review, in accordance with changes to Model #651, a record of state approvals of all Medicare supplement insurance new or innovative benefits for use by state insurance regulators and others. Review state-approved new or innovative benefits and consider whether to recommend that they be made part of standard benefit plan designs in Model #651.
   F. Develop appropriate regulatory standards and revisions, as necessary, to the NAIC models, consumer guides, and training material on LTCI, including the study and evaluation of evolving LTCI product design, rating, suitability, and other related factors. Review the existing Long-Term Care Insurance Model Act (#640), the Long-Term Care Insurance Model Regulation (#641), the Limited Long-Term Care Insurance Model Act (#642), and the Limited Long-Term Care Insurance Model Regulation (#643) to determine their flexibility to remain compatible with the evolving delivery of long-term care (LTC) services and the evolving LTCI marketplace. Work with federal agencies, as appropriate.
   G. Examine examples of health-related financial exploitation of seniors and work with other NAIC committees, task forces, and working groups on possible solutions.
   H. Examine the effects of structural racism and the COVID-19 pandemic on access, affordability, and outcomes for older insurance consumers.

2. The Long-Term Care Insurance (LTCI) Model Update (B) Subgroup will:
   A. Review and update Model #640 and Model #641 to determine their flexibility to remain compatible with the evolving delivery of LTC services and the evolving LTCI marketplace.
   B. Update Model #642 and Model #643 to correlate with Model #640 and Model #641.
   C. Consider recommendations referred from the Long-Term Care Insurance (EX) Task Force and/or its subgroups.

NAIC Support Staff: David Torian
The mission of the Property and Casualty Insurance (C) Committee is to: 1) monitor and respond to problems associated with the products, delivery, and cost in the property/casualty (P/C) insurance market and the surplus lines market as they operate with respect to individual persons and businesses; 2) monitor and respond to problems associated with financial reporting matters for P/C insurers that are of interest to regulatory actuaries and analysts; and 3) monitor and respond to problems associated with the financial aspects of the surplus lines market.

**Ongoing Support of NAIC Programs, Products or Services**

1. **The Property and Casualty Insurance (C) Committee** will:
   - Discuss issues arising and make recommendations with respect to advisory organization and insurer filings for personal and commercial lines, as needed. Report yearly.
   - Monitor the activities of the Casualty Actuarial and Statistical (C) Task Force.
   - Monitor the activities of the Surplus Lines (C) Task Force.
   - Monitor the activities of the Title Insurance (C) Task Force.
   - Monitor the activities of the Workers’ Compensation (C) Task Force.
   - Provide an impartial forum for considering appeals of adverse decisions involving alien insurers delisted or rejected for listing to the Quarterly Listing of Alien Insurers. Appeal procedures are described in the International Insurers Department (IID) Plan of Operation.
   - Monitor and review developments in case law and rehabilitation proceedings related to risk retention groups (RRGs). If warranted, make appropriate changes to the Risk Retention and Purchasing Group Handbook.
   - Monitor the activities of the Federal Crop Insurance Corporation (FCIC) that affect state insurance regulators:
     1. Serve as a forum for discussing issues related to the interaction of federal crop insurance programs with state insurance regulation.
   - Monitor the regulatory information exchanges between the FCIC and state insurance regulators, as well as the FCIC and the NAIC, and make recommendations for improvements or revisions, as needed.
   - Report on the cyber insurance market, including data reported within the Cybersecurity Insurance and Identity Theft Coverage Supplement.
   - Monitor regulatory issues that arise with the development of autonomous vehicles. Study and, if necessary, develop recommendations for changes needed to the state-based insurance regulatory framework.
   - Provide a forum for discussing issues related to parametric insurance and consider the development of a white paper or regulatory guidance.

2. **The Cannabis Insurance (C) Working Group** will:
   - Assess and periodically report on the status of federal legislation that would protect financial institutions from liability associated with providing services to cannabis businesses operating legally under state law.
   - Encourage admitted insurers to ensure coverage adequacy in states where cannabis, including hemp, is legal.
   - Provide insurance resources to stakeholders and keep up with new products and innovative ideas that may shape insurance in this space.
   - Develop an appendix to the Understanding the Market for Cannabis Insurance white paper, providing updated information on cannabis-related insurance issues for adoption by the 2022 Summer National Meeting.
   - Collaborate with the Producer Licensing (D) Task Force to study whether cannabis-related convictions in states where cannabis is legalized for medical and/or recreational use are preventing individuals from being licensed as an agent or broker.

3. **The Catastrophe Insurance (C) Working Group** will:
   - Monitor and recommend measures to improve the availability and affordability of insurance and reinsurance related to catastrophe perils for personal and commercial lines.
   - Evaluate potential state, regional, and national programs to increase capacity for insurance and reinsurance related to catastrophe perils.
   - Monitor and assess proposals that address disaster insurance issues at the federal and state levels. Assess concentration-of-risk issues and whether a regulatory solution is needed.
   - Provide a forum for discussing issues and recommending solutions related to insuring for catastrophic risk, including terrorism, war, and natural disasters.
   - Consider revisions to the Catastrophe Computer Modeling Handbook.
PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE (Continued)

F. Investigate and recommend ways the NAIC can assist states in responding to disasters by continuing to build the NAIC’s Catastrophe Resource Center for state insurance regulators to better prepare for disasters.

G. Continue to monitor the growth of the private flood insurance market and assess the actions taken by individual states to facilitate growth. Update the Considerations for Private Flood Insurance appendix to include new ways states are growing the private flood insurance market.

H. Study, in coordination with other NAIC task forces and working groups, earthquake matters of concern to state insurance regulators. Consider various innovative earthquake insurance coverage options aimed at improving take-up rates.

4. The NAIC/Federal Emergency Management Agency (FEMA) (C) Working Group will:
   A. Assist state insurance regulators in engaging and collaborating with FEMA on an ongoing basis by establishing a process for the oversight, prioritization, and reporting of disaster-related regional workshops and other exercises to improve disaster preparation and resilience.

5. The Terrorism Insurance Implementation (C) Working Group will:
   A. Coordinate the NAIC’s efforts to address insurance coverage for acts of terrorism. Work with the U.S. Department of the Treasury’s (Treasury Department’s) Terrorism Risk Insurance Program (TRIP) Office on matters of mutual concern. Discuss long-term solutions to address the risk of loss from acts of terrorism.
   B. Review and report on data collection related to insurance coverage for acts of terrorism.

6. The Transparency and Readability of Consumer Information (C) Working Group will:
   A. Facilitate consumers’ capacity to understand the content of insurance policies and assess differences in insurers’ policy forms.
   B. Assist other groups with drafting language included within consumer-facing documents.
   C. Complete the drafting of regulatory best practices that serve to inform consumers of the reasons for significant premium increases related to P/C insurance products.
   D. Update and develop web page and mobile content for A Shopping Tool for Homeowners Insurance and A Shopping Tool for Automobile Insurance.
   E. Study and evaluate ways to engage department of insurance (DOI) communication to more diverse populations, such as rural communities.

NAIC Support Staff: Aaron Brandenburg/Jennifer Gardner
The mission of the Casualty Actuarial and Statistical (C) Task Force is to identify, investigate, and develop solutions to actuarial problems and statistical issues in the property/casualty (P/C) insurance industry. The Task Force’s goals are to assist state insurance regulators with maintaining the financial health of P/C insurers; ensure that P/C insurance rates are not excessive, inadequate, or unfairly discriminatory; and ensure that appropriate data regarding P/C insurance markets are available.

Ongoing Support of NAIC Programs, Products or Services

1. The Casualty Actuarial and Statistical (C) Task Force will:
   A. Provide reserving, pricing, ratemaking, statistical, and other actuarial support to NAIC committees, task forces, and/or working groups. Propose changes to the appropriate work products (with the most common work products noted below) and present comments on proposals submitted by others relating to casualty actuarial and statistical matters. Monitor the activities, including the development of financial services regulations and statistical (including disaster) reporting, regarding casualty actuarial issues.
      1. Property and Casualty Insurance (C) Committee – ratemaking, reserving, or data issues.
      2. Blanks (E) Working Group – P/C annual financial statement, including Schedule P; P/C quarterly financial statement; P/C quarterly and annual financial statement instructions, including Statement of Actuarial Opinion (SAO) and Actuarial Opinion Summary Supplement.
   B. Monitor national casualty actuarial developments and consider regulatory implications.
      1. Casualty Actuarial Society (CAS) – Statements of Principles and Syllabus of Basic Education.
      3. Society of Actuaries (SOA) – general insurance track’s basic education.
   C. Facilitate discussion among state insurance regulators regarding rate filing issues of common interest across the states through the scheduling of regulator-only conference calls.
   D. Conduct the following predictive analytics work:
      1. Facilitate training and the sharing of expertise through predictive analytics webinars (Book Club).
      2. Review the completed work on artificial intelligence (AI) from other committee groups. Coordinate with the Innovation, Cybersecurity, and Technology (H) Committee on the tracking of new uses of AI, auditing algorithms, product development, and other emerging regulatory issues in as far as these issues contain a Task Force component.
      3. With NAIC staff assistance, discuss guidance for the regulatory review of tree-based models and generalized additive models (GAM) used in rate filings.

2. The Actuarial Opinion (C) Working Group will:
   A. Propose revisions to the following, as needed, especially to improve actuarial opinions, actuarial opinion summaries, and actuarial reports, as well as the regulatory analysis of these actuarial documents and loss and premium reserves:
      3. Annual Statement Instructions—Property/Casualty.
      4. Regulatory guidance to appointed actuaries and companies.
      5. Other financial blanks and instructions, as needed.

3. The Statistical Data (C) Working Group will:
   A. Consider updates and changes to the Statistical Handbook of Data Available to Insurance Regulators.
   B. Consider updates and developments, provide technical assistance, and oversee the production of the following reports and databases. Periodically evaluate the demand and utility versus the costs of production of each product.
      1. Dwelling Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance.
      2. Auto Insurance Database.
C. Implement the expedited reporting and publication of average auto and average homeowners premium portions of the annual Auto Insurance Database and Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance.

NAIC Support Staff: Kris DeFrain/Jennifer Gardner/Libby Crews
SURPLUS LINES (C) TASK FORCE

The mission of the Surplus Lines (C) Task Force is to: 1) monitor the surplus lines market and regulation, including the activity and financial condition of U.S. and alien surplus lines insurers by providing a forum for discussion of issues; and 2) develop or amend relevant NAIC model laws, regulations, and/or guidelines.

Ongoing Support of NAIC Programs, Products or Services

1. The Surplus Lines (C) Task Force will:
   A. Provide a forum for discussion of current and emerging surplus lines-related issues and topics of public policy and determine appropriate regulatory response and action.
   B. Review and analyze quantitative and qualitative data on U.S. domestic and alien surplus lines industry results and trends.
   C. Monitor federal legislation related to the surplus lines market and ensure all interested parties remain apprised.
   D. Develop or amend relevant NAIC model laws, regulations, and/or guidelines.
   E. Oversee the activities of the Surplus Lines (C) Working Group.

2. The Surplus Lines (C) Working Group will:
   A. Operate in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and operate in open session when discussing surplus lines topics and policy issues, such as amendments to the International Insurers Department (IID) Plan of Operation.
   B. Maintain and draft new guidance within the IID Plan of Operation regarding standards for admittance and continued inclusion on the NAIC Quarterly Listing of Alien Insurers.
   C. Review and consider appropriate decisions regarding applications for admittance to the NAIC Quarterly Listing of Alien Insurers.
   D. Analyze renewal applications of alien surplus lines insurers on the NAIC Quarterly Listing of Alien Insurers and ensure solvency and compliance per the IID Plan of Operation guidelines for continued listing.
   E. Provide a forum for surplus lines-related discussion among jurisdictions.

NAIC Support Staff: Andy Daleo
TITLE INSURANCE (C) TASK FORCE

The mission of the Title Insurance (C) Task Force is to study issues related to title insurers and title insurance producers.

Ongoing Support of NAIC Programs, Products or Services

1. The Title Insurance (C) Task Force will:
   A. Discuss and/or monitor issues and developments affecting the title insurance industry, and provide support and expertise to other NAIC committees, task forces, and/or working groups, or outside entities, as appropriate.
   B. Review and assist various regulatory bodies in combating fraudulent and/or unfair real estate settlement activities. Such efforts could include working with the Antifraud (D) Task Force and other NAIC committees, task forces, and/or working groups to combat mortgage fraud and mitigating title agent defalcations through the promotion of closing protection letters (CPLs) and other remedies.
   C. Consult with the Consumer Financial Protection Bureau (CFPB) and other agencies responsible for information; education; and disclosure for mortgage lending, closing, and settlement services about the role of title insurance in the real estate transaction process.
   D. Evaluate CPLs to ensure compliance with state regulation and requirements, consumer protection offered and excluded, and potential alternatives for coverage.
   E. Review current rate regulation practices.

NAIC Support Staff: Anne Obersteadt
WORKERS’ COMPENSATION (C) TASK FORCE

The mission of the Workers’ Compensation (C) Task Force is to study the nature and effectiveness of state approaches to workers’ compensation and related issues, including, but not limited to: 1) assigned risk plans; 2) safety in the workplace; 3) treatment of investment income in rating; 4) occupational disease; 5) cost containment; and 6) the relevance of adopted NAIC model laws, regulations, and/or guidelines pertaining to workers’ compensation.

Ongoing Support of NAIC Programs, Products or Services

1. The Workers’ Compensation (C) Task Force will:
   A. Oversee the activities of the NAIC/International Association of Industrial Accident Boards and Commissions (IAIABC) Joint (C) Working Group.
   B. Discuss issues with respect to advisory organizations, rating organizations, statistical agents, and insurance companies in the workers’ compensation arena.
   C. Monitor the movement of business from the standard markets to the assigned risk pools. Alert state insurance department representatives if the growth of assigned risk pools changes dramatically.
   D. Follow workers’ compensation issues regarding cannabis in coordination with the Cannabis Insurance (C) Working Group.
   E. Discuss workers’ compensation issues related to COVID-19.

2. The NAIC/IAIABC Joint (C) Working Group will:
   A. Study issues of mutual concern to state insurance regulators and the IAIABC. Review relevant IAIABC model laws and white papers and consider possible charges in light of the Working Group’s recommendations.

NAIC Support Staff: Sara Robben/Aaron Brandenburg
The mission of the Market Regulation and Consumer Affairs (D) Committee is to monitor all aspects of the market regulatory process for continuous improvement. This includes market analysis, regulatory interventions with companies, and multi-jurisdictional collaboration. The Committee will also review and make recommendations regarding the underwriting and market practices of insurers and producers, as those practices affect insurance consumers, including the availability and affordability of insurance.

Ongoing Support of NAIC Programs, Products or Services

1. The Market Regulation and Consumer Affairs (D) Committee will:
   A. Monitor the centralized collection and storage of market conduct data, national analysis, and reporting at the NAIC, including issues regarding the public availability of data.
   B. Monitor and assess the current process for multi-jurisdictional market conduct activities and provide appropriate recommendations for enhancement, as necessary.
   C. Evaluate all data currently collected in the NAIC Market Information Systems (MIS) and considered confidential to determine what, if any, can be made more widely available.
   D. Oversee the activities of the Antifraud (D) Task Force.
   E. Oversee the activities of the Market Information Systems (D) Task Force.
   F. Oversee the activities of the Producer Licensing (D) Task Force.
   G. Monitor the underwriting and market practices of insurers and producers, as well as the conditions of insurance marketplaces, including urban markets, to identify specific market conduct issues of importance and concern. Hold public hearings on these issues at the NAIC national meetings, as appropriate.
   H. In collaboration with other technical working groups, discuss and share best practices through public forums to address broad consumer concerns regarding personal insurance products.
   I. Coordinate with the International Insurance Relations (G) Committee to develop input and submit comments to the International Association of Insurance Supervisors (IAIS) and/or other related groups on issues regarding market regulation concepts.
   J. Coordinate with the Health Insurance and Managed Care (B) Committee to provide policy recommendations regarding uniform state enforcement of the federal Affordable Care Act (ACA).
   K. Review the “Best Practices and Guidelines for Consumer Information Disclosures” (adopted October 2012) and update, as needed.

2. The Advisory Organization Examination Oversight (D) Working Group will:
   A. Revise the protocols, as necessary, for the examination of national or multistate advisory organizations (including rating organizations and statistical agents) to be more comprehensive, efficient, and possibly less frequent than the current system of single-state exams. Solicit input and collaboration from other interested and affected committees and task forces.
   B. Monitor the data reporting and data collection processes of advisory organizations (including rating organizations and statistical agents) to determine if they are implementing appropriate measures to ensure data quality. Report the results of this ongoing charge, as needed.
   C. Actively assist with and coordinate multistate examinations of advisory organizations (including rating organizations and statistical agents).

3. The Market Actions (D) Working Group will:
   A. Facilitate interstate communication and coordinate collaborative state regulatory actions.

4. The Market Analysis Procedures (D) Working Group will:
   A. Recommend changes to the market analysis framework based on results over the past five years, including the current set of Level 1 and Level 2 questions.
   B. Discuss other market data collection issues and make recommendations, as necessary.
   C. Consider recommendations for new lines of business for the Market Conduct Annual Statement (MCAS).

5. The Market Conduct Annual Statement Blanks (D) Working Group will:
   A. Review the MCAS data elements and the “Data Call and Definitions” for those lines of business that have been in effect for longer than three years and update them, as necessary.
   B. Develop an MCAS blank to be used for the collection of data for additional lines of business, where appropriate.
MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE (Continued)

6. The Market Conduct Examination Guidelines (D) Working Group will:
   A. Develop market conduct examination standards, as necessary, for inclusion in the Market Regulation Handbook.
   B. Monitor the adoption and revision of NAIC models and develop market conduct examination standards to correspond with adopted NAIC models.
   C. Develop updated standardized data requests, as necessary, for inclusion in the Market Regulation Handbook.
   D. Develop uniform market conduct procedural guidance (e.g., a library, depository or warehouse with market conduct examination templates, such as an exam call letter, exam exit agenda, etc.) for inclusion in, or for use in conjunction with, the Market Regulation Handbook.
   E. Coordinate with the Innovation, Cybersecurity and Technology (H) Committee to develop market conduct examiner guidance for the oversight of regulated entities’ use of insurance and non-insurance consumer data and models using algorithms and artificial intelligence (AI).
   F. Discuss the effectiveness of group supervision of market conduct risks and develop examination procedural guidance, as necessary.
   G. Discuss the role of market conduct examiners in reviewing insurers’ corporate governance as outlined in the NAIC’s Corporate Governance Annual Disclosure Model Act (#305) and Corporate Governance Annual Disclosure Model Regulation (#306).

7. The Market Regulation Certification (D) Working Group will:
   A. Develop a formal market regulation certification proposal for consideration by the NAIC membership that provides recommendations for the following: 1) certification standards; 2) a process for the state implementation of the standards; 3) a process to measure the states’ compliance with the standards; 4) a process for future revisions to the standards; and 5) assistance for jurisdictions to achieve certification.

8. The Privacy Protections (D) Working Group will:
   A. Review state insurance privacy protections regarding the collection, use and disclosure of information gathered in connection with insurance transactions and make recommended changes, as needed, to certain NAIC models, such as the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672). (Further direction from NAIC Executive (EX) Committee may result in this charge being moved to the new Innovation, Cybersecurity, and Technology (H) Committee.)

NAIC Support Staff: Tim Mullen/Randy Helder
ANTIFRAUD (D) TASK FORCE

The mission of the Antifraud (D) Task Force is to serve the public interest by assisting the state insurance supervisory officials, individually and collectively, through the detection, monitoring, and appropriate referral for the investigation of insurance crime, both by and against consumers. The Task Force will assist the insurance regulatory community by conducting the following activities: 1) maintaining and improving electronic databases regarding fraudulent insurance activities; 2) disseminating the results of research and analysis of insurance fraud trends, as well as case-specific analysis, to the insurance regulatory community; and 3) providing a liaison function between state insurance regulators, law enforcement (federal, state, local, and international), and other specific antifraud organizations. The Task Force will also serve as a liaison with the NAIC Information Technology Group (ITG) and other NAIC committees, task forces, and/or working groups to develop technological solutions for data collection and information sharing. The Task Force will monitor all aspects of antifraud activities by its working groups on the following charges.

Ongoing Support of NAIC Programs, Products or Services

1. The Antifraud (D) Task Force will:
   A. Work with NAIC committees, task forces, and working groups (e.g., Title Insurance (C) Task Force, etc.) to review issues and concerns related to fraud activities and schemes related to insurance fraud.
   B. Coordinate efforts to address national concerns related to agent fraud and activities of unauthorized agents related to insurance sales.
   C. Coordinate the enforcement and investigation efforts of state and federal securities regulators with state insurance fraud bureaus.
   D. Coordinate with state, federal, and international law enforcement agencies in addressing antifraud issues relating to the insurance industry.
   E. Review and provide comments to the International Association of Insurance Supervisors (IAIS) on its Insurance Core Principles (ICPs) related to insurance fraud.
   F. Coordinate activities and information from national antifraud organizations and provide information to state insurance fraud bureaus.
   G. Coordinate activities and information with state and federal fraud divisions to determine guidelines that will assist with reciprocal involvement concerning antifraud issues resulting from natural disasters and catastrophes.
   H. Coordinate efforts with the insurance industry to address antifraud issues and concerns.
   I. Evaluate and recommend methods to track national fraud trends.

2. The Antifraud Education Enhancement (D) Working Group will:
   A. Develop seminars, trainings, and webinars regarding insurance fraud. Provide three webinars by the 2022 Fall National Meeting.

3. The Antifraud Technology (D) Working Group will:
   A. Work with the NAIC to develop an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions. Complete by 2022 Fall National Meeting.
   B. Evaluate sources of antifraud data and propose methods for enhancing the utilization and exchange of information among state insurance regulators, fraud investigative divisions, law enforcement officials, insurers, and antifraud organizations. Complete by the 2022 Fall National Meeting.

4. The Improper Marketing of Health Insurance (D) Working Group will:
   A. Coordinate with state insurance regulators, both on a state and federal level, to provide assistance and guidance monitoring the improper marketing of health plans, and coordinate appropriate enforcement actions, as needed, with other NAIC committees, task forces, and working groups.
   B. Review existing NAIC models and guidelines that address the use of lead generators for sales of health insurance products, and identify models and guidelines that need to be updated or developed to address current marketplace activities.

NAIC Support Staff: Greg Welker/Lois E. Alexander
MARKET INFORMATION SYSTEMS (D) Task Force

The mission of the Market Information Systems (D) Task Force is to provide business expertise regarding the desired functionality of the NAIC Market Information Systems (MIS) and the prioritization of regulatory requests for the development and enhancements of the MIS.

Ongoing Support of NAIC Programs, Products or Services

1. The Market Information Systems (D) Task Force will:
   A. Ensure that the MIS support the strategic direction set forth by the Market Regulation and Consumer Affairs (D) Committee.
   B. Develop recommendations for the incorporation of artificial intelligence (AI) abilities in NAIC Market Information Systems for use in market analysis. Complete by the 2022 Summer National Meeting.
   C. Analyze the data in the MIS. If needed, recommend methods to ensure better data quality. Complete by the 2022 Fall National Meeting.
   D. Provide guidance on the appropriate use of the MIS and the data entered in them.
      2. Electronic Forums.
      4. Market Analysis Profile.
      5. Market Analysis Prioritization Tool (MAPT).
      9. 1033 State Decision Repository (SDR1033) (in conjunction with the Antifraud (D) Task Force).

2. The Market Information Systems Research and Development (D) Working Group will:
   A. Serve as the business partner to review and prioritize submitted Uniform System Enhancement Request (USER) forms to ensure an efficient use of available NAIC staffing and resources.
   B. Assist the Task Force with tasks as assigned, such as:
      1. Analyze MIS data.
      2. Provide state users with query access to MIS data.
      3. Provide guidance on the appropriate use of the MIS.

NAIC Support Staff: Randy Helder
PRODUCER LICENSING (D) TASK FORCE

The mission of the Producer Licensing (D) Task Force is to: 1) develop and implement uniform standards, interpretations, and treatment of producer and adjuster licensees and licensing terminology; 2) monitor and respond to developments related to licensing reciprocity; 3) coordinate with industry and consumer groups regarding priorities for licensing reforms; and 4) provide direction based on NAIC membership initiatives to the National Insurance Producer Registry (NIPR) Board of Directors regarding the development and implementation of uniform producer licensing initiatives, with a primary emphasis on encouraging the use of electronic technology.

Ongoing Support of NAIC Programs, Products or Services

1. The Producer Licensing (D) Task Force will:
   A. Work closely with NIPR to encourage the full utilization of NIPR products and services by all the states and producers, and encourage accurate and timely reporting of state administrative actions to the NAIC’s Regulatory Information Retrieval System (RIRS) to ensure that this data is properly reflected in the State Producer Licensing Database (SPLD) and the Producer Database (PDB).
   B. Facilitate roundtable discussions, as needed, with the state producer licensing directors for the exchange of views, opinions, and ideas on producer licensing activities in the states and at the NAIC.
   C. Discuss, as necessary, state perspectives regarding the regulation and benefit of the activities of the federal Affordable Care Act (ACA), established enrollment assisters (including navigators and non-navigator assisters and certified application counselors), and the activities of producers in assisting individuals and businesses purchasing in the health insurance marketplaces. Coordinate with the Health Insurance and Managed Care (B) Committee and the Antifraud (D) Task Force, as necessary.
   D. Monitor the activities of the National Association of Registered Agents and Brokers (NARAB) in the development and enforcement of the NARAB membership rules, including the criteria for successfully passing a background check.
   E. Coordinate through NAIC staff to provide guidance to NIPR on producer licensing-related electronic initiatives. Hear a report from NIPR at each national meeting.
   F. Coordinate with the Market Information Systems (D) Task Force and the Antifraud (D) Task Force to evaluate and make recommendations regarding the entry, retention, and use of data in the NAIC’s Market Information Systems (MIS).
   G. Monitor the state implementation of adjuster licensing reciprocity and uniformity; update, as necessary, NAIC adjuster licensing standards.
   H. Coordinate with the Special (EX) Committee on Race and Insurance on referrals affecting insurance producers.
   I. Discuss how criminal convictions may affect producer licensing applicants and review the NAIC’s Guidelines for State Insurance Regulators to the Violent Crime Control and Law Enforcement Act of 1994 to create a more simplified and consistent approach in how states review 1033 waiver requests.

2. The Producer Licensing Uniformity (D) Working Group will:
   A. Work closely with state producer licensing directors and exam vendors to ensure that: 1) the states achieve full compliance with the standards in order to achieve greater uniformity; and 2) the exams test the qualifications for an entry-level position as a producer.
   B. Provide oversight and ongoing updates, as needed, to the State Licensing Handbook.
   C. Monitor and assess the state implementation of the Uniform Licensing Standards (ULS) and update the standards, as needed.
   D. Review and update, as needed, the NAIC’s uniform producer licensing applications and uniform appointment form. Provide any recommended updates to the Producer Licensing (D) Task Force by the NAIC Summer National Meeting.

3. The Uniform Education (D) Working Group will:
   A. Update, as needed, the reciprocity guidelines, the uniform application forms for continuing education (CE) providers, and the process for state review and approval of instructors and courses. Provide any recommended updates to the Producer Licensing (D) Task Force by the 2022 Fall National Meeting.
   B. Coordinate with NAIC parent committees, task forces, and/or working groups to review and provide recommendations, as necessary, on prelicensing education and CE requirements that are included in NAIC model acts, regulations, and/or standards.

NAIC Support Staff: Tim Mullen/Greg Welker
FINANCIAL CONDITION (E) COMMITTEE

The mission of the Financial Condition (E) Committee is to be the central forum and coordinator of solvency-related considerations of the NAIC relating to accounting practices and procedures; blanks; valuation of securities; financial analysis and solvency; multistate examinations and examiner and analysis training; and issues concerning insurer insolvencies and insolvency guarantees. In addition, the Committee interacts with the technical task forces.

Ongoing Support of NAIC Programs, Products or Services

1. The Financial Condition (E) Committee will:
   B. Appoint and oversee the activities of the following: Accounting Practices and Procedures (E) Task Force; Capital Adequacy (E) Task Force; Examination Oversight (E) Task Force; Receivership and Insolvency (E) Task Force; Reinsurance (E) Task Force; Risk Retention Group (E) Task Force; and Valuation of Securities (E) Task Force.
   C. Oversee a process to address financial issues that may compromise the consistency and uniformity of the U.S. solvency framework, referring valuation and other issues to the appropriate committees as needed.
   D. Use the Risk-Focused Surveillance (E) Working Group to address specific industry concerns regarding regulatory redundancy, and review any issues industry subsequently escalates to the Committee.

2. The Financial Analysis (E) Working Group will:
   A. Analyze nationally significant insurers and groups that exhibit characteristics of trending toward or being financially troubled; determine if appropriate action is being taken.
   B. Interact with domiciliary regulators and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods, and action(s).
   C. Support, encourage, promote, and coordinate multistate efforts in addressing solvency problems, including identifying adverse industry trends.
   D. Increase information-sharing and coordination between state insurance regulators and federal authorities, including through representation of state insurance regulators in national bodies with responsibilities for system-wide oversight.

3. The Group Capital Calculation (E) Working Group will:
   A. Continually review and monitor the effectiveness of the group capital calculation (GCC), and consider revisions, as necessary, to maintain the effectiveness of its objective under the U.S. solvency system.
   B. Liaise, as necessary, with the International Insurance Relations (G) Committee on international group capital developments, and consider input from participation of U.S. state insurance regulators in the International Association of Insurance Supervisors (IAIS) monitoring process.

4. The Group Solvency Issues (E) Working Group will:
   A. Continue to develop potential enhancements to the current regulatory solvency system as it relates to group solvency-related issues.
   B. Critically review and provide input and drafting to the IAIS Insurance Groups Working Group on other IAIS material dealing with group supervision issues.
   C. Continually review and monitor the effectiveness of the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450), and consider revisions, as necessary, to maintain effective oversight of insurance groups.
   D. Assess the IAIS Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame), and make recommendations on its implementation in a manner appropriate for the U.S.

5. The Own Risk and Solvency Assessment (ORSA) Implementation (E) Subgroup of the Group Solvency Issues (E) Working Group will:
   A. Continue to provide and enhance an enterprise risk management (ERM) education program for state insurance regulators in support of the ORSA implementation.
   B. Continually review and monitor the effectiveness of the Risk Management and Own Risk and Solvency Assessment Model Act (#505) and its corresponding NAIC Own Risk and Solvency Assessment (ORSA) Guidance Manual; consider revisions as necessary.
6. The **Mortgage Guaranty Insurance (E) Working Group** will:
   A. Develop changes to the **Mortgage Guaranty Insurance Model Act (#630)** and other areas of the solvency regulation of mortgage guaranty insurers, including, but not limited to, revisions to **Statement of Statutory Accounting Principles (SSAP) No. 58—Mortgage Guaranty Insurance**, and develop an extensive mortgage guaranty supplemental filing. Finalize Model #630 by the 2022 Spring National Meeting.

7. The **Mutual Recognition of Jurisdictions (E) Working Group** will:
   A. Oversee the process for evaluating jurisdictions and maintain a listing of jurisdictions that meets the NAIC requirements for recognizing and accepting the NAIC GCC.
   B. Maintain the **NAIC List of Qualified Jurisdictions** and the **NAIC List of Reciprocal Jurisdictions** in accordance with the **Process for Evaluating Qualified and Reciprocal Jurisdictions**.

8. The **NAIC/American Institute of Certified Public Accountants (AICPA) (E) Working Group** will:
   A. Continually review the **Annual Financial Reporting Model Regulation (#205)** and its corresponding implementation guide; revise as appropriate.
   B. Address financial solvency issues by working with the AICPA and responding to AICPA exposure drafts.
   C. Monitor the federal Sarbanes-Oxley (SOX) Act of 2002, as well as rules and regulations promulgated by the U.S. Securities and Exchange Commission (SEC), the Public Company Accounting Oversight Board (PCAOB), and other financial services regulatory entities.
   D. Review annually the premium threshold amount included in Section 16 of Model #205, with the general intent that those insurers subject to the Section 16 requirements would capture at least approximately 90% of industry premium and/or in response to any future regulatory or market developments.

9. The **National Treatment and Coordination (E) Working Group** will:
   A. Increase utilization and implementation of the **Company Licensing Best Practices Handbook**.
   B. Encourage synergies between corporate changes/amendments and rate and form filing review and approval to improve efficiency.
   C. Continue to monitor the usage and make necessary enhancements to the **Form A Database**.
   D. Maintain educational courses in the existing NAIC Insurance Regulator Professional Designation Program for company licensing regulators.
   E. Make necessary enhancements to promote electronic submission of all company licensing applications.

10. The **Restructuring Mechanisms (E) Working Group** will:
    A. Evaluate and prepare a white paper that:
        1. Addresses the perceived need for restructuring statutes and the issues those statutes are designed to remedy. Also, consider alternatives that insurers are currently employing to achieve similar results.
        2. Summarizes the existing state restructuring statutes.
        3. Addresses the legal issues posed by an order of a court (or approval by an insurance department) in one state affecting the policyholders of other states.
        4. Considers the impact that a restructuring might have on guaranty associations and policyholders that had guaranty fund protection prior to the restructuring.
        5. Identifies and addresses the legal issues associated with restructuring using a protected cell.
    B. Consider requesting approval from the Executive (EX) Committee on developing changes to specific NAIC models as a result of findings from the development of the white paper.

11. The **Long-Term Care Insurance Restructuring (E) Subgroup** of the Restructuring Mechanisms (E) Working Group will:
    A. Identify and assess potential legal and regulatory issues arising from a corporate transaction that would seek to legally separate certain long-term care (LTC) policies from the general account of the issuing insurer. Report on the Subgroup’s consideration of the issue, including a recommendation as to merits of an existing regulatory framework (e.g., Insurance Business Transfers state statutes) or a new regulatory framework, as contemplated by Workstream #2 of the Long-Term Care Insurance (EX) Task Force.
12. The Restructuring Mechanisms (E) Subgroup of the Restructuring Mechanisms (E) Working Group will:

A. Develop best practices to be used in considering the approval of proposed restructuring transactions, including, among other things, the expected level of reserves and capital expected after the transfer, along with the adequacy of long-term liquidity needs. Also, develop best practices to be used in monitoring the companies after the transaction is completed. Once completed, recommend to the Financial Regulation Standards and Accreditation (F) Committee for its consideration.

B. Consider the need to make changes to the RBC formula to better assess the minimum surplus requirements for companies in runoff.

C. Review the various restructuring mechanisms and develop, if deemed needed, accounting and reporting requirements for referring to the Statutory Accounting Principles (E) Working Group.

13. The Risk-Focused Surveillance (E) Working Group will:

A. Continually review the effectiveness of risk-focused surveillance, and develop enhancements to processes as necessary.

B. Continually review regulatory redundancy issues identified by interested parties, and provide recommendations to other NAIC committee groups to address as needed.

C. Oversee and monitor the Peer Review Program to encourage consistent and effective risk-focused surveillance processes.

D. Continually maintain and update standardized job descriptions/requirements and salary range recommendations for common solvency monitoring positions to assist insurance departments in attracting and maintaining suitable staff.

14. The Valuation Analysis (E) Working Group will:

A. Respond to states in a confidential forum regarding questions and issues arising during the course of annual principle-based reserving (PBR) reviews or PBR examination, which also may include consideration of asset adequacy analysis questions and issues.

B. Work with NAIC resources to assist in prioritizing and responding to issues and questions regarding PBR and asset adequacy analysis, including actuarial guidelines or other requirements making use of or relating to PBR, such as Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation (AG 38), Actuarial Guideline XLVIII—Actuarial Opinion and Memorandum Requirements for the Reinsurance of Policies Required to be Valued Under Sections 6 and 7 of the NAIC Valuation of Life Insurance Policies Model Regulation (AG 48), and the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).

C. Develop and implement a plan with NAIC resources to identify outliers/concerns regarding PBR/asset adequacy analysis.

D. Refer questions/issues, as appropriate, to the Life Actuarial (A) Task Force that may require consideration of changes/interpretations to be provided in the Valuation Manual.

E. Assist NAIC resources in the development of a standard asset/liability model portfolio used to calibrate company PBR models.

F. Make referrals, as appropriate, to the Financial Analysis (E) Working Group.

G. Perform other work to carry out the Valuation Analysis (E) Working Group procedures.

NAIC Support Staff: Dan Daveline/Julie Gann/Bruce Jenson
ACCOUNTING PRACTICES AND PROCEDURES (E) TASK FORCE

The mission of the Accounting Practices and Procedures (E) Task Force is to identify, investigate and develop solutions to accounting problems with the ultimate goal of guiding insurers in properly accounting for various aspects of their operations; modify the Accounting Practices and Procedures Manual (AP&P Manual) to reflect changes necessitated by Task Force action; and study innovative insurer accounting practices that affect the ability of state insurance regulators to determine the true financial condition of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Accounting Practices and Procedures (E) Task Force will:

2. The Blanks (E) Working Group will:
   A. Consider improvements and revisions to the various annual/quarterly statement blanks to:
   1. Conform these blanks to changes made in other areas of the NAIC to promote uniformity in reporting of financial information by insurers.
   2. Develop reporting formats for other entities subject to the jurisdiction of state insurance departments.
   3. Conform the various NAIC blanks and instructions to adopted NAIC policy.
   4. Oversee the development of additional reporting formats within the existing annual financial statements as needs are identified.
   B. Continue to monitor state filing checklists to maintain current filing requirements.
   C. Continue to monitor and improve the quality of financial data filed by insurance companies by recommending improved or additional language for the Annual Statement Instructions.
   D. Continue to monitor and review all proposals necessary for the implementation of statutory accounting guidance to ensure proper implementation of any action taken by the Accounting Practices and Procedures (E) Task Force affecting annual financial statements and/or instructions.
   E. Continue to coordinate with other task forces of the NAIC to ensure proper implementation of reporting and instructions changes as proposed by these taskforces.
   F. Coordinate with the Life Actuarial (A) Task Force to use any special reports developed and avoid duplication of reporting.
   G. Review requests for investment schedule blanks and instructions changes in connection with the work being performed by the Capital Adequacy (E) Task Force and its working groups.
   H. Review changes requested by the Valuation of Securities (E) Task Force relating to its work on other invested assets reporting for technical consistency within the investment reporting schedules and instructions.

3. The Statutory Accounting Principles (E) Working Group will:
   A. Maintain codified statutory accounting principles by providing periodic updates to the guidance that address new statutory issues and new generally accepted accounting principles (GAAP) pronouncements. Provide authoritative responses to questions of application and clarifications for existing statutory accounting principles. Report all actions and provide updates to the Accounting Practices and Procedures (E) Task Force.
   B. At the discretion of the Working Group chair, develop comments on exposed GAAP and International Financial Reporting Standards (IFRS) pronouncements affecting financial accounting and reporting. Any comments are subject to review and approval by the chairs of the Accounting Practices and Procedures (E) Task Force and the Financial Condition (E) Committee.
   C. Coordinate with the Life Actuarial (A) Task Force on changes to the AP&P Manual related to the Valuation Manual VM-A, Requirements, and VM-C, Actuarial Guidelines, as well as other Valuation Manual requirements. This process will include the receipt of periodic reports on changes to the Valuation Manual on items that require coordination.
   D. Obtain, analyze and review information on permitted practices, prescribed practices or other accounting treatments suggesting that issues or trends occurring within the industry may compromise the consistency and uniformity of statutory accounting, including, but not limited to, activities conducted by insurers for which there is currently no statutory accounting guidance or where the states have prescribed statutory accounting that differs from the guidance issued by the NAIC. Use this information to consider possible changes to statutory accounting.

NAIC Support Staff: Robin Marcotte
The mission of the Capital Adequacy (E) Task Force is to evaluate and recommend appropriate refinements to capital requirements for all types of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Capital Adequacy (E) Task Force will:
   A. Evaluate emerging “risk” issues for referral to the risk-based capital (RBC) working groups/subgroups for certain issues involving more than one RBC formula. Monitor emerging and existing risks relative to their consistent or divergent treatment in the three RBC formulas.
   B. Review and evaluate company submissions for the schedule and corresponding adjustment to total adjusted capital (TAC).
   C. Evaluate relevant historical data and apply defined statistical safety levels over appropriate time horizons in developing recommendations for revisions to the current asset risk structure and factors in each of the RBC formulas.

2. The Health Risk-Based Capital (E) Working Group, Life Risk-Based Capital (E) Working Group, and Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Evaluate refinements to the existing NAIC RBC formulas implemented in the prior year. Forward the final version of the structure of the current year life and fraternal, property/casualty (P/C), and health RBC formulas to the Financial Condition (E) Committee by June.
   B. Consider improvements and revisions to the various RBC blanks to: 1) conform the RBC blanks to changes made in other areas of the NAIC to promote uniformity; and 2) oversee the development of additional reporting formats within the existing RBC blanks as needs are identified. Any proposal that affects the RBC structure must be adopted no later than April 30 in the year of the change, and adopted changes will be forwarded to the Financial Condition (E) Committee by the next scheduled meeting or conference call. Any adoptions made to the annual financial statement blanks or statutory accounting principles that affect an RBC change adopted by April 30 and results in an amended change may be considered by July 30 for those exceptions where the Capital Adequacy (E) Task Force votes to pursue by super-majority (two-thirds) consent of members present no later than June 30 for the current reporting year.
   C. Monitor changes in accounting and reporting requirements resulting from the adoption and continuing maintenance of the revised Accounting Practices and Procedures Manual (AP&P Manual) to ensure that model laws, publications, formulas, analysis tools, etc., supported by the Task Force continue to meet regulatory objectives.
   D. Review the effectiveness of the NAIC’s RBC policies and procedures as they affect the accuracy, audit ability, timeliness of reporting access to RBC results and comparability between the RBC formulas. Report on data quality problems in the prior year RBC filings at the summer and fall national meetings.

3. The Longevity Risk (E/A) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force, will:
   A. Provide recommendations for the appropriate treatment of longevity risk transfers by the new longevity factors.

4. The Variable Annuities Capital and Reserve (E/A) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force, will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and RBC calculation, and determine if additional revisions need to be made.
   B. Develop and recommend appropriate changes including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

5. The Catastrophe Risk (E) Subgroup of the Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Recalculate the premium risk factors on an ex-catastrophe basis, if needed.
   B. Continue to update the U.S. and non-U.S. catastrophe event list.
   C. Continue to evaluate the need for exemption criteria for insurers with minimal risk.
   D. Evaluate the RBC results inclusive of a catastrophe risk charge.
   E. Refine instructions for the catastrophe risk charge.
   F. Continue to evaluate any necessary refinements to the catastrophe risk formula.
   G. Evaluate other catastrophe risks for possible inclusion in the charge.
6. The Risk-Based Capital (RBC) Investment Risk and Evaluation (E) Working Group will:
   A. Perform a comprehensive review of the RBC investment framework for all business types, which could include:
      1. Identifying and acknowledging uses that extend beyond the purpose of the Risk-Based Capital (RBC) for Insurers Model Act (#312).
      2. Assessing the impact and effectiveness of potential changes in contributing to the identification of weakly capitalized companies; i.e., those companies at action level.
      3. Documenting the modifications made over time to the formulas, including, but not limited to, an analysis of the costs in study and development, implementation (internal and external), assimilation, verification, analysis, and review of the desired change to the RBC formulas and facilitating the appropriate allocation of resources.

NAIC Support Staff: Jane Barr
EXAMINATION OVERSIGHT (E) TASK FORCE

The mission of the Examination Oversight (E) Task Force is to monitor, develop and implement tools for the risk-focused surveillance process. For financial examinations and analysis, this includes maintenance of the Financial Condition Examiners Handbook and the Financial Analysis Handbook to provide guidance to examiners and analysts using a risk-focused approach to solvency regulation and to encourage effective communication and coordination between examiners, analysts and other regulators. In addition, the mission of the Task Force is to: monitor and refine regulatory tools of the risk-focused surveillance process, including Financial Analysis Solvency Tools (FAST) such as company profiles and the FAST ratio scoring system; oversee financial examiner and analyst use of electronic software tools; monitor the progress of coordination efforts among the states in conducting examinations and the sharing of information necessary to solvency monitoring; establish procedures for the flow of information between the states about troubled companies; maintain an effective approach to the review of information technology (IT) general controls; and monitor the timeliness of financial examinations.

Ongoing Support of NAIC Programs, Products or Services

1. The Examination Oversight (E) Task Force will:
   A. Accomplish its mission using the following groups:
      5. Information Technology (IT) Examination (E) Working Group.

2. The Electronic Workpaper (E) Working Group will:
   A. Monitor and support the state insurance departments in using electronic workpaper software tools to conduct and document solvency monitoring activities.
   B. Provide ongoing oversight to the transition of electronic workpaper work to the TeamMate+ application.
   C. Monitor state insurance regulator use of TeamMate+ to proactively identify best practices and improvements to the application, as necessary.

3. The Financial Analysis Solvency Tools (E) Working Group will:
   A. Provide ongoing maintenance and enhancements to the Financial Analysis Handbook and related applications for changes to the NAIC annual/quarterly financial statement blanks, as well as enhancements developed to assist in the risk-focused analysis and monitoring of the financial condition of insurance companies and groups. Monitor the coordination of analysis activities of holding company groups, and coordinate and analyze input received from other state regulators.
   B. Provide ongoing development maintenance and enhancements to the automated financial solvency tools developed to assist in conducting risk-focused analysis and monitoring the financial condition of insurance companies and groups. Prioritize and perform analysis to ensure that the tools remain reliable and accurate.
   C. Coordinate with the Financial Examiners Handbook (E) Technical Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. Adjust the Financial Analysis Handbook and current financial analysis solvency tools for life insurance companies based on any recommendations as requested from the Life Actuarial (A) Task Force to incorporate principle-based reserving (PBR) changes.

4. The Financial Examiners Coordination (E) Working Group will:
   A. Develop enhancements that encourage the coordination of examination activities regarding holding company groups.
   B. Promote coordination by assisting and advising domiciliary regulators and exam coordinating states as to what might be the most appropriate regulatory strategies, methods and actions regarding financial examinations of holding company groups.
   C. Facilitate communication among regulators regarding common practices and issues arising from coordinating examination efforts.
   D. Provide ongoing maintenance and enhancements to the Financial Examination Electronic Tracking System (FEETS).
EXAMINATION OVERSIGHT (E) TASK FORCE (Continued)

5. The Financial Examiners Handbook (E) Technical Group will:
   A. Continually review the Financial Condition Examiners Handbook and revise, as appropriate.
   B. Coordinate with the Risk-Focused Surveillance (E) Working Group to monitor the implementation of the risk-assessment process by developing additional guidance and exhibits within the Financial Condition Examiners Handbook, including consideration of potential redundancies affected by the examination process, corporate governance and other guidance as needed to assist examiners in completing financial condition examinations.
   C. Coordinate with the Financial Analysis Solvency Tools (E) Working Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. Coordinate with the IT Examination (E) Working Group and the Financial Examiners Coordination (E) Working Group to maintain specialized areas of guidance within the Financial Condition Examiners Handbook related to the charges of these specific working groups.
   E. Adjust the Financial Condition Examiners Handbook based upon any recommendations as requested from the Life Actuarial (A) Task Force to incorporate PBR changes.

6. The Information Technology (IT) Examination (E) Working Group will:
   A. Continually review and revise, as needed, the “General Information Technology Review” and “Exhibit C—Evaluation of Controls in Information Systems” sections of the Financial Condition Examiners Handbook.
   B. Monitor cybersecurity trends, including emerging and/or ongoing vulnerabilities, and develop guidance within the Financial Condition Examiners Handbook or other tools, if deemed necessary, to support IT examiners.

NAIC Support Staff: Bailey Henning
FINANCIAL STABILITY (E) TASK FORCE

The mission of the Financial Stability (E) Task Force is to consider issues concerning domestic or global financial stability as they pertain to the role of state insurance regulators.

Ongoing Support of NAIC Program, Products or Services

1. The Financial Stability (E) Task Force will:
   A. Consider issues concerning domestic and global financial stability as they pertain to the role of state insurance regulators and make recommendations to the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council and/or the Executive (EX) Committee, as appropriate.
      1. Analyze existing post-financial crisis regulatory reforms for their application in identifying macroeconomic trends, including identifying possible areas of improvement or gaps, and propose to the Financial Condition (E) Committee or other relevant committee enhancements and/or additions to further improve the ability of state insurance regulators and the industry to address macroprudential impacts; consult with such committees on implementation, as needed.
   B. Consider state insurance regulators’ input to national and international discussions on macroeconomic vulnerabilities affecting the insurance sector.
      1. Monitor international macroprudential activities at forums like the International Association of Insurance Supervisors (IAIS).
      2. Implement the Macroprudential Initiative (MPI) domestically, which includes enhancements to the U.S. regulatory toolkit as part of the State Ahead initiative.
   C. Serve as a forum to coordinate state insurance regulators’ perspectives on a wide variety of issues arising from the designation of a U.S. insurance group as “systemically important” and “internationally active” both pre- and post-designation, including:
      1. Where appropriate, develop policy recommendations and/or guidance regarding the role, responsibilities and activities of state insurance regulators in the context of consolidated supervision resulting from designation.
      2. Analyze proposed rules by the federal agencies that relate to financial stability.
      3. Analyze proposed policy measures regarding supervisory standards for global systemically important insurers (G-SIIs) and internationally active insurance groups (IAIGs).
      4. Develop comment letters on such analysis for further consideration by the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.

2. The Macroprudential (E) Working Group will:
   A. Oversee the implementation and maintenance of the liquidity stress testing framework for 2020 data as well as future iterations.
   B. Assist with the remaining MPI projects related to counterparty disclosures and capital stress testing as needed.
   C. Continue to develop and administer data collection tools as needed, leveraging existing data where feasible, to provide the Financial Stability (E) Task Force with meaningful macroprudential information regarding how the insurance sector is navigating the prevailing market conditions.
   D. Oversee the development, implementation, and maintenance process for a new Macroprudential Risk Assessment system (i.e., policies, procedures, and tools) to enhance regulators’ ability to monitor industry trends from a macroprudential perspective.
   E. Oversee the documentation of the NAIC’s macroprudential policies, procedures, and tools.
   F. Provide the Task Force with proposed responses to IAIS and other international initiatives as needed.

NAIC Support Staff: Todd Sells/Tim Nauheimer
RECEIVERSHIP AND INSOLVENCY (E) TASK FORCE

The mission of the Receivership and Insolvency (E) Task Force is to be administrative and substantive as it relates to issues concerning insurer insolvencies and insolvency guarantees. Such duties include, without limitation: 1) monitoring the effectiveness and performance of state administration of receiverships and the state guaranty fund system; 2) coordinating cooperation and communication among regulators, receivers and guaranty funds; 3) monitoring ongoing receiverships and reporting on such receiverships to NAIC members; 4) developing and providing educational and training programs in the area of insurer insolvencies and insolvency guarantees to regulators, professionals and consumers; 5) developing and monitoring relevant model laws, guidelines and products; and 6) providing resources for regulators and professionals to promote efficient operations of receiverships and guaranty funds.

Ongoing Support of NAIC Programs, Products or Services

1. The Receivership and Insolvency (E) Task Force will:
   A. Monitor and promote efficient operations of insurance receiverships and guaranty associations.
   B. Monitor and promote state adoption of insurance receivership and guaranty association model acts and regulations, and monitor other legislation related to insurance receiverships and guaranty associations.
   C. Provide input and comments to the International Association of Insurance Supervisors (IAIS), the Financial Stability Board (FSB) or other related groups on issues regarding international resolution authority.
   D. Monitor, review and provide input on federal rulemaking and studies related to insurance receiverships.
   F. Monitor the work of other NAIC committees, task forces and working groups to identify and address any issues that affect receivership law and/or regulatory guidance.
   G. Perform additional work as directed by the Financial Condition (E) Committee and/or received through referral by other groups.

2. The Receiver’s Handbook (E) Subgroup of the Receivership and Insolvency (E) Task Force will:
   A. Review the Receiver’s Handbook to identify areas where information is outdated, updates are required, or additional guidance is needed. Based on this review, draft and propose recommended edits to the Receiver’s Handbook. Complete by the 2022 Fall National Meeting.

3. The Receivership Financial Analysis (E) Working Group will:
   A. Monitor receiverships involving nationally significant insurers/groups to support, encourage, promote and coordinate multistate efforts in addressing problems.
   B. Interact with the Financial Analysis (E) Working Group, domiciliary regulators, and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods and/or action(s) regarding potential or pending receiverships.

4. The Receivership Law (E) Working Group will:
   A. Review and provide recommendations on any issues identified that may affect states’ receivership and guaranty association laws (e.g., any issues that arise as a result of market conditions; insurer insolvencies; federal rulemaking and studies; international resolution initiatives; or as a result of the work performed by or referred from other NAIC committees, task forces and/or working groups).
   B. Discuss significant cases that may impact the administration of receiverships.

NAIC Support Staff: Jane Koenigsman
The mission of the Reinsurance (E) Task Force is to monitor and coordinate activities and areas of interest that overlap to some extent the charges of other NAIC groups—specifically, the International Insurance Relations (G) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Reinsurance (E) Task Force will:
   A. Provide a forum for the consideration of reinsurance-related issues of public policy.
   C. Monitor the implementation of the 2011, 2016 and 2019 revisions to the Credit for Reinsurance Model Law (#785); and the 2011 and 2019 revisions to the Credit for Reinsurance Model Regulation (#786) and the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).
   D. Communicate and coordinate with the Federal Insurance Office (FIO), other federal authorities, and international regulators and authorities on matters pertaining to reinsurance.
   E. Consider any other issues related to the revised Model #785, Model #786 and Model #787.
   F. Monitor the development of international principles, standards and guidance with respect to reinsurance. This includes, but is not limited to, monitoring the activities of various groups within the International Association of Insurance Supervisors (IAIS), including the Reinsurance and Other Forms of Risk Transfer Subcommittee, the Reinsurance Mutual Recognition Subgroup and the Reinsurance Transparency Group.
   G. Consider the impact of reinsurance-related federal legislation, including, but not limited to, the federal Nonadmitted and Reinsurance Reform Act (NRRA) and the Federal Insurance Office Act, and coordinate any appropriate NAIC action.
   H. Continue to monitor the impact of reinsurance-related international agreements, including the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (UK Covered Agreement).

2. The Reinsurance Financial Analysis (E) Working Group will:
   A. Operate in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and operate in open session when discussing certified reinsurance topics and policy issues, such as amendments to the Uniform Application for Certified Reinsurers.
   B. Provide advisory support and assistance to states in the review of reinsurance collateral reduction applications. Such a process with respect to the review of applications for reinsurance collateral reduction and qualified jurisdictions should strengthen state regulation and prevent regulatory arbitrage.
   C. Provide a forum for discussion among NAIC jurisdictions of reinsurance issues related to specific companies, entities, or individuals.
   D. Support, encourage, promote, and coordinate multistate efforts in addressing issues related to certified reinsurers, including, but not limited to, multistate recognition of certified reinsurers.
   E. Provide analytical expertise and support to the states with respect to certified reinsurers and applicants for certification.
   F. Provide advisory support with respect to issues related to the determination of qualified jurisdictions.
   G. Ensure the public passporting website remains current.
   H. For reinsurers domiciled in Reciprocal Jurisdictions, determine the best and most effective approaches for the financial solvency surveillance to assist the states in their work to protect the interests of policyholders.

NAIC Support Staff: Jake Stultz/Dan Schelp
RISK RETENTION GROUP (E) TASK FORCE

The mission of the Risk Retention Group (E) Task Force is to stay apprised of the work of other NAIC groups as it relates to financial solvency regulation and the NAIC Financial Regulation Standards and Accreditation Program. The Task Force may make referrals to the Financial Regulation Standards and Accreditation (F) Committee and/or other NAIC groups, as deemed appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Risk Retention Group (E) Task Force will:
   A. Monitor and evaluate the work of other NAIC committees, task forces and working groups related to risk retention groups (RRGs). Specifically, if any of these actions affect the NAIC Financial Regulation and Accreditation Standards Program, assess whether and/or how the changes should apply to RRGs and their affiliates.
   B. Monitor and analyze federal actions, including any U.S. Government Accountability Office (GAO) reports. Consider any action necessary as a result of federal activity.
   C. Monitor the impacts of recent tools and resources made available to domiciliary and non-domiciliary state insurance regulators pertaining to RRGs. Consider whether additional action is necessary, including educational opportunities, updating resources and further clarifications.

NAIC Support Staff: Becky Meyer/Sara Franson
VALUATION OF SECURITIES (E) TASK FORCE

The mission of the Valuation of Securities (E) Task Force is to provide regulatory leadership and expertise to establish and maintain all aspects of the NAIC’s credit assessment process for insurer-owned securities, as well as produce insightful and actionable research and analysis regarding insurer investments.

Ongoing Support of NAIC Programs, Products or Services

1. The Valuation of Securities (E) Task Force will:
   A. Review and monitor the operations of the NAIC Securities Valuation Office (SVO) and the NAIC Structured Securities Group (SSG) to ensure they continue to reflect regulatory objectives.
   B. Maintain and revise the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) to provide solutions to investment-related regulatory issues for existing or anticipated investments.
   C. Monitor changes in accounting and reporting requirements resulting from the continuing maintenance of the Accounting Practices and Procedures Manual, as well as financial statement blanks and instructions, to ensure that the P&P Manual continues to reflect regulatory needs and objectives.
   D. Consider whether improvements should be suggested to the measurement, reporting and evaluation of invested assets by the NAIC as the result of: 1) newly identified types of invested assets; 2) newly identified investment risks within existing invested asset types; or 3) elevated concerns regarding previously identified investment risks.
   E. Identify potential improvements to the credit filing process, including formats and electronic system enhancements.
   F. Provide effective direction to the NAIC’s mortgage-backed securities modeling firms and consultants.
   G. Coordinate with other NAIC working groups and task forces—including, but not limited to, the Capital Adequacy (E) Task Force, the Statutory Accounting Principles (E) Working Group and the Blanks (E) Working Group—to formulate recommendations and to make referrals to such other NAIC regulator groups to ensure expertise relative to investments, or the purpose and objective of guidance in the P&P Manual, is reflective in the guidance of such other groups and that the expertise of such other NAIC regulatory groups and the objectives of their guidance is reflected in the P&P Manual.
   H. Identify potential improvements to the filing exempt process (the use of credit rating provider ratings to determine an NAIC designation) to ensure greater consistency, uniformity and appropriateness to achieve the NAIC’s financial solvency objectives.
   I. Implement policies to oversee the NAIC’s staff administration of rating agency ratings used in NAIC processes, including staff’s discretion over the applicability of their use in its administration of filing exemption.

NAIC Support Staff: Charles Therriault
FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE

The mission of the Financial Regulation Standards and Accreditation (F) Committee is both administrative and substantive, as it relates to the administration and enforcement of the NAIC Financial Regulation Standards and Accreditation Program. This includes, without limitation: 1) the consideration of standards and revisions of standards for accreditation; 2) the interpretation of standards; 3) the evaluation and interpretation of the states’ laws and regulations, as well as departments’ practices, procedures and organizations as they relate to compliance with standards; 4) the examination of members for compliance with standards; 5) the development and oversight of procedures for the examination of members for compliance with standards; 6) the selection of qualified individuals to examine members for compliance with standards; and 7) the determination of whether to accredit members.

Ongoing Support of NAIC Programs, Products and Services

1. The Financial Regulation Standards and Accreditation (F) Committee will:
   A. Maintain and strengthen the NAIC Financial Regulation Standards and Accreditation Program.
   B. Assist the states, as requested and as appropriate, in implementing laws, practices, and procedures and obtaining personnel required for compliance with the standards.
   C. Conduct a yearly review of accredited jurisdictions.
   D. Consider new model laws; new practices and procedures; and amendments to existing model laws, practices, and procedures required for accreditation. Determine the timing and appropriateness of the addition of new model laws, practices, procedures, and amendments.
   E. Render advisory opinions and interpretations of model laws required for accreditation and on substantial similarity of state laws.
   F. Review existing standards for effectiveness and relevancy, and make recommendations for change, if appropriate.
   G. Produce, maintain, and update the NAIC Accreditation Program Manual to provide guidance to state insurance regulators regarding the official standards, policies, and procedures of the program.
   H. Maintain and update the “Financial Regulation Standards and Accreditation Program” pamphlet.
   I. Perform enhanced pre-accreditation review services, including, but not limited to, additional staff support, increased participation, enhanced report recommendations, and informal feedback.

NAIC Support Staff: Becky Meyer/Sara Franson
INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE

The mission of the International Insurance Relations (G) Committee is to: 1) coordinate NAIC participation in international discussions on and the development of insurance regulatory and supervisory standards; 2) promote international cooperation; 3) coordinate on international insurance matters with the U.S. federal government, including the U.S. Department of the Treasury (Treasury Department), the Federal Reserve Board, the Office of the U.S. Trade Representative (USTR), the U.S. Department of Commerce, and other federal agencies; and 4) provide an open forum for NAIC communication with U.S. interested parties and stakeholders on international insurance matters.

Ongoing Support of NAIC Programs, Products or Services

1. The International Insurance Relations (G) Committee will:
   A. Monitor and assess international activities at forums like the International Association of Insurance Supervisors (IAIS), the Financial Stability Board (FSB), and the Organisation for Economic Co-operation and Development (OECD), among others, that affect U.S. insurance regulation, U.S insurance consumers, and the U.S. insurance industry.
   B. Support and facilitate the participation of state insurance regulators and the NAIC in relevant IAIS, FSB, OECD, and similar workstreams.
   C. Develop NAIC policy on international activities, coordinating, as necessary, with other NAIC committees, task forces, and working groups and communicating key international developments to those NAIC groups.
   D. Coordinate and facilitate state efforts to participate in key bilateral and multilateral dialogues, projects, conferences, and training opportunities with international regulators and international organizations, both directly and in coordination with the federal government, as appropriate.
   E. Strengthen international regulatory systems and relationships by interacting with international regulators and sharing U.S. supervisory best practices, including conducting an International Fellows Program and educational (technical assistance) seminars to provide an understanding of the U.S. state-based system of insurance regulation.
   F. Coordinate the NAIC's participation in the International Monetary Fund (IMF)/World Bank Financial Sector Assessment Program (FSAP).
   G. Coordinate state efforts to assist in achieving U.S. international trade objectives through reviewing relevant materials, developing input, and providing assistance and expertise on insurance matters to the USTR and/or other federal entities.

NAIC Support Staff: Ryan Workman/Nikhail Nigam
NAIC/CONSUMER LIAISON COMMITTEE

The mission of the NAIC/Consumer Liaison Committee is to assist the NAIC in its mission to support state insurance regulation by providing consumer views on insurance regulatory issues. The Liaison Committee provides a forum for ongoing dialogue between NAIC members and NAIC consumer representatives. The Liaison Committee’s activities in 2022 will be closely aligned with the priorities of the NAIC Consumer Board of Trustees.
NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE

The mission of the NAIC/American Indian and Alaska Native Liaison Committee is to provide a forum for ongoing dialogue between NAIC Members and the American Indian and Alaska Native communities concerning insurance issues of common interest. Specifically, the Liaison Committee will provide a forum for an exchange of information and views on issues surrounding the availability of insurance for American Indian and Alaska Native consumers and tribal interests, an opportunity for American Indian and Alaska Native groups to bring insurance consumer protection issues to the attention of NAIC Members, and a dialogue on best practices for dealing with insurance issues unique to sovereign tribal nations.
1. The Audit Committee will:
   A. Provide continuous audit oversight, including:
      1. Provide an open avenue of communication between the independent auditor and the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.
      2. Confirm and ensure the independence of the independent auditor.
      3. Inquire of management and the independent auditor about significant risks or exposures, and assess the steps management has taken to minimize such risk.
      4. Consider and review with the independent auditor:
         a. Significant findings during the year, including the status of previous audit recommendations.
         b. Any difficulties encountered in the course of audit work, including any restrictions on the scope of activities or access to required information.
         c. The adequacy of internal controls, including computerized information system controls and security, as documented in the Statement on Auditing Standards (SAS) 115 letter from the independent auditor.
         d. Related findings and recommendations of the independent auditor with management’s responses, as documented in the SAS 114 letter from the independent auditor.
      5. Meet periodically with the independent auditor in separate executive sessions to discuss any matters the Committee believes should be discussed privately with the Committee.
      6. Report periodically to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee on significant results of the foregoing activities.
      7. Instruct the independent auditor that the Executive (EX) Committee and Internal Administration (EX1) Subcommittee are the auditor’s clients.
   B. Provide continuous oversight of reporting policies, including:
      1. Advise financial management and the independent auditor that they are expected to provide a timely analysis of significant current financial reporting issues and practices.
      2. Inquire as to the auditor’s independent qualitative judgments about the appropriateness, not just the acceptability, of the accounting principles and the clarity of the financial disclosure practices.
      3. Inquire as to the auditor’s views about whether management’s choices of accounting principles are conservative, moderate or aggressive from the perspective of income, asset and liability recognition, and whether those principles are common practices or minority practices.
      4. Inquire as to the auditor’s views about how choices of accounting principles and disclosure practices may affect NAIC members, the insurance industry, and public views and attitudes.
   C. Provide continuous oversight of financial management, including:
      1. Review the monthly consolidated financial statements, and receive regular reports from executive management on the financial operations of the association.
      2. Meet prior to, or at, each national meeting or more frequently, as circumstances require. The Committee may ask members of management or others to attend meetings and provide pertinent information, as necessary.
      3. Report on significant results of the foregoing activities to the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee on a regular basis.
   D. Conduct scheduled audit activities, including:
      1. Recommend the selection of the independent auditor for approval by the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, approve the compensation of the independent auditor, and review and approve the discharge of the independent auditor.
      2. Review annually the audit scope and plan of the independent auditor with management and the independent auditor, including:
         a. The independent auditor’s audit of the financial statements, accompanying footnotes, and its report thereon.
         b. Any significant changes required in the independent auditor’s audit plans.
         c. Any difficulties or disputes with management encountered during the course of the year under audit.
         d. Other matters related to the conduct of the audit, which are to be communicated to the Committee under generally accepted auditing standards (GAAS).
      3. Review and approve needs-based funding allocations, as needed.
4. Review and update the Committee charter on at least an annual basis.

E. Conduct other activities when necessary, including:
   1. Arrange for the independent auditor to be available to the full Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, as needed.
   2. Review and approve requests for any management consulting engagement to be performed by the independent auditor, and be advised of any other study undertaken at the request of management that is beyond the scope of the audit engagement letter.
   3. Conduct and/or authorize investigations into any matters within the Committee’s scope of responsibilities. The Committee shall be empowered to retain independent counsel and other professionals to assist in the conduct of any investigation.
   4. Ensure that members of the Committee receive the appropriate orientation to the Committee and receive a copy of the policy manual.

APPENDIX A -- DISTRIBUTION CHANNELS

The following is a description of distribution channels used in the development of recommended 2022 GRET values:

1. **Independent** – Business written by a company that markets its insurance policies through an independent insurance agent or insurance broker not primarily affiliated with any one insurance company. These agencies or agents are not employed by the company and operate without an exclusive distribution contract with the company. These include most PPGA arrangements.

2. **Career** – Business written by a company that markets insurance and investment products through a sales force primarily affiliated with one insurance company. These companies recruit, finance, train, and often house financial professionals who are typically referred to as career agents or multi-line exclusive agents.

3. **Direct Marketing** – Business written by a company that markets its own insurance policies direct to the consumer through methods such as direct mail, print media, broadcast media, telemarketing, retail centers and kiosks, internet or other media. No direct field compensation is involved.

4. **Niche Marketers** – Business written by home service, pre-need, or final expense insurance companies as well as niche-market companies selling small face amount life products through a variety of distribution channels.

5. **Other** – Companies surveyed were only provided with the four options described above. Nonetheless since there were many companies for which we did not receive a response (or whose response in past years’ surveys confirmed an “other” categorization (see below), values for the “other” category are given in the tables in this memo. It was also included to indicate how many life insurance companies with no response (to this survey and prior surveys) and to indicate whether their exclusion has introduced a bias into the resulting values.
APPENDIX B – UNIT EXPENSE SEEDS

The expense seeds used in the 2014 and prior GRETs were differentiated between branch office and all other categories, due to the results of a relatively old study that had indicated that branch office acquisition cost expressed on a per Face Amount basis was about double that of other distribution channels. Due to the elimination of the branch office category in the 2015 GRET, non-differentiated unit expense seeds have been used in the current and immediately prior studies.

The unit expense seeds used in the 2022 GRET and the 2021 GRET recommendations were based on the average of the 2006 through 2010 Annual SOA expense studies. These studies differentiated unit expenses by type of individual life insurance policy (term and permanent coverages). As neither the GRET nor the Annual Statement data provided differentiates between these two types of coverage, the unit expense seed was derived by judgment based this information. The following shows the averages derived from the Annual SOA studies and the seeds used in this study. Beginning with the 2020 Annual Statement submission this information will become more readily available.

TO: Reggie Mazyck, NAIC

FROM: Pete Miller, Experience Study Actuary, Society of Actuaries (SOA)
       Tony Phipps, Chair, SOA Committee on Life Insurance Company Expenses

DATE: August 4, 2021

RE: 2022 Generally Recognized Expense Table (GRET) – SOA Analysis

Dear Mr. Mazyck:

As in previous years, the Society of Actuaries expresses its thanks to NAIC staff for their assistance and responsiveness in providing Annual Statement expense and unit data for the 2022 GRET analysis for use with individual life insurance sales illustrations. The analysis is based on expense and expense related information reported on companies’ 2019 and 2020 Annual Statements. This project has been completed to assist the Life Actuarial Task Force (LATF) in its consideration of potential revisions to the GRET that could become effective for calendar year 2022. This memo describes the analysis and resultant findings.

NAIC staff provided Annual Statement data for life insurance companies for calendar years 2019 and 2020. This included data from 776 companies in 2019 and 771 companies in 2020. This decrease resumes the trend of small decreases from year to year. Of the total companies, 375 were in both years and passed the outlier exclusion tests and were included as a base for the GRET factors (292 companies passed similar tests last year).

APPROACH USED

The methodology for calculating the recommended GRET factors based on this data is similar to that followed the last several years. The methodology was last altered in 2015. The changes made at that time can be found in the recommendation letter sent to LATF on July 30, 2015.1

To calculate updated GRET factors, the average of the factors from the two most recent years (2019 and 2020 for those companies with data available for both years) of Annual Statement data was used. For each company an actual-to-expected ratio was calculated. Companies with ratios that fell outside predetermined parameters were excluded. This process was completed three times to stabilize the average rates. The boundaries of the exclusions have been modified from time to time; however, there were no adjustments made this year. Unit expense seed factors (the seeds for all distribution channel categories are the same), as shown in Appendix B, were used to compute total expected expenses. Thus, these seed factors were used to implicitly allocate expenses between acquisition and maintenance expenses, as well as among the three acquisition expense factors (on a direct of ceded reinsurance basis).

Companies were categorized by their reported distribution channel (four categories were used as described in Appendix A included below). There remain a significant number of companies for which no distribution channel was provided, as no responses to the annual surveys have been received from those companies. The characteristics of these companies vary significantly, including companies not currently writing new business or whose major line of business is not individual life insurance. Any advice or assistance from LATF in future

1 https://www.soa.org/Files/Research/Projects/research-2016-gret-recommendation.pdf
years to increase the response rate to the surveys of companies that submit Annual Statements in order to reduce the number of companies in the “Other” category would be most welcomed. The intention is to continue surveying the companies in future years to enable enhancement of this multiple distribution channel information.

Companies were excluded from the analysis if in either 2019 or 2020 (1) their actual to expected ratios were considered outliers, often due to low business volume, (2) the average first year and single premium per policy were more than $40,000, (3) they are known reinsurance companies or (4) their data were not included in the data supplied by the NAIC. To derive the overall GRET factors, the unweighted average of the remaining companies’ actual-to-expected ratios for each respective category was calculated. The resulting factors were rounded, as shown in Table 1.

**THE RECOMMENDATION**

The above methodology results in the proposed 2022 GRET values shown in Table 1. To facilitate comparisons, the current 2021 GRET factors are shown in Table 2. Further characteristics of the type of companies represented in each category are included in the last two columns in Table 1, including the average premium per policy issued and the average face amount ($000s) per policy issued.

To facilitate comparisons, the current 2021 GRET factors are shown in Table 2. Further characteristics of the type of companies represented in each category are included in the last two columns in Table 1, including the average premium per policy issued and the average face amount ($000s) per policy issued.

In previous recommendations, an effort was made to reduce volatility in the GRET factors from year-to-year by limiting the change in GRET factors between years to about ten percent of the prior value. The changes from the 2021 GRET were reviewed to ensure that a significant change was not made in this year’s GRET recommendation.

The Independent, Niche Marketing and Other distribution channel categories experienced a change greater than ten percent so the factors for this line were capped at the ten percent level (the Acquisition per unit factor changed somewhat more than 10% because of rounding) from the corresponding 2021 GRET values. The volatility occurred due to incorrect NAIC data for 2018 for some companies, which caused their actual to expected ratios to be considered outliers and they were not included in the calculation. Over the next one to three years, the ten percent cap will allow this difference to be graded in so calculated GRET will be used for the final recommended GRET factors.

USAGE OF THE GRET

This year’s survey, responded to by companies’ Annual Statement correspondent, included a question regarding whether the 2021 GRET table was used in its illustrations by the company. Last year, 29% of the responders indicated their company used the GRET for sales illustration purposes, with similar percentage results by size of company; this contrasted with about 28% in 2019. This year, 31% of responding companies indicated that they used the GRET in 2020 for sales illustration purposes. The range was from 11% for Direct Marketing to 43% for independent. Based on the information received over the last several years, the variation in GRET usage appears to be in large part due to the relatively small sample size and different responders to the surveys.

We hope LATF finds this information helpful and sufficient for consideration of a potential update to the GRET. If you require further analysis or have questions, please contact Pete Miller at 847-706-3566.

Kindest personal regards,

Pete Miller, ASA, MAAA, Experience Study Actuary Society of Actuaries

Tony Phipps, FSA, MAAA Chair, SOA Committee on Life Insurance Company Expenses
APPENDIX A -- DISTRIBUTION CHANNELS

The following is a description of distribution channels used in the development of recommended 2021 GRET values:

6. **Independent** – Business written by a company that markets its insurance policies through an independent insurance agent or insurance broker not primarily affiliated with any one insurance company. These agencies or agents are not employed by the company and operate without an exclusive distribution contract with the company. These include most PPGA arrangements.

7. **Career** – Business written by a company that markets insurance and investment products through a sales force primarily affiliated with one insurance company. These companies recruit, finance, train, and often house financial professionals who are typically referred to as career agents or multi-line exclusive agents.

8. **Direct Marketing** – Business written by a company that markets its own insurance policies direct to the consumer through methods such as direct mail, print media, broadcast media, telemarketing, retail centers and kiosks, internet or other media. No direct field compensation is involved.

9. **Niche Marketers** – Business written by home service, pre-need, or final expense insurance companies as well as niche-market companies selling small face amount life products through a variety of distribution channels.

10. **Other** – Companies surveyed were only provided with the four options described above. Nonetheless since there were many companies for which we did not receive a response (or whose response in past years’ surveys confirmed an “other” categorization (see below), values for the “other” category are given in the tables in this memo. It was also included to indicate how many life insurance companies with no response (to this survey and prior surveys) and to indicate whether their exclusion has introduced a bias into the resulting values.
APPENDIX B – UNIT EXPENSE SEEDS

The expense seeds used in the 2014 and prior GRETs were differentiated between branch office and all other categories, due to the results of a relatively old study that had indicated that branch office acquisition cost expressed on a per Face Amount basis was about double that of other distribution channels. Due to the elimination of the branch office category in the 2015 GRET, non-differentiated unit expense seeds have been used in the current and immediately prior studies.

The unit expense seeds used in the 2022 GRET and the 2021 GRET recommendations were based on the average of the 2006 through 2010 Annual SOA expense studies. These studies differentiated unit expenses by type of individual life insurance policy (term and permanent coverages). As neither the GRET nor the Annual Statement data provided differentiates between these two types of coverage, the unit expense seed was derived by judgment based on this information. The following shows the averages derived from the Annual SOA studies and the seeds used in this study. Beginning with the 2020 Annual Statement submission this information will become more readily available.

CALCULATION OF MINIMUM RESERVES AND MINIMUM NONFORFEITURE VALUES FOR POLICIES WITH GUARANTEED INCREASING DEATH BENEFITS BASED ON AN INDEX

A. Valuation - Text

For a policy where premiums are fixed in amount at issue which provides for whole life insurance with the amount of death benefit adjusted periodically with the Consumer Price Index or another cost of living index, the value of the minimum reserve at any time shall be based on the maximum valuation interest rate for the year of issue and an acceptable mortality table for life insurance statutory reserves and based on the death benefit and premium pattern adjusted as provided in the policy by reasonable annual increases based on the index. The present value of future benefits component shall be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit. If the policy provides for future premiums and such premiums are also adjusted periodically with the Consumer Price Index or another cost of living index, the present value of future premiums component shall likewise be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit. The assumption as to what is a reasonable annual increase in death benefits based on the index must not be less than the maximum valuation interest rate for the year of issue less:

1. 2.0% If the annual increase is limited to an annual and non-cumulative maximum of 0% through 5.0%
2. 1.5% If the annual increase is limited to an annual and cumulative maximum of 0% through 5.0%
3. 1.5% If the annual increase is limited to an annual and non-cumulative maximum of 5.01% through 10.0%
4. 1.25% If the annual increase is limited to an annual and cumulative maximum of 5.01% through 10.0%
5. 1.0% For all other plans.

The term “annual and non-cumulative maximum” refers to a maximum where each annual increase is limited to the lower of the maximum or the increase in the index without carry forward of excess index increases.

The term “annual and cumulative maximum” refers to a maximum where each annual increase is limited to the lower of the maximum or the increase in the index with carry forward of excess index increases.

In no event shall the assumption as to an annual increase based on the index be less than 1.0%.

This guideline for valuation shall be effective immediately for policies issued on or after January 1, 1991.

B. Nonforfeiture – Text

The threshold amount shall be $10,000 until December 31, 2009. For years beginning after December 31, 2009, the threshold amount for a calendar year shall be the product of $10,000 and the ratio of 1) the index for June of the prior year to 2) 136.0 (the index as of June 30, 1991), rounded to the nearest $25. If this calculation would result in an increase in the threshold amount of less than $500, the unadjusted threshold amount from the prior year shall continue in effect for the next calendar year. In no calendar year shall the increase in threshold amount exceed 5% of the prior calendar year threshold amount.

The index used to determine the threshold amount for years beginning after December 31, 2009, shall be the Consumer Price Index for All Urban Consumers (CPI-U) as of June 30 of that year. If this index is no longer available, another index which, in the actuary’s opinion, reflects the change in general consumer prices for the year should be substituted.
I. FOR POLICIES WHERE ANY DEATH BENEFIT FOR ANY POLICY YEAR WOULD EXCEED THE THRESHOLD AMOUNT EVEN IN ABSENCE OF ANY ANNUAL INCREASES BASED ON THE INDEX

For a policy where premiums are fixed in amount at issue which provides for whole life insurance with the amount of death benefit adjusted periodically with the Consumer Price Index or another cost of living index, the value of the minimum nonforfeiture benefit at any time shall be based on the maximum nonforfeiture interest rate for the year of issue and an acceptable mortality table for life insurance nonforfeiture and based on the death benefit and premium pattern adjusted as provided in the policy by reasonable annual increases based on the index. The present value of future benefits component shall be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit. If the policy provides for future premiums and such premiums are also adjusted periodically with the Consumer Price Index or another cost of living index, the present value of future premiums component shall likewise be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit. The assumption as to what is a reasonable annual increase in death benefits based on the index must not be less than the maximum valuation interest rate for the year of issue less:

1. 2.0% If the annual increase is limited to an annual and non-cumulative maximum of 0% through 5.0%.
2. 1.5% If the annual increase is limited to an annual and cumulative maximum of 0% through 5.0%.
3. 1.5% If the annual increase is limited to an annual and non-cumulative maximum of 5.01% through 10.0%.
4. 1.25% If the annual increase is limited to an annual and cumulative maximum of 5.01% through 10.0%.
5. 1.0% For all other plans.

The term “annual and non-cumulative maximum” refers to a maximum where each annual increase is limited to the lower of the maximum or the increase in the index without carry forward of excess index increases.

The term “annual and cumulative maximum” refers to a maximum where each annual increase is limited to the lower of the maximum or the increase in the index with carry forward of excess index increases.

In no event shall the assumption as to an annual increase based on the index be less than 1.0%.

II. FOR POLICIES WHERE ANY DEATH BENEFIT FOR ANY POLICY YEAR WOULD NOT EXCEED THE THRESHOLD AMOUNT IN ABSENCE OF ANY ANNUAL INCREASES BASED ON THE INDEX

For a policy where premiums are fixed in amount at issue which provides for whole life insurance with the amount of death benefit adjusted periodically with the Consumer Price Index or another cost-of-living index, the unadjusted value of the minimum nonforfeiture benefit at any time shall be based on a level death benefit, an acceptable mortality table for life insurance nonforfeiture and a nonforfeiture interest rate equal to the greater of (a) and (b):

(a) The nonforfeiture interest rate defined in Section 3 of VM-02, Minimum Nonforfeiture Mortality and Interest, less:
   1. 4.5%–0 bp If the annual increase based on the index is limited to a maximum of 0% through 5.0%.
   2. 4.25%–25 bp If the annual increase based on the index is limited to a maximum of 5.01% through 10.0%.
   3. 4.0%–50 bp For all other plans.

   (b) The Applicable Accumulation Test Minimum Rate in the Cash Value Accumulation Test under IRS Section 7702 (Life Insurance Contract Defined) of the U.S. Internal Revenue Code.

The present value of future benefits component shall be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit. If the policy provides for future premiums and such premiums are also adjusted periodically with the Consumer Price Index or another cost-of-living index, the present value of future premiums component shall likewise be further adjusted each year by the ratio of the then current amount of death benefit to the initially projected amount of death benefit.

© 2021 National Association of Insurance Commissioners 2
For purposes of this guideline multiple policies on a single life shall be aggregated and only those policies aggregating not more than $10,000 (or the threshold amount after December 31, 2009), shall be considered under B.II.

This guideline for nonforfeiture shall be effective immediately for policies issued on or after January 1, 1991.

BACKGROUND

A number of companies are marketing individual life insurance policies with guaranteed increasing death benefits tied into a consumer price index or another cost-of-living index and are for low initial amounts of insurance sold through funeral directors to provide for burial expenses. Some of the policies provide for graded death benefits such as the return of premium with or without interest for the early policy years or for a fixed scheduled increase in death benefits prior to the operation of the index. In some cases, there is a maximum on the increase for any year. The vast majority of such policies are single premium policies, but some are annual premium policies (generally limited payment). The annual premium may or may not be subject to adjustment with the index.

Since the changes in the index are not known at issue, but from past experience, increases within a given range can be expected with a high probability, it is necessary to assume some increases and then to continually adjust the present value of future benefits component and, if appropriate, the present value of future premiums component in the reserve and nonforfeiture calculation.

Theoretically the same assumed increases in the death benefits should be used for both valuation and nonforfeiture. This guideline so provides for policies where the amount of death benefit in any given policy year would exceed $10,000 (or the threshold amount after December 31, 2009), even if there were no increases based on the index. For practical purposes this may mean that such policies are not marketable for higher amounts as it is most likely that such policies will not qualify under the IRS Section 7702. The cash value accumulation test to qualify thereunder requires a minimum interest rate of 4% and an assumed level amount of death benefits.

In the case of policies for an initial amount of insurance of $5,000 or less, the IRS rules provide an exception to the prohibition of assuming increasing death benefits. However, since many of the policies for very low amounts of initial face amount of insurance would require relatively high expenses if underwritten, many of the policies are issued with simplified underwriting or on a guaranteed issue basis with lower amounts of death benefits in the early policy years, some of the resulting annual increases are such as would disqualify many of the policies for the exception. Therefore, it is recommended that policies for low amounts of insurance be allowed to qualify under the cash value accumulation test by permitting the nonforfeiture values to be based on a level death benefit and 4% or higher interest rate not less than the VM-02 nonforfeiture interest rate Applicable Accumulation Test Minimum Rate in the Cash Value Accumulation Test under IRS Section 7702 and requiring such values to be updated as increases based on the index take place. The amount in this guideline is set at $10,000 (or the threshold amount after December 31, 2009), to allow for future adjustments and for different patterns of benefits for low amounts.

For single premium policies, the value of nonforfeiture benefits based on a level death benefit and a net assumed nonforfeiture interest rate equal to the maximum nonforfeiture interest rate less an assumed increase based on the index and such factors then adjusted by the projected increases will approximate factors based on assumed increases and the maximum nonforfeiture interest rate. However, the net interest rate is likely to be less than 4%. Thus, the procedure of assuming a level death benefit and a net assumed rate of not less than 4% the VM-02 nonforfeiture interest rate Applicable Accumulation Test Minimum Rate in the Cash Value Accumulation Test under IRS Section 7702 for policies of low amounts of insurance is apt to produce lower cash values than the procedure for large amounts of insurance. Such lower values can be justified based upon the fact that the highly specialized market is prearranged funeral expenses for very small amounts of insurance per policy.

To emphasize the qualification with the IRS rules for the very low amounts of insurance, the nonforfeiture guideline for small amount policies is stated in terms of the net rate, a level death benefit and continual adjustment.

For solvency purposes, reserves should be conservative. The same rules apply for reserves regardless of the size of the policy. That is, lower reserves are not permitted for policies with very low amounts of insurance per policy.

Paragraph 5c(3) of the Model Standard Nonforfeiture Law states that unscheduled changes do not need to be taken into account until the time of the change. The changes guaranteed according to an index are a hybrid, i.e., the changes are scheduled but the amount of the change is not known until the index is determined. Thus, the changes must be recognized at issue. This guideline
is a hybrid with increases assumed at issue either explicitly or implicitly but with further adjustments made at the time the increase based on the index is determined.

1 In 2010, the actuarial guideline was modified to substitute a threshold amount for 10,000, such threshold being increased by the change in the CPI-U, the CPI for All Urban Consumers.

In determining what business to report for a particular jurisdiction, unless otherwise indicated in these instructions, all companies should follow the same methodology/definitions used to file the Financial Annual Statement (FAS) and its corresponding state pages. Specifically, the business to be reported is the direct business of the reporting company. Reinsurance ceded is not deducted and reinsurance assumed is not included.

**Participation Requirements:** All companies licensed and reporting any travel insurance within any of the participating MCAS jurisdictions. (This threshold is subject to individual jurisdiction requirements.)
**Definitions:**

**Travel Insurance** means insurance coverage for personal risks incident to planned travel.

Include:
- Interruption or cancellation of trip or event;
- Loss of baggage or personal effects;
- Damages to accommodations or rental vehicles;
- Sickness, accident, disability or death occurring during travel;
- Emergency evacuation;
- Repatriation of remains; or
- Any other contractual obligations to indemnify or pay a specified amount to the traveler upon determinable contingencies related to travel as approved by the Commissioner.

Exclude:
- major medical plans that provide comprehensive medical protection for travelers with trips lasting longer than six (6) months, including for example, those working or residing overseas as an expatriate, or any other product that requires a specific insurance producer license.

**Blanket Travel Insurance** means a policy of Travel Insurance issued to any Eligible Group providing coverage for specific classes of persons defined in the policy with coverage provided to all members of the Eligible Group without a separate charge to individual members of the Eligible Group.

**Coverages**
For the following terms, the NAIC asks that the insurer use definitions that meet industry standards. To the extent the insurer’s definitions differ from industry standards, the NAIC asks that the insurer provide those definitions.

- **Trip Cancellation**
- **Trip Interruption**
- **Trip Delay**
- **Baggage Loss/Delay**
- **Emergency Medical / Dental**
- **Emergency Transportation/Repatriation**
- **Primary Coverage**
- **Excess/Secondary Coverage**

**Cancellations** – Includes all cancellations of the policies/certificates where the cancellation was executed during the reporting year regardless of the date of placement of the coverage.

**Claim** – A request or demand for payment of a loss that may be included within the terms of coverage of an insurance policy/certificate. Each claimant/insured reporting a loss is counted separately.
Exclude:

- An event reported for “information only.”
- An inquiry of coverage if a claim has not actually been presented (opened) for payment.
- A potential claimant if that individual has not made a claim nor had a claim made on his or her behalf.

**Claims Closed With Payment** – Claims closed with payment where the claim was closed during the reporting period regardless of the date of loss or when the claim was received. The number of days to closure, however, should be measured as the difference between the date of the final payment and the date the claim was reported or between the date of the final payment and the date the request for supplemental payment was received. See also “Date of Final Payment.”

Exclude:

- Claims where payment was made for company loss adjustment expenses if no payment was made to an insured/claimant.
- Claims that are closed because the amount claimed is below the insured’s deductible.

Clarifications:

- If a claim is reopened for the sole purpose of refunding the insured’s deductible, do not count it as a paid claim.
- For claims where the net payment is $0 due to subrogation recoveries, report the number of claims in which any amount was paid to the insured; do not net the payment with subrogation recoveries when counting the number of paid claims.

Calculation Clarification:

- For each coverage identifier, the sum of the claims settled with payment across each closing time interval should equal the total number of claims closed with payment during the reporting period.

Handling additional payment on previously reported claim/subsequent supplemental payment for claims closed with payment during the reporting period:

- If a claim is reopened for a subsequent supplemental payment, count the reopened claim as a new claim. Calculate a separate aging on the supplemental payment from the time the request for supplemental payment was received to the date the final payment was made.

**Claims Closed Without Payment** – Claims closed with no payment made to an insured or third party. The number of days to closure is the difference between the date the claim was closed and the date the claim was reported and/or reopened. See also “Date of Final Payment.”
Include:

- All claims that were closed during the reporting period regardless of the date of loss or when the claim was received.
- Claims where no payment was made to an insured/claimant even though payment was made for company loss adjustment expenses.
- A demand for payment for which it was determined that no relevant policy/certificate was in-force at the time of the loss if a claim file was set up and the loss was investigated.
- Claims that are closed because the amount claimed is below the insured’s deductible.
- Claims closed because primary coverage was available elsewhere.

Complaints Received Directly from any Person or Entity Other than the Department of Insurance – any written communication that expresses dissatisfaction with a specific person or entity subject to regulation under the jurisdiction’s insurance laws. An oral communication, which is subsequently converted to a written form in order to be analyzed and acted upon, will meet the definition of a complaint for this purpose.

Include:

- Any complaint regardless of the subject of the complaint (claims, underwriting, marketing, etc.)
- Complaints received from third parties

Complaints Received Directly from the Department of Insurance – All complaints:

- As identified by the DOI as a complaint.
- Sent or otherwise forwarded by the DOI to the reporting company.

Date of Final Payment – The date final payment was issued to the insured/claimant.

Calculation Clarification:

- If partial payments were made on the claim, the claim would be considered closed with payment if the final payment was made during the reporting period regardless of the date of loss or when the claim was received.
- Report a claim as “closed with payment” or “closed without payment” if it is closed in the company’s claims system during the reporting period (even if the final payment was issued in a prior reporting period.)
- If a claim remains open at the end of the reporting period (even though a final payment has been issued) it should be reported as open. Only when the claim is closed in the company’s claims system, would you report the days to final payment.

Example:

- A claim is open on 11/1/00 and final payment is made on 12/1/00. The claim is left open until 2/1/01 to allow time for supplemental requests.
  o The claim would be reported as open in the “00” MCAS submission and closed in the “01” MCAS submission.
  o The number of days to final payment would be calculated as 30 days and
reported in the “01” MCAS submission.

**Date the Claim was Reported** – The date an insured or claimant first reported his or her claim to either the company or insurance agent.

**Domestic Coverage:** Coverage for travel originating and contained within the United States including travel directly to and from mainland United States to Hawaii, Alaska and United States territories.

**Group Travel Insurance** means Travel Insurance issued to any Eligible Group as defined by state law.

**International Coverage:** Coverage for any travel other than Domestic.

**Premium Written During Period** – The total premium written before any reductions for refunds for travel insurance during the reporting period.

**In-force** – A master policy, individual policy, or certificate in effect during the reporting period.

**Lawsuit** – An action brought in a court of law in which one party, the plaintiff, claims to have incurred a loss as a result of the action of another party, the defendant.

For purposes of reporting lawsuits in the Travel MCAS blank:

- Include only lawsuits brought by an applicant for insurance or a policyholder or a claimant/beneficiary as a plaintiff against the reporting insurer or its agent as a defendant;
- Include all lawsuits, whether or not a hearing or proceeding before the court occurred;
- Do not include arbitrations of any sort;
- If one lawsuit seeks damages under two or more policies, count the number of policies involved as the number of lawsuits. For example, if one lawsuit seeks damages under three policies, count the action as three lawsuits;
- If one lawsuit has two or more complainants, report the number of complainants as the number of lawsuits. For example, if one lawsuit has two complainants, report two lawsuits. If the lawsuit is a class action, see instructions for treatment of class action lawsuits;
- Report a lawsuit in the jurisdiction in which the policy was issued with the exception of class action lawsuits;
- Treatment of class action lawsuits: Report the opening and closing of a class action lawsuit once in each jurisdiction in which a potential class member resides. Include an explanatory note with your submission stating the number of class action lawsuits included in the data and the general cause of action.

**Lawsuits Closed During the Period with Consideration for the Consumer** – A lawsuit closed during the reporting period in which a court order, jury verdict, or settlement resulted in payment, benefits, or other thing of value, i.e., consideration, to the applicant or policyholder in
an amount greater than offered by the reporting company before the lawsuit was brought.

**Median Days to Final Payment** – The median value for all claims closed with payment during the period.

Calculation for losses with one final payment date during the reporting period:
- Date the loss was reported to the company to the date of final payment.

Calculation for losses with multiple final payment dates during the reporting period:
- Date the request for supplemental payment received to the date of final payment (for each different final payment date.)

Exclude:
- Subrogation payments.

**Calculation Clarification / Example:**
- To determine the Median Days to Final Payment you must first determine the number of days it took to settle each claim. This is the difference between the date the loss was reported to the company, or the date the request for supplemental payment was received, to the date of final payment. The Median Days to Final Payment is the median value of the number of days it took to settle all claims closed with payment during the period.

**Median** - A median is the middle value in a distribution arranged in numerical order (either lowest to highest or highest to lowest). If the distribution contains an odd number of elements, the median is the value above and below which lie an equal number of values. If the distribution contains an even number of elements, the median is the average of the two middle values. It is not the arithmetic mean (average) of all of the values.

Consider the following simple example of the number of days it took to settle each of the following seven claims:

<table>
<thead>
<tr>
<th>Days to Settle</th>
<th>Nbr 1</th>
<th>Nbr 2</th>
<th>Nbr 3</th>
<th>Nbr 4</th>
<th>Nbr 5</th>
<th>Nbr 6</th>
<th>Nbr 7</th>
</tr>
</thead>
<tbody>
<tr>
<td>Claim</td>
<td>2</td>
<td>4</td>
<td>4</td>
<td>5</td>
<td>6</td>
<td>8</td>
<td>20</td>
</tr>
</tbody>
</table>

In this situation, the Median Days to Final Payment would be 5 because it is the middle value. There are exactly 3 values below the median (2, 4, & 4) and 3 values above the median (6, 8, & 20). If the data set had included an even number of values, then the median would be the average of the two middle values as demonstrated below.

<table>
<thead>
<tr>
<th>Days to Settle</th>
<th>Nbr 1</th>
<th>Nbr 2</th>
<th>Nbr 3</th>
<th>Nbr 4</th>
<th>Nbr 5</th>
<th>Nbr 6</th>
</tr>
</thead>
<tbody>
<tr>
<td>Claim</td>
<td>2</td>
<td>4</td>
<td>5</td>
<td>6</td>
<td>8</td>
<td>20</td>
</tr>
</tbody>
</table>

Median Days to Final Payment = (5 + 6)/2 = 5.5
The median should be consistent with the paid claim counts reported in the closing time intervals.

Example: A carrier reports the following closing times for paid claims.

**Closing Time # of Claims**

<table>
<thead>
<tr>
<th>Closing Time</th>
<th># of Claims</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 30</td>
<td>22</td>
</tr>
<tr>
<td>31-60</td>
<td>13</td>
</tr>
<tr>
<td>61-90</td>
<td>18</td>
</tr>
<tr>
<td>91-180</td>
<td>11</td>
</tr>
<tr>
<td>181-365</td>
<td>12</td>
</tr>
<tr>
<td>&gt;365</td>
<td>15</td>
</tr>
</tbody>
</table>

The sum of the claims reported across each closing time interval is 91, so that the median is the 46th claim. This claim falls into the closing time interval “61-90 days.” Any reported median that falls outside of this range (i.e. less than 61 or greater than 90) will indicate a data error.

**NAIC Company Code** – The five-digit code assigned by the NAIC to all U.S. domiciled companies which filed a Financial Annual Statement with the NAIC.

**NAIC Group Code** – The code assigned by the NAIC to identify those companies that are a part of a given holding company structure. A zero indicates that the company is not part of a holding company.

**Travel Retailer** means a business entity that makes, arranges or offers planned travel and may offer and disseminate Travel Insurance as a service to its customers on behalf of and under the direction of a Limited Lines Travel Insurance Producer.
Short-Term Limited Duration Insurance Market Conduct Annual Statement

Data Call & Definitions

**Line of Business:** Short-Term Limited Duration Insurance

**Reporting Period:** January 1, 2022 through December 31, 2022

**Filing Deadline:** June 30, 2023

**Participation Requirements:** All companies licensed and reporting at least $50,000 of Short-Term Limited Duration Insurance (STLDI) premium for all coverages reportable in MCAS within any of the participating MCAS jurisdictions. (This threshold is subject to individual jurisdiction requirements.)

**Report by Residency:** This MCAS blank is designed to collect data from the perspective of individual insureds in each state that the form is marketed in. When reporting for forms issued to discretionary groups, associations, or trusts – data should be provided on each state of residence of the insureds, rather than only where the discretionary group, association or trust is sitused.
General Definitions:

**Short-Term Limited-Duration Insurance** - Health coverage provided pursuant to a contract with an issuer that has an expiration date specified in the contract that is less than 12 months after the original effective date of the contract. (state and federal government guidelines may have renewal duration limitations)

**Association** – For purposes of this MCAS blank, a non-employer group that secures benefits for its members.

**Individual STLDI Product** – Policies marketed, sold, and issued to individual consumers, regardless of whether or not the policy forms have been filed with any State’s department of insurance. An individual STLDI policy is not issued to a trust, association, or administrator.

**Group STLDI Product/Coverage** - Policies issued to a trust, association, or administrator for the purpose of marketing, selling, and issuing certificates to individual consumers, regardless of whether or not the policy forms have been filed with any State’s department of insurance and regardless of where the association, trust, or administrator is sitused.

**New Policies/Certificates Issued** - STLDI policy/certificate issued to an individual or family for whom no prior short-term coverage has been placed with the same insurer within the previous 63 days

**Policies / Certificates** - Refers to the coverage documents provided to individuals or families (i.e., state residents) who are enrolled in coverage (not the association)

**Policyholder / Certificateholder** – Refers to the individual who is afforded benefits of the coverage according to the laws of the state in which they reside (i.e., not the association). Policyholder is the individual when purchased in the individual market. Certificateholder is the individual when purchased through an Association, which is the policyholder.

**Renewal / Reissue** - STLDI policy/certificate issued to an individual or family for whom prior short-term coverage has been placed with the same insurer within 63 days of the prior coverage. If a policy is re-underwritten based on health factors or provides different benefits, it should be reported as a new policy/certificate issued.

**Schedule 2 Definitions (Policy/Certificate Administration):**

**Rescission** – A rescission is a cancellation or discontinuance of coverage that is retroactive to the issue date. (Does not include cancellations for non-payment.)

**Written Premium** - Provide the total annual written premium for all policies and/or certificates issued to insureds residing in the state for which reporting is being completed

**Earned Premium** – Total premium earned from all policies/certificates written by the insurer during the specified period.
Free Look – A set number of days provided in an insurance policy/certificate that allows time for the purchaser to review the contract provisions with the right to return the policy/certificate for a full refund of all premium paid. Report the number of policies/certificates that were returned by the insured under the free look provision during the period, regardless of the original issuance date.

Member months– The sum of total number of lives insured on policies/certificates issued on a pre-specified day of each month of the reported year. Reasonable approximations are allowed when exact information is not administratively available to the reporting entity.

Schedule 3 and 4 Definitions (Prior Authorization and Claims Administration):

Prior Authorization – A decision by a carrier or its designee in advance of the provision of a health care service that the service (including specialist care, habilitation and rehabilitation services, and mental health and substance use disorder services), treatment plan, or medical device and equipment is medically necessary or a covered service. Sometimes called preauthorization, prior approval or precertification, this includes any provision requiring the insured to notify the company prior to treatment.

Claim – For the purposes of this data call a claim means any individual line of service within a bill for services.

Claim Clarifications:
- Claims received, paid and denied should be reported according to the data year of the receipt, payment or denial.
- Claims are to be reported at the service line level.
- Capitated claims are to be reported if an Explanation of Benefits (EOB) is generated.
- Duplicate claims should not be reported.

Claims Received - provide the total number of claims received during the reporting period for individual policyholders and/or group certificate holders residing in the state for which reporting is being completed

Claims Denied - provide the total number of claims denied during the reporting period for individual policyholders and/or group certificate holders residing in the state for which reporting is being completed; includes rejected and returned claims, whether in whole or in part

Clarification:
- The nine claim denial reporting categories are not exhaustive. Claim denials reported in the categories should be a subset of the reported total denials.

Claims Paid - provide the total number of claims paid during the reporting period for individual policyholders and/or group certificate holders residing in the state for which reporting is being completed.
**Waiting Period**: Period of time a covered person who is entitled to receive benefits for sicknesses must wait before coverage is provided. This applies to waiting periods that are per policy or per condition.

**Schedules 5 Definitions (Consumer Requested Reviews/Grievance/Complaints):**

**Lawsuit**—An action brought in a court of law in which one party, the plaintiff, claims to have incurred a loss as a result of the action of another party, the defendant.

For purposes of reporting lawsuits for Short-Term Limited Duration Insurance products:

- Include only lawsuits brought by an applicant for insurance, a policyholder or a claimant/beneficiary as a plaintiff against the reporting insurer or its agent as a defendant;
- Include all lawsuits, whether or not a hearing or proceeding before the court occurred;
- Do not include arbitrations of any sort;
- If one lawsuit seeks damages under two or more policies or contracts, count the number of policies or contracts involved as the number of lawsuits. For example, if one lawsuit seeks damages under three policies or contracts, count the action as three lawsuits;
- If one lawsuit has two or more complainants, report the number of complainants as the number of lawsuits. For example, if one lawsuit has two complainants, report two lawsuits. If the lawsuit is a class action, see instructions for treatment of class action lawsuits;
- Report a lawsuit in the jurisdiction in which the policy was issued with the exception of class action lawsuits;
- Treatment of class action lawsuits: Report the opening and closing of a class action lawsuit once in each state in which a potential class member resides. Include an explanatory note with your submission stating the number of class action lawsuits included in the data and the general cause of action.

**Lawsuits Closed During the Period with Consideration for the Consumer**—A lawsuit closed during the reporting period in which a court order, jury verdict, or settlement resulted in payment, benefits, or other thing of value, i.e., consideration, to the applicant, policyholder, or beneficiary in an amount greater than offered by the reporting insurer before the lawsuit was brought.

**Schedule 6 Definitions (Marketing and Sales)**

**Commissions** - The total amount of compensation paid to any individual or entity for their consideration in marketing, selling, and attracting potential insureds, by whatever means this compensation is provided. Do not include monetary valuables paid to any individual or entity that is generally not able to be converted into actual money. NOTE: For products not related to the actual sale of a contract, do not include any amounts paid for the specific purpose of marketing, encouraging or promoting.

**Other Remuneration** - Any monetary consideration provided by the insurer through the course of the insurance transaction. This is not commissions and are separate amounts paid for as a result of the insurance transaction.
Regulatory Information Retrieval System (RIRS) Proposed Coding Structure Changes

Overview
Outlined below are the Market Information Systems Research and Development (D) Working Group proposed revisions to the Regulatory Information Retrieval System (RIRS) coding structure. These revisions address the serious deficiencies of the current coding structure. They are designed to render greater coherency to the data structure and make the system more compatible with other market information systems.

In brief, this proposal consists of:
1) New Record Type field to distinguish routine administrative actions from actions that are a result of an infraction or financial impairment. This distinction is important for market analysis purposes.
2) New Modification Indicator field to link related RIRS records. Some RIRS records represent a termination, modification, or extension of a previous RIRS record. This new field can be used to eliminate duplicate records when counting unique actions.
3) New Line of Business field to reflect infractions that arise out of activity specific to a line of business.
4) Significant Revisions to the Origin of Action, Reason for Action, and Disposition for Action codes to provide a more logical overall data structure.

## Origin of Action (Revised)

The Origin of Action field is meant to provide information about the origin (source) of the regulatory action. The code(s) used should be reflective of the source of information or activity that resulted in the regulatory action. Information about the reason (allegations) and/or disposition (outcome) of the action should be reported in those respective fields. (max 4)

# Reason for Action (Revised)

The Reason for Action field is meant to provide information about the reason (allegations) for the regulatory action. The code(s) used should be reflective of allegations associated with the action (i.e. the nature of the violation found). Information about the origin (source) and/or disposition (outcome) of the action should be reported in those respective fields. (max 20)

Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation

Mutual Recognition of Jurisdictions (E) Working Group
Process for Evaluating Jurisdictions that Recognize and Accept
the Group Capital Calculation

1. **Group Capital Calculation.** On December 9, 2020, the NAIC adopted revisions to the NAIC Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). These revisions implement the Group Capital Calculation (GCC) filing requirements for insurance groups at the level of the ultimate controlling person for the purposes of evaluating solvency at the group level. The revisions specifically provide that the requirement to file the NAIC’s GCC applies to U.S.-based groups, while a group headquartered outside the U.S. is exempt from the GCC (subject to limited exceptions)¹ if its group-wide supervisor “recognizes and accepts” the GCC for U.S. groups doing business in that jurisdiction. Likewise, a U.S. group subject to a group capital calculation specified by the Federal Reserve Board is exempt from the GCC. This process codifies the concepts of mutual recognition and one group/one group-wide supervisor.

2. **NAIC Listing Process.** Section 4L(2) of Model #440 provides two ways a non-U.S. jurisdiction may meet the standards for its insurance groups to be exempt from the GCC:

   (a) If the jurisdiction has been determined to be a Reciprocal Jurisdiction for purposes of credit for reinsurance, which includes a requirement that the jurisdiction “recognizes the U.S. state regulatory approach to group supervision and group capital”;² or

   (b) If the jurisdiction has otherwise been determined to recognize and accept the GCC by procedures specified in regulation.

Jurisdictions meeting either of these criteria will be referred to informally as “‘Recognize and Accept’ Jurisdictions.” Sections 21D and 21E of Model #450 provide a general framework for how the process to identify “Recognize and Accept” Jurisdictions will work and specifically contemplates the development of a list of such jurisdictions through the NAIC Committee Process. The purpose of this document is to provide a documented evaluation process for creating and maintaining this list of jurisdictions that recognize and accept the GCC.

¹ Under Section 4L(2)(e) of Model #440, if the worldwide insurance operations of a non-U.S. group are exempt from the GCC, the group’s U.S. Lead State Commissioner may nevertheless require a GCC that is limited to the group’s U.S. operations if: “after any necessary consultation with other supervisors or officials, it is deemed appropriate by the lead state commissioner for prudential oversight and solvency monitoring purposes or for ensuring the competitiveness of the insurance marketplace.” A group’s exemption is also contingent on the group providing sufficient information to the lead state, directly or through the group-wide supervisor, sufficient to enable the lead state to comply with the group supervision approach set forth in the NAIC Financial Analysis Handbook.

² Model #440. § 4L(2)(c).
3. **Covered Agreements.** The “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” was signed on September 22, 2017. On December 18, 2018, a similar Covered Agreement was signed with the United Kingdom (UK) (collectively “Covered Agreements”). The Covered Agreements include, inter alia, the elimination of reinsurance collateral requirements for certain reinsurers licensed and domiciled in participating jurisdictions, and limit the worldwide application of prudential group insurance measures on insurance groups based in participating jurisdictions. In relevant part, the Covered Agreements provide that U.S. insurers and reinsurers can operate in the EU and UK without subjecting the U.S. parent to the host jurisdiction’s group-level governance, solvency and capital, and reporting requirements, and also provide the same protections for EU and UK insurers and reinsurers operating in the U.S. However, the Covered Agreements only exempt U.S., EU and UK insurance groups from each other’s worldwide group capital requirements if the home supervisor performs worldwide group capital assessments on its own insurance groups and has the authority to impose preventive and corrective measures.

4. **Reciprocal Jurisdictions.** In response to the Covered Agreements, the NAIC also amended the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) to provide that jurisdictions that are subject to in-force covered agreements are considered to be “Reciprocal Jurisdictions,” and large, financially strong reinsurers that are based in those jurisdictions are not required to post reinsurance collateral. In addition, a “Qualified Jurisdiction” under Section 2E of Model #785 may become a Reciprocal Jurisdiction if, among other requirements, it “recognizes the U.S. state regulatory approach to group supervision and group capital.” By the terms of the Covered Agreements, insurance groups based in EU Member States and the UK are entitled to exemption from the extraterritorial application of the U.S. GCC, and Section 4L(2)(c) of Model #440 recognizes that other Reciprocal Jurisdictions, which have made the same commitment, are entitled to the same treatment.

5. **Other Jurisdictions that Recognize and Accept.** In addition, because most of the requirements for Reciprocal Jurisdiction status are not relevant to group capital and group supervision, Section 4L(2)(d) of Model #440 provides an alternative pathway for the exemption. The ultimate controlling person of an insurance holding company system whose non-U.S. group-wide supervisor is not in a Reciprocal Jurisdiction is exempted from filing the GCC as long as the jurisdiction of its group-wide supervisor “recognizes and accepts” the GCC, as specified by the commissioner in regulation. Section 21D of Model #450 provides that a non-U.S. jurisdiction is considered to “recognize and accept” the GCC if it satisfies all of the following criteria:
(a) The non-U.S. jurisdiction recognizes the U.S. state regulatory approach to group supervision and group capital, by providing confirmation by a competent regulatory authority, in such jurisdiction, that insurers and insurance groups whose lead state is accredited by the NAIC under the NAIC Accreditation Program shall be subject only to worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, by the lead state and will not be subject to group supervision, including worldwide group governance, solvency and capital, and reporting, at the level of the worldwide parent undertaking of the insurance or reinsurance group by the non-U.S. jurisdiction;

(b) Where no U.S. insurance groups operate in the non-U.S. jurisdiction, that non-U.S. jurisdiction indicates formally in writing to the lead state with a copy to the International Association of Insurance Supervisors that the group capital calculation is an acceptable international capital standard. This will serve as the documentation otherwise required in Section 21D(1)(a);

(c) The non-U.S. jurisdiction provides confirmation by a competent regulatory authority in such jurisdiction that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the lead state commissioner in accordance with a memorandum of understanding or similar document between the commissioner and such jurisdiction, including but not limited to the International Association of Insurance Supervisors Multilateral Memorandum of Understanding or other multilateral memoranda of understanding coordinated by the NAIC. The commissioner shall determine, in consultation with the NAIC Committee Process, if the requirements of the information sharing agreements are in force;

(d) Notwithstanding these exemptions, Section 4L(2)(e) of Model #440 provides that a lead state commissioner shall require the group capital calculation for U.S. operations of any non-U.S. based insurance holding company system from a Reciprocal Jurisdiction or “Recognize and Accept” Jurisdiction where, after any necessary consultation with other supervisors or officials, it is deemed appropriate by the commissioner for prudential oversight and solvency monitoring purposes or for ensuring the competitiveness of the insurance marketplace. Section 21E(1) of Model #450 then provides that to assist with a determination under Section 4L(2)(e) of Model #440, the list will also identify whether a jurisdiction that is exempted under either Sections 4L(2)(c) or 4L(2)(d) requires a group capital filing for any U.S.-based insurance group’s operations in that non-U.S. jurisdiction.
6. **Mutual Recognition of Jurisdictions (E) Working Group.** On March 8, 2021, the Financial Condition (E) Committee repositioned the Qualified Jurisdiction (E) Working Group to report directly to the Committee and revised the name of the group to the Mutual Recognition of Jurisdictions (E) Working Group. The Working Group received the additional charge of developing a process for evaluating jurisdictions that meet the NAIC requirements for recognizing and accepting the GCC (“Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation,” or “Recognize and Accept” Process). A separate process exists for evaluating Qualified and Reciprocal Jurisdictions (“Process for Evaluating Qualified and Reciprocal Jurisdictions”), and it is intended that the “Recognize and Accept” Process will closely mirror this process. The Committee charged this Working Group with developing and implementing the “Recognize and Accept” Process due to this Working Group’s experience and expertise in evaluating the insurance regulatory systems of non-U.S. jurisdictions and their recognition of U.S. group-wide supervision.

7. **List of Jurisdictions that Recognize and Accept the GCC.** The Mutual Recognition of Jurisdictions (E) Working Group will evaluate non-U.S. jurisdictions in accordance with this “Recognize and Accept” Process. A list of “Recognize and Accept” Jurisdictions is published through the NAIC committee process (“NAIC List of Jurisdictions that Recognize and Accept the Group Capital Calculation”; “Recognize and Accept’ List”; or “List”). The creation of the List does not constitute a delegation of regulatory authority to the NAIC. Although a state must consider this List under Section 21E(3) of Model #450 in its determination of whether a non-U.S. insurance group is exempt from filing an annual GCC, the List is not binding and the ultimate authority to designate a “Recognize and Accept” Jurisdiction resides solely in each state.

   (a) The List will include all Reciprocal Jurisdictions that recognize the U.S. state regulatory approach to group supervision and group capital. [See discussion in paragraph 9.]

   (b) The evaluation of non-U.S. jurisdictions that are non-Reciprocal Jurisdictions as “Recognize and Accept” Jurisdictions will be conducted in accordance with the provisions of Section 4L(2) of Model #440 and Section 21 of Model #450, and any other relevant guidance developed by the NAIC. [See discussion in paragraphs 10 and 11.]

   (c) As specified in Section 21E(1) of Model #450, the List will also identify which “Recognize and Accept” Jurisdictions require a group capital filing for a U.S.-based insurance group’s operations in that jurisdiction. [See discussion of Subgroup Capital Calculation in paragraph 13.]
(d) Upon final inclusion of a jurisdiction on the List, any confidential documents reviewed by the Mutual Recognition of Jurisdictions (E) Working Group in its evaluation of the jurisdiction will be made available to individual U.S. state insurance regulators upon request and confirmation that the information contained therein will remain confidential. The NAIC will maintain the List on its public website and in other appropriate NAIC publications.

(e) If a non-US group’s lead state exempts the group from the GCC, and the group-wide supervisor is based in a jurisdiction that is not on the “Recognize and Accept” List, the state must thoroughly document the justification for the exemption.

8. **Procedure for Evaluation of Non-U.S. Jurisdictions.** In undertaking the evaluation of a non-U.S. Jurisdiction for inclusion on the “Recognize and Accept” List, the Mutual Recognition of Jurisdictions (E) Working Group shall utilize similar processes and procedures to those outlined in the *Process for Evaluating Qualified and Reciprocal Jurisdictions*. Specifically, the Working Group will undertake the following procedure in making its evaluation:

(a) **Initiation of Evaluation.** Formal notification of the Mutual Recognition of Jurisdictions (E) Working Group’s intent to initiate the evaluation process will be sent by the NAIC to the supervisory authority in the jurisdiction selected. The process of evaluation and all related documentation are private and confidential matters between the NAIC and the applicant jurisdiction, unless otherwise provided in this document. Upon receipt of confirmation by a competent regulatory authority of the non-U.S. jurisdiction, the Mutual Recognition of Jurisdictions (E) Working Group:

i. Will direct NAIC staff and/or outside consultants with the appropriate knowledge, experience and expertise to review the materials received from the jurisdiction. Upon completing its review of the evaluation materials, the internal reviewer(s) will report initial findings to the Mutual Recognition of Jurisdictions (E) Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation. Copies of the initial findings may also be made available to the Federal Insurance Office (FIO) and other relevant federal authorities subject to appropriate confidentiality and information-sharing agreements being in place.

ii. Will issue public notice on the NAIC website inviting public comments with respect to consideration of the jurisdiction as a “Recognize and Accept” Jurisdiction.
iii. Will consider public comments from state regulators, U.S. insurance groups, and any other interested parties.

iv. May review other public materials deemed relevant to making a determination.

v. Will invite each non-U.S. jurisdiction, or its designee, to provide any additional information it deems relevant to making a determination.

vi. Relevant U.S. state and federal authorities will be notified of the Mutual Recognition of Jurisdictions (E) Working Group’s decision to evaluate a jurisdiction.

(b) Preliminary Evaluation Report. NAIC staff will prepare a Preliminary Evaluation Report for review by the Mutual Recognition of Jurisdictions (E) Working Group. The report will contain a recommendation as to whether the NAIC should recognize the jurisdiction as a “Recognize and Accept” Jurisdiction. Upon review by the Working Group, the results of the Preliminary Evaluation Report will be immediately communicated in written form to the supervisory authority of the jurisdiction under review. At that time, a copy of the Preliminary Evaluation Report will also be shared with the Group Capital Calculation (E) Working Group in regulator-to-regulator session. The Group Capital Calculation (E) Working Group will also be kept advised of any new developments in the evaluation of this jurisdiction.

(c) Final Evaluation Report. Upon receipt of the Preliminary Evaluation Report, the supervisory authority will have an opportunity to respond to the initial findings and determination. The Mutual Recognition of Jurisdictions (E) Working Group will consider any response, and will proceed to prepare its Final Evaluation Report. The Working Group will consider the Final Evaluation Report for approval in regulator-to-regulator session.

(d) Summary of Findings and Determination. Upon approval of the Final Evaluation Report, the Mutual Recognition of Jurisdictions (E) Working Group will issue a public statement and a summary of its findings with respect to its determination. At this time, the Working Group will release the Summary of Findings and Determination for public comment. Once the Working Group has finally adopted the Summary of Findings and Determination in open session after opportunity for public comment, it will submit the summary of its findings and its recommendation to the Financial Condition (E) Committee at an open meeting. Upon approval by the Committee, the summary and recommendation will be submitted to the Executive (EX) Committee and Plenary, as well as to the Federal Insurance Office (FIO), United States Trade Representative (USTR) and other relevant federal authorities for informational purposes. Upon approval as a “Recognize and Accept” Jurisdiction by the Executive
Committee and Plenary, the jurisdiction will be added to the NAIC List of Jurisdictions that Recognize and Accept the Group Capital Calculation.

9. Evaluation of Reciprocal Jurisdictions. Under Section 4L(2)(c) of Model #440, Reciprocal Jurisdictions that recognize the U.S. state regulatory approach to group supervision and group capital are exempt from the GCC. Because a “recognize and accept” evaluation by the Mutual Recognition of Jurisdictions (E) Working Group is already part of the Reciprocal Jurisdiction review process, all Reciprocal Jurisdictions designated by the NAIC through that review process are also automatically designated as “Recognize and Accept” Jurisdictions. Likewise, in view of the terms of the EU and UK Covered Agreements, all EU Member States and the UK are automatically designated “Recognize and Accept” Jurisdictions. If there is a material change to the terms of the U.S.-EU or U.S.-UK Covered Agreement, or if the United States enters into a new covered agreement with one or more non-U.S. jurisdictions, the Mutual Recognition of Jurisdictions (E) Working Group will consider, and will consult with FIO and USTR regarding, whether and how the applicability of the procedures in this document may apply.

10. Evaluation of Non-Reciprocal Jurisdictions with U.S. Insurance Group Operations. Under Section 21D(1)(a) of Model #450, a non-Reciprocal Jurisdiction, in which a U.S. insurance group has operations, that recognizes the U.S. state regulatory approach to group supervision and group capital may be included on the NAIC “Recognize and Accept” List. The Mutual Recognition of Jurisdictions (E) Working Group may rely on written confirmation by a competent regulatory authority in that jurisdiction that insurers and insurance groups whose lead state is accredited by the NAIC under the NAIC Accreditation Program shall be subject only to worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, by the lead state and will not be subject to group supervision, including worldwide group governance, solvency and capital, and reporting, at the level of the worldwide parent undertaking of the insurance or reinsurance group by the non-U.S. jurisdiction.

(a) The Mutual Recognition of Jurisdictions (E) Working Group will perform a due diligence review of available public and confidential documents to confirm that to the best of its determination the representations in the written confirmation are true and accurate.

(b) The jurisdiction must also have an acceptable Memorandum of Understanding to be included on the “Recognize and Accept” List, as described in paragraph 12 of this Process.
NAIC staff will work with the Mutual Recognition of Jurisdictions (E) Working Group and the applicant jurisdiction to prepare an acceptable confirmation letter for this purpose. The NAIC will publish a form letter in the Appendix: Letter Templates that a competent regulatory authority of a non-U.S. jurisdiction may use to provide confirmation pursuant to Section 21D(1)(a), Section 21D(1)(b) and 21D(2) of Model #450 as well as a template letter that any “Recognize and Accept” Jurisdiction, including a Reciprocal Jurisdiction, may use to provide confirmation, pursuant to Section 21(E)(1) of Model #450, as to whether or not it requires a group capital filing for any U.S. based insurance group’s operations. NAIC Staff will work with the jurisdiction to modify these forms if necessary for a particular jurisdiction.

Because the GCC embraces and encourages the concepts of mutual recognition and one group/one group-wide supervisor, a non-U.S. jurisdiction may be included on the “Recognize and Accept” List, enabling its insurance groups to do business in the U.S. without being subject to U.S group-wide supervision, even if no U.S. groups operate in that jurisdiction. Under Section 21D(1)(b) of Model #450, such a jurisdiction must document its recognition and acceptance by indicating formally in writing to the lead state of each of its insurance groups doing business in the U.S., with a copy to the International Association of Insurance Supervisors (IAIS), that the GCC is an acceptable international capital standard. The Mutual Recognition of Jurisdictions (E) Working Group may rely on written confirmation by a competent regulatory authority in that jurisdiction.

(a) The Mutual Recognition of Jurisdictions (E) Working Group will perform a due diligence review of available public and confidential documents to confirm that, to the best of its determination, the representations in the written confirmation are true and accurate.

(b) The jurisdiction must also have an acceptable Memorandum of Understanding to be included on the “Recognize and Accept” List, as described in paragraph 12 of this Process.

(c) NAIC staff will work with the Mutual Recognition of Jurisdictions (E) Working Group and the applicant jurisdiction to prepare an acceptable confirmation letter for this purpose.

12. Memorandum of Understanding.
Section 21D(2) of Model #450 requires a non-Reciprocal Jurisdiction that “recognizes and accepts” the GCC to provide confirmation by a competent regulatory authority that information regarding insurers, and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the lead state commissioner of any U.S.-
based insurance group doing business in that jurisdiction, in accordance with a memorandum of understanding or similar document between the commissioner and the jurisdiction. Acceptable MOUs include, but are not limited to, the International Association of Insurance Supervisors Multilateral Memorandum of Understanding (“IAIS MMoU”) or other multilateral memoranda of understanding coordinated by the NAIC. The Mutual Recognition of Jurisdictions (E) Working Group will review such memoranda of understanding and include an opinion in the Summary of Findings and Determination as to whether the jurisdiction has met this condition to be included on the “Recognize and Accept” List.

(a) The lead state will act as a conduit for information between the “Recognize and Accept” Jurisdiction and other states that have an insurer from that jurisdiction, and will share information with these states consistent with the terms governing the further sharing of information included in the applicable MOU, and pursuant to the NAIC Master Information Sharing and Confidentiality Agreement. The jurisdiction must also confirm in writing that it is willing to permit this lead state to act as the contact for purposes of sharing information concerning all insurers within the group.

(b) If a jurisdiction has not been approved by the IAIS as a signatory to the MMoU, it must either (1) enter into an MOU with the lead state, or (2) enter into an MOU with a state that has agreed to serve as a single point of contact for multiple lead states, similar to the procedure for sharing information under the Process for Evaluating Qualified and Reciprocal Jurisdictions. The MOU must also provide for appropriate confidentiality safeguards with respect to the information shared among the jurisdictions.

(c) The same requirements and procedures will apply to a Reciprocal Jurisdiction that is subject to a case-by-case “recognize and accept” review, unless the necessary information-sharing procedures are already specified in the applicable covered agreement.

13. Prudential Oversight and Solvency Monitoring. Section 4L(2)(e) of Model #440 directs a lead state commissioner to require the group capital calculation for U.S. operations of any non-U.S. based insurance holding company system based in a “Recognize and Accept” Jurisdiction if, after any necessary consultation with other supervisors or officials, the commissioner deems such a “subgroup” calculation to be appropriate for prudential oversight and solvency monitoring purposes or for ensuring the competitiveness of the insurance marketplace. Section 21E(1) of Model #450 provides that to assist with such a determination, the “Recognize and Accept” List will also identify whether a listed jurisdiction requires a group capital filing for any U.S. based insurance group’s operations in that jurisdiction. As part of Paragraph 8, Procedure for Evaluation of Non-U.S. Jurisdiction, the Mutual Recognition of Jurisdictions (E) Working Group will perform a due diligence review of available public and confidential
documents to confirm whether or not any “Recognize and Accept” Jurisdiction requires a subgroup group capital filing for a U.S.-based insurance group’s operations, and a discussion and findings on this review will be included in the Preliminary Evaluation Report, Final Evaluation Report and Summary of Findings and Determination. If the Working Group has evidence indicating that a jurisdiction requires a subgroup group capital filing for any U.S.-based insurance group’s operations in that jurisdiction, it will attempt to obtain written confirmation of the existence and scope of any such requirement from a competent regulatory authority in that jurisdiction, but it is recognized that such a confirmation is not an essential element of the Working Group’s determination. The NAIC will identify such jurisdictions on the “Recognize and Accept” List, and may include an explanatory note in cases where a simple “Yes” or “No” response does not adequately describe the jurisdiction’s requirements. States may rely on this List when making determinations under Section 4L(2)(e) of Model #440.

14. Process for Periodic Evaluation. The process for determining whether a non-U.S. jurisdiction is a “Recognize and Accept” Jurisdiction is ongoing and subject to periodic review. The Mutual Recognition of Jurisdictions (E) Working Group will perform a yearly review of the NAIC List of Jurisdictions that Recognize and Accept the Group Capital Calculation to determine whether there have been any significant changes over the prior year that might affect inclusion on the List. This yearly review shall follow such abbreviated process as may be determined by the Working Group to be appropriate.

(a) Upon determination by a lead state commissioner that a non-U.S. jurisdiction no longer meets one or more of the requirements to “recognize and accept” the GCC, the lead state commissioner may provide a recommendation to the Working Group that the jurisdiction be removed from the “Recognize and Accept” List. Upon review and after consultation with the “Recognize and Accept” Jurisdiction, the Working Group may remove the jurisdiction from the List, which must then be confirmed by the Financial Condition (E) Committee and the NAIC Executive (EX) Committee and Plenary.

(b) Upon determination by a lead state commissioner that a non-U.S. jurisdiction requires a group capital filing for any U.S. based insurance group’s operations in that non-U.S. jurisdiction, the lead state commissioner may provide a recommendation to the Working Group that the non-U.S. jurisdiction be identified as such on the “Recognize and Accept” List. Upon receipt of any such notice, the Mutual Recognition of Jurisdictions (E) Working Group will also consider whether it is necessary to re-evaluate the jurisdiction’s “Recognize and Accept” status.

(c) The Mutual Recognition of Jurisdictions (E) Working Group will also give due consideration to any notice from a U.S.-based insurance group that it has been
required to perform a group capital calculation, at either the group-wide or subgroup level, in a jurisdiction on the “Recognize and Accept” List.

(d) If a jurisdiction referred for re-evaluation under this Paragraph is a Reciprocal Jurisdiction, the Mutual Recognition of Jurisdictions (E) Working Group shall conduct a concurrent review of the jurisdiction’s continuing status as a Reciprocal Jurisdiction, or, in the case of a jurisdiction entitled to that status by virtue of a covered agreement, shall refer the matter to the Reinsurance (E) Task Force for further discussion and communication with appropriate federal and/or international authorities, in accordance with the Process for Evaluating Qualified and Reciprocal Jurisdictions.

Appendix: Letter Templates

Paragraph 10(c) of the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation provides that the NAIC will publish a form letter that a competent regulatory authority of a non-U.S. jurisdiction that is not a Reciprocal Jurisdiction may use to provide confirmation pursuant to Section 21(D)(1)(a), Section 21(D)(1)(b) and 21(D)(2) of the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450), as well as a template letter that any “Recognize and Accept” Jurisdiction, including a Reciprocal Jurisdiction, may use to provide confirmation, pursuant to Section 21(E)(1) of Model #450, as to whether or not it requires a group capital filing for any U.S. based insurance group’s operations. The following template letters are designed to satisfy these requirements:

A. Jurisdictions with U.S. Insurance Group Operations. In order to satisfy the requirements of Sections 21D(1)(a) and 21D(2) of Model #450, the competent regulatory authority of a non-U.S. Jurisdiction in which U.S. insurance groups operate shall provide the NAIC with a written letter, confirming, as follows:

As the competent regulatory authority for [non-U.S. Jurisdiction], I hereby confirm to the National Association of Insurance Commissioners (NAIC) and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories the following:

- [Non-U.S. Jurisdiction] recognizes the U.S. state regulatory approach to group supervision and group capital, and confirms that that insurers and insurance groups whose lead state is accredited by the NAIC under the NAIC Accreditation Program shall be subject only to worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, by the lead state and will not be subject to group supervision, including
worldwide group governance, solvency and capital, and reporting, at the level of the worldwide parent undertaking of the insurance or reinsurance group by the non-U.S. jurisdiction;

- Information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to a lead state commissioner in accordance with a memorandum of understanding or similar document between the commissioner and [non-U.S. Jurisdiction], including but not limited to the International Association of Insurance Supervisors Multilateral Memorandum of Understanding or other multilateral memoranda of understanding coordinated by the NAIC.

- [Non-U.S. Jurisdiction] will immediately notify the NAIC upon any changes to the assurances provided in this letter.

B. Jurisdictions with No U.S. Insurance Group Operations. In order to satisfy the requirements of Sections 21D(1)(b) and 21D(2) of Model #450, the competent regulatory authority of a non-U.S. Jurisdiction in which no U.S. insurance groups operate shall provide the NAIC with a written letter, confirming, as follows:

As the competent regulatory authority and lead insurance regulatory supervisor for [non-U.S. Jurisdiction], I hereby confirm to the National Association of Insurance Commissioners (NAIC) and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories, with a copy to the International Association of Insurance Supervisors (IAIS), the following:

- [Non-U.S. Jurisdiction] recognizes the Group Capital Calculation as defined under Section 4L(2) of the NAIC Insurance Holding Company System Regulatory Act (#440) as an acceptable international capital standard.

- Information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to a lead state commissioner in accordance with a memorandum of understanding or similar document between the commissioner and [non-U.S. Jurisdiction], including but not limited to the International Association of Insurance Supervisors Multilateral Memorandum of Understanding or other multilateral memoranda of understanding coordinated by the NAIC.

- [Non-U.S. Jurisdiction] will immediately notify the NAIC upon any changes to the assurances provided in this letter.
C. Jurisdictions with Subgroup Capital Requirements. Paragraph 13 of the Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation provides that the Mutual Recognition of Jurisdictions (E) Working Group will attempt to obtain written confirmation from a competent regulatory authority in any jurisdiction where the Working Group has evidence indicating that the jurisdiction requires a subgroup group capital filing for any U.S. based insurance group’s operations in that jurisdiction. The NAIC will identify such jurisdictions on the “Recognize and Accept” List, and will provide an explanation and discussion on such determination in its Summary of Findings and Determination. States may rely on this List when making determinations under Section 4L(2)(e) of Model #440.
ReFAWG Review Process for Passporting Certified and Reciprocal Jurisdiction Reinsurers

Reinsurance Financial Analysis (E) Working Group
ReFAWG Review Process for Passporting
Certified and Reciprocal Jurisdiction Reinsurers
(“ReFAWG Review Process”)

1. ReFAWG Review Process

The Reinsurance Financial Analysis (E) Working Group (ReFAWG) normally operates in Executive Session, in accordance with the NAIC Policy Statement on Open Meetings and in open session when addressing policy issues. The authority of the Working Group is limited to that of an advisory body. This authority is derived from the 2011 Preface to Credit for Reinsurance Models, which provided that the purpose of the Working Group is “to provide advisory support and assistance to states in the review of reinsurance collateral reduction applications. Such a process with respect to the review of applications for reinsurance collateral reduction and qualified jurisdictions should strengthen state regulation and prevent regulatory arbitrage.”

a. In November 2011, the NAIC adopted revisions to its Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) which reduce the prior reinsurance collateral requirements for non-U.S. licensed reinsurers that are licensed and domiciled in Qualified Jurisdictions and establish a certification process for reinsurers under which a Certified Reinsurer is eligible for collateral reduction with respect to contracts entered into or renewed subsequent to certification. The authority to issue individual ratings of certified reinsurers is reserved to the NAIC member jurisdictions under their respective statutes and regulations. While this forum is intended to strengthen state regulation and prevent regulatory arbitrage, it is not within the authority of the Working Group to assign collateral requirements for individual reinsurers.

b. On June 25, 2019, the NAIC adopted further revisions to the models, which implement the reinsurance collateral provisions of the Covered Agreements with the European Union (EU) and the United Kingdom (UK). The revisions eliminate reinsurance collateral requirements and local presence requirements for EU and UK reinsurers that maintain a minimum amount of own-funds equivalent to $250 million USD and a solvency capital requirement (SCR) of 100% under Solvency II. The revisions also incorporate the “Reciprocal Jurisdiction” concept. Reciprocal Jurisdiction status is afforded to (1) jurisdictions subject to an in-force Covered Agreement within the U.S.; (2) accredited U.S. jurisdictions; and (3) Qualified Jurisdictions if they meet certain requirements in the credit for reinsurance models. ReFAWG has also been given additional responsibilities with respect to these “Reciprocal Jurisdiction Reinsurers.” ReFAWG will coordinate its efforts with the Mutual Recognition of Jurisdictions (E) Working Group (formerly known as the Qualified Jurisdictions (E) Working Group).

c. Issues upon which the Working Group may provide advisory support and assistance include but are not limited to:

i. Provide advisory support and assistance to states in the review of reinsurance collateral reduction applications. Such a process with respect to the review of applications for
reinsurance collateral reduction and qualified jurisdictions should strengthen state regulation and prevent regulatory arbitrage.

ii. Provide a forum for discussion, among NAIC jurisdictions, of reinsurance issues related to specific companies, entities or individuals.

iii. Support, encourage, promote and coordinate multi-state efforts in addressing issues related to certified reinsurers, including but not limited to multi-state recognition of certified reinsurers.

iv. Provide analytical expertise and support to the states with respect to certified reinsurers and applicants for certification.

v. Interact with domiciliary regulators of ceding insurers and certifying states to assist and advise on the most appropriate regulatory strategies, methods and actions with respect to certified reinsurers.

vi. Provide advisory support with respect to issues related to the determination of qualified jurisdictions.

vii. Ensure the public passporting website remains current.

viii. For reinsurers domiciled in Reciprocal Jurisdictions, determine the best and most effective approaches for the financial solvency surveillance to assist the states in their work to protect the interests of policyholders.

2. **Lead States and Passporting Process**

   a. A reinsurer seeking recognition as either a Certified Reinsurer or a Reciprocal Jurisdiction Reinsurer must submit certain information to each state in which it seeks such recognition. A reinsurer may decide to make a filing with a Lead State and use the NAIC Passporting process to facilitate multi-state recognition or a reinsurer may decide to submit the information to each state as a separate application. Under the ReFAWG Review Process, ReFAWG will assist the states with the initial review of this information and provide guidance to the states in making their review of the reinsurer to determine whether it has met the regulatory requirements to be recognized as a Certified Reinsurer and/or a Reciprocal Jurisdiction Reinsurer.

   b. **Passporting for Certified Reinsurers** - In addition to this assistance to individual states, ReFAWG will also assist with a passporting process for the states. “Passporting” refers to the process under which a state has the discretion to defer to the certification of a reinsurer (and the rating assigned to that certified reinsurer) by another state. Under this process, a reinsurer will apply to an initial state for certification, referred to as the “Lead State,” which will begin its analysis of the reinsurer and notify ReFAWG of the application. The Lead State will complete its initial analysis and will submit filing information and other documentation to ReFAWG for a peer review. Upon completion of the confidential peer review process, ReFAWG will make its recommendation concerning both the certified status of the reinsurer and its rating. The Lead State then makes the final determination regarding certification, upon which the Lead State notifies ReFAWG and the certified reinsurer is eligible to apply for passporting into other states. States are encouraged to utilize the passporting process to reduce the amount of documentation filed with the states and reduce duplicate filings.
c. **Passporting for Reciprocal Jurisdiction Reinsurers** - A similar Passporting Process is in place with respect to Reciprocal Jurisdiction Reinsurers as outlined in Sections 5 and 6 below. In order to facilitate multi-state recognition of assuming insurers and to encourage uniformity among the states, the NAIC has initiated a process called “passporting” under which the commissioner has the discretion to defer to another state’s determination with respect to compliance with this section. Passporting is based upon individual state regulatory authority, and states are encouraged to act in a uniform manner in order to facilitate the passporting process. States are also encouraged to utilize the passporting process to reduce the amount of documentation filed with the states and reduce duplicate filings.

d. **Discretion to Defer to Lead State** - If an NAIC accredited jurisdiction has determined that the conditions set forth for recognition as a Reciprocal Jurisdiction Reinsurer have been met, the commissioner of any other state has the discretion to defer to that jurisdiction’s determination and add such assuming insurer to the list of assuming insurers to which cessions shall be granted credit. The commissioner may accept financial documentation filed with the Lead State or with the NAIC and is encouraged to support a uniform submission and approval process among the states of the NAIC. ReFAWG and the Mutual Recognition of Jurisdictions (E) Working Group will coordinate efforts to obtain financial information regarding both Certified Reinsurers and Reciprocal Jurisdiction Reinsurers and disseminate it to the states.

e. **Communication with ReFAWG** - The ReFAWG Review Process is designed to facilitate communication of relevant information with respect to individual reinsurers or reinsurance related issues by allowing interested state insurance regulators the opportunity to monitor the ReFAWG meetings and discussion. It should be noted that the process for engaging ReFAWG in the consideration of an application is intended to be flexible. Specific circumstances may necessitate discussion between ReFAWG and any states that have received any application in order to determine an appropriate lead state on a case-by-case basis.

f. **Change of Lead State** - The Lead State for a Certified Reinsurer and/or a Reciprocal Jurisdiction Reinsurer may change based upon mutual agreement between the current lead state and any other state where the reinsurer is recognized, with input to be provided by ReFAWG. Upon a change in lead state, NAIC staff will provide timely notification to all states. In order to facilitate a change of lead state from one state to another, both states should discuss the rationale for the change during a regulator-only ReFAWG meeting. NAIC Staff will update the lead state and note such change on NAIC systems and send notice to ReFAWG and interested regulators.

3. **ReFAWG Review Process for Certified Reinsurers**

ReFAWG makes available to the states a *Uniform Application Checklist for Certified Reinsurers* (Exhibit 1) for certification of reinsurers based upon the requirements of the Credit for Reinsurance Model Law and Regulation. It is intended that the checklist be used by lead states for the initial/renewal application review and by ReFAWG in its review of Passporting requests.
The following timeline applies to these filings:

In order to be eligible for certification, the assuming insurer shall meet the following requirements:

a. **Qualified Jurisdiction** - The assuming insurer must be domiciled and licensed to transact insurance or reinsurance in a Qualified Jurisdiction. The applicant must be in good standing and provide a copy of the certificate of authority or license to transact insurance and/or reinsurance business.

b. **Capital and Surplus** - The assuming insurer must maintain capital and surplus of no less than $250,000,000 as reported within its audited financial statement. This requirement may also be satisfied by an association including incorporated and individual unincorporated underwriters having minimum capital and surplus equivalents (net of liabilities) of at least $250,000,000 and a central fund containing a balance of at least $250,000,000.

c. **Financial Strength Ratings** - The assuming insurer must maintain financial strength ratings from two or more rating agencies deemed acceptable by the commissioner. These ratings shall be based on interactive communication between the rating agency and the assuming insurer and shall not be based solely on publicly available information. The applicant must provide the rating agency report. If the rating is a group rating, the rationale for the group rating must be provided. Initial or Affirmed financial strength rating dates must be within 15 months of the application date/renewal filing date. Acceptable rating agencies include: A.M. Best, Fitch Ratings, Moody’s, Standard & Poor’s or any other Nationally Recognized Statistical Rating Organization by the SEC. *Kroll is not recognized as an acceptable rating organization in Model #786 but has been recognized as an acceptable rating organization by the Reinsurance (E) Task Force.*
d. The following table outlines the necessary ratings needed to meet a secure level:

e. **Protocol for Considering a Group Rating** - Section 8B(4) of the Credit for Reinsurance Model Regulation (#786) provides, in relevant part: “Each certified reinsurer shall be rated on a legal entity basis, with due consideration being given to the group rating where appropriate....”

Understanding the rating agency basis for utilizing a group rating is a key factor in determining whether an applicant’s group rating may be considered appropriate. The recommended protocol for understanding the rationale involves one or more of the following protocol steps:

i. For reasons set forth in the rating agency report or its published ratings standards or guidelines, the rating agency utilizes the group rating as a consequence of finding that the company had sufficient interconnectivity with the group;

ii. For reasons set forth in the rating agency report or its published ratings standards or guidelines, the rating agency enhances the group rating due to the subsidiary’s potential benefit of capital support from one or more affiliated companies;

iii. The group rating was utilized because the subsidiary derives benefit from its inclusion within a financially strong and well-capitalized insurance group;
iv. The lead state has contacted the rating agency and was provided a written explanation for the use of the group rating;

v. Other factors deemed appropriate by the Reinsurance Financial Analysis (E) Working Group; or

vi. To assist the Lead State in the assessment of the appropriateness of the use of a group rating, applicants are encouraged to provide their rational for the use of a group rating.

f. Changes in Ratings

Section 8(B)(7)(a) of Model #786 provides that a certified reinsurer is required to notify the Commissioner of a certifying state within 10 days of any regulatory actions taken against the certified reinsurer, any change in the provisions of its domiciliary license or any change in rating by an approved rating agency, including a statement describing such changes and the reasons. The certified reinsurer may also fulfill this requirement by notifying its Lead State commissioner, with this information being distributed to other certifying states by the NAIC through the ReFAWG process. Upon receipt of any such notification, a certifying state should immediately notify ReFAWG in order to facilitate communication of the information to other states. ReFAWG will subsequently send notification to all applicable regulators and may coordinate an interim meeting as deemed appropriate in order to discuss the issue(s).

Changes requiring action by a certifying state in accordance with statute and/or regulation may include but are not limited to: deterioration in financial condition; downgrade in a financial strength rating; change in the status of its domiciliary license; change in the qualification status of its domestic jurisdiction; and the triggering of certain thresholds with respect to reinsurance obligations to U.S. ceding insurers that are past due (in accordance with Section 8(B) of Model #786). While such changes may require action under statute or regulation, the ReFAWG process is intended to facilitate communication and coordination with respect to the date upon which changes in a certified reinsurer’s rating/status are effective, as well as discussion of any other relevant issues.

As part of the ongoing review process, other information may come to the attention of a certifying state and/or ReFAWG that warrants consideration with respect to a certified reinsurer’s rating/status. While ReFAWG cannot require a state to delay any action with respect to a certified reinsurer’s rating/status, certifying states are strongly encouraged to notify ReFAWG prior to taking any related action, as the ReFAWG process will serve to provide a proactive regulatory mechanism for communication of such information, discussion among regulators with respect to changes being considered on the basis of subjective rating criteria, and possible coordination of applicable effective dates if such changes are enacted. Upon receipt of any such information, ReFAWG will send notification to the NAIC Chief Financial Regulators listing and may coordinate an interim meeting as deemed appropriate in order to discuss the issue(s).
g. **Schedule F/S (Ceded Reinsurance)** – Applicants domiciled in the U.S. must provide the most recent NAIC Annual Statement Blank Schedule F (property/casualty) and/or Schedule S (life and health). Applicants domiciled outside the U.S. must provide Form CR-F (property/casualty) and/or Form CR-S (life and health), completed in accordance with the instructions.

h. **Disputed and/or Overdue Reinsurance Claims** - The applicant must provide a detailed explanation regarding reinsurance obligations to U.S. cedents that are in dispute and/or more than 90 days past due that exceed 5% of its total reinsurance obligations to U.S. cedents as of the end of its prior financial reporting year or reinsurance obligations to any of the top 10 U.S. cedents (based on the amount of outstanding reinsurance obligations as of the end of its prior financial reporting year) that are in dispute and/or more than 90 days past due exceed 10% of its reinsurance obligations to that U.S. cedent. The applicant must then provide a description of its business practices in dealing with U.S. ceding insurers and a statement that the applicant commits to comply with all contractual requirements applicable to reinsurance contracts with U.S. ceding insurers.

i. **Mechanisms Used to Secure Obligations Incurred as a Certified Reinsurer** - The applicant must specify the mechanisms it will use to secure obligations incurred as a Certified Reinsurer. Use of multi-beneficiary trust must include: (1) approval from the domiciliary regulator; (2) the form of the trust that will be used as a certified reinsurer; and (3) the form of the trust that will be used to secure obligations incurred outside of the applicant’s certified reinsurer status (if applicable).

j. **Regulatory Actions** – The applicant must provide a description of any regulatory actions taken against the applicant. Include details on all regulatory actions, fines, and penalties. Further, a description of any changes in with respect to the provisions of the applicant’s domiciliary license should be provided.

k. **Audited Financial Report and Actuarial Opinion** – As filed with its non-U.S. jurisdiction supervisor, with a translation into English, the applicant must file audited financial statement for the current and prior year and an actuarial opinion (must be stand-alone, or the functional equivalent under the Supervisor’s applicable Actuarial Function Holder Regime).

l. **Solvent Schemes of Arrangement** - The applicant must provide a description of any past, present, or proposed future participation in any solvent scheme of arrangement, or similar procedure, involving U.S. ceding insurers.

m. **Form CR-1** - The applicant must provide a state lead state specific Form CR-1, which must be properly executed by an officer authorized to bind the applicant to the commitments set forth in the form.

n. **Other Requirements** - The applicant must commit to comply with other reasonable requirements deemed necessary for certification by the certifying state. Further, the applicant must provide a statement that it agrees to post 100% security upon the entry of an order of rehabilitation or conservation against the ceding insurer or its estate.
o. **Public Notice** - The commissioner is required to post notice on the insurance department’s website promptly upon receipt of any application for certification, including instructions on how members of the public may respond to the application. The commissioner may not take final action on the application until at least 30 days after posting such notice. The commissioner will consider any comments received during the public notice period with respect to this application.

4. **Certified Reinsurers – Certified by Another NAIC Accredited Jurisdiction**

If an applicant for certification has been certified as a reinsurer in an NAIC accredited jurisdiction, the state has the discretion to defer to that jurisdiction’s certification and assigned rating (i.e., passporting) as provided in the *Uniform Application Checklist for Certified Reinsurers* (Exhibit 1).

To assist in the determination to defer to another jurisdiction’s certification the following documents are required:

a. **Qualified Jurisdiction** - The assuming insurer must be domiciled and licensed to transact insurance or reinsurance in a Qualified Jurisdiction.

b. **Verification of Certification Issued by an NAIC Accredited Jurisdiction** – The applicant must provide a copy of the approval letter or other documentation provided to the applicant by the NAIC accredited jurisdiction. The letter should include the state, rating and collateral percentage assigned, effective date, lines of business, and the applicant’s statement on compliance. ReFAWG may also verify a certification issued by an NAIC accredited jurisdiction through its internal processes.

c. **Mechanisms Used to Secure Obligations Incurred as a Certified Reinsurer** - The applicant must specify the mechanisms it will use to secure obligations incurred as a Certified Reinsurer. Use of multi-beneficiary trust must include: (1) approval from the domiciliary regulator; (2) the form of the trust that will be used as a certified reinsurer; and (3) the form of the trust that will be used to secure obligations incurred outside of the applicant’s certified reinsurer status (if applicable).

d. **Form CR-1** - The applicant must provide a state lead state specific Form CR-1, which must be properly executed by an officer authorized to bind the applicant to the commitments set forth in the form.

e. **Other Requirements** - The applicant must commit to comply with other reasonable requirements deemed necessary for certification by the certifying state. Further, they must provide a statement that they agree to post 100% security upon the entry of an order of rehabilitation or conservation against the ceding insurer or its estate.

f. **Public Notice** - The commissioner is required to post notice on the insurance department’s website promptly upon receipt of any application for certification, including instructions on how members of the public may respond to the application. The commissioner may not take final action on the
application until at least 30 days after posting such notice. The commissioner will consider any comments received during the public notice period with respect to this application.

5. **Reciprocal Jurisdiction Process - Initial Application to Lead State**

**Annual Verification of Minimum Standards:**

Pursuant to the *Uniform Checklist for Reciprocal Jurisdiction Reinsurers* (Exhibit 2), the “Lead State” will uniformly require assuming insurers to provide the following documentation so that other states may rely upon the Lead State’s determination:

a. **Status of Reciprocal Jurisdiction** - The assuming insurer must be licensed to write reinsurance by, and have its head office or be domiciled in, a Reciprocal Jurisdiction that is listed on the *NAIC List of Reciprocal Jurisdictions*. A “Reciprocal Jurisdiction” is a jurisdiction, as designated by the commissioner, that meets one of the following: (1) a non-U.S. jurisdiction that is subject to an in-force Covered Agreement with the United States; (2) a U.S. jurisdiction that meets the requirements for accreditation under the NAIC Financial Standards and Accreditation Program; or (3) a Qualified Jurisdiction that has been determined by the commissioner to meet all applicable requirements to be a Reciprocal Jurisdiction. The Reciprocal Jurisdiction Reinsurer should identify which type of jurisdiction it is domiciled in and provide any documentation to confirm this status if requested by the commissioner.

b. **Minimum Capital and Surplus** - The assuming insurer must have and maintain on an ongoing basis minimum capital and surplus, or its equivalent, calculated on at least an annual basis as of the preceding December 31 or at the annual date otherwise statutorily reported to the Reciprocal Jurisdiction: no less than $250,000,000 (USD); or if the assuming insurer is an association, including incorporated and individual unincorporated underwriters: minimum capital and surplus equivalents (net of liabilities) or own funds of the equivalent of at least $250,000,000 (USD); and a central fund containing a balance of the equivalent of at least $250,000,000 (USD). The assuming insurer’s supervisory authority must confirm to the Lead State commissioner on an annual basis according to the methodology of its domiciliary jurisdiction that the assuming insurer satisfies this requirement. The Mutual Recognition of Jurisdictions (E) Working Group will coordinate the
confirmations of the domiciliary jurisdictions with ReFAWG with respect to individual Reciprocal Jurisdiction Reinsurers.

c. **Minimum Solvency or Capital Ratio** - The assuming insurer must have and maintain on an ongoing basis a minimum solvency or capital ratio: The ratio specified in the applicable in-force Covered Agreement where the assuming insurer has its head office or is domiciled; or if the assuming insurer is domiciled in an accredited state, a risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, calculated in accordance with the formula developed by the NAIC; or if the assuming insurer is domiciled in a Reciprocal Jurisdiction that is a Qualified Jurisdiction, such solvency or capital ratio as the commissioner determines to be an effective measure of solvency. The assuming insurer’s supervisory authority must confirm to the Lead State commissioner on an annual basis that the assuming insurer complies with this requirement. The Mutual Recognition of Jurisdictions (E) Working Group will coordinate the confirmations of the domiciliary jurisdictions with ReFAWG with respect to individual Reciprocal Jurisdiction Reinsurers.

d. **Form RJ-1** - The assuming insurer must provide a signed Form RJ-1, which must be properly executed by an officer of the assuming insurer.

e. **Audited Financial Report** - The assuming insurer’s annual audited financial statements, in accordance with the applicable law of the jurisdiction of its head office or domiciliary jurisdiction, as applicable, including the external audit report as provided under Section 9C(5)(a) of Model #786.

f. **Solvency and Financial Condition Report or Actuarial Opinion** – The applicant must submit a solvency and financial condition report or actuarial opinion, if filed with the assuming insurer’s supervisor as provided under Section 9C(5)(b) of Model #786.

g. **Overdue Reinsurance Claims** – The applicant must submit a list of all disputed and overdue reinsurance claims outstanding for 90 days or more, regarding reinsurance assumed from ceding insurers domiciled in the United States as provided under Section 9C(5)(c) of Model #786. The commissioner shall request the reinsurer to provide the information required to demonstrate the reinsurer’s practice of prompt payment of claims under its reinsurance agreements prior to entry into a reinsurance agreement, and annually thereafter, in order to demonstrate compliance with Section 9C(6) of Model #786.

h. **Assumed and Ceded Reinsurance Schedules** – The applicant must submit information regarding the assuming insurer’s assumed reinsurance by ceding insurer, ceded reinsurance by the assuming insurer, and reinsurance recoverable on paid and unpaid losses by the assuming insurer as provided under Section 9C(5)(d) of Model #786. Applicants domiciled in the U.S. must provide the most recent NAIC Annual Statement Blank Schedule F (property/casualty) and/or Schedule S (life and health). Applicants domiciled outside the U.S. may provide this information using Form CR-F (property/casualty) and/or Form CR-S (life and health), which ReFAWG considers sufficient to meet this requirement.
i. **Prompt Payment of Claims** - The assuming insurer must maintain a practice of prompt payment of claims under reinsurance agreements. The lack of prompt payment will be evidenced if any of the following criteria is met: (1) more than fifteen percent (15%) of the reinsurance recoverables from the assuming insurer are overdue and in dispute as reported to the commissioner; (2) more than fifteen percent (15%) of the assuming insurer’s ceding insurers or reinsurers have overdue reinsurance recoverable on paid losses of 90 days or more which are not in dispute and which exceed for each ceding insurer $100,000, or as otherwise specified in a Covered Agreement; or (3) the aggregate amount of reinsurance recoverable on paid losses which are not in dispute, but are overdue by 90 days or more, exceeds $50,000,000, or as otherwise specified in a Covered Agreement.

6. **Reciprocal Jurisdiction Process – Passporting States**

Per the *Uniform Checklist for Reciprocal Jurisdiction Reinsurers* (Exhibit 2), if an NAIC accredited jurisdiction has determined that the conditions set forth under the *Filing Requirements for Lead States* have been met, the commissioner has the discretion to defer to that jurisdiction’s determination and add such assuming insurer to the list of assuming insurers to which cessions shall be granted credit. The commissioner may accept financial documentation filed with the Lead State or with the NAIC. The following document is required to be filed with the state:

a. **Form RJ-1** - The assuming insurer must provide a signed Form RJ-1, which must be properly executed by an officer of the assuming insurer.

b. **Verification of Determination Issued by an NAIC Accredited Jurisdiction** – The applicant must provide a copy of the approval letter or other documentation provided to the applicant by the NAIC accredited jurisdiction. The letter should include the state, effective date, and lines of business.

7. **NAIC Staff Review of Certified and Reciprocal Jurisdiction Reinsurers**

The reinsurer will file this information with the initial reviewing state and such Lead State will submit the information to ReFAWG in accordance with the applicable information sharing process. This submission by the Lead State will also facilitate other states’ access to the information. NAIC staff shall prepare a report for review by ReFAWG intended to provide information regarding whether the Lead State’s submission meets the requirements of the ReFAWG Review Process, and to determine whether there are any deficiencies in the application. This report will be considered confidential but may be made available to states through the NAIC’s information sharing process.

NAIC Staff under the direction of ReFAWG will assist in the review of the filings and in monitoring the ongoing condition of the reinsurers. If during the review process or during an interim period ReFAWG determines that a reinsurer’s assigned rating or status may warrant reconsideration, notice will be sent to the Lead State. The specific issues identified will be presented for discussion during the next ReFAWG meeting.
8. **Process for Ongoing Monitoring of Reinsurers**

Certified and Reciprocal Jurisdiction Reinsurers are required to file specific information to a certifying state on an ongoing basis. NAIC Staff and ReFAWG will review this information in an effort to assist states with the ongoing monitoring of the reinsurers. Subject to applicable state law, all non-public information submitted by reinsurers shall be kept confidential and regulator only.

9. **Withdrawal/Termination of a Certified or Reciprocal Jurisdiction Reinsurer**

When a reinsurer requests to withdraw its status or the lead state terminates the reinsurer’s status as a certified or reciprocal reinsurer, notice of this action should be promptly conveyed to the appropriate NAIC Staff. Once NAIC Staff receives notification of withdrawal or termination, the applicable Passported Reinsurers List(s) will be updated to reflect this status change. The Passported reinsurer will follow the lead state’s laws regarding its withdrawal or termination regarding any active reinsurance contracts.

10. **Interaction Between Certified Reinsurers and Reciprocal Jurisdiction Reinsurer Status**

   a. Under Section 8A(5) Model #786, credit for reinsurance shall apply only to reinsurance contracts entered into or renewed on or after the effective date of the certification of the assuming insurer with respect to Certified Reinsurers. Under Section 2F(7) of the Credit for Reinsurance Model Law (#785), credit shall be taken with respect to Reciprocal Jurisdiction Reinsurers only for reinsurance agreements entered into, amended, or renewed on or after the effective date of the statute adding this subsection, and only with respect to losses incurred and reserves reported on or after the later of (i) the date on which the assuming insurer has met all eligibility requirements to be designated a Reciprocal Jurisdiction Reinsurer, and (ii) the effective date of the new reinsurance agreement, amendment, or renewal.

   b. It is expected that certain assuming insurers may be considered to be Certified Reinsurers for purposes of in-force business or business with existing liabilities and Reciprocal Jurisdiction Reinsurers with respect to reinsurance agreements entered into, amended, or renewed on or after the effective date. In addition, these same reinsurers may also have certain blocks of business that are fully collateralized under the prior provisions of Model #785 and Model #786. The NAIC Blanks have been amended to reflect the status of these reinsurers with respect to each type of insurance assumed.

   c. With respect to those reinsurers that are currently Certified Reinsurers but are seeking recognition by ReFAWG as Reciprocal Jurisdiction Reinsurers for passporting purposes, the same process as outlined in paragraphs 3-6 of this ReFAWG Review Process must be followed. A Form RJ-1 must be filed with each state in which the reinsurer seeks recognition as a Reciprocal Jurisdiction Reinsurer, and the reinsurer must meet all other applicable requirements. However, states may share this information with other states through the NAIC and the ReFAWG Review Process, and previously filed information used in the review of the reinsurer as a Certified Reinsurer may also be utilized in its review as a Reciprocal Jurisdiction Reinsurer. For example, a Reciprocal Jurisdiction Reinsurer may cross reference information/documentation that has been filed with...
respect to its status as a Certified Reinsurer, so that it is not necessary to file duplicative documents. ReFAWG will take full advantage of the passporting process, with the intent of reducing the amount of documentation filed with the states and reduce duplicate filings.

d. During the initial phases of the implementation of the review of Reciprocal Jurisdiction Reinsurers, not all states may have fully implemented their internal processes for performing these reviews. During this interim period, if a Reciprocal Reinsurer has been approved by a lead state and ReFAWG, the Reciprocal Jurisdiction Reinsurer may seek passporting approval from other states that have adopted the model law and regulation even where a formal internal process for doing so has not yet been finalized. States and Reciprocal Jurisdiction Reinsurers are encouraged to communicate on these issues and, as appropriate, to coordinate through the NAIC to facilitate the passporting process.

11. Commissioner Shall Create and Publish Lists

Section 2E(3) of Model #785 and Section 8C(1) of Model #786 require the commissioner to publish a list of Qualified Jurisdictions, while Section 2E(4) of Model #785 and Section 8B(2) of Model #786 require the commissioner to publish a list of all Certified Reinsurers and their ratings. Section 2F(2) & (3) of Model #785 and Section 9D and E of Model #786 require the commissioner to (a) timely create and publish a list of Reciprocal Jurisdictions; and (b) timely create and publish a list of Reciprocal Jurisdiction Reinsurers. It is expected that the commissioner will publish these respective lists on the insurance department’s website, along with special instructions or other guidance as to how Certified Reinsurers and Reciprocal Jurisdiction Reinsurers may meet the applicable filing requirements under the models. There currently are no specific requirements as to the format in which these lists must be published, but ReFAWG and NAIC staff will assist the states with questions on the publication of these lists. In addition, ReFAWG will maintain links on its NAIC webpage to the lists published on the insurance departments’ webpages.
MEMORANDUM

To: Financial Regulation Standards and Accreditation (F) Committee

From: Financial Condition (E) Committee

Date: March 8, 2021

Re: 2020 Revisions to Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)

On Dec. 9, 2020, the NAIC Executive (EX) Committee and Plenary unanimously adopted revisions to the NAIC Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). These revisions implemented a Group Capital Calculation (GCC) for the purpose of group solvency supervision and Liquidity Stress Test (LST) for macroprudential surveillance.

Please find attached, memorandums and proposed changes to the Accreditation (E) Committee as adopted by the Financial Condition (E) Committee related to these most recent changes to #440 and #450. Each of the memorandum’s summarize the basis for recommending that certain provisions of these model changes become part of the Accreditation program as well as suggested timing. With respect to timing, consistent with action taken by the Financial Regulation Standards and Accreditation (F) Committee to use an expedited process in 2019 with respect to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) due to the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement), we recommend a similar expedited process with respect to states who are a Group Wide Supervisor of a group with operations in the EU or UK. The attached provide further details on the specifics of such recommendations.

On August 14, F Committee voted to expose the referral for a 1-year comment period beginning January 1, 2022 (pending approval by Plenary at the Fall National Meeting).

The exposure by F Committee differs from the original exposure in two ways:
- The proposed effective date for all states is January 1, 2026.
- The proposed significant elements for the group capital calculation were modified to allow commissioners to grant exemptions to groups meeting the qualifications set forth in Model #450 Section 21A and Section 21B without the requirement to file at least once.

Note: In conjunction with the motion, the F Committee strongly encourages all states with a group impacted by the Covered Agreement to adopt the group capital calculation revisions to Model #440 and Model #450 for those groups effective Nov. 7, 2022. The Committee also strongly encourages states with a group impacted by the liquidity stress test to adopt the relevant revisions to Model #440 as soon as possible.
MEMORANDUM

To: Financial Condition (E) Committee

From: Group Capital Calculation (E) Working Group

Date: February 25, 2021

Re: 2020 Revisions to Insurance Holding Company System Regulatory Model Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)

Executive Summary

On Dec. 9, 2020, the NAIC Executive (EX) Committee and Plenary unanimously adopted revisions to the NAIC Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). These revisions implemented a Group Capital Calculation (GCC) for the purpose of group solvency supervision and Liquidity Stress Test (LST) for macroprudential surveillance. This memorandum makes recommendations with respect to the accreditation standards that this Working Group believes is appropriate with respect to only the GCC and expect the Financial Stability (EX) Task Force to make separate recommendations to the Committee with respect to the LST.

The GCC was developed as a result of discussions which began in 2015. The GCC is a natural extension of work state insurance regulators had begun, in part by lessons learned from the most recent financial crisis, to better understand an insurance group’s financial risk profile for the purpose of enhancing policyholder protections. While state insurance regulators currently have the authority to obtain information regarding the capital positions of non-insurance affiliates, they do not have a consistent analytical framework for evaluating such information. The GCC is designed to address this shortcoming and will serve as an additional financial metric that will assist state insurance regulators in identifying risks that may emanate from a holding company system. The GCC, and related financial reporting, will provide comprehensive transparency to state insurance regulators, making risks more easily identifiable and quantifiable. For these reasons, the Working Group recommends adoption of #440 and #450 as accreditation standards for all states with the normal accreditation timeline, which would result in an effective date of January 1, 2026.

In addition, the GCC is intended to comply with the requirements under the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement), which was signed on Sept. 22, 2017. On Dec. 18, 2018, a similar Covered Agreement was signed with the United Kingdom (UK). The GCC is intended to meet the requirement that the states have a “worldwide group capital calculation” in place by Nov. 7, 2022 in order to avoid the EU from imposing a group capital assessment or requirement at the level of the worldwide parent undertaking. Failure of any state to do so for any U.S. group operating in such jurisdiction raises the potential for any supervisor in the EU or UK to impose its own group capital calculation (e.g., Solvency II capital requirements) on that group and therefore all of the U.S. insurers within that group. Due to this agreement, the Working Group recommends that the accreditation standard become effective Nov. 7, 2022 for those states who are the Group Wide Supervisor of a group with operations in the EU or UK.
A statement and explanation of how the potential standard is directly related to solvency surveillance and why the proposal should be included in the standards:

The current Insurance Holding Company Systems accreditation standard requires that state law shall contain the significant elements from Model #440 and Model #450. These models have provided state insurance departments the framework for insurance group supervision since the early 1970s. Following the 2008 financial crisis, state regulators identified group supervision as an area where improvements could be made to the U.S. system. In December 2010, the NAIC adopted changes to the models enhancing the domestic legal structure under which holding companies are supervised. In December 2014, the NAIC adopted revisions to clarify legal authority and powers to act as a group-wide supervisor for internationally active insurance groups. These changes are newly required elements of the NAIC Accreditation Program and have been satisfactorily adopted by nearly all accredited U.S. jurisdictions. As discussed in the preceding paragraphs, the GCC was designed to enhance these same standards that were previously included as accreditation standards.

A statement as to why ultimate adoption by every jurisdiction may be desirable:

The Group Capital Calculation (E) Working Group believes that all states that are the lead state for a group subject to the GCC should be required to adopt the model revisions. The GCC is a tool intended to help protect the policyholders in all states from the risk that can emanate from outside the domestic insurer and will be an input into the Group Profile Summary (GPS). After an initial filing by all insurance groups, the GCC is required for all U.S. insurance groups with greater than $1 billion in premium. The groups subject to the GCC are expected to have domestic insurers in most U.S. states. Therefore, it is recommended that that the new significant elements apply to all states.

A statement as to the number of jurisdictions that have adopted and implemented the proposal or a similar proposal and their experience to date:

We are not currently aware of any states that have adopted the 2020 revisions to Model #440 and Model #450, although we have been advised that many states have begun their legislative processes for adoption of these revisions.

A statement as to the provisions needed to meet the minimum requirements of the standard. That is, whether a state would be required to have “substantially similar” language or rather a regulatory framework. If it is being proposed that “substantially similar” language be required, the referring committee, task force or working group shall recommend those items that should be considered significant elements:

The current accreditation standard for Model #440 and Model #450 requires state adoption on a substantially similar basis. Therefore, the Group Capital Calculation (E) Working Group supports the attached proposed significant elements (Attachment A) be adopted by NAIC-accredited jurisdictions in a “substantially similar” manner, as that term is defined in the Accreditation Interlineations of the NAIC Financial Regulation Standards and Accreditation Program. The Financial Regulation Standards and Accreditation (F) Committee should consider a waiver of procedure as provided for in the Accreditation Program Manual and expeditiously consider adoption of this standard. The Group Capital Calculation (E) Working Group recommends that the accreditation standard become effective Nov. 7, 2022, the end of the 60-month period contemplated under the Covered Agreement, with enforcement of the standard to commence Jan. 1, 2023. However, the Working Group is also supportive of the effective date being bifurcated to allow those states that are not the Group Wide Supervisor of a group with operations in the EU or UK to be subject to a later effective date in line with the normal accreditation timeline, which would result in an effective date of January 1, 2026.
There were also revisions made to Section 8 of Model #440 regarding Confidential Treatment. The Group Capital Calculation (E) Working Group strongly supports the use of language similar to that contained in Section 8G of Model #440. This language was considered very critical to the GCC as its very important that members of the insurance industry (or regulators) not be allowed to make the results of the GCC public in any way as they are designed as regulatory-only tools. Unlike RBC that has regulatory trigger points, the GCC does not, and the regulators of these groups believed it would be detrimental if these tools were used by insurers as a means to advertise their relative solvency strength.

An estimate of the cost for insurance companies to comply with the proposal and the impact on state insurance departments to enforce it, if reasonably quantifiable:

The NAIC has not performed a cost/benefit analysis with respect to the 2020 revisions to Model #440 and Model #450, nor do we believe that the specific costs for insurance companies to comply with the proposal and the impact on state insurance departments to enforce it are reasonably quantifiable. However, the possible exemptions allowed under Model #450 are specifically designed to consider the cost to complete the GCC by the insurance company and the benefits of the GCC to the lead-state commissioner. More specifically, all insurers are required to submit the GCC at least once, after which time the expectation is that the lead state commissioner will evaluate the added insight brought to the state from GCC; then, provided the group has premium less than $1 billion, no international business, no risky non-regulated entities and no banks or similar capital regulated entities in the group, the lead state commissioner can exempt the group from filing in the future.

In addition, the construction of the GCC also considers cost of completion and specifically provides a principle-based approach where the insurance company can exclude non-risky affiliates from the calculation and also provides the insurance company to group the information of multiple non-insurance/non-regulated affiliates as a means to further reduce the burden of completion. In short, the GCC is only as complex as the insurance group has structured itself, and therefore the GCC already inherently considers the cost to comply.
6. Insurance Holding Company Systems

State law should contain the NAIC *Insurance Holding Company System Regulatory Act* (#440), or an act substantially similar, and the department should have adopted the NAIC *Insurance Holding Company System Model Regulation* (#450).

iv. Provision that sets forth the criteria for a jurisdiction to be included on the NAIC listing that “recognize and accept the group capital calculation” similar to that required under Section 21D and Section 21E of Model #450?
MEMORANDUM

To: Financial Condition (E) Committee
From: Financial Stability (E) Task Force
Date: February 22, 2021
Re: 2020 Revisions to Insurance Holding Company System Regulatory Act (#440)

Executive Summary

On Dec. 9, 2020, the NAIC Executive (EX) Committee and Plenary unanimously adopted revisions to the NAIC Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). These revisions implemented a Group Capital Calculation (GCC) for the purpose of group solvency supervision and Liquidity Stress Test (LST) for macroprudential surveillance. This memorandum makes recommendations with respect to the accreditation standards that this Task Force believes is appropriate with respect to only the LST and expect the Group Capital Calculation (E) Working Group to make separate recommendations to the Committee with respect to the GCC.

Post-financial crisis, regulators from all financial sectors across the globe recognized the need for macroprudential surveillance and tools to address macroprudential risks. While the solvency framework established and managed by the Financial Condition (E) Committee thoroughly addresses legal entity insurers and insurance groups, there was no group with a macroprudential scope. This Task Force was created to fill this gap, and in 2017 was charged to “analyze existing post-financial crisis regulatory reforms for their application in identifying macroprudential trends, including identifying possible areas of improvement or gaps, and propose . . . enhancements and/or additions to further improve the ability of state insurance regulators and industry to address macroprudential impacts.” The Task Force created the NAIC Macroprudential Initiative (MPI) to focus its efforts in four key areas: liquidity risk, recovery and resolution, capital stress testing, and exposure concentrations. Liquidity risk was consistently recognized as a key macroprudential risk by federal and international regulatory agencies, and there were several attempts to assess potential market impacts emanating from a liquidity stress in the insurance sector. Many of these analyses relied heavily on anecdotal assumptions and observations from behaviors of other financial sectors.

In order to provide more evidence-based analyses, the Task Force decided to develop a LST for large life insurers that would aim to capture the impact on the broader financial markets of aggregate asset sales under a liquidity stress event. Unlike capital adequacy, which has risk-based capital as a standardized legal entity capital assessment tool and the newly created Group Capital Calculation to provide a capital analysis tool at the group level, there is no regulatory liquidity assessment or stress tool. The Task Force focused on large life insurers due to the long-term cash buildup involved in many life insurance contracts and the potential for large scale liquidation of assets, not because liquidity risk does not exist in other insurance segments. Thus, the primary goal of the LST is to provide quantitative as well as qualitative insights for macroprudential surveillance, such as identifying the amount of asset sales that could occur during a specific stress scenario; but it will also aid micro prudential regulation as well. Because this stress testing is complex and resource-intensive, a set of scope criteria were developed to identify life insurers with large balances of activities assumed to be highly correlated with liquidity risk; thus, many life insurers will not be subject to the LST.
A statement and explanation of how the potential standard is directly related to solvency surveillance and why the proposal should be included in the standards:

The current Insurance Holding Company Systems accreditation standard requires that state law shall contain the significant elements from Model #440 and Model #450. These models have provided state insurance departments the framework for insurance group supervision since the early 1970s. Following the 2008 financial crisis, state regulators identified group supervision as an area where improvements could be made to the U.S. system. In December 2010, the NAIC adopted changes to the models enhancing the domestic legal structure under which holding companies are supervised. In December 2014, the NAIC adopted revisions to clarify legal authority and powers to act as a group-wide supervisor for internationally active insurance groups. These changes are newly required elements of the NAIC Accreditation Program and have been satisfactorily adopted by nearly all accredited U.S. jurisdictions. As discussed in the preceding paragraphs, the LST was designed to enhance these same standards that were previously included as accreditation standards.

Macroprudential risks can directly impact regulated legal entity insurers and groups, and/or can emanate from or be amplified by these insurers and transmitted externally. The NAIC solvency surveillance framework must address macroprudential risks to ensure that the companies states regulate remain financially strong for the protection of policyholders, while serving as a stabilizing force to contribute to financial stability, including in stressed financial markets. The LST is the first new tool developed for the macroprudential program within the financial solvency framework.

A statement as to why ultimate adoption by every jurisdiction may be desirable:

The Financial Stability Task Force believes that all states that are the lead state for a group subject to the LST should be required to adopt the model revisions. The LST is a tool intended to help assess the impacts the life insurance industry can have on the broader financial markets in a time of stress. Ideally, the tool would have been required of all life insurance groups, but this was not possible due to the complexity and resources required to accomplish such liquidity stress testing. Thus, the LST uses a set of scope criteria to identify those life insurers with significant amounts in activities assumed to have high liquidity risk, thus representing the larger portion of the life insurance industry in terms of liquidity risk rather than representing the entire life insurance industry. If a scoped-in life insurance group was not subject to the LST because a state did not adopt the model revisions, this would significantly reduce the ability of the NAIC to represent the results as truly macroprudential and reflective of the majority of risks of the life insurance sector. Additionally, the LST results will be helpful to the lead states in their group supervision efforts as well.

Though not every state will be the lead state of a scoped-in group, the Task Force still believes the model revisions for the LST should be adopted in every state. It is fairly common for legal entity insurers to move from one group to another, impacting the group dynamics including the lead state determination, and each state should have the LST in their statutes to ensure they will be prepared for any future appointment as lead state. Also, even without legal entities changing groups, business acquisition and operational changes within existing groups might subject a previously excluded group to the LST. Therefore, it is recommended that that the new significant elements apply to all states.

A statement as to the number of jurisdictions that have adopted and implemented the proposal or a similar proposal and their experience to date:

We are not currently aware of any states that have adopted the 2020 revisions to Model #440, although we have been advised that many states have begun their legislative processes for adoption of these revisions.
A statement as to the provisions needed to meet the minimum requirements of the standard. That is, whether a state would be required to have “substantially similar” language or rather a regulatory framework. If it is being proposed that “substantially similar” language be required, the referring committee, task force or working group shall recommend those items that should be considered significant elements:

The current accreditation standard for Model #440 and Model #450 requires state adoption on a substantially similar basis. Therefore, the Financial Stability (E) Task Force supports the attached proposed significant elements (Attached) be adopted by NAIC-accredited jurisdictions in a “substantially similar” manner, as that term is defined in the Accreditation Interlineations of the NAIC Financial Regulation Standards and Accreditation Program. The Financial Regulation Standards and Accreditation (F) Committee should consider a waiver of procedure as provided for in the Accreditation Program Manual and expeditiously consider adoption of this standard. The Financial Stability (E) Task Force recommends that the accreditation standard become effective Nov. 7, 2022, concurrent with the Group Capital Calculation revisions to the model, with enforcement of the standard to commence Jan. 1, 2023.

There were also revisions made to Section 8 of Model #440 regarding Confidential Treatment. The Financial Stability (E) Task Force strongly supports the use of language similar to that contained in Section 8G of Model #440. This language was considered very critical to the LST as its very important that members of the insurance industry (or regulators) not be allowed to make the results of the LST public in any way as they are designed as regulatory-only tools using complex assumptions for potential future stress events and the results could easily be misinterpreted and misrepresented by other users, causing true financial harm to the insurers.

An estimate of the cost for insurance companies to comply with the proposal and the impact on state insurance departments to enforce it, if reasonably quantifiable:

The NAIC has not performed a cost/benefit analysis with respect to the 2020 revisions to Model #440, nor do we believe that the specific costs for insurance companies to comply with the proposal and the impact on state insurance departments to enforce it are reasonably quantifiable. However, the LST scope criteria selects the larger, more complex life insurers, and all of these already perform some form of internal liquidity stress tests. While there are regulatory requirements for inputs and outputs, truly significant costs are avoided by using their existing internal stress testing systems instead of specifying a regulatory model.
6. Insurance Holding Company Systems

State law should contain the NAIC Insurance Holding Company System Regulatory Act (#440), or an act substantially similar.

**Insurance Holding Company Systems – continued**

Changes to Existing

k. Additions to the filing requirements for the enterprise risk filing specified in Section 4L(1) of the Model #440 (see next item).

New

c. Define “NAIC Liquidity Stress Test Framework” similar to that in Section 1K?

d. Define “Scope Criteria” similar to that in Section 1M?

l. Filing requirements for the liquidity stress test filing similar to those specified in Section 4L(3) of Model #440:

i. The ultimate controlling person of every insurer subject to registration and also scoped into the NAIC Liquidity Stress Test Framework shall file the results of a specific year’s Liquidity Stress Test to the lead state insurance commissioner of the insurance holding company system as determined by the procedures within the Financial Analysis Handbook similar to Section 4L(3)?

ii. Insurers meeting at least one threshold of the Scope Criteria for a specific data year are scoped into that year’s NAIC Liquidity Stress Test Framework unless the lead state, after consultation with the NAIC Financial Stability Task Force or its successor, determines the insurer should not be scoped into the Framework for that data year similar to Section 4L(3)(a)? Insurers that do not trigger at least one threshold of the Scope Criteria are considered scoped out of the NAIC Liquidity Stress Test Framework for the specified data year, unless the lead state insurance commissioner, in consultation with the NAIC Financial Stability Task Force or its successor, determines the insurer should be scoped into the Framework for that data year?

iii. Provision requiring compliance with the NAIC Liquidity Stress Test Framework’s instructions and reporting templates for the specific data year and any lead state insurance commissioner determinations in consultation with the Financial Stability Task Force or its successor, provided within the Framework similar to Section 4L(3)(b)?

Changes to Existing

c. Provisions for protecting confidential information submitted to the commissioner, including provisions maintaining confidentiality for information shared with state, federal and international regulators similar to Section 8? If sharing confidential information with the NAIC and third-party consultants is permitted, appropriate confidentiality protections should be included.

m. Provision prohibiting the making, publishing, disseminating, circulating or placing before the public in any way the group capital calculation and resulting group capital ratio under Section 4L(2) and/or the liquidity stress test along with its results and supporting disclosures required under Section 4L(3), by any insurer, broker, or other person engaged in any manner of the insurance business, except if the sole purpose of the announcement is to rebut a materially false statement, similar to Section 8G of Model #440?
The following significant elements were modified from the initial March 8, 2021 E Committee referral and exposed by the F Committee on Aug. 14, 2021 for a 1-year exposure beginning January 1, 2022 (pending approval by Plenary at the Fall National Meeting). The modifications to n(i) and n(ii) allow Commissioners to grant exemptions to the group capital calculation to groups meeting the standards set forth in Model Regulation #450 Section 21A and Section 21B without the requirement to file at least once.

The significant elements are separated into those that incorporate the group capital calculation and those that incorporate the liquidity stress test.

6. Insurance Holding Company Systems (Group Capital Calculation)

State law should contain the NAIC Insurance Holding Company System Regulatory Act (#440), or an act substantially similar, and the department should have adopted the NAIC Insurance Holding Company System Model Regulation (#450).

Changes to Existing

k. Filing requirements for the enterprise risk filing similar to those specified in Section 4L(1) of the Model #440?

New

l. Filing requirements for the group capital calculation filing similar to those specified in Section 4L(2) of Model #440?

i. The ultimate controlling person of every insurer subject to registration shall annually file a group capital calculation completed in accordance with the NAIC Group Capital Calculation Instructions as directed by the lead state commissioner similar to section 4L(2)?

ii. Provision for exempting an insurance holding company system that has only one insurer within its holding company structure, that only writes business [and is only licensed] in its domestic state and assumes no business from any other insurer, similar to 4L(2)(a)?

iii. Provision for exempting an insurance holding company system that is required to perform a group capital calculation specified by the U.S. Federal Reserve? If the Federal Reserve Board cannot share the calculation with the lead state commissioner, the insurance holding company system is not exempt from the GCC, similar to 4L(2)(b)?

iv. Provision for exempting an insurance holding company system whose non-U.S. group-wide supervisor is located within a Reciprocal Jurisdiction that recognizes the U.S. state regulatory approach to group supervision and group capital, similar to 4L(2)(c)?

v. Provision for exempting an insurance holding company system that provides information to the lead state that meets the requirements for accreditation under the NAIC financial standards and accreditation program and whose non-U.S. group-wide supervisor that is not in a Reciprocal Jurisdiction recognizes and accepts the GCC as the worldwide group capital assessment for U.S. insurance groups who operate in that jurisdiction, similar to 4L(2)(d)?

vi. Provision that gives the lead state the authority to require the GCC for U.S. operations of any non-U.S. based insurance holding company system where after any necessary consultation with other supervisors or officials, it is deemed appropriate by the lead state commissioner for prudential oversight and solvency monitoring purposes, similar to 4L(2)(e)?

Changes to Existing

cc. Provisions for protecting confidential information submitted to the commissioner, including provisions maintaining confidentiality for information shared with state, federal and international regulators similar to Section 8? If sharing confidential information with the NAIC and third-party consultants is permitted, appropriate confidentiality protections should be included.
New
m. Provision prohibiting the making, publishing, disseminating, circulating or placing before the public in any way the group capital calculation and resulting group capital ratio under Section 4L(2) and/or the liquidity stress test along with its results and supporting disclosures required under Section 4L(3), by any insurer, broker, or other person engaged in any manner of the insurance business, except if the sole purpose of the announcement is to rebut a materially false statement, similar to Section 8G of Model #440?

n. Filing requirements for the group capital calculation filing similar to those specified in Section 21 of Model #450?

i. Provision that gives the lead state the authority to exempt the filing of the group capital calculation provided the criteria are similar to those allowed under Section 21A of Model #450?
   o Although not required for accreditation, in order to grant an exemption, is the filing required at least once?

ii. Provision that gives the lead state the authority to accept a limited group capital filing provided the criteria are similar to those allowed under Section 21B of Model #450?
   o Although not required for accreditation, in order to grant an exemption, is the filing required at least once?

iii. Provision that gives the lead state the authority to require the group capital calculation of any group that previously met an exemption or submitted a limited filing if any insurer in the holding company system either triggers an RBC action level event, is deemed in hazardous financial condition, or otherwise exhibits qualities of a troubled insurer, similar to those allowed under Section 21C of Model #450?

iv. Provision that sets forth the criteria for a jurisdiction to be included on the NAIC listing that “recognize and accept the group capital calculation” similar to that required under Section 21D and Section 21E of Model #450?

6. Insurance Holding Company Systems (Liquidity Stress Test)

State law should contain the NAIC Insurance Holding Company System Regulatory Act (#440), or an act substantially similar.

Insurance Holding Company Systems – continued

Changes to Existing
o. Additions to the filing requirements for the enterprise risk filing specified in Section 4L(1) of the Model #440 (see next item).

New
c. Define “NAIC Liquidity Stress Test Framework” similar to that in Section 1K?

d. Define “Scope Criteria” similar to that in Section 1M?

p. Filing requirements for the liquidity stress test filing similar to those specified in Section 4L(3) of Model #440:

vii. The ultimate controlling person of every insurer subject to registration and also scoped into the NAIC Liquidity Stress Test Framework shall file the results of a specific year’s Liquidity Stress Test to the lead state insurance commissioner of the insurance holding company system as determined by the procedures within the Financial Analysis Handbook similar to Section 4L(3)?

viii. Insurers meeting at least one threshold of the Scope Criteria for a specific data year are scoped into that year’s NAIC Liquidity Stress Test Framework unless the lead state, after consultation with the NAIC Financial Stability Task Force or its successor, determines the insurer should not be scoped into the Framework for that data year similar to Section 4L(3)(a)? Insurers that do not trigger at least one threshold of the Scope Criteria are considered scoped out of the NAIC Liquidity Stress Test Framework for the specified data year, unless the lead state insurance commissioner, in consultation with the NAIC Financial Stability Task Force or its successor, determines the insurer should be scoped into the Framework for that data year?
ix. Provision requiring compliance with the NAIC Liquidity Stress Test Framework’s instructions and reporting templates for the specific data year and any lead state insurance commissioner determinations in consultation with the Financial Stability Task Force or its successor, provided within the Framework similar to Section 4L(3)(b)?

Changes to Existing

cc. Provisions for protecting confidential information submitted to the commissioner, including provisions maintaining confidentiality for information shared with state, federal and international regulators similar to Section 8? If sharing confidential information with the NAIC and third-party consultants is permitted, appropriate confidentiality protections should be included.

q. Provision prohibiting the making, publishing, disseminating, circulating or placing before the public in any way the group capital calculation and resulting group capital ratio under Section 4L(2) and/or the liquidity stress test along with its results and supporting disclosures required under Section 4L(3), by any insurer, broker, or other person engaged in any manner of the insurance business, except if the sole purpose of the announcement is to rebut a materially false statement, similar to Section 8G of Model #440?
State Implementation Reporting of NAIC-Adopted Model Laws and Regulations

Executive (EX) Committee

- Amendments to the *Unfair Trade Practices Act* (#880)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. Two states have enacted the revisions to this model.

Life Insurance and Annuities (A) Committee

- Amendments to the *Annuity Disclosure Model Regulation* (#245)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2021 Summer National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the *Suitability in Annuity Transactions Model Regulation* (#275)—These revisions were adopted by the Executive (EX) Committee and Plenary during the February 13, 2020, conference call. Seven states have enacted the revisions to this model.

- Amendments to the *Standard Nonforfeiture Law for Individual Deferred Annuities* (#805)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. 14 states have adopted the revisions to this model.

Health Insurance and Managed Care (B) Committee

- Amendments to the *Accident and Sickness Insurance Minimum Standards Model Act* (#170)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2019 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the *Health Maintenance Organization Model Act* (#430)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. One state has enacted this model.

- Amendments to the *Insurance Holding Company System Regulatory Act* (#440)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. Six states have adopted the revisions to this model.

- Amendments to the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions* (#450)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. Two states have adopted the revisions to this model.

- Adoption of the *Limited Long-Term Care Insurance Model Act* (#642)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. One state has enacted this model.

- Adoption of the *Limited Long-Term Care Insurance Model Regulation* (#643)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. One state has enacted this model.
Property and Casualty Insurance (C) Committee

- Adoption of the Real Property Lender-Placed Insurance Model Act (#631)—This model was adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Adoption of the Travel Insurance Model Act (#632)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. Six states have enacted this model.

Financial Condition (E) Committee

- Amendments to the Credit for Reinsurance Model Law (#785)—These revisions were adopted by the Executive (EX) Committee and Plenary during the June 26, 2019, conference call. 46 states have enacted this model.

- Amendments to the Credit for Reinsurance Model Regulation (#786)—These revisions were adopted by the Executive (EX) Committee and Plenary during its June 26, 2019, conference call. 22 states have enacted this model.

The Executive (EX) Committee met in San Diego, CA, Dec. 14, 2021. The following Committee members participated: David Altmaier, Chair (FL); Dean L. Cameron, Vice Chair (ID); Chlora Lindley-Myers, Vice President (MO); Andrew N. Mais, Secretary-Treasurer (CT); Raymond G. Farmer, Most Recent Past President (SC); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Michael Conway (CO); Doug Ommen (IA); James J. Donelon (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Mike Chaney (MS); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); and Larry D. Deiter (SD).

1. **Adopted the Dec. 12 Report of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee**

Commissioner Altmaier reported that the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee met Dec. 12 in joint session. The meeting was held in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings.

During this meeting, the Committee and Subcommittee adopted its Dec. 7, Oct. 26, and Summer National Meeting minutes, which included the following action: 1) approved the proposed NAIC 2022 budget and recommended that it be considered by the full membership during the joint meeting of the Executive (EX) Committee and Plenary during the Fall National Meeting; 2) held a public hearing on the proposed NAIC 2022 budget with interested parties; 3) approved exposure of the proposed NAIC 2022 budget for a public comment period; and 4) approved the 2021 NAIC Staffing Request Fiscal.

The Committee and Subcommittee also adopted the report of the Audit Committee, which met Dec. 7 and took the following action: 1) received an overview of the Oct. 31 financial statements; 2) received an update on the 2021 financial audit and the 2021/2022 Service Organization Control (SOC) 1 and SOC 2 audits; 3) received an update on database filing fee payments and the Zone financials; 4) received an update on the Enterprise Resource Planning project; and 5) received an update on the operating reserve analysis project.

The Committee and Subcommittee also adopted the report of the Audit Committee, which met Dec. 7 and took the following action: 1) received an overview of the Oct. 31 financial statements; 2) received an update on the 2021 financial audit and the 2021/2022 Service Organization Control (SOC) 1 and SOC 2 audits; 3) received an update on database filing fee payments and the Zone financials; 4) received an update on the Enterprise Resource Planning project; and 5) received an update on the operating reserve analysis project.

The Committee and Subcommittee also adopted the report of the Internal Administration (EX1) Subcommittee, which met Nov. 22 and took the following action: 1) received the Sept. 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports; 2) adopted a recommendation to increase the liability driven investment (LDI) percentage for the Defined Benefit Plan portfolio; and 3) adopted the report of the Information Systems (EX1) Task Force, which met Nov. 18 and took the following action: a) adopted its Summer National Meeting minutes; b) received an operational report on the System for Electronic Rates & Forms Filing (SERFF) Modernization Project; and c) received a cybersecurity update.

The Committee and Subcommittee also adopted the report of the Internal Administration (EX1) Subcommittee, which met Nov. 22 and took the following action: 1) received the Sept. 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports; 2) adopted a recommendation to increase the liability driven investment (LDI) percentage for the Defined Benefit Plan portfolio; and 3) adopted the report of the Information Systems (EX1) Task Force, which met Nov. 18 and took the following action: a) adopted its Summer National Meeting minutes; b) received an operational report on the System for Electronic Rates & Forms Filing (SERFF) Modernization Project; and c) received a cybersecurity update.

The Committee and Subcommittee also adopted the report of the Internal Administration (EX1) Subcommittee, which met Nov. 22 and took the following action: 1) received the Sept. 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports; 2) adopted a recommendation to increase the liability driven investment (LDI) percentage for the Defined Benefit Plan portfolio; and 3) adopted the report of the Information Systems (EX1) Task Force, which met Nov. 18 and took the following action: a) adopted its Summer National Meeting minutes; b) received an operational report on the System for Electronic Rates & Forms Filing (SERFF) Modernization Project; and c) received a cybersecurity update.

Director Cameron made a motion, seconded by Commissioner Mais, to adopt the Dec. 12 report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee. The motion passed unanimously.

2. **Adopted its Dec. 7, Oct. 26, and Oct. 12 Minutes**

Director Lindley-Myers, made a motion, seconded by Director Cameron, to adopt the Committee’s Dec. 7, Oct. 26, and Oct. 12 interim meeting report (Attachment One). The motion passed unanimously.
3. **Adopted the Reports of its Task Forces**

The Committee received written reports from: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance.

Commissioner Godfread provided an additional oral report from the Innovation and Technology (EX) Task Force concerning its work on a new letter committee. Commissioner Godfread reported that NAIC members discussed the importance of raising the visibility, as well as prioritizing and organizing the work of the many NAIC committees specific to innovation, technology and cybersecurity regardless of what committee is working on it. The intention is to provide more consistency and collaboration and ensure the coordination of related workstreams.

As the chair of the Innovation and Technology (EX) Task Force Commissioner Godfread was asked to create an ad hoc drafting group to put together proposed charges for a new NAIC letter committee, the Innovation, Cybersecurity, and Technology (H) Committee. Superintendent Dwyer chaired the Drafting Group, and Commissioner Birrane and Director Daniels served as vice chairs.

Commissioner Godfread thanked all the states that participated in the drafting process: Arizona, California, Connecticut, Georgia, Iowa, Maryland, Michigan, North Dakota, New Mexico, Ohio, Rhode Island, Tennessee, and Wisconsin. These states held their first meeting on Sept. 27, and a “strawman” charges draft was reviewed. It was exposed publicly, and an open public comment meeting was held on Nov. 19. The ad hoc drafting group considered another draft based on comments received on Nov. 30. The final version was completed and posted on the NAIC website. The charges will be considered for adoption during the Plenary meeting along with a bylaw amendment to establish the new committee.

Additionally, Commissioner White reported that the Long-Term Care Insurance (EX) Task Force adopted some important deliverables. The Task Force adopted the Long-Term Care Insurance Multi-State Rate Review Framework (MSA Framework). The MSA Framework is a cornerstone project for the Task Force that delivers on the charge to develop a consistent national approach for reviewing current long-term care insurance (LTCI) rates that result in actuarially appropriate increases being granted by the states in a timely manner. The Task Force gathered insights from a pilot project as the basis and spent most of this past year developing the MSA Framework. It is expected that the MSA process will continue to undergo work and enhancements in the future. It is anticipated that the members will be asked to consider adoption of the MSA Framework in the spring of 2022, with anticipated full implementation by September 2022.

Commissioner White also highlighted two other important work products that were developed by the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup and adopted by the Long-Term Care Insurance (EX) Task Force during its Dec. 12 meeting: 1) the “RBO Consumer Notices Checklist” intended to establish a consistent approach to drafting and reviewing LTCI reduced benefit options (RBO) policyholder communications; and 2) a document titled “Issues Related to LTC Wellness Benefits” outlining issues and observations in innovation of wellness benefits aimed at reducing the need for long-term care (LTC).

Director Farmer made a motion, seconded by Commissioner Altman, to adopt the reports of the: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance (Attachment Two). The motion passed unanimously.

4. **Adopted its 2022 Proposed Charges**

Director Cameron reported that the Committee’s 2022 proposed charges for consideration are largely the same from year to year. The Committee’s task forces will continue work on climate and resiliency, LTC, and race and insurance.

Director Cameron noted that the Committee is not adopting charges for the Innovation and Technology (EX) Task Force, as it anticipates adoption by the joint Executive (EX) Committee and Plenary of the formation of the new “H” Committee.

Director Cameron made a motion, seconded by Director Wing-Heier, to adopt the Committee’s 2022 proposed charges (Attachment Three). The motion passed unanimously.
5. Received a Status Report on the NAIC State Ahead Strategic Plan Implementation

Commissioner Altmaier provided an update on NAIC State Ahead implementation efforts. State Ahead is a three-year strategic plan for the organization intended to further advance the products, services, and support the NAIC provides to state insurance regulators in order to better meet the changing regulatory landscape. Overall, NAIC staff continue to make good progress on the many State Ahead projects (Attachment Four). Planning has begun at the member level for the next iteration of the strategic plan.

6. Received a Report of Model Law Development Efforts

Commissioner Altmaier presented a written report on the progress of ongoing model law development efforts (Attachment Five).

7. Heard a Report from the NIPR Board of Directors

Director Deiter reported that the National Insurance Producer Registry (NIPR) Board of Directors met Dec. 12. During this meeting, the Board approved NIPR's 2022 budget with projected revenues of $61.4 million and expenses of $56.4 million, including the approval of five additional technical employees.

The Board also heard an update on the progress of NIPR’s three-year strategic plan, including the recent implementation of moving NIPR’s technical applications to cloud-based technology, which is a key element of the strategic plan.

This year marks NIPR’s 25th anniversary. In October 1996, NIPR was incorporated to ease the inefficiency of state-based insurance regulation on agents and brokers by developing a comprehensive source of data and an electronic licensing system to be used for all states’ producer licensing.

As NIPR enhanced the simplicity of its products, more states, producers and compliance professionals used it, creating year-over-year growth. Today, as the central hub around which producer credentialing revolves, NIPR will close 2021 with the strongest revenue year in its history processing more than 42 million transactions and moving more than $1.1 billion in fees to state insurance departments helping to fulfill its mission of cost-effective, streamlined, and uniform producer licensing.

Director Dieter noted that NIPR Deputy Director, Laurie Wolf, was honored at NIPR's 25th anniversary celebration for her impact on the industry over the last 32 years. Ms. Wolf has been a part of NIPR’s history since the beginning and is widely recognized as the national subject matter expert (SME) on producer licensing. After starting her career in the insurance industry, she spent 19 years serving as the director of the Agent Licensing and Investigation Division for the North Dakota Insurance Department where she worked tirelessly on NAIC committees and working groups to further the cause of improved producer licensing. She has served as NIPR’s deputy director for 13 years. Her expertise has allowed NIPR to successfully understand and tackle the needs and challenges faced by state insurance producer licensing departments. Director Deiter thanked Ms. Wolf for her contributions to NIPR and the producer licensing community.

8. Heard a Report from the Compact

Superintendent Dwyer reported that the Interstate Insurance Product Regulation Commission (Compact) met Dec. 12 and elected Commissioner Birrane to serve as chair, Director Eric Dunning (NE) to serve as vice chair, and Commissioner Allan L. McVey (WV) to serve as Treasurer.

The 2022 Management Committee will include the three officers as well as: Illinois, Massachusetts, Michigan, Minnesota, New Jersey, Ohio, Pennsylvania, Rhode Island, Texas, Virginia, and Wyoming.

The Compact also approved 2022 committee assignments, appointed company and industry representatives to four open seats on the Industry Advisory Committee, and appointed Anna Howard (Cancer Action Network—CAN) to a vacant seat on the Consumer Advisory Committee.

The Compact also adopted changes to its individual LTC Uniform Standards, specifically with respect to separating requirements for in-force rate increase requests for Compact-approved products into a standalone standard. This change will facilitate the ability of Compacting States to opt out of the in-force rate schedule standard while continuing to participate in the other individual LTC Uniform Standards. These amendments were adopted after several discussions of options to respond to South Carolina’s request to reduce or eliminate the 15% threshold when the Compact has authority to approve an in-force rate
increase request. The 15% threshold stays in place but allows flexibility for a Compacting State to opt out of all in-force rate increase requests on Compact-approved products.

The Governance Committee also brought forward several amendments to the Compact’s Bylaws, many of them recommended during the independent governance review performed by Squire Patton Boggs in 2020.

Having no further business, the Executive (EX) Committee adjourned.

NAICSupportStaffHub/Member Meetings/Fall 2021/Cmte/Ex/_Final Minutes/12-EXCmte Minutes.docx
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

EXECUTIVE (EX) COMMITTEE
December 7, 2021 / October 26, 2021 / October 12, 2021

Summary Report

The Executive (EX) Committee met Dec. 7, Oct. 26, and Oct. 12, 2021, in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee:

1. Approved the NAIC proposed 2022 budget and recommended the proposed 2022 budget be considered by the full membership during the joint meeting of the Executive (EX) Committee and Plenary during the Fall National Meeting.

2. Approved the 2021 NAIC Staffing Request Fiscal.

3. Approved the release of the NAIC proposed 2022 budget for public review and comment.

4. Approved the release of the 2021 NAIC Staffing Request Fiscal for public comment.

5. Reappointed Commissioner Andrew N. Mais (CT) to the International Association of Insurance Supervisors (IAIS) Executive Committee for a two-year term.

NAIC Support Staff Hub/Member Meetings/Fall 2021/Cmte/Ex/Att 1 InterimMtgReport.docx
REPORT OF THE EXECUTIVE (EX) COMMITTEE TASK FORCES

Climate and Resiliency (EX) Task Force—The Climate and Resiliency (EX) Task Force met Dec. 14 and took the following action: 1) heard a recommendation from the Technology Workstream; 2) heard a presentation regarding the proposed redesigned NAIC Climate Risk Disclosure Survey; 3) heard status reports from the Solvency, Innovation, and Pre-Disaster Mitigation Workstreams; 4) heard a federal update; and 5) heard an international update.

Government Relations (EX) Leadership Council—The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting. The Leadership Council meets weekly in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss federal legislative and regulatory developments affecting insurance regulation.

Innovation and Technology (EX) Task Force—The Innovation and Technology (EX) Task Force met Dec. 13 and took the following action: 1) adopted minutes from the Summer National Meeting and reports of the Big Data and Artificial Intelligence (EX) Working Group, the Speed to Market (EX) Working Group, and the E-Commerce (EX) Working Group; 2) heard an update on Colorado’s SB 21-169 legislation from Commissioner Michael Conway (CO); 3) heard presentations from two insurtech coalitions—the American InsurTech Council (AITC) and the InsurTech Coalition; 4) heard an update on the progress of the Ad Hoc Drafting Group working on proposed charges for a new Innovation, Cybersecurity, and Technology (H) Committee; 5) heard reports from various NAIC committees working on related or potentially overlapping workstreams, such as the Special (EX) Committee on Race and Insurance, the Privacy Protections (D) Working Group, and the Accelerated Underwriting (A) Working Group; 6) heard a presentation from MIB on its algorithmic bias testing for life insurers; and 7) received an update on the System for Electronic Rates & Forms Filing (SERFF) modernization project.

The Big Data and Artificial Intelligence (EX) Working Group met Nov. 12 in regulator-to-regulator session, pursuant to paragraph 6 (consultation with NAIC staff members related to technical guidance) of the NAIC Policy Statement on Open Meetings, to: 1) discuss preliminary, aggregate analysis of industry responses to a survey on private passenger automobile (PPA) insurers’ use and governance of big data, as used in an artificial intelligence (AI) and machine learning (ML) system; and 2) discuss the use of the NAIC’s Regulatory Data Collection system to survey the use of AI/ML in other lines of business. The survey was conducted under the examination authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin. The Working Group also met Dec. 3 and took the following action: 1) reviewed its 2022 proposed charges; 2) received a presentation on how to leverage the lessons learned in developing the regulatory framework for cybersecurity to the development of a regulatory framework for AI; 3) received two presentations on how state insurance regulators could regulate AI, including how to monitor and mitigate AI bias and enable AI transparency; 4) received a presentation on the PPA AI/ML survey results; 5) discussed the next line of insurance to survey; and 6) discussed the development of a 2022 workplan.

The E-Commerce (EX) Working Group met Oct. 7 and took the following action: 1) heard presentations from industry organizations and consumer groups about various issues facing insurers and consumers in electronic transactions in light of the regulations and bulletins issued by state insurance regulators as a result of the COVID-19 pandemic; and 2) heard from state insurance department representatives regarding their ongoing efforts at regulatory reform in electronic transactions and other related areas and discussed using these presentations and information to develop a survey to send to the states and industry organizations regarding these issues. The survey responses may also be helpful in the drafting of a white paper and/or model bulletin if determined appropriate.

The Speed to Market (EX) Working Group met Nov. 16 and took the following action: 1) adopted its June 30 and June 29 minutes; 2) adopted the Regulatory Review of Predictive Models white paper edits to Chapter Three of the Product Filing Review Handbook. These proposed edits were previously adopted by the Casualty Actuarial and Statistical (C) Task Force, which was charged with proposing modifications to reflect current best practices for the regulatory review of Generalized Linear Models (GLM) predictive analytics; and 3) discussed contacts and resources for updates to the Product Requirements Locator (PRL) tool.
Long-Term Care Insurance (EX) Task Force—The Long-Term Care Insurance (EX) Task Force met Dec. 12 in joint session with the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup and took the following action: 1) adopted its Oct. 29 minutes, which included adoption of the 2022 proposed charges for the Task Force and its subgroups; and 2) adopted its Summer National Meeting minutes.

During the Dec. 12 meeting, the Long-Term Care Insurance (EX) Task Force: 1) received the reports of its subgroups: a) the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, which met Dec. 12, Nov. 15, and Sept. 10 to: i) hear comments from state insurance regulators and interested parties on the Long-Term Care Insurance (LTCI) Multistate Actuarial Rate Review Framework (MSA Framework) exposure draft; and ii) adopt the MSA Framework; b) the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, which met Dec. 7, Nov. 19, Oct. 19, Oct. 4, Sept. 27, and Aug. 23 to receive comments on and adopt the documents titled “Issues Related to LTC Wellness Benefits” and “RBO Consumer Notices Checklist”; and c) the Long-Term Care Insurance Financial Solvency (EX) Subgroup, which reported on industry trends and factors affecting reserve levels; 2) adopted the MSA Framework; 3) adopted the “Issues Related to LTC Wellness Benefits” document; and 4) adopted the “RBO Consumer Notices Checklist” document.

During the Dec. 12 meeting, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup: 1) adopted its Nov. 15 and Sept. 28 minutes; 2) heard comments on the MSA Framework from state insurance regulators and interested parties; and 3) adopted the MSA Framework.

Special (EX) Committee on Race and Insurance—The Special (EX) Committee on Race and Insurance met Dec. 14 and took the following action: 1) adopted its Summer National Meeting minutes; 2) heard reports from its five workstreams; and 3) heard presentations from interested parties.

- Workstream One of the Special Committee is focused on researching and analyzing the level of diversity and inclusion within the insurance sector. The Workstream met in regulator-to-regulator session in October to hear a presentation from California and New York regarding their respective diversity, equity, and inclusion (DE&I) efforts and the diversity-related industry data that these states are collecting. The Workstream also held a public call with stakeholders in November to better understand industry diversity-related programs, how companies are measuring progress, and what state insurance regulators can do to support these efforts.

- Workstream Two of the Special Committee continues gathering responses to the survey intended to examine, at the zone level, best practices and initiatives state insurance departments may consider when promoting DE&I in their offices. Once responses have been gathered, the Workstream will discuss a method and forum to share diversity and inclusion information among state insurance regulators. On Oct. 18, Evelyn Boswell, NAIC Director of Diversity, Equity, and Inclusion, held the first State Diversity Leader’s Forum. The Forum provides a space for diversity leaders in each state that has a diversity leader, to come together and discuss best practices in promoting diversity in their respective insurance departments.

- Workstream Three of the Special Committee is focused on property/casualty (P/C) insurance issues. The Workstream met Dec. 1 and heard from numerous interested parties about definitions contained within Charge F having to do with unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. The Workstream expects to begin drafting a white paper to define relevant terms and determine next steps.

- Workstream Four of the Special Committee met in regulator-to-regulator session in October to discuss how best to develop a work plan. The Workstream members concluded that there is a need for data to drive discussion and advance understanding of these issues and next steps. The Workstream expects to meet in January to discuss how it fits into the larger work of the Special Committee and the other Workstreams as it moves forward to address the issues identified in its charges.

- Workstream Five of the Special Committee met Dec. 3, Nov. 18, Oct. 14, Sept. 9 and Aug. 26 to discuss issues related to data collection and provider networks, provider directories, and cultural competency. During these meetings, the Workstream discussed the comments received on its draft Principles for Data Collection document received by the public comment period ending Aug. 19. The Workstream discussed revisions to the draft document based on the comments received. The Workstream also exposed a draft outline for its proposed white paper on provider networks, provider directories, and cultural competency for a public comment period. The Workstream hopes to finalize the
Principles for Data Collection document by the end of 2021 and begin work in early 2022 on its white paper on
provider networks, provider directories, and cultural competency.
2022 Proposed Charges

EXECUTIVE (EX) COMMITTEE

The mission of the Executive (EX) Committee is to manage the affairs of the NAIC in a manner consistent with its Articles of Incorporation and its Bylaws.

Ongoing Support of NAIC Programs, Products or Services

1. The Executive (EX) Committee will:
   A. Identify the goals and priorities of the organization and make recommendations to achieve such goals and priorities based on input of the membership. Make recommendations by the 2022 Commissioners Conference.
   B. Create/terminate task force(s) and/or Executive (EX) Committee-level working groups to address special issues and monitor the work of these groups. Create necessary task force(s) and/or Executive (EX) Committee-level working groups throughout 2022 as necessary.
   C. Submit reports and recommendations to NAIC members concerning the activities of its subcommittee and the standing committees. Submit a report at each national meeting.
   D. Consider requests from NAIC members for friend-of-the-court briefs.
   E. Establish and allocate functions and responsibilities to be performed by each NAIC zone.
   F. Pursuant to the Bylaws, oversee the NAIC offices to assist the organization and the individual members in achieving the goals of the organization.
   G. Conduct strategic planning on an ongoing basis.
   H. Plan, implement and coordinate communications and activities with the Federal Insurance Office (FIO).
   I. Plan, implement and coordinate communications and activities with other state, federal, local and international government organizations to advance the goals of the NAIC and promote understanding of state insurance regulation.
   J. Review and approve requests for the development of model laws and/or regulations. Coordinate the review of existing model laws and/or regulations.
   K. Select NAIC national meeting sites five and six years in advance of the meeting date to ensure efficient and economical locations and facilities.
   L. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.

NAIC Support Staff: Andrew J. Beal/Kay Noonan
2022 Proposed Charges

CLIMATE AND RESILIENCE (EX) TASK FORCE

The mission of the Climate and Resiliency (EX) Task Force is to serve as the coordinating NAIC body for discussion and engagement on climate-related risk and resiliency issues, including dialogue among state insurance regulators, industry, and other stakeholders.

Ongoing Support of NAIC Programs, Products or Services

1. The Climate and Resiliency (EX) Task Force will:
   A. Consider appropriate climate risk disclosures within the insurance sector, including:
      2. Evaluation of alignment with other sectors and international standards.
   B. Evaluation of financial regulatory approaches to climate risk and resiliency in coordination with other relevant committees, task forces, and working groups, such as the Financial Condition (E) Committee and the Financial Stability (E) Task Force.
      1. Evaluation of the use of modeling by carriers and their reinsurers concerning climate risk.
      2. Evaluation of how rating agencies incorporate climate risk into their analysis and governance.
      3. Evaluation of the potential solvency impact of insurers’ exposures, including both underwriting and investments, to climate-related risks.
      4. Evaluation and development of climate risk-related disclosure, stress testing, and scenario modeling.
   C. Consider innovative insurer solutions to climate risk and resiliency, including:
      1. Evaluation of how to apply technology and innovation to the mitigation of storm, wildfire, other climate risks, and earthquake.
      2. Evaluation of insurance product innovation directed at reducing, managing, and mitigating climate risk and closing protection gaps.
   D. Identify sustainability, resilience, and mitigation issues and solutions related to the insurance industry.
   E. Consider pre-disaster mitigation and resiliency and the role of state insurance regulators in resiliency.

NAIC Support Staff: Jennifer Gardner
2022 Proposed Charges

GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council coordinates the NAIC’s ongoing work with the federal government and state government officials on legislative and regulatory policy. The Leadership Council, in conjunction with the NAIC’s other standing committees, is responsible for quickly responding to federal legislative and regulatory developments that affect insurance regulation.

The mission of the Government Relations (EX) Leadership Council is to develop, coordinate, and implement the NAIC’s legislative, regulatory, and outreach initiatives. The Leadership Council will devise strategies for NAIC action and promote the participation of all NAIC members in the NAIC’s government relations initiatives.

Ongoing Support of NAIC Programs, Products or Services

1. The Government Relations (EX) Leadership Council will:
   A. Monitor, analyze, and respond to federal legislative and regulatory actions and other issues of importance to the NAIC membership.
   B. Work with other standing committees, task forces, and working groups to help develop and communicate the NAIC’s policy views to federal and state officials on pending legislation and regulatory issues by the involvement of NAIC members through testimony, correspondence, and other approaches.
   C. Develop a strategy and program for directly engaging NAIC members with the U.S. Congress (Congress) and federal agencies to advocate for NAIC objectives and the benefits and efficiencies of state-based insurance regulation.
   D. Secure broader participation from NAIC membership on all government affairs advocacy initiatives.
   E. Report to the Executive (EX) Committee on all activities and matters relating to the annual charges of the Leadership Council.

NAIC Support Staff: Ethan Sonnichsen/Brian R. Webb/Brooke Stringer
LONG-TERM CARE INSURANCE (EX) TASK FORCE

Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, the mission of the Long-Term Care Insurance (EX) Task Force is to: 1) further develop and implement a coordinated national approach for reviewing LTCI rates; 2) monitor and evaluate the rate review process; 3) evaluate and recommend options to help consumers manage the impact of rate increases; and 4) monitor work performed by other NAIC groups to review the financial solvency of long-term care (LTC) insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Long-Term Care Insurance (EX) Task Force will:
   A. Once adopted by the NAIC Executive (EX) Committee and Plenary, monitor, and evaluate the progress of the multistate actuarial (MSA) rate review process as outlined in the MSA Framework document. Monitor state insurance department rate review actions subsequent to implementation of the MSA Framework and MSA rate review recommendations.
   B. Complete an evaluation and recommend options to provide consumers with choices regarding modifications to LTCI contract benefits where policies are no longer affordable due to rate increases.
   C. Monitor the work performed by other NAIC solvency working groups and assist in the timely multi-state coordination and communication of the review of the financial condition of LTC insurers.

   Staff Support: Jeff Johnston, Jane Koenigsman

2. The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup will:
   A. Finalize the development of the MSA rate review process as outlined in the MSA Framework document which outlines a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Implement the MSA rate review process once adopted by the NAIC Executive (EX) Committee and Plenary.
   B. Evaluate the progress of the MSA rate review process and provide ongoing maintenance and enhancements, as deemed necessary.
   C. The Subgroup should complete its charges by the 2022 Fall National Meeting.

   Staff Support: Eric King

3. The Long-Term Care Reduced Benefit Options (EX) Subgroup will:
   A. Complete an evaluation and/or recommendation of options to help consumers manage the impact of rate increases. This includes:
      1. Finalizing development of a process to evaluate innovative options that allow for insurers to offer benefits that lessen the likelihood of an insured needing long-term care services, including evaluation of the suitability of and regulatory barriers to proposed options.
      2. The potential development of mechanisms to help regulators and consumers objectively compare reduced benefit options (RBOs), including comparison of accepting a rate increase and retaining current benefits to electing an offered RBOs.
      3. Finalizing the Consumer Notices Checklist for RBOs.
   B. Support and provide expertise to the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup regarding evaluation of RBOs.
   C. The Subgroup should complete its charges by the 2022 Fall National Meeting.

   Staff Support: Eric King
2022 Proposed Charges

SPECIAL (EX) COMMITTEE ON RACE AND INSURANCE

The mission of the Special (EX) Committee on Race and Insurance is to serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.

Ongoing Support of NAIC Programs, Products or Services

1. The Special (EX) Committee on Race and Insurance will:
   A. Serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.
   B. Coordinate with existing groups such as the Big Data and Artificial Intelligence (EX) Working Group and the Casualty Actuarial and Statistical (C) Task Force and encourage those groups to continue their work on issues affecting people of color and/or historically underrepresented groups, particularly in predictive modeling, price algorithms, and artificial intelligence (AI).
   C. (Workstream One) Continue research and analysis to identify issues and develop specific recommendations on action steps state insurance regulators and companies can take to improve the level of diversity and inclusion in the industry, including:
     1. Seek additional engagement from stakeholders to understand the efficacy of diversity-related programs, how companies measure their progress, and what state insurance regulators can do to support these efforts.
     2. Collect input on any existing gaps in available industry diversity-related data.
   D. (Workstream Two) In coordination with the Executive (EX) Committee, receive reports on NAIC diversity, equity, and inclusion (DE&I) efforts. Serve as the coordinating body for state requests for assistance from the NAIC related to DE&I efforts.
   E. (Workstream Two) Research best practices among state insurance departments on DE&I efforts and develop forums for sharing relevant information among states and with stakeholders, as appropriate.
   F. Continue research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. Make recommendations for statutory or regulatory changes and additional steps, including:
     1. (Workstream Four) The impact of traditional life insurance underwriting on traditionally underserved populations, considering the relationship between mortality risk and disparate impact.
     2. (Workstream Three) Developing analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance, including issues related to:
        a. Rating and underwriting variables, such as socioeconomic variables and criminal history, including:
           1. Identifying proxy variables for race.
           2. Correlation versus causation, including discussion of spurious correlation and rational explanation.
           3. Potential bias in underlying data.
           4. Proper use of third-party data.
        b. Disparate impact considerations.
   G. (Workstreams Three, Four, and Five) Consider enhanced data reporting and record-keeping requirements across product lines to identify race and other sociodemographic factors of insureds, including consideration of legal and privacy concerns. Consider a data call to identify insurance producer resources available and products sold in specific ZIP codes to identify barriers to access.
   H. Continue research and analysis related to insurance access and affordability issues, including:
     1. (Workstream Four) The marketing, distribution, and access to life insurance products in minority communities, including the role that financial literacy plays.
2. (Workstream Four) Disparities in the number of cancellations/rescissions among minority policyholders.
3. (Workstream Five) Measures to advance equity through lowering the cost of health care and promoting access to care and coverage, with a specific focus on measures to remedy impacts on people of color, low income and rural populations, and historically marginalized groups, such as the LGBTQ+ community, individuals with disabilities, and Alaska Native and other Native and Indigenous people.
4. (Workstream Five) Examination of the use of network adequacy and provider directory measures (e.g., provider diversity, language, and cultural competence) to promote equitable access to culturally competent care.
5. (Workstream Five) Conduct additional outreach to educate consumers and collect information on health and health care complaints related to discrimination and inequities in accessing care.
6. (Workstream Three) Whether steps need to be taken to mitigate the impact of residual markets, premium financing, and nonstandard markets on historically underrepresented groups.
7. Make referrals for the development of consumer education and outreach materials, as appropriate.

1. Direct NAIC and Center for Insurance Policy & Research (CIPR) staff to conduct necessary research and analysis, including:
   1. (Workstream Three) The status of studies concerning the affordability of auto and homeowners insurance, including a gap analysis of what has not been studied.
   2. (Workstream Three) The availability of producer licensing exams in foreign languages, steps exam vendors have taken to mitigate cultural bias, and the number and locations of producers by company compared to demographics in the same area.
   3. (Workstream Five) Aggregation of existing research on health care disparities and the collection of insurance responses to the COVID-19 pandemic and its impact across demographic populations.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE – NEW CHARGES

The Accelerated Underwriting (A) Working Group, as part of its ongoing work to consider the use of external data and data analytics in accelerated life underwriting, will include an assessment of and recommendations, as necessary, regarding the impact of accelerated underwriting on minority populations.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE – NEW CHARGES

1. The Health Insurance and Managed Care (B) Committee will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House, and federal agencies; analyze policy implications and the effect on the states of proposed and enacted federal legislation and regulations, including, where appropriate, an emphasis on equity considerations and the differential impact on underserved populations; and communicate the NAIC’s position through letters and testimony, when requested.

   The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group of the Regulatory Framework (B) Task Force will develop model educational material for state departments of insurance (DOIs) and research disparities in and interplay between mental health parity and access to culturally competent care for people of color and/or historically underrepresented groups.

   The Health Innovations (B) Working Group will evaluate mechanisms to resolve disparities through improving access to care, including the efficacy of telehealth as a mechanism for addressing access issues; the use of alternative payment models and value-based payments and their impact on exacerbating or ameliorating disparities and social determinants of health; and programs to improve access to historically underserved communities.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE – NEW CHARGES

The Producer Licensing (D) Task Force will receive a report on the availability of producer licensing exams in foreign languages, the steps exam vendors have taken to mitigate cultural bias, and the number and location of producers by company compared to demographics in the area.
2022 Proposed Charges

INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE

The mission of the Internal Administration (EX1) Subcommittee is to monitor the operations of the NAIC, including: 1) preparing a budget for Executive (EX) Committee review; 2) providing direction on personnel issues; 3) approving emergency expenditures; 4) evaluating the chief executive officer (CEO); and 5) assisting the CEO in resolving competing demands for NAIC staff resources.

Ongoing Support of NAIC Programs, Products or Services

1. The **Internal Administration (EX1) Subcommittee** will:
   A. Review and approve all expenditures of funds not included in the annual budget by considering any fiscal impact statements of unbudgeted resource requests and reporting its actions to the Executive (EX) Committee.
   B. Annually work with the CEO, chief operating officer/Chief legal officer (COO/CLO), and chief financial officer (CFO) to review the business operations plan, which will incorporate the Executive (EX) Committee’s strategic management initiatives, and report its actions to the Executive (EX) Committee.
   C. Oversee a review of any management areas of the NAIC that should be designated for formal operational reviews by working with the CEO and COO/CLO.
   D. Oversee the development, revision, and delivery of all NAIC education programs, or the addition of new programs, by coordinating with other committees, as appropriate, and providing direction to the CEO and COO/CLO.
   E. Receive a report at each national meeting from the NAIC Audit Committee, which will be chaired by the secretary-treasurer. The NAIC Audit Committee will meet with NAIC management at or before each national meeting, or more frequently as necessary, to review the NAIC financial statements and hear reports from NAIC management on emerging financial issues for the NAIC, and it will report such information to the Internal Administration (EX1) Subcommittee. The NAIC Audit Committee shall also carry out the following activities pursuant to its charter:
      1. Engage the NAIC’s independent accountants with respect to the annual audit. This will include the appointment of an independent audit firm, a review of the results of the annual audit, and discussions with the independent auditors and NAIC management to ensure all audit comments or suggestions are addressed in a timely manner.
      2. Engage the NAIC’s service advisory firm. This will include the selection of an independent firm to provide Statement on Standards for Attestation Engagements (SSAE) services to the NAIC.
   F. Serve as the primary liaison between the NAIC membership and the NAIC investment advisor, or appoint a subcommittee to act in that capacity, including receiving reports on the performance of the NAIC’s investment portfolio and, from time to time, meeting directly with investment firm representatives to hear periodic reports and recommendations.
   G. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.
   H. Appoint the Information Systems (EX1) Task Force to provide regulator-based technology expertise.
   I. Conduct evaluations of the CEO and COO/CLO, and make appropriate recommendations to the Executive (EX) Committee. Consult with the CEO and COO/CLO on compensation of senior management.
The mission of the Information Systems (EX1) Task Force is to: 1) provide regulator-based technology expertise to the Internal Administration (EX1) Subcommittee; and 2) support committee activities and objectives by monitoring projects that provide technical services or systems for state-based insurance regulation, as prioritized by the Executive (EX) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The **Information Systems (EX1) Task Force** will:
   
   A. Serve as the Internal Administration (EX1) Subcommittee’s project-independent technology monitor and consultant. This involves monitoring the development, deployment and operation of NAIC information technology (IT) systems and services for state insurance regulators and, based on this effort, providing reports and recommendations to the Subcommittee, as appropriate. To achieve this, the Task Force will receive regular portfolio and technical operational reports.
   
   B. Provide consultation to NAIC technology staff, as well as the interpretation of intent and specific technology direction, where needed. For example, from time to time, NAIC technology staff may request approval of a specific technology approach, such as a proposal to drop support for a particular version of software. The Task Force will provide direction in such matters, either directly or through a working group. Task Force members will also communicate current and future state technology changes planned for their state to alert NAIC technology staff of potential impacts and requirements for NAIC systems and services used by state insurance regulators.
   
   C. Review, with technical recommendations for the Subcommittee: 1) Fiscal Impact Statements Appendix A for all *State Ahead* projects, as well as others involving a technology component exceeding $100,000 or 1,150 hours of technology staff development and which is not limited to the support of the internal operations; and 2) project requests that involve technology being submitted to the Subcommittee or directly to the Executive (EX) Committee.
2022 PROPOSED NAIC AUDIT COMMITTEE
Committee Charter

1. The Audit Committee will:
   A. Provide continuous audit oversight, including:
      1. Provide an open avenue of communication between the independent auditor and the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.
      2. Confirm and ensure the independence of the independent auditor.
      3. Inquire of management and the independent auditor about significant risks or exposures, and assess the steps management has taken to minimize such risk.
      4. Consider and review with the independent auditor:
         a. Significant findings during the year, including the status of previous audit recommendations.
         b. Any difficulties encountered in the course of audit work, including any restrictions on the scope of activities or access to required information.
         c. The adequacy of internal controls, including computerized information system controls and security, as documented in the Statement on Auditing Standards (SAS) 115 letter from the independent auditor.
         d. Related findings and recommendations of the independent auditor with management’s responses, as documented in the SAS 114 letter from the independent auditor.
      5. Meet periodically with the independent auditor in separate executive sessions to discuss any matters the Committee believes should be discussed privately with the Committee.
      6. Report periodically to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee on significant results of the foregoing activities.
      7. Instruct the independent auditor that the Executive (EX) Committee and Internal Administration (EX1) Subcommittee are the auditor’s clients.
   B. Provide continuous oversight of reporting policies, including:
      1. Advise financial management and the independent auditor that they are expected to provide a timely analysis of significant current financial reporting issues and practices.
      2. Inquire as to the auditor’s independent qualitative judgments about the appropriateness, not just the acceptability, of the accounting principles and the clarity of the financial disclosure practices.
      3. Inquire as to the auditor’s views about whether management’s choices of accounting principles are conservative, moderate or aggressive from the perspective of income, asset and liability recognition, and whether those principles are common practices or minority practices.
      4. Inquire as to the auditor’s views about how choices of accounting principles and disclosure practices may affect NAIC members, the insurance industry, and public views and attitudes.
   C. Provide continuous oversight of financial management, including:
      1. Review the monthly consolidated financial statements, and receive regular reports from executive management on the financial operations of the association.
      2. Meet prior to, or at, each national meeting or more frequently, as circumstances require. The Committee may ask members of management or others to attend meetings and provide pertinent information, as necessary.
      3. Report on significant results of the foregoing activities to the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee on a regular basis.
   D. Conduct scheduled audit activities, including:
      1. Recommend the selection of the independent auditor for approval by the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, approve the compensation of the independent auditor, and review and approve the discharge of the independent auditor.
      2. Review annually the audit scope and plan of the independent auditor with management and the independent auditor, including:
         a. The independent auditor’s audit of the financial statements, accompanying footnotes, and its report thereon.
         b. Any significant changes required in the independent auditor’s audit plans.
         c. Any difficulties or disputes with management encountered during the course of the year under audit.
d. Other matters related to the conduct of the audit, which are to be communicated to the Committee under generally accepted auditing standards (GAAS).

3. Review and approve needs-based funding allocations, as needed.

4. Review and update the Committee charter on at least an annual basis.

E. Conduct other activities when necessary, including:

1. Arrange for the independent auditor to be available to the full Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, as needed.

2. Review and approve requests for any management consulting engagement to be performed by the independent auditor, and be advised of any other study undertaken at the request of management that is beyond the scope of the audit engagement letter.

3. Conduct and/or authorize investigations into any matters within the Committee’s scope of responsibilities. The Committee shall be empowered to retain independent counsel and other professionals to assist in the conduct of any investigation.

4. Ensure that members of the Committee receive the appropriate orientation to the Committee and receive a copy of the policy manual.

NAIC Support Staff: Jim Woody

NAIC Support Staff Hub/Member Meetings/Fall 2021/Cmte/Ex/Att 3 ExCmteProposedCharges.docx
Draft: 12/13/21

Model Law Development Report

Amendments to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171)—Amendments to Model #171 are required for consistency with the federal Affordable Care Act (ACA). Therefore, they did not require approval of a Request for NAIC Model Law Development by the Executive (EX) Committee. At the 2015 Fall National Meeting, the Regulatory Framework (B) Task Force discussed the proposed revisions to this model. The Task Force met Feb. 11, 2016, and appointed the Accident and Sickness Insurance Minimum Standards (B) Subgroup to work on revisions to this model. The Subgroup has been meeting on a regular basis since the 2016 Spring National Meeting, and it plans to continue meeting until it completes its work. During its meetings, the Subgroup has discussed several issues, including its approach for revising the model’s disability income insurance coverage provisions, and it decided preliminarily to review the Interstate Insurance Product Regulation Commission’s (Compact’s) approach. After pausing its work due to the ACA’s potential repeal, replacement, or modification—and the possible impact on the provisions of this model, as well as the Subgroup’s preliminary proposed revisions to the model—the Subgroup began meeting again in May 2018. Revisions to the Supplementary and Short-Term Health Insurance Minimum Standards Model Act (#170) were adopted by the full NAIC membership at the 2019 Spring National Meeting. The Subgroup has been meeting to consider revisions to Model #171 for consistency with the revised Model #170 since the 2019 Summer National Meeting discussion on comments received on Sections 1–5 of Model #171. In December 2019, the Subgroup set a public comment period ending Feb. 7, 2020, to receive comments on Sections 6–7 of Model #171. Due to the COVID-19 health emergency, the Subgroup has not scheduled any meetings. Any future meetings will depend on when a new co-chair is appointed and the duration of the COVID-19 health emergency. As requested, the Subgroup received comments from stakeholders on Sections 6–7 of Model #171. A new Subgroup co-chair has been appointed. The Subgroup met June 7, 2021, to discuss the status of the proposed revisions to Model #171 and its next steps. The Subgroup decided to establish a new public comment period ending July 2, 2021, to receive comments on Sections 1–7 of Model #171. The Subgroup does not plan to meet at the 2021 Fall National Meeting. Since the 2021 Summer National Meeting, the Subgroup has been meeting to discuss possible revisions to Model #171 based on the comments received by the July 2, 2021, public comment deadline. During some of these meetings, the Subgroup heard from industry presenters about the products currently covered under Model #171 and the products to be covered under Model #171 after it is revised.

Amendments to the Life Insurance Disclosure Model Regulation (#580)—The Executive (EX) Committee met June 19, 2017, and approved a Request for NAIC Model Law Development to incorporate a policy overview document requirement into Model #580 and the Life Insurance Illustrations Model Regulation (#582) in order to improve the understandability of the life insurance policy summary and narrative summary already required by Section 5A(2) of Model #580 and Section 7B of Model #582. While the Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee was originally planning to revise both Model #580 and Model #582, it will now revise only Model #580. The Working Group has been meeting to develop language to add a requirement for a one- to two-page consumer-oriented policy overview. The Working Group continued to make progress during meetings in late 2019 and early 2020, and it received an extension from the Committee at the 2021 Spring National Meeting to continue its work. The Working Group completed alternative draft versions of model law revisions and a sample policy overview document for term life policies. One version shows the model and sample pre-underwriting, and the other shows the model and sample under existing model law timing requirements. The Working Group developed these alternative versions to aid the Committee in providing guidance to the Working Group with respect to the timing of the delivery of the policy overview document. Discussion of this issue is on the Committee’s agenda at the 2021 Fall National Meeting.

Amendments to the Mortgage Guaranty Insurance Model Act (#630)—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #630 at the 2013 Summer National Meeting. The Mortgage Guaranty Insurance (E) Working Group has developed proposed changes to the model, which have been exposed for comment, and subsequent changes have been made to address the comments. However, the Working Group has been focused on the development of a capital model, which is currently incorporated as a requirement in the model, but further changes are expected to be made to that model before adoption can occur. The Working Group previously received an extension to continue work on the capital model until the 2022 Spring National Meeting. Because the work on the capital model is not completed, an additional request for extension is expected in the future.
Amendments to the Nonadmitted Insurance Model Act (#870)—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #870 at the 2021 Spring National Meeting. The amendments will modernize the model and bring it into alignment with the federal Nonadmitted and Reinsurance Reform Act. The Surplus Lines (C) Task Force met Aug. 5, 2021, and appointed a drafting group to work on the revisions to Model #870.

New Model: Pet Insurance Model Act—The Executive (EX) Committee approved a Request for NAIC Model Law Development at the 2019 Summer National Meeting. The Pet Insurance (C) Working Group held numerous meetings to draft the model law to define a regulatory structure for pet insurance and address issues such as producer licensing, policy terms, coverages, claims handling, premium taxes, disclosures, arbitration, and preexisting conditions. The Working Group adopted the Pet Insurance Model Act on Aug. 4, 2021, and the Property and Casualty Insurance (C) Committee adopted it on Nov. 10, 2021. The Executive (EX) Committee and Plenary is expected to consider the model at the 2021 Fall National Meeting.
CLIMATE AND RESILIENCY (EX) TASK FORCE

Climate and Resiliency (EX) Task Force Dec. 14, 2021, Minutes ......................................................................................... 4-24
Technology Workstream Center of Excellence (COE) Recommendation (Attachment One) .............................................. 4-28
Catastrophe Modeling COE Proposal (Attachment One-A) ................................................................................................. 4-30
Center for Insurance Policy and Research (CIPR) COE Frequently Asked Questions (FAQ) (Attachment One-B) ............... 4-35
Draft Climate Risk Disclosure Survey (Attachment Two) ............................................................................................... 4-41
The Climate and Resiliency (EX) Task Force met in San Diego, CA, Dec. 14, 2021. The following Task Force members participated: Ricardo Lara, Co-Chair, Mike Peterson, Bryant Henley, and Camillo Pizzaro (CA); Raymond G. Farmer, Co-Chair, Michael Wise and Michelle Proctor (SC); Colin M. Hayshida, Co-Vice Chair (HI); James J. Donelon, Co-Vice Chair, represented by Nick Lorusso (LA); Kathleen A. Birrane, Co-Vice Chair, and Alexander Borkowski (MD); Mark AfaIe, Co-Vice Chair, and Sarah Smith (WI); Andrew R. Stolfi, Co-Vice Chair (OR); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Michael Conway (CO); Andrew N. Mais represented by George Bradner and Wanchin Chou (CT); Karima M. Woods and Sharon Shipp (DC); Trinidad Navarro represented by Frank Pyle (DE); David Altmair and Susanne Murphy (FL); Amy L. Beard represented by Victoria Hastings (IN); Gary D. Anderson (MA); Eric A. Cioppa (ME); Grace Arnold (MN); Jon Godfread represented by Matt Fischer (ND); Eric Dunning (NE); Russel Toal represented by Jennifer Catechis (NM); Barbara D. Richardson (NV); Adrienne A. Harris and Yue Chen (NY); Judith L. French (OH); Jessica K. Altman (PA); Elizabeth Kelleheer Dwyer (RI); Scott A. White (VA); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler and Jay Bruns (WA); and Jeff Rude (WY). Also participating were: Elizabeth Perri (AS); Susan Berry (IL); Troy Downing (MT).

1. **Adopted its 2021 Summer National Meeting Minutes**

Commissioner Altmair made a motion, seconded by Commissioner Altman, to adopt the Task Force’s Aug. 15 minutes (see *NAIC Proceedings – Summer 2021, Climate and Resiliency (EX) Task Force*). The motion passed unanimously.

2. **Heard a Recommendation from the Technology Workstream**

Mr. Lorusso said the Technology Workstream was charged with applying technology, such as predictive modeling, to understand and evaluate climate and natural catastrophe risk exposures. He said other groups at the NAIC are also considering catastrophe models within their work. The Catastrophe Risk (E) Subgroup of the Property and Casualty Risk Based Capital (E) Working Group is evaluating wildfire models to consider adding wildfire for informational purposes only into the risk-based capital (RBC) framework. The Catastrophe Insurance (C) Working Group is planning to consider revisions to the *Catastrophe Computer Modeling Handbook*.

Mr. Lorusso said the Technology Workstream met Sept. 20 in regulator-to-regulator session, pursuant to paragraph 6 (consultations with NAIC staff regarding technical guidance) of the NAIC Policy Statement on Open Meetings, to consider the need for support services related to the use of catastrophe models in insurance, including discussion of what other NAIC committees had planned and the relevant research of the Center for Insurance Policy and Research (CIPR). Acknowledging the benefit of a shared resource for state insurance regulators regarding catastrophe models, on Sept. 21 the Technology Workstream exposed a proposal (Attachment One-A) for the CIPR to create a Catastrophe Model Center of Excellence (COE). The Workstream collected comments until its open meeting on Nov. 4, where it heard comments on the proposal and addressed the questions received. Following the Nov. 4 meeting, the Workstream issued a frequently asked questions (FAQ) document (Attachment One-B) to address the comments and clarify the intent of the COE. The Workstream held another open meeting on Nov. 22 to adopt a recommendation (Attachment One) for the NAIC’s CIPR to create a COE.

Commissioner Lara said the Task Force plans to meet during an interim meeting before the 2022 Spring National Meeting to consider the recommendation for adoption.

3. **Heard a Presentation Regarding the Proposed Redesigned NAIC Climate Risk Disclosure Survey**

Commissioner Stolfi (OR) said the Climate Risk Disclosure Workstream met on Nov. 19 to expose its proposed redesigned NAIC Climate Risk Disclosure Survey. He said the Workstream was charged to consider appropriate climate risk disclosures within the insurance sector, including an evaluation of the NAIC Climate Risk Disclosure Survey and evaluation of alignment with other sectors and international standards. Commissioner Stolfi said the NAIC adopted the Climate Risk Disclosure Survey in 2010, which includes eight questions regarding how insurers consider climate-related risks in their risk and investment management practices, including how insurers identify and assess climate-related risks and their potential impact to the company’s business strategies. It also considers how insurers engage with stakeholders on the topic of risk management. The survey is voluntary for states to use. For the past several years, six states participated in the survey, which represented approximately 70% of the market measured by direct written premium. In 2021, 15 states participated, representing nearly 80%...
of the market. All insurers writing at least $100 million in direct written premium with business in any participating state are required to complete the survey annually. For the past two years, insurers were allowed to submit using the Financial Stability Board’s (FSB’s) Task Force on Climate-Related Financial Disclosure (TCFD) in lieu of the eight survey questions. In 2020, eight TCFD reports were filed with the California Department of Insurance (DOI) as part of the annual reporting requirement. In 2021, 28 TCFD reports were received.

The TCFD includes four themes: 1) governance; 2) strategy; 3) risk management; and 4) metrics and targets. The FSB created the TCFD in 2015 and formally adopted its reporting framework in 2017. Internationally, multiple jurisdictions have proposed or finalized laws and regulations to require disclosure aligned with TCFD recommendations, some coming into effect as early as 2022. The Financial Stability Oversight Council (FSOC) published a Report on Climate-Related Financial Risk in October, which, among other things, said that regulators across the financial system should review their existing public disclosure requirements and consider updating and standardizing them to promote the consistency, comparability, and decision-usefulness of information on climate-related risks and opportunities. Furthermore, it was recommended that disclosures build on the four core elements of the TCFD.

Commissioner Stolfi said the Climate Risk Disclosure Workstream decided to align its redesigned survey to the TCFD recommendations and include insurance-specific questions. He then described the proposed survey questions and their origin (Attachment Two). All questions provide for a narrative response. Several questions are repeated as closed-ended, yes or no, or multiple-choice. This information is requested to quickly discern steps companies are taking to manage their climate-related risks and provide trending over time.

Commissioner Stolfi said comments are due on the proposed survey by Jan. 10. The Workstream plans to meet again in early 2022 to review the comments received and consider the revised survey for adoption. The Workstream will report its final recommendation to the Task Force before the 2022 Spring National Meeting.

Director French asked if there would there be room for explanation for insurers that do not have a clear answer for the closed-ended questions. Commissioner Stolfi said that the closed-ended questions always include a narrative question as well. The insurer filling out the survey can use the narrative question to explain their answers within the closed-ended question. Director French asked if the survey would continue to remain voluntary for states or if the objective is for the majority of states to participate. Commissioner Stolfi welcomed other states to opt in, but he said the recommendation of the Workstream is for the survey to continue to be voluntary for states.

4. Received a Status Report from the Solvency Workstream

Commissioner Birrane said the Solvency Workstream is focused on climate-related financial risk and the prudential oversight by U.S. insurance regulators to ensure that the risk is identified, analyzed, and appropriately addressed. The Workstream met on Sept. 30 to hear a presentation from the New York Department of Insurance regarding its Guidance for New York Domestic Insurers on Managing the Financial Risks from Climate Change. The Workstream also heard a summary of prior panel discussions and heard feedback from industry regarding the financial solvency tools to consider for updates related to climate risk. The Workstream then held three regulator-to-regulator discussions pursuant to paragraph 6 (consultations with NAIC staff regarding technical guidance) to discuss financial solvency tools.

The Workstream met in an open meeting on Nov. 8 to expose a list of questions to gather thoughts from regulators and interested parties regarding potential updates on financial solvency tools related to climate risk. Comments on the questions were due on Dec. 8. NAIC staff have begun compiling the comments for the Workstream to review during a future meeting. The Solvency Workstream will review the comments received and consider the need for enhancements to financial solvency tools. After a transparent, collaborative, iterative process, the Solvency Workstream hopes to make its final recommendations to the Task Force in the first quarter of 2022.

5. Received a Status Report from the Innovation Workstream

Commissioner Hayashida said the Innovation Workstream has met twice since the Summer National Meeting. On Sept. 9, the Workstream met to hear from Sola Insurance about a parametric product offered as an endorsement to a homeowners policy. The product uses data from the National Weather Service to detect tornado activity.

The Workstream also met Oct. 6 to hear a presentation from Guy Carpenter about community-based insurance for disaster resilience. He said Guy Carpenter is part of a project team, led by the Wharton Risk Management and Decision Processes Center, to increase the financial resilience of lower to middle income households in New York City to escalating flood risk.
through inclusive insurance programs. The Center for NYC Neighborhoods will buy a parametric risk transfer policy to fund an emergency disaster relief grant program. The New York City Mayor’s Office of Resilience (MOR) sought out the public-private partnership to prepare for flooding.

6. **Received a Status Report from the Pre-Disaster Mitigation Workstream**

Ms. Smith said the Pre-Disaster Mitigation Workstream has been focused on its charge to collect and share resources with consumers and other stakeholders, seeking out best practices to encourage consumer risk awareness. In August, the Workstream distributed a list of mitigation actions to reduce the risk of future loss. Comments were collected on the list of mitigation actions, and the Workstream met Oct. 5 to hear comments received. The National Association of Mutual Insurance Companies (NAMIC) commented that the actions of individual home and property owners may be less effective than actions taken at a community or municipal level. On Oct. 5, the Workstream also heard a presentation from Leslie Chapman-Henderson (Federal Alliance for Safe Homes [FLASH]) regarding its recently released *Buyer’s Guide to Resilient Homes*.

Ms. Smith said the Workstream also met Nov. 18 to hear a presentation from Dave Snyder (American Property and Casualty Insurance Association—APCIA) and Karen Collins (APCIA) regarding industry-led mitigation efforts. During that meeting, the Workstream also heard about grass roots campaigns in Wisconsin and South Carolina to increase consumer awareness, encourage stronger building codes, and incentivize building retrofits through grant programs to increase the resilience of vulnerable communities. The Wisconsin Office of the Insurance Commissioner developed a campaign, “Stronger Wisconsin,” to share information with consumers about measures to protect themselves from increasingly common weather events from severe winter storms to flooding. The campaign is bridging the gap between state agencies, municipalities, and consumers. The Workstream is considering a workshop in spring 2022 to build on its earlier work with building codes, mitigation, and resiliency funding, this time with a focus on wildfire.

Amy Bach (United Policyholders—UP) said UP has been working closely with the California DOI regarding risk reduction resources for property owners and mitigation measures with the Insurance Institute for Business & Home Safety (IBHS). She also mentioned the Federal Advisory Committee on Insurance (FACI) is working on parallel efforts to consider the availability of insurance products and addressing the protection gap through public-private partnerships and other mechanisms.

7. **Heard an Update on Federal Activities**

Brooke Stringer (NAIC) said President Joe Biden’s May 2021 executive order on climate-related financial risk mandated a range of federal studies to analyze the risks climate change poses to the U.S. financial system and lays the groundwork for eventual policy changes. She said the Order directs the Federal Insurance Office (FIO) to assess climate-related issues or gaps in insurance supervision and the potential for major disruptions of insurance coverage in regions of the country particularly vulnerable to climate-related impacts. The NAIC submitted a comment letter in response to the FIO’s request for information underscoring the long-running history and focus of state insurance regulators to assist consumers and protect policyholders while maintaining well-functioning markets.

Ms. Stringer said that in October, the Financial Stability Oversight Council (FSOC) released its *Report on Climate-Related Financial Risk*, which included several policy recommendations to build capacity and expand efforts to address climate-related financial risks, fill data gaps, enhance public climate-related disclosures, and assess climate-related risks to financial stability. The FSOC intends to form two new committees to help financial regulators better understand climate-related risks to the financial system.

The U.S. Securities and Exchange Commission (SEC) remains focused on climate risk disclosure. SEC Chair Gary Gensler directed SEC staff to develop a mandatory climate risk disclosure proposal for the Committee’s consideration by the beginning of 2022. Ms. Stringer also said the Build Back Better reconciliation bill is making its way through the U.S. Congress. It includes President Biden’s policy priorities, including $555 billion for initiatives to combat climate change and promote clean energy production and resilience investments. Build Back Better has been passed in the U.S. House of Representatives but not the U.S. Senate.

Finally, Ms. Stringer said the NAIC is supportive of the Disaster Mitigation and Tax Parity Act, introduced by Sen. Dianne Feinstein (D-CA) and Rep. Mike Thompson (D-CA). If enacted, the Act would ensure that state-based disaster mitigation grants receive the same federal tax exemptions as federal mitigation grants.
8. **Heard an Update on International Activities**

Ryan Workman (NAIC) said the International Association of Insurance Supervisors (IAIS) held its annual conference in November, which included a panel focused on emerging good practices in climate risk scenario analysis for insurers and steps supervisors can take to advance scenario analysis as an effective risk assessment tool for insurers. He said the IAIS created a Climate Risk Steering Group. Commissioner Stolfi is the NAIC representative for that group, and Ms. Yue (Nina) Chen (New York Department of Financial Services [DFS]) serves as vice chair. The Steering Group has three workstreams. The first will develop a gap analysis of the IAIS global standards for insurance supervision to consider whether changes are needed to account for climate-related risk. The second will share examples of effective practices for developing climate scenario analysis in the insurance sector. The third will consider how to integrate climate related financial risks in the annual data collected as part of the Global Monitoring Exercise (GME).

Mr. Workman said the Sustainable Insurance Forum (SIF) met in October to discuss: 1) impacts of climate-related risks on the insurability of assets; 2) broader sustainability issues, including its scoping study *Nature-Related Risks in the Global Insurance Sector*; and 3) climate risks in the actuarial process. Director Farmer is the NAIC representative. Maryland recently became an SIF member, joining California, New York, Vermont, and Washington.

Mr. Workman said in October, the EU-U.S. Insurance Dialogue Project held a public virtual meeting. Commissioner Birrane and Commissioner Doug Ommen (IA) represented the NAIC. In October, they developed two working groups focused on climate-related topics to include: 1) climate risk financial oversight, including climate risk disclosures, supervisory reporting, and other financial surveillance; and 2) climate risk and resilience, including innovative technology, pre-disaster mitigation and adaptation efforts, and modelling.

Finally, Mr. Workman said in early November, the NAIC participated in the COP26 Sustainable Insurance Series hosted by the UN Environment Programme’s (UNEP) Principles for Sustainable Insurance Initiative (PSI). The event was held in conjunction with the United Nation’s (UN’s) COP26 Summit. Commissioner Altmaier, Commissioner Birrane, Director Farmer, Commissioner Kreidler, Commissioner Lara, and Commissioner Mais participated in panels focused on the actions of insurance supervisors regarding climate-related risk and resiliency, including coordination through the NAIC.

Having no further business, the Climate and Resiliency (EX) Task Force adjourned.
MEMORANDUM

TO: Members of the Climate and Resiliency (EX) Task Force

FROM: Technology Workstream of the Climate and Resiliency (EX) Task Force

DATE: Nov. 22, 2021

RE: Recommendation for the NAIC’s Center for Insurance Policy and Research to Create a Catastrophe Model Center of Excellence

The NAIC Climate and Resiliency (EX) Task Force charged the Technology Workstream to apply technology, such as predictive modeling tools, to understand and evaluate climate and natural catastrophe risk exposures. In particular, the Technology Workstream was tasked with determining whether technical support services were needed by state insurance departments regarding the industry’s use of catastrophe models.

The Workstream met Aug. 6, June 7, and March 24 in regulator-to-regulator session, pursuant to paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings, to hear about NAIC activities related to the use of catastrophe models in insurance. Content included a 2020 Center for Insurance Policy and Research (CIPR) research paper, Application of Wildfire Mitigation to Insured Property Exposure, which explores the economic benefits and costs of employing wildfire resilience strategies in nine communities in California, Colorado, and Oregon. Analysis was conducted using the RMS North America Wildfire Models highlighting the benefit of working with catastrophe model vendors for regulatory resilience priorities. Acknowledging the benefit of having a central resource for state insurance regulators regarding catastrophe models, as well the need for its discussed support services, on Sept. 21, the Technology Workstream issued a request for comments on a proposal (Appendix A) for the NAIC’s CIPR to create a Catastrophe Model Center of Excellence (COE). Comments were collected up to its open meeting on Nov. 4, during which the Workstream heard comments on the proposal, answered questions, and clarified the intent of the COE. The Workstream met again on Nov. 22 to provide an overview of a Frequently Asked Questions document (Appendix B), developed to provide answers to the questions received during the open comment period, as well as to provide additional clarification regarding the role of the COE and services to be provided if the proposal is adopted through the Executive (EX) Committee and Plenary.

If adopted, the COE would: 1) facilitate insurance department access to catastrophe modeling documentation and provide assistance in distilling the technical information received; 2) provide general technical education/training materials on the mechanics of commercial models and treatment of perils and risk exposures; and 3) conduct applied research analysis using various model platforms to proactively answer the regulatory “so what” questions that may need to be addressed for regulatory resilience priorities.

The support services offered through the COE will not take the place of individual state insurance department activities involving catastrophe models such as model and rate filing review, nor would the...
COE approve vendor models. The COE will engage with all vendors willing to participate for all perils with technical documentation available for state insurance regulators. The COE will establish a governance structure to ensure that the COE remains transparent and impartial. The COE will periodically report to relevant NAIC committees, including the Technology Workstream of the Climate and Resiliency (EX) Task Force and the Catastrophe Insurance (C) Working Group of the Property and Casualty Insurance (C) Committee.

Furthermore, the COE will provide only fact-based information and relevant objective analysis, as requested. The COE will conduct research using catastrophe models to support risk mitigation and resilience efforts, critical for reducing future probable losses.

The COE will safeguard information received from participating catastrophe modeling vendors through legally binding data-use agreements. Some funding will be necessary to support the ongoing work of the COE, including staff salaries and resources for model access. The expenses associated with COE activities would be subject to the NAIC budget process.

The Technology Workstream voted on Nov. 22 to recommend that the NAIC’s CIPR create a catastrophe modeling COE. We believe this will be a valuable resource for state insurance departments and recommend that the Climate and Resiliency (EX) Task Force will consider moving the proposal forward to the joint Executive (EX) Committee and Plenary to consider for adoption during the 2022 Spring National Meeting.

Tech WS COE Recommendation
APPENDIX A

A Proposal to Establish a Catastrophe (CAT) Modeling “Center of Excellence” (COE) within the NAIC’s Center for Insurance Policy & Research (CIPR)

September 20, 2021

Introduction

The leadership and members of the NAIC have determined natural CAT risks and resiliency to be a top priority and organized several workstreams to pursue objectives intended to help ensure homes and businesses are protected from insured perils arising from natural CATs, while keeping markets stable through financially strong insurers and reinsurers. For example, the Catastrophe Risk (E) Subgroup has spent many years working to develop risk-based capital (RBC) factors for hurricane and earthquake exposures and, more recently, grappling with how best to address wildfire, flood, and convection storm perils. Separately, the Catastrophe Insurance (C) Working Group is charged with maintaining the NAIC State Disaster Response Plan, the Disaster Assistance Program, and the Catastrophe Computer Modeling Handbook. The Working Group has also commenced work to determine ways in which the private flood market can be facilitated and monitored by the state insurance regulators. The Climate and Resiliency (EX) Task Force has taken on significant work, which will require a deeper understanding of all aspects of climate and natural CAT risks. Further, many state insurance regulators are taking on new roles in working to create risk resilient communities within their jurisdictions.

Given these increased pressures and new roles, state insurance regulators need to improve their understanding of the CAT modeling technologies used by insurers and reinsurers. This means having access to the same knowledge, insights, and tools used by insurers. In doing so, state insurance regulators can more effectively engage with insurers and state and federal policymakers when discussing how best to maintain critical insurance coverages for their states' economies and developing new regulatory policy. The NAIC can play an instrumental role fulfilling these needs.

In this regard, the Technology Workstream of the Climate and Resiliency (EX) Task Force was assigned the task of considering the potential application of technology, such as early warning systems and predictive modeling tools, to better understand and thereby evaluate insurers' climate and natural CAT risks.
risk exposures. In particular, the Technology Workstream was tasked with determining whether technical support services were needed by state insurance departments regarding the industry’s use of CAT models.

To help facilitate the members’ consideration of such a need, NAIC/CIPR staff conducted two presentations on June 7 and Aug. 6, 2021, wherein staff laid out a range of support services for state insurance departments when encountering the use of commercial CAT models by insurers in rate making processes, solvency functions, and/or other insurance business decisions (e.g., strategic, reinsurance, claims management). NAIC/CIPR staff addressed potential support services in the areas of: 1) facilitating access to CAT modeling documentation; 2) providing technical education and training; and 3) conducting applied research to proactively address regulatory climate risk and resilience priorities. Finally, an additional related benefit highlighted is the ability to provide future support services for other modeled CAT risk beyond climate and natural CATs, including casualty/liability, cyber, terrorism, and infectious diseases such as pandemics. This additional support work could potentially influence other NAIC related committee activities, as appropriate.

**Proposal**

As outlined in the introduction above, the time has arrived for the NAIC to establish a permanent support group—i.e., the NAIC CAT Modeling COE—to provide the NAIC and state system of insurance regulation with the necessary technical expertise, tools, and information to effectively regulate the insurers and reinsurers exposed to catastrophic events for a secure and stable insurance marketplace. We believe this COE would be best positioned within the NAIC’s CIPR given CIPR’s: 1) existing knowledge, expertise, and recent NAIC applied research track record in this field; and 2) its ability to effectively work with modelers and state insurance regulators from a neutral perspective within the NAIC. Below is a complementary and integrated series of technical support services envisioned by the COE:

1) Facilitating insurance department access to CAT modeling documentation and assistance in the distilling of this information.

2) Providing general technical education/training materials on the mechanics of commercial models and treatment of perils and risk exposures.

3) Conducting applied research analysis utilizing various model platforms to proactively answer the regulatory “so what” questions that may need to be addressed for regulatory resilience priorities.

The first element from above provides for the CAT Modeling COE to facilitate insurance department access to CAT modeling documentation and other information, as well as centralizing accumulated knowledge and expertise to aid in the deciphering and distillation of CAT models. The COE would assist
with managing both CAT model vendor relationships and insurance department needs. As such, the COE would be briefed on the modeling technologies and inputs in a similar fashion as insurers and reinsurers are and have access to the same modeling documentation to develop internal expertise. This knowledge and expertise would then be actively shared with state insurance regulators for use in regulatory processes and other considerations. Critically, this information would be collected and stored on an NAIC regulator-only technological platform with proper CAT modeling vendor Data Use Agreements (DUAs) in place to allow for proprietary model information sharing, part of which has been a stumbling block to regulatory access to date.

The second element from above provides for technical education/training materials on the mechanics of commercial models and treatment of perils and risk exposures for state insurance regulators. Importantly, this technical training would be utilized to enhance regulatory operational activities, thereby bringing the science to operations. For example, it would allow for state insurance departments and the NAIC to reimagine the NAIC *Catastrophe Computer Modeling Handbook*, which could become the foundational authoritative literature on state insurance regulator use of CAT models. As state insurance regulators gain more practice with these models, the NAIC is also well-positioned to develop best practices on industry use, as well as state insurance regulator use. Consequently, the NAIC *Financial Condition Examiners Handbook* and the *NAIC Own Risk and Solvency Assessment (ORSA) Guidance Manual* could be improved to account for the latest developments and best practices in CAT risk assessment. Further from a solvency perspective, both the development of related RBC CAT charges and climate stress testing would benefit greatly from such a technical foundation.

The third element from above provides for conducting applied research analysis to utilize various model platforms to proactively answer the regulatory “so what” questions that may need to be addressed. CAT models are not limited to use by the insurance industry; they are tools for CAT risk assessment. State insurance regulators can apply these tools in much the same way as the industry, albeit for regulatory resilience priorities (e.g., how to increase the uptake and proliferation of home hardening activities related to hurricane and wildfire risk). Such mitigation activities are critical to reduce expected losses and improve the availability and affordability of coverage currently and in a future warming climate. Applied research utilizing CAT models can demonstrate the economic value of such mitigation activities, laying the proper foundation for policy discussions to address increasing property owner mitigation implementation.

Lastly, it is important to note that these identified support services will not be taking the place of individual state department of insurance (DOI) activities involving CAT models, such as model and rate filing reviews, nor will the CAT Modeling COE be approving vendor models. Rather, the support services will allow the COE to engage with state insurance regulators as a trusted partner with a sufficient level
of CAT modeling expertise to enable the conduction of ongoing CAT modeling regulatory activities more effectively.

**Plan of Action**

In the past year, many of the above support services have already transpired and/or are currently underway. These include: 1) regulator-only technological platform infrastructure development and DUA executions; 2) NAIC Insurance Summit and CIPR events focused on CAT modeling education concerning wildfire and flood models, CAT model climate change incorporation and climate risk assessment, and casualty CAT modeling; 3) successful completion of a California, Colorado, and Oregon DOI wildfire mitigation report and wildfire CAT model technical documentation done in conjunction with the Insurance Institute for Business & Home Safety (IBHS) and Risk Management Solutions (RMS), which was further leveraged by the Catastrophe Risk (E) Subgroup for wildfire RBC factor development and the Catastrophe Insurance (C) Working Group *Catastrophe Computer Modeling Handbook* updates.

Therefore, this proposal will not be to start such CAT modeling COE support service activities, but rather to build upon and leverage these activities for further enhancement and formalization at the NAIC.

Following the meeting of the Technology Workstream on Aug. 6, 2021, the proposal was released to the member states for further comments and questions. Comments were considered, and a revised proposal was approved for public exposure by the Technology, Solvency, and Pre-Disaster Mitigation Workstreams on Sept. 20, 2021.

Following the Sept. 20 regulator-only meeting, the proposal was released to interested parties for further comment and questions for 30 days. Comments will be considered by the Technology Workstream following this feedback and revisions may be made to the proposal, as agreed upon.

If the proposal advances through the above process steps, it will be prepared for recommendation to the Climate Risk and Resiliency (EX) Task Force at the NAIC 2021 Fall National Meeting in San Diego, CA.

We anticipate there would be no new charges associated with creation of the COE; i.e., the expenses associated with the COE resources would be effectively absorbed by the NAIC budget and have no special assessments, fee for services, etc. These resources may include: 1) recruiting a vendor/insurance department CAT modeling relationship manager and a CAT model research analyst; 2) funding for education/training development and implementation and the licensing and/or running of models for applied research to support and/or enhance regulatory operational activities; and 3) addressing regulatory resilience priorities.
**Conclusion**

In the face of extreme weather and the future climate significantly affecting property insurance markets, state insurance regulators need to have access to the same knowledge, insights, and CAT modeling tools used by insurers and reinsurers to assess and address climate risk and resiliency; i.e., knowledge and tools that are available for state insurance regulators to access, understand, and utilize. To accomplish this, we propose that the NAIC establish a permanent support group—i.e., the NAIC CAT Modeling COE—housed within the NAIC’s research unit; i.e., CIPR. We have laid out a proposal and plan of action that would build upon the work that the NAIC/CIPR has already been conducting around climate and CAT risks and allows the NAIC/CIPR to bring science to the operation of the DOIs in a way that is additive to the existing regulatory system, easy to access, and tailored to the needs of the state insurance regulators.

We welcome feedback on the proposal and plan of action. Please send questions or comments to Jennifer Gardner at jgardner@naic.org.
NAIC/Center for Insurance Policy and Research (CIPR) Catastrophe Model
Center of Excellence (COE)
Frequently Asked Questions (FAQ)
November 16, 2021

Governance & Oversight

Topic: Vendor and Insurer Continued Engagement with Departments of Insurance (DOIs)

Is the intent for the COE to become the primary point of contact between state insurance regulators and modelers?

No. As stated in the proposal, “identified support services will not be taking the place of state DOI activities involving CAT models, such as model and rate filing reviews, nor will the CAT Modeling COE be approving vendor models.” However, we do envision the COE providing access to CAT modeling expertise to support state insurance regulator understanding, training, etc.

Will state insurance regulators continue to be open to discussions with modelers (and insurers) about models?

Yes. In fact, the COE will seek to improve communication between state insurance regulators and modelers/insurers, supplying state insurance regulators with expertise and information to help facilitate such discussions.

Topic: Transparency and Potential Bias of Modeled Results/Usage

How will the COE engage with interested stakeholders to remain transparent?

Most NAIC support resources interact with a committee for reporting and oversight. In this instance, at least for now, we propose that the catastrophe resource center will report to the Technology Workstream under the Climate and Resiliency (EX) Task Force, as well as coordinate with the Property and Casualty Insurance (C) Committee.

How will the COE work to ensure impartiality of vendor models?
The COE will make every effort to engage with all vendors willing to participate for all perils with available technical documentation. Furthermore, the COE will establish a governance structure to ensure that partiality is not provided to any model or vendor.

**Would the COE be engaging to connect learnings from the CAT model to specific insurer rate-making, solvency, and/or business—i.e., strategic, reinsurance, claims management—decisions?**

The COE support services will not take the place of state DOI activities involving CAT models, such as model and rate filing reviews, nor will the CAT Modeling COE be approving vendor models. The COE will work to understand models objectively from a general sense, not for individual rate filings or solvency assessments. We acknowledge that each insurer has their own risk profile that would need to be considered on an individual basis, which is outside the scope of the COE.

**Topic: Objective Science**

**Would the kind of information the COE conveys be facts-based or would it include opinions or analysis?**

The information provided to the state DOIs would be fact-based with relevant objective analysis, as requested. Providing this type of information to states highlights the importance of the placement of the COE within the NAIC’s independent research center, the CIPR.

**Topic: Addressing Regulatory “So What” Questions Through Applied Research**

**What are regulatory “so what” questions in support service #3 of the proposal conducting applied research analysis?**

State insurance regulators are responsible for maintaining well-functioning competitive insurance markets. Forward-looking models can be utilized to help analyze market performance, especially regarding the need for improved resilience. As stated in the proposal, CAT models are tools for catastrophe risk assessment. State insurance regulators can apply these tools in much the same way as the industry, albeit for regulatory resilience priorities. For example, models can be used to identify high-risk areas and where proliferation of home hardening activities can improve resilience to natural hazards, including hurricane, flood, severe convective storm, tornado, wildfire, and earthquake. Such mitigation activities are critical to reduce probable losses. Lower losses over time can improve the availability and affordability of coverage in the future. Applied research utilizing CAT models can demonstrate the economic value of mitigation activities. One
description provided via public comments that we considered useful is, “conducting applied research analysis that utilizes or analyzes the potential to utilize CAT models to further public and private risk mitigation and resiliency efforts; benefits and opportunities at the individual consumer or business; or public agency at the community, regional, state, or national level.”

**Regarding conducting applied research analyses utilizing CAT models, we would like to understand the research and support expectations from the COE on modelers.**

We envision working with modelers on applied research activities as applicable. We are requesting funding to allow for modeler engagement.

**Depending on the expected level of granularity for COE work, additional questions may be relevant, such as whether the COE (NAIC/CIPR) would need to be prepared to go to a hearing to testify or respond to discovery?**

It is not anticipated that the COE would maintain granular information about individual insurer use of CAT models. The level of detail would be around the actual CAT model to provide education and training to state DOIs.

**Will the COE be used to conduct research and analysis into the markets for CAT models. Will conflicts of interest or market failures distort the use of CAT models?**

No. It is not envisioned that the COE would set out to conduct this type of research and analysis.

**Implementation Considerations**

**Topic: COE Communication of Various Results, Information, and Observations to DOIs**

Given the complexity of models and breadth of expertise required to build and maintain them, there is a risk that any third party cannot adequately communicate the nuances and justification of models. Will the COE plan to coordinate model presentations from the modelers, rather than only relaying this information second-hand?

Yes. The COE would plan to coordinate model presentations from modelers.

**How will information, observations, and/or questions about models be conveyed to state insurance departments? What kind of output will be generated?**

We plan to hire a relationship manager responsible for communicating with the CAT model vendors and state insurance regulators. A regulator-only technology platform will help facilitate information sharing with state insurance regulators.
Research output could take multiple forms depending upon the nature of the analysis undertaken.

**What kinds of data fields will be included? Will others provide input into the design?**

The data fields selected would be contingent on the models being used and the research project under consideration. Data fields would follow from model inputs and outputs.

**Will the COE reviews and/or output be designed to be geography-specific?**

Yes. That is possible.

**Once a model has been reviewed, what renewal process is envisioned?**

Models will not be reviewed, nor would they be posted on the state insurance regulator-only website. However, model technical documentation and information will be updated as new versions of the models are released.

**Topic: Model Vendor Intellectual Property (IP) Protection**

**How will the COE safe-guard intellectual property of the participating CAT model vendors?**

All modeling documentation, access, and usage will be centralized and monitored through the COE via legally binding data use agreements. The NAIC has an extensive track record of experience in collecting and protecting proprietary information. The actual models will not be posted on the state insurance regulator website, only the model documentation will be posted.

**Topic: Interaction with Modelers and Other External Experts**

**Will modelers engage in discussions with the COE about specific models? Do you expect insurers would be involved in model-related discussions?**

Yes. The COE would be engaged with modelers on the modeling technologies and inputs in a similar fashion as insurers and reinsurers and have access to the same modeling documentation to develop internal expertise. It is possible that insurers could be involved in model-related discussions with the COE, but the COE will not review individual insurer’s use of models.

**Is the CIPR planning to license and use modeler software or engage in paid consulting studies for their research and development of processes?**
Yes, depending on COE resources and the specific research use case. The CIPR would be willing to either license modeler software and/or engage in paid consulting studies for research and educational/training purposes, as directed by the appropriate NAIC authorities.

**How will results and underlying assumptions from licensed models be communicated to state insurance regulators?**

Any use of a licensed model, including distribution of modeled results, would be subject to the model license agreement and/or model vendor negotiated research consulting contract. Underlying assumptions from the various models utilized would be collected via the model technical documentation as part of the model vendor data use agreement. Note that it is possible that the model technical documentation, including underlying model assumptions, could be collected through a COE data use agreement without an associated model-based research project. If we were to license a model, the actual model would not be posted on the state insurance regulator-only website.

**Will modelers be involved in establishing workflows, best practices, agendas, and expectations of the COE, including timing?**

We anticipate that modelers will be actively engaged with the COE staff, advising on these items as appropriate.

**How many vendors is the COE considering supporting?**

The COE will not be “supporting” vendors, but rather the COE will collect model documentation and engage with model vendors. The COE will engage with any model vendor serving insurance markets where the information is relevant to state insurance regulators.

**Does the COE anticipate looking to external experts for some of the implementation or ongoing work?**

Yes. External collaboration would be welcome, whether that be with industry experts, public agencies, or the academic community.

**Topic: Resources – Staffing and Funding**

**How many states do you expect to be interfacing with the COE?**

The COE will be a resource of the NAIC potentially interfacing with all 56 jurisdictions.
Beyond recruiting for the identified new roles of CAT modeling relationship manager and CAT model research analyst, how many people at the NAIC/CIPR will be contributing to COE activities? Do you expect that to change over time?

The CIPR director, the NAIC solvency enterprise risk management (ERM) advisor, and potentially Property and Casualty Insurance (C) Committee staff support will have a role in supporting the work of the COE. We anticipate that additional technical and administrative support resources may be necessary as the workload and demand for services evolve with demonstrated success.

Will the staffing level proposed by the NAIC be able to provide meaningful analysis in the broad category of catastrophe modeling?

Prior to the creation of the COE, CIPR and NAIC staff have provided meaningful analysis on wildfire CAT modeling and applied wildfire resilience research. We aim to build off this success and need to start somewhere. Every little bit helps for the states, as stated by one industry commenter, “[t]he staffing issues mentioned above regarding experts at the NAIC are even larger for state insurance departments. Most states are not going to have enough or the right staff to review these models. They will have to rely on others to evaluate catastrophe model validity, and most likely will have to rely heavily on the decisions and evaluations made by others.”

Have long-term plans been prepared? Are there budget implications?

No long-term plan has been developed for the COE. The expenses associated with the COE would be subject to the NAIC budget process and have no special assessments or fees for service.
PROPOSED REDESIGNED NAIC CLIMATE RISK DISCLOSURE SURVEY

PURPOSE STATEMENT

The purpose of the Climate Risk Disclosure Survey is to:

- Enhance transparency about how insurers manage climate risks and opportunities as well as identify good practices and vulnerabilities.
- Provide a baseline supervisory tool to assess how climate-related risks may affect the insurance industry.
- Promote insurer strategic management and encourage shared learning for continual improvement.
- Enable better-informed collaboration and engagement on climate-related issues among regulators and interested parties.
- Align with international climate risk disclosure frameworks to reduce redundancy in reporting requirements.

Narrative and closed ended questions follow, grouped into the Financial Stability Board’s Task Force for Climate-related Financial Disclosure (TCFD) four topics.

Can be presented as (1) two separate parts of the same survey, narrative and closed ended, with option to attach narrative answers as file if it exists already (e.g., like current TCFD reports) so that only closed ended need to be completed, or (2) closed ended questions directly incorporated into narrative questions, with possible option to attach a report and only answer closed ended questions.

*Italics* indicate that the question is copied from TCFD.
Governance – narrative questions

1. **Disclose the organization's governance around climate-related risks and opportunities.**
   - Identify and include any publicly stated climate risk goals
   - Describe where climate risk disclosure is handled within the organization’s structure, e.g., at a group level, entity level, or a combination. If handled at the group level, describe what activities are undertaken at the company level.
   A. **Describe the board's oversight of climate-related risks and opportunities.**
      - Describe who on your board or committees is responsible for the oversight of managing the climate-related financial risks.
   B. **Describe management’s role in assessing and managing climate-related risks and opportunities.**

Governance – closed ended questions answered in addition to the narrative

1. Is Climate Risk Governance done at a group level, entity level, or a combination? (Multiple-choice answers)
   - Based on answer/if group level: Are any activities undertaken at the Company Level? (Y/N)
2. Does the company have publicly stated climate risk goals? (Y/N)
3. Does your board have a member, members, a committee, or committees responsible for the oversight of managing the climate-related financial risk? (Y/N)
4. Does management have a role in assessing and managing climate-related risks and opportunities? (Y/N)

Strategy – narrative questions

2. **Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.**
   - Describe how the company defines materiality.
   - Describe the steps the company has taken to engage key constituencies on the climate risk and resiliency.
   - Describe the companies plan to assess, reduce, or mitigate its greenhouse gas emissions in its operations or organizations.
   A. **Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term by completing the chart below.**
      - Define short, medium, and long-term, if different than 1-5y as short term, 5-10y as medium term, and 10-30y as long term.
B. **Describe the impact of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning.**
   - Discuss how the company provides products or services, or makes investments, to support the low carbon transition or help customers adapt to climate risk? (This can include underwriting and/or investments.)

C. **Describe the resilience of the organization's strategy, taking into consideration different climate-related scenarios, including a 2 degree Celsius or lower scenario.**

***Strategy - closed ended questions answered in addition to the narrative***

1. Has the company taken steps to engage key constituencies on the topic of climate risk and resiliency? (Y/N)
2. Does the company provide products or services, or make investments, to support the low carbon transition or help customers adapt to climate risk? (This can include underwriting and/or investments.) (Y/N)
3. Does the company have a plan to assess, reduce or mitigate its greenhouse gas emissions in its operations or organizations? (Y/N)

***Risk Management – narrative questions***

3. **Disclose how the organization identifies, assesses, and manages climate-related risks.**
   - Discuss how the company considers the impact of climate related risks on its underwriting portfolio, and how the company is managing its underwriting exposure with respect to physical, transition and liability risk.
   - Describe any steps the company has taken to encourage policyholders to manage their potential climate related risks.
   - Describe how the company has considered the impact of climate related risks on its investment portfolio, including what investment classes have been considered.
   
   A. **Describe the organization’s processes for identifying and assessing climate-related risks.**
      - Discuss whether the process includes an assessment of financial implications.
      - Discuss how frequently the company go through the process to assess climate-related risks.
   
   B. **Describe the organization’s processes for managing climate-related risks.**
   
   C. **Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization’s overall risk management.**
      - Discuss whether climate-related risks are addressed through the company’s general enterprise-risk management process or a separate process.
• Discuss how frequently the company goes through the process to identify climate-related risks
• Describe the potential impact of climate related risks on the company’s underwriting portfolio and how the company is managing its exposure with respect to physical, transition and liability risk.
• Describe how the company considers the impact of climate-related risks on its investment portfolio.

Risk Management – closed ended questions answered in addition to the narrative

1. Does the company have a process for identifying climate-related risks? (Y/N)
   A. If yes, are climate-related risks addressed through the company’s general enterprise-risk management process? (Y/N)
   B. If yes, how frequently does the company go through the process to identify climate-related risks? (Multiple choice, e.g., annually, etc.)
2. Does the company have a process for assessing climate-related risks? (Y/N)
   A. If yes, does the process include an assessment of financial implications? (Y/N)
   B. If yes, how frequently does the company go through the process to assess climate-related risks? (Multiple choice)
3. Does the company have a process for managing climate-related risks? (Y/N)
4. Has the company considered the impact of climate-related risks on its underwriting portfolio? (Y/N)
5. Has the company taken steps to encourage policyholders to manage their potential climate-related risks? (Y/N)
6. Has the company considered the impact of climate-related risks on its investment portfolio? (Y/N)

Metrics and Targets – narrative questions

4. Disclose the metrics and targets used to assess and manage relevant collateralized risks and opportunities where such information is material.
   • Describe how your organization uses catastrophe modeling to manage the climate-related risks to your business.
   • Specify for which climate-risks the company uses catastrophe models to assess. (Property, Casualty, Life, Health)
   • Discuss the climate scenarios utilized by the company to analyze its underwriting risks, including which risk factors the scenarios consider, what types of scenarios are used, and what timeframes are considered.
   • Discuss the climate scenarios utilized by the company to analyze risks on its investments, including which risk factors are utilized, what types of scenarios are used, and what timeframes are considered.
     A. Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process.
In describing the metrics used by the company to assess and monitor climate risks, consider the amount of exposure to business lines, sectors, and geographies vulnerable to climate-related physical risks [answer in absolute amounts and percentages if possible], alignment with climate scenarios, [1 in 100 years probable maximum loss, Climate VaR, carbon intensity], and the amount of financed or underwritten carbon emissions)

B. **Disclose Scope 1, Scope 2, and if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the related risks.**

C. **Describe the targets used by the organization to manage climate-related risks and opportunities and performance against targets.**

**Metrics and Targets – closed ended questions answered in addition to the narrative**

1. Does your company use catastrophe modeling to manage your company’s climate-related risks? (Y/N)
   A. If yes, for which climate-related risks does the company use catastrophe models? (Multiple choice: Property, Casualty, Life, Health)
   B. If yes, how does the company use catastrophe modeling to manage climate-related risks? Multiple choice: Financial solvency, underwriting, other – please describe)

2. Does the company use metrics to assess and monitor climate-related risks? (Y/N)

3. Does the company have climate-related targets? (Y/N)

4. Has the company utilized climate scenarios to analyze their underwriting risk? (Y/N)
   A. If yes, which risk factors do the scenarios consider? (Multiple choice: Physical, Transition, Liability)
   B. If yes, what type of scenarios are used? (Multiple-choice)
   C. If yes, what timeframes are considered? (Multiple-choice)
   D. If no, does the company expect to develop scenario analysis for underwriting in the future? (Open comment)

5. Has the company utilized climate scenarios to analyze their investment risk? (Y/N)
   A. If yes, which risk factors do the scenarios consider? (Multiple choice: Physical, Transition, Liability)
   B. If yes, what type of scenarios are used? (Multiple-choice)
   C. If yes, what timeframes are considered? (Multiple-choice)
   D. If no, does the company expect to develop scenario analysis for investment management in the future? (Open comment)
GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting.
The Innovation and Technology (EX) Task Force met in San Diego, CA, Dec. 13, 2021. The following Task Force members participated: Jon Godfread, Chair, and Chris Aufenthie (ND); Elizabeth Kelleher Dwyer, Vice Chair, and Matt Gendron (RI); Lori K. Wing-Heier (AK); Jim L. Riding represented by Jimmy Gunn (AL); Alan McClain (AR); Evan G. Daniels (AZ); Ricardo Lara represented by Ken Allen and Lucy Jabourian (CA); Michael Conway (CO); Andrew N. Mais (CT); Karima M. Woods represented by Michael Ross (DC); Trinidad Navarro (DE); David Altmaier represented by John Reilly (FL); Colin M. Hayashida (HI); Doug Ommen (IA); Dean L. Cameron represented by Weston Trexler (ID); Dana Popish Severinghaus represented by Eric Weyhenmeyer (IL); Amy L. Beard represented by Jerry Ehlers (IN); Vicki Schmidt represented by LeAnn Crow (KS); Sharon P. Clark represented by Vicki Lloyd (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Eric A. Cioppa represented by Benjamin Yardley (ME); Anita G. Fox represented by Chad Arnold (MI); Grace Arnold (MN); Chlora Lindley-Myers represented by Cynthia Amann (MO); Mike Chaney represented by Ryan Blakeney (MS); Troy Downing (MT); Mike Causey represented by Angela Hatchell (NC); Marlene Caride represented by Randall Currier (NJ); Russell Toal represented by Leatrice Geckler (NM); Barbara D. Richardson (NV); Judith L. French (OH); Glen Mulready represented by Teresa Green (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Raymond G. Farmer represented by Michael Wise (SC); Larry D. Deiter (SD); Carter Lawrence (TN); Cassie Brown (TX); Jonathan T. Pike (UT); Scott A. White and Rebecca Nichols (VA); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler represented by Molly Nollette (WA); Mark Afable (WI); and Allan L. McVey represented by Robert Grishaber (WV).

1. **Adopted its Summer National Meeting Minutes**

Commissioner Conway made a motion, seconded by Commissioner Altman, to adopt the Task Force’s Aug. 14 minutes (see *NAIC Proceedings – Summer 2021, Innovation and Technology (EX) Task Force*). The motion passed unanimously.

2. **Adopted its Working Group Reports**

   a. **Big Data and Artificial Intelligence (EX) Working Group**

   Commissioner Ommen gave the report of the Big Data and Artificial Intelligence (EX) Working Group. He said the Working Group met Dec. 13 and reviewed its 2022 proposed charges and briefly discussed the progress on its 2021 charges and the relevance of the Working Group’s efforts continuing under the proposed Innovation, Cybersecurity, and Technology (H) Committee. He said the Working Group has focused its efforts this year in researching the use of big data and artificial intelligence (AI) in the business of insurance and evaluating existing regulatory frameworks for overseeing and monitoring AI and machine learning (ML), including discussions on model governance. He said during its meeting, the Working Group received a presentation on how to leverage the lessons learned in developing the regulatory framework for cybersecurity to the development of a regulatory framework for the use of AI. Additionally, building on the work of the NAIC’s AI principles adopted last year, the Working Group heard a presentation from Monitaur, which is a company that has been active in developing governance and controls for AI/ML models, and SigmaRed, another company developing processes to monitor and mitigate AI bias and enhance model transparency.

   Commissioner Ommen said the Working Group received a presentation on the preliminary, aggregate analysis of industry responses to the survey on private passenger auto (PPA) insurers’ AI/ML use that was conducted under the examination authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin. He said this research is intended to inform work in other areas related to the Working Group’s charges, such as evaluating the appropriateness of existing regulatory frameworks for overseeing and monitoring the use of AI/ML models. He said it was distributed to PPA insurers with national premium greater than $75 million and asked a threshold question of whether a company is using or contemplating using AI/ML; followed by questions related to the operational areas of rating, underwriting, claims, fraud detection, marketing, and loss prevention; and additional questions related to specific uses, level of deployment, level of decisions influenced, governance, and types of data used.

   Commissioner Ommen said the Working Group discussed the next line of insurance to survey, which included a discussion of conducting surveys for both homeowners and life insurance at the same time, and he said the Working Group will identify state subject matter experts (SMEs) to begin discussions for these two lines while finalizing the analysis of the PPA survey.
b. Speed to Market (EX) Working Group

Ms. Nichols gave the report of the Speed to Market (EX) Working Group. She said the Working Group met Nov. 16 and took the following action: 1) adopted its June 30 and June 29 minutes; 2) discussed and reviewed the Casualty Actuarial and Statistical (C) Task Force’s Regulatory Review of Predictive Models white paper; 3) considered its proposed edits to Chapter Three—The Basics of Property and Casualty Rate Regulation of the Product Filing Review Handbook (Handbook) for approval; and 4) adopted the Casualty Actuarial and Statistical (C) Task Force’s edits to the Handbook. She said updating the Handbook will be a priority in 2022 for the Working Group.

c. E-Commerce (EX) Working Group

Commissioner Birrane gave the report of the E-Commerce (EX) Working Group. She said the Working Group met Oct. 7 and heard from state insurance regulators, consumer representatives, industry representatives, and other stakeholders on the core concerns and considerations that should shape the scope of its work. She said the American Council of Life Insurers (ACLI) suggested the development of a handbook that would capture the regulatory framework that exists with respect to e-commerce, including variations among jurisdictions. She said the presentations informed the three surveys that were circulated to state insurance regulators and interested parties on Dec. 10: 1) a survey to identify, for each jurisdiction, the laws that regulate electronic insurance transactions, including the status of the state’s adoption of the Uniform Electronic Transactions Act (UETA); 2) a survey focused on what accommodations each jurisdiction made to allow electronic transactions to occur during the COVID-19 pandemic, as well as the basis for those accommodations and what would have to happen to allow it to become permanent; and 3) a survey directed to industry focusing on identifying specific and practical ways in which specific laws or regulatory constructs impede electronic commerce in the insurance sector. She said once the survey responses are received, the Working Group will analyze and report on the results, which will inform its next steps.

Commissioner Godfread asked if there are any questions regarding any of the working group reports. Hearing none, Superintendent Dwyer made a motion, seconded by Director Wing-Heier, to adopt the following reports: 1) the Big Data and Artificial Intelligence (EX) Working Group, including its Dec. 13 minutes (Attachment One); 2) the Speed to Market (EX) Working Group, including its Nov. 16 minutes (Attachment Two); and 3) the E-Commerce (EX) Working Group, including its Oct. 7 minutes (Attachment Three). The motion passed unanimously.

3. Heard an Update on CO SB 21-169

Commissioner Conway said the core goal of Colorado Senate Bill 21-169 is to protect Colorado consumers from insurance practices that result in unfair discrimination on the basis of race, color, national or ethnic origin, religion, sex, sexual orientation, disability, gender identity, or gender expression. He said it is focused on ensuring that external consumer data is not used in a way that unfairly discriminates against consumers. He said the core idea came from recognizing that the insurance department would not have the resources or expertise to compete with insurance companies but needed to find a way to ensure that the industry is using big data components responsibly. He said the intention is to find ways for the industry to stress test their own systems and identify the issues that may be occurring with big data systems and algorithms and find solutions for them. He said this is a problem that is bigger than just the insurance industry, and he provided examples. He said at its core, the legislation says a simple correlation to risk will not be sufficient if the underlying insurance practice also correlates to a protected class and negatively affects that class. He said it will be a balancing test that the law requires to be defined through a stakeholder process. He said the legislation is focused on personal lines of insurance, life, health, property, and casualty. He said the insurance practices subject to the legislation are marketing, underwriting, pricing, utilization management, reimbursement methodologies, and claims management. He said the risk management framework required by the law includes providing information on the external consumer data and information source used, explaining how it is used, establishing and maintaining a risk management framework, attesting to its implementation, and providing an assessment of the results of the framework or a similar process. He said the plan is to begin stakeholder meetings in mid-January 2022, and the rules will not be effective until Jan. 1, 2023. He encouraged all stakeholders to engage with the process.

4. Heard Presentations from Insurtech Coalitions

Commissioner Godfread introduced J.P. Wieske (American InsurTech Council—AITC) and Scott Harrison (AITC).

a. AITC

Mr. Harrison said the group is formally launching today, Dec. 13. He said he is the co-founder of the AITC, and he is joined by three other co-founders: Jack Friou, Thomas Mays, and Mr. Wieske. He said another co-founder, Teri Hernandez is not able
to be in attendance. He said the AITC saw the need for an organization to work with state insurance regulators as they develop new standards and regulatory frameworks for Insurtech. He said the AITC’s mission is to serve as a dedicated, independent advocacy organization, advancing the public interest through the development of ethical, technology-driven innovation in insurance. Through its advocacy efforts, it also aims to advance public policy interests of insurers, insurance carriers, brokers, and other stakeholders by providing policy research, education, and outreach to policymakers, with the public, and across all lines of insurance. Mr. Wieske said the regulation of insurance must change and the regulatory environment modernize. He said the AITC wants to work with state insurance regulators to build this new environment, and it must be state-based. He said the AITC will not be for everybody, and he expects it to be a bit more of an exclusive organization going forward, but he believes these core principles are the key to moving forward.

Director Dieter said South Dakota did an innovation waiver last year, and Mr. Wieske and Mr. Harrison were very helpful in working with the legislature in getting that bill passed.

b. **InsurTech Coalition**

Commissioner Godfread introduced the second presenter from the InsurTech Coalition, Rachel Jrade-Rice (Next Insurance). Ms. Jrade-Rice introduced the other InsurTech Coalition members: Bill Latza (Lemonade), Jeremy Deitch (Boost), and Melanie Irvin (Branch). She said the InsurTech Coalition is made up of property/casualty (P/C) insurers. She said it is more of a bottom-up type of organization that started with these companies talking about regulation and how best to interface with commissioners given their unique characteristics. She said the InsurTech Coalition’s insurers are in business to benefit the consumer and, more than thinking about the technologies, think about things in terms of the insurance product and consumer experience as a whole. She said the insurers that make up the Insurtech Coalition are focused on three things: 1) customer engagement; 2) convenience; and 3) tailored insurance products. She said the mission is to, first and foremost, be a resource and share information about how they use these technologies. She said founders of these companies recognized that there were underserved consumers in the marketplace, and they worked to bridge that insurance protection gap between what customers need, increasing accessibility and leveraging technology to build a better future. She said the focus of the InsurTech Coalition is speed to market, collaboration, and modernization.

Commissioner Godfread asked Ms. Jrade-Rice if the InsurTech Coalition is seeking additional members. Ms. Jrade-Rice said the InsurTech Coalition would welcome other members, and it is here to serve and be a resource to state insurance regulators and each other and to help everyone navigate the complex regulatory landscape.

5. **Heard a Presentation from the Ad Hoc Drafting Group on Proposed Draft Charges for a New NAIC H Committee**

Superintendent Dwyer provided an update on the progress of the Ad Hoc Drafting Group related to drafting charges for a new NAIC committee. She said she chaired the Ad Hoc Drafting Group, and it was vice chaired by Commissioner Birrane and Director Daniels. She said the process was thoughtful and deliberate, and the end product reflects the discussion and comments from all stakeholders, not just the 13 states who served on the Ad Hoc Drafting Group. She said in addition to Arizona, Maryland, and Rhode Island, the following states participated: California, Connecticut, Georgia, Iowa, Michigan, New Mexico, Ohio, North Dakota, Tennessee, and Wisconsin. She said the first meeting was held on Sept. 27, and a “strawman” charges draft was discussed, subsequently revised, and circulated to the members prior to the Commissioners’ Conference in late October. She said hearing no objections, the draft was then exposed publicly; a public open comment meeting was held on Nov. 19; and comments, both written and verbal, provided by state insurance regulators, industry, and consumer representatives were taken into consideration following that meeting. She said another meeting of the Ad Hoc Drafting Group was held on Nov. 30 to review the new draft, and the final version was completed and posted on the NAIC website. She said it is open for discussion at the Innovation and Technology (EX) Task Force meeting, will be discussed during the Executive (EX) Committee meeting, and will be brought before the full membership at the Executive (EX) Committee and Plenary for a vote.

Superintendent Dwyer said the intention is to provide more consistency and collaboration, ensure coordination on related workstreams, and provide clarity and understanding regarding who or what committee is doing what and how it aligns and coordinates with related activities taking place in other workstreams. She said in addition, a priority and focus will be given to cybersecurity. She said once a chair and vice chair are named and committee members assigned, the committee will go over its charges and develop its strategy and workplan for addressing the charges. She said that may involve some re-organization of NAIC committees, but those decisions will be made once the committee is formed.

Commissioner Godfread said the new committee, once approved and members appointed, will put the structure in place, and the working groups that come under the committee will continue the work they have been doing in the technology and cybersecurity space and innovation, but it may look just a touch different as the work is elevated up to a letter committee level.
6. Heard Updates from Other Committees and Working Groups on Related Activities

Commissioner Godfread asked representatives from other committees whose charges involve related workstreams to those of the Task Force to provide updates.

a. Special (EX) Committee on Race and Insurance

Commissioner Mais said his report focuses on activity of the Special (EX) Committee on Race and Insurance that relates to data issues. He said there has been discussion within the workstreams about data potentially being needed to ensure that unfair discrimination or bias is not occurring in the marketing, underwriting, or rating of insurance. He said Workstream Five, dealing with health, has moved the furthest down this path by drafting a “Principles for Data Collection” document that provides high-level guiding principles for the collection and treatment of data on race, ethnicity, and other demographic characteristics in the health insurance business. He said one consistent theme expressed by stakeholders is that robust data collection is a key to both quantifying existing disparities and evaluating the effectiveness of initiatives to address those disparities. He said the Workstream plans to hold one last meeting on Dec. 20 to finalize the document, then it will be forwarded to the Special Committee for consideration.

Commissioner Mais said the Special Committee is also hearing how race is considered in the banking sector during this national meeting to see what can be learned and leveraged from that regulatory process to better inform workstreams as they begin to consider what additional data may or may not be needed. He said in terms of P/C issues, Workstream Three met Dec. 1 and heard from interested parties about Charge F having to do with continuing research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. He said the Workstream believes an important first step would be to consider the drafting of a white paper to define some of these terms, as well as to set forth next steps for the Special Committee.

Commissioner Mais said during Workstream Three’s Dec. 1, the Casualty Actuarial Society (CAS) previewed several papers it will be releasing in early 2022 that will define discrimination insurance; potential influences of racial bias on P/C insurance; approaches to address racial bias in financial services, including lessons learned for the insurance industry; and methods for quantifying discriminatory effects on protected classes in insurance. He said the CAS provided an overview of those papers, and it appears they will be useful in drafting the white paper. He said the Workstream also heard from several other consumer and industry groups about how to define these terms, as well as how to audit algorithms to ensure there is no disparate impact. He said the next step will be to have another call to continue these discussions, with a goal of drafting a white paper outline and taking comments on that outline.

b. Privacy Protections (D) Working Group

Ms. Amann said the Privacy Protections (D) Working Group met Dec. 11 and had a lively discussion about privacy protections. She said this work will likely overlap with many other groups. She said during that meeting, the Working Group adopted its charges and minutes from previous meetings. She said the focus of the work going forward would include the right to: 1) opt out; 2) limit and correct information; 3) delete information; 4) data portability; 5) restrict the use of data; 6) data ownership; 7) notice; and 8) non-discrimination or non-retaliation. She said the report was re-worded to replace the word “right” with “categories of discussion,” and this is now the report of the Working Group and not a policy statement as it had previously been labeled.

a. Accelerated Underwriting (A) Working Group

Commissioner Arnold gave the report of the Accelerated Underwriting (A) Working Group. She said the Working Group has been releasing its education report on accelerated underwriting in pieces for comment. She said the latest draft was released on Nov. 8, and comments are due by Dec. 3. She said the Working Group has received four comment letters from NAIC-funded consumer representative Birny Birnbaum (Center for Economic Justice—CEJ), NAIC-funded consumer representative Brendan Bridgeland (CEJ), Sue Bartholf (American Academy of Actuaries—Academy); and David Leifer and Gabrielle Smith (ACLI). Commissioner Arnold said on the Dec. 6 call, each of the commenters had the opportunity to briefly summarize the primary points in their comments. She said she chairs an ad hoc group made up of state insurance regulators working to draft the report, but the ad hoc group has not had an opportunity get together yet to review and consider these comments. The ad hoc group plans to meet following the Fall National Meeting, and it anticipates exposing a revised draft for a public comment period prior to the 2022 Spring National Meeting.
7. **Heard a Presentation on the MIB’s Algorithmic Bias Testing for Life Insurers**

Commissioner Godfread introduced Scott Kosnoff (Faegre Drinker) and Christie Corado (MIB Group). Mr. Kosnoff said the MIB Group is a life insurance trusted partner for data; offers insights in digital solutions; and manages a contributory data exchange for life insurance application data, which is known as the MIB Group checking service. He said the MIB Group may be able to help life insurers with algorithmic accountability, especially as it relates to racial bias, and it sees four challenges in this area including: 1) due to liability concerns, most insurers are reluctant to collect, derive, or purchase the demographic information needed to test for racial bias; 2) even if that data is available, there is no agreed upon means of measuring racial bias in algorithms; 3) there is no consensus on what level of correlation with race is acceptable; and 4) there is no consensus on how to mitigate racial bias if it is determined to exist. Ms. Corado said the MIB Group can help by serving as a repository of data, including race and ethnicity information that companies may not want to collect or store from the MIB Group checking service and publicly available data. She said the MIB Group could also promote algorithmic accountability by using actuarial analysis and data analytics to test and validate life insurers’ AI algorithms and external data. She said to do this, it would need companies to provide their underwriting outcomes, and if they would, the MIB Group may be able to create industry benchmarks that will allow insurers to compare their results with industry averages. She detailed the reasons why the MIB Group may be uniquely situated to provide this type of service.

Commissioner Afable asked Mr. Kosnoff and Ms. Corado if they have determined a standard that they are using to test against. Mr. Kosnoff said no, and that is one of the big challenges identified; but if enough companies would use the MIB service, the MIB Group may start to develop the bell curve that would allow it to see what looks and feels normal versus where there are outliers.

8. **Received a Presentation on the SERFF Modernization Project**

Joy Morrison (NAIC) provided an update on the System for Electronic Rates and Forms Filing (SERFF) Modernization Project. She said SERFF is used in 53 jurisdictions and has been around for 20 years, processing over half a million filings yearly. She said the effort to modernize SERFF started a couple years ago with there being some indication that there was a need for added functionality. She said an assessment was done in 2020, and the team identified many great tools and technologies available that could be leveraged to improve the system. She said the team has done some development work that is currently being demonstrated to state insurance regulators to get their feedback. She said that input is very important, and she encouraged everyone to participate in those demos and provide input and feedback.

9. **Discussed Other Matters**

Commissioner Godfread said the Task Force had an agenda item to get an update on international work related to innovation and technology, but due to time constraints, that report will be distributed to the Task Force members after the meeting.

Commissioner Godfread thanked everyone who has participated in Task Force activities over the past five years, noting that it will be disbanded with the appointment of the new Innovation, Cybersecurity, and Technology (H) Committee. He said he wants to specifically thank one of his staff members, Mr. Aufenthie, and the vice chair, Superintendent Dwyer, for the work they have done in support of the Task Force. He also thanked the members for their continued engagement and level of interest.

Having no further business, the Innovation and Technology (EX) Task Force adjourned.

12.13ITTF Minutes Final.docx
The Big Data and Artificial Intelligence (EX) Working Group of the Innovation and Technology (EX) Task Force met in San Diego, CA, Dec. 13, 2021. The following Working Group members participated: Doug Ommen, Chair (IA); Elizabeth Keller Dwyer, Co-Vice Chair (RI); Mark Afable, Co-Vice Chair (WI); Lori K. Wing-Heier (AK); Jimmy Gunn (AL); Ken Allen (CA); Peg Brown (CO); George Bradner (CT); Frank Pyle (DE); Nicole Altieri Crockett (FL); Erica Weyhenmeyer (IL); Jerry Ehlers (IN); Victoria Lloyd (KY); Tom Travis (LA); Kathleen A. Birrane and Robert Baron (MD); Karen Dennis (MI); Grace Arnold (MN); Cynthia Amann (MO); Kathy Shortt (NC); James Fox (NH); Randy Currier (NJ); Barbra Richardson (NV); Lori Barron (OH); Glen Mulready and Teresa Green (OK); Jessica K. Altman (PA); Raymond G. Farmer (SC); Bill Huddleston (TN); Mark Worman (TX); Don Beatty (VA); Kevin Gaffney (VT); and Molly Nollette and John Haworth (WA).

1. **Reviewed its 2022 Proposed Charges**

Commissioner Ommen said the NAIC members are considering the formation of a new Innovation, Cybersecurity, and Technology (H) Committee, which includes proposed charges to continue the work of the Big Data and Artificial Intelligence (EX) Working Group. He summarized the charges as follows: 1) research the use of big data and artificial intelligence (AI) in the business of insurance and evaluate existing regulatory frameworks for overseeing and monitoring their use, which may include model governance; 2) review current audit and certification programs and/or frameworks that could be used to oversee insurers’ use of consumer and non-insurance data and models using AI, and, if appropriate, work to develop modifications to model laws and/or regulations; and 3) assess data needs and required tools for state insurance regulators to appropriately monitor the marketplace, including gaining a better understanding of currently available data and tools and a means to include these tools into existing or new regulatory processes. He said the Working Group has been making expected measurable progress on the charges, but the charges have not been completed.

2. **Received a Presentation on Applying Cybersecurity Lessons Learned to AI Regulation**

Jillian Froment, an independent insurance regulatory advisor, provided a presentation on the similarities of cybersecurity and AI from a regulatory viewpoint. She said the similarities between cybersecurity and AI include their consumer impact and the fact that neither is a traditional area of insurance regulation nor an area of expertise for state insurance regulators. She said both areas are constantly evolving compared to typical insurance issues and have a potential for federal overlap. She said there are also external expectations for state insurance regulators to develop an appropriate regulatory framework. She said there are five actionable areas for AI regulation similar to the areas of regulation set forth in the *Insurance Data Security Model Law* (#668). These include proactive identification and mitigation of risks, ongoing monitoring and reporting of potential risks, insurer accountability of third parties, compliance certification to state insurance regulators, and transparency to state insurance regulators. Ms. Froment said this is an ongoing process and includes a governance solution that places responsibility on insurer. She said AI has similar challenges for state insurance regulators as cybersecurity. She said the overlay of the NAIC’s AI Guiding Principles on the five actionable areas could provide a structure for the foundation of a governance model over the insurers’ use of AI.

3. **Received a Presentation on a Possible AI Regulatory Path**

Commissioner Ommen said the Working Group’s charges include researching the use of big data and AI in the business of insurance and evaluating existing regulatory frameworks for overseeing and monitoring their use, which may include model governance. He said the NAIC’s AI Guiding Principles developed expectations regarding insurers’ use of AI, which include being diligent in assessing the risks involved and mitigating those risks. He said one path forward, as explained by Ms. Froment, is to leverage the regulatory framework for cybersecurity. He said there are technical standards, audits, and certifications established for cybersecurity, and he suggested that there could be similar technical and audit standards developed for AI, which Anthony Habayeb (Monitaur) will discuss.

Mr. Habayeb said Monitaur provides a Machine Learning Assurance (MLA) software platform for model governance that helps companies monitor AI risks. He said a potential next step for regulating insurers’ AI risk could include the NAIC identifying what controls should be in place for insurers to manage AI risk based upon the expectations set forth in the NAIC AI Guiding Principles. He suggested that this is a risk-centric approach that could be immediately implemented. He reviewed the potential...
steps to implement regulatory oversight, which include defining the principles, understanding the current status, defining key risks to the principles, defining assurance statements and frequencies, providing a period of time for carriers to implement practices, and defining market conduct questions and practices.

4. **Received a Presentation on Monitoring and Mitigating AI Bias and Enabling Transparency**

Commissioner Ommen said the next presentation has aspects of governance, but it also addresses the Working Group’s charge to assess data needs and required tools for state insurance regulators to appropriately monitor the marketplace. If there is an agreed upon governance model developed, he said the next presentation will provide some thoughts on what resources or tools might be needed to verify that insurers are adhering to established expectations set forth in a governance model.

Kashyap Murali (SigmaRed) said AI is being adopted in an accelerated manner, and AI has risks related to bias, transparency, and robustness. He said there are also multiple AI regulations world-wide that require responsible AI, including the one published by the NAIC. He provided an overview of AI governance, which includes transparency and explainability, fairness and non-discrimination, accountability, safety and security, privacy, human control of technology, professional responsibility, and promotion of human values. He said prominent vendor solution archetypes include: 1) single segment solutions, which are targeted towards one component of AI governance; 2) custom, mitigative multi-segment solutions, which work on multiple components for AI governance; 3) preconfigured, non-mitigative multi-segment solutions, which work on multiple components of AI governance but do not work on custom metrics or provide solutions to mitigate risks; and 4) consulting and specific services, which provide hands-on service for customers who are just starting to implement AI and require aid for supporting technology services and non-technical services. He said SigmaRed’s platform provides companies the ability to assess AI risk on an ongoing basis, provide immediate mitigation of risk, while also making AI explainable and compliant with regulatory standards.

Birny Birnbaum (Center for Economic Justice—CEJ) said he appreciates the perspectives provided, but he said there is a distinction between cybersecurity and AI because AI is an existing regulatory concern, which requires state insurance regulators to collect market outcome data to test whether AI models are producing the expected consumer outcomes. He said unlike cybersecurity, insurers and consumers will have different opinions on what is and is not an appropriate consumer outcome, and a model governance or model audit will not resolve these differences of opinion. Commissioner Ommen said he agrees that model governance is not the only solution, but he said the ideas of governance should be discussed.

5. **Received a Presentation on PPA AI/ML Survey Results**

Commissioner Ommen said the Working Group has been researching the use of big data and AI in private passenger auto (PPA) insurance to inform the Working Group of areas related to its charges, such as evaluating the appropriateness of existing regulatory frameworks for overseeing and monitoring the use of AI, as well as informing the Working Group of the need to develop or modify model laws and regulatory guidance.

Superintendent Dwyer said the survey was conducted under the market conduct authority of the nine requesting states (Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin). She said all documents, materials, and other information requested under this authority and held by the requesting states is confidential. Superintendent Dwyer said companies that were writing PPA business in one or more of the nine requesting states and had national direct written premium of $75 million or more were requested to respond to the survey. The survey responses captured national activities, not just within nine states. Responses were not requested or provided on a state-by-state basis.

Superintendent Dwyer said a group of subject matter experts (SMEs), one from each of the nine states and several commissioners, collaborated with NAIC staff to develop the survey instrument. She said the NAIC established a weblink for the survey, which includes the survey template, filing guidance for the companies, definitions, validations, a frequently asked questions (FAQ) document, and a user guide for the tool used to submit the information. She said call letters were sent to the Government Relations, Market Conduct, and Market Conduct Annual Statement company contacts. The survey template was published on Aug. 9, and the survey submission link was released on Sept. 28. Superintendent Dwyer said the requesting states expected to receive 188 filings and received 192.

Superintendent Dwyer said the survey starts with a simple question of whether a company is using or contemplating using AI/machine learning (ML). If no, the survey asked for information regarding why not, and if yes, the survey continues with questions about what operational areas the company is using AI/ML: rating, underwriting, claims, fraud detection, marketing,
loss prevention, and “other.” The survey then requested information on specific uses within each area, including the level of deployment, level of decisions influenced, governance being applied, and types of data used.

Superintendent Dwyer said the filing deadline was Oct. 28, and the survey results are now being analyzed, but that much more needs to be completed, especially more analysis of the text information provided. She said this also needs to be completed in accordance with state confidentiality laws and agreements. She said the last response was received on Nov. 29, and out of the 192 filings received, 168 companies reported using, planning to use, or exploring the use of AI/ML. Twenty-four companies reported that they were not using AI/ML. If a company indicated that it is not planning to use AI/ML, the survey asked why to provide some insight, such as whether regulatory issues were creating obstacles. Superintendent Dwyer said just over 57% of the companies indicated that they are developing the models internally, and about 43% indicated using third parties for model development. Additional analysis will provide more detail on the development of models for each of the operational areas.

Superintendent Dwyer said the survey process has gone very well and thanked the companies for their participation in the survey. Commissioner Afable said the SMEs received a lot of input from all stakeholders, and they want to hear feedback on the survey because the Working Group will use the survey template for other lines. Superintendent Dwyer said the next steps include apprising a broader group of NAIC members and state insurance regulators about the preliminary analysis, completing more detailed analysis of the data, analyzing the open ended/free-form questions, determining what information can be made public, and analyzing strengths and weaknesses of the survey instrument for use in surveying additional lines of business.

Commissioner Ommen said the survey is focused on problem-scoping and what areas might require more attention. Mr. Haworth questioned if there is more detail on the “other” uses of AI. Superintendent Dwyer said this analysis is ongoing. Mr. Birnbaum asked how many insurer groups are represented by the company responses. Superintendent Dwyer said this would be included in the additional analysis.

6. **Discussed the Next Line of Insurance to Survey**

Commissioner Ommen said the Working Group always planned to learn how to improve the survey questions and process from the PPA survey and develop surveys for additional lines of insurance. Commissioner Afable suggested that the Working Group should continue to focus on personal lines and life or homeowners insurance. Director Wing-Heier agreed that the Working Group should focus on personal lines and homeowners as the next line of insurance. Superintendent Dwyer asked if the Working Group conducts a survey on life insurance whether the survey would be limited in scope, such as focusing on term life. Ms. Amann said it would be helpful to have the survey to be broken out by coverage types within homeowners insurance. Commissioner Ommen encouraged people with expertise in life insurance to become involved in the next survey if life is selected. He suggested that the Working Group would pursue surveys for both homeowners insurance and life insurance. Mr. Birnbaum said there will be overlap in company reporting for the PPA survey and homeowners insurance, and there is no information from life insurers.

7. **Discussed its 2022 Work Plan Development**

Denise Matthews (NAIC) said the Working Group has outlined some next steps with surveys of homeowners and life insurance. She said the new Innovation, Cybersecurity, and Technology (H) Committee, if formed by the NAIC members, will likely be looking for some more detailed plans, and she encouraged the Working Group members to think about priorities and timelines for 2022.

8. **Discussed Other Matters**

Commissioner Ommen said the American Academy of Actuaries (Academy) has authored a paper titled *Big Data and Algorithms in Actuarial Modeling and Consumer Impacts*, which is an excellent resource document. He said the paper does a good job establishing terms and definitions, which could be very helpful to the Working Group going forward. He said individuals who want more information about the paper should reach out to Dorothy L. Andrews (NAIC).

Having no further business, the Big Data and Artificial Intelligence (EX) Working Group adjourned.

_BDAI WG Minutes 12.13.21_
The Speed to Market (EX) Working Group of the Innovation and Technology (EX) Task Force met Nov. 16, 2021. The following Working Group members participated: Rebecca Nichols, Chair (VA); Maureen Motter, Vice Chair (OH); Erick Wright (AL); Jimmy Harris (AR); Shirley Taylor (CO); Susan Jennette (DE); Julie Rachford (IL); Marcia Kramer (KS); Tammy Lohmann (MN); Camille Anderson-Weddle (MO); Ted Hamby (NC); Chris Aufenthie (ND); Frank Cardamone (NH); Russell Toal (NM); Mark Worman (TX); Lichiou Lee (WA); and Barry Haney (WI).

1. **Adopted its June 30 and June 29 Minutes**

The Working Group met June 30 and June 29 and took the following action: 1) adopted its March 10 minutes; 2) heard an update from the Information Technology Group (ITG); and 3) discussed and considered the suggestions received for updates to the product coding matrices (PCMs) and uniform transmittal document (UTDs).

Mr. Toal made a motion, seconded by Ms. Jennette, to adopt the Working Group’s June 30 and June 29 minutes (see NAIC Proceedings – Summer 2021, Innovation and Technology (EX) Task Force, Attachment Two). The motion passed unanimously.

Ms. Motter stated that there are updates that need to be made to the Product Filing Review Handbook (Handbook). She stated many of the updates to be made are technical edits involving corrections, such as updating obsolete information, removing working groups that no longer exist, updating current uniform resource locators (URLs), correcting punctuation, updating the formatting, editing areas to be consistent with the currently published NAIC Style Guide, etc. Ms. Motter explained that technical types of edits like that will not need the Working Group’s review, as they do not require adoption since they are not content-related; those corrections will just be made, and the release of the updated Handbook would reflect those technical edits. She stated technical edits also include those that the System for Electronic Rates & Forms Filing (SERFF) team would be submitting, such as updating the list of current SERFF tools and updating the number of filing submissions.

Ms. Motter stated there are, however, some areas of the Handbook that may need some substantive or nontechnical content edits, and that she, Ms. Nichols, and Petra Wallace (NAIC) have started to review the Handbook to identify these types of edits. She stated this is one of the things that will be a priority in 2022 and may require Working Group involvement. Depending on the level of edits needed, a request for volunteers may be made to assist with these edits. Ms. Motter stated the main thing for the Working Group to address now is accepting the edits to Chapter 3 of the Handbook that were adopted by the Casualty Actuarial and Statistical (C) Task Force. She stated the Task Force was charged to propose modifications to reflect current best practices for the regulatory review of Generalized Linear Models (GLM) predictive analytics. Ms. Motter stated that even though these edits have already been reviewed and adopted by the Task Force, because they are considered content-related changes, the Working Group must ultimately review and accept them since revisions to the Handbook is one of this Working Group’s charges. A copy of the Regulatory Review of Predictive Models white paper was provided for review prior to the meeting, posted on the Working Group’s committee page, and shared during the meeting for review, along with a copy of the Handbook.

Ms. Motter stated many sections of Chapter 3 had no proposed changes. She stated the areas of the Handbook that were edited or added were: Interaction Between Rating Variables (Multivariate Analysis), Approval of Classification Systems, Predictive Modeling, Generalized Linear Models, What Is a Best Practice, Best Practices for the Regulatory Review of Predictive Models, Confidentiality, Questions to Ask a Company, Additional Ratemaking Information, Other Reading, and the Summary.

Mr. Toal made a motion, seconded by Ms. Lohmann, to adopt all changes proposed by the Task Force in the Regulatory Review of Predictive Models white paper for Chapter 3 of the Handbook (Attachment Two-A). The motion passed unanimously.

3. **Discussed the PRL Contacts**

Ms. Nichols stated that in the past, many states have not been utilizing the Product Requirements Locator (PRL) tool. She stated she wanted to provide information about whom states can contact for assistance with inactivating the PRL tool once a
state has made the decision to discontinue using or updating the tool, and for assistance with updating the PRL if a state is still using it.

Ms. Nichols explained that states should use their state’s assigned persons to make PRL updates if needed. The assigned individual or individuals have a username and password that allow for the adding, changing, or deleting of product content requirements at any time. She explained that if needed, the assigned information technology (IT) liaison for a state can assist with identifying who has the PRL role, or that states can reach out to the NAIC Help Desk at 816-783-8558 or help@naic.org if additional research into that role for a state is needed. The Help Desk is also whom the PRL user for a state would need to contact if a password reset is needed to access the PRL tool. The log-in ID would be the same as the person’s myNAIC login.

Ms. Nichols stated that if a state is not using or updating the PRL, the assigned persons for that state can contact Alex Rogers at arogers@naic.org, and his team can assist with inactivating that state in the PRL tool. The application removal itself will not take place until the NAIC takes it down, after the full transition into the new SERFF platform, which is still a couple of years away. She noted that this is not something states are being asked or required to address right now; this information is just being shared for any states that are looking to remove information from the PRL at this time or that might need assistance in making updates. Ms. Nichols stated there is a help document that outlines how to make PRL changes for states that are still using the tool and that it has been posted under the document tab for this Working Group’s web page.

Having no further business, the Speed to Market (EX) Working Group adjourned.

November 16 Speed to Market Minutes
The LER suggests a 29% reduction, however, with flattening for expenses, the rate credit is only 25% (1.00 - .75 deductible factor).

Calculation of Increased Limit Factors

Increased limits are typically defined as the limits of liability above the minimum required limits (e.g., the financial responsibility limits in auto insurance) established by the state. Loss ratio and pure premium methods do not work well for increased limit pricing, largely because of sparse data at the higher limits and of policy limit censorship (e.g., if a loss is $500,000 but the limit of liability is $100,000, then only the $100,000 gets coded into the data system).

Mathematical distributions are often used to derive increased limit factors. Available data is fitted to a mathematical distribution, and then that distribution is used to extrapolate anticipated expected losses at higher levels of limits.

When using loss data, consideration needs to be given to any differences in loss development or loss trends by limit. Loss development factors tend to be higher for higher limits of liability because the losses at the higher limits tend to be the ones that take a longer time to settle. Trend factors also tend to be higher for higher limits of liability because the growth of lost amounts for lower limits are capped more often by the limit of liability.

Increased limit factors often contain risk loads that increase as the limits of liability increase. Based on economic principles, it is appropriate to obtain higher rates of return when accepting higher risk. As noted in the section titled "Profit and Contingency Provisions," it is also appropriate to consider this when selecting the profit and contingency provision to apply to basic limit rates.

Credibility for Rating Factors

Just as credibility, or the level of believability of data, was considered in the overall indicated rate change, credibility is considered in the rating factor indications. While common examples of the alternative indication used when applying credibility to the overall rate change are a regional indication, countrywide indication, or inflation, credibility for rating factor indications is often weighted with the overall indication.

Interaction between Rating Variables (Multivariate Analysis)

If the pricing of rating variables is evaluated separately for each rating variable, there is potential to miss the interaction between rating variables. Care should be taken to have a multivariate analysis when possible. In some instances a multivariate analysis is not possible.

If each rating variable is evaluated separately, statistically significant interactions between rating variables may not be identified and, thus, may not be included in the rating plan. Care should be taken to have a multivariate analysis when practical. In some instances, a multivariate analysis is not possible. But, with computing power growing exponentially, insurers believe they have found many ways to improve their operations and competitiveness through use of complex predictive models in all areas of their insurance business.

Approval of Classification Systems

With rate changes, companies sometimes propose revisions to their classification system. Because the changes to classification plans can be significant and have large impacts on the consumers’ rates, regulators should focus on these changes.

Some items of proposed classification can sometimes be deemed to be against public policy, such as the use of education or occupation. You should be aware of your state’s laws and regulations regarding which rating factors are allowed.

With rate changes, companies sometimes propose revisions to their classification system. Because the changes to classification plans can be significant and have large impacts on the consumers’ rates, regulators should focus on these changes.

Some items of proposed classification can sometimes be deemed to be contrary to state laws and/or regulations, such as the use of education or occupation. You should be aware of your state’s laws and regulations regarding which rating factors are allowed, and you should require definitions of all data elements that can affect the charged premium. Finding rating or
underwriting characteristics that may violate state laws and/or regulations is becoming more difficult for regulators with the increasing and innovative ways insurers use predictive models.

Rating Tiers

Some states allow an insurer to have multiple rate levels, or rating tiers, within a single company. These rating tiers are another way of classifying risks for rating purposes. Typically, there are requirements for rating tiers: the underwriting rules for each tier should be mutually exclusive, clear, and objective; there should be a distinction between the expected losses or expenses for each tier; and the placement process should be auditable. Tiers within a company are mainly seen in personal lines products.

One particular concern with rating tiers would be the analyses of whether a plan produces unfair discrimination. Questions arise around the time-sensitive aspects of the underwriting criteria and any related re-evaluation of the tiers upon renewal. For example, consider two tiers where the insured is placed in the “high” tier because of a lapse of insurance in the prior 12 months. The question is: What happens upon renewal after there has no longer been a lapse of insurance for 12 months? Does the insured get slotted in the “low” tier as he would if he was new business? Some statutes limit the amount of time that violations, loss history, or insurance scores can be used, and some statutes might only allow credit history to be used for re-rating at the policyholder’s request. Regulators should consider the acceptability of differences in rates between existing and new policyholders when they have the same current risk profile.

Insurers also can create different rating levels by having separate companies within a group. While regulators should examine rating tiers within an insurer to a high degree of regulatory scrutiny, there tends to be less scrutiny with differences in rates that exist between affiliated companies. Workers’ compensation insurers are more likely to obtain rating tiers using separate companies.

Rate Justification: New Products

When new products are introduced, there are often new unanswered questions for a regulator, especially because new products are the most difficult to price. There may be additional judgment and use of competitor rates involved with new products. Regulators should discuss new issues with management and consider using NAIC message boards to discuss issues.

- Individual Risk Rating

The rating system established with base rates and rating factors, sometimes called “manual rates,” typically groups policyholders within classifications based on each policyholder’s individual characteristics. However, there could be some policyholders, especially in the commercial lines of business, where it is appropriate to modify the manual rate based on the policyholder’s own loss experience. The most common methods of rating based on individual actual loss experience are called experience rating, schedule rating, and retrospective rating. These plans are typically required to be filed with the state.

- Experience Rating

Experience rating uses the actual loss experience of the policyholder to calculate a rating discount or surcharge. A typical process is that actual individual losses are capped at a maximum single loss, the actual capped losses are compared to similarly limited expected losses, and credibility is considered to develop the experience rating modification factor. (There are other detailed adjustments to data in the calculations.) The states typically place limitations on the amount that experience rating can impact the overall rate.

Typically, there is a requirement of the policy being a minimum size to qualify for experience rating and a requirement that all policies meeting that size requirement be experience rated.

- Schedule Rating
Schedule rating is a method of pricing property and liability insurance. It uses charges and credits to modify a class rate based on the special characteristics of a risk. Insurers have been able to develop a schedule of rates because experience has shown a direct relationship between certain physical characteristics and the possibility of a loss. For example, implementation of an effective safety program should likely result in lower insurance rates but will not be fully reflected in loss experience for a few years. Companies who change their delivery drivers from experienced drivers to youthful drivers should likely pay more.

Some examples of schedule rating categories might include:

- Premises: Condition, Care
- Equipment: Type, Condition, Care
- Employees: Selection, Training, Supervision, Experience

Each state establishes limitations on schedule rating. Typically, there is a limitation on the overall percentage impact on the policyholder’s rates from schedule rating.

Typically, there is a requirement of the policy being a minimum size to qualify for schedule rating, which is often less than the level required for experience rating.

- Combination of Experience and Schedule Rating Factors

States typically require companies to state whether the experience rating factor and schedule rating factor are additive (where discounts/charges are added together) or multiplicative (where factors are multiplied together). If the experience rating factor is .90, or includes a 10% discount, and the schedule rating factor is 1.03, or includes a 3% charge, the additive factor would be .93 (= 1 – 10% + 3%) and the multiplicative factor would be .927 (= .90 x 1.03).

- Retrospective Rating

Retrospective rating is where a policyholder pays an initial deposit premium (likely based on manual rates) at the time the policy is issued, but the premium is adjusted over time as claims emerge and more information is known about the true costs that have arisen from the insurance policy. Retrospective rating plans differ from typical insurance pricing. Typical pricing is prospective and does not allow for recoupment of past losses.

The analysis for retrospective rating is similar to experience rating in that actual losses are used, individual claim amounts can be capped, and resulting amounts are compared to expected amounts at the same level of capping and same point in expected development. The retrospective adjustment is usually limited at minimum and maximum premium levels. There is also a limitation in how many years of adjustments are made.

- Dividend Rating Plans

Dividend rating plans, used most commonly in workers’ compensation, are sometimes allowed. The company can charge more up-front to provide more cushion when losses are worse than expected, but when loss experience is better than expected, the company can disperse extra profits out to policyholders. This plan is often used as an acceptable marketing tool.

Predictive Modeling

The ability of computers to process massive amounts of data has led to the expansion of the use of predictive modeling in insurance ratemaking. Predictive models have enabled insurers to build underwriting models with significant segmentation power and are increasingly being applied in such areas as claims modeling and used in helping insurers to price risks more effectively.

Key new rating variables that are being incorporated into insurers’ predictive models include homeowners’ rates by peril, homeowners rating by building characteristics, vehicle history, usage-based auto insurance, and credit characteristics. Data quality within and communication about models are of key importance with predictive modeling.
The ability of computers to process massive amounts of data (referred to as "big data") has led to the expansion of the use of predictive modeling in insurance ratemaking. Predictive models have enabled insurers to build rating, marketing, underwriting, and claim models with significant predictive ability.

Data quality within, and communication about, models are of key importance with predictive modeling. Depending on definitional boundaries, predictive modeling can sometimes overlap with the field of machine-learning. In the modeling space, predictive modeling is often referred to as "predictive analytics."

Insurers’ use of predictive analytics along with big data has significant potential benefit to consumers and insurers. Predictive analytics can reveal insights into the relationship between consumer behavior and the cost of insurance, lower the cost of insurance for many, and provide incentives for consumers to better control and mitigate loss. However, predictive analytic techniques are evolving rapidly and leaving many state insurance regulators without the necessary tools to effectively review insurers’ use of predictive models in insurance applications. To aid the regulator in the review of predictive models, best practices have been developed.

The term “predictive model” refers to a set of models that use statistics to predict outcomes. When applied to insurance, the model is chosen to estimate the probability or expected value of an outcome given a set amount of input data; for example, models can predict the frequency of loss, the severity of loss, or the pure premium.

To further complicate regulatory review of models in the future, modeling technology and methods are evolving rapidly. Generalized linear models (GLMs) are relatively transparent and their output and consequences are much clearer than many other complex models. But as computing power grows exponentially, it is opening the modeling world to more sophisticated forms of data acquisition and data analysis. Insurance actuaries and data scientists seek increased predictiveness by using even more complex predictive modeling methods. Examples of these methods are predicting models utilizing logistic regression, nearest neighbor classification, random forests, decision trees, neural networks, or combinations of available modeling methods (often referred to as “ensembles”). These evolving techniques will make the regulators’ understanding and oversight of filed rating plans even more challenging.

- Generalized Linear Models

The GLM is a commonly used predictive model in insurance applications, particularly in building an insurance product’s rating plan. Because of this and the fact most property/casualty regulators are most concerned about personal lines, the NAIC has developed an appendix in its white paper for guidance in reviewing GLMs for personal automobile and home insurance.

- What is a “Best Practice”?

A best practice is a form of program evaluation in public policy. At its most basic level, a practice is a “tangible and visible behavior…[based on] an idea about how the actions…will solve a problem or achieve a goal.” Therefore, a best practice represents an effective method of problem solving. The “problem” regulators want to solve is how can regulators determine whether predictive models, as used in rate filings, are compliant with state laws and/or regulations? However, best practices are not intended to create standards for filings that include predictive models.

Best practices are based on the following principles that promote a comprehensive and coordinated review of predictive models across the states:

- State insurance regulators will maintain their current rate regulatory authority and autonomy.

10 Refer to Appendix B in the NAIC white paper, Regulatory Review of Predictive Models.

State insurance regulators will be able to share information to aid companies in getting insurance products to market more quickly across the states.

State insurance regulators will share expertise and discuss technical issues regarding predictive models to make the review process in any state more effective and efficient.

State insurance regulators will maintain confidentiality, in accordance with state laws and/or regulations, regarding predictive models.

Best practices will help the regulator understand if a predictive model is cost-based, if the predictive model is compliant with state laws and/or regulations, and how the model improves the company’s rating plan. Best practices can also improve the consistency among the regulatory review processes across the states and improve the efficiency of each regulator’s review, thereby assisting companies in getting their products to market faster. With this in mind, the regulator’s review of predictive models should:

1. Ensure that the selected rating factors, based on the model or other analysis, produce rates that are not excessive, inadequate, or unfairly discriminatory.
   a. Review the overall rate level impact of the proposed revisions to rate level indications provided by the filer.
   b. Determine whether individual input characteristics to a predictive model and their resulting rating factors are related to the expected loss or expense differences in risk.
   c. Review the premium disruption for individual policyholders and how the disruptions can be explained to individual consumers.
   d. Review the individual input characteristics to, and output factors from, the predictive model (and its sub-models), as well as associated selected relativities, to ensure they are compatible with practices allowed in the state and do not reflect prohibited characteristics.

2. Obtain a clear understanding of the data used to build and validate the model, and thoroughly review all aspects of the model, including assumptions, adjustments, variables, sub-models used as input, and resulting output.
   a. Obtain a clear understanding of how the selected predictive model was built.
   b. Determine whether the data used as input to the predictive model is accurate, including a clear understanding how missing values, erroneous values, and outliers are handled.
   c. Determine whether any adjustments to the raw data are handled appropriately, including, but not limited to, trending, development, gapping, and removal of catastrophes.
   d. Obtain a clear understanding of how often each risk characteristic, used as input to the model, is updated and whether the model is periodically refreshed, so model output reflects changes to non-static risk characteristics.

3. Evaluate how the model interacts with and improves the rating plan.
   a. Obtain a clear understanding of the characteristics that are input to a predictive model (and its sub-models).
   b. Obtain a clear understanding how the insurer integrates the model into the rating plan and how it improves the rating plan.
   c. Obtain a clear understanding of how model output interacts with non-modeled characteristics/variables used to calculate a risk’s premium.
Enable competition and innovation to promote the growth, financial stability, and efficiency of the insurance marketplace.

a. Enable innovation in the pricing of insurance through acceptance of predictive models, provided such models are in compliance with state laws and/or regulations, particularly prohibitions on unfair discrimination.

b. Protect the confidentiality of filed predictive models and supporting information in accordance with state laws and/or regulations.

c. Review predictive models in a timely manner to enable reasonable speed to market.

Confidentiality

Each state determines the confidentiality of a rate filing and the supplemental material to the filing, when filing information might become public, the procedure to request that filing information be held confidentially, and the procedure by which a public records request is made. Regulatory reviewers are required to protect confidential information in accordance with applicable state laws and/or regulations. State insurance regulators should be aware of their state laws and/or regulations on confidentiality when requesting data from insurers that may be proprietary or trade secret. However, insurers should be aware that a rate filing might become part of the public record. It is incumbent on an insurer to be familiar with each state’s laws and/or regulations regarding the confidentiality of information submitted with their rate filing.

State authority, regulations and rules governing confidentiality always apply when a regulator reviews a model used in rating. When the NAIC or a third party enters the review process, the confidential, proprietary, and trade secret protections of the state on behalf of which a review is being performed will continue to apply.

Advisory Organizations

Advisory Organization Filings

Advisory organizations develop loss costs, policy forms, risk classifications, and other miscellaneous rating rules that may be used by insurer members of the organizations.

Allowable advisory organization activities are likely defined in your state rating law. The NAIC model rating laws define the advisory organizations’ permitted and prohibited activities with the intent to prohibit anticompetitive behavior and discourage concerted rate action by insurers. Generally, advisory organizations are not allowed to publish fully developed rates, including all expense and profit loadings, for the insurance companies to use. They can, however, provide advisory prospective loss costs, which would be the recommended insurance charge prior to consideration of expenses (typically, other than loss adjustment expenses) and profit.

When an advisory organization makes a loss cost or rating rule filing, the state’s resources applied to the filing are generally high given that the components of the filing will be used by many insurance companies and have a large impact on the market.

Insurance Company’s Use of Advisory Organization’s Loss Costs

Adoption of the advisory organization’s loss costs requires development of a loss cost multiplier to add in any missing expenses and profit. The NAIC developed model filing forms for loss cost multipliers (Appendices A, B, and C). A calculation of the loss cost multiplier when a company fully adopts the advisory organization’s loss costs and has no expense constants is illustrated:
If there are two indications being weighted together and one is for a rate increase and one is a rate decrease, is the weighting justified?

3. Regarding differences in assumptions from previous filings:
   a. Have methodologies changed significantly?
   b. Are assumptions for the weighting of years or credibility significantly different? Or does there appear to be some manipulation to the rate indication?

4. Is there unfair discrimination?
   a. Do classifications comply with state requirements?
   b. Are proposed rates established so that different classes will produce the same underwriting results?

5. What do you need to communicate?
   a. Can you explain why you are taking a specific action on the filing?
   b. What do you need to tell the Consumer Services Department?
   - Can you explain the impact of the rate change on current business? How big is the company and how much of the market is impacted?
   - What are the biggest changes in the filing (and the ones on which consumer calls might be expected)?
   - What is the maximum rate change impact on any one policyholder?

Questions to Ask a Company

If you remain unsatisfied that the company has satisfactorily justified the rate change, then consider asking additional questions of the company. Questions should be asked of the company when it has not satisfied statutory or regulatory requirements in the state or when any current justification is inadequate and could have an impact on the rate change approval or the amount of the approval.

If there are additional items of concern, the company can be notified so they will make appropriate modifications in future filings.

If you remain unsatisfied that the company has satisfactorily justified the rate change, then consider asking additional questions of the company. Questions should be asked of the company when it has not satisfied statutory or regulatory requirements in the state or when any current justification is inadequate and could have an impact on the rate change approval or the amount of the approval.

If there are additional items of concern, the company can be notified so it can make appropriate modifications in future filings.

The NAIC white paper, Regulatory Review of Predictive Models, documents questions that a state insurance regulator may want to ask when reviewing a model. These questions are listed as “information elements” in Appendix B of the white paper. Note: Although Appendix B focuses on GLMs for personal automobile and home insurance, many of the “information elements” and concepts they represent may be transferable to other types of models, other lines of business, and other applications beyond rating.

Additional Ratemaking Information

The Casualty Actuarial Society (CAS) has an extensive examination syllabus that contains a significant amount of ratemaking information, on both the basic topics covered in this chapter and on advanced ratemaking topics. The CAS website contains links to many of the papers included in the syllabus. Recommended reading is the Foundations of Casualty Actuarial Science, which contains chapters on ratemaking, risk classification, and individual risk rating.

The Casualty Actuarial Society (CAS) and the Society of Actuaries (SOA) have extensive examination syllabi that contain a significant amount of ratemaking information, on both the basic topics covered in this chapter and on advanced ratemaking topics. The CAS and SOA websites (https://www.casact.org and https://www.soa.org, respectively) contain links to many of the papers included in the syllabus. Recommended reading is the Foundations of Casualty Actuarial Science, which contains chapters on ratemaking, risk classification, and individual risk rating.
Other Reading

Some additional background reading is recommended:

- Chapter 1: Introduction
- Chapter 3: Ratemaking
- Chapter 6: Risk Classification
- Chapter 9: Investment Issues in Property-Liability Insurance
- Chapter 10: Only the section on Regulating an Insurance Company, pp. 777–787

Casualty Actuarial Society (CAS) Statements of Principles, especially regarding property and casualty ratemaking.

Association of Insurance Compliance Professionals: “Rate Making—What the State Filer Needs to Know.”

Review of filings and approval of insurance company rates.

Additional background reading is recommended:

  - Chapter 1: Introduction

NAIC: Casualty Actuarial and Statistical (C) Task Force’s white paper, *Regulatory Review of Predictive Models*

Summary

Rate regulation for property-casualty lines of business require significant knowledge of state rating laws, rating standards, actuarial science, and many data concepts.

- Rating laws vary by state, but the rating laws are usually grouped into prior approval, file and use or use and file (competitive), no file (open competition), and presumption.
Rate standards typically included in the state rating laws require that “rates shall not be inadequate, excessive, or unfairly discriminatory.”

A company will likely determine their indicated rate change by starting with historical years of underwriting data (earned premiums, incurred loss and loss adjustment expenses, general expenses) and adjusting that data to reflect the anticipated ultimate level of costs for the future time period covered by the policies. Numerous adjustments are made to the data. Common premium adjustments are on-level premium, audit, and trend. Common loss adjustments are trend, loss development, catastrophe/large loss provisions, and an adjusting and other (A&O) loss adjustment expense provision. A profit/contingency provision is also calculated to determine the indicated rate change.

Once an overall rate level is determined, the rate change gets allocated to the classifications and other rating factors.

Individual risk rating allows manual rates to be modified by an individual policyholder’s own experience.

Advisory organizations provide the underlying loss costs for companies to be able to add their own expenses and profit provisions (with loss cost multipliers) to calculate their insurance rates.

The Casualty Actuarial Society’s Statement of Principles Regarding Property and Casualty Insurance Ratemaking provides guidance and guidelines for the numerous actuarial decisions and standards employed during the development of rates.

NAIC model laws also include special provisions for workers’ compensation business, penalties for not complying with laws, and competitive market analysis to determine whether rates should be subject to prior approval provisions.

While this chapter provides an overview of the rate determination/actuarial process and regulatory review, state statutory or administrative rules may require the examiner to adopt different standards or guidelines than the ones described.

Rate regulation for property/casualty lines of business requires significant knowledge of state rating laws, rating standards, actuarial science, statistical modeling, and many data concepts.

- Rating laws vary by state, but the rating laws are usually grouped into prior approval, file and use or use and file (competitive), no file (open competition), and flex rating.

- Rate standards typically included in the state rating laws require that “rates shall not be inadequate, excessive, or unfairly discriminatory.”

- A company will likely determine its indicated rate change by starting with historical years of underwriting data (earned premiums, incurred loss and loss adjustment expenses, general expenses) and adjusting that data to reflect the anticipated ultimate level of costs for the future time period covered by the policies. Numerous adjustments are made to the data. Common premium adjustments are on-level premium, audit, and trend. Common loss adjustments are trend, loss development, catastrophe/large loss provisions, and an adjusting and other (A&O) loss adjustment expense provision. - Individual risk rating allows manual rates to be modified by an individual policyholder’s own experience.

- Advisory organizations provide the underlying loss costs for companies to be able to add their own expenses and profit provisions (with loss cost multipliers) to calculate their insurance rates.

- The CAS’ Statement of Principles Regarding Property and Casualty Insurance Ratemaking provides guidance and guidelines for the numerous actuarial decisions and standards employed during the development of rates.

- NAIC model laws and regulations include special provisions for workers’ compensation business, penalties for not complying with laws, and competitive market analysis to determine whether rates should be subject to prior approval provisions.

- Best practices for reviewing predictive models are provided in the NAIC white paper, Regulatory Review of Predictive Models. The best practices and many of the information elements and underlying concepts may be transferable to other types of models, other lines of insurance, and applications beyond rating.
While this chapter provides an overview of the rate determination/actuarial process and regulatory review, state statutory or administrative rule may require the examiner to employ different standards or guidelines than the ones described.

Chapter Three Glossary

**Adjusting and Other Expenses:** Those expenses other than DCC. A&O includes, but is not limited to, fees and expenses of adjusters and settling agents, loss adjustment expenses for participation in voluntary and involuntary market pools if reported by calendar year, attorney fees incurred in the determination of coverage, including litigation between the reporting entity and the policyholder, and fees and salaries for appraisers, private investigators, hearing representatives, reinspectors and fraud investigators, if working in the capacity of an adjuster. (SSAP No. 55)

**Advisory Organizations:** As defined in the *Property and Casualty Model Rating Law (Prior Approval Version)*: “‘Advisory organization’ means any entity, including its affiliates or subsidiaries, which either has two or more member insurers or is controlled either directly or indirectly by two or more insurers, and which assists insurers in ratemaking-related activities …”

**ALAE:** Loss adjustment expenses that are assignable or allocable to specific claims. (*Foundations of CAS*)

**Base Rate:** Benchmark premium rates for each risk classification. (www.lni.wa.gov/ClaimsIns/Insurance/RatesRisk/How/RiskClass/default.asp)

**Consumer Price Index:** An index of the cost of all goods and services to a typical consumer. (http://wordnet.princeton.edu/perl/webwn)

**Defense and Cost Containment:** Includes defense litigation, and medical cost containment expenses, whether internal or external. DCC expenses include, but are not limited to: surveillance expenses; fixed amounts for medical cost containment expenses; litigation management expenses; loss adjustment expenses for participation in voluntary and involuntary market pools if reported by accident year; fees or salaries for appraisers, private investigators, hearing representatives, reinspectors and fraud investigators, if working in defense of a claim, and fees or salaries for rehabilitation nurses, if such cost is not included in losses; attorney fees incurred owing to a duty to defend, even when other coverage does not exist; and the cost of engaging experts. (SSAP No. 55)

**Detrending:** The statistical or mathematical operation of removing trend from the series. Detrending is often applied to remove a feature thought to distort or obscure the relationships of interest. (www.ltrr.arizona.edu/~dmeko/notes_7.pdf)

**Experience Rating:** Statistical procedure used to calculate a premium rate based on the loss experience of an insured group. (*Dictionary of Insurance Terms*)

**Exposure Rate:** Basis to which rates are applied to determine premium. (www.irmi.com/online/insurance-glossary/terms/e/exposure-base.aspx)

**Exposures:** The basic rating unit underlying an insurance premium (*Foundations of CAS*)

**Loss Development:** Difference in the amount of losses between the beginning and end of a time period. (*Dictionary of Insurance Terms*)

**Loss Ratio Method:** Modification of premium rates by a stipulated percentage for closely related classes of property or liability insurance policies. The objective of such modification is to more directly align the combined actual loss ratio of the classes of policies under consideration with the expected loss ratio of these classes. The resultant alignment should show no significant standard deviation or variation of the actual loss ratio from the expected loss ratio

**Manual Rate:** Published cost per unit of insurance, usually the standard rate charged for a standard risk. (*Dictionary of Insurance Terms*)
The E-Commerce (EX) Working Group of the Innovation and Technology (EX) Task Force met Oct. 7, 2021. The following Working Group members participated: Kathleen A. Birrane and Robert Baron, Chair (MD); Jully Pae (CA); Heather Droge (KS); Tom Travis (LA); Cynthia Amann (MO); Chris Aufenthie (ND); Martin Swanson (NE); Lori Barron (OH); John Lacek (PA); Elizabeth Kelleher Dwyer (RI); and Bryce Carlen (WA).

1. Considered Adoption of its June 30 Minutes

Commissioner Birrane asked the Working Group whether it had an opportunity to review the June 30 minutes that were included in the meeting materials. Hearing no changes or edits to the June 30 minutes, Mr. Aufenthie made a motion, seconded by Ms. Amann, to adopt the Working Group’s June 30 minutes (see NAIC Proceedings – Summer 2021, Innovation and Technology (EX) Task Force, Attachment Three). The motion passed unanimously.

2. Discussed its Overall Status, a Potential Survey to the States, and the Timeline for its Work Plan

Commissioner Birrane reminded the Working Group of its 2021 charges, including survey states regarding federal Uniform Electronic Transactions Act (UETA) exceptions and additional questions regarding the actions taken by the states in response to the COVID-19 pandemic. She also stated the possibility of including an additional survey question to be provided to the insurance industry regarding their actions in response to the COVID-19 pandemic. She stated that the goal of the survey would be to review the responses and continue to work toward meaningful, unified recommendations with the hope being that the survey would be sent out before the end of 2021.

Gabrielle Griffith (American Council of Life Insurers—ACLI) and Angela Gleason (American Property Casualty Insurance Association—APCIA) provided a presentation entitled, “Consumer Driven, Consumer Protected – Regulatory Supported Innovation” and focused on developments in innovation in e-commerce and their continued support of consumers maintaining their ability to choose how they interact with insurers. Ms. Griffith and Ms. Gleason discussed the various requirements some states maintain requiring first-class mail delivery for certain insurance documents and notices and how many of these provisions were adopted and put in place long before the advent and development of e-commerce. This has resulted in a lack of clarity and uniformity among the states.

Ms. Griffith and Ms. Gleason continued by discussing the various regulatory accommodations that were put in place due to the COVID-19 pandemic, including the waiting for wet signatures for various filing, allowing remote notarization, allowing remote regulatory examinations, and allowing for remotely proctored producer examinations. Ms. Griffith stated that industry does not believe new laws or regulations are necessary for further innovation in the e-commerce space; instead she recommended the drafting and preparation of an innovation and technology handbook that could provide clarity and guidance for both state insurance regulators and industry. She explained that a draft handbook table of contents was prepared, and she discussed various recommended chapters to include in the handbook.

Ms. Griffith and Ms. Gleason explained that industry believes that the regulatory accommodations made during the COVID-19 pandemic worked very well, and to the extent that they were not made permanent, they should be. Ms. Griffith also stated that industry’s hope is that legislators and state insurance regulators remain open to evolving electronic transactions, and the traditional opt-in regime is no longer needed.

4. Heard a Presentation on Operational and Technology Issues Confronting the Retirement Income Industry

Sarah Wood (Insured Retirement Institute—IRI) and Bryan Harmelink (IRI) said the IRI is the leading association for the entire supply chain of insured retirement strategies and has 113 member companies. Ms. Wood and Mr. Harmelink explained that the various benefits of implementing electronic solutions include providing consumers with secure, efficient, and easy-to-use
methods to purchase insurance and service insured retirement products; providing state insurance regulators with a robust model of traceability, and providing industry a clear audit trail to prevent and detect fraud.

Ms. Wood and Mr. Harmelink explained that the IRI maintains an Operations and Technology Committee, which is a board-level working group. In early 2020, this Committee approved commitments to digital solution implementation and adoption, and as the pandemic unfolded, the Committee recognized the immediate need for remote ways of transacting business. These efforts included increasing both e-signature availability of application order entry platforms and increasing e-delivery consumer availability. Ms. Wood stated that while many of these options have been available for more than 20 years, some states still require manual steps that lead to roadblocks when adopting these types of provisions. She also said as the various temporary e-commerce accommodations expire, it will create a patchwork of requirements and inconsistencies among the states. Ms. Wood and Mr. Harmelink encouraged the NAIC to encourage permanent adoption of temporary accommodations made during the pandemic, address specific issues as they are identified through regulatory change and/or guidance, and develop model guidance or a model bulletin.

5. Heard a Presentation on State Efforts to Review E-Commerce Laws, Rules, and Regulations Prior to and As a Result of the COVID-19 Pandemic

Ms. Amann said Missouri reviewed where its regulatory processes are lacking from a technology perspective as well as its processes that were affected by the COVID-19 pandemic. Missouri began reviewing all regulatory processes across all departments in 2017 as part of a state-wide effort, which resulted in the reduction of one out of every five regulatory restrictions. When Missouri’s governor signed an executive order in 2020 declaring a state of emergency in response to the COVID-19 pandemic, it enabled the governor to waive certain state laws and regulations where necessary. This resulted in nearly 2,500 modifications to the Missouri Department of Insurance’s (DOI’s) rules and processes and identified many regulatory processes that need to be improved and streamlined.

Ms. Amman said the Missouri DOI and its system of regulation must keep pace with a rapidly evolving marketplace fueled by seismic shifts in consumer behavior, technological advances, and a dynamic policy and regulatory environment. She also said while Missouri remained open for business, any steps taken could not be at the expense of decreasing consumer protection responsibilities.

Ms. Amman said the Missouri DOI took several steps to help the insurance industry and the DOI itself to continue serving consumers during the pandemic, such as issues bulletins that provided guidance on health insurance issues and coverage for COVID-19 testing, providing temporary grace periods that allowed consumers to retain their coverage during the first few months of the pandemic, waiving license requirements, waiving onsite examination requirements for title insurers, and many others. She said the Working Group should identify concerns that must be addressed via legislative action, and the departments should identify each waiver they issue during the pandemic, while also asking whether they intend to let the waiver expire, keep the waiver in place, or propose modifications.

6. Heard a Presentation on Telematics and Privacy Issues Confronting Insurance Consumers

Lee Tien (Electronic Frontier Foundation—EFF) provided a presentation on telematics and privacy issues confronting insurance consumers.

7. Heard a Presentation on Issues Regarding Insurance Consumers and E-Commerce in the Insurance Space

Birny Birnbaum (Center for Economic Justice—CEJ) said while advances in digitalization and e-commerce hold huge potential to speed up traditional insurance processes and help insurers reach new markets, insurance is not like most consumer products. He said insurance is a complex financial protection product that promises consumers a future benefit for which there is no data about how well the product performs. He said that every digital transaction comes with terms and conditions, and that is no oversight of such e-commerce terms and conditions. He said regulatory guidance for plain language and unacceptable provisions in e-commerce terms and conditions is needed. As an example, he explained the various required consents for a hypothetical title transaction, including the requirement that a consumer provide a release allowing the company to use their name, image, likeness, etc. in various manners and mediums.

Mr. Birnbaum also explained dark patterns, which is a term used to describe digital designs created to make users do things they might not want to do that benefit the business but not the user. He said action is needed by state insurance regulators to develop the skills necessary to recognize dark patterns in insurance and stop unfair and deceptive digital interactions.
Mr. Birnbaum continued by discussing e-commerce activity analytics and how the use of e-commerce creates new personal consumer information about the consumer’s digital behavior and interactions. These new data include things such as how quickly a consumer completes an online application, and some insurance vendors are already marketing algorithms to assess consumer’s biological age and candor from video interactions with consumers. Mr. Birnbaum also said the use of e-commerce and increased digital interactions must not marginalize historically disadvantaged group or communities, and the use of e-commerce tools should explicitly consider potential bias based on race and ensure access for people with disabilities.

Having no further business, the E-Commerce (EX) Working Group adjourned.

The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup met in San Diego, CA, Dec. 12, 2021, immediately followed by a meeting of the Long-Term Care Insurance (EX) Task Force. The following Subgroup members participated: Michael Conway, Chair (CO); Alan McClain (AR); Andrew N. Mais represented by Paul Lombardo (CT); David Altmaier (FL); Doug Ommen represented by Andrea Seip (IA); Dean L. Cameron represented by Weston Trexler (ID); Amy L. Beard represented by Scott Shover (IN); James J. Donelon represented by Tom Travis (LA); Anita G. Fox represented by Karen Dennis (MI); Grace Arnold and Fred Andersen (MN); Chlora Lindley-Myers (MO); Eric Dunning (NE); Russell Toal represented by Jennifer Catechis (NM); Barbara D. Richardson represented by Stephanie McGee (NV); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer represented by Jack Broccoli (RI); Raymond G. Farmer represented by Michael Wise (SC); Cassie Brown represented by Doug Slape (TX); Jonathan T. Pike (UT); Scott A. White (VA); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler and Lichiou Lee (WA); and Allan L. McVey represented by Tonya Gillespie (WV).

The following Task Force members participated: Scott A. White, Chair (VA); Michael Conway, Vice Chair (CO); Lori K. Wing-Heier represented by Anna Latham (AK); Jim L. Ridling represented by Mark Fowler (AL); Alan McClain (AR); Evan G. Daniels (AZ); Ricardo Lara represented by Susan Bernard (CA); Andrew N. Mais represented by Paul Lombardo (CT); David Altmaier (FL); Colin M. Hayashida (HI); Doug Ommen represented by Andrea Seip (IA); Dean L. Cameron represented by Weston Trexler (ID); Dana Popish Severyinghaus represented by Susan Berry (IL); Amy L. Beard represented by Scott Shover (IN); Vicki Schmidt (KS); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Eric A. Cioppa (ME); Ana G. Fox represented by Karen Dennis (MI); Grace Arnold represented and Fred Andersen (MN); Chlora Lindley-Myers (MO); Mike Chaney (MS); Troy Downing (MT); Mike Causey represented by Jackie Obusek (NC); Jon Godfrey represented by Matt Fischer (ND); Eric Dunning and Justin Schrader (NE); Russell Toal represented by Jennifer Catechis (NM); Barbara D. Richardson represented by Stephanie McGee (NV); Judith L. French (OH); Glen Mulready represented by Andrew Schallhorn (OK); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer represented by Jack Broccoli (RI); Raymond G. Farmer represented by Michael Wise (SC); Carter Lawrence represented by Brian Hoffmeister (TN); Cassie Brown represented by Doug Slape (TX); Jonathan T. Pike (UT); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler and Lichiou Lee (WA); Mark Afable represented by Nathan Houdek (WI); and Allan L. McVey represented by Tonya Gillespie (WV).

1. **Long-Term Care Insurance Multistate Rate Review (EX) Subgroup**

   a. **Adopted its Nov. 15 and Sept. 28 Minutes**

   Commissioner Conway said the Subgroup met Sept. 10 in regulator-to-regulator session, pursuant to paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meeting. He said the Subgroup also met Nov. 15 and Sept. 28 and took the following action: 1) received and discussed interested state insurance regulator and interested party comments on the draft Long-Term Care Insurance Multi-State Rate Review Framework (MSA Framework); and 2) exposed the revised MSA Framework for a 21-day comment period ending Dec. 6.

   Commissioner Altman made a motion, seconded by Commissioner Altmaier, to adopt the Subgroup’s Nov. 15 (Attachment One) and Sept. 28 (Attachment Two) minutes. The motion passed unanimously.

   b. **Heard Comments on the Exposure Draft of the Draft MSA Framework**

   Commissioner Conway said the MSA Framework was exposed for a public comment period ending Dec. 6. Comment letters were received from: 1) the American Council of Life Insurers (ACLI) and America’s Health Insurance Plans (AHIP); and 2) Risk & Regulatory Consulting LLC (RRC) (Attachment Three).

   Jan Graeber (ACLI) thanked the Subgroup for its work on the MSA Framework. She said she recognizes that there are some issues that remain and this project will take time, and she looks forward to continuing the dialogue with the Subgroup. She said it will take the participation of both state insurance departments and insurance companies for the process to work.
Mr. Andersen summarized the drafting group’s response to comments received (Attachment Four). The drafting group agreed to make the recommended changes in items #3 and #9 from the letter. The drafting group did not recommend changes for the other items. Mr. Andersen discussed the rationale as follows:

- **Item #2:** The reasons for not utilizing the Interstate Insurance Product Regulation Commission (Compact) is because the rate proposals under the MSA Framework are outside the scope of the Compact.
- **Item #4:** The Subgroup recently decided that there is a benefit in sharing the MSA Advisory Report with the insurer. The MSA Team can answer questions from the insurer and provide clarifications rather than the insurer asking all jurisdictions.
- **Item #5:** The drafting group disagreed with the recommendation that at least one member of the MSA Team meet the qualification standards for actuaries issuing statement of opinion, as that is a high bar that is mostly for company actuaries that focus on valuation. No change was made.
- **Item #6:** As the process develops, the MSA Framework can be edited to address resources in the future.
- **Item #7:** The drafting group agreed that the MSA Team should have flexibility. The MSA Framework already includes this flexibility.
- **Item #8:** With each review, the MSA Team learns more about the time necessary for the review. Often, the timing is out of the MSA Team’s control, as it is dependent on the quality and completeness of the rate proposal.
- **Item #10:** The Texas and Minnesota methodologies eliminate the subsidization of one policyholder by another.
- **Item #11:** The MSA Framework includes an information checklist. A template may be helpful, but it will need to be developed in the future after more experience is gained from the process.
- **Item #12:** Actuarial Standards of Practice (ASOPs) are required regardless of being listed in the MSA Framework.
- **Item #13:** Assessing adequacy of reserves is outside the scope of the MSA Framework, which is focused on rate review.
- **Items #14 and #15:** The drafting group recommends no change for now, but it may make changes in the future.

2. **Adopted the MSA Framework**

Commissioner Conway said the MSA Framework will continue to undergo improvements as the MSA Team learns more about the needs of the state insurance departments and the experience of the insurers.

Mr. Lombardo made a motion, seconded by Mr. Trexler, to adopt the MSA Framework (Attachment Five). The motion passed with Louisiana abstaining.

Having no further business, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup adjourned into the Long-Term Care Insurance (EX) Task Force meeting.

2. **Long-Term Care Insurance (EX) Task Force**

   a. **Adopted the Long-Term Care Insurance (EX) Task Force’s Oct. 29 and Summer National Meeting Minutes**

The Task Force conducted an e-vote on Oct. 29 to adopt the 2022 proposed charges for the Task Force and its subgroups.

Commissioner Altmaier made a motion, seconded by Commissioner Altman, to adopt the Task Force’s Oct. 29 (Attachment Six), and Aug. 13 (see NAIC Proceedings – Summer 2021, Long-Term Care Insurance (EX) Task Force minutes. The motion passed unanimously.

   b. **Heard an Update on Industry Trends**

Mr. Andersen said a group of state insurance regulators with long-term care insurance (LTCl) experience has reviewed insurers’ *Actuarial Guideline L1—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves* (AG 51) filings and coordinated and communicated with the domestic state insurance departments. This year, the group has focused on cost-of-care trends for policies with inflation protection. Often, the actual daily cost-of-care has been less than the inflation protected daily maximum benefits stated in the policy. If the cost-of-care increases, it could have a significant impact on the claims cost for inflation protected products, especially for companies with a lot of 5% inflation protected business. There has been a general trend of companies planning to increase the conservatism in the future cost-of-care assumptions. He said the group has seen some shift of care from more costly facilities to less costly home settings. This is likely temporary and an aspect that will continue. It will continue to be monitored as it affects reserves. Mr. Andersen said the group has also seen an increasing trend in the complexity of assets supporting reserves. The Life Actuarial (A) Task Force is currently asking for comments to
d. **Adopted the MSA Framework**

Commissioner White thanked the drafting group, the Subgroup, NAIC staff, state insurance regulators, and interested parties that contributed and provided feedback throughout the process. Mr. Lombardo said the MSA Framework is a work-in-progress,
and state insurance regulators will continue to work on the MSA Framework to make it better as more information is gathered. Commissioner White agreed that it is not a finished product and will be improved as the MSA Team completes its reviews. He asked everyone to remain engaged in the process going forward.

Commissioner Conway made a motion, seconded by Commissioner Pike, to adopt the MSA Framework (Attachment Five). The motion passed with Louisiana abstaining.

Commissioner Conway thanked Superintendent Cioppa for starting the process to find solutions for LTCI issues in 2019. Commissioner White thanked NAIC leadership for making LTCI a priority and giving the Task Force the necessary resources.

Commissioner White said the MSA Framework will be considered for adoption by the Executive (EX) Committee and Plenary at the 2022 Spring National Meeting. In 2022, the Subgroup will focus on implementation of the MSA Framework, which is expected to be fully operational by September 2022. Companies can continue to make rate proposals through the Pilot Project, which will inform future improvements to the MSA Framework.

e. Received the Report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup

Commissioner Altman said the Subgroup met Dec. 7 (Attachment Seven), Nov. 19 (Attachment Eight), Oct. 19 (Attachment Nine), Oct. 4 (Attachment Ten), Sept. 27 (Attachment Eleven), and Aug. 23 (Attachment Twelve). During these meetings, the Subgroup took the following action: 1) discussed comments received on a draft LTC wellness program issues document; and 2) discussed comments received on a draft reduced benefit options (RBOs) consumer notices checklist. Both documents were adopted through an open and collaborative process with state insurance regulators, industry, and consumer representatives. Both documents provide excellent guidance in two key areas aimed at protecting LTC consumers.

Commissioner Altman said on Nov. 19, the Subgroup adopted the “Checklist for Premium Increase Communications” document. This checklist is intended to establish a consistent approach to drafting and reviewing LTCI RBO policyholder communications. The checklist can be used by states for guidance, and it is not required to be used for the review of insurer communications with policyholders. It is a tool to try to gain more consistency across the states. This tool will be available to state insurance regulators to use; as reviews of consumer notices are performed, state insurance departments will need to consider states’ requirements.

Commissioner Altman said on Dec. 7, the Subgroup adopted a document titled “Issues Related to LTC Wellness Benefits Document.” She said the Subgroup first heard from industry about the types of benefits they were introducing and testing. This is an area of LTCI that is new, and there are a lot of innovative ideas out there. Therefore, it also requires state insurance regulators to consider the issues that may arise from these types of new benefits. The document outlines issues, observations, and next steps that the Subgroup identified for various topics, including:

- The effectiveness of LTC wellness programs.
- Preventions of unfair discrimination related to extra-contractual benefits and costs.
- Consumer confusion over wellness programs.
- Rebating; i.e., whether some LTC wellness benefits run afoul of anti-rebating laws.
- Tax considerations for policyholders.
- The regulatory role in approving or evaluating LTC wellness approaches.
- Actuarial considerations of the impact of LTC wellness benefits.
- Data privacy.

Commissioner Altman said the document is intended to provide guidance to state insurance regulators. The area of wellness benefits is expected to evolve over time; therefore, this document may be revised and enhanced in the future as these benefits evolve and these conversations mature. She encouraged every state to review and utilize these documents.

Bonnie Burns (California Health Advocates) said RBOs are a serious decision for consumers when faced with the trade-offs they make to maintain some of their coverage. She related a story of an 88-year-old woman that had reduced benefits over the years instead of rate increases and was left with a policy with only two years of coverage and no inflation protection. That said, the RBOs given to consumers is decreasing the promise that the company made to the consumer when the policy was purchased. State insurance regulators need to understand how the RBOs work over time and how many decisions policyholders are being asked to make to keep some of their coverage. RBOs have serious consequences for consumers. Commissioner White said the work on RBOs is important. If policyholders are given options, they need to understand the consequences for accepting those RBOs. The checklist goes a long way in ensuring consumers have good options and understand those options.
Commissioner Conway made a motion, seconded by Commissioner Altmaier, to receive the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup. The motion passed unanimously.

f. Adopted the “Issues Related to LTC Wellness Benefits” Document

Commissioner Altman made a motion, seconded by Mr. Gaffney, to adopt the “Issues Related to LTC Wellness Benefits” document (Attachment Thirteen). The motion passed unanimously.

Ms. Burns said wellness benefits are new and are operating in an unregulated and unstructured environment. It is important for the NAIC to have some oversight over these benefits. Ms. Burns asked that state insurance regulators monitor these products as they emerge.

g. Adopted the “Checklist for Premium Increase Communications” Document

Commissioner Altman made a motion, seconded by Commissioner Altmaier, to adopt the “Checklist for Premium Increase Communications” document (Attachment Fourteen). The motion passed unanimously.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.
The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup met Nov. 15, 2021. The following Subgroup members participated: Michael Conway, Chair (CO); Jimmy Harris (AR); Paul Lombardo (CT); Philip Barlow (DC); Benjamin Ben (FL); Klete Geren (IA); Dean L. Cameron (ID); Alex Peck (IN); Rod Friedy (LA); Fred Andersen (MN); William Leung (MO); Michael Muldoon (NE); Russel Toal (NM); Jessica K. Altman (PA); Matt Gendron (RI); Michael Wise (SC); Doug Slape (TX); Tomasz Serbinowski (UT); Bob Grissom (VA); Anna Van Fleet (VT); Michael Walker (WA); and Joylynn Fix (WV).

1. Discussed and Exposed Comments on an MSA Framework Draft

Mr. Conway said the purpose of today’s meeting is to: 1) review the latest changes that have been made to the draft combined Long-Term Care Insurance (LTCI) Multistate Rate Review Framework (MSA Framework); 2) address the comments received on the second exposure of the MSA Framework; and 3) expose the draft for a final public comment period in advance of the Fall National Meeting.

Mr. Andersen presented a recommendation (Attachment One-A) from the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup. He said the recommendation was in response to a referral from the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup for guidance concerning suggested edits to the Reduced Benefit Options appendix of the draft MSA Framework. He said it is recommended that no changes be made at this time.

Mr. Andersen gave a summary of the changes made to the draft MSA Framework in response to comments received from the Arizona Department of Insurance (DOI) and Financial Institutions (Attachment One-B), the North Carolina DOI (Attachment One-C), the American Academy of Actuaries (Academy) (Attachment One-D), and the American Council of Life Insurers (ACLI) and America’s Health Insurance Plans (AHIP) (Attachments One-E and One-F) during the second exposure, using a marked-up version of the draft (Attachment One-G).

Mr. Conway said the combined draft of the MSA Framework discussed during the meeting will be exposed for a third public comment period ending Dec. 6. He said the Subgroup plans to discuss any comments received and consider adoption of the MSA Framework during its Dec. 12 meeting, and then forward it to the Long-Term Care Insurance (EX) Task Force for its consideration.

Having no further business, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup adjourned.
The Vermont Department of Financial Regulation submitted the following comment to the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup (MSRRSG) in response to the Subgroup’s exposure of operational sections of the Long-Term Care Insurance (LTCI) Multistate Rate Review Framework (MSA Framework) for public comment:

On p. 14, in appendix D, Principles for Reduced Benefit Options (RBO) Associated with LTCI Rate Increases, it reads:

- Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases, e.g., providing hand railings for fall prevention in high-risk homes, and identifying the pros and cons of such an approach.

Vermont suggests keeping the bullet above as is, and adding another bullet:

- In the case that an offering is tied to a rate increase, and involves the collection of consumer data, regulators should ensure that data collection and use is clearly disclosed and easily understood, that the consumer is made aware of any other available options, that the offer is not discriminatory, and that the rate impact is correlated to the offering. Consumer data should not be collected to be monetized for profit or for advertising.

The MSRRSG referred the comment to the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (RBOSG) during its Sept. 28, 2021 meeting for evaluation.

The RBOSG discussed the referral during its Oct. 4, 2021 meeting. It recommends the following:

The RBOSG recommends that the proposed language not be added to the MSA Framework at this time. However, if the Multistate Actuarial LTCI Rate Review Team (MSA Team) is presented with a rate increase filing that includes the issue addressed in the comment, the RBOSG requests that the MSRRSG make a referral that includes details of the offering’s connection to the rate increase request.

Arizona Comments
Greetings,

The following comments are submitted from the Arizona Department of Insurance and Financial Institutions on the LTC Multistate Rate Review Framework (MSA). Thank you for accepting our late submission.

We appreciate the potential benefit of the uniformity of the MSA LTC rate review and standardized format of the corresponding reports, particularly if the MSA process becomes used by many state insurance departments. We also appreciate that there are multiple points in the process where participating/impacted states will be able to ask questions about and comment on the MSA review. However, we may not always be able to participate in, or become aware of, an MSA review until an insurer references an MSA report in its subsequent AZ rate filing. Thus, in order for Arizona to be able to maximize its use of the MSA reports to augment, or even potentially replace, some of its review of a LTC rate filing, we believe the MSA report should contain a certain level of detail about the actuarial rate review analysis. Currently, the framework document indicates the report will contain a “summary” of the analysis, rather than the actual analysis. Here are our suggestions for actuarial review details that we believe should be made available to participating/impacted states:

- A more detailed description about how the MSA reached its conclusions regarding the application of the different methodologies it used (Texas method, Minnesota method, other), including the calculated values (at a high level). Given that the methodologies used by the MSA to analyze the filing might differ from state-specific statutory or regulatory requirements, this analysis could be important for subsequent state reviewers to understand.

- A clear indication of whether the recommended increase in the report is based on:
  - a total allowed increase in the pending request, or
  - a recommended cumulative inception-to-date increase?

- A clear indication about whether the rate increase submitted for review to the MSA involved:
  - different increases for different coverages based on lifetime vs limited coverages,
  - different increase with or without inflation coverage
  - different increases based on issue age groupings

- In order to determine when we can and cannot use the MSA analysis, we must be able to discern whether the filing contains Pre Stabilization and/or Post Stabilization business in accordance with when our Rate Stabilization rules became effective. Currently, it appears that the MSA combines its results into a single Recommended rate increase, with no distinction between the policy issuance periods. Because states may have different standards for Pre Stabilization business than for Post Stabilization business, and because states adopted the Pre and Post rules at different times, there is a potential for the resulting recommended rate increase found in the MSA report to be either higher or lower than a rate more accurately based only on whether policies were issued in a Pre or Post period.

- A clear indication about whether the MSA independently projects lifetime premiums and claims and a comparison of the MSA projections to the filer's projections.
Arizona Comments

- A clear indication about any analysis the MSA made regarding the "fairness" or equity of landing spots or benefit reduction options.

- A clear indication about any analysis the MSA made regarding the filer's actuarial assumptions and margins, discount interest rate, and other pertinent factors.

North Carolina Comments on Operational Section of the MSA Framework – 9/14/21

I had a few insignificant observations on the Long-Term Care Insurance Multi-State Rate Review Framework.

1. The Table of Contents needs to be updated with the addition of Section II. D.
2. In section VI. B. Appendix, I think the first sentence should read: “... LTCI rate increase review inquiries from all of states”
3. Section VI. A. 2. Disclaimers does not seem to be in the Section VII. A. Exhibit – Sample MSA Advisory Report.

Some additional questions:

1. How will Reduced Benefit Options like “landing spots” or new endorsements for reduced inflation benefits be handled? Especially when the MSA Team is recommending different rate increases for different states due to historical approvals.
2. Section II. F. states “the MSA Team ... may communicate with the insurer outside of SERFF.” Will this be documented?
3. Section IV. B. – Will the insurer get a chance to respond to the MSA Team’s recommendation before the Advisory Report is released to the states?

Thank you for the opportunity to comment.

Attn: Jane Koenigsman, Senior Manager, Life and Health Financial Analysis

Re: Long-term Care Insurance (LTCI) Multistate Rate Review Framework Operational and Actuarial Sections, September 2021 Exposures

Dear Commissioners White and Conway:

On behalf of the American Academy of Actuaries LTC Reform Subcommittee, I appreciate the opportunity to offer comments on the exposure drafts of the operational and actuarial sections of the Long-Term Care Insurance Multi-State Rate Review Framework (“Framework”) released September 10, 2021, and September 15, 2021, respectively. This letter provides our comments on both the operational and actuarial aspects of the exposed Framework.

We previously provided comments on the operational aspects of the prior version of the Framework in our letter dated May 24, 2021, and comments on the actuarial aspects in our letter dated July 26, 2021. We appreciate the NAIC Long-Term Care Insurance (EX) Task Force’s consideration of our previous comments and the opportunity to discuss them with the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup.

Actuarial Qualifications and Professional Judgment

We appreciate the revisions and additions to the Framework reflecting our previous comments on actuarial qualifications and professional judgment.

Future Updates

Section IV.E. of the Framework calls for regulatory feedback on the Multi-State Actuarial (MSA) Review process. We recommend that interested parties continue to be invited to review and comment on future changes to the Framework. In particular, if any formalized actuarial and/or policy approaches beyond the Minnesota and Texas approaches are considered for...
frequent use by the MSA Team in evaluating rate proposals (as contemplated in Section V.A.), we suggest that those new approaches should be similarly vetted through the NAIC’s Multistate Rate Review (EX) Subgroup or the Long-Term Care Pricing (B) Subgroup, with opportunity for feedback from the Academy and others.

Future Non-Actuarial Considerations

Section V.F.2. of the Framework discusses the potential for additional non-actuarial considerations to be incorporated into the MSA Review process. This introduces—or continues—a potentially open-ended and inconsistent decision-making process with respect to future rate increase proposals. Insurers and their pricing actuaries should be able to anticipate a stable regulatory framework when introducing new long-term care (LTC) policies into the market. We recognize that individual states’ use of non-actuarial considerations may be outside the scope of the MSA Framework.

Loss Ratio Approach

Section V.A. of the Framework specifies that the MSA Team will “apply both the Minnesota and Texas approaches for each rate proposal submitted.” This implies that the rate stabilization methodology is not sufficient. The rate stabilization approach is used by many state insurance departments. To not include this baseline approach would be contrary to the intent of the MSA Team proposal, which seeks uniformity across states and reduces the implied subsidization that currently exists. The MSA Team should also apply the appropriate loss ratio approach and provide an opinion on the assumptions underlying the calculation if it seeks to have greater state participation.

Section V.B.4. states that

“The loss ratio approach, one of the minimum standards in many states’ statutes, is evaluated by the MSA Team. However, there is general recognition that this approach produces rate increases that are too high and do not recognize other typical statutory standards such as fair and reasonable rates.”

We suggest that the opinion in the preceding sentence be properly attributed to either the members of the MSA Team and/or a decision of an appropriate committee.

Section V.B.5. discusses an application of the 58% / 85% standard to rate-stabilized business. Not all states have adopted rate stability regulations, and effective dates vary across states that have adopted regulations based on policy issue date. Therefore, it is not entirely clear when a rate proposal will be considered to cover a “relevant block” of rate-stabilized business. Given that this test would impose, by regulation, a restriction on rate increases for policies initially issued under rate stability regulation, the MSA Framework’s statement that “if this standard produced lower increases than the Minnesota and Texas approaches, it would produce the recommended rate increase,” may not be justified in all jurisdictions. If the 58% / 85% standard is analyzed by the MSA team, we suggest that the resulting rate increase be reported in comparison with the Minnesota and Texas results. This will allow individual Participating States to consider whether the 58/85 limit applies under their own regulations. Otherwise, the MSA Team’s use of the 58/85
standard may have the effect of layering on a limit that was never applicable to some of the policies in a nationwide block.

**Minnesota and Texas Approaches**

In sections V.D. and VII.A, the Minnesota and Texas approaches are described as actuarially justified approaches. As mentioned in our July 26 letter, these approaches include decisions based on non-actuarial considerations. Two examples of non-actuarial considerations in these approaches are cost-sharing provisions and disallowing interest rate deviations as a reason for a rate increase. We suggest recognizing that these approaches include both actuarial and non-actuarial considerations.

We believe that the Minnesota approach embeds implied policy decisions that are not actuarial in nature. While the calculations themselves may require actuarial methods, as stated in Section V.C., the approach embeds non-actuarial considerations that seek a “fair and reasonableness consideration,” the level of which is not clearly defined. Also, as the approaches labeled “if-knew / makeup approach” and “cost-sharing formula” are public policy decisions that are not specified in adopted model law, defining them as “actuarially justified” seems inappropriate.

Appendix 3 of the sample MSA Advisory Report in Section VII.A. includes a reference to cost sharing and the Texas approach. This reference should be clarified or corrected, as cost sharing does not appear throughout the rest of the Framework in the description of the Texas approach. To our knowledge, cost sharing has never been included in prior documentation of the Texas approach.

**Goals of MSA Review Process**

The sample MSA Advisory Report in Section VII.A. mentions a goal of the MSA Team to attain the same resulting rate tables in each state for a given product. When products have had varied historical rate increase approvals, both in magnitude and timing across states, this goal conflicts, at least in part, with another stated goal of the MSA Review of eliminating cross-state subsidization. A goal of having the same resulting rate tables in each state has a potential adverse impact of creating less incentive for more appropriate rate increase approvals in states that were slow to approve (or did not approve at all) prior rate increase requests, before participating in an MSA review. Said another way, this could have the unintended effect of encouraging states to delay approving rate increases.

**Additional Items**

Insurers may want to file rate increase requests in non-participating states concurrently with the MSA Review filing so that the insurer does not needlessly delay the filing and review process in non-participating states. It is unclear if and how insurers will know which states are Participating States in the MSA Review, and whether states will decide on participation in the MSA review each time any rate increase request is submitted.
Average premiums may vary significantly based on policy characteristics and issue age distribution differences across jurisdictions, in addition to past rate increase approvals. Also, Section V.A. acknowledges that premium rates may be lower in lower-cost states based on coverage differences elected by insureds. In the sample MSA Advisory Report in Section VII.A., the reference to average annual premium rate variation by state should be clarified. We suggest that any comparison of average premium rates be carefully considered as it may be misleading.

*****

Thank you for the opportunity to provide input on the development of the operational and actuarial aspects of the Long-Term Care Insurance Multi-State Rate Review Framework. We welcome the opportunity to speak with you in more detail and answer any questions you have regarding these comments or on other topics. If you do have any questions or would like to discuss further, please contact Matthew Williams, the Academy’s senior health policy analyst, at williams@actuary.org.

Sincerely,

Andrew H. Dalton, MAAA, FSA
Vice Chairperson, LTC Reform Subcommittee
American Academy of Actuaries

October 11, 2021

Commissioner Michael Conway  
Chairman, NAIC LTCI Multi-State Rate Review (EX) Subgroup  
Colorado Insurance Department

Dear Commissioner Conway and Subgroup Members,

The American Council of Life Insurers (ACLI)\(^i\) and the American Association of Health Insurance Plans (AHIP)\(^ii\) appreciate the opportunity to comment on the second draft of the Operational Section of the Long-Term Care Insurance (LTC) Multi-State Rate Review Framework, exposed by the NAIC LTC (EX) Task Force on September 13, 2021. Our members recognize the hard work that has gone into developing the Framework thus far and hope that our input can further the progress already made.

GENERAL

The purpose of the Framework is to develop a consistent national approach for reviewing current LTC rates that results in actuarially appropriate increases being granted by the states in a timely manner that eliminates cross-state rate subsidization. We provide our comments in full support of this charge from the NAIC to the LTCI Multi-State Rate Review (EX) Subgroup.

Consistent, actuarially appropriate, timely rate increases that eliminate cross-state rate subsidization are achieved when the governance, policies, procedures, and actuarial methodologies utilized by the MSA Review Team are openly communicated and reliably followed. We are encouraged by the Subgroup’s edits to the first draft of the Operational Section to give insurers access to the MSA Advisory Report. Access to the final Report will help insurers to understand the thought process the MSA Team worked through to make their recommendation, thereby giving insurers greater predictability in how their business will be regulated.

This letter’s headings correspond with the various sections and subsections of the Framework for which we have comments. In addition to these comments, we respectfully submit our suggested edits (highlighted in yellow) to the Operational Section in the attached redlined document.

I. INTRODUCTION

PURPOSE

We urge the Subgroup to incorporate its entire charge into the Framework. Currently, the portion of the charge directing the Subgroup to develop an approach to the MSA Review that eliminates cross-state rate subsidization is not included. Eliminating cross-state rate subsidization should be a key component of, and explicitly stated in, the Framework. The original charge of the LTC (EX) Task Force emphasized the importance of addressing cross-state inequities. It recognized, “... the gravity of the threat posed by the current long-term care...”
insurance environment both to consumers and our state-based system of insurance regulation” and the need to take action to address the threat.

Many of the recommendations that ACLI/AHIP made in our comments on the first draft of the Operational Section, and are making again in this comment letter, would mitigate cross-state rate inequities. If adopted, these recommendations will help to keep rate increase decisions on blocks of business both consistent and actuarially sound.

STATE PARTICIPATION IN THE MSA REVIEW
ACLI/AHIP acknowledges the careful balance the Framework must achieve “to create a voluntary and efficient MSA Review that produces reliable and nationally consistent rate recommendations that state insurance regulators and insurers can depend upon.” A voluntary, yet dependable, MSA Review requires an expectation that Participating States will rely on the MSA Advisory Report in their rate approval decisions. If this expectation is not communicated to, and followed by, the states, rate recommendations will not be consistent, nor will regulators or insurers depend on them in their decision-making. We recommend that the Framework emphasize the expectation that participating in the MSA Review means a commitment to the results of the Review, barring any contradictory state law requirements.

Understanding that the Review process will be refined over time, we suggest that wording in the Operational Section be changed to say, “state participation is expected to increase (as opposed to evolve) in the future.” Emphasizing state reliance on the MSA Review will help to promote the consistency and efficiency the review process is meant to achieve.

In order for “[i]nsurance companies . . . to understand how . . . the MSA Advisory Report may impact the insurer’s in-force LTCI premium rate increase filing decisions and interactions with individual state insurance regulators” the MSA Review process must be transparent about how it applies the actuarial methodologies. ACLI/AHIP will address this matter in more detail in our comments on the second draft of the Actuarial Section of the Framework.

GENERAL DESCRIPTION OF THE MSA REVIEW
In our redline document, we suggest amendments to the language in this section to clarify that the MSA Team will keep insurers updated throughout the Review process and inform the insurer if the recommendation differs from the proposal. We also recommend language that strongly encourages states to rely on the MSA Advisory Report to achieve the charge and purpose of the MSA Review process.

BENEFITS OF PARTICIPATING IN THE MSA REVIEW
This Section lists the benefits state regulators will attain if they participate in the MSA process. However, unless the MSA Team, does, in fact, use the same dedicated approach to evaluate in force LTCl rate increase reviews, the states will not obtain the stated “benefit of using the same consistent methodology that is relied upon by other state insurance departments when reviewing in force LTCI rate increase filings in their state.” The MSA process will also not realize the “increased efficiency and reduced timelines for nationwide premium rate increase
requests” listed as a benefit for insurers. For these reasons, and as asserted in other sections of this letter, the Operational Section should encourage the states to not only accept the Advisory Report, but to also accept the rate filing submitted to the MSA Team, without additional state-specific filing requirements, unless mandated by state law.

DISCLAIMERS AND LIMITATIONS
While we appreciate the additional clarification that Participating States will provide MSA Advisory Reports the same protection from disclosure as provided by the confidentiality provisions contained within their state’s laws and regulations for rate filings, we remain concerned that insurers’ proprietary information could be revealed in the MSA Review process. Section I. E. 2. refers to the Master Information Sharing and Confidentiality Agreement between states that governs the sharing of information among state insurance regulators. We respectfully request that this document be shared with insurers so that we may understand the privacy protocols in place throughout the MSA review process. We recommend that the Subgroup clarify which privacy rules govern each part of the MSA Review process in the Framework. The safeguards used to keep insurers’ information confidential will influence whether an insurer decides to participate in the MSA Review process. Development of the MSA recommendation, including the Advisory Report, should be held confidential, subject to the Master agreement. Once the insurer filed the Advisory Report with the state it should be provided the confidentiality protections afforded by the state’s law.

II. MULTI-STATE ACTUARIAL LTCI RATE REVIEW TEAM (MSA TEAM)
MSA ASSOCIATE PROGRAM
We applaud the addition of the MSA Associate Program to the Framework to develop and expand LTCI actuarial expertise amongst state insurance department regulators. ACLI/AHIP members offer their support of the program and their help answering questions, if desired.

III. REQUESTING AN MSA REVIEW
PROCESS FOR REQUESTING AN MSA REVIEW
ACLI/AHIP requests clarification on the confidentiality of information in SERFF. The draft Framework states that “Participating States will have access to view the insurer’s rate proposal and review correspondence in SERFF.” Is the request for a rate proposal in SERFF, as well as accompanying information and correspondence, protected by Compact confidentiality procedures, state law, the Master Agreement, or something else?

CERTIFICATION
The certification provision references Participating States that “affirmatively relied on the MSA Review and/or the MSA Advisory Report in making its determination; or . . . consents in writing to use the MSA Review and/or the MSA Advisory Report.” Under what circumstances does the Subgroup believe that a state would do either? We suggest that all Participating States disclose whether they affirmatively relied on the MSA Review/Advisory Report in making their rate recommendations.

IV. REVIEW OF THE RATE PROPOSAL
RECEIPT OF A RATE PROPOSAL
In the referenced SERFF or email notifications, how much of the rate proposal submission, correspondence between the MSA Team and insurers, and other activities be visible to Participating States? Will Participating States be able to read all submitted information in its entirety? How will this information be kept confidential among the MSA Team and Participating States?

COMPLETION OF THE MSA REVIEW
We would appreciate clarity regarding the timeline once the MSA Team completes its review. The Framework states that the insurer will receive sufficient information regarding the MSA Team’s recommendation to allow “the insurer an opportunity to review the recommendation and in the event that the MSA Team recommendation differs from the proposal submitted by the insurer, the insurer will be given the opportunity to interact with MSA Team in order to ask questions, understand the MSA Team’s reasoning, and provide additional information in support of its proposal [sic] will address questions from the insurer about the result of the review.” Does this mean an insurer will see the recommendation before it is communicated to state insurance departments? If so, ACLI/AHIP are in support.

At what point will the MSA Team decide to abort the insurer’s efforts to refute a MSA recommendation differing from its proposal? We suggest that the Framework clearly state that an insurer can see and appeal the MSA recommendation prior to its communication to Participating States. A minimum two-week appeal period would give the insurer time to compile and submit additional information in support of its proposal.

PREPARATION AND DISTRIBUTION OF THE MSA ADVISORY REPORT
Furthermore, whether the recommendation differs from the proposal or not, our members would like to participate in MSA Team presentations of the draft MSA Advisory Report with regulators from Participating States. We believe an insurer’s ability to answer questions and respond to concerns from Participating States, if needed, would be helpful to all involved and increase MSA review efficiency.

TIMELINE OF REVIEW AND DISTRIBUTION OF THE MSA ADVISORY REPORT
Please see our suggested changes to the timeline in the redline document.

FEEDBACK TO THE MSA TEAM
The MSA Review process will be refined over time. With this in mind, we strongly recommend that the draft Framework be edited to specify a formal, annual assessment of the MSA Review process. Further, in addition to a survey gathering feedback from Participating States, insurers should also be surveyed for feedback on the process. Obtaining a clear and complete picture of the process from all participants will give NAIC leadership a more accurate picture of how well the process is working and what areas need improvement. Moreover, the anonymous results of the annual assessment should be shared with both Participating States and insurers to aid both groups in their business-planning and decision-making.
VII. EXHIBITS

EXHIBIT A. SAMPLE MSA ADVISORY REPORT

In Appendix 1, the note regarding the Minnesota approach refers to downward adjustments to morbidity assumptions. We suggest the Advisory Report include more explicit information about the adjustments made so that they may be re-evaluated, if appropriate.

The cost-sharing formula included in Appendix 3 of Exhibit A. assumes a company should have had more information about the possibility of rate increases than the consumer had. Whether or not this is true in any given circumstance, inclusion of the cost-sharing formula here is inappropriate. The assumption is a policy consideration that should not be incorporated into the actuarial approach. Further, Appendix 3 appears to apply the prospective cost-sharing formula within the Texas methodology, which differs from the provided Texas methodology explanation. See our red-lined document for additional suggested edits to this portion of the draft Framework.

CONCLUSION

ACLI/AHIP remains committed to working with the Subgroup to address the challenges in developing an MSA Review Framework. We look forward to addressing questions on our comments at our next LTCI Multi-State Rate Review (EX) Subgroup meeting.

Sincerely,

Jan M. Graeber Ray Nelson
ACLI Senior Actuary AHIP Consulting Actuary

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.

I. INTRODUCTION

A. Purpose

The National Association of Insurance Commissioners ("NAIC") charged the Long-Term Care Insurance (EX) Task Force ("LTCI (EX) Task Force") with developing a consistent national approach for reviewing current long-term care insurance ("LTCI") rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Considering that charge and the threat posed by the current LTCI environment both to consumers and the state-based system of insurance regulation, the LTCI (EX) Task Force developed this framework for a multi-state actuarial ("MSA") LTCI rate review process ("MSA Review").

This framework is based upon the extensive efforts of the LTCI Multi-State Review (EX) Subgroup, including its experience with a pilot program conducted by the pilot program’s rate review team ("Pilot Team"). As part of that pilot program, the Pilot Team reviewed LTCI premium rate increase proposals and issued MSA Advisory Reports recommending actuarially justified state-by-state rate increases. This framework aims to institutionalize a refined version of the Pilot Team’s approach to create a voluntary and efficient MSA Review that produces reliable and nationally consistent rate recommendations that state insurance regulators and insurers can depend upon. The MSA Review has been designed to leverage the limited LTCI actuarial expertise among state insurance departments by combining that expertise into a single review process analyzing in force LTCI premium rate increase proposals ("rate proposal(s)") and producing an MSA Advisory Report for the benefit and use of all state insurance departments. 

Note that rate decreases can be contemplated within the MSA Review process. The same concepts of this MSA Framework would be applied, if such a decrease request is received for MSA Review. The goal of this framework is to create a process that will not only encourage insurers to submit their LTCI products for multi-state review, but also provide insurance departments the requisite confidence in the MSA Review so that they will voluntarily rely upon its recommendations when conducting their own state level reviews of in force LTCI rate increase filings.

Ultimately, the MSA Review is designed to foster as much consistency as possible between states in their respective approaches to rate increases.

The purpose of this document is to function as a user's manual framework for the MSA Review that communicates to NAIC members, state insurance department staff, and external stakeholders how the MSA Review works to the benefit of state insurance departments and how insurers might engage in the MSA Review. This user's manual framework is intended to communicate the governance, policies,
procedures, and actuarial methodologies supporting the MSA Review. State insurance regulators can utilize the information and guidance contained herein to understand the basis of the multi-state actuarial LTCI rate review team’s (“MSA Team”) MSA Advisory Reports. Insurance companies can access the information and guidance contained herein to understand how to engage in the MSA Review, and how the MSA Advisory Report may impact the insurer’s in force LTCI premium rate increase filing decisions and interactions with individual state insurance regulators.

This document will be maintained by NAIC staff under the oversight of the LTCI (EX) Task Force and be revised as directed by the Task Force or an appointed Subgroup. This document will be part of the NAIC library of official publications and copyrighted.

B. State Participation in the MSA Review

The MSA Review of an insurer’s rate proposal will be available to state insurance departments who are both an Impacted State and a Participating State. These are defined as follows.

- "Impacted State" is defined as the domestic state, or any state for which the product associated with the insurer’s in force LTCI premium rate increase proposal is or has been issued.
- "Participating State" is defined as any impacted state insurance department that agrees to participate in the MSA Review. Participation is voluntary as described in Section I.E.1 below. Participation may include activities such as, but not limited to, receiving notifications of rate proposals in SERFF, participation in communication/Webinars with the MSA Team, and access to the MSA Advisory Report.

Note that state participation is expected to evolve/increase in the future as the MSA Review process continues to be developed and refined.

C. General Description of the MSA Review

The MSA Review provides for a consistent actuarial review process that will result in an MSA Advisory Report which state insurance departments may choose to rely on when deciding to make decisions on an insurer’s rate increase filing or to supplement the state’s own review process.

The MSA Review is conducted by a team of state’s regulatory actuaries with expertise in LTCI rate review. Each review will be led by a designated member of the MSA Team. The review process is supported by NAIC staff, the Interstate Insurance Product Regulation Commission ("Compact") staff, who will administratively assist insurers in making requests to utilize the MSA process and facilitate communication between the insurer, the MSA Team and [Participating/Impacted TBD] States. The NAIC’s electronic infrastructure, the System for Electronic Rates and Forms ("SERFF") will be used to streamline the rate proposal and review process. Although the administrative services of the Compact staff and SERFF’s Compact filing platform are utilized in the MSA Review, MSA rate proposals are reviewed, and MSA

4 Certain processes for Impacted vs. Participating States are yet to be determined (TBD).
Advisory Reports are prepared by the MSA Team. MSA rate proposals are not Compact filings and Compact staff will not have any role in determining the substantive content of the MSA Advisory Reports.

The MSA Review process begins when an insurer expresses interest in an MSA Review being performed for an in force LTCI rate proposal to the MSA Team through SERFF, or to supporting NAIC or Compact staff. The eligibility of the rate proposal will be reviewed and determined by the MSA Team and, as needed, from supporting staff.

The MSA Review of eligible rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. The MSA Team will apply the Minnesota and Texas approaches to calculate recommended, approvable rate increases. While aspects of the Minnesota and Texas approaches may result in lower rate increases than resulting from loss ratio-based approaches and are outside the pure loss ratio requirements contained in many states’ laws and rules, the approaches fall in line with legal provisions that rates shall be fair, reasonable, and not misleading. The MSA Team will review support for the assumptions, experience, and projections provided by the insurer and perform validation steps to review the insurer-provided information for reasonableness. The MSA Team will document how the proposal complies with the regulatory approach utilized by the MSA Team for Participating States. See Section V for more details on the actuarial review.

Throughout the MSA Review process the MSA Team will provide updates to the insurer. The MSA Team will deliver the final MSA Advisory Report to the insurer and address any questions the insurer has about the results of the Review. Through the MSA Review, the MSA Team will communicate MSA information to the insurer, including the final MSA Advisory Report, and the MSA Team will address any questions from the insurer about the results of the review.

Additionally, the review will consider reduced benefit options that are offered in lieu of the requested rate increases and factor in non-actuarial considerations.

At the completion of the review, the MSA Team will draft an MSA Advisory Report for Participating States that provides both summary and detail information about the rate proposal, the review methodologies, the analysis and other considerations of the team, and the recommendation for rate increases as outlined in Appendix A. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law. Participating States are encouraged to utilize the information filed with the MSA Team in addition to the advisory report recommendation unless required by state law.

The rate proposal, review process, actuarial methodologies and other review considerations are detailed within this framework document and accompanying appendices.

D. Benefits of Participating in the MSA Review

Both state insurance regulators and insurers will benefit by participating in the MSA Review in multiple ways.
For state insurance regulators:

- First, they will be able to leverage the demonstrated expertise of the MSA Team in reviewing in force LTCI rate increases filed to their state. It is recognized that multiple states may not have significant actuarial expertise with LTCI, so participation in the MSA Review will allow those states to build on the specific, dedicated LTCI actuarial expertise of the MSA Team.
- Second, state insurance regulators will be able to utilize the MSA Team to promote consistency of actuarial reviews among filings submitted by all insurers to states, and among actuarial reviews across all states. Because the MSA Team is using the same dedicated approach to in force LTCI rate increase reviews, states who utilize the MSA Team will have the benefit of using the same consistent methodology that is relied upon by other state insurance departments when reviewing in force LTCI rate increase filings in their state.
- Third, the MSA Review allows for more state regulatory actuaries to work with or under the supervision of qualified actuaries which affords them an opportunity to establish LTCI-specific qualifications in making actuarial opinions. This is particularly important when we consider that requirements to be a “Qualified Actuary” include years of experience under the supervision of another already qualified actuary in that subject matter.
- Finally, participating in the MSA Review will allow all state insurance regulators to share questions and information regarding a particular rate proposal or review methodologies; thus, increasing each state’s knowledge base in this area and promoting a more consistent national approach to in force LTCI rate review.

Note that states’ use of and reliance on the MSA Advisory Report is expected to increase in the future as the MSA Review process continues to be developed and refined and the benefits of the MSA Review described above become more evident.

Long-Term Care (LTCI) insurers will likewise see multiple benefits in participating the MSA Review.

- First, by utilizing the MSA Review and through the receipt of MSA information and the MSA Advisory Report from the MSA Team, insurers should see increased efficiency and reduced timelines for nationwide premium rate increase requests. As the MSA Team delivers the MSA Advisory Report for a rate proposal to Participating States, they have functionally reduced the review time for each state, meaning that LTC insurers should see more efficient and timely reviews from these states.
- Second, participating in the MSA Review will provide LTC insurers with one consistent recommendation to be used when making rate increase filings to all states, thus reducing the carrier’s workload in developing often widely differing filings for states’ review.
- Finally, the consistency of one uniform national system for reviewing rate proposals should lead to more accurate reviews, theoretically reducing some of the need for ongoing rate increase filings.

E. Disclaimers and Limitations

1. State Authority over Rate Increase Approvals
The MSA Advisory Report is a recommendation to Participating States based upon the methodologies adopted by the MSA Review. The recommendations are not specific to, and do not account for, the requirements of any specific state’s laws or regulations. The MSA Review is not intended, nor should it be considered, to supplant or otherwise replace any state’s regulatory authority, responsibility and/or decision-making. Each state remains ultimately responsible for approving, partially approving or disapproving any rate increase in accordance with applicable state law. To satisfy the LTC EX Task Force charge to “develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization,” it is expected that states will generally follow the MSA Advisory Report’s recommendations and not impose state-specific caps on actuarially appropriate increases unless specifically mandated by state law.

A Participating State’s non-adoption of the MSA Advisory Report’s recommendations with respect to one filing does not require that state to consider or use adopt any MSA Advisory Report recommendations with respect to any other filing. The MSA Review in no way (a) eliminates the insurer’s obligation to file for a rate increase in each Participating State or (b) modifies the substantive or procedural requirements for making such a filing. While expected to adopt the recommendations of the MSA Review in each of their state filings, insurers are not obligated to align their individual state rate filings with the recommendations contained within the MSA Advisory Report.

The MSA Advisory Reports, including the recommendations contained therein, are only for use by Participating States in considering and evaluating rate filings. The MSA Advisory Reports or their conclusions shall not be utilized by any insurer in a rate filing submitted to a non-participating state, nor shall the MSA Advisory Reports be used outside of each regulator’s own review process, or to challenge the results of any individual state’s determination of whether to grant, partially grant or deny a rate increase.

2. Information Sharing Between State Insurance Departments

The MSA Review, including, but not limited to, meetings, calls, and correspondence with insurers on insurer-specific matters are held in regulator-to-regulator sessions and are confidential. In addition, if certain information and documents related to specific companies that are confidential under the state law of a MSA Team member or a Participating State need to be shared with other regulators, such sharing will occur as authorized by state law, and pursuant to the Master Information Sharing and Confidentiality Agreement ("Master Agreement") between states that governs the sharing of information among state insurance regulators. Through the Master Agreement, state insurance regulators affirm that any confidential information received from another state insurance regulator will be maintained as confidential and represent that they have the authority to protect such information from disclosure.

3. Confidentiality of the Rate Proposal
Members of the MSA Team affirm and represent that they will provide any in-force LTCI rate proposal as discussed herein with the same protection from disclosure, if any, as provided is protected from disclosure by the confidentiality provisions contained within their state’s laws and regulations.

4. Confidentiality of the MSA Reports

Likewise, members of the MSA Team and Participating States affirm and represent that they will provide any MSA Advisory Report(s) and MSA information provided to insurers as discussed herein with the same protection from disclosure, if any, as provided is protected from disclosure by the confidentiality provisions contained within their state’s laws and regulations for rate filings.

F. Governing Body and Role of the NAIC Long-Term Care Insurance (EX) Task Force

The NAIC LTCI (EX) Task Force is expected to remain in place for the foreseeable future to oversee the implementation of the MSA Review, and related MSA Advisory Reports, and to provide a discussion forum for MSA-related activities. The Task Force or any successor will continuously evaluate the effectiveness and efficiency of the MSA Review for the benefit of state insurance regulators and provide direction, as needed.

The LTCI (EX) Task Force may create one or more subgroups to carry out its oversight responsibilities.

Membership and leadership of the Task Force will be selected by the NAIC President and President-elect as part of the annual committee assignment meeting held in January. Selection of the membership and leadership may consider a variety of criteria, including commissioner participation, insurance department staff competencies, market size, domestic LTC insurers, and other criteria considered appropriate for an effective governance system.

II. Multi-State Actuarial LTCI Rate Review Team (MSA Team)

The MSA Team comprises state insurance department actuarial staff. MSA Team members are chosen by their skill set and LTCI actuarial experience. The LTCI (EX) Task Force, or its appointed Subgroup, will determine the appropriate experience and skill set for qualifying members for the MSA Team. It is expected that state participants will provide expertise and technical knowledge specifically regarding the array of LTCI products and solvency considerations. The desired MSA Team membership composition should include a minimum of five and up to seven members.

Membership must follow the requirements below and be approved by the Chair of the LTCI (EX) Task Force or the Chair of an appointed Subgroup. The following outlines the qualifications, duties, participation expectations and resources required for MSA Team members.

A. Qualifications of an MSA Team Member
To be eligible to participate as a member of the MSA Team, a state insurance regulator is required to:

- Hold a senior actuarial position in a state insurance department in life insurance, health insurance, or long-term care insurance
- Be recommended by the Insurance Commissioner of the state in which the actuary serves
- Have over five years of relevant LTCI insurance experience
- Hold an Associate of the Society of Actuaries (ASA) designation
- Currently participates as a member of the LTCI Multistate Rate Review (EX) Subgroup (or equivalent Subgroup appointed by the LTCI (EX) Task Force) and the LTC Pricing (B) Subgroup
- At least one member of the MSA Team must be a member of the American Academy of Actuaries

Additionally, the following qualifications are preferred:

- Hold a Fellow of the Society of Actuaries (FSA) designation
- Have spent at least one year engaged in discussions of either the LTCI (EX) Task Force or its appointed Subgroup

As both state insurance regulators and the MSA Review process may benefit by developing and expanding specific LTCI actuarial expertise through participation in this process, having one or more suitably experienced and qualified actuaries participate in and supervise the work of the MSA Team is critical to the viability of the MSA process. Participation also provides opportunities for additional actuaries to meet the requirements of the U.S. Qualification Standards applicable to members of the American Academy of Actuaries and other U.S. actuarial organizations as they relate to LTCI.

Consultants engaged by the state insurance department would not be considered for MSA Team membership.

B. Duties of an MSA Team Member

- Active involvement with the MSA Team, with an expected average commitment of 20 hours per month (See Section IV for details of the MSA Review and activities of a team member)
- Participate in all MSA Team calls and meetings (unless an extraordinary situation occurs)
- Review and analyze materials related to MSA rate proposals
- Provide input on the MSA Advisory Reports, including regarding the recommended rate increase approval amounts
- Maintain confidentiality of MSA Team meetings, calls, correspondence, and the matters discussed therein to the extent permitted by state law and protect from disclosure any confidential information received pursuant to the Master Information Sharing and
Confidentiality Agreement. MSA Team Members should communicate any request for public disclosure of MSA information or any obligation to disclose.

- Active involvement within NAIC LTCI actuarial groups
- Willingness to provide expertise to assist other states

C. Participation of an MSA Team Member

Except for webinars and other general communications with state insurance departments, participation in the MSA Review conference calls and meetings related to the review of a specific rate proposal will be limited to named MSA Team members, supporting NAIC or Compact staff members who will be assisting the MSA Team, and the Chair and Vice Chair of the LTC (EX) Task Force, or its appointed Subgroup. Other interested regulators, e.g., domiciliary state insurance regulator, may be invited to participate on a call at the discretion of the MSA Team, or Chair or Vice Chair of the Task Force or its appointed Subgroup.

D. MSA Associate Program

The MSA Associate Program within the MSA Framework is intended to encourage and engage state insurance department regulators to become actively involved in the MSA process. Additionally, a benefit of the program is to provide an educational opportunity for state insurance department regulatory actuaries that wish to gain expertise in LTCI. Regulatory actuaries can participate with varying levels of involvement or for different purposes as described. Regulatory actuaries may participate:

- As a mentee. The mentee would participate in aspects of the MSA Review process. An MSA Team member will serve as a mentor to another state regulatory actuary and provide one-on-one guidance.
- To gain more knowledge and understanding of the Minnesota and Texas actuarial approaches.
- To share their own expertise through feedback to the MSA Team on MSA Advisory Reports, to better enhance the overall MSA process.
- To participate on an ad hoc limited basis, i.e., where a regulatory actuary would like to participate but is unable to make the required time commitment.
- To meet the U.S. Qualification Standards applicable to members of the American Academy of Actuaries and other U.S. actuarial organizations as they relate to LTCI by serving under the supervision of a qualified actuary on the MSA Team.
- To serve as a peer reviewer of the MSA Advisory Reports.

D.E. Conflicts, Confidentiality and Authority of the MSA Team

1. Authority of the MSA Team

Members of the MSA Team serve in a purely voluntary basis, and any member’s participation shall not be viewed or construed to be any official act, determination or finding on behalf of their respective jurisdictions.
2. **Disclosures and Confidentiality Obligations, as Applicable**

All members of the MSA Team acknowledge and understand that the MSA Review, including, but not limited to, meetings, calls, and correspondence are confidential and may not be shared, transmitted, or otherwise reproduced in any manner. Additionally, all members of the MSA Team affirm and represent that they will (a) provide any in force LTCI rate proposal with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations; and (b) provide any MSA Advisory Report with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations for rate filings. Any resulting advisory report, as well as all meetings, calls, correspondence, and all other materials produced in connection herewith are confidential and may not be shared, transmitted, or otherwise reproduced in any manner.

3. **Conflict of Interest Avoidance Procedures and Certifications**

No member of the MSA Team may own, maintain, or otherwise direct any financial interest in any company or its affiliates subject to the regulation of any individual State, nor may any member serve or otherwise be affiliated with the management or board of directors in any company or its affiliates subject to the regulation of any individual State. All conflicts of interest, whether real or perceived, are prohibited and no member of the MSA Team shall engage in any behaviors that would result in or create the appearance of impropriety.

E.F. **Required NAIC and Compact Resources**

The MSA Team will require administrative and technical support from the NAIC. As the MSA Review develops, it is expected NAIC support resources will play an integral role in managing the overall program. Administrative staff support will be needed to support MSA Team communications and manage record keeping for underlying workpapers and final MSA Advisory Reports associated with each rate proposal, etc. Additionally, it is possible that limited actuarial support will be needed for the analysis of rate proposals, including preparing data files, gathering information, performing limited actuarial analysis procedures, drafting MSA Advisory Reports, and monitoring interactions among the state insurance departments and the MSA Team. Dedicated staff support for the ongoing work of the LTCI (EX) Task Force will be needed as well. As more experience with rate proposal volumes and average analysis time is gained, the full complement of human resources required will be better understood.

The MSA Team and supporting NAIC and Compact staff will use the NAIC SERFF electronic infrastructure to receive insurer rate proposals and correspond with insurers. As needed, the MSA Team or supporting NAIC and Compact staff may communicate with the insurer outside of SERFF. NAIC and Compact staff will communicate with insurers only at the direction of the MSA Team. Compact staff will perform administrative work related to MSA Filings at the direction of the MSA Team and as described in this Framework.
III. REQUESTING AN MSA REVIEW

A. Scope and Eligibility of a Rate Proposals for MSA Review

The following are the preferred eligibility criteria for requesting an MSA Review of a rate proposal:

- Must be an in force long-term care insurance product [individual or group]
- Must be seeking a rate increase in at least 20 states and must affect at least 5,000 policyholders nationwide
- Includes any stand-alone LTCI product approved by states, not by the Interstate Insurance Product Regulation Commission (Compact)
- For Compact-approved products meeting certain criteria, the Compact Office will provide the first-level advisory review subject to the input and quality review of the MSA

It is recognized that rate proposals vary from insurer to insurer. The above criteria and the timelines provided below are general guidelines. The MSA Team has the authority to weigh the benefits of the MSA Review for state insurance departments and the insurer against available MSA Team resources when considering the eligibility of rate proposals and the timeline for completion. Based on these considerations, the MSA Team, at its discretion, may elect to perform an MSA Review on a rate proposal that does not satisfy the above eligibility criteria.

The MSA Team reserves the right to deny a request that does not meet eligibility criteria. An insurer will be notified if the request for an MSA Review is denied.

An insurer may ask questions for more information about a potential rate proposal though communication to supporting NAIC and Compact staff and the MSA Team. This will be accomplished through a Communication Form that will be available on the Compact webpage. Supporting NAIC and Compact staff will work with the insurer to complete the necessary steps to assess eligibility, discuss any technical or other issues and answer questions.

The insurer will have access to primary and supplementary checklists in Appendix B that provide guidance to the insurer for information that should be included in a complete MSA rate proposal requested through the NAIC’s SERFF application.

B. Process for Requesting an MSA Review

As noted in Section I.C. above, the MSA Review will utilize the Compact’s multi-state review platform within the NAIC’s SERFF application and its format for in-force LTCI rate increase requests. Therefore, a state may participate in the MSA Review without being a member of the Compact. The following describes a few key elements of the process for insurers and state insurance department regulators.

- The insurer will work with NAIC and Compact support staff and the MSA Team to make a seamless request.
• Instructions containing a checklist for information required to be included in the rate proposal, as reflected in Appendix B, will be available to insurers through the Compact’s webpage or within SERFF.
• The insurer shall include in the rate proposal a list of all states for which the product associated with the rate increase request is or has been issued. Participating states will have access to view the insurer’s rate proposal and review correspondence in SERFF.
• Fee schedule for using the MSA Review [To Be Determined].
• Rate proposals for MSA Review within SERFF will be clearly identified as separate from Compact filings.
• The supporting NAIC and Compact staff through SERFF will notify the impacted states upon receipt of the request with the SERFF Tracking No.
• The MSA Team may utilize a “queue” process for managing workload and resources for incoming requests through SERFF.
• The MSA Team may utilize Listserv or other communication means for inter-team communications.
• The MSA Team’s review of objections and insurer responses are completed through SERFF.

C. Certification

The insurer shall provide certifications signed by an Officer of the insurer that it acknowledges and understands the non-binding effect of the MSA Review and MSA Advisory Report. The certification shall also provide, and the insurer shall agree, that it will not utilize or otherwise use the MSA Review and/or the resulting MSA Review and/or the resulting MSA Advisory Report to challenge, either through litigation or any applicable administrative procedure(s), any state’s decision to approve, partially approve or disapprove a rate increase filing except when: 1) the individual state is a [Participating/Impacted TBD] State that affirmatively relied on the MSA Review and/or the MSA Advisory Report in making its determination; or 2) the individual state consents in writing to use of the MSA Review and/or the MSA Advisory Report.

Failure to abide by the terms of the insurer’s certification will result in the insurer and its affiliates being excluded from any future MSA Reviews, and it will permit the MSA Team to terminate, at its sole discretion, any other ongoing review(s) related to the insurer and its affiliates.

Should the MSA Team exclude any insurer and its affiliates for failure to adhere to its certification, the MSA Team, at its sole discretion, may permit the insurer and its affiliates to resume submitting rate proposals for review upon written request of the insurer.

IV. REVIEW OF THE RATE PROPOSAL

A. Receipt of a Rate Proposal

The MSA rate review process begins when an insurer expresses interest in an MSA Review being performed for a rate proposal. This interest can be expressed through completion of a Communication
Form, which will be available through the Compact webpage. The initial request will be reviewed by the MSA Team lead reviewer and/or supporting NAIC and Compact staff. Once an insurer has completed this initial communication and meets the criteria for requesting an MSA Review, the insurer will work with supporting NAIC and Compact staff and the MSA Team to complete the rate proposal in SERFF. The MSA Team will be notified, via SERFF, when the proposal is available for review.

The supporting NAIC and Compact staff via SERFF or e-mail will notify (Participating/Impacted states TBD) when rate proposals are submitted, correspondence between the MSA Team and insurer is sent or received in SERFF, the MSA Advisory Report is available and other pertinent activities occur during the review.

B. Completion of the MSA Review

The MSA Team shall designate a lead reviewer to perform the initial review of each rate proposal. Once the rate proposal is made through SERFF, the MSA Review will resemble a state-specific review process.

The MSA Team will meet periodically to discuss the review and determine any needed correspondence with the insurer. Objections and communications with filers will be conducted through SERFF, similar to any state-specific filing or Compact filing, to maintain a record of the key review items. Other supplemental communication between the insurer and the MSA Team or supporting NAIC and Compact staff, may occur, such as conference calls or emails, as appropriate.

The timeframe for completion of the MSA Team’s review and drafting the MSA Advisory Report will be dependent upon the completeness of the rate proposal and the size and complexity of the block of policies for which the rate increase applies. The MSA Team may utilize a “queue” process for managing workload and resources for incoming requests through SERFF. The timeliness of any necessary communication between the MSA Team and the insurer to resolve questions or request/receive additional information about the rate proposal will impact the completion of the review.

As the MSA Team completes its review: 1) the insurer will receive initial communication of a completed review and that a final MSA Advisory Report with recommendations will be distributed and communicated to state insurance departments within the next month which may serve as a signal for a potential ideal time for the insurer to prepare to submit the state-specific filings to each state; and, 2) the insurer will receive sufficient MSA Review information regarding the MSA Team’s recommendation to allow for the insurer an opportunity to review the recommendation; and in the event that the MSA Team recommendation differs from the proposal submitted by the insurer, the insurer will be given the opportunity to interact with MSA Team in order to ask questions, understand the MSA Team’s reasoning, and provide additional information in support of its proposal. The MSA Team will address questions from the insurer about the result of the review.

C. Preparation and Distribution of the MSA Advisory Report
Upon completion of the actuarial review, the MSA Team will prepare a draft MSA Advisory Report for the rate proposal. The reports will be made available within SERFF “reviewer notes” for Participating States. Supporting NAIC and Compact staff will maintain a distribution list and send notifications of the availability of reports to Participating States. Consultants engaged by a state insurance department staff to perform rate reviews would be given access to the MSA Advisory Report, subject to the terms of the agreement between the consultant and the Participating State insurance department.

Consultants who are bound by the actuarial Code of Professional Conduct, adopted by the Academy of Actuaries, Society of Actuaries and Conference of Consulting Actuaries, should consider whether receipt of the MSA Advisory Report is acceptable under Precept 7 regarding Conflicts of Interest. For other professions, similar consideration should be made if bound by similar professionalism standards.

Prior to finalizing the MSA Advisory Report, the MSA Team will present the draft MSA Advisory Report to Participating States on a regulatory-only WebEx call, as deemed necessary, to provide an overview of the recommendations and respond to questions from Participating States. Insurers may participate in the call at a time of day to directly address state regulator questions.

The MSA Team will issue the final MSA Advisory Report to the Participating States and the insurer after consideration of any comments and questions from Participating States.

The MSA Advisory Report will include standardized content as reflected in Appendix A, with modifications as necessary for any unique factors specific to the rate proposal. The content and format are based on feedback received from state insurance departments and the LTCI (EX) Task Force during the pilot project.

The content and format of the MSA Advisory Report may be modified in the future under the direction of the LTCI (EX) Task Force, or appointed Subgroup, as the MSA Team gains more experience in generating the reports and receives more feedback through this process. A formal, annual review will ensure Participating States and insurers have a forum to provide feedback.

D. Timeline for Review and Distribution of the MSA Report

The draft MSA Advisory Report will be made available to Participating States for a two-week comment period prior to being finalized. The following timeline for this comment period and distribution of the final MSA Advisory Report will be adhered to as close as possible, barring timing delays due to, e.g., holidays or other unexpected events. Note that the MSA Review is intended to occur before filings are made to the state insurance departments, therefore not impacting state insurance departments’ required timelines for review. However, use of the MSA Advisory Report by the state insurers may result in a reduction in the amount of time required for the state to complete its review.

- Share the draft Report with the insurer. If the recommendation in the Report differs from the insurer’s proposal, allow the insurer a two-week comment period to ask questions and provide additional information.
- Day 1 – Distribution of a draft MSA Advisory Report to all Participating States
E. Feedback to the MSA Team

At the direction of the LTCI (EX) Task Force, or appointed Subgroup, state insurance departments will be requested to periodically annually provide data and feedback on their state rate increase approval amounts and feedback on their state’s use of and reliance on the MSA Advisory Reports. Among other things, the annual review will collect and share information about:

1. The number of filings made with the MSA Review Team
2. The number of rate requests approved by the MSA Review Team
3. The number of states that approved MSA recommendations
4. The number of states that required additional information from the insurer before making an approval or disapproval decision
5. Feedback regarding how the Review process and methodology could be improved

State responses will be confidential pursuant to the Master Agreement and aggregated results of feedback surveys will not specifically identify state responses. This collective feedback will aid the Task Force in understanding the practical effects of the MSA Review process in achieving the goal of developing a more consistent state-based approach for reviewing LTCI rate proposals that result in actuarily appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. The feedback will also help refine the review process, improve future reports to better meet participants’ needs and make updates to this MSA Framework. Finally, the feedback will assist NAIC leadership in making decisions regarding the technology and staff resources needed for the continued success of the project. Aggregated survey results will be shared with Participating States and Insurers.

VII.A. APPENDIX A—MSA ADVISORY REPORT FORMAT FOR REGULATORS

The MSA Advisory Report that is distributed to Participating State insurance departments and the insurer will generally follow a template that includes the following information. Note that degree of rigor in the review and the details and content of the MSA Advisory Report will depend on the magnitude of rate increases.
increase and complexity of the rate proposal and the insurer’s financial condition. See also the sample MSA Advisory Report in Exhibit A.

1. Executive Summary
   a. Overall recommended rate increase, before consideration of different states’ history of approvals
   b. Explanation of whether or not the recommended rate approval is in line with the insurer’s proposal

2. Disclaimers
   a. Purpose and intent of how states should use the MSA Advisory Report
   b. Disclaimer that the MSA Review and findings shall not be considered an approval of the rate schedule increase filing, nor shall it be binding on the states or the insurer
   c. Statement that the in-force rate increase request filed with the respective states shall be subject to the approval of each state, and each state’s applicable state laws and regulations shall apply to the entire rate schedule increase filing
   d. Statement that states are encouraged to work directly with insurers to address lifetime rate equity

3. Background on the MSA Rate Review process

4. Explanation of the Insurer’s Request

5. Summary of the MSA Team’s rate review analysis, including these aspects:
   a. Actuarial review
   b. Summary of consideration of differences in the history of state’s rate increase approvals
   c. Non-actuarial considerations and findings
   d. Financial solvency-related aspects and adjustments
   e. Review for reasonableness and clarity of reduced-benefit options
   f. Summary information about the mix of business

6. Appendices
   a. Summary of the drivers of the rate increase request
   b. Details regarding the Minnesota and Texas approaches as applied to the rate proposal
   c. Summary of rate proposal correspondence
   d. Tables of recommended rate increases by state, after consideration of different state’s history of approvals
   e. Frequently Asked Questions (FAQ)

VI. B. APPENDIX B — INFORMATION CHECKLIST

At the request of the former Long-Term Care Insurance (B/E) Task Force, the LTC Pricing (B) Subgroup developed a single checklist that reflects significant aspects of LTCI rate increase review inquiries from all
of states. In this context, “checklist” means the list or template of inquiries, that states typically send at the beginning of reviews of state-specific rate increase filings.

This document contains aspects of the NAIC Guidance Manual for Rating Aspect of the Long–Term Care Insurance Model Regulation and checklists developed by several other states. This consolidated checklist is not intended to prevent a state from asking for additional information. The intent is to take a step toward moving away from 50 states having 50 different checklists to have a more efficient process nationally to provide the most important information needed to determine an approvable rate increase. To keep the template at a manageable length, it is anticipated that this template will result in states attaining 90 to 100 percent of the information necessary to decide on approvable rate increases. State and block specifics will generate the other zero to ten percent of requests. As states apply this checklist, it or an improved version may be considered for future addition to the Guidance Manual for Rating Aspect of the Long–Term Care Insurance Model Regulation.

A. Information Required for an MSA Review of a Rate Proposal

The following provides a checklist of information necessary for a complete rate proposal to the MSA Review. This checklist is consistent with the “Consolidated, Most Commonly Asked Questions – States’ LTC Rate Increase Reviews” as adopted by the Health Actuarial (B) Task Force on March 23, 2018.

1. Identify all states for which the product associated with the rate increase request is or has been issued.

2. New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
   a. Provide rate increase percentages by policy form number and clear mapping of these numbers to any alternative terminology describing policies stated in the actuarial memorandum and other supporting documents.
   b. Provide the cumulative rate change since inception, after the requested rate increase, for each of the rating scenarios.

3. Rate increase history that reflects the filed increase.
   a. Provide the month, year, and percentage amount of all previous rate revisions.
   b. Provide the SERFF MSA numbers associated with all previous rate revisions.

4. Actuarial Memorandum justifying the new rate schedule, which includes:
   a. Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
      i. The projection should be by year.
      ii. Provide the count of covered lives and count of claims incurred by year.

---

6 https://content.naic.org/sites/default/files/inline-files/cmte_b_ltc_price_sg_180323_ltc_increase_reviews%20%289%29.docx
iii. Provide separate experience summaries and projections for significant subsets of policies with substantially different benefit and premium features. Separate projections of costs for significant blocks of paid-up and premium-paying policies should be provided.

iv. Provide a comparison of state versus national mix of business. In addition, a state may request separate state and national data and projections. The insurer should accompany any state-specific information with commentary on credibility, materiality, and impact on requested rate increase.

5. Reasons for the rate increase, including which pricing assumptions were not realized and why.
   a. Attribution analysis - present the portion of the rate increase allocated to and impact on the lifetime loss ratio from each change in assumption.
   b. Related to the issue of past losses, explain how the requested rate increase covers a policyholder’s own past premium deficiencies and/or subsidizes other policyholders’ past claims.
   c. Provide the original loss ratio target to allow for comparison of initially assumed premiums and claims and actual and projected premiums and claims.
   d. Provide commentary and analysis on how credibility of experience contributed to the development of the rate increase request.

6. Statement that policy design, underwriting, and claims handling practices were considered.
   a. Show how benefit features, e.g., inflation and length of benefit period, and premium features, e.g., limited pay and lifetime pay, impact requested increases.
   b. Specify whether waived premiums are included in earned premiums and incurred claims, including in the loss ratio target calculation; provide the waived premium amounts and impact on requested increase.
   c. Describe current practices with dates and quantification of the effect of any underwriting changes. Describe how adjustments to experience from policies with less restrictive underwriting are applied to claims expectations associated with policies with more restrictive underwriting.

7. A demonstration that actual and projected costs exceed anticipated costs and the margin.

8. The method and assumptions used in determining projected values should be reviewed considering reported experience and compared to the original pricing assumptions and current assumptions.
   a. Provide applicable actual-to-expected ratios regarding key assumptions.
   b. Provide justification for any change in assumptions.
9. Combined morbidity experience from different forms with similar benefits, whether from inside or outside the insurer, where appropriate to result in more credible historical claims as the basis for future claim costs.
   a. Explain the relevance of any data sources and resulting adjustments made relevant to the current rate proposal, particularly regarding the morbidity assumption.
   b. A comparison of the population or industry study to the in-force related to the rate proposal should be performed, if applicable.
   c. Explain how claims cost expectations at older ages and later durations are developed if data is not fully credible at those ages and durations.
   d. Provide the year of the most recent morbidity experience study.

   a. Comparison with asset adequacy testing reserve assumptions.
      i. Explain the consistency regarding actuarial assumptions between the rate proposal and the most recent asset adequacy (reserve) testing.
      ii. Additional reserves that the insurer is holding above NAIC Model Regulation 10 formula reserves should be provided, (such as premium deficiency reserves and Actuarial Guideline 51 reserves).
   c. Provide actuarial assumptions from original pricing and most recent rate increase proposal and have the original actuarial memorandum available upon request.

11. Provide the following calendar year projections, including totals, for current premium paying nationwide policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate*:
   a. Present value of future benefits (PVFB) under current assumptions
   b. PVFB under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
   c. Present value of future premiums (PVFP) under current assumptions.
   d. PVFP under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).

*To emphasize, these projections should include only active nationwide policyholders currently paying premium, and should not include any policyholders not paying premium, regardless of the reason. Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption or benefit reduction assumption.

b. Also, please identify the maximum valuation interest rate and ensure that it is the same for all four projections.
12. **NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation** checklist items: summaries (including past rate adjustments); average premium; distribution of business, including rate increases by state; underwriting; policy design and margins; actuarial assumptions; experience data; loss ratios; rationale for increase; reserve description.

13. Assert that analysis complies with actuarial standards of practice, including 18 & 41.

14. Numerical exhibits should be provided in Excel spreadsheets with active formulas maintained, where possible.

15. Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

16. Policyholder notification letter – should be clear and accurate.
   a. Provide a description of options for policyholders in lieu of or to reduce the increase.
   b. If inflation protection is removed or reduced, is accumulated inflation protection vested?
   c. Explain the comparison of value between the rate increase and policyholder options.
   d. Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
   e. How are partnership policies addressed?

17. Actuarial certification and rate stabilization information, as described in the Guidance Manual, and contingent benefit upon lapse information, including reserve treatment.

**B. Supplemental Information**

As part of the LTCI (EX) Task Force’s pilot project in 2020-2021, the following supplemental information was identified by the MSA Team as beneficial and therefore, may be requested to assist in the MSA Review.

1. Benefit utilization:
   a. Provide current, prior rate increase, and original assumptions, including first-projection year through ultimate utilization percentages for 5% compound inflation, lesser inflation, and zero inflation cells.
   b. Explain how benefit utilization assumptions vary by maximum daily benefit.
   c. Provide the cost of care inflation assumption implied in the benefit utilization assumption.

2. Attribution of rate increase
a. Provide the attribution of rate increase by factor: morbidity, mortality, lapse, investment, other.

b. For the morbidity factor, break down the attribution by incidence, claim length, benefit utilization, and other.

c. Provide information on the assumptions that are especially sensitive to small changes in assumptions.

3. Reduced benefit options (RBOs)
   a. Provide the history of RBOs offered and accepted for the block.
   b. Provide a reasonability analysis of the value of each significant type of offered RBO.

4. Investment returns:
   a. Provide original and updated / average investment return assumptions underlying the pricing.
   b. Explain how the updated assumption reflects experience.

5. Expected loss ratio:
   a. With respect to the initial rate filing and each subsequent rate increase filing, provide the target loss ratio.
   b. Provide separate ratios for lifetime premium periods and non-lifetime premium periods and for inflation-protected and non-inflation-protected blocks.

6. Shock lapse history: Provide shock lapse data related to prior rate increases on this block.

7. Waiver of premium handling:
   a. Explain how policies with premiums waived are handled in the exhibits of premiums and incurred claims.
   b. Explain how counting is appropriate (as opposed to double counting or undercounting).

8. Actual-to-expected differences: Explain how differences between actual and expected counts or percentages (in the provided exhibits) are reflected or not reflected in assumptions.

9. Assumption consistency with the most recent asset adequacy testing: Explain the consistency or any significant differences between assumptions underlying the rate increase request and those included in Actuarial Guideline 51 testing.
VII. EXHIBIT – SAMPLE MSA ADVISORY REPORT

FROM: Long-Term Care Insurance (LTCI) Multistate Actuarial Rate Review Team
DATE: [Date]
RE: ABC Insurance Company – Block LTC1 – Draft of Initial MSA Advisory Report

Executive Summary
The LTCI Multistate Actuarial Rate Review Team (MSA Team) recommends a rate increase of 35% to be approved for inflation-protected products and 20% to be approved for products with no inflation, related to ABC Company’s block.

Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved. Reduced benefit options may be selected to help manage the impact of the rate increase.

Analysis by the MSA Team resulted in the recommended rate increase being consistent with that resulting from the actuarially justified Texas and Minnesota approaches. The recommended rate increases are below the increases that would have resulted from the lifetime loss ratio approach and the rate stability rules.

Background
The MSA Team was formed to assist the Task Force in developing a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.

The members are: [List names and state of members]. Starting in the first half of 2020, the MSA Team accepted rate increase filings as part of a pilot program. The MSA Review process became operational on [insert date].

This MSA Advisory Report is related to the rate increase request filed by ABC Company for its LTC 1 block sold between 2003 and 2006. The MSA Team’s actuarial analysis is provided below. The intention is that states can utilize this analysis and feel comfortable accepting the MSA Advisory Report recommendation when taking action on the upcoming ABC filings that will be made to the states.

7 Information contained in this sample report is an example only and is not derived from any actual rate filing.
As this is a state-approved product, each state will ultimately be responsible for approving, partially approving, or disapproving the rate increase. A goal of the Task Force is for as much consistency as possible to occur between states in the rate increase approvals.

Insurer’s Request
ABC Company requests a rate increase of 60% to be approved for inflation-protected products and 40% to be approved for products with no inflation.

In addition, ABC is requesting higher rate increases for states that did not grant full approval of prior rate increase requests, consistent with the MSA Team’s goal of attaining the same resulting rate tables in each state for a given product.

Workstream-related Review Aspects

Actuarial Review

At the direction of the LTCI Multistate Rate Review (EX) Subgroup, the MSA Team applied the Minnesota and Texas approaches to calculate the recommended, approvable rate increases. Aspects of the Minnesota approach that result in lower rate increases than those resulting from loss ratio-based approaches contained in many states’ laws and rules include:

- Reduction in rate increases at later policy durations to address shrinking block issues;
- Elimination of rate increases related to inappropriate recovery of past losses;

Minnesota also has additional unique aspects: consideration of adverse investment expectations related to decline in market interest rates, adjustments to projected claim costs to ensure impact of uncertainty is adequately borne by the insurer, and a cost-sharing formula applied in typical circumstances.

Even though these additional aspects are outside the pure loss-ratio requirements, they fall in line with legal provisions that rates shall be fair, reasonable, and not misleading.

The Minnesota approach, including application of the typical-circumstance cost-sharing formula, results in an approvable rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.

The Texas approach results in an approvable rate increase of 29% in aggregate.
The MSA Team’s recommendation, in consideration of the Minnesota and Texas approaches, is to approve a rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.

Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved.

The MSA Team reviewed support for the assumptions, experience, and projections provided by the insurer and performed validation steps to review the insurer-provided information for reasonableness. Details regarding the actuarial review are provided in Appendix 1. Also, the initial submission and subsequent correspondence between the insurer and MSA Team are available on SERFF. The SERFF tracking number is ABCC-123456789.

Consideration of Differences in Histories of States’ Rate Increase Approvals

According to the Historical Rate Level Summary, Appendix D in the insurer filing, past rate increase approvals by state have varied and can be categorized as follows:

- 25 states have granted full or near-full approval of ABC’s past requests (at or near 55%, cumulative).
- 18 states have granted cumulative approvals averaging 45%.
- 5 states have granted cumulative approvals averaging 27%.
- 2 states have granted cumulative approvals averaging 15%.

The insurer’s stated goal is to bring rates in all states up to an equivalent rate level. Currently, the average annual premium rates for a policyholder range from below $1,700 in some states (with the lowest past approvals) to over $2,200 in other states (with the highest past approvals).

The MSA Team’s recommendation is based on a goal of rates per benefit unit being uniform between states going forward.

A table of examples of recommended rate increases, based on past cumulative approval history is provided in Appendix 2.

Non-actuarial & Valuation/Solvency Considerations

Non-actuarial considerations, including, flexibility regarding phase-in of rate increases, waiting periods between rate increases should be coordinated with phase-in periods, and other issues are being discussed at the LTCI (EX) Task Force and LTCI Multistate Rate Review (EX) Subgroup.
Even with future claims potentially being reduced due to COVID-19-related behavioral impact, ABC will continue to experience substantial losses on this block.

Regarding coordination of rate and reserving reviews, the insurer states that assumptions underlying the rate increase request are consistent with assumptions underlying the reserve adequacy testing.

**Reduced Benefit Options – Review for Reasonableness**

Unless a rider was purchased, ABC policyholders facing a rate increase will be offered the following applicable options in lieu of a rate increase:

1. extending the elimination period;
2. decrease the benefit period;
3. Reduce future inflation accumulation.

The insurer produced rate tables which demonstrate the RBOs provide reasonable value in relation to a case of a policyholder retaining full benefits and paying the full rate increase.

**Financial Impact for Insurer**

The requested rate increase associated with recent adverse development would result in around $50 million of reduced losses for this block, according to information contained in the actuarial memorandum.

**Mix of Business**

From the insurer’s actuarial memorandum:

- Total enrollees as of date of filing: 15,000
- Inflation protection: 9,000 (inflation protection), 6,000 (no inflation)
- Benefit period: 8,500 (lifetime benefits), 6,500 (limited benefits)

- Product type: Expense reimbursement
- Average issue age: 58
- Average attained age: 75
- Annualized premium: $30 million; $2,000 average per policyholder

**Appendix 1**

Drivers of Rate Increase Request - Summary
The primary drivers, summarized in the insurer actuarial memorandum, were lower lapses and longer average claim length. The insurer assumptions were based on actual-to-expected adjustments, based in part by insurer experience that has become more credible in recent years. The assumptions were determined to be reasonable and in line with industry and actuarial averages.

Details Regarding Minnesota Approach

For an average (in terms of benefit period and issue age) 5% compound inflation-protected cell:

- Makeup cumulative rate increase: 177% (the increase from original rates needed going forward to get the block to the financial position contemplated at original pricing)
  - This increase is equal to the increase that would result from a pure loss ratio approach.
- If-knew cumulative rate increase: 36% (the increase from original rates needed if the insurer could go back to the past and reprice the product given information it knows now)
- Proportion of original policyholders remaining in force, based on insurer original and updated assumptions: 62%
- Blended if-knew / makeup rate cumulative rate increase since issue: 123%
  - $0.62 \times 177\% + (1 - 0.62) \times 36\%$, adjusted for rounding
- Insurer cost share based on Minnesota formula (see Appendix 3): 12%
- Recommended cumulative rate increase since issue: 109%
  - $(1 - 0.12) \times 1.23$, adjusted for rounding
- Past cumulative rate increases: 55%
- Actuarial recommended rate increase from current rates: 35%
  - $(1 + 1.09) / (1 + 0.55) - 1$, adjusted for rounding
- Final actuarial recommended rate increase from current rates (for the inflation-protected cell): 35%
  - Minimum of: calculated approval rate of 35% and insurer request of 60%
- Using the same methodology, the final actuarial recommended rate increase from current rates (for the non-inflation-protected cell): 20%

Note that the Minnesota approach includes reflection of declining interest rates which tends to lead to adverse investment returns compared to expectations in original pricing. Where applicable, insurer morbidity assumptions are adjusted downward due to lack of credible support at extremely high ages.

Commented [CB1]: See ACLI/AHIP comment letter
and general lack of complete support for aspects of morbidity assumptions, including uncertainty regarding future benefit utilization.

Details regarding Texas approach

- Insurer Calculation (aggregate): 52%

PPV calculations

- Texas Life & Health Actuarial Office (LHAO) PPV Calculation (aggregate): 29%

LHAO Comments

- For purposes of the MSA report, and as a component of the calculation of the approvable rate increase, Texas recommends an actuarially justified PPV calculated amount of 29%.

Texas rate stabilized PPV Formula:

\[
\text{rate increase } \% = \frac{\Delta PV(\text{future incurred claims}) - \left( \frac{(5S + 5.5C)}{1 + C} \right) \Delta PV(\text{future earned premiums})}{\Delta PV(\text{future earned premiums})}
\]

Reconciliation of Minnesota and Texas approaches

The Texas PPV calculated amount of 29% aligns well with the Minnesota approach’s recommended rate increase of 35% for inflation-protected policies and 20% for non-inflation-protected policies when the distribution of inflation-protected vs non-inflation-protected cells is applied. The MSA Team’s recommended rate increase is 35% for inflation-protected policies and 20% for non-inflation-protected policies.

Recommended rate increases by state, in consideration of various histories of rate increase approvals, are listed in Appendix 2.

Filing Correspondence Summary

- Template information request for multi-state rate increase filings, based on the list adopted by the NAIC Health Actuarial Task Force on March 23, 2018.
- New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
- Rate increase history that reflects the filed increase.
- Actuarial Memorandum justifying the new rate schedule, which includes:
• Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the
maximum valuation interest rate.
• Reasons for the rate increase, including which pricing assumptions were not realized & why.
• Statement that policy design, underwriting, and claims handling practices were considered.
• A demonstration that actual and projected costs exceed anticipated costs and the margin.
• The method and assumptions used in determining projected values should be reviewed in
light of reported experience and compared to the original pricing assumptions and current
assumptions.
• Combined morbidity experience from different forms with similar benefits, whether from
inside or outside the insurer, where appropriate to result in more credible historical claims
as the basis for future claim costs.
• Information (from NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance
★ Comparison with asset adequacy testing reserve assumptions
★ Provide actuarial assumptions from original pricing and most recent rate increase
filing, and have the original actuarial memorandum available upon request.
• Guidance Manual Checklist items: summaries (including past rate adjustments); average
premium; distribution of business, including rate increases by state; underwriting; policy
design and margins; actuarial assumptions; experience data; loss ratios; rationale for
increase; reserve description
• Assert that analysis complies with Actuarial Standards of Practice, including No. 18 & No. 41.
• Numerical exhibits should be provided in Excel spreadsheets with active formulas
maintained, where possible.

• Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

• Policyholder notification letter – should be clear and accurate.
★ Provide a description of options for policyholders in lieu of or to reduce the increase.
★ If inflation protection is removed or reduced, is accumulated inflation protection vested?
★ Explain the comparison of value between the rate increase and policyholder options.
★ Are future rate increases expected if the rate increase is approved in full? If so, how is this
communicated to policyholders?
★ How are partnership policies addressed?

• Supplementary information, based on a list developed by the MSA Team following review of initial
pilot program filings:
★ Information on benefit utilization
★ Attribution of rate increase by factor
Following initial review of the filing, additional information was requested by the MSA Team related to:

- Original pricing assumptions.
- Lapse assumption by duration.
- Premiums & incurred claims by calendar year based on original assumptions.
- Distribution of inforce by inflation protection.
- Loss ratios by lifetime/non-lifetime benefit period and with/without inflation protection.
- Description of waiver of premium handling in premium & claim projections.
- Commentary on COVID-19 short-term and long-term LTC impact

Appendix 2

Examples of Rate Increases if a Reduced Benefit Option is not Selected

<table>
<thead>
<tr>

</tbody>
</table>

*The recommendation for each state is based on the actual past cumulative approved increases in that state.

Commented [CB2]: Change to “state with full past approvals”
Re “state with average past approvals”—is this the average or is this the maximum rate approved by a state?
Potential Cost-Sharing Formula for Typical Circumstance

Cumulative rate increase since issue date is haircut by:

- No haircut for the first 15%
- 10% for the portion of cumulative rate increase between 15% and 50%
- 25% for the portion of cumulative rate increase between 50% and 100%
- 35% for the portion of cumulative rate increase between 100% and 150%
- 50% for the portion of cumulative rate increase in excess of 150%

Example: if the Texas approach or pre-cost sharing Minnesota approach results in a cumulative 210% rate increase since issue:

- Break 210% into the following components: 15%, 35%, 50%, 50%, 60%
- Post haircut approval is 100% of 15% + 90% of 35% + 75% of 50% + 50% of 50% + 50% of 60%
- = 15% + 32% + 38% + 33% + 30%
- = 147%

Legal justification for the cost-sharing formula is that the insurer should have had more information about the possibility of triple-digit rate increases than the consumer had.

Adjustments to the formula may be desired when an insurer’s solvency position is dependent on a certain level of rate increase approval. That is not the case with this insurer or filing.

Commented [CB3]: See ACLI/AHIP comment letter

Commented [CB4]: Is there a legal ruling regarding this justification?
October 28, 2021

Commissioner Michael Conway
Chairman, NAIC LTCI Multi-State Rate Review (EX) Subgroup

Dear Commissioner Conway and Subgroup Members,

The American Council of Life Insurers (ACLI)\(^1\) and the American Association of Health Insurance Plans (AHIP)\(^2\) appreciate the opportunity to comment on the second draft of the Actuarial Section of the Long-Term Care Insurance (LTC) Multi-State Rate Review Framework, exposed by the NAIC LTC (EX) Task Force on September 15, 2021. Our members recognize the hard work that has gone into developing the Framework and hope that our input can further the progress already made.

PRIMARY COMMENT

The purpose of the Framework is to develop a consistent national approach for reviewing current LTC rates that results in actuarially appropriate increases being granted by the states in a timely manner that eliminates cross-state rate inequities. We provide our comments in full support of this charge from the NAIC to the LTCI Multi-State Rate Review (EX) Subgroup.

As we mentioned in our July 26, 2021 comment letter, insurers best protect their policyholders when they can fulfill the obligations they made to these policyholders. This is accomplished when insurers have some level of predictability in their ability to effectively manage their LTC business over time. At its core, this level of predictability can only be achieved through transparency and consistency within the MSA Review Process, specifically with respect to the methodology used to calculate the increase recommended by the MSA Team.

While some fundamental questions outlined in our prior comment letter remain, we recognize that for a new process of this magnitude, many questions will need to be addressed over time as both regulatory and industry experience evolves. Our hope is that regulators will continue to have an open dialogue with industry to address outstanding issues.

As mentioned in Section V. A of the Framework document, the "**MSA Team will apply a balanced approach and professional judgement for each rate proposal based on the characteristics of the block reviewed to determine the method most appropriate.**"

Our primary request at this time is that the Framework document include a commitment that after review of a certain number of filings, the MSA Team will provide insight into the general rationale or criteria utilized when determining which method applied to each filing. We understand that this is a dynamic review and that flexibility is key. We acknowledge that different characteristics of the block might influence the method used in the future. For example, general category trends, such as those in the chart below, would be helpful to
industry in managing their blocks of business going forward as well as in understanding how business being sold today will be regulated.

We suggest that the following language be added to Section V. A - MSA Team’s Actuarial Review Considerations

After review of “X” filings, the MSA Team will provide the method generally applied to the filings based on the following general characteristics:

<table>
<thead>
<tr>
<th>Primary Characteristic of the Block</th>
<th>Method Used (Texas, Minnesota, Loss Ratio)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Small Remaining Block (i.e. percentage of policyholders remaining is less than X percent)</td>
<td></td>
</tr>
<tr>
<td>Older Legacy Block or Newer Block (i.e. blocks with policies first issued before or after MM/DD/YYYY)</td>
<td></td>
</tr>
<tr>
<td>Cumulative Past Rate Increase Percentage Greater Than “X” Percent</td>
<td></td>
</tr>
</tbody>
</table>

The above characteristic are examples and may differ from those the MSA Team identified as the primary characteristics of the blocks actually.

ADDITIONAL COMMENT

We appreciate the subgroup’s change to heading of Section V. C. 5. with respect to the term “bait and switch” under the Minnesota method. We believe the name itself draws a legal conclusion and believe that all references to this type of adjustment should be categorized as an “original assumption adjustment”. The term “bait and switch” remains in Sections V.C.5.a.iii and VI.A.3.a.i.3.c. We believe this is an oversight and respectfully request that the term “bait and switch” be removed from these sections.
CONCLUSION
ACLI/AHIP remains committed to working with the Subgroup to address the challenges in developing an MSA Review Framework. We look forward to addressing questions on our comments at our next LTCI Multi-State Rate Review (EX) Subgroup meeting.
Sincerely,

Jan M. Graeber  Ray Nelson
ACLI Senior Actuary  AHIP Consulting Actuary

---

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
LONG-TERM CARE INSURANCE
MULTI-STATE
RATE REVIEW FRAMEWORK

Drafted by the
Ad Hoc Drafting Group\(^1\) of the
NAIC Long-Term Care Insurance (EX) Task Force

\(^1\) The Ad Hoc Drafting Group consists of representatives from state insurance departments in Connecticut, Minnesota, Nebraska, Texas, Virginia, and Washington.

I. INTRODUCTION

A. Purpose

The National Association of Insurance Commissioners (“NAIC”) charged the Long-Term Care Insurance (EX) Task Force (“LTCI (EX) Task Force”), with developing a consistent national approach for reviewing current long-term care insurance (“LTCI”) rates that result in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.

Considering that charge and the threat posed by the current LTCI environment both to consumers and the state-based system (SBS) of insurance regulation, the LTCI (EX) Task Force developed this framework for a multi-state actuarial (“MSA”) LTCI rate review process (“MSA Review”).

This framework is based upon the extensive efforts of the Long-Term Care Insurance Multi-State Rate Review (EX) Subgroup, including its experience with a pilot program conducted by the pilot program’s rate review team (“Pilot Team”). As part of that pilot program, the Pilot Team reviewed seven LTCI premium rate increase proposals and issued MSA Advisory Reports recommending actuarially justified state-by-state rate increases. This framework aims to institutionalize a refined version of the Pilot Team’s approach to create a voluntary and efficient MSA Review that produces reliable and nationally consistent rate recommendations that state insurance regulators and insurers can depend upon. The MSA Review has been designed to leverage the limited LTCI actuarial expertise among state insurance departments by combining that expertise into a single review process analyzing in force LTCI premium rate increase proposals or “rate increases” (2) and producing an MSA Advisory Report for the benefit and use of all state insurance departments. Note that rate decrease proposals can be contemplated within the MSA Review. The same concepts of this MSA Framework would be applied, if such a rate decrease proposal request is received for MSA Review. The goal of this framework is to create a process that will not only encourage insurers to submit their LTCI products for multi-state review, but also provide insurance departments the requisite confidence in the MSA Review so that they will voluntarily rely upon the processes the Multistate Actuarial LTCI Rate Review Team’s (MSA Team’s) recommendations when conducting their own state level reviews of in force LTCI rate increase filings. Ultimately, the MSA Review is designed to foster as much consistency as possible between states in their respective approaches to rate increases.

The purpose of this document is to function as a user’s manual framework for the MSA Review that communicates to NAIC members, state insurance department staff, and external stakeholders how the MSA Review works to the benefit of state insurance departments and how insurers might engage in the MSA Review. This user’s manual framework is intended to communicate the governance, policies, procedures, and actuarial methodologies supporting the MSA Review. State insurance regulators can utilize the information and guidance contained herein to understand the basis of the multi-state actuarial LTCI rate review team’s (“MSA Team’s”) MSA Advisory Reports. Insurance companies can access the information and guidance contained herein to understand how to engage in the MSA Review, and how

---

2 “Premium rate increase proposal(s)” or “rate proposal(s)” in this document refers only to an insurer’s request for review of a proposed in force LTCI premium rate increase or decrease under the MSA Review process.

3 The term “rate increase filing” or “rate filing(s)” in this document refers only to the in force LTCI premium rate request(s) that is submitted to individual state departments of insurance (DOI) for a regulatory decision. Filings refer to both rate increase filings and rate decrease filings.
the MSA Advisory Report may affect the insurer’s in force LTCI premium rate increase filing decisions and interactions with individual state insurance regulators.

This document will be maintained by NAIC staff under the oversight of the LTCI (EX) Task Force and be revised as directed by the Task Force or an appointed subgroup. This document will be part of the NAIC library of official publications and copyrighted.

B. State Participation in the MSA Review

The MSA Review of an insurer’s rate proposal will be available to state insurance departments who are both an Impacted State and a Participating State. These are defined as follows.

- “Impacted State” is defined as the domestic state, or any state for which the product associated with the insurer’s in force LTCI premium rate increase proposal is or has been issued.
- “Participating State” is defined as any impacted state insurance department that agrees to participate in the MSA Review. Participation is voluntary as described in Section 1E.1 below. Participation may include activities such as, but not limited to, receiving notifications of rate increase proposals in System for Electronic Rate and Form Filing (SERFF), participation in communication/aweblinars with the MSA Team, and access to the MSA Advisory Report.

Note that state participation is expected to evolve in the future as the MSA Review process continues to be developed and refined.

C. General Description of the MSA Review

The MSA Review provides for a consistent actuarial review process that will result in an MSA Advisory Report, which state insurance departments may consider when deciding how to review and make decisions on an insurer’s rate increase filing or to supplement the state’s own review process.

The MSA Review is conducted by a team of state’s regulatory actuaries with expertise in LTCI rate review. Each review will be led by a designated member of the MSA Team. The review process is supported by NAIC staff and the Interstate Insurance Product Regulation Commission (Compact) staff, who will administratively assist insurers in making requests to utilize the MSA process and facilitate communication between the insurer, the MSA Team and [Participating/Impacted TBD] States. The NAIC’s electronic infrastructure, the System for Electronic Rates and Forms (SERFF) will be used to streamline the rate proposal and review process. Although the administrative services of the Compact staff and SERFF’s Compact filing platform are utilized in the MSA Review, MSA rate proposals are reviewed, and MSA Advisory Reports are prepared by the MSA Team. MSA rate proposals are not Compact filings, and Compact staff will not have any role in determining the substantive content of the MSA Advisory Reports.

The MSA Review process begins when an insurer expresses interest in an MSA Review being performed for an in force LTCI rate proposal to the MSA Team through SERFF or supporting NAIC or Compact staff. The eligibility of the rate proposal will be reviewed and determined by the MSA Team and with assistance, as needed, from supporting staff.

4 Certain processes for Impacted vs. Participating States are yet to be determined (TBD).
The MSA Review of eligible rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. The MSA Team will apply the Minnesota and Texas approaches to calculate recommended, approvable rate increases. While aspects of the Minnesota and Texas approaches may result in lower rate increases than those resulting from loss ratio-based approaches and are outside the pure loss/ratio requirements contained in many states' laws and rules, the approaches fall in line with legal provisions that rates shall be fair, reasonable, and not misleading. The MSA Team will review support for the assumptions, experience, and projections provided by the insurer and perform validation steps to review the insurer-provided information for reasonableness. The MSA Team will document how the proposal complies with the regulatory approach utilized by the MSA Team for Participating States. See Section V for more details on the actuarial review.

Throughout the MSA Review, the MSA team will provide updates to the insurer. The MSA team will deliver the final MSA advisory Report to the insurer and address any questions the insurer has about the results of the Review. Through the MSA Review, the MSA Team will communicate MSA information to the insurer, including the final MSA Advisory Report, and the MSA Team will address any questions from the insurer about the results of the review[Staff9][DG10].

Additionally, the review will consider reduced benefit options (RBOs) that are offered in lieu of the requested rate increases and factor in non-actuarial considerations.

At the completion of the review, the MSA Team will draft an MSA Advisory Report for Participating States that provides both summary and detail information about the rate proposal, the review methodologies, the analysis and other considerations of the team, and the recommendation for rate increases as outlined in Appendix A. The MSA Advisory Report will also indicate whether the recommendation differs from the insurer's proposal. Participating States can utilize either rely on the MSA Advisory Report or supplement their own state's rate review with it as described in the following Subsection[Staff11][DG12] I-D. Participating States may also utilize the information filed with the MSA Team in addition to the Advisory Report as appropriate.

The rate proposal, review process, actuarial methodologies, and other review considerations are detailed within this framework document and accompanying appendices.

D. Benefits of Participating in the MSA Review

Both state insurance regulators and insurers will benefit by participating in the MSA Review in multiple ways.

For state insurance regulators:
- First, they will be able to leverage the demonstrated expertise of the MSA Team in reviewing in force LTCI rate increases filing to in their state. It is recognized that multiple states may not have significant actuarial expertise with LTCI, so participation in the MSA Review will allow states to build on the specific, dedicated LTCI actuarial expertise of the MSA Team.
- Second, state insurance regulators will be able to utilize the MSA Team to promote consistency of actuarial reviews among filings submitted by all insurers to states, and among actuarial reviews across all states. Because the MSA Team is using the same dedicated approach to in force LTCI rate increase reviews, states who utilize the MSA Team will have the benefit
of using the same consistent methodology that is relied upon by other state insurance departments when reviewing in force LTCI rate increase filings in their state.

- Third, the MSA Review allows for more state regulatory actuaries to work with or under the supervision of qualified actuaries which affords them an opportunity to establish LTCI-specific qualifications in making actuarial opinions. This is particularly important when we consider that requirements to be a qualified actuary include years of experience under the supervision of another already qualified actuary in that subject matter.

- Finally, participating in the MSA Review will allow all state insurance regulators to share questions and information regarding a particular rate proposal or review methodologies; thus, increasing each state’s knowledge base in this area and promoting a more consistent national approach to in force LTCI rate review.

**Note that states’ use of and reliance on the MSA Advisory Report is expected to evolve increase in the future as the MSA Review continues to be developed and refined and the benefits of the MSA Review described above become more evident.**

Long-Term Care (LTC) insurers will likewise see multiple benefits in participating in the MSA Review:

- First, by utilizing the MSA Review and through the receipt of MSA information and the MSA Advisory Report from the MSA Team, insurers should see increased efficiency and reduced timelines for nationwide premium rate increases. As the MSA Team delivers the MSA Advisory Report for a rate proposal to Participating States, it has functionally reduced the review time for each state, meaning that LTC insurers should see more efficient and timely reviews from these states.

- Second, participating in the MSA Review will provide LTC insurers with one consistent recommendation to be used when making rate increase filings to all states, thus reducing the carrier’s workload in developing often widely differing filings for states’ review.

- Finally, the consistency of one uniform national system for reviewing rate increase proposals should lead to more accurate reviews, theoretically reducing some of the need for ongoing rate increase filings.

**E. Disclaimers and Limitations**

State Authority Over Rate Increase Approvals

The MSA Advisory Report is only a recommendation to Participating States based upon the methodologies adopted by the MSA Review. The recommendations are not specific to, and do not account for, the requirements of any specific state’s laws or regulations. The MSA Review is not intended, nor should it be considered, to supplant or otherwise replace any state’s regulatory authority, responsibility, and/or decision-making. Each state remains ultimately responsible for approving, partially approving, or disapproving any rate increase in accordance with applicable state law. To satisfy the Task Force charge to “develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization,” a Participating State’s use of the MSA Advisory Report’s recommendations with respect to one filing does not require that state to consider or adopt any MSA Advisory Report recommendations.
with respect to any other filing. The MSA Review in no way: ːeliminates the insurer’s obligation to file
for a rate increase in each Participating State; or, ːmodifies the substantive or procedural
requirements for making such a filing. While ːencouraged[Staff17][DG18] to adopt the recommendations of
the MSA Review in each of their state filings, insurers are not obligated to align their individual state rate
filings with the recommendations contained within the MSA Advisory Report.

The MSA Advisory Reports, including the recommendations contained therein, are only for use by
Participating States in considering and evaluating rate filings. The MSA Advisory Reports or their
conclusions shall not be utilized by any insurer in a rate filing submitted to a non-Participating State,
nor shall the MSA Advisory Reports be used outside of each state’s regulator’s own review process, or to challenge the results of any individual state’s determination of whether to grant, partially grant, or deny a rate increase.

Information Sharing Between State Insurance Departments

The MSA Review, including, but not limited to, meetings, calls, and correspondence with insurers on
insurer-specific matters are held in regulator-to-regulator sessions and are confidential. In addition, if
certain information and documents related to specific companies ːthat are confidential under the state
law of an MSA Team member or a Participating State need to be shared with other state insurance regulators, such sharing will occur as authorized by state law, and pursuant to the Master Information Sharing and Confidentiality Agreement (“Master Agreement”[Staff19][DG20:]) between states that govern the sharing of information among state insurance regulators. Through the Master Agreement, state insurance regulators affirm that any confidential information received from another state insurance regulator will be maintained as confidential and represent that they have the authority to protect such information from disclosure.

Confidentiality of the Rate Proposal

Members of the MSA Team and Participating States[Staff21][DG22] affirm and represent that they will provide
any in-force LTCI rate proposal, as discussed herein, with the same protection from disclosure, if any, as
provided is protected from disclosure by the confidentiality provisions contained within their state’s laws
and regulations.

Confidentiality of the MSA Reports

Likewise, members of the MSA Team and Participating States affirm and represent that they will provide
any MSA Advisory Report(s), and MSA information provided to insurers as discussed herein with the same
protection from disclosure, if any, as provided is protected from disclosure by the confidentiality
provisions contained within their state’s laws and regulations for rate filings.

F. Governing Body and Role of the NAIC Long-Term Care Insurance (EX) Task Force

The NAIC Long Term Care Insurance (EX) Task Force is expected to remain in place for the foreseeable
future to oversee the implementation of the MSA Review, and related MSA Advisory Reports, and to
provide a discussion forum for MSA-related activities. The Task Force or any successor will continuously
evaluate the effectiveness and efficiency of the MSA Review for the benefit of state insurance regulators and provide direction, as needed.

The LTCI (EX) Task Force may create one or more subgroups to carry out its oversight responsibilities.

Membership and leadership of the Task Force will be selected by the NAIC President and President-elect as part of the annual committee assignment meeting held in January. Selection of the membership and leadership may consider a variety of criteria, including commissioner participation, insurance department staff competencies, market size, domestic LTC insurers, and other criteria considered appropriate for an effective governance system.

II. Multi-State Actuarial LTCI Rate Review Team (MSA Team)

The MSA Team comprises state insurance department actuarial staff. MSA Team members are chosen by their skill set and LTCI actuarial experience. The Long-Term Care Insurance (EX) Task Force, or its appointed subgroup, will determine the appropriate experience and skill set for qualifying members for the MSA Team. It is expected that state participants will provide expertise and technical knowledge specifically regarding the array of LTCI products and solvency considerations. The desired MSA Team membership composition should include a minimum of five and up to seven members.

Membership must follow the requirements below and be approved by the Chair of the LTCI (EX) Task Force or the Chair of an appointed subgroup. The following outlines the qualifications, duties, participation expectations and resources required for MSA Team members.

A. Qualifications of an MSA Team Member

To be eligible to participate as a member of the MSA Team, a state insurance regulator is required to:

- Hold a senior actuarial position in a state insurance department in life insurance, health insurance, or long-term care insurance.
- Be recommended by the Insurance Commissioner of the state in which the actuary serves.
- Have over five years of relevant LTCI insurance experience.
- Hold an Associate of the Society of Actuaries (ASA) designation.
- Currently participates as a member of the Long-Term Care Insurance (EX) Multistate Rate Review (EX) Subgroup (or an equivalent Subgroup appointed by the Long-Term Care Insurance LTCI (EX) Task Force) and the LTC Pricing (B) Subgroup.
- At least one member of the MSA Team must be a member of the American Academy of Actuaries (Academy) (at least one member).

Additionally, the following qualifications are preferred:

- Hold a Fellow of the Society of Actuaries (FSA) designation
- Have spent at least one year engaged in discussions of either the LTCI (EX) Task Force or its appointed Subgroup
As both state insurance regulators and the MSA Review may benefit by developing and expanding specific LTCI actuarial expertise through participation in this process, having one or more suitably experienced and qualified actuaries participate in and supervise the work of the MSA Team is critical to the viability of the MSA process. Participation also provides opportunities for additional actuaries to meet the requirements of the U.S. Qualification Standards applicable to members of the Academy and other U.S. actuarial organizations as they relate to LTCI.

Consideration will be given to joint membership where two actuaries within a state combine to meet the criteria stated above.

Consultants engaged by the state insurance department would not be considered for MSA Team membership.

B. Duties of an MSA Team Member

- Active involvement with the MSA Team, with an expected average commitment of 20 hours per month (see Section IV for details of the MSA Review and activities of a team member).
- Participate in all MSA Team calls and meetings (unless an extraordinary situation occurs).
- Review and analyze materials related to MSA rate proposals.
- Provide input on the MSA Advisory Reports, including regarding the recommended rate increase approval amounts.
- Maintain confidentiality of MSA Team meetings, calls, correspondence, and the matters discussed therein to the extent permitted by state law and protect from disclosure any confidential information received pursuant to the Master Information Sharing and Confidentiality Agreement. MSA Team Members should communicate any request for public disclosure of MSA information or any obligation to disclose.
- Active involvement within NAIC LTCI actuarial groups.
- Willingness to provide expertise to assist other states.

C. Participation of an MSA Team Member

Except for webinars and other general communications with state insurance departments, participation in the MSA Review conference calls and meetings related to the review of a specific rate proposal will be limited to named MSA Team members, supporting NAIC or Compact staff members who will be assisting the MSA Team, and the Chair and Vice Chair of the Long-Term Care Insurance (EX) Task Force, or its appointed subgroup. Other interested state insurance regulators, e.g., domiciliary state insurance regulators, may be invited to participate on a call at the discretion of the MSA Team, or the Chair or Vice Chair of the Task Force or its appointed subgroup.

D. MSA Associate Program

The MSA Associate Program within the MSA Framework is intended to encourage and engage state insurance regulators to become actively involved in the MSA process. Additionally, a benefit of the program is to provide an educational opportunity for state insurance department regulatory actuaries.
that wish to gain expertise in LTCI. Regulatory actuaries can participate with varying levels of involvement or for different purposes as described. Regulatory actuaries may participate:

- As a mentee. The mentee would participate in aspects of the MSA Review. An MSA Team member will serve as a mentor to another state regulatory actuary and provide one-on-one guidance.
- To gain more knowledge and understanding of the Minnesota and Texas actuarial approaches.
- To share their own expertise through feedback to the MSA Team on MSA Advisory Reports to better enhance the overall MSA process.
- To participate on an ad hoc limited basis, i.e., where a regulatory actuary would like to participate but is unable to make the required time commitment.
- To meet the U.S. Qualification Standards applicable to members of the Academy and other U.S. actuarial organizations as they relate to LTCI by serving under the supervision of a qualified actuary on the MSA Team.
- To serve as a peer reviewer of the MSA Advisory Reports.

**D.E. Conflicts, Confidentiality, and Authority of the MSA Team**

**Authority of the MSA Team**

Members of the MSA Team serve on a purely voluntary basis, and any member’s participation shall not be viewed or construed to be any official act, determination, or finding on behalf of their respective jurisdictions.

**Disclosures and Confidentiality Obligations, as Applicable**

All members of the MSA Team acknowledge and understand that the MSA Review, including, but not limited to, meetings, calls, and correspondence are confidential and may not be shared, transmitted, or otherwise reproduced in any manner. Additionally, all members of the MSA Team affirm and represent that they will: (a) provide any in force LTCI rate proposal with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations; and, (b) provide any MSA Advisory Report with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations for rate filings, any resulting advisory report, as well as all meetings, calls, correspondence, and all other materials produced in connection herewith are confidential and may not be shared, transmitted, or otherwise reproduced in any manner.

**Conflict of Interest Avoidance Procedures and Certifications**

No member of the MSA Team may own, maintain, or otherwise direct any financial interest in any company or its affiliates subject to the regulation of any individual state, nor may any member serve or otherwise be affiliated with the management or board of directors in any company or its affiliates subject to the regulation of any individual state. All conflicts of interest, whether real or perceived, are prohibited and no member of the MSA Team shall engage in any behaviors that would result in or create the appearance of impropriety.
E.F. Required NAIC and Compact Resources

The MSA Team will require administrative and technical support from the NAIC. As the MSA Review develops, it is expected that NAIC support resources will play an integral role in managing the overall program. Administrative staff support will be needed to support MSA Team communications and manage record keeping for underlying workpapers and final MSA Advisory Reports associated with each rate proposal, etc. Additionally, it is possible that limited actuarial support will be needed for the analysis of rate proposals, including preparing data files, gathering information, performing limited actuarial analysis procedures, drafting MSA Advisory Reports, and monitoring interactions among the state insurance departments and the MSA Team. Dedicated staff support for the ongoing work of the Long-Term Care Insurance (EX) Task Force will be needed as well. As more experience with rate proposal volumes and average analysis time is gained, the full complement of human resources required will be better understood.

The MSA Team and supporting NAIC and Compact staff will use the NAIC SERFF electronic infrastructure to receive insurer rate increase proposals and correspond with insurers. As needed, the MSA Team or supporting NAIC and Compact staff may communicate with the insurer outside of SERFF. [S25][DG26]. The material substance of such communication can be documented within SERFF. [NAIC and Compact staff will communicate with insurers only at the direction of the MSA Team. Compact staff will perform administrative work related to MSA rate increase proposals] at the direction of the MSA Team and as described in this Framework.

III. REQUESTING AN MSA REVIEW

A. Scope and Eligibility of a Rate Proposals for MSA Review

The following are the preferred eligibility criteria for requesting an MSA Review of a rate proposal.

- Must be an in force long-term care insurance LTCI product (individual or group).
- Must be seeking a rate increase in at least 20 states and must affect at least 5,000 policyholders nationwide.
- Includes any stand-alone LTCI product approved by states, not by the Interstate Insurance Product Regulation Commission (Compact).
- For Compact-approved products meeting certain criteria, the Compact Office will provide the first-level advisory review subject to the input and quality review of the MSA.

It is recognized that rate proposals vary from insurer to insurer. The above criteria and the timelines provided below are general guidelines. The MSA Team has the authority to weigh the benefits of the MSA Review for state insurance departments and the insurer against available MSA Team resources when considering the eligibility of rate proposals and the timeline for completion. Based on these considerations, the MSA Team, at its discretion, may elect to perform an MSA Review on a rate proposal that does not satisfy the above eligibility criteria.

The MSA Team reserves the right to deny a proposal that does not meet eligibility criteria. An insurer will be notified if the proposal for an MSA Review is denied.
An insurer may ask questions for more information about a potential rate proposal through communication to supporting NAIC and Compact staff and the MSA Team. This will be accomplished through a Communication Form that will be available on the Compact webpage. Supporting NAIC and Compact staff will work with the insurer to complete the necessary steps to assess eligibility, discuss any technical or other issues, and answer questions.

The insurer will have access to primary and supplementary checklists in Appendix B that provide guidance to the insurer for information that should be included in a complete MSA rate proposal requested through the NAIC’s SERFF application.

B. Process for Requesting an MSA Review

As noted in Section I.C. above, the MSA Review will utilize the Compact’s multi-state review platform within the NAIC’s SERFF application and its format for in-force LTCI rate increases. Therefore, a state may participate in the MSA Review without being a member of the Compact. The following describes a few key elements of the process for insurers and state insurance department regulators:

- The insurer will work with NAIC and Compact support staff and the MSA Team to make a seamless rate increase proposal request.
- Instructions containing a checklist for information required to be included in the rate increase proposal, as reflected in Appendix B, will be available to insurers through the Compact’s webpage or within SERFF.
- The insurer shall include in the rate proposal a list of all states for which the product associated with the rate increase request proposal is or has been issued. Participating states will have access to view the insurer’s rate proposal and review correspondence in SERFF.
- Fee schedule for using the MSA Review [To Be Determined].
- Rate increase proposals for MSA Review within SERFF will be clearly identified as separate from Compact filings.
- The supporting NAIC and Compact staff through SERFF will notify the impacted states upon receipt of the rate increase proposal with the SERFF Tracking Number.
- The MSA Team may utilize a “queue” process for managing workload and resources for incoming rate increase proposals, requests through SERFF.
- The MSA Team may utilize Listserv or other communication means for inter-team communications.
- The MSA Team’s review of objections and insurer responses are completed through SERFF.

C. Certification

The insurer shall provide certifications signed by an officer of the insurer that it acknowledges and understands the non-binding effect of the MSA Review and MSA Advisory Report. The certification shall also provide, and the insurer shall agree, that it will not utilize or otherwise use the MSA Review and/or the resulting MSA Advisory Report to challenge, either through litigation or any applicable administrative procedure(s), any state’s decision to approve, partially approve, or disapprove a rate increase filing except when: [(Participating/Impacted State [TBD])]

—END—
State that affirmatively relied on the MSA Review and/or the MSA Advisory Report in making its determination; or 2) the individual state consents in writing to use of the MSA Review and/or the MSA Advisory Report.

Failure to abide by the terms of the insurer’s certification will result in the insurer and its affiliates being excluded from any future MSA Reviews, and it will permit the MSA Team to terminate, at its sole discretion, any other ongoing review(s) related to the insurer and its affiliates.

Should the MSA Team exclude any insurer and its affiliates for failure to adhere to its certification, the MSA Team, at its sole discretion, may permit the insurer and its affiliates to resume submitting rate proposals for review upon written request of the insurer.

**IV. REVIEW OF THE RATE PROPOSAL**

**A. Receipt of a Rate Proposal**

The MSA rate review process begins when an insurer expresses interest in an MSA Review being performed for a rate proposal. This interest can be expressed through completion of a Communication Form, which will be available through the Compact web page. The initial request will be reviewed by the MSA Team lead reviewer and/or supporting NAIC and Compact staff. Once an insurer has completed this initial communication and meets the criteria for requesting an MSA Review, the insurer will work with supporting NAIC and Compact staff and the MSA Team to complete the rate increase proposal in SERFF. The MSA Team will be notified, via SERFF, when the rate increase proposal is available for review.

The supporting NAIC and Compact staff will, via SERFF or e-mail, notify participating/impacted States [TBD] when rate increase proposals are submitted, correspondence between the MSA Team and insurer is sent or received in SERFF, the MSA Advisory Report is available, and other pertinent activities occur during the review.

**B. Completion of the MSA Review**

The MSA Team shall designate a lead reviewer to perform the initial review of each rate proposal. Once the rate increase proposal is made through SERFF, the MSA Review will resemble a state-specific review process.

The MSA Team will meet periodically to discuss the review and determine any needed correspondence with the insurer. Objections and communications with filers will be conducted through SERFF, similar to like any state-specific filing or Compact filing, to maintain a record of the key review items. Other supplemental communication between the insurer and the MSA Team or supporting NAIC and Compact staff, may occur, such as conference calls or emails, as appropriate.

The timeframe for completing the MSA Team’s review and drafting the MSA Advisory Report will be dependent upon the completeness of the rate proposal and the size and complexity of the block of policies for which the rate increase applies. The MSA Team may utilize a “queue” process for managing workload and resources for incoming rate increase proposals through SERFF. The timeliness of any
necessary communication between the MSA Team and the insurer to resolve questions or request/receive additional information about the rate proposal will impact the completion of the review.

As the MSA Team completes its review: 1) the insurer will receive initial communication of a completed review, and that a final MSA Advisory Report with recommendations will be drafted and communicated to state insurance departments within the next month, which may serve as a signal for a potential ideal time for the insurer to prepare to submit the state-specific filings to each state; and; 2) the insurer will receive MSA Review information for the insurer and the MSA Team will address questions from the insurer about the result of the review. 2) the insurer will receive sufficient information regarding the MSA Team’s recommendation to allow the insurer an opportunity to review the recommendation and in the event that the MSA Team recommendation differs from the proposal submitted by the insurer, the insurer will be given the opportunity to interact with the MSA Team in order to ask questions, and understand the MSA Team’s reasoning.

### C. Preparation and Distribution of the MSA Advisory Report

Upon completion of the actuarial review, the MSA Team will prepare a draft MSA Advisory Report for the rate proposal. The reports will be made available within SERFF “reviewer notes” for Participating States. Supporting NAIC and Compact staff will maintain a distribution list and send notifications of the availability of reports to Participating States. Consultants engaged by state insurance department staff to perform rate reviews would be given access to the MSA Advisory Report, subject to the terms of the agreement between the consultant and the Participating State insurance department.

Consultants who are bound by the actuarial Code of Professional Conduct, adopted by the Academy of Actuaries, the Society of Actuaries (SOA) and the Conference of Consulting Actuaries (CCA), should consider whether receipt of the MSA Advisory Report is acceptable under Precept 7 regarding Conflicts of Interest. For other professions, similar consideration should be made if bound by similar professionalism standards.

Prior to finalizing the MSA Advisory Report, the MSA Team will present the draft MSA Advisory Report to Participating States on a regulatory-only WebEx call, as deemed necessary, to provide an overview of the recommendations and respond to questions from Participating States.

The MSA Team will issue the final MSA Advisory Report to the Participating States and the insurer after consideration of any comments and questions from Participating States.

The MSA Advisory Report will include standardized content, as reflected in Appendix A, with modifications, as necessary, for any unique factors specific to the rate proposal. The content and format are based on feedback received from state insurance departments and the Long-Term Care Insurance (EX) Task Force during the pilot project.

The content and format of the MSA Advisory Report may be modified in the future under the direction of the LTCI (Ex)-Task Force, or an appointed Subgroup, as the MSA Team gains more experience in generating the reports and receives more feedback from Participating states and the insurer, through this process.
D. **Timeline for Review and Distribution of the MSA Advisory Report**

The draft MSA Advisory Report will be made available to Participating States for a two-week comment period prior to being finalized. The following timeline for this comment period and distribution of the final MSA Advisory Report will be adhered to as close as possible, barring timing delays due to, e.g., holidays or other unexpected events. Note that the MSA Review is intended to occur before filings are made to the state insurance departments, therefore not affecting state insurance departments’ required timelines for review. However, use of the MSA Advisory Report by the state review [Staff39][DG40] may result in a reduced amount of time required for the state to complete its review.

- **Pre-Distribution**: Share the draft MSA Advisory Report with the insurer. The insurer will be given the opportunity to interact with the MSA Team to ask questions and understand the MSA Team’s reasoning.
- **Day 1**: Distribution of a draft MSA Advisory Report to all Participating States.
- **Day 5-7**: Regulator-to-regulator WebEx conference call of all Participating States [DG44] during which the MSA Team will present the recommendations in the MSA Advisory Report and seek comments from states.
- **Day 21**: Deadline for comments on the Draft Initial MSA Advisory Report.
- **Day 35**: Distribution of the final MSA Advisory Report, with consideration of comments, to Participating States and the insurer.
- **Date to be determined TBD**: By the Insurer – Individual rate increase filings submitted to each state insurance department.
- **Date to be determined TBD**: By each state’s department of insurance [DOI] – approval or disapproval of the rate increase filing submitted to in each state.

E. **Feedback to the MSA Team**

At the [Staff47][DG48] direction of the Long-Term Care Insurance (EX) Task Force, or an appointed Subgroup, state insurance departments will be requested to periodically provide data and feedback on their state rate increase approval amounts and on their state’s use of and reliance on the MSA Advisory Reports. The following items may be considered in a feedback survey:

1. The number of filings for proposals made with the MSA Review Team;
2. The number of rate request proposals approved by the MSA Review Team;
3. Information regarding states approval of MSA recommendations;
4. Feedback on additional information states requested;
5. Feedback regarding how the review process and methodology could be improved.

State responses will be confidential pursuant to the Master Agreement, and aggregated results of feedback surveys will not specifically identify state responses. The MSA Team and state insurance regulators welcome feedback from insurers on their experience using the MSA Review Process. This collective feedback will aid the Task Force in understanding the practical effects of the MSA Review process in achieving the goal of developing a more consistent state-based approach for reviewing LTCI rate proposals that result in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. The feedback will also help refine the review process.
process, improve future reports to better meet participants’ needs, and make updates to this MSA Framework. Finally, the feedback will assist NAIC leadership in making decisions regarding the technology and staff resources needed for the continued success of the project. Aggregated feedback results will be shared with Participating States and Insurers as determined appropriate.

V. ACTUARIAL REVIEW

A. MSA Team’s Actuarial Review Considerations

In conducting its actuarial review of a rate proposal, the MSA Team will consider assumptions, projections, and other information provided by the insurer as outlined in Appendix B. The MSA actuarial review process will be evaluated and evolve over time as more rate proposals are reviewed.

The Minnesota and Texas approaches ensure remaining policyholders do not make up for losses associated with past policyholders. Professional judgment is used to address agreed upon policy issues, including the handling of incomplete or non-fully credible data. The Minnesota approach also considers adverse investment expectations related to the decline in market interest rates, and a cost-sharing formula is applied. The Texas approach ensures rate changes reflect prospective changes in expectations. More detail of each approach is provided in the following sections.

The MSA Team will consider the following in performing their review, applying their expertise and professional judgement to the review, and as well as reviewing the actuarial formulas and results:

- Review company insurer experience, company insurer narrative explanation, and relevant industry studies.
- Assess reasonability of assumptions for lapse, mortality, morbidity, and interest rates.
- Validate and adjust or request new projections of claim costs and premiums by year.
  - Validate that the patterns of claims and premium projections over time match reasonably align those reflected in the assumptions.
  - Adjust or request new projections of claims and premium to the extent that any underlying assumptions are deemed unreasonable or unsupported by the MSA Team. Any differences will initially result in correspondence between the MSA Team and the insurer via SERFF.
  - After verifying loss ratio compliance, apply both the Minnesota and Texas approaches for each rate proposal submitted.

which ensure remaining policyholders do not make up for losses associated with past policyholders.

In developing a recommendation, the MSA Team will apply a balanced approach and professional judgement for each rate proposal based on the characteristics of the block reviewed to determine the most appropriate method. The MSA Team’s recommendation will not be the lowest or the highest percentage method just because it is the lowest or the highest. Rather, the recommendation may be the result of either the Texas or Minnesota approach, a blend of the two approaches; or using professional judgement, the MSA Team may recommend a rate increase outside of these two approaches. Other methods may evolve over time that may be incorporated into the future process that generate similar or unique results. In developing a recommendation, the MSA Team will in applying regulatory actuarial
professional judgement, for instance [e.g., when considering the extent to which less-than-fully credible older-age morbidity should be projected to cause adverse experience], a balanced approach is applied as opposed to denying a rate increase, which could lead to a spike in the future, or approving the rate increase if there was full credibility, which could lead to rates that could be too high. As [Staff] [pos] the MSA Team reviews more rate proposals, it will consider and evaluate the characteristics of the rate proposals as it refines the blending of the two methods.

The MSA Team will consider how to reflect the differences in the histories of states’ rate approvals. Current approach includes:

- The MSA Team’s recommendation results in the same rate per unit in each state following the current rate increase round, leading to higher percentage rate increases in states that approved lower rate increases in the past.
- Analysis will continue on state cost differences impacting justifiable rate increases. As of May 2021, there does not appear to be substantial evidence that policyholders who purchased policies in lower-cost states [source] should receive lower percentage rate increases. Part of the reason is that there was a tendency for people in lower-cost areas to purchase less coverage. Their premium rates will continue to be lower than rates for policyholders with more coverage, even if percentage rate increases are the same.
- Any recommendation from the MSA Team for a catch-up increase aims to achieve only current rate equity between states and not lifetime rate equity between states.

Consideration of Solvency Concerns

If concerns exist regarding an insurer’s financial solvency and the impact of rate increases on future solvency, each state DOI, by their authority over rate approval, has the flexibility to consider solvency adjustments in these rare instances. In rare, non-typical circumstances, adjustments could be considered within the MSA Review, including consultation with states as part of the MSA Advisory Report comment period.

Follow-Up Proposals Filings on the Same Block

Any subsequent rate increase proposal to the MSA Team on a block of business previously reviewed by the MSA Team needs to involve the development of adverse experience and/or expectations. In the absence of adverse experience or expectation development, the MSA Team will consider a reasonable explanation from an insurer for an increase in credibility of morbidity data of being the reason for a rate increase. Prior rate increases would need to be implemented before the implementation of a subsequent rate increase. The MSA Team will not consider a new rate increase request proposal on a block that did not receive the full percentage rate increase requested without the experience, expectation, or credibility criteria noted above. If an insurer did not receive the full percentage rate increase and has no adverse changes in experience or expectations, the insurer should work directly with the applicable state DOI.

B. Loss Ratio Approach

Key aspects of the loss ratio approach to the actuarial review of rate changes include:
1. At policy issuance, pricing based on a lifetime loss-ratio target is typically established. A common target is 60%, which means the present value of claims is targeted to equal 60% of the present value of premiums. In some instances, products may be priced with a projected lifetime loss ratio in excess of 60%. The remainder goes towards sales-related costs, administrative expenses, expenses related to claims, and profit. Note that 60% is a required minimum loss ratio under the pre-rate stability rules; newer policies may be priced with lower expected loss ratios. Refer to state law or regulation modeled from the Long-Term Care Insurance Model Regulation (#641), Section 19 for more details on compliance with loss ratio standards.

2. As lapses and mortality have generally been lower than expected, more people have reached ages where claims tend to occur than originally expected. In some cases, this has resulted in a substantial increase in the present value of claims; thus, resulting in substantially higher expected lifetime loss ratios than originally targeted. For companies where morbidity expectations have increased over original assumptions, lifetime loss ratios would be even higher.

3. The loss ratio approach increases future premiums to a level referred to as make-up premium, such that the original loss ratio target is once again attained.

4. The loss ratio approach, one of the minimum standards in many states’ statutes, is evaluated by the MSA Team. However, there is general recognition that this approach produces rate increases that are too high and do not recognize other typical statutory standards such as fair and reasonable rates.
   a. The loss ratio approach also does not recognize actuarial considerations such as the shrinking block issue, where past losses being absorbed by a shrinking number of remaining policyholders would lead to unreasonably high-rate increases. This concern was the main driver of the Minnesota, Texas, and other approaches.
   b. The loss ratio approach shifts all the risk to the policyholders. If the company is allowed to always return to the 60% loss ratio, there may be a lower incentive for more reasonable appropriate initial pricing.

5. For rate-stabilized business, lifetime loss ratios are broken out, such as in a 58%/85% pattern, where the 58% reflects the portion of initial premiums and the 85% reflects the portion of the increased premium available to pay the claims. For relevant blocks, this standard is analyzed by the MSA Team. If this standard produced lower increases than the Minnesota and Texas approaches, it would produce the recommended rate increase.

C. **Minnesota Approach**

Key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Blended if-knew / makeup approach to address the shrinking block issue.
   a. The if-knew concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.
b. The makeup concept is for a premium to be charged going forward to return the block to its original lifetime loss ratio.

c. The blending method helps ensure concepts discussed in public NAIC Long-Term Care rate

(Professional) Subgroup calls from 2015 to 2019[4] are incorporated, including the concept that rates will not substantially rise as the block shrinks, (as policyholder persistency falls over time).

2. Cost-sharing formula that increases the company insurer’s burden as cumulative rate increases rise.

a. This addition to company insurer’s burden moves rates away from a direction that could potentially be seen as misleading. The company insurer likely had or should have had more information on the likelihood of large rate increases than the consumer had at the time the policy was issued.

3. Assumption review.

a. Verification that the company insurer’s original and current assumptions are indeed drivers of the magnitude increase in lifetime loss ratio presented by the company insurer.

b. Verification of appropriateness of current assumptions.

i. A combination of credible company insurer experience, relevant industry experience, and regulatory professional judgement is applied.

ii. For areas of uncertainty, such as older-age morbidity, conservatism may be added to the company insurer-provided assumptions. This conservatism can be released as credible experience develops.

4. Interest rate / investment return component.

a. The Minnesota approach considers changes in expectations regarding interest rates and related investment returns in a manner consistent with how other key assumptions are considered. Reasons include:

i. Changes in market interest rates are among the key factors driving profits and losses associated with blocks of LTC business.

ii. In the Minnesota approach, all factors impacting the business are considered.

1. If interest rates rise, this would tend to lead to lower rate increase approvals. Note, in this scenario, if interest rate changes were not considered, it is possible an company insurer would get approval for rate increases even when profits on the block were higher than expected.

2. If interest rates fall, this would tend to lead to higher rate increase approvals.

iii. To prevent shifting of “good assets” and “bad assets” to supporting LTC rates, and to prevent an company insurer from increasing rates based on risky investments that turned into losses, an index of average corporate bond yields (e.g., Moody’s) is relied on to reflect experience and current expectations.

iv. Original pricing typically includes an assumption on investment returns, (for which premiums and other positive cash flows are assumed to accumulate). This forms the interest component of the original assumption.

v. The original pricing investment return in Section VC(4)iv is compared to the average corporate bond yields in Section VC(4)iii to determine the adversity associated with the interest rate factor.

5. Anti-bait and switch adjustment

   Original Assumption Adjustment

   a. If original mortality, lapse, or investment return assumptions were out of line with industry-average assumptions at the time of original pricing, the original premium is replaced by a “benchmark premium.”
      i. This results in a lower rate increase.
      ii. This adjustment wears off over 20 years from policy issue.
         1. The rationale for the wearing off of this adjustment is the assumption that no company insurer would intentionally underprice a product, knowing it would suffer losses for 20 years and then hope to offset a portion of that loss with a rate increase.
      iii. This adjustment is intended to prevent bait & switch, where, e.g., an company insurer would underpricing a product, gaining market share, and then immediately requesting a rate increase.

D. Texas Approach

The Texas approach to the actuarial review of rate changes was developed in response to the NAIC Long-Term Care Pricing (B) Subgroup’s discussions regarding the recoupment of past losses in LTCI rate increases. The Texas approach relies upon a formula intended to prevent the recoupment of past losses by calculating the actuarially justified rate increase for premium-paying policyholders based solely on projected future (prospective) claims and premiums.

Key aspects of the Texas approach to the actuarial review of rate changes include:

1. Past losses are assumed by the company insurer, and not by existing policyholders. An approach that considers past claims in the calculation of the rate increase, such as a lifetime loss ratio approach, permits to some extent, the recoupment of past losses to some extent.

2. Calculates the rate increase needed to fund the prospective premium deficiency for active, premium-paying policyholders based on an actuarily supported change in assumption(s). This ensures that active policyholders do not pay for the past claims of policyholders who no longer pay premium.

3. Data Requirements for Calculation:
   a. The following calendar year projections, including totals, for current premium-paying policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate:
      i. Present Value of Future Benefits (PVFB) under current assumptions.
      ii. PVFB under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
      iii. Present Value of Future Premiums (PVFP) under current assumptions.
      iv. PVFP under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
1. {Note that for all 4 projections above, the projection period is typically 40–50 years; although, some companies project for 60 or more years.}

To emphasize, these projections should only include active policyholders currently paying premium and should not include any policyholders not paying premium (e.g., policies on waiver, on claim, or paid up); regardless of the reason. -Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption.

Also, the company, insurer should identify and explain any estimates or adjustments to the data, as applicable.

4. Assumptions
   a. Rate increases are commonly driven by a change to the persistency, morbidity, or mortality assumption, or a combination of the three.
   b. Verification that assumption change(s) are supported by credible data.
   c. The interest rate is the same for all four projections. This ensures that interest rate risk is assumed by the company, insurer, not the policyholder.

The formula used in the TexasX approach is provided in Appendix C.

E. Reduced Benefit Options (RBOs)

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (“LTCI RBO (EX) Subgroup”) of the Long-Term Care Insurance (EX) Task Force, developed a list of RBO principles to provide guidance for evaluating RBO offerings in Appendix D.

RBOs in the MSA Advisory Report

As part of the MSA Review, the MSA Team will perform a limited review of the reasonableness of RBOs included in the rate proposal that are extracontractual. The MSA Advisory Report will highlight how the company, insurer demonstrates the proposed RBOs’ reasonableness. Note that the MSA Team will not perform an assessment of RBOs in relation to individual state specific requirements for RBOs. The purpose of the guidance in the MSA Advisory Report is to provide initial information about the RBOs with which the state insurance regulators can then utilize to perform a more detailed assessment specific to their state’s requirements. As the MSA Review process develops and as the LTCI RBO (EX) Subgroup continues its work, this area of review may evolve.

Future RBOs

As the industry continues to innovate new RBOs for consumers, the MSA Review process will likewise develop and evolve to consider the reasonableness of RBOs. Additionally, as the MSA Review process evolves, additional regulatory expertise with RBOs may be added to the MSA Team in the future. To achieve more consistency across states in their understanding and consideration of RBOs, the LTCI (EX) Task Force will encourage its appointed Subgroup and/or an appropriate NAIC actuarial committee or group, to collectively consider new RBOs, as they arise. This process will provide for input and technical...
F. Non-Actuarial Considerations

The Long-Term Care Insurance (EX) Task Force continues to review and consider non-actuarial considerations impacting states’ approval or disapproval of LTCI rate changes to develop consensus among jurisdictions and develop recommendations for application of these considerations. These considerations include such topics as:

1. Caps or limits on approved rate changes.
2. Phase-in of approved rate changes over a period of years.
3. Waiting periods between rate change requests.
4. Considerations of prior rate change approvals and disapprovals.
5. Limits or disapproval on rate changes based solely or predominately on the number of policyholders in a particular state.
6. Limits or disapproval on rate changes based on attained age of the policyholder.
7. Fair and reasonableness considerations for policyholders.
8. The impact of the rate change on the financial solvency of the insurer.

Considerations in the MSA Advisory Report

As part of the MSA Review, the MSA Team will identify relevant aspects of the insurer’s rate proposal, based on the information provided by the insurer, that may be impacted by the state’s non-actuarial considerations. Note that the MSA Team will not perform a state-by-state review of each state’s non-actuarial considerations, statutes, or practices. Instead, the MSA Team will highlight in the MSA Advisory Report those aspects of the rate proposal that relate to or that may be impacted by non-actuarial considerations. The purpose of this guidance in the MSA Advisory Report is to prompt state insurance regulators to contemplate those impacted aspects of the rate proposal when completing their individual state’s rate review. For example, the MSA Advisory Report may highlight:

- If cumulative rate increases are high, as this may impact the cost-sharing formula.
- If a rate proposal is for a block of business where the average policyholder age is predominately 85 or above, as this may impact states that consider age caps.
- If it is determined that the block of business will likely continue to incur substantial financial losses and impose a potential solvency concern, as this may impact the potential need for adjustments to the cost-sharing formula.
- Aspects of the coordination of rate and reserving review, as this may signify adjustments to the methodology assumptions used by the MSA Team in their review.

Future Non-Actuarial Considerations[Staff67][DG68]

The MSA Review process will continue to develop and evolve as it is implemented. To achieve more consistency and minimize the number of differences across states in their application of other non-actuarial considerations in rate review criteria for LTCI rate filings, the LTExTask Force will encourage

advice from actuaries and non-actuarial experts to the state insurance departments as they exercise their authority in considering RBOs as part of rate filings. States and insurers are therefore encouraged to discuss new and developing RBOs through this process.
its appointed Subgroup, or an appropriate NAIC actuarial committee or group, to collectively consider new future non-actuarial considerations, as they arise. This process will provide for input and technical advice from actuaries to states as they exercise their authority in considering non-actuarial factors. States are therefore encouraged to discuss new and developing practices and/or recommendations in this area.

VI. APPENDICES—MSA ADVISORY REPORT FORMAT FOR REGULATORS

A. Appendix A—MSA Advisory Report Format

The MSA Advisory Report that is distributed to Participating State insurance departments and the insurer will generally follow a template that includes the following information. Note that degree of rigor in the review and the details and content of the MSA Advisory Report will depend on the magnitude of rate increase and the complexity of the rate proposal and the insurer’s financial condition. See also the sample MSA Advisory Report in Exhibit A.

1. Executive Summary,
   a. Overall recommended rate increase, before consideration of different states’ history of approvals.

2. Disclaimers,
   a. Purpose and intent of how states should use the MSA Advisory Report.
   b. Disclaimer that the MSA Review and findings shall not be considered an approval of the rate schedule increase filing, nor shall it be binding on the states or the insurer.
   c. Statement that the in-force rate increase request filing submitted to the respective states shall be subject to the approval of each state, and each state’s applicable state laws and regulations shall apply to the entire rate schedule increase filing.

3. Background on the MSA Rate Review process.

4. Explanation of the insurer’s Proposal Request,
   a. The explanation will be based on the aspects of the insurer’s rate proposal, which may include details as to whether the rate increase submitted for review involved different types of coverages or groupings.

5. Summary of the MSA Team’s rate review analysis, including these aspects:
   a. Actuarial review,
      i. The summary of the review and the MSA Team’s recommendation will be based on the aspects of the insurer’s rate proposal, and may include specific details of the review, for example analysis of projections, assumptions, margins or other aspects.
   b. Summary of consideration of differences in the history of state’s rate increase approvals.
   c. Non-actuarial considerations and findings.
   d. Financial solvency-related aspects and adjustments.
   e. Review for reasonableness and clarity of reduced benefit option.
   f. Summary information about the mix of business.

© 2021 National Association of Insurance Commissioners
6. Appendices
   a. Summary of the drivers of the rate proposal increase request.
   b. Details regarding the Minnesota and Texas approaches as applied to the rate proposal.
   c. Summary of rate proposal correspondence.
   d. Examples of rate increases if an RBO is not selected.
   e. Potential cost-sharing formula for typical circumstances.
      
      e. – Tables of recommended rate increases by state, after consideration of different state’s history of approvals.
      d. – Frequently Asked Questions (FAQ)

**A-B. Appendix B – Information eChecklist**

At the request of the former Long-Term Care Insurance (B/E) Task Force, the Long-Term Care Pricing (B) Subgroup developed a single checklist that reflects significant aspects of LTCI rate increase review inquiries from all states. In this context, “checklist” means the list or template of inquiries; states typically send at the beginning of reviews of state-specific rate increase filings.

This document contains aspects of the NAIC Guidance Manual for Rating Aspect of the Long–Term Care Insurance Model Regulation⁶ (Guidance Manual) and checklists developed by several other states. This consolidated checklist is not intended to prevent a state from asking for additional information. The intent is to take a step toward moving away from 50 states having 50 different checklists to have a more efficient process nationally to provide the most important information needed to determine an approvable rate increase. To keep the template at a manageable length, it is anticipated that this template will result in states attaining 90–100% percent of the information necessary to decide on approvable rate increases. State and block specifics will generate the other 0-10% zero to ten percent of requests. As states apply this checklist, it or an improved version may be considered for a future addition to the Guidance Manual for Rating Aspect of the Long–Term Care Insurance Model Regulation.

**A. Information Required for an MSA Review of a Rate Proposal**

The following provides a checklist of information necessary for a complete rate proposal to the MSA Review. This checklist is consistent with the “Consolidated, Most Commonly Asked Questions – States’ LTC Rate Increase Reviews”⁷ as adopted by the Health Actuarial (B) Task Force on March 23, 2018.

1. Identify all states for which the product associated with the rate increase request proposal is or has been issued.

2. New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.

---

⁷ https://content.naic.org/sites/default/files/inline-files/cmte_b_ltc_price_sq_180323_ltc_increase_reviews%20%289%29.docx
a. Provide rate increase percentages by policy form number and clear mapping of these numbers to any alternative terminology describing policies stated in the actuarial memorandum and other supporting documents.
b. Provide the cumulative rate change since inception, after the requested rate increase, for each of the rating scenarios.

3. Rate increase history that reflects the filed increase.
a. Provide the month, year, and percentage amount of all previous rate revisions.
b. Provide the SERFF MSA numbers associated with all previous rate revisions.

4. Actuarial memorandum justifying the new rate schedule, which includes:
a. Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
   i. The projection should be by year.
   ii. Provide the count of covered lives and count of claims incurred by year.
   iii. Provide separate experience summaries and projections for significant subsets of policies with substantially different benefit and premium features. Separate projections of costs for significant blocks of paid-up and premium-paying policies that should be provided.
   iv. Provide a comparison of state versus national mix of business. In addition, a state may request separate state and national data and projections. The insurer should accompany any state-specific information with commentary on credibility, materiality, and the impact on requested rate increase.

5. Reasons for the rate increase, including which pricing assumptions were not realized and why.
a. Attribution analysis - presents the portion of the rate increase allocated to and the impact on the lifetime loss ratio from each change in assumption.
b. Related to the issue of past losses, explain how the requested rate increase covers a policyholder’s own past premium deficiencies and/or subsidizes other policyholders’ past claims.
c. Provide the original loss ratio target to allow for comparison of initially assumed premiums and claims and actual and projected premiums and claims.
d. Provide commentary and analysis on how credibility of experience contributed to the development of the rate increase.

6. Statement that policy design, underwriting, and claims handling practices were considered.
a. Show how benefit features, [e.g., inflation and length of benefit period], and premium features, [e.g., limited pay and lifetime pay] impact requested increases.
b. Specify whether waived premiums are included in earned premiums and incurred claims, including in the loss ratio target calculation; provide the waived premium amounts and impact on requested increase.
c. Describe current practices with dates and quantification of the effect of any underwriting changes. Describe how adjustments to experience from policies with less restrictive underwriting are applied to claims expectations associated with policies with more restrictive underwriting.

7. A demonstration that actual and projected costs exceed anticipated costs and the margin.
8. The method and assumptions used in determining projected values should be reviewed considering reported experience and compared to the original pricing assumptions and current assumptions.
   a. Provide applicable actual-to-expected ratios regarding key assumptions.
   b. Provide justification for any change in assumptions.

9. Combined morbidity experience from different forms with similar benefits, whether from inside or outside the insurer, where appropriate to result in more credible historical claims as the basis for future claim costs.
   a. Explain the relevance of any data sources and resulting adjustments made relevant to the current rate proposal, particularly regarding the morbidity assumption.
   b. A comparison of the population or industry study to the in-force related to the rate proposal should be performed, if applicable.
   c. Explain how claims cost expectations at older ages and later durations are developed if data is not fully credible at those ages and durations.
   d. Provide the year of the most recent morbidity experience study.

    a. Comparison with asset adequacy testing reserve assumptions.
       i. Explain the consistency regarding actuarial assumptions between the rate proposal and the most recent asset adequacy (reserve) testing.
       ii. Additional reserves that the insurer is holding above Health Insurance ReservesNAIC Model Regulation [#10] formula reserves should be provided, (such as premium deficiency reserves and Li—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves (AG 51) Actuarial Guideline 51 reserves).
    c. Provide actuarial assumptions from original pricing and most recent rate increase proposal and have the original actuarial memorandum available upon request.

11. Provide the following calendar year projections, including totals, for current premium paying nationwide policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate*:
    a. Present value of future benefits (PVFB) under current assumptions
    b. PVFB under prior assumptions [(from prior rate increase filing, or if no prior increase, from original pricing)]
    c. Present value of future premiums (PVFP) under current assumptions
    d. PVFP under prior assumptions [(from prior rate increase filing, or if no prior increase, from original pricing)]

*To emphasize, these projections should include only active nationwide policyholders currently paying premium, and they should not include any policyholders not paying premium, regardless of the reason. Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption or benefit reduction assumption.
b. Also, please identify the maximum valuation interest rate and ensure that it is the same for all four projections.

12. **NAIC** Guidance Manual *for Rating Aspect of the Long-Term Care Insurance Model Regulation* checklist items: 
   a) summaries (including past rate adjustments); 
   b) average premium; 
   c) distribution of business, including rate increases by state; 
   d) underwriting; 
   e) policy design and margins; 
   f) actuarial assumptions; 
   g) experience data; 
   h) loss ratios; 
   i) rationale for increase; and 
   j) reserve description.

13. Assert that analysis complies with *Actuarial Standards of Practice (ASOPs)*, including 18 & 41.

14. Numerical exhibits should be provided in Microsoft Excel spreadsheets with active formulas maintained, where possible.

15. Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

16. Policyholder notification letter— should be clear and accurate.
   a. Provide a description of options for policyholders in lieu of or to reduce the increase.
   b. If inflation protection is removed or reduced, is accumulated inflation protection vested?
   c. Explain the comparison of value between the rate increase and policyholder options.
   d. Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
   e. How are partnership policies addressed?

17. Actuarial certification and rate stabilization information, as described in the Guidance Manual, and contingent benefit upon lapse information, including reserve treatment.

**Supplemental Information**

As part of the Long-Term Care Insurance (EX) Task Force’s pilot project in 2020–2021, the following supplemental information was identified by the MSA Team as beneficial; and, therefore, the Task Force may be requested to assist in the MSA Review.

1. Benefit utilization:
   a. Provide current, prior rate increase, and original assumptions, including first-projection year through ultimate utilization percentages for 5% compound inflation, lesser inflation, and zero inflation cells.
   b. Explain how benefit utilization assumptions vary by maximum daily benefit.
   c. Provide the cost of care inflation assumption implied in the benefit utilization assumption.

2. Attribution of rate increase
   a. Provide the attribution of rate increase by factor: morbidity, mortality, lapse, investment, and other.
   b. For the morbidity factor, break down the attribution by incidence, claim length, benefit utilization, and other.
c. Provide information on the assumptions that are especially sensitive to small changes in assumptions.

3. **Reduced benefit options (RBOs)**
   a. Provide the history of RBOs offered and accepted for the block.
   b. Provide a reasonableness analysis of the value of each significant type of offered RBO.

4. Investment returns:
   a. Provide original and updated/average investment return assumptions underlying the pricing.
   b. Explain how the updated assumption reflects experience.

5. Expected loss ratio:
   a. With respect to the initial rate filing and each subsequent rate increase filing, provide the target loss ratio.
   b. Provide separate ratios for lifetime premium periods and non-lifetime premium periods and for inflation-protected and non-inflation-protected blocks.

6. **Shock lapse history:**
   a. Provide shock lapse data related to prior rate increases on this block.

7. Waiver of premium handling:
   a. Explain how policies with premiums waived are handled in the exhibits of premiums and incurred claims.
   b. Explain how counting is appropriate (as opposed to double counting or undercounting).

8. **Actual-to-expected differences:**
   a. Explain how differences between actual and expected counts or percentages (in the provided exhibits) are reflected or not reflected in assumptions.

9. **Assumption consistency with the most recent asset adequacy testing:**
   a. Explain the consistency or any significant differences between assumptions underlying the rate increase request/proposal and those included in Actuarial Guideline 51 testing.

**B.C. Appendix C—Actuarial Approach Detail**

**A. Minnesota Approach**

Details on the key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Review of current assumptions for appropriateness, reasonableness, justification, and support.
   a. A combination of credible company, insurer experience, relevant industry experience, and regulatory professional judgment is applied.

2. If-knew premium and makeup premium aspects — aggregate application.
   a. Makeup percentage:
      i. \[ \frac{[\text{PV (claims)} - \text{PV (past premium)}]}{\text{PV (future premium)}} - 1 \]
ii. Premiums in the formula reflect the actual rate level.

b. If-knew percentage:
   i. \[ \frac{\text{PV (claims)}}{\text{PV (premiums)}} \] / original LLR – 1
   ii. Premiums in the formula are at the original rate level.
   iii. The concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.

c. Definitions and explanations:
   i. PV means present value.
   ii. LLR means lifetime loss ratio.
   iii. Interest rates underlying PVs and LLRs are based on:
      1. For original PVs and LLRs, the interest rate is the investment return assumed in original pricing. Note that this rate is typically different than the statutory LLR discount rate.
      2. For current PVs, the interest rates are the average corporate bond yields over time for each year minus 0.25% (to account for expected defaults). For projections beyond the current year, phasing over five years of the current rate to a target rate (currently 4%) is assumed.
   iv. PV calculations are based on actual, current experience and expectations for persistency, morbidity, and interest rate.
   v. CompanyInsurer provide premium and claim cash flows may be adjusted based on assumption review.
   vi. Makeup percentage is similar to that attained by the loss ratio approach.

3. If-knew premium and makeup premium aspects – sample policy-level verification:
   a. Over a range of issues years, issue ages, benefit periods, and inflation protection:
      i. Calculate an estimate of the original premium.
         1. Based on original pricing assumptions for persistency, morbidity, investment returns, and expenses.
         2. Apply first principles:
            a. For each policy year, calculate PV of claims and expenses, applying mortality, lapse, morbidity, and expenses, discounting at original investment rates.
            b. Add the PV of claims expenses for each policy year to attain PV of claims & expenses at issue.
            c. Divide by the sum of the PV of an annuity of 1 per year.
            d. Multiply \[ \frac{b}{c} \] times \( 1 + \) originally assumed profit percentage to attain the original premium.
            e. This premium provides the basis for comparison against the makeup and if-knew premium.
      3. Replace the original premium with a benchmark premium:
         a. If the benchmark premium is higher than the original premium and original pricing (reflected in mortality, lapse, and investment return assumptions) was out of line with industry-average assumptions at the time of original pricing.
         b. The benchmark premium is phased back into the original premium proportionally over 20 years from issue.
c. The benchmark aspect is intended to prevent example, an insurer underpricing a product, gaining market share, and then immediately requesting a rate increase.

ii. Calculate an estimate of the makeup premium.
   1. Calculate the original dollar PV of profits for the sample policy using original pricing assumptions.
   2. Calculate an updated dollar PV of profits for the sample policy using:
      a. Actual history of premiums and claims.
      b. Expectations of future claims.
      c. “Backed into” makeup premium.
   3. Note that attaining the same dollar PV of profits for a sample policy leads to a lower makeup premium than attaining the same percentage PV of profits (as a percentage of premium).
      a. The reason for targeting the dollar instead of percentage is to avoid the dollar amount of profit being higher as premium rates increase.

iii. Calculate an estimate of the if-knew premium.
   1. The calculation is the same as for the original premium, except it is based on current assumptions instead of original pricing assumptions.
      a. Verifying the impact on expectation changes on rates
         i. While lapse, mortality, and interest rate experience and assumptions are fairly routine to track (for determination of the rate impact), morbidity experience and assumptions tend to be difficult to track.
         ii. A combination of information is relied upon to estimate the impact of morbidity expectation deviations (from original pricing) on rates. This information includes:
             1. Original and current claim incidence and claim length by age and other factors. Incidence and length are tracked separately for some companies and combined for others.
             2. Experience
             3. Impact on LLR of changes in expectations of morbidity.
             4. Industry information and trends (for reasonableness checks).
      c. Assumptions underlying the calculations of estimates of premiums may be adjusted as part of the review. For instance:
         i. If sample policy verification shows less impact on rates due to changes in lapse, mortality, interest rate, and morbidity expectations than demonstrated in the company’s aggregate projections, past or projected premiums or claims may be adjusted in the original, makeup, or if-knew premium calculations.
         ii. If there is wide variance in practice among companies in morbidity assumptions at ages where data is of low credibility, adjustments may be made to help ensure similar situations resulting in similar rate increase approval amounts.
            1. A balanced approach is pursued, recognizing that providing full or zero credit for partially credible experience may result in harmful consequences (excessive rates or later rate shocks).
2. Any reductions to rate increases caused by lack of credible experience can potentially be reversed in subsequent rate increase requests as credibility increases.
   iii. Similar adjustments may apply when incomplete or inconsistent information is provided by the company insurer (after initial attempts to resolve significant differences or gaps).

4. Reconciliation of aggregate and sample policy applications:
   a. In many cases, the aggregate and sample policy applications will result in similar current LLRs.
   b. In other cases, some steps are taken to understand the difference, including additional requests for information.
   c. Because the sample policy application considers information only related to premium-paying policyholders, it is possible that differences between the aggregate and sample policy application are caused by inclusion of past premiums and all claims related to non-premium payers in the aggregate information.
   d. When reconciliation does now occur after rounds of communication, decisions will be made based on the information provided.

5. Blending – same for aggregate and sample policy applications:
   a. The weighting towards the makeup premium is the percentage of original policyholders remaining.
   b. The weighting towards the if-knew premium is the percentage of original policyholders no longer having active policies, or 1 minus the percentage in ii.
   c. The blending of the if-knew premium and makeup premium helps ensure remaining policyholders are not held responsible for paying for adverse experience associated with past policyholders.
   d. The blending also helps limit cumulative rate increases at later durations; as the percentage of remaining policyholders approaches zero, the blended approval amount approaches the if-knew premium.

6. Cost-sharing formula that increases the company insurer burden as cumulative rate increases rise:
   a. The cumulative-since-issue, weighted if-knew / makeup premium-based increase is reduced by:
      i. No haircut for the first 15%;
      ii. 10% for the portion of cumulative rate increase between 15% and 50%;
      iii. 25% for the portion of cumulative rate increase between 50% and 100%;
      iv. 35% for the portion of cumulative rate increase between 100% and 150%;
      v. 50% for the portion of cumulative rate increase in excess of 150%.

7. Reduction for past rate increase:
   a. Take one plus the cost-sharing-adjusted blend amount and divide by one plus the previous, cumulative rate increases, then subtract one. This is the approvable rate increase.

8. Summary
   a. Review current assumptions.
b. Calculate aggregate if-knew premium and makeup premium amounts. Calculate the blended amount.

c. Calculate the sample policy estimated original premium, if-knew premium, and makeup premium. Calculate the blended amount.

d. Reconcile aggregate and sample policy blended amounts. Set this blended amount aside.

e. Apply the cost-sharing formula to the blended amount.

f. Deduct past rate increases.

g. Example – if:

i. The original premium is $1,000

ii. Makeup premium is $3,000

iii. If-knew premium is $1,500

iv. 60% of policyholders remain

v. Past rate increases are 50%

vi. Blended amount is:

1. $3,000 / $1,000 * 0.60 +
2. $1,500 / $1,000 * 0.40
3. − 1 =
4. 180% + 60% − 1 = 240% − 1 = 140%

vii. Cost sharing is:

1. 100% * 0.15 +
2. 90% * 0.35 +
3. 75% * 0.5 +
4. 65% * 0.4 =
5. 110%

viii. Deduction for past rate increases results in:

1. (1 + 1.1) / (1 + .50) − 1 =
2. 40%

**Texas PPV Formula**

Details on the PPV Formula of the Texas approach to the actuarial review of rate changes include the following. To reiterate, the formula is limited to active, premium-paying policyholders.

For rate stabilized policies:

\[
\text{rate increase } \% = \frac{\Delta PV (\text{future incurred claims}) - \left(\frac{.85 + .85C}{1 + C}\right) \Delta PV (\text{future earned premiums})}{.85 PV_{\text{current}} (\text{future earned premiums})}
\]

Where:
\[ \Delta \text{ indicates the change in PV due to the change in actuarial assumptions between the time of the last rate increase (or original pricing if no prior rate increase) and the current assumptions.} \]

\[ C \text{ is the cumulative % rate increase to date. For example, if the current rate (prior to the proposed rate increase) is 50% higher than the rate at initial pricing, then } C = 0.5. \]

The current subscript in the denominator indicates that the PV should be computed using current assumptions. The future earned premiums in the formula are based on the current premiums prior to the proposed rate increase. (State insurance regulators may wish to consider the addition of margin to the rate increase. For example, the } \Delta PV(\text{future incurred claims}) \text{ term in the above formula could be multiplied by } (1 + \text{margin}).)

For pre-rate stabilized policies, we use 0.6 in place of 0.58 and 0.8 in place of 0.85:

\[ \text{rate increase } \% = \frac{\Delta PV(\text{future incurred claims}) - (0.6 + 0.8C)\Delta PV(\text{future earned premiums})}{0.8 PV_{\text{current}}(\text{future earned premiums})} \]

Prior to the time that Texas adopted the PPV approach, a past requested rate increase may have been reduced by the state insurance regulator by a method other than the PPV approach. In this situation, for a current filing, the state insurance regulator may make adjustments to the current approvable amount based on what would have been approved had PPV been used in the prior filing.

**C.D. Appendix D—Principles of RBOs Associated with LTCI Rate Increases**

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (“LTCI_RBO_(EX)_Subgroup”) of the Long-Term Care Insurance (EX) Task Force, was charged to “Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.” In completing this charge, the Subgroup developed the following list of RBO principles to provide guidance for evaluating RBO offerings.

**A. Principles and Issues**

As related to:

1. Fairness and equity for policyholders who elect an RBO:
   - If some policyholders facing a rate increase are being offered an RBO but not others, an adequate explanation is needed.
   - Each RBO should provide reasonable value relative to the default option of accepting the rate increase and maintaining the current benefit level.

2. Fairness and equity for policyholders who choose to accept rate increases and continue LTCI coverage at their current benefit level:
The extent of potential anti-selection should be analyzed, with consideration of the impact on the financial stability of the remaining block of business and the resulting effect on the remaining policyholders.

3. Clarity of communication with policyholders eligible for an RBO:
   - Policyholders should be provided with maximum opportunity and adequate information to make decisions in their best interest.
   - Companies should present RBOs in clear and simple language, format and content, with clear instructions on how to proceed and whom to contact for assistance.

4. Consideration of encouragement or requirement for an companyinsurer to offer certain RBOs:
   - State insurance regulators should evaluate legal constraints, the impact on remaining policyholders and companyinsurer finances, and the impact on Medicaid budgets if encouraging or requiring reduced LTCI benefits.

5. Exploration of innovation, particularly where an outcome of improved health and lower claim costs are possible:
   - Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases, [e.g., providing hand railings for fall prevention in high-risk homes], and identifying the pros and cons of such an approach.

B. Widely Established RBOs in Lieu of Rate Increases

1. Reduce inflation protection going forward, while preserving accumulated inflation protection.
2. Reduce daily benefit.
3. Decrease benefit period/maximum benefit pool.
4. Increase elimination period.
5. Contingent nonforfeiture (CNE).
   i. Claim amount can be the sum of past premiums paid.
   ii. Only receive that benefit if the policyholder qualifies for a claim.

C. Less Common RBOs for Potential Discussion

1. Cash buyout.
2. Copay percentage on benefits.

As the industry continues to innovate new RBOs for consumers, such as the two listed above, the MSA Review process will likewise develop and evolve to consider the reasonableness of these RBOs. The LTCI (EX)-Task Force will encourage its appointed Subgroup or an appropriate NAIC actuarial committee or group, to collectively consider new RBOs, as they arise, that provides for input and technical advice from actuaries to states as they exercise their authority in considering RBOs as part of rate filings.

D.E. Appendix E—Guiding Principles on LTCI RBOs Presented in Policyholder Notification Materials
In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force LT C RBO (EX) Subgroup of the LT C (EX) Task Force adopted the following guiding principles to ensure quality of consumer notices of rate increases and RBOs. This section seeks to provide guiding principles in answering this question: “What are the recommendations for ensuring long-term care insurance policyholders have maximized opportunity to make reduced benefit decisions that are in their best interest?”

To complete the charge, the LT C RBO (EX) SS Subgroup 1) evaluated the quality of consumer notices and RBO materials presented to policyholders; 2) considered the relevant lessons learned and consumer focus group studies from the liquidation of LT C insurer Penn Treaty Network of America; 3) reviewed existing RBO consumer notice checklists or principles from multiple states (i.e., Nebraska, Pennsylvania, Texas and Vermont); and 4) addressed stakeholder comments on RBO principles.

This document is intended to establish consistent high-level guiding principles for long-term care insurance reduced benefit options - LT C RBOs presented in policyholder notification materials. These principles are guidance and do not carry the weight of law or impose any legal liability.

Recognizing that each component outlined in these principles will not apply in all circumstances, this section:

- RECOMMENDS that insurance companies recognize these fundamental principles.
- CALLS ON all insurance companies to consider the following principles in communicating reduced benefit option RBOs available to consumers in the event of a rate increase.
- UNDERLINES that the following principles are complementary and should be considered as a whole.

### Filing Rate Action Letters

Insurers should consider:

- Sending rate actions after the state has approved the rate action filing.
- Making the rate action effective on a policy anniversary date, recognizing that the Long-Term Care Insurance Model Regulation (R641) allows for the next anniversary date or next billing date.
- Mailing rate increase notification letters at least 45 days prior to the date(s) a rate action becomes effective, consistent with any applicable state laws and/or regulations.
- Sending rate increase notifications each year for rate increases that are phased-in over multiple years.
- Disclosing all associated future planned rate increases approved by state insurance regulators in the initial and phased-in rate increase notification letters.
- Filing rate action letter templates in the NAIC System for Electronic Rate and Form Filing (SERFF) rate increase filing to include statements of variability and sample letters highlighting the differences between the communications, consistent with any applicable state laws and/or regulations.
- Presenting innovative options to state insurance regulators prior to filing new reduced benefit option RBOs.
  - This enables state insurance regulators to evaluate potential anti-selection, adverse morbidity, and implications to consumers and future claims experience.
Readability and Accessibility

Insurers should consider:

- Drafting a rate action letter that is easy to follow, flows logically, and displays the essential information and/or the primary action first, followed by the nonessential information.
- Presenting the reduced benefit option RBOs in a way that is comprehensible, memorable, and adjusted to the needs of the audience.
- Using cover pages, a table of contents, glossaries, plain language, headers, maximized white space, and appropriate font size and reading level for the intended audience.
- Using illustrative tools, such as bullet points or illustrations, as appropriate, and graphs or charts enabling a side-by-side comparison.
- Including definitions of complex terms; and if a term, subject, or warning is repeated throughout the communication, consider making the language consistent throughout the document.
- Including a question and answer Q&A section that is succinct but answers the commonly asked questions in plain language.
- Providing appropriate accommodations for policyholders with disabilities or for policyholders for whom English is not a first language.

Identification

Insurers should consider drafting the RBO communication in a way that helps policyholders understand:

- What is happening.2
- Why is it happening to them.2
  - Ensure the letter does not negatively reference the state insurance department.
- When it is happening.2
- What they can do about it.2
- How do they take action.2

Communication Touch and Tone

Insurers should consider:

- Drafting the communication in a way that helps policyholders envision or reflect on the reason(s) why they purchased a long-term care insurance LTCI policy.
- Conveying as much empathy as possible regarding the impact a rate action(s) may have on policyholders.
- Presenting reduced benefit option RBOs fairly, refraining from the use of bolding, repeating or emphasizing one option over another.
- Displaying the policyholder’s ability to maintain current benefits by paying the increased premium.
- Using word choices that appreciate how those words could influence a policyholder’s decision.
  - For instance, consider using “now” instead of “must”; or consider using “mitigation options,” “offset premium impact” or “manage an increase” instead of “avoid an increase.”
Consultation and Contact Information

The insurer should consider listing multiple contacts in the communication in an easy-to-identify location to include when available: phone number, email address, and website when available. For example:

- Customer service.
- Lapse notifier.
- Insurance producer.
- State insurance department.
- State Health Insurance Assistance Program (SHIP).

The insurer should consider suggesting policyholders consult a family member or other trusted advisor, such as:

- Lapse notifier.
- Insurance producer.
- Financial advisor.
- Certified personal accountant or tax advisor (in the event cash buyouts are offered).

Understanding Policy Options

Insurers should consider the presentation of the communication by:

- Identifying what necessitated the communication on the first page.
  - For example, the header could say, “Your Long-Term Care Premiums Are Increasing.”
- Including the reduced benefit option RBOs with the rate action letter.
- Limiting the number of options displayed on the letter to no more than four or five.
- Identifying which reduced benefit option RBO(s) have limited time frames.
- Advising policyholders that they can ask about reducing their benefits at any time, regardless of a rate increase.
- Providing enough information in the communication to make a decision.
  - If supplemental materials (e.g., insurer’s website) are provided, they would enhance the policyholder’s understanding, but not be necessary to use when making a decision.

Insurers should consider indicating the window of time to act by:

- Clearly indicating what the policyholder’s premium will increase to and by when.
- Displaying the due date(s) in an easy-to-identify location and repeating it multiple times throughout the document.
- Clearly differentiating due date(s) for each RBO, if available for a limited time.

Insurers should consider including disclosures regarding rate increase history by:

- Disclosing that future rate actions could occur.
- Advising if prior rate actions have or have not occurred to include:
DRAFT: 11/5/21

LTCI MSA Framework

- Policy form(s) impacted.
- Calendar year(s) the policy form(s) was available for purchase.
- Percentage of increase approved to include the minimum and maximum, if they vary by benefit type.
- Reminding policyholders that their policy is guaranteed renewable.

Insurers should consider advising policyholders of their current benefits:

- For example, the communication could disclose the policyholder’s current benefits to include:
  - Daily maximum amount.
  - Inflation option.
  - Current pool of benefits for policies with a limited pool of benefits.

Insurers should consider personal needs decision-making by:

- Only listing reduced benefit option RBOs that are available to the policyholder.
- Calling on policyholders to reflect on how each option could impact them personally.
- Prompting policyholders to consider their unique situation to include their current age, health conditions, financial position, availability of caregivers, spouse or partner impacts, and the potential need for institutionalized care.
- Reminding policyholders to consider the cost of care in the area and setting where they expect to receive care.
- Informing policyholders of factors that impact long-term care LTC costs, such as:
  - The average cost of care for in-home care, assisted living, and nursing home care in their area.
  - The inflation rate of the cost of care for in-home and nursing home care in their area.
  - The average age and duration of a long-term care LTC claim for in-home and nursing home care.
  - Factors that influence the age, duration, and cost of a claim.
- Disclosing to policyholders when an RBO falls below the cost of care in their area.
- Calculating for policyholders the number of days or months a paid-up option could cover based on the cost of care in their area.
  - Buyout or cash-out disclosures.
    - The cash offerings, if any, should disclose to policyholders that the option could result in a taxable event, and they should consult with their certified personal accountant and/or tax advisor before electing this option.

Insurers should consider the value of each option by:

- Disclosing if the RBOs may not be of equal value and are dependent on the unique situation of each policyholder.

Insurers should consider communicating the impact of options by:

- Displaying the options in a way that enables policyholders to compare options, including details such as:
  - Daily/monthly benefit.
• Benefit period.
• Inflation option.
• Maximum lifetime amount.
• Premium increase percentage and/or new premium.
• Nonforfeiture (NFO) or contingent nonforfeiture (CNF) amount.
• If the policy is Partnership qualified, changes to benefits may impact Partnership status.
• Current premium.

• Providing a series of questions to help policyholders contemplate the implications of each action, such as:
  
  o What will happen if they take no action?
  o What will happen if they make no payment before the policy anniversary date?
  o If they accept the full increase without reducing their benefits, how will they handle potential future rate increases?
  o If they elect the cash buyout, there could be tax implications.
  o If they elect a paid-up nonforfeiture option NFO, how long will the reduced benefit last if they had a claim?
  o If they were to increase their elimination period from 30 days to 100 days, do they have enough funds to cover those expenses?
  o Partnership policies: Will reducing the benefits remove Partnership qualification? If so, the letter should explain that their asset protection may be removed or reduced.

When rate actions span over multiple years, insurers should consider:

• Disclosing the full rate increase amount, how it is spread out across multiple years, and all associated future planned rate increases approved by state insurance regulators.
• Specifying if the premium increase referenced is the first, second, third, last, etc.
• Offering contingent nonforfeiture CNF based on the full increase amount and offered with each phase of the rate action.
• Notifying policyholders at least 45 days in advance of each phase of the rate increase, consistent with any applicable state laws and/or regulations.
VII. EXHIBITS

A. EXHIBIT A—SAMPLE MSA ADVISORY REPORT

FROM: Long-Term Care Insurance (LTCI) Multistate Actuarial Rate Review Team
DATE: [Date]
RE: ABC Insurance Company – Block LTC1 – Draft of Initial MSA Advisory Report

Executive Summary

The LTCI Multistate Actuarial Rate Review Team (MSA Team) recommends a rate increase of 35% to be approved for inflation-protected products and 20% to be approved for products with no inflation, related to ABC Company’s block.

Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved. Reduced benefit options (RBOs) may be selected to help manage the impact of the rate increase.

Analysis by the MSA Team resulted in the recommended rate increase being consistent with that resulting from the actuarially justified Texas and Minnesota approaches. The recommended rate increases are below the increases that would have resulted from the lifetime loss ratio approach and the rate stability rules.

Background

The MSA Team was formed to assist the Long-Term Care Insurance (EX) Task Force in developing a consistent national approach for reviewing LTCI rates, which results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.

The members are: [List names and state of members]. Starting in the first half of 2020, the MSA Team accepted rate increase [insert proposal submitting date as part of a pilot program]. The MSA Review became operational on [insert date].

This MSA Advisory Report is related to the rate increase [insert proposal submitting date] filed by ABC Company for its LTC 1 block sold between 2003 and 2006. The MSA Team’s actuarial analysis is provided below. The intention is that states can utilize this analysis and feel comfortable accepting the MSA Advisory Report recommendation when taking action on the upcoming ABC filings that will be made to the states.

MSA Review and findings shall not be considered an approval of the rate schedule increase filing, nor shall it be binding on the states or the insurer. As this is a state-approved product, each state will ultimately be responsible for approving, partially approving, or disapproving the rate increase. A goal

---

8 Information contained in this sample report is an example only and is not derived from any actual rate filing.
of the Task Force is for as much consistency as possible to occur between states in the rate increase approvals.

Insurer’s Request Proposal

ABC Company requests a rate increase of 60% to be approved for inflation-protected products and 40% to be approved for products with no inflation.

In addition, ABC Company is requesting higher rate increases for states that did not grant full approval of prior rate increase requests, consistent with the MSA Team’s goal of attaining the same resulting rate tables in each state for a given product. [Staff87][DG88]

Workstream-Related Review Aspects

Actuarial Review

At the direction of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, the MSA Team applied the Minnesota and Texas approaches to calculate the recommended, approvable rate increases. Aspects of the Minnesota approach that result in lower rate increases than those resulting from loss ratio-based approaches contained in many states’ laws and rules include:

- Reduction in rate increases at later policy durations to address shrinking block issues.
- Elimination of rate increases related to inappropriate recovery of past losses.

Minnesota also has additional unique aspects: 1) consideration of adverse investment expectations related to the decline in market interest rates, 2) adjustments to projected costs to ensure the impact of uncertainty is adequately borne by the insurer; and 3) a cost-sharing formula applied in typical circumstances.

Even though these additional aspects are outside the pure loss-ratio requirements, they fall in line with legal provisions that rates shall be fair, reasonable, and not misleading.

The Minnesota approach, including application of the typical-circumstance cost-sharing formula, results in an approvable rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.

The Texas approach results in an approvable rate increase of 29% in aggregate.

The MSA Team’s recommendation, in consideration of the Minnesota and Texas approaches, is to approve a rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.

Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved.

The MSA Team reviewed support for the assumptions, experience, and projections provided by the insurer and performed validation steps to review the insurer-provided information for reasonableness. Details regarding the actuarial review are provided in Appendix 1. Also, the initial submission and subsequent
correspondence between the insurer and the MSA Team are available on SERFF. The SERFF tracking number is ABCC-123456789.

**Consideration of Differences in Histories of States’ Rate Increase Approvals**

According to the Historical Rate Level Summary, Appendix D in the insurer’s filing, past rate increase approvals by state have varied and can be categorized as follows:

- 25 states have granted full or near-full approval of ABC Company’s past requests (at or near 55%, cumulative).
- 18 states have granted cumulative approvals averaging 45%.
- Five states have granted cumulative approvals averaging 27%.
- Two states have granted cumulative approvals averaging 15%.

The insurer’s stated goal is to bring rates in all states up to an equivalent rate level. Currently, the average annual premium rates for a policyholder range from below $1,700 in some states (with the lowest past approvals) to over $2,200 in other states (with the highest past approvals).

The MSA Team’s recommendation is based on a goal of rates per benefit unit being uniform between states going forward.

A table of examples of recommended rate increases based on past cumulative approval history is provided in Appendix 2.

**Non-actuarial & Valuation/Solvency Considerations**

Non-actuarial considerations, including flexibility regarding the phase-in of rate increases, waiting periods between rate increases being coordinated with phase-in periods, and other issues are being discussed at the Task Force and the Subgroup.

Even with future claims potentially being reduced due to COVID-19-related behavioral impact, ABC Company will continue to experience substantial losses on this block.

Regarding coordination of rate and reserving reviews, the insurer states that assumptions underlying the rate increase are consistent with assumptions underlying the reserve adequacy testing.

**RBOs – Review for Reasonableness**

Unless a rider was purchased, ABC Company policyholders facing a rate increase will be offered the following applicable options in lieu of a rate increase:

1) Extending the elimination period.
2) Decreasing the benefit period.
3) Reducing future inflation accumulation.

The insurer produced rate tables which demonstrate that the RBOs provide reasonable value in relation to a case of a policyholder retaining full benefits and paying the full rate increase.
Financial Impact for Insurer
The requested rate increase associated with recent adverse development would result in around $50 million of reduced losses for this block according to information contained in the actuarial memorandum.

Mix of Business

From the insurer’s actuarial memorandum:

Enrollees:
- Total enrollees as of date of proposal filing: 15,000
- Inflation protection: 9,000 (inflation protection) and 6,000 (no inflation)
- Benefit period: 8,500 (lifetime benefits) and 6,500 (limited benefits)

Product type: Expense reimbursement
- Average issue age: 58
- Average attained age: 75
- Annualized premium: $30 million; $2,000 average per policyholder

Appendix 1

Drivers of Rate Increase RequestProposal – Summary

The primary drivers, summarized in the insurer actuarial memorandum, were lower lapses and longer average claim length. The insurer assumptions were based on actual-to-expected adjustments, based in part by insurer experience that has become more credible in recent years. The assumptions were determined to be reasonable and in line with industry and actuarial averages.

Details Regarding Minnesota Approach

For an average (in terms of benefit period and issue age), 5% compound inflation-protected cell:
- Makeup cumulative rate increase: 177% (the increase from original rates needed going forward to get the block to the financial position contemplated at original pricing)
- This increase is equal to the increase that would result from a pure loss ratio approach.
- If-knew cumulative rate increase: 36% (the increase from original rates needed if the insurer could go back to the past and reprice the product given information it knows now)
- Proportion of original policyholders remaining in force, based on insurer original and updated assumptions: 62%
- Blended if-knew / makeup rate cumulative rate increase since issue: 123%
- $ = 0.62 * 177% + (1 - 0.62) * 36%, adjusted for rounding
- Insurer cost share based on Minnesota formula (see Appendix 3): 12%
- Recommended cumulative rate increase since issue: 109%
- $ = (1 - 0.12) * 1.23, adjusted for rounding
- Past cumulative rate increases: 55%
- Actuarial recommended rate increase from current rates: 35%
- $ = (1 + 1.09) / (1 + 0.55) – 1, adjusted for rounding
- Final actuarial recommended rate increase from current rates (for the inflation-protected cell):
  - 35%
  - Minimum of: calculated approval rate of 35% and insurer request proposal of 60%
- Using the same methodology, the final actuarial recommended rate increase from current rates (for the non-inflation-protected cell): 20%

Note that the Minnesota approach includes the reflection of declining interest rates which tends to lead to adverse investment returns compared to expectations in original pricing. Also, where applicable, insurer morbidity assumptions are adjusted downward due to a lack of credible support at extremely high ages, and a general lack of complete support for aspects of morbidity assumptions, including uncertainty regarding future benefit utilization.

Details Regarding Texas Approach
- Insurer Calculation (aggregate): 52%

PPV calculations
- Texas Life & Health Actuarial Office (LHAO) PPV Calculation (aggregate): 29%

LHAO Comments
- For the purposes of the MSA report, and as a component of the calculation of the approvable rate increase, Texas recommends an actuarially justified PPV calculated amount of 29%.

Texas rate stabilized PPV Formula:

\[
\text{rate increase } \% = \frac{\Delta PV(future \ incurred \ claims) - (\frac{.58 + .85 \ C}{1+C}) \Delta PV(future \ earned \ premiums)}{.85 PV(current \ future \ earned \ premiums)}
\]

Reconciliation of Minnesota and Texas Approaches

The Texas PPV calculated amount of 29% aligns well with the Minnesota approach’s recommended rate increase of 35% for inflation-protected policies and 20% for non-inflation-protected policies when the distribution of inflation-protected vs. non-inflation-protected cells is applied. The MSA Team’s recommended rate increase is 35% for inflation-protected policies and 20% for non-inflation-protected policies.

Recommended rate increases by state, in consideration of various histories of rate increase approvals, are listed in Appendix 2.

Filings—Correspondence Summary
- Template information request for multi-state rate increase filings, based on the list adopted by the Health Actuarial (B) Task Force on March 23, 2018.
- New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
- Rate increase history that reflects the filed increase.
• Actuarial Memorandum justifying the new rate schedule, which includes:
  o Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
  o Reasons for the rate increase, including which pricing assumptions were not realized and why.
  o Statement that policy design, underwriting, and claims handling practices were considered.
  o A demonstration that actual and projected costs exceed anticipated costs and the margin.
  o The method and assumptions used in determining projected values should be reviewed in light of reported experience and compared to the original pricing assumptions and current assumptions.
  o Combined morbidity experience from different forms with similar benefits, whether from inside or outside the insurer, where appropriate to result in more credible historical claims as the basis for future claim costs.
    ▪ Comparison with asset adequacy testing reserve assumptions.
    ▪ Provide actuarial assumptions from original pricing and most recent rate increase filing, and have the original actuarial memorandum available upon request.
  o Guidance Manual Checklist items: summaries, including past rate adjustments; average premium; distribution of business, including rate increases by state; underwriting; policy design and margins; actuarial assumptions; experience data; loss ratios; rationale for increase; and reserve description.
  o Assert that analysis complies with Actuarial Standards of Practice, including No. 18 and No. 41.
  o Numerical exhibits should be provided in Microsoft Excel spreadsheets with active formulas maintained, where possible.

• Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

• Policyholder notification letter – should be clear and accurate.
  o Provide a description of options for policyholders in lieu of or to reduce the increase.
  o If inflation protection is removed or reduced, is accumulated inflation protection vested?
  o Explain the comparison of value between the rate increase and policyholder options.
  o Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
  o How are partnership policies addressed?

• Supplementary information, based on a list developed by the MSA Team following the review of initial pilot program filings/proposals:
  o Information on benefit utilization.
  o Attribution of rate increase by factor.
  o RBO history and reasonability analysis.
  o Investment returns.
  o Expected loss ratio.
  o Shock lapse history.
  o Waiver of premium handling.
  o Actual-to-expected differences.
  o Assumption consistency with Actuarial Guideline 51 asset adequacy testing.
Following initial review of the filing proposal, additional information was requested by the MSA Team related to:
- Original pricing assumptions.
- Lapse assumption by duration.
- Premiums and incurred claims by calendar year based on original assumptions.
- Distribution of in force by inflation protection.
- Loss ratios by lifetime/non-lifetime benefit period and with/without inflation protection.
- Description of waiver of premium handling in premium and claim projections.
- Commentary on COVID-19 short-term and long-term LTC impact.

Appendix 3 [Staff93][DG94]

Potential Cost Sharing Formula for Typical Circumstance

Cumulative rate increase since issue date is haircut by:
- No haircut for the first 15%.
- 10% for the portion of cumulative rate increase between 15% and 50%.
- 25% for the portion of cumulative rate increase between 50% and 100%.
- 35% for the portion of cumulative rate increase between 100% and 150%.
- 50% for the portion of cumulative rate increase in excess of 150%.

Example: if the Texas approach of pre-cost sharing Minnesota approach results in a cumulative 210% rate increase since issue:
- Break 210% into the following components: 15%, 35%, 50%, 50%, 60%
• Post haircut approval is 100% of 15% + 90% of 35% + 75% of 50% + 65% of 50% + 50% of 60%
  • = 15% + 32% + 38% + 33% + 30%
  • = 147%

Legal justification for the cost-sharing formula is that the insurer should have had more information about the possibility of triple-digit rate increases than the consumer had.

Adjustments to the formula may be desired when an insurer’s solvency position is dependent on a certain level of rate increase approval. That is not the case with this insurer or filing proposal.
The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met Sept. 28, 2021. The following Subgroup members participated: Michael Conway, Chair (CO); Paul Lombardo (CT); David Altmaier (FL); Andria Seip (IA); Stephen Chamblee (IN); Stewart Guerin (LA); Karen Dennis (MI); Fred Andersen (MN); Russel Toal (NM); Jessica K. Altman (PA); Matt Gendron (RI); Michael Wise (SC); Barbara Snyder (TX); Tomasz Serbinowski (UT); Bob Grissom (VA); Anna Van Fleet (VT); Lichiou Lee (WA); and Joylynn Fix (WV). Also participating was: Barbara D. Richardson (NV).

1. Discussed Comments on an MSA Framework Draft

Mr. Conway said the purpose of today’s meeting is to review the changes that have been made to the Actuarial sections of the draft Long-Term Care Insurance (LTCI) Multi-State Rate Review Framework (MSA Framework) in response to the comments received from their first exposure. He said the Actuarial sections have been exposed for a second public comment period ending Oct. 28.

Mr. Andersen gave a summary of the changes to the Actuarial sections of the draft MSA Framework, using a marked-up version of the draft (Attachment Two-A) and a summary of received comments (Attachment Two-B) as references. He said comments were received from the Washington State Office of the Insurance Commissioner, the Vermont Department of Financial Regulation (DFR), the American Academy of Actuaries (Academy), the American Council of Life Insurers (ACLI) and the America’s Health Insurance Plans (AHIP), and FinancialMedic LLC.

Mr. Conway said several comments were received requesting more specificity on how the Multistate Actuarial LTCI Rate Review Team (MSA Team) will apply either the Minnesota or Texas approach and other technical details of the process. He said the MSA Framework is intended to be a framework for the MSA Team’s rate review process, and it will not include every detail of every aspect the MSA Team will consider as it conducts its reviews. He said the MSA Team will apply actuarial judgement in its reviews that is not able to be captured in its entirety in the MSA Framework.

Mr. Conway said the MSA Framework is intended to be a tool for states to use in determining the rate increase each state will ultimately approve, and each state will reserve the right to make a rate increase decision that is not the one recommended in any given MSA Team Advisory Report. He said he hopes the MSA Team Advisory Reports can be used by states to arrive at rate increase approval determinations more expeditiously.

Ms. Richardson asked whether the MSA Team considers the number of policyholders in each state when making its recommendations. Mr. Andersen said this is a non-actuarial issue, and the MSA Team strives to achieve rate equity among all states, irrespective of the number of policyholders in a given state.

Mr. Toal said he supports the concept of rate equity among policyholders in different states. He said this also needs to be balanced with the concepts of reasonableness and affordability. He said rate increases of 150% to 200% are not affordable to policyholders in New Mexico, and the issues of reasonableness and affordability need to be part of the MSA Framework’s review process. Mr. Conway said these concerns fall into the non-actuarial considerations category, and he agreed that these issues need to be discussed. Mr. Andersen said the Minnesota method attempts to address reasonableness in that it produces rate increase recommendations lower than those using a loss ratio approach. He said it is important to note that even in light of large rate increases, given the expected increase in claims costs, reasonableness is part of the review process.

Jan Graeber (American Council of Life Insurers—ACLI) said there could be more clarity on how the Minnesota and Texas rate review methodologies will be applied, such as commentary on which methodology better addresses issues such as small remaining blocks of policies and other high-level issues. She suggested that a walk-through of the MSA review process using a sample rate increase filing may be helpful. Mr. Andersen said the MSA Team has researched including more clarity as requested, but it has found that the differences in filings make stating which methodology is preferred for various categories difficult. He said the MSA Team will continue to research these issues. Mr. Lombardo said the MSA Team has not reviewed...
many filings at this point, and he noted that the MSA Framework will be updated as needed as more filings have been reviewed. He said at this time, the MSA Team does not have enough information to provide the level of detail that Ms. Graeber requested.

Ms. Graeber suggested that the Long-Term Care Pricing (B) Subgroup revisit its document that outlines the Minnesota and Texas methodologies and determine if it can be used to add clarity to the MSA Framework. Mr. Andersen said he agrees with this approach, and he suggested developing some case studies to apply the MSA Framework process to. Mr. Conway said any methodology used in the MSA Framework will be required to produce an actuarially justified result.

Birny Birnbaum (Center for Economic Justice—CEJ) said there is no requirement that insurers return excess premiums collected if experience proves to be better than expected. He said he considers this to be a violation of the principle of reasonableness. He said for the MSA Framework process to be transparent, MSA Team Advisory Reports need to be made publicly available. Mr. Conway said the level of detail for each report that is publicly available will be dependent on a given state’s confidentiality requirements.

Mr. Conway said the Operational sections of the MSA Framework have been exposed for a second public comment period, and comments are due Oct. 11. He said after the Oct. 28 comment deadline for Actuarial sections, the Subgroup will meet to discuss comments received on both the Actuarial and Operational sections. He said the Subgroup’s ultimate goal is to adopt the final version of the MSA Framework prior to the Fall National Meeting, where it will be presented to the Long-Term Care Insurance (EX) Task Force for its consideration.

Having no further business, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup adjourned.

V. ACTUARIAL REVIEW

A. MSA Team’s Actuarial Review Considerations

In conducting its actuarial review of a rate proposal, the MSA Team will consider assumptions, projections and other information provided by the insurer as outlined in Appendix B. The MSA actuarial review process will be evaluated and evolve over time as more proposals are reviewed.

The Minnesota and Texas approaches ensure remaining policyholders do not make up for losses associated with past policyholders. Professional judgment is used to address agreed upon policy issues, including handling of incomplete or non-fully credible data. The Minnesota approach also considers adverse investment expectations related to the decline in market interest rates, and a cost-sharing formula is applied. The Texas approach ensures rate changes reflect prospective changes in expectations. More detail of each approach is provided in the following sections.

The MSA Team will consider the following in performing their review, applying their expertise and professional judgement to the review as well as reviewing the actuarial formulas and results.

- Review company insurer experience, company insurer narrative explanation, and relevant industry studies.
- Assess reasonability of assumptions for lapse, mortality, morbidity, and interest rates.
- Validate and adjust or request new projections of claim costs and premiums by year.
  - Validate that the patterns of claims and premium projections over time match reasonably align those reflected in the assumptions.
  - Adjust or request new projections of claims and premium to the extent any underlying assumptions are deemed unreasonable or unsupported by the MSA Team. Any differences will initially result in correspondence between MSA Team and insurer, via SERFF.
  - After verifying loss ratio compliance, apply both the Minnesota and Texas approaches for each rate proposal submitted.

which ensure remaining policyholders do not make up for losses associated with past policyholders.

In developing a recommendation, the MSA Team will apply a balanced approach and professional judgement for each rate proposal based on the characteristics of the block reviewed to determine the method most appropriate. The MSA Team’s recommendation will not be the lowest or the highest percentage method just because it is the lowest or the highest. Rather, the recommendation may be the result of either the Texas or Minnesota approach, a blend of the two approaches, or using professional judgement the MSA Team may recommend a rate increase outside of these two approaches. Other methods may evolve over time that may be incorporated into the future process that generate similar or unique results. In developing a recommendation, the MSA Team will apply regulatory actuarial professional judgement, for instance when considering, the extent to which less-than-fully credible older-age morbidity should be projected to cause adverse experience. a balanced approach is applied as opposed to denying a rate increase, which could lead to a spike in the future, or approving the rate increase as if there was full credibility, leading to rates that could be too high.
The MSA Team will consider how to reflect the differences in the histories of states’ rate increase approvals. Current approach includes:

- The MSA Team’s recommendation results in the same rate per unit in each state following the current rate increase round (leading to higher percentage rate increases in states that approved lower rate increases in the past).
- Analysis will continue on state cost differences impacting justifiable rate increases. As of May 2021, there does not appear to be substantial evidence that policyholders who purchased policies in lower-cost states should receive lower percentage rate increases. Part of the reason is that there was a tendency for people in lower-cost areas to purchase less coverage. Their premium rates will continue to be lower than rates for policyholders with more coverage, even if percentage rate increases are the same.
- Any recommendation from the MSA Team for a catch-up increase aims to achieve only current rate equity between states and not lifetime rate equity between states.

Consideration of Solvency Concerns:

If concerns exist regarding an insurer’s financial solvency and the impact of rate increases on future solvency, each state department of insurance, by their authority over rate approval, has the flexibility to consider solvency adjustments in these rare instances. In rare, non-typical circumstances, adjustments could be considered within the MSA Review process, including consultation with states as part of the MSA Advisory Report comment period.

Follow-Up Filings on the Same Block:

Any subsequent rate increase proposal to the MSA Team on a block of business previously reviewed by the MSA Team needs to involve development of adverse experience and/or expectations. In the absence of adverse experience or expectation development, the MSA Team will consider a reasonable explanation from an insurer for an increase in credibility of morbidity data of being the reason for a rate increase. Prior rate increases would need to be implemented before implementation of a subsequent rate increase. The MSA Team will not consider a new rate increase request on a block that did not receive the full percentage rate increase requested without the experience, expectation, or credibility criteria noted above. If an insurer did not receive the full percentage rate increase and has no adverse changes in experience or expectations, the insurer should work directly with the applicable state department of insurance.

B. Loss Ratio Approach

Key aspects of the loss ratio approach to the actuarial review of rate changes include:

1. At policy issuance, pricing based on a lifetime loss-ratio target is typically established. A common target is 60%, which means the present value of claims is targeted to equal 60% of the present value of premiums. In some instances, products may be priced with a projected lifetime loss ratio in excess of 60%. The remainder goes towards sales-related costs, administrative expenses, expenses related to claims, and profit. Note that 60% is a required minimum loss ratio under the pre-rate stability rules; newer policies may be priced with lower expected loss ratios. Refer to state law or regulation modeled from the Long-term Care Insurance Model Regulation (#641), Section 19 for more details on compliance with loss ratio standards.
2. As lapses and mortality have generally been lower than expected, more people have reached ages where claims tend to occur than originally expected. In some cases, this has resulted in a substantial increase in the present value of claims; thus, resulting in substantially higher expected lifetime loss ratios than originally targeted. For companies where morbidity expectations have increased over original assumptions, lifetime loss ratios would be even higher.

3. The loss ratio approach increases future premiums to a level (referred to as make-up premium) such that the original loss ratio target is once again attained.

4. The loss ratio approach, one of the minimum standards in many states’ statutes, is evaluated by the MSA Team. However, there is general recognition that this approach produces rate increases that are too high and do not recognize other typical statutory standards such as fair and reasonable rates.
   a. The loss ratio approach also does not recognize actuarial considerations such as the shrinking block issue, where past losses being absorbed by a shrinking number of remaining policyholders would lead to unreasonably high-rate increases. This concern was the main driver of the Minnesota, Texas, and other approaches.
   b. The loss ratio approach shifts all the risk to the policyholders. If the company is allowed always to return to the 60% loss ratio, there may be a lower incentive for more responsible pricing.

5. For rate-stabilized business, lifetime loss ratios are broken out, such as in a 58% / 85% pattern, where the 58% reflects the portion of initial premiums and the 85% reflects the portion of the increased premium available to pay the claims. For relevant blocks, this standard is analyzed by the MSA Team. If this standard produced lower increases than the Minnesota and Texas approaches, it would produce the recommended rate increase.

C. Minnesota Approach

Key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Blended if-knew / makeup approach to address the shrinking block issue.
   a. The if-knew concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.
   b. The makeup concept is for a premium to be charged going forward to return the block to its original lifetime loss ratio.
   c. The blending method helps ensure concepts discussed in public NAIC LTC subgroup calls from 2015 to 2019 are incorporated, including the concept that rates will not substantially rise as the block shrinks (as policyholder persistency falls over time).

---

2. Cost-sharing formula that increases the companyinsurer’s burden as cumulative rate increases rise.
   a. This addition to company the insurer’s burden moves rates away from a direction that could potentially be seen as misleading. The companyinsurer likely had or should have had more information on the likelihood of large rate increases than the consumer had at the time the policy was issued.

3. Assumption review
   a. Verification that the companyinsurer’s original and current assumptions are indeed drivers of the magnitude increase in lifetime loss ratio presented by the companyinsurer.
   b. Verification of appropriateness of current assumptions.
      i. A combination of credible companyinsurer experience, relevant industry experience, and regulatory-professional judgement is applied.
      ii. For areas of uncertainty, such as older-age morbidity, conservatism may be added to the companyinsurer-provided assumptions. This conservatism can be released as credible experience develops.

4. Interest rate / investment return component
   a. The Minnesota approach considers changes in expectations regarding interest rates and related investment returns in a manner consistent with how other key assumptions are considered. Reasons include:
      i. Changes in market interest rates are among the key factors driving profits and losses associated with blocks of LTC business.
      ii. In the Minnesota approach, all factors impacting the business are considered.
         1. If interest rates rise, this would tend to lead to lower rate increase approvals. Note, in this scenario, if interest rate changes were not considered, it is possible an companyinsurer would get approval for rate increases even when profits on the block were higher than expected.
         2. If interest rates fall, this would tend to lead to higher rate increase approvals.
      iii. To prevent shifting of “good assets” and “bad assets” to supporting LTC rates, and to prevent an companyinsurer from increasing rates based on risky investments that turned into losses, an index of average corporate bond yields (e.g., Moody’s) is relied on to reflect experience and current expectations.
      iv. Original pricing typically includes an assumption on investment returns (for which premiums and other positive cash flows are assumed to accumulate). This forms the interest component of the original assumption.
      v. The original pricing investment return in iv is compared to the average corporate bond yields in iii to determine the adversity associated with the interest rate factor.

5. Anti-bait and switch adjustment Original Assumption Adjustment
a. If original mortality, lapse, or investment return assumptions were out of line with industry-average assumptions at the time of original pricing, the original premium is replaced by a “benchmark premium”.
   i. This results in a lower rate increase.
   ii. This adjustment wears off over 20 years from policy issue.
      1. The rationale for the wearing off of this adjustment is the assumption that no company insurer would intentionally underprice a product knowing it would suffer losses for 20 years and then hope to offset a portion of that loss with a rate increase.
   iii. This adjustment is intended to prevent bait & switch, where, e.g., an company insurer would underprice a product, gain market share, and then immediately request a rate increase.

D. Texas Approach

The Texas approach to the actuarial review of rate changes was developed in response to the NAIC Long-Term Care Pricing (B) Subgroup’s discussions regarding the recoupment of past losses in LTCI rate increases. The Texas approach relies upon a formula intended to prevent the recoupment of past losses by calculating the actuarily justified rate increase for premium-paying policyholders based solely on projected future (prospective) claims and premiums.

Key aspects of the Texas approach to the actuarial review of rate changes include:

1. Past losses are assumed by the company insurer and not by existing policyholders. An approach that considers past claims in the calculation of the rate increase, such as a lifetime loss ratio approach, permits to some extent, the recoupment of past losses.

2. Calculates the rate increase needed to fund the prospective premium deficiency for active, premium-paying policyholders based on an actuarially supported change in assumption(s). This ensures that active policyholders do not pay for the past claims of policyholders who no longer pay premium.

3. Data Requirements for Calculation:
   a. The following calendar year projections, including totals, for current premium-paying policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate:
      i. Present Value of Future Benefits (PVFB) under current assumptions.
      ii. PVFB under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
      iii. Present Value of Future Premiums (PVFP) under current assumptions.
      iv. PVFP under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
         • (Note that for all 4 projections above, the projection period is typically 40-50 years, although some companies project for 60 or more years.)
To emphasize, these projections should only include active policyholders currently paying premium and should not include any policyholders not paying premium (e.g., policies on waiver, on claim, or paid up), regardless of the reason. Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption.

Also, the company insurer should identify and explain any estimates or adjustments to the data, as applicable.

4. Assumptions
   a. Rate increases are commonly driven by a change to the persistency, morbidity, or mortality assumption, or a combination of the three.
   b. Verification that assumption change(s) are supported by credible data.
   c. The interest rate is the same for all four projections. This ensures that interest rate risk is assumed by the company insurer, not the policyholder.

The formula used in TX approach is provided in Appendix C.

E. Reduced Benefit Options (RBO)

In 2020, Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (“LTCI RBO (EX) Subgroup”) of the LTCI (EX) Task Force, developed a list of RBO principles to provide guidance for evaluating RBO offerings in Appendix D.

1. RBOs in MSA Advisory Report

As part of the MSA Review, the MSA Team will perform a limited review of the reasonableness of RBOs included in the rate proposal that are extracontractual. The MSA Advisory Report will highlight how the company insurer demonstrates the proposed RBOs’ reasonableness. Note that the MSA Team will not perform an assessment of RBOs in relation to individual state specific requirements for RBOs. The purpose of the guidance in the MSA Advisory Report is to provide initial information about the RBOs with which the state insurance regulators can then utilize to perform a more detailed assessment specific to their state’s requirements. As the MSA Review process develops and as the LTCI RBO (EX) Subgroup continues its work, this area of review may evolve.

2. Future RBOs

As the industry continues to innovate new RBOs for consumers, the MSA Review process will likewise develop and evolve to consider the reasonableness of RBOs. Additionally, as the MSA Review process evolves, additional regulatory expertise with RBOs may be added to the MSA Team in the future. To achieve more consistency across states in their understanding and consideration of RBOs, the LTCI (EX) Task Force will encourage its appointed Subgroup and/or an appropriate NAIC actuarial committee or group, to collectively consider new RBOs, as they arise. This process will provide for input and technical advice from actuaries and non-actuarial experts to the state insurance departments as they exercise their authority in considering RBOs as part of rate filings. States and insurers are therefore encouraged to discuss new and developing RBOs through this process.
F. Non-Actuarial Considerations

The LTCI (EX) Task Force continues to review and consider non-actuarial considerations impacting states’ approval or disapproval of LTCI rate changes to develop consensus among jurisdictions and develop recommendations for application of these considerations. These considerations include such topics as:

- Caps or limits on approved rate changes
- Phase-in of approved rate changes over a period of years
- Waiting periods between rate change requests
- Considerations of prior rate change approvals and disapprovals
- Limits or disapproval on rate changes based solely or predominately on number of policyholders in a particular state
- Limits or disapproval on rate changes based on attained age of the policyholder
- Fair and reasonableness considerations for policyholders
- Impact of the rate change on the financial solvency of the insurer

1. Considerations in MSA Advisory Report

As part of the MSA Review, the MSA Team will identify relevant aspects of the insurer’s rate proposal, based on the information provided by the insurer, that may be impacted by a state’s non-actuarial considerations. Note that the MSA Team will not perform a state-by-state review of each state’s non-actuarial considerations, statutes, or practices. Instead, the MSA Team will highlight in the MSA Advisory Report those aspects of the rate proposal that relate to or that may be impacted by non-actuarial considerations. The purpose of this guidance in the MSA Advisory Report is to prompt state insurance regulators to contemplate those impacted aspects of the rate proposal when completing their individual state’s rate review. For example, the MSA Advisory Report may highlight:

- If cumulative rate increases are high, as this may impact the cost sharing formula
- If a rate proposal is for a block of business where the average policyholder age is predominately 85 or above, as this may impact states that consider age caps
- If it is determined the block of business will likely continue to incur substantial financial losses and impose a potential solvency concern, as this may impact the potential need for adjustments to the cost-sharing formula
- Aspects of coordination of rate and reserving review, as this may signify adjustments to the methodology assumptions used by the MSA Team in their review

2. Future Non-Actuarial Considerations

The MSA review process will continue to develop and evolve as it is implemented. To achieve more consistency and minimize the number of differences across states in their application of other non-actuarial considerations in rate review criteria for LTCI rate filings, the LTCI (EX) Task Force will encourage its appointed Subgroup or an appropriate NAIC actuarial committee or group, to collectively consider new future non-actuarial considerations, as they arise. This process will provide for input and technical advice from actuaries to states as they exercise their authority in considering non-actuarial factors. States are therefore encouraged to discuss new and developing practices and/or recommendations in this area.
VI.C. APPENDIX C—ACTUARIAL APPROACH DETAIL

A. Minnesota Approach

Details on the key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Review of current assumptions for appropriateness, reasonableness, justification, and support.
   a. A combination of credible company insurer experience, relevant industry experience, and regulatory professional judgement is applied.

2. If-knew premium and makeup premium aspects – aggregate application
   a. Makeup percentage
      i. \( \frac{[PV \text{ (claims)} / \text{original LLR}] - PV \text{ (past premium)}}{PV \text{ (future premium)}} - 1 \)
      ii. Premiums in the formula reflect the actual rate level.
   b. If-knew percentage
      i. \( \frac{[PV \text{ (claims)} / PV \text{ (premiums)}]}{\text{original LLR}} - 1 \)
      ii. Premiums in the formula are at the original rate level.
      iii. The concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.
   c. Definitions and explanations
      i. PV means present value
      ii. LLR means lifetime loss ratio
      iii. Interest rates underlying PVs and LLRs are based on:
         1. For original PVs and LLRs, the interest rate is the investment return assumed in original pricing. Note that this rate is typically different than the statutory LLR discount rate.
         2. For current PVs, the interest rates are the average corporate bond yields over time for each year minus 0.25% (to account for expected defaults). For projections beyond the current year, phasing over 5 years of the current rate to a target rate (currently 4%) is assumed.
      iv. PV calculations are based on actual, current experience and expectations for persistency, morbidity, and interest rate
      v. Company insurer provide premium and claim cash flows may be adjusted based on assumption review.
      vi. Makeup percentage is similar to that attained by the loss ratio approach.

3. If-knew premium and makeup premium aspects – sample policy-level verification
   a. Over a range of issues years, issue ages, benefit periods, and inflation protection:
      i. Calculate an estimate of the original premium
         1. Based on original pricing assumptions for persistency, morbidity, investment returns, and expenses.
2. Apply first principles
   a. For each policy year, calculate PV of claims and expenses, applying mortality, lapse, morbidity, and expenses, discounting at original investment rates.
   b. Add the PV of claims expenses for each policy year to attain PV of claims & expenses at issue.
   c. Divide by the sum of the PV of an annuity of 1 per year
   d. Multiply \( \frac{\text{b}}{\text{c}} \) times \((1 + \text{originally assumed profit percentage})\) to attain the original premium.
   e. This premium provides the basis for comparison against the makeup and if-knew premium.

3. Replace the original premium with a benchmark premium
   a. If the benchmark premium is higher than the original premium and original pricing (reflected in mortality, lapse, and investment return assumptions) were out of line with industry-average assumptions at the time of original pricing.
   b. The benchmark premium is phased back into the original premium proportionally over 20 years from issue.
   c. The benchmark aspect is intended to prevent bait & switch.

ii. Calculate an estimate of the makeup premium.
   1. Calculate the original dollar PV of profits for the sample policy using original pricing assumptions.
   2. Calculate an updated dollar PV of profits for the sample policy using:
      a. Actual history of premiums and claims.
      b. Expectations of future claims.
      c. “Backed into” makeup premium.
   3. Note that attaining the same dollar PV of profits for a sample policy leads to a lower makeup premium than attaining the same percentage PV of profits (as a percentage of premium).
      a. The reason for target the dollar instead of percentage is to avoid the dollar amount of profit being higher as premium rates increase.

iii. Calculate an estimate of the if-knew premium.
   1. The calculation is the same as for the original premium, except it is based on current assumptions instead of original pricing assumptions.

b. Verifying the impact on expectation changes on rates
   i. While lapse, mortality, and interest rate experience and assumptions are fairly routine to track (for determination of the rate impact), morbidity experience and assumptions tend to be difficult to track.
   ii. A combination of information is relied up to estimate the impact of morbidity expectation deviations (from original pricing) on rates. This information includes:
      1. Original and current claim incidence and claim length by age and other factors. Incidence and length are tracked separately for some companies and combined for others.
      2. Experience
3. Impact on LLR of changes in expectations of morbidity.
4. Industry information and trends (for reasonableness checks).
   c. Assumptions underlying the calculations of estimates of premiums may be adjusted as part of the review. For instance:
      i. If sample policy verification shows less impact on rates due to changes in lapse, mortality, interest rate, and morbidity expectations than demonstrated in the company's aggregate projections, past or projected premiums or claims may be adjusted in the original, makeup, or if-knew premium calculations.
      ii. If there is wide variance in practice among companies in morbidity assumptions at ages where data is of low credibility, adjustments may be made to help ensure similar situations result in similar rate increase approval amounts.
         1. A balanced approach is pursued, recognizing that providing full or zero credit for partially credible experience may result in harmful consequences (excessive rates or later rate shocks).
         2. Any reductions to rate increases caused by lack of credible experience can potentially be reversed in subsequent rate increase requests as credibility increases.
      iii. Similar adjustments may apply when incomplete or inconsistent information is provided by the company (after initial attempts to resolve significant differences or gaps).
4. Reconciliation of aggregate and sample policy applications
   a. In many cases, the aggregate and sample policy applications will result in similar current LLRs.
   b. In other cases, some steps are taken to understand the difference, including additional requests for information.
   c. Because the sample policy application considers information only related to premium-paying policyholders, it is possible that differences between the aggregate and sample policy application are caused by inclusion of past premiums and all claims related to non-premium payers in the aggregate information.
   d. When reconciliation does now occur after rounds of communication, decisions will be made based on the information provided.
5. Blending – same for aggregate and sample policy applications
   a. The weighting towards the makeup premium is the percentage of original policyholders remaining.
   b. The weighting towards the if-knew premium is the percentage of original policyholders no longer having active policies, or 1 minus the percentage in ii.
   c. The blending of the if-knew premium and makeup premium helps ensure remaining policyholders are not held responsible for paying for adverse experience associated with past policyholders.
   d. The blending also helps limit cumulative rate increases at later durations; as the percentage of remaining policyholders approaches zero, the blended approval amount approaches the if-knew premium.
6. Cost-sharing formula that increases the company insurer burden as cumulative rate increases rise.
   a. The cumulative-since-issue, weighted if-knew / makeup premium-based increase is reduced by:
      i. No haircut for the first 15%;
      ii. 10% for the portion of cumulative rate increase between 15% and 50%;
      iii. 25% for the portion of cumulative rate increase between 50% and 100%;
      iv. 35% for the portion of cumulative rate increase between 100% and 150%;
      v. 50% for the portion of cumulative rate increase in excess of 150%.

7. Reduction for past rate increase:
   a. Take one plus the cost-sharing-adjusted blend amount and divide by one plus the previous, cumulative rate increases. Then subtract one. This is the approvable rate increase.

8. Summary
   a. Review current assumptions
   b. Calculate aggregate if-knew premium and makeup premium amounts. Calculate the blended amount.
   c. Calculate the sample policy estimated original premium, if-knew premium, and makeup premium. Calculate the blended amount.
   d. Reconcile aggregate and sample policy blended amounts. Set this blended amount aside.
   e. Apply the cost-sharing formula to the blended amount.
   f. Deduct past rate increases.
   g. Example – if:
      i. the original premium is $1,000
      ii. makeup premium is $3,000;
      iii. if-knew premium is $1,500;
      iv. 60% of policyholders remain;
      v. Past rate increases are 50%:
      vi. Blended amount is:
         1. $3,000 / $1,000 * .60 +
         2. $1,500 / $1,000 * .40
         3. – 1 =
         4. 180% + 60% - 1 = 240% - 1 = 140%.
      vii. Cost sharing is:
         1. 100% * .15 +
         2. 90% * .35 +
         3. 75% * .5 +
         4. 65% * .4 =
viii. Deduction for past rate increases results in:

1. \[
\frac{(1 + 1.1)}{(1 + .50)} - 1 =
\]

2. 40%.

B. Texas PPV Formula

Details on the PPV Formula of the Texas approach to the actuarial review of rate changes include the following. To reiterate, the formula is limited to active, premium-paying policyholders.

For rate stabilized policies:

\[
\text{rate increase} \% = \frac{\Delta PV \left( \text{future incurred claims} \right) - \left( \frac{.58 + .85C}{1 + C} \right) \Delta PV \left( \text{future earned premiums} \right)}{.85 PV_{current} \left( \text{future earned premiums} \right)}
\]

Where:

\( \Delta \) indicates the change in PV due to the change in actuarial assumptions between the time of the last rate increase (or original pricing if no prior rate increase) and the current assumptions.

\( C \) is the cumulative % rate increase to date. For example, if the current rate (prior to the proposed rate increase) is 50% higher than the rate at initial pricing, then \( C = .5 \).

The current subscript in the denominator indicates that the PV should be computed using current assumptions. The future earned premiums in the formula are based on the current premiums prior to the proposed rate increase. (Regulators may wish to consider the addition of margin to the rate increase. For example, the \( \Delta PV(\text{future incurred claims}) \) term in the above formula could be multiplied by \( (1 + \text{margin}) \).

For pre-rate stabilized policies, we use .6 in place of .58 and .8 in place of .85:

\[
\text{rate increase} \% = \frac{\Delta PV \left( \text{future incurred claims} \right) - \left( \frac{.6 + .8C}{1 + C} \right) \Delta PV \left( \text{future earned premiums} \right)}{.8 PV_{current} \left( \text{future earned premiums} \right)}
\]

Prior to the time that Texas adopted the PPV approach, a past requested rate increase may have been reduced by the regulator by a method other than the PPV approach. In this situation, for a current filing, the regulator may make adjustments to the current approvable amount based on what would have been approved had PPV been used in the prior filing.
VI.D. APPENDIX D—PRINCIPLES FOR REDUCED BENEFIT OPTIONS (RBO) ASSOCIATED WITH LTCI RATE INCREASES

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (“LTCI RBO (EX) Subgroup”) of the LTCI (EX) Task Force, was charged to “Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.” In completing this charge, the Subgroup developed the following list of RBO principles to provide guidance for evaluating RBO offerings.

A. Principles and Issues

As related to:

1. Fairness and equity for policyholders who elect an RBO:
   - If some policyholders facing a rate increase are being offered an RBO but not others, an adequate explanation is needed.
   - Each RBO should provide reasonable value relative to the default option of accepting the rate increase and maintaining the current benefit level.

2. Fairness and equity for policyholders who choose to accept rate increases and continue LTCI coverage at their current benefit level:
   - The extent of potential anti-selection should be analyzed, with consideration of the impact on the financial stability of the remaining block of business and the resulting effect on the remaining policyholders.

3. Clarity of communication with policyholders eligible for an RBO:
   - Policyholders should be provided with maximum opportunity and adequate information to make decisions in their best interest.
   - Companies should present RBOs in clear and simple language, format and content, with clear instructions on how to proceed and whom to contact for assistance.

4. Consideration of encouragement or requirement for an companyinsurer to offer certain RBOs:
   - Regulators should evaluate legal constraints, the impact on remaining policyholders and companyinsurer finances, and the impact on Medicaid budgets if encouraging or requiring reduced LTCI benefits.

5. Exploration of innovation, particularly where an outcome of improved health and lower claim costs are possible:
   - Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases, e.g., providing hand railings for fall prevention in high-risk homes, and identifying the pros and cons of such an approach.
B. Widely Established RBOs in Lieu of Rate Increases

1. Reduce inflation protection going forward, while preserving accumulated inflation protection.
2. Reduce daily benefit.
3. Decrease benefit period/maximum benefit pool.
4. Increase elimination period.
5. Contingent nonforfeiture.
   i. Claim amount can be sum of past premiums paid.
   ii. Only receive that benefit if the policyholder qualifies for a claim.

C. Less Common RBOs for Potential Discussion

1. Cash buyout.
2. Copay percentage on benefits.

As the industry continues to innovate new RBOs for consumers, such as the two listed above, the MSA review process will likewise develop and evolve to consider the reasonableness of these RBOs. The LTCI (EX) Task Force will encourage its appointed Subgroup or an appropriate NAIC actuarial committee or group, to collectively consider new RBOs, as they arise, that provides for input and technical advice from actuaries to states as they exercise their authority in considering RBOs as part of rate filings.

VI.E. APPENDIX E—GUIDING PRINCIPLES ON LTCI REDUCED BENEFIT OPTIONS PRESENTED IN POLICYHOLDER NOTIFICATION MATERIALS

In 2020, LTCI RBO (EX) Subgroup of the LTCI (EX) Task Force adopted the following guiding principles to ensure quality of consumer notices of rate increases and RBOs. This section seeks to provide guiding principles in answering this question: “What are the recommendations for ensuring long-term care insurance policyholders have maximized opportunity to make reduced benefit decisions that are in their best interest?”

To complete the charge, the LTCI RBO (EX) Subgroup 1) evaluated the quality of consumer notices and RBO materials presented to policyholders; 2) considered the relevant lessons learned and consumer focus group studies from the liquidation of LTC insurer Penn Treaty Network of America; 3) reviewed existing RBO consumer notice checklists or principles from multiple states (i.e., Nebraska, Pennsylvania, Texas and Vermont); and 4) addressed stakeholder comments on RBO principles.

This document is intended to establish consistent high-level guiding principles for long-term care insurance reduced benefit options presented in policyholder notification materials. These principles are guidance and do not carry the weight of law or impose any legal liability.

Recognizing that each component outlined in these principles will not apply in all circumstances, this section:

- RECOMMENDS that insurance companies recognize these fundamental principles.
CALLS ON all insurance companies to consider the following principles in communicating reduced benefit options available to consumers in the event of a rate increase.

UNDERLINES that the following principles are complementary and should be considered as a whole.

A. Filing Rate Action Letters

Insurers should consider:

- Sending rate actions after the state has approved the rate action filing.
- Making the rate action effective on a policy anniversary date, recognizing that the Long-Term Care Insurance Model Regulation (#641) allows for the next anniversary date or next billing date.
- Mailing rate increase notification letters at least 45 days prior to the date(s) a rate action becomes effective, consistent with any applicable state laws and/or regulations.
- Sending rate increase notifications each year for rate increases that are phased-in over multiple years.
- Disclosing all associated future planned rate increases approved by regulators in the initial and phased-in rate increase notification letters.
- Filing rate action letter templates in the NAIC System for Electronic Rate and Form Filing (SERFF) rate increase filing to include statements of variability and sample letters highlighting the differences between the communications, consistent with any applicable state laws and/or regulations.
- Presenting innovative options to state insurance regulators prior to filing new reduced benefit options.
  - This enables regulators to evaluate potential anti-selection, adverse morbidity, and implications to consumers and future claims experience.

B. Readability and Accessibility

Insurers should consider:

- Drafting a rate action letter that is easy to follow, flows logically, and displays the essential information and/or the primary action first, followed by the nonessential information.
- Presenting the reduced benefit options in a way that is comprehensible, memorable, and adjusted to the needs of the audience.
- Using cover pages, a table of contents, glossaries, plain language, headers, maximized white space, and appropriate font size and reading level for the intended audience.
- Using illustrative tools, such as bullet points or illustrations as appropriate, and graphs or charts enabling a side-by-side comparison.
- Including definitions of complex terms; and if a term, subject or warning is repeated throughout the communication, consider making the language consistent throughout the document.
- Including a question-and-answer section that is succinct but answers the commonly asked questions in plain language.
- Providing appropriate accommodations for policyholders with disabilities or for policyholders for whom English is not a first language.
C. Identification

Insurers should consider drafting the RBO communication in a way that helps policyholders understand:

- What is happening?
- Why is it happening to them?
  - Ensure the letter does not negatively reference the state insurance department.
- When is it happening?
- What can they do about it?
- How do they take action?

D. Communication Touch and Tone

Insurers should consider:

- Drafting the communication in a way that helps policyholders envision or reflect on the reason(s) why they purchased a long-term care insurance policy.
- Conveying as much empathy as possible regarding the impact a rate action(s) may have on policyholders.
- Presenting reduced benefit options fairly, refraining from the use of bolding, repeating or emphasizing one option over another.
- Displaying the policyholder’s ability to maintain current benefits by paying the increased premium.
- Using word choices that appreciate how those words could influence a policyholder’s decision.
  - For instance, consider using “now” instead of “must”; or “mitigation options,” “offset premium impact” or “manage an increase” instead of “avoid an increase.”

E. Consultation and Contact Information

The insurer should consider listing multiple contacts in the communication in an easy-to-identify location to include when available; phone number; email address; and website. For example:

- Customer service.
- Lapse notifier.
- Insurance producer.
- State insurance department.
- State Health Insurance Assistance Program (SHIP).

The insurer should consider suggesting policyholders consult a family member or other trusted advisor, such as:

- Lapse notifier.
- Insurance producer.
- Financial advisor.
- Certified personal accountant or tax advisor (in the event cash buyouts are offered).

F. Understanding Policy Options

Insurers should consider the presentation of the communication by:

- Identifying what necessitated the communication on the first page.
  - For example, the header could say, “Your Long-Term Care Premiums Are Increasing.”
- Including the reduced benefit options with the rate action letter.
Limiting the number of options displayed on the letter to no more than four or five.

Identifying which reduced benefit option(s) have limited time frames.

Advising policyholders that they can ask about reducing their benefits at any time, regardless of a rate increase.

Providing enough information in the communication to make a decision.
  - If supplemental materials (e.g., insurer’s website) are provided, they would enhance the policyholder’s understanding, but not be necessary to use when making a decision.

Insurers should consider indicating the window of time to act by:

- Clearly indicating what the policyholder’s premium will increase to and by when.
- Displaying the due date(s) in an easy-to-identify location and repeating it multiple times throughout the document.
- Clearly differentiating due date(s) for each RBO, if available for a limited time.

Insurers should consider including disclosures regarding rate increase history:

- Disclosing that future rate actions could occur.
- Advising if prior rate actions have or have not occurred to include:
  - Policy form(s) impacted.
  - Calendar year(s) the policy form(s) was available for purchase.
  - Percentage of increase approved to include the minimum and maximum, if they vary by benefit type.
- Reminding policyholders that their policy is guaranteed renewable.

Insurers should consider advising policyholders of their current benefits:

- For example, the communication could disclose the policyholder’s current benefits to include:
  - Daily maximum amount.
  - Inflation option.
  - Current pool of benefits for policies with a limited pool of benefits.

Insurers should consider personal needs decision-making by:

- Only listing reduced benefit options that are available to the policyholder.
- Calling on policyholders to reflect on how each option could impact them personally.
- Prompting policyholders to consider their unique situation to include their current age, health conditions, financial position, availability of caregivers, spouse or partner impacts, and the potential need for institutionalized care.
- Reminding policyholders to consider the cost of care in the area and setting where they expect to receive care.
- Informing policyholders of factors that impact long-term care costs, such as:
  - The average cost of care for in-home care, assisted living, and nursing home care in their area.
  - The inflation rate of the cost of care for in-home and nursing home care in their area.
  - The average age and duration of a long-term care claim for in-home and nursing home care.
  - Factors that influence the age, duration and cost of a claim.
- Disclosing to policyholders when an RBO falls below the cost of care in their area.
- Calculating for policyholders the number of days or months a paid-up option could cover based on the cost of care in their area.
  - Buyout or cash-out disclosures.
The cash offerings, if any, should disclose to policyholders that the option could result in a taxable event and they should consult with their certified personal accountant and/or tax advisor before electing this option.

Insurers should consider the value of each option by:
- Disclosing if the RBOs may not be of equal value and are dependent on the unique situation of each policyholder.

Insurers should consider communicating the impact of options by:
- Displaying the options in a way that enables policyholders to compare options, including details such as:
  - Daily/monthly benefit.
  - Benefit period.
  - Inflation option.
  - Maximum lifetime amount.
  - Premium increase percentage and/or new premium.
  - Nonforfeiture (NFO) or contingent nonforfeiture (CNF) amount.
  - If the policy is Partnership qualified, changes to benefits may impact Partnership status.
  - Current premium.
- Providing a series of questions to help policyholders contemplate the implications of each action, such as:
  - What will happen if they take no action?
  - What will happen if they make no payment before the policy anniversary date?
  - If they accept the full increase without reducing their benefits, how will they handle potential future rate increases?
  - If they elect the cash buyout, there could be tax implications.
  - If they elect a paid-up nonforfeiture option, how long will the reduced benefit last if they had a claim?
  - If they were to increase their elimination period from 30 days to 100 days, do they have enough funds to cover those expenses?
  - Partnership policies: Will reducing the benefits remove Partnership qualification? If so, the letter should explain that their asset protection may be removed or reduced.

When rate actions span over multiple years, insurers should consider:
- Disclosing the full rate increase amount, how it is spread out across multiple years, and all associated future planned rate increases approved by regulators.
- Specifying if the premium increase referenced is the first, second, third, last, etc.
- Offering contingent nonforfeiture based on the full increase amount and offered with each phase of the rate action.
- Notifying policyholders at least 45 days in advance of each phase of the rate increase, consistent with any applicable state laws and/or regulations.
Summary of Comments on MSA Actuarial Framework Exposure – July 26, 2021

| 9/15/21 | ACLI/AHIP | 4. The MSA's Actuarial Review standards/recommendations for participating states should include an acknowledgment that the recommendations for rate approvals do not reflect lifetime rate inequalities resulting from inconsistencies in the amount and/or timing of historical rate approvals between states, even on policies that offer identical coverage. We believe the standards should encourage states to work with filing companies to address these inequities and that the MSA Team should continue to assess this issue to determine if more specific guidance is appropriate.

At this time the MSA recommendation, for the filed rate increase, could be what the Texas or Minnesota method generates a blend of the two methods, or using professional actuarial judgement the MSA Team may recommend a rate increase outside of these two methods. Our methods may evolve over time as the MSA Team continues to study the future process that may generate similar or unique results.

<th>Section V.B. Loss Ratio Approach</th>
</tr>
</thead>
</table>
| **Academy**                     | The tone of several sections of the document seems to unnecessarily impute suspect motivations to companies who sold and/or currently sell LTC insurance:  
Section V.B.4(b) states that the loss ratio method results in “low incentive for responsible pricing.” Practicing LTC pricing actuaries are responsible for compliance with all relevant actuarial standards of practice, and a company has incentives to price appropriately. Most companies would prefer to receive premium sooner rather than later. Additionally, there are the costs associated with filing and implementing a rate increase and the impact on policyholders of premium adjustments.  
See edit to this bullet in Section V.B.4.b.  
|  
| **Financial Medic LLC**         | Addressing Actuarial Review, Loss Ratio Approach, Section B, point 4:  
The admission that past losses, known as premiums that were insufficient since inception, confirms our independent findings. We find evidence that some regulators reject the past loss theory without foundation of data science and accounting practices. We add that it is not merely the principle of past underpricing that is subject to recapture. The LRA is based on present value (PV) calculations, thus the shrinking number of policyholders (SNOP) are also charged interest based on the carrier’s discount rates, as though signing an LTCI contract involved a hidden lending arrangements.  
Typical example (2021): A recent rate increase for a large carrier expands SNOP premium to 4.02x original premium though the book remains considerably underpriced using LRA (at an LLR of 111%). Through standard accounting procedures, the new premium is calculable and allocatable to 3 distinct components. We do not see recovery of principal and its interest being reported in narratives or financial statements from LTCI actuaries in carrier filings or regulatory final dispositions. This non-disclosure misleads all LTCI stakeholders. We note that the expanding pie in premium growth in rate filings 2020+ are mainly due to the two recovery components while Fair Pricing remains static.  
We ask how the industry came about the LRA method and not Repriced in Accordance with Level Premium Precepts (Fair Pricing) as the product was originally intended and sold to clients.  
The Actuarial Review raises fundamental questions as to the technical purity of rate adjudication methods yet the industry appears to be unduly focused on RBO. This is *cart before the horse logic* in our professional opinion.  
MN & TX deal with the past loss issue, but in different ways.

<td>18</td>
<td>Academy</td>
<td>For rate-stabilized business, the draft states that the 58/85 test “would produce the recommended rate increase” if lower than the Minnesota and Texas approaches. Why would these approaches potentially override and reduce the recommended rate increase, when the rate stability model was already intended to address the issues with loss ratio regulation described in the preceding paragraph of the Framework?</td>
<td></td>
</tr>
<tr>
<td>19</td>
<td>Academy</td>
<td>Section V.C.1(c) cites “concepts discussed in public NAIC LTC pricing subgroup calls from 2015 to 2019,” which provides inadequate documentation to include in a regulatory procedure document. Rate filing actuaries may not be aware of the content of past calls. We suggest citation to particular documents, such as adopted summaries or minutes of the referenced calls, if available. Added footnote in Section V.D. to NAIC Library for past proceedings.</td>
<td></td>
</tr>
</tbody>
</table>
| 20 | Academy | The tone of several sections of the document seems to unnecessarily impute suspect motivations to companies who sold and/or currently sell LTC insurance:  
- Section V.C.2(a) refers to “a direction that could be seen as misleading.” Subparagraph (a) could be deleted entirely without affecting the definition of the Minnesota approach.  
- Section V.C.5, “anti-bait and switch adjustment,” where we suggest a less pejorative term could be used. In the context of a rate increase review, see our comments above regarding industry standards and benchmarking. The concern regarding potential deliberate underpricing to boost market share, expressed in subparagraph 5(a)(iii), is best addressed in the context of an initial rate review by regulators. Edited paragraph title. Topic under consideration for future discussion among actuary groups. No other specific changes to the Framework. |  |
| 21 | Academy | Section V.C.5(a) refers to “industry-average assumptions at the time of original pricing” for LTC products.  
- Where are these averages reliably to be found?  
- How are variations in product, carrier, distribution channel, and other factors taken into account?  
- What level of deviation from these averages (in one or more assumptions) would be considered “out of line” and trigger the use of “benchmark premium,” rather than actual original premium, in the MSA Review Team’s review process?  
- Recognizing that regulators who approved a company’s original product and rate filings had the opportunity to review all relevant assumptions at the time of filing, and may not have enforced or suggested the use of industry averages at that time, it may not be appropriate to determine benchmark premiums with 20/20 hindsight uniformly for all product filings and company characteristics. There was enough demand to eliminate incentive for bait & switch that a broad-brush approach was developed – not perfect but generally effective. Mortality, lapse, and investment returns are focus – able to look at average assumptions for each year of issue. Topic under consideration for future discussion among actuary groups. No edits to the Framework as these topics are more detailed than intended for the Framework. |  |
<p>| 22 | ACLI/AHIP | 7. The description of the Minnesota methodology includes a focus on underlying assumptions and indicates that the reviews are benchmarking to industry-average assumptions. See response to Academy comment #21. | Added “e.g., Moody’s” |</p>
<table>
<thead>
<tr>
<th>#</th>
<th>Source</th>
<th>Section</th>
<th>Text</th>
</tr>
</thead>
</table>
| 23 | ACLI/AHIP | 8. | How are those assumptions calculated?  
Will they be provided to companies?  
Similarly, what is the “average corporate yield bond” index that will be used under the Minnesota method? |
|   | ACLI/AHIP | 9. | The “anti-bait and switch adjustment” under the Minnesota method appears to suggest the insurers intentionally underpriced LTC products.  
How would the MSA Team make this determination?  
How are the “industry-average assumptions at the time of original pricing” determined?  
Are product and underwriting differences accounted for?  
How far from the industry average is considered reasonable?  
Wouldn’t such assumptions only be considered unreasonable in hindsight considering the product was originally approved by the state insurance department? |
|   | ACLI/AHIP | 10. | The Minnesota Approach accounts for changes in interest rates; the Texas Approach explicitly does not.  
How do these conflicting approaches achieve similar results?  
The same is true in cases of solvency concern – the document states that the cost-sharing formula in the Minnesota Approach can be adjusted.  
How will the cost-sharing formula be adjusted?  
How is solvency accounted for in the Texas Approach? |
|   | ACLI/AHIP | 13. | The Framework states that the MSA Team’s review of rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. In addition, the MSA Team will apply the Minnesota (Blended If-Knew/Make-Up) and Texas (Prospective Present Value) approaches, as described in the 2018 NAIC LTC Pricing Subgroup’s paper – Long-term Care Insurance Approaches to Reviewing Premium Rate Increases (“NAIC Pricing Subgroup’s Paper”), to calculate recommended, approvable rate increases. In reviewing the methodologies, we noticed that specific components of the Texas method are not clearly included. In addition, there were changes or additions to adjustments made to the Minnesota method. The NAIC LTC Pricing Subgroup’s paper was the result of a deliberate and collaborative effort on the part of regulators and industry in 2018, during which each method was fully vetted. We believe that any kind of change to the methods outlined in that document should occur only after the same robust discussion and review. For example: |
|   | ACLI/AHIP | 13. | Framework allows for flexibility when applying the MN, TX or any other approach to deal with unforeseen circumstances, data limitations, etc. Circumstances will be addressed on a case-by-case basis.  
Catch up and transition are concepts applied after the TX PPV is calculated. The base TX PPV amount applies to a typical case (across states). |
<p>|   | ACLI/AHIP | 13. | No edits to the Framework. |</p>
<table>
<thead>
<tr>

<tbody>
<tr>
<td>a.</td>
<td>Under the Texas method, the catch-up and transitional provisions are not clearly included. As outlined in the NAIC LTC Pricing Subgroup's Paper, we believe these are valid and important adjustments that should be considered when applying the Texas method. The catch-up provision is intended to account for necessary additional premiums in a new rate increase related to assumptions provided to the department at the time of a previous rate increase request that were not approved in conjunction with the prior filing(s). Likewise, the transition provision, for pre-rate stability products and other products where the last rate increase request was voluntarily reduced by the company, provides the ability to make a single filing to provide the full amount of premium necessary to meet the actuarial certification.</td>
</tr>
<tr>

</tr>
<tr>
<td>13.b.</td>
<td>With respect to the “anti-bait and switch adjustment” under the Minnesota method, we strongly disagree with the inclusion of this adjustment. We believe the name itself draws a legal conclusion and submit that any reference to this type of adjustment should be categorized as an “original assumption adjustment”.</td>
</tr>
<tr>
<td>27</td>
<td>Financial Medic LLC</td>
</tr>
<tr>
<td></td>
<td>Our firm agrees with what the Texas Approach is designed to address, Section D points 1 and 2. Point 3 describes a general methodology of looking at forward “deltas” (both present value premiums &amp; claims, along with rate history) as the primary drivers of rate changes. Appendix C, Section B provides a formula that allows our firm to back test with a small code snippet to our LTCI processing subsystem that already had a forensic analysis capability. We encountered cases were the future claim “delta” was small relative to future premium “delta” such that a premium reduction would be called for. The Texas approach provides a useful filtering mechanism. (refer to the full comment letter for example). The claim “delta” was exactly zero, a perfect overlap, yet the regulatory agency granted a 40% increase. The stock language of the actuarial narrative based the increase on an expected deterioration of future claims. Accounting procedures refute the actuarial narrative but a simple picture tells the story even better absent professional formalities. The Texas proposal acknowledges that the methodology would not work for a first time increase as not “deltas’ exist. Moreover, we discovered the formula by itself is not a complete specification. For example, when measuring future “deltas” form one filing to the next, the specification does not clarify the source of PVs to be used for the baseline (old) filing. In our experience, many rate requests are not granted in full thus the baseline filing would not be a good source of information unless there were a recalculation of PV futures as adjusted by the actual rate increase.</td>
</tr>
<tr>
<td></td>
<td>MN &amp; TX approaches address issue with past losses.</td>
</tr>
<tr>
<td></td>
<td>No edits to the Framework.</td>
</tr>
</tbody>
</table>
that would cause stakeholders to question why any methodological changes in being proposed, much less implemented, after significant economic harm. Our firm has received questions from clients, who (1) have lapsed, (2) paid more premium that they thought they should have, or (3) exercised an RBO – “have we been injured by the Loss Ratio Approach”? answering a resounding “yes”!

<table>
<thead>
<tr>
<th>Section V.F. Non-Actuarial Considerations</th>
</tr>
</thead>
<tbody>
<tr>
<td>28 Academy</td>
</tr>
<tr>
<td>The Framework contains various non-actuarial considerations that may be contemplated as part of the rate recommendation. We believe it is important to recognize that many of these considerations, while listed as non-actuarial, have actuarial aspects or implications. For example, the phase-in of a rate change over a period of years necessitates a higher cumulative rate increase to have the same financial impact as a single rate increase. Similarly, if limitations are imposed on when a company can file a future rate increase, such as a rate guarantee period, a future request may need to be higher due to the cost of waiting. Caps or limits on rate increase approvals that are not based on actuarial considerations likewise increase the size of future rate increases. In this situation, where necessary premium rate increases are delayed, policyholders pay higher premiums, and the ultimate necessary premium level increases due to the delays in approvals. It should also be noted that the Minnesota and Texas approaches, while primarily actuarial in presentation, already include decisions based on non-actuarial considerations, such as specific cost-sharing provisions and disallowing interest rate deviations as a reason for a rate increase. Finally, we believe that the MSA Review process may ultimately add little value if its actuarial conclusions are frequently overridden at the state level by non-actuarial considerations. The task force may wish to consider the degree of commitment demonstrated by Participating States when evaluating the success of the MSA Review program in meeting the NAIC’s objective of “developing a consistent national approach for reviewing current LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner.”</td>
</tr>
<tr>
<td>29 Academy</td>
</tr>
<tr>
<td>We note that “Fair and reasonableness considerations” is listed in Section V.F (Non-Actuarial Considerations). This is a broad and not-well-defined category allowing wide latitude in regulatory decision-making regarding the results of an analysis, distinct from the justification of actuarial assumptions.</td>
</tr>
</tbody>
</table>

Non-actuarial considerations are topics for future discussion.

No edits to the Framework.
|   | ACLI/AHIP | 9. Will the MSA Team recommendation reflect any non-actuarial considerations or is the document simply acknowledging their existence?  
10. A clear distinction needs to be made between non-actuarial considerations that should inform the MSA Team’s recommendations (like company solvency) and non-actuarial considerations that states might apply to the MSA Team’s recommendation (rate caps, phasing, age limits). The former should be a factor in the MSA Team’s regulatory actuarial judgment. To achieve The Task Force’s goal of a consistent national approach to rate actions, the MSA Team should seek to discourage the latter (unless required by a clear state statutory mandate).  
11. A primary goal of MSA Review Process is to achieve an adequate rate level for policyholders in all states. As proposed, the process gives states the discretion to continue to apply state-specific non-actuarial restrictions and caps on rate increase amounts. While we recognize the independence of each state’s authority, we note that allowing states to impose artificial rate caps on what the MSA Team has determined to be an actuarially justified rate likely will perpetuate the historical discrepancies between states, which will not address cross-state inequities. It will also undermine the Task Force’s charge to develop “a consistent national approach” to achieve “actuarially appropriate increases.” | #9 – acknowledging their existence. Non-actuarial considerations are outside the MSA team’s review.  
#10 - Solvency considerations are outside the calculation and are a consideration of individual states.  
See added subparagraph to Section V.A.  
#11 - States retain authority for final rate decisions.  
Non-actuarial considerations (caps, phasing, etc.) are topics for future discussion. |
|   | Washington | Can the rate changes recommended by the MSA team be implemented by all states and meet existing state laws and rules? If not, does this invalidate the actuarial work of the MSA team? Some states have capped an LTCI rate increase regardless of actuarial justification. If the MSA team recommends a higher rate increase than a particular state’s capped rate increase, the actuarial assumptions may no longer be valid. Also, those states without a rate cap will be continuing to subsidize the states with a rate cap. | Section I.E.1 states that the MSA Review is not specific to any state’s law and that individual states retain ultimate authority for rate decisions.  
Non-actuarial considerations are topics for future discussion.  
No edits to framework. |
| 31 | Vermont | On p. 14, in appendix D, Principles for Reduced Benefit Options (RBO) Associated with LTCI Rate Increases, it reads:  
*Exploration of innovation, particularly where an outcome of improved health and lower claim costs are possible:*  
- Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases, e.g., providing hand railings for fall prevention in high-risk homes, and identifying the pros and cons of such an approach. | VT provided an additional sentence. “In the case that an offering is tied to a rate increase, and involves the collection of consumer data, regulators should ensure that data collection and use is clearly disclosed and easily understood, that the consumer is made aware of any other available options, that the offer is not discriminatory, and that the rate impact is correlated to the offering. Consumer data should |

Appendix D. Principles for RBOs associated with LTCI rate increases
Rate increases for long-term care policies typically add thousands of dollars to the annual premium paid for the policy. These types of rate increases are significant and may be a hardship to elderly consumers on fixed incomes. Consumers may not be able to consider their own best interest in the face of a significant change to annual expenses. Any offer associated with a rate action, and which involves the collection of data through artificial intelligence should clearly explain how information will be collected and used to avoid profiting and potential discriminator actions on behalf of the insurer. Also, any offer to an insured tied to rate increases should be supported with data showing why and how the rate impact is directly correlated to the offer.

Consider this example:

- A consumer on a fixed income receives notice that long-term care premiums will increase by $3,000 annually.
- That consumer now faces $3,000 of new expenses.
- If the consumer checks a box, they will receive a smart device that will collect data from their home and computer.
- If they select this option, they will not have to pay any rate increase.

The consumer may not be in the position to act in their own best interest and may not be able to consider these options carefully for several reasons. First, the consumer may not fully understand the technology proposed, the data to be collected, and the privacy implications. Second, the consumer may not realize that there may be several other options to modify their policy and reduce premiums besides accepting the new technology option. The technology option may seem like the only choice available.

The MSA subgroup should consider keeping the wellness program offers separate from implementation of large rate increases (greater than 10%). Then, there would be no question that the consumer was coerced, rather than persuaded, to take part in any wellness program.

Appendix E. Guiding Principles for LTCI RBOs Options Presented in Policyholder Notification Materials

<table>
<thead>
<tr>
<th>33</th>
<th>Academy</th>
<th>There is a potential interaction between the NAIC’s Reduced Benefit Options workstream and the MSA Review. Appendix E, “Guiding Principles on LTCI Reduced Benefit Options Presented in Policyholder Notification Materials,” suggests that insurers should consider “disclosing all associated future planned rate increases approved by regulators” in their rate increase notification letters.</th>
</tr>
</thead>
</table>
|  | | • Will the existence of an MSA Review report with a recommended cumulative rate level impose any obligation on an insurer to disclose the likelihood of future rate increases to reach this level? | Goal is for MSA recommendation to be the final rate review unless the block’s expectations deteriorate, or adverse morbidity experience becomes more credible.

Not be collected to be monetized for profit or for advertising.”

Referred VT comment letter to RBO Subgroup for input as the Subgroup is currently discussing wellness initiatives.

<td>Is this binding? If not, limited participation might impact goal of nationwide uniformity and defeat the purposes of MSA rate review.</td>
<td>Section I.E.1 states that the MSA Review is not specific to any state’s law and that individual states retain ultimate authority for rate decisions.</td>
</tr>
<tr>
<td></td>
<td>Several states have made it clear that they are not willing to participate in or accept the results of the MSA rate review, thus hampering the ability of MSA rate review to achieve its stated goal of nationwide uniformity. In order to achieve a more consistent rate review approach and minimize the differences across states, most states (if not all) need to participate in the MSA rate review program and make use of the final results mandatory.</td>
<td>Regarding benefits of MSA results, see edit to I.B &amp; I.D of the Operational section second exposure draft.</td>
</tr>
<tr>
<td></td>
<td>If the MSA rate review is not binding on participating states and is instead treated as a recommendation, state actuarial reviewers will use their own actuarial judgement to evaluate the MSA rate review and then apply state-specific laws and rules. The results will be different and therefore inconsistent. Enough state must bind themselves to the MSA rate review results in order for this approach to be effective.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The current status of LTCI rate review at the Interstate Insurance Product Regulation Compact (IIPRC) informs this concern. At least a half dozen of the IIPRC states have opted out of IIPRC LTC review standards. This lack of uniformity is exacerbated by the IIPRC only being allowed to consider rate increases for policies that the IIPRC originally approved, and only for increases up to 15%. These challenges for the IIPRC suggest similar challenges may exist for MSA rate review.</td>
<td></td>

December 6, 2021

Commissioner Michael Conway
Chairman, NAIC LTC Multi-State Rate Review (EX) Subgroup

Dear Commissioner Conway and Subgroup Members,

The American Council of Life Insurers (ACLI)\(^1\) and the America’s Health Insurance Plans (AHIP)\(^2\) appreciate
the opportunity to comment on the third draft of the Actuarial Section of the Long-Term Care Insurance
(LTC) Multi-State Rate Review Framework, exposed by the NAIC LTC (EX) Task Force on November 15, 2021.

The ACLI and AHIP fully support the charge of the NAIC LTC (EX) Task Force to develop a consistent national
approach for reviewing current LTC rates that results in actuarially appropriate increases being granted by
the states in a timely manner that eliminates cross-state rate inequities. We applaud the LTC Multi-State
Rate Review Subgroup for the time, effort, and thought that were put into the development of a framework
to achieve this charge.

As stated in our previous comment letters, insurers best protect their policyholders when they can fulfill
the obligations they made to these policyholders. This is accomplished when insurers have some level of
predictability in their ability to effectively manage their current and future LTC business over time. At its
core, this level of predictability can only be achieved through transparency and consistency within the
Multi-State Rate Review Process, specifically with respect to the methodology used to calculate the
increase recommended by the Multi-State Actuarial Team.

While some fundamental questions outlined in our prior comment letters remain, we recognize that many
questions about this new process will need to be addressed over time as regulatory and industry
experience evolves. We remain committed to continuing to work with the Task Force and Subgroup to
achieve a robust process that is beneficial to both states and industry.

Sincerely,

Jan M. Graeber
ACLI Senior Actuary

Ray Nelson
AHIP Consulting Actuary

\(^1\) The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

\(^2\) AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
Memo

To: Commissioner Conway, Chair, Long Term Care Insurance Multistate Rate Review Subgroup
From: Tricia Matson, Partner
Date: December 6, 2021
Subject: RRC comments regarding Long Term Care Insurance Multistate Rate Review Framework

Background

The Long Term Care Insurance Multistate Rate Review Subgroup ("the Subgroup") exposed a Long Term Care Insurance (LTCI) Multistate Rate Review Framework ("the Framework") which covers a potential approach to increase consistency of LTCI rate review actions across states and improve efficiency of LTCI rate reviews for insurers. RRC appreciates the opportunity to offer our comments. Should you have any questions, we would be glad to discuss our comments with you and the Subgroup members.

RRC Comments

1. Overall, we applaud these efforts. We understand that there are current industry challenges associated with differences in rate approval practices among states and agree with efforts to increase uniformity of those practices while continuing to maintain the individual state decision making authority.

2. Regarding the involvement of and coordination with the Interstate Insurance Product Regulation Commission ("Compact"), it is unclear from the Framework why the MSA Team was determined to be the appropriate body to review the rates, rather than the Compact. It might be helpful to clarify this in the Framework.

3. On page 5, the document indicates that a uniform national system should lead to "more accurate reviews, theoretically reducing some of the need for ongoing rate increase filings." Based on our experience, current state-based rate reviews are not subject to inaccuracy, so we would suggest removing or rewording this. We believe that a uniform national system has many benefits, but we do not believe that improving accuracy is one of them.

4. Page 5 also states that the MSA Advisory Reports "are only for use by Participating States in considering and evaluating rate filings." There is also language to minimize misuse of the MSA Advisory Reports by the insurers submitting the filings. It is not clear why the MSA Advisory Reports are shared with the insurers. If they are only for the Participating States, and there are concerns about potential misuse by the insurers, perhaps a better approach would be to provide them only to the Participating States for their use in the ultimate rating decision. This may also reduce risk in the event that the MSA Advisory Report recommendations differ significantly from the final state decision.

5. Regarding the qualifications of an MSA team member on page 7, we recommend adding that some minimum number (and at least one) of the members meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States.
6. Page 8 indicates that an MSA member will likely spend 20 hours per month. With 5 to 7 MSA members, it appears that 20 hours may not be sufficient, depending on the volume of submitted filings. We suggest considering alternative options to add additional supporting resources, spread work among resources, or increase the time commitment of MSA members, in the event needed.

7. Page 10 provides the eligibility criteria for submission of filings. Because certain criteria are somewhat arbitrary (e.g., impacting 20 states and at least 5,000 policyholders), we are in favor of the additional language allowing the MSA Team to apply judgment in considering filings for inclusion that do not strictly meet the criteria. You may also consider whether the criteria might be revised in the future to enable incorporation of more filings, in particular if results are highly beneficial.

8. Regarding the timeframes for completing reviews outlined on page 12, we recognize that precise timeframes are not possible due to the level of uncertainty. However, we suggest outlining some general time constraints, similar to what exists in current state laws (i.e., deemer dates), to improve accountability and enable more robust planning by the Participating States and the insurers.

9. Page 14 indicates that one of the items that may be considered in a feedback survey is the “number of rate proposals approved by the MSA Review Team.” Since the state, and not the MSA Review Team, is the ultimate approving party, we suggest changing “approved” to “reviewed”.

10. On page 15, the Framework notes that the MSA Team’s recommendations may include a goal of achieving the same rate per unit in each state, resulting in higher increases in states that have not approved as many historical rate increases. While such an approach could improve equity/remove subsidization across states, it could also reduce equity/increase subsidization among individual policyholders, since policyholders that stay in force might be subject to “catch up” rate increases thereby subsidizing policyholders that lapsed. We would encourage approaches that focus on reducing inappropriate cross subsidization based on prospective considerations, rather than approaches that simply move inappropriate cross subsidization from one group to another.

11. Regarding Appendix B, it may be helpful to develop templates for carriers to submit information. We have found in our LTC rate filing reviews that the nature and depth of information can vary significantly from filing to filing and use of standard templates may enable the MSA Team to review the filings more efficiently.

12. On page 23, we suggest adding a requirement that the assumption information provided must include sufficient rationale such that another actuary qualified in the same practice area can understand how the assumption was developed, as required by ASOP 41. We specifically mention this because we often find that filings do not include this level of detail, and this information will be important for the MSA Team to review.

13. On page 24, we suggest adding a requirement to provide information about past reserve strengthening and premium deficiency reserves held, to help the reviewers understand if actions taken in reserves are reasonably consistent with the need for premium increases. On this same page, we suggest adding a requirement to provide support for the determination of the maximum valuation interest rate (i.e., the weighted average calculation across issue years).

14. On page 25, we suggest adding a requirement to identify how potential antiselection was addressed in the projection associated with election of Reduced Benefit Options.
15. Regarding Exhibit A, the sample MSA Advisory Report, we suggest including the disclosures required under applicable actuarial standards of practice (ASOPs). For example, ASOP 41, *Actuarial Communications*, requires disclosure of the information date, the applicable law, reliance on others, if any assumptions were determined to be unreasonable or could not be assessed for reasonableness, and that the actuary is qualified to provide the statement of actuarial opinion.

Thank you for the opportunity to provide comments on this important initiative. I can be reached at tricia.matson@riskreg.com or (860) 305-0701 if you or other Subgroup members have any questions.
The following proposed revisions were made since the Nov. 15 exposure draft in response to comments received and are reflected in the December 2021 draft LTCI MSA Framework.

- Page 4, I.D. Benefits of Participating in the MSA Review: Third bullet describing benefits for insurers was deleted in response to comment from RRC. 
  
Finally, the consistency of one uniform national system for reviewing rate increase proposals should lead to more accurate reviews, theoretically reducing some of the need for ongoing rate increase filings.

- Page 11, IV.E. Feedback to the MSA Team: In #2, replaced “approved” with “reviewed” as suggested by RRC.

- Page 22, Appendix C: Minnesota Approach 2.a.ii edited:
  - Premiums in the formula reflect the actual rate level. To ensure past increases are not doubled counted, past premiums in the formula in 2.a.i should reflect actual rate level, including past increases; while PV (future premium) in 2.a.i. should be based upon the original rate level.
Long-Term Care Insurance Multistate Rate Review Framework

Draft as of December 2021

NAIC Long-Term Care Insurance (EX) Task Force
PREFACE

The Long-Term Care Insurance Multistate Rate Review Framework (LTCI MSA Framework) was drafted by the Ad Hoc Drafting Group of the NAIC Long-Term Care Insurance (EX) Task Force. The Ad Hoc Drafting Group consists of representatives from state insurance departments in Connecticut, Minnesota, Nebraska, Texas, Virginia, and Washington.

The LTCI MSA Framework was adopted by the NAIC Long-Term Care Insurance Multistate Rate Review (EX) Subgroup and the Long-Term Care Insurance (EX) Task Force on [insert date], and the NAIC Executive Committee and Plenary on [insert date].

I. INTRODUCTION

A. Purpose

The NAIC charged the Long-Term Care Insurance (EX) Task Force with developing a consistent national approach for reviewing current long-term care insurance (LTCI) rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Considering that charge and the threat posed by the current LTCI environment both to consumers and the state-based system (SBS) of insurance regulation, the Task Force developed this framework for a multi-state actuarial (MSA) LTCI rate review process (MSA Review).

This framework is based upon the extensive efforts of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, including its experience with a pilot program conducted by the pilot program’s rate review team (Pilot Team). As part of that pilot program, the Pilot Team reviewed LTCI premium rate increase proposals and issued MSA Advisory Reports recommending actuarially justified state-by-state rate increases. This framework aims to institutionalize a refined version of the Pilot Team’s approach to create a voluntary and efficient MSA Review that produces reliable and nationally consistent rate recommendations that state insurance regulators and insurers can depend upon. The MSA Review has been designed to leverage the limited LTCI actuarial expertise among state insurance departments by combining that expertise into a single review process analyzing in force LTCI premium rate increase proposals or rate proposal and producing an MSA Advisory Report for the benefit and use of all state insurance departments. Note that rate decrease proposals can be contemplated within the MSA Review. The same concepts of this MSA Framework would be applied, if such a rate decrease proposal is received for MSA Review. The goal of this framework is to create a process that will not only encourage insurers to submit their LTCI products for multi-state review, but also provide insurance departments the requisite confidence in the MSA Review so they will voluntarily utilize the Multistate Actuarial LTCI Rate Review Team’s (MSA Team’s) recommendations when conducting their own state level reviews of in force LTCI rate increase filings. Ultimately, the MSA Review is designed to foster as much consistency as possible between states in their respective approaches to rate increases.

The purpose of this document is to function as a framework for the MSA Review that communicates to NAIC members, state insurance department staff, and external stakeholders how the MSA Review works to the benefit of state insurance departments and how insurers might engage in the MSA Review. This MSA framework is intended to communicate the governance, policies, procedures, and actuarial methodologies supporting the MSA Review. State insurance regulators can utilize the information and guidance contained herein to understand the basis of the MSA Team’s MSA Advisory Reports. Insurance companies can access the information and guidance contained herein to understand how to engage in the MSA Review, and how the MSA Advisory Report may affect the insurer’s in force LTCI premium rate increase filing decisions and interactions with individual state insurance regulators.

This document will be maintained by NAIC staff under the oversight of the Task Force and be revised as directed by the Task Force or an appointed subgroup. This document will be part of the NAIC library of official publications and copyrighted.

B. State Participation in the MSA Review

The MSA Review of an insurer’s rate proposal will be available to state insurance departments who are both an Impacted State and a Participating State. These are defined as follows.

- “Impacted State” is defined as the domestic state, or any state for which the product associated with the insurer’s in force LTCI premium rate increase proposal is or has been issued.

---

1 “Premium rate increase proposal(s)” or “rate proposal(s)” in this document refers only to an insurer’s request for review of a proposed in force LTCI premium rate increase or decrease under the MSA Review.
2 The term “rate increase filing” or “rate filing(s)” in this document refers only to the in force LTCI premium rate request(s) that is submitted to individual state departments of insurance (DOI) for a regulatory decision. Filings refer to both rate increase filings and rate decrease filings.
Participating State” is defined as any impacted state insurance department that agrees to participate in the MSA Review. Participation is voluntary as described in Section IE(1) below. Participation may include activities such as, but not limited to, receiving notifications of rate increase proposals in System for Electronic Rate and Form Filing (SERFF), participation in communication/webinars with the MSA Team, and access to the MSA Advisory Report.

Note that state participation is expected to increase in the future as the MSA Review process continues to be developed and refined.

C. General Description of the MSA Review

The MSA Review provides for a consistent actuarial review process that will result in an MSA Advisory Report, which state insurance departments may consider when deciding on an insurer’s rate increase filing or to supplement the state’s own review process.

The MSA Review is conducted by a team of state’s regulatory actuaries with expertise in LTCI rate review. Each review will be led by a designated member of the MSA Team. The review process is supported by NAIC staff and Interstate Insurance Product Regulation Commission (Compact) staff, who will administratively assist insurers in making requests to utilize the MSA process and facilitate communication between the insurer, the MSA Team and [Participating/Impacted TBD] States. The NAIC’s electronic infrastructure, SERFF, will be used to streamline the rate proposal and review process. Although the administrative services of Compact staff and SERFF’s Compact filing platform are utilized in the MSA Review, MSA rate proposals are reviewed, and MSA Advisory Reports are prepared by the MSA Team. MSA rate proposals are not Compact filings, and Compact staff will not have any role in determining the substantive content of the MSA Advisory Reports.

The MSA Review begins when an insurer expresses interest in an MSA Review being performed for an in force LTCI rate proposal to the MSA Team through SERFF or supporting NAIC or Compact staff. The eligibility of the rate proposal will be reviewed and determined by the MSA Team with assistance, as needed, from supporting staff.

The MSA Review of eligible rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. The MSA Team will apply the Minnesota and Texas approaches to calculate recommended, approvable rate increases. While aspects of the Minnesota and Texas approaches may result in lower rate increases than those resulting from loss ratio-based approaches and are outside the pure loss ratio requirements contained in many states’ laws and rules, the approaches fall in line with legal provisions that rates shall be fair, reasonable, and not misleading. The MSA Team will review support for the assumptions, experience, and projections provided by the insurer and perform validation steps to review the insurer-provided information for reasonableness. The MSA Team will document how the proposal complies with the regulatory approach utilized by the MSA Team for Participating States. See Section V for more details on the actuarial review.

Throughout the MSA Review, the MSA Team will provide updates to the insurer. The MSA Team will deliver the final MSA Advisory Report to the insurer and address any questions the insurer has about the results of the Review.

Additionally, the review will consider reduced benefit options (RBOs) that are offered in lieu of the requested rate increases and factor in non-actuarial considerations.

At the completion of the review, the MSA Team will draft an MSA Advisory Report for Participating States and insurers that provides both summary and detail information about the rate proposal, the review methodologies, the analysis and other considerations of the team, and the recommendation for rate increases as outlined in Appendix A. The MSA Advisory Report will also indicate whether the recommendation differs from the insurer’s proposal. Participating States can utilize the MSA Advisory Report or supplement their own state’s rate review with it as

1 Certain processes for Impacted vs. Participating States are yet to be determined (TBD).
described in the following Section ID. Participating States may also utilize the information filed with the MSA Team in addition to the Advisory Report as appropriate.

The rate proposal, review process, actuarial methodologies, and other review considerations are detailed within this framework document and accompanying appendices.

D. Benefits of Participating in the MSA Review

Both state insurance regulators and insurers will benefit by participating in the MSA Review in multiple ways. For state insurance regulators:

- First, they will be able to leverage the demonstrated expertise of the MSA Team in reviewing in force LTCI rate increase filings in their state. It is recognized that multiple states may not have significant actuarial expertise with LTCI, so participation in the MSA Review will allow those states to build on the specific, dedicated LTCI actuarial expertise of the MSA Team.
- Second, state insurance regulators will be able to utilize the MSA Team to promote consistency of actuarial reviews among filings submitted by all insurers to states and actuarial reviews across all states. Because the MSA Team is using the same dedicated approach to in force LTCI rate increase reviews, states who utilize the MSA Team will have the benefit of using the same consistent methodology that is relied upon by other state insurance departments when reviewing in force LTCI rate increase filings in their state.
- Third, the MSA Review allows for more state regulatory actuaries to work with or under the supervision of qualified actuaries, which affords them an opportunity to establish LTCI-specific qualifications in making actuarial opinions. This is particularly important when we consider that requirements to be a qualified actuary include years of experience under the supervision of another already qualified actuary in that subject matter.
- Finally, participating in the MSA Review will allow all state insurance regulators to share questions and information regarding a particular rate proposal or review methodologies; thus, increasing each state’s knowledge base in this area and promoting a more consistent national approach to in force LTCI rate review.

Note that states’ use of and reliance on the MSA Advisory Report is expected to increase in the future as the MSA Review continues to be developed and refined, and the benefits of the MSA Review described above become more evident.

Long-Term Care (LTC) insurers will likewise see multiple benefits in participating in the MSA Review:

- First, by utilizing the MSA Review and through the receipt of MSA information and the MSA Advisory Report from the MSA Team, insurers should see increased efficiency and reduced timelines for nationwide premium rate increase filings. As the MSA Team delivers the MSA Advisory Report for a rate proposal to Participating States, it has functionally reduced the review time for each state, meaning that LTC insurers should see more efficient and timely reviews from these states.
- Second, participating in the MSA Review will provide LTC insurers with one consistent recommendation to be used when making rate increase filings to all states, thus reducing the carrier’s workload in developing often widely differing filings for states’ review.

E. Disclaimers and Limitations

State Authority Over Rate Increase Approvals

The MSA Advisory Report is a recommendation to Participating States based upon the methodologies adopted by the MSA Review. The recommendations are not specific to, and do not account for, the requirements of any specific state’s laws or regulations. The MSA Review is not intended, nor should it be considered, to supplant or otherwise replace any state’s regulatory authority, responsibility, and/or decision making. Each state remains ultimately
responsible for approving, partially approving, or disapproving any rate increase in accordance with applicable state law.

A Participating State’s use of the MSA Advisory Report’s recommendations with respect to one filing does not require that state to consider or use any MSA Advisory Report recommendations with respect to any other filing. The MSA Review in no way: 1) eliminates the insurer’s obligation to file for a rate increase in each Participating State; or, 2) modifies the substantive or procedural requirements for making such a filing. While encouraged to adopt the recommendations of the MSA Review in each of their state filings, insurers are not obligated to align their individual state rate filings with the recommendations contained within the MSA Advisory Report.

The MSA Advisory Reports, including the recommendations contained therein, are only for use by Participating States in considering and evaluating rate filings. The MSA Advisory Reports or their conclusions shall not be utilized by any insurer in a rate filing submitted to a non-Participating State, nor shall the MSA Advisory Reports be used outside of each state insurance regulator’s own review process or challenge the results of any individual state’s determination of whether to grant, partially grant, or deny a rate increase.

Information Sharing Between State Insurance Departments

The MSA Review, including, but not limited to, meetings, calls, and correspondence on insurer-specific matters are held in regulator-to-regulator sessions and are confidential. In addition, if certain information and documents related to specific companies that are confidential under the state law of an MSA Team member or a Participating State need to be shared with other state insurance regulators, such sharing will occur as authorized by state law, and pursuant to the Master Information Sharing and Confidentiality Agreement (Master Agreement) between states that governs the sharing of information among state insurance regulators. Through the Master Agreement, state insurance regulators affirm that any confidential information received from another state insurance regulator will be maintained as confidential and represent that they have the authority to protect such information from disclosure.

Confidentiality of the Rate Proposal

Members of the MSA Team and Participating States affirm and represent that they will provide any in force LTCI rate proposal, as discussed herein with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations.

Confidentiality of the MSA Reports

Likewise, members of the MSA Team and Participating States affirm and represent that they will provide any MSA Advisory Report(s), as discussed herein with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations for rate filings.

F. Governing Body and Role of the NAIC Long-Term Care Insurance (EX) Task Force

The Long-Term Care Insurance (EX) Task Force is expected to remain in place for the foreseeable future to oversee the implementation of the MSA Review, and related MSA Advisory Reports, and to provide a discussion forum for MSA-related activities. The Task Force or any successor will continuously evaluate the effectiveness and efficiency of the MSA Review for the benefit of state insurance regulators and provide direction, as needed. The Task Force may create one or more subgroups to carry out its oversight responsibilities.

Membership and leadership of the Task Force will be selected by the NAIC president and president-elect as part of the annual committee assignment meeting held in January. Selection of the membership and leadership may consider a variety of criteria, including commissioner participation, insurance department staff competencies, market size, domestic LTC insurers, and other criteria considered appropriate for an effective governance system.
II. MSA TEAM

The MSA Team comprises state insurance department actuarial staff. MSA Team members are chosen by their skill set and LTCI actuarial experience. The Long-Term Care Insurance (EX) Task Force, or its appointed subgroup, will determine the appropriate experience and skill set for qualifying members for the MSA Team. It is expected that state participants will provide expertise and technical knowledge specifically regarding the array of LTCI products and solvency considerations. The desired MSA Team membership composition should include a minimum of five and up to seven members.

Membership must follow the requirements below and be approved by the chair of the Task Force or the chair of an appointed subgroup. The following outlines the qualifications, duties, participation expectations and resources required for MSA Team members.

A. Qualifications of an MSA Team Member

To be eligible to participate as a member of the MSA Team, a state insurance regulator is required to:

- Hold a senior actuarial position in a state insurance department in life insurance, health insurance, or LTCI.
- Be recommended by the insurance commissioner of the state in which the actuary serves.
- Have over five years of relevant LTCI insurance experience.
- Hold an Associate of the Society of Actuaries (ASA) designation.
- Currently participates as a member of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup (or an equivalent Subgroup appointed by the Long-Term Care Insurance (EX) Task Force) and the LTC Pricing (B) Subgroup.
- Be a member of the American Academy of Actuaries (Academy) (at least one member).

Additionally, the following qualifications are preferred:

- Hold a Fellow of the Society of Actuaries (FSA) designation
- Have spent at least one year engaged in discussions of either the Task Force or its appointed Subgroup

As both state insurance regulators and the MSA Review may benefit by developing and expanding specific LTCI actuarial expertise through participation in this process, having one or more suitably experienced and qualified actuaries participate in and supervise the work of the MSA Team is critical to the viability of the MSA process. Participation also provides opportunities for additional actuaries to meet the requirements of the U.S. Qualification Standards applicable to members of the Academy and other U.S. actuarial organizations as they relate to LTCI.

Consideration will be given to joint membership where two actuaries within a state combine to meet the criteria stated above.

Consultants engaged by the state insurance department would not be considered for MSA Team membership.

B. Duties of an MSA Team Member

- Active involvement with the MSA Team, with an expected average commitment of 20 hours per month (see Section IV for details of the MSA Review and activities of a team member).
- Participate in all MSA Team calls and meetings (unless an extraordinary situation occurs).
- Review and analyze materials related to MSA rate proposals.
- Provide input on the MSA Advisory Reports, including regarding the recommended rate increase approval amounts.
- Maintain confidentiality of MSA Team meetings, calls, correspondence, and the matters discussed therein to the extent permitted by state law and protect from disclosure any confidential information received.
pursuant to the Master Agreement. MSA Team members should communicate any request for public disclosure of MSA information or any obligation to disclose.

- Active involvement within NAIC LTCI actuarial groups.
- Willingness to provide expertise to assist other states.

C. Participation of an MSA Team Member

Except for webinars and other general communications with state insurance departments, participation in the MSA Review conference calls and meetings related to the review of a specific rate proposal will be limited to named MSA Team members, supporting NAIC or Compact staff members who will be assisting the MSA Team, and the chair and vice chair of the Long-Term Care Insurance (EX) Task Force, or its appointed subgroup. Other interested state insurance regulators (e.g., domiciliary state insurance regulators) may be invited to participate on a call at the discretion of the MSA Team or the chair or vice chair of the Task Force or its appointed subgroup.

D. MSA Associate Program

The MSA Associate Program within the MSA Framework is intended to encourage and engage state insurance regulators to become actively involved in the MSA process. Additionally, a benefit of the program is to provide an educational opportunity for state insurance department regulatory actuaries that wish to gain expertise in LTCI. Regulatory actuaries can participate with varying levels of involvement or for different purposes as described. Regulatory actuaries may participate:

- As a mentee. The mentee would participate in aspects of the MSA Review. An MSA Team member will serve as a mentor to another state regulatory actuary and provide one-on-one guidance.
- To gain more knowledge and understanding of the Minnesota and Texas actuarial approaches.
- To share their own expertise through feedback to the MSA Team on MSA Advisory Reports to better enhance the overall MSA process.
- To participate on an ad hoc limited basis, i.e., where a regulatory actuary would like to participate but is unable to make the required time commitment.
- To meet the U.S. Qualification Standards applicable to members of the Academy and other U.S. actuarial organizations as they relate to LTCI by serving under the supervision of a qualified actuary on the MSA Team.
- To serve as a peer reviewer of the MSA Advisory Reports.

E. Conflicts, Confidentiality, and Authority of the MSA Team

Authority of the MSA Team

Members of the MSA Team serve on a purely voluntary basis, and any member’s participation shall not be viewed or construed to be any official act, determination, or finding on behalf of their respective jurisdictions.

Disclosures and Confidentiality Obligations, as Applicable

All members of the MSA Team acknowledge and understand that the MSA Review, including, but not limited to, meetings, calls, and correspondence are confidential and may not be shared, transmitted, or otherwise reproduced in any manner. Additionally, all members of the MSA Team affirm and represent that they will: a) provide any in force LTCI rate proposal with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations; and, b) provide any MSA Advisory Report with the same protection from disclosure, if any, as provided by the confidentiality provisions contained within their state’s laws and regulations for rate filings.

Conflict of Interest Avoidance Procedures and Certifications
No member of the MSA Team may own, maintain, or otherwise direct any financial interest in any company or its affiliates subject to the regulation of any individual state, nor may any member serve or otherwise be affiliated with the management or board of directors in any company or its affiliates subject to the regulation of any individual state. All conflicts of interest, whether real or perceived are prohibited and no member of the MSA Team shall engage in any behaviors that would result in or create the appearance of impropriety.

F. Required NAIC and Compact Resources

The MSA Team will require administrative and technical support from the NAIC. As the MSA Review develops, it is expected that NAIC support resources will play an integral role in managing the overall program. Administrative staff support will be needed to support MSA Team communications and manage record keeping for underlying workpapers and final MSA Advisory Reports associated with each rate proposal, etc. Additionally, it is possible that limited actuarial support will be needed for the analysis of rate proposals, including preparing data files, gathering information, performing limited actuarial analysis procedures, drafting MSA Advisory Reports, and monitoring interactions among the state insurance departments and the MSA Team. Dedicated staff support for the ongoing work of the Long-Term Care Insurance (EX) Task Force will be needed as well. As more experience with rate proposal volumes and average analysis time is gained, the full complement of human resources required will be better understood.

The MSA Team and supporting NAIC and Compact staff will use the NAIC SERFF electronic infrastructure to receive insurer rate increase proposals and correspond with insurers. As needed, the MSA Team or supporting NAIC and Compact staff may communicate with the insurer outside of SERFF. The material substance of such communication can be documented within SERFF. NAIC and Compact staff will communicate with insurers only at the direction of the MSA Team. Compact staff will perform administrative work related to MSA rate increase proposals at the direction of the MSA Team and as described in this framework.

III. REQUESTING AN MSA REVIEW

A. Scope and Eligibility of a Rate Proposals for MSA Review

The following are the preferred eligibility criteria for requesting an MSA Review of a rate proposal.

- Must be an in force LTCI product (individual or group).
- Must be seeking a rate increase in at least 20 states and must affect at least 5,000 policyholders nationwide.
- Includes any stand-alone LTCI product approved by states, not by the Compact.
- For Compact-approved products meeting certain criteria, the Compact office will provide the first-level advisory review subject to the input and quality review of the MSA.

It is recognized that rate proposals vary from insurer to insurer. The above criteria and the timelines provided below are general guidelines. The MSA Team has the authority to weigh the benefits of the MSA Review for state insurance departments and the insurer against available MSA Team resources when considering the eligibility of rate proposals and the timeline for completion. Based on these considerations, the MSA Team, at its discretion, may elect to perform an MSA Review on a rate proposal that does not satisfy the above eligibility criteria.

The MSA Team reserves the right to deny a proposal that does not meet eligibility criteria. An insurer will be notified if the proposal for an MSA Review is denied.

An insurer may ask questions for more information about a potential rate proposal through communication to supporting NAIC and Compact staff and the MSA Team. This will be accomplished through a Communication Form that will be available on the Compact web page. Supporting NAIC and Compact staff will work with the insurer to complete the necessary steps to assess eligibility, discuss any technical or other issues, and answer questions.
The insurer will have access to primary and supplementary checklists in Appendix B that provide guidance to the insurer for information that should be included in a complete MSA rate proposal requested through the NAIC’s SERFF application.

B. Process for Requesting an MSA Review

As noted in Section IC above, the MSA Review will utilize the Compact’s multistate review platform within the NAIC’s SERFF application and its format for in force LTCI rate increase proposals. Therefore, a state may participate in the MSA Review without being a member of the Compact. The following describes a few key elements of the process for insurers and state insurance regulators:

- The insurer will work with NAIC and Compact support staff and the MSA Team to make a seamless rate increase proposal.
- Instructions containing a checklist for information required to be included in the rate increase proposal, as reflected in Appendix B, will be available to insurers through the Compact’s web page or within SERFF.
- The insurer shall include in the rate proposal a list of all states for which the product associated with the rate increase proposal is or has been issued. Participating States will have access to view the insurer’s rate proposal and review correspondence in SERFF.
- Fee schedule for using the MSA Review [TBD].
- Rate increase proposals for MSA Review within SERFF will be clearly identified as separate from Compact filings.
- The supporting NAIC and Compact staff through SERFF will notify the Impacted States upon receipt of the rate increase proposal with the SERFF Tracking Number.
- The MSA Team may utilize a “queue” process for managing workload and resources for incoming rate increase proposals through SERFF.
- The MSA Team may utilize Listserv or other communication means for inter-team communications.
- The MSA Team’s review of objections and insurer responses are completed through SERFF.

C. Certification

The insurer shall provide certifications signed by an officer of the insurer that it acknowledges and understands the non-binding effect of the MSA Review and MSA Advisory Report. The certification shall also provide, and the insurer shall agree, that it will not utilize or otherwise use the MSA Review and/or the resulting MSA Advisory Report to challenge, either through litigation or any applicable administrative procedure(s), any state’s decision to approve, partially approve, or disapprove a rate increase filing except when: 1) the individual state is a (Participating/Impacted State [TBD]) that affirmatively relied on the MSA Review and/or the MSA Advisory Report in making its determination; or 2) the individual state consents in writing to use of the MSA Review and/or the MSA Advisory Report.

Failure to abide by the terms of the insurer’s certification will result in the insurer and its affiliates being excluded from any future MSA Reviews, and it will permit the MSA Team to terminate, at its sole discretion, any other ongoing review(s) related to the insurer and its affiliates.

Should the MSA Team exclude any insurer and its affiliates for failure to adhere to its certification, the MSA Team, at its sole discretion, may permit the insurer and its affiliates to resume submitting rate proposals for review upon written request of the insurer.

IV. REVIEW OF THE RATE PROPOSAL

A. Receipt of a Rate Proposal
The MSA rate review process begins when an insurer expresses interest in an MSA Review being performed for a rate proposal. This interest can be expressed through completion of a Communication Form, which will be available through the Compact web page. The initial request will be reviewed by the MSA Team lead reviewer and/or supporting NAIC and Compact staff. Once an insurer has completed this initial communication and meets the criteria for requesting an MSA Review, the insurer will work with supporting NAIC and Compact staff and the MSA Team to complete the rate increase proposal in SERFF. The MSA Team will be notified, via SERFF, when the rate increase proposal is available for review.

The supporting NAIC and Compact staff will notify (Participating/Impacted States [TBD]) via SERFF or e-mail when rate increase proposals are submitted, correspondence between the MSA Team and insurer is sent or received in SERFF, the MSA Advisory Report is available, and other pertinent activities occur during the review.

B. Completion of the MSA Review

The MSA Team shall designate a lead reviewer to perform the initial review of each rate proposal. Once the rate increase proposal is made through SERFF, the MSA Review will resemble a state-specific review process.

The MSA Team will meet periodically to discuss the review and determine any needed correspondence with the insurer. Objections and communications with filers will be conducted through SERFF, like any state-specific filing or Compact filing, to maintain a record of the key review items. Other supplemental communication between the insurer and the MSA Team or supporting NAIC and Compact staff, may occur, such as conference calls or emails, as appropriate.

The timeframe for completing the MSA Team’s review and drafting the MSA Advisory Report will be dependent upon the completeness of the rate proposal and the size and complexity of the block of policies for which the rate increase applies. The MSA Team may utilize a “queue” process for managing workload and resources for incoming rate increase proposals through SERFF. The timeliness of any necessary communication between the MSA Team and the insurer to resolve questions or request/receive additional information about the rate proposal will affect the completion of the review.

As the MSA Team completes its review: 1) the insurer will receive initial communication of a completed review, and a final MSA Advisory Report with recommendations will be drafted and communicated to state insurance departments within the next month, which may serve as a signal for a potential ideal time for the insurer to prepare to submit the state-specific filings to each state; and 2) the insurer will receive sufficient information regarding the MSA Team’s recommendation to allow the insurer an opportunity to review the recommendation and in the event that the MSA Team recommendation differs from the proposal submitted by the insurer, the insurer will be given the opportunity to interact with the MSA Team in order to ask questions, and understand the MSA Team’s reasoning.

C. Preparation and Distribution of the MSA Advisory Report

Upon completion of the actuarial review, the MSA Team will prepare a draft MSA Advisory Report for the rate proposal. The reports will be made available within SERFF “reviewer notes” for Participating States. Supporting NAIC and Compact staff will maintain a distribution list and send notifications of the availability of reports to Participating States. Consultants engaged by state insurance department staff to perform rate reviews would be given access to the MSA Advisory Report, subject to the terms of the agreement between the consultant and the Participating State insurance department.

Consultants who are bound by the actuarial Code of Professional Conduct, adopted by the Academy of Actuaries, the Society of Actuaries (SOA) and the Conference of Consulting Actuaries (CCA), should consider whether receipt of the MSA Advisory Report is acceptable under Precept 7 regarding Conflicts of Interest. For other professions, similar consideration should be made if bound by similar professionalism standards.
Prior to finalizing the MSA Advisory Report, the MSA Team will present the draft MSA Advisory Report to Participating States on a regulatory-only call, as deemed necessary, to provide an overview of the recommendations and respond to questions from Participating States.

The MSA Team will issue the final MSA Advisory Report to the Participating States and the insurer after consideration of any comments and questions from Participating States.

The MSA Advisory Report will include standardized content, as reflected in Appendix A, with modifications, as necessary, for any unique factors specific to the rate proposal. The content and format are based on feedback received from state insurance departments and the Long-Term Care Insurance (EX) Task Force during the pilot project.

The content and format of the MSA Advisory Report may be modified in the future under the direction of the Task Force, or an appointed subgroup, as the MSA Team gains more experience in generating the reports and receives more feedback from Participating States and the insurer, through this process.

D. Timeline for Review and Distribution of the MSA Advisory Report

The draft MSA Advisory Report will be made available to Participating States for a two-week comment period prior to being finalized. The following timeline for this comment period and distribution of the final MSA Advisory Report will be adhered to as close as possible, barring timing delays due to holidays or other unexpected events. Note that the MSA Review is intended to occur before filings are made to the state insurance departments, therefore not affecting state insurance departments’ required timelines for review. However, use of the MSA Advisory Report by the state is expected to reduce the amount of time required for the state to complete its review.

Pre-Distribution - Share the draft MSA Advisory Report with the insurer. The insurer will be given the opportunity to interact with the MSA Team to ask questions and understand the MSA Team’s reasoning.

- Day 1 – Distribution of a draft MSA Advisory Report to all Participating States.
- Day 5-7 – Regulator-to-regulator conference call of all Participating States during which the MSA Team will present the recommendations in the MSA Advisory Report and seek comments from states.
- Day 21 – Deadline for comments on the draft MSA Advisory Report.
- Day 35 – Distribution of the final MSA Advisory Report, with consideration of comments, to Participating States and the insurer.
- Date TBD by the Insurer – Individual rate increase filings submitted to each state insurance department.
- Date TBD by each state’s DOI – Approval or disapproval of the rate increase filing submitted in each state.

E. Feedback to the MSA Team

At the direction of the Long-Term Care Insurance (EX) Task Force, or an appointed subgroup, state insurance departments will be requested to periodically provide data and feedback on their state rate increase approval amounts and their state’s use of and reliance on the MSA Advisory Reports. The following items may be considered in a feedback survey:

1. The number of rate proposals made with the MSA Review Team.
2. The number of rate proposals reviewed by the MSA Review Team.
3. Information regarding states approval of MSA recommendations.
4. Feedback on additional information states requested.
5. Feedback regarding how the review process and methodology could be improved.

State responses will be confidential pursuant to the Master Agreement, and aggregated results of feedback surveys will not specifically identify state responses. The MSA Team and state insurance regulators welcome feedback from insurers on their experience using the MSA Review Process. This collective feedback will aid the Task Force in understanding the practical effects of the MSA Review in achieving the goal of developing a more consistent state-
based approach for reviewing LTCI rate proposals that result in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. The feedback will also help refine the review process, improve future reports to better meet participants’ needs, and make updates to this MSA Framework. Finally, the feedback will assist NAIC leadership in making decisions regarding the technology and staff resources needed for the continued success of the project. Aggregated feedback results will be shared with Participating States and insurers as determined appropriate.

V. ACTUARIAL REVIEW

A. MSA Team’s Actuarial Review Considerations

In conducting its actuarial review of a rate proposal, the MSA Team will consider assumptions, projections, and other information provided by the insurer as outlined in Appendix B. The MSA actuarial review process will be evaluated and evolve over time as more rate proposals are reviewed.

The Minnesota and Texas approaches ensure remaining policyholders do not make up for losses associated with past policyholders. Professional judgment is used to address agreed upon policy issues, including the handling of incomplete or non-fully credible data. The Minnesota approach also considers adverse investment expectations related to the decline in market interest rates, and a cost-sharing formula is applied. The Texas approach ensures rate changes reflect prospective changes in expectations. More detail of each approach is provided in the following sections.

The MSA Team will consider the following in performing their review, applying their expertise and professional judgement to the review, and reviewing the actuarial formulas and results:

- Review insurer experience, insurer narrative explanation, and relevant industry studies.
- Assess reasonability of assumptions for lapse, mortality, morbidity, and interest rates.
- Validate and adjust or request new projections of claim costs and premiums by year.
  - Validate that the patterns of claims and premium projections over time reasonably align those reflected in the assumptions.
  - Adjust or request new projections of claims and premium to the extent that any underlying assumptions are deemed unreasonable or unsupported by the MSA Team. Any differences will initially result in correspondence between the MSA Team and the insurer via SERFF.
  - After verifying loss ratio compliance, apply both the Minnesota and Texas approaches for each rate proposal submitted.

In developing a recommendation, the MSA Team will apply a balanced approach and professional judgement for each rate proposal based on the characteristics of the block reviewed to determine the most appropriate method. The MSA Team’s recommendation will not be the lowest or the highest percentage method just because it is the lowest or the highest. Rather, the recommendation may be the result of either the Texas or Minnesota approach, a blend of the two approaches: or using professional judgement, the MSA Team may recommend a rate increase outside of these two approaches. Other methods may evolve over time that may be incorporated into the future process that generate similar or unique results. In applying professional judgement, (e.g., when considering the extent to which less-than-fully credible older-age morbidity should be projected to cause adverse experience), a balanced approach is applied as opposed to denying a rate increase, which could lead to a spike in the future, or approving the rate increase as if there was full credibility, which could lead to rates that could be too high. As the MSA Team reviews more rate proposals, it will consider and evaluate the characteristics of the rate proposals as it refines the blending of the two methods.

The MSA Team will consider how to reflect the differences in the histories of states’ rate approvals. Current approach includes:
The MSA Team’s recommendation results in the same rate per unit in each state following the current rate increase round, leading to higher percentage rate increases in states that approved lower rate increases in the past.

Analysis of state cost differences affecting justifiable rate increases will continue. As of May 2021, there does not appear to be substantial evidence that policyholders who purchased policies in lower-cost states should receive lower percentage rate increases. Part of the reason is that there was a tendency for people in lower-cost areas to purchase less coverage. Their premium rates will continue to be lower than rates for policyholders with more coverage, even if percentage rate increases are the same.

Any recommendation from the MSA Team for a catch-up increase aims to achieve only current rate equity between states and not lifetime rate equity between states.

Consideration of Solvency Concerns

If concerns exist regarding an insurer’s financial solvency and the impact of rate increases on future solvency, each state DOI, by their authority over rate approval, has the flexibility to consider solvency adjustments in these rare instances. In rare, non-typical circumstances, adjustments could be considered within the MSA Review, including consultation with states as part of the MSA Advisory Report comment period.

Follow-Up Proposals on the Same Block

Any subsequent rate increase proposal to the MSA Team on a block of business previously reviewed by the MSA Team needs to involve the development of adverse experience and/or expectations. In the absence of adverse experience or expectation development, the MSA Team will consider a reasonable explanation from an insurer for an increase in credibility of morbidity data of being the reason for a rate increase. Prior rate increases would need to be implemented before the implementation of a subsequent rate increase. The MSA Team will not consider a new rate increase proposal on a block that did not receive the full percentage rate increase requested without the experience, expectation, or credibility criteria noted above. If an insurer did not receive the full percentage rate increase and has no adverse changes in experience or expectations, the insurer should work directly with the applicable state DOI.

B. Loss Ratio Approach

Key aspects of the loss ratio approach to the actuarial review of rate changes include:

1. At policy issuance, pricing based on a lifetime loss ratio target is typically established. A common target is 60%, which means the present value of claims is targeted to equal 60% of the present value of premiums. In some instances, products may be priced with a projected lifetime loss ratio in excess of 60%. The remainder goes towards sales-related costs, administrative expenses, expenses related to claims, and profit. Note that 60% is a required minimum loss ratio under the pre-rate stability rules; newer policies may be priced with lower expected loss ratios. Refer to state law or regulation modeled from the Long-Term Care Insurance Model Regulation (§641), Section 19 for more details on compliance with loss ratio standards.

2. As lapses and mortality have generally been lower than expected, more people have reached ages where claims tend to occur than originally expected. In some cases, this has resulted in a substantial increase in the present value of claims; thus, resulting in substantially higher expected lifetime loss ratios than originally targeted. For companies where morbidity expectations have increased over original assumptions, lifetime loss ratios would be even higher.

3. The loss ratio approach increases future premiums to a level, referred to as make-up premium, such that the original loss ratio target is once again attained.
4. The loss ratio approach, one of the minimum standards in many states’ statutes, is evaluated by the MSA Team. However, there is general recognition that this approach produces rate increases that are too high and do not recognize other typical statutory standards, such as fair and reasonable rates.
   a. The loss ratio approach also does not recognize actuarial considerations such as the shrinking block issue, where past losses being absorbed by a shrinking number of remaining policyholders would lead to unreasonably high-rate increases. This concern was the main driver of the Minnesota, Texas, and other approaches.
   b. The loss ratio approach shifts all the risk to the policyholders. If the insurer is allowed to always return to the 60% loss ratio, there may be a lower incentive for more appropriate initial pricing.

5. For rate-stabilized business, lifetime loss ratios are broken out, such as in a 58%/85% pattern, where the 58% reflects the portion of initial premiums and the 85% reflects the portion of the increased premium available to pay the claims. For relevant blocks, this standard is analyzed by the MSA Team. If this standard produced lower increases than the Minnesota and Texas approaches, it would produce the recommended rate increase.

C. Minnesota Approach

Key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Blended if-knew / makeup approach to address the shrinking block issue.
   a. The if-knew concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.
   b. The makeup concept is for a premium to be charged going forward to return the block to its original lifetime loss ratio.
   c. The blending method helps ensure concepts discussed in public NAIC Long-Term Care Pricing (B) Subgroup calls from 2015 to 2019 are incorporated, including the concept that rates will not substantially rise as the block shrinks, as policyholder persistency falls over time.

2. Cost-sharing formula that increases the insurer’s burden as cumulative rate increases rise.
   a. This addition to the insurer’s burden moves rates away from a direction that could potentially be seen as misleading. The insurer likely had or should have had more information on the likelihood of large rate increases than the consumer had at the time the policy was issued.

3. Assumption review.
   a. Verification that the insurer’s original and current assumptions are indeed drivers of the magnitude increase in lifetime loss ratio presented by the insurer.
   b. Verification of appropriateness of current assumptions.
      i. A combination of credible insurer experience, relevant industry experience, and professional judgement is applied.
      ii. For areas of uncertainty, such as older-age morbidity, conservatism may be added to the insurer-provided assumptions. This conservatism can be released as credible experience develops.

4. Interest rate / investment return component
   a. The Minnesota approach considers changes in expectations regarding interest rates and related investment returns in a manner consistent with how other key assumptions are considered. Reasons include:
      i. Changes in market interest rates are among the key factors driving profits and losses associated with blocks of LTC business.

---

ii. In the Minnesota approach, all factors impacting the business are considered.
   1. If interest rates rise, this would tend to lead to lower rate increase approvals. Note, in this scenario, if interest rate changes were not considered, it is possible an insurer would get approval for rate increases even when profits on the block were higher than expected.
   2. If interest rates fall, this would tend to lead to higher rate increase approvals.

iii. To prevent shifting of “good assets” and “bad assets” to supporting LTC rates and prevent an insurer from increasing rates based on risky investments turned into losses, an index of average corporate bond yields (e.g., Moody’s) is relied on to reflect experience and current expectations.

iv. Original pricing typically includes an assumption on investment returns, for which premiums and other positive cash flows are assumed to accumulate. This forms the interest component of the original assumption.

v. The original pricing investment return in Section VC(4)iv is compared to the average corporate bond yields in Section VC(4)iii to determine the adversity associated with the interest rate factor.

5. Original Assumption Adjustment
   a. If original mortality, lapse, or investment return assumptions were out of line with industry-average assumptions at the time of original pricing, the original premium is replaced by a “benchmark premium.”
      i. This results in a lower rate increase.
      ii. This adjustment wears off over 20 years from policy issue.
         1. The rationale for the wearing off of this adjustment is the assumption that no insurer would intentionally underprice a product, knowing it would suffer losses for 20 years and then hope to offset a portion of that loss with a rate increase.
         iii. This adjustment is intended to prevent for example, an insurer underpricing a product, gaining market share, and then immediately requesting a rate increase.

D. Texas Approach

The Texas approach to the actuarial review of rate changes was developed in response to the NAIC Long-Term Care Pricing (B) Subgroup’s discussions regarding the recoupment of past losses in LTCI rate increases. The Texas approach relies upon a formula intended to prevent the recoupment of past losses by calculating the actuarially justified rate increase for premium-paying policyholders based solely on projected future (prospective) claims and premiums.

Key aspects of the Texas approach to the actuarial review of rate changes include:

1. Past losses are assumed by the insurer and not by existing policyholders. An approach that considers past claims in the calculation of the rate increase, such as a lifetime loss ratio approach, permits, the recoupment of past losses to some extent.

2. Calculates the rate increase needed to fund the prospective premium deficiency for active, premium-paying policyholders based on an actuarially supported change in assumption(s). This ensures that active policyholders do not pay for the past claims of policyholders who no longer pay premium.

3. Data Requirements for Calculation:
   a. The following calendar year projections, including totals, for current premium-paying policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate:
      i. Present Value of Future Benefits (PVFB) under current assumptions.
      ii. PVFB under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
      iii. Present Value of Future Premiums (PVFP) under current assumptions.
      iv. PVFP under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
1. Note that for all four projections above, the projection period is typically 40–50 years: although, some companies project for 60 or more years.

To emphasize, these projections should only include active policyholders currently paying premium and should not include any policyholders not paying premium (e.g., policies on waiver, on claim, or paid up) regardless of the reason. Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption.

Also, the insurer should identify and explain any estimates or adjustments to the data, as applicable.

4. Assumptions
   a. Rate increases are commonly driven by a change to the persistency, morbidity, mortality assumption, or a combination of the three.
   b. Verification that assumption change(s) are supported by credible data.
   c. The interest rate is the same for all four projections. This ensures that interest rate risk is assumed by the insurer, not the policyholder.

The formula used in the Texas approach is provided in Appendix C.

E. RBOs

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force, developed a list of RBO principles to provide guidance for evaluating RBO offerings in Appendix D.

RBOs in the MSA Advisory Report

As part of the MSA Review, the MSA Team will perform a limited review of the reasonableness of RBOs included in the rate proposal that are extracontractual. The MSA Advisory Report will highlight how the insurer demonstrates the proposed RBOs’ reasonableness. Note that the MSA Team will not perform an assessment of RBOs in relation to individual state specific requirements for RBOs. The purpose of the guidance in the MSA Advisory Report is to provide initial information about the RBOs with which the state insurance regulators can then utilize to perform a more detailed assessment specific to their state’s requirements. As the MSA Review develops and as the Subgroup continues its work, this area of review may evolve.

Future RBOs

As the industry continues to innovate new RBOs for consumers, the MSA Review will likewise develop and evolve to consider the reasonableness of RBOs. Additionally, as the MSA Review evolves, additional regulatory expertise with RBOs may be added to the MSA Team in the future. To achieve more consistency across states in their understanding and consideration of RBOs, the Task Force will encourage its appointed Subgroup and/or an appropriate NAIC actuarial committee or group to collectively consider new RBOs as they arise. This process will provide for input and technical advice from actuaries and non-actuarial experts to the state insurance departments as they exercise their authority in considering RBOs as part of rate filings. States and insurers are therefore encouraged to discuss new and developing RBOs through this process.

F. Non-Actuarial Considerations

The Long-Term Care Insurance (EX) Task Force continues to review and consider non-actuarial considerations affecting states’ approval or disapproval of LTCI rate changes to develop consensus among jurisdictions and develop recommendations for application of these considerations. These considerations include such topics as:

1. Caps or limits on approved rate changes.
2. Phase-in of approved rate changes over a period of years.
3. Waiting periods between rate change requests.
4. Considerations of prior rate change approvals and disapprovals.
5. Limits or disapproval on rate changes based solely or predominately on the number of policyholders in a particular state.
6. Limits or disapproval on rate changes based on attained age of the policyholder.
7. Fair and reasonableness considerations for policyholders.
8. The impact of the rate change on the financial solvency of the insurer.

Considerations in the MSA Advisory Report

As part of the MSA Review, the MSA Team will identify relevant aspects of the insurer’s rate proposal, based on the information provided by the insurer, which may be affected by a state’s non-actuarial considerations. Note that the MSA Team will not perform a state-by-state review of each state’s non-actuarial considerations, statutes, or practices. Instead, the MSA Team will highlight in the MSA Advisory Report those aspects of the rate proposal that relate to or that may be affected by non-actuarial considerations. The purpose of this guidance in the MSA Advisory Report is to prompt state insurance regulators to contemplate those affected aspects of the rate proposal when completing their individual state's rate review. For example, the MSA Advisory Report may highlight:

- If cumulative rate increases are high, as this may affect the cost-sharing formula.
- If a rate proposal is for a block of business where the average policyholder age is predominately 85 or above, as this may affect states that consider age caps.
- If it is determined that the block of business will likely continue to incur substantial financial losses and impose a potential solvency concern, as this may affect the potential need for adjustments to the cost-sharing formula.
- Aspects of the coordination of rate and reserving review, as this may signify adjustments to the methodology assumptions used by the MSA Team in its review.

Future Non-Actuarial Considerations

The MSA Review will continue to develop and evolve as it is implemented. To achieve more consistency and minimize the number of differences across states in their application of other non-actuarial considerations in rate review criteria for LTCI rate filings, the Task Force will encourage its appointed Subgroup, or an appropriate NAIC actuarial committee or group, to collectively consider new future non-actuarial considerations as they arise. This process will provide for input and technical advice from actuaries to states as they exercise their authority in considering non-actuarial factors. States are therefore encouraged to discuss new and developing practices and/or recommendations in this area.

VI. APPENDICES

A. Appendix A – MSA Advisory Report Format

The MSA Advisory Report that is distributed to Participating State insurance departments and the insurer will generally follow a template that includes the following information. Note that degree of rigor in the review and the details and content of the MSA Advisory Report will depend on the magnitude of rate increase and the complexity of the rate proposal and the insurer’s financial condition. See also the sample MSA Advisory Report in Exhibit A.

1. Executive Summary.
   a. Overall recommended rate increase, before consideration of different states’ history of approvals.

2. Disclaimers.
   a. Purpose and intent of how states should use the MSA Advisory Report.
   b. Disclaimer that the MSA Review and findings shall not be considered an approval of the rate schedule increase filing, nor shall it be binding on the states or the insurer.
c. Statement that the in force rate increase filing submitted to the respective states shall be subject to the approval of each state, and each state's applicable state laws and regulations shall apply to the entire rate schedule increase filing.

3. Background on the MSA Review.

4. Explanation of the insurer’s Proposal.
   a. The explanation will be based on the aspects of the insurer’s rate proposal, which may include details as to whether the rate increase submitted for review involved different types of coverages or groupings.

5. Summary of the MSA Team’s rate review analysis, including these aspects:
   a. Actuarial review.
      i. The summary of the review and the MSA Team’s recommendation will be based on the aspects of the insurer’s rate proposal, and may include specific details of the review, for example analysis of projections, assumptions, margins, or other aspects.
   b. Summary of consideration of differences in the history of state’s rate increase approvals.
   c. Non-actuarial considerations and findings.
   d. Financial solvency-related aspects and adjustments.
   e. Review for reasonableness and clarity of RBOs.
   f. Summary information about the mix of business.

6. Appendices.
   a. Summary of the drivers of the rate proposal.
   b. Details regarding the Minnesota and Texas approaches as applied to the rate proposal.
   c. Summary of rate proposal correspondence.
   d. Examples of rate increases if an RBO is not selected.
   e. Potential cost–sharing formula for typical circumstances.

B. Appendix B – Information Checklist

At the request of the former Long-Term Care Insurance (B/E) Task Force, the Long-Term Care Pricing (B) Subgroup developed a single checklist that reflects significant aspects of LTCI rate increase review inquiries from all states. In this context, “checklist” means the list or template of inquiries that states typically send at the beginning of reviews of state-specific rate increase filings.

This document contains aspects of the NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation1 (Guidance Manual) and checklists developed by several other states. This consolidated checklist is not intended to prevent a state from asking for additional information. The intent is to take a step toward moving away from 50 states having 50 different checklists to a more efficient process nationally to provide the most important information needed to determine an approvable rate increase. To keep the template at a manageable length, it is anticipated that this template will result in states attaining 90–100% of the information necessary to decide on approvable rate increases. State and block specifics will generate the other 0-10% of requests. As states apply this checklist, it or an improved version may be considered for a future addition to the Guidance Manual.

Information Required for an MSA Review of a Rate Proposal

1 https://www.naic.org/documents/committees_b_senior_issues_100609_b_s_guidance_manual.pdf
The following provides a checklist of information necessary for a complete rate proposal to the MSA Review. This checklist is consistent with the “Consolidated, Most Commonly Asked Questions – States’ LTC Rate Increase Reviews” as adopted by the Health Actuarial (B) Task Force on March 23, 2018.

1. Identify all states for which the product associated with the rate proposal is or has been issued.

2. New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
   a. Provide rate increase percentages by policy form number and clear mapping of these numbers to any alternative terminology describing policies stated in the actuarial memorandum and other supporting documents.
   b. Provide the cumulative rate change since inception, after the requested rate increase, for each of the rating scenarios.

3. Rate increase history that reflects the filed increase.
   a. Provide the month, year, and percentage amount of all previous rate revisions.
   b. Provide the SERFF MSA numbers associated with all previous rate revisions.

4. Actuarial memorandum justifying the new rate schedule, which includes:
   a. Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
      i. The projection should be by year.
      ii. Provide the count of covered lives and count of claims incurred by year.
      iii. Provide separate experience summaries and projections for significant subsets of policies with substantially different benefit and premium features. Separate projections of costs for significant blocks of paid-up and premium-paying policies that should be provided.
      iv. Provide a comparison of state versus national mix of business. In addition, a state may request separate state and national data and projections. The insurer should accompany any state-specific information with commentary on credibility, materiality, and the impact on requested rate increase.

5. Reasons for the rate increase, including which pricing assumptions were not realized and why.
   a. Attribution analysis - presents the portion of the rate increase allocated to and the impact on the lifetime loss ratio from each change in assumption.
   b. Related to the issue of past losses, explain how the requested rate increase covers a policyholder’s own past premium deficiencies and/or subsidizes other policyholders’ past claims.
   c. Provide the original loss ratio target to allow for comparison of initially assumed premiums and claims and actual and projected premiums and claims.
   d. Provide commentary and analysis on how credibility of experience contributed to the development of the rate proposal.

6. Statement that policy design, underwriting, and claims handling practices were considered.
   a. Show how benefit features (e.g., inflation and length of benefit period) and premium features (e.g., limited pay and lifetime pay) impact requested increases.
   b. Specify whether waived premiums are included in earned premiums and incurred claims, including in the loss ratio target calculation; provide the waived premium amounts and impact on requested increase.
   c. Describe current practices with dates and quantification of the effect of any underwriting changes. Describe how adjustments to experience from policies with less restrictive underwriting are applied to claims expectations associated with policies with more restrictive underwriting.

6 https://content.naic.org/sites/default/files/inline-files/cmte_b_ltc_price_sg_180323_ltc_increase_reviews%20%289%29.docx
7. A demonstration that actual and projected costs exceed anticipated costs and the margin.

8. The method and assumptions used in determining projected values should be reviewed considering reported experience and compared to the original pricing assumptions and current assumptions.
   a. Provide applicable actual-to-expected ratios regarding key assumptions.
   b. Provide justification for any change in assumptions.

9. Combined morbidity experience from different forms with similar benefits, whether from inside or outside the insurer, where appropriate to result in more credible historical claims as the basis for future claim costs.
   a. Explain the relevance of any data sources and resulting adjustments made relevant to the current rate proposal, particularly regarding the morbidity assumption.
   b. A comparison of the population or industry study to the in force related to the rate proposal should be performed, if applicable.
   c. Explain how claims cost expectations at older ages and later durations are developed if data is not fully credible at those ages and durations.
   d. Provide the year of the most recent morbidity experience study.

    a. Comparison with asset adequacy testing reserve assumptions.
       i. Explain the consistency regarding actuarial assumptions between the rate proposal and the most recent asset adequacy (reserve) testing.
       ii. Additional reserves that the insurer is holding above Health Insurance Reserves Model Regulation (#10) formula reserves should be provided, (such as premium deficiency reserves and Li—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves (AG 51) reserves.
    c. Provide actuarial assumptions from original pricing and most recent rate increase proposal and have the original actuarial memorandum available upon request.

11. Provide the following calendar year projections, including totals, for current premium paying nationwide policyholders only, prior to the rate increase, all discounted at the maximum valuation interest rate*:
    a. Present value of future benefits (PVFB) under current assumptions
    b. PVFB under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).
    c. Present value of future premiums (PVFP) under current assumptions.
    d. PVFP under prior assumptions (from prior rate increase filing, or if no prior increase, from original pricing).

   *To emphasize, these projections should include only active nationwide policyholders currently paying premium, and they should not include any policyholders not paying premium, regardless of the reason. Projections under current actuarial assumptions must not include policyholder behavior as a result of the proposed premium rate increase, such as a shock lapse assumption or benefit reduction assumption.

    b. Also, please identify the maximum valuation interest rate and ensure that it is the same for all four projections.

12. The Guidance Manual checklist items: 1) summaries (including past rate adjustments); 2) average premium; 3) distribution of business, including rate increases by state; 4) underwriting; 5) policy design and margins; 6) actuarial assumptions; 7) experience data; 8) loss ratios; 9) rationale for increase; and 10) reserve description.

13. Assert that analysis complies with Actuarial Standards of Practice (ASOPs), including 18 and 41.
14. Numerical exhibits should be provided in Microsoft Excel spreadsheets with active formulas maintained, where possible.

15. Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

16. Policyholder notification letter should be clear and accurate.
   a. Provide a description of options for policyholders in lieu of or to reduce the increase.
   b. If inflation protection is removed or reduced, is accumulated inflation protection vested?
   c. Explain the comparison of value between the rate increase and policyholder options.
   d. Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
   e. How are partnership policies addressed?

17. Actuarial certification and rate stabilization information, as described in the Guidance Manual, and contingent benefit upon lapse information, including reserve treatment.

Supplemental Information

As part of the Long-Term Care Insurance (EX) Task Force’s pilot project in 2020–2021, the following supplemental information was identified by the MSA Team as beneficial; and, therefore, the Task Force may be requested to assist in the MSA Review.

1. Benefit utilization:
   a. Provide current, prior rate increase, and original assumptions, including first-projection year through ultimate utilization percentages for 5% compound inflation, lesser inflation, and zero inflation cells.
   b. Explain how benefit utilization assumptions vary by maximum daily benefit.
   c. Provide the cost of care inflation assumption implied in the benefit utilization assumption.

2. Attribution of rate increase
   a. Provide the attribution of rate increase by factor: morbidity, mortality, lapse, investment, and other.
   b. For the morbidity factor, break down the attribution by incidence, claim length, benefit utilization, and other.
   c. Provide information on the assumptions that are especially sensitive to small changes in assumptions.

3. RBOs
   a. Provide the history of RBOs offered and accepted for the block.
   b. Provide a reasonability analysis of the value of each significant type of offered RBO.

4. Investment returns:
   a. Provide original and updated / average investment return assumptions underlying the pricing.
   b. Explain how the updated assumption reflects experience.

5. Expected loss ratio:
   a. With respect to the initial rate filing and each subsequent rate increase filing, provide the target loss ratio.
   b. Provide separate ratios for lifetime premium periods and non-lifetime premium periods and for inflation-protected and non-inflation-protected blocks.

6. Shock lapse history:
   a. Provide shock lapse data related to prior rate increases on this block.

7. Waiver of premium handling:
a. Explain how policies with premiums waived are handled in the exhibits of premiums and incurred claims.
b. Explain how counting is appropriate (as opposed to double counting or undercounting).

8. Actual-to-expected differences:
   a. Explain how differences between actual and expected counts or percentages (in the provided exhibits) are reflected or not reflected in assumptions.

9. Assumption consistency with the most recent asset adequacy testing:
   a. Explain the consistency or any significant differences between assumptions underlying the rate increase proposal and those included in Actuarial Guideline 51 testing.

C. Appendix C—Actuarial Approach Detail

Minnesota Approach

Details on the key aspects of the Minnesota approach to the actuarial review of rate changes include:

1. Review of current assumptions for appropriateness, reasonableness, justification, and support.
   a. A combination of credible insurer experience, relevant industry experience, and professional judgement is applied.

2. If-knew premium and makeup premium aspects – aggregate application.
   a. Makeup percentage:
      i. \[
         \frac{[PV (claims) / original LLR] - PV [past premium]}{PV [future premium]} - 1.
      \]
      ii. To ensure past increases are not doubled counted, past premiums in the formula in 2.a.i should reflect actual rate level, including past increases; while PV (future premium) in 2.a.i. should be based upon the original rate level.
      iii.
   b. If-knew percentage:
      i. \[
         \frac{PV (claims) / PV [premiums]}{original LLR} - 1.
      \]
      ii. Premiums in the formula are at the original rate level.
      iii. The concept is to estimate a premium that would have been charged at issuance of the policy if information we know now on factors such as mortality, lapse, interest rates, and morbidity was available then.
   c. Definitions and explanations:
      i. PV means present value.
      ii. LLR means lifetime loss ratio.
      iii. Interest rates underlying PVs and LLRs are based on:
         1. For original PVs and LLRs, the interest rate is the investment return assumed in original pricing. Note that this rate is typically different than the statutory LLR discount rate.
         2. For current PVs, the interest rates are the average corporate bond yields over time for each year minus 0.25% (to account for expected defaults). For projections beyond the current year, phasing over five years of the current rate to a target rate (currently 4%) is assumed.
      iv. PV calculations are based on actual, current experience and expectations for persistency, morbidity, and interest rate.
      v. Insurer-provide premium and claim cash flows may be adjusted based on assumption review.
      vi. Makeup percentage is similar to that attained by the loss ratio approach.

3. If-knew premium and makeup premium aspects – sample policy-level verification.
   a. Over a range of issue years, issue ages, benefit periods, and inflation protection:
      i. Calculate an estimate of the original premium.
1. Based on original pricing assumptions for persistency, morbidity, investment returns, and expenses.
2. Apply first principles.
   a. For each policy year, calculate PV of claims and expenses, applying mortality, lapse, morbidity, and expenses, discounting at original investment rates.
   b. Add the PV of claims expenses for each policy year to attain PV of claims & expenses at issue.
   c. Divide by the sum of the PV of an annuity of 1 per year.
   d. Multiply \( \frac{b}{c} \) times \((1 + \text{originally assumed profit percentage})\) to attain the original premium.
   e. This premium provides the basis for comparison against the makeup and if-knew premium.
3. Replace the original premium with a benchmark premium.
   a. If the benchmark premium is higher than the original premium and original pricing (reflected in mortality, lapse, and investment return assumptions) was out of line with industry-average assumptions at the time of original pricing.
   b. The benchmark premium is phased back into the original premium proportionally over 20 years from issue.
   c. The benchmark aspect is intended to prevent, for example, an insurer underpricing a product, gaining market share, and then immediately requesting a rate increase.

ii. Calculate an estimate of the makeup premium.
1. Calculate the original dollar PV of profits for the sample policy using original pricing assumptions.
2. Calculate an updated dollar PV of profits for the sample policy using:
   a. Actual history of premiums and claims.
   b. Expectations of future claims.
   c. "Backed into" makeup premium.
3. Note that attaining the same dollar PV of profits for a sample policy leads to a lower makeup premium than attaining the same percentage PV of profits (as a percentage of premium).
   a. The reason for targeting the dollar instead of percentage is to avoid the dollar amount of profit being higher as premium rates increase.

iii. Calculate an estimate of the if-knew premium.
1. The calculation is the same as for the original premium, except it is based on current assumptions instead of original pricing assumptions.
   b. Verifying the impact on expectation changes on rates
      i. While lapse, mortality, and interest rate experience and assumptions are fairly routine to track (for determination of the rate impact), morbidity experience and assumptions tend to be difficult to track.
      ii. A combination of information is relied upon to estimate the impact of morbidity expectation deviations (from original pricing) on rates. This information includes:
         1. Original and current claim incidence and claim length by age and other factors.
         Incidence and length are tracked separately for some companies and combined for others.
         2. Experience
         3. Impact on LLR of changes in expectations of morbidity.
         4. Industry information and trends (for reasonableness checks).
   c. Assumptions underlying the calculations of estimates of premiums may be adjusted as part of the review. For instance:
      i. If sample policy verification shows less impact on rates due to changes in lapse, mortality, interest rate, and morbidity expectations than demonstrated in the insurer's aggregate projections, past or projected premiums or claims may be adjusted in the original, makeup, or if-knew premium calculations.
ii. If there is wide variance in practice among companies in morbidity assumptions at ages where data is of low credibility, adjustments may be made to help ensure similar situations resulting in similar rate increase approval amounts.

1. A balanced approach is pursued, recognizing that providing full or zero credit for partially credible experience may result in harmful consequences (excessive rates or later rate shocks).
2. Any reductions to rate increases caused by lack of credible experience can potentially be reversed in subsequent rate increase requests as credibility increases.

iii. Similar adjustments may apply when incomplete or inconsistent information is provided by the insurer (after initial attempts to resolve significant differences or gaps).

4. Reconciliation of aggregate and sample policy applications.
   a. In many cases, the aggregate and sample policy applications will result in similar current LLRs.
   b. In other cases, some steps are taken to understand the difference, including additional requests for information.
   c. Because the sample policy application considers information only related to premium-paying policyholders, it is possible that differences between the aggregate and sample policy application are caused by inclusion of past premiums and all claims related to non-premium payers in the aggregate information.
   d. When reconciliation occurs after rounds of communication, decisions will be made based on the information provided.

5. Blending – same for aggregate and sample policy applications.
   a. The weighting towards the makeup premium is the percentage of original policyholders remaining.
   b. The weighting towards the if-knew premium is the percentage of original policyholders no longer having active policies, or 1 minus the percentage in ii.
   c. The blending of the if-knew premium and makeup premium helps ensure remaining policyholders are not held responsible for paying for adverse experience associated with past policyholders.
   d. The blending also helps limit cumulative rate increases at later durations; as the percentage of remaining policyholders approaches zero, the blended approval amount approaches the if-knew premium.

6. Cost-sharing formula that increases the insurer burden as cumulative rate increases rise.
   a. The cumulative-since-issue, weighted if-knew / makeup premium-based increase is reduced by:
      i. No haircut for the first 15%.
      ii. 10% for the portion of cumulative rate increase between 15% and 50%.
      iii. 25% for the portion of cumulative rate increase between 50% and 100%.
      iv. 35% for the portion of cumulative rate increase between 100% and 150%.
      v. 50% for the portion of cumulative rate increase in excess of 150%.

7. Reduction for past rate increase:
   a. Take 1 plus the cost-sharing-adjusted blend amount and divide by 1 plus the previous, cumulative rate increases, then subtract 1. This is the approvable rate increase.

8. Summary.
   a. Review current assumptions.
   b. Calculate aggregate if-knew premium and makeup premium amounts. Calculate the blended amount.
c. Calculate the sample policy estimated original premium, if-knew premium, and makeup premium. Calculate the blended amount.
d. Reconcile aggregate and sample policy blended amounts. Set this blended amount aside.
e. Apply the cost-sharing formula to the blended amount.
f. Deduct past rate increases.
g. Example – if:
   i. The original premium is $1,000
   ii. Makeup premium is $3,000.
   iii. If-knew premium is $1,500.
   iv. 60% of policyholders remain.
   v. Past rate increases are 50%.
   vi. Blended amount is:
      1. \( \frac{3,000}{1,000} \times 0.60 + \)
      2. \( \frac{1,500}{1,000} \times 0.40 \)
      3. \(- 1 = \)
      4. \(180\% + 60\% - 1 = 240\% - 1 = 140\% \)
   vii. Cost sharing is:
      1. \(100\% \times 0.15 + \)
      2. \(90\% \times 0.35 + \)
      3. \(75\% \times 0.5 + \)
      4. \(65\% \times 0.4 = \)
      5. \(110\% \)
   viii. Deduction for past rate increases results in:
      1. \(\frac{(1 + 1.1)}{(1 + 5)} - 1 = \)
      2. \(40\% \)

**Texas PPV Formula**

Details on the PPV Formula of the Texas approach to the actuarial review of rate changes include the following. To reiterate, the formula is limited to **active, premium-paying policyholders**.

For rate stabilized policies:

\[
\Delta PV \text{ (future incurred claims)} = (\frac{58 + .85C}{1 + C}) \Delta PV \text{ (future earned premiums)}
\]

\[
\text{rate increase} \% = \frac{\Delta PV \text{ (future incurred claims)}}{.85 PV_{\text{current}} \text{ (future earned premiums)}}
\]

Where:

\( \Delta \) indicates the change in PV due to the change in actuarial assumptions between the time of the last rate increase (or original pricing if no prior rate increase) and the current assumptions.

\( C \) is the cumulative % rate increase to date. For example, if the current rate (prior to the proposed rate increase) is 50% higher than the rate at initial pricing, then \( C = 0.5 \).

The **current** subscript in the denominator indicates that the PV should be computed using current assumptions. The future earned premiums in the formula are based on the current premiums prior to the proposed rate increase.
(State insurance regulators may wish to consider the addition of margin to the rate increase. For example, the \( \Delta PV(\text{future incurred claims}) \) term in the above formula could be multiplied by \((1 + \text{margin})\).

For pre-rate stabilized policies, we use 0.6 in place of 0.58 and 0.8 in place of 0.85:

\[
\text{rate increase \%} = \frac{\Delta PV(\text{future incurred claims}) - \left(\frac{6 + 0.8 C}{1 + C}\right) \Delta PV(\text{future earned premiums})}{\text{PV current}(\text{future earned premiums})}
\]

Prior to the time that Texas adopted the PPV approach, a past requested rate increase may have been reduced by the state insurance regulator by a method other than the PPV approach. In this situation, for a current filing, the state insurance regulator may make adjustments to the current approvable amount based on what would have been approved had PPV been used in the prior filing.

D. Appendix D—Principles of RBOs Associated with LTCI Rate Increases

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force, was charged to “Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.” In completing this charge, the Subgroup developed the following list of RBO principles to provide guidance for evaluating RBO offerings.

Principles and Issues

As related to:

1. Fairness and equity for policyholders who elect an RBO:
   - If some policyholders facing a rate increase are being offered an RBO but not others, an adequate explanation is needed.
   - Each RBO should provide reasonable value relative to the default option of accepting the rate increase and maintaining the current benefit level.

2. Fairness and equity for policyholders who choose to accept rate increases and continue LTCI coverage at their current benefit level:
   - The extent of potential anti-selection should be analyzed, with consideration of the impact on the financial stability of the remaining block of business and the resulting effect on the remaining policyholders.

3. Clarity of communication with policyholders eligible for an RBO:
   - Policyholders should be provided with maximum opportunity and adequate information to make decisions in their best interest.
   - Companies should present RBOs in clear and simple language, format, and content, with clear instructions on how to proceed and whom to contact for assistance.

4. Consideration of encouragement or requirement for an insurer to offer certain RBOs:
   - State insurance regulators should evaluate legal constraints, the impact on remaining policyholders and insurer finances, and the impact on Medicaid budgets if encouraging or requiring reduced LTCI benefits.
5. Exploration of innovation, particularly where an outcome of improved health and lower claim costs are possible:
   - Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases (e.g., providing hand railings for fall prevention in high-risk homes) and identifying the pros and cons of such an approach.

Widely Established RBOs in Lieu of Rate Increases

1. Reduce inflation protection going forward, while preserving accumulated inflation protection.
2. Reduce daily benefit.
3. Decrease benefit period/maximum benefit pool.
4. Increase elimination period.
5. Contingent nonforfeiture (CNF).
   i. Claim amount can be the sum of past premiums paid.
   ii. Only receive that benefit if the policyholder qualifies for a claim.

Less Common RBOs for Potential Discussion

1. Cash buyout.
2. Copay percentage on benefits.

As the industry continues to innovate new RBOs for consumers, such as the two listed above, the MSA Review will likewise develop and evolve to consider the reasonableness of these RBOs. The Task Force will encourage its appointed Subgroup or an appropriate NAIC actuarial committee or group, to collectively consider new RBOs, as they arise, that provides for input and technical advice from actuaries to states as they exercise their authority in considering RBOs as part of rate filings.

E. Appendix E—Guiding Principles on LTCI RBOs Presented in Policyholder Notification Materials

In 2020, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force adopted the following guiding principles to ensure quality of consumer notices of rate increases and RBOs. This section seeks to provide guiding principles in answering this question: “What are the recommendations for ensuring long-term care insurance policyholders have maximized opportunity to make reduced benefit decisions that are in their best interest?”

To complete the charge, the Subgroup 1) evaluated the quality of consumer notices and RBO materials presented to policyholders; 2) considered the relevant lessons learned and consumer focus group studies from the liquidation of LTC insurer Penn Treaty Network America; 3) reviewed existing RBO consumer notice checklists or principles from multiple states (i.e., Nebraska, Pennsylvania, Texas, and Vermont); and 4) addressed stakeholder comments on RBO principles.

This document is intended to establish consistent high-level guiding principles for LTCI RBOs presented in policyholder notification materials. These principles are guidance and do not carry the weight of law or impose any legal liability.

Recognizing that each component outlined in these principles will not apply in all circumstances, this section:

- RECOMMENDS that insurance companies recognize these fundamental principles.
- CALLS ON all insurance companies to consider the following principles in communicating RBOs available to consumers in the event of a rate increase.
- UNDERLINES that the following principles are complementary and should be considered as a whole.
Filing Rate Action Letters

Insurers should consider:

- Sending rate actions after the state has approved the rate action filing.
- Making the rate action effective on a policy anniversary date, recognizing that the Long-Term Care Insurance Model Regulation (#641) allows for the next anniversary date or next billing date.
- Mailing rate increase notification letters at least 45 days prior to the date(s) a rate action becomes effective, consistent with any applicable state laws and/or regulations.
- Sending rate increase notifications each year for rate increases that are phased-in over multiple years.
- Disclosing all associated future planned rate increases approved by state insurance regulators in the initial and phased-in rate increase notification letters.
- Filing rate action letter templates in the NAIC SERFF rate increase filing to include statements of variability and sample letters highlighting the differences between the communications, consistent with any applicable state laws and/or regulations.
- Presenting innovative options to state insurance regulators prior to filing new RBOs.
  - This enables state insurance regulators to evaluate potential anti-selection, adverse morbidity, and implications to consumers and future claims experience.

Readability and Accessibility

Insurers should consider:

- Drafting a rate action letter that is easy to follow, flows logically, and displays the essential information and/or the primary action first, followed by the nonessential information.
- Presenting the RBOs in a way that is comprehensible, memorable, and adjusted to the needs of the audience.
- Using cover pages, a table of contents, glossaries, plain language, headers, maximized white space, and appropriate font size and reading level for the intended audience.
- Using illustrative tools, such as bullet points or illustrations, as appropriate, and graphs or charts enabling a side-by-side comparison.
- Including definitions of complex terms; and if a term, subject, or warning is repeated throughout the communication, consider making the language consistent throughout the document.
- Including a Q&A section that is succinct but answers the commonly asked questions in plain language.
- Providing appropriate accommodations for policyholders with disabilities or policyholders for whom English is not a first language.

Identification

Insurers should consider drafting the RBO communication in a way that helps policyholders understand:

- What is happening.
- Why it is happening to them.
  - Ensure the letter does not negatively reference the state insurance department.
- When it is happening.
- What they can do about it.
- How they take action.

Communication Touch and Tone

Insurers should consider:
Drafting the communication in a way that helps policyholders envision or reflect on the reason(s) why they purchased an LTCI policy.

Conveying as much empathy as possible regarding the impact a rate action(s) may have on policyholders.

Presenting RBOs fairly, refraining from the use of bolding, repeating, or emphasizing one option over another.

Displaying the policyholder’s ability to maintain current benefits by paying the increased premium.

Using word choices that appreciate how those words could influence a policyholder’s decision.

For instance, consider using “now” instead of “must”; or consider using “mitigation options,” “offset premium impact” or “manage an increase” instead of “avoid an increase.”

Consultation and Contact Information

The insurer should consider listing multiple contacts in the communication in an easy-to-identify location to include phone number, email address, and website when available. For example:

- Customer service.
- Lapse notifier.
- Insurance producer.
- State insurance department.
- State Health Insurance Assistance Program (SHIP).

The insurer should consider suggesting policyholders consult a family member or other trusted advisor, such as:

- Lapse notifier.
- Insurance producer.
- Financial advisor.
- Certified personal accountant or tax advisor (in the event cash buyouts are offered).

Understanding Policy Options

Insurers should consider the presentation of the communication by:

- Identifying what necessitated the communication on the first page.
  - For example, the header could say, “Your Long-Term Care Premiums Are Increasing.”
- Including the RBOs with the rate action letter.
- Limiting the number of options displayed on the letter to no more than four or five.
- Identifying which RBO(s) have limited time frames.
- Advising policyholders that they can ask about reducing their benefits at any time, regardless of a rate increase.
- Providing enough information in the communication to make a decision.
  - If supplemental materials (e.g., insurer’s website) are provided, they would enhance the policyholder’s understanding, but not be necessary to use when making a decision.

Insurers should consider indicating the window of time to act by:

- Clearly indicating what the policyholder’s premium will increase to and by when.
- Displaying the due date(s) in an easy-to-identify location and repeating it multiple times throughout the document.
- Clearly differentiating due date(s) for each RBO, if available for a limited time.

Insurers should consider including disclosures regarding rate increase history by:
• Disclosing that future rate actions could occur.
• Advising if prior rate actions have or have not occurred to include:
  o Policy form(s) impacted.
  o Calendar year(s) the policy form(s) was available for purchase.
  o Percentage of increase approved to include the minimum and maximum if they vary by benefit type.
• Reminding policyholders that their policy is guaranteed renewable.

Insurers should consider advising policyholders of their current benefits:

• For example, the communication could disclose the policyholder’s current benefits to include:
  o Daily maximum amount.
  o Inflation option.
  o Current pool of benefits for policies with a limited pool of benefits.

Insurers should consider personal needs decision-making by:

• Only listing RBOs that are available to the policyholder.
• Calling on policyholders to reflect on how each option could impact them personally.
• Prompting policyholders to consider their unique situation to include their current age, health conditions, financial position, availability of caregivers, spouse or partner impacts, and the potential need for institutionalized care.
• Reminding policyholders to consider the cost of care in the area and setting where they expect to receive care.
• Informing policyholders of factors that impact LTC costs, such as:
  o The average cost of care for in-home care, assisted living, and nursing home care in their area.
  o The inflation rate of the cost of care for in-home and nursing home care in their area.
  o The average age and duration of an LTC claim for in-home and nursing home care.
  o Factors that influence the age, duration, and cost of a claim.
• Disclosing to policyholders when an RBO falls below the cost of care in their area.
• Calculating for policyholders the number of days or months a paid-up option could cover based on the cost of care in their area.
  o Buyout or cash-out disclosures.
  • The cash offerings, if any, should disclose to policyholders that the option could result in a taxable event, and they should consult with their certified personal accountant and/or tax advisor before electing this option.

Insurers should consider the value of each option by:

• Disclosing if the RBOs may not be of equal value and are dependent on the unique situation of each policyholder.

Insurers should consider communicating the impact of options by:

• Displaying the options in a way that enables policyholders to compare options, including details such as:
  o Daily/monthly benefit.
  o Benefit period.
  o Inflation option.
  o Maximum lifetime amount.
  o Premium increase percentage and/or new premium.
  o Nonforfeiture (NFO) or contingent nonforfeiture (CNF) amount.
  o If the policy is Partnership qualified, changes to benefits may impact Partnership status.
  o Current premium.
Providing a series of questions to help policyholders contemplate the implications of each action, such as:

- What will happen if they take no action?
- What will happen if they make no payment before the policy anniversary date?
- If they accept the full increase without reducing their benefits, how will they handle potential future rate increases?
- If they elect the cash buyout, there could be tax implications.
- If they elect a paid-up NFO, how long will the reduced benefit last if they had a claim?
- If they were to increase their elimination period from 30 days to 100 days, do they have enough funds to cover those expenses?
- Partnership policies: Will reducing the benefits remove Partnership qualification? If so, the letter should explain that their asset protection may be removed or reduced.

When rate actions span over multiple years, insurers should consider:

- Disclosing the full rate increase amount, how it is spread out across multiple years, and all associated future planned rate increases approved by state insurance regulators.
- Specifying if the premium increase referenced is the first, second, third, last, etc.
- Offering CNF based on the full increase amount and offered with each phase of the rate action.
- Notifying policyholders at least 45 days in advance of each phase of the rate increase, consistent with any applicable state laws and/or regulations.

VII. EXHIBITS

A. EXHIBIT A—SAMPLE MSA ADVISORY REPORT

FROM: Long-Term Care Insurance (LTCI) Multistate Actuarial Rate Review Team
DATE: [Date]
RE: ABC Insurance Company – Block LTC1 – Draft of Initial MSA Advisory Report

Executive Summary

The LTCI Multistate Actuarial Rate Review Team (MSA Team) recommends a rate increase of 35% to be approved for inflation-protected products and 20% to be approved for products with no inflation, related to ABC Company’s block.

Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved. Reduced benefit options (RBOs) may be selected to help manage the impact of the rate increase.

Analysis by the MSA Team resulted in the recommended rate increase being consistent with that resulting from the actuarially justified Texas and Minnesota approaches. The recommended rate increases are below the increases that would have resulted from the lifetime loss ratio approach and the rate stability rules.

Background

---

7 Information contained in this sample report is an example only and is not derived from any actual rate filing.
The MSA Team was formed to assist the Long-Term Care Insurance (EX) Task Force in developing a consistent national approach for reviewing LTCI rates, which results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.

The members are: [List names and state of members]. Starting in the first half of 2020, the MSA Team accepted rate increase proposals as part of a pilot program. The MSA Review became operational on [insert date].

This MSA Advisory Report is related to the rate increase proposal filed by ABC Company for its LTC 1 block sold between 2003 and 2006. The MSA Team’s actuarial analysis is provided below. The intention is that states can utilize this analysis and feel comfortable accepting the MSA Advisory Report recommendation when taking action on the upcoming ABC filings that will be made to the states.

The MSA Review and findings shall not be considered an approval of the rate schedule increase filing, nor shall it be binding on the states or the insurer. As this is a state-approved product, each state will ultimately be responsible for approving, partially approving, or disapproving the rate increase. A goal of the Task Force is for as much consistency as possible to occur between states in the rate increase approvals.

Insurer’s Proposal

ABC Company requests a rate increase of 60% to be approved for inflation-protected products and 40% to be approved for products with no inflation.

In addition, ABC Company is requesting higher rate increases for states that did not grant full approval of prior rate increase requests.

Workstream-Related Review Aspects

Actuarial Review

At the direction of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, the MSA Team applied the Minnesota and Texas approaches to calculate the recommended, approvable rate increases. Aspects of the Minnesota approach that result in lower rate increases than those resulting from loss ratio-based approaches contained in many states’ laws and rules include:

- Reduction in rate increases at later policy durations to address shrinking block issues.
- Elimination of rate increases related to inappropriate recovery of past losses.

Minnesota also has additional unique aspects: 1) consideration of adverse investment expectations related to the decline in market interest rates, 2) adjustments to projected claim costs to ensure the impact of uncertainty is adequately borne by the insurer; and 3) a cost-sharing formula applied in typical circumstances.

Even though these additional aspects are outside the pure loss-ratio requirements, they fall in line with legal provisions that rates shall be fair, reasonable, and not misleading.

The Minnesota approach, including application of the typical-circumstance cost-sharing formula, results in an approvable rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.

The Texas approach results in an approvable rate increase of 29% in aggregate.

The MSA Team’s recommendation, in consideration of the Minnesota and Texas approaches, is to approve a rate increase of 35% for inflation-protected products and 20% for products with no inflation protection.
Higher rate increases are recommended for states where past cumulative rate increases below 55% have been approved.

The MSA Team reviewed support for the assumptions, experience, and projections provided by the insurer and performed validation steps to review the insurer-provided information for reasonableness. Details regarding the actuarial review are provided in Appendix 1. Also, the initial submission and subsequent correspondence between the insurer and the MSA Team are available on SERFF. The SERFF tracking number is ABCC-123456789.

Consideration of Differences in Histories of States’ Rate Increase Approvals

According to the Historical Rate Level Summary, Appendix D in the insurer proposal, past rate increase approvals by state have varied and can be categorized as follows:

- 25 states have granted full or near-full approval of ABC Company’s past requests (at or near 55%, cumulative).
- 18 states have granted cumulative approvals averaging 45%.
- Five states have granted cumulative approvals averaging 27%.
- Two states have granted cumulative approvals averaging 15%.

The insurer’s stated goal is to bring rates in all states up to an equivalent rate level. Currently, the average annual premium rates for a policyholder range from below $1,700 in some states (with the lowest past approvals) to over $2,200 in other states (with the highest past approvals).

The MSA Team’s recommendation is based on a goal of rates per benefit unit being uniform between states going forward.

A table of examples of recommended rate increases based on past cumulative approval history is provided in Appendix 2.

Non-actuarial & Valuation/Solvency Considerations

Non-actuarial considerations, including flexibility regarding the phase-in of rate increases, waiting periods between rate increases being coordinated with phase-in periods, and other issues are being discussed at the Task Force and the Subgroup.

Even with future claims potentially being reduced due to COVID-19-related behavioral impact, ABC Company will continue to experience substantial losses on this block.

Regarding coordination of rate and reserving reviews, the insurer states that assumptions underlying the rate increase proposal are consistent with assumptions underlying the reserve adequacy testing.

RBOs – Review for Reasonableness

Unless a rider was purchased, ABC Company policyholders facing a rate increase will be offered the following applicable options in lieu of a rate increase:

1) Extending the elimination period.
2) Decreasing the benefit period.
3) Reducing future inflation accumulation.

The insurer produced rate tables which demonstrate that the RBOs provide reasonable value in relation to a case of a policyholder retaining full benefits and paying the full rate increase.
Financial Impact for Insurer
The requested rate increase associated with recent adverse development would result in around $50 million of reduced losses for this block according to information contained in the actuarial memorandum.

Mix of Business
From the insurer’s actuarial memorandum:

Enrollees:
- Total enrollees as of date of proposal: 15,000
- Inflation protection: 9,000 (inflation protection) and 6,000 (no inflation)
- Benefit period: 8,500 (lifetime benefits) and 6,500 (limited benefits)

Product type: Expense reimbursement:
- Average issue age: 58
- Average attained age: 75
- Annualized premium: $30 million; $2,000 average per policyholder

Appendix 1
Drivers of Rate Increase Proposal – Summary
The primary drivers, summarized in the insurer actuarial memorandum, were lower lapses and longer average claim length. The insurer assumptions were based on actual-to-expected adjustments, based in part by insurer experience that has become more credible in recent years. The assumptions were determined to be reasonable and in line with industry and actuarial averages.

Details Regarding Minnesota Approach
For an average (in terms of benefit period and issue age), 5% compound inflation-protected cell:
- Makeup cumulative rate increase: 177% (the increase from original rates needed going forward to get the block to the financial position contemplated at original pricing)
  - This increase is equal to the increase that would result from a pure loss ratio approach.
- If-knew cumulative rate increase: 36% (the increase from original rates needed if the insurer could go back to the past and reprice the product given information it knows now)
- Proportion of original policyholders remaining in force, based on insurer original and updated assumptions: 62%
- Blended if-knew / makeup rate cumulative rate increase since issue: 123%
  - $0.62 * 177% + (1 - 0.62) * 36%, adjusted for rounding
- Insurer cost share based on Minnesota formula (see Appendix 3): 12%
- Recommended cumulative rate increase since issue: 109%
  - $(1 - 0.12) * 1.23$, adjusted for rounding
- Past cumulative rate increases: 55%
- Actuarial recommended rate increase from current rates: 35%
  - $(1 - 0.55) = 1$, adjusted for rounding
- Final actuarial recommended rate increase from current rates (for the inflation-protected cell): 35%
  - Minimum of calculated approval rate of 35% and insurer proposal of 60%.
- Using the same methodology, the final actuarial recommended rate increase from current rates (for the non-inflation-protected cell): 20%
Note that the Minnesota approach includes the reflection of declining interest rates which tends to lead to adverse investment returns compared to expectations in original pricing. Also, where applicable, insurer morbidity assumptions are adjusted downward due to a lack of credible support at extremely high ages, and a general lack of complete support for aspects of morbidity assumptions, including uncertainty regarding future benefit utilization.

Details Regarding Texas Approach
- Insurer Calculation (aggregate): 52%

PPV calculations
- Texas Life & Health Actuarial Office (LHAO) PPV Calculation (aggregate): 29%

LHAO Comments
- For the purposes of the MSA report, and as a component of the calculation of the approvable rate increase, Texas recommends an actuarially justified PPV calculated amount of 29%.

Texas rate stabilized PPV Formula:
\[
\text{rate increase} \% = \frac{\Delta PT'(future incurred claims) - \left( \frac{.58 + .85C}{1+C} \right) \Delta PT'(future earned premiums)}{.85 PT'_{current}(future earned premiums)}
\]

Reconciliation of Minnesota and Texas Approaches

The Texas PPV calculated amount of 29% aligns well with the Minnesota approach’s recommended rate increase of 35% for inflation-protected policies and 20% for non-inflation-protected policies when the distribution of inflation-protected vs. non-inflation-protected cells is applied. The MSA Team’s recommended rate increase is 35% for inflation-protected policies and 20% for non-inflation-protected policies.

Recommended rate increases by state, in consideration of various histories of rate increase approvals, are listed in Appendix 2.

Correspondence Summary
- Template information request for multi-state rate increase filings, based on the list adopted by the Health Actuarial (B) Task Force on March 23, 2018.
- New premium rate schedule, percentage increase for each rating scenario such as issue age, benefit period, elimination period, etc., from the existing and original rates.
- Rate increase history that reflects the filed increase.
- Actuarial Memorandum justifying the new rate schedule, which includes:
  - Lifetime loss ratio projection, with earned premiums and incurred claims discounted at the maximum valuation interest rate.
  - Reasons for the rate increase, including which pricing assumptions were not realized and why.
  - Statement that policy design, underwriting, and claims handling practices were considered.
  - A demonstration that actual and projected costs exceed anticipated costs and the margin.
  - The method and assumptions used in determining projected values should be reviewed in light of reported experience and compared to the original pricing assumptions and current assumptions.
  - Combined morbidity experience from different forms with similar benefits, whether from inside or outside the insurer, where appropriate to result in more credible historical claims as the basis for future claim costs.
  - Comparison with asset adequacy testing reserve assumptions.
• Provide actuarial assumptions from original pricing and most recent rate increase filing, and, have the original actuarial memorandum available upon request.
  o Guidance Manual Checklist items: summaries, including past rate adjustments; average premium; distribution of business, including rate increases by state; underwriting; policy design and margins; actuarial assumptions; experience data; loss ratios; rationale for increase; and reserve description.
  o Assert that analysis complies with Actuarial Standards of Practice, including No. 18 and No. 41.
  o Numerical exhibits should be provided in Microsoft Excel spreadsheets with active formulas maintained, where possible.

• Rate Comparison Statement of renewal premiums with new business premiums, if applicable.

• Policyholder notification letter – should be clear and accurate.
  o Provide a description of options for policyholders in lieu of or to reduce the increase.
  o If inflation protection is removed or reduced, is accumulated inflation protection vested?
  o Explain the comparison of value between the rate increase and policyholder options.
  o Are future rate increases expected if the rate increase is approved in full? If so, how is this communicated to policyholders?
  o How are partnership policies addressed?

• Supplementary information, based on a list developed by the MSA Team following the review of initial pilot program proposals:
  o Information on benefit utilization.
  o Attribution of rate increase by factor.
  o RBO history and reasonability analysis.
  o Investment returns.
  o Expected loss ratio.
  o Shock lapse history.
  o Waiver of premium handling.
  o Actual-to-expected differences.
  o Assumption consistency with Actuarial Guideline 51 asset adequacy testing.

• Following initial review of the proposal, additional information was requested by the MSA Team related to:
  o Original pricing assumptions.
  o Lapse assumption by duration.
  o Premiums and incurred claims by calendar year based on original assumptions.
  o Distribution of in force by inflation protection.
  o Loss ratios by lifetime/non-lifetime benefit period and with/without inflation protection.
  o Description of waiver of premium handling in premium and claim projections.
  o Commentary on COVID-19 short-term and long-term LTC impact.

Appendix 2

Examples of Rate Increases If an RBO is Not Selected
Appendix 3

Potential Cost-Sharing Formula for Typical Circumstance

Cumulative rate increase since issue date is haircut by:

- No haircut for the first 15%.
- 10% for the portion of cumulative rate increase between 15% and 50%.
- 25% for the portion of cumulative rate increase between 50% and 100%.
- 35% for the portion of cumulative rate increase between 100% and 150%.
- 50% for the portion of cumulative rate increase in excess of 150%.

Example: if the pre-cost sharing Minnesota approach results in a cumulative 210% rate increase since issue:

- Break 210% into the following components: 15%, 35%, 50%, 50%, 60%
- Post haircut approval is 100% of 15% + 90% of 35% + 75% of 50% + 65% of 50% + 50% of 60%
- = 15% + 32% + 38% + 33% + 30%
- = 147%

Justification for the cost-sharing formula is that the insurer should have had more information about the possibility of triple-digit rate increases than the consumer had.

Adjustments to the formula may be desired when an insurer’s solvency position is dependent on a certain level of rate increase approval. That is not the case with this insurer or proposal.
The National Association of Insurance Commissioners (NAIC) is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators from the 50 states, the District of Columbia and five U.S. territories. Through the NAIC, state insurance regulators establish standards and best practices, conduct peer review, and coordinate their regulatory oversight. NAIC staff supports these efforts and represents the collective views of state regulators domestically and internationally. NAIC members, together with the central resources of the NAIC, form the national system of state-based insurance regulation in the U.S.

For more information, visit www.naic.org.
The Long-Term Care Insurance (EX) Task Force conducted an e-vote that concluded Oct. 29, 2021. The following Task Force members participated: Michael Conway, Vice Chair (CO); Jim L. Ridling represented by Mark Fowler (AL); Alan McClain (AR); Ricardo Lara represented by Tyler McKinney (CA); Andrew N. Mais represented by Paul Lombardo (CT); Karima M. Woods represented by Philip Barlow (DC); Trinidad Navarro represented by Frank Pyle (DE); David Altmaier represented by Christina Huff (FL); Colin M. Hayashida represented by Kathleen Nakasone (HI); Doug Ommen represented by Andria Seip (IA); Dana Popish Severinghaus represented by Shannon Whalen (IL); Amy L. Beard represented by Dawn Bopp (IN); Anita G. Fox represented by Karen Dennis (MI); Grace Arnold (MN); Chlora Lindley-Myers (MO); Mike Chaney represented by Bob Williams (MS); Troy Downing represented by Bob Biskupiak (MT); Mike Causey represented by Ted Hamby (NC); Jon Godfread represented by Chrystal Bartuska (ND); Eric Dunning (NE); Russell Toal (NM); Barbara D. Richardson represented by Jack Childress (NV); Glen Mulready represented by Andrew Schallhorn (OK); Andrew Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry D. Deiter (SD); Mike Kreidler represented by Molly Nollette (WA); Mark Afable (WI); Allan L. McVey (WV); and Jeff Rude (WY).

1. **Adopted the 2022 Proposed Charges**

The Task Force conducted an e-vote to consider adoption of the 2022 proposed charges of the Task Force and its Subgroups. A majority of the members voted in favor of adopting the 2022 proposed charges (Attachment Six-A). The motion passed.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.

[06_LTCI(EX)TaskForce_102921_Minutes.docx]
**2022 Proposed Charges**

**LONG-TERM CARE INSURANCE (EX) TASK FORCE**

**Ongoing Support of NAIC Programs, Products or Services**

A. The Long-Term Care Insurance (EX) Task Force will:

Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, this Task Force is charged to:

- further develop and implement a coordinated national approach for reviewing LTCI rates;
- monitor and evaluate the rate review process;
- evaluate and recommend options to help consumers manage the impact of rate increases; and
- monitor work performed by other NAIC groups to review the financial solvency of long-term care (LTC) insurers.

**Ongoing Support of NAIC Programs, Products or Services**

1. The Long-Term Care Insurance (EX) Task Force will:

A. Once adopted by the NAIC Executive (EX) Committee and Plenary, monitor, and evaluate the progress of the multistate actuarial (MSA) rate review process as outlined in the MSA Framework document. Monitor state insurance department rate review actions subsequent to implementation of the MSA Framework and MSA rate review recommendations.

   A. Develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Deliver such a proposal to the Executive (EX) Committee by the 2021 Summer National Meeting.

   B. Complete an evaluation and further evaluate and recommend options to provide consumers with choices regarding modifications to LTCI contract benefits where policies are no longer affordable due to rate increases.

   C. Monitor the work performed by other NAIC solvency working groups and assist in the timely multi-state coordination and communication of the review of the financial condition of LTC insurers. Deliver such a proposal to the Executive (EX) Committee by the 2021 Summer National Meeting.

**Staff Support:** Jeff Johnston, Jane Koenigsman

4. The Long-Term Care Insurance Financial Solvency (EX) Subgroup will:

1. Explore restructuring options and techniques to address potential inequities between policyholders in different states and techniques to mitigate policyholders’ risk to state guaranty fund benefit limits, including states’ pre-rehabilitation planning options. Evaluate the work of the consultant and report on the work to the Task Force.

2. Monitor the work performed by other NAIC solvency working groups and assist in the timely multi-state coordination and communication of the review of the financial condition of LTC insurers.

3. Complete its charges by the 2021 Summer National Meeting.

**The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup will:**

A. Develop and finalize the development of the multistate actuarial (MSA) rate review process as outlined in the MSA Framework document which outlines a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization. Implement the MSA rate review process once adopted by the NAIC Executive (EX) Committee and Plenary.

B. Evaluate the progress of the MSA rate review process and provide ongoing maintenance and enhancements, as deemed necessary.

C. The Subgroup should complete its charges by the 2022 Summer National Meeting.

**Staff Support:** Eric King
6.3. The Long-Term Care Reduced Benefit Options (EX) Subgroup will:
   A. Further Complete an evaluation and/or recommendation of options to help consumers manage the impact of rate increases. This includes:
      1. The potential Finalizing development of a process to evaluate innovative options that allow for insurers to offer benefits that lessen the likelihood of an insured needing long-term care services, including evaluation of the suitability of and regulatory barriers to proposed options.
      2. The potential development of mechanisms to help regulators and consumers objectively compare reduced benefit options (RBOs), including comparison of accepting a rate increase and retaining current benefits to electing an offered RBOs.
      3. The further exploration of pursuing more uniformity in Finalizing the Consumer Notices Checklist for RBOs.
   B. Support and provide expertise to the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup regarding evaluation of RBOs.
   C. The Subgroup should Complete its charges by the 2021 Summer Fall National Meeting.

Staff Support: Eric King
The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met Dec. 7, 2021. The following Subgroup members participated: Jessica K. Altman, Chair (PA); Lori K. Wing-Heier (AK); Jimmy Harris (AR); Emily Smith (CA); Frank Pyle (DE); Andria Seip (IA); Eric Anderson (IL); Karen Dennis (MI); Fred Andersen (MN); Jill Kruger (SD); Michael Markham (TX); Tomasz Serbinowski (UT); Anna Van Fleet (VT); Lichiou Lee (WA); and Joylynn Fix (WV).

1. **Adopted a Draft LTC Wellness Program Issues Document**

Mr. Andersen gave an overview of the draft long-term care (LTC) wellness program issues document and provided a summary of comments and edits made to the draft exposure.

Mr. Andersen made a motion, seconded by Director Wing-Heir, to adopt the document (Attachment Seven-A) that reflects edits made in response to comments received (Attachment Seven-B) during its second public exposure for comment. The motion passed unanimously.

Commissioner Altman said the document will be forwarded to the Long-Term Care Insurance (EX) Task Force for its consideration.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.
Issues related to LTC wellness benefits

7/22/2021 exposed draft with 10/04/21 edits

Objective:
The objective of this paper is to increase clarity to regulators, insurance companies, and interested parties regarding issues related to innovative long-term care wellness programs.

Background:
Stand-alone long-term care insurance is a unique industry, in that higher-than-expected claims’ costs have resulted in substantial rate increases for consumers and financial losses and in some cases solvency concerns for insurance companies.

Technology firms are developing technological and other approaches that could be used by insurance companies to potentially prevent, delay, or lower the severity of LTC claims and improve health outcomes in a space called “LTC wellness”. Examples of these early, pre-insurance-claim interventions include:

- Fall prevention programs;
- Home modification consultations, analysis and implementation to facilitate aging in place;
- Caregiver support programs for both formal and informal caregivers;
- Next generation care coordination services;
- Technological solutions aimed at improvements in cognitive impairment prevention and early diagnosis, potentially involving technology supplemented by a physician’s cognitive risk evaluation.

In light of systemic, LTC-related financial challenges, insurance companies, insurance regulators, and tech firms are interested in working together to explore some of these claim cost-reducing innovations. Here are some potential barriers to increased adoption of these new approaches and how those barriers could potentially be addressed, with details provided below the list:

1. Analysis of effectiveness
2. Unfair discrimination
3. Consumer confusion
4. Rebating
5. Tax considerations
6. Regulatory role in approving or evaluating LTC wellness approaches
7. Actuarial considerations
8. Data privacy
9. Other considerations
Details:

1. Analysis of effectiveness
   a. Issue: in light of the lag time between policyholder age during LTC wellness efforts and policyholder age when claim incidence becomes more common, what issues arise from insurers' lack of knowledge of effectiveness of LTC wellness programs in reducing claim costs, and how can those issues be addressed?
      i. The cost of innovation efforts, with no guarantee of any returns, may dissuade some insurance companies from pursuing these programs.
         1. Expenses vary - in many cases are typically upfront and significant.
         2. The financial impact on claims cost is typically unknown and down the road.
      ii. Designing pilot programs is difficult because there is such a variety of programs available, and each block of LTC insurance policies has unique characteristics that might influence the effectiveness of a given program.
      iii. Some companies are concerned about regulatory reaction to these changes.
   b. Current observations
      i. Industry representatives described some current or likely upcoming LTC wellness efforts at the May 4, 2021 NAIC Reduced Benefit Option Subgroup meeting. A theme was that there is great supply and demand for LTC wellness innovation efforts.
      ii. Some insurance companies are exploring or implementing pilot programs. Very early signs on the effectiveness of interventions on impact on policyholder health and claim costs are promising, but data development is slow and it is difficult to implement control trials.
         1. Insurance companies are eager for data and for ways to effectively share data within the legal and regulatory framework so that the industry can effectively respond to positive policyholder experiences and discontinue any programs that fail to make an impact.
      iii. Because there is little competition in the stand-alone LTC insurance market, due to the financial losses accumulated and many insurance companies exiting the actively selling market, sharing of ideas between companies on management of active policies may be possible, although care should be taken regarding anti-trust issues.
      iv. Effectiveness may increase or decrease if targeting certain policyholders.
      iii. Development of experience showing effectiveness will be a work in progress.
   c. Addressing of Issues
      i. Lack of data: With most LTC wellness programs being under-developed or being implemented recently, data is lacking on the extent to which resulting claim cost decreases offset the costs of the programs.
      ii. How to measure health impact: Whether an LTC wellness program effectively reduces claim costs or not, will there be approaches established to measure health benefits to policyholders?
i. Data sharing: Facilitating the sharing of data, between vendors and insurance companies, and perhaps involving public programs such as Medicaid, is a key element of analyzing effectiveness.

d. Next steps
   i. Regulators engage with insurance companies to learn of recent developments.
   ii. Research public programs’ data on effectiveness of LTC wellness programs to see if Medicare Advantage, Med Supp, or Medicaid / PACE data is available, relevant, and used. Also, look into potential independent living / senior facility wellness experience as well as health and life insurance wellness experience.
   iii. Determine an approach to monitor success of programs. For example, if 3 to 4 companies are applying 3 to 4 pilot programs and finding success, it would be good news regarding broader, future efforts.
      1. Facilitate the sharing of general results (i.e., not individual policyholder data) among those insurance companies in a way that is within the legal and regulatory boundaries.
   iv. Regulators ensure capital supporting LTC liabilities is adequate under a range of scenarios, including one where claims costs continue to increase.

2. Prevention of unfair discrimination related to extra-contractual benefits and costs
   a. Issue: how does an insurer offer a wellness initiative that is not unfairly discriminatory to discrete populations within the broader group of policyholders?
   b. Current observations
      i. There may be state anti-discrimination and bias-related legal issues to address if certain policyholders are targeted, including through Big Data, to receive extra benefits.
         1. For instance, if older policyholders have less of an online footprint than younger policyholders, how would this impact the accuracy of the targeting of LTC wellness benefits or otherwise introduce bias?
         2. [Birny Birnbaum May 4 comment]: If wellness or other efforts to address specific conditions are based on age or the health of the policyholder, this seems like normal value-added products and services for loss prevention and not an example of unfair discrimination.
            a. Issues to address are likely related to creating a clear framework for compliance related to the use of data analytics and artificial intelligence.
   c. Addressing of issues
      i. Equality: How policyholders are offered wellness initiatives could be unfairly discriminatory.
         1. Policyholders of “the same class and of essentially the same hazard” must be treated equally. See NAIC Model Unfair Trade Practices Act (#880) (“Model Law”).
2. How may an insurer “classify” policyholders post underwriting? Regulators may need to provide guidance on how to classify policyholders.
   a. What is fair? The insurers will need to provide justification.
      i. For example, under the Model Law the availability of the value-added product or service must be based on documented objective criteria and offered in a manner that is not unfairly discriminatory.
   b. May classification be made by jurisdiction? Does that impact the LTC Multi-State Actuarial Rate Review (MSA) program’s overarching goals?
   c. May classification be made by product form?

ii. Selection: How policyholders are selected for wellness initiatives could be unfairly discriminatory.
   1. Wellness initiatives may be costly to the insurer. How can an insurer test it to validate the benefits before rolling it out more broadly?
      a. Under the Model Act, the insurer may provide the product or service in a manner that is not unfairly discriminatory as part of a pilot or testing program for no more than one year.
      a.b. Initial selection of participants may be the most important for antidiscrimination. That selection for pilots should consider including a wide range of individuals from various geographic, economic, social, marital, age, racial, and ethnic populations to ensure meaningful data is collected.
   2. Would a random selection of policyholders be unfair?
   3. Should policyholders be given the option to participate in a wellness initiative?
      a. Must all policyholders be given the option to participate?
   4. How much time/data is needed to prove the initiative is valuable?

5. Prior to offering a wellness program, an insurer should have a logical hypothesis of what benefits could be derived from the program.
   a. Even if benefits are available to all those who utilize, the initiatives may be limited in application depending on a policyholder’s specific circumstances.

iii. Accessibility: How a wellness initiative operates could be unfairly discriminatory.
   1. Does it limit who can participate based on the medium and cost of the equipment or technology? For example:
      a. Does it require access to a computer or internet for online participation?
      b. Does it require access to a smart phone, texting minutes, etc., to use an app?
      c. Does it require access to roads, pools, sidewalks?
      d. Does it require technical skills to use software or hardware?
      e.e. Will insurers utilize different communication methods, such as phone, text, e-mail, or mail?
2. Does any such limitation require alternatives for those unable to participate in the initiative?

iv. Uniformity: If guidance is issued on wellness initiatives, how would states adopt the guidance, especially if states have different standards for allowing wellness programs in LTC insurance?

1. Have all states adopted the Model Law? If not, what have hurdles been for states that have not adopted the model? Will states adopt updates to the Model Law?

2. Standards for unfair discrimination, including in the specific context of wellness initiatives, may vary by state requiring insurers and regulators to be aware of the specific requirements of the jurisdiction in question.
   a. For example, Alaska permits rewards under wellness programs but requires that the reward be available for “all similarly situated individuals.” See AK Stat § 21.36.110.

3. If some states allowed wellness initiatives and not others, would this conflict with other initiatives, such as the MSA?

d. Dependencies
   i. Unfair discrimination guidance needs to consider other wellness initiative issues that include:
      1. Analyzing Effectiveness
      2. Actuarial Impacts
      3. Rebate Standards and Limitations
         a. What if an insurer offers the service at a cost (full or portion) for the policyholder(s) after the pilot?

3.4. Regulatory Evaluation

e. Next steps
   i. Regulators and interested parties discuss the issues noted above, including whether the use of Big Data to predict risks (of e.g., falls or dementia) and offering benefits and services only to those targeted as high risk would cause concerns regarding discrimination.

3. Consumer confusion
   a. Issue: potential consumer confusion concerning LTC wellness programs will be highly variable dependent upon factors such as the nature of the program, the consumers involved, and the complexity of regulatory issues.

b. Addressing of issues:
   i. Wellness programs with simple to understand direct connections to prevention of common medical issues (e.g., installing a grab bar) will provoke far less confusion than more esoteric programs based on new technological services (e.g., data collection/monitoring of insured activities) with not yet proven results. Simpler programs may also trigger fewer and less complex regulatory/statutory requirements related to privacy, consent, disclosure, etc. resulting in programs...
that will be more easily understood and documented. Programs with newer technology, more data collection and manipulation, and which are connected to more complex care issues will be more confusing and will trigger more complicated regulatory/statutory requirements.

1. In these scenarios, there may be a need to first educate consumers on the technology and the data collection/usage and then the program and its potential benefits before disclosure and informed consent can occur. The ability to prevent confusion and achieve adequate education and understanding may be further impacted by the level of technological sophistication and mental acuity of the consumer, factors which often decline with age.

ii. Designing effective communication regarding insurer LTC wellness programs will require in-depth engagement with LTC consumers, policyholders, family members, eldercare subject matter experts, and NAIC consumer representatives. When the vetting group engages with Medicaid programs, PACE, etc. to learn about best practices in wellness programming, the vetting group should take the opportunity to learn about the successes and failures in communication used in implementing these programs, including any relevant focus group data available.

iii. In addition to engaging with Medicaid and PACE, the following organizations may have valuable insights: National Council on Aging (www.ncoa.org), AARP (www.aarp.org), and the National Institute on Aging (www.nia.nih.gov). In addition to engaging with NAIC representatives and these national organizations, the Vermont team would also propose to reach out to Vermont’s sister agencies in state government (The Agency of Disabilities, Aging, and Independent Living (DAIL), and the Agency of Human Services, (AHS)). Lastly, Emily Brown serves on the board of directors for Central Vermont Home Health and Hospice. Engagement with this local group may provide rural eldercare perspectives missing at the national level.

iv. Focus groups designed to elicit feedback on communication style are most helpful when the programming has been determined. In the alternative, guidelines for communication and disclosure designed to minimize confusion and maximize understanding would need to be developed along a spectrum of wellness programs of increasing complexity. The results of vetting group work around rebating, program effectiveness, data privacy, loss of tax-preferred status, and discrimination concerns will determine components of what needs to be tested in focus groups. For instance, if the loss of tax-preferred status is something the vetting group can address at the federal level, it will not need to be considered when determining barriers to effective communication.
v. Building consensus around terminology and building trust are essential to effective communication. In a Medicaid setting, the PACE program (Programs for All Inclusive Care for the Elderly), wellness efforts include a multidisciplinary team of health professionals coordinating care and no cost share on services. (Source: https://www.medicaid.gov/medicaid/long-term-services-supports/pace/programs-all-inclusive-care-elderly-benefits/index.html). This builds trust through human contact with medical professionals.

1. This type of communication is vastly different than the communication between an insurer and a long-term care policyholder facing a rate increase, where participation may have some impact on the premium rate increase the consumer must pay. As a result, extra care will need to be taken to ensure policyholders truly understand the offer and the level of participation required and that they do not acquiesce based on confusion or because they feel they have no other choice.

vi. As the wellness vetting subgroup works through the issues (program effectiveness, discrimination, data privacy, and tax considerations), the Vermont team hopes to build on the conversations planned with subject matter experts in eldercare programming. The vetting group should plan to add time at the end of the process to explore and understand the vetted programs with consumers via focus group(s) to best anticipate and mitigate consumer confusion.

4. Rebating

a. Issue: whether some long-term care wellness benefits for policyholders run afoul of the NAIC Model anti-rebating laws or are otherwise prohibited. Those wellness plans may be designed to prevent or lower the severity of LTC insurance claims or to improve health outcomes (“Wellness Initiative”).

b. Addressing issues:

i. **NAIC Model Law.** The recently amended version of the NAIC Model Unfair Trade Practices Act (#880) (“Model Law”) explicitly exempts the type of Wellness Initiatives currently being considered from the prohibition on rebates as an unfair trade practice. Specifically, § 4 (H)(2)(e) of the Model Law excludes from “the definition of discrimination or rebates . . . [t]he offer or provision . . . of value-added products or services at no or reduced cost,” even “when such products or services are not specified in the policy of insurance,” if the product or service meets certain requirements. Amongst procedural requirements, the Model Law requires that the product or service (a) relate to the insurance coverage, (b) be “primarily designed to satisfy” one of nine functions, including providing loss mitigation, reducing claim costs, enhancing health, and incentivizing behavioral changes, and (c) cost a reasonable amount in comparison to premiums or coverage. As the Wellness Initiatives in question would be designed to prevent or
lower the severity of LTC insurance claims and improve health outcomes, as long as their cost is reasonably related to the premiums or coverage, then they should not be considered rebates under the recently amended Unfair Trade Practice Act.

ii. Variations in State Law. The above cited language from the Unfair Trade Practices Act, § 4 (H)(2)(e), however, is a recent December 2020 addition to the Model Law. As such, most states have yet to specifically address that update and have only enacted a prior version of the Unfair Trade Practices Act. Unfortunately, the old language of the Model Law was less flexible on this point, which led a number of states to carve out exceptions by individual amendments, regulations, bulletins or desk drawer rules. And the Unfair Trade Practices Act is not the only model law with language prohibiting rebates in the business of insurance. As such, it is much less certain whether the Wellness Initiatives at issue would trigger the law’s anti-rebating provision. And the many state initiatives in this area do not permit a uniform analysis of rebating in each adopting jurisdiction as the precise language, interpretation, and application of the law varies by state.

1. As a result, whether Wellness Initiatives could arguably be considered a rebate remains a question subject to the specifics of each individual state’s rebating law and how each jurisdiction has interpreted and applied that law. To provide a few examples of the variations in state law, even amongst states that have adopted the prior Model Law:

   a. Alaska: Statutorily excludes “a reward under a wellness program established under a health care plan that favors an individual” from the definition of rebates so long as seven requirements, including the program being designed to promote health or prevent disease, are met. See AK Stat § 21.36.110.

   b. Maine: Statutorily permits provision of a value-added service that is related to the coverage provided by an insurance contract, without fee or at a reduced fee, if it is (a) included within the insurance contract, (b) directly related to the servicing of the insurance contract, or (c) offered to provide risk control for the benefit of a client. See Me. Stat. tit. 24-A, § 2163-A.

2. Thus, under the current legal landscape, those seeking to introduce Wellness Initiatives would need to confirm whether such an initiative would be permissible under each relevant jurisdiction’s rebating law and if there are any state specific requirements for offering such an initiative.

iii. Trends in State Law. Notwithstanding the variation in individual state’s laws and if and how they have been amended or interpreted, there does appear to be a general trend that “services are not prohibited if they are directly related to the
insurance product sold, are intended to reduce claims, and are provided in a fair and nondiscriminatory manner.”  J. Parson, D. Marlett, S. Powell, Time to Dust Off the Anti-Rebate Laws, 36 J. Ins. Reg. 7, at 8 (2017).  Under this general approach, which aligns with the substantive result of the language in the current Model Law, a Wellness Initiative should not be prohibited as impermissible rebating.

iv. Policy Considerations. The exemptions in the current Model Law and the trend amongst states to permit certain services even if they are not contained within the insurance contract appear to be logical limitations on the scope of anti-rebating statutes. In short, Wellness Initiatives are not the type of conduct that anti-rebating statutes were originally designed to protect consumers against. This is particularly true in the context of LTC insurance where consideration of these initiatives only began significantly after the policies were initially sold, where the initiatives do not begin at the moment the policy is issued, and moreover where the policies have proven to be unprofitable for the insurers. In other words, it is fair to assume that Wellness Initiatives in this context are not being used to either induce the policyholder to enter into the insurance contract, nor to expand the insurer’s share of the LTC insurance market. Rather, they are targeted at improving policyholder health and reducing the frequency and severity of claims.

v. Conclusion. Given the current legal landscape with respect to rebating, to facilitate the success of Wellness Initiatives jurisdictions could either (a) adopt the recently added rebating exemptions found in the current version of the Model Law, which would explicitly permit such initiatives, or (b) take action to interpret and apply their existing laws in a manner that would allow the provision of products or services that are directly related to the insurance policy in question and designed to reduce claims or improve health. Absent adoption of the current version of the Model Law, however, insurers would need to conduct a state-by-state evaluation of rebating laws in all relevant jurisdictions before implementing a Wellness Initiative.

5. Tax considerations
   a. Issue: will non-ADL / non-cognitive benefits cause tax issues for policyholders?
   b. Current observations
      i. There may be tax consequences for consumers if benefits outside the federal definition of LTC benefits are provided, but this may depend on whether initial investment in programs is paid for out of general company expenses or from the benefit pool.
   c. Addressing issues: [section to be drafted]
   d. Next steps:
      i. Engage with the federal government and insurance industry tax experts to work out potential IRS/tax issues.
6. **Regulatory role in approving or evaluating LTC wellness approaches**
   
a. **Issue:** there is question as to whether LTC wellness approaches need to be approved by regulators or will be implemented by companies and later evaluated by regulators.
   
b. **Current observations:**
   
i. There is little regulatory clarity or uniformity regarding LTC wellness programs.
   
c. **Addressing issues**
   
i. **Idea:**
   
   1. Provide guidance that companies should have available, upon request, documentation of their programs and documentation that key issues our group identified have been addressed.
      
      a. These issues include company plans to accumulate data on programs’ effectiveness, avoiding unfair discrimination, preventing consumer confusion, their take on rebating, avoiding unfavorable consumer tax issues, and data privacy.
   
   2. States retain the right to conduct back-end reviews, targeting any critical areas of regulatory focus.
   
   3. Companies and regulators need to ensure that this approach is in compliance with existing state laws.
      
      a. The NAIC Model Unfair Trade Practices Law appears to contemplate either a “provide notice and opportunity for objection” approach or a “documented criteria must be maintained by the insurer and produced to the regulator upon request” approach, depending on the circumstances.
   
ii. **Considerations:**
   
   1. Balance between holding companies accountable while not creating a burden that could prevent or slow up companies from pursuing beneficial programs.
   
   2. There may be mixed policies regarding pre-approval or filing of documentation by state. An effort to make any filing process as efficient as possible for regulators and companies should be pursued to avoid any unconstructive burdens.
   
   3. Companies being alerted that documentation must be available would likely ensure they at least attempt to address each of the issues prior to implementing a program.
   
   4. Would states be interested in being provided notice of development of a new wellness program? Would states want to be notified of every change in or addition to a program? In what form would the notification occur?
   
   5. Would a state have a right to object to an aspect of a program? If the objection leads to elimination of the program in that state, would that lead to other concerns, e.g., discrimination?
6. Would development of a uniform LTC wellness template help creating uniformity in how states interact with companies offering programs?

7. Need to determine consequences for a company that does not maintain the required documentation.

i. After experiencing several companies’ pilot programs and identifying actual problem areas (as opposed to hypothetical issues), it is possible regulators will want to pursue a targeted pre-approval process or up-front receipt of documentation. That could be decided at a later date.

Next steps

i. Analyze flexibility in existing laws that would allow for innovation that could potentially result in better health for policyholders and lower claims costs for insurance companies.

ii. Consider developing a template that a company could fill in with narrative explanation of how they have considered identified issues in development of a LTC wellness program. An efficient manner to have this information received by interested regulators resulting from a single company filing (perhaps through SERFF or an NAIC portal) can be pursued.

ii. Because LTC insurance is in a desperate situation in some cases regarding solvency and rate increases, explore a regulatory sandbox approach regarding LTC wellness innovations.

iii. Explore whether a company’s commitment towards innovation efforts could be a contingency to receiving a fully actuarially justified rate increase.

7. Actuarial considerations

a. Issue: how are actuarial issues such as valuation, rate increase reviews, and reasonable value of benefits and options impacted by LTC wellness benefits?

b. Current observations

i. Although health outcomes can be expected to improve, to some extent, with LTC wellness programs, it is unclear how future claim costs will be impacted in comparison to the investment in the programs.

ii. As data emerges, actuarial issues related to the impact of LTC wellness benefits on future claim incidence and severity, could impact rate increases and reserves.

C. Addressing of Issues

i. Valuation: Under moderately adverse conditions, as data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into reserve adequacy testing, including Actuarial Guideline 51 stand-alone long-term care analysis, per actuarial standards of practice.

ii. Rates: As data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into lifetime loss ratio projections associated with rate-increase filings, per actuarial standards of practice.
iii. The NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation and NAIC Health Actuarial Task Force-adopted Consolidated, Most Commonly Asked Questions - States’ LTC Rate Increase Reviews document suggest that consistency between rate increase assumptions and reserve adequacy assumptions (noting reserve adequacy assumptions may include a margin to account for moderately adverse conditions) may be expected by some regulators.

iv. Reasonable value: The Long-term Care (EX) Task Force has tentatively established guidance that reduced benefit options in lieu of rate increases should provide reasonable value in comparison to the economic value of maintaining benefits and paying the increased premium. To the extent that LTC wellness benefits are tied into reduced benefit options, the holistic concept of reasonable value will likely be a consideration.

d. Next steps
   i. Determine the NAIC venue to work through LTC wellness actuarial issues.

8. Data privacy

   a. Issue: utilization of consumers’ data for wellness initiatives can be used to develop the marketing strategy and a specific wellness initiative, as well as to analyze the impact or effects of a wellness initiative. The use of Big data Data or artificial intelligence to develop the target demographic for new sales, the selection of the existing consumers for wellness initiatives, or to determine the results of the initiative, could result in an insurer or third party data vendor using the data in a way that could be unethical, discriminatory, confusing, or otherwise problematic.

   i. With many of the tech advancements, data on the policyholder would be accessed to, e.g., help identify warning signs of risks such as falls and early-stage dementia.

   b. Current observations
      i. The standards applied by insurance companies and tech firm vendors to ensure certain levels of privacy are generally unknown.

   c. Addressing of issues
      i. Data Use to Identify Wellness Initiatives:
         1. Policyholders considerations:
            a. Confusion about why they are being solicited for the initiative.
            b. Suspicion about the motivation of the insurer.
c. General lack of awareness that data is being collected, and what data is being collected.

d. General lack of awareness or understanding on how data is collected and used.

e. Will they know if their data was used to determine a specific wellness initiative for them versus being selected as part of a class of policyholders?

f. Will the policyholder know what data is going to be used prior to participation?

g. Should the policyholder have the option to “opt in/out” of their data being used internally for other initiatives or for external sale or use?

h. Should policyholders have the ability to have appropriate control over their information, including the ability to access and correct inaccuracies, consistent with legitimate business purposes and/or legal requirements to retain such information?

2. Insurer considerations:

   a. Should insurer communications include why a wellness initiative is being offered; including what data is being used?

   b. How should insurers use clear and concise notice about the collection, use, and disclosure of personal information?

   c. Should insurers purchase data regarding their policyholders (e.g. data that shows specific policyholders may have a near term claim - purchasing canes, grab bars, electronic fall detectors, etc.)?

   d. How should wellness initiatives be marketed to a policyholder? Insurers may need to limit what is advertised on the envelope, postcard, etc. due to HIPAA concerns.

   e. Should insurers partner with vendors or service providers to supply specific policyholder data to the wellness company? What data should be sent? How will the data be transferred?

   f. Should insurers focus their data on policyholder specific needs and only offer services relevant to the ongoing needs?

   g. How are opt in/out options, disclosures, etc. being shared with the consumer? Email, letter, text, etc. Is it appropriate to the policyholder’s needs or preferences?

   h. When using third party data providers, what screening or data protection programs are in place?

ii. Data Use During Wellness Initiative Development:

   1. Should insurers purchase policyholder specific information from third party data sources?

      a. Data collected during purchases, search history, television programming, etc.

      b. Should it always be headless, anonymized, or deidentified?
2. When considering big data, are there unacceptable “correlations”? How will insurers recognize relevant correlations vs irrelevant statistically significant correlations?
3. Are there data use standards, controls, definitions of personal data, or a data privacy review body in place to ensure the data is used, stored, or shared ethically?
4. When evaluating the data for wellness initiatives, will it focus on policyholder specific information – for example, will the policyholder’s claims detail or demographic factors determine the type of wellness initiative offered to that policyholder?
5. Will the risk of a data breach be assessed and protected against by the insurer as well as all vendors or third-party data suppliers?
6. Does the insurer have procedures in place to notify the policyholders of a potential breach?

iii. Wellness Results Data Use:
   1. Should the results be sold? Aggregate vs specific demographic information?
   2. Should insurers use the results internally for cross marketing other wellness initiatives?
   3. Should the policyholder be notified and have the option to “opt in/out” of letting the insurer use the data?
   4. Should the results be shared with the policyholder, POA, third party notifier? What guardrails should be in place relative to that sharing?
   5. How should the data be shared, if at all, with other vendors or service providers?
   6. How long will the data be retained? Will the data be destroyed or disposed?

d. Dependencies
   i. Unfair Discrimination
      ii. States’ adoption of wellness initiatives could make it difficult to implement a program uniformly.

e. Next steps:
   i. Reach out to experts in the health insurance and Medicare Advantage, Medicare Supplement, or Medicaid / PACE areas to learn from their experiences.
   ii. Identify applicable state privacy laws and HIPAA anti-marketing restrictions.
   iii. Require insurance companies to provide information on privacy protection matters when claims management processes are established.
   iv. Determine if policyholder approval of use of expanded data can be established at certain points in time:
      1. At times of options in lieu of rate increases, can insurance companies get agreement to attain more policyholder data?
   v. Can new contracts be written with evergreen access to some private data?
9. **Other considerations**
   
   a. Issue: other legal or market and administrative issues may come into play as LTC wellness programs are established.

   b. Current observations
      
      i. There are dozens or hundreds of cutting-edge technological advancements being developed to help with aspects of LTC claims management.
         
         1. It is difficult for insurance companies and regulators to determine which tech advancements are most promising in terms of likelihood of success and degree of impact on consumer health and reducing claims cost.

      ii. TPAs or reinsurers used by direct-writing insurance companies may be resistant to administering these additional activities or may be concerned about potential legal ramifications that could impact their firms.

      iii. Insurers could potentially be subject to requirements if a policyholder, e.g., is identified as having cognitive impairment and therefore be a risk related to driving or finances.

   c. **Addressing issues [section to be drafted]**

   d. Next steps
      
      i. Determine if there is objection to an insurance company offering an extra-contractual wellness benefit that is not tied to loss ratio / benefits / contracted obligations, i.e., out of expenses?

      ii. Determine if benefits offered outside the contract could be considered in a similar category as because a reduced benefit option in lieu of a rate increase, which is essentially a mutually-agreed-to restructuring of the insurance contract.

      iii. Either identify or ensure industry members are identifying requirements related to disclosing, e.g., when a policyholder has cognitive impairment and may be a high-risk driver.

      iv. Regulatory guidance may help innovators engage in this space.

10. **Miscellaneous topics**

    a. How will insurers report on issues and learnings?

    b. This document will likely need to be updated with new learnings or issues.

    c. Continuous collaboration with insurers regarding issues or new initiatives will likely be needed.

    d. Note that there are hybrid products that contain wellness benefits. However, the scope of this document is wellness associated with stand-alone LTC insurance policies, which tend to have more volatile financial profiles than hybrid products.
Commissioner Jessica Altman
Chairman, NAIC LTCI Reduced Benefit Options (EX) Subgroup
Pennsylvania Insurance Department

November 4, 2021

Dear Commissioner Altman,

The American Council of Life Insurers (ACLI)\(^1\) and the American Association of Health Insurance Plans (AHIP)\(^2\) appreciate the opportunity to comment on the second draft of the “Issues Related to LTC Wellness Benefits,” exposed by the NAIC Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup on October 5, 2021.

ACLI/AHIP continue to support the Subgroup’s work to explore the offering of innovative wellness benefit programs as part of long-term care insurance (LTCI). By discussing the issues and opportunities associated with wellness programs in LTCI, we learn how these benefits may contribute to policyholder health and strengthen the LTCI market.

**OBJECTIVE**

ACLI/AHIP request that the newly added objective statement be revised to reflect the document’s stated purpose in the Background section to work “together to explore some of these claim cost-reducing innovations.” Thus, we recommend the objective statement read, “The objective of this paper is to foster dialogue amongst regulators, insurance companies, and interested parties regarding issues related to innovative long-term care wellness programs.” Fostering discussion that supports insurance companies in developing pilot wellness programs should be the aim of this document, as opposed to increasing “clarity,” which could stifle innovation. As we have previously asserted, LTCI wellness initiatives are in their infancy and will require significant development and testing. Insurers are encouraged to develop wellness initiatives when the regulatory environment facilitates exploration, innovation, and targeted pilot programs.

With the goal of contributing to the discussion on wellness programs in LTCI, our comments on the second draft are as follows.

**BACKGROUND**

We appreciate the addition of “pre-insurance-claim” to describe the wellness interventions discussed in the document. The true value of wellness interventions comes in providing them pre-claim when they are most effective.

And while we recognize the Subgroup’s stated goal to address rate increases and solvency concerns with wellness programs, we continue to feel it is important that this discussion...
document emphasize what should be wellness programs’ primary goal, and that is the maintained or improved health and independence of policyholders. Whether or not wellness programs affect rate increases or solvency concerns remains to be seen. They are likely to be one of many factors, including necessary and actuarially justified rate increases, that strengthen the LTCI marketplace overall. Wellness programs should not be pursued as a “cure” to industry issues. What we can reasonably pursue, however, is the improved wellness of LTCI policyholders.

PREVENTION OF UNFAIR DISCRIMINATION RELATED TO EXTRA-CONTRACTUAL BENEFITS AND COSTS

ACLI/AHIP affirm the importance of avoiding unfair discrimination when offering LTCI wellness benefits. We also believe it is possible navigate discrimination concerns when targeting wellness programs to cohorts of similarly situated insureds. Our original comments asserted that certain wellness “programs may be most effective and most utilized if focused on those insureds with a particular condition, age range, or sex. Targeted wellness programs could more effectively reduce claims costs and maximize the health of policyholders.” The ability to target wellness programs, while avoiding unfair discrimination, is key to encouraging LTC insurers to implement wellness programs. Insurers are unlikely to attempt a wellness program if they cannot first experiment with a small, targeted pilot program before scaling up.

While we agree with efforts to better support underserved markets, we disagree with the newly added language in this section that suggests “selection for pilots should consider including a wide range of individuals from various geographic, economic, social, marital, age, racial, and ethnic populations to ensure meaningful data is collected.” While a broad range of characteristics might be appropriate for many benefit programs, it is not appropriate in all instances, particularly pilot programs. Often, meaningful data is best collected and analyzed when it is targeted. Certain benefits are also likely to be more effective at improving wellness if targeted.

The LTCI industry needs assurance from regulators that focusing wellness benefits on a cohort of similarly situated policyholders successfully navigates unfair discrimination requirements. Regulatory guidance on how to classify policyholders for a targeted wellness program is unnecessary and would hamper industry efforts to innovate.

REGULATORY ROLE IN APPROVING OR EVALUATING LTC WELLNESS APPROACHES

We welcome the edits made to this section that both express a goal to avoid unconstructive regulatory and filing burdens and, also, remove the suggestion that receiving an actuarially justified rate increase be contingent on an insurer’s innovation efforts.

To reiterate, ACLI/AHIP believe that tying wellness benefit programs to rate increases is inappropriate for a few reasons. First, a rate increase request for an individual block of business may not have an associated wellness program. Second, wellness programs might only be offered to new customers. Third, wellness programs are primarily structured to improve
wellness, not address actuarially justified rate increases. Fourth, it could lead to inequities between companies with varying participation levels in the wellness realm. And fifth, the data needed to justify a correlation between wellness programs and rate increases, will, if such a correlation exists, take time to gather and analyze.

CONCLUSION

ACLI/AHIP affirm their commitment to continuous collaboration with regulators and other interested parties in developing the thinking about wellness programs in LTCI. Thank you for the opportunity to provide these comments. ACLI/AHIP look forward to discussing our comments with you soon.

Sincerely,

Jan M. Graeber   Susan Coronel
Senior Actuary, ACLI  Executive Director, Product Policy, AHIP

i The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

ii AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met Nov. 19, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Jimmy Harris (AR); Emily Smith (CA); Susan Jennette (DE); Doug Ommen (IA); Stewart Guerin (LA); Kevin Dyke (MI); Carter Lawrence (TN); R. Michael Markham (TX); Tomasz Serbinowski (UT); Elsie Andy (VA); Anna Van Fleet (VT); and Sharon Daniel (WA).

1. **Adopted the RBO Consumer Notices Checklist.**

Ms. Van Fleet and Ms. Logue presented a version of a draft Reduced Benefit Options (RBO) Consumer Notices Checklist (Checklist) that incorporates comments received on the draft, with notes on the proposed treatment of each comment. The Subgroup, interested state insurance regulators, and interested parties discussed and agreed to changes to items 16, 18, and 42. These changes were incorporated into a final version of the Checklist (Attachment Fourteen).

Mr. Serbinowski made a motion, seconded by Ms. Van Fleet, to adopt the final version of the Checklist (Attachment Eight-A). The motion passed unanimously.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.

---

attachment: 08 A LTC(EX)TF RBO Communication Checklist 10.19.2021.docx
Checklist for Premium Increase Communications

AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup is composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

*Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.*

The Long-Term Care Insurance (EX) Task Force (Task Force) adopted the Long-Term Care Insurance RBO Communication Principles. The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a complementary checklist that can be leveraged by state regulators and Long-Term Care Insurance insurers.

INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experiences in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, complaints, improve the quality of consumer communications, and ensure the information presented. The checklist seeks to ensure that consumer communications:

- Reads in a clear, logical, not overly complex manner.
- Present identifies if the options are presented fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

Suggested Edits from BB & BC:

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, and complaints, improve the quality of consumer communications, and to ensure the information presented. The checklist seeks to ensure that consumer communications:

- Reads in a clear, logical, not overly complex manner.
● Identify if the options are presented fairly and without subtle coercion.
● Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

[The LTC Task Force? The RBO[9] Subgroup?] RECOMMENDS that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and adopt use the checklist when reviewing filed Long-Term Care Insurance RBO Communications.

CALLS ON all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

**READABILITY AND ACCESSIBILITY**

| 8.7. | Is the communication easy to follow? Does it flow logically? Does it display the essential information and/or the primary action first (followed by the nonessential information)? Is the primary message of the communication presented first and clearly worded? |   |
| 9.8. | Are all technical insurance terms clearly explained in the communication? |   |
| 10.9. | Are all technical terms used consistently throughout the communication? |   |
| 11.10. | Is the communication in an easily readable font? For example: Is the type in at least 11-point type? |   |
| 12.11. | Does the communication use headings to help the reader find information easily? |   |

Page Reference and Filing Notes
13. Is white space (margins, lines spacing, and spacing between paragraphs) sufficient and consistent?

14. Are tables, charts, and other graphics easy to read and understand? (See question 18 for reference).

15. Are the grade level and reading ease scores appropriate according to state readability standards? (8th grade or lower; Flesch reading ease score 60 or higher).

16. Are there side-by-side illustrations of options compared with current benefits? Are reduced benefit options clear and not misleading? For example: Are there side-by-side illustrations of options compared with current benefits?

   - Use of Italics
   - Narrow margins (top and bottom less than 1.5 inches)
   - All caps (all bold is acceptable)
   - Difficult to read text (fonts other than Sans Serif or Courier)
   - Glossy paper
   - Different colors throughout (print to test)
   - Small font

17. If FAQs are included, are they succinct and easy to understand?

18. Does the insurer provide appropriate accommodations for policyholders with disabilities or for policyholders for whom English is not a first language? For example: Accessibility of its online and written material to all interested parties, including those with disabilities such as blindness or

Attachment Eight-A

Long-Term Care Insurance (EX) Task Force

12/12/21

© 2021 National Association of Insurance Commissioners

4-288
The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met Oct. 19, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Emily Smith (CA); Frank Pyle (DE); Doug Ommen (IA); Eric Anderson (IL); Karen Dennis (MI); Fred Andersen (MN); Gretchen Brodkorb (SD); Carter Lawrence (TN); Tomasz Serbinowski (UT); Bob Grissom (VA); Anna Van Fleet (VT); and Melanie Anderson (WA).

1. **Discussed Comments Received on a Draft RBO Consumer Notices Checklist.**

Ms. Van Fleet presented a version of a draft Reduced Benefit Options (RBO) Consumer Notices Checklist (Checklist) (Attachment Nine-A) that incorporates comments received on the draft, with notes on the proposed treatment of each comment.

Ms. Van Fleet said discussion at the next meeting will focus on questions 16 and 42. Commissioner Altman said the Subgroup will schedule another meeting to continue discussion of the comments on the Checklist using the version that reflects revisions made today.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.
Comments as of 7-21-21 Noted

Checklist for Premium Increase Communications

AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup is composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.

The Long-Term Care Insurance (EX) Task Force adopted the Long-Term Care Insurance RBO Communication Principles. The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a complementary checklist that can be leveraged by state regulators and Long-Term Care Insurance insurers.

INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in their state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, complaints, improve the quality of consumer communications, and ensure the information presented. The checklist seeks to:

- Reads in a clear, logical, not overly complex manner.
- Identify if the options are presented fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

Suggested Edits from BB & BC:

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.
Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, and complaints, improve the quality of the consumer communications, and to ensure the information presented. The checklist seeks to ensure that consumer communications:

- Reads in a clear, logical, not overly complex manner.
- Identifies if the options are presented fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

[The LTC Task Force? The RBO Subgroup?] RECOMMENDS that state regulators adopt the checklist to reflect their state regulations, laws, or statutes and when reviewing filed Long-Term Care Insurance RBO Communications.

CALLS ON all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met Oct. 4, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Emily Smith (CA); Frank Pyle (DE); Doug Ommen (IA); Eric Anderson (IL); Stewart Guerin (LA); Karen Dennis (MI); Fred Andersen (MN); Carter Lawrence (TN); Barbara Snyder (TX); Tomasz Serbinowski (UT); Scott A. White (VA); Anna Van Fleet (VT); Melanie Anderson (WA); and Joylynn Fix (WV).

1. **Discussed Comments Received on a Draft LTC Wellness Program Issues Document**

Commissioner Altman presented a version of a draft Long-Term Care (LTC) Wellness Program Issues document (Attachment Ten-A) that reflects edits made in response to comments received (Attachment Ten-B) during its public exposure for comment. She also presented a summary (Attachment Ten-C) of the comments received. Mr. Andersen gave an overview of the document and the summary of comments.

Bonnie Burns (California Health Advocates—CHA) asked how wellness program benefits will be offered to policyholders. Mr. Andersen said the benefits are likely not included in the original policy contract, and they will likely be offered through a mutual agreement between the insurer and policyholder to new contract terms. He said this will be like how reduced benefit options (RBO) are made available to policyholders.

Birny Birnbaum (Center for Economic Justice—CEJ) suggested that a standardized template be used for collection of data needed for wellness program implementation and the data collection be facilitated using a national statistical agent.

Anitha Rao (Neurocern) said she is concerned that the standards of care used by insurers offering wellness programs for providing care to policyholders may not be the same as those used by the medical community.

Commissioner Altman said the document will be re-exposed for an additional public comment ending Nov.4.

2. **Responded to a Referral from the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup**

Mr. Andersen presented a comment (Attachment Ten-D) submitted by the Vermont Department of Financial Regulation in response to an exposure for public comment by the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup of Operational sections of a Long-Term Care Insurance (LTCI) Multi-State Rate Review Framework (MSA Framework). He said the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup referred the comment to the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup for a recommendation on whether to include the additional language proposed in the MSA Framework.

The Subgroup determined that it will recommend that the proposed language not be added to the MSA Framework at this time. However, if the Multistate Actuarial LTCI Rate Review Team (MSA Team) is presented with a rate increase filing that includes the issue addressed in the comment, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup requests that the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup make a referral that includes details of the offering’s connection to the rate increase request.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.

Issues related to LTC wellness benefits

7/22/2021 exposed draft with 10/04/21 edits

Objective:

The objective of this paper is to increase clarity to regulators, insurance companies, and interested parties regarding issues related to innovative long-term care wellness programs.

Background:

Stand-alone long-term care insurance is a unique industry, in that higher-than-expected claims’ costs have resulted in substantial rate increases for consumers and financial losses and in some cases solvency concerns for insurance companies.

Technology firms are developing technological and other approaches that could be used by insurance companies to potentially prevent, delay, or lower the severity of LTC claims and improve health outcomes in a space called “LTC wellness”. Examples of these early pre-insurance-claim interventions include:

- Fall prevention programs;
- Home modification consultations, analysis and implementation to facilitate aging in place;
- Caregiver support programs for both formal and informal caregivers;
- Next generation care coordination services;
- Technological solutions aimed at improvements in cognitive impairment prevention and early diagnosis, potentially involving technology supplemented by a physician’s cognitive risk evaluation.

In light of systemic, LTC-related financial challenges, insurance companies, insurance regulators, and tech firms are interested in working together to explore some of these claim cost-reducing innovations. Here are some potential barriers to increased adoption of these new approaches and how those barriers could potentially be addressed, with details provided below the list:

1. Analysis of effectiveness
2. Unfair discrimination
3. Consumer confusion
4. Rebating
5. Tax considerations
6. Regulatory role in approving or evaluating LTC wellness approaches
7. Actuarial considerations
8. Data privacy
9. Other considerations
Details:

1. Analysis of effectiveness
   a. Issue: in light of the lag time between policyholder age during LTC wellness efforts and policyholder age when claim incidence becomes more common, what issues arise from insurers’ lack of knowledge of effectiveness of LTC wellness programs in reducing claim costs, and how can those issues be addressed?
      i. The cost of innovation efforts, with no guarantee of any returns, may dissuade some insurance companies from pursuing these programs.
         1. Expenses vary - in many cases are typically-upfront and significant.
         2. The financial impact on claims cost is typically unknown and down the road.
      ii. Designing pilot programs is difficult because there is such a variety of programs available, and each block of LTC insurance policies has unique characteristics that might influence the effectiveness of a given program.
      iii. Some companies are concerned about regulatory reaction to these changes.
   b. Current observations
      i. Industry representatives described some current or likely upcoming LTC wellness efforts at the May 4, 2021 NAIC Reduced Benefit Option Subgroup meeting. A theme was that there is great supply and demand for LTC wellness innovation efforts.
      ii. Some insurance companies are exploring or implementing pilot programs. Very early signs on the effectiveness of interventions on impact on policyholder health and claim costs are promising, but data development is slow and it is difficult to implement control trials.
         1. Insurance companies are eager for data and for ways to effectively share data within the legal and regulatory framework so that the industry can effectively respond to positive policyholder experiences and discontinue any programs that fail to make an impact.
      iii. Because there is little competition in the stand-alone LTC insurance market, due to the financial losses accumulated and many insurance companies exiting the actively selling market, sharing of ideas between companies on management of active policies may be possible, although care should be taken regarding anti-trust issues.
      iv. Effectiveness may increase or decrease if targeting certain policyholders.
      v. Development of experience showing effectiveness will be a work in progress.
   c. Addressing of issues
      i. Lack of data: With most LTC wellness programs being under-developed or being implemented recently, data is lacking on the extent to which resulting claim cost decreases offset the costs of the programs.
      ii. How to measure health impact: Whether an LTC wellness program effectively reduces claim costs or not, will there be approaches established to measure health benefits to policyholders?
iii. Data sharing: Facilitating the sharing of data, between vendors and insurance companies, and perhaps involving public programs such as Medicaid, is a key element of analyzing effectiveness.

d. Next steps
i. Regulators engage with insurance companies to learn of recent developments.
ii. Research public programs’ data on effectiveness of LTC wellness programs to see if Medicare Advantage, Med Supp, or Medicaid / PACE data is available, relevant, and used. Also, look into potential independent living / senior facility wellness experience as well as health and life insurance wellness experience.
iii. Determine an approach to monitor success of programs. For example, if 3 to 4 companies are applying 3 to 4 pilot programs and finding success, it would be good news regarding broader, future efforts.
   1. Facilitate the sharing of general results (i.e., not individual policyholder data) among those insurance companies in a way that is within the legal and regulatory boundaries.
iv. Regulators ensure capital supporting LTC liabilities is adequate under a range of scenarios, including where claims costs continue to increase.

2. Prevention of unfair discrimination related to extra-contractual benefits and costs
   a. Issue: how does an insurer offer a wellness initiative that is not unfairly discriminatory to discrete populations within the broader group of policyholders?
   b. Current observations
      i. There may be state anti-discrimination and bias-related legal issues to address if certain policyholders are targeted, including through Big Data, to receive extra benefits.
         1. For instance, if older policyholders have less of an online footprint than younger policyholders, how would this impact the accuracy of the targeting of LTC wellness benefits or otherwise introduce bias?
         2. [Birny Birnbaum May 4 comment]: If wellness or other efforts to address specific conditions are based on age or the health of the policyholder, this seems like normal value-added products and services for loss prevention and not an example of unfair discrimination.
            a. Issues to address are likely related to creating a clear framework for compliance related to the use of data analytics and artificial intelligence.
   c. Addressing of issues
      i. Equality: How policyholders are offered wellness initiatives could be unfairly discriminatory.
         1. Policyholders of “the same class and of essentially the same hazard” must be treated equally. See NAIC Model Unfair Trade Practices Act (#880) (“Model Law”).
2. How may an insurer “classify” policyholders post underwriting? Regulators may need to provide guidance on how to classify policyholders.
   a. What is fair? The insurers will need to provide justification.
      i. For example, under the Model Law the availability of the value-added product or service must be based on documented objective criteria and offered in a manner that is not unfairly discriminatory.
   b. May classification be made by jurisdiction? Does that impact the LTC Multi-State Actuarial Rate Review (MSA) program’s overarching goals?
   c. May classification be made by product form?

ii. Selection: How policyholders are selected for wellness initiatives could be unfairly discriminatory.
   1. Wellness initiatives may be costly to the insurer. How can an insurer test it to validate the benefits before rolling it out more broadly?
      a. Under the Model Act, the insurer may provide the product or service in a manner that is not unfairly discriminatory as part of a pilot or testing program for no more than one year.
      b. Initial selection of participants may be the most important for antidiscrimination. That selection for pilots should consider including a wide range of individuals from various geographic, economic, social, marital, age, racial, and ethnic populations to ensure meaningful data is collected.
   2. Would a random selection of policyholders be unfair?
   3. Should policyholders be given the option to participate in a wellness initiative?
      a. Must all policyholders be given the option to participate?
   4. How much time/data is needed to prove the initiative is valuable?
      a. Even if benefits are available to all those who utilize, the initiatives may be limited in application depending on a policyholder’s specific circumstances.

iii. Accessibility: How a wellness initiative operates could be unfairly discriminatory.
   1. Does it limit who can participate based on the medium and cost of the equipment or technology? For example:
      a. Does it require access to a computer or internet for online participation?
      b. Does it require access to a smart phone, texting minutes, etc., to use an app?
      c. Does it require access to roads, pools, sidewalks?
      d. Does it require technical skills to use software or hardware?
      e. Will insurers utilize different communication methods, such as phone, text, e-mail, or mail?
2. Does any such limitation require alternatives for those unable to participate in the initiative?

iv. **Uniformity:** If guidance is issued on wellness initiatives, how would states adopt the guidance, especially if states have different standards for allowing wellness programs in LTC insurance?

1. Have all states adopted the Model Law? If not, what have hurdles been for states that have not adopted the model? Will states adopt updates to the Model Law?
2. Standards for unfair discrimination, including in the specific context of wellness initiatives, may vary by state. Requesting insurers and regulators to be aware of the specific requirements of the jurisdiction in question.
   a. For example, Alaska permits rewards under wellness programs but requires that the reward be available for “all similarly situated individuals.” See AK Stat § 21.36.110.

3. If some states allowed wellness initiatives and not others, would this conflict with other initiatives, such as the MSA?

d. Dependencies
   i. Unfair discrimination guidance needs to consider other wellness initiative issues that include:
      1. Analyzing Effectiveness
      2. Actuarial Impacts
      3. Rebate Standards and Limitations
         a. What if an insurer offers the service at a cost (full or portion) for the policyholder(s) after the pilot?
      4. Regulatory Evaluation

e. Next steps
   i. Regulators and interested parties discuss the issues noted above, including whether the use of Big Data to predict risks (of e.g., falls or dementia) and offering benefits and services only to those targeted as high risk would cause concerns regarding discrimination.

3. **Consumer confusion**
   a. Issue: Potential consumer confusion concerning LTC wellness programs will be highly variable dependent upon factors such as the nature of the program, the consumers involved, and the complexity of regulatory issues.

   b. Addressing of issues:
      i. Wellness programs with simple to understand direct connections to prevention of common medical issues (e.g., installing a grab bar) will provoke far less confusion than more esoteric programs based on new technological services (e.g., data collection/monitoring of insured activities) with not yet proven results. Simpler programs may also trigger fewer and less complex regulatory/statutory requirements related to privacy, consent, disclosure, etc. resulting in programs
that will be more easily understood and documented. Programs with newer technology, more data collection and manipulation, and which are connected to more complex care issues will be more confusing and will trigger more complicated regulatory/statutory requirements.

1. In these scenarios, there may be a need to first educate consumers on the technology and the data collection/usage and then the program and its potential benefits before disclosure and informed consent can occur. The ability to prevent confusion and achieve adequate education and understanding may be further impacted by the level of technological sophistication and mental acuity of the consumer, factors which often decline with age.

ii. Designing effective communication regarding insurer LTC wellness programs will require in-depth engagement with LTC consumers, policyholders, family members, eldercare subject matter experts, and NAIC consumer representatives. When the vetting group engages with Medicaid programs, PACE, etc. to learn about best practices in wellness programming, the vetting group should take the opportunity to learn about the successes and failures in communication used in implementing these programs, including any relevant focus group data available.

iii. In addition to engaging with Medicaid and PACE, the following organizations may have valuable insights: National Council on Aging (www.ncoa.org), AARP (www.aarp.org), and the National Institute on Aging (www.nia.nih.gov). In addition to engaging with NAIC representatives and these national organizations, the Vermont team would also propose to reach out to Vermont’s sister agencies in state government (The Agency of Disabilities, Aging, and Independent Living (DAIL), and the Agency of Human Services, (AHS)). Lastly, Emily Brown serves on the board of directors for Central Vermont Home Health and Hospice. Engagement with this local group may provide rural eldercare perspectives missing at the national level.

iv. Focus groups designed to elicit feedback on communication style are most helpful when the programming has been determined. In the alternative, guidelines for communication and disclosure designed to minimize confusion and maximize understanding would need to be developed along a spectrum of wellness programs of increasing complexity. The results of vetting group work around rebating, program effectiveness, data privacy, loss of tax-preferred status, and discrimination concerns will determine components of what needs to be tested in focus groups. For instance, if the loss of tax-preferred status is something the vetting group can address at the federal level, it will not need to be considered when determining barriers to effective communication.
v. Building consensus around terminology and building trust are essential to effective communication. In a Medicaid setting, the PACE program (Programs for All Inclusive Care for the Elderly), wellness efforts include a multidisciplinary team of health professionals coordinating care and no cost share on services. (Source: https://www.medicaid.gov/medicaid/long-term-services-supports/pace/programs-all-inclusive-care-elderly-benefits/index.html). This builds trust through human contact with medical professionals.

1. This type of communication is vastly different than the communication between an insurer and a long-term care policyholder facing a rate increase, where participation may have some impact on the premium rate increase the consumer must pay. As a result, extra care will need to be taken to ensure policyholders truly understand the offer and the level of participation required and that they do not acquiesce based on confusion or because they feel they have no other choice.

vi. As the wellness vetting subgroup works through the issues (program effectiveness, discrimination, data privacy, and tax considerations), the Vermont team hopes to build on the conversations planned with subject matter experts in eldercare programming. The vetting group should plan to add time at the end of the process to explore and understand the vetted programs with consumers via focus group(s) to best anticipate and mitigate consumer confusion.

4. Rebating
   a. Issue: whether some long-term care wellness benefits for policyholders run afoul of the NAIC Model anti-rebating laws or are otherwise prohibited. Those wellness plans may be designed to prevent or lower the severity of LTC insurance claims or to improve health outcomes (“Wellness Initiative”).
   b. Addressing issues:
      i. **NAIC Model Law.** The recently amended version of the NAIC Model Unfair Trade Practices Act (#880) (“Model Law”) explicitly exempts the type of Wellness Initiatives currently being considered from the prohibition on rebates as an unfair trade practice. Specifically, § 4 (H)(2)(e) of the Model Law excludes from “the definition of discrimination or rebates . . . [t]he offer or provision . . . of value-added products or services at no or reduced cost,” even “when such products or services are not specified in the policy of insurance,” if the product or service meets certain requirements. Amongst procedural requirements, the Model Law requires that the product or service (a) relate to the insurance coverage, (b) be “primarily designed to satisfy” one of nine functions, including providing loss mitigation, reducing claim costs, enhancing health, and incentivizing behavioral changes, and (c) cost a reasonable amount in comparison to premiums or coverage. As the Wellness Initiatives in question would be designed to prevent or
lower the severity of LTC insurance claims and improve health outcomes, as long as their cost is reasonably related to the premiums or coverage, then they should not be considered rebates under the recently amended Unfair Trade Practice Act.

ii. Variations in State Law. The above cited language from the Unfair Trade Practices Act, § 4 (H)(2)(e), however, is a recent December 2020 addition to the Model Law. As such, most states have yet to specifically address that update and have only enacted a prior version of the Unfair Trade Practices Act. Unfortunately, the old language of the Model Law was less flexible on this point, which led a number of states to carve out exceptions by individual amendments, regulations, bulletins or desk drawer rules. And the Unfair Trade Practices Act is not the only model law with language prohibiting rebates in the business of insurance. As such, it is much less certain whether the Wellness Initiatives at issue would trigger the law’s anti-rebating provision. And the many state initiatives in this area do not permit a uniform analysis of rebating in each adopting jurisdiction as the precise language, interpretation, and application of the law varies by state.

1. As a result, whether Wellness Initiatives could arguably be considered a rebate remains a question subject to the specifics of each individual state’s rebating law and how each jurisdiction has interpreted and applied that law. To provide a few examples of the variations in state law, even amongst states that have adopted the prior Model Law:
   a. Alaska: Statutorily excludes “a reward under a wellness program established under a health care plan that favors an individual” from the definition of rebates so long as seven requirements, including the program being designed to promote health or prevent disease, are met. See AK Stat § 21.36.110.
   b. Maine: Statutorily permits provision of a value-added service that is related to the coverage provided by an insurance contract, without fee or at a reduced fee, if it is (a) included within the insurance contract, (b) directly related to the servicing of the insurance contract, or (c) offered to provide risk control for the benefit of a client. See Me. Stat. tit. 24-A, § 2163-A.

2. Thus, under the current legal landscape, those seeking to introduce Wellness Initiatives would need to confirm whether such an initiative would be permissible under each relevant jurisdiction’s rebating law and if there are any state specific requirements for offering such an initiative.

iii. Trends in State Law. Notwithstanding the variation in individual state’s laws and if and how they have been amended or interpreted, there does appear to be a general trend that “services are not prohibited if they are directly related to the

---

© 2021 National Association of Insurance Commissioners
insurance product sold, are intended to reduce claims, and are provided in a fair and nondiscriminatory manner.” J. Parson, D. Marlett, S. Powell, *Time to Dust Off the Anti-Rebate Laws*, 36 J. Ins. Reg. 7, at 8 (2017). Under this general approach, which aligns with the substantive result of the language in the current Model Law, a Wellness Initiative should not be prohibited as impermissible rebating.

iv. **Policy Considerations.** The exemptions in the current Model Law and the trend amongst states to permit certain services even if they are not contained within the insurance contract appear to be logical limitations on the scope of anti-rebating statutes. In short, Wellness Initiatives are not the type of conduct that anti-rebating statutes were originally designed to protect consumers against. This is particularly true in the context of LTC insurance where consideration of these initiatives only began significantly after the policies were initially sold, **where the initiatives do not begin at the moment the policy is issued**, and **moreover** where the policies have proven to be unprofitable for the insurers. In other words, it is fair to assume that Wellness Initiatives in this context are not being used to either induce the policyholder to enter into the insurance contract, nor to expand the insurer’s share of the LTC insurance market. Rather, they are targeted at improving policyholder health and reducing the frequency and severity of claims.

v. **Conclusion.** Given the current legal landscape with respect to rebating, to facilitate the success of Wellness Initiatives jurisdictions could either (a) adopt the recently added rebating exemptions found in the current version of the Model Law, which would explicitly permit such initiatives, or (b) take action to interpret and apply their existing laws in a manner that would allow the provision of products or services that are directly related to the insurance policy in question and designed to reduce claims or improve health. Absent adoption of the current version of the Model Law, however, insurers would need to conduct a state-by-state evaluation of rebating laws in all relevant jurisdictions before implementing a Wellness Initiative.

5. **Tax considerations**
   a. Issue: will non-ADL / non-cognitive benefits cause tax issues for policyholders?
   b. Current observations
      i. There may be tax consequences for consumers if benefits outside the federal definition of LTC benefits are provided, but this may depend on whether initial investment in programs is paid for out of general company expenses or from the benefit pool.
   c. Addressing issues: *[section to be drafted]*
   d. Next steps:
      i. Engage with the federal government and insurance industry tax experts to work out potential IRS/tax issues.
6. **Regulatory role in approving or evaluating LTC wellness approaches**
   
a. **Issue:** there is question as to whether LTC wellness approaches need to be approved by regulators or will be implemented by companies and later evaluated by regulators.
   
b. **Current observations:**
   i. There is little regulatory clarity or uniformity regarding LTC wellness programs.
   
c. **Addressing issues**
   i. **Idea:**
   1. Provide guidance that companies should have available, upon request, documentation of their programs and documentation that key issues our group identified have been addressed.
      a. These issues include company plans to accumulate data on programs’ effectiveness, avoiding unfair discrimination, preventing consumer confusion, their take on rebating, avoiding unfavorable consumer tax issues, and data privacy.
   2. States retain the right to conduct back-end reviews, targeting any critical areas of regulatory focus.
   3. Companies and regulators need to ensure that this approach is in compliance with existing state laws.
      a. The NAIC Model Unfair Trade Practices Law appears to contemplate either a “provide notice and opportunity for objection” approach or a “documented criteria must be maintained by the insurer and produced to the regulator upon request” approach, depending on the circumstances.
   
   ii. **Considerations:**
   1. Balance between holding companies accountable while not creating a burden that could prevent or slow up companies from pursuing beneficial programs.
   2. **There may be mixed policies regarding pre-approval or filing of documentation by state.** An effort to make any filing process as efficient as possible for regulators and companies should be pursued to avoid any unconstructive burdens.
   3. Companies being alerted that documentation must be available would likely ensure they at least attempt to address each of the issues prior to implementing a program.
   4. Would states be interested in being provided notice of development of a new wellness program? Would states want to be notified of every change in or addition to a program? In what form would the notification occur?
   5. Would a state have a right to object to an aspect of a program? If the objection leads to elimination of the program in that state, would that lead to other concerns, e.g., discrimination?
6. Would development of a uniform LTC wellness template help creating uniformity in how states interact with companies offering programs?

7. Need to determine consequences for a company that does not maintain the required documentation.

- After experiencing several companies’ pilot programs and identifying actual problem areas (as opposed to hypothetical issues), it is possible regulators will want to pursue a targeted pre-approval process or up-front receipt of documentation. That could be decided at a later date.

Next steps

- Analyze flexibility in existing laws that would allow for innovation that could potentially result in better health for policyholders and lower claims costs for insurance companies.

- Consider developing a template that a company could fill in with narrative explanation of how they have considered identified issues in development of a LTC wellness program. An efficient manner to have this information received by interested regulators resulting from a single company filing (perhaps through SERFF or an NAIC portal) can be pursued.

- Because LTC insurance is in a desperate situation in some cases regarding solvency and rate increases, explore a regulatory sandbox approach regarding LTC wellness innovations.

- Explore whether a company’s commitment towards innovation efforts could be a contingency to receiving a fully actuarially justified rate increase.

7. Actuarial considerations

a. Issue: how are actuarial issues such as valuation, rate increase reviews, and reasonable value of benefits and options impacted by LTC wellness benefits?

b. Current observations

i. Although health outcomes can be expected to improve, to some extent, with LTC wellness programs, it is unclear how future claim costs will be impacted in comparison to the investment in the programs.

ii. As data emerges, actuarial issues related to the impact of LTC wellness benefits on future claim incidence and severity, could impact rate increases and reserves.

c. Addressing of issues

i. Valuation: Under moderately adverse conditions, as data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into reserve adequacy testing, including Actuarial Guideline 51 stand-alone long-term care analysis, per actuarial standards of practice.

ii. Rates: As data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into lifetime loss ratio projections associated with rate-increase filings, per actuarial standards of practice.
iii. The NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation and NAIC Health Actuarial Task Force-adopted Consolidated, Most Commonly Asked Questions - States' LTC Rate Increase Reviews document suggest that consistency between rate increase assumptions and reserve adequacy assumptions (noting reserve adequacy assumptions may include a margin to account for moderately adverse conditions) may be expected by some regulators.

iv. Reasonable value: The Long-term Care (EX) Task Force has tentatively established guidance that reduced benefit options in lieu of rate increases should provide reasonable value in comparison to the economic value of maintaining benefits and paying the increased premium. To the extent that LTC wellness benefits are tied into reduced benefit options, the holistic concept of reasonable value will likely be a consideration.

d. Next steps
   i. Determine the NAIC venue to work through LTC wellness actuarial issues.

8. Data privacy
   a. Issue: utilization of consumers’ data for wellness initiatives can be used to develop the marketing strategy and a specific wellness initiative, as well as to analyze the impact or effects of a wellness initiative. The use of **Big data** [Data or artificial intelligence] to develop the target demographic for new sales, the selection of the existing consumers for wellness initiatives, or to determine the results of the initiative, could result in an insurer or third party data vendor using the data in a way that could be unethical, discriminatory, confusing, or otherwise problematic.

   i. With many of the tech advancements, data on the policyholder would be accessed to, e.g., help identify warning signs of risks such as falls and early-stage dementia.

   b. Current observations
      i. The standards applied by insurance companies and tech firm vendors to ensure certain levels of privacy are generally unknown.
      ii. There are lessons from other types of insurance on the types of privacy-related issues that may develop.

      iii. There are cases, and perhaps a trend, of programs/interventions being implemented without utilizing significant amounts of policyholder personally identifiable information.

      iv. States’ continuous adoption of data and privacy regulations will need to be available for insurers to assess the compliance of their wellness initiatives.

   c. Addressing of issues
      i. **Data Use to Identify Wellness Initiatives:**
         1. Policyholders considerations:
            a. Confusion about why they are being solicited for the initiative.
            b. Suspicion about the motivation of the insurer.
c. General lack of awareness that data is being collected, and what data is being collected.
d. General lack the awareness or understanding on how data is collected and used.
e. Will they know if their data was used to determine a specific wellness initiative for them versus being selected as part of a class of policyholders?
f. Will the policyholder know what data is going to be used prior to participation?
g. Should the policyholder have the option to “opt in/out” of their data being used internally for other initiatives or for external sale or use?
h. **Should policyholders have the ability to have appropriate control over their information, including the ability to access and correct inaccuracies, consistent with legitimate business purposes and/or legal requirements to retain such information?**

2. **Insurer considerations:**
   a. Should insurer communications include why a wellness initiative is being offered; including what data is being used?
   b. **How should insurers use clear and concise notice about the collection, use, and disclosure of personal information?**
   c. Should insurers purchase data regarding their policyholders (e.g. data that shows specific policyholders may have a near term claim - purchasing canes, grab bars, electronic fall detectors, etc.)?
   d. **How should wellness initiatives be marketed to a policyholder? Insurers may need to limit what is advertised on the envelope, postcard, etc. due to HIPAA concerns.**
   e. Should insurers partner with vendors or service providers to supply specific policyholder data to the wellness company? What data should be sent? How will the data be transferred?
   f. Should insurers focus their data on policyholder specific needs and only offer services relevant to the ongoing needs?
   g. **How are opt in/out options, disclosures, etc. being shared with the consumer? Email, letter, text, etc. Is it appropriate to the policyholder’s needs or preferences?**
   h. When using third party data providers, what screening or data protection programs are in place?

ii. **Data Use During Wellness Initiative Development:**
   1. Should insurers purchase policyholder specific information from third party data sources?
      a. Data collected during purchases, search history, television programming, etc.
      b. Should it always be headless, anonymized, or deidentified?
2. When considering big data, are there unacceptable “correlations”? How will insurers recognize relevant correlations vs irrelevant statistically significant correlations?
3. Are there data use standards, controls, definitions of personal data, or a data privacy review body in place to ensure the data is used, stored, or shared ethically?
4. When evaluating the data for wellness initiatives, will it focus on policyholder specific information – for example, will the policyholder’s claims detail or demographic factors determine the type of wellness initiative offered to that policyholder?
5. Will the risk of a data breach be assessed and protected against by the insurer as well as all vendors or third-party data suppliers?
6. Does the insurer have procedures in place to notify the policyholders of a potential breach?

iii. **Wellness Results Data Use:**
   1. Should the results be sold? Aggregate vs specific demographic information?
   2. Should insurers use the results internally for cross marketing other wellness initiatives?
   3. Should the policyholder be notified and have the option to “opt in/out” of letting the insurer use the data?
   4. Should the results be shared with the policyholder, POA, third party notifier? What guardrails should be in place relative to that sharing?
   5. How should the data be shared, if at all, with other vendors or service providers?
   6. How long will the data be retained? Will the data be destroyed or disposed?

d. **Dependencies**
   i. Unfair Discrimination
   ii. States’ adoption of wellness initiatives could make it difficult to implement a program uniformly.

e. **Next steps:**
   i. Reach out to experts in the health insurance and Medicare Advantage, Medicare Supplement, or Medicaid / PACE areas to learn from their experiences.
   ii. Identify applicable state privacy laws and HIPAA anti-marketing restrictions.
   iii. Require insurance companies to provide information on privacy protection matters when claims management processes are established.
   iv. Determine if policyholder approval of use of expanded data can be established at certain points in time:
      1. At times of options in lieu of rate increases, can insurance companies get agreement to attain more policyholder data?
   v. Can new contracts be written with evergreen access to some private data?
9. **Other considerations**
   a. Issue: other legal or market and administrative issues may come into play as LTC wellness programs are established.
   b. Current observations
      i. There are dozens or hundreds of cutting-edge technological advancements being developed to help with aspects of LTC claims management.
         1. It is difficult for insurance companies and regulators to determine which tech advancements are most promising in terms of likelihood of success and degree of impact on consumer health and reducing claims cost.
      ii. TPAs or reinsurers used by direct-writing insurance companies may be resistant to administering these additional activities or may be concerned about potential legal ramifications that could impact their firms.
      iii. Insurers could potentially be subject to requirements if a policyholder, e.g., is identified as having cognitive impairment and therefore be a risk related to driving or finances.
   c. Addressing issues [section to be drafted]
   d. Next steps
      i. Determine if there is objection to an insurance company offering an extra-contractual wellness benefit that is not tied to loss ratio / benefits / contracted obligations, i.e., out of expenses?
      ii. Determine if benefits offered outside the contract could be considered in a similar category as because a reduced benefit option in lieu of a rate increase, which is essentially a mutually-agreed-to restructuring of the insurance contract.
      iii. Either identify or ensure industry members are identifying requirements related to disclosing, e.g., when a policyholder has cognitive impairment and may be a high-risk driver.
      iv. Regulatory guidance may help innovators engage in this space.

10. **Miscellaneous topics**
   a. How will insurers report on issues and learnings?
   b. This document will likely need to be updated with new learnings or issues.
   c. Continuous collaboration with insurers regarding issues or new initiatives will likely be needed.
   d. Note that there are hybrid products that contain wellness benefits. However, the scope of this document is wellness associated with stand-alone LTC insurance policies, which tend to have more volatile financial profiles than hybrid products.
September 1, 2021

Dear Interested NAIC Regulators, the Long-Term Care Insurance (LTCI) Reduced Benefit Options (EX) Subgroup, Senior Issues (B) Task Force, Health Actuarial (B) Task Force, and Interested Parties:

This letter is in response to the draft long term care insurance (LTCI) wellness program document circulated on 7/22/2021. We are a group of physicians who specialize in cognitive and neurological issues in adults. Many of our patients require home care, assisted living, or long-term care eventually in their lifetime. LTCI has been beneficial for our patients that need custodial care.

Regarding the cognitive wellness initiatives specifically related to “Technological solutions aimed at improvements in cognitive impairment prevention and early diagnosis”, we have the following concerns:

- Insurance carriers are implementing various digital technologies such as wearables, eye-tracking, and other digital biomarkers as the sole means to flag patients with cognitive risk. These technologies are rapidly evolving, experimental and, at most, should be considered data points that are used for decision support. We highly recommend that insurance carriers urge their members to see their physician for a proper cognitive risk evaluation.

- Research from the Alzheimer’s Association has demonstrated approximately 50% of cognitive impairment cases are undiagnosed. New cognitive wellness programs in LTCI that identify patients for cognitive risk could potentially do so before a physician has diagnosed or disclosed the medical condition to the patient. This brings up a variety of legal risks to both the insurance carrier, cognitive wellness coaches, and for the patient.

- As part of cognitive impairment guidelines from the American Academy of Neurology, there is bloodwork and imaging to do as part of the medical workup, as well as ruling out common conditions that “mimic” cognitive impairment (i.e., delirium, vitamin deficiencies, depression). This process is not being verified by insurance carriers or cognitive wellness programs. This gap in care may result in a high number of patients incorrectly flagged as having cognitive risk (false positives). This may also have downstream financial implications for patients through increased insurance premiums.
- Social workers and nurses should not be flagging, diagnosing, or telling patients they have cognitive impairment without a proper medical evaluation and workup by their physician using evidence-based clinical practice guidelines. This gap in care is currently underway at LTCI third-party administrators (during face-to-face assessments) and in internal claims processing workflows during chronic illness verification and the adjudication process. In 2020, an independent external medical advisory task force found 20-30% of potential claims to have a possible 'treatable' condition to their cognitive impairment (delirium, depression, vitamin deficiencies etc.). These patients may have received an incorrect label of irreversible cognitive impairment.

- There are ethical and legal consequences to consider in telling someone they are at risk for dementia or have cognitive impairment before a physician does so. Some states require clinicians to report the patient’s medical condition to the DMV or alert banks regarding mental capacity.

As advocates for patient safety and care representing several U.S territories, we are concerned that these issues will put our patients in harm rather than benefiting them. We suggest to the committee that they seek the advice from an external independent medical advisory board before implementing any nationally approved cognitive wellness programs.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Eric, here are some comments I received on the LTC Wellness exposure. The submitter (for some reason) wanted to be anonymous.

- Clarify definition of wellness benefits by calling them pre-claim wellness initiatives.
- Perhaps define pre-claim wellness initiatives as providing pre-claim support to assist regarding the declining independence of the insured.
- Wellness benefits (home modification, caregiver training, care management) are often available in today’s LTC products but are not available until the insured is benefit eligible, which is too late to benefit the insured or their family. It should be offered when there’s an initial need.
- Pre-claim (pre-2 ADL) access to caregiver training and home modifications can delay the need for formal care and may provide fairly reliable claim cost savings.
- Rebating would tend to come into play if extra benefits were available day 1, not “later on but pre-claim”.
- Supplement or replace reliance on technology to identify high risk policyholders by having insureds self-identify or opt in.
- If the initiative is one of early support, broad communication and outreach is key. If the initiative is age- or condition-based, it should be offered consistently.
- Health plans already offer caregiver training, home modifications, or wellness programs without tax consequences – what’s different about LTC?

Another issue brought up is whether hybrid products should be brought into the conversation. I think, considering LTC TF is focused on standalone LTC, focus there for now and don’t enter life insurance policy issues into the conversation when standalone LTC is the focus. Do you have thoughts on this?

Thanks.
Larry Nisenson  
Assured Allies  
245 Washington Street, Suite 203  
Wellesley, MA 02481

To the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, Senior Issues (B) Task Force,  
Health Actuarial (B) Task Force, Interested Regulators, and Interested Parties:

Assured Allies mission is to transform the aging process and improve lives for every American as they age. We aspire to do this by reinventing the aging experience for the estimated 20+ million US consumers the vast majority of which are unprepared to finance their long term care costs.

While the precise number of Americans that need assistance as they age is debatable, there is no question that we need a creative and modern approach to solve this societal problem. Assured allies may be new to the long term care space, but our team is rich and deep in experience solving issues for health care and aging. Our products are built with the consumer in mind and thereby use a data driven engagement approach with the singular aim of helping our consumers live healthier lives and age in place.

While our programs fall under the heading of “wellness programs”, we believe our science based wellness solutions provide much more. In fact, we are the first company to take longstanding solutions in the healthcare space, modernize them and apply them to aging and long term care. We build trusted relationships with our consumers and engage and coach them on their respective aging journey. We partner with trusted vendors across the nation to offer meaningful value added discounts to help the consumer as they age and reward the policyholder for healthy decisions. We look to change the trajectory of aging and demonstrate to our consumers that they personally can impact how they age and even where they age. We look to deliver these services, tied to the insurable risk of needing long term care services and partner with insurance carriers to offer new insurance products and help manage current legacy blocks of business. Our new approach and product design will change how long term care is financed and even the aging process.

Insurance regulators are rightly concerned with data use, sources and protections/privacy. We appreciate the data concerns expressed by state regulators and believe through positive consumer consent and transparency we can strike the right balance of protection and innovation that will ultimately benefit our policyholders. We also appreciate the rebating concerns highlighted in the document and believe that our program, which is designed to benefit all policyholders navigates through this complex issue as well. Our program, services and benefits are all tied directly the underlying insurable risk in the insurance contract. We believe it is important to look holistically at how we finance long term care and move beyond premium increases, cutting benefits and try to improve peoples’ lives.

As a new emerging technology company focused on helping older adults age with dignity and independence, we’d appreciate an opportunity to discuss the data privacy and rebating concerns and why we believe our innovative approach to aging is good for consumers, carriers and state insurance departments.

Thank you for your consideration.

Larry Nisenson  
Chief Growth Officer
Issues related to LTC wellness benefits
First draft, work in progress – 7/22/2021

Background:
Stand-alone long-term care insurance is a unique industry, in that higher-than-expected claims’ costs have resulted in substantial rate increases for consumers and financial losses and in some cases solvency concerns for insurance companies.

Technology firms are developing approaches that could be used by insurance companies to potentially prevent or lower the severity of LTC claims and improve health outcomes in a space called “LTC wellness”. Examples of these early interventions include:

- Fall prevention programs;
- Home modification consultations, analysis and implementation to facilitate aging in place;
- Caregiver support programs for both formal and informal caregivers;
- Next generation care coordination services;
- Technological solutions aimed at improvements in cognitive impairment prevention and early diagnosis.

In light of systemic, LTC-related financial challenges, insurance companies, insurance regulators, and tech firms are interested in working together to explore some of these claim cost-reducing innovations. Here are some potential barriers to increased adoption of these new approaches and how those barriers could potentially be addressed, with details provided below the list:

1. Analysis of effectiveness
2. Unfair discrimination
3. Consumer confusion
4. Rebating
5. Tax considerations
6. Regulatory role in approving or evaluating LTC wellness approaches
7. Actuarial considerations
8. Data privacy
9. Other considerations
Details:

1. Analysis of effectiveness

   a. Issue: in light of the lag time between policyholder age during LTC wellness efforts and policyholder age when claim incidence becomes more common, what issues arise from insurers’ lack of knowledge of effectiveness of LTC wellness programs in reducing claim costs, and how can those issues be addressed?

   i. The cost of innovation efforts, with no guarantee of any returns, may dissuade some insurance companies from pursuing these programs.

      1. Expenses are typically upfront and significant.

      2. The financial impact on claims cost is typically unknown and down the road.

   ii. Designing pilot programs is difficult because there is such a variety of programs available, and each block of LTC insurance policies has unique characteristics that might influence the effectiveness of a given program.

   iii. Some companies are concerned about regulatory reaction to these changes.

   b. Current observations

   i. Industry representatives described some current or likely upcoming LTC wellness efforts at the May 4, 2021 NAIC Reduced Benefit Option Subgroup meeting. A theme was that there is great supply and demand for LTC wellness innovation efforts.

   ii. Some insurance companies are exploring or implementing pilot programs. Very early signs on the effectiveness of interventions on impact on policyholder health and claim costs are promising, but data development is slow and it is difficult to implement control trials.

      1. Insurance companies are eager for data and for ways to effectively share data within the legal and regulatory framework so that the industry can effectively respond to positive policyholder experiences and discontinue any programs that fail to make an impact.

   iii. Because there is little competition in the stand-alone LTC insurance market, due to the financial losses accumulated and many insurance companies exiting the actively selling market, sharing of ideas between companies on management of active policies may be possible, although care should be taken regarding anti-trust issues.

   c. Addressing of Issues

   i. Lack of data: With most LTC wellness programs being under-developed or being implemented recently, data is lacking on the extent to which resulting claim cost decreases offset the costs of the programs.

   ii. How to measure health impact: Whether an LTC wellness program effectively reduces claim costs or not, will there be approaches established to measure health benefits to policyholders?
iii. Data sharing: Facilitating the sharing of data, between vendors and insurance companies, and perhaps involving public programs such as Medicaid, is a key element of analyzing effectiveness.

d. Next steps
   i. Regulators engage with insurance companies to learn of recent developments.
   ii. Research public programs’ data on effectiveness of LTC wellness programs to see if Medicare Advantage, Med Supp, or Medicaid / PACE data is available, relevant, and used.
   iii. Determine an approach to monitor success of programs. For example, if 3 to 4 companies are applying 3 to 4 pilot programs and finding success, it would be good news regarding broader, future efforts.
      1. Facilitate the sharing of general results (i.e., not individual policyholder data) among those insurance companies in a way that is within the legal and regulatory boundaries.
   iv. Regulators ensure capital supporting LTC liabilities is adequate under a range of scenarios, including one where claims costs continue to increase.

We suggest another next step would be to explore the potential effect of wellness programs offered at independent living/senior facilities and identification of programs that delay or reduce the length of stays in long-term care facilities. We also support the use of pilot programs to help identify successful programs.

2. Prevention of unfair discrimination related to extra-contractual benefits and costs
   a. Issue: how does an insurer offer a wellness initiative that is not unfairly discriminatory to discrete populations within the broader group of policyholders?
   b. Current observations
      i. There may be state anti-discrimination and bias-related legal issues to address if certain policyholders are targeted, including through Big Data, to receive extra benefits.
         1. For instance, if older policyholders have less of an online footprint than younger policyholders, how would this impact the accuracy of the targeting of LTC wellness benefits or otherwise introduce bias?
         2. [Birny Birnbaum May 4 comment]: If wellness or other efforts to address specific conditions are based on age or the health of the policyholder, this seems like normal value-added products and services for loss prevention and not an example of unfair discrimination.
            a. Issues to address are likely related to creating a clear framework for compliance related to the use of data analytics and artificial intelligence.
   c. Addressing of issues
      i. Equality: How policyholders are offered wellness initiatives could be unfairly discriminatory.
1. Policyholders of “the same class and of essentially the same hazard” must be treated equally. See NAIC Model Unfair Trade Practices Act (#880) (“Model Law”).

2. How may an insurer “classify” policyholders post-underwriting?
   a. What is fair? The insurers will need to provide justification.
      i. For example, under the Model Law the availability of the value-added product or service must be based on documented objective criteria and offered in a manner that is not unfairly discriminatory.
   b. May classification be made by jurisdiction? Does that impact the LTC Multi-State Actuarial Rate Review (MSA) program’s overarching goals?
   c. May classification be made by product form?

ii. Selection: How policyholders are selected for wellness initiatives could be unfairly discriminatory.
   1. Wellness initiatives may be costly to the insurer. How can an insurer test it to validate the benefits before rolling it out more broadly?
      a. Under the Model Act, the insurer may provide the product or service in a manner that is not unfairly discriminatory as part of a pilot or testing program for no more than one year.
   2. Would a random selection of policyholders be unfair?
   3. Should policyholders be given the option to participate in a wellness initiative?
      a. Must all policyholders be given the option to participate?
   4. How much time/data is needed to prove the initiative is valuable?
   5. Prior to offering a wellness program, an insurer should have a logical hypothesis of what benefits could be derived from the program.

iii. Accessibility: How a wellness initiative operates could be unfairly discriminatory.
   1. Does it limit who can participate based on the medium? For example:
      a. Does it require access to a computer or internet for online participation?
      b. Does it require access to a smart phone, texting minutes, etc., to use an app?
      c. Does it require access to roads, pools, sidewalks?
   2. Does any such limitation require alternatives for those unable to participate in the initiative?

iv. Uniformity: If guidance is issued on wellness initiatives, how would states adopt the guidance, especially if states have different standards for allowing wellness programs in LTC insurance?
   1. Have all states adopted the Model Law? If not, what have hurdles been for states that have not adopted the model? Will states adopt updates to the Model Law?
   2. Standards for unfair discrimination, including in the specific context of wellness initiatives, may vary by state requiring insurers and regulators to be aware of the specific requirements of the jurisdiction in question.
a. For example, Alaska permits rewards under wellness programs but requires that the reward be available for “all similarly situated individuals.” See AK Stat § 21.36.110.

3. If some states allowed wellness initiatives and not others, would this conflict with other initiatives, such as the MSA?

d. Dependencies
   i. Unfair discrimination guidance needs to consider other wellness initiative issues that include:
      1. Analyzing Effectiveness
      2. Actuarial Impacts
      3. Rebate Standards and Limitations
      4. Regulatory Evaluation

e. Next steps
   i. Regulators and interested parties discuss the issues noted above, including whether the use of Big Data to predict risks (of e.g., falls or dementia) and offering benefits and services only to those targeted as high risk would cause concerns regarding discrimination.

We agree that a determination must be made regarding to whom any pilot or permanent program is offered to ensure no unfair discrimination. Including a wide range of individuals from various geographic, economic, social, age, racial, and ethnic populations is necessary to determine the usefulness of such a program, the credibility of data collected, and whether the program is valuable for all or some.

Additionally, to ensure no unfair discrimination, consideration regarding the availability of internet and smart devices, as well as the technical skills needed to use any devices will be necessary. This includes consideration that aging may impact/change a person’s previous tech skills. Also, a person’s financial position may change, limiting the ability to purchase current/up-to-date technology devices or equipment.

Consideration in selecting pilot participants should also include younger consumers; those who purchase LTC coverage long before their senior years.

3. Consumer confusion
   a. Issue: potential consumer confusion concerning LTC wellness programs will be highly variable dependent upon factors such as the nature of the program, the consumers involved, and the complexity of regulatory issues.

   b. Addressing of issues:
      i. Wellness programs with simple to understand direct connections to prevention of common medical issues (e.g., installing a grab bar) will provoke far less confusion than more esoteric programs based on new technological services (e.g., data collection/monitoring of insured activities) with not yet proven results. Simpler programs may also trigger fewer and less complex regulatory/statutory requirements related to privacy, consent, disclosure, etc. resulting in programs
that will be more easily understood and documented. Programs with newer technology, more data collection and manipulation, and which are connected to more complex care issues will be more confusing and will trigger more complicated regulatory/statutory requirements.

1. In these scenarios, there may be a need to first educate consumers on the technology and the data collection/usage and then the program and its potential benefits before disclosure and informed consent can occur. The ability to prevent confusion and achieve adequate education and understanding may be further impacted by the level of technological sophistication and mental acuity of the consumer, factors which often decline with age.

ii. Designing effective communication regarding insurer LTC wellness programs will require in-depth engagement with LTC consumers, policyholders, family members, eldercare subject matter experts, and NAIC consumer representatives. When the vetting group engages with Medicaid programs, PACE, etc. to learn about best practices in wellness programming, the vetting group should take the opportunity to learn about the successes and failures in communication used in implementing these programs, including any relevant focus group data available.

iii. In addition to engaging with Medicaid and PACE, the following organizations may have valuable insights: National Council on Aging (www.ncoa.org), AARP (www.aarp.org), and the National Institute on Aging (www.nia.nih.gov). In addition to engaging with NAIC representatives and these national organizations, the Vermont team would also propose to reach out to Vermont’s sister agencies in state government (The Agency of Disabilities, Aging, and Independent Living (DAIL), and the Agency of Human Services, (AHS)). Lastly, Emily Brown serves on the board of directors for Central Vermont Home Health and Hospice. Engagement with this local group may provide rural eldercare perspectives missing at the national level.

iv. Focus groups designed to elicit feedback on communication style are most helpful when the programming has been determined. In the alternative, guidelines for communication and disclosure designed to minimize confusion and maximize understanding would need to be developed along a spectrum of wellness programs of increasing complexity. The results of vetting group work around rebating, program effectiveness, data privacy, loss of tax-preferred status, and discrimination concerns will determine components of what needs to be tested in focus groups. For instance, if the loss of tax-preferred status is something the vetting group can address at the federal level, it will not need to be considered when determining barriers to effective communication.
v. Building consensus around terminology and building trust are essential to effective communication. In a Medicaid setting, the PACE program (Programs for All Inclusive Care for the Elderly), wellness efforts include a multidisciplinary team of health professionals coordinating care and no cost share on services. (Source: https://www.medicaid.gov/medicaid/long-term-services-supports/pace/programs-all-inclusive-care-elderly-benefits/index.html). This builds trust through human contact with medical professionals.

1. This type of communication is vastly different than the communication between an insurer and a long-term care policyholder facing a rate increase, where participation may have some impact on the premium rate increase the consumer must pay. As a result, extra care will need to be taken to ensure policyholders truly understand the offer and the level of participation required and that they do not acquiesce based on confusion or because they feel they have no other choice.

vi. As the wellness vetting subgroup works through the issues (program effectiveness, discrimination, data privacy, and tax considerations), the Vermont team hopes to build on the conversations planned with subject matter experts in eldercare programming. The vetting group should plan to add time at the end of the process to explore and understand the vetted programs with consumers via focus group(s) to best anticipate and mitigate consumer confusion.

We agree significant consumer education must be done to ensure understanding of the product, the wellness benefit and any associated technology, and the intent of the wellness benefit and its potential impact on future rate changes. A variety of education methods should be developed and utilized; consumer outreach will be critical.

4. Rebating

a. Issue: whether some long-term care wellness benefits for policyholders run afoul of the NAIC Model anti-rebating laws or are otherwise prohibited. Those wellness plans may be designed to prevent or lower the severity of LTC insurance claims or to improve health outcomes (“Wellness Initiative”).

b. Addressing issues:

i. **NAIC Model Law.** The recently amended version of the NAIC Model Unfair Trade Practices Act (#880) (“Model Law”) explicitly exempts the type of Wellness Initiatives currently being considered from the prohibition on rebates as an unfair trade practice. Specifically, § 4 (H)(2)(e) of the Model Law excludes from “the definition of discrimination or rebates . . . [t]he offer or provision . . . of value-added products or services at no or reduced cost,” even “when such products or services are not specified in the policy of insurance,” if the product or service meets certain requirements. Amongst procedural requirements, the Model Law
requires that the product or service (a) relate to the insurance coverage, (b) be “primarily designed to satisfy” one of nine functions, including providing loss mitigation, reducing claim costs, enhancing health, and incentivizing behavioral changes, and (c) cost a reasonable amount in comparison to premiums or coverage. As the Wellness Initiatives in question would be designed to prevent or lower the severity of LTC insurance claims and improve health outcomes, as long as their cost is reasonably related to the premiums or coverage, then they should not be considered rebates under the recently amended Unfair Trade Practice Act.

ii. Variations in State Law. The above cited language from the Unfair Trade Practices Act, § 4 (H)(2)(e), however, is a recent December 2020 addition to the Model Law. As such, most states have yet to specifically address that update and have only enacted a prior version of the Unfair Trade Practices Act. Unfortunately, the old language of the Model Law was less flexible on this point, which led a number of states to carve out exceptions by individual amendments, regulations, bulletins or desk drawer rules. And the Unfair Trade Practices Act is not the only model law with language prohibiting rebates in the business of insurance. As such, it is much less certain whether the Wellness Initiatives at issue would trigger the law’s anti-rebating provision. And the many state initiatives in this area do not permit a uniform analysis of rebating in each adopting jurisdiction as the precise language, interpretation, and application of the law varies by state.

1. As a result, whether Wellness Initiatives could arguably be considered a rebate remains a question subject to the specifics of each individual state’s rebating law and how each jurisdiction has interpreted and applied that law. To provide a few examples of the variations in state law, even amongst states that have adopted the prior Model Law:

a. Alaska: Statutorily excludes “a reward under a wellness program established under a health care plan that favors an individual” from the definition of rebates so long as seven requirements, including the program being designed to promote health or prevent disease, are met. See AK Stat § 21.36.110.

b. California: Repealed certain anti-rebating provisions via Proposition 103 in 1988.2

---

1 A variety of states have other prohibitions on rebates, gifts, and inducements. Trade association ACLI had cataloged a list that the authors found online from 2015 here. https://cdn2.hubspot.net/hubfs/193810/documents/producer/2018/ACLI_Inducements_Gifts_Rebates.pdf.

2 But note that one California attorney warned that recent actions by the CA DOI reflect the state’s still existing anti-rebating statutes in specific areas, like title insurance and home protection contracts. See https://www.insurereinsure.com/2021/03/24/warning-shot-across-the-bow-the-ca-dept-of-insurance-and-rebating/.
c. **Maine:** Statutorily permits provision of a value-added service that is related to the coverage provided by an insurance contract, without fee or at a reduced fee, if it is (a) included within the insurance contract, (b) directly related to the servicing of the insurance contract, or (c) offered to provide risk control for the benefit of a client. See Me. Stat. tit. 24-A, § 2163-A.

2. Thus, under the current legal landscape, those seeking to introduce Wellness Initiatives would need to confirm whether such an initiative would be permissible under each relevant jurisdiction’s rebating law and if there are any state specific requirements for offering such an initiative.

iii. **Trends in State Law.** Notwithstanding the variation in individual state’s laws and if and how they have been amended or interpreted, there does appear to be a general trend that “services are not prohibited if they are directly related to the insurance product sold, are intended to reduce claims, and are provided in a fair and nondiscriminatory manner.” J. Parson, D. Marlett, S. Powell, *Time to Dust Off the Anti-Rebate Laws*, 36 J. Ins. Reg. 7, at 8 (2017). Under this general approach, which aligns with the substantive result of the language in the current Model Law, a Wellness Initiative should not be prohibited as impermissible rebating.

iv. **Policy Considerations.** The exemptions in the current Model Law and the trend amongst states to permit certain services even if they are not contained within the insurance contract appear to be logical limitations on the scope of anti-rebating statutes. In short, Wellness Initiatives are not the type of conduct that anti-rebating statutes were originally designed to protect consumers against. This is particularly true in the context of LTC insurance where consideration of these initiatives only began significantly after the policies were initially sold, and moreover where the policies have proven to be unprofitable for the insurers. In other words, it is fair to assume that Wellness Initiatives in this context are not being used to either induce the policyholder to enter into the insurance contract, nor to expand the insurer’s share of the LTC insurance market. Rather, they are targeted at improving policyholder health and reducing the frequency and severity of claims.

v. **Conclusion.** Given the current legal landscape with respect to rebating, to facilitate the success of Wellness Initiatives jurisdictions could either (a) adopt the recently added rebating exemptions found in the current version of the Model Law, which would explicitly permit such initiatives, or (b) take action to interpret and apply their existing laws in a manner that would allow the provision of products or services that are directly related to the insurance policy in question and designed to reduce claims or improve health. Absent adoption of the current version of the Model Law, however, insurers would need to conduct a state-by-
state evaluation of rebating laws in all relevant jurisdictions before implementing a Wellness Initiative.

We agree it must be determined if offering a benefit requiring a device or app violates anti-rebating or uniform trade practices statutes.

5. Tax considerations
   a. Issue: will non-ADL / non-cognitive benefits cause tax issues for policyholders?
   b. Current observations
      i. There may be tax consequences for consumers if benefits outside the federal definition of LTC benefits are provided, but this may depend on whether initial investment in programs is paid for out of general company expenses or from the benefit pool.
   c. Addressing issues: [section to be drafted]
   d. Next steps:
      i. Engage with the federal government and insurance industry tax experts to work out potential IRS/tax issues.

We agree that understanding the tax consequences of new benefits will be critical to the success of any pilot or permanent wellness program.

6. Regulatory role in approving or evaluating LTC wellness approaches
   a. Issue: there is question as to whether LTC wellness approaches need to be approved by regulators or will be implemented by companies and later evaluated by regulators.
   b. Current observations:
      i. There is little regulatory clarity or uniformity regarding LTC wellness programs.
   c. Addressing issues [section to be drafted]
   d. Next steps
      i. Analyze flexibility in existing laws that would allow for innovation that could potentially result in better health for policyholders and lower claims costs for insurance companies.
      ii. Because LTC insurance is in a desperate situation in some cases regarding solvency and rate increases, explore a regulatory sandbox approach regarding LTC wellness innovations.
      iii. Explore whether a company’s commitment towards innovation efforts could be a contingency to receiving a fully actuarially justified rate increase.

Uniformity on prior approval of LTC wellness benefits would be helpful.
7. Actuarial considerations
   a. Issue: how are actuarial issues such as valuation, rate increase reviews, and reasonable value of benefits and options impacted by LTC wellness benefits?
   b. Current observations
      i. Although health outcomes can be expected to improve, to some extent, with LTC wellness programs, it is unclear how future claim costs will be impacted in comparison to the investment in the programs.
      ii. As data emerges, actuarial issues related to the impact of LTC wellness benefits on future claim incidence and severity, could impact rate increases and reserves.
   c. Addressing of Issues
      i. Valuation: Under moderately adverse conditions, as data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into reserve adequacy testing, including Actuarial Guideline 51 stand-alone long-term care analysis, per actuarial standards of practice.
      ii. Rates: As data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into lifetime loss ratio projections associated with rate-increase filings, per actuarial standards of practice.
      iii. The NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation and NAIC Health Actuarial Task Force-adopted Consolidated, Most Commonly Asked Questions - States' LTC Rate Increase Reviews document suggest that consistency between rate increase assumptions and reserve adequacy assumptions (noting reserve adequacy assumptions may include a margin to account for moderately adverse conditions) may be expected by some regulators.
      iv. Reasonable value: The Long-term Care (EX) Task Force has tentatively established guidance that reduced benefit options in lieu of rate increases should provide reasonable value in comparison to the economic value of maintaining benefits and paying the increased premium. To the extent that LTC wellness benefits are tied into reduced benefit options, the holistic concept of reasonable value will likely be a consideration.
   d. Next steps
      i. Determine the NAIC venue to work through LTC wellness actuarial issues.

As noted under Section 1, we suggest some data might or could be available from independent living/senior communities related to classes or programs offered that may help improve or stabilize health issues resulting in mitigation of loss or severity of loss.

Consideration should be given to both the cost of developing and implementing wellness programs and the value of wellness programs related to premium/rates.
8. Data privacy

a. Issue: utilization of consumers’ data for wellness initiatives can be used to develop the marketing strategy and a specific wellness initiative, as well as to analyze the impact or effects of a wellness initiative. The use of data to develop the target demographic for new sales, the selection of the existing consumers for wellness initiatives, or to determine the results of the initiative, could result in an insurer or third party data vendor using the data in a way that could be unethical, discriminatory, confusing, or otherwise problematic.
   i. With many of the tech advancements, data on the policyholder would be accessed to, e.g., help identify warning signs of risks such as falls and early-stage dementia.

b. Current observations
   i. The standards applied by insurance companies and tech firm vendors to ensure certain levels of privacy are generally unknown.
   ii. There are lessons from other types of insurance on the types of privacy-related issues that may develop.
   iii. There are cases, and perhaps a trend, of programs/interventions being implemented without utilizing significant amounts of policyholder personally identifiable information.

c. Addressing of issues
   i. Data Use to Identify Wellness Initiatives:
      1. Policyholders considerations:
         a. Confusion about why they are being solicited for the initiative.
         b. Suspicion about the motivation of the insurer.
         c. General lack of awareness that data is being collected, and what data is being collected.
         d. General lack the awareness or understanding on how data is collected and used.
         e. Will they know if their data was used to determine a specific wellness initiative for them versus being selected as part of a class of policyholders?
         f. Will the policyholder know what data is going to be used prior to participation?
         g. Should the policyholder have the option to “opt in/out” of their data being used internally for other initiatives or for external sale or use?
      2. Insurer considerations:
         a. Should insurer communications include why a wellness initiative is being offered; including what data is being used?
         b. Should insurers purchase data regarding their policyholders (e.g. data that shows specific policyholders may have a near term claim - purchasing canes, grab bars, electronic fall detectors, etc.)?
c. How should wellness initiatives be marketed to a policyholder? Insurers may need to limit what is advertised on the envelope, postcard, etc. due to HIPAA concerns.
d. Should insurers partner with vendors or service providers to supply specific policyholder data to the wellness company? What data should be sent? How will the data be transferred?
e. Should insurers focus their data on policyholder specific needs and only offer services relevant to the ongoing needs?
f. How are opt in/out options, disclosures, etc. being shared with the consumer? Email, letter, text, etc. Is it appropriate to the policyholder’s needs or preferences?
g. When using third party data providers, what screening or data protection programs are in place?

ii. Data Use During Wellness Initiative Development:
1. Should insurers purchase policyholder specific information from third party data sources?
   a. Data collected during purchases, search history, television programming, etc.
   b. Should it always be headless, anonymized, or deidentified?
2. When considering big data, are there unacceptable “correlations”? How will insurers recognize relevant correlations vs irrelevant statistically significant correlations?
3. Are there data use standards, controls, definitions of personal data, or a data privacy review body in place to ensure the data is used, stored, or shared ethically?
4. When evaluating the data for wellness initiatives, will it focus on policyholder specific information – for example, will the policyholder’s claims detail or demographic factors determine the type of wellness initiative offered to that policyholder?
5. Will the risk of a data breach be assessed and protected against by the insurer as well as all vendors or third-party data suppliers?
6. Does the insurer have procedures in place to notify the policyholders of a potential breach?

iii. Wellness Results Data Use:
1. Should the results be sold? Aggregate vs specific demographic information?
2. Should insurers use the results internally for cross marketing other wellness initiatives?
3. Should the policyholder be notified and have the option to “opt in/out” of letting the insurer use the data?
4. Should the results be shared with the policyholder, POA, third party notifier? What guardrails should be in place relative to that sharing?
5. How should the data be shared, if at all, with other vendors or service providers?
6. How long will the data be retained? Will the data be destroyed or disposed?

d. Dependencies
   i. Unfair Discrimination

e. Next steps:
   i. Reach out to experts in the health insurance and Medicare Advantage, Medicare Supplement, or Medicaid / PACE areas to learn from their experiences.
   ii. Identify applicable state privacy laws and HIPAA anti-marketing restrictions.
   iii. Require insurance companies to provide information on privacy protection matters when claims management processes are established.
   iv. Determine if policyholder approval of use of expanded data can be established at certain points in time:
      1. At times of options in lieu of rate increases, can insurance companies get agreement to attain more policyholder data?
   v. Can new contracts be written with evergreen access to some private data?

We recognize the trend toward use of technology but are concerned with wellness programs reliance on technology and AI. Seniors must be comfortable with the use of and security of their personal data for these programs to succeed.

9. Other considerations
   a. Issue: other legal or market and administrative issues may come into play as LTC wellness programs are established.
   b. Current observations
      i. There are dozens or hundreds of cutting-edge technological advancements being developed to help with aspects of LTC claims management.
         1. It is difficult for insurance companies and regulators to determine which tech advancements are most promising in terms of likelihood of success and degree of impact on consumer health and reducing claims cost.
      ii. TPAs or reinsurers used by direct-writing insurance companies may be resistant to administering these additional activities or may be concerned about potential legal ramifications that could impact their firms.
      iii. Insurers could potentially be subject to requirements if a policyholder, e.g., is identified as having cognitive impairment and therefore be a risk related to driving or finances.
   c. Addressing issues [section to be drafted]
   d. Next steps
      i. Determine if there is objection to an insurance company offering an extra-contractual wellness benefit that is not tied to loss ratio / benefits / contracted obligations, i.e., out of expenses?
ii. Determine if benefits offered outside the contract could be considered in a similar category as because a reduced benefit option in lieu of a rate increase, which is essentially a mutually-agreed-to restructuring of the insurance contract.

iii. Either identify or ensure industry members are identifying requirements related to disclosing, e.g., when a policyholder has cognitive impairment and may be a high-risk driver.

iv. Regulatory guidance may help innovators engage in this space.
Commissioner Jessica Altman
Chairman, NAIC LTCI Reduced Benefit Options (EX) Subgroup
Pennsylvania Insurance Department

November 4, 2021

Dear Commissioner Altman,

The American Council of Life Insurers (ACLI)\(^1\) and the American Association of Health Insurance Plans (AHIP)\(^2\) appreciate the opportunity to comment on the second draft of the “Issues Related to LTC Wellness Benefits,” exposed by the NAIC Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup on October 5, 2021.

ACLI/AHIP continue to support the Subgroup’s work to explore the offering of innovative wellness benefit programs as part of long-term care insurance (LTCI). By discussing the issues and opportunities associated with wellness programs in LTCI, we learn how these benefits may contribute to policyholder health and strengthen the LTCI market.

**OBJECTIVE**

ACLI/AHIP request that the newly added objective statement be revised to reflect the document’s stated purpose in the Background section to work “together to explore some of these claim cost-reducing innovations.” Thus, we recommend the objective statement read, “The objective of this paper is to foster dialogue amongst regulators, insurance companies, and interested parties regarding issues related to innovative long-term care wellness programs.”

Fostering discussion that supports insurance companies in developing pilot wellness programs should be the aim of this document, as opposed to increasing “clarity,” which could stifle innovation. As we have previously asserted, LTCI wellness initiatives are in their infancy and will require significant development and testing. Insurers are encouraged to develop wellness initiatives when the regulatory environment facilitates exploration, innovation, and targeted pilot programs.

With the goal of contributing to the discussion on wellness programs in LTCI, our comments on the second draft are as follows.

**BACKGROUND**

We appreciate the addition of “pre-insurance-claim” to describe the wellness interventions discussed in the document. The true value of wellness interventions comes in providing them pre-claim when they are most effective.

And while we recognize the Subgroup’s stated goal to address rate increases and solvency concerns with wellness programs, we continue to feel it is important that this discussion
document emphasize what should be wellness programs’ primary goal, and that is the maintained or improved health and independence of policyholders. Whether or not wellness programs affect rate increases or solvency concerns remains to be seen. They are likely to be one of many factors, including necessary and actuarially justified rate increases, that strengthen the LTCI marketplace overall. Wellness programs should not be pursued as a “cure” to industry issues. What we can reasonably pursue, however, is the improved wellness of LTCI policyholders.

PREVENTION OF UNFAIR DISCRIMINATION RELATED TO EXTRA-CONTRACTUAL BENEFITS AND COSTS
ACL/HIP affirm the importance of avoiding unfair discrimination when offering LTCI wellness benefits. We also believe it is possible navigate discrimination concerns when targeting wellness programs to cohorts of similarly situated insureds. Our original comments asserted that certain wellness “programs may be most effective and most utilized if focused on those insureds with a particular condition, age range, or sex. Targeted wellness programs could more effectively reduce claims costs and maximize the health of policyholders.” The ability to target wellness programs, while avoiding unfair discrimination, is key to encouraging LTC insurers to implement wellness programs. Insurers are unlikely to attempt a wellness program if they cannot first experiment with a small, targeted pilot program before scaling up.

While we agree with efforts to better support underserved markets, we disagree with the newly added language in this section that suggests “selection for pilots should consider including a wide range of individuals from various geographic, economic, social, marital, age, racial, and ethnic populations to ensure meaningful data is collected.” While a broad range of characteristics might be appropriate for many benefit programs, it is not appropriate in all instances, particularly pilot programs. Often, meaningful data is best collected and analyzed when it is targeted. Certain benefits are also likely to be more effective at improving wellness if targeted.

The LTCI industry needs assurance from regulators that focusing wellness benefits on a cohort of similarly situated policyholders successfully navigates unfair discrimination requirements. Regulatory guidance on how to classify policyholders for a targeted wellness program is unnecessary and would hamper industry efforts to innovate.

REGULATORY ROLE IN APPROVING OR EVALUATING LTC WELLNESS APPROACHES
We welcome the edits made to this section that both express a goal to avoid unconstructive regulatory and filing burdens and, also, remove the suggestion that receiving an actuarially justified rate increase be contingent on an insurer’s innovation efforts.

To reiterate, ACLI/HP believe that tying wellness benefit programs to rate increases is inappropriate for a few reasons. First, a rate increase request for an individual block of business may not have an associated wellness program. Second, wellness programs might only be offered to new customers. Third, wellness programs are primarily structured to improve
wellness, not address actuarially justified rate increases. Fourth, it could lead to inequities between companies with varying participation levels in the wellness realm. And fifth, the data needed to justify a correlation between wellness programs and rate increases, will, if such a correlation exists, take time to gather and analyze.

CONCLUSION
ACLJ/AHIP affirm their commitment to continuous collaboration with regulators and other interested parties in developing the thinking about wellness programs in LTCI. Thank you for the opportunity to provide these comments. ACLI/AHIP look forward to discussing our comments with you soon.

Sincerely,

Jan M. Graeber  
Senior Actuary, ACLI

Susan Coronel  
Executive Director, Product Policy, AHIP

---

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers' financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers' products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
Commissioner Jessica Altman
Chairman, NAIC LTCI Reduced Benefit Options (EX) Subgroup
Pennsylvania Insurance Department

September 7, 2021

Dear Commissioner Altman,

The American Council of Life Insurers (ACLI)\(^1\) and the American Association of Health Insurance Plans (AHIP)\(^2\) appreciate the opportunity to comment on the draft “Issues Related to LTC Wellness Benefits,” exposed by the NAIC Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup on July 22, 2021.

ACLI/AHIP applaud the work of the Subgroup in exploring innovative wellness benefit programs in long-term care insurance. It is our belief that as regulators and industry work together to consider and develop these programs, they will prove beneficial to policyholders and contribute to a strong LTC market.

**GENERAL**

Overall, ACLI/AHIP found the draft to be a balanced and comprehensive outline of issues related to wellness benefit programs in the LTC insurance realm. We do have three general observations about the draft.

First, we wish to reinforce the understanding that many wellness initiatives are in their infancy and will require significant development and testing. Insurers should be allowed to explore and develop these initiatives on a voluntary basis without regulatory mandates if they determine such initiatives are viable and appropriate for their businesses and policyholders.

Second, as the Subgroup’s work on wellness programs continues, we would like to discuss what form the ultimate deliverable will take. Since wellness benefit programs don’t directly correlate with rate actions, tying them together would unnecessarily encumber both. Therefore, we suggest that wellness initiatives not be incorporated into or made dependent on the RBO Checklist or MSSR process. Ideally, the final deliverable encourages uniform state approaches for wellness programs and discourages state-by-state reviews that could stymie uniformity.

And third, because LTC wellness benefit programs are in their infancy, and there is still much to do, we suggest prioritizing the issues explored in the draft. Issues related to the upfront design of programs, such as rebating and discrimination, are a top priority as they are necessary to get started. Those issues related to results, such as actuarial issues and consumer acceptance/confusion, should be a secondary priority because they will be easier to ascertain and address after we have made some progress.
With these general concepts in mind, we offer our analysis of the draft, by section, below.

**BACKGROUND**

Hybrid products constitute 80% of LTC products sold today. Given their key role in the LTC market, we suggest incorporating hybrid products into the background section.

Timing is an important component of wellness benefit programs that should be mentioned in this section. Many LTC policies provide some form of home modification and caregiver training benefits. The true value of these initiatives comes in providing them pre-claim when they are most effective.

This section refers to wellness initiatives as “claim cost-reducing innovation.” In addition to reducing claim costs for insurers, wellness initiatives help policyholders by potentially extending their independence at home and preventing severe impairment. Providing early access to existing benefits, such as caregiver training and home modifications, may postpone the need for formal care and enable insureds to remain in their homes under the care of their families. In addition to maintaining or improving the health and well-being of insureds, wellness initiatives ultimately benefit family members in caring for loved ones.

**ANALYSIS OF EFFECTIVENESS**

A major concern about developing wellness programs is determining how effective they will be. While there are certain desired results that could require years of study and implementation to ascertain whether they can be achieved, other results can be realized quickly. For instance, the affect wellness programs might have on reducing early claims or encouraging cost-effective home care could be known within months of implementation.

Further, the draft refers to upfront, significant costs associated with wellness programs. While this may be true, there are some wellness offerings that are not expensive and can be tested without much financial risk. For example, health education programs or immunization incentives would not cost much. And while individual blocks of LTC insurance policies might be unique, there could be wellness programs that are effective for most, if not all of them, such as stress management and certain medical screenings.

Paragraph (b)(iii) of this section mentions the stand-alone LTC insurance market. As previously mentioned, it’s important to account for the thriving hybrid LTC market. Carriers selling hybrid products can and should contribute to the industry’s wellness initiatives. The flexible design of hybrid products makes them uniquely suited to offer wellness programs that maintain policyholders’ independence at home. For example, the life component of the hybrid product could finance the wellness initiative. Alternatively, additional riders could be added to the hybrid policy to cover wellness programs.
In addition, there is likely much to be learned from wellness programs currently offered under life insurance policies, whether hybrid or not. LTC certainly has components that differentiate it from life and major medical insurance, but to the extent possible, learning from the experience of life and health insurance wellness programs would be advantageous, saving the LTC industry time and money, while expediting health outcomes. In addition to Medicaid and Medicare Advantage mentioned in the draft, there are other products and programs, such as workplace wellness programs and disability income insurance to look to for learning.

We recommend adding another “next step” to this section to better define what is meant by wellness. We need to be clear on what we are hoping to achieve. We are happy to work with the subgroup on a definition.

There are two additional factors to consider when looking at the effectiveness of wellness programs. First, it should be noted that the goal of wellness programs is to improve the health outcomes of policyholders, which could affect loss ratios for insurers. Second, regulators and all participants should be cautious to avoid, even inadvertently, setting overly optimistic expectations as to what the ultimate impacts of any wellness initiatives might be. More innovative wellness programs may take months or years to pilot and assess before any actuarially meaningful results are revealed. They are likely to be one of many factors, in addition to necessary and actuarially justified rate increases, that may ultimately improve the LTC marketplace. However, wellness programs alone should not be considered a “cure” to industry issues.

PREVENTION OF UNFAIR DISCRIMINATION RELATED TO EXTRA-CONTRACTUAL BENEFITS AND COSTS

Unfair discrimination is an important concern to navigate in LTC wellness programs if the same wellness benefits will not be offered to all policyholders. While certain preventative health programs might be offered to all insureds, other programs may be most effective and most utilized if focused on those insureds with a particular condition, age range, or sex. Targeted wellness programs could more effectively reduce claims costs and maximize the health of policyholders. Limiting wellness programs by geographic region, for example, might be necessary to test the effectiveness of programs before scaling up. To do so, insurers would need regulatory support that programs or initiatives focused on similarly situated insureds, for example, those in the “same class,” would not be considered unfair discrimination. Health insurers have a long history of targeting wellness programs aimed at those deemed high risk while avoiding unfair discrimination.

One issue for further study are the characteristics that can rightfully be used to define an acceptable cohort for a wellness initiative. For example, could an insurer only offer certain benefits to insureds without a spouse or other informal caregiver? Would differing methods of contacting policyholders, for example mail vs. email, be considered unfair discrimination? Also, what are the implications if policyholders share the cost of a more expensive wellness
intervention? Similarly, what would the implications be, if, after a pilot program ends, policyholders wish to continue the wellness program by covering the cost themselves?

CONSUMER CONFUSION
Consumer communication and education are vital to precluding confusion. Giving consumers the option to opt-in a program after they fully understand it is one way to ensure consumers are comfortable. Another option is to allow insureds to self-identify their conditions before a wellness initiative begins. An example of self-identification is optional testing for early dementia where early intervention is effective.

Clearly communicating with informal caregivers is also important. Depending on the wellness benefit program and condition of the insured, a caregiver may be the one utilizing the technology and other tools offered by a wellness program. We would suggest consulting caregiving groups, such as the National Alliance for Caregiving, which supports family caregivers, or the Paraprofessional Healthcare Institute, which represents direct care workers, to give stakeholders valuable insight into fostering caregiver engagement in wellness programs.

REBATING
One can make a strong case that the wellness initiatives our industry is currently contemplating do not violate anti-rebating laws. Wellness benefit programs are intended to encourage behavioral changes that improve the insured’s health, thereby reducing the risk the insured will need LTC. Many states allow insurers to provide value-added services and programs for loss mitigation and rate reduction purposes to insureds at no additional charge or a discounted rate under certain conditions. The ACLI maintains a law survey on the subject of rebating that could prove useful to companies with access to the law survey when assessing the different requirements between states. Additionally, as the draft mentions, the NAIC Model Unfair Trade Practices Act explicitly exempts certain wellness benefits.

Another factor to consider is that many, if not most, wellness initiatives would not begin the moment a policy becomes effective. This factor is further evidence that wellness benefits are not rebates.

TAX CONSIDERATIONS
Many wellness and similar initiatives designed to reduce the onset or severity of chronic illness can be undertaken today consistently with federal tax requirements for qualified long-term care insurance, but for others clarifying guidance from the Treasury Department or IRS would be helpful or amendment of tax requirements by Congress may be needed.

As noted, however, certain wellness initiatives are permissible under current tax law. For example, though not considered precedent, PLR 201105026 and PLR 201105027 describe certain wellness benefits as permissible under federal tax law. The IRS Private Letter Rulings both comment, “It would be inconsistent with the stated goal of § 7702B to deny qualification
to a long-term care insurance contract because it provided ancillary mechanisms aimed at minimizing long-term care needs.”

To summarize, we caution the Subgroup to not purport to interpret existing federal tax requirements regarding wellness initiatives, although we think the NAIC and state regulators can perform an important informational role with respect to non-tax aspects of such initiatives in connection with any future efforts to obtain clarifying IRS/Treasury guidance or legislative changes, there may be tax consequences if benefits are provided to an insured who is not chronically ill as defined in 26 U.S.C.A. §7702B(c)(2), that is, outside the federal tax definition of qualified LTC benefits. Federal legislative changes to section 7702B could be required to ensure policyholders can receive wellness benefits without tax consequence.

**REGULATORY ROLE IN APPROVING OR EVALUATING LTC WELLNESS APPROACHES**

Ideally, the effort to incorporate wellness initiatives in LTC results in a process that minimizes or eliminates state-by-state reviews of wellness programs and fosters flexibility for insurers wanting to offer these incentives.

The draft posits the question of whether a company’s commitment towards innovation efforts could be a contingency to receiving a fully actuarially justified rate increase. It may ultimately be just one factor, of many, to consider in a rate decision. And, first, it would be necessary to establish objective criteria to evaluate companies fairly.

The following items should be considered as wellness initiatives are more fully developed:

- Wellness initiatives are designed to improve the health of policyholders and the impact on claims and loss ratios are still unknown. Linking rate increases to wellness offerings will not be appropriate for some time.
- Formal regulator approval of a wellness offering could stifle innovation. Rather than a formal approval process, companies could provide information to regulators on an as needed basis or upon request.
- Because the impact on claims is unknown at this time, there should not be an assumption that wellness programs are available to all or that engagement in the wellness initiative will be high.
- Finally, characterization of LTC insurance in (d)(iii) as being in a “desperate situation” discounts the vibrant hybrid market.

**ACTUARIAL CONSIDERATIONS**

First, as with any other actuarial assumption, actuaries must have a valid justification for the impact of the wellness initiative, especially as it relates to in-force rate increases. As discussed throughout the draft, this will take time to develop.

Second, while a wellness program could be tied to a reduced benefit option, there should not be an expectation that it will be. This determination is best made by the insurer.
DATA PRIVACY
Data privacy is a fundamental and legitimate concern in the development and implementation of wellness benefit programs. Because these programs are an emerging innovation, starting small by allowing insureds to participate at their discretion and/or self-attest to their medical conditions is key.

In this section of the draft, there are multiple questions raised that likely already have adequate regulations in place to address them. (e.g. “Should insurers purchase data regarding their policyholders?” and “Should insurers partner with vendors or service providers to supply specific policyholder data to the wellness company?”) For issues that have already been addressed, we suggest specifying that their inclusion in the draft is to give a comprehensive overview on the topic, alert regulators for oversight focus, or for some other stated purpose.

Along those same lines, the draft would benefit from bifurcation between issues governed by clear regulations vs. those that are not (either because the issue falls within a gray area or no regulation exists). Similarly, if the NAIC has already addressed substantially similar topics, the draft should refer to the NAIC’s work rather than replicate their efforts. (e.g. “When considering big data, are there unacceptable ‘correlations’? “How will insurers recognize relevant correlations vs. irrelevant statistically significant correlations?”)

The ability to collect and analyze data is essential to test pilot programs and eventually implement fully developed wellness initiatives. In data privacy matters that are unsettled, insurers need assurance they can move forward without fear of adverse legal or regulatory action. The ongoing efforts of regulators and industry stakeholders to coordinate and balance the public policies of data privacy, improved health, and lower LTC costs can give that assurance.

As we move forward, guiding principles are vital. ACLI/AHIP are strongly committed to the proper use and protection of consumer data. We encourage clear and concise notice about the collection, use, and disclosure of personal information. We also support the ability for consumers to have appropriate control over their information, including the ability to access and correct inaccuracies, consistent with legitimate business purposes and/or legal requirements to retain such information.

OTHER CONSIDERATIONS
At this time, ACLI/AHIP have no comments on this section of the draft.
CONCLUSION
Thank you for the opportunity to provide these comments. ACLI/AHIP welcome the opportunity to discuss our comments with you soon.

Sincerely,

Jan M. Graeber  
Senior Actuary, ACLI

Susan Coronel  
Executive Director, Product Policy, AHIP

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.
