consumer credit information. Together with the Fair Debt Collection Practices Act (FDCPA), the FCRA forms the foundation of consumer rights law in the United States. It was originally passed in 1970 and is enforced by the US Federal Trade Commission, the Consumer Financial Protection Bureau and private litigants.

Generalized Linear Model—TBD

Geodemographic—Geodemographic segmentation (or analysis) is a multivariate statistical classification technique for discovering whether the individuals of a population fall into different groups by making quantitative comparisons of multiple characteristics with the assumption that the differences within any group should be less than the differences between groups. Geodemographic segmentation is based on two principles:

1. People who live in the same neighborhood are more likely to have similar characteristics than are two people chosen at random.
2. Neighborhoods can be categorized in terms of the characteristics of the population that they contain. Any two neighborhoods can be placed in the same category, i.e., they contain similar types of people, even though they are widely separated.

PCA Approach (Principal Component Analysis) —The method creates multiple new variables from correlated groups of predictors. Those new variables exhibit little or no correlation between them—thereby making them potentially more useful in a GLM. A PCA in a filing can be described as “a GLM within a GLM.” One of the more common applications of PCA is geodemographic analysis, where many attributes are used to modify territorial differentials on, for example, a census block level.

DRAFTING NOTE 10/15/19: WILL NEED TO CORRECT ALL FOOTNOTES. THE FOLLOWING IS ADDED FOR DRAFTING PURPOSES:

© 2019 National Association of Insurance Commissioners 54
Draft: 10/15/2019
As adopted by the Casualty Actuarial and Statistical (C) Task Force on XX/XX/XX

[19] newonlinecourses.science.psu.edu/stat504/node/216
[yy] https://en.wikipedia.org/wiki/Granularity#Data_granularity
[xx] https://www.statisticshowto.datasciencecentral.com/correlation-matrix

To see that this second definition accounts for the interaction, note that it is equivalent to 
\[ n \beta_1 + \beta_2 x_1 + \beta_3 x_2 \] 
and to 
\[ n \beta_1 + \beta_2 x_1 + \beta_3 x_2, \] 
with \( \beta_1 = \beta_2 + \beta_3 x_2 \) and \( \beta_2 = \beta_2 + \beta_3 x_1 \). Since \( \beta_1 \) is a function of \( x_1 \) and \( \beta_2 \) is a function of \( x_2 \), these two equivalences say that the effect of \( x_1 \) depends on the level of \( x_2 \) and vice versa.

### APPENDIX C – SAMPLE RATE-DISRUPTION TEMPLATE

**State Division of Insurance - EXAMPLE for Rate Disruption**

- First, fill in the boxes for minimum and maximum individual impacts, shaded in light blue. Default values in the cells are examples only.
- The appropriate percent-change ranges will then be generated based on the maximum/minimum changes.
- For every box shaded in light green, replace "ENTER VALUE" with the number of affected insureds within the corresponding change range.
- Once all values are filled in, use the "Charts" feature in Excel to generate a histogram to visually display the spread of impacts.

**NOTE:** Values of Minimum % Change, Maximum % Change, and Total Number of Insureds must reconcile to the Rate/Rule Schedule in SERFF.

### APPENDIX D – INFORMATION NEEDED BY REGULATOR MAPPED INTO BEST PRACTICES

TBD

### APPENDIX E – REFERENCES

November 22, 2019

Kris DeFrain, FCAS, MAAA, CPCU
Director of Research and Actuarial Services
National Association of Insurance
Commissioners (NAIC) Central Office

Re: CASTF Regulatory Review of Predictive Models White Paper

Ms. DeFrain,

Several members of the CAS Ratemaking Research Committee have discussed the most recently exposed revisions to the draft white paper on “Regulatory Review of Predictive Models”. This document should not be construed as representing an official response from the CAS membership as a whole. The views are representative of only those members whose names appear at the conclusion of this document.

Having reviewed and discussed the changes to the document, we make the following observations:

- Given the emphasis on GLMs in the guide, should the title be reworded to indicate that the paper refers specifically to such models?
- On page 3, with respect to the issue of credibility in GLMs, we note the following
  o We disagree with the statement credibility weighting GLM outputs is not standard practice.
  o If the sample data are highly variable, then so too are the coefficient estimates. An experienced modeler will recognize this fact and so opine.
  o Estimates of standard error for coefficients and residuals permit one to develop confidence intervals around estimated quantities. Non-parametric sample estimates of the first moment of a distribution – however credible – do not support this.
  o Segmented data may be analyzed using GLMMs – generalized linear mixed models – which have substantially similar assumptions of classic Buhlman-Straub credibility estimators.
- Page 4:
  o Spurious relationships between predictors and targets may occur in smaller samples as well as in “big data” samples.
  o When controlling for non-permitted variables, validation of a rating plan isn’t straightforward. Model performance may suffer from the exclusion of variables which are available to the insurer.
- Page 5:
  o The focus on personal auto and property appears to be largely driven by the ratemaking behavior of market participants. The adoption of GLMs for commercial auto writers is noted. However, there is no comment on why the best practices advocated in the document would be inappropriate for commercial auto coverage. One might conjecture that the higher limits on offer in commercial lines would necessitate robust statistical techniques like extreme value theory. Absent clarifying language from the NAIC, this remains a supposition.
On page 7, we feel that the first paragraph oversteps the bounds of a rate filing review. We suggest that the paragraph be worded as follows:

- Documentation of the design and operational details of the model is required to ensure business continuity and transparency of models used. Granularity of documentation takes into account the level of management or key function at which it is intended to be used. Documentation should be sufficiently detailed and complete to enable a qualified third party to form a sound judgment on the suitability of the model for the intended purpose. The theory, assumptions, methodologies, software and empirical bases should be explained, as well as the data used in developing and implementing the model. Relevant testing and ongoing performance testing needs to be documented. Key model limitations and overrides need to be pointed out so that stakeholders understand the circumstances under which the model does not work effectively. End-user documentation should be provided and key reports using the model results described. Major changes to the model need to be shared in a timely manner and documented, and IT controls should be in place, such as a record of versions, change control and access to model.

Page 8:
- Point A.1.b – We have struggled to understand this point. The notion that aggregated data has not been “scrubbed” suggests that no quality audit has been performed at all. This remark would benefit from further wording which would clarify what is meant here.

Page 11:
- Point A.3.d – The modeler should make a statement as to whether there is any systemic reason for missing data.

Page 13:
- Point B.1.a – The practice guidelines are highly specific to GLMs. Although reference is made to other model types, the steps involved in compliance for other models is vague. In a sense, this penalizes GLMs, which have existed for far longer and whose development and implementation enjoys more widespread understanding. The lesser detail for non-GLM models could persuade some market participants that the compliance burden may be reduced by gravitating towards techniques which have been less tested. We not sure that’s a desirable outcome.
- Point B.1.b – Pedantic note, but the R version, as well as the version of all packages used in calculation is incredibly simple to obtain. Simply call `sessionInfo()` at an appropriate stage of the calculation (likely at the end). If I were a regulator who was told that a filer didn’t know what version of R they were using, I’d be highly suspect.
- Point B.1.c – Although the term “training” is used with little ambiguity, “test” and “validation” are terms that are sometimes interchanged, or the word “validation” may not be used at all. The practice guidelines should be clear on this point.

Page 15:
- Point B.2.e – Most software has default convergence criteria. In practice, the modeler would only need to adjust this if the model fails to converge. I would recommend changing this statement to one which requires the modeler to make a statement if they deviated from defaults.
- Point B.3.a – As worded, this seems to imply that interaction terms warrant more explanation than any other rating variable. In practice, interaction terms are used for the same reason as any other explanatory variable: they improve the model’s predictive power. The classic example is the interaction between age and smoking when predicting mortality. That variable’s use in life insurance rating has been well established and non-controversial.
- Point B.3.b – We think it is reasonable to require diagnostics for various candidate models.

Page 15, B.3.b—We have commented on this before. To reiterate, while this is listed as a Level 4 item, assembly of a list of all predictor variables is onerous. Further, can lead to companies having to disclose
intellectual property for types of variables they have experimented with. This will hamper speed to market and hinder innovation.

- Page 16
  - Point B.3.c – The wording in the comment would benefit from more context. When constructing a GLM, the modeler may measure correlation as an aid to decide the set of candidate predictors, or to interpret significance of coefficient estimates. The utility of a statement about Pearson v. Cramer, or a statement about how the matrix was produced is not immediately clear.
  - Point B.3.e – Use of PCA will obviate much of the preceding guidance about a rational relationship between a predictor and a target response.

We make the following comments with respect to terms used in the document:

- The current definition for “insurance data” is “data collected by the insurance company”. We feel that the definition would benefit by citing some examples of data sources which are not insurance data. We presume this would include items such as census or credit data.
- We recommend avoiding use of the term “predictive power” without reference to how this is measured. There are numerous statistical diagnostics – root-mean squared error, mean absolute error, to name two – which have crisp, clear definitions.
- Within the data science literature, although the term “training” is used with little ambiguity, “test” and “validation” are terms that are sometimes interchanged. The word “validation” may not be used at all. The practice guidelines should be clear on the definition of these terms.

Once again, we thank you for your consideration of these points and welcome the opportunity to discuss with you or any members of the CASTF.

Regards,

Sandra Callanan

Honorable James J. Donelon  
Commissioner, Louisiana Department of Insurance  
Vice-Chairman, NAIC Casualty Actuarial and Statistical Task Force  
1702 N. Third Street; P.O. Box 94214;  
Baton Rouge, LA 70802

Submitted Electronically to kdefrain@naic.org

Dear Chairman Kelley and Vice Chair Donelon:

I write on behalf of the Consumer Data Industry Association (CDIA) to comment on the exposure draft concerning best practices when reviewing predictive models and analytics. This draft was released by your Casualty Actuarial and Statistical Task Force ("Task Force") on October 15, 2019. Thank you for allowing CDIA another chance to offer comments on behalf of our consumer reporting agency ("CRA") members. We offer comments on section VI in the body of the whitepaper and sections A, B and C in the modeling guide.

The Consumer Data Industry Association is the voice of the consumer reporting industry, representing consumer reporting agencies including the nationwide credit bureaus, regional and specialized credit bureaus, background check and residential screening companies, and others. Founded in 1906, CDIA promotes the responsible use of consumer data to help consumers achieve their financial goals, and to help businesses, governments and volunteer organizations avoid fraud and manage risk. Through data and analytics, CDIA members empower economic opportunity all over the world, helping ensure fair and safe transactions for consumers, facilitating competition and expanding consumers’ access to financial and other products suited to their unique needs.

Section VI, 1. c (p. 5) addresses a “Review [of] the individual input characteristics to and output factors from the predictive model (and its sub-models), as well as, associated selected relativities to ensure they are not unfairly discriminatory”. We appreciate your feedback on our initial comments expressing concerns related to including "sub-models" like Credit-Based Insurance Scores ("CBIS") into the regulatory
review process. However, we do respectfully believe this will increase the burden of regulatory compliance for CRAs, slowdown the speed to market and impede the relationship between insurers and consumers. These new burdens can inject unnecessary friction into consumers who seek quick decisions and competitive prices from their insurers.

We respectfully believe these are "new, proposed obligations". The review of CBIS models has been established and ongoing in many States for close to two decades like you highlight, but those occur in other forms of insurance and not under the forms the Casualty Actuarial and Statistical (C) Task Force is seeking to add to its handbook and make an industry wide practice. The current reviews may include the same CBIS models, but if they are not currently being reviewed then we would argue these are in fact new obligations on CRAs.

Many States have provided certain confidentiality protections from the general public for CBIS models in accordance with their State law, but many is not all states. CDIA members spend significant amounts of time and resources developing their models and complying with current regulations. only takes one employee in one state to make one mistake and decades of hard work, investment and research is available for anyone to view, replicate, deceive or use to commit fraud. We are encouraged by the inclusion of new confidentiality language in Section VII of the Whitepaper, pertaining state confidential, proprietary, or trade secret state laws and relevant contractual provisions, and request inclusion of the language as a proposed change to the Product Filing Review Handbook. Even with the new language, the lack of a national exemption from public records remains a concern because information that has never previously been requested could be subject to the myriad of public disclosure laws around the country. There is no surety to how all states will respond to public records requests.

New language in Section V of the Whitepaper suggests that reliance on state confidentiality authority, regulations, and rules may not govern if the NAIC or another third party becomes involved in the review process on behalf of the states. NAIC or third party participation in the review process causes significant trade secret and proprietary information protection concerns. It is not clear from the new language what protections, law, or authority would apply in such a case. We request clarifying language be added that, as a floor, the confidential, proprietary, and trade secret protections of the state on behalf of which a review is being performed apply.

We understand no information should be confidential from the regulators themselves. However, if the CBIS models are reviewed and accepted elsewhere, it would seem that a repetitive and costly process is occurring for not much if any added value to the final product for the consumers. The credit reporting system is a consistent nationwide process. Exposing individual characteristics of scoring models to public record requests allows competitors access to information that they can use to gain an unfair advantage over another company. It also reduces the incentive to continue to
create new solutions, reducing a competitive environment, which ultimately hurts consumers. Regulators should be able to know whether scoring models are in compliance with the law, but this information should not be accessible as a public record.

The potential for confidentiality concerns is not only with the CRAs, but the companies they work with (date furnishers and lenders) in the credit reporting system and their consumers. We are not convinced that including CBIS in this type of review is mission critical. Yet, if this review needs to be in the process, CDIA recommends the establishment of highly specific rules to protect confidentiality and proprietary information. Additionally, a separate review process of sub-models as an optional request with defined valid concerns would help in addressing concerns.

Credit-based insurance scores do not unfairly discriminatory towards any race, religion, gender, ethnicity, or other established suspect classes and there are studies that show the lack of illegal discrimination. A myth of illegal discrimination pervades many media accounts and public policy debates, but in truth, credit-based insurance scores do not promote redlining or other illegal insurance practices.

Section VI 3.a. (p. 6) addresses how to “[e]valuate how the model interacts with and improves the rating plan” and how to “[o]btain a clear understanding of the characteristics that are input to a predictive model (and its sub-models), their relationship to each other and their relationship to non-modeled characteristics/variables used to calculate a risk’s premium.” We recognize the goal of the regulator in seeking to understand how the individual components of the rating plan interrelate to produce a consumer’s premium, but we feel your comment adds further confusion to our members. The white paper only mentions “characteristics”, but your comment refers to “information that the ‘CRAs use to create CBIS’ is essential to understanding the structure of the CBIS models, the variables used, and their justification.”. CRAs could provide general characteristics of the model without having confidentiality concerns, but the “information they use to create CBIS” appears to be far more specific.

If these provisions are meant to include information relating to the scoring models that CRAs use to create CBIS, there would be a significant new regulatory burden on CRAs and this would impede the relationship between insurers and consumers. These new burdensome requirements can inject unnecessary friction on to consumers who seek quick decisions and competitive prices from their insurers. Along with heightening the risk of disclosing proprietary information that is currently kept confidential because of its importance.

In “Selecting Model Input” under subsections A.1.a “Available Data Sources”, the original wording caused concern that FCRA requirements would be extended to all external data sources. The edit to this section is appreciated, but we believe application
to contractual disclosure restriction concerns remain. For CBIS models, we feel that review should be restricted to credit variables used in the model, not all credit variables.

Regarding A.2.b of the third exposure draft, former subsection A.2.f., “Determine if the sub-model was previously approved (or accepted) by the regulatory agency,” the review level change is appreciated as it will eliminate unnecessary and duplicative reviews of third-party and vendor models that have been previously approved. To be consistent with the A.2.b review level change, a change from a review level 1 to a 3 or 4 is requested for current A.2.f., former A.2.e, “If using output of any scoring algorithms, obtain a list of the variables used to determine the score and provide the source of the data used to calculate the score”.

Section A.4.c addresses “Identif[ing] material findings the company had during their data review and obtain an explanation of any potential material limitations, defects, bias or unresolved concerns found or believed to exist in the data. If issues or limitations in the data influenced modeling analysis and/or results, obtain a description of those concerns and an explanation how modeling analysis was adjusted and/or results were impacted”. This provision should be re-categorized from its current score of 1 to a 3 or 4 score. Existing regulations around actuarial rate making standards and state regulations should prevent these items from entering a “final/proposed” model. This should be categorized as three of four (i.e. if model review uncovers issues).

We have several comments regarding Section B, “building the model”:

- Sec. B.2.c, “Obtain a description of univariate balancing and the testing that was performed during the model-building process, including an explanation of the thought processes involved and a discussion of why interaction terms were included (or not included).” Only included interactions should be discussed. Interactions not be included, but default are not in a model, and therefore should not need to be justified.
- Secs. B.3.a and B.3.c, Both subsections pose trade secret protection and confidentiality issues.
- Sec. B.3.b, “Obtain[ing] a list of predictor variables considered but not used in the final model, and the rationale for their removal”. The best practices and guidelines should be limited to only the variables that were in the final and proposed models.
- Sec. B.3.d, “Obtain[ing] an rational explanation for why an increase in each predictor variable should increase or decrease frequency, severity, loss costs, expenses, or any element or characteristic being predicted.” CDIA agrees with the current and actuarially accepted practice of rate making guidelines not requiring intuitive or rational explanations of predictive values. We support use of variables that are statistically and actuarially predictive of insurance losses.
Additionally, this subsection poses a risk exposing trade secret and confidential information.

- Secs. B.4.b, through B.4.b CDIA recommends recategorizing these scores from their current scores of two to a three or four score, along with only making this a requirement if deemed necessary.
- Sec. B.4.c “Identifying the threshold for statistical significance and explain why it was selected. Obtain a reasonable and appropriately supported explanation for keeping the variable for each discrete variable level where the p-values were not less than the chosen threshold”. This is a fairly subjective standard. We recommend that it includes more objective and actuarially sound information and decisions. We recommend adding “threshold for statistical significance” into the list of required elements and changing this score from its current one to a three or four.

We have several comments regarding “Section C, “The Filed Rating Plan”:

- Sec. C.1.c, like many other areas, this provision creates potential trade secret and confidentiality issues.
- Sec. C.2.a, “Obtain a narrative regarding how the characteristics/rating variables, included in the filed rating plan, logically and intuitively relate to the risk of insurance loss (or expense) for the type of insurance product being priced.” CDIA appreciates the edits made to the Information Element. “Logical and intuitive” was removed from the “Information Element” box, but not the “Comment” box. We recommend removal of “logical and intuitive” from the “Comment” box for consistency.
- Sec. C.7.h, this new section will impact CBIS and it appears to extend FCRA requirements on all external data. To ease FCRA requirement extension, we request changing the language in the Comment box from “…data should be documented and an overview of who…” and “…consumer verification should be addressed,….” to “…data may need to be documented and an overview…” and “consumer verification may need to be addressed…”.

The “Supporting Data” section, specifically Secs. C.6.a and C.6.b, on “Obtain[ing] an explanation of any material (especially directional) differences between model indications and state-specific univariate indications” pose some concerns for CRAs and could interfere with the insurance process for consumers.

Section VIII of the Whitepaper proposes several changes to the Handbook. Section X, “Other Considerations” of the Handbook suggest advisory organization regulation of model and algorithm vendors. As explained further in this comment, CIBS modelers are already heavily regulated.

Credit Based Insurance Scores are constructed using nationwide data sets. Scoring or grading their performance out at a state level may not be supported or
accurate with this approach. It is also a common occurrence for certain contracts to prevent model providers from sharing distinct or customer specific data with third parties. There are several factors besides credit information and CBIS that go into the rate setting process. Credit Information and CBIS may be the only ones that are consistent and transferrable across the country, while some of the other factors used can and do differ greatly on a state by state basis.

The insurance industry has been using CBIS models for decades and they have been approved by nearly every state’s insurance department for auto and home insurers. Adding the work CASTF proposes will be burdensome and repetitive. The lack of trade secret and proprietary information protection will always remain a source of concern. In the long run we see this as something only large insurers will be able to absorb and the small to medium sized insurers that rely on third parties help will get squeezed out. We strongly feel that this will give large insurers a competitive edge in the marketplace. This will come at great cost to the consumers when their options decrease because of the eventual lack of competition.

There is already a large regulatory review presence on the industry. It is already over seen at the federal level by the Consumer Financial Protection Bureau (CFPB) and Federal Trade Commission (FTC), along with several states implementing their own regulations and the Conference of State Banking Commissioners looking into the industry as well. This increased regulation not only hurts the industry, but the consumers it serves. It will significantly hamper speed to market for the products consumers need and does not appear to add much, if any, benefit to the outcome for the industry and its consumer.

In conclusion, we believe that these potential new best practices will create burdensome regulatory difficulties for our members, speed to market issues for insurance companies, their product and the consumers that need them. CDIA members provide quality products that are already regulated and accepted by the insurance industry. CDIA and its members respectfully request consideration and inclusion of its comments in the task force’s whitepaper. Thank you for the opportunity to comment and please feel free to contact us with any questions you may have.

Sincerely,

Eric J. Ellman
Senior Vice President, Public Policy & Legal Affairs

Comments for the Center for Economic Justice

To the Casualty Actuarial Task Force

Regulatory Review of Predictive Models White Paper

November 22, 2019

The Center for Economic Justice offers the following comments on the October 2019 draft of the Regulatory Review of Predictive Models White Paper.

Section VI, number 1 states: “Ensure that the selected rating factors, based on the model or other analysis, produce rates that are not excessive, inadequate, or unfairly discriminatory.” CEJ suggests the following addition to part c.:

c. Review the individual input characteristics to and output factors from the predictive model (and its sub-models), as well as, associated selected relativities to ensure they are not unfairly discriminatory in terms of both a cost-based relationship of the risk classification and an absence of intentionally or unintentional discrimination against protected classes.

The suggested addition identifies the two prongs of unfair discrimination – the absence of cost differentials necessary to justify different treatment of consumers and the direct or indirect (proxy) use of prohibited classes for different treatment of consumers.

Section VI, number 2 states: “Obtain a clear understanding of the data used to build and validate the model, and thoroughly review all other aspects of the model, including assumptions, adjustments, variables, submodels used as input, and resulting output.” CEJ suggests the addition of another item under number 2:

x. Determine if data used for model development and testing are biased against protected classes of consumers, if insurers have tested the data for such bias and if any action has been taken to eliminate or reduce bias in data.

While this type of information and testing is implied in other parts of the white paper, CEJ suggests explicit identification of this type of data and model testing.
Regarding Section VII, A.1.a:

Request details of any non-insurance data used (customer-provided or other), whether the data was collected by use of a questionnaire/checklist, whether data was voluntarily reported by the applicant, and whether any of the data is subject to the Fair Credit Reporting Act. If the data is from an outside source, find out what steps were taken to verify the data was accurate, complete and unbiased in terms of relevant and representative time frame, representative of potential exposures and uncorrelated with protected classes.

While there are important consumer protection issues associated with insurers’ use of non-FCRA compliant data, it is unclear what a filing reviewer should or might do with information sought in the first (italicized) sentence. CEJ suggests that, whatever the source of the data or the means of obtaining the data from or about consumers, the same regulatory issues and questions apply – those set out in CEJ’s proposed revisions to the second sentence of the section.

CEJ suggests a new section: Testing for and Minimizing Disparate Impact Unfair Discrimination:

While regulators must review models for the direct use of prohibited risk classifications (intentional discrimination or disparate treatment), such violations are relatively easy to identify. Insurers’ use of many new databases of non-insurance personal consumer information as well as more intensive and granular databases of insurance personal consumer information (including consumer-generated data through telematics) increases the risk of proxy discrimination against protected classes. A “protected class” of consumers is one associated with prohibited risk classifications, such as race, religion or national origin.

GLMs – like any predictive model -- are developed using historical data. If the historical data incorporates or reflects biased or atypical outcomes, the algorithm will reflect and perpetuate those biases. The scholars Barocas and Selbst note in Big Data’s Disparate Impact¹

Advocates of algorithmic techniques like data mining argue that they eliminate human biases from the decision-making process. But an algorithm is only as good as the data it works with. Data mining can inherit the prejudices of prior decision-makers or reflect the widespread biases that persist in society at large. Often, the “patterns” it discovers are simply preexisting societal patterns of inequality and exclusion. Unthinking reliance on data mining can deny members of vulnerable groups full participation in society.

Disparate impact unfair discrimination refers to practices which have the effect of discrimination against protected classes and is sometimes referred to disparate effect. Regulatory review of complex predictive models should include a requirement that insurers demonstrate:

1. Testing of bias against protected classes in data used to develop and test the predictive model;
2. Testing of disparate impact against protected classes in the development of the model;
3. Employing statistical tools to minimize disparate impact in the development of the model; and
4. Testing of model output for disparate impact.

One common approach to identifying and minimizing disparate impact unfair discrimination is to utilize a control variable for the prohibited class in the development of the model. A control variable is an independent variable used to control or neutralize effects that might otherwise distort model specifications and output. For example, an insurer developing a national personal auto or homeowners insurance pricing model might use a control variable for state to control for / remove effects of differences among the states in minimum limits requirements, tort frameworks or other state-specific issues that might impact the statistical contribution of other, national, factors to explaining the dependent variable. While a control variable is used in the development of the model, the control variable is not included in the model deployed for use.

Similarly, by using the prohibited class characteristics as independent (control) variables in the development of the model, the remaining independent variables’ contribution (to explaining the dependent variable) is shorn of that part of their contribution that is a function of correlation with the prohibited characteristics. For the independent variables other than race, religion and national origin, what remains is a more accurate picture of the remaining independent variables’ contribution to the target outcome. Consequently, using prohibited class characteristics as control variables simultaneously tests for and minimizes disparate impact.

Testing for disparate impact is consistent with the statistical and actuarial nature of unfair discrimination based on cost-based analysis. One form of insurance unfair discrimination is different treatment of consumers without any demonstrated differences in the cost of the transfer of risk of those consumers. Stated differently, a rate is unfairly discriminatory if consumers of the same risk and hazard are treated differently. The traditional test for unfair discrimination is whether an insurer can demonstrate a difference in expected claims or expenses on the basis of the risk classification.

Testing for and measuring disparate impact is completely consistent with the cost-based tests for unfair discrimination. Actuarial justification is a statistical test – that a particular characteristic of the consumer, vehicle, property or environment is correlated with a particular outcome, like pure premium (average claim cost). The same statistical test can be used to evaluate and minimize disparate impact. Stated differently – if a particular correlation and statistical significance is used to justify, say, insurance credit scoring, those same standards of correlation and statistical significance are reasonable evidence of disparate impact and unfair discrimination on the basis of prohibited factors.
Testing for and minimizing disparate impact improves cost-based insurance pricing models. To the extent that historical data reflects bias and unfair discrimination against protected classes, testing for and minimizing disparate impact can stop the cycle of algorithms reflecting and perpetuating that historic discrimination.
I would suggest the following to “fix” the issue raised (note that the first bullet is moved up a level):

Other Considerations

- Regulators are often responding to consumer inquiries regarding how a policy premium is calculated and why the premium, or change in premium, is so high. The ability of the regulator to respond to these inquiries is included in best practice 1.b, “Review the premium disruption for individual policyholders and how the disruptions can be explained to individual consumers.”
  - The white paper identified the following information elements that may assist in addressing this best practice and a response to a consumer:
    - C.2.a Provide an explanation how the characteristics/rating variables, included in the filed rating plan, logically and intuitively relate to the risk of insurance loss (or expense) for the type of insurance product being priced. Include a discussion of the relevance each characteristic/rating variable has on consumer behavior that would lead to a difference in risk of loss (or expense).
    - C.7.f Explain how the insurer will help educate consumers to mitigate their risk.
    - C.7.h Identify sources to be used at "point of sale" to place individual risks within the matrix of rating system classifications. How can a consumer verify their own "point-of-sale" data and correct any errors?
    - C.7.j Provide the regulator with a description of how the company will respond to consumers’ inquiries about how their premium was calculated.

The white paper has the following note about “best practices” but then lists one best practice and 4 information items. How should I modify the introductory sentence?

Other Considerations

- Regulators are often responding to consumer inquiries regarding how a policy premium is calculated and why the premium, or change in premium, is so high.
  - The white paper identified the following best practices:
    - 1.b. Review the premium disruption for individual policyholders and how the disruptions can be explained to individual consumers. …and information elements that may assist the regulator's and consumer's understanding of the premium being charged.
    - C.2.a Provide an explanation how the characteristics/rating variables, included in the filed rating plan, logically and intuitively relate to the risk of insurance loss (or expense) for the type of insurance product being priced. Include a discussion of the relevance each characteristic/rating variable has on consumer behavior that would lead to a difference in risk of loss (or expense).
    - C.7.f Explain how the insurer will help educate consumers to mitigate their risk.
    - C.7.h Identify sources to be used at "point of sale" to place individual risks within the matrix of rating system classifications. How can a consumer verify their own "point-of-sale" data and correct any errors?
    - C.7.j Provide the regulator with a description of how the company will respond to consumers’ inquiries about how their premium was calculated.

Re: Comments on the October 15, 2019 Exposed CAS Task Force Draft White Paper –
Best Practices – Regulatory Review of Predictive Models

Dear Ms. DeFrain:

Fair Isaac Corporation (FICO) is pleased to provide its comments on the most recently released draft white paper, Best Practices – Regulatory Review of Predictive Models.

FICO is an independent analytics provider (not a data company) that is dependent on other firms (e.g., consumer reporting agencies, insurance companies, lending institutions) to provide the appropriate and necessary data for FICO analysis and for its development of predictive models. With a focus on innovation that effectively rewards all parties – insurers, lenders, and consumers alike – FICO is recognized as the pioneer in developing the algorithms and underlying analytics used to produce credit scores, credit-based insurance scores, and other risk management scores. FICO fully understands and respects the value of regulatory scrutiny and the need for regulatory flexibility to help ensure that consumers continue to benefit from these scores by enjoying quick, fair access to credit and greater access to more affordable insurance. In previous years, access to affordable insurance involved a lengthy decision process based, in some cases, on subjective and inconsistent underwriting and pricing factors.

In 1993, FICO introduced the first commercially available credit-based insurance scores to US insurers as an additional risk segmentation factor that could be used in their private passenger auto and home insurance underwriting and pricing programs. On behalf of several hundred FICO® Insurance Score clients, over these past 25 years, FICO has met with state departments of insurance and has testified before dozens of state legislative committees. Our goal in each of these interactions was to provide support for our clients’ continued use of FICO Insurance Scores by answering all appropriate regulatory questions to the best of our ability and by offering as much insight into FICO’s proprietary modeling analytics and technologies as possible, while still protecting our intellectual property.

For nearly two decades, in support of successful rate filings throughout the nation by our FICO® Insurance Score clients, FICO has provided model documentation—specific consumer credit characteristics, attributes and weights for the filed model—as well as reason code/factor definitions, and a general discussion of our model development process to all requesting departments of insurance...
able to provide the necessary protections. In addition, FICO has modified its insurance score models as required by those states with specific statutory or regulatory mandates. FICO also offers an insurance score educational website (insurancescores.fico.com) that has been accessed by consumers, regulators, legislators, insurers, agents and other interested parties throughout the nation for a more thorough understanding of FICO’s credit-based insurance scores, the insurance industry’s use of our insurance scores, and general credit management tips.

It remains our hope that home and auto insurers using credit-based insurance scores as one factor in their underwriting and pricing programs will continue to receive filing approvals, just as they have in virtually every state in the nation for the past two decades. The use of credit-based insurance scores should be allowed to continue unabated – grandfathered, as it were - under current regulatory review processes such that such long-standing use of credit by virtually every insurer would not be negatively impacted by the undue burdens proposed by the October 15, 2019 CAS TF draft white paper. State regulatory authorities want to ensure a fair playing field that allows all insurers, not just a few at the top, the opportunity to compete effectively and appropriately for their constituents’ business. The industry’s use of credit-based insurance scores that have been approved for over two decades should not be overshadowed by a newly proposed predictive model review approach that may force market participants such as FICO to withdraw their scores from use and may lead to premium increases for the majority of consumers.

Quite concerning is the fact that in recent months and weeks both Maine and Washington have apparently chosen to “jump the gun” on the traditional NAIC decision-making process. The following blog highlights the problem this is creating for effective industry competition and consumer pricing benefits - https://www.insurancejournal.com/blogs/right-street/2019/10/27/546717.htm.

As was stated in the conclusion of the FTC’s 2007 report – “Credit-Based Insurance Scores: Impacts on Consumers of Automobile Insurance” –

“…..credit-based insurance scores are effective predictors of risk under automobile insurance policies. Using scores is likely to make the price of insurance conform more closely to the risk of loss that consumers pose.....”

Industry studies have shown that the same conclusion could be drawn with respect to homeowner insurance, as well.

Having shared a bit of FICO’s background and our FICO® Insurance Score client support strategies that we certainly hope to continue, the remainder of our comments will focus on our Scores business model and the negative implications the recommendations within the draft white paper will have on FICO’s Scores business. More importantly, if the proposed predictive model review positions remain in place with respect to time-tested, regularly reviewed and approved credit-based insurance scores, there will be significant negative impact seen by virtually all auto and home insurance companies and the vast
majority of consumers – your constituents – across the nation as this key risk segmentation tool is restricted from use in rate filings.

The intellectual property underlying much of our predictive modeling and analytics technology has been developed by FICO data scientists over the past six decades. This development work has taken an enormous amount of time, money, research, know-how, and testing. Given that, however, FICO has been very transparent – sharing our models with state insurance regulators for the past two decades where appropriate protections were in place to avoid exposure of critical intellectual property.

Our goal is to continue to offer an insurance risk management tool to the benefit of the industry and to consumers alike, while still protecting the interest of our shareholders. FICO’s scoring-related trade secrets have substantial independent economic value to the company precisely because they are not generally known by others, including any potential competitors, that could unfairly obtain economic value from their disclosure or use. Forcing disclosure of these intellectual property assets would put them at risk and dissipate their value.

Given the necessary protection of FICO’s intellectual property, including its trade secrets, our belief is that the depth and breadth of the regulatory review of predictive models proposed by the draft white paper presents serious market-restriction issues for FICO, and for the hundreds of FICO® Insurance Score clients doing business in all states that allow for the industry’s significant use of credit-based insurance scores within their well-considered and comprehensive rating programs.

As mentioned previously, we believe the state regulatory practices under which FICO has supported its clients for the past two decades are appropriate and quite sufficiently protect all interests – consumers, regulators, and insurers. These scores have proven time and again over 25+ years to be highly accurate and effective in enabling insurers to more objectively and accurately price risk, while lowering premiums for the majority of consumers. As such, we believe previously approved FICO® Insurance Scores should be excluded from the draft white paper to the benefit of the industry as a whole and to the benefit of your constituents specifically.

The draft white paper’s only references to protection for the intellectual property of an independent analytics provider like FICO are too vague to offer any real protection. The proposal, as highlighted here, leaves the decision about confidentiality of a company’s intellectual property and trade secrets entirely within the discretion of each state regulator.

1. The fourth Key Regulatory Principle: State insurance regulators will maintain confidentiality, where appropriate, regarding predictive models.
2. Section V. CONFIDENTIALITY warns rate filers:

Insurers and regulators should be aware that a rate filing might become part of the public record. Each state determines the confidentiality of a rate filing, supplemental material to the filing, when filing information might become public, the procedure to request that filing information be held confidentially, and the procedure by which a public records request is made. It is incumbent on an insurer to be familiar with each
state’s laws regarding the confidentiality of information submitted with their rate filing.

FICO strongly supports the following comments from the National Association of Mutual Insurance Companies (NAMIC) stated in its June 28, 2019 letter to the NAIC Casualty Actuarial and Statistical (C) Task Force – “NAMIC wishes to continue to reiterate that exposing confidential and proprietary trade secrets, confidential information, and other business practices simply for accumulation of data in a rate filing, when otherwise unnecessary, is problematic for all involved. The data provided for these requirements subjects the regulator to increased Freedom of Information Act requests, subpoenas, and other types of litigation when there has been no demonstrated harm to consumers or trigger for the inquiry.”

Since FICO cannot be left in a precarious position with respect to the protection of its intellectual property, if the drafted white paper is adopted, as written, by any state without necessary trade secrets and other intellectual property protections in place, FICO may be forced to remove its FICO Insurance Score models from use by our insurance clients in that state, just as is now occurring in some “early adopter” states, creating wholly unnecessary market disruption.

As always, we look to the NAIC to do the right thing for consumers and insurers throughout the nation. We also look forward to working with the NAIC Casualty Actuarial and Statistical Task Force toward a regulatory review approach that protects the interests of all stakeholders, including the vast numbers of US consumers who benefit from the insurance industry’s continued use of credit-based insurance scores to enhance their underwriting and pricing policies based on proven risk characteristics.

Sincerely,

Lamont D. Boyd, CPCU, AIM
Insurance Industry Director, Scores

FICO Decisions

Dear Ms. DeFrain,

Insurance Services Office, Inc. (ISO) is a countrywide licensed rating/advisory organization serving the property/casualty market. We have extensive experience and expertise in the development of advisory insurance pricing tools including prospective loss costs, rating plans and predictive analytics, including related regulatory issues.

ISO appreciates the opportunity to provide comments on the Draft White Paper on Best Practices for Regulatory Review of Predictive Models as published by the CASTF in October 2019. The CASTF has addressed the bulk of ISO’s previous comments but we have a few comments.

- B.1.c addresses how validation (hold out) data is used. The GLM paper (Generalized Linear Models for Insurance Rating) that is on the Exam 8 syllabus addresses the use of hold out data. On page 39 it says “Once a final model is chosen, however, we would then go back and rebuild it using all of the data, so that the parameter estimates would be at their most credible.”

- B.3.b asks for a list of predictor variables considered but not used in the final model and the rationale for their removal. While we appreciate that this is a level 4 item we don’t see how the variables not used in a model are relevant to reviewing the filed model. This would be analogous to asking for policy wording considered but not used in a filed policy form.

- Item C.7.h does not have a level ranking.

Respectfully Submitted,

Stephen C. Clarke, CPCU
NAIC Casualty Actuarial and Statistical (C) Task Force

Re: NAMIC Comments on CASTF’s Predictive Model White Paper – October 14, 2019 Exposure

Dear Task Force Chair, Vice Chair, Task Force Members, and Other Interested Regulators,

Please accept the following remarks of the National Association of Mutual Insurance Companies (hereinafter “NAMIC”)1 on behalf of its member companies regarding the task force request for comments regarding the October 14, 2019 exposure of the latest draft of the Predictive Modeling White Paper. NAMIC wishes to thank the task force for the ability to provide additional comments on the white paper and the continuing transparency of the process as a whole.

While the task force has exhaustively attempted to review and examine all comments and submitted input concerning this endeavor, NAMIC still believes there are concerns that might override any completion of this project in the near term. NAMIC respectfully suggests there remain substantial principles that must be clearly defined and/or established before moving to any type of final product as previously mentioned in our comment letters. Further, to avoid repetitive comments from continually being reiterated we would refer the task force to NAMIC’s comment letters of January 15, 2019; June 28, 2019; and September 9, 2019. While NAMIC may refer to some of the content of those letters, please do not interpret a failure to discuss as relinquishment of concerns already posited to the task force to the extent they were not formally adopted.

As for the topic of predictive modeling broadly, NAMIC does not believe as a whitepaper the document has much description of the positive aspects of analysis of large data sets for policyholders and instead moves to anecdotal or cursory concerns. Consequently, the paper almost assumes that there are “issues” that currently exist despite any real demonstration of the same. It is genuinely believed by NAMIC and its members that large data sets provide a level of detail that promotes healthy and robust insurance products and concomitant marketplaces that benefit all stakeholders.

1NAMIC membership includes more than 1,400 member companies. The association supports regional and local mutual insurance companies on main streets across America and many of the country’s largest national insurers. NAMIC member companies write $268 billion in annual premiums. Our members account for 59 percent of homeowners, 46 percent of automobile, and 29 percent of the business insurance markets. Through our advocacy programs we promote public policy solutions that benefit NAMIC member companies and the policyholders they serve and foster greater understanding and recognition of the unique alignment of interests between management and policyholders of mutual companies.
NAMIC encourages the authors to integrate the positive aspects of large data set analytics more fully throughout the paper. Issues need not necessarily be presupposed, and they should not be presented without including the demonstrable benefits data yields. The ability, for instance, to provide outstanding customer service and products which is demanded by consumers should be further elucidated as there is existing support for these outcomes presently. Future regulators that review this document might be overly persuaded that imminent issues exist that in reality have not been manifested.

Using larger data sets is a natural evolution of the insurance paradigm. Its positive effects outweigh any perceived downside. Although prudent stakeholders plan for potentialities, many positive results from large data analytics are already present and being utilized for the benefit of the public and consumers. Because the insurance industry is so justifiably based on data – to understand the risks involved in order to better underwrite and price – the paper has a responsibility to prominently discuss the benefits to all stakeholders gained through improved efficiency, accuracy, and fairness.

As for the submitted comments and current draft of the white paper, NAMIC wants to thank the task force for accepting a number of comments NAMIC has made concerning this matter including but not limited to revisiting the level of importance definitions and assignments, discussion of a core set of information elements that should be in every filing that includes a model; adding additional sentences/paragraphs on confidentiality and regulatory duties in this regard; attempting to limit the scope of review of data sources; addressing consumer responsibility in data reporting; merging or deleting duplicative matter; clarifying in many instances definitions; adding terminology to the glossary, removal of vague terms such as “intuitive,” and “thought processes;” and revision of the wording in many paragraphs of the elements including adding NAMIC phraseology. This acknowledgment of existing concerns is greatly appreciated and applauded.

Nevertheless, and in continuation of concerns regarding more broad overarching principles concerning the implementation of this process, NAMIC must reiterate existing concerns and posit additional thought regarding the same.

**Unpromulgated Model Regulation**

NAMIC believes that due to the level of granularity and detail that is being requested in this paper which is, in some instances, unnecessary, excessive, overburdensome, and overly prescriptive without considering any demonstrated need or trigger for the regulator to request is essentially a regulation masked as a white paper. The upfront loading of data being sought not only subjects the same to unwarranted exposure, it is not necessary for the regulator to perform their respective duties in a timely and efficient, yet, legal manner. Inevitably, despite protestations to the contrary, this document as currently written will tie up regulatory discretion, encourage a slow-down in speed to market of products, stifle innovation and be utilized as a manual of necessity.

However, if it is the intention of NAIC to move forward in this regard, NAMIC would suggest this is on the wrong track and should be subjected to model regulation scrutiny and the accompanying process. It appears NAIC is attempting to adopt a national standard requiring uniformity amongst all states. Further, any state who intends to implement such standards
should go through their own rule-making process for the same to be effective. There are many items within regulatory functions that are less onerous or detailed that have gone through this process. Throughout the paper the term guidance is utilized. Additionally, there are too many ramifications concerning this paper including the confidential and proprietary nature of the data subject to exposure that the appropriate process should be followed to ensure maximum input and protection of the scope and concerns that are being and have been previously discussed.

Drafting Notes

In relation to the rule-making process concern described above, there are concerns that too many drafting notes are being lost in this process. When the intended paper is ultimately released as currently drafted, it will be devoid of many of the drafting statements made to essentially reject alterations, edits, or comment suggestions. When the paper ends up in the regulators’ purview, they will not necessarily have the benefit of this “guidance” concerning the thought processes that ultimately led to the document’s finality. These notes are a part of this process and should therefore be inclusive such as with a model regulation. Intentions, however well-meaning, can be misinterpreted when not fully explained.

Unresolved Work Streams – “Other Considerations”

It appears to be somewhat unfair to mention other topics, provide a brief discussion without any resolution, and then state that they are not covered in the paper. There could be a host of suggestions to include in this area from an industry standpoint as well such as exploring the positive aspects of predictive modeling and how it improves consumer experience in many aspects. Providing such a brief level of concern without more discussion leaves the potential for misimpressions and may cause readers/regulators to delve more closely into supposed aspirational conclusions without proper review/discussion or further input on such topics from all stakeholders. These unresolved issues include granularity of rating variables and plans, scientific mindset of open inquiry, correlation vs. causality, and data mining conflicts. We believe these topics should be left for further elucidation if and when such matters are decided to be thoroughly explored from all aspects in a transparent manner but not touched upon in such a cursory manner.

Continuing Concerns

While NAMIC provides comments as requested by the task force, we would like to reiterate that discussion should be revisited as to the necessity of this document as currently drafted. NAMIC would implore the task force to consider meaningful baseline analysis requirements that regulators need to review filings and fulfill their legal and regulatory obligations. Each regulator may always request further documentation to quell concerns. However, as currently drafted, we do not feel the same has been sufficiently curtailed. In fact, the paper has continued from its existence to require an extraordinary amount of data and responses that may not be necessary at all. There is a difference between an amount of information needed to perform the required duties of approving such filings and merely satisfying the inquisitive nature of a reviewer. We believe the document encourages delay and continual demand for explanatory conferences that while
important to address legitimate concerns should not be the rule but the exception. This paper is requiring each regulator to be a data modeler and then opine on the actual resultant product which in many instances deviates from traditional legal duties of a regulator. Additionally, NAMIC believes there is terminology that is open to interpretation such as “rational,” that will create confusion and delay.

In closing, NAMIC again wants to thank the task force for the ability to respond to its well-intended and open process. We look forward to providing continued input in regard to this endeavor. However, due to the existing concerns, NAMIC would suggest that there are too many unresolved matters to move forward with finalization in Austin, Texas.

Sincerely,

Andrew Pauley, CPCU
Government Affairs Counsel
National Association of Mutual Insurance Companies (NAMIC)
Dear Ms. DeFrain,

I write you as director of finance, insurance and trade policy at the R Street Institute, a nonprofit, nonpartisan public policy research organization (“think tank”). Our mission is to engage in policy research and outreach to promote free markets and limited, effective government. Since our founding in 2012, R Street has had a successful history of research into public policy regarding the business of insurance. Our most notable contribution in this space has been producing our annual Insurance Regulation Report Card, whose eighth edition will be published in early December.

R Street is not engaged as an insurance underwriter, data firm or model provider. Our thoughts on the Task Force’s Predictive Model White Paper are solely our own, grounded in the principles of limited, effective and efficient government. With that said, we would like to share some of our concerns with this exposed white paper.

While framed as a simple “best practices” document focused on generalized linear models (GLM) deployed in the personal auto and homeowners lines of business, the white paper’s scope clearly goes far beyond that. It proposes new rating standards that do not reflect any existing state actuarial review process for rating plans filed with a GLM. In some places, it even suggests that such standards be applied to other, and possibly even all, model types. Of particular concern is that the white paper in several places recommends states require the collection of information that could breach confidentiality, trade secrets and long-established Actuarial Standards of Practice (ASOPs).

Among the problematic recommendations are the paper’s various instructions concerning raw data, which it defines as “data before scrubbing, transformation etc. takes place.” Regulators should, the paper notes, “review the geographic scope and geographic exposure distribution of the raw data for relevance to the state where the model is filed” as well as “ask for aggregated data... that allows the regulator to focus on the univariate distributions and compare raw data to adjusted/binned/transformed/etc. data.”

The goal appears to be to allow regulators to reproduce a model’s outputs, rather than simply review those outputs. But submitting raw data could pose security risks and may violate contractual obligations.
with third parties. Our view is that, as a general heuristic, regulators should temper their desire to know everything that goes on inside the proverbial “black box” and instead put the appropriate focus on what comes out of it; that is, focus on rates, not the models that produced them.

The confidentiality concerns extend beyond raw data and to the models themselves. The paper has been amended to better recognize the need for confidentiality protections, but it continues to entrust regulators to determine where it is “appropriate” to guard intellectual property and trade secrets. Third-party vendors can only fiscally justify their significant investment in proprietary algorithms if they are granted certainty that such work product will be protected. Without that certainty, few new vendors will come to the market and existing models could be withdrawn. In either case, the effect would be to stifle innovation.

Needless to say, a withdrawal of existing GLMs would cause significant market disruption. State departments of insurance have been deploying well-established review processes for GLMs for years. The results have been vibrant and competitive insurance markets. As R Street has demonstrated in its annual Insurance Regulation Report Card,¹ no state currently has either a personal auto or homeowners insurance market with a Herfindahl-Hirschman Index (HHI) score that would indicate it is highly concentrated. In our forthcoming edition, we find only Alaska, Louisiana and New York had moderately concentrated auto insurance markets in 2018 and only Alaska had a moderately concentrated homeowners market.

This is a marked difference from the situation that prevailed through the 1980s, when some states saw as much as half of all auto insurance consumers shunted into residual market mechanisms. By contrast, according to the Automobile Insurance Plans Service Office (AIPSO), as of 2018, residual markets accounted for less than 0.1% of the market in 34 of the 50 states. Just four states—Maryland, Massachusetts, Rhode Island and North Carolina—have residual markets that account for more than 1% of auto insurance policies. This greatly improved ability of insurers to segment, classify and price risk effectively can be traced directly to the emergence of dynamic models like credit-based insurance scores.

Regulators should be very cautious before adopting any changes that could reverse those victories. To its credit, this updated version of the exposed draft does acknowledge a central weakness at the heart of the project, which is the degree to which regulators are expected to ask “the modeler to go beyond correlation and document their basic, causal understanding of how variables used in a model or rating plan are related to risk.” As the white paper notes, this approach significantly exceeds the requirements established in ASOP No. 12. It is, of course, reasonable to require model predictions to bear some resemblance to the subject being modeled, but causality is notorious difficult to prove, and the standards raised here could make the practice of modeling itself untenable.

What also should be noted is the irony that the white paper would recommend that regulators insist upon filings that prove not only the credibility, but the causal nature of modeling assumptions, when the Task Force itself has not begun to credibly demonstrate that such radical shifts in the rate-filing approval process would better serve markets or consumers.

Indeed, given the decades-long record for competitive insurance markets, there simply is no good reason to risk widespread market disruption via unprecedented information requests. Any best practices around regulation of predictive modeling should begin by determining what information is truly “essential” to ensure that rates are sufficient and neither excessive nor unfairly discriminatory.

Draft: 12/17/19

Surplus Lines (C) Task Force
Austin, Texas
December 7, 2019

The Surplus Lines (C) Task Force met in Austin, TX, Dec. 7, 2019. The following Task Force members participated: James J. Donelon, Chair, and Stewart Guerin (LA); Al Redmer Jr., Vice Chair (MD); Lori K. Wing-Heier, represented by Michael Ricker (AK); Michael Conway represented by Rolf Kaumann (CO); Colin M. Hayashida represented by Paul Yuen (HA); Robert H. Muriel represented by Patrick Hyde (IL); Nancy G. Atkins represented by John Melvin (KY); Mike Causey represented by Fred Fuller (NC); Marlene Caride represented by Philip Gennace (NJ); Glen Mulready represented by Buddy Combs (OK); Elizabeth Kelleher Dwyer represented by Beth Vollucci (RI); Raymond G. Farmer represented by Lee Hill (SC); Larry Deiter represented by Johanna Nickelson (SD); Mike Kreidler represented by Jeff Baughman (WA); James A. Dodrill represented by Greg Elam (WV); and Jeff Rude represented by Donna Stewart (WY). Also participating was: Scott Greenberg (AZ); and Robert Wake (ME).

1. **Adopted its Summer National Meeting Minutes**

   Mr. Fuller made a motion, seconded by Commissioner Redmer, to adopt the Task Force’s Aug. 3 minutes (*see NAIC Proceedings – Summer 2019, Surplus Lines (C) Task Force*). The motion passed unanimously.

2. **Adopted the Report of the Surplus Lines (C) Working Group**

   Mr. Guerin reported that the Surplus Lines (C) Working Group met Sep. 26 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.

   During the conference call, the Working Group heard a summary of five applications for admission to the *Quarterly Listing of Alien Insurers*. All five of the applying companies were discussed, and four companies were admitted to the Oct. 1 edition of the listing.

   Ms. Stewart made a motion, seconded by Commissioner Redmer, to adopt the report of the Surplus Lines (C) Working Group. The motion passed unanimously.

3. **Heard Comments on an Exposure of a Blanks Proposal Regarding Home State Direct Premiums Written**

   Commissioner Donelon summarized the background on a blanks proposal to add a new column to Schedule T within the Property/Casualty (P/C) financial blank. Specifically, this new section would provide Home State direct premiums written. The blanks proposal was exposed for a 45-day public comment period ending Oct. 10. During the exposure period, comment letters were received from three interested parties.

   Commissioner Donelon said the overall intent of the proposal is to provide a means for insurance departments to arrive at an estimate of surplus lines premium tax dollars due to their states by applying the state surplus lines tax rate to the direct premiums written as would be reported on a home state basis. He said there is a general understanding that this is not a perfect solution to the surplus lines tax reconciliation issues experienced by several state insurance departments. He added that the proposal does provide the states with a starting point to begin the process of tax reconciliation. This issue came to the Task Force’s attention due to inquiries received by NAIC staff from state insurance departments seeking assistance in surplus lines tax reconciliation.

   Commissioner Donelon invited Task Force members to provide comments.

   Ms. Nickelson said the difference between home state premium and risk state premium makes it difficult to tie back to one another. She said it would be helpful if brokers and companies would report on a home state basis as it would benefit audit practices.

   Commissioner Redmer said he sees only an incremental benefit from implementing this approach, and he believes that the burden placed on the industry would not prove worthwhile. He suggested fine tuning the approach.

   David Kodama (American Property Casualty Insurance Association—APCIA) said a key concern from his comment letter related to the precedent, which would be set by using the financial statements to impose a responsibility on surplus lines insurance companies, that is not a statutory duty.
Brady Kelley (Wholesale & Specialty Insurance Association—WSIA) said he would like a reasonable method of estimating premium tax, but he thinks that the proposal may be an imperfect solution, as the company versus broker reporting will never match. He said driving this type of change in the industry would likely be troublesome. He said an alternative solution that is more reasonable may be developed with additional time.

Mr. Kodama said this proposal would not only place obligations on the insurance industry, but it would also require a commitment of additional resources from state insurance regulators at state insurance departments to review the policy level detail. He is unsure whether an actual benefit would be achieved. He said that the APCIA would remain committed to finding an alternative solution.

Ms. Nickelson said that receiving the home state premium on Schedule T would allow state insurance regulators a premium amount to compare to broker reported premium, as both would be prepared on the same basis.

Mr. Kodama said the broker is the regulated entity in the surplus lines transaction, and theirs is the statutory duty to bill, collect and remit premium taxes. He said the proposal attempts to add the insurance companies as a third party to the transaction.

Commissioner Donelon clarified that the proposal attempts to impose a statutory obligation on surplus lines insurance companies that are unregulated in all the states except for their state of domicile, while licensed surplus lines brokers are the regulated entities.

Mr. Wake said he is unsure why company reporting cannot be consistent with broker reporting since federal law provides a definition for identifying home state premium. He said the laws in his state require brokers to pay the tax and insurance companies to do thorough business reporting. He said the tax collecting authority in Maine, separate from the insurance department, has said receiving the home state premium would provide a definite benefit.

Mr. Kelley said that although it would be possible for companies to collect home state premium data, it would be difficult to accurately compare to broker reported data.

Mr. Kodama said that home state identification is not a straightforward process; and to assure consistency, new process rules would need to be created.

Commissioner Donelon said if there is inconsistency in identifying a home state, it points to a need for new rules or a model law for brokers.

Ms. Stewart added that state insurance regulators have updated their systems, statutes and procedures to recognize a home state, but many insurance companies have not.

Mr. Kelley said that the distinction of home state is not a concern of surplus lines carriers, as it does not influence risk underwriting.

Dan Maher (Excess Line Association of New York—ELANY) said surplus lines brokers have the legal duty to identify the home state, and should there be a disagreement in that identification with the company or another state, that would affect the ability to perfectly reconcile a broker versus company home state premium reporting.

Commissioner Donelon said that situations in which such disagreements occur are isolated, and the inability to have a perfect process should not prevent the creation of a tool that would allow for a more accurate accounting of premium taxes.

Ms. Nickelson said she recognizes that a perfect reconciliation between company and broker reporting will never be possible because of report timing and other factors. However, she said that it would provide a starting point for accessing whether additional investigation is necessary.

Mr. Kodama said the federal Nonadmitted and Reinsurance Reform Act of 2010 (NRRA) was written to streamline the surplus lines market, and adding additional responsibilities to surplus lines carriers would be contrary to the intent of the legislation.

Mr. Greenberg clarified that the proposal would require separate Schedule T reporting for home state premium. He noted that companies would need to discount reported premiums for the additional fees that brokers are obligated to collect, premium returns, and cancellations.

Commissioner Donelon asked whether, at this point, a vote to forward the proposal to the Blanks (E) Working Group for more discussion is appropriate.
Andy Daleo (NAIC) said that he had discussed with NAIC staff regarding the proposal, and he was told that no additional technical evaluation and discussion of the proposal would be completed by the Blanks (E) Working Group. He said that because of the technical nature of the proposal, all discussion would be limited to the Task Force.

Mr. Kodama asked whether the proposal involved a question of whether it was legal to compel insurance companies to report home state premium when it is not a statutory responsibility.

Mr. Kelley asked if there were alternative methods to assess whether accurate premiums were available, rather than imposing reporting duties on insurance companies that will have dramatic changes on current reporting requirements.

Commissioner Donelon said that based on the discussion, he views the proposal as a much more convoluted attempt to remedy an acknowledged problem faced by state insurance regulators. He added that the proposal is problematic and may be more burdensome to insurers than perceived, and it may not be legal. He also questioned what enforcement options would be available to the states other than the state of domicile to enforce compliance on nonadmitted carriers.

Commissioner Donelon asked if a postponement would be appropriate due to the amount of time spent on this issue.

Commissioner Redmer made a motion, seconded by Mr. Hill, to postpone a decision on the blanks proposal until the Task Force’s meeting at the 2020 Spring National Meeting. The motion passed unanimously.

4. **Heard an Update on its Referral to the Producer Licensing (D) Task Force**

Commissioner Donelon introduced Tim Mullen (NAIC) to provide an update on a referral from this Task Force to the Producer Licensing (D) Task Force regarding suggested modifications to the Producer Licensing Handbook to accommodate the adopted Guideline on Nonadmitted Accident and Health Coverages (#1860).

Mr. Mullen said the Producer Licensing (D) Task Force had discussed this referral at several meetings, and it had exposed the issue for comment in October. He said 11 letters were received with two primary concerns. The first concern was that the members of Producer Licensing (D) Task Force did not understand the scope of the accident & health (A&H) market in their states. The second concern was that existing state laws would not provide for the modifications to the Uniform Licensing Standards (ULS).

Mr. Mullen said that the ULS was adopted shortly after the adoption of the Producer Licensing Model Act (#218). The ULS provides for a high level of authority among NAIC member states, and it is not regarded as guidance, but as standards that the state market would need to develop and only then be modified. He said the Producer Licensing (D) Task Force would meet following this Task Force meeting; and although there would be additional discussion, he assumed that the referral would be premature at this time.

5. **Received Adjustments to Exempt Commercial Purchaser Minimum Qualifications**

Mr. Daleo stated that according to the directive within the Nonadmitted section of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), the minimum qualifying amounts for three categories of Exempt Commercial Purchaser requires adjustment every five years. The Dodd-Frank Act legislation does not provide guidance on how these adjustments are to be carried out. As a result, back in 2014, the Task Force determined that the September Consumer Price Index (CPI) would be used for the five-year period beginning Jan. 1.

The last adjustment the Task Force made was in September 2014 for the period beginning Jan. 1, 2015. He said within Section 527 of the Dodd-Frank Act, the qualifying amounts in subclauses (I), (II) and (IV) are to be adjusted effective “each fifth January 1 based on the CPI for all urban consumers.”

The percentage change calculation and adjusted minimum amounts for the categories are in your materials, and they reflect a 7.9% rise. At the 2024 Fall National Meeting, Mr. Daleo said a similar adjustment will be provided.

Commissioner Donelon said that a copy of the adjustments would be posted on the Task Force web page.

Having no further business, the Surplus Lines (C) Task Force adjourned.

TITLE INSURANCE (C) TASK FORCE

Title Insurance (C) Task Force Dec. 8, 2019, Minutes......................................................................................................... 8-322
Title Insurance (C) Task Force Sept. 25, 2019, Minutes (Attachment One) ................................................................. 8-326
The Title Insurance (C) Task Force met in Austin, TX, Dec. 8, 2019. The following Task Force members participated: James J. Donelon, Chair, represented by Warren Byrd (LA); David Altmaier, Vice Chair, represented by Anoush Brangaccio (FL); Lori K. Wing-Heier represented by Michael Ricker (AK); Michael Conway represented by Damion Hughes (CO); Colin M. Hayashida represented by Paul Yuen (HI); Dean L. Cameron represented by Jesse Adamson (ID); Vicki Schmidt represented by Heather Droge (KS); Al Redmer Jr. represented by Robert Baron (MD); Steve Kelley represented by Paul Hanson (MN); Chlora Lindley-Myers represented by Carrie Couch and Marjorie Thompson (MO); Mike Causey represented by Fred Fuller (NC); Bruce R. Ramge represented by Peg Jasa (NE); Marlene Caride (NJ); John G. Franchini represented by Anna Krylova (NM); Barbara D. Richardson represented by Stephanie McGee (NV); Jillian Froment represented by Angela Dingus (OH); Glen Mulready represented by Holly Mills (OK); Raymond G. Farmer represented by Lee Hill (SC); Larry Deiter represented by Frank Marnell (SD); Todd E. Kiser represented by Tracy Klausmeier and Reed Stringham (UT); Scott A. White represented by Mike Beavers (VA); and Michael S. Pieciak represented by Karen Ducharme and Kevin Gaffney (VT).

1. **Adopted its Sept. 25 and Summer National Meeting Minutes**

Commissioner Caride made a motion, seconded by Ms. Droge, to adopt the Task Force’s Sept. 25 (Attachment One) and Aug. 4 (see NAIC Proceedings – Summer 2019, Title Insurance (C) Task Force) minutes. The motion passed unanimously.

2. **Heard a Presentation on the Title Industry, Including Types of Endorsements, Market Statistics, CPL Statutes, and the Effect of Mandatory Title Insurance**

Joseph L. Petrelli Jr. (Demotech) said title insurance varies from other types of property/casualty (P/C) insurance in that it looks backwards to the effective policy date. The reporting for title insurance has not caught up with this nuance. The relative frequency of the issuance of endorsements varies markedly from endorsement to endorsement. For instance, a $35 million mansion in Los Angeles, CA, is a one- to four-family residence, while a $300 thousand beer and milk drive-thru in Akron, OH, is non-residential. Mr. Petrelli provided an overview of endorsements and their coverages.

**Endorsements include:**

- **Street Assessments (American Land Title Association [ALTA] Form 1 Series)** ensures that there are no street improvements which have resulted in a lien.
- **Zoning (ALTA Form 3 Series)** insures against an adverse final court decree, which prohibits zone-specified use.
- **Condominium Assessments Priority (ALTA Form 4 Series)** insures against several risks with respect to the condominium regime and documentation.
- **Planned Unit Development—Assessment Priority—Loan Policy (ALTA Form 5 Series)** affords coverage for charges in favor of any association of homeowners referred to in Schedule B over the lien of any insured mortgage.
- **Variable Rate (ALTA Form 6 Series)** insures a variable rate mortgage, securing a loan in which the unpaid principal balance increases as the result of the addition of unpaid interest.
- **Manufactured Housing (ALTA Form 7 Series)** may be issued with an Owner’s or Loan Policy where the land described in the policy is improved with a manufactured housing unit.
- **Environmental Protection Liens (ALTA Form 8 Series)** insure the priority of the mortgage lien against existing or subsequently recorded federal or state environmental protection liens.
- **Restrictions, Encroachments, Minerals and Loan Policy (ALTA Form 9-6 Series)** covers additional improvements that encroach upon easement areas or damage resulting from using the land surface for mineral extraction.
- **Assignment (ALTA Form 10 Series)** insures against loss resulting from: 1) failure of the referenced assignment to vest title of the insured mortgage in the insured assignee; or 2) any modification recorded prior to the endorsement date.
- **Mortgage Modification (ALTA Form 11 Series)** insures against loss from modification of the insured mortgage.
- **Aggregation (ALTA Form 12 Series)** amends Section 7 to provide that the amount of insurance available to cover liability for loss shall be the policy insurance amount aggregate.
- **Leasehold—Owner’s (ALTA Form 13 Series)** modifies the Owner’s Policy for insured leaseholder estates.
Future Advance Priority (ALTA Form 14 Series) provides coverage to a lender for loss sustained if a future advance does not have the same priority as the original mortgage.

Non-imputation—Full Equity Transfer (ALTA Form 15 Series) insures the title in the existing entity that owns the land when said owning entity has a total replacement of equity holders in a full equity transfer of the entity.

Mezzanine Financing (ALTA Form 16 Series) assigns to the mezzanine lender the right to receive payments otherwise payable to the insured under the policy.

Access and Entry—Direct (ALTA Form 17 Series) provides coverage for loss if the insured lacks both actual vehicular and pedestrian access to and from a specifically identified street.

Single Tax Parcel (ALTA Form 18 series) ensures that the land identified in the policy is a single and separate tax parcel.

Contiguity—Multiple Parcels (ALTA Form 19 Series) insures against loss if the boundaries to multiple parcels are not contiguous as described.

First Loss (ALTA Form 20 Series) provides that the insurer’s liability shall be determined without requiring the maturity of the entire indebtedness.

Location Endorsement (ALTA Form 22 Series) insures against loss from failure of an improvement.

Co-insurance—Single Policy (ALTA Form 23 Series) is a transaction where total liability is assumed by two or more co-insurers, with the liability being divided between the co-insurers from the first dollar.

Doing Business (ALTA Form 24 Series) insures a lender against loss from the invalidity of the insured mortgage lien.

Same as Survey (ALTA Form 25 Series) insures against loss from failure of the land description to match the survey.

Subdivision (ALTA Form 26 Series) ensures that the land described in the policy constitutes a lawfully created parcel.

Usury (ALTA Form 27 Series) protects the insured against loss from invalidity of the lien as a result of a final judicial determination that the loan secured by the insured mortgage is usurious.

Easement—Damage (ALTA Form 28 Series) insures against loss from damage to an existing building on the land.

Interest Rate Swap Endorsement—Direct Obligation (ALTA Form 29 Series) insures against loss from the invalidity, unenforceability, or lack of priority of the insured mortgage’s lien as security for the swap obligation.

One to Four Family Shared Appreciation Mortgage (ALTA Form 30 Series) insures against loss from the invalidity of the insured mortgage’s lien as security for the indebtedness caused by the provisions for shared appreciation.

Severable Improvements (ALTA Form 31 Series) includes certain losses and costs related to “Severable Improvements” in the calculation of loss under the policy.

Construction Loan—Loss of Priority (ALTA Form 32 Series) provides coverage to a lender for loss due to the invalidity of the insured’s mortgage lien as security for construction loan advances.

Minerals and Other Subsurface Substances—Buildings (ALTA Form 35 Series) insures against loss from enforced removal or alteration of any building from the use of the land surface for mineral extraction.

Energy Project—Leasehold/Easement—Owners (ALTA Form 36 Series) issued with an Owner’s Policy, alters certain conditions to reflect that the interest insured is a leasehold interest and adds some energy project-specific definitions.

Assignment of Rents and Leases (ALTA Form 37 Series) insures against loss sustained by the insured due to a defect in the execution of an assignment of rents or any assignment of a lessor’s interest in any lease affecting the title.

Policy Authentication (ALTA Form 39 Series) ensures that the insurer will not deny liability under the policy solely on the grounds that it was issued electronically or lacks signatures in accordance.

Tax Credit—Owner’s Policy (ALTA FORM 40 Series) includes in the loss calculation certain losses related to a “Tax Credit.”

Commercial Lender Group (ALTA Form 42 Series) insures against loss from invalidity or loss of priority of the insured lien from transfers after the date of policy.

Anti-Taint (ALTA Form 43) insures against loss from loss of priority of the insured mortgage lien as security for the indebtedness advanced on the loan.

Insured Mortgage Recording (ALTA Form 44 Series) insures against loss from failure of the insured mortgage to have been recorded in the public records.

Pari Passu Mortgage—Loan Policy (ALTA Form 45 Series) insures against loss from invalidity of the insured mortgage lien solely due to the provisions of a Pari Passu Mortgage or an Intercreditor Agreement establishing lien priority.

Option (ALTA Form 46 Series) insures against loss from: 1) a defect in the option execution resulting from forgery or incapacity of the optionor; 2) failure of the option; and 3) the option not being properly signed or witnessed.
- Partnership/LLC—Permitted Transfer Fairway insures a partnership or limited liability company (LLC) against coverage denial due to the admission/withdrawal of a partner/member in the insured partnership/LLC, respectively.
- Last Dollar provides that payments to a loan secured by the insured mortgage will not cause a proportionate reduction in the amount of insurance until the aggregate principal indebtedness is reduced to the amount of the policy.
- Subdivision assures the insured that the land described in the policy constitutes a lawfully created parcel.

Mr. Petrelli said the number of title underwriters has declined over the past decade due to a consolidation trend from 2007 to 2009. Countrywide direct written premium has rebounded to almost the historic levels seen in 2003–2006. Residential policies insure dwellings intended to occupy one to four families. Non-residential policies cover everything else. Texas was the top writer in 2018, with $2.2 billion in written direct premium or 14.7% of the market. Texas, California and Florida represented over one-third of the countrywide premium in 2018. These three states also held just under one-third of the countrywide residential policies. There are substantially more transactions and written premium on the residential side than the non-residential side. In 2018, the industry had $11.1 billion in residential written premium as compared to $3.7 billion in non-residential premium. For the same year, it also had 9.7 million residential policies as compared to 1 million non-residential policies. Premium for title insurance is a graduated dollar amount per every thousand dollars of coverage, typically subject to a minimum. Thus, the single premium typically goes up over time as the value of homes goes up.

Mr. Byrd asked if Texas mandated the seller to provide the buyer with a closing protection letter (CPL) at closing. Diane Evans (Land Title Guarantee Company of Colorado—LTGC) said it is common, but not required.

Mr. Petrelli said the Task Force has discussed the coverage of CPLs. The ultimate intent of the CPL and the coverage is to make sure that the instructions of the lender are followed to the benefit of the lender, borrower and owner. This includes the financial integrity of the process and the proper authority recording. However, the CPL is a document that is only formally filed in some states. Closing protection coverage, on the other hand, is specifically filed with and approved by the department of insurance (DOI) where it is used. It is important to recognize that some states have instituted the appropriate regulation and legislation to regulate the content, coverage and premium, if applicable.

Mr. Byrd asked if these states had indicated what the coverage needs to be by statute. Mr. Petrelli said that is indeed the case, with the states indicating what needs to be in the coverage, the minimum contents of that coverage, and the filing and amendment process (usually prior approval). Louisiana amended its law in 2009 to address minimum contents, risking appropriation of settlement funds and failure to comply with instructions, prohibit other coverage indemnifying against improper acts or omissions, affirm the insurance department’s regulation of “closing protection,” and set a single premium for risk premium. Ohio revised its code to provide for the offer of closing or settlement protection to parties. Similar to Louisiana, coverage includes theft and misappropriation of funds and failure to comply with closing instructions. Additionally, the DOI’s authority is affirmed, and other coverage indemnifying against improper acts or omissions is prohibited.

Mr. Byrd asked if there are more commercial endorsements than residential endorsements. Mr. Petrelli said there are more commercial endorsements, and their compiled statistics show that much of the premium on the commercial side comes from endorsements.

3. **Heard a Presentation on the History of CPLs**

James Gosdin (Stewart Title) said the CPL is insuring the closing of a real estate transaction. CPLs began in some form in the 1940s with the early issuance of insured closing service letters (ICLs). Use of ICLs grew in the 1960s with Lawyers Title Insurance Company providing these letters for approved attorneys. They were originally developed for commercial lending institutions to cover acts of independent title agents or approved attorneys. The primary concern of the time was misappropriation of funds. ICLs provided basic coverage against: 1) acts of fraud, theft, dishonesty or negligence in handling settlement funds or documents in connection with a closing, but only to the extent that the acts affect the status or priority of title in the real estate insured by the title insurance; and 2) failure to comply with written closing instructions of a proposed insured when agreed to by the title agency or title agent relating to title insurance coverage, but only to the extent that the acts affect the status or priority of title in real estate insured by the title insurance. It is important to remember that escrow and closing services are separate from title insurance coverage. The title insurance underwriter/agent relationship is a limited agency relationship wherein the agent is only granted the authority to act on behalf of the title insurance underwriter for the purpose of issuing title insurance commitments or policies. Although both title insurance underwriters and title agents perform closing and escrow functions, these functions are outside the limited scope of title insurance underwriter’s agency contract and relationship with the policy issuing agent.
Ms. Evans said the authorized title insurance agent is allowed by contract to issue a title insurance policy on behalf of the underwriter. Oftentimes, agents are asked by the parties of the transaction to close it (referred to as an escrow on the transaction in some states). The CPL gives the closing agent and the parties to the real estate transaction the confidence that the agent is permitted to close for the underwriter.

Mr. Byrd said the title agent is also the closing attorney for the sale in many states. He asked for clarification on if the insurer is underwriting the risk of an agent absconding with funds received from the lender. Mr. Gosdin said escrow is separate from title insurance. There is indemnity with respect to the theft of transferred funds because it ultimately affects the lien on the mortgage.

Mr. Gosdin said ALTA has standardized CPLs across the industry and currently has two versions, one for single transactions and one for multiple transactions (or blanket). It has approved revisions to its CPLs over the years, with the most recent being in 2018. Current ALTA CPL coverage requirements include: 1) the issuer is contractually obligated to issue a policy for the insured’s protection in a real estate transaction; 2) the insured is a lender secured by the title’s mortgage or a purchaser/lessee of the title; 3) aggregate of funds transmitted to the issuing agent/attorney does not exceed a specified dollar amount; and 4) the loss is caused by failure to comply with closing instructions or fraud, theft or misappropriation.

Mr. Byrd asked how the transaction would work if a buyer of one piece of property placed the land into three different LLC names with the intent of developing the land associated with each LLC at different times and for different commercial purposes. Mr. Gosdin said it would be a multiple transactions and that it was only important that the lender and title agent be the same.

Ms. Evans said CPLs are one of many tools used to assure consumers that transactions are protected against errors, omissions and cyber threats. Lenders currently request CPLs at the time of title order, rather than just prior to closing, and then verify electronically. Recent trends have seen several states pass laws and companies file CPL rates. This raises a competitive question about the issuance of CPLs for transactions involving direct operations and not just agents. The CPL fee is remitted in total to the underwriter, which does not account for the agent’s process and tracking expenses. Additionally, explaining to consumers that the CPL fee protects them against fraud from the person doing the explaining is awkward and causes confusion.

Mr. Gosdin said CPLs may be issued in all jurisdictions, except New York where it is deemed to be outside the scope of a monoline title insurer’s license and writing authority. About half of the states regulate CPLs in some form. There are three types of authorizing laws. One version states that the CPL may be issued to “a party to a transaction in which a title insurance policy will be issued” (e.g., Alabama, Arizona, Arkansas, Georgia, Louisiana, Nevada and Utah). Another version allows CPLs to be issued to the seller or buyer (or lender) (e.g., Colorado and Texas, subject to limits); to the buyer, lender or seller (e.g., Georgia); or to the buyer, borrower or lender (e.g., Georgia and Maine). The third version allows CPLs to be issued to the buyer, borrower or lender (e.g., Maine). Additionally, there are several states that have special requirements. For example, a Notice of Availability is required in Alabama, Arizona, Arkansas, Colorado, Missouri and Ohio. CPLs are issued through approved websites or through an integration with the issuing agent’s title production system. If a transaction exceeds a standard liability set forth in the CPL, issuing agents can request custom coverage for higher liability transactions. Common claims under a CPL include: 1) theft of settlement funds by the title insurance agent; 2) fraudulent flips; 3) fraudulent down payment undisclosed by title insurance agents; 4) unresolved title defects; and 5) claims under both the policy and CPL.

4. Received Compiled NAIC Information on CPLs

Mr. Byrd said the materials include a compilation of discussions from the NAIC Proceedings on CPLs and CPL-related questions (namely 58–62) from the Survey of State Insurance Laws Regarding Title Data and Title Matters, which was last updated by the Task Force in March of this year. The information serves as background materials and is also posted on the Property and Casualty Insurance (C) Committee’s web page.

Having no further business, the Title Insurance (C) Task Force adjourned.
Title Insurance (C) Task Force
Conference Call
September 25, 2019

The Title Insurance (C) Task Force met by conference call on Sept. 25, 2019. The following Task Force members participated: James J. Donelon, Chair, represented by Warren Byrd (LA); David Altmaier, Vice Chair, represented by Anoush Brangaccio (FL); Lori K. Wing-Heier represented by Joanne Bennett (AK); Michael Conway represented by Dennis Newman (CO); John F. King represented by Margaret Witten (GA); Dean L. Cameron represented by Jim Scanlon (ID); Vicki Schmidt represented by James Norman (KS); Mike Causey represented by Timothy Johnson (NC); Bruce R. Ramge represented by Matt Holman and Barbara Peterson (NE); Marlene Caride represented by Carl Sornson (NJ); John G. Franchini represented by Otis Phillips (NM); Jillian Froment represented by Michelle Brugh Rafeld (OH); Glen Mulready represented by Joel Sander (OK); Jessica Altman represented by Michael McKenney (PA); Todd E. Kiser represented by Jay Sueoka (UT); Scott A. White represented by Mike Beavers (VA); and Michael S. Pieciak represented by Karen Ducharme (VT). Also participating were: Emma Hirschhorn and Susan Stapp (CA); Holly Zhu (MI); Marianne Baker and Ronda Lee (TX); Eric Slavich (WA); and Donna Stewart (WY).

1. Discussed and Adopted its 2020 Proposed Charges

Mr. Byrd stated comments on its exposed 2020 proposed charges were due Sept. 16. Its 2020 proposed charges include disbanding the Title Insurance Financial Reporting (C) Working Group and moving its charges into the Task Force directly (proposed charge D). They also include additional charges for revising the Title Insurance Consumer Shopping Tool (proposed charge E) and evaluating the effectiveness of closing protection letters (CPLs) (proposed charge F).

Its 2020 proposed charges are as follows:

A. Monitor issues and developments occurring in the title insurance industry, and provide support and expertise to other NAIC committees, task forces and/or working groups, or outside entities, as appropriate.

B. Review and assist various regulatory bodies in combating fraudulent and/or unfair real estate settlement activities. Such efforts could include working with the Antifraud (D) Task Force and other NAIC committees, task forces and/or working groups to combat mortgage fraud and mitigating title agent defalcations through the promotion of closing protection letters (CPLs) and other remedies. Report results at each national meeting.

C. Consult with the Consumer Financial Protection Bureau (CFPB) and other agencies responsible for information, education and disclosure for mortgage lending, closing and settlement services about the role of title insurance in the real estate transaction process.

D. As necessary, consider the effectiveness of changes in financial reporting by title insurance companies and identify further improvements and clarifications to blanks, instructions, Statement of Statutory Accounting Principles (SSAPs), solvency tools and other matters. Coordinate efforts with the Statutory Accounting Principles (E) Working Group.

E. Revise the Title Insurance Consumer Shopping Tool Template to include questions and answers about title insurance-related fraud topics, including, but not limited to, CPLs and wire fraud.

F. Evaluate the effectiveness of CPLs, including, but not limited to, intent, state regulation and requirements, consumer protections offered and excluded, and potential alternatives for coverage.

a. Proposed Charge E

Brenda J. Cude (University of Georgia) and Birny Birnbaum (Center for Economic Justice—CEJ) suggested the charge regarding consumer information be expanded to include the revision of the Title Insurance Consumer Shopping Tool Template (Shopping Tool). Specifically, they suggested revisions include questions and answers about title insurance-related fraud topics, including, but not limited to, CPLs and wire fraud.

Ms. Rafeld stated it is a good suggestion to incorporate discussion on fraud topics into the Shopping Tool given the numerous related consumer complaints, especially on wire fraud.
Justin Ailes (American Land Title Association—ALTA) stated the Federal Bureau of Investigation (FBI) attributes $5 billion to business email compromise. Of that, $149 million in attributed to criminal real estate closing activities alone, affecting 11,300 victims. However, the FBI estimates this likely represents only 10% to 15% of the full criminal activity, since much is not reported. ALTA supports the incorporation of fraud topics into the Shopping Tool.

Mr. Byrd stated there seems to be a consensus to add a charge to “revise the Title Insurance Consumer Shopping Tool Template to include questions and answers about title insurance-related fraud topics, including, but not limited to, closing protection letters and wire fraud.”

b. Proposed Charge F

Andrew Liput (Secure Insight) suggested the charge regarding CPLs should be expanded to include the formation of a subgroup to evaluate whether the CPL is the most effective and appropriate manner and method to protect/cover borrowers, lenders and subsequent lienholders from risk of loss from mortgage closing negligence and fraud. This evaluation should include considering adding a new product option or replacing the CPL with an insurance policy covering consumers, lenders, future lienholders and other relevant stakeholders to a mortgage closing. This insurance policy would have the advantage of being subject to traditional insurance ratings, premium approvals, terms and conditions reviews, consumer education/opt-out requirements, and traditional risk underwriting processes. Additionally, its pricing would be as a transaction-based product commensurate with the current market for a fraud/negligence hybrid policy. Alternately, such a policy could be approved as an alternative to the CPL, with consumers choosing which type of protection they would like to purchase. He advised replacing the CPL with an insurance policy is advisable because the CPL is: 1) a form of warranty letter and not a true insurance product included in the title insurance policy; 2) not available in every state; 3) being billed to consumers as a title charge and packaged in a letter format that appears to a layperson to be a form of insurance; 4) not regulated by state insurance laws addressing claims practices, licensed sales activity and typical transparency/terms explanation/notice provisions usually found when marketing and selling insurance; 5) is not being underwritten like typical insurance policies; 6) not an optional charge to consumers, with charges from $50 to $125 per transaction in many states; and 7) does not cover all potential risk to a consumer, lender and future lienholder from negligence and intentional acts that might occur at a mortgage closing. He suggested the Task Force analyze prior discussions it had in 2008–2010 on an initiative to review the CPL to determine whether an insurance alternative made sense. Additionally, the Title Escrow Theft & Title Insurance Fraud white paper adopted by the Task Force in 2013 includes a section on CPLs that the Task Force should review again.

Mr. Byrd stated he believes this to be an important issue to look at and would fit under the Task Force’s current charges, requiring no additional charge to be developed. Additionally, he stated the Task Force should undertake the initial discussions before considering the formation of a subcommittee to examine the issue. The Task Force’s recently concluded survey of state laws related to title insurance would provide a great resource in examining how the CPL is being handled across the states. Louisiana took a positive step in 2011 when it enacted La. R.S. 22:515 of the Louisiana Insurance Code with specific revisions that brought CPLs into the title insurance arena fully.

Ms. Rafeld stated this proposal would be interesting for the Task Force to investigate. Ohio requires title agents to offer the option of a CPL to consumers. However, many consumers do not fully understand closing protections, many title agents gloss over them, and disreputable title agents are not likely to offer them at all.

Mr. Byrd stated he agrees. He stated there are only a few states that handle CPLs in the same manner as Louisiana. The Task Force should gain an understanding of how other states handle CPLs by reviewing a cross-section of information related to CPLs from the survey of state laws at the Fall National Meeting.

Ms. Rafeld stated it would also be beneficial for the Task Force to review any discussions on CPLs it has had in prior years. Mr. Byrd directed NAIC staff to include this information in the Fall National Meeting.

Jennifer Gardner (NAIC) stated that NAIC staff will provide materials at the Fall National Meeting that include questions related to CPLs, including the related statutes, from the survey of state laws that was just updated earlier this year. NAIC staff will also compile discussions on CPLs from old Proceedings they have collected for review at the Fall National Meeting.

Mr. Ailes stated ALTA supports looking into CPLs and would be available to present on the history of CPLs at the Fall National Meeting. He noted charge B and charge F both address CPLs.
Mr. Byrd stated while they do cross over, charge F provides more focus on how CPLs should be addressed by the Task Force. He stated there seems to be a consensus that the Task Force should address this issue at the Task Force level, as drafted in the 2020 proposed charges.

c. Proposed Additional Considerations

Mr. Philips suggested the Task Force consider the following: 1) whether searches and title plants should remain a requirement to issue title insurance when it is issued based on algorithms and if they need to be under separate regulations; 2) if CPLs should be available upon request to everyone; 3) if insurers should back-up CPLs and hold the agents liable for error; 4) the relation of bonding and error and omissions; 5) best practice requirements; 6) assessing the current accountability of financial fiduciary responsibilities; and 7) if the Consumer Financial Protection Bureau (CFPB) enforces the federal Real Estate Settlement Procedures Act (RESPA).

Mr. Byrd stated these questions are important for the Task Force to consider and can be done within its currently drafted charges. The Task Force should consider discussing the CFPB’s potential enforcement of RESPA at the Fall National Meeting. Mr. Philips supported this approach.

Ms. Rafeld made a motion, seconded by Mr. McKenney, to adopt the Task Force’s 2020 proposed charges. The motion passed unanimously.

2. Discussed Other Matters

Mr. Byrd stated it should be noted that the Federal Trade Commission (FTC) issued an administrative complaint on Sept. 6 seeking to block the merger of Fidelity National Financial and Stewart Information Services. The FTC alleged the merger would substantially reduce competition in state markets for commercial title insurance underwriting. On Sept. 10, Fidelity National Financial stated it would pay $50 million to Stewart Information Services to terminate their $1.2 million merger.

Ms. Rafeld stated that Ohio had a situation recently where a legitimate title company’s web presence was hijacked by a Mexican timeshare resale scam operation. They were made aware of it after a consumer went to the legitimate company’s location and was told they did not know anything. Other states are experiencing similar activity. The scam looks credible because it hijacks the corporate identity of a legitimate company from corporate registration information at the Secretary of State’s Office by altering the names of corporate officers.

Having no further business, the Title Insurance (C) Task Force adjourned.
WORKERS’ COMPENSATION (C) TASK FORCE

Workers’ Compensation (C) Task Force Dec. 9, 2019, Minutes

© 2019 National Association of Insurance Commissioners
The Workers’ Compensation (C) Task Force met in Austin, TX, Dec. 9, 2019. The following Task Force members participated:

John G. Franchini, Chair, and Robert Doucette (NM); Lori K. Wing-Heier, Vice Chair, and Michael Ricker (AK); Allen W. Kerr represented by William Lacy (AR); Keith Schraad represented by Erin Klug (AZ); Andrew N. Mais represented by George Bradrner (CT); Stephen C. Taylor represented by Philip Barlow (DC); Trinidad Navarro represented by Fleur McKendell (DE); David Altmaier represented by Sandra Starnes (FL); John F. King represented by Steve Manders (GA); Colin M. Hayashida represented by Kathleen Nakasone (HI); Doug Ommen represented by Travis Grassel (IA); Robert H. Muriel represented by Mike Chrysler (IL); Vicki Schmidt represented by Heather Droge (KS); James J. Donelon represented by Warren Byrd (LA); Eric A. Cioppa represented by Sandra Darby (ME); Steve Kelley represented by Tammy Lohmann (MN); Chlora Lindley-Myers and LeAnn Cox (MO); Mike Causey represented by Fred Fuller (NC); Glen Mulready represented by Cuc Nguyen (OK); Andrew Stolfi represented by TK Keen (OR); Jessica Altman represented by Shannen Logue (PA); Elizabeth Kelleher Dwyer represented by Beth Vollucci (RI); Raymond G. Farmer represented by Joe Cregan (SC); Larry Deiter represented by Frank Maxwell (SD); Hodgen Mainda represented by Brian Hoffmeister (TN); Todd E. Kiser represented by Tracy Klausmeier and Reed Stringham (UT); Michael S. Pieciak represented by Kevin Gaffney (VT); and James A. Dodrill represented by Tonya Gillespie (WV). Also participating was: Peg Brown (CO).

1. **Adopted its Summer National Meeting Minutes**

Mr. Ricker made a motion, seconded by Ms. Nguyen, to adopt the Task Force’s Aug. 5 minutes (see NAIC Proceedings – Summer 2019, Workers’ Compensation (C) Task Force). The motion passed unanimously.

2. **Adopted the NAIC/IAIABC Joint (C) Working Group Report and Exposed its Draft Document on the Changing Workforce**

Mr. Byrd said the NAIC/IAIABC Joint (C) Working Group has been drafting a document regarding workers’ compensation policy and the changing workforce. The document, the *Workers’ Compensation Policy and the Changing Workforce*, includes a section regarding the changing relationships with work. This section includes information regarding transformations across the workforce and the workplace over the past century. The section addresses connections to work, including: 1) employee or independent contractor issues; 2) alternative work arrangements; 3) platform work; 4) estimates of alternative or independent work; and 5) the impact of change.

The second section of the paper discusses determining employee status and includes information regarding: 1) the federal standard; 2) state standards; 3) state employment classification; 4) state employment tests; 5) marketplace contractors; and 6) the impact of legal uncertainty of employment classification.

The final section of the paper addresses alternative coverage models, including: 1) independent contractor coverage; 2) the black car fund; 3) occupational accident insurance; 4) disability insurance; and 5) portable benefits. This section further discusses policy questions and considerations.

Mr. Byrd made a motion, seconded by Ms. Darby, to adopt the Working Group’s report, as well as to expose the draft document on the changing workforce for a 30-day comment period ending Jan. 6, 2020. The motion passed unanimously.

3. **Heard a Presentation on the Official Disability Guidelines and Formularies**

Ken Eichler (MCG Health) and Ron Bordelon (Attorney and Consultant and former Texas Commissioner of Workers’ Compensation) presented to the Task Force on official disability guidelines and formularies. Mr. Bordelon said the Texas Workers’ Compensation Commission underwent many reforms during his time as commissioner. He said there is sometimes a misunderstanding regarding how a treatment guideline and a formulary are meant to be used. A treatment guideline and a formulary are not meant to be an establishment of standards of care for medicine. They are also not a directive or dictate to medical providers and doctors on how to treat a patient. A treatment guideline and a pharmacy formulary are an accumulation of evidence that simply guide a medical treatment provider, an insurance carrier or review agents on the best and appropriate evidence that suggests a treatment or a restriction is recommended or not recommended. If a treatment or restriction is recommended, the treating physician can simply provide that treatment or prescription without fear of losing a dispute because the treatment or prescription is not medically appropriate; the evidence in the treatment guideline or in the formulary will
suggest that it is in fact recommended and appropriate. If the treatment or prescription is not recommended, the treatment or prescription will need to be preauthorized; if the doctor and insurer agree through the preauthorization process that the treatment or prescription should be provided, it will be provided without fear of dispute or reprisal. There is a dispute process available if the preauthorization is rejected.

Mr. Eichler said in workers’ compensation, an injured worker is entitled to any treatment that can be medically documented as necessary, regardless of cost. The premise is that unbiased treatment guidelines and formularies can unite payers, providers and employers to confidently and effectively return employees to health. The Centers for Disease Control and Prevention (CDC) also supports treatment guidelines, and treatment guidelines serve as tools for transparency.

One of the differences between group health and workers’ compensation is that with group health, you get what you pay for, meaning prescription benefits are cost-based and are defined and limited. With workers’ compensation, any treatment that is medically appropriate and causally related should be covered, including prescription benefits.

Mr. Bordelon said workers’ compensation is not mandatory in Texas. Texas had a number of reforms, and the treatment guidelines and formularies have by far had the largest quantifiable effect. Results of the treatment guidelines and formularies include costs decreasing, disputes being resolved more quickly, premium reduction (65%) and more employers purchasing workers’ compensation insurance.

Mr. Bordelon said the state of Texas surveys injured workers at various points in their recovery process. Survey results have shown that injured workers’ satisfaction and return to work rates have improved. The state of Texas released a report, Analysis of Injured Employee Outcomes After the Texas Pharmacy Closed Formulary, in October, which provides more detailed information regarding the survey. The report also includes information regarding treatment guidelines.

Implementation of the treatment guidelines and formularies resulted in the total number of claims receiving not-recommended drugs decreasing by 67%. The total number of not-recommended prescriptions decreased by 77%, and the total cost associated with those not-recommended drugs decreased by almost 80%. Additionally, the total number of claims receiving high levels of not-recommended opioids decreased by almost 15,000 from before the formulary went into effect to less than 500. Texas worked very closely with the medical community, resulting in a positive outcome.

The average return to work rate increased following the implementation of treatment guidelines and formularies. Additionally, mental and physical functioning scores improved. The time it took for an injured worker to access care decreased, as well as physicians being paid more quickly. The number of disputes decreased by approximately 40% and were due to a number of factors; however, most of it was due to the transparent process.

The surveys conducted from injured employees following the use of treatment guidelines and formularies indicated that almost 80% of injured employees said they had no problem receiving their prescriptions or medical treatment. An additional 10% of injured workers said problems encountered were minor. The overall result indicated that almost 90% of injured employees are reporting that they have no problem, or very little problem, obtaining the treatment or prescriptions they need.

Mr. Eichler said MCG Health provides a formulary free of charge, and there are nearly 360 different drugs listed on the formulary. The formulary lists drugs that are preferred drugs that do not require preauthorization. Preauthorization in most states takes anywhere between 24 hours to three days. The formulary allows drugs to be sorted by class so the treating physician can sort by drug class, generic prescription name or by brand name. The formulary can be used by the treating physician to educate the patient.

Mr. Eichler said National Council of Insurance Legislators (NCOIL) has been working on a formulary model law for the past year. He said the model formulary bill is being sponsored by U.S. Rep. Matt Lehman (R-IN), who is the president-elect of NCOIL. Mr. Lehman also sponsored the formulary bill in Indiana. Mr. Eichler said Indiana has a limited number of workers’ compensation staff members, so Indiana asked for a prescriptive bill. This bill rolled out with no issues. The opioid prescriptions in Indiana precluded employees from going back to work; employees were unable to go back to work if they tested positive or were prescribed any of these medications.

Mr. Eichler said the International Association of Industrial Accident Boards and Commissions (IAIABC) conducted a return to work study. This study found that incrementally, the longer a person is out of work, the less chance there is the person will return to work. The sooner a person gets treatment for an injury, the sooner he or she is able to get back to work. Additionally, many states have caps on benefits. Therefore, injured workers will become part of other state systems once they hit the workers’ compensation cap.
Mr. Eichler said data-driven medicine is a benchmark, and there has been a decrease over the past few years of evidence-based studies. This makes it important to consider data-driven medicine. In the age of technology, published studies are not necessarily needed to get information out. With quality data, as long as the data is clarified and verified, data is worth measuring.

It is important to note that more than 700,000 people died from opioid overdoses from 1999 to 2017. 68% of the 70,000 drugs involved in an overdose death involved an opioid. There are 130 Americans that die every day from an opioid overdose. There are several states where there are more prescriptions being written than there are citizens in the state. The formula for success is the appropriate diagnosis plus timely care plus appropriate care plus expedited dispute resolution minus injured workers’ frustrations equals improved outcomes.

Mr. Eichler said there needs to be a focus on functional restoration as part of a treatment option and to focus on function. Isolated treatments and medication are a small but costly and potentially dangerous piece of the treatment plan puzzle and need to be looked at like a picture within a picture, meaning the specific drug versus the alternative drug options versus the alternatives to drugs. The return to the activities of daily living (ADLs) and work are often among the best therapies.

Transparency in the rollout process is important, and stakeholder education is key to the success. Additionally, states need to compare formulary models with states having common traits.

Mr. Bordelon said results across the country are positive with respect to formularies. Mr. Byrd asked what the top arguments received for parties not wanting to adopt treatment guidelines or formularies. Mr. Bordelon said misinformation or misunderstanding of the purposes of the treatment guidelines and formularies cause the most resistance. The arguments generally say using treatment guidelines or formularies are like cookbook medicine or telling treating physicians how to treat their patients. Sometimes physicians feel the treatment guidelines and formularies get in between the physician and the patient relationship. Mr. Bordelon said this is a misunderstanding because the treatment guidelines and formularies are informing a doctor how a claim is going to be reviewed when it is being processed for payment. It is also showing the physician this process up front before the doctor provides the treatment. A doctor can still choose the way he or she wants to treat. However, the guidelines state that it is not recommended and so the carrier and the utilization review agent will be looking at this anyway, and the guidelines are providing the doctor this information. It is meant to be a tool for the doctor as well as the guideline do not tell the physician how to treat the patient; rather, it is a procedural tool.

Having no further business, the Workers’ Compensation (C) Task Force adjourned.
MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE

Privacy Protections (D) Working Group Dec. 8, 2019, Minutes (Attachment Ten) ................................................................. 9-151

© 2019 National Association of Insurance Commissioners
The Market Regulation and Consumer Affairs (D) Committee met in Austin, TX, Dec. 9, 2019. The following Committee members participated: Chlora Lindley-Myers, Chair (MO); Allen W. Kerr, Vice Chair, and Russ Galbraith (AR); Trinidad Navarro represented by Frank Pyle (DE); John F. King represented by Martin Sullivan (GA); Colin M. Hayashida represented by Paul Yuen (HI); Stephen W. Robertson represented by Holly Williams-Lambert (IN); Vicki Schmidt (KS); Anita G. Fox represented by Michele Riddering (MI); Mike Causey represented by Tracy Biehn (NC); Barbara D. Richardson (NV); Kent Sullivan and Ignatius Wheeler (TX); Todd E. Kiser (UT); and Mike Kreidler and John Haworth (WA). Also participating were: Maria Ailor (AZ); Cynthia Amann (MO); Timothy Schott (ME); Bruce R. Ramge (NE); Jessica Altman (PA) and Larry Deiter (SD).

1. **Adopted its Oct. 1 Minutes**

   The Committee met Oct. 1 and took the following action: 1) adopted its Summer National Meeting minutes; and 2) appointed the Privacy Protections (D) Working Group.

   Commissioner Kerr made a motion, seconded by Mr. Haworth, to adopt the Committee’s Oct. 1 minutes (Attachment One). The motion passed unanimously.

2. **Adopted its 2020 Proposed Charges**

   Director Lindley-Myers said the Committee’s 2020 proposed charges are similar to its 2019 charges, except for some revisions to the charges of the Market Conduct Annual Statement Blanks (D) Working Group. She said the first charge of Working Group was changed to reflect that the review of Market Conduct Annual Statement (MCAS) data elements should be for the lines of business in effect longer than three years, rather than for all lines. Additionally, the reference to completing work by June 1 was deleted to reflect that the Working Group’s tasks are completed as necessary and appropriate.

   Commissioner Kerr made a motion, seconded by Mr. Haworth, to adopt the Committee’s 2020 proposed charges (see NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Two). The motion passed unanimously.

3. **Adopted the Workers’ Compensation In-Force SDR and the Travel Insurance Examination Standards**

   Director Ramge said the Market Conduct Examination Standards (D) Working Group met Aug. 29 and adopted a new workers’ compensation in-force standardized data request (SDR) that will be incorporated into the reference documents of the Market Regulation Handbook.

   Director Ramge said the Working Group also met Oct. 9 and adopted new travel insurance examination standards (for inclusion in the Market Regulation Handbook). He said the examination standards were discussed during the Working Group’s May 30, June 18, July 18, Aug. 29 and Oct. 9 conference calls. He said the Working Group’s revisions to the exposure draft were drafted with input from the U.S. Travel Insurance Association (UStiA) and the American Property Casualty Insurance Association (APCIA).

   Commissioner Richardson made a motion, seconded by Commissioner Schmidt, to adopt the workers’ compensation in-force SDR (Attachment Two) and the travel insurance examination standards (Attachment Three). The motion passed unanimously.

4. **Adopted Revisions to the State Licensing Handbook and the 2019 Continuing Education Reciprocity Agreement**

   Director Deiter said the Producer Licensing (D) Task Force met Dec. 7 and adopted revisions to the State Licensing Handbook (Handbook), which was revised to be consistent with established NAIC policy on producer licensing. He said the Producer Licensing Uniformity (D) Working Group began its review of the Handbook in April 2019. He said the Working Group met six times from August through October and adopted the proposed revisions to the Handbook during its Oct. 30 conference call. The Producer Licensing (D) Task Force subsequently adopted the proposed revisions to the Handbook during its Dec. 7 meeting at the Fall National Meeting.
Director Deiter said the more significant changes to the Handbook are as follows: 1) exact language from the *Producer Licensing Model Act* (#218) was added where appropriate; 2) the appendix to the Handbook will be removed from future hardcopy versions and will be posted as a separate electronic appendix on the NAIC website; 3) the Handbook was updated to provide a link to the NAIC webpage where the most current information about the National Association of Registered Agents and Brokers (NARAB) is posted because of ongoing uncertainty about when NARAB will be formed; and 4) additional clarification was added to the licensing reciprocity examples in Chapter 4 of the Handbook.

Director Deiter said the Producer Licensing (D) Task Force also adopted the 2019 Continuing Education Reciprocity Agreement (CER Agreement) during its Dec. 7 meeting at the Fall National Meeting. He said the Uniform Education (D) Working Group drafted the CER Agreement throughout 2019 and adopted the agreement during its Oct. 31 conference call.

Director Deiter said the CER Agreement supports the use of the Uniform Continuing Education Reciprocity Course Filing Form (CER Form). He said continuing education (CE) providers may use the CER Form to streamline the course-approval process in multiple states. He noted that through the reciprocal approval process, the CE provider’s home state conducts a substantive review of the CE course; therefore, non-resident states do not need to perform a similar review for a course previously approved by the home state.

Commissioner Schmidt made a motion, seconded by Commissioner Kerr, to adopt the proposed revisions to the *State Licensing Handbook* (Attachment Four) and the 2019 CER Agreement (Attachment Five). The motion passed unanimously.

5. **Adopted its Task Force and Working Group Reports**

Director Lindley-Myers said the reports of the Committee’s task forces and working groups were circulated for this meeting. She said the Market Actions (D) Working Group met Dec. 7 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings. She asked if any of the chairs of the task forces or working groups, committee members, or interested parties would like to make any comments on the reports.

a. **Advisory Organization Examination Oversight (D) Working Group**

Mr. Schott said the Advisory Organization Examination Oversight (D) Working Group issued a survey to collaborative action designees (CADs), market analysis chiefs (MACs) and market chief examiners (MCEs) concerning whether to add three new advisory organizations to be overseen by the Working Group for regularly scheduled examinations. The Working Group meets in regulator-to-regulator session pursuant to paragraph 3 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings. He encouraged any state that has not yet responded to do so.

b. **Market Analysis Procedures (D) Working Group**

Mr. Haworth said the Market Analysis Procedures (D) Working Group met Dec. 8 and adopted its Nov. 21 minutes. He said that during the Nov. 21 conference call, the Working Group: 1) agreed to not include fraternals in the MCAS until a formal proposal is received for their inclusion; 2) adopted “other health” as a line of business in the MCAS; and 3) discussed a uniform process for addressing MCAS extension requests.

Mr. Haworth said that during the Working Group’s Dec. 8 meeting, it continued its discussion of adding “other health” to the MCAS and assured all interested parties that the development of the blank will be done by the Market Conduct Annual Statement Blanks (D) Working Group, and it will include state insurance regulators, carriers and consumer representatives. The goal, as always, will be to develop a blank with all the parameters and data elements fully and clearly defined.

Mr. Haworth said the Working Group also heard an update on the short-term limited duration (STLD) data call. He said a reminder letter was sent to all companies Dec. 5 reminding them of the Dec. 13 due date. He said only one filing has been received as of Dec. 7. He said the Working Group encouraged companies to complete their filings or notify NAIC staff that they do not write STLD.

Mr. Haworth said the Working Group also began work revising the MCAS Best Practices Guide and other MCAS materials in order to build consistency in how the states handle extension and waiver requests.

Finally, Mr. Haworth said the Working Group discussed its plans for meeting its 2020 proposed charges.
Samantha Burns (America’s Health Insurance Plans—AHIP) said the development of the “other health” MCAS blank will be a significant undertaking. She said AHIP has concerns about the scope of the blank and the definitions. She said even though the Market Conduct Annual Statement Blanks (D) Working Group is charged with developing the blank, it is the purview of the Market Analysis Procedures (D) Working Group to adopt the line of business before it is created. She said the Working Group should better define what is expected to be included as “other health.” By not being specific, the Working Group is setting a bad precedent.

Ms. Burns said the discussion about the other health line of business was tabled in 2018 and the Working Group focused on STLD. When discussions were renewed in November, the line of business was adopted without any discussion about what products are included in “other health.” Ms. Burns noted that packaged indemnity products were mentioned as being included in other health, but they are not packaged or sold at the carrier level. She said the MCAS would not be the best avenue for obtaining data on packaged indemnity plans. Ms. Burns said more discussion is needed, and she asked the Committee to not adopt other health as the next line of business and instruct the Working Group to continue its discussions about what is included in the line of business.

Chuck Piacentini (American Council of Life Insurers—ACLI) agreed with Ms. Burns. He said “other health” is not a common term, and if the intent is to obtain information on plans other than major medical plans, the Working Group should be more specific. There may be better methods for getting data for different types of products.

Birny Birnbaum (Center for Economic Justice—CEJ) said there was an extended discussion during the Working Group’s Dec. 8 meeting about the process for developing an MCAS blank. He said the Market Analysis Procedures (D) Working Group is charged with identifying the need for a new MCAS line of business. The Working Group did that. He said the Market Conduct Annual Statement Blanks (D) Working Group will then consider the coverages and data that will be collected in the MCAS blank. He said if the Market Conduct Annual Statement Blanks (D) Working Group decides that packaged indemnity products should not be collected in an MCAS blank, it can decide not to include them. As an example, he said the Market Conduct Annual Statement Blanks (D) Working Group eliminated coverages from both the flood insurance and lender-placed insurance MCAS blanks. He said the industry is encouraged to take part in the development of the MCAS blanks.

Commissioner Kerr agreed with Mr. Birnbaum. He said state insurance regulators need to know what is being sold in the marketplace.

Commissioner Altman also agreed and said the Working Groups should move forward with the creation of the “other health” MCAS blank.

Commissioner Richardson made a motion, seconded by Commissioner Kerr, to adopt the report of the Market Analysis Procedures (D) Working Group (Attachment Six), including the adoption of “other health” as the next line of business in the MCAS. The motion passed unanimously.

c. Market Conduct Annual Statement Blanks (D) Working Group

Ms. Ailor said the Market Conduct Annual Statement Blanks (D) Working Group did not meet at the Fall National Meeting. She said the Working Group met Oct. 23 and Nov. 21 via conference call.

Ms. Ailor said that during its Oct. 23 conference call, the Working Group heard an update on the Life and Annuity MCAS Data Element Review Project, and it decided to issue a survey to the states to determine if any data elements need to be added, deleted or revised for the homeowners and auto lines of business in the MCAS.

Ms. Ailor said that during its Nov. 21 conference call, the Working Group made two changes to due dates. She said the first change involves situations where the MCAS due date occurs on a weekend or federal holiday. She said that in that instance, the Working Group agreed that the due date will be moved to the next business day.

Ms. Ailor said the second change is to the due date for the health MCAS. She said the Working Group extended the health MCAS filing due date to June 30 for data to be reported in 2020, 2021 and 2022. She said that after three years, the due date will automatically revert to April 30 unless health companies request a re-evaluation. She said that because this is an extension of the April 30 due date, the Working Group received assurances from industry that companies would not request extensions beyond the June 30 due date except for extraordinary circumstances.
Joe Zolecki (Blue Cross Blue Shield Association—BCBSA) thanked Ms. Ailor, Ms. Dingus and the Working Group for overseeing a collaborative process to address issues raised by the health insurance industry regarding its MCAS filings.

d. Privacy Protections (D) Working Group

Ms. Amann said the Privacy Protections (D) Working Group met Dec. 8. She said the Working Group was appointed Oct. 1, noting that she is chair Ron Kreiter (OK) is vice chair. She said the Working Group is in the process of building the membership, as well as the distribution lists for interested state insurance regulators and interested parties. She the Working Group will work closely with the other working groups in this arena, such as the Artificial Intelligence (EX) Working Group and the Accelerated Underwriting (A) Working Group. She noted that each of these working groups has its unique set of issues that, nevertheless, require coordination.

Ms. Amann said that during its Dec. 8 meeting, the Working Group discussed its proposed workplan to meet every six weeks via conference call to keep on track so it can accomplish its charges by the deadline established. She said the Working Group also heard a presentation by Jennifer McAdam (NAIC) in which she reviewed: 1) the NAIC Insurance Information and Privacy Protection Model Act (#670); 2) the Privacy of Consumer Financial and Health Information Regulation (#672); 3) the European Union’s General Data Protection Regulation (GDPR); 4) the California Consumer Privacy Act (CCPA); and 5) the states’ data privacy legislation.

Ms. Amann said the Working Group also received an update from Kendall Cotton (MT) on current legislative activities in Montana. Additionally, the Working Group discussed comments received from the CEJ, the National Association of Mutual Insurance Companies (NAMIC) and the APCIA.

David Snyder (APCIA) said the Antifraud (D) Task Force summary report in the Committee materials references a BuzzFeed article bringing awareness to a potential threat claiming that an alliance between insurers and law enforcement is working against innocent consumers. He said the report says the Task Force decided to review and provide an additional update at the 2020 Spring National Meeting. He said the APCIA challenges the validity of the article and asked to participate in the review of the allegations in the article. He noted that the insurer antifraud efforts and law enforcement have cooperated to effectively protect consumers, not harm them.

Mr. Pyle said he is a member of the Antifraud (D) Task Force, and although he cannot speak for the chair, he is certain the APCIA’s participation would be welcomed by the Task Force.

Mr. Birnbaum said the CEJ is responsible for forwarding the article to the Task Force and the Market Regulation and Consumer Affairs (D) Committee chairs to illustrate the need to review the algorithms being used in antifraud efforts to be sure that they are not biased in some way. He said it was not meant to cast any aspersion of the work of antifraud entities.

Commissioner Kerr made a motion, seconded by Commissioner Kreidler, to adopt the reports of the Committee’s task forces and working groups: the Antifraud (D) Task Force, the Market Information Systems (D) Task Force; the Producer Licensing (D) Task Force; the Advisory Organization Examination Oversight (D) Working Group; the Market Actions (D) Working Group; the Market Analysis Procedures (D) Working Group; the Market Conduct Annual Statement Blanks (D) Working Group (Attachment Seven); the Market Conduct Examination Standards (D) Working Group (Attachment Eight); the Market Regulation Certification (D) Working Group (Attachment Nine); and the Privacy Protections (D) Working Group (Attachment Ten). The motion passed unanimously.

6. Discussed Updates to Best Practices and Guidelines for Consumer Information Disclosures

Director Lindley-Myers said the review of the Best Practices and Guidelines for Consumer Information Disclosures is in response to a request from the NAIC funded consumer representatives for the NAIC membership to consider best practices for consumer information disclosures. She said that in response to requests for comments prior to the Summer National Meeting and again in October, the Committee received extensive, suggested revisions from the NAIC funded consumer representatives. She said no state insurance regulators or other interested parties submitted comments.

Mr. Birnbaum said the consumer representatives provided proposed revisions to the Best Practices and Guidelines for Consumer Information Disclosures to incorporate new information on how consumers learn to make consumers disclosures more effective. He said it also highlights the work of state insurance regulators to get consumer engagement, notably Commissioner Sullivan and the Texas Department of Insurance. He said the consumer representative asks that the proposed revisions be exposed for another comment period to add additional information.
7. **Heard a Presentation on Mental Health Parity Examinations**

Joel Ario (Manatt Health), Daniel Blaney-Koen (American Medical Association—AMA) and Tim Clement (American Psychiatric Association—APA) gave a presentation to the Committee on the urgency of the state insurance departments to use their mental health and substance use disorder (MH/SUD) parity oversight authority to address the opioid epidemic in the U.S.

Mr. Blaney-Koen provided recommendations including: 1) removing prior authorization regulations for medication-assisted treatment (MAT); 2) increased oversight and enforcement of MH/SUD parity laws; 3) ensuring network adequacy for those needing treatment for opioid use disorder; 4) enhancing access to comprehensive, multi-disciplinary multimodal pain care; 5) expanding access to naloxone; and 6) evaluating the results to identify what is working, and building on the most successful efforts.

Mr. Clement said when conducting a market conduct examination regarding MH/SUD parity, examiners should not assume that a company is necessarily complying with the easiest parts of the federal Mental Health Parity and Addiction Equity Act (MHPAEA), such as defining MH/SUD, classifying benefits, or using quantitative treatment limitations and financial requirements. He said many carriers are setting non-quantitative treatment limitations, such as requiring prior authorizations on all formulations of naloxone, all inpatient MH/SUD benefits, and blanket exclusions on benefits. He also said examiners should look to see if the carrier has more stringent written processes, evidentiary standards, and triggers for utilization review. Finally, he encouraged examiners to look closely at claims to see if the company’s utilization review approvals for MH/SUD are more limited, whether MH/SUD requests are more often sent for peer review, and whether the peer reviewers are adhering to medical necessity criteria and level of care guidelines.

Commissioner Kreidler asked whether the use of blanket prior authorizations is more of an issue when a consumer changes carriers or plans, rather than when a consumer has a continuity of coverage.

Mr. Blaney-Koen said it is more common when switching plans, but it occurs in both instances.

Commissioner Kreidler also recommended that a review of the thorough study being conducted by the Washington State Office of the Insurance Commissioner to evaluate consumer access to services for MH/SUD in state-regulated individual, small group, and large group health insurance plans.

Commissioner Sullivan asked if there are tools available to consumers to help them inquire of a company about their MH/SUD parity and compare companies.

Mr. Clement said there are some resources, but they are written at too high a level. He asked Commissioner Sullivan and other members of the Committee to contact him for more information on consumer tools that are available.

Mr. Ario said some of the state insurance department websites contain useful consumer assistance.

Having no further business, the Market Regulation and Consumer Affairs (D) Committee adjourned.
The Market Regulation and Consumer Affairs (D) Committee met via conference call Oct. 1, 2019. The following Committee members participated: Chlora Lindley-Myers, Chair (MO); Allen W. Kerr, Vice Chair (AR); Trinidad Navarro represented by Frank Pyle (DE); Stephen W. Robertson represented by Holly Lambert (IN); Vicki Schmidt (KS); Anita G. Fox represented by Michele Riddering (MI); Barbara D. Richardson represented by Nick Stosic (NV); Mike Causey represented by Tracy Biehn (NC); Kent Sullivan represented by Ignatius Wheeler (TX); Todd E. Kiser represented by Tanji Northrup (UT); Michael S. Piesciak represented by Christina Rouleau (VT); and Mike Kreidler and John Haworth (WA). Also participating were: Pam Pugsley (NH); Mark McLeod (NY); Angela Dingus and Don Layson (OH); Ron Kreiter and Joel Sander (OK); Rebecca Nichols (VA); Tom Whitener (WV); and Sue Ezalarab and Jo LeDuc (WI).

1. **Adopted its Summer National Meeting Minutes**

Commissioner Kerr made a motion, seconded by Ms. Biehn, to adopt the Committee’s Aug. 5 minutes (see NAIC Proceedings – Summer 2019, Market Regulation and Consumer Affairs (D) Committee). The motion passed unanimously.

2. **Discussed the New Charge on State Insurance Privacy Protections and Appointed a New Working Group**

Director Lindley-Myers said the Innovation and Technology (EX) Task Force has a charge to monitor developments in the area of cybersecurity. During the Summer National Meeting, the Task Force received an update on cybersecurity and data privacy. Director Lindley-Myers said that cybersecurity is focused on information technology (IT) system security and that data privacy is about what insurance companies do with consumer data and how they communicate their activities to consumers. After receiving updates from NAIC staff regarding federal activity on data privacy and NAIC model laws addressing data privacy, Director Lindley-Myers said the Task Force decided it would be appropriate for the Market Regulation and Consumer Affairs (D) Committee to pursue further investigation into state insurance privacy protections and to evaluate where there may be gaps or omissions that may require some type of additional work. The Task Force referred the following charge to the Committee: “Review state insurance privacy protections regarding the collection, use and disclosure of information gathered in connection with insurance transactions, and make recommended changes, as needed, to certain NAIC models, such as the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672), by the 2020 Summer National Meeting.” Director Lindley-Myers said the Executive (EX) Committee and Plenary adopted this charge at the Summer National Meeting.

Director Lindley-Myers asked Jennifer McAdam (NAIC) to provide an update on the research NAIC legal staff have completed on state data privacy initiatives and the NAIC models that govern data privacy. Ms. McAdam said the NAIC has three model laws governing data privacy: 1) the Health Information Privacy Model Act (#55); 2) the NAIC Insurance Information and Privacy Protection Model Act (#670); and 3) the Privacy of Consumer Financial and Health Information Regulation (#672).

Ms. McAdam said Model #670 was the first NAIC model and was adopted in 1980. To put this into historical context, she said the federal Fair Credit Reporting Act was enacted in 1970, and this Act addresses the fairness, accuracy and privacy of the personal information contained in the files of the credit reporting agencies. Then the federal Privacy Act was enacted in 1974. This Act governs the collection, maintenance, use and dissemination of personally identifiable information about individuals that is maintained in systems of records by federal agencies. The NAIC drafted this model when those two federal laws were in place. Ms. McAdam said Model #670 sets standards for the collection, use and disclosure of information gathered in connection with insurance transactions. It requires insurers to provide notice that alerts the individual of the insurer’s information practices. It gives consumers the right to request that an insurer: 1) give access to recorded personal information; 2) disclose the identity of the third parties to whom the information disclosed the information; 3) provide the source of the collected information; 4) correct and amend the collected information; 5) amend the personal information; and 6) delete the collected personal information. Seventeen jurisdictions have adopted the model.

Ms. McAdam said the NAIC adopted Model #55 following the federal enactment of the Health Insurance Portability and Accountability Act (HIPAA) of 1996. Model #55 sets standards to protect health information from unauthorized collection, use and disclosure by requiring carriers to establish procedures for the treatment of all health information.

© 2019 National Association of Insurance Commissioners
Following HIPAA, Ms. McAdam said the federal Gramm-Leach-Bliley Act (GLBA) was enacted in 1999. The GLBA imposes privacy and security standards on financial institutions and directs state insurance commissioners to adopt certain data privacy and data security regulations. In response to this, Ms. McAdam said the NAIC adopted both Model #672 and the Standards for Safeguarding Customer Information Model Regulation (#673). Model #672 is about consumer privacy, and Model #673 is about data security and was used as the basis for drafting the Insurance Data Security Model Law (#668).

Ms. McAdam said data privacy and data security are often conflated, but the focus of the regulations is different. Data security regulations focus on how the information that a business collects is protected from unauthorized access once it is in the possession of the business. On the other hand, data privacy regulations focus on the consumer’s right to privacy and how companies are allowed to collect and then disclose the personal information of a consumer.

Ms. McAdam said Model #672 was intended to be enforced via a state’s unfair trade practices law. Model #672: 1) requires that insurers provide notice to consumers about its privacy policies and practices; 2) describes the conditions under which a licensee may disclose nonpublic personal health information and nonpublic personal financial information about individuals to affiliates and nonaffiliated third parties; and 3) provides methods for individuals to prevent a licensee from disclosing that information—“opt out” for financial info and “opt in” for health info. The provisions governing protection of health information were taken directly from Model #55 and the health information privacy regulations promulgated by the U.S. Department of Health and Human Services (HHS) pursuant to HIPAA. The provisions governing protection of financial information are based on privacy regulations promulgated by federal banking agencies. Ms. McAdam said the key difference between the treatment of financial information and health information is that insurers must give consumers the right to “opt out” of the disclosure or sharing of their financial information, but insurers must obtain explicit consumer authorization to “opt in” prior to sharing health information. Every state has a version of this model regulation, with 19 jurisdictions having only adopted the provision regarding financial information and not the one regarding health information.

Ms. McAdam said data privacy started receiving more attention when the European Union’s (EU) General Data Protection Regulation (GDPR) became effective in May 2018. Although it is an EU law, Ms. McAdam said it affects many U.S. companies if they collect data from citizens of the EU over the internet. It requires companies to obtain explicit consent from consumers to collect their data (“opt in”), with an explanation of how the data will be used. It also contains standards for safeguarding the data. Ms. McAdam said California then became the first U.S. state to adopt an “omnibus” privacy law, which imposes broad obligations on businesses to provide consumers with transparency and control of their personal data. The California Consumer Privacy Act (CCPA) was signed into law in June 2018, amended in September 2018 and will become effective in 2020. The CCPA gives consumers the right to request that a business: 1) disclose the categories and specific pieces of personal information collected; 2) disclose categories of sources the information was collected from; 3) disclose the business purpose for collecting the information; 4) disclose the categories of third parties with whom the information is shared and the specific pieces of personal information that were shared; and 4) delete any personal information. Ms. McAdam said the CCPA also gives consumers the right to opt-out of their information being disclosed to third parties and has separate opt-in requirements for minors. In addition, there is a nondiscrimination provision that prohibits companies from discriminating against consumers who exercise their rights under the law. Finally, there is a full exemption for protected health information governed by HIPAA and a partial exemption for information subject to the GLBA.

Ms. McAdam said several states introduced similar data privacy bills during the 2019 legislative session. There were 24 states considering some type of data privacy legislation, but only three states enacted laws: Illinois, Maine and Nevada. Illinois’ law bans insurers from using genetic testing information to set health or accident rates. Maine’s law bans internet providers from selling personal information without consent. Nevada’s law requires businesses to allow consumers to opt out of any sale of their personal information. There are exemptions for entities subject to the GLBA and HIPAA. Ms. McAdam said NAIC staff created a chart listing general state data privacy laws applicable to all businesses and not specific to insurers. The chart lists: 1) the entity responsible for enforcing the law; 2) what exemptions there are, if any; 3) whether it is “opt-in” or “opt-out”; and 4) what consumer notice requirements there are.

Director Lindley-Myers asked for the circulation of the research to the Market Regulation and Consumer Affairs (D) Committee and interested parties. She asked if the Committee should address the charge or if a new Privacy Protections (D) Working Group should be appointed. Mr. Haworth questioned if the discussion would include the use of electronic disclosures. Director Lindley-Myers said this would be included but provided an example of Missouri consumers wanting hard copies of insurance documents. Because of this, she suggested the models should address both the use of the electronic and hard copy disclosures. Mr. Haworth said he supports the formation of a Working Group and suggested a more detailed list of issues to be addressed. Peter Kochenburger (University of Connecticut School of Law) suggested the working group discuss best practices for disclosures and the limitations of disclosures for consumer protection.
Commissioner Schmidt made a motion, seconded by Ms. Northrup, to appoint a Privacy Protections (D) Working Group. The motion passed. Director Lindley-Myers said Cynthia Amann (MO) would chair the Working Group unless there is interest from another state.

Birny Birnbaum (Center for Economic Justice—CEJ) said insurers are relying more on consumer, nonfinancial data from third-party vendors. In addition, Mr. Birnbaum said insurers are using consumer data generated through telematics and health monitoring devices. Mr. Birnbaum said the NAIC models should address the concept of consumer digital rights, such as whether a consumer has provided insurers the permission to have access and use this type of data.

Director Lindley-Myers said NAIC research would be shared with all parties by the end of the week and asked Mr. Birnbaum to submit written comments for consideration of the workplan. Director Lindley-Myers asked state insurance regulators to contact Tim Mullen (NAIC) if they want to be a member of the Privacy Protections (D) Working Group and asked all parties to submit comments regarding the issues that should be addressed. Director Lindley-Myers said a workplan would then be shared with the Committee by Oct. 25 for its review.

3. **Discussed Other Matters**

Director Lindley-Myers said the Committee will consider the adoption of its 2020 proposed charges in November. Draft charges will be circulated to Committee members in October and then circulated to all interested parties.

Director Lindley-Myers said the Committee will discuss the proposed revisions to the *Best Practices and Guidelines for Consumer Information Disclosures*, which were adopted in 2012. The NAIC consumer representatives provided a document with extensive revisions at the Summer National Meeting. Director Lindley-Myers asked for the submission of additional comments by Oct. 15 and said she would work with NAIC staff to revise the document for further discussion by the Committee in November.

Director Lindley-Myers said the Committee will also consider the adoption of Market Conduct Annual Statement (MCAS) disability ratios and the workers’ compensation in force standardized data request during its November conference call.

Director Lindley-Myers said Mr. Birnbaum submitted an Aug. 15, 2019, BuzzFeed article titled “Insurance Companies Are Paying Cops to Investigate Their Own Customers.” She said the article sets forth allegations of insurers’ unfair and abusive anti-fraud investigations against consumers in the settlement of homeowners and automobile claims. Mr. Birnbaum asked the Committee to review the role of third-party databases and algorithms use for claim settlement and antifraud and the revised antifraud model proposed by the Coalition Against Insurance Fraud (CAIF), which was recently adopted by National Council of Insurance Legislators (NCOIL). Director Lindley-Myers said that the Antifraud (D) Task Force would review these issues and that some preliminary thoughts would likely be shared with the Committee during its November conference call.

Having no further business, the Market Regulation and Consumer Affairs (D) Committee adjourned.
**POLICY IN FORCE STANDARDIZED DATA REQUEST**  
Property & Casualty Line of Business  
Workers Compensation

**Contents:** This file should be downloaded from company system(s) and contain one record for each workers compensation policy issued in [applicable state] which was in force at any time during the examination period.

For any fields where there are multiple entries, please repeat field as necessary.

**Uses:** Data will be used to determine if the company follows appropriate procedures with respect to the issuance and/or termination of workers compensation policies in [applicable state] within the scope of the examination.

Chapter 21A—Conducting the Property and Casualty Travel Insurance Examination

IMPORTANT NOTE:
The standards set forth in this chapter are based on established procedures and/or NAIC models, not on the laws and regulations of any specific jurisdiction. This handbook is a guide to assist examiners in the examination process. Since it is based on NAIC models, use of the handbook should be adapted to reflect each state’s own laws and regulations with appropriate consideration for any bulletins, audit procedures, examination scope and the priorities of examination. Further important information on this and how to use this handbook is included in Chapter 1—Introduction.

This chapter provides a format for conducting travel insurance company examinations. Procedures for conducting property/casualty insurance company examinations and other types of specialized examinations—such as third-party administrators and surplus lines brokers—may be found in separate chapters.

The examination of travel insurance operations may involve any review of one or a combination of the following business areas:

A. Marketing and Sales
B. Producer Licensing
C. Policyholder Service
D. Underwriting and Rating
E. Claims

When conducting an examination that reviews these areas, there are essential tests that should be completed. The tests are applied to determine if the company is meeting standards. Some standards may not be applicable to all jurisdictions. The standards may suggest other areas of review that may be appropriate on an individual state basis.
A. Marketing and Sales

Use the standards for this business area that are listed in Chapter 20—General Examination Standards, Chapter 21—Conducting the Property and Casualty Examination, and the standards set forth below.

1. Tests and Standards

The marketing and sales review includes, but is not limited to, the following standards addressing various aspects of the marketing and sales function. The sequence of the standards listed here does not indicate priority of the standard.
STANDARDS
MARKETING AND SALES

Standard 1

Ensure the advertising and/or sales materials being utilized by the limited lines travel insurance producer and travel insurer (i) provide the information required by Section 4(C) of the model law [or state equivalent], (ii) are consistent with the travel protection plan being offered, (iii) are not deceptive or misleading, and (iv) otherwise comply with state law.

Apply to: All property and casualty travel insurance products

Priority: Essential

Documents to be Reviewed

_____ Applicable statutes, rules and regulations

_____ The travel insurer’s approved brochures or other written materials used in offering or disseminating travel insurance to prospective purchasers.

_____ Policy forms and fulfillment materials are accurately represented in advertising and sales materials

_____ Producers’ own advertising and sales materials, including travel retailers under the direction of a limited lines travel insurance producer

NAIC Model References

Travel Insurance Model Act (#632)
Unfair Trade Practices Act (#880)

Review Procedures and Criteria

Examiners should request a listing of all marketing materials and select a sample according to the jurisdiction’s sampling protocols. If the examiner is unable to obtain the requested information from the travel insurer or the limited lines travel insurance producer, the examiner may request the information directly from the travel retailer.

Review specimen or actual copies of all of the brochures or other written materials in conjunction with the appropriate policy forms, endorsements, policies, rate filings, and certificates of insurance.

Materials should not:

• Misrepresent policy benefits, advantages or conditions by failing to disclose limitations, exclusions or reductions, or use terms or expressions that are misleading or ambiguous; and

• Make false, deceptive or misleading statements or representations with respect to any person, company or organization
Materials should:

- Clearly disclose name and address of insurer;
- If using a trade name, disclose the name of the insurer, an insurance group designation, name of the parent company of the insurer, name of a particular division of the insurer, service mark, slogan, symbol or other device or reference, if the advertisement would have the capacity or tendency to mislead or deceive as to the true identity of the insurer, or create the impression that a company other than the insurer would have any responsibility for the financial obligation under a policy;
- Clearly describe the type of policy being advertised;
- Indicate that the travel protection plan being marketed is insurance; and
- Comply with applicable statutes, rules and regulations.

Determine if the travel insurer approves producer sales materials and advertising.

*Travel Insurance Model Act (#632)*
*Unfair Trade Practices Act (#880)*

Review Procedures and Criteria

Examiners should request information from the travel insurer or limited lines travel insurance producer that is sufficient to determine compliance with this standard. If the examiner is unable to obtain the information from the travel insurer or the limited lines travel insurance producer, the examiner may request the information directly from the travel retailer.
STANDARDS
MARKETING AND SALES

Standard 7
The limited lines travel insurance producer has an adequate training program in place, containing
instructions on the types of insurance offered, ethical sales practices, and required consumer disclosures,
that is required of each employee and authorized representative of the travel retailer whose duties shall
include offering and disseminating travel insurance.

Apply to: All property and casualty travel insurance products

Priority: Essential

Documents to be Reviewed

_____ Applicable statutes, rules and regulations

_____ Limited lines travel insurance producer’s policies and procedures, including the standards for product training

_____ Limited lines travel insurance producer’s instruction/training files and training materials for travel retailer employees and authorized representatives offering or disseminating travel insurance

NAIC Model References

Travel Insurance Model Act (#632)

Review Procedures and Criteria

Review policies and procedures to ensure that the limited lines travel insurance producer has adequate procedures in place to provide instruction and training that is appropriate for and consistent with the type(s) of travel insurance being offered. Review the limited lines travel insurance producer’s procedures used to inform travel retailers of the regulated entity’s standards for travel insurance product training and of applicable state statutes, rules or regulations regarding the solicitation and sale of travel insurance products.

Determine that the limited lines travel insurance producer has adequate procedures in place to verify that the employees and authorized representatives of a travel retailer have completed necessary training, as required by applicable state statutes, rules and regulations, before allowing the employees and authorized representatives to sell travel insurance for that insurer.

Contact other regulators that may have conducted a recent review of the training standards.

Determine if the training materials are appropriate and accurately reflect the coverage provided by the travel insurance product.

Review regulated entity’s records to determine if, when and how training occurred prior to the employees or authorized representatives of a travel retailer’s recommendation of a travel insurance product.
Standard 8
The Limited lines travel insurance producer has designated a “Designated Responsible Producer.”

The policies issued contain benefits for which a claim and claim payment could have been made.

Apply to: All property and casualty travel insurance products

Priority: Essential

Documents to be Reviewed

____ Applicable statutes, rules and regulations
____ Review policy forms and endorsements
____ Claim files
____ Claim complaint records
____ Claim procedure/underwriting manuals

NAIC Model References

Travel Insurance Model Act (#632)
Unfair Trade Practices Act (#880)
Unfair Property/Casualty Claims Settlement Practices Act (#902)

Review Procedures and Criteria

To determine compliance with this requirement, examiners will (i) review a sample set of policies to confirm that benefits are being offered under the policies issued and a payment for a claim could have been made; and (ii) review a sample of denied claims to confirm that the denials were appropriate based on the policy language.
Chapter 1

Modern Producer Licensing

The process for licensing insurance producers has had numerous phases. The first NAIC model on this subject was the NAIC Agent and Broker Model. The next phase was the NAIC Single License Procedure Model. Although development of the newest model began in the late 1990s, it was Congress’ passage of the GLBA in 1999 that caused the NAIC to speed the development of the PLMA Producer Licensing Model Act.

Uniformity Provisions of the Gramm Leach Bliley Act Adopted in 1999

In order to achieve the licensing uniformity standards of GLBA, a majority of states had to satisfy all five of the following requirements:

1. Adoption of uniform criteria regarding a producer’s integrity, personal qualifications, education, training and experience, which must include qualification and training on suitability of products for a prospective customer.
2. Adoption of uniform continuing education (CE) requirements.
3. Adoption of uniform ethics course requirements in conjunction with other CE requirements.
4. Adoption of uniform suitability requirements based on financial information submitted by the customer.
5. Elimination of nonresident requirements posing any limitation or condition because of the place of the producer’s residence or business, except for countersignature requirements.

One of the major provisions of the GLBA was a provision to create NARAB. While much progress was made to improve uniformity and streamline nonresident producer licensing, the NAIC endorsed the provisions of Terrorism Risk Insurance Program Reauthorization Act of 2015 (Public Law 107-297), which modified NARAB. These provisions, commonly referred to as NARAB II, were signed by President Barack Obama on Jan. 12, 2015. At the time of the publication of this handbook, NARAB has not been completed for additional updated information please see the NAIC link. (https://content.naic.org/cipr_topics/topic_producer_licensing.htm)

NARAB II is intended to streamline the nonresident producer licensing process while preserving the states’ ability to protect consumers and regulate producer conduct. NARAB II does not create a federal insurance regulator but establishes a nonprofit corporation, known as NARAB, controlled by its board of directors. The stated purpose of the legislation is to provide “a mechanism through which licensing, CE, and other nonresident insurance producer qualification requirements and conditions may be adopted and applied on a multistate basis without affecting the laws, rules and regulations, and preserving the rights of a state pertaining to certain specific producer-related conduct.”

NARAB is to be governed by a 13-member governing board comprised of eight state insurance commissioners and five insurance industry representatives subject to presidential appointment and Senate confirmation. NARAB, acting through its board of directors, will establish membership criteria through which producers can obtain nonresident authority to sell, solicit or negotiate insurance. Satisfaction of membership criteria means a producer can sell, solicit or negotiate insurance (and perform incidental activities) in any state for which a producer pays that state’s licensing fee for any line(s) of insurance for which the producer is licensed in the home state. NARAB membership is not mandatory for producers.

The law preserves the rights of a state pertaining to resident licensing and CE, supervision and enforcement of conduct, and disciplinary actions for nonresident producers, and leaves intact a state’s full range of authorities for resident producers. The PLMA also includes important disclosures to the states, addresses business entity licensing and protects state revenues.

Through the efforts of the Producer Licensing (DEX) Task Force and the its Producer Licensing (EX) Working Group, the NAIC monitors state compliance with reciprocity guidelines. The NAIC also set a goal to create uniform licensing practices. The Producer Licensing (DEX) Working Group Task Force has adopted a number of Uniform Licensing Standards and guidelines, and continues to strive toward a more efficient licensing system among the states.
National Insurance Producer Registry

The NAIC has long advocated for increased use of technology to streamline licensing processes. In 1996, the NAIC collaborated with industry to create the Insurance Regulatory Information Network (IRIN) as a nonprofit affiliate of the NAIC. In 1999, the organization changed its name to the National Insurance Producer Registry (NIPR). The purpose of the NIPR is to work with the states and the NAIC to re-engineer, streamline and make more uniform the producer licensing process for the benefit of insurance regulators, the insurance industry and consumers. The NIPR worked with the NAIC to develop and implement: 1) the Producer Database (PDB), which includes licensing information from 50 states, the District of Columbia and three U.S. territories, utilized by the industry for licensing and appointment information; and 2) the State Producer Licensing Database (SPLD) for use by insurance regulators.

States use the NIPR to link state insurance departments with the entities they regulate. Applicants and licensees can transmit licensing applications, insurers can transmit appointments and terminations, and both can transmit other information to insurance regulators in multiple states, thereby creating electronic solutions that are easy and efficient to use by the states and industry.

Additionally, using the subsequent launch of the Attachment Warehouse, an applicant who answers “yes” to any background question on the NAIC Uniform application can submit the required supporting documentation at the time he or she is applying for or renewing a license. The submission of a document to the Attachment Warehouse will trigger an email alert to the appropriate state(s) notifying the state(s) that supporting documentation has been submitted to fulfill document requirements pertaining to the “yes” answer on the background. The advantage to the producer and the state(s) is that the documentation can be sent to the Attachment Warehouse once, and all appropriate states will be notified and have the ability to view, download or print the document. The Attachment Warehouse also allows a producer to meet the requirement from the states to report and submit documentation related to any regulatory action taken against him/her. This enables the producer to meet this regulatory obligation quickly in order to comply with the typical state requirement for producers to report an action within 30 days. Through the use of the Attachment Warehouse, all states in which the producer is licensed are notified with an email alert and have access to the document.

A complete list of jurisdictions using NIPR products and services is available at www.nipr.com. The website has an updated list of the states that are making active use of NIPR electronic processing. (Product List by State)
Chapter 2

Producer Licensing Model Act

Uniformity Provisions of the Producer Licensing Model Act

Through the PLMA, the NAIC created a system of reciprocity for producer licensing and also established uniform standards in key areas of producer licensing. The PLMA was initially adopted in January 2000. It was subsequently amended in October 2000 and in January 2005.

In December 2002, the Producer Licensing (EX) Working Group adopted a set of Uniform Resident Licensing Standards (URLS). In December 2008, the standards were revised and updated to incorporate standardization and uniformity for both resident and nonresident licensing. The standards were, therefore, renamed the ULS. The PLMA and the ULS are designed to complement each other and assist the states in creating a uniform system of producer licensing. In 2008, the Producer Licensing (EX) Working Group was charged with reviewing the ULS. Subsequent revisions were made to the ULS in August 2010 (limited lines definitions) and in August 2011 (definitions for certain non-core limited lines). The revised standards are included in the Appendix, and updates can be found on the Producer Licensing (EX) Working Group's State Licensing Handbook web page on the NAIC website. (https://content.naic.org/state_licensing_handbook.htm)

The key uniformity provisions of the PLMA are:

1. Definitions for “negotiate,” “sell” and “solicit,” and uniform exceptions to licensing requirements.
2. An application process for both resident and nonresident producer license applications that uses the NAIC Uniform Application for resident and nonresident producers.
3. Definitions for the six major lines of insurance: Life, Accident and Health or Sickness, Property, Casualty, Personal Lines, and Variable Life or Annuity Products.
4. Exemptions from completing prelicensing education and examinations for licensed producers who apply for nonresident licenses.
5. Standards for license denials, non-renewals and revocations.
6. Standards regarding which individual producers and business entities may receive a commission related to the sale of an insurance policy.
7. Standards for producer appointments for states that have an appointment system.
8. Procedures for insurance regulators, companies and producers to report and administratively resolve “not for cause” and “for cause” appointment terminations.
9. A definition for limited lines insurance. The Producer Licensing (EX) Working Group has adopted a recommended list of limited lines licenses, as set forth in the ULS, and has encouraged states to eliminate licensing categories for other lines of insurance.

Other Key Provisions of the Producer Licensing Model Act

The PLMA also contains a number of provisions that promote simplified licensing procedures.

Home State

The intent of the PLMA is for a producer to have one state of residence. Section 2(B) of the PLMA defines this concept as the home state:

“Home state” means the District of Columbia and any state or territory of the United States in which an insurance producer maintains his or her principal place of residence or principal place of business and is licensed to act as an insurance producer.”

A producer is permitted to designate either the actual state of residence or the principal place of business as the home state. The PLMA does not specifically prohibit the existence of two home state licenses. The producer may select either the resident state or the principal place of business. This option was intended to accommodate a producer who lives in one state but maintains his or her business in another state. However, it was the intent of the drafters for one state to be designated as the home state to prevent forum shopping. The Producer Licensing (DEX) Working Group has discouraged any state from adopting a stance that a producer can maintain two home states.
Change of Home State

Under the PLMA, there is now a simplified process for producers who move from state to state and were in good standing prior to the change of residence.

Section 9 of the PLMA provides a mechanism for licensed producers to maintain an active license when changing the state of residence. Section 9(A) creates an exemption from prelicensing education or examination for a producer who moves into a state who was previously licensed for the same lines of authority in another state. In this scenario, the producer receives a new resident license for the same lines of authority, so long as the producer applies for a resident license within 90 days of the cancellation of the producer’s previous license and the producer was in good standing in the prior state.

Section 9(B) creates an exemption from prelicensing education or examination for a line of authority held by a former nonresident producer who moves into a state and becomes a resident of that state. In practice, when a nonresident becomes a resident, that producer is to be granted the same lines of authority previously held, so long as the producer applies for a resident license within 90 days of establishing legal residence. States are not to impose prelicensing education or an examination on a nonresident producer who subsequently moves into another state and declares it to be the home state, unless “the commissioner has determined otherwise by regulation.”

Under the PLMA, letters of certification were eliminated as a prerequisite to granting a nonresident license. The SPLD provides verification of good standing in the producer’s home state.

One unresolved issue is the long-established practice of requiring a letter of clearance for producers changing their resident state. Despite the fact that the PLMA does not contain any reference to a letter of clearance, some states still require the producer to provide a letter of clearance from the former state before the new state will grant the producer an active resident status. Other states grant the new nonresident license but continue to monitor the producer’s record to make sure that the prior resident license changes in status from resident to nonresident. This is done to prevent the producer from holding two active resident licenses.

The Producer Licensing (EX) Working Group and NIPR have identified this as an issue that could best be resolved by the establishment of an electronic method for the producer to communicate the desired changes to all affected states in one transaction. NIPR’s launch of the Contact Change Request (CCR) service allows producers for many states to change their physical addresses, email addresses, phone numbers and fax numbers. The Producer Licensing (EX) Working Group will turn its attention to solving the issues surrounding a change of resident state once all states have fully implemented the CCR service.

Commissioner Discretion

The PLMA contains language that allows a state to adopt regulations to cover a state-specific situation. States should carefully consider the impact that deviation from the PLMA might have on NAIC uniformity and reciprocity initiatives.

Section-by-Section Summary of the Producer Licensing Model Act

The full text of the PLMA is in the Appendices.

Section 1: Purpose and Scope

- To promote efficiency and uniformity in producer licensing.

Section 2: Definitions

- Defines the terms “home state,” “limited lines insurance,” “sell,” “solicit,” “negotiate” and other pertinent terms.

Section 3: License Required

Section 4: Exceptions to Licensing

- Lists the persons and entities that do not need licenses, even though they participate in the insurance industry.
Section 5: Application for Examination

- Requires that producers must pass an examination in the lines of authority for which application is made.
- Allows use of outside testing services to administer examinations.

Section 6: Application for License

- Sets forth the qualifications for licensure as an individual or business entity.
- Provides that limited line credit insurers must provide instruction to individuals who will sell credit insurance.

Section 7: License

- Sets forth the six major lines of authority, the limited line of credit insurance and any other line of insurance permitted under state laws or regulations.
- Provides guidelines for license continuation and reinstatement.
- Provides for hardship exemptions for failure to comply with renewal procedures.
- Lists the information the license should contain.
- Requires licensees to notify the insurance commissioner of a legal change of name or address within thirty (30) days of the change.

Section 8: Nonresident Licensing

- Requires states to grant nonresident licenses to persons from reciprocal states for all lines of authority held, including limited lines and surplus lines insurance, if those persons are currently licensed and in good standing in their home states.
- Requires a nonresident licensee who moves from one state to another to file a change of address and certification from the new resident state within thirty (30) days with no fee or application.

Section 9: Exemption from Examination

- Exempts licensed individuals who change their home state from prelicensing and examination.
- Requires a licensed nonresident who becomes a resident to register in the new home state within ninety (90) days of establishing legal residence, unless “the commissioner determines otherwise by regulation.”

Section 10: Assumed Names

- Requires a producer to notify the insurance commissioner prior to using an assumed name.

Section 11: Temporary Licensing

- Allows temporary licensure for up to 180 days without requiring an exam when the insurance commissioner deems that the temporary license is necessary for the servicing of an insurance business in specific cases.

Section 12: License Denial, Non-renewal or Revocation

- Lists 14 grounds for denial, non-renewal or revocation of a producer license.
• Provides that a business entity license may be revoked if an individual licensee’s violation was known or should have been known by one or more of the partners, officers or managers acting on behalf of the partnership or corporation, and the violation was not reported to the insurance commissioner nor was corrective action taken.

Section 13: Commissions

• Prohibits payment of commissions or other compensation to or acceptance by an unlicensed person for “selling, soliciting or negotiating” insurance.

• Allows payment of renewal commissions to an unlicensed person if the person was licensed at the time of the sale, solicitation or negotiation.

• Permits payment or assignment of commissions or other compensation to an insurance agency or to persons who do not sell, solicit or negotiate, unless the payment would violate rebate provisions.

Section 14: Appointments (optional)

• Prohibits a producer from acting as a producer for an insurer unless appointed. The insurer appoints the producer either within 15 days from the date the agency contract is executed or within 15 days from the date that the first insurance application is submitted.

• Sets forth processes for initial and renewal appointments.

Section 15: Notification to the Insurance Commissioner of Termination

• Requires the insurer to notify the insurance commissioner within 30 days following the effective date of termination of a producer’s appointment, if the termination is for cause. The insurer also has a duty to promptly notify the insurance commissioner of any new facts learned after the termination. When requested by the insurance commissioner, the insurer shall provide additional information, documents, records, or other data pertaining to the termination or activity of the producer.

• If termination of a producer is not for cause, the insurer must notify the insurance commissioner within 30 days following the effective date of termination.

• Sets forth a detailed process for notifying the producer and for a producer to submit comments to the state.

• Provides that in the absence of actual malice, insurers have immunity from any actions that result from providing information required by or provided pursuant to this section.

• Contains penalties for insurers who fail to report or who report with actual malice.

• Requires that documents furnished to the insurance commissioner pursuant to this section shall be confidential and privileged.

Section 16: Reciprocity

• A state cannot impose additional requirements on nonresident license applicants who are licensed in good standing in their home state other than the requirements imposed by Section 8 of the PLMA, if the applicant’s home state grants nonresident producer licenses on the same basis.

• A nonresident’s satisfaction of CE in the producer’s home state shall constitute satisfaction of all CE requirements in the nonresident state, if the home state practices CE reciprocity. A nonresident producer’s satisfaction of his or her home state’s continuing education requirements for licensed insurance producers shall constitute satisfaction of this state’s continuing education requirements if the non-resident producer’s home state recognizes the satisfaction of its continuing education requirements imposed upon producers from this state on the same basis.”

Section 17: Reporting of Actions (By Producers)

• A producer must report any administrative actions taken in another jurisdiction or by another government agency in the home jurisdiction within thirty (30) days of the final disposition of the matter.
• A producer shall report any criminal prosecution taken in any jurisdiction within 30 days of the initial pretrial hearing date. The report must include the legal order, relevant court documents and the original complaint.

Section 18: Compensation Disclosure

• In any instance when a producer will receive compensation from a customer for placing an insurance policy and also will receive compensation from an insurer for that placement, prior to placing that policy, the producer is required to disclose to the customer the amount and sources of compensation the producer will receive, if the customer makes an insurance purchase.

Section 19: Regulations

• The insurance commissioner may promulgate reasonable regulations to carry out the purposes of the PLMA.

Section 20: Severability

Section 21: Effective Date

Frequently Asked Questions

The Producer Licensing (EX) Working Group has created several documents that answer frequently asked questions (FAQ) about reciprocity, uniformity and how to administer the PLMA. The current version of the FAQ as of the publication date appears below. The latest version of these documents can be found on the State Licensing Handbook webpage under the appendix section. The latest version of these documents can be found on the Producer Licensing (EX) Working Group’s web page on the NAIC website.

PLMA Implementation - FAQ

This document has been prepared by the NAIC’s Producer Licensing (D) Working Group for informational purposes only. The following questions and answers are based upon the language of the PLMA. This document is not intended as legislative history or to replace a state insurance department’s independent review and analysis of these questions. The contents of this document should not be interpreted as representing the views or opinions of the NAIC or of any individual NAIC member or state insurance department.

Question 1: Is Section 14 of the PLMA regarding appointments, which is labeled “optional,” intended to be optional for adoption by a state that requires insurer appointments of producers?

Answer 1: No. If a state requires appointments, it should adopt Section 14. It was labeled “optional” only to accommodate those states that do not require appointments—e.g., Colorado.

Question 2: PLMA Section 14B starts a clock of 15 days for insurer compliance by providing that “the appointing insurer shall file … within 15 days from the date the agency contract is executed or the first insurance application is submitted” (emphasis added). When is an application deemed “submitted”?

Answer 2: An application is submitted when it is dated received by the insurer. The use of any other event will undermine the ability of the states and insurers to achieve uniform national practice for regulatory notifications. This is because any other temporal event is unknown to the insurer, which has the compliance responsibility. That is, “submitted” should not mean when a producer mails an application, since different producers might use different means of communicating applications; different producers will mail applications at different times; mail pick-up and delivery varies among localities, etc. The one certain time of submission is when the application is dated received by the insurer.

Question 3: If a state adopts PLMA Section 14, is there an option for the state to require an insurer to execute an agency contract with a producer prior to accepting the first insurance application from a producer that has not yet been appointed?

Answer 3: No. PLMA Section 14B provides that “the appointing insurer shall file, in a format approved by the insurance commissioner, a notice of appointment within 15 days from the date the agency contract is executed or the first insurance application is submitted” (emphasis added). The use of the word “or” in the model act clearly allows an insurer to notice
appointment upon the earliest of the two events. Pennsylvania has adopted modified language and is not in complete agreement with this answer.

**Question 4:** Since the PLMA works toward uniform national procedures by eliminating the traditional distinctions between agents and brokers for purposes of licensure, is it appropriate to require appointments of producers acting as brokers?

**Answer 4:** No. PLMA Section 14A makes clear that an insurer need only appoint producers “acting as agents on behalf of the insurer.” Inasmuch as brokers are not appointed, notification of appointments of brokers is not required.

**Question 5:** Must a business entity reside in a state to obtain a producer license?

**Answer 5:** No. Section 8 outlines the requirements that a person must fulfill in order to obtain a nonresident license, and the definition of “person” (see PLMA §2L) makes clear that this section applies to the licensing of both individuals and business entities. Section 8 is devoid of any residency requirement, and a nonresident business entity should be able to obtain a nonresident producer license if business entities are required to be licensed by the insurance department at all. In addition, states that impose residency requirements on business entities are likely not compliant with National Archives and Records Administration (NARA) provisions of the GLBA.

**Question 6:** Should the record of producer qualifications obtainable from the NIPR SPLD satisfy all certification requirements for state licensing?

**Answer 6:** Yes. PLMA Section 7G, Section 8B and Section 9 make clear that states should adopt and use the SPLD record for all regulatory purposes.

**Question 7:** Should a state require that a resident be licensed as a producer if he or she is entitled to renewal or other deferred commissions produced in another state?

**Answer 7:** No. PLMA Section 3 and Section 13C indicate that a producer license is required to sell, solicit or negotiate the sale of insurance, but do not suggest that a license is needed after such activity has ceased. The person’s receipt of renewal or other deferred commissions does not result in any licensing requirement.

**Question 8:** Are insurers alone responsible for educating those persons who sell limited lines credit insurance products?

**Answer 8:** Yes. PLMA Section 6D requires such insurers to furnish the program of instruction to those who sell limited lines insurance. The program is filed with the insurance commissioner in most states.

**Question 9:** Does reciprocity pursuant to Section 8 of the PLMA require recognition of a nonresident line of authority when the state in which the nonresident license is sought does not recognize a line of authority for resident producers?

**Answer 9:** Yes. For example, the reciprocity mandates of Section 8E should be respected for a limited line of authority, as is the case with any other line of authority. Consequently, states should be prepared to recognize the authority on a nonresident basis.

**Question 10:** What process is to be followed by a producer in identifying a new “home state” without the loss of his or her license to do business in the prior home state?

**Answer 10:** The producer should notify the prior home state of his or her change of address and intent to apply for a resident license in the new home state. The producer must apply for resident license in his or her new home state. Pursuant to Section 9 of the PLMA, the producer or applicant is not required to complete any prelicensing education or examination in order to secure the new resident license.

**Question 11:** What process is to be followed by the new home state insurance regulator with regard to a producer changing his or her state of residency?

**Answer 11:** The new home state should process the producer’s application, issue a resident license if warranted and, if issued, notify the SPLD of the producer’s new status as a resident licensee.
Question 12: What is the process to be followed by the prior home state insurance regulator?

Answer 12: At the time the producer notifies the prior home state insurance regulator of a change of address, the prior home state insurance regulator should send to the SPLD a report of “active with notice of transfer of residency to [the new home state],” identifying the new state of residency. Upon PDB notification of the new resident state licensure, the prior home state resident license is replaced with a nonresident license for the duration of its term. It is noted that time frames for notice to the states of a change in address are stated in the PLMA.

Question 13: If a commission is paid to enroll a customer in a group credit insurance policy, must the enroller be licensed?

Answer 13: Yes. An individual who enrolls customers under a group insurance policy must obtain a limited lines license if a commission is paid. PLMA Section 4B(2) provides an exception from licensing if no commission is paid to the enroller and the enroller does not engage in selling, soliciting or negotiating.

Question 14: May an individual sell, solicit or negotiate group credit insurance coverage without a license?

Answer 14: No. An individual must have a limited lines license before he or she can sell, solicit or negotiate the purchase of group insurance. While PLMA Section 4B(2) provides an exception for securing and furnishing information in connection with group insurance coverage, there is no such exception from licensing for selling, soliciting or negotiating group insurance coverage.

Question 15: Can a person enrolling someone in a group insurance policy secure and furnish information about the policy to a customer and still be exempt from licensure?

Answer 15: Yes. As set forth in Section 4B(2) of the PLMA, there is an exception that allows a group enroller to secure and furnish information about the group insurance policy to a customer, provided no commission is paid or there is no selling, solicitation or negotiation. However, Section 4B(2) generally recognizes an exception for purposes of enrolling individuals under plans, issuing certificates under plans, assisting with the administration of plans, and performing administrative services related to the mass marketing of property/casualty (P/C) insurance.

Note: It is important to note that individual state laws and factual circumstances will control in determining whether an activity involves selling, solicitation or negotiation. Likewise, the states will have discretion in interpreting what activities constitute the “securing or furnishing” of information.

Question 16: With regard to products sold by life insurers, does the qualification in the PLMA that a person shall not sell, solicit or negotiate insurance “in this state” without a license mean that the producer must be licensed in the state(s) where the: 1) sale, solicitation or negotiation occurs; or 2) policyholder principally resides?

Answer 16: In those states that have adopted the PLMA, licensure should be based upon where a producer “sells, solicits or negotiates” insurance, as specifically stated in the PLMA. In traditional insurance sales transactions, licensure should be determined solely by this PLMA standard without reference to the state of residence of the insured. Application of the “sells, solicits or negotiates” standard where an insurance transaction takes place purely by electronic or telephonic means is more complex. In such transactions, application of the PLMA licensure standard should turn on the state of residence of the customer.

Question 17: Section 14B of the PLMA states: “To appoint a producer as its agent, the appointing insurer shall file, in a format approved by the insurance commissioner, a notice of appointment within 15 days from the date the agency contract is executed or the first insurance application is submitted.” In a situation where a producer is not currently appointed by an insurer, but was previously appointed by and submitted an application to that insurer, must that producer now obtain a new appointment before submitting a new application to that insurer because it would not be the first application the producer ever submitted to that insurer?
Answer 17: No. Section 14B of the PLMA requires appointment within 15 days of the date an insurer receives the first application submitted by a producer who is not currently appointed, even if that producer was previously appointed by that insurer and submitted business in the past. Reference to the agency contract or the first application is based on the current time period. If a producer’s prior appointment with the insurer was terminated, each jurisdiction would consider the time period to start again with the new contract execution or the time period when the agent submits his first insurance application following the prior termination.
Chapter 3

Uniform Licensing Standards

In 2002, the Producer Licensing (EX) Working Group adopted the Uniform Resident Licensing Standards (URLS). The standards were revised and updated to incorporate standardization and uniformity for both resident and nonresident licensing. The standards were renamed to the ULS in 2008. These standards will be referenced throughout this Handbook. The full text of the ULS is in the Appendices. The latest version of the appendix can be found on the State Licensing Handbook webpage. The latest information can be found on the Producer Licensing (EX) Working Group’s web page on the NAIC website.

These standards establish an important baseline to assure insurance regulators that all states are applying the same standards to resident applicants. The Producer Licensing (DEX) Working Group Task Force and its Working Groups monitors compliance with the uniform standards. Since the adoption of the ULS, the Producer Licensing (EX) Working Group Task Force has adopted interpretative guidelines and clarifications to further explain the proper implementation of the ULS.

The ULS contain guidelines in the following categories:

1. Licensing qualifications.
2. Prelicensing education training.
3. Producer licensing test.
4. Integrity/personal qualifications/background checks.
5. Application for licensure/license structure.
6. Appointment process.
7. CE Requirements.
8. Limited lines uniformity.
9. Surplus lines standards.
11. Commission sharing.

Initial and Renewal Producer License Applications

The Producer Licensing (DEX) Working Group Task Force has adopted initial and renewal NAIC Uniform Applications for resident and nonresident individuals and business entities. Under the ULS, states are directed to use the Uniform Applications rather than state-specific applications. The Producer Licensing (DEX) Working Group Task Force has established a schedule for review and update of the applications. States are encouraged to use the most current form of the Uniform Applications. The forms are available on the NAIC website. All NIPR online applications use the most recent approved uniform initial and renewal application forms.
Recommended Best Practices for Insurance Regulators

- Conduct a regular review of state business rules, as well as any state-specific requirements for paper and electronic applications that are posted on NIPR’s website, with the NIPR or other vendor to maintain compliance with reciprocity and the ULS.
- Consider whether existing business rules are statutorily required. To the extent they are not statutorily required, they should be removed. To the extent they are statutorily required, the state licensing director should consider whether they are necessary. To the extent they are not necessary for consumer protection, the insurance commissioner should take steps to attempt to have such statutory requirements repealed (e.g., sponsor legislation).
- Carefully consider whether licensing staff should be given authority to change internal business rules or to give direction to a vendor without the licensing director’s approval. A change in procedure that may seem to be appropriate could cause problems with reciprocity or the ULS.
- If a state uses an outside vendor to receive and process license applications, monitor the vendor to ensure that applicants are provided only the most current NAIC uniform application, whether the applicant applies or renews online or via paper application.
- Adapt the department website to direct applicants to a single electronic location to obtain the most current version of the NAIC uniform forms, or specifically to the link for the electronic process.
- Departments should encourage the use of electronic processes, when available, rather than paper processes to expedite the licensing process.
- Eliminate all state-specific application forms, and use only the most recent version of the NAIC uniform forms.
- Develop a procedure manual, and cross-train staff so that several personnel can perform all licensing tasks.
- Provide adequate notice of changes to licensing and appointment fee structures, as well as changes to applications and other forms required to be submitted by applicants. With regard to the transition from an old application form to a new form, states should continue to accept original, signed applications up to a reasonable transition period beyond the inception date for the new form. Prior to the effective revision date, the state should provide adequate notice by way of email, website updates and any other appropriate communication device to interested parties.
Chapter 4

Nonresident Licensing

The previous reciprocity provisions of the GLBA adopted in 1999 required that barriers to nonresident producer licensing be eliminated. The PLMA contains specific guidance on this issue. A producer licensed in good standing in the home state must be granted a nonresident license unless good cause for denial exists under Section 12 of the PLMA.

There are four key components to licensing reciprocity:

1. Administrative procedures.
2. CE requirements.
3. Elimination of any limitations on nonresident.
4. Reciprocity with other States.

Administrative Procedures

Under the previous administrative procedures for reciprocal licensing mandated by the GLBA, a nonresident person received a nonresident producer license if:

1. The person was currently licensed as a resident and is in good standing in the person’s home state.
2. The person submitted the proper request for licensure and paid the fees required by the nonresident state’s law or regulation.
3. The person submitted or transmitted to the insurance commissioner the application for licensure that the person submitted to the person’s home state or, in lieu of that, a completed NAIC Uniform Application.
4. The person’s home state awarded nonresident producer licenses on the same basis to residents of the state in which the applicant is seeking a nonresident license.

States were required to license nonresident applicants for at least the line of authority held in the home state. This was true even if the line of authority held in the applicant’s home state may not have precisely aligned with the major or limited lines of authority in the other state. States were not allowed to charge a licensing fee to a nonresident that was so different from the fee charged a resident so as to be considered a barrier to nonresident licensure. States also were not allowed to collect fingerprints from nonresident applicants.

Section 8(C) of the PLMA makes it clear that a licensed nonresident producer who changes residency is not required to surrender the license and submit a new application. All that is required is a change of address within thirty (30) days of the change of legal residence. The model provides that a state should not charge a fee for processing this change of address.

The reciprocity provisions of the PLMA also extend to surplus lines producers. A majority of states treat surplus lines as a distinct license type. Persons holding surplus lines producer licenses in their home states shall receive nonresident surplus lines producer licenses, unless some other reason for disqualification exists.

A producer holding a limited line of insurance is eligible for a nonresident limited lines producer license for the same scope of authority as granted under the license issued by the producer’s home state. The nonresident state may require only what is permitted under Section 8 of the PLMA for limited lines applicants. A limited line is any authority that restricts the authority of the licensee to less than the total authority prescribed in the associated major line.

Continuing Education Requirements

Pursuant to the PLMA, a nonresident state must accept the producer’s proof of the completion of the home state’s CE requirements as satisfaction of the nonresident state’s CE requirements, if the nonresident producer’s home state recognizes the satisfaction of its CE requirements imposed upon producers from the nonresident state on the same basis.
Limitations on Nonresidents

States had to eliminate licensing restrictions that required a nonresident producer to maintain a residence or office in the nonresident state so long as the nonresident’s license was from one of the United States, the District of Columbia or the U.S. territories. The NARAB Working Group stated it was not a violation of GLBA reciprocity requirements if a state required nonresidents to provide proof of citizenship; however, under the ULS, it is the responsibility of the resident state to verify an applicant’s citizenship status.

Reciprocity with other States

To comply with the reciprocity provisions of the GLBA, a majority of the states had to meet all three of the above components and grant reciprocity to all residents of the other states who have met those components.

Reciprocity Examples

The PLMA contains specific guidance on the proper reciprocal treatment that a state licensing director should grant. This chapter contains illustrative examples of these provisions. Unless otherwise specified, these examples assume that the applicant is in good standing in the home state and has not requested a change in line of authority (LOA). There are some states that did not adopt all the reciprocity standards previously required by the GLBA in 1999 and currently reflected in the PLMA. The answers to the following examples will vary when a nonreciprocal state is involved. Examples also can be found in the Producer Licensing (EX) Working Group Frequently Asked Questions contained in Chapter 1.

- **Example A**

  A producer whose home state is State A has a nonresident license from State B and State C and moves to State D as the producer’s new home state.

  What should happen: The producer timely files a change of address in State A, State B and State C. State A places the producer’s resident license on inactive status. Within 90 days of cancelling the resident state license in State A, the producer applies for a resident license in State D. Using the SPLD, State D confirms the producer was in good standing in State A and applies for the same line of authority the producer held in State A. State D issues the producer a resident license. State A confirms the producer’s new resident license in State D and converts the producer’s inactive resident license to an active non-resident license. State B and State C also confirm the producer now holds a resident license in State D and record the producer’s change of address. Because the producer held the same line of authority in State A that the producer applied for in State D, the producer should not be required to take and pass a license examination or complete prelicensing education.

- **Example B**

  A producer holds a line of authority for surety in State A, and applies for a nonresident license in State B. However, State B does not have a separate surety line of authority.

  What should happen: State B issues a license that includes surety (which may have additional authority) but the producer is limited to the surety LOA held in the producer’s resident state.

- **Example C**

  A producer’s home state is State A. State A does not have a prelicensing education requirement for the life LOA. The producer holds a license with the life LOA in State A. The producer applies for a nonresident license in State B. State B has a resident license prelicensing education requirement.

  What should happen: State B issues a nonresident license with the life LOA and does not require any prelicensing education.

- **Example D**

  A producer’s home state is State A. State A does not have a prelicensing education requirement for any LOA. The producer holds a license with the life insurance LOA. The producer holds a nonresident license from State B. State B has a resident license prelicensing education requirement. The producer moves to State B.
What should happen: State B should issue a resident license to the producer with the life LOA. State B should not require prelicensing education or completion of an examination before issuance, “except where the commissioner determined otherwise by regulation.” (See PLMA Section 9B.)

- **Example E**

A producer’s home state is State A. Both State A’s resident prelicensing education and CE requirements are less than the ULS. The producer holds a resident license with the life insurance LOA in State A. The producer applies for a nonresident license in State B. State B has both prelicensing and CE requirements that match or exceed the ULS.

What should happen: State B issues the nonresident license with the life LOA and does not require the completion of either additional prelicensing education or additional CE.

- **Example F**

A producer’s home state is State B. The producer applies for a nonresident license with the variable products LOA in State A. A check of the PDB reveals that the applicant is not licensed for the variable products LOA in State B. Upon investigation, it is learned that State B either issues life or variable as a combined LOA or has a requirement for variable products licensing, but it is not specifically tracked by the Department of Insurance (DOI).

What should happen: This is a challenge, as State B has failed to adopt the variable products line of authority as defined in the PLMA. A second challenge is that the records on the SPLD and/or the NIPR may not accurately reflect the home state business rule. In this example, the nonresident state will have to pend the application and contact the home state to verify if the applicant is in compliance with the home state law on variable products. The nonresident state must then decide if the applicant should be granted a license.

- **Example A**

A producer whose home state is State A has a nonresident license from State B and State C and moves to State D as the producer’s new home state.

What should happen: The producer timely files a change of address in State A, State B and State C. State A changes the license from resident to nonresident. State B and State C record a change of address. The producer should apply for a license with State D within 90 days. State D should issue the license and may not require the producer to complete either an examination or prelicensing education. State D should verify that the license was in good standing in State A via the SPLD.

- **Example B**

A producer who holds a line of authority for surety in the home state, State A, applies for a nonresident license in State B, which does not have a separate surety line of authority.

What should happen: State B issues a license that has multiple LOAs, including surety, LOA, that the producer holds in the home state, but the producer is limited to the surety LOA held in his or her home state.

- **Example C**

A producer’s home state, State A, does not have a prelicensing education requirement for any LOA, and the producer holds a life insurance LOA. The producer applies for a nonresident license in a state that has a prelicensing education requirement.

What should happen: State B issues a nonresident license with the life LOA and does not require any prelicensing education before issuance.

- **Example D**

A producer’s home state, State A, does not have a prelicensing education requirement for any LOA, and the producer holds a life insurance LOA. The producer holds a nonresident license from State B that has a prelicensing education requirement. The producer moves into that state.
What should happen: State B should issue a resident license to the producer with a life LOA and does not require prelicensing education or completion of an examination before issuance, “except where the commissioner determined otherwise by regulation.” (See PLMA Section 9B.)

**Example E**

A producer’s home state, State A, has a prelicensing education requirement and a CE requirement that is less than the ULS, and the producer holds a life insurance LOA. The producer applies for a nonresident license in State B, which has a prelicensing requirement that matches or exceeds the ULS and a CE requirement that matches the ULS.

What should happen: State B issues the nonresident license with the life LOA and does not require the completion of either additional prelicensing education or additional CE.

**Example F**

A nonresident producer applies for the variable products LOA in State A. A check of the SPLD reveals that the applicant is not licensed for variable products in the home state, State B. Upon investigation, it is learned that State B either issues life or variable as a combined LOA or has a requirement for variable products licensing, but it is not specifically tracked by the Department of Insurance (DOI).

What should happen: This is a challenge, as State B has failed to adopt the variable products line of authority as defined in the PLMA. A second challenge is that the records on the SPLD and/or the NIPR may not accurately reflect the home state business rule. In this example, the nonresident state will have to pend the application and contact the home state to verify if the applicant is in compliance with the home state law on variable products. The nonresident state must then decide if the applicant should be granted a license.
Chapter 5
Activities Requiring Licensure

License Required to Sell, Solicit and Negotiate

The PLMA uses three key words to determine when a person is required to have an insurance producer license:

“Sell” means to exchange a contract of insurance by any means, for money or its equivalent, on behalf of an insurance company.

“Solicit” means attempting to sell insurance, or asking or urging a person to apply for a particular kind of insurance, from a particular company.

“Negotiate” means the act of conferring directly with, or offering advice directly to, a purchaser or prospective purchaser of a particular contract of insurance concerning any of the substantive benefits, terms or conditions of the contract, provided that the person engaged in that act either sells insurance or obtains insurance from insurers for purchasers.

The specific requirement to hold a license is found in Section 3 of the PLMA and reads as follows:

A person shall not sell, solicit or negotiate insurance in this state for any class or classes of insurance, unless the person is licensed for that line of authority in accordance with this Act.

The Producer Licensing (EX) Working Group clarified in 2006 that in traditional life insurance sales transactions, licensure should be determined solely by the PLMA’s “sells, solicits or negotiates” standard, without reference to the insured’s state of residence. The key is to determine if the producer was properly licensed in the state in which the activity requiring a license took place. See also FAQ Number 16 in Chapter 2.

During the drafting of the PLMA, there was considerable discussion about who should be required to hold an insurance producer license. Prior to the adoption of the PLMA, the Producer Licensing (EX) Working Group discussed guidelines for “licensable” and “non-licensable” activities. The main thrust of that effort was to distinguish acts that constitute the sale, solicitation or negotiation of insurance from administrative or clerical acts. The guidelines document gives numerous examples of “Agent” activities that do require an insurance producer license and “Clerical” activities that do not. The document is included in the Appendices. The latest version of these documents can be found on the State Licensing Handbook webpage under the appendix section. Check the Producer Licensing (EX) Working Group’s web page for any updates.

Commissions

Section 13 of the PLMA provides guidance regarding the relationship between being licensed and receiving commissions. Section 13(A) prohibits the payment of commission to a person who is required to be licensed. Section 13(B) prohibits a person from receiving a commission if that person was unlicensed and was required to hold a license under the Act.

Section 13(C) of the PLMA states that it is not necessary nor should any state require a producer to maintain an active license solely to continue to receive renewal or deferred commissions.

Section 13(D) of the PLMA provides that an insurer or a producer licensed in a state may assign commissions, services fees, brokerages or similar compensation to an insurance agency (business entity) or to persons (individuals) who are not selling, soliciting or negotiating in that state and who are not licensed in that state, unless the payment would violate a state’s antif-rebating statutes. For example, if a regional manager in State A is, by contract with an insurer, to receive an override commission on all sales activities from subagents located in States B and State C, but the manager does not engage in any activity that would require licensure under Section 3 of the PLMA, no license should be required by State B or State C in order for the manager to receive commission payments.

Another example: A trade association with members in all states is headquartered in State A. An insurer pays a fee to the association for each member who purchases insurance from that insurer through an affinity marketing program. The association does not have to be licensed in any state because the association does not sell, solicit or negotiate insurance.
In 2008, the Producer Licensing (EX) Working Group provided guidance on uniform interpretation of the commission sharing provision in PLMA and recommended that adoption of Section 13 be included in the ULS. The Commission Sharing guidance document is included in the Appendix of this Handbook.

Exceptions to Licensing

The PLMA contains two key sections that clarify when a license is not required. When considering whether to require a license, states should carefully review Section 4 and Section 13 of the PLMA.

Section 4 of the PLMA contains a specific list of exceptions from the licensing requirement. States should take special note of Section 4(B)(6), which provides an exception for producers placing commercial insurance for a multistate risk with an incidental exposure in several states. As the section provides, in this situation a license is only required in the state where the insured maintains its principal place of business and the contract of insurance insures risks located in that state.

The following is a summary of types of persons and entities that are exempted from licensing:

1. An officer, director or employee of an insurer or insurance producer, provided that the officer, director or employee does not receive any commission on policies written or sold to insure risks residing, located or to be performed in the state.
2. A person who secures and furnishes information for, or enrolls individuals in, group life insurance, group P/C insurance, group annuities or group, or blanket accident and health insurance, where no commissioner is paid to the person for the service.
3. An employer or association; its officers, directors, employees; or the trustees of an employee trust plan, not in any manner compensated, directly or indirectly, by the company issuing the contracts.
4. Employees of insurers or organizations employed by insurers who are engaging in the inspection, rating or classification of risks.
5. A person whose activities in a state are limited to advertising without the intent to solicit insurance in that state.
6. A person who is not a resident of a state who sells, solicits or negotiates a contract of insurance for commercial P/C risks to an insured with risks located in more than one state insured under that contract.
7. A salaried, full-time employee who counsels or advises the employer relative to the insurance interests of the employer who does not receive commission.

Recommended Best Practice for Insurance Regulators

- For uniformity purposes, states that still use a “transaction-based licensure” approach should eliminate that standard and change to the PLMA standard.
Chapter 6

Prelicensing Education

Prelicensing education is required in some states as a condition of licensure for resident insurance producers. Neither the PLMA nor the ULS suggests that a state must have a requirement for prelicensing education. States that have a prelicensing education requirement should follow the uniform standards as adopted by the Producer Licensing (EX) Working Group.

The ULS set a minimum credit hour requirement for prelicensing education. In 2010, the Producer Licensing (EX) Working Group was charged with reviewing this standard. Updated information, if there are any changes to this standard, can be found on the Producer Licensing (EX) Working Group’s web page.

States that require prelicensing education shall require 20 credit hours of prelicensing education per major line of authority. States must accept both classroom study and verifiable self-study, which includes both text and online courses. The ULS does not have a limit on the number of credits that can be obtained by self-study. States shall independently determine the content requirements for prelicensing education. The ULS require that a state have a method to verify completion of prelicensing education, but they do not prescribe a method.

The ULS provide that a person who has completed a college degree in insurance shall be granted a waiver from all prelicensing education requirements. The ULS also provide that individuals holding certain professional designations approved by the insurance department should be granted a waiver from the prelicensing education requirement. In 2008, the ULS were updated to indicate the following list of designations be provided as guidance for designations that would waive prelicensing education, but the list is not exhaustive:

Life: CEBS, ChFC, CIC, CFP, CLU, FLMI, LUTCF

Health: RHU, CEBS, REBC, HIA

P/C: AAI, ARM, CIC, CPCU

Under both reciprocity standards and the ULS, no state shall require prelicensing education for nonresident applicants or nonresident producers who change their state of residency.
Chapter 7
Application Review for Initial Licenses

Individual Application Forms

The Producer Licensing (EX) Working Group adopted a uniform application, and the ULS require its use for all producer applicants. Section 6 of the PLMA outlines the process a state is to follow in reviewing the application and in making the determination as to whether to grant a resident producer license.

Before issuing a resident producer license to an applicant, the state must find that an applicant for a resident license:

1. Is at least 18 years of age.
2. Has not committed any act that is a ground for denial, suspension or revocation set forth in the PLMA Section 12.
3. Where required by the insurance commissioner, has completed a prelicensing course of study for the lines of authority for which the person has applied.
4. Has paid the appropriate fees.
5. Has successfully passed the examinations for the lines of authority for which the person has applied. Note that the ULS provide that examinations are not generally required for limited lines, but that it is acceptable for examinations for areas such as crop and surety.

Business Entity Applications

The following requirements are optional and would apply only to those states that have a business entity license requirement.

The Producer Licensing (EX) Working Group adopted a uniform application form for business entities, and the ULS require its use. Section 6 of the PLMA requires that before approving an application for a resident business entity, the state shall find that:

1. The business entity has paid the appropriate fees.
2. The business entity has designated a licensed producer responsible for the business entity’s compliance with the insurance laws, rules and regulations of the state.

Section 6 also gives the insurance commissioner authority to require any documents necessary to verify the information contained in an application. In 2010, the Producer Licensing (EX) Task Force considered methods to expedite and streamline business entity licensing. Updated proposals can be found on the Producer Licensing (EX) Working Group’s web page.

Background Checks

The GLBA allows states to perform criminal background checks on resident applicants. The ULS contain guidelines on how to perform background checks, including the following three-step process for background checks:

A. States will ask and review the answers to the standard background questions contained on the Uniform Applications;
B. States will run a check against the NAIC Regulatory Information Retrieval System (RIRS)/SPLD and 1033 State Decision Repository (SDR) – Data Entry Tool; and

C(1) States will fingerprint their resident producer applicants and conduct state and federal criminal background checks on new resident producer applicants; or
C(2) If a state lacks the authority or resources to accept and receive data from the Federal Bureau of Investigation (FBI), it shall conduct a statewide criminal history background check through the appropriate governmental agency for new resident producer applicants until such time as it obtains the appropriate authority.
Fingerprints

Under the ULS, the goal is that all states will electronically fingerprint their resident producers as part of the initial resident producer licensing process. States that lack the authority to run criminal history background checks through the FBI are encouraged to at least run a statewide background check until such time that state and national fingerprinting is implemented.

The Producer Licensing (EX) Working Group adopted model language that will allow a state to access federal databases. (See the Authorization for Criminal History Record Check Model [#222].) States are encouraged to adopt this language. The Model #222 can be found on the State Licensing Handbook web page on the NAIC website. (https://content.naic.org/state_licensing_handbook.htm)

1033 Consent Waivers

The Violent Crime Control and Law Enforcement Act of 1994, 18 U.S.C. §§ 1033 and 1034, commonly referred to as “1033,” establishes a ban on individuals who have been convicted of certain felony crimes involving dishonesty or breach of trust from working in the insurance business. The law provides that a banned person can apply to the state insurance commissioner for a written consent to work in the insurance business. If an individual with a felony involving dishonesty or breach of trust obtains a 1033 consent waiver from that person’s resident state, the person cannot be prosecuted for engaging in the business of insurance in violation of 18 U.S.C. §§1033 and 1034.

When one state grants a written consent waiver to an individual pursuant to 18 U.S.C. §1033, the consensus of legal opinion is that this written consent waiver is effective nationwide.

The Producer Licensing (EX) Working Group determined that the resident state bears responsibility for consideration of applications for consent waivers. Nonresident applicants should not be subject to additional procedures, nor should producers seeking nonresident licenses have to go through the 1033 process in all states after the producer’s resident state has issued a waiver. However, producers who have received waivers are required to attach them to applications for nonresident licenses. To assist these applicants, states should include a specific reference to 18 U.S.C §1033 within the text of the document that grants a waiver. States may exercise their discretion to deny licenses based on the types of criminal convictions disclosed in consent waivers. The NAIC Antifraud (D) Task Force adopted guidelines for review and granting of these consent waivers. Under the guidelines, states are to report all activity on these consent waivers to the (1033 SDR – Data Entry Tool). The full text of the guidelines are included State Licensing Handbook web page on the NAIC website. (https://content.naic.org/state_licensing_handbook.htm)

is available through I-Site.

NAIC Databases Relevant to Initial Application Review

The NAIC maintains three databases that should be consulted as part of application review.

1. The Complaint Database System (CDS) contains information on closed complaints as reported by the states.
2. The RIRS contains any action taken by a state insurance department where the action is against an entity and where the disposition is public information. All final adjudicated actions taken and submitted by a state insurance department are reflected in the RIRS. The information typically includes: administrative complaints, cease and desist orders, settlement agreements and consent orders, receiverships, license suspensions or revocations, corrective action plans, restitutions, closing letters, and letter agreements. The RIRS does not include exam report adoption orders without regulatory actions.
3. A record of 1033 actions is maintained in 1033 SDR – Data Entry Tool. The 1033 State Decision Repository (SDR) application allows regulators to enter and search for 1033 decisions (approved or denied), which state regulators have made for individuals who requested to work in the business of insurance but who have been prohibited to do so by section 1033 of the Violent Crime Control and Law Enforcement Act of 1994.

Review of Applications When Criminal History is Disclosed

As part of the 2009 charges for the Producer Licensing (EX) Working Group, the Producer Licensing (EX) Task Force asked the Producer Licensing (EX) Working Group to develop uniform guidelines for background check reviews of producers. For all jurisdictions to have a comfort level with licensing determinations made by a resident state when the applicant has a criminal

© 2019 National Association of Insurance Commissioners
history, a uniform process of review is warranted. If all jurisdictions implement these guidelines, in most situations, nonresident states will be able to defer to the resident state’s licensing decision. A copy of the Uniform Criminal History and Regulatory Actions Background Review Guidelines is included in the Appendix of this Handbook.
When an application contains a disclosure with a “yes” answer to a criminal history question, in determining whether to issue a license, states should consider the following factors:

- **Resident vs. Nonresident**

  If the application is for a resident producer license, it is incumbent upon the resident state to scrutinize all “yes” answers on the application and to request and obtain documentation and a detailed explanation for all criminal charges. Nonresident applicants’ criminal histories also should be documented and explained with consideration given the fact that the resident state already has issued a license to the applicant.

- **Severity and Nature of the Offense**

  Felony convictions should always be considered in determining whether to issue a license to an individual and may require the applicant to apply for a 1033 consent waiver prior to application. (See the section on 1033 consent waivers.)

  A criminal conviction is only relevant to the licensing decision if the crime is related to the qualifications, functions or duties of an insurance producer. Examples include theft; burglary; robbery; dishonesty; fraud; breach of trust or breach of fiduciary duties; any conviction arising out of acts performed in the business of insurance; or any actions not consistent with public health, safety and welfare. Special scrutiny should be given to financial and violent crimes.

- **Frequency of Offenses**

  While a producer’s past criminal history is a red flag and may be a predictor of future behavior, the frequency of offenses should be considered, with more weight given to a pattern of illegal behavior than to a one-time minor indiscretion.

- **Date of the Offense**

  The application form requires the applicant to disclose all criminal charges, except minor traffic offenses. A reviewer should consider when the offenses occurred and the age of the applicant at the time of the offense.

- **Completion of Terms of Sentencing**

  Applicants should provide evidence that they have completed all the terms of their sentences, including paying restitution, or completing any probationary periods or community service.

- **Evidence of Rehabilitation**

  The applicant should be required to provide evidence of rehabilitation. Completion of the terms of sentencing alone does not demonstrate rehabilitation. A state may request a statement from the applicant’s probation officer or other appropriate official.

**Statutory Obligations and Discretion**

Insurance regulators should review state law to determine guidelines for approval or denial of the application. After consideration of the above factors, the insurance regulator has several options:

1. Request additional information or documentation.
2. If the producer failed to report an action, contact the producer and request an explanation from the producer. (Technical violations, such as bad address or failure to timely report, generally do not merit formal action. However, the failure to report an action in itself can be cause for administrative penalty or a warning letter, depending on the particular state’s law).
3. Approve the application with no conditions.
4. Approve the application with conditions.
5. Deny the application.

In some cases, it may be appropriate to grant a conditional license. This option may not be available in all states and may be limited by state law or regulation. Some options include:
1. Issue a probationary license that will expire after six months or a year, or that will coincide with the applicant’s criminal probationary period. At the end of the probationary period, and prior to consideration of full licensure, the insurance regulator should confirm that the applicant successfully completed all terms of the sentence and probation. This option also can be used for a producer with a record of prior administrative action.

2. Enter into a supervisory agreement, whereby another established licensed producer agrees to be responsible for the applicant during a certain period of time of the applicant’s license term. This is a good option for producers who have criminal records in another state or some other evidence of past bad conduct. The supervisory agreement should include a requirement that the supervising producer report to the insurance regulator any inappropriate behavior that is relevant to the agreement and to the applicant’s license status.

3. Issue only a limited or restricted license for a particular product, such as credit life insurance. The theory of this option is that some types of products present individuals with less opportunity to commit bad acts.

4. Issue the license along with a requirement that the producer must report all complaints received against the producer and under the condition that there will be an immediate suspension for any bad act.

#### Recommended Best Practices for Insurance Regulators

- Work with state officials to adopt a fingerprint program that allows your state criminal justice agency to receive electronic prints, as well as electronically submit the reports back to the state DOI.
- If no fingerprint program is in place, inquire of the state criminal investigation department to determine if an alternative system for meaningful state background checks can be arranged.
- Allow pre-exam and post-exam fingerprinting.
- Make electronic fingerprinting available at test sites.
- Allow re-fingerprinting, if necessary, on a walk-in basis with no additional cost.
- Include registration for fingerprinting with registration for the exam, or link the online websites to allow for electronic registration.
- Streamline the background check process to avoid delay in the overall licensing process such as allowing for a temporary work authority pending receipt of the background check results.
- Check with other state agencies to determine what vendor(s) are used for the submission of electronic fingerprints (agencies that oversee programs such as teachers, bus drivers, social workers, foster parents, etc.)
- Adopt the NAIC’s Authorization for Criminal History Record Check Model Act (#222) for all license classes. (Allow some lag time before the effective date to provide sufficient time to establish procedures.) Note that ULS 14 has since been updated to fingerprint new resident producers and that fingerprints are no longer required for additional lines of authority under an existing home state license.
- The PLMA allows a producer to reinstate a lapsed license within 12 months of expiration, so only resident producers who are reinstating a license lapsed over 12 months should be required to submit fingerprints.
- Work with your state district attorney official to coordinate review and approval of the enabling statute, which must be approved by the U.S. attorney general to access the Criminal Justice Information Services (CJIS) division of the FBI criminal history record information.
- Establish a set number of times an applicant should be re-fingerprinted. (At times, fingerprints are rejected.) If re-fingerprinting is required, and the fingerprints are still rejected, establish a process to perform a state and federal NAME check.
- If your state is unable to use a vendor to electronically collect the cost of the criminal history background check from applicants, work with NIPR to collect this fee from new resident producer applicants during the electronic resident licensing application.
- Work with state officials to establish a reimbursement services agreement (RSA) for the payment of fingerprint or background checks.
- If your jurisdiction is just implementing fingerprinting, reach out to other jurisdictions for suggestions and best practices.
- Develop a system for review of 1033 consent waiver applications and post relevant information on the department website.
- Post all information regarding 1033 consent waiver requests, approvals and denials on the 1033 SDR – Data Entry Tool.
- Accommodate applicants to the greatest extent possible with flexible hours of operation.
- Allow payment by check, credit card or debit card.
Chapter 8

Testing Programs

Introduction

The states have a responsibility to ensure that licensing examinations are fair, sound, valid and secure. Directors must consider how an exam is developed, who is involved in the development process, how the exam is offered and how security is maintained. Nearly every state has contracted with an outside vendor to assist in examination development and administration. These testing vendors employ test development experts and psychometricians to construct and evaluate examinations.

The primary purpose of a state examination and licensing program is to protect consumers. Examinations should be consistent across the states in difficulty level, content and subject matter. They should be uniformly administered and scored. Examinations should be psychometrically sound, using methods for setting and maintaining passing standards (i.e., cut scores) that are in accordance with testing industry best practices. They should use resources such as: 1) the Standards for Educational and Psychological Testing, developed jointly by the American Educational Research Association (AERA), American Psychological Association (APA) and National Council on Measurement in Education (NCME); and 2) the U.S. Equal Employment Opportunity Commission’s (EEOC) Uniform Guidelines on Employee Selection Procedures (29 CFR 1607). Through valid, reliable and legally defensible test development practices, candidates will have a fair and equitable opportunity to pass an exam, regardless of which state exam they take. Ideally, pass rates should be consistent throughout the states; however, statistics from national examination administration have shown that the pass rates for examinations for the same line of insurance vary significantly among the states. Other variables may contribute to pass rates, such as state education systems, demographics, the existence of a prelicensing education requirement and the quality of such prelicensing education, but the states should work with their test vendors to be sure that they eliminate any practices that do not measure the entry-level knowledge, duties and responsibilities of an insurance producer.

Different states take different approaches to the development and administration of producer license examinations. Some of the states exercise significant control over test development and review. Other states rely almost entirely on outside experts. In most of the states, the state does not pay any fee to a testing vendor, and the cost of test development and administration is passed through to the test-takers. Most of the states reserve the right to preapprove any fees charged by testing vendors.

With the state licensing system increasingly built on reciprocity, it is in the best interest of consumers, insurance regulators, industry, producers and prospective producers for state licensing directors to establish guidelines that promote efficiency and consistency throughout the licensing process. Directors also should reduce or eliminate artificial barriers that impede qualified applicants from obtaining a license.

The purpose of this chapter is to recommend best practices for states in testing administration in the following areas:

1. Test development and review.
2. Test administration.
3. Test results.
4. Expectations for test vendors.

This chapter was developed with assistance from insurance test vendors, industry representatives, education providers and insurance regulators.

PLMA Guidelines on Examinations

Section 5 of the PLMA contains guidance for administering licensing examinations. Under Section 5, all residents are expected to complete a written examination, which should include the following:

1. The entry-level knowledge required for an individual concerning the lines of authority for which the application is made.
2. The duties and responsibilities of an insurance producer.
3. The applicable insurance laws and regulations of the state.

Section 5 grants the insurance commissioner authority to hire an outside testing service to administer examinations and impose nonrefundable examination fees.
The PLMA contains several exemptions from prelicensing education and examination requirements. An individual who is licensed as a nonresident in a state and who moves into that state, or an individual who moves from his or her home state to another state and seeks a resident license, is not required to complete an examination for the line(s) of authority previously actively held in the prior resident state as long as application is made within 90 days of the change in residence and the prior resident state indicates the producer was licensed in good standing. In this situation, a nonresident state should never impose prelicensing education or examination requirements.

The ULS provide that examinations are not generally required for limited lines, but that it is acceptable to require examinations for areas such as crop and surety.

The PLMA leaves test development and administration to the discretion of the individual states. Section 5(A) of the PLMA requires that “[a] resident individual applying for an insurance producer license shall pass a written examination” and requires that the examination must test the knowledge of the individual in three areas:

1. The specific lines of authority for which the application is made.
2. The entry-level duties and responsibilities of an insurance producer.
3. The applicable insurance laws and regulations of the state.

Beyond these broad subject matter categories, Section 5 states that tests “shall be developed and conducted under rules and regulations prescribed by the insurance commissioner.”

In order to provide more uniformity in state licensing practices, the 2012 revised ULS for Exam Content or Subject Area and Testing Administration Standards establishes implementation of the “Exam Content and Testing Administration Recommended Best Practices found in Chapter 8 of the NAIC State Licensing Handbook” as the uniform standard.

Test Development and Review

Test development experts believe that licensing examinations should measure the minimum competency required for a candidate to perform at an entry level. Therefore, test content and curriculum development should be focused on assessing whether a candidate demonstrates sufficient knowledge to pass an examination that is appropriately targeted to an entry-level producer.

The examination should not dictate the curriculum that an entry-level insurance producer should master. Instead, the test content should be developed using the steps outlined below. Examinations and curriculums should be updated to reflect any changes in insurance laws, regulations or industry practice. An online candidate guide should be available and should provide detailed testing and licensing procedures, as well as content outlines with cross-references to the curriculum.

Input from trainers who conduct test preparation courses may assist in the development of the curriculum and the exam content outline; however, some insurance regulators believe it is not appropriate to invite these trainers to participate in reviewing final examination questions. Education providers who do not offer prelicensing education courses (such as CE providers) sometimes are used during test development. There are generally two approaches to examination construction. A bank-based test generates individual examinations from a large bank of items. A form-based examination will consist of a specified set of predesigned test forms that are rotated. The states use both methods, and both are psychometrically acceptable. Although contracted outside experts play a major role in test development in most jurisdictions, the state should have a regular process and procedures for developing and reviewing licensing examinations to ensure that those examinations are properly focused on the minimum competencies required of an entry-level producer. Some items that should be included in the plan include:

1. Procedures to ensure that a job analysis survey that includes input from insurance regulators and the industry is conducted at regular intervals to determine the requirements and work performed by an entry-level insurance producer.
2. Regular, ongoing review and assessment of producer licensing examinations in the event of legislative or regulatory changes that could affect the accuracy of exam content.
3. An annual review of the examination development process conducted with the state and the testing vendor.
4. Depending on test volume, test performance and the need for content changes, either an annual (or at least biannual) substantive review of the examination and the psychometric properties of the test. These efforts should include the involvement of content or test development professionals, department personnel and industry representatives, industry including recent, entry level producers, representatives should include a mix of both recently licensed and more experienced producers.
Developing the Questions

Developing a valid and sound bank of test questions, often called “items,” is perhaps the most critical piece of any testing program. The items need to be at the appropriate level of difficulty. Items should be relevant to the profession and should be effective in evaluating whether the person taking the exam possesses the knowledge, skills and abilities critical to competently performing the job and safely practicing in the profession. To create this balance, most of the states use a combination of local subject-matter experts (SMEs) and content or test development professionals. The local panel should include new and experienced producers to help establish such a balance.

Using multiple item writers to develop test content is a common practice, but it can lead to variation in test item style, format and difficulty. Developing a style guide with templates, development standards and rules can go a long way in improving item consistency, format and variety. Content development training can ensure that writers have the tools they need to develop credible, legally defensible items and templates that can be leveraged to create multiple variations of the same question.

Passing Score vs. Pass Rate

A passing score, sometimes called a “cut score,” is the minimum score one needs to achieve in order to pass the exam. The “pass rate” is the percentage of candidates who actually pass the exam. The test development process will consider data from actual tests and data from reviewers rating the items and exams in evaluating the cut score.

In some of the states, the cut scores are arbitrarily established by rule or regulation. This is not a valid testing practice. Cut scores should be based on data collected through the test-development process. Regulatory licensing exams typically target a level referred to as “minimum” competency rather than “average” competency. Licensing examinations try to determine who has the minimum competency to safely practice in a profession without compromising the health and safety of the public. An arbitrary cut score, which is the practice in some of the states, tends to focus on the average, rather than minimum, competency. Thus, qualified candidates could be cut because they fall below the average, not because their competency is unacceptable.

Exam Scoring

Some of the states administer a one-part or one-score exam, while others administer two-part exams. In the one-part exam, general product knowledge and state-specific content are scored together. In the states with a two-part exam, the candidate must separately pass both the general knowledge exam and the state-specific exam in order to be eligible to apply for a license for the line of authority requested. A third variation is to require the first-time test-taker to pass an exam on state-specific insurance laws and regulations once. All additional lines of authority are tested on general product knowledge only.

Preliminary review of pass rates indicates a tendency for more candidates to fail in the states that require two-part exams. There is no evidence that two-part exams increase consumer protections or that the states that administer one-part exams license producers who do not know applicable state law. The states are encouraged to move to one-part exams to allow for more success among candidates without jeopardizing consumer protections.

Exam Content

As of May 2013, the states have no standard exam curriculum. The NAIC is encouraging more uniform approaches by considering the best practices for testing programs listed at the end of this chapter to be standards for all jurisdictions to work toward. The Producer Licensing (EX) Task Force formed a subgroup of five states to develop a draft national content outline using the life and annuity line of authority as a pilot. The national content outline provides guidance for entry-level subject matter that the states should test for, as well as information that will assist candidates in identifying relevant knowledge to study in preparation for the exam.

Some experts have recommended that examinations should be constructed with the following considerations in mind:

1. The states should not target examinations to an artificially set passing score. A state should determine whether its test is focused on assessing the knowledge needed by potential new producers, and only applicants who lack that
The states should use legally defensible, recognized methodology when establishing a cut score.

2. Prior to releasing items into an exam form, the editing and review process employed is critical. This editing process should include the psychometric evaluation of the cognitive level of the items and the reading level of the items, as well as such editorial issues as grammar, sensitivity and style. Psychometric editing is best performed by test development professionals, not state SMEs or item writers. Individuals trained in the complexity of psychometric editing evaluate items in a different, critical light than SMEs or item writers. It is critical, however, to have all final items reviewed and approved by state and national SMEs in the given field for accuracy and relevancy.

3. Each examination should consist of pre-test questions that are being evaluated for performance and questions that previously have been evaluated (pre-tested) and determined to be statistically effective. Each candidate’s score should be based only on the previously pre-tested and approved questions. Any time used to respond to pre-test items should not be counted against the test-takers, and responses to pre-test items should not be calculated in the test-taker’s score. Pre-test items should not be used as scored items until they have been statistically proven to be effective. The test questions for any new examination should be chosen from the pool of test questions to properly represent the subject-matter outline of the examination.

4. Reports regarding exam pass rates, candidate demographics when collected and number of exams administered should be made available to the public. Reports should include first-time pass success by subject area. Whenever possible, this information should be tracked by, and be made available to, each education provider so they may evaluate their programs and instructors, and be provided with data needed for course development. The states may ask for, but generally cannot require, information on candidate population, gender, ethnicity, education level and income level. When candidate demographics are collected, reports should include the percentage and number of examinees who passed the examination by race, ethnicity, gender, education level and native language. This information is necessary for the selection of future test questions, and will aid in making testing transparent and assessing whether differences in test scores are correlated with relevant demographic factors.

5. A state advisory committee consisting of insurance regulators and the industry—including, where possible, recently licensed producers—should annually (or, if changes are not needed every year, at least biannually) work with the testing vendor to review the questions on each examination form or bank of items for substantive and psychometric requirements. Adjustments should be made to the examination to eliminate any questions that might be inaccurate or unclear, that might test subject matter that is beyond what a new producer should know or that exhibit unsatisfactory psychometric properties.

6. Licensing examinations should be reviewed at least annually, but if, during any rolling 12-month period, a licensing examination exhibits uncharacteristically high or low pass rates (such as less than 60% or more than 80%), unexplained fluctuations in testing volume or other significant deviations, that examination should be reviewed immediately.

A state testing program should include statistical analysis of test items in the field and gather feedback on the candidate performance on the individual items. The most obvious and critical use of this information is to ensure that exams are equivalent, and to evaluate the accuracy with which items differentiate between candidates who are minimally qualified and candidates who are not. The psychometric review can result in the continued use of items, the modification of items or the deletion of items from the bank.

A professional test vendor should use a comprehensive strategy for developing test items and ensuring measurement of the knowledge, skills and abilities necessary for initial insurance licensees to perform their jobs effectively. The steps may include:

1. Conducting a committee-based job analysis.
2. Developing content specifications and weightings.
3. Developing items.
4. Editing and reviewing items with SMEs to ensure items meet the required criteria.
5. Obtaining item difficulty (e.g., Angoff method) estimates to establish a passing score.
6. Developing item sampling groups to structure each examination.
7. Creating equivalent forms.
Test Development Deliverables

A state licensing director should expect to receive the following items to ensure that the testing vendor has provided all items necessary to administer a successful testing program:

1. Finalized task and knowledge statements reflecting the requirements of each licensed insurance position.
2. Content specifications for each licensing examination.
3. A set of approved, relevant and important items for use on each licensing examination.
4. A list of references used to develop the test items.
5. Candidate Information Bulletins (CIBs).
6. A technical report describing the procedures used and results obtained from the test development process for each licensing examination.

Candidate Information Bulletin

A CIB should describe the examinations, examination policies and procedures, and the consequences of violating security procedures. A testing vendor should be capable of making changes to the information contained within the CIB during any contract year at the state’s request.

The CIB should be available at no charge to candidates, trainers and insurers in hard copy or in electronic format via the Internet. The state licensing director should consider including the following topics in the CIB:

1. How to contact the testing vendor.
2. Requirements for taking an examination.
3. How to apply for an examination, including receiving authorization of eligibility from the state, prelicensing education and background checks.
4. Links to current application forms.
5. How to obtain current forms in hard copy (if available in hardcopy).
6. Examination fees.
7. Scheduling procedures.
8. The content outline and format of the examination.
9. Supplies provided at the test center.
10. The time limit for the examination.
11. The scoring system.
13. Examination process and procedures.
14. Appropriate examination-taking strategies (e.g., “There is no penalty for incorrect answers, so be sure to answer every question.”).
15. Appropriate use of scratch paper, calculators and/or other support material.
16. Sample questions.
17. Specific information about taking the test on the computer.
19. List of test centers, alternative test centers and driving directions to each.
20. Procedures for requesting special accommodation.
21. Examination registration forms.
22. Licensing requirements and procedures.
23. Refund policies.
24. Holiday or weather-related test center closures.
25. Instructions about how to contact the state insurance department.

A state should approve each CIB before it is published. The licensing director should work with the vendor to set a timeline that will allow for final publication of an updated CIB in advance of the expiration of the prior edition of the CIB. The new edition should be provided to test preparation trainers at least six weeks in advance of implementation so that training materials can be updated.

Technology Issues

A licensing director should consult with the state’s information technology (IT) staff to ensure that the testing vendor can deliver data to the state insurance department. This is critical when a state changes testing vendors. This also is critical if the
state directs a vendor to send data to a different location than the state insurance department. Any transition should include a testing phase for hardware, software and state insurance department staff.

The state and the testing vendor should jointly agree on a timeline for introducing new or updated examinations. State IT staff also should be consulted.

**Legal Defensibility**

Items developed also must be legally defensible to protect the state in the event of a legal challenge. To protect the state from liability, each exam should be critically reviewed from a content and psychometric perspective to ensure that the exam was developed according to recognized standards. Validation procedures for licensing examinations should be designed to comply with content validation requirements of the EEOC’s Uniform Guidelines on Employee Selection Procedures (29 CFR 1607).

The states should require testing vendors to follow and document standardized methods. This should include appropriate test development personnel in the process. Using the appropriate, credentialed professionals is critical, as there are multiple steps involved in the test development process and various methodologies that can be used for each step. State licensing directors should discuss all options with qualified professionals.

**Vendor Responsibilities**

Test vendors should be able to meet minimum guidelines for sufficient availability, facilities, personnel and openness in terms of providing information related to their operations.

The states, and not the test vendors, must be responsible for all examination content and content outlines. The vendor should provide accessible information regarding the registration system through the Internet, toll-free telephone numbers, interactive voice response, fax and other available technologies. The available information should include permitting candidates to view exam test dates and to access forms and content guidelines without requiring prior payment and scheduling of an exam.

The vendor should promptly provide the state with all pertinent information, including prompt notification of any candidate complaints, changes to test administration, conflicts at examination test sites or other information requested or required by the state.

The vendor should provide quality, accessible facilities, with an established system of examination site supervision that ensures that competent site administrators consistently provide accurate information to applicants.

Where a vendor operates test sites in multiple states, the vendor should permit any applicant to take a state’s examination in another state, under the same conditions that would apply if the exam were taken at an in-state location.

Vendors should be required, on an ongoing basis, to collect the data on customer satisfaction and, if directed by the state, to make those data available to insurance regulators, the industry and the public.

**Test Administration**

The testing process should be fair and accessible for all candidates. A state should consider including the following elements below in its licensing process to ensure applicants have equal access to examinations.

**Secure Administration**

The security of the test center network is important in maintaining the integrity of a test. A vendor should be equipped with adequate security features and qualified test center administrators. Each proctor should be trained and tested on his or her ability to supervise exams. A vendor should have systems in place to ensure the fair, consistent and even administration of the exam in every location. A vendor also should have a method to detect attempts to record questions. For example, a vendor should track multiple examination attempts by individuals to assess if the candidate is intentionally failing the exam so it can be repeated. A vendor should be required to notify the state immediately if the vendor suspects that the integrity of an examination has been compromised.

**Test Locations and Registration**

Test locations should be set up to provide flexibility and convenience. Realizing that the states have different geographic challenges and diverse population density, a state should consider, where possible, requiring the following elements:
1. Testing should be made available at locations convenient to residents of all areas of the state.
2. Test locations should provide enough testing capacity so a candidate can test at the desired location within two to five business days of registration.
3. Exam site hours should include evening and weekend hours.
4. Test vendors should provide regular reports as required by the state detailing site usage and availability data.
5. Test registration should be available online or by telephone and allow for next day testing when space is available. A state should consider tracking telephone hold and wait times to monitor how long callers wait.
6. State guidelines should provide for flexible means for payment of fees for testing, fingerprinting and other licensing. The states should consider methods which facilitate payment by companies.

**Disabilities**

A state should require a vendor to develop a system that accommodates the physically impaired that is not related to a testing candidate’s knowledge of insurance. Visually impaired and hearing-impaired persons should be accommodated through all steps of the licensing process, pursuant to national standards set by the federal Americans with Disabilities Act (ADA).

**Examinations in Languages Other Than English**

Some industry experts suggest caution about using translated or interpreted exams. The material may not directly translate into equivalent terms or meaning. Cultural biases might cause incorrect interpretation of a meaning. Some experts recommend that tests should be developed and administered in English, especially if other materials necessary to perform job duties for the profession (such as contracts) are in English. State licensing directors should review state law and consult with legal counsel about the appropriateness of offering examinations in a foreign language.

**Reporting Examination Results**

State licensing procedures should include guidelines that facilitate the prompt issuance of licenses once an applicant passes a test. Elements might include:

1. Pass/fail notices should be issued at exam sites upon completion of the exam. If an applicant has not achieved a passing score, the applicant should receive immediate notification of failure. The states vary as to whether successful completion is reported with a precise score or merely an indication that the candidate passed the exam. When a candidate does not pass the exam, the state should provide the precise score and the percentage of questions in each subject area that the applicant answered incorrectly.
2. If a state issues a paper license, and if it has been predetermined that an applicant has met all requirements necessary for licensure, including any required fingerprint report, a license should be issued at the exam site, or within 48 hours of completing all necessary requirements.
3. The state should send an email or other timely communication to a candidate to whom a license has been issued outside the test site or provide information to applicants as to how to check online.
4. Within 24 hours of license issuance, the new licensee’s information should be added to the state’s database, and the updated status should be sent to NIPR.
5. The states should work with their vendors to report aggregate results in a way that is more uniform with other states.
6. First-time pass rates should be maintained and made available to the public. First-time pass rates are defined as the percentage of candidates who pass the whole test the first time.
7. In performing background checks, the use of an electronic process should be required whenever possible.
8. In those states requiring fingerprints, where possible, exam sites should have the capability to collect electronic fingerprints.

**Retesting or Notice of Failure**

A state licensing plan should include a method to facilitate prompt retesting of applicants who have failed a test. The “non-passing” notice should break scores out by each subject area. If the candidate requests to make another attempt, an examination should be made available within a reasonable time period.
### Producer Exam Content and Testing Administration Recommended Best Practices for Insurance Regulators

- The states should use accepted psychometric methods including job analysis to determine if the examination content falls within the content domain that a minimally competent candidate of that specific line of authority tested would be expected to know.
- The states should set passing scores (cut scores) and difficulty level using psychometric methods and appropriate SMEs based on what an entry-level producer needs to know.
- The states are encouraged to move to one-part exams to allow for more success among candidates without jeopardizing consumer protections.
- The states should require the test vendor (or other entity responsible for test development) to document the process for ensuring quality control and validity of the examination, including psychometric review and editing and analysis of item bias or cultural and gender sensitivity.
- To allow for meaningful comparison, all jurisdictions should define first-time pass rate as the percentage of candidates who pass the whole test the first time.
- At least annually, reports regarding exam pass rates, candidate demographics when collected and number of exams administered should be made available to the public. Reports should include first-time pass rate, success and average scoring by subject area. Whenever possible, the reports should be available by education provider and provided to them.
- A state advisory committee consisting of insurance regulators and the industry—including, where possible, recently licensed producers—should annually work with the testing vendor to review the questions on each examination form for substantive and psychometric requirements. If, during any other time, any examination results exhibit significant unexplained deviations, the examination should be reviewed.
- The states should work with testing vendors and approve CIBs that describe the examinations and examination policies and procedures, and provide sufficient examination content outline and study references for the candidate to prepare for the examination. Updated editions of the CIB/content outline should be provided to prelicensing education providers at least six (6) weeks in advance of implementation so that training materials can be updated.
- Testing should be made available at locations reasonably convenient to residents of all areas of the state, with registration available online or by telephone and the ability for a candidate to schedule testing within two to five business days of registration.
- Pass/fail notices should be issued at exam sites upon completion of the exam. The fail notice should break out scores by subject area. The state should provide a method to facilitate prompt retesting, while allowing a reasonable time for candidates to review and prepare for retest.
- The states should deliver exams in a secure test center network that employs qualified test proctors.
- The states should set clear performance standards for test vendors and require accountability.
Chapter 9

Lines of Insurance

The Major Lines

A line of authority is a general subject area of insurance that a producer can be licensed to sell. The PLMA identifies and defines seven lines of authority; however, the ULS set forth six lines that are considered major lines of authority, as well as certain core limited lines. Additionally, the ULS set forth standards for non-core limited lines. The states should review all other lines of insurance and consider eliminating them in an effort to become compliant with the ULS. Uniform adoption of the major lines is essential to fully implement NAIC licensing reforms.

The six major lines of authority are defined in the PLMA as follows:

1. Life – insurance coverage on human lives including benefits of endowment and annuities, and may include benefits in the event of death or dismemberment by accident and benefits for disability income.
2. Accident and health or sickness – insurance coverage for sickness, bodily injury or accidental death and may include benefits for disability income.
3. Property – insurance coverage for the direct or consequential loss or damage to property of every kind.
4. Casualty – insurance coverage against legal liability, including that for death, injury or disability, or damage to real or personal property.
5. Variable life and variable annuity – insurance coverage provided under variable life insurance contracts and variable annuities.
6. Personal lines – P/C insurance coverage sold to individuals and families for primarily noncommercial purposes.

Because the ULS also require that each major line be available individually, the states should provide individual examinations for each of the major lines except variable life and variable annuity. It is acceptable for a state also to offer combined exams. The ULS contemplate that each state will require an examination for residents to qualify for all major lines. The states should give examinations only to residents, not nonresidents.

While the ULS do not specifically prohibit an examination for variable life and variable annuity products, most states do not require an examination. This line of authority is usually granted if the applicant holds a life line of authority and has successfully completed the Financial Industry Regulatory Authority (FINRA), formerly known as the National Association of Securities Dealers (NASD), examinations necessary to obtain a state securities license in that state. In most cases, this means successful completion of the FINRA Series 6 and/or Series 7 (according to the specific state’s requirements) and/or Series 63 exams.

The Producer Licensing (EX) Working Group has not specifically stated that states should not require an active state securities license of residents or nonresidents as a condition of granting the variable life and variable annuity products line of authority. The ULS do contemplate that no such requirement shall be imposed. For nonresident applicants, it is not appropriate to pend a request for the variable life/annuity products line of authority to verify existence of the underlying life line of authority in the home state. If a proper request for licensure is received and the applicant is in good standing in the home state with the variable life and variable annuity line of authority, the nonresident license should be granted. If a state cannot verify through the SPLD that the applicant holds a variable authority, it is permissible to pend the application and contact the applicant’s home state to verify the variable authority.

Information regarding an applicant’s status as to securities registration and securities examinations passed currently are easily accessible on FINRA’s public Web site (under “Check Out Brokers & Advisors” at www.finra.org/InvestorInformation/index.htm). Information available includes: employment history; states where the individual is securities licensed; securities examinations passed; and formal and final disciplinary history. To obtain Central Registry Depository (CRD) information regarding pending complaints and unresolved cases, a state insurance department must contact its state’s securities regulator.

---

1 The PLMA does not address title insurance, which is considered a major line by some of the states and a limited line by others.
Limited Lines

A limited line of insurance is a line of insurance that covers only a specific subject matter. Limited line licenses generally have simpler licensing requirements than required by the major lines. Some states require an examination for credit insurance. For the other limited lines, some states require an examination, while some require only a simplified application process. In some states, a business entity is permitted to maintain a limited lines license on behalf of individuals who make the limited line of insurance available to its customers. Often, a limited line is adopted by regulation and not by statute.

The PLMA contains a specific definition for credit insurance and allows states to define other limited lines. The Producer Licensing (EX) Working Group adopted definitions for specific “core” limited lines of insurance for producers, which have become part of the ULS. States are encouraged to adopt the definitions of those limited lines and to review and eliminate as many non-uniform limited lines as possible. The PLMA requires states to grant to a nonresident a nonresident limited line producer license with the same limited line of authority as the license issued by the home state. Many states have adopted a special licensing category to accommodate this type of situation.

The core limited lines are:

1. Car rental insurance.
2. Credit insurance.
3. Crop insurance.
4. Travel insurance.

The ULS provide that examinations are not generally required for limited lines, but that it is acceptable for examinations for areas such as crop and surety. The states should give examinations only to residents, not nonresidents. The ULS specifically state that CE is required for only the major lines of insurance. (See specifics for crop insurance.)

In 2009, the Producer Licensing (EX) Working Group was charged with reviewing limited line licensing issues, with particular focus on: 1) the establishment of a limited lines that encompasses several insurance products where the business of insurance is ancillary to the business of the person offering the product; 2) the licensing requirements of individuals selling limited line products; and 3) the fingerprinting of individuals selling limited line insurance products. Throughout the year, the Producer Licensing (EX) Working Group had discussions; however, no consensus was achieved. As a result, the Producer Licensing (EX) Working Group reported to the Producer Licensing (EX) Task Force and requested further guidance on its charge. For 2010, the Producer Licensing (EX) Working Group was asked to:

Finalize the review of limited-line licensing issues, with particular focus on the following: 1) individually review the licensing requirements for each core limited line; 2) review other limited lines, and determine what licensing requirements should apply to them; and 3) determine if another “catch all” limited line was needed to address licensing requirements for insurance products not already encompassed within the list of limited lines. Updates to the limited line charge may be obtained on the Producer Licensing (EX) Working Group’s web page on the NAIC website.

The NAIC has adopted a specific resolution rejecting a prior request by industry to adopt a new limited line for term life insurance. The full text of the resolution is in the Appendices.

As part of its 2010 charges, the Producer Licensing (EX) Working Group conducted a review of the ULS and adopted several amendments. Specifically related to this chapter, revisions were made to Standard 16 (Lines of Authority), Standard 33 (Definition of Core Limited Lines), Standard 34 (Travel) and Standard 37 (Non-Core Limited Lines).

Recommended Best Practices for Regulators

- Adopt the major lines and the definitions exactly as stated in the PLMA and provide separate testing for each line, except variable
- Allow combined examinations, as appropriate
A. Limited Line of Car Rental Insurance

Under the ULS, car rental insurance is defined as:

[I]nsurance offered, sold or solicited in connection with and incidental to the rental of rental cars for a period of [per state law], whether at the rental office or by pre-selection of coverage in master, corporate, group or individual agreements that (i) is non-transferable; (ii) applies only to the rental car that is the subject of the rental agreement; and (iii) is limited to the following kinds of insurance:

(a) personal accident insurance for renters and other rental car occupants, for accidental death or dismemberment, and for medical expenses resulting from an accident that occurs with the rental car during the rental period;

(b) liability insurance that provides protection to the renters and other authorized drivers of a rental car for liability arising from the operation or use of the rental car during the rental period;

(c) personal effects insurance that provides coverage to renters and other vehicle occupants for loss of, or damage to, personal effects in the rental car during the rental period;

(d) roadside assistance and emergency sickness protection insurance; or

(e) any other coverage designated by the insurance commissioner.

The states vary in their methods of supervising the sale of car rental insurance. In the states that require a license, there are generally three methods in use. The first is a registration requirement through submission of an application. The second is the successful completion of an exam and submission of an application. The states should give examinations only to residents, not nonresidents. Under the third method, a car rental company registers with the state insurance department. The company holds the license and is responsible for supervising the training and testing of its counter agents. The company reports to the department and pays all fees.

B. Limited Line of Credit Insurance

The PLMA defines limited lines credit insurance as:

Credit life, credit disability, credit property, credit unemployment, involuntary unemployment, mortgage life, mortgage guaranty, mortgage disability, guaranteed automobile protection insurance or any other form of insurance offered in connection with an extension of credit that is limited to partially or wholly extinguishing that credit obligation and that is designated by the insurance commissioner as limited line credit insurance.

Credit insurance products are designed to protect the borrower against the risk of not being able to pay a debt. Credit life, disability and involuntary unemployment insurance are typical lines of coverage. These products are generally made available by the creditor at the time the loan transaction occurs. Because the insurance is purchased at the time the borrower completes the loan, policy and certificate forms, premium structures and underwriting conditions are generally simpler than other limited lines of insurance.

Credit insurance is issued under individual and group policies. This allows market flexibility for different distribution systems and variations in product design to insure the different types of credit risks. If an individual enrolls customers under a group insurance policy, the individual must obtain a limited lines license, if a commission is paid. Section 4(B)(2) of the PLMA provides an exception from licensing if no commission is paid to the enroller and the enroller does not engage in

Recommended Best Practices for Regulators

- Allow resident and nonresident limited lines license applications to be filed electronically.
- Eliminate state-specific applications.
- To further reciprocity, report all limited lines licensees to the SPLD.
- Adopt the applicable revisions to the ULS related to limited lines.
selling, soliciting or negotiating.

Section 6(D) of the PLMA provides that each insurer that sells, solicits or negotiates any form of limited line credit insurance shall provide its producers a program of instruction that may be approved by the insurance commissioner.

C. Limited Line of Crop Insurance

Under the ULS, crop insurance is defined as:

Insurance providing protection against damage to crops from unfavorable weather conditions, fire or lightning, flood, hail, insect infestation, disease, or other yield-reducing conditions or perils provided by the private insurance market, or that is subsidized by the Federal Crop Insurance Corporation (FCIC), including multi-peril crop insurance.

There are two types of crop insurance: multiple peril crop insurance (MPCI) and crop hail insurance.

The federal government is involved with crop insurance because a single event (such as drought) often results in multiple losses. Automobile accidents or health problems generally are independent, random events that do not trigger multiple insurance losses. For crop insurance, multiple losses are the norm rather than the exception. For many years, capital requirements to maintain adequate reserves to cover widespread losses were so high that commercial development of MPCI policies by companies was unrealistic. As a result, the federal government created a federally subsidized risk management program.

Multiple Peril Crop Insurance

An MPCI policy provides protection against crop losses from nearly all natural disasters, including: adverse weather conditions; fire; insects, but not damage due to insufficient or improper application of pest control measures; plant disease, but not damage due to insufficient or improper application of disease control measures; wildlife; earthquake; volcanic eruption; or failure of the irrigation water supply if due to an unavoidable cause of loss occurring within the insurance period.

MPCI is subsidized by the federal government and delivered by private insurance companies. The insurer’s functions include hiring and training producers; paying for marketing and advertising; hiring and training loss adjusters; and carrying out loss adjustment activity, billing and collecting premiums, processing and verifying applications, conducting actual production history reviews, processing and verifying acreage reports, paying claims, auditing and verifying claims data, paying uncollected premiums, and maintaining the necessary automated data processing infrastructure to communicate data with the Risk Management Agency (RMA) on a routine basis for all MPCI policies.

The MPCI policy is a contract between the producer and the insurance company and not with the federal government. However, a farmer cannot receive the federal subsidy attached to the program unless the insurance policy followed the federal standards and rates. Like many insurance companies, crop insurance companies have reinsurance agreements to transfer risk to other private companies known as reinsurers. Unlike most other insurance lines, the private insurance companies also transfer some of the risk associated with the crop insurance program directly to the federal government.

There are many MPCI plan options available: yield-based, revenue-based or a combination of both. The basic policy provisions for all these plans, as well as the rates, are set by the FCIC. A combination of commodity markets results and the U.S. Department of Agriculture (USDA) establish the maximum price for each crop each year for insurance purposes (i.e., the value of each bushel in the event of loss).

While the RMA controls pricing and policy forms, producer licensing and enforcement of proper sales practices are left to the states.
Crop/Hail Insurance

Crop/hail insurance is offered through companies licensed by state insurance departments. A private market has existed for crop/hail insurance for more than a century. Companies have developed stand-alone full coverage and deductible crop hail policies, as well as companion policies that function very well in conjunction with the different MPCI plans that are offered at varying coverage levels. The premium rates for these crop/hail policies are determined by historical loss experience and are set by the companies.

Continuing Education

Subsequent to the adoption of the ULS, the Producer Licensing (EX) Working Group considered and agreed that a CE requirement for crop insurance shall not be a violation of the uniform standards. Under federal law, insurance producers selling MPCI are required to attend CE classes each year.

D. Limited Line of Surety

As part of the discussion of limited lines, the Producer Licensing (EX) Working Group made the determination to remove surety as a limited line. Although this determination was made, it is understood that surety is considered a major line by some of the states and a limited line by others.

E. Limited Line of Travel Insurance

Under the ULS (as revised Aug. 6, 2010), travel insurance is defined as:

Insurance coverage for personal risks incidental to planned travel, including, but not limited to:

1. Interruption or cancellation of trip or event.
2. Loss of baggage or personal effects.
3. Damages to accommodations or rental vehicles.
4. Sickness, accident, disability or death occurring during travel.

Travel insurance does not include major medical plans, which provide comprehensive medical protection for travelers with trips lasting six months or longer, including, for example, those working overseas as an ex-patriot or military personnel being deployed.

Standard 34 recognizes and sets the guidelines for the creation of an additional business entity licensing model under the travel limited line licensing structure. This structure creates the concept of a “travel retailer” in which the entity and a certain number of its employees may disseminate travel insurance under the direction of a responsible licensed producer. Said producer maintains responsibility for the training and conduct of any and all associated travel retailer(s).

F. Non-Core Limited Lines

After much discussion about the concept of “auxiliary” or “miscellaneous” lines, the Producer Licensing (EX) Working Group formally adopted Standard 37 as a basis for any future addition of other non-core limited line. The standard states, in part, that:

A state is not required to implement any non-core limited line of authority for which a state does not already require a license or which is already encompassed within a major line of authority; however, the states should consider products where the nature of the insurance offered is incidental to the product being sold to be limited line insurance products. If a state offers non-core limited lines (such as pet insurance or legal expense insurance), it shall do so in accordance with the following licensing requirements. Individuals who sell, solicit or negotiate insurance, or who receive commission or compensation that

Recommended Best Practices for Regulators

- A state adding the travel limited line should do so in accordance with applicable ULS.
is dependent on the placement of the insurance product, must obtain a limited line insurance producer license. The individual applicant must: 1) obtain the limited lines insurance producer license by submitting the appropriate application form and paying all applicable fees as set forth in applicable state law; and 2) receive a program of instruction or training subject to review by the insurance department.

No prelicensing or testing shall be required for the identified non-core limited lines insurance.
Surplus Lines Producer Licenses

In order to operate in a state, P/C insurance companies are generally categorized in one of two ways. An admitted company obtains a certificate of authority to operate in a given state and is fully subject to and regulated by the laws of the state. Its policyholders are protected, at least to some extent, by the state’s guaranty fund.

A nonadmitted company, otherwise known as a surplus lines company, has limited authority to operate in a state. These companies may be required to be eligible in a state but are subject to significantly less regulation. States allow surplus lines companies to operate because they recognize that certain types of insurance, or insurance at certain amounts, are not available from admitted companies. Generally, surplus lines companies are not subject to rate and policy form regulation, and their policyholders are not covered by state guaranty funds.

Under the ULS, a producer who wishes to engage in the sale of surplus lines insurance (SLI) must first obtain a surplus lines producer license. Under the ULS, this is considered a license type and not a line of authority; however, in some of the states, it is treated as a line of authority. The ULS require that a resident producer hold both property and casualty lines of authority before an SLI producer license can be issued. Under the previous reciprocity provisions of the GLBA, surplus lines producers were entitled to reciprocal licensing if they were licensed for surplus lines and in good standing in the producer’s home state. The NAIC uniform application is to be used for application as a surplus lines producer.

Some of the states also require a resident producer placing SLI to complete an examination or post a bond. However, to comply with the reciprocity provisions of Section 8 of the PLMA, these requirements cannot be imposed on nonresidents. States cannot impose an additional CE requirement on nonresident SLI producers.

The Nonadmitted and Reinsurance Reform Act

The federal Nonadmitted and Reinsurance Reform Act (NRRA) was signed into law by President Barack Obama on July 21, 2010, as part of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act, 12 U.S.C. § 5301. The NRRA set federal standards for the collection of surplus lines premium taxes, insurer eligibility, producer licensing and commercial purchaser exemptions. Most of the provisions of the NRRA went into effect on July 21, 2011.

For licensing of surplus lines brokers, the most significant change was to limit the licensing requirements to only the home state of the insured. Specifically, to place a surplus lines multistate risk policy, the broker needs only to be licensed as a surplus line broker in the insured’s home state, not in all of the states where the policy risk is located. The NRRA defines the home state of the insured as “(i) the state in which an insured maintains its principal place of business or, in the case of an individual, the individual’s principal residence; or (ii) if 100% of the premium of the insured risk is located out of the state referred to in clause (i), the state to which the greatest percentage of the insured’s taxable premium for that insurance contract is located.” The definition goes on to clarify that, with respect to affiliated groups, “[i]f more than one insured from an affiliated group are named insureds on a single non-admitted insurance contract, the term ‘home state’ means the home state, as determined pursuant to [clauses (i) and (ii) above], of the member of the affiliated group that has the largest percentage of premium attributed to it under such insurance contract.”

The NRRA also prohibits a state from collecting fees relating to the licensing of a surplus lines broker unless the state participates in the NAIC’s national insurance producer database for surplus lines broker licensure by July 21, 2012. Currently, all states accept applications and renewals for surplus lines broker licenses for individuals through the NIPR and all but one state accept applications and renewals for surplus lines broker licenses for business entities.

Surplus Lines Distribution Systems

Surplus lines insurance is generally produced through one of two distribution systems. One, generally referred to as a retail distribution system, involves a single broker accessing the surplus lines company directly to place insurance. The second, generally referred to as a wholesale distribution system, involves a surplus lines broker that operates as an intermediary between a “retail agent” and a surplus lines company. In the retail distribution system, there is only one producer in a transaction, so that producer would need to conduct the diligent search of the admitted markets prior to accessing the surplus lines markets (unless there is some exception such as a large commercial purchaser or an export list). In the wholesale
distribution system, the diligent search is often conducted by the retail broker, who determines there is no admitted market prior to contacting the surplus lines wholesale broker; however, some of the states have different requirements.

The vast majority of the states take the position that a broker conducting a diligent search would need a P/C agent’s license because it is necessary to solicit insurance, take an application and make a submission to an admitted company. Many states do not require a retail producer to obtain a surplus lines broker’s license unless the broker is going to access the surplus lines companies directly. There are a couple of states that require a retailer to have a surplus lines license before using the services of a surplus lines wholesale broker.

Diligent Search Requirements

The vast majority of the states require a “diligent search” of the admitted market to determine if there is an admitted carrier willing to write the risk, prior to accessing the surplus lines markets. A couple of states have abolished the diligent search requirement. Many of the states require that brokers search those admitted companies that are actually writing the coverages sought. If there is no admitted carrier willing to write the risk, the risk can be placed in the surplus lines markets. Many of the states require an affidavit to be completed documenting that the diligent effort was completed. Recently, a number of the states have replaced the affidavit, which was sworn under penalty of perjury, with a report from the surplus lines licensee that the diligent search was conducted. Some of the states also have replaced the requirement that the affidavit (or report) be filed with the insurance department or Surplus Line Association (SLA) with a requirement that the report of the diligent search be maintained in the office of the broker and available for audit by the insurance department.

Many of the states specify that the diligent search can be conducted by the retail broker (commonly called producing broker), when a surplus lines wholesaler accesses the surplus lines markets. The retail broker has access to admitted markets. The retailer uses the services of a surplus lines wholesale broker only after the retail broker has determined that the admitted markets are not willing to underwrite the risk.

The most common diligent search standard requires declinations from three admitted carriers, but as many as five are required. Other states simply require the producing broker to make an effort, a reasonable effort or a good faith effort to place the coverage in the admitted markets. A couple of states require that the insurance not be procurable after a diligent effort has been made to place the coverage among a majority of insurers, but this standard has been called into question as unclear and impractical. A number of exceptions to the diligent search requirement exists in state law, and the NRRA implemented a national exception to the diligent search rules for insureds that qualify as exempt commercial purchasers. Twenty-two states have laws authorizing an “export list” of coverages that the insurance commissioner has determined are not generally available in the admitted markets. Coverages on the export list can be placed in the surplus lines market without a diligent search. In some of the states, the state insurance department is required to conduct an annual public hearing regarding the export list. The purpose of the hearing is to take testimony on the export list to determine whether any items should be added or removed.

The former NARAB (EX) Working Group updated the NAIC’s standard for determining compliance with the GLBA’s previous reciprocity provisions. In a report that was adopted by the NAIC in September 2009, the Working Group refined its approach to reciprocity relating to any underlying P/C licensing requirements for nonresident surplus lines producers. The Working Group determined that if a state requires the surplus lines producer to perform the diligent search of the admitted market, then the state may require the nonresident surplus lines producer to obtain an underlying nonresident P/C license in addition to a nonresident surplus lines license. However, the Working Group determined that a state may not require a nonresident surplus lines producer also to obtain a nonresident P/C license if they do not perform the diligent search. Many surplus lines producers do not perform diligent searches because the retailer has already conducted the diligent search, and the law does not require a second diligent search. In such instances, the surplus lines producer is not accessing the admitted market. Consequently, the Working Group determined that it was inconsistent with the previous GLBA reciprocity requirements to require an underlying P/C license for a surplus lines wholesale broker unless they are required by law to conduct a diligent search or conduct diligent searches in their agency.

The NRRA established a single “exempt commercial purchaser” exemption from state diligent search requirements that is applicable in every state. As of July 21, 2011, a diligent search in the admitted market is not required to place a policy for an exempt commercial purchaser if: 1) the broker has disclosed to the exempt commercial purchaser that coverage may be available from the admitted market, which may provide greater protection with more regulatory oversight; and 2) the exempt commercial purchaser has requested in writing that the broker procure/place such coverage with a surplus lines insurer.

An “exempt commercial purchaser” is defined in the NRRA as a purchaser of commercial insurance that:
1) employs or retains a qualified risk manager to negotiate insurance coverage; 2) has paid aggregate nationwide commercial P/C insurance premiums in excess of $100,000 in the immediately preceding 12 months; and 3) meets at least one of the following criteria: (i) possesses a net worth in excess of $20 million (as adjusted for inflation); (ii) generates annual revenues in excess of $50 million (as adjusted for inflation); (iii) employs more than 500 full-time employees per individual insured or is a member of an affiliated group employing more than 1,000 employees in the aggregate; (iv) is a not-for-profit organization or public entity generating annual budgeted expenditures of at least $30 million (as adjusted for inflation); or (v) is a municipality with a population of more than 50,000.

A number of the states elected to maintain their statutory exemptions from diligent search requirements, which were sometimes known as industrial insured exemptions. If the state’s industrial insured exemption was more liberal than the NRRA exempt commercial purchaser (ECP) exemption, then the state’s requirements were not in conflict with the NRRA, and the exemption in the NRRA would not apply.

SLI producers are routinely subject to additional state administrative requirements that are considered to be outside the scope of licensing reciprocity considerations or the ULS. The regulations regarding the administration of surplus lines are different from other types of insurance because the states typically require the licensed surplus lines producers to perform certain compliance activities that would usually be the responsibility of the licensed insurance company in a transaction in the admitted market. In a surplus lines transaction, the compliance obligations are imposed upon the producer because the producer is the licensed party. The surplus lines insurer is unlicensed and often referred to as a “nonadmitted insurer” in some of the states or “unauthorized insurers” in other states.

There are additional administrative requirements in some of the states for licensed surplus lines producers that apply once the coverage is placed. These may include:

1. Filing reports with state insurance departments or state stamping offices of placements made.
2. Collecting and paying surplus lines premium taxes.
3. Maintaining a record of all surplus lines placements made.
4. Providing the insured with a disclosure stating that the policy he or she has purchased is being issued by an insurer that is not licensed in the state, is not subject to the financial solvency regulation and enforcement that apply to the state’s licensed insurers, and does not participate in any of the insurance guarantee funds created by the state’s law.
5. Using a designated stamping office.
6. Including declaration or binder pages with the surplus lines tax filings.
7. Filing a report stating that no policies were written that are known as “zero reports” (as discussed later in this section).

In order for a producer to place business in the surplus lines market, the producer must first determine that the company is an eligible surplus lines company in a given state. Most of the states require that a surplus lines company be deemed “eligible” by meeting certain financial criteria or by having been designated as “eligible” on a state-maintained list. Prior to the enactment of the NRRA, state eligibility standards varied widely from state to state.

As of July 21, 2011, a surplus lines transaction is subject only to the eligibility requirements of the NRRA. The NRRA eligibility requirements are based on two provisions from the Nonadmitted Insurance Model Act (#870).

Specifically, the NRRA requires surplus lines carriers to comply with Section 5A(2) and Section 5C(2)(a) from Model #870, which require an insurer to be authorized in its domiciliary state to write the type of insurance that it writes as surplus lines coverage in the state where it is eligible and to have capital and surplus, or its equivalent, under the laws of its domiciliary jurisdiction, exceeding the greater of: 1) the minimum capital and surplus requirements under the law of the home state of the insured; or 2) $15 million. The insurance commissioner in the insured’s home state may reduce or waive the capital and surplus requirements (down to a minimum of $4.5 million) after the insurance commissioner makes a finding of eligibility based on several factors set out in Model #870, such as the quality of management, the surplus of a parent company and reputation within the industry.

In addition to eligibility requirements for U.S. domiciled insurers, the NRRA requires the states to permit the placement of surplus lines coverage with surplus lines companies organized in a foreign country (alien insurers) that are listed on the NAIC Quarterly Listing of Alien Insurers. The states cannot prohibit a broker from making a placement with an NAIC-listed
alien insurer. A state also may allow placement of coverage with alien insurers not on the NAIC list. A number of the states have authority to individually approve an alien carrier that is not listed on the Quarterly Listing of Alien Insurers.

The Quarterly Listing of Alien Insurers is available for reference and download on the NAIC Products – AVS, Data & Publications website at http://www.naic.org/prod_serv_alpha_listing.htm# (Quarterly Listing of Alien Insurers)

Premium Taxes

Surplus lines premium tax generally is the obligation of either the policyholder or the surplus lines producer, depending on the applicable state law. In all states, the producer or the insured, rather than the insurance company, remits the surplus lines tax. If the policy covers risks that are located entirely in one state, the tax is assessed at that state’s tax rate.

Under the NRRA, the home state of the insured has sole regulatory authority over the collection of surplus lines premium taxes. The NRRA prohibits any state other than the home state of the insured from requiring any premium tax payment for surplus lines insurance.

The NRRA permitted, but did not require, allocation of the surplus lines taxes among the states where the exposure was located. The states initially pursued three different approaches to allocation of taxes following the adoption of the NRRA: 1) the Nonadmitted Insurance Multi-State Agreement (NIMA); 2) the Surplus Lines Insurance Multi-State Compliance Compact (SLIMPACT); and 3) taxing and keeping 100% of surplus lines premium tax on policies in the home state of insureds. NIMA is no longer operational and SLIMPACT never became operational. The prevailing rule is that states are taxing and keeping 100% of the premium. The NRRA requires surplus lines brokers to adhere to the law of the home state of the insured to determine the amount of premium tax owed on a surplus lines transaction and for any other regulatory requirements the state may require in connection with the payment of the premium tax, such as the timing of tax payments and whether the state requires the submission of risk allocation information for multi-state transactions. The NRRA requires surplus lines brokers to submit the premium tax payment on a surplus lines transaction only to the insured’s home state. In the case of a state that has joined NIMA, the payment will be made to the clearinghouse in accordance with the home state’s law. Should SLIMPACT become operational, it also could elect to require multistate payments to be made to the clearinghouse.

Many of the states require brokers to submit documentation regarding allocation by state of the risks covered by a surplus lines transaction. If the home state of the insured is a state that has joined NIMA, the broker will be required to use the NIMA risk-allocation formula. If the home state is a state that has joined SLIMPACT, the broker will be required to use the SLIMPACT risk-allocation formula. As of May 2013, both NIMA and SLIMPACT have adopted the same allocation formula. Other states require the broker to submit allocation data in accordance with individual state laws and regulations, but the vast majority of states do not require allocation data because there are very few states allocating premium at this time. In some of the states, taxes are paid to a state agency other than the insurance department, such as the department of revenue.

Guaranty Fund Warning

Nearly all of the states require a disclosure regarding the unavailability of guaranty fund coverage for a surplus lines policyholder, even if the state represents a small portion of the risk. Prior to the NRRA, when a multistate risk was involved, the company would be required to include several pages of guaranty fund notices, many of which had nearly the same language with minor variations. Brokers may choose to continue to use this approach following the enactment of the NRRA, but the NRRA initiated a compliance system that requires compliance only with laws of the home state of the insured.
As an example, a typical disclosure statement is as follows:

NOTICE TO POLICYHOLDER

This contract is issued, pursuant to Section of the (State) Insurance Code, by a company not authorized and licensed to transact business in (State), and as such, is not covered by the (State) Insurance Guaranty Fund.

After review of this and other issues by a special NAIC subgroup in 2006, the Producer Licensing (EX) Working Group adopted its recommendation that, on a multistate risk, the home state’s disclosure should fulfill all other states’ disclosure requirements.

Stamping Offices

Stamping offices are entities that are not governmental agencies but whose existence is authorized by law. These offices act as the liaison between the surplus lines producer and the state insurance departments. The stamping offices have varied responsibilities, which may include evaluation of insurance companies for inclusion on a white list, review of surplus lines policies and education. Stamping offices also provide reports of premiums and taxes to the state insurance department.

Stamping offices are nonprofit and are funded by stamping fees assessed on each policy of surplus lines insurance written in the state. As of April 2017, there are stamping offices in 14 states.

Zero Reports

In some of the states, a producer is required to file a report, known as a “zero report,” stating that the producer has not placed any SLI business during a specified time period.

In 2006, a special NAIC study group documented that five states require this report monthly, 12 quarterly, seven semi-annually and 27 annually. The states also use the reports for different recording purposes, so it was not determined if it would be possible to eliminate these reports altogether. However, the study group concluded and recommended to the Producer Licensing (EX) Working Group that zero reports be eliminated. The group also recommended further study to determine feasibility of any other use of a zero report. As of January 2017, the Producer Licensing (EX) Working Group has not taken any formal action on this issue.
Chapter 11

Appointments

An appointment is a registration with the state insurance department that a producer is acting on behalf of an insurer. The PLMA contains several sections related to appointments. Section 14 of the PLMA establishes the requirement that a producer acting as an agent of an insurer must have an appointment. This is an optional provision and applies only in those states that require appointments. Section 15 of the PLMA establishes a procedure for the reporting of appointment terminations. The GLBA, as modified in 2015, prohibits any state other than a producer’s home state from imposing any appointment requirements upon a member of NARAB.

In 2002, the Producer Licensing (EX) Working Group adopted a uniform appointment process. The full text is included in the Appendices and is available on the Producer Licensing (EX) Working Group’s web page. This process is referred to in the ULS. The key elements include:

1. States should allow electronic filing of appointments and appointment terminations. Paper filings are discouraged.
2. States should establish a billing system for payment by insurers of initial appointments.
3. States shall allow insurers to select the effective date of the initial appointment.
4. States shall require insurers to follow a prescribed timeline to file appointments.
5. States shall require only one appointment or termination form or transaction per producer per company. (At this writing, appointments by company group are not available.)
6. States shall require insurance companies to submit terminations to the insurance department in accordance with the requirements of Section 15 of the PLMA.
7. States shall require that, if a producer is terminated for cause, the insurer must submit supporting documentation. Any information received by the insurance department must remain confidential in accordance with Section 15 of the PLMA.

In states that are required to renew appointments, the key elements include:

1. States shall provide or publish a pre-renewal notice to insurers informing them that appointment renewals are imminent.
2. At the time for renewal, a state will deliver an invoice. The invoice may not be altered, amended or used for appointing or terminating producers.
3. Insurers shall return the invoice and the payment to the department or its designee.
4. States shall establish a dispute resolution process to accommodate errors after the fact.

Appointment Terminations

Section 15 of the PLMA imposes a requirement on insurers to report terminations of producer appointments. Section 15 requires that the insurer report a termination within 30 days of its occurrence. If a termination is for any of the reasons listed in Section 12 (License Denial, Nonrenewal or Revocation) of the PLMA, insurers are required to submit a detailed report to the state and a copy of the report to the producer. Section 15 (E) grants immunity from civil liability for good-faith reporting to insurers and insurance regulators. Reports filed under Section 15 are considered confidential.
### Recommended Best Practices for Insurance Regulators

- Automatically terminate appointments if a license goes inactive for any reason.
- Eliminate fees for appointment terminations and instead assess all charges at the time of an appointment. This will eliminate delays in cancellations.
- Do not require an appointment as a condition of licensure. The PLMA and the ULS provide that a producer can hold a license without holding an active appointment.
- Require only one appointment or termination form or transaction for each company for each producer per state.
- Sub-appointments and Business Entity appointments are discouraged.
- Immediately accept terminations for cause and refer them for investigation. States should follow the procedures as outlined in the PLMA. No advance notice should be required to the producer or the state insurance department.
- Use electronic filing for appointments, terminations and renewals, to the extent possible, to eliminate delays and increase efficiency.
Chapter 12

Business Entities

Prior to the PLMA, most states used the term “insurance agency” to refer to the business structure used by insurance producers. Under the PLMA, the term “business entity” (BE) is used. This term is intended to cover a broad range of legal business operating structures. BEs are considered to be producers under the PLMA.

Section 2(A) of the PLMA defines a BE as a corporation, association, partnership, limited liability company, limited liability partnership or other legal entity.

The Producer Licensing (EX) Working Group has adopted a uniform application form that is the standard for all states for resident and nonresident BE applications. Section 6(B) of the PLMA provides further guidance about the licensing of BEs:

A BE acting as an insurance producer is required to obtain an insurance producer license. Application shall be made using the Uniform Business Entity Application. Before approving the application, the insurance commissioner shall find that:

1. The BE has paid the fees set forth in [insert appropriate reference to state law]; and
2. The BE has designated a licensed producer responsible for the BE’s compliance with the insurance laws, rules and regulations of this state.

Since BEs are considered producers, the reciprocity issues discussed in other sections also apply to BEs. States should not require additional attachments to the application that might interfere with reciprocity.

A common issue that arises with resident and nonresident BE licensing is the role of the secretary of state (SOS) and the state corporation statutory requirements. Most states have adopted a Model Corporation Law that requires resident and nonresident businesses to register with the state corporation department. The issue for state licensing directors is whether the state insurance department should require some proof of registration with the SOS as a pre-condition to licensing. The NAIC legal department has studied this issue extensively and advised the Producer Licensing (EX) Working Group that states should not require items such as articles of incorporation or proof of registration with the SOS as a pre-condition to licensing for nonresident BEs.

The PLMA does require that all producers, including BEs, notify the insurance commissioner prior to using an assumed name. Section 10 of the PLMA states:

An insurance producer doing business under any name other than the producer’s legal name is required to notify the insurance commissioner prior to using the assumed name.

The uniform appointment process as adopted by the Producer Licensing (EX) Working Group does not specifically address BEs. Section 14 of the PLMA states that a producer acting as an agent of an insurance company must be appointed. States vary in the interpretation of these guidelines. This issue is one that the Producer Licensing (EX) Task Force considered in 2010 as part of its efforts to streamline BE licensing. In the absence of specific guidance from the Producer Licensing (EX) Working Group, the guidelines discussed in the paragraphs below are suggested.

Insurance regulators should balance the cost of a regulatory requirement with the benefit that requirement adds to consumer protection. If detailed information is collected, such as several levels of appointments, that information should be a meaningful part of the state insurance department’s consumer protection plan. If information is only rarely used in support of investigations, it may not be cost-effective to collect that information and require staff to compile it and process it. During a recent assessment of state insurance department licensing units, it was often found that information about affiliations and branch offices often required at the time of application was rarely used. Sub-appointments and BE appointments are discouraged.

Just as the uniform appointment process contemplates that only one appointment will be required for an individual producer no matter how many types of products that producer sells for a given company, if a state requires appointments for a BE, then
the state should require only one appointment per BE per company—no matter how many types of products that BE sells for a given company.

Section 6(B)(2) of the PLMA requires a BE to designate a licensed producer as responsible for compliance. This is commonly referred to as the designated responsible producer (DRP). There is no provision in the PLMA to require multiple DRPs if the BE chooses to write multiple lines of insurance. For example, if a DRP holds a life LOA only, and an affiliated producer is authorized to sell P/C products, it is not necessary for a DRP with a P/C LOA to be named as a second DRP.

The PLMA does not give specific guidance on appropriate action to take when a notification is received that the DRP has lost their home state license. A recommended practice is to send a notification to the BE and inform it that the BE license will go inactive unless a new DRP is named and approved within a reasonable number of days.

A BE has an ongoing responsibility to report misconduct of the BE or any of its affiliated producers. Section 12(c) of the PLMA states:

The license of a BE may be suspended, revoked or refused if the insurance commissioner finds, after hearing, that an individual licensee’s violation was known or should have been known by one or more of the partners, officers or managers acting on behalf of the partnership or corporation and the violation was neither reported to the insurance commissioner nor corrective action taken.

Chapter 13
Temporary Licenses

Section 11 of the PLMA contains a provision that allows a state insurance director to issue a temporary license to the survivor of a producer if the insurance commissioner deems it necessary for servicing the deceased producer’s customers.

The license is limited to 180 days and also may be limited in scope by the insurance commissioner. The intent of this section is to wind up the business affairs of the producer and not to indefinitely continue the decedent’s insurance business.

The PLMA gives three examples of persons eligible for a temporary license:

1. The surviving spouse or court-appointed personal representative of a licensed insurance producer who dies or becomes mentally or physically disabled to allow adequate time for the sale of the insurance business owned by the producer, or for the recovery or return of the producer to the business, or to provide for the training and licensing of new personnel to operate the producer’s business.
2. A member or employee of a BE licensed as an insurance producer, upon the death or disability of an individual designated in the BE application or the license.
3. The designee of a licensed insurance producer entering active service in the armed forces of the U.S.

The insurance commissioner also is given discretion to grant a temporary license in any other circumstance where the insurance commissioner deems that the public interest will best be served by the issuance of this license. The insurance commissioner also may require the temporary licensee to have a licensed producer as a sponsor.

Chapter 14
Continuing Education

The completion of CE is the method used by state insurance regulators to ensure continued competence of producers. Under the previous GLBA reciprocity requirements, a state had to recognize a producer’s completion of a CE requirement in the producer’s home state as satisfying the other state’s CE requirement for license renewal. The only exception was if the producer’s home state refused to provide reciprocity to another state.

Some states have adopted special training requirements for specific lines of insurance. When such a requirement exists, it is typically imposed on resident and nonresident producers selling a specific insurance product. A specific CE standard, which is derived from federal mandates, may be imposed on nonresidents such as for long-term care insurance (LTCI), annuity, flood or crop insurance and would not violate the ULS.

Section 16(B) of the PLMA specifically states:

A nonresident producer’s satisfaction of his or her home state’s CE requirements for licensed insurance producers shall constitute satisfaction of this state’s CE requirements if the nonresident producer’s home state recognizes the satisfaction of its CE requirements imposed upon producers from this state on the same basis.

Under the ULS, producers are to complete 24 credits of CE for each biennial compliance period. Three of the 24 credits must be in ethics. Fifty minutes is equal to one credit hour of CE. If applicable, the CE compliance period should coincide with the license renewal. The ULS indicate that the license term should be tied to the birth date or birth month. Calculation of one credit hour of CE should be based on the NAIC Guidelines for CE. If applicable, the CE compliance period should coincide with the license renewal. The ULS indicate that the license term should be tied to the birth date or birth month.

CE is required if the producer holds one of the six major lines of authority contained in the PLMA, but it is not required for each line of authority. For example, if a producer holds a life and a property line of authority, the requirement for renewal is 24 credits. If a producer holds only the life line of authority, the requirement for renewal is 24 credits. States may limit the subject area requirements for CE. Some states prohibit CE credit for training on sales techniques. Generally, CE is not required for limited lines. Under the ULS, producers may repeat CE courses for credit in successive renewal terms but are not permitted to take a course for credit more than once in the same license continuation period. States must accept both classroom study and verifiable self-study. States should not impose a limit on the use of self-study courses.

Producers and CE providers must submit evidence of course completion in the method specified by the insurance commissioner. Some states require the producer to present a certificate of completion at the time of license renewal. Many states require the CE provider to report attendance. Under this system, a producer is required to present only the attendance certificates if there is a discrepancy. Another option is to require producers to self-certify completion and then verify compliance by random desk audits.

The PLMA and the ULS contain two exemptions from CE requirements. The exemptions are an inability to comply due to military service and/or a demonstration of an extenuating circumstance, such as medical disability. States with waivers for professional designations should consider allowing CE credits for filed and approved courses used to obtain and maintain professional designations.

Some states grant an extension instead of an exemption. This decision is left to each state to decide.

Course Approvals

The Producer Licensing (EX) Working Group has adopted standards for course approval and reciprocity in filing of courses. States are to follow the standards set forth in the Continuing Education Reciprocity (CER) process as adopted by the Producer Licensing (EX) Working Group. Under a reciprocity filing, states are to accept the number of credits awarded by another state and treat a request for reciprocity as a registration. Only the home state of the CE provider is to perform a content review of the course filing. The Appendices contain information on CER and the current filing forms. The most current information on CER can be found on the Producer Licensing (EX) Working Group web page.
States vary in their method for course content approval. Some states use outside vendors, and others do the course reviews internally. The Producer Licensing (EX) Working Group has not adopted any guidelines on methods for approving classroom courses.

The Producer Licensing (EX) Working Group has adopted guidelines for approval of online and self-study courses. The goal of these standards is to deliver functional computer-based Internet courses that offer quality insurance and/or risk management material in a password-protected online environment.

The key elements are:

1. Material that is current, relevant and accurate, and includes valid reference materials, graphics and interactivity.
2. Clearly defined objectives and course completion criteria.
3. Specific instructions to register, navigate and complete the coursework.
4. Technical support or provider representative available during business hours.
5. A process to authenticate student identity.
6. A method for measuring the student’s successful completion of course material and for evaluating the learning experience.
7. A process for requesting and receiving CE course-completion certificates.

The standards call for an examination that is proctored by a disinterested third party. The standards also provide several methods to compute the number of credits that should be awarded. The standards also recommend acceptance of courses that are part of a program that is part of a nationally recognized professional designation. For designation courses, the course should receive credit hours equivalent to hours assigned to the same classroom course material.

The Continuing Education Recommended Guidelines on Online and Self-Study is included in the Appendices.

The ULS prohibit CE providers from advertising CE programs until state course approval is received.

The Appendices contain a sample list of questions and answers frequently asked by insurance producers about CE requirements.

**Continuing Education Providers**

A state should have a process for registering and qualifying persons who wish to be recognized as CE providers. The process should include duties, responsibilities and performance standards for CE providers. An aspiring CE provider should demonstrate an ability to deliver quality instruction and to comply with all reporting and course supervision requirements. These standards should also contain the conditions under which a CE provider may be removed from the state’s approved provider list.

The Appendices contain a sample outline of instructions to CE providers.

### Recommended Best Practices for Insurance Regulators

- Require CE providers to electronically report class attendance to the state insurance department or its designated vendor.
- Set a reasonable deadline for CE providers to deliver electronic reports.
- Require CE providers to promptly issue attendance certificates (or certificate of completion for self-study courses) and require producers to retain them. The certificates should be sent only to the state insurance department in the event of a dispute.
- Provide access for producers and insurers to department records to monitor CE credits on file.
- Implement an audit program to observe and evaluate CE providers and instructors.
- Participate in the NAIC Personalized Information Capture System (PICS) to receive alerts or monitor actions against existing licensees.
Chapter 15

Reporting of Actions and Compensation Disclosure

Reporting of Actions

Section 17 of the PLMA requires a producer to report, to all states in which the producer is licensed, any administrative action taken against the producer in another jurisdiction or by another governmental agency in this state within thirty (30) days of the final disposition of the matter. Producers also are required to report any criminal prosecution of the producer taken in any jurisdiction within 30 days of the initial pretrial hearing date.

The challenge for producers is that it can be difficult to ensure that all relevant states received the report. NIPR has created an electronic solution, called Reporting of Actions (ROA), to facilitate distribution of one report to multiple states. States should encourage the use of this electronic process to save time and create an electronic record of timely submission.

State licensing directors should have a method to receive these reports and refer them for investigation. The director should consider giving staff limited authority to review and clear reports that include violations such as traffic citations or certain misdemeanors.

<tbody>
<tr>
<td>• Use the Attachment Warehouse/Reporting of Action system to receive electronic notifications to alert a state when an individual or business entity producer has added information into the Attachment Warehouse since their initial entry regarding administrative, criminal or civil actions.</td>
</tr>
</tbody>
</table>

Compensation Disclosure

Section 18 of the PLMA requires disclosure where the producer receives any compensation from the customer for the placement of insurance or represents the customer with respect to that placement. This section contains several specific definitions and exceptions to the disclosure requirement. The Producer Licensing (EX) Working Group has not developed any formal guidance on the implementation of Section 18, but the NAIC issued an FAQ document to give additional guidance. This FAQ is in the Appendices. State licensing directors should confer with their legal counsel as to appropriate methods for implementing this section.
Chapter 16

License Renewal and Reinstatement

License Renewal

Under the PLMA, the general rule is that a producer license remains in effect unless suspended, cancelled or revoked. All states have a procedure for individual producers to verify compliance with CE requirements. In states that renew licenses, the CE compliance period should coincide with the license renewal.

The Producer Licensing (EX) Working Group has adopted a uniform license renewal application that is recommended for use by states that renew producer licenses. The current version of the application can be found on the Producer Licensing (EX) Working Group web page. States should use the data elements from the uniform renewal application, whether renewal is done via paper application or electronically.

The previous reciprocity provisions of the GLBA also applied to license renewal of nonresidents. The process should be similar to initial licensing:

1. The proper application and fee are submitted.
2. If the answers to any of the questions on the renewal application indicate conduct prohibited by Section 12 of the PLMA, a state can require additional documentation.
3. No other attachments should be required.

A number of states use the electronic license renewal process. This process automatically checks the NAIC and NIPR databases to verify the producer’s standing in the home/resident state. The NIPR process uses the data elements from the uniform renewal application.

The PLMA contains a special process for producers who cannot comply with CE requirements due to military service or other extenuating circumstances.

Reinstatement

The PLMA allows a producer to reinstate a lapsed license within 12 months of expiration. No examination is required as long as the producer was otherwise eligible to renew. The PLMA also provides that a penalty fee can be assessed.
Chapter 17

Post Licensing Producer Conduct Reviews

Section 12 of the PLMA contains a list of 14 reasons a producer may be disciplined. The insurance commissioner is given authority to take administrative action against a producer who commits any of these acts. Disciplinary action may include suspension, revocation or refusal to renew the producer license. Some states have added additional provisions to this list. For example, if a state does not align the CE compliance term with license renewal, it may be necessary to commence an administrative action to suspend the producer’s license for failure to timely complete CE. In some states, insurance departments are required to suspend the license of any individual who fails to pay student loans on a timely basis.

States should use caution in adding additional disciplinary reasons and should carefully review the requirements of the ULS. The full text of the PLMA can be found in the Appendices.

After a license is issued, an insurance regulator may become aware of potential violations of Section 12 in several ways:

1. A licensed producer notifies the insurance regulator of pending criminal charges.
2. The insurance regulator receives a notice from PICS indicating that a nonresident producer failed to disclose criminal charges.
3. A PICS Notice is received of previously unreported administrative action.
4. A letter is received from the producer informing of an administrative sanction by another state or FINRA.
5. The insurance regulator receives subsequent arrest or conviction information from the state’s department of justice (DOJ).

The following considerations should be taken into account:

1. If the producer is a nonresident, the insurance regulator should consider what, if any, action was taken by the producer’s resident state or FINRA.
2. Whether the criminal charge or administrative action indicates that the producer is or may be a danger to consumers.
3. Whether the charge involves theft or other financial fraud, or involves an activity that threatens the safety of consumers, such that action should be taken immediately to revoke or suspend the producer’s license.
4. Whether it is appropriate to contact the producer and request a voluntarily surrender of the license.
5. If the producer failed to report an action, the insurance regulator should consider contacting the producer and request an explanation from the producer. Technical violations (e.g., bad address, failure to timely report) generally do not merit formal action. However, the failure to report an action in itself can be cause for administrative penalty or a warning letter, depending on the particular state’s statutes and regulations.
6. Whether the individual did not disclose previous criminal or administrative actions taken in response to the answers to the background questions on any application.

License Reinstatement or Reissuance After Disciplinary Action

Reinstatement of a producer license means the producer’s previous license is re-activated and will expire at the end of the license term. Reissuance of a license means the issuance of a new license with a full license term.

Reinstatement or reissuance of a license after disciplinary action usually is not automatic. A producer whose license has been revoked or suspended by order, or who forfeited a license in connection with a disciplinary matter, should be required to make a written request to the insurance commissioner for reconsideration of the action taken on the license whether it be reinstatement or reissuance in accordance with the terms of the order of revocation or suspension or the order accepting the forfeiture.

When a producer’s license has been suspended for a period of time that extends beyond the producer’s license expiration date, reinstatement is not an option. The producer must request reissuance of a license and should not be allowed merely to apply for a new license by passing an examination and submitting a new application.

The producer’s request for reinstatement or reissuance must include sufficient information to allow the insurance department to determine whether the basis of the revocation, suspension or forfeiture of the applicant’s license no longer exists and whether it will be in the public interest to grant the request for a new or reinstated license. The burden of proof to establish such facts is on the producer. In most states, the producer will have a right to an administrative hearing if the reinstatement request is denied.
Some states allow a license to be voluntarily forfeited in lieu of compliance with an order of the insurance commissioner. In this scenario, a request for voluntary forfeiture of a license should be made in writing to the insurance commissioner. The written consent of the insurance commissioner usually is required.

Forfeiture of a license is effective upon submission of the request, unless a contested case proceeding is pending at the time the request is submitted. If a contested case proceeding is pending at the time of the request, the forfeiture becomes effective when and upon such conditions as required by order of the insurance commissioner. A forfeiture made during the pendency of a contested case proceeding is usually considered a disciplinary action subject to reporting to RIRS.

**Collaboration and Referrals Among Insurance Regulators**

There are several NAIC tools to facilitate communication about enforcement actions among insurance regulators.

The NAIC’s Market Actions (D) Working Group (MAWG) identifies and reviews insurance companies that are exhibiting or may exhibit characteristics indicating a current or potential market regulatory issue that may affect multiple jurisdictions. The Working Group determines if regulatory action should be taken and supports collaborative actions in addressing problems identified.

The NAIC has adopted the *Market Regulation Handbook* to guide state insurance regulators in the conduct of investigations and enforcement activities. The *Market Regulation Handbook* also gives guidance to market conduct examiners on some licensing issues. The Producer Licensing (EX) Working Group has advised examiners that insurers should not be required to keep a hard copy of each individual producer license. Under the PLMA and the *Market Regulation Handbook*, insurers and insurance regulators are directed to rely on the SPLD to verify license status.

Adjusters

An adjuster is a person who investigates claims, determines coverage, examines relevant documents and inspects property damage. An adjuster also may determine the amount of a claim, loss or damage payable under an insurance contract or plan. An adjuster often settles or negotiates settlement of the claim. In some states, the adjuster’s authority is limited to a specialty area such as auto, homeowner, workers’ compensation or crop insurance.

There are three-four kinds of adjusters: 1) public; 2) independent including crop; and 3) company (sometimes called staff adjusters). Public adjusters represent the insured, while independent and staff adjusters represent the insurer. More than 30 states require licensure of one or more of these types of adjusters.

Public adjusters directly contract with the person who is seeking coverage or benefits under an insurance policy or other kind of insurance plan. The role of a public adjuster is to represent an insured or claimant in the settlement of a claim. The NAIC has adopted the Public Adjuster Licensing Model Act (#228).

Under the model, a public adjuster is defined as:

“Public adjuster” means any person who, for compensation or any other thing of value, acts on behalf of an insured by doing any of the following:

1. Acting for or aiding an insured in negotiating for or in effecting the settlement of a first-party claim for loss or damage to real or personal property of the insured.
2. Advertising for employment as a public adjuster of first-party claims or otherwise soliciting business or representing to the public that the person is a public adjuster of first-party claims for loss or damage to real or personal property of an insured.
3. Directly or indirectly soliciting the business of investigating or adjusting losses, or of advising an insured about first-party claims for loss or damage to real or personal property of the insured.

Staff adjusters are typically salaried employees of an insurer or an insurer’s affiliates and do not adjust claims for entities other than their employer or its affiliates. Independent adjusters are self-employed or associated with or employed by an independent firm. Independent adjusters may adjust claims on behalf of many insurers. The NAIC has adopted model guidelines for Independent Adjuster Licensing Guideline adjusters that states are encouraged to adopt. The Appendices contain the model guideline.

Most states recognize one or more of the following exemptions to adjuster licensing:

1. Attorneys-at-law admitted to practice in this state, when acting in their professional capacity as an attorney.
2. A catastrophe situation officially declared by the insurance commissioner or governor (according to state law). Registration may be required, but no permanent license should be required of a nonresident adjuster who is sent on behalf of an insurer for the purpose of investigating or adjusting a loss or a series of losses resulting from a catastrophe.
3. A person employed solely to obtain facts surrounding a claim or to furnish technical assistance to a licensed independent adjuster.
4. An individual who is employed to investigate suspected fraudulent insurance claims but who does not adjust losses or determine claims payments.
5. A person who solely performs executive, administrative, managerial or clerical duties, or any combination thereof, and who does not investigate, negotiate or settle claims with policyholders, claimants or their legal representatives.
6. A licensed health care provider or its employee who provides managed care services as long as the services do not include the determination of compensability.
7. A managed care organization or any of its employees or an employee of any organization providing managed care services as long as the services do not include the determination of compensability.
8. A person who settles only reinsurancce subrogation claims.
9. An officer, director, manager or employee of an authorized insurer, surplus lines insurer, a risk retention group (RRG) or an attorney-in-fact of a reciprocal insurer.
10. A U.S. manager of the U.S. branch of an alien insurer.
11. A person who investigates, negotiates or settles life, accident and health, annuity, or disability insurance claims.
12. An individual employee, under a self-insured arrangement, who adjusts claims on behalf of his or her employer.
13. A licensed insurance producer to whom claim authority has been granted by the insurer.
14. A person authorized to adjust workers’ compensation or disability claims under the authority of a third-party administrator (TPA) license pursuant to [applicable licensing statute].

Drafting Note: This guideline is drafted to eliminate redundant licensure requirements with respect to the activities engaged in by a licensee. If licensed as an independent adjuster, TPA or similar business entity, licensees should not be required to obtain separate independent adjuster licenses, provided that the types of claims adjusted do not include life, health, annuity or disability insurance claims.

**Qualifications of an Adjuster**

States that do require licensure assess the qualifications of potential adjusters in various ways. States use one or more of the following methods to determine that a person has the requisite knowledge to properly adjust claims:

1. Specialized or related education prior to licensure, i.e., prelicensing coursework.
2. A specified amount of experience that is relevant to the kind of adjusting work the applicant will be doing (i.e., P/C, workers’ compensation or life/health).
3. A license examination.
4. Relevant professional designation such as the Chartered Property Casualty Underwriter (CPCU) or Associate in Claims (AIC).
5. Prior similar licensure in another state.

For states implementing a new regulatory scheme for adjusters, it is common practice to waive the initial exam for applicants with appropriate credentials and experience.

**Fitness and Character Considerations**

Like insurance producers, many states also evaluate an applicant’s fitness, character and trustworthiness to engage in this aspect of the insurance business. Insurance regulators typically consider:

1. Criminal history.
2. Administrative actions taken by other state insurance regulators.
3. Civil judgments that may shed light on an applicant’s character or fiscal integrity.

In some states, an adjuster must apply for a license by line of insurance, or line of authority, similar to the manner in which producers are licensed. Other states require adjuster licenses by categories such as motor vehicle physical damage, workers’ compensation or crop.

States are encouraged to implement a fingerprint requirement for public and independent adjusters, similar to what is required of producers. Additionally, if a state permits a nonresident adjuster to designate that state as its home state, fingerprinting of that nonresident should be required. States are encouraged to adopt the Authorization for Criminal History Record Check Model Act (#222) when evaluating and considering whether an applicant or licensee has met the character and trustworthiness requirements to obtain, maintain or renew a license.

**Reciprocity**

In almost every jurisdiction where licensure is required, it is the “home state” insurance regulator who assesses the qualifications of his or her resident adjusters. Based upon securing a license in one’s home state, many states will grant a comparable or similar nonresident license to such an individual. This is not the case in all states, and varying lines of authority, qualification standards and license types have created barriers to nonresident licensure. In addition, an adjuster based in a state that does not license adjusters may be required to take exams in multiple states.

The **New NAIC Public Adjuster Model Act** defines home state as:

“Home state” means the District of Columbia and any state or territory of the U.S. in which the public adjuster’s principal place of residence or principal place of business is located. If neither the state in which the public adjuster maintains the principal place of residence nor the state in which the public adjuster maintains the principal place of business has a substantially similar law governing public adjusters, the public adjuster may declare another state in which it becomes licensed and acts as a public adjuster to be the “home state.”
The NAIC Independent Adjuster Guidelines defines home state as:

“Home state” means the District of Columbia and any state or territory of the U.S. in which an independent adjuster maintains his, her or its principal place of residence or business and is licensed to act as a resident independent adjuster. If the resident state does not license independent adjusters for the line of authority sought, the independent adjuster shall designate as his, her or its home state any state in which the independent adjuster is licensed and in good standing.

There are a few states that will not grant nonresident licensure based upon a person having qualified and passed a license exam in the applicant’s home state. Instead, these states require the nonresident applicant to take an exam in the nonresident state even though the person has taken and passed the license exam in the home state.

Adjuster licensing processes were modeled on producer licensing processes and in 2011, the NAIC adopted the Independent Adjuster Reciprocity Best Practices Guidelines paper, which provides jurisdictions with a model to meet reciprocity requirements, as well as take major steps toward reaching uniformity. The NAIC uniform licensing forms are designed to be used by applicants for adjuster licenses. Producer licensing for nonresidents is predicated on the producer satisfying the requirements for a home state license. Those producer requirements often include prelicensing education and examination. Since, at this writing, 40 states license public adjusters, 33 states license independent adjuster licenses and only 15 states require company adjusters to be licensed, obtaining nonresident adjuster licenses becomes more complex because adjusters often do not have an underlying resident license. Until states adopt the provision that allows an individual to qualify for licensure by designating another state as the person’s home state or to designate the state in which the application is filed as the person’s home state, obtaining a nonresident adjuster license becomes more complex because adjusters often do not have an underlying resident license.

Some states do not license adjusters. In order for the use of electronic licensing systems, adjusters residing in states that do not license adjusters can select an Adjuster Designated Home State (ADHS). The ADHS is the state in which the adjuster does not maintain his, her or its principal place of residence or business, and the adjuster qualifies for the license as if the person were a resident.

A state whose laws permit a nonresident adjuster to designate that state as its home state will require the nonresident to qualify as if the person were a resident (exam requirements; fingerprinting, if required; and CE). Once the individual has met the qualifications, the designated home state will issue a nonresident license. The PDB and designated home state will list the record as nonresident, designated home state.

If the resident state of the adjuster does not require an adjuster license, adjusters cannot use the NIPR ADHS module unless they declare another state to be the home state. NIPR has recently added a new Nonresident Adjuster Licensing (NRAL) application that allows an individual to designate a state other than the resident state as the home state. NIPR contains functionality to allow adjusters that have designated another state as the home state to renew online. Adjusters with any license can update contact information through the NIPR CCR.

Continuing Education

Approximately 18 states have CE requirements for their resident adjusters. Reciprocity exists among a majority of these states but not all, in part as a result of the inconsistency among lines of authority granted within each state’s adjuster licensing scheme. It also becomes problematic when the resident adjuster’s home state does not have any CE requirements.

Model #228 and the Independent Adjuster Licensing Guideline contain a CE requirement that the home state shall require 24 hours of CE every two years, with three of the 24 hours covering ethics. It is recommended that a state accept an adjuster’s satisfaction of its home state’s CE requirements as satisfying that state’s CE requirements, provided that the home state recognizes CE satisfaction on a reciprocal basis. For a state that permits a nonresident adjuster to designate that state as its home state, the home state will require and track CE compliance for that adjuster.

Emergency/Catastrophic Adjusters

A state that offers temporary licensure or registration for emergency/catastrophic adjusters are encouraged to follow the Independent Adjuster Licensing Guideline and develop an automated notification or registration procedure that allows for an immediate, streamlined and efficient filing process for adjusters who are seeking authority to adjust claims in the event an emergency or catastrophe is declared.
Non-U.S. Adjusters for Limited Lines Portable Electronics Insurance Products

Many states license, or are considering licensure for, limited lines portable electronics insurance producers. Because some major portable electronics insurance companies provide claims adjustment services via non-U.S. entities, the issue of licensing adjusters who do not reside in the U.S. has gained increased prominence. The Independent Adjuster Licensing Guideline and Model #228 are silent on the licensing of non-U.S. citizens beyond the requirement to designate a home state. Some states, however, have tax laws or other laws that require licensees and applicants for licenses to submit and maintain a Social Security number (SSN). State license laws that allow for the licensing of non-U.S. adjusters must take this possible barrier to licensure into consideration. States also should require non-U.S. citizens to comply with all necessary qualification requirements, such as passing the resident license examination (if applicable).

Recommended Best Practices for Regulators

- Adopt the NAIC Model Act for Public Adjusters.
- Adopt the NAIC Independent Adjuster Licensing Guideline.
- Use the NAIC uniform applications and develop a mechanism for electronic submission and electronic bulk submissions.
- Use the definition of “home state” as defined in the NAIC Public Adjuster Model Act as the basis of reciprocity.
- Provide resident and nonresident adjuster licensing requirements on forms and Web sites and on the SPLD.
- Allow electronic payment for residents and nonresidents for authorized submitters as well as individual adjusters.
- Post applications and license status information on Web sites and on the SPLD.
- Eliminate perpetual licenses, eliminate the word “perpetual” from issued licenses, and adopt a biennial renewal process tied to the uniformity standards.
- Adopt the NAIC Independent Adjuster Reciprocity Best Practices Guidelines.
- Use the definition of “home state” as defined in the NAIC Independent Adjuster Licensing Guideline (#1224)
- Participate in the NIPR ADHS application.
- Participate in the NAIC Personalized Information Capture System (PICS) to receive alerts or monitor actions against existing licensees.
- Use the Attachments Warehouse/Reporting of Action system to receive electronic notifications to alert a state when an adjuster has added information into the Attachments Warehouse since their initial entry regarding administrative, criminal or civil actions. For nonresidents that designate your state as the “home state”, a nonresident license should be issued.
- For nonresidents that designate your state as the “home state”, develop internal data fields that will allow the tracking of CE compliance.
- Include a provision in law that prohibits simultaneous licensure as both an Independent Adjuster and a Public Adjuster.
- If your state requires a license examination, require applicants for a resident license to pass your own state’s examination, not simply use passing results from another’s state’s examination. However, recognition of an exam taken in another state may be given where a nonresident license is being requested.
- Grant an exemption from the license examination requirement to applicants for the crop line of authority who have satisfactorily completed the National Crop Insurance Services Crop Adjuster Proficiency Program or the loss adjustment training curriculum and competency testing required by the Federal Crop Insurance Corporation Standard Reinsurance Agreement.
- If your state allows non-U.S. citizens to receive a license, ensure that other laws in your state (such as tax laws) do not require every licensee or applicant for a license to submit a Social Security Number (SSN) or Individual Taxpayer Identification Number (ITIN).
Chapter 19

Bail Bond Agents

A bail bond is one method used to obtain the release of a defendant awaiting trial upon criminal charges from the custody of law enforcement officials. A bail bond can be based on an insurance product or collateral. The defendant, the defendant’s family and friends, or a professional bail bond agent executes a document that promises to forfeit the sum of money determined by the court to be commensurate with the gravity of the alleged offense if the defendant fails to return for the trial date. A bail bond is considered a three-part contract between the defendant, the government and the insurance company.

Some states regulate bail bonds through the insurance department, and others leave the administration to the discretion of the court system. It is usually required that a bail bond insurer file a power of attorney with the local court authority. This power of attorney is proof to the court that the bail agent is authorized to write bonds for that insurer up to a certain dollar amount.

State insurance departments vary in the manner in which bail bond activities are regulated. There is no NAIC model to guide state licensing directors for bail bond agents. A number of states use the surety line of authority to regulate only the bonds that are insurance-based. In other states, a more comprehensive system has been developed that includes examinations, background checks and personal integrity bonds. The majority of bail bond transactions are executed by resident bail bond agents. Some states prohibit nonresident bail bond agents. In many states, the state court system and local county sheriff may also have a process for approval of bail bond agents.

States that regulate bail bond agents should consider including the following elements in their regulatory scheme:

1. Minimum content and disclosure requirements for the bail bond contract.
2. Detailed record-keeping.
3. Requirement that bail funds be segregated in a trust account.
4. Appointments for all bail bond agents.
5. Written examination.
6. Background check, including fingerprints.
7. P relicensing education on state laws and bond procedures.
8. Completion of CE.
9. Laws that clearly place liability on insurers’ appointed bail bond agents who fail to comply with state law on bail bonds and return of collateral.
10. Cross reference the PLMA and the state’s unfair trade practices act to apply penalties for misconduct.
11. Laws that create a fiduciary relationship between the bail bond agent and the criminal defendant.
12. Dialogue with the appropriate state court and law enforcement officials to coordinate efforts at regulating bail bond agents.
13. Adoption of a specific list of prohibited activities by bail bond agents.

Bond Forfeiture

Forfeiture enforcement may or may not be the responsibility of the state insurance department. In some states, enforcement is left to the court system. This may result in a bail agent’s bond privileges being revoked in a particular county. If enforcement is the responsibility of the state insurance department, the state likely will have authority to suspend or revoke the license of a bail agent.

Prohibited Activities

The following list contains excerpts from several states’ laws and regulations regarding bail bond agent licenses. This is a suggested starting point for states to draft a list of prohibited activities for bail bond agents and insurers:

1. Pay, rebate, give or promise anything of value to a jailer, peace officer, magistrate or any other person who has power to arrest or hold a person in custody, or to any public official or public employee for the purpose of securing a settlement, compromise, remission or reduction of the amount of bail bond, or to secure delay or other advantage. This section does not prohibit public reward paid for the return of a fugitive.
2. Pay, rebate, give or promise anything of value to an attorney in a bail bond matter, except in defense of an action on a bail bond, collateral or indemnification agreement.
3. Pay, rebate, give or promise anything of value to a defendant or anyone acting on the defendant’s behalf in exchange for a referral of bail bond business.
4. Recommend a particular attorney to represent a defendant.
5. Solicit business where a prisoner is confined in or near a courtroom if otherwise prohibited by court order or law.
6. Sign or countersign a bail bond that the licensee did not execute.

**Immigration Bonds**

An immigration bond guarantees the Immigration and Naturalization Service (INS) that an alien will comply with one of several obligations under U.S. immigration laws. Most often, an immigration bond guarantees the alien while released from U.S. custody during the pendency of the government’s case for unlawful entry into the country. An immigration bond can be in the form of a surety product or collateral. (See INS Form I-352.) With respect to surety products, the underlying guarantee is an insurance product permitted to be issued solely by a licensed insurer. Consequently, an individual selling, soliciting or negotiating an immigration bond must maintain a resident or nonresident producer license in order to legally sell the bond in a state.

States should recognize that immigration bonds are a form of insurance required to be issued by a licensed insurer and that the sale, solicitation and negotiation of immigration bonds constitute activities for which an individual must maintain a license as a resident or nonresident producer under the respective states’ licensing laws. New Jersey Bulletin No. 09-09 contains an example of notification regarding appropriate treatment of immigration bonds.
Chapter 20

Charitable Gift Annuities

A charitable gift annuity (CGA) is a transfer by a donor to a charitable organization. In return, the donor receives an annuity payable over one or two lives. If the actuarial value of the annuity is less than the value of the property transferred, then the difference in value constitutes a charitable deduction for federal tax purposes. CGAs are not investments. Annuity payments are tax-free partial returns of the donor’s gift based on actuarial tables of life expectancy.

To qualify as a charitable organization under the federal law, the entity must be one described in either Section 501(c)(3) or Section 170(c) of the Internal Revenue Code (IRC).

The maximum rates of return that are typically paid on these uninsured annuities are established by the American Council on Gift Annuities (ACGA).

Gift annuity payments are fixed. They never go down or up. CGAs are not insured. A charity could become insolvent and be unable to make annuity payments. Most gift annuities are not protected by any state guaranty fund.

Chapter 21

Fraternals and Small Mutuals

Fraternal Benefit Societies

A fraternal benefit society is a membership organization that is legally required to offer life, health and related insurance products to its members, be not-for-profit, and carry out charitable and other programs for the benefit of its members and the public. It must be composed of members having a common bond and be organized into lodges or chapters (local membership groups). A fraternal benefit society exists solely for the benefit of its members and their beneficiaries. Fraternal benefit societies must have a representative form of governance.

Federal law allows a fraternal to offer life and health insurance products. Section 501(c)(8) of the IRC defines a fraternal beneficiary society as:

(a) a nonprofit mutual aid organization;
(b) operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system; and
(c) providing for the payment of life, sick, accident or other benefits to the members of such society, order or association, or their dependents.

Fraternal benefit societies offer insurance products, are chartered and licensed according to state insurance laws, and are regulated and examined by state insurance departments. Individuals who sell, solicit or negotiate insurance products for a fraternal benefit society are required to obtain a state insurance producer license.

The NAIC has adopted the Uniform Fraternal Code (#675). However, this model is not widely in use. At this writing, 45 states had adopted a version of the Model Fraternal Code as drafted by the National Fraternal Congress of America (NFCA). Both the NAIC model and the NFCA model contain a section about producer licensing that pre-dates the PLMA. States should check the fraternal law that has been adopted in their state and update it to reference the PLMA.

Small Mutual Insurers

Small mutual insurers are risk-bearing entities that historically formed around common interests of farmers, householders, and ethnic and religious groups. Small mutuals, commonly known as farm mutuals, may also be called “town” or “county” or “state” mutuals.

Small mutuals provide, with only a few exceptions, property insurance for homes, farmsteads, crops and some small businesses. They do not, except for the legal liability associated with those risks, write casualty insurance. In some states, small mutuals are allowed to offer liability coverage through an affiliation with an insurer. State laws usually limit small mutuals to either a certain premium volume or geographic area or both. Most states also impose a lighter regulatory burden than that applied to larger mutual and investor-owned insurers.

Mutual insurers are owned and operated by the policyholders. Unlike a stock company, a mutual policyholder has an indivisible interest in the enterprise that, in general, cannot be bought or sold like a share of stock. Policyholders often are referred to as “members.” In some cases, a dividend or return of premium is paid when the mutual’s board of directors judges it has sufficient capital. Members of the board also are policyholders.

Individuals who sell products for small mutuals should be licensed as producers as outlined in the PLMA and the ULS.
Chapter 22

Insurance Consultants

An insurance consultant is a person who charges a fee for giving advice about insurance products. Not all states require a separate consultant license. In those states, the individual can obtain a producer license and abide by the disclosure provisions for insurance consultants. In states that do require a special license, the applicant usually is required to pass an examination. The exam may be either one of the same subject-matter examinations that insurance producers must pass or an examination specific to consultants. In states that require an examination, a waiver may be granted if the applicant can demonstrate a specified amount of insurance experience.

States usually adopt exemptions from the consultant licensing requirement. The exemptions are available as long as the person is acting in his or her professional capacity or in the normal course of business. Common exemptions are:

1. A licensed attorney.
2. A trust officer of a bank.
3. An actuary or certified public accountant.
4. A risk manager who consults for his or her employer only.

If a state requires appointments for insurance producers, appointments should not be required of insurance consultants. The consultant represents the insured and is not an agent of the insurance company. Some states prohibit an individual from holding both an insurance producer license and an insurance consultant license. Other states allow an insurance producer to function in either capacity with full disclosure. In all cases where an individual is acting as an insurance consultant, a written contract should be used to clearly explain the terms of the consultant arrangement.

In states that have a separate insurance consultant license, it is a common practice to have a CE requirement that mirrors the CE requirement for insurance producers.
Chapter 23

Managed Care Providers

Health Maintenance Organizations

A health maintenance organization (HMO) is a type of managed care organization that provides a form of health care coverage that is fulfilled through hospitals, doctors and other providers with which the HMO has a contract. Unlike traditional health insurance, an HMO sets out guidelines under which doctors can operate. On average, an HMO costs less than comparable traditional health insurance, with a trade-off of limitations on the range of treatments available. Unlike many traditional insurers, HMOs do not merely provide financing for medical care. The HMO actually delivers the treatment as well. Doctors, hospitals and insurers all participate in the HMO business arrangement.

The NAIC has adopted a model law and regulation that governs the licensure of HMOs: Health Maintenance Organization Model Act (¶430) and Model Regulation to Implement Rules Regarding Contracts and Services of Health Maintenance Organization (¶432). In most cases, access to an HMO is only available to employer group plans.

Preferred Provider Organizations

A preferred provider organization (PPO) is a group of doctors and/or hospitals that provides medical service only to a specific group or association. The PPO may be sponsored by a particular insurance company, by one or more employers, or by some other type of organization. PPO physicians provide medical services to the policyholders, employees or members of the sponsor(s) at discounted rates and may set up utilization review programs to help control the cost of medical care.

In some states, managed care providers may be licensed by an agency outside the insurance department.
Chapter 24

Managing General Agents

A managing general agent (MGA) is an insurance producer authorized by an insurance company to manage all or part of the insurer’s business in a specific geographic territory. Activities on behalf of the insurer may include marketing, underwriting, issuing policies, collecting premiums, appointing and supervising other agents, paying claims, and negotiating reinsurance. Many states regulate the activities and contracts of MGAs.

The NAIC has adopted the Managing General Agents Act (Model #225) to guide states in regulating MGAs. Under the model, an MGA is defined as any person who engages in all of the following:

1. Negotiates and binds ceding reinsurance contracts on behalf of an insurer or manages all or part of the insurance business of an insurer—including the management of a separate division, department or underwriting office—and who acts as an agent for such insurer whether known as a managing general agent, manager or other similar term or title.
2. With or without authority and either separately or together with affiliates, directly or indirectly produces and underwrites an amount of gross direct written premium equal to or greater than 5% of the policyholder surplus in any one quarter or year, as reported in the last annual statement of the insurer.
3. Engages in either or both of the following:
   (a) Adjusts or pays claims in excess of an amount determined by the insurance commissioner.
   (b) Negotiates reinsurance on behalf of the insurer.

Under the model, an MGA does not include any of the following:

1. An employee of the insurer.
2. A manager of a U.S. branch of an alien insurer who resides in this country.
3. An underwriting manager who, pursuant to contract, manages all insurance operations of the insurer, who is under common control with the insurer, subject to [cite to state law] relating to the regulation of insurance holding company systems, and who is not compensated based upon the volume of premiums written.
4. An insurance company, in connection with the acceptance or rejection of reinsurance on a block of business.
5. The attorney-in-fact authorized by or acting for the subscribers of a reciprocal insurer or interinsurance exchange under a power of attorney.

In most states, MGAs must be licensed as producers and are not allowed to place business until a written contract exists among all parties. Under the Model #225, insurers are required to monitor the financial stability of MGAs under contract.
Chapter 25

Multiple Employer Welfare Arrangements

Multiple employer welfare arrangements (MEWAs) are arrangements that allow a group of employers collectively to offer health insurance coverage to their employees. MEWAs are most often found among employer groups belonging to a common trade, industry or professional association.

MEWA plans are generally available to the employees (and sometimes their dependents) of the employers who are part of the arrangement. People who do not have an employment connection to the group cannot obtain coverage through the MEWA plan. MEWA plans cannot be sold to the public.

To qualify as an MEWA, the organization must be nonprofit, in existence for at least five years and created for purposes other than that of obtaining health insurance coverage. In other words, employers cannot group together solely for the purpose of offering health insurance. However, employers that already have grouped together for another common purpose (for example, a trade association) may also offer health insurance coverage to their member employers.

States and the federal government coordinate the regulation of MEWAs pursuant to a 1982 amendment to the federal Employee Retirement Income Security Act (ERISA). This dual jurisdiction gives states primary responsibility for overseeing the financial soundness of MEWAs and the licensing of MEWA operators. The U.S. Department of Labor (DOL) enforces the fiduciary provisions of ERISA against MEWA operators to the extent a MEWA is an ERISA plan or is holding plan assets. State insurance laws that set standards requiring specified levels of reserves or contributions are applicable to MEWAs even if they also are covered by ERISA.

The NAIC has adopted a model regulation, Prevention of Illegal Multiple Employer Welfare Arrangements (MEWAs) and Other Illegal Health Insurers Model Regulation (#220), to give guidance to states in the supervision of MEWAs.
Chapter 26

Reinsurance Intermediaries

A reinsurance intermediary acts as a broker in soliciting, negotiating or procuring the writing of any reinsurance contract or binder. Reinsurance intermediaries act as insurance producers in accepting any reinsurance contract or binder on behalf of an insurer.

The NAIC has adopted the Reinsurance Intermediary Model Act (#790), which contains a simplified registration process for nonresident reinsurance intermediaries. Nonresident reinsurance intermediaries verify that they are licensed in their home states under similar laws as in the nonresident states, i.e., the NAIC Model, and the nonresident reinsurance intermediaries are granted reciprocity.
Chapter 27

Risk Retention Groups and Risk Purchasing Groups

Risk Retention Groups

Congress enacted the federal Risk Retention Act (RRA) in 1981. This federal law enabled product sellers to form RRGs to provide group self-insurance. RRGs are insurers licensed and fully regulated in one state pursuant to that state’s laws. In the mid-1980s, general liability insurance premiums skyrocketed, and certain lines were unavailable. Coverage for some classes of businesses was typically either unavailable or extremely expensive for the desired limits and coverages. Congress intervened again in 1986, this time expanding the RRA to permit RRGs to cover broader liability risks. The RRA is now referred to as the federal Liability Risk Retention Act (LRRA).

Under the Model Risk Retention Act (#705), an RRG “registers” in non-domicile states and is then exempt from most insurance laws in non-domicile states. RRGs are limited to providing non-workers’ compensation commercial lines liability insurance to its members. All owners of an RRG must be insureds, and all insureds must be owners.

RRGs can be required by states to:

1. Comply with the unfair claim settlement practices law.
2. Pay applicable premium and other taxes that are levied on admitted insurers and surplus lines insurers, brokers or policyholders.
3. Participate in residual market mechanisms.
4. Register and designate the insurance commissioner as agent for service.
5. Submit to a financial examination in any state in which the group is doing business if:
   a. The domiciliary insurance commissioner has not begun or refused to initiate an examination.
   b. Any examination shall be coordinated to avoid unjustified duplication and repetition.
6. Comply with a lawful order issued in a delinquency proceeding commenced by the insurance commissioner if there has been a finding of financial impairment or in a voluntary dissolution proceeding.
7. Comply with deceptive, false or fraudulent acts or practices laws, except that if the state seeks an injunction regarding the conduct, it must be from a court of competent jurisdiction.
8. Comply with an injunction issued by a court of competent jurisdiction, upon a petition by the state insurance commissioner alleging that the group is in hazardous financial condition or is financially impaired.
9. Provide the following notice, in 10-point type, in any insurance policy:

   NOTICE

   This policy is issued by your risk retention group (RRG). Your RRG may not be subject to all of the insurance laws and regulations of your state. State insurance insolvency guaranty funds are not available for your RRG.

A state may require that a person acting, or offering to act, as a producer or broker for an RRG obtain a license from that state, except that a state may not impose any qualification or requirement that discriminates against a nonresident producer or broker.

Risk Purchasing Groups

The second type of entity allowed to operate under the RRA is a risk purchasing group (RPG). RPGs are vehicles for any insurer to market on a group basis, with the ability to discriminate as to rates for those groups. But as with RRGs, RPGs are only allowed to place liability coverage. RPGs are formed so that similar risks may pool purchasing power. RPGs are purchasing entities, not insurers, and are not generally subject to state insurance laws.

Insurance departments generally do not actively regulate RPGs. The insurer writing for an RPG is subject to all insurance laws, with few exceptions. The transaction of insurance for an RPG in a state generally follows a traditional transaction based on the form of the insurer in relation to that state. Hence, if the insurer is licensed in the state, then producer licensing and, if applicable, appointment procedures apply. If the insurer is a writer of surplus lines, then the traditional surplus lines producer
licensing rules apply. As with RRGs, a state may require that a person acting, or offering to act, as a producer or broker for a purchasing group obtain a license from that state. A state may not impose any qualification or requirement that discriminates against a nonresident producer or broker.
Chapter 28

Third-Party Administrators

A TPA is an entity that directly or indirectly underwrites, collects charges or premium from, or adjusts or settles claims on residents of a state, in connection with life, annuity or health coverage offered or provided by an insurer, unless accepted by statute.

When an employer offers its employees a self-funded health care plan (the employer helps finance the health care costs of its employees), the employer often contracts with a TPA to administer the plan. The employer also may contract with a reinsurer to pay amounts in excess of a certain threshold in order to share the risk for potential catastrophic claims experience.

In most states, a TPA is required to register with the state. Some states require a bond. The TPA is required to answer inquiries from the state insurance department, but, if the TPA is working for a self-funded ERISA plan, a state has limited authority to take enforcement action against the TPA. An insurer also may act as a TPA for certain customers. This can be confusing to a consumer who has an identification card that has a name similar to a well-known health insurance company. The consumer often thinks coverage is provided by that insurance company instead of the employer plan.
Title Insurance Agents

Title insurance is insurance indemnifying against financial loss from defects in title of real property arising from conditions of title that exist on the date of issuance of the policy. While most insurance coverage indemnifies insureds against loss caused by future events, title insurance is unique as it focuses on the elimination of risk before the policy is issued. Title insurance policies are typically purchased when real property is conveyed or financed. Insureds pay one premium for coverage that has no expiration. In many states, title insurance has essentially replaced abstracts of title, and it is often required as a condition for obtaining a loan secured by a lien on real property.

Title insurance policies commonly guarantee or indemnify the fee title of owners or the lien priority of a lender from losses or damages from liens, encumbrances, defects or unmarketability of title, or adverse claims to title in the real property, and defects in the authorization, execution or delivery of an encumbrance on the real estate. Coverage is subject to standard exceptions, as well as specific exclusions listed on a schedule attached to the policy limiting the extent of the insurer’s liability. Coverage is often expanded or amended through endorsements attached to the policy.

Two types of title insurance policies are commonly issued: the owner’s policy and the lender’s loan policy. The owner’s policy ensures that the title to the real property is vested as described in the policy, that the title is marketable, that there is a right of access to the property, and against defects in or lien or encumbrances on the title. Title insurance does not require a written application. Policies often are ordered by real estate agents or lenders. The title insurance agent issues a commitment or binder basically revealing the current state of title to the property and agreeing to insure the property, provided that the requirements in the commitment are met to the satisfaction of the title insurer. Typically, even though the buyer/borrower pays for the loan policy, only the lender is covered by the loan policy.

The effective date of the policy is typically the date that transactional documents (deed, deed of trust, etc.) are recorded in the public real estate records. Losses under the policy are subject to the limits listed on Schedule A of the Policy, plus any costs of defense. The policy limit of an owner’s policy is generally the purchase price of the real property, and the policy limit of a lender’s loan policy is generally the original amount of the loan. Losses from title defects are rare, and loss ratios for insurers are relatively low. The goal of a title insurer is to find defects in title prior to issuing a policy; consequently, expense ratios are fairly high due to the cost of title research.

Most states place monoline restrictions on title insurers. Monoline restrictions prohibit title insurers from issuing any line of insurance other than title insurance. Rates and rate setting processes vary by state. Some states regulate only the risk premium, while other states regulate an all-inclusive premium, which generally includes all costs of issuing the policy, search expenses and the risk premium.

Functions of title insurance agents include conducting title searches, performing underwriting functions, preparing and issuing title insurance commitments and policies, maintaining policy records, and receiving premiums. In addition, many title agents perform real estate closings, and provide settlement and escrow services.

Many activities of state licensing divisions with regard to title insurance are the same as in other lines of insurance. In most states, agents are required to pass a licensing exam and fulfill ongoing (CE) requirements. In some states, the licensing division also will be responsible for receiving and filing agency appointments with insurers, bonds or letters of credit (LOCs), proof of errors and omissions (E&O) coverage, and forms disclosing controlled and affiliated business relationships. The NAIC has adopted the Title Insurance Agent Model Act (#230) to give guidance to state licensing directors.

Title insurance creates some unique regulatory issues, primarily due to the risk elimination nature of the insurance coverage, and the business relationships between title insurance agents and those who refer title insurance business. The entity referring the title insurance business often is viewed as the customer rather than the insured due to the nature of real estate transactions. Entities that regularly refer title insurance business—such as mortgage brokers, lenders, realtors and attorneys—are referred to as producers of title insurance business. Note that “producer of title insurance” as used in this context carries a very different meaning from “insurance producer.”

Controlled and affiliated business relationships refer to business relationships between title insurance agents and producers of title insurance business. Many states require that controlled and affiliated business relationships be disclosed both to the insured and to the insurance department in writing. Many states also prohibit title insurance agents from providing rebates, referral fees, inducements or financial incentives to producers of title insurance business. In addition to state laws, rebates and referrals related to most residential real estate transactions are prohibited under the federal Real Estate Settlement Procedures Act (RESPA).
Chapter 30
Viatical and Life Settlement Providers and Brokers

The Viatical Settlements Model Act (#697) defines a viatical settlement as a transaction in which the owner of a life insurance policy sells the right to receive the death payment due under the policy to a third party. Typically, the owner/insured receives a cash payment, and the buyer agrees to make any remaining premium payments on the policy.

In 1993, the NAIC adopted the Viatical Settlements Model Regulation (#698) and Model #697 to provide a regulatory structure to protect consumers involved in viatical settlements. The Model #697 was revised in 2003 and 2004 to address the issue of healthy consumers who might want to sell their insurance policy on the secondary market, better known as “life settlements.”

Licensing requirements vary as a result of the several versions of Model #697. Under the 1993 version of Model #697, a viatical settlement broker was required to have an underlying life producer license before being able to apply for and receive a viatical settlement broker license. This provision was not uniformly adopted.

The 2003 version of Model #697 provided for licensing procedures of individuals who were not licensed life insurance producers by requiring CE to maintain the license. The 2003 version was modified in 2004 to allow for licensed life insurance producers to notify or register with the insurance regulator as prescribed by the insurance commissioner if they were engaging in the business of settlements, and exempted life insurance producers from the viatical settlement brokers’ examination and the CE requirements.

The 2003 and 2004 versions of Model #697 also required the viatical settlement broker to maintain financial responsibility in the form of an errors and omissions policy, surety bond or cash deposit, or a combination of any of the three. It also placed fiduciary responsibility requirements on the broker. The 2003 and 2004 versions of Model #697 required brokers to disclose the method by which compensation was calculated and the amount of compensation. It is essential the viatical broker meet the licensing requirements of the state where the transaction occurs.

The 2003 version of Model #697 also provided for licensing procedures for viatical settlement providers.

Model #697 was revised in 2007 to address, among other things, transactions that have been called stranger-originated life insurance (STOLI) or investor-originated life insurance (IOLI). These transactions are related to a life insurance policy exhibiting any one of three characteristics prior to or within two years of policy issue:

1. Non-recourse premium financing.
2. Guarantee of settlement.
3. Settlement evaluation.

Settlement of such policies is prohibited for five years.

Other key revisions include:

1. New consumer disclosures related to viatical settlement compensation.
2. A new consumer disclosure requiring a statement that the viatical settlement broker represents exclusively the viator and owes a fiduciary duty to the viator, including a duty to act in the best interest of the viator.
3. Allowing life agents to sell without a viatical license, but special conditions apply.
Additional revisions include:

Under specified circumstances, a life insurance producer may operate as a viatical settlement broker. The life insurance producer is deemed to meet the viatical settlement broker licensing requirements. The revisions also permit a person licensed as an attorney, certified public accountant (CPA) or financial planner accredited by a national recognized accrediting agency, who is retained to represent the viator and whose compensation is not paid directly or indirectly by the viatical settlement provider, to negotiate viatical settlement contracts on behalf of a viator without having to obtain a viatical settlement broker’s license.

To receive and maintain a license, the 2007 revisions require a viatical settlement provider or broker to demonstrate evidence of financial responsibility through a surety bond or a deposit of cash, certificates of deposit or securities, or any combination thereof in the amount of $250,000. The surety bond must be issued in the favor of the state and must specifically authorize recovery by the insurance commissioner on behalf of any person in the state who sustained damages as the result of erroneous acts, failure to act, conviction of fraud or conviction of unfair practices by the provider or broker. The insurance commissioner may ask for evidence of financial responsibility at any time the insurance commissioner deems necessary. The revisions make clear that a provider or broker that is licensed in more than one state is not required to file multiple bonds in each state. Some problems have arisen with implementing the bonding requirements of the Model #697. Regulated entities argue that it is impossible to obtain a bond as described by Model #697.

The revisions also require an individual licensed as a viatical settlement broker to complete, on a biennial basis, 15 hours of training related to viatical settlements and viatical settlement transactions. A life insurance producer who is operating as a viatical settlement broker is not subject to this requirement.

NAIC CONTINUING EDUCATION RECIPROCITY AGREEMENT – 2019 VERSION UNIFORM DECLARATION – CE RECIPROCITY COURSE APPROVAL GUIDELINES

Whereas, the Commissioners find that it is in the best interest of each of their States and their insurance producers to simplify the continuing education (CE) reciprocity course approval process and reduce barriers to non-resident CE providers that reside in a State.

Whereas, the undersigned Insurance Commissioners of the National Association of Insurance Commissioners, hereafter the Commissioners, have determined that it is redundant unnecessary for each State to perform a substantive review of continuing education courses or individual instructors that have previously been approved by another State.

Whereas, the Commissioners find that it is in the best interest of each of their States and their insurance producers to simplify the continuing education (CE) reciprocity course approval process and reduce barriers to non-resident CE providers that reside in a State.

Definitions

Home State: the state in which the CE provider organization maintains his, her, or its principal place of residence or principal place of business.

Home State Course Approval: approval of a course that has had a substantive review in a home state.

Reciprocal State: state other than the home state and a party to of this continuing education reciprocity agreement.

Substantive Review: a thorough review of the course to confirm compliance with the home State’s applicable laws and regulations for the approval of insurance continuing education. The review includes a determination whether the:

i. Subject matter meets the criteria for insurance education, to include approvable and non-approvable topic guidelines;

ii. Provider has procedures for reviewing course material in order to keep it up to date and timely;

iii. Course design and instructional strategies are appropriate for the method of delivery;

iv. Credit hours are properly calculated based on instruction method;

v. Criteria for completing the course meets the standards applicable to the instruction method.

The Commissioners agree as follows:

1. Each state will conduct a substantive review of continuing education courses submitted for home state approval. Once When a CE provider residing in a State has received a home state course approval initial approval to offer courses in its home State, that a reciprocal State will not conduct a substantive review of that same course as a condition of approval. not require that CE provider to file courses for substantive review that have been awarded credit by the CE provider’s home state. A CE Provider’s Home state means the state in which the CE pProvider’s Home state Organization maintains his, her, or its principal place of residence or principal place of business. However, If the laws or regulations of the CE Provider’s home state restrict or limit the minimum or maximum number of credit hours for which a national course may be approved for in that state, or restricts certain course topics, the CE pProvider may elect to recognize another home state in order to obtain a home state course approval for the filing of its national courses in order to obtain the maximum credits allowed. A CE Provider that elects another home state in which to file its national courses shall elect a state that conducts a substantive review of its courses.

© 2019 National Association of Insurance Commissioners
2. Unless specifically limited by State law and regulations, a reciprocal State will award a course the same number of credits and will accept all course topics as approved by the CE provider’s home State.

3. A **reciprocal** State will agrees to approve a course submission within 30- days of receipt, provided that the review and approval process for a course that is filed using the NAIC Uniform Continuing-Education Reciprocity Course Filing Form (Appendix A) or an equivalent electronic submission method, and contains a **home state course approval**, A CE provider who wishes to offer topics that are not approvable by the home State may still file a course directly with a State by completing a specific State’s course approval form.

4. Each State will accept the NAIC Uniform Continuing-Education Reciprocity Course Filing Form (Appendix A), or a substantially similar form; including an equivalent the delivery by electronic submission method, and the required attachment(s) a **home state course approval document** as the sole form requirements required by for a reciprocal course submission non-resident CE provider.

5. Each State accepts and will use the following standards for substantive course review approval:
   
   a. For classroom and webinar courses, one credit will be awarded for each 50 minutes of contact instruction. Each State will use its own method to award credit for self-study courses.
   
   b. For self-study/online courses, credit will be awarded based on the NAIC’s Recommended Guidelines for Online Courses (Appendix B).

   c. The minimum number of credits that will be awarded is one credit, no partial credits will be awarded and there is no maximum number of credits.

   d. Credits will only be awarded for courses whose subject matter will increase technical knowledge of insurance principles, coverages, ethics, laws or regulations and will not be awarded for topics such as personal improvement, motivation, time management, supportive office skills or other matters not related to technical insurance knowledge. If any credits are awarded for sales and/or marketing those credits will be separately noted on the course approval document. Credits for sales and/or marketing will only be awarded in States that are permitted by law or regulation to accept credit for those topics. **Additional guidance can be found in the NAIC’s Recommended Approved/Not Approved Course Topics (Appendix C).**

**NAIC UNIFORM DECLARATION—(CONT’D)**

4. Each State will use its own method to determine if an instructor is qualified and no instructor will be approved unless the CE provider has provided sufficient information to demonstrate that the instructor is qualified, according to that State’s laws and regulations, to teach the topics covered in the outline.

5. A reciprocal State will not review an instructor’s qualifications once that instructor’s qualifications have been reviewed and approved by the CE provider’s home State.

6. A State’s course approval document or approved course application will include, at a minimum, the following information: course name, whether the method of instruction is self-study, whether a course is part of a national or professional designation program and the contact person. A National Course is defined as an approved program of instruction in insurance related topics including a course leading to a National Professional Designation or an insurance course at an institution offered as part of a degree conferring curriculum, presented by an approved CE Provider organization title, credit hours, credit category, method of instruction, and clearly indicate if it is a **home state approval**.

7. Each State reserves the right to disapprove individual instructors or CE providers who have been the subject of disciplinary proceedings or who have otherwise failed to comply with a State’s laws and regulations.

8. Each State agrees that it will notify other States when a CE provider or instructor has been the subject of a formal administrative action or other disciplinary action by that State.
Drafting Note: The Producer Licensing Working Group needs to make a formal request to NAIC staff to ensure the proper programming and electronic systems are in place through which a provider/instructor is assigned a unique identifier number and notification can be made through the use of electronic means. Can this become part of the NAIC’s Regulatory Information Retrieval Systems and the Personalized Information Capture System.

Drafting Note: The Producer Licensing Working Group needs to discuss how to proceed with getting these changes officially agreed upon by states and replacing the existing Midwest Zone Guidelines and Filing Form. The working group also needs to discuss the impact these changes will have for the Uniform Regulation Through Technology.
**UNIFORM CONTINUING EDUCATION RECIPROCITY COURSE FILING FORM**

Please clearly print or type information on this form. Thank you for helping us promptly process your application.

**Information Below is for Regulator Use Only**

- Approval Date
- Course Number assigned
- Course approval expiration date
- Signature of Home State Regulator/Representative
- OR ATTACH Provider Home State Approval Form
- Signature of Reciprocal State Regulator/Representative
- OR ATTACH Reciprocal State Approval Form
INSTRUCTION SHEET

NOTE: This course may NOT be advertised or offered as approved in the state to which application has been made until approval has been received from the insurance department.

1. If you are a PROVIDER filing for approval from the Home State:
   1.1 Complete all the fields in the “Provider Information” section except “Reciprocal State” and the adjacent “Provider #” fields.
   1.2 Complete the Course Information Section.
   1.3 In the “Credit Hours Requested and Course/Hours Decision” section, complete the “Hrs. Requested by Provider” columns, detailing in the respective columns the number of hours for sales – and marketing-related instruction and the number of hours for other insurance-related instruction. Please note the following:
      1.3.1 When using this application, which is governed by the NAIC CE Reciprocity Agreement in conjunction with ‘states’ laws, only whole numbers of credit hours will be approved – partial hours will be eliminated.
      1.3.2 States that approve sales/marketing topics will consider the hours in the “sales/Mktg” column and the hours in the “Insurance” column when deciding the number of hours to approve. States that do not permit sales/marketing topics as part of continuing education credit hours will only consider the hours shown in the “Insurance” column when making their credit-hour approval decisions.
      1.3.3 Contact the individual state to determine whether there are any state specific requirements for submitting courses.
   1.4 Submit the application form along with required course materials, a detailed course outline, instructor information, if required, and the required course application fee.

2. If you are a PROVIDER filing for approval from a Reciprocal State:
   2.1 Make a sufficient number of photocopies of the Home State approval form to enable you to submit a copy of this application to each of the Reciprocal States where you are seeking credit.
   2.2 On each application, write the Reciprocal State and the provider number assigned to you by that state in the “Reciprocal State” and adjacent “Provider #” fields.
   2.3 Send the CER application, home state approval, if home state issues one, a detailed course outline, and the required fee to the reciprocal state. If this is a National Course *, the Providers will be allowed to submit an agenda that must include date, time, each topic and event location in lieu of a detailed course outline.
   2.4 Subsequent national course offerings should only be reported for events that are conducted in the “home” state.

* National Course is defined as an approved program of instruction in insurance related topics, offered by an approved provider, and leads to a national professional designation or a course offered to individuals who must update their designation once it is earned.

3. If you are the HOME STATE or designated representative of the Home State:
   3.1 After reviewing the course materials, complete the “Hrs Approved by Home State” column.
   3.1.1 Multiple types of credit and delivery methods can be approved using one CER Form.
   3.2 Enter the date of approval, course # assigned, course approval expiration date. Sign the CER Form OR attach the home state approval form.
   3.3 If the course is not approved, note it on the bottom of the CER Form.

4. If you are the RECIPROCAL STATE or designated representative of the Reciprocal State:
   4.1 After reviewing “Hrs approved by Home State” complete the “Hrs Approved by Reciprocal State”.
      4.1.1 It is unnecessary for each State to perform a substantive review of continuing education courses that have previously been approved by the Home State.
      4.1.2 Reciprocal states cannot award different credits than the home state unless certain aspects are not allowed by state law.
   4.2 Enter the date of approval, course number assigned, course approval expiration date. Sign the CER Form OR attach the reciprocal state approval form.
   4.3 If the course is not approved, note it on the bottom of the CER Form.
   4.4 The reciprocal state agrees to approve the CER submission within 30 days of receipt.

Substantive Review – A thorough review of the course to confirm compliance with the home state’s applicable laws and regulations for the approval of insurance continuing education. The review includes a determination whether the:

1. Subject matter meets the criteria for insurance education, to include approveable and non-approvable topic guidelines;
2. Provider has procedures for reviewing course material in order to keep it up to date and timely;
3. Course design and instructional strategies are appropriate for the method of delivery;
4. Credit hours are properly calculated based on instruction method;
5. Criteria for completing the course meets the standards applicable to the instruction method.

*Drafting Note: The instructor information matrix was eliminated in 2018 as this information should be readily available on individual state/jurisdiction websites.
Continuing Education Recommended Guidelines for Online Courses

Adopted by NAIC Membership March 18, 2015

**Goal:** To deliver functional computer-based internet courses that offer quality insurance and/or risk management material in a password-protected online environment.

**Key Components:**
- Material that is current, relevant, accurate, and that includes valid reference materials, graphics and interactivity.
- Clearly defined objectives and course completion criteria
- Specific instructions to register, navigate and complete the course work
- Technical support/provider representative should be available during business hours and response provided within 24 hours of initial contact.
- Instructors/subject matter experts must be available to answer student questions during provider business hours
- Process to authenticate student identity such as passwords and security prompts
- Method for measuring the student’s successful completion of course which includes the material, exam and any proctor requirements.
- Process for requesting and receiving CE course-completion certificate and reporting student results to the appropriate regulator
- Require each agent to enroll for the course before having access to course material.
- Prevent access to the course exam before review of the course materials.
- Prevent downloading of any course exam.
- Provide review questions at the end of each unit/chapter and prevent access to the final exam until each set of questions are answered at a 70% rate.
- Provide final exam questions that do not duplicate unit/chapter questions.
- Prevent alternately accessing course materials and course exams. This does not apply if the state allows for “open book” exams.
- Have monitor affidavit containing specific monitor duties and responsibilities printed for monitor’s use to direct the taking of the final exam. Monitor will complete the affidavit after the exam is completed. (This only for states that require a monitored exam).

**Final Assessment (exam) Criteria:**
- Minimum of 10 questions for 1 credit hour course with additional 5 questions for each subsequent credit hour and a score of 70% or greater
- At least enough questions to fashion a minimum of 2 versions with a least 50% of questions being new/different in each subsequent version
- Inability to print the exam or to view the exam prior to reviewing material
- Proctor, if required by the state, who verifies identity by photo identification and processes affidavit testifying the student received no outside assistance

**Procedures to determine Appropriate Number of Credit Hours:**

**Word Count/Difficulty Level**
- Divide total number of words by 180 (documented average reading time) = number of minutes to read material
- Divide number of minutes by 50 = credit hours
- Course difficulty level is identified by the CE provider on the CER form and should be based on the NAIC CE Standardized Terms-Definitions for basic, intermediate and advanced course difficulty levels.
- Multiply number of hours by 1.00 for a basic level course; 1.25 for an intermediate level; 1.50 for an advanced course for additional study time = total number of credit hours (fractional hours rounded up if .50 or above and rounded down if .49 or less)
Interactive Course Content

- Elements included in the online course, in addition to text, such as video, animation, interactive exercises, quizzes, case studies, games, and simulations.
- Interactive elements should be applicable to course material and facilitate student learning.
- Only mandatory interactive elements should be included in the calculation of CE credit hours.
- Calculation of CE hour credits should be based on the run time of the interactive elements.
- CE providers will indicate run time of the interactive elements in the course content and upon request provide access to the state for review of the course.

Professional Designation Course

- Course that is part of a nationally recognized professional designation
- Credit hours equivalent to hours assigned to the same classroom course material

Final Assessment

- Time spent completing the final assessment should not be used in calculation of CE credit hours.

Adopted by the NAIC Membership 2015
COURSE GUIDELINES FOR CLASSROOM WEBINAR/WEBCAST DELIVERY
Adopted by the NAIC Membership August 2014

- These guidelines are intended to apply to courses conducted and viewed in real time (live) in all locations and are not intended to apply when courses have been recorded and are viewed at a later time or to other online courses.

- Each student will be required to log in to the webinar using a distinct username, password and/or email. Students that view webinars in group settings which is two or more individuals should alternatively verify their participation in the form of sign-in and sign-out sheets submitted by a monitor with an attestation or verification code.

- The provider will verify the identity and license number, or National Producer Number (NPN), of all students.

- A provider representative, using computer-based attendance-monitoring technology, must monitor attendance throughout the course.

- The provider must have a process to determine when a participant is inactive or not fully participating, such as when the screen is minimized, or the participant does not answer the polling questions and/or verification codes.

- For webinars not given in a group setting, no less than two polling questions and/or attendance verification codes must be asked, with appropriate response provided, at unannounced intervals during each one-hour webinar session to determine participant attentiveness.

- The provider will maintain an electronic roster to include records for each participant’s log-in/log-out times. If required by states chat history and polling responses should be captured as part of the electronic record.

- When a student is deemed inactive or not fully participating in the course by the course monitor of failure to enter appropriate polling question response or verification codes, continuing education (CE) credit is denied.

- All students and the instructor do not need to be in the same location.

- Students in all locations must be able to interact in real time with the instructor. Students should be able to submit questions or comments at any point during the webinar session.

- The course pace must be set by the instructor and does not allow for independent completion.

- Instruction time is considered the amount of time devoted to the actual course instruction and does not include breaks, lunch, dinner or introductions of speakers.

- One credit will be awarded for each 50 minutes of webinar/webcast instruction, and the minimum number of credits that will be awarded for webinar/webcast courses is one credit.

- The provider must have a procedure that informs each student in advance of course participation requirements and consequences for failing to actively participate in the course.

- A comprehensive final examination is not required.
**Approved Topics**

1. Actuarial mathematics, statistics and probability – in relation to insurance
2. Assigned risk – in relation to insurance
3. Claims adjusting
4. Courses leading to and maintaining insurance designations
5. Employee benefit plans – in relation to insurance
6. Errors and omissions – in relation to insurance
7. Estate planning/taxation – in relation to insurance
8. Ethics
9. Fundamentals/principles of insurance (including but not limited to: annuities, crop and hail, life, accident and health, property/casualty [P/C], etc.)
10. Insurance accounting/actuarial considerations
11. Insurance contract/policy comparison and analysis
12. Insurance fraud
13. Insurance laws, rules, regulations and regulatory updates
14. Insurance policy provisions
15. Insurance product-specific knowledge
16. Insurance rating/underwriting/claims
17. Insurance tax laws
18. Legal principles – in relation to insurance
19. Long-term care/partnership
20. Loss prevention, control and mitigation – in relation to insurance
21. Managed care
22. Principles of risk management – in relation to insurance
23. Proper uses of insurance products
24. Real Estate Settlement Procedures Act (RESPA) – in relation to insurance
25. Restoration – addresses claims, loss control issues and mitigation – in relation to insurance
26. Retirement planning – in relation to insurance
27. Securities – in relation to insurance
28. Suitability in insurance products
29. Surety bail bond
30. Underwriting principles – in relation to insurance
31. Viatical/slife settlements – in relation to insurance

Other topics approved that contribute substantive knowledge relating to the field of insurance and expands competence of the licensee.
RECOMMENDED APPROVED/NOT APPROVED TOPICS FOR CE CREDIT

Adopted by the Uniform Education (D) Working Group 12.20.17
Adopted by the Producer Licensing (D) Task Force 3.25.18

Not Approved Topics

1. Automation
2. Clerical functions
3. Computer science
4. Computer training/skills or software presentations
5. Courses on investments – stocks, bonds, mutual funds, Financial Industry Regulatory Authority (FINRA)/U.S. Securities and Exchange Commission (SEC) compliance (National Association of Securities Dealers [NASD]/SEC), etc.
6. Courses that are primarily intended to impart knowledge of specific products of specific insurers
7. Customer service
8. General management training
9. Goal-setting
10. Health/stress/exercise management
11. Marketing/telemarketing
12. Motivational training
13. Company and vendor-specific product launches
14. Office skills or equipment or procedures
15. Organizational procedures and internal policies of an individual insurer
16. Personal improvement
17. Prospecting
18. Psychology
19. Relationship building
20. Restoration – promoting products or services
21. Sales training
22. Service standards or service vendors
23. Time management

Other topics or courses not related to insurance knowledge or competence of the licensee.
The Market Analysis Procedures (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met in Austin, TX, Dec. 8, 2019. The following Working Group members participated: John Haworth, Chair (WA); Rebecca Rebholz, Vice Chair (WI); Ryan James and Suzanne Tipton (AR); Maria Ailor (AZ); Damion Hughes (CO); Kurt Swan (CT); Sharon Shipp (DC); Frank Pyle (DE); Scott Woods (FL); Erica Weyhenmeyer (IL); LeAnn Crow (KS); Jeff Zewe (LA); Christopher Joyce (MA); Nour Benchaaboun (MD); Timothy Schott (ME); Michele Riddering (MI); Cynthia Amann and Stewart Freilich (MO); Paul Hanson (MN); Troy Smith (MT); Laura Arp (NE); Philip Gennace (NJ); Paige Duhamel (NM); Stephanie McGee (NV); Angela Dingus (OH); Cuc Nguyen (OK); Katie Dzurec and Gary Jones (PA); Michael Bailes (SC); Tracy Klausmeier (UT); Julie Blauvelt (VA); Christina Rouleau (VT); Erin K. Hunter and Tonya Gillespie (WV).

1. **Adopted its Nov. 21 Minutes**

The Working Group met Nov. 21 and took the following action: 1) adopted its Oct. 31 minutes; 2) adopted “other health” as a line of business in the Market Conduct Annual Statement (MCAS); and 3) discussed a uniform process for addressing MCAS extension requests.

Ms. Dzurec said she was concerned about the lack of clarity around the term “other health” and the possibility of insurance companies avoiding reporting by finding loopholes in what constitutes “other health.”

Mr. Haworth said the Market Conduct Annual Statement Blanks (D) Working Group will be developing the blank and working out the details and definitions. He said the health MCAS blank took five years to complete.

Ms. Dzurec said the development of the other health blank needs to be done carefully, due to the activity in the marketplace, including the combining of products to compete with qualified plans.

Ms. Arp said the short-term limited duration (STLD) data call focused on products with coverage periods less than 365 days. She asked if the other health MCAS would apply to more than STLD. She noted there are many insurers with many types of products.

Mr. Haworth said it would apply to more than STLD. He said the health MCAS took five years to develop, but for the other health MCAS, the Market Conduct Annual Statement Blanks (D) Working Group will have both the health MCAS and the STLD data call to use as templates.

Ms. Ailor said the Market Conduct Annual Statement Blanks (D) Working Group is aware that there are many products, and it may consider segmenting the other health MCAS blank. She said all variables will be considered, and the Working Group will develop a blank that is useful to state insurance regulators.

Ms. Amann made a motion, seconded by Mr. Pyle, to adopt the Working Group’s Nov. 21 minutes (Attachment Six-A). The motion passed unanimously.

2. **Heard an Update on the STLD Medical Data Call Template**

Ms. Rebholz said the STLD data call is due Dec. 13 and, as of Dec. 8, there is only one STLD submission. She said there have, however, been 29 users that requested and obtained the necessary role permission to submit data to the NAIC and that may represent more than 29 companies, because some users may work with multiple cocodes.

Ms. Rebholz said a reminder email was sent Dec. 5 to all the initial recipients of the call letter. Immediately after the reminder, numerous emails were received from companies that do not write STLD. She said more than 600 emails from companies and groups of companies have been received advising that they do not write STLD business and have nothing to report.
Ms. Rebholz reminded the Working Group and interested parties that this is a mandatory data call and each participating state may take any actions that they would normally pursue whenever a company fails to report or does not file timely. She encouraged all the company representatives to check to be sure that their company has either completed an STLD filing or has sent an email to the NAIC advising that you do not write STLD business. She said she anticipates a flood of filings close to the Dec. 13 deadline, but she encouraged the states to consider what actions they can take in response to companies that fail to file or who say that they have no STLD products when, in fact, they do. She said Wisconsin is already considering its response to companies that file late or fail to file.

Ms. Dingus asked how soon the participating states will: 1) get a list of companies that did not file or said they had no STLD business to report; and 2) how soon the reported data will be available to them.

Randy Helder (NAIC) said the list of companies should be ready within one week of the due date and the data itself should also be available within one week.

3. Discussed Revisions to the MCAS Best Practices Guide

Ms. Rebholz said that during the Nov. 21 conference call, she asked for additional volunteers to form a small group to review and make suggested revisions to the MCAS Best Practices Guide. She said five volunteers are on the group, and she welcomes anyone else who is interested. She asked interested volunteers to send a note to Mr. Helder.

Ms. Rebholz said that in the first week of January 2020, she plans to send a list of the materials the small group needs to look at and potentially update. She will then schedule the group’s first conference call for mid- to late January 2020.

Ms. Rebholz said the topics that the group will look at as part of the update process include: 1) identifying threshold issues, such as the number of extension requests that a company has made in recent years and the reasons the company cites; 2) specifying the length of the extensions allowed in order to try to bring consistency in the states’ responses to company extension requests; 3) mapping out a generic process that the states can use as a template; and 4) developing templates for extension request response letters and orders to be available to the states.

Ms. Rebholz said the materials to be reviewed are the MCAS Best Practice Guide; the MCAS web page; the MCAS Frequently Asked Questions (FAQs); the MCAS Industry User Guide; the MCAS data call letters; and all MCAS training materials.

Finally, Ms. Rebholz said the small group will explore what type of extension request report the NAIC can provide on an annual basis to help the states determine where threshold issues are triggered. She said that as part of the State Ahead strategic plan, the NAIC market regulation staff will be developing a Tableau report that will be able to track historical extension and waiver requests. She said the work of the Best Practices small group will be to provide input into what should be included in this tool and its design.

4. Discussed its 2020 Proposed Charges

Mr. Haworth said there are no changes to the charges from 2019.

Mr. Haworth said the Working Group’s first charge is to “[r]ecommend changes to the market analysis framework based on results over the past five years, including the current set of Level 1 and Level 2 questions.” He said the Working Group is to provide recommendations to the Market Regulation and Consumer Affairs (D) Committee by the 2020 Fall National Meeting. He said the current framework used by most market analysts on the state departments is described in chapter 7 of the Market Regulation Handbook. He suggested that the Working Group review chapter 7 in light of the experiences of its members as analysts to see if any improvements on the methodology can be made. He said it would be helpful to determine how well the process works and what can be done to improve the abilities of analysts to identify concerns and make recommendations to the insurance department leadership.

Mr. Haworth said the Working Group’s second charge is to “[d]iscuss other market data-collection issues and make recommendations as needed.” He said Working Group continues to do a good job of identifying new data-collection needs, such as the STLD data call, and it is also working this year on the MCAS Best Practices Guide.
Mr. Haworth said the third charge is to recommend new lines of business in the MCAS. He encouraged everyone to be thinking of which lines need to be added to the MCAS throughout 2020. He said the Working Group should be considering at least one line of business per year, but preferably two or three.

5. **Discussed Other Matters**

Charles Piacentini (American Council of Life Insurers—ACLI) said the consideration of “other health” as the next line of business in the MCAS was tabled in 2018, but when it was reintroduced, there was a lack of discussion before adopting it. He said the industry can assist in defining health plans that are alternatives to qualified federal Affordable Care Act (ACA) plans and welcome the possibility of participating. He said if the other health line is not properly defined, the reporting could be misleading and disruptive. He said much of the best data comes from consumer complaints.

Mr. Haworth said carriers are welcome to participate in the process, as well as the industry representatives. He said the Market Conduct Annual Statement Blanks (D) Working Group spends a lot of time in the development of MCAS blanks.

Ms. Dzurec said complaints are helpful, but consumers are often not aware that they can complain or that there is any issue.

Mr. Haworth said all the analytics, including reported complaints, will be considered in the development of the blank.

Heather Jerbi (America’s Health Insurance Plans—AHIP) agreed with Mr. Piacentini, and she said AHIP is concerned with the lack of specificity about what is being considered for this line of business. She said she wants the industry and state insurance regulators to work together with a robust discussion.

Birny Birnbaum (Center for Economic Justice—CEJ) said the Market Analysis Procedures (D) Working Group only identifies lines of business; it is the Market Conduct Annual Statement Blanks (D) Working Group’s job to develop the blank. He said industry is always invited to participate in the creation of the blank.

Ms. Dzurec said the Market Conduct Annual Statement Blanks (D) Working Group must be very clear on what is to be reported to make the blank most effective.

Ms. Ailor said the Working Group recognizes that the term “other health” is broad, but she said the term is taken from the annual financial statement’s Supplemental Health Care Exhibit. She said definitions may be able to be found in the *Annual Statement Instructions*. She said the ACLI and AHIP will be invited to participate in the development of the blank.

Having no further business, the Market Analysis Procedures (D) Working Group adjourned.
Market Analysis Procedures (D) Working Group
Conference Call
November 21, 2019

The Market Analysis Procedures (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Nov. 21, 2019. The following Working Group members participated: John Haworth, Chair (WA); Rebecca Rebholz, Vice Chair (WI); Melissa Grisham (AR); Maria Ailor and Cheryl Hawley (AZ); Don McKinley (CA); Damion Hughes (CO); Kurt Swan (CT); Frank Pyle (DE); Scott Woods (FL); Patrick Tallman (IL); Tate Flott (KS); Lori Cunningham (KY); Jeff Zewe (LA); Mary Lou Moran (MA); Salama Camara (MD); Connie Mayette (ME); Jill Huiskens (MI); Teresa Kroll (MO); Paul Hanson (MN); Troy Smith (MT); Robert McCullough (NE); Douglas Rees (NH); Ralph Boeckman (NJ); Peggy Willard-Ross (NV); Larry Wertel (NY); Angela Dingus (OH); Landon Hubbart (OK); Jeffrey Arnold (PA); Rachel Moore (SC); Tanji Northrup (UT); Wil Felvey (VA); Christina Rouleau (VT); and Tom Whitener (WV).

1. Adopted its Oct. 31 Minutes

The Working Group met Oct. 31 and took the following action: 1) adopted its Aug. 27 minutes; 2) discussed analysis of lender-placed insurance Market Conduct Annual Statement (MCAS) data; 3) discussed the uniform process for addressing MCAS extension requests; 4) discussed the inclusion of fraternals in the MCAS; and 5) discussed adding “other health” as the next line of insurance in the MCAS.

Ms. Northrup made a motion, seconded by Ms. Moran, to adopt the Working Group’s Oct. 31 minutes (Attachment Six-A1). The motion passed unanimously.

2. Heard an Update on the STLD Medical Data Call Template

Ms. Rebholz said the call letters were sent to all companies licensed in the 40 participating jurisdictions, or about 6,400 companies. She said the due date for responses is Dec. 13, and there will be no opportunity to submit data through the Regulatory Data Collection (RDC) tool after that date. Any late submissions allowed by any of the participating jurisdictions will have to be submitted outside of the tool directly to the jurisdiction. Ms. Rebholz said no submissions have been received yet, and only 24 people have requested the short-term limited duration (STLD) role necessary to submit reports. She said 262 emails have been received from companies advising that they have no STLD data to report. She estimated that this equates to more than 300 companies, because some of the emails came from groups on behalf of multiple companies.

3. Adopted “Other Health” as a Line of Business in the MCAS

Mr. Haworth said the discussion to add “other health” as a line of business in the MCAS is being considered in order to collect market data regarding medical plans that are not required to be compliant with the federal Affordable Care Act (ACA). He said the discussion began last year, but it was put on hold while the Working Group developed the STLD data call.

Katie Keith (Out2Enroll) said the NAIC-funded consumer representatives support the addition of the “Other Health” line of business in the MCAS. She agreed with the original proposals identification of gaps in the current health MCAS blank.

Ms. Ailor made a motion, seconded by Ms. Rouleau, to add the “other health” line of business to the MCAS. The motion passed unanimously.

4. Discussed the Uniform Process for Addressing MCAS Extension Requests

Ms. Rebholz said the best way to address how to consistently handle extension requests is to review and update the MCAS Best Practices Guide developed by the Working Group in 2014. She said three state insurance regulators have volunteered to assist her in reviewing and updating the MCAS Best Practices Guide. She asked others interested in volunteering to contact Randy Helder (NAIC).

Having no further business, the Market Analysis Procedures (D) Working Group adjourned.
The Market Analysis Procedures (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Oct. 31, 2019. The following Working Group members participated: John Haworth, Chair (WA); Rebecca Rebholz, Vice Chair (WI); Melissa Grisham (AR); Maria Ailor (AZ); Don McKinley (CA); Damion Hughes (CO); Kurt Swan (CT); Robin David (DE); Scott Woods (FL); Tate Flott (KS); Russell Hamblen (KY); Jeff Zewe (LA); Dawna Kokosinski (MD); Timothy Schott (ME); Jill Huiskens (MI); Cynthia Amann and Teresa Kroll (MO); Reva Vandevoorde (NE); Douglas Rees (NH); Ralph Boeckman (NJ); Peggy Willard-Ross (NV); Larry Wertel (NY); Angela Dingus (OH); Landon Hubbard (OK); Gary Jones and Katie Dzurec (PA); Michael Bailes (SC); Julie Fairbanks (VA); and Christina Rouleau (VT). Also participating was: October Nickel (ID).

1. **Adopted its Aug. 27 Minutes**

The Working Group met Aug. 27 and took the following action: 1) adopted its Summer National Meeting Minutes; 2) adopted the disability insurance Market Conduct Annual Statement (MCAS) scorecard ratios; and 3) agreed to post a 2018 national health MCAS scorecard.

Ms. Dingus made a motion, seconded by Ms. Amann, to adopt the Working Group’s Aug. 27 minutes (Attachment Six-A1a). The motion passed unanimously.

2. **Heard an Update on the STLD Medical Data Call Template**

Ms. Rebholz said the call letters were sent to all companies licensed in the 40 participating jurisdictions. She said the due date for responses is Dec. 13 and there will be no opportunity to submit data through the Regulatory Data Collection (RDC) tool after that date. Any late submissions allowed by any of the participating jurisdictions will have to be submitted outside of the tool directly to the jurisdiction, and they will not be in the aggregated totals.

Ms. Rebholz said an NAIC web page has been set up for the short-term limited duration (STLD) data call with the RDC tool, the data call, instructions, a frequently asked questions (FAQ) document and other assistance for companies. She said the RDC only provides form and format validations. Data quality and accuracy will need to be determined by each jurisdiction.

Ms. Rebholz said the NAIC will compile a list of all companies receiving the call. The list will include whether the company indicated on their Accident and Health Policy Experience Exhibit that it collected premium for Short-Term Medical products and whether the company filed any STLD products in the System for Electronic Rate and Form Filing (SERFF). Companies that do not have any STLD products to report are being instructed to send an email to the NAIC stating that they have no data to report.

Ms. Rebholz said after Dec. 13, the participating jurisdiction will be provided lists of companies that provided no response. The participating jurisdictions will follow up with the companies.

3. **Discussed an Analysis of LPI MCAS Data**

Mr. Haworth said the first submission of lender-placed insurance (LPI) was received earlier in the year. He said comments were received from Tom Keepers (Consumer Credit Industry Association—CCIA) about reporting concerns for blanket vehicle single-interest (VSI) insurance.

Mr. Keepers said blanket VSI provides protection only for the lender’s financial interest. A commercial insurance policy is issued to the lender that covers all eligible property. He said no certificates are issued to individuals. He said the MCAS blank has 17 underwriting data elements requesting certificate information for the blanket VSI business which companies have answered with zeroes. He said some participating MCAS states are insisting on responses for these data elements. He wanted to bring this issue to the attention of the Working Group so that analysts would understand why zeroes are being reported.
Mr. Keepers questioned whether blanket VSI belongs in the MCAS, because it is a commercial product protecting commercial lenders. Mr. Haworth asked what the size of the marketplace is. He said there are six to 10 insurers writing about $10 million each in premium. He said it is a small market.

Birny Birnbaum (Center for Economic Justice—CEJ) agreed with the description of blanket VSI, but he said all single-interest LPI is commercial in that it protects the lender. Blanket VSI is still LPI. He said because there are no certificates or reporting on an individual basis, it creates problems for analysts because the companies still report on claims, complaint, canceled policies, and other underwriting and claims information. He said this can skew the ratios in comparison to other LPI coverages. He suggested, however, that blanket VSI does not need to be excluded in the MCAS, but it could be broken out into a separate coverage. He recommended a special data call on blanket VSI and then creation of the separate MCAS blank.

Ms. Ailor agreed and said the issue should be referred to the Market Conduct Annual Statement (D) Working Group for consideration. She recommended that companies use the comments to explain their data if they expect that their data will create questions.

4. Discussed the Uniform Process for Addressing MCAS Extension Requests

Ms. Rebholz said the best way to address how to consistently handle extension requests is to review and update the MCAS Best Practices Guide developed by the Working Group in 2014. She asked for volunteers to review and update the MCAS Best Practices Guide.

Mr. Haworth volunteered and asked other volunteers to contact Randy Helder (NAIC).

5. Discussed the Reporting of Phantom Claims in the MCAS

Mr. Haworth said there seemed to be no concerns by any of the members about the reporting of phantom claims, and he said he would take this item off the agenda for the next meeting.

6. Discussed the Inclusion of Fraternals in the MCAS

Mr. Haworth said several states have expressed opposition to adding fraternals to the MCAS because they operate differently in different states. Additionally, he said many of the fraternals are small companies. Ms. Vandevoorde said Nebraska strongly opposes adding fraternals to the MCAS.

Ms. Huisken said that while many fraternals are small, there are a number of large fraternals for which MCAS data would be helpful. She said small fraternals could be eliminated by the premium threshold for reporting.

Mr. Birnbaum agreed with Ms. Huisken and noted that reporting from large fraternals should not be excluded just to protect small fraternals.

Mr. Haworth said there is no proposal one way or the other concerning the inclusion of fraternals. He solicited a proposal before considering this further.

7. Discussed Adding “Other Health” as a Line of Business in the MCAS

Mr. Haworth said the discussion to add “other health” as a line of business in the MCAS is being considered in order to collect market data regarding medical plans that are not required to be compliant with the federal Affordable Care Act (ACA).

Ms. Ailor supported adding the “other health” line of business to the MCAS. She noted that the line of business was never disapproved by the Working Group, but only put on hold. She said the STLD data call will provide some necessary data for analysts, but work should begin on the “other health” line of business.

Ms. Nickel and Ms. Rebholz also supported adding the “other health” line of business.

Ms. Ailor said now that the STLD template has been developed and the first collection of data will occur soon, the STLD data call can be used as a pilot for the development of an “other health” line of business blank for the MCAS.
Ms. Rebholz and Mr. Pyle said they support including “other health” in the MCAS.

Mr. Haworth said the Working Group would accept comments until Nov. 15 and would consider adoption of “other health” as the next line of business in the MCAS during the Working Group’s Nov. 21 conference call.

Having no further business, the Market Analysis Procedures (D) Working Group adjourned.
Market Analysis Procedures (D) Working Group
Conference Call
August 27, 2019

The Market Analysis Procedures (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Aug. 27, 2019. The following Working Group members participated: John Haworth, Chair (WA); Rebecca Rebholz, Vice Chair (WI); Melissa Grisham (AR); Maria Ailor and Cheryl Hawley (AZ); Pam O’Connell (CA); Damion Hughes (CO); Kurt Swan (CT); Sharon Shipp (DC); Frank Pyle (DE); Pamela Lovell (FL); Susan Lamb and Matthew Ryan (IL); Tate Flott (KS); Russell Hamblen (KY); Jeff Zewe (LA); Mary Lou Moran (MA); Raymond Guzman (MD); Timothy Schott (ME); Jill Huiskens (MI); Paul Hanson (MN); Cynthia Amann and Teresa Kroll (MO); Jeannie Keller (MT); Reva Vandevoorde (NE); Ralph Boeckman (NJ); Peggy Willard-Ross (NV); Sylvia Lawson (NY); Angela Dingus (OH); Joel Sander (OK); Jeffrey Arnold (PA); Michael Bailes (SC); Julie Fairbanks (VA); and Theresa Miller (WV).

1. **Adopted its Summer National Meeting Minutes**

Ms. Amann made a motion, seconded by Mr. Hanson, to adopt the Working Group’s Aug. 4 minutes (*see NAIC Proceedings – Summer 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Three*). The motion passed unanimously.

2. **Heard an Update on the STLD Medical Data Call Template**

Ms. Rebholz said the confidentiality agreement was sent to the participating states on Aug. 15, and responses have been received from around 25 jurisdictions.

Randy Helder (NAIC) said the confidentiality agreement indicated the data call would cover the period of September 2018 to March 2019. Because it was decided to possibly conduct the short-term, limited duration (STLD) data call multiple times, the NAIC Legal Division will send an email to the participating states asking for their agreement to leave the data call period open and not limited to just the September 2018 to March 2019 period. He also said the date the Regulatory Data Collection (RDC) tool will be ready was pushed to Oct. 1.

3. **Adopted Disability Insurance MCAS Proposed Scorecard Ratios**

Mr. Haworth said that during the Summer National Meeting, he asked for technical comments regarding the proposed disability insurance Market Conduct Annual Statement (MCAS) scorecard ratios. He said comments were received from the American Council of Life Insurers (ACLI), America’s Health Insurance Plans (AHIP) and the Center for Economic Justice (CEJ).

Michael Lovendusky (ACLI) said his comments concerned ambiguities in the definitions of paid and denied claims within the definitions of the MCAS blank, as well as technical comments on six of the ratios.

Mr. Haworth told Mr. Lovendusky to limit with comments to the ratios because data element and definitional matters belong to the Market Conduct Annual Statement Blanks (D) Working Group.

Mr. Lovendusky said ratio 1, “Percentage of claims denied,” would be improved by making the denominator the sum of claims denied and new paid claim determinations. He said ratio 6, “The number of complaints relating to group policies to the average number of group policies in force during the reporting period,” could produce false positives because the denominator is the average number of policies, but the number of members in group policies can vary substantially from company to company. He also noted that ratio 4, ratio 5 and ratio 6 refer to “complaints from consumers” but should read “complaints from insureds.”

Mr. Lovendusky said ratio 7, “The percentage of lawsuits closed with consideration for the consumer,” does not actually measure any wrong-doing or fault on the part of the insurer because some litigation results in good-will settlements by the insurer. He also cautioned that it could be exploited by the plaintiff bar. He was also unsure if the impact of class action lawsuits were considered.

Mr. Arnold said he would like a better understanding of the ratio.
Mr. Haworth said class action lawsuits were considered and noted this was just one data point that needed to be reviewed in addition to the raw data.

Mr. Birnbaum said the definition of a lawsuit closed with consideration to the consumer states that the settlement has to be larger than the last offer of the company before the lawsuit was brought. A company with a higher ratio may be making offers that more often compel litigation. He noted that if a data element is adopted, the assumption is it has value to market analysts.

Mr. Lovendusky said the titles of ratio 8, “Non-renewals and cancellations to average policies in-force,” and ratio 9, “Covered lives affected by non-renewals to average policies in-force,” should specify that the cancellations and non-renewals are by the insurer, not the insured. He said ratio 9 has the same confusion as ratio 6 in that the number of members in a group can vary significantly. Mr. Lovendusky said the purpose of ratio 10, “Average pending benefit determinations to claims received,” is unclear. He said if claims are handled appropriately by being processed within the standards set for timely claim handling, then there is no significance to average pending determinations.

Ms. Ailor made a motion, seconded by Ms. Amann, to revise ratio 4, ratio 5 and ratio 6 to change the word “consumer” to the actual terminology in the blank, “any entity other than the DOI,” and to clarify the titles of ratio 8 and ratio 9 to make it clear they refer to insurer non-renewals and cancellations. The motion passed unanimously.

Ms. Ailor made a motion, seconded by Ms. Amann, to adopt the proposed disability insurance MCAS scorecard ratios (Attachment Six-A1a1). The motion passed unanimously.

4. **Agreed to Post a 2018 National Health MCAS Scorecard**

Mr. Haworth said that for the 2017 data year, it was decided that the public health MCAS scorecards would not be posted. He said there was a concern of having only one or two companies writing health business within a jurisdiction. He said that at the Summer National Meeting, it was agreed again not to post the state by state scorecards for the 2018 data year. He said a proposal was made to post a single national scorecard instead.

Mr. Zewe noted there were no comments in opposition to a national scorecard.

Demetria Tittle (Blue Cross and Blue Shield Association—BCBSA) said since the national scorecard was only introduced at the last meeting, it would be helpful for all state insurance regulators and interested parties to see it prior to posting it as the 2018 health scorecard.

Mr. Haworth noted that whether it was publicly exposed as a working document or if it was posted as the scorecard, it would be publicly viewable.

Joseph Zolecki (BCBSA) said there was some confusion regarding how the scorecard ratios would be calculated.

Mr. Helder explained that for each numerator and denominator, the total of all reported data by all companies would be calculated regardless of which state or states it was reported to. It will not be an average.

Mr. Zolecki asked that the statement regarding the methodology employed be included on the scorecard.

Mr. Zewe made a motion, seconded by Ms. Amann, to post a 2018 data year national health MCAS scorecard. The motion passed unanimously. Mr. Haworth said a statement regarding the methodology for the calculation will be included.

5. **Discussed Uniform Process for Addressing MCAS Extension Requests**

Ms. Rebholz said there was interest by the Working Group for a uniform process and what would and would not be in that process. She said, for example, that many states are not interested in fines, but many states do want a template letter that can be sent if a company meets a trigger, such as two or three consecutive years of requesting an extension. She volunteered to draft a process to begin the discussions.
6. Discussed the Reporting of Phantom Claims in the MCAS

Ms. Kroll said she brought this issue up at the Summer National Meeting. She said she understands the property/casualty (P/C) insurers were originally given latitude on the reporting of claims in the MCAS. She said, however, that after 15 years, they should be able to report accurate claims numbers without including claims setup for precautionary reasons only or set up just to address an inquiry of coverage and closed without payment. She suggested the participating MCAS states need to make a firm stand on this issue.

Ms. Ailor noted the Market Conduct Annual Statement Blanks (D) Working Group made revisions in 2017 to the P/C MCAS definitions to address claims reported for informational reasons only.

Mr. Haworth asked state insurance regulators to let the Working Group and Ms. Kroll know if they are seeing the same issues.

7. Discussed Inclusion of Fraternals in the MCAS

Mr. Haworth said fraternals are currently not required to file an MCAS because the MCAS submission tool is only available to companies that file their annual financial statements on the life, property and health statement types. He said because fraternals used to file their financial statements on a fraternal statement type, they were unable to access the MCAS submission tool. He said beginning with the 2019 data year, fraternals will no longer submit on the fraternal financial statements; instead, they will be reporting on the life, health and P/C financial statements. He noted that this means fraternals could now be required to file an MCAS if the Working Group decides it would be useful to have them submit MCAS filings.

Ms. Vandever said there are only a few fraternals that account for most of the premium generated by fraternals. She said for most fraternals, submitting an MCAS would be a cost burden. She said Nebraska does not support requiring fraternals to report an MCAS.

Ms. Rebholz said, in Wisconsin, there are not many complaints relating to fraternals. She suggested adding a line to the MCAS that has more issues that need addressing.

Ms. Huisken asked if the consideration was to add an MCAS blank specifically for fraternals or to require fraternals to file on the already established MCAS blanks.

Mr. Haworth said the consideration was for fraternals to report on already established MCAS blanks.

Ms. Huisken said that was not too much of a burden and that the consumers of products provided by fraternals are subject to the same issues as consumers of products offered by other types of insurance companies.

Mr. Arnold said a stand-alone fraternal MCAS blank is not necessary. He said the top six fraternals in Pennsylvania account for 90% of the premium written by fraternals.

Mr. Birnbaum said it would be helpful to quantify the cost burden to fraternals for comparison to the qualitative benefits of adding fraternals.

Mr. Haworth noted that fraternals are regulated differently from other companies in Washington. He said the Working Group would continue the discussion.

8. Discussed Adding “Other Health” as a Line of Business in MCAS

Mr. Haworth said the discussion to add “other health” as a line of business in MCAS was tabled last year while the Working Group developed the STLD data call. He said interest was expressed in reopening the discussion.

Ms. Ailor said that now that the STLD template has been developed and the first collection of data will occur soon, the STLD data call can be used as a pilot for the development of an “other health” line of business blank for the MCAS.

Ms. Rebholz and Mr. Pyle said they support including “other health” in the MCAS.

Mr. Haworth said this agenda item will remain on the Working Group agenda.

Having no further business, the Market Analysis Procedures (D) Working Group adjourned.
2019 Market Conduct Annual Statement Ratios

Disability Income

**Ratio 1**  Percentage of claims denied

\[
\frac{\text{Number of claims denied during reporting period (21)}}{\text{Number of paid claims closed during reporting period (22)}}
\]

**Ratio 2**  Percentage of claims processed with initial decision after 45 days

*Short-Term Only*

\[
\frac{\text{Number of claims processed with initial claim decision over 45 days (28)}}{\text{Number of claims processed with initial claim decision within 1-14 days (25)} + \text{Number of claims processed with initial claim decision within 15-30 days (26)} + \text{Number of claims processed with initial claim decision within 31-45 days (27)}}
\]

**Ratio 3**  Percentage of claims processed with initial decision after 90 days

*Long-Term Only*

\[
\frac{\text{Number of claims processed with initial claim decision over 90 days (33)}}{\text{Number of claims processed with initial claim decision within 1-30 days (30)} + \text{Number of claims processed with initial claim decision within 31-60 days (31)} + \text{Number of claims processed with initial claim decision within 61-90 days (32)}}
\]

Commented [HR1]: Replaced Benefit Determinations with Claims Decisions
2019 Market Conduct Annual Statement Ratios

**Ratio 4** The number of complaints received directly from consumers per 1,000 individual policies in force during the reporting period

\[
\frac{[\text{Number of complaints received from consumers (83)}]}{([\text{Number of policies beginning of the reporting period (67)}] + [\text{Number of policies at the end of the reporting period (75)}] + 2) \div 1000}
\]

**Ratio 5** The number of complaints received directly from consumers per 1,000 lives covered on group policies

\[
\frac{[\text{Number of complaints received from consumers (83)}]}{([\text{Number of lives covered at the beginning of the reporting period (76)}] + [\text{Number of lives covered at the end of the reporting period (82)}] + 2) \div 1000}
\]

**Ratio 6** The number of complaints relating to group policies to average number of group policies in force during the reporting period

\[
\frac{[\text{Number of complaints received from consumers (83)}]}{([\text{Number of policies in force at beginning of reporting period (67)}] + [\text{Number of policies in force at end of the reporting period (75)}] + 2)}
\]

**Ratio 7** The percentage of lawsuits closed with consideration for the consumer

\[
\frac{[\text{Number of lawsuits closed with consideration for consumer (87)}]}{[\text{Total number of lawsuits closed during the period (86)}]}
\]

Commented [HR2]: Ratio 4 was split into three ratios in order to separately measure complaints on individual policies and complaints on group policies.
2019 Market Conduct Annual Statement Ratios

**Ratio 8  Non-renewals and cancellations to average policies in force**

\[
\left( \frac{\text{Number of insurer non-renewals (71) + Number of insurer cancellations (72)}}{\text{\(\frac{\text{Number of policies in force at the beginning of the reporting period (67) + Number of policies in force at the end of the reporting period (75)}}{2}\)}} \right)
\]

**Ratio 9  Covered lives affected by non-renewals to average policies in force**

Group only

\[
\left( \frac{\text{Number of lives covered under insurer non-renewals (79) + Number of lives covered under insurer cancellations (80)}}{\text{\(\frac{\text{Number of lives covered under policies in force at the beginning of the reporting period (76) + Number of lives covered under policies in force at the end of the reporting period (82)}}{2}\)}} \right)
\]

**Ratio 10  Average pending benefit determinations to claims received**

\[
\left( \frac{\text{\(\frac{\text{Number of pending benefit determinations, beginning of reporting period (17) + Number of pending benefit determinations, end of reporting period (23)}}{2}\)}}{\text{Number of claims received during the reporting period (19)}} \right)
\]

**Ratio 11  Rescissions after two years from issuance to total rescissions**

\[
\left( \frac{\text{Number of rescissions after two years from policy issue (74) + Number of rescissions within two years from policy issue (73)}}{\text{Number of rescissions after two years from policy issue (74)}} \right)
\]
The Market Conduct Annual Statement Blanks (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Nov. 21, 2019. The following Working Group members participated: Maria Ailor, Chair (AZ); Angela Dingus, Vice Chair (OH); Melissa Grisham (AR); Kurt Swan (CT); Scott Woods (FL); October Nickel (ID); Lori Cunningham (KY); Teresa Fischer (MN); Teresa Kroll and Cynthia Amann (MO); Katie Dzurec (PA); Ned Gaines and John Haworth (WA); Jo LeDuc (WI); and Letha Tate (WV). Also participating were: Laura Arp and Martin Swanson (NE).

1. **Adopted its Oct. 23 Minutes**

The Working Group met Oct. 23 and took the following action: 1) adopted its May 2 minutes; 2) heard an update on the Life and Annuity Market Conduct Annual Statement (MCAS) Data Element Review Project; 3) heard an update on the Other MCAS Lines of Business Data Element Review Project; and 4) heard an update on the health MCAS industry questions meetings.

Ms. Dingus made a motion, seconded by Mr. Haworth to adopt the Working Group’s Oct. 23 minutes (Attachment Seven-A). The motion passed.

2. **Agreed to Change MCAS Due Dates Occurring on Weekends and Federal Holidays**

Ms. Ailor advised concerns were expressed to the Working Group related to when an MCAS due date falls on the weekend. It was asked if the due date could be moved to a weekday. The Working Group discussed this concern and agreed that if the due date falls on a weekend or a federal holiday, the due date will be moved to the next business day.

3. **Extended the Health MCAS Filing Deadline for 2020, 2021 and 2022**

Ms. Ailor advised a letter was received requesting the health MCAS filing due date be permanently changed from April 30 to June 30. The letter is attached to the minutes for reference (Attachment Seven-B).

Joseph Zolecki (Blue Cross and Blue Shield Association—BCBSA) provided the Working Group with a summary of the request. He went through the points outlined in the letter and explained that one of the concerns health carriers have with an April 30 filing deadline instead of a June 30 deadline is that certain health MCAS data may not be complete or entirely reliable due to the numerous health claim adjustments that occur in the beginning of the year and the year-end claim submissions in the first and second quarters. He advised that based on carrier experiences in the first two years of health MCAS filings, a June 30 filing date will allow for adequate time to pull and process this information and will result in more accurate and useful health MCAS filings. He advised the amount of external data required for health MCAS reporting compared to the life and property/casualty MCAS reporting is disproportionate, yet the filing dates are similar. He explained there is not currently an automated way to compile the data into the health MCAS because health data is received from so many different sources, and, as a result, health carriers are required to manually compile the data. He advised it would likely be several years before full automation is possible, noting that a June 30 filing date should minimize and/or eliminate extension requests. He stated that unless there are extraordinary circumstances, June 30 would be the firm due date.

Prior to requesting comments and/or questions from the Working Group, Ms. Ailor explained that any decision by the Working Group to amend the due date would need to be considered and approved by the Market Regulation and Consumer Affairs (D) Committee at the Fall National Meeting.

Ms. Nickel expressed concern with getting corrections from health carriers made within the next data year for Idaho. She said Idaho has a small department and a small market conduct section. She explained that getting all carriers and lines of business together at once to evaluate the MCAS data in a consistent manner and have enough time to analyze those carriers and provide companies with letters and/or contact information when irregularities/outliers are seen is already going into the next year. Then, after adding in time for responses and re-evaluations, many times the next data year is already underway. To review if there are violations going on, the department would like to cure that as soon as possible.

© 2019 National Association of Insurance Commissioners
Mr. Gaines said Washington has the same issue as Idaho, noting that the department is required to review all domestic companies. Most of the domestic companies that must report happen to be health carriers, and, with a June 30 date, the department cannot even start reviews until August at the earliest, which puts staff in a bind to get everything completed by the end of the year. If reviewing data at the end of the year, it makes it difficult to go back to the carrier and try to get any corrections, as so much time has passed and the carrier is already looking at submitting new data for the next year.

Ms. Dingus advised she understands the issues with companies trying to get data and she is not opposed to extending the deadline but not on a permanent basis. She advised a period of three years would be acceptable, with the understanding the due date would be reevaluated.

Mr. Haworth asked for clarification on what would be considered extraordinary circumstances. He advised that Washington often gets requests for extension the day of or day before the due date, claiming the carrier was unable to get data from a third-party vendor and wants to know if this would qualify.

Ms. Dingus added the example of carriers requesting extensions because the person who was handling the data left the company and did not think this should qualify as an extraordinary circumstance.

Ms. Arp said she believes three years is fair, with the understanding that this due date will be reevaluated in three years.

Mr. Swanson said he envisions that an extraordinary circumstance would be a fire or an “Act of God,” not a staffing issue. Ms. Arp said changes in personnel should be excluded.

Ms. Nickel suggested a May 30 deadline, explaining the Working Group cannot really define “extraordinary” and, if an extension is requested, trying to qualify “extraordinary” could become problematic.

Ms. Ailor asked Mr. Zolecki what he considers to be “extraordinary,” and he agreed it would not be a change of personnel. He asked if he could go back to the carriers and send some examples for consideration, but said he agrees something like an Act of God is a reasonable parameter.

Birny Birnbaum (Center for Economic Justice—CEJ) asked that the deadline be kept at April 30 and enforced because the purpose is not to be aligned with other reporting dates, but to provide data to regulators in a timely fashion. He advised that routine reporting requirements enables insurers to develop procedures for timely reporting. He advised the annual financial statement is far more complex than the health MCAS and insurers are able to report just two months following the end of the experience period, as insurers have developed the tools and resources to meet this reporting deadline despite the complexity, noting that regulators have confirmed the importance of this data for regulatory purposes.

Ms. Ailor expressed her understanding of the concerns presented from all parties and advised she supports extending the deadline to June 30 or May 30 with a reevaluation date in the future, such as three years as previously discussed. She asked how the Working Group would like to move forward with this request.

Ms. Dingus made a motion, seconded by Ms. Dzurec, to extend the health MCAS deadline to June 30 for three reporting periods of 2020, 2021 and 2022, to be reevaluated in 2022, only if companies request the reevaluation. If companies do not request reevaluation of the due date in 2022, the due date will roll back to April 30. The motion passed.

Tressa Smith (NAIC) confirmed with the Working Group that this motion is for the 2019 data to be reported in 2020, the 2020 data to be reported in 2021, and the 2021 data to be reported in 2022.

4. Discussed Other Matters

Ms. Amann advised that regarding the life MCAS, there was not enough desire from the small group to expand the life and annuity MCAS due to time and staff limitations. Mr. Haworth advised the State Ahead initiative is taking a lot of NAIC resources and adding extra data fields may not be feasible at this time.

Teresa Cooper (NAIC) advised that while the State Ahead initiative is taking a lot of resources, the Working Group should not let that be a factor in this decision and to make changes as needed.
Mr. Birnbaum asked who the members of the small group are, noting that such information is not readily available. He then asked if the NAIC was specifically asked if this request would be a burden or conflict with the State Ahead initiative, and Ms. Amann confirmed the NAIC was not asked that question.

Mr. Birnbaum then asked for clarification on why this would be difficult for regulators.

Ms. Amann advised the difficulty is collecting data they are not able to analyze because they either do not have the time or they have limitations on the data being accurate. Mr. Birnbaum then asked that a more robust report be provided from the small group and that a discussion take place about it.

Having no further business, the Market Conduct Annual Statement Blanks (D) Working Group adjourned.
The Market Conduct Annual Statement Blanks (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Oct. 23, 2019. The following Working Group members participated: Maria Ailor, Chair (AZ); Angela Dingus, Vice Chair (OH); Melissa Grisham (AR); Kurt Swan represented by Steve DeAngelis (CT); Scott Woods (FL); Paul Hanson (MN); Teresa Kroll and Cynthia Amann (MO); Michael Bailes (SC); Ned Gaines and John Haworth (WA); Jo LeDuc (WI); and Letha Tate (WV).

1. **Adopted its May 2 Minutes**

The Working Group met May 2 and took the following action: 1) adopted its March 28 minutes; 2) adopted the private flood Market Conduct Annual Statement (MCAS) Data Call and Definitions; 3) adopted items from its Jan. 23-24 meeting; and 4) made a motion to add a health MCAS blank for the “number of member months for policies terminated during the period.”

(Editor’s Note: Item #4 regarding the health MCAS blank was adopted unanimously by the Working Group. It was subsequently adopted by the Market Regulation and Consumer Affairs (D) Committee during its July 15 conference call, and it will be added to the 2020 health MCAS blank, which will be reported in 2021.)

Mr. Haworth made a motion, seconded by Ms. Kroll to adopt the Working Group’s May 2 minutes (see NAIC Proceedings – Summer 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Four). The motion passed.

2. **Heard an Update on the Life and Annuity MCAS Data Element Review Project**

Ms. Amann said there was a previous survey generated regarding product category expansion/modification for life and annuity data elements. The smaller review group is currently reviewing the comments and survey responses, and it will provide a written update to the Working Group by the end of the month.

Birny Birnbaum (Center for Economic Justice—CEJ) said he recently submitted supplemental survey comments referring to changes in the annual financial statement. The changes to the annual financial statement provide for the recording of more categories, so he suggested that the Working Group consider tracking these changes because they break life and annuity into more product categories. The comments he submitted will be reviewed.

Michael Lovendusky (American Council of Life Insurers—ACLI) asked that Ms. Amann include him on the distribution list for the written update on this subject matter, and she confirmed that she would. He asked when the 2019 MCAS User Guide would be posted because disability income is being reported for the first time, and Teresa Cooper (NAIC) said it should be posted by the end of the month.

3. **Heard an Update on the Other MCAS Lines of Business Data Element Review Project**

Ms. Ailor said the Working Group needs to review the other lines of business for MCAS. She suggested that a survey be sent out to see if there is any interest in updating or changing data elements for homeowners and private passenger auto to begin the reviews for other lines of business. The survey would be similar to the one generated for the pending life and annuity data element review. Depending on the results of the survey, subject-matter expert (SME) groups can be formed to review the data elements.

4. **Heard an Update on the Health MCAS Industry Questions Meetings**

Ms. Ailor said comment letters were received yesterday from health insurance industry interested parties regarding the MCAS submission process and filing deadline. A Working Group meeting is being arranged for Nov. 21 to further discuss these details after Working Group members have had an opportunity to review these letters, which will soon be generated with the meeting notice.
Joseph E. Zolecki (Blue Cross and Blue Shield Association—BCBSA) asked if there would be time to get this reviewed before the Market Regulation and Consumer Affairs (D) Committee meets in December.

Ms. Cooper explained that system changes related to validations and attestations do not have to go through the Working Group.

Ms. Ailor explained that, if needed, there may need to be separate handling of these matters between scheduled meetings.

Having no further business, the Market Conduct Annual Statement Blanks (D) Working Group adjourned.
Ms. Maria Ailor

RE: Health Industry Interested Parties Proposed Health Market Conduct Annual Statement Blank (MCAS) Filing Date

Dear Ms. Ailor and Ms. Dingus:

The Health Industry Interested Parties (“HIIP”) group is comprised of single and multi-state licensed health insurers and administrators representing comprehensive major medical and managed care health insurance carriers of all sizes located throughout the United States. On behalf of the HIIP group, we continue to be concerned about the due date for filing the Health Market Conduct Annual Statement (Health MCAS) in 2020 and thereafter, and we request that the Market Conduct Annual Statement Blanks Working Group (Working Group) consider making June 30 the permanent annual filing deadline for the Health MCAS beginning in 2020.

As the due date for health insurers to file their 2019 Health MCAS Reports is scheduled to shift forward in 2020 to April 30, the HIIP group recognizes and understands the Working Group’s desire to align the due dates for MCAS filings across all lines of business. During Health MCAS implementation, the HIIP group has appreciated the Working Group’s flexibility in allowing health insurers to submit their MCAS reports on a different timetable in 2018 and 2019. However, based on their experiences from these first two years of Health MCAS reporting, the HIIP group members firmly believe that the April 30 deadline is problematic and impracticable as it pertains to the reporting of health insurance data. Based on the HIIP group members’ experiences compiling and reporting Health MCAS data over the past two years, the group believes that a June 30 deadline is more suitable going forward and more constructive toward the NAIC’s goal of collecting complete, useful and fully-adjusted health insurance market data. External administrators also support a filing date for health carriers that is later in the second quarter in order to support and manage the capacity and growing number of reporting client needs and expectations during their peak reporting season.

As discussed more fully below, we believe that the rationale for requiring uniform deadlines for all MCAS data should not outweigh the need for ensuring that the Health MCAS produces complete, carefully compiled and validated health data that regulators can rely upon in performing their regulatory oversight goals.
Complexity of Health Data and the Health MCAS

It is important to recognize the complexity and nature of Health MCAS data being reported compared to data reported for other MCAS lines of business, as well as the manner in which data must be collected and compiled for the Health MCAS report.

As compared to MCAS blanks used to collect data on other lines of business, which are more straightforward and involve relatively few data elements, the Health MCAS is substantially more complex, requiring significantly more data elements to collect and validate through quality assurance processes necessary to produce complete, consistent and verifiable information. Without counting Interrogatories, the Health MCAS calls for more than 140 lines (or elements) of policy and claim data - over four times more than the MCAS for Homeowners and over six times more than that for Private Passenger Auto. Moreover, each of these lines or data elements requires dozens of individual, potentially unique, or overlapping substratifications that require various programming, querying, aggregating, or cross-referencing processes to identify and compile, not to mention validate and attest. These various sub-elements and substratifications, which generally are not otherwise tracked and maintained throughout an insurer’s systems in the Health MCAS format include:

- On Exchange vs. Off Exchange;
- Single State vs. Multi-State;
- Grandfathered vs. NonGrandfathered;
- Individual vs. Group;
- Small Group vs. Large Group;
- Catastrophic vs. Non-Catastrophic;
- Student vs. Non-Student;
- Bronze, Silver, Gold or Platinum;
- In-Network vs. Out of Network;
- Pharmacy vs. Non-Pharmacy; and
- Behavioral Health vs. Non-Behavioral Health

There is nothing comparable in the other Life or Property and Casualty MCAS filings. Moreover, much of the data reported in the Health MCAS must be obtained from multiple internal and external sources or systems, further complicating the effort necessary to compile accurate data for the Health MCAS report. These sources include finance, membership, claims, customer service, health care services, care management, and pharmacy, and typically involve data maintained by numerous vendors or third-party administrators.

The amount of external data required for Health MCAS reporting compared to Life and Property and Casualty MCAS reporting is disproportionate, yet the filing dates are similar. For example, there are products like behavioral health, where this sensitive data is extensively controlled and restricted by regulation. For these reasons, carriers' behavioral health data is often held outside of the reporting database. Data processing is extremely complex and time-consuming to initially retrieve the data from external sources and match it to members and policies that exist on internal reporting databases, followed by multiple iterations of testing and validation to ensure accurate presentation of data in Health MCAS filings.

Nor is there currently an automated way to compile the data into the Health MCAS, since health data is received from so many different sources. Therefore, health carriers are required to manually compile the data to ensure quality and accuracy. A Health MCAS filing could have millions of associated underlying lines of administrative data that requires health carriers to perform multiple manual steps in their comprehensive review of the data. Life and property and casualty carriers do not have the volume of manual data input and analysis that health carriers are required to perform.
The Working Group has indicated that it expects health carriers to eventually automate the process for data retrieval required for the annual Health MCAS report; however, this expectation is several years from realization and will require a substantial outlay of healthcare resources to achieve. Considering the vast quantity of data elements and sub-strata mandated by the Health MCAS blank, not to mention the changes or additions to those elements from year to year and the evolving state of definitions and instructions applicable to them, it will likely be several years to come before full automation is possible.

Until full automation is achieved, carriers must go through a series of cumbersome and manual processes for Health MCAS reporting. Carriers can have a significant volume of underlying lines of administrative data associated with the data elements required for Health MCAS reporting. The underlying administrative data can be subject to a manual multi-step validation process. A key step in this validation process is to model claims, which can encompass 200+ data elements that are extracted from administrative systems and data warehouses. Each associated line of administrative data must have a specific designation (i.e. “be modeled”) to allow for changes due to any number of internal variables, such as place of service code or line of business changes.

Data Readiness
One of the primary concerns that health carriers have with an April 30 filing deadline instead of June 30 is that certain data needed for compiling the Health MCAS report may not be fully adjusted or complete, which could result in MCAS reports that are not entirely reliable. Health carriers have numerous adjustments that occur in the first few months of the year, as well as the processing of year-end claim submissions in the 1st and 2nd quarters. Based on carrier experiences in the first two years of Health MCAS filings, a June 30 filing date will allow for adequate time to pull and process this information and will result in more accurate and useful Health MCAS filings.

For example, if a carrier pulls claims data at the beginning of the year (in January or February), the carrier would not catch certain active member validations related to unpaid December premiums, given that members would be in a 90 day grace period during this data pull. In this example, the member would be counted as having active coverage through year-end instead of having inactive coverage for non-payment. However, if the same data is pulled in April, the member would be accurately counted as having inactive coverage since the retroactive adjustment back to November 30 would have been processed.

Furthermore, there is national recognition that health claim reporting requires a significant amount of time after year-end to complete and test the accuracy of data. An example of complex state reporting is the All-Payer Claims Databases (APCD) report, which typically has a nine-month timeline as the minimum standard concerning new or modified reporting requirements in recognition of the need for data accuracy. This guide has proved effective for carriers to reconfigure inclusions and exclusions rules, schedule and execute data workloads and outputs and finally to run all of the data edits and investigate any variances.

In order for carriers to provide carefully compiled and validated Health MCAS filings by June 30, the HIIP group recommends that all Health MCAS reporting requirements be released as final by the NAIC no later than August 31 of the data year. Any new Health MCAS reporting requirement requires significant analysis and a complete re-look at all of the required modeling to ensure that there is not a relationship issue or other issues in the data. This form of analysis requires sufficient time for necessary programming and modeling in order to process through all of the data quality edits and to investigate and re-test the correction of variances.

Other Mandatory Filing Requirements
The health insurance industry is unique compared to other lines of insurance in that since the passage of the Affordable Care Act, the vast majority of health policies follow a strict annual calendar-year cycle. This means that, while other insurance policies are underwritten and issued throughout the
year, the annual policies offered by health insurers are predominately marketed, sold and issued only during a brief open enrollment period each year. Accordingly, product development, rating, approval, and marketing cycles for health insurance products also follow a strict annual cycle. As a result, during the first quarter of each year substantial resources and focus of health insurers are devoted toward enrollment validation and processing for new and renewing plan members for the current policy year (including distribution of member ID cards and coverage information), as well as the planning and development of the next year’s product offerings so that they can be submitted for regulatory approval in time to be brought to market. Under an April 30 filing deadline, the need to pull Health MCAS data hits health insurers at a time when their data systems and personnel are already intensely focused on the enrollment process and product development aspects of the health insurance cycle.

In addition to the burdens created by this annual cycle and the array of mandatory NAIC financial, actuarial and solvency reporting requirements for all carriers in the 1st and 2nd quarters, the health industry is further unique in having several other mandatory health insurance data filing requirements during the 1st and 2nd quarters that the other line of business carriers do not have. These mandatory filing requirements are uniquely applicable to health carriers only include the following:

- Medicare Supplement Insurance Experience Exhibit;
- Medicare Part D Coverage Supplement;
- Accident & Health Policy Experience Exhibit;
- Supplemental Health Care Exhibit; and
- Long-Term Care Experience Exhibit

Many health insurers are also required to make mandatory federal and state rate and form filings for their Affordable Care Act (ACA) products. Given the delays in receiving the Notice of Benefit and Payment Parameters (NBPP) information from the federal government, the period for these filings is greatly condensed, adding to the stress on carriers’ resources and systems during this period. In addition to the filing requirements imposed by state regulators, most health insurers are in various ways subject to an added layer of federal regulation, which differentiates them from companies reporting other MCAS lines of business and enhances the challenges imposed by an April 30th deadline.

On behalf of the Health Industry Interested Parties group, we would like to thank you for your consideration of our concerns and related comments regarding an April 30 filing deadline, and we look forward to working with you on a feasible alternative date that is satisfactory for both regulators and health carriers. Please contact us if you have any questions.

Sincerely,

Joseph E. Zolecki
BCBSA

Samantha Burns
AHIP

Cc: Demetria Tittle, BCBSA
The Market Conduct Examination Standards (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Nov. 20, 2019. The following Working Group members participated: Bruce R. Ramge, Chair, Martin Swanson and Reva Vandevoorde (NE); Russell Hamblen, Vice Chair (KY); Melissa Grisham and Mel Heaps (AR); Damion Hughes (CO); Kurt Swan (CT); Frank Pyle (DE); Sarah Crittenden (GA); Lindsay Bates and Kim Cross (IA); Mary Lou Moran (MA); Jill Huiskens and Gloria Mason (MI); Cynthia Amann, Stewart Freilich and Win Nickens (MO); Edwin Pugsley (NH); Ralph Boeckman (NJ); Sylvia Lawson (NY); Rodney Beech and Angela Dingus (OH); Landon Hubbart and Joel Sander (OK); Scott Martin (OR); Katie Dzurec and Christopher Monahan (PA); Julia Fairbanks and Yolanda Tennyson (VA); Marcia Violette (VT); John Haworth and Jeanette Plitt (WA); Barbara Belling, Sue Ezalarab, Darcy Paskey, Rebecca Rebolz and Mary Kay Rodriguez (WI); and Desiree Mauller (WV).

1. **Adopted its Oct. 9 Minutes**

The Working Group met Oct. 9 and took the following action: 1) adopted its Aug. 29 minutes; 2) discussed revisions made to the draft travel insurance examination standards subsequent to comments received in September from Nebraska, the U.S. Travel Insurance Association (USTiA) and the American Property Casualty Insurance Association (APCIA); and 3) adopted the travel insurance-related examination standards for inclusion in the Market Regulation Handbook (Handbook).

Mr. Swan made a motion, seconded by Ms. Plitt, to adopt the Working Group’s Oct. 9 minutes (Attachment Eight-A). The motion passed unanimously.

Director Ramge said that a new draft farmowners in force standardized data request (SDR) and a new draft farmowners claims SDR were developed by regulator subject matter experts (SMEs) for the Working Group’s review, discussion and consideration of adoption, for inclusion in the reference documents of the Handbook. The drafts were exposed Oct. 29 for a public comment period ending Dec. 2.

Ms. Vandevoorde said the field name CanTerRs (reason for cancellation/termination of coverage) in the farmowners in force SDR duplicates the data that is obtained by field name CanTer (who cancelled the coverage); Ms. Vandevoorde will submit revised language for the field name CanTerRs, and Petra Wallace (NAIC staff) will circulate a revised draft farmowners in force SDR prior to the Working Group’s next conference call. Director Ramge encouraged state insurance regulators and interested parties to submit comments on the draft SDRs by the comments due date so that the Working Group can discuss the comments during its next conference call, which is scheduled for Dec. 18.

3. **Discussed New Draft Limited LTC Chapter, Oct. 29 Draft, for Inclusion in the Handbook**

Director Ramge said that new draft limited long-term care (LTC) exam standards were developed by regulator SMEs for the Working Group’s review, discussion and consideration of adoption, for inclusion as a new market conduct examination standards chapter in the Handbook. The drafts were exposed Oct. 29 for a public comment period ending Dec. 2.

Ms. Moran said there is language in 1) Marketing and Sales Standard 1 and 2) Standard 1 Appeal of Benefit Trigger Adverse Determination of the draft that may not be relevant. Ms. Moran said that she will provide revisions to these areas and that Ms. Wallace will circulate revised draft standards prior to the Working Group’s next conference call. Director Ramge encouraged state insurance regulators and interested parties to submit comments on the draft standards by the comments due date so that the Working Group can discuss the comments during its Dec. 18 conference call.

4. **Discussed Other Matters**

Director Ramge said NAIC staff will provide advance email notice of the Working Group’s Dec. 18 conference call.

Having no further business, the Market Conduct Examination Standards (D) Working Group adjourned.

© 2019 National Association of Insurance Commissioners
Market Conduct Examination Standards (D) Working Group
Conference Call
October 9, 2019

The Market Conduct Examination Standards (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Oct. 9, 2019. The following Working Group members participated: Bruce R. Ramge, Chair, and Reva Vandevoorde (NE); Russell Hamblen, Vice Chair (KY); Mel Heaps (AR); Maria Ailor (AZ); Damion Hughes (CO); Kurt Swan (CT); Frank Pyle (DE); Sarah Crittenden (GA); Lindsay Bates (IA); Mary Lou Moran (MA); Jill Huisken and Gloria Mason (MI); Paul Hanson (MN); Win Nickens (MO); Ralph Boeckman (NJ); Otis Phillips (NM); Peggy Willard-Ross (NV); Sylvia Lawson (NY); Rodney Beetch and Angela Dingus (OH); Kevin Foor, Landon Hubbart, Joel Sander and Shelly Scott (OK); Scott Martin (OR); Gary Jones (PA); Joy Morton and Yolanda Tennyson (VA); Christina Rouleau (VT); Jeanette Plitt (WA); Barbara Belling, Darcy Paskey, Rebecca Rebholz and Mary Kay Rodriguez (WI); and Desiree Mauller (WV).

1. Adopted its Aug. 29 Minutes

The Working Group met Aug. 29 and took the following action: 1) adopted a new workers’ compensation standardized data request for inclusion in the Market Regulation Handbook (Handbook) reference documents; and 2) continued its discussion of new travel insurance-related examination standards for inclusion in the Handbook.

Ms. Plitt made a motion, seconded by Ms. Dingus, to adopt the Working Group’s Aug. 29 minutes (Attachment Eight-A1). The motion passed unanimously.

Director Ramge said the draft travel insurance exam standards were developed by state insurance regulator volunteers Ms. Morton and Rebecca Nichols (VA). The draft was first circulated May 22, and the Working Group discussed the draft during its May 30, June 18, July 18 and Aug. 29 conference calls.

Director Ramge said the draft being discussed during today’s conference call was circulated Oct. 3 and contains revisions made by Ms. Morton and Ms. Nichols after they reviewed the following comments: 1) Sept. 20 comments received from Ms. Vandevoorde; 2) Sept. 27 comments received from John P. Fielding and LeeAnn Goheen (Steptoe & Johnson LLP) on behalf of the U.S. Travel Insurance Association (UStiA); and 3) Sept. 30 comments received from Angela Gleason (American Property Casualty Insurance Association—APCIA).

Director Ramge said the Oct. 3 draft was circulated in a redlined version and a “clean” version with the redlines accepted. Additionally, a summary of changes made to the document was also provided to the Working Group, interested state insurance regulators and interested parties.

Ms. Morton presented the changes made to the draft. Ms. Vandevoorde said that the first sentence in the first review procedures and criteria paragraph in Marketing and Sales Standard 1 should be replaced with: “Examiners should request a listing of all marketing materials and select a sample according to the jurisdiction’s sampling protocols.”

Ms. Plitt made a motion, seconded by Ms. Lawson, that in Marketing and Sales Standard 1, in the next to last bullet point in the “Materials should …” review procedures and criteria section, the bullet should be changed from “… indicate that the travel protection plan being marketed includes insurance” to “… indicate that the travel protection plan being marketed is insurance.” A voice vote was held, and a majority of the Working Group agreed to the change. Ms. Morton and Ms. Vandevoorde opposed this change.

Mr. Hamblen made a motion, seconded by Mr. Pyle, to adopt the new travel insurance-related examination standards draft, including all revisions made during the conference call, for inclusion in the Handbook (see NAIC Proceedings – Fall 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Three). The motion passed unanimously.

Director Ramge said NAIC staff will provide advance email notice of the Working Group’s next conference call, which is scheduled for Nov. 20.

Having no further business, the Market Conduct Examination Standards (D) Working Group adjourned.
Market Conduct Examination Standards (D) Working Group
Conference Call
August 29, 2019

The Market Conduct Examination Standards (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Aug. 29, 2019. The following Working Group members participated: Bruce R. Ramge, Chair (NE); Russell Hamblen, Vice Chair (KY); Melissa Grisham and Mel Heaps (AR); Sarah Borunda and Maria Ailor (AZ); Damion Hughes (CO); Kurt Swan (CT); Sharon Shipp (DC); Frank Pyle (DE); Sarah Crittenden (GA); Lindsay Bates (IA); Mary Lou Moran (MA); Jill Huisken (MI); Win Nickens (MO); Paul Hanson (MN); Edwin Pugsley and Maureen Belanger (NH); Ralph Boekeeman (NJ); Bogdanka Kurahovic and Otis Phillips (NM); Peggy Willard-Ross (NV); Sylvia Lawson (NY); Rodney Beetch and Angela Dingus (OH); Kevin Foor, Landon Hubbard, Joel Sander and Shelly Scott (OK); Scott Martin (OR); Christopher Monahan (PA); Joy Morton, Rebecca Nichols and Yolanda Tennyson (VA); Christina Rouleau (VT); Jeanette Plitt (WA); Barbara Belling, Darcy Paskey, Diane Dambach and Rebecca Rebholz (WI); and Desiree Mauller (WV).

Director Ramge said Ms. Nichols and Ms. Morton developed draft travel insurance-related examination standards and a high-level summary of the draft standards for the Working Group’s review and discussion, based on the Travel Insurance Model Act (#632) and to be incorporated into the Market Regulation Handbook (Handbook). He said the draft examination standards were exposed May 22 for a public comment period ending June 24, and the comment period was subsequently extended to July 10 and then to Aug. 15.

Ms. Morton said a revised draft was circulated Aug. 26 for the conference call, and the draft included revisions she and Ms. Nichols made in response to comments received in July from John P. Fielding (Steptoe & Johnson LLP) on behalf of the U.S. Travel Insurance Association (UStiA) and Angela Gleason (American Property Casualty Insurance Association—APCIA).

Ms. Morton presented the redlined changes made to the draft. Ms. Plitt suggested that in Marketing and Sales Exam Standard 1 in the sentence “Indicate that the travel protection plan being marketed is insurance,” that “is” be changed to “can include.” Ms. Gleason and Mr. Fielding said they would both be submitting additional comments on the draft.

Director Ramge extended the comment due date to Oct. 2, and Ms. Gleason and Mr. Fielding said they would both be submitting additional comments on the draft by that date. Director Ramge asked for comments by Oct. 2, so Ms. Nichols and Ms. Morton can review any comments received and provide a revised draft for discussion during the next Working Group conference call, which is scheduled for Oct. 9. Director Ramge said NAIC staff will provide advance email notice of the conference call.

Director Ramge said the new workers’ compensation in force standardized data request (SDR) was circulated July 15. It was discussed during the Working Group’s July 18 conference call and exposed for a public comment period ending Aug. 15. He said it was developed by state insurance regulator subject-matter experts (SMEs) for the Working Group’s review, discussion and consideration of adoption.

Mr. Hamblen made a motion, seconded by Ms. Nichols, to adopt the new workers’ compensation standardized data request (see NAIC Proceedings – Market Regulation and Consumer Affairs (D) Committee, Attachment Two). The motion passed unanimously.

3. Discussed Other Matters

Director Ramge welcomed Oregon’s new representatives, TK Keen and Mr. Martin, to the Working Group.

Having no further business, the Market Conduct Examination Standards (D) Working Group adjourned.

© 2019 National Association of Insurance Commissioners
The Market Regulation Certification (D) Working Group of the Market Regulation and Consumer Affairs (D) Committee met via conference call Nov. 20, 2019. The following Working Group members participated: John Haworth, Chair (WA); Melissa Grisham (AR); Lindsay Bates (IA); Holly Williams-Lambert (IN); Mary Lou Moran (MA); Jason Decker (MD); Chlora Lindley-Myers and Cynthia Amann (MO); Tracy Biehn (NC); Reva Vandevoorde (NE); Edwin Pugsley (NH); Angela Dingus (OH); Brian Fordham (OR); Christopher Monahan (PA); Rachel Moore (SC); Julie Fairbanks (VA); Christina Rouleau (VT); and Theresa Miller (WV). Also participating were Pam O’Connell (CA); Sarah Crittenden (GA); and Russell Hamblen (KY).

1. Discussed Suggestions of the Certification Pilot Volunteers

Mr. Haworth said the pilot of the Voluntary Market Regulation Certification Program took place during 2017 and 2018 and included 18 states. He noted there have been previous attempts to develop an accreditation program for market regulation that, for a variety of reasons, never got off the ground. He said because the insurance industry is growing and changes are happening faster with the advent of new tools leveraging big data, there is an obvious benefit to a certification program so the states can rely on the market regulation efforts of other states.

Mr. Haworth said the certification program is written broadly and maintains flexibility for each state’s specific needs. Each state has its own authorities for the protection of its consumers. He said the certification program recognizes that domestic deference does not work well for market conduct regulation. Additionally, he said the market certification program is designed to be independent of financial accreditation.

Mr. Haworth said that based on their experiences with attempting to comply with the requirements of the program, the volunteer states revised the certification program. He said the most obvious change is the reorganization of the program document to combine the requirements, guidelines and checklists by requirement such that for each requirement, the guidelines and checklists are immediately below the description of the requirement.

Mr. Haworth said the certification program is divided into 12 requirements that fall into five general categories: 1) the statutory authority for the department to conduct market regulation; 2) use of the Market Regulation Handbook; 3) staffing; 4) timely, accurate and complete use of shared market information systems; and 5) collaboration.

Mr. Haworth provided an overview of the suggested revisions to the 12 requirements, guidelines and checklists.

Ms. O’Connell asked if there would be time allowed for state insurance regulators and interested parties to review and comment. Mr. Haworth asked that comments be sent to Randy Helder (NAIC) by Dec. 18.

Ms. Crittenden asked whether the comments should be in the form of redlines to the current certification program document or simply reference the document. Mr. Haworth asked that comments not be made as redline in order to maintain version control.

Mr. Hamblen asked if the goal is to turn the program into a mandatory program or keep it voluntary. Mr. Haworth said there is no intent to make the program mandatory. He noted that the financial accreditation program is also voluntary, but the states recognize the value of being accredited.

Having no further business, the Market Regulation Certification (D) Working Group adjourned.
The Privacy Protections (D) Working Group met in Austin, TX, Dec. 8, 2019. The following Working Group members participated: Cynthia Amann, Chair (MO); Ron Kreiter, Vice Chair (OK); Theodore J. Patton (MN); Kendall Cotton (MT); Bob Harkins (NE); and Don Beatty (VA). Also participating were Ryan James and Suzanne Tipton (AR); Peg Brown (CO); Angela Dingus (OH); Brian Fordham (OR); Travis Jordan (SD); and Tracy Klausmeier (UT).

1. **Heard Opening Remarks**

Ms. Amann said this is the first meeting of the Working Group, as it was appointed by the Market Regulation and Consumer Affairs (D) Committee during its Oct. 1 conference call. She said the Working Group is in the process of building its membership, as well as forming distribution lists for interested regulators and interested parties. Ms. Amann asked those interested in joining the Working Group or being added to a distribution list to contact Lois Alexander (NAIC).

2. **Heard a Presentation from NAIC Staff on Model #670, Model #672, GDPR, CCPA and State Data Privacy Legislation Chart**

Ms. Amann said Jennifer McAdam (NAIC) would be providing an overview of the Insurance Information and Privacy Protection Model Act (#670), the Privacy of Consumer Financial and Health Information Regulation (#672), the European Union’s (EU) General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA) and the research chart of State Data Privacy Legislation prepared by NAIC Legal Division staff.

Ms. McAdam said she would be discussing what is currently happening at the state level with data privacy laws, but she would like to first give a quick overview of the NAIC model laws already in existence that address consumer privacy. She clarified that data privacy is related to how data is collected and used by businesses; data security is related to how data is stored and protected.

Ms. McAdam said she brought this up because the two are often conflated and—to make things more confusing—there are some laws that address both, like the GDPR, for example. She said an example of a data privacy law would be the CCPA. Ms. McAdam said this law governs how businesses collect and use consumer data; the rights consumers have so they know how that data is being used; the consumer’s right to challenge the accuracy of the data; and, if it is being used, how it is being used. As such, these laws are focused on consumer protection and consumer rights.

She said an example of a data security law would be the Insurance Data Security Model Law (#668), which governs how businesses protect the data once it has been collected and what the businesses need to do in the event the company’s protections of that data fail during a data breach or cybersecurity event. Ms. McAdam said these laws are focused on business obligations, although such data security laws can have an impact on consumer protection, as well.

Ms. McAdam said the NAIC has three model laws governing data privacy: 1) The Health Information Privacy Model Act (#55); 2) Model #670; and 3) Model #672. She said because historical context is helpful, the first of these was Model #670, which was adopted in 1980. However, Ms. McAdam said the federal Fair Credit Reporting Act (FCRA) was enacted in 1970, and it addresses the fairness, accuracy and privacy of the personal information contained in the files of the consumer reporting agencies. Then, she said the Federal Privacy Act was enacted in 1974, and it governs the collection, maintenance, use and dissemination of personally identifiable information about individuals that is maintained in systems of records by federal agencies. So, Ms. McAdam said the NAIC began drafting Model #670 after the two federal laws were in already in place.

Ms. McAdam said Model #670 sets standards for the collection, use and disclosure of information gathered in connection with insurance transactions; it addresses how information is collected by insurance institutions, agents and insurance support organizations (ISOs). She also said the model balances the need for information by those conducting the business of insurance and the public’s need for fairness. Ms. McAdam said it establishes a regulatory mechanism to enable consumers to ascertain
what information is being, or has been, collected about them and to have access to such information so they can verify or dispute its accuracy. She said it limits the disclosure of information collected in connection with insurance transactions, and it enables insurance applicants and policyholders to find out the reasons for any adverse underwriting decision. Ms. McAdam said the model does this by requiring insurers to provide notice that alerts the individual of the insurer’s information practices and it gives consumers the right to request that an insurer: 1) give access to recorded personal information; 2) disclose the identity of the third parties to whom the insurance disclosed the information; 3) provide the source of the collected information; 4) correct and amend the collected information; 5) amend the personal information; and 6) delete the collected personal information.

Ms. McAdam said the definition of “personal information” is different from that of the protected information found in most of the data security or data breach notification laws. She said those laws tend to specifically enumerate the categories of data that must be protected. Ms. McAdam said in this model “personal information” means any individually identifiable information gathered in connection with an insurance transaction from which judgments can be made about an individual’s character, habits, avocations, finances, occupation, general reputation, credit, health or any other personal characteristics.

In 1998, following enactment of the federal Health Insurance Portability and Accountability Act of 1996 (HIPAA), the NAIC adopted Model #55, which sets standards to protect health information from unauthorized collection, use and disclosure by requiring carriers to establish procedures for the treatment of all health information. Ms. McAdam said Model #55 requires carriers to: 1) create policies, standards and procedures governing health information; 2) notify consumers of those policies, standards and procedures; 3) establish consumers’ right to access their personal health information (PHI); 4) establish consumers’ right to amend their PHI; 5) provide a list of disclosures of PHI; and 6) obtain authorization for the collection, use or disclosure of PHI (with exceptions).

Following enactment of HIPAA at the federal level, Ms. McAdam said the federal Gramm-Leach-Bliley Act (GLBA) was enacted in 1999. She said GLBA imposes privacy and security standards on financial institutions and directs state insurance commissioners to adopt certain data privacy and data security regulations. She said that is when the NAIC adopted both Model #672 and the Standards for Safeguarding Customer Information Model Regulation (#673). Ms. McAdam said Model #672 is about consumer privacy, and Model #673 is about data security and was used as the basis for drafting Model #668.

Ms. McAdam said this Working Group will be addressing data privacy; it will not be addressing data security. She also said Model #672: 1) requires that insurers provide notice to consumers about its privacy policies and practices; 2) describes the conditions under which a licensee may disclose nonpublic PHI and nonpublic personal financial information about individuals to affiliates and nonaffiliated third parties; and 3) provides methods for individuals to prevent a licensee from disclosing that information (“opt out” for financial info and “opt in” for health information). Ms. McAdam said this model is intended to be enforced via the state’s Unfair Trade Practices Act. She said the provisions governing protection of health information were taken directly from Model #55, as well as the health information privacy regulations promulgated by the U.S. Department of Health and Human Services (HHS) pursuant to HIPAA. Ms. McAdam said the provisions governing the protection of financial information are based on privacy regulations promulgated by federal banking agencies.

Ms. McAdam said the key difference between the treatment of financial information and health information is that insurers must give consumers the right to “opt out” of the disclosure or sharing of their financial information, but insurers must get explicit authorization prior to sharing health information (which is considered “opt in”).

Ms. McAdam said the protected information under Model #672 is “health information” and “personally identifiable financial information.” She said 17 states have adopted Model #670 and every state has adopted a version of Model #672, although 19 states have only adopted the provision regarding financial information and not the provision regarding health information. Ms. McAdam said NAIC guidance on data privacy includes the privacy standard used in market conduct examinations. She said standards 10 through 16 address how companies are to handle data privacy pursuant to Model #670, Model #672, Model #55 and any other data privacy laws to which companies are subject.

Ms. McAdam said there are generally applicable data privacy laws that apply to all businesses; not just to the insurance sector. She said data privacy started getting more attention when the GDPR became effective in May 2018. Ms. McAdam said although it is an EU law, it affects many U.S. companies if they collect data from citizens of the EU over the internet. She said the GDPR
requires companies to obtain explicit consent from consumers to collect their data (“opt in”) with an explanation of how the data will be used and it contains standards for safeguarding the data.

Ms. McAdam said California became the first U.S. state to adopt an “omnibus” privacy law, which imposes broad obligations on businesses to provide consumers with transparency and control of their personal data. She said the CCPA was signed into law last summer, was amended last fall and becomes effective in 2020. Ms. McAdam said the CCPA gives consumers the right to request that a business:

- Disclose (a) the categories and specific pieces of personal information collected; (b) categories of sources the information was collected from; (c) the business purpose for collecting the information; and (d) the categories of third parties with whom the information is shared, and the specific pieces of personal information that was shared.
- Delete any personal information.
- Provide the right to opt-out of their information being disclosed to third parties, with separate opt-in requirements for minors.
- Provide the right to not be discriminated against for exercising rights.

Ms. McAdam said the CCPA is enforced by the state attorney general and there is a full exemption for protected health information governed by HIPAA and a partial exemption for information subject to the GLBA; if the information subject to GLBA is breached, the consumer can pursue a private civil action against the company.

Ms. McAdam said some states introduced similar data privacy laws to the CCPA that were generally applicable. She said amendments to the CCPA were introduced during the 2019 legislative session, but none of them specifically affect insurers; the full HIPAA exemption and partial GLBA exemption remain in place.

Ms. McAdam said, in 2019, 24 states had considered some type of data privacy legislation but only three states enacted laws: 1) Illinois, which bans insurers from using genetic testing information to set health or accident rates; 2) Maine, which bans internet providers from selling personal information without consent; and 3) Nevada, which requires businesses to allow consumers to opt out of any sale of their personal information and has exemptions for entities subject to the GLBA and HIPAA.

Ms. McAdam said five states passed bills establishing task forces to study the issue of data privacy by reviewing laws in other states and making recommendations for what would be appropriate privacy standards: Connecticut; Hawaii; Louisiana; North Dakota; and Texas. She said there are some states with legislation still pending and some that will carryover to 2020. For example, in New York, there was a bill pending that would go further than the CCPA and would establish a fiduciary duty for companies to act in the consumer’s best interest regarding their personal information; however, it did not make it out of committee but will be considered in 2020.

Ms. McAdam said a comparison of business obligations and consumer rights related to data privacy under both the CCPA and Model #670 shows the following similarities in those requirements.

<table>
<thead>
<tr>
<th>CCPA</th>
<th>Model #670</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consumer right to request that a business:</td>
<td>Individual right to request that an insurer:</td>
</tr>
<tr>
<td>Disclose the categories and specific pieces of personal information collected</td>
<td>Disclose types of personal information collected</td>
</tr>
<tr>
<td>Disclose categories of sources</td>
<td>Disclose sources of the collected information</td>
</tr>
<tr>
<td>Disclose business purpose for collecting the information</td>
<td>Disclose purpose for collecting the information</td>
</tr>
<tr>
<td>Disclose categories of third parties with whom the information is shared, and specific pieces of personal information shared</td>
<td>Disclose identity of the third parties to whom information is disclosed</td>
</tr>
<tr>
<td>Right to access, correct, delete</td>
<td>Right to access, correct, delete</td>
</tr>
</tbody>
</table>

Ms. McAdam said NAIC Legal Division staff created several legal research charts that were posted to the Privacy Protections (D) Working Group page on the NAIC website. She said one chart lists general state data privacy laws that are applicable to all businesses and are not specific to insurers. She also said the chart lists the entity responsible for enforcing the law; what exemptions there are, if any; whether it is “opt-in” or “opt-out”; and what consumer notice requirements are required.
Ms. McAdam said the Working Group will want to address insurance-specific data privacy issues while making sure that any new requirements work with already-existing laws. She said it will be important to consider the following questions going forward: 1) what types of data collection, sharing and usage are specific to insurers; 2) what privacy risks affect insurance consumers; 3) where the gaps are in federal and state law; 4) what obligations insurers should have to consumers; and 5) what rights consumers should have to control their personal information.

Ms. Amann said Ms. McAdam will continue to provide any legal assistance the Working Group needs throughout the process. She then asked if any Working Group members had any comments.

Mr. Cotton said he is concerned about the consumer data that insurers already are presenting to Montana in rate filings. He said rate filings have ballooned up to thousands of pages of different data points on consumers. Mr. Cotton said Montana has seen an increased reliance on third-party risk scores that aggregate consumer information in order to make determinations and conclusions about that information. He said insurers have a responsibility to make sure that the third parties used are following state laws and complying with the state’s standards for accuracy and fairness. Besides providing disclosure of those third parties when consumers request it, Mr. Cotton said insurers are required to report how the information was gathered; where it was drawn from (e.g., web traffic, geolocation data, social media, etc.); and why the company thinks it needs to use these particular data points as the possibilities available to insurers are endless.

Ms. Amann said the Working Group will need to stay on track in order to accomplish its charges by the deadline. She said the Working Group’s proposed charges will be considered for adoption by the Market Regulation and Consumer Affairs (D) Committee during its Dec. 9 meeting.

Ms. Amann said this Working Group will work closely with the other working groups in this arena—the Artificial Intelligence (EX) Working Group, the Accelerated Underwriting (A) Working Group, etc.—as each has its unique set of issues that nevertheless require coordination.

4. Heard Comments from Interested Parties

   a. NAMIC

Cate Paolino (National Association of Mutual Insurance Companies—NAMIC) urged regulators to consider the impact of California’s law and the likely passage in 2020 of other state laws that may differ dramatically from it. Ms. Paolino asked that regulators analyze and identify any gaps that might need insurance-specific language. She said regulators could then determine the most appropriate vehicle to deliver that solution; i.e., whether to amend existing models or to draft new models.

Ms. Paolino urged policymakers to consider several important concepts:

   - Workability – Allowing for various exemptions for operational and other reasons that acknowledge vital business purposes for insurers to collect, use, and disclose information. For example, she said Article IV of Model #672 was developed to implement the GLBA; it appears instructive on types of operational functions to preserve and facilitate. Ms. Paolino said it may also be useful to review the exceptions imbedded into Section 13 of the 1982 version of Model #672. She said clear and well-crafted provisions accounting for the GLBA and the FCRA would be important in any broader business legislation regulators may see.
   - Exclusivity – Avoiding dual regulation so insurers are not simultaneously subject to potentially inconsistent or conflicting interpretations by more than one regulator.
   - Clarity – Asking that care be taken to consider how best to dovetail with existing model laws/regulations; consulting other resources and educating legislators on how privacy bill language impacts the insurance industry, including the legal requirements to retain and use certain data, as well as data mandates.
   - Effective Date – Allowing advance time (like the two to five years that was afforded under the GDPR) for insurers to be ready for implementation, to avoid having revisions like the CCPA and the GDPR. She also suggested that a roll-out period with different dates for different provisions would be a more measured approach within that time frame to undertake such a significant endeavor.
b. APCIA

Angela Gleason (American Property Casualty Insurance Association—APCIA) agreed with NAMIC’s assessment with regard to the implementation time frame, the initial survey request and the complex array of laws that state legislatures may pass during the December to January time frame that could put insurers in the position of complying with omnibus privacy bills in one state and industry-specific bills in another state. She said it could bring about some difficult compliance issues, which could reduce, rather than enhance, existing consumer protections and generate significant operational challenges. She said state insurance departments could play an important role in these legislative conversations based on their experience with insurance-specific privacy laws that are consistent with regulators’ objectives to protect consumers and ensure insurer solvency.

Ms. Gleason said insurers are scrambling to be ready for the effective date of the CCPA that takes effect Jan. 1, 2020 and gives consumers more ability to control what information is shared about them.

c. ACLI

Kate Kiernan (American Council of Life Insurers—ACLI) said the regulatory environment is evolving. She said existing privacy laws have been on the books since the mid-1980s and late 1990s with little change, which reflects well on the stability of the insurance regulatory structure. However, she said that advances in technology and changes in the insurance industry have resulted in rendering some of the existing financial services privacy laws as being somewhat outdated.

Ms. Kiernan asked the Working Group to think about how ride- and home-sharing services, such as Uber and Airbnb, have disrupted the livery and hospitality industries. She asked the Working Group to look at the big picture to ensure that the insurance industry does not encounter a complete change of its industry like that which happened in the hospitality and livery industry.

Ms. Kiernan said even though policyholders might welcome stiffer regulation initially, stiffer regulation could unintentionally harm the companies that serve those consumers. She said caution is warranted when considering additional regulation to ensure a level playing field with how all other companies are collecting personal information, so insurance companies are not disadvantaged when compared to the technology sector.

Ms. Kiernan said consistency across states and business types is necessary so insurers will not be required to meet industry-specific privacy rules, while companies like Amazon, Google and the Insure Techs have different rules to meet.

Ms. Kiernan asked the Working Group to consider the following questions:

- How do you envision the current financial services privacy regulatory system meshing with new comprehensive laws such as the CCPA?
- How will financial services companies be able to compete with technology companies with differing rules on the use of personal information?
- How can we provide control and equal protections to all consumers regarding their personal information no matter where they live or with whom they are doing business? In other words, provide consumers with legal transparency and the same level enforceable rights?
- How can we develop a regime that is robust and supports growth and innovation?

Ms. Kiernan said to put these questions another way:

- How do we avoid consumer confusion over this already complex issue?
- How do we avoid the obstruction of the flow of data and impediments to interstate commerce?
- How do we prevent the distortion of competition (tech versus retail versus financial services)?

In conclusion, Ms. Kiernan said technology is transforming both social norms and business capabilities. The internet is universal, and information is global. Consumers and businesses need standards that are coherent, and that provide a common understanding of privacy protections. Ms. Kiernan said policymakers should avoid creation of a system that would provide differing consumer rights; differing levels of protections; fragmented implementation of consumer protections; and legal uncertainty.
Ms. Kiernan said this complex issue warrants a comprehensive review and she looks forward to working with the Working Group as it moves forward. Ms. Kiernan said she would like to align her comments with the recently submitted observations of NAMIC and the APCIA because she agrees with the thoughtful comments regarding specific issues and challenges that her sister national trade associations raised in their remarks.

d. **CEJ**

Birny Birnbaum (Center for Economic Justice—CEJ) said Model #670 addresses “personal information,” while Model #672 addresses “nonpublic personal financial information and nonpublic personal health information.” He said both models discuss “consumer reports” and “consumer reporting agencies,” as defined by the FCRA.

Mr. Birnbaum asked the Working Group to consider:

- Data vendors are scraping personal consumer information from public sources to produce consumer profiles, scores and other tools for insurers. The data vendor products, while assembled from public information, raise concerns over consumers’ digital rights and privacy.
- Many data vendors and many types of personal consumer information are not subject to FCRA consumer protections. In turn, many of the types of data and algorithms (essentially, a consumer report) used by insurers are not subject to either FCRA consumer protections or the NAIC model law/regulation protections.
- It is unclear if the NAIC models cover the new types of data being generated by consumers as part of, or related to, insurance transactions. For example, consumers are producing large volumes of data through telematics programs—from devices collecting personal consumer data in the vehicle or home or wearable devices.
- There are a lot of organizations working on consumer digital rights. He asked the Working Group to solicit input and presentations at Working Group meetings from, among others, the Center for Digital Democracy, the Electronic Privacy Information Center, the Electronic Frontier Foundation, the Public Knowledge-Privacy Rights Clearinghouse, the Public Citizen, the U.S. Public Interest Research Group and the World Privacy Forum. In addition, Mr. Birnbaum said there are several organizations active on digital rights in the EU that are familiar with the GDPR and whose perspectives would help the Working Group.
- He asked that if consumer disclosures are to be used, that the disclosure should be a compliance or enforcement tool that would be created using consumer focus testing and established best practices for the creation of such consumer disclosures.

Having no further business, the Privacy Protections (D) Working group adjourned.
The Antifraud (D) Task Force met in Austin, TX, Dec. 8, 2019. The following Task Force members participated: John G. Franchini, Chair, and Roberta Baca (NM); Trinidad Navarro, Vice Chair (DE); Lori K. Wing-Heier represented by Anna Latham (AK); Allen W. Kerr represented by Suzanne Tipton (AR); Keith Schraad represented by Scott Greenberg (AZ); Ricardo Lara represented by George Mueller (CA); Michael Conway represented by Damion Hughes (CO); Andrew N. Mais represented by Kurt Swan (CT); Stephen C. Taylor represented by Sharon Shipp (DC); John F. King represented by Margaret Witten (GA); Dean L. Cameron represented by Randy Pipal (ID); Vicki Schmidt represented by LeAnn Crow (KS); James J. Donelon represented by Matthew Stewart (LA); Anita G. Fox represented by Randall Gregg (MI); Steve Kelley represented by Michael Marben (MN); Chlora Lindley-Myers represented by Carrie Couch and Marjorie Thompson (MO); Mike Chaney represented by John Hornback (MS); Matthew Rosendale represented by Jeannie Keller (MT); Mike Causey and Tracy Biehn (NC); Jon Godfread represented by Johnny Palsgraaf (ND); Bruce R. Ramge represented by Peg Jasa (NE); Marlene Caride represented by Richard Besser (NJ); Barbara D Richardson represented by Stephanie McGee (NV); Jillian Froment represented by Angela Dingus and Jennifer Demory (OH); Glen Mulready represented by Rick Wagnon (OK); Andrew Stolfi represented by TK Keen (OR); Kent Sullivan represented by Leah Gillum and Chris Davis (TX); Todd E. Kiser represented by Armand Glick (UT); Scott A. White represented by Mike Beavers (VA); Mike Kreidler represented by John Haworth (WA); James A. Dodrill represented by Erin K. Hunter and Greg Elam (WV); and Jeff Rude represented by Bill Cole (WY). Also participating was: David Altmaier represented by Simon Blank (FL).

1. **Adopted its Oct. 31 and Summer National Meeting Minutes**

During its Oct. 31 meeting, the Task Force adopted its 2020 proposed charges. Mr. Marben made a motion, seconded by Mr. Beavers, to adopt the Task Force’s Oct. 31 (Attachment One) and Aug. 4 (see NAIC Proceedings – Summer 2019, Antifraud (D) Task Force) minutes. The motion passed unanimously.

2. **Discussed its 2020 Proposed Charges**

Superintendent Franchini said the Task Force adopted its 2020 proposed charges via an e-vote that concluded Nov. 4. He said the adopted charges had few changes, including the necessary changes to appropriately update the charges to reflect 2020 deadlines.

Superintendent Franchini said there were only two significant changes. The first was to remove the charge to coordinate with NAIC committees, task forces and working groups and provide a recommendation for the development of a database to be created and maintained by the Securities Valuation Office (SVO) specific to tracking the fraudulent financial reporting for chief executive officers (CEO), directors, and corporate officers. He said the charge was completed at the Spring National Meeting; therefore, the Task Force would not need to keep this on its list of charges. He said the second was to add a new charge to review and provide recommendations for the development of an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions.

Superintendent Franchini said the proposed charges would be presented and considered for adoption by the Market Regulation and Consumer Affairs (D) Committee during its Dec. 9 meeting. He said as the Task Force moves through 2020, he encourages Task Force members to bring other areas or potential goals that would assist with the fight against fraud.

3. **Received an Update from the Antifraud Education Enhancement (D) Working Group**

Greg Welker (NAIC) said the Antifraud Education Enhancement (D) Working Group has not met since the Summer National Meeting; however, it held an Investigator Safety Training Webinar on Oct. 30. He said the webinar had 315 participants, and it received a score of 4.6 out of 5 on its review. He said in 2020, the Working Group will be hosting a webinar on investigator safety training for state insurance department employees, and it will be reaching out to the fraud directors for assistance with presenting. He said the Working Group will also be working to arrange a course on open source investigation course for state investigators. He said the Working Group has encouraged the Task Force to send any potential topics for training at any time throughout the year.
4. Received an Update from the Antifraud Technology (D) Working Group

Mr. Glick said the Antifraud Technology (D) Working Group has not met since the Summer National Meeting; however, it has met with the Antifraud Education Enhancement (D) Working Group and NAIC staff concerning the state requirements for individual antifraud plans. He said, after further investigation, the Working Group was able to confirm requirements for all the states/jurisdiction concerning whether an antifraud plan is required. He said in addition to this investigation, it determined that a review of the NAIC Antifraud Plan Guideline was overdue. He said on Nov. 25, the Working Group distributed an email soliciting comments, and it suggested changes to the NAIC Antifraud Plan Guideline with a deadline of Dec. 31.

5. Discussed the Fraudulent Treatment of Consumers

Superintendent Franchini said the next item on the agenda is a topic that was brought to the Task Force’s attention concerning a BuzzFeed article dated Aug. 15, advising that insurance companies are paying law enforcement officers to investigate their customers. He said the article claims that an alliance between insurers and law enforcement has turned the justice system into the industry’s hired gun and left innocent customers facing prison. He said due to the activity that this article created, it was brought to the Task Force for further discussion. The Task Force discussed the article and posed the question of whether any state has encountered this type of fraud.

Mr. Blank said Florida has encountered some of these types of activities, and it has even prosecuted some law enforcement officials after concluding its investigation.

Superintendent Franchini said there have been some states that have reviewed and provided further information regarding this topic. He said he would work with the Commissioner Navarro and NAIC staff to reach out to those states and provide its findings at the 2020 Spring National Meeting.

6. Heard a Presentation from the HFPP

Superintendent Franchini said next on the agenda is to hear a presentation from the Healthcare Fraud Prevention Partnership (HFPP). He said presenting to the Task Force will be Matthew Smith, director of government affairs and general counsel with the Coalition Against Insurance Fraud (Coalition); Sparky Heevner, partner engagement lead and recruiter with HFPP; and Dan Kreitman, director of the HFPP.

Mr. Kreitman said the HFPP is a volunteer public-private partnership between federal government state agencies and private partners, law enforcement and antifraud associations. He said the HFPP helps the fight against fraud through a proactive approach using data and information sharing. He said the HFPP assists with this by an exchange of data between public and private sections, leveraging various analytic tools against statistics provided by its partners, and providing a forum for public leaders and members to speak out against insurance fraud. He said the overall goal of the HFPP is to promote training and information-sharing.

7. Heard an Update from the Coalition

Mr. Smith said, in 2019, the Coalition assisted with 198 bills that were introduced across the nation. He said from those bills introduced, there is now a total of 61 new antifraud bills in place to assist with the fight against insurance fraud. He said some of the highlights of those bills are two that were signed by New York concerning a bill called “Alice’s Law,” which is focused on staged auto accidents. In addition, New York signed an important storm chaser bill to protect consumers. Mr. Smith said Ohio has a similar bill pending. Florida has a number of bills pending, including an important auto glass bill.

Mr. Smith said the Coalition recently released an antifraud tool kit, which includes, videos, advertisements, graphics and press information available to all the states at no charge. He said the Coalition is gearing up to adopt its 2020 list of legislative priorities and encourage the states to reach out to the Coalition if there is a specific area that they can provide assistance. He said antifraud funding will remain a high priority on the legislative list for the Coalition as it moves into 2020. He said towing fraud also remains to be a big issue across the states, and the Coalition will continue to focus legislative issues on this type of fraud as well. He said in 2019, the Coalition reviewed and adopted a renewed version of their Insurance Fraud Act. He said the Coalition will be working this year to implement this within the states to assist with fighting insurance fraud.
Mr. Smith said in October of this year, he, along with Superintendent Franchini, attended the first ever International Insurance Fraud Summit, which took place in Spain. He said this summit was a gathering of 16 different nations to discuss in an open line of communication to discuss the issues being faced with insurance fraud. He said the summit will take place again in 2020, and the Coalition plans to be a leader.

Mr. Smith said the Coalition will also be participating with the French National Antifraud Group at a symposium taking place in Paris in February 2020 and the International Association of Special Investigator Units European conference taking place in Sweden sometime in June 2020. He said the Coalition will hold its annual year-end meeting Dec. 16–17 in Washington, DC.

Having no further business, the Antifraud (D) Task Force adjourned.
Antifraud (D) Task Force
Conference Call
October 31, 2019

The Antifraud (D) Task Force met via conference call Oct. 31, 2019. The following Task Force members participated:
John G. Franchini, Chair, represented by Roberta Baca (NM); Trinidad Navarro, Vice Chair (DE); Ricardo Lara represented by George Mueller (CA); Michael Conway represented by Damion Hughes (CO); Stephen C. Taylor represented by Phil Comstock (DC); David Altmaier represented by Matt Guy (FL); Nancy G. Atkins represented by Willie Skeens (KY); James J. Donelon represented by Trent Beach (LA); Steve Kelley represented by Michael Marben (MN); Chlora Lindley-Myers represented by Carrie Couch (MO); Matthew Rosendale represented by Jeannie Keller (MT); Mike Causey represented by Lisa Volpe (NC); Marlene Caride represented by Richard Besser (NJ); Barbara D. Richardson (NV); Andrew Stolfi represented by Stephanie Noren (OR); and Scott A. White represented by Mike Beavers (VA).

1. Discussed its 2020 Proposed Charges

 Commissioner Navarro said the purpose of this conference call is to review and consider adoption of the Task Force’s 2020 proposed charges. He said because there is no quorum, the Task Force would review the charges and discuss any comments. Then an e-vote request would be distributed to consider adoption of the proposed charges.

 Commissioner Navarro said that during the Summer National Meeting, the Task Force opened the 2019 charges to review and accept comments for its 2020 proposed charges. He said NAIC staff distributed the draft 2020 proposed charges, reflecting some minor changes regarding specific deadlines for next year. He said there were also two significant changes made to the 2019 charges.

 Commissioner Navarro said the first change was to remove the charge that states, “Coordinate with NAIC committees, task forces and working groups (e.g., Financial Condition (E) Committee, etc.) and provide recommendations for the development of a database to be created and maintained by the NAIC Securities Valuation Office (SVO) specific to tracking the fraudulent financial reporting for chief executive officers (CEO), directors, and corporate officers.” He said this charge was discussed and completed at the Spring National Meeting, so there would no longer be a need to have this listed as part of the Task Force’s charges moving forward.

 Commissioner Navarro said the second and only other change was to add a new charge under the Antifraud Technology (D) Working Group that states the Working Group will, “Review and provide recommendations for the development of an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions.”

 Mr. Mueller made a motion, seconded by Mr. Marben to adopt the Task Force’s 2020 proposed charges. Commissioner Navarro said with no quorum, NAIC staff will distribute an email with the proposed charges for an e-vote to finalize this process (Attachment One-A).

 Having no further business, the Antifraud (D) Task Force adjourned.
Antifraud (D) Task Force
E-Vote
November 4, 2019

The Antifraud (D) Task Force conducted an e-vote that concluded Nov. 4, 2019. The following Task Force members participated: John G. Franchini, Chair, represented by Roberta Baca (NM); Trinidad Navarro, Vice Chair, represented by Frank Pyle (DE); Allen W. Kerr (AR); Ricardo Lara represented by George Mueller (CA); Andrew N. Mais represented by Kurt Swan (CT); David Altmaier represented by Simon Blank (FL); Doug Ommen represented by Jared Kirby (IA); Dean L. Cameron represented by Weston Trexler (ID); Vicki Schmidt represented by Dennis Jones (KS); Nancy G. Atkins represented by Willie Skeens (KY); James J. Donelon represented by Matthew Stewart (LA); Al Redmer Jr. represented by James Wright (MD); Steve Kelley represented by Michael Marben (MN); Chlorinda Myers represented by Carrie Couch (MO); Mike Chaney represented by John Hornback (MS); Bruce R. Ramge (NE); Jon Godfread represented by Dale Pittman (ND); Barbara D. Richardson represented by Ted Bader (NV); Jillian Froment represented by Michelle Brugh Rafeld (OH); Glen Mulready represented by Rick Wagnon (OK); Kent Sullivan represented by Chris Davis (TX); Todd E. Kiser represented by Armand Glick (UT); Scott A. White represented by Mike Beavers (VA); and Jeff Rude represented by Todd Schildmeier (WY).

1. **Adopted its 2020 Proposed Charges**

The Task Force conducted an e-vote to consider adoption of its 2020 proposed charges. Mr. Mueller made a motion, seconded by Mr. Marben, to adopt the Task Force’s 2020 proposed charges (see NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Two). The motion passed unanimously.

Having no further business, the Antifraud (D) Task Force adjourned.
The Market Information Systems (D) Task Force met in Austin, TX, Dec. 7, 2019. The following Task Force members participated: Lori K. Wing-Heier, Chair (AK); Chlora Lindley-Myers, Vice Chair, and Cynthia Amann (MO); Keith Schraad represented by Maria Ailor (AZ); Michael Conway represented by Damion Hughes (CO); Stephen C. Taylor represented by Sharon Shipp (DC); Robert H. Muriel represented by CJ Metcalf (IL); James J. Donelon represented by Jeff Zewe (LA); Steve Kelley represented by Paul Hanson (MN); Mike Causey represented by Chad Bridges (MS); Mike Causey represented by Tracy Biehn (NC); Jon Godfread represented by Johnny Palsgraaf (ND); Bruce R. Ramge represented by Matt Holman (NE); Jillian Froment represented by Angela Dingus (OH); Andrew Stolfi represented by Brian Fordham (OR); Kent Sullivan represented by Rachel Cloyd and Ignatius Wheeler (TX); Michael S. Pieciak represented by Christina Rouleau (VT); Mike Kreidler represented by John Haworth (WA).

1. Adopted its Oct. 29 Minutes

The Task Force met Oct. 29 and took the following action: 1) adopted its Summer National Meetings; 2) adopted the report of the Market Information Systems Research and Development (D) Working Group; and 3) adopted its 2020 proposed charges.

Director Lindley-Myers made a motion, seconded by Mr. Haworth, to adopt the Task Force’s Oct. 29 minutes (Attachment One). The motion passed unanimously.

Mr. Haworth said the Market Information Systems Research and Development (D) Working Group met Nov. 19, Nov. 15 and Sept. 19. He said the meetings were held via conference call in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) and paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings.

Mr. Haworth said the Working Group reviewed and prioritized the outstanding Uniform System Enhancement Request (USER) forms. He said the Working Group considered the anticipated benefits and the estimated level of effort of each request. He said three requests were selected as high priority, with a goal of having them completed by the end of this year. Those requests are: 1) USER form 10063 to add to the Regulatory Information Retrieval System (RIRS) the ability to search in iSite+ by the Financial Industry Regulatory Authority (FINRA) unique identifier; 2) USER form 10072 to allow companies to file new Market Conduct Annual Statement (MCAS) submissions for prior years; and 3) USER form 10080 to display data retention policies and terminology related to action dates in RIRS.

Mr. Haworth said the Working Group also considered the detailed analysis results for two USER forms. USER form 10072 is a request to add the ability for companies to submit new prior year MCAS filings, and USER form 10080 is a request to update the RIRS in iSite+ to include the data retention policies and terminology related to action dates. He said the Working Group adopted motions to move both requests to application development.

Finally, Mr. Haworth said the Working Group completed its review of the MIS data analysis results and made recommendations for the metrics, the presentation of the results and methods to improve data quality.
Ms. Dingus made a motion, seconded by Mr. Fordham, to adopt the Working Group’s report. The motion passed unanimously.

3. **Adopted the MIS Data Analysis Metrics and Recommendations**

Mr. Haworth said the metrics are designed to evaluate three aspects of data quality for each market information system. Those three aspects are completeness, accuracy and timeliness, which are all critical for state insurance regulators to conduct proper analysis.

   a. **CDS**

   Mr. Haworth said there is no automated way to ensure that states have successfully submitted all of their closed complaints to the NAIC; however, it is possible to determine whether the submitted data successfully loaded to the NAIC database. He said the first Complaint Database System (CDS) completeness metric identifies errors that prevented complaint data from loading. He said there were more than 117,000 new errors created last year, which reflects complaint data that did not initially load to the database. He noted that staff in the state insurance departments can, and often do, correct the errors and resubmit the data. He said that as of Nov. 25, about 6,000 of those errors were still outstanding. He said all states have access to the State Data Load Error Viewer in iSite+, where they can monitor the status of their submitted data.

   Mr. Haworth said that to make trending results from year to year more meaningful, the Working Group recommends adding a percentage of errors to total complaints.

   Mr. Haworth said the results for the CDS timeliness metric continued to improve in 2018, with three more jurisdictions submitting complaints at least monthly. He said many states submit complaints daily.

   Mr. Haworth said the Working Group recommends adding a measure of the percentage of months with no files received to the total number of months.

   Mr. Haworth said the Working Group also recommends adding a new timeliness metric for the CDS. He said the first timeliness metric only considers the files received by each jurisdiction and not the timeliness of the data within the files. He said the Working Group recommends adding a second timeliness metric that identifies jurisdictions that did not submit a current complaint at least monthly. He said a current complaint would be defined as one that was closed and submitted within 45 days.

   Mr. Haworth said the accuracy metrics for complaints are designed to determine if the complaints are appropriately designated as confirmed and whether the complaint is associated with the correct entity and line of business. He said, as directed by the Task Force, NAIC staff generate these results and distribute them to the state Consumer Services Directors quarterly.

   Mr. Haworth said the first accuracy metric identifies complaints submitted with a confirmed indicator with a disposition code that may indicate it is not confirmed. He said the results of this metric continue to improve.

   Mr. Haworth said the second accuracy metric identifies complaints submitted for a line of business on companies that did not report premiums written for that line of business in their financial annual statement. He said this metric includes both state-level premium and national-level premium results. He noted that for most lines of business, the state-level premium results more accurately identify miscoded complaints. For the life insurance lines of business, however, the national-level premium results are more accurate because people may move from state to state. He said this metric reflects a small decrease in accuracy from last year but still looks good.

   b. **MATS**

   Mr. Haworth said there is no automated method to ensure all market actions are reported in MATS. He said the closest method identified was to compare MATS actions to those reported in the NAIC **Insurance Department Resources Report (IDRR)**. He said the first completeness metric compares the number of closed exams, and the entities associated with those exams, reported in MATS to those reported in the IDRR. He said the second completeness metric compares the number of entities included in all closed market actions, which include exams, focused inquiries and non-exam regulatory interventions. Mr. Haworth noted the IDRR reporting instructions have been updated to clarify what should be reported. However, he said there are still significant discrepancies.

   Mr. Haworth said the Working Group recommends investigation to determine the reasons for the differences.
Mr. Haworth said the third completeness metric identifies RIRS records with an origin code of “Market Conduct Exam” that do not have a corresponding record in MATS. He said the results are not trending well. He said there is not a clear understanding of how MATS and RIRS actions should be associated. He also said the Working Group members shared that they were using the RIRS action and effective dates differently.

Mr. Haworth said the Working Group recommends best practices regarding the use of MATS and RIRS be defined and communicated, and that the RIRS action and effective dates be defined and communicated.

Mr. Haworth said the Working Group recommends completing the RIRS/MATS hard card next year.

Mr. Haworth said the Working Group recommends adding the percentage of RIRS actions taken with no MATS entry to the total RIRS actions with a “Market Conduct Exam” origin code.

Mr. Haworth said there are several MATS timeliness metrics. He said all the results are as of July 9, 2019. He said the first MATS timeliness metric identifies open actions that contain inactive values. He said there are no longer any actions that meet this criterion and that the Working Group recommends eliminating this metric.

Mr. Haworth said the remaining MATS timeliness metrics identify actions that contain a particular status for more than a specified period of time. He said the results indicate there is room for improvement. He noted, however, there are valid reasons for an action to remain in a particular status for an extended period of time.

Mr. Haworth said the Working Group recommends defining and providing education and training on MATS best practices, including how to ensure statuses are kept current.

Mr. Haworth said the Working Group recommends adding filters to the MATS “No Change” Personalized Information Capture System (PICS) event. He said the PICS event would provide subscribers a monthly listing of market actions that have been in a status longer than the specified time threshold. He said, however, there is currently no way to limit this listing to only those actions your state is participating in.

c. **MARS**

Mr. Haworth said there are two completeness metrics in the Market Analysis Review System (MARS). He said the first completeness metric identifies the number of jurisdictions that did not complete the minimum 10 reviews in 2018. Those results were consistent with the previous year. He said the metric should have reflected the threshold set by the Market Analysis Procedures (D) Working Group, which is set at 15 reviews but was not adjusted for 2018.

Mr. Haworth said to prevent such an oversight in the future, the Working Group recommends modifying this metric to identify jurisdictions that did not complete the minimum number of reviews in the past year per the Market Analysis Procedures (D) Working Group’s minimum guidelines.

Mr. Haworth said the Working Group also recommends adding premium volume and the number of companies writing business for each jurisdiction.

Mr. Haworth said the second MARS completeness metric identifies Level 1 reviews with a disposition that indicates a Level 2 analysis was planned but not completed within nine months. He said there are many scenarios where this could reasonably happen, so the Working Group recommends eliminating this metric for now because the current MARS does not allow the original disposition to be updated. He said a requested feature of the MARS redesign project is to allow this functionality.

Mr. Haworth said the first MARS timeliness metric identifies reviews that were started but not completed and subsequently deleted by the system after 60 days. He said the Working Group also recommends eliminating this metric. He said the Working Group did not find the results of this metric meaningful because MARS sends several notifications prior to deleting reviews. He said the reviews were likely created in error and should be deleted.

Mr. Haworth said the second timeliness metric identifies reviews that did not use the most current financial data. He said there was an improvement in the percentage of these reviews, with more than 96% of the reviews created last year using the most current financial data.
d. **MCAS**

Mr. Haworth said there are three MCAS completeness metrics. He said the first completeness metric reflects the number of non-participating states. He said there was no change. He said the second completeness metric reflects the number of missing filings and is consistent with last year. The second metric is of 2018 data results as of Nov. 5, 2019 and may continue to change as additional filings are received.

Mr. Haworth said the third completeness metric for the MCAS identifies companies that were required to file, requested a waiver, and the jurisdiction did not respond to the request. He said this is a new metric, and the results are trending positively.

Mr. Haworth said the Working Group recommends adding the percentage of waiver requests approved and denied.

Mr. Haworth said the first MCAS timeliness metric reflects the number of filings submitted 45 or more days after the filing deadline. He said those results improved this year. He said the second timeliness metric identifies companies that were required to file, requested an extension, and the jurisdiction did not respond to the request. The results of the second timeliness metric also show improvement.

Mr. Haworth said the Working Group recommends adding the percentage of extension requests approved and denied.

Mr. Hanson asked if it is possible to create a metric to identify companies that use the same reason in their waiver or extension multiple years in a row. Mr. Haworth said NAIC staff are working on a Tableau report to provide that information.

Mr. Haworth said validations are run on MCAS filing data when it is processed at the NAIC. He said the first accuracy metric reviews review the percentage of validation errors on the original filings and the current percentage of errors. He noted errors are generally fixed with subsequent filings. He said the results continue to be very good.

Mr. Haworth said the second MCAS accuracy metric identifies refilings. He said the number of refilings increased this year primarily because of the new lines of business—health and lender-placed insurance.

e. **RIRS**

Mr. Haworth said that last year, there were still two jurisdictions that had not submitted regulatory actions in the past five years. He said that after the Working Group chair reached out to them, both jurisdictions submitted actions in 2019.

Mr. Haworth said the second RIRS completeness metric identifies errors that prevented regulatory actions from successfully loading to the RIRS database. He said there were about 2,500 errors that prevented regulatory actions from loading last year. He said there are much fewer now.

Mr. Haworth said the Working Group recommends adding the percentage of errors to total regulatory actions.

Mr. Haworth said the goal of the RIRS timeliness metric is to have regulatory actions entered and made available to other state insurance regulators as soon as possible after the effective date. He said the RIRS timeliness metric results indicate there continues to be improvement in this area.

Mr. Haworth said the Working Group believes the metrics continue to perform as desired. He said there are caveats associated with most of the metrics, and in some cases, the results do not necessarily reflect data-quality issues. He said the metrics are helpful in identifying potential issues. He said the majority of the NAIC MIS data is of good quality. He noted there were several areas where the results improved from the previous year, but some areas in need of improvement have been identified.

Mr. Haworth said there appears a need for education and training regarding expectations and best practices to ensure data quality.

Mr. Haworth said the detailed results will be distributed to each state’s collaborative action designees, market analysis chiefs and market conduct chief examiners, with instructions to review the results and make appropriate updates where necessary.

Director Wing-Heier thanked the Working Group and NAIC staff for their good work on the MIS data analysis and recommendations. She said a motion to adopt the report will also include adoption of all the Working Group recommendations.

Mr. Hanson made a motion, seconded by Mr. Fordham, to adopt the Working Group’s MIS data analysis and recommendations. The motion passed unanimously.
4. Reviewed Outstanding USER Forms

Director Wing-Heier asked Ginny Ewing (NAIC) to give an update on outstanding USER forms.

a. USER Form 10051

Ms. Ewing said USER form 10051 is a request to implement the MATS web service in State Based Systems (SBS). She said when MATS was developed, services were created that could be used by state back-office systems to update MATS. She said this request would eliminate the need for states to enter data twice—in the back-office system and in MATS. She said the SBS team has begun initial investigation and plans to complete its review in the first quarter of 2020 and will then have a better idea of the effort to implement this request. She asked for state insurance regulators to volunteer to help with the design.

b. USER Form 10059

Ms. Ewing said USER form 10059 is complete. She said this request was made five years ago prior to the release of iSite+. She said the request improved navigation for the majority of report screens.

c. USER Form 10063

Ms. Ewing said USER form 10063 is a request to facilitate data sharing with FINRA. She said the request is complete, and state insurance regulators now have the ability to search on FINRA’s unique identifier on the Individual Entity Search in iSite+.

d. USER Form 10069A and Form 10069B

Ms. Ewing said USER form 10069A and form 10069B are requests to enhance CDS codes. She said USER10069A requests adding back previously eliminated reason and disposition codes, and USER form 10069B requests new codes for lender-placed insurance and pet insurance. She said the effort to implement these changes is relatively small, and the majority of the effort is related to testing the state implementations.

e. USER Form 10072

Ms. Ewing said USER form 10072 is a request to allow companies to submit new filings for prior years once the MCAS has been closed for the current filing period. She said the request was made prior to the release of the redesigned MCAS system. She noted the new redesigned MCAS will more easily accommodate this change, and it is being incorporated into the quarter one release in February and March.

f. USER Form 10080

Ms. Ewing said USER form 10080 is a request to update RIRS to provide data retention policies and terminology related to action dates. She said the request includes seven components, two of which are associated with data definitions and will be assisted by the RIRS SME group and will not be completed by the end of 2019, but the remaining components will be completed by the end of 2019.

g. USER Form 10081

Ms. Ewing said USER form 10081 is a request to make all MCAS data available through the Market Analysis Prioritization Tool (MAPT). She said in preliminary analysis, it appears this request could be addressed as part of the State Ahead strategic plan to provide market conduct regulators additional data access.

Ms. Ewing said the second section of the USER report includes the requests being addressed as part of a NAIC State Ahead strategic plan. She said when the strategic plan was drafted, many of the projects defined in the plan came from state insurance regulator requests like the ones the Market Information Systems Research and Development (D) Working Group had in its backlog. She said nine requests are being addressed by four State Ahead projects.

Ms. Ewing said the MARS redesign project will redesign MARS to combine the Level 1 and Level 2 reviews into a single level to provide a more focused review of a company. She said the project is scheduled to begin in April 2020.
Ms. Ewing said the market regulation self-service dashboard project will replace current iSite+ market regulation tools and provide visual representations of MIS data. She said the first phase of this project will deliver a dashboard for complaint and regulatory actions data.

Ms. Ewing said an initial kickoff meeting was held in July for the project to provide market conduct regulators additional data access. She said that based on feedback from the self-service dashboard project, NAIC staff will work with interested regulators to determine what data to provide and the appropriate methods to access it.

Ms. Ewing said the objective of the market conduct data improvements phase II project is to improve the MCAS MAPT by making the data accessible using Tableau dashboards. She said feedback is being gathered on a draft dashboard that has already been created.

Director Wing-Heier said that during the Summer National Meeting, some concern was expressed about the number of USER forms that have not progressed in the last few years. She said she asked the Market Information Systems Research and Development (D) Working Group to take a close look at the prioritization list to determine which projects should be reprioritized and which should be removed due to lack of activity. She said that during the Task Force’s conference call in November, it heard from Working Group about how it reprioritized the USER forms by moving three smaller projects to the top of the prioritization list. Additionally, the Working Group recommended not removing any projects from the list so as not to lose track of them as resources become available to address them.

Director Wing-Heier said that she and Director Lindley-Myers agreed that if a project is not being worked on, it should be removed from the prioritization list. She said some of the projects may lose relevance as the NAIC State Ahead strategic plan nears completion. Director Wing-Heier said the Task Force will schedule a conference call in the first week of January to assess each USER form project.

5. Discussed Recommendations for AI in the MIS

Director Wing-Heier said the Task Force adopted a new charge to discuss recommendations for the use of artificial intelligence (AI) in MIS. She said that given the prioritization of the State Ahead projects and resource demand of the other projects, she does not anticipate any action on these recommendations immediately, but said the Task Force’s work will lay the groundwork for moving market analysis into the future.

Director Wing-Heier invited comments on this topic for consideration at the 2020 Spring National Meeting. She also said she would like to have speakers at the next national meeting who can provide additional information regarding what AI is and what is needed to incorporate AI into the MIS. She said the Task Force will also explore the potential uses and benefits and possible risks of AI.

Director Wing-Heier invited all comments and requests to give presentations to the Task Force should be sent to Randy Helder (NAIC) by February.

Having no further business, the Market Information Systems (D) Task Force adjourned.
The Market Information Systems (D) Task Force met via conference call Oct. 29, 2019. The following Task Force members participated: Lori K. Wing-Heier, Chair (AK); Chlora Lindley-Myers, Vice Chair, and Brent Kabler (MO); Keith Schraad represented by Maria Ailor (AZ); Ricardo Lara represented by Pam O’Connell (CA); Robert H. Muriel represented by Erica Weyhenmeyer (IL); Nancy G. Atkins represented by Russell Hamblen (KY); James J. Donelon represented by Jeff Zewe (LA); Mike Causey represented by Tracy Biehn (NC); John Godfread represented by Johnny Palsgraaf (ND); Bruce R. Ramge represented by Reva Vandevoorde (NE); Jillian Froment represented by Angela Dingus (OH); Glen Mulready represented by Joel Sander (OK); Kent Sullivan represented by Ignatius Wheeler (TX); Michael S. Pieciak represented by Isabelle Turpin Keiser (VT); and Mike Kreidler represented by John Haworth (WA).

1. **Adopted its Summer National Meeting Minutes**

Director Lindley-Myers made a motion, seconded by Mr. Zewe, to adopt the Task Force’s Aug. 3 minutes (*see NAIC Proceedings – Summer 2019, Market Information Systems (D) Task Force*). The motion passed unanimously.

Director Wing-Heier said the Market Information Systems Research and Development (D) Working Group maintains a prioritization list of Uniform System Enhancement Request (USER) forms received from state insurance regulators. After the Working Group’s report at the Summer National Meeting, a Task Force member asked about the status of USER forms that have been on the prioritization list for several years without any additional action.

Director Wing-Heier said she asked the Working Group chair, Mr. Kabler, to lead the Working Group in a review of the prioritization list to determine whether some of the USER forms could be wrapped into *State Ahead* projects, and which of the older USER forms could be removed from the list due to inactivity. She also asked the Working Group to take a fresh look at the prioritization to see if any re-prioritization was needed.

Mr. Kabler said the Working Group met Sept. 19, in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings, to review the USER form prioritization. He said the USER requests werequantified according the hours needed to complete. He said most of the requests were considered extra-large, meaning the estimated time of completion was more than 400 hours. He said there were three requests that were classified as small (less than 40 hours), and they were moved to the top of the prioritization list. He noted that there were severe staffing constraints affecting the others.

Ginny Ewing (NAIC) said the development teams are at capacity, but they have room to complete the three projects moved to the top of the priority list. She said the high priority projects being worked on by the development teams are the *State Ahead* projects that include transitioning to the cloud, the Online Fraud Reporting System (OFRS) redesign, and the Enterprise Data project. She said upcoming *State Ahead* projects include the Market Analysis Review System (MARS) redesign and the Regulatory Data Collection (RDC) tool enhancements. Additionally, the developments have ongoing support and maintenance responsibilities.

Mr. Kabler said the Working Group considered whether any requests should be removed from the USER list and decided against doing so. He said all the requests have merit, and even though there may not currently be the time to address them, the Working Group does not want to lose sight of them for the future. He said the Working Group was looking for guidance on how to address these.

Director Wing-Heier asked Ms. Ewing if there was any possibility for the resource demand to lessen in the near future. Ms. Ewing said *State Ahead* projects will be completed and consulting dollars are available to assist.
Director Lindley-Myers said she understands Mr. Kabler’s concerns, but, at some point, the old items that are not being worked on need to be removed. She said there may still be opportunities to put those projects back on the list later. She suggested that a determination could be made at the Fall National Meeting when Ms. Ewing may have clearer projections of resource availability.

Director Wing-Heier agreed and said some of the projects may not be relevant after the State Ahead work is completed. She said the Task Force may need to consider the list project by project. Mr. Kabler suggested creating a new category called “tabled” rather than removing them from the list entirely.

Mr. Kabler said the Working Group also received the recommendations from the Regulatory Information Retrieval System (RIRS) subject-matter experts (SMEs). He noted that there was a delay in completing the recommendations due to the difficulty arising at a consensus among so many different states. He said this is a high priority project that is extra-large. He said it is possible that it could be stalled in implementation, and he suggested that it be pushed along by the Task Force.

Director Wing-Heier suggested adding this to the agenda for the Task Force at the Fall National Meeting. Mr. Kabler said the Working Group plans to meet Nov. 15 and can present the entire proposal to the Task Force at the Fall National Meeting. Director Wing-Heier said a summary would be enough, and anyone who wants the entire proposal can reach out to the Working Group.

Ms. Dingus made a motion, seconded by Mr. Hamblen, to adopt the report of the Market Information System Research and Development (D) Working Group. The motion passed unanimously.

3. **Adopted its 2020 Proposed Charges**

Director Wing-Heier said there is essentially one change to the charges. She said charge to develop a plan to make public data collected in the NAIC Market Information Systems more meaningful and widely available was removed and replaced with a charge to, “[d]evelop recommendations for the incorporation of artificial intelligence (AI) abilities in NAIC Market Information Systems for use in market analysis.”

Director Wing-Heier said the old charge has been a Task Force charge for several years, and in the last year, the Task Force had a few comments but very little other interest in the charge. She said that during the Spring National Meeting, the Task Force heard a presentation on the redesign of the Consumer Insurance Search (CIS), which met many of the goals of this charge.

Director Wing-Heier said the new charge aligns the Task Force with the direction of many other NAIC Committees and Task Forces considering the value, benefits and risks of the use of AI. She said, given the prioritization of the State Ahead projects and resource demand of the other projects, she did not anticipate any action on these recommendations immediately, but they will lay the groundwork for moving the NAIC market systems into the future.

Mr. Hamblen made a motion, seconded by Director Lindley-Myers, to adopt the Task Force’s 2020 proposed charges (Attachment One-A). The motion passed unanimously.

Having no further business, the Market Information Systems (D) Task Force adjourned.
MARKET INFORMATION SYSTEMS (D) TASK FORCE

The mission of the Market Information Systems (D) Task Force is to provide business expertise regarding the desired functionality of the NAIC Market Information Systems and the prioritization of regulatory requests for the development and enhancements of the NAIC Market Information Systems.

Ongoing Support of NAIC Programs, Products or Services

1. The **Market Information Systems (D) Task Force** will:
   A. Ensure the NAIC Market Information Systems support the strategic direction set forth by the Market Regulation and Consumer Affairs (D) Committee.
   B. Develop a plan for making public data collected in the NAIC Market Information Systems more meaningful and widely available by the 2019 Fall National Meeting.
   C. Develop recommendations for the incorporation of Artificial Intelligence (AI) abilities in market information systems for use in market analysis by the 2020 Fall National Meeting.
   D. Analyze the data in the NAIC Market Information Systems. If needed, recommend methods to ensure better data quality by the 2019 Summer-Fall National Meeting.
   E. Provide guidance on appropriate use of the NAIC Market Information Systems and data entered in them.
      1. Complaint Database System (CDS).
      2. Electronic Forums.
      4. Market Analysis Profile.
      5. Market Analysis Prioritization Tool (MAPT).
      9. 1033 State Decision Repository (in conjunction with the Antifraud (D) Task Force).

2. The **Market Information Systems Research and Development (D) Working Group** will:
   A. Serve as the business partner to review and prioritize submitted Uniform System Enhancement Request (USER) forms to ensure an efficient use of available NAIC staffing and resources.
   B. Assist the Task Force with tasks as assigned, such as:
      1. Analyze NAIC Market Information Systems data.
      2. Provide state users with query access to NAIC Market Information Systems data.
      3. Provide guidance on appropriate use of the NAIC Market Information Systems.

The Producer Licensing (D) Task Force met in Austin, TX, Dec. 7, 2019. The following Task Force members participated: Larry Deiter, Chair (SD); Mike Kreidler, Vice Chair, represented by Jeff Baughman (WA); Lori K. Wing-Heier represented by Jacob Lauten (AK); Allen W. Kerr represented by Letty Hardee (AR); David Altmaier represented by Matt Tamplin (FL); Doug Ommen represented by Andria Seip (IA); Vicki Schmidt (KS); James J. Donelon represented by Barry Ward (LA); Anita G. Fox represented by Michele Riddering (MI); Chlora Lindley-Myers represented by Carrie Couch and Marjorie Thompson (MO); Mike Causey represented by Angela Hatchell (NC); Jon Godfread represented by John Arnold (ND); Bruce R. Ramge represented by Peg Jasa (NE); Marlene Caride represented by Phil Gennace (NJ); John G. Franchini represented by Victoria Baca (NM); Jillian Froment represented by Jana Jarrett (OH); Glen Mulready represented by Teresa Green (OK); Elizabeth Kelleher Dwyer represented by Beth Vollucci (RI); Raymond G. Farmer represented by Lee Hill (SC); Kent Sullivan represented by Chris Herrick (TX); Todd E. Kiser represented by Randal Overstreet (UT); Scott A. White represented by Mike Beavers (VA); James A. Dodrill represented by Ellen Potter (WV); and Jeff Rude (WY).

1. **Adopted its Oct. 25 Minutes**

The Task Force met Oct. 25 and took the following action: 1) adopted its Summer National Meeting minutes; 2) adopted its 2020 proposed charges; 3) discussed amendments to the NAIC Uniform Licensing Standards (ULS) for surplus lines; 4) discussed the role of chatbots in the distribution of insurance; and 5) discussed NAIC/Financial Industry Regulatory Authority (FINRA) data sharing.

Mr. Hill made a motion, seconded by Mr. Baughman, to adopt its Oct. 25 minutes (Attachment One). The motion passed unanimously.

2. **Adopted Revisions to the Handbook**

Mr. Beavers said the Producer Licensing Uniformity (D) Working Group reviewed the *State Licensing Handbook* (Handbook) during conference calls, with all comments and drafts being shared with interested parties on the NAIC website. The first conference call occurred Aug. 21, and the Working Group met six more times via conference call. The Working Group adopted the revised Handbook during its Oct. 30 conference call.

Mr. Beavers said some of the more significant changes include: 1) exact language of the *Producer Licensing Model Act* (#218), when referenced, was added to the Handbook; 2) the appendix was removed from future hard copy publications and will be made available in an electronic format on the NAIC website; 3) a link was added to the NAIC web page for current information about the National Association of Registered Agents and Brokers (NARAB); 4) language was removed regarding the National Insurance Producer Registry’s (NIPR) implementation of the Contact Change Request application; and 5) the licensing reciprocity examples were clarified.

Mr. Overstreet made a motion, seconded by Mr. Lauten, to adopt the revised *State Licensing Handbook* (see NAIC Proceedings – Fall 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Four). The motion passed unanimously.

3. **Adopted the 2019 CER Agreement**

Mr. Beavers said the form was created by combining information from the 2004 Continuing Education Declaration regarding continuing education (CE) reciprocity course approval and the 2004 Continuing Education Reciprocity (CER) Agreement. Mr. Beavers said the Uniform Education (D) Working Group adopted the CER Agreement during its Oct. 31 conference call. This agreement is used to support the use of the Uniform Continuing Education Reciprocity Course Filing Form, which CE providers may use to streamline the course-approval process in multiple states. Through the reciprocal approval process, the CE provider’s home state conducts a substantive review of the CE course; therefore, non-resident states do not need to perform a similar review.

Ms. Potter made a motion, seconded by Mr. Hill, to adopt the 2019 CER Agreement Handbook (see NAIC Proceedings – Fall 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Five). The motion passed unanimously.
4. Discussed Amendments to the NAIC ULS for Surplus Lines

Director Deiter said the Surplus Lines (C) Task Force sent a request to the Producer Licensing (D) Task Force Aug. 4, 2018, to consider whether the requirement of a resident producer to hold underlying property/casualty (P/C) licenses before a surplus lines license is issued should be expanded to permit an accident and health (A&H) license to fulfill this underlying license requirement.

Director Deiter said the Task Force had multiple discussions on this topic at NAIC national meetings and during an interim conference call in October. Upon the last review of comments submitted Nov. 15, Director Deiter said there continues to be divergent views on what, if any, changes should be made to the ULS. Because of this, Director Deiter suggested it may be premature to modify the ULS for surplus lines and the chapter of the State Licensing Handbook that addresses surplus lines licensing. Director Deiter said he believed it would be better for consumers and the industry if each state implements changes to state laws, as needed, as the market for A&H surplus lines products develops.

Director Deiter asked if there were any objections or comments regarding his suggested direction.

John Fielding (Council of Insurance Agents & Brokers—CIAB) said the CIAB does not object to this direction and requested the Task Force be willing to address this issue in the future if there is a need for states to move in uniform direction.

Director Deiter said the Task Force could revisit this issue in the future, if needed, to ensure the necessary consumer protections are in place and the regulatory framework is appropriate to facilitate the delivery of needed insurance products through the surplus lines market.

Hearing no other comments, Director Deiter said there is not a need for a motion since the Task Force is not taking any affirmative action to change the ULS. Director Deiter said this concludes the Task Force’s discussion of the request.

5. Adopted the Reports of the Producer Licensing Uniformity (D) Working Group and the Uniform Education (D) Working Group

Director Deiter said Chris Murray, Producer Licensing Uniformity (D) Working Group chair, and Rachel Chester, Uniform Education (D) Working Group chair, were not able to attend this meeting and that written reports have been made available. Director Deiter asked if there were any questions or comments on the reports.

Commissioner Schmidt made a motion, seconded by Mr. Hill, to adopt the reports of the Producer Licensing Uniformity (D) Working Group, including its Oct. 30 (Attachment Two), Oct. 10 (Attachment Three), Sept. 26 (Attachment Four), Sept. 12 (Attachment Five), Aug. 29 (Attachment Six) and Aug. 21 (Attachment Seven) minutes, and the Uniform Education (D) Working Group, including its Oct. 31 (Attachment Eight) and Aug. 22 (Attachment Nine) minutes. The motion passed unanimously.

6. Heard a Report from the NIPR Board of Directors

Director Deiter said the NIPR Board of Directors met Dec. 6. During this meeting, the Board heard a report from the NIPR Audit Committee, which reported NIPR’s total revenues are $3,555,225 (10.2%) above budget through October and 13.9% above the prior year. The Board approved NIPR’s 2020 budget, with projected revenues of $46.1 million and projected expenses of $43.3 million. The Board heard an update on the progress of implementing NIPR’s strategic plan, which will be completed in 2020. In addition to the general progress on the plan, two major strategic initiatives have been accomplished this year. NIPR implemented Florida for resident licensing for its individual insurance producers, and it is anticipated Florida’s resident business entities will be available before year-end.

Having no further business, the Producer Licensing (D) Task Force adjourned.
The Producer Licensing (D) Task Force met via conference call Oct. 25, 2019. The following Task Force members participated: Larry Deiter, Chair, and Dan Nelson (SD); Mike Kreidler, Vice Chair, represented by Jeff Baughman (WA); Lori K. Wing-Heier represented by Chris Murray (AK); Ricardo Lara represented by Charlene Ferguson (CA); Michael Conway represented by Steven Giampaolo (CO); Trinidad Navarro represented by Ashley Webb (DE); David Altmaier represented by Matt Guy (FL); Vicki Schmidt represented by Lee Modesitt (KS); Nancy G. Atkins represented by Lee Webb (KY); James J. Donelon represented by Barry Ward (LA); Chlora Lindley-Myers represented by Carrie Couch (MO); Bruce R. Ramge represented by Kevin Schlautman (NE); John G. Franchini represented by Venessa DeJesus and Victoria Baca (NM); Jillian Froment represented by Karen Vourvopoulos (OH); Glen Mulready represented by Courtney Khodabakhsh (OK); Andrew Stolfi represented by Kirsten Anderson (OR); Todd E. Kiser represented by Randy Overstreet (UT); James A. Dodrill represented by Robert Grishaber (WV); and Jeff Rude (WY).

1. **Adopted its Summer National Meeting Minutes**

   Mr. Murray made a motion, seconded by Ms. Webb, to adopt the Task Force’s Aug. 3 minutes *(see NAIC Proceedings – Summer 2019, Producer Licensing (D) Task Force)*. The motion passed unanimously.

2. **Adopted its 2020 Proposed Charges**

   Director Deiter said the next agenda item is to consider adoption of the Task Force’s 2020 proposed charges. He said charge 1.H was changed to reflect that the white paper on the role of chatbots will be finalized by the 2020 Spring National Meeting. In addition, the reference to the year 2019 was changed to 2020 in charge 2.C and charge 3.A. He said charge 1.I was added to develop procedures for amending the NAIC’s uniform producer licensing applications and uniform appointment form to ensure consistency with the NAIC membership’s goal of maintaining uniform and stable applications that encourage the efficient use of electronic technology. He said this charge is consistent with other areas across the NAIC, which have developed more structured procedures for NAIC work products that are used by NAIC members for regulatory purposes. For example, he said the Market Conduct Annual Statement Blanks (D) Working Group has guidelines regarding the process for amending or adding a new Market Conduct Annual Statement (MCAS) blank, and the Market Conduct Examination Standards (D) Working Group has guidelines for the discussion and adoption of revisions to the *Market Regulation Handbook*.

   Mr. Baughman made a motion, seconded by Ms. Khodabakhsh, to adopt the Task Force’s 2020 proposed charges (Attachment One-A). The motion passed unanimously.

3. **Discussed Amendments to the NAIC Uniform Licensing Standards for Surplus Lines**

   Director Deiter said the Task Force circulated a proposal at the Summer National Meeting that would permit a state the flexibility to require: 1) both an underlying property/casualty (P/C) license and accident and health (A&H) license; 2) only an underlying P/C license; or 3) only an underlying A&H license prior to the issuance of a resident surplus lines license.

   Based on the discussions of the Task Force at the Summer National Meeting, Director Deiter said there are three other options the Task Force should consider. The first option is for states to require an underlying P/C license prior to the issuance of a resident surplus lines license regardless of the type of insurance the surplus lines producer will be selling, soliciting or negotiating. This is the general standard in the market today.

   Director Deiter said the second option is for states to require an underlying P/C license prior to the issuance of a resident surplus lines license if the surplus lines producer is selling, soliciting or negotiating P/C insurance and require an underlying A&H license prior to the issuance of resident surplus lines license if the surplus lines producer will be selling, soliciting or negotiating A&H insurance. He said there seems to be some agreement around this option at the Summer National Meeting.

   Director Deiter said the third option is for the states to require either an underlying P/C license or an underlying A&H license prior to the issuance of resident surplus lines license. He said he does not believe this option was widely supported because almost all surplus business involves P/C risks.
Director Deiter said he believes the second option is the most appropriate approach and requested state insurance regulators and interested parties to submit comments on the second option so the Task Force can make a final decision at the Fall National Meeting.

John Fielding (Council of Insurance Agents & Brokers—CIAB) said the CIAB wants to avoid a situation where a surplus lines producer has to obtain both an underlying P&C license and A&H license unless the surplus lines producer is selling both P&C and A&H insurance.

Keri Kish (Wholesale & Specialty Insurance Association—WSIA) said she agrees with the position of the CIAB and believes the WSIA can support the second option.

David Kodama (American Property Casualty Insurance Association—APCIA) asked if the second option would permit a surplus lines producer who is only selling A&H products to only obtain an underlying A&H license.

Director Deiter said this is the intent of the second option. He asked for any additional comments to be submitted by the middle of November.

4. Discussed the Role of Chatbots in the Distribution of Insurance

Tim Mullen (NAIC) said a draft outline of a white paper discussing the role of chatbots and artificial intelligence (AI) has been circulated. He said the outline has four sections: 1) an introduction; 2) examples of chatbots and AI; 3) regulatory considerations for licensing requirements; and 4) regulatory considerations for marketplace practices. He said the white paper is not intended to establish public policy but rather explain current marketplace activities.

Director Deiter said he would appreciate state insurance regulators and interested parties submitting comments, noting that a small drafting group might be formed to create an initial draft of the paper.

Ms. Ferguson suggested the white paper include a section on cybersecurity and fraud.

Mr. Kodama asked if this work will overlap with the work of the Artificial Intelligence (EX) Working Group. Mr. Mullen said he is coordinating with the NAIC staff support for this Working Group and would ensure there is proper coordination between the two groups.

5. Discussed NAIC/FINRA Data Sharing

Mr. Mullen said the NAIC and the Financial Industry Regulatory Authority (FINRA) are finalizing a memorandum of understanding (MOU) for the sharing of information to enhance state insurance regulators’ awareness of actions FINRA has taken against security brokers who are also operating in the insurance industry. Similarly, the data-sharing will enhance FINRA’s awareness of actions state insurance regulators have taken against insurance producers who are also operating in the securities industry.

Mr. Mullen said FINRA sends a file to the NAIC containing the following data fields for matching against the State Producer Licensing Database (SPLD): 1) first name; 2) last name; 3) year of birth; and 4) last four digits of the Social Security number (SSN). The file also contained FINRA’s Central Registration Depository (CRD) number active/inactive status. The NAIC retains matches and deletes all other information from FINRA. The NAIC then sends FINRA the National Producer Number and active/inactive status of matched individuals in the SPLD.

Mr. Mullen said the NAIC and FINRA are exchanging this information for regulatory purposes and will not disclose each organization’s data to the public. He said the MOU should be finalized within the next 30 days, noting that state insurance regulators will be see new data fields for CRD and FINRA Active/Inactive status in the SPLD.

Having no further business, the Producer Licensing (D) Task Force adjourned.
Draft: 10/7/19

Adopted by the Executive (EX) Committee and Plenary, TBD
Adopted by the Market Regulation and Consumer Affairs (D) Committee, TBD
Adopted by the Producer Licensing (D) Task Force, Oct. 25, 2019

2020 PROPOSED CHARGES

PRODUCER LICENSING (D) TASK FORCE

The mission of the Producer Licensing (D) Task Force is to: 1) develop and implement uniform standards, interpretations and treatment of producer and adjuster licensees and licensing terminology; 2) monitor and respond to developments related to licensing reciprocity; 3) coordinate with industry and consumer groups regarding priorities for licensing reforms; and 4) provide direction based on NAIC membership initiatives to the National Insurance Producer Registry (NIPR) Board of Directors regarding the development and implementation of uniform producer licensing initiatives, with a primary emphasis on encouraging the use of electronic technology.

Ongoing Support of NAIC Programs, Products or Services

1. The Producer Licensing (D) Task Force will:

   A. Work closely with the National Insurance Producer Registry (NIPR) to encourage full utilization of NIPR products and services by all of the states and producers, and encourage accurate and timely reporting of state administrative actions to the NAIC’s Regulatory Information Retrieval System (RIRS) to ensure this data is properly reflected in the State Producer Licensing Database (SPLD) and the Producer Database (PDB).

   B. Facilitate roundtable discussions, as needed, with the state producer licensing directors for the exchange of views, opinions and ideas on producer-licensing activities in the states and at the NAIC.

   C. Discuss, as necessary, state perspectives regarding the regulation and benefit of the activities of the federal Affordable Care Act (ACA) established enrollment assisters (including navigators and non-navigator assisters and certified application counselors) and the activities of producers in assisting individuals and businesses purchasing in the health insurance marketplaces. Coordinate with the Health Insurance and Managed Care (B) Committee and the Antifraud (D) Task Force, as necessary.

   D. Monitor the activities of the National Association of Registered Agents and Brokers (NARAB) in the development and enforcement of the NARAB membership rules, including the criteria for successfully passing a background check.

   E. Coordinate through NAIC staff to provide guidance to NIPR on producer licensing-related electronic initiatives. Hear a report from NIPR at each national meeting.

   F. Coordinate with the Market Information Systems (D) Task Force and the Antifraud (D) Task Force to evaluate and make recommendations regarding the entry, retention and use of data in the NAIC’s Market Information Systems (MIS).

   G. Monitor state implementation of adjuster licensing reciprocity and uniformity; update, as necessary, NAIC adjuster licensing standards.

   H. Finalize the white paper on the role of chatbots and artificial intelligence (AI) in the distribution of insurance and the regulatory supervision of these technologies by the 2020 Spring National Meeting.

   I. Draft procedures for amending the NAIC’s uniform producer licensing applications and uniform appointment form to ensure consistency with the NAIC membership’s goal of maintaining uniform and stable applications that encourage the efficient use of electronic technology.

2. The Producer Licensing Uniformity (D) Working Group will:

   A. Work closely with state producer licensing directors and exam vendors to ensure: 1) the states achieve full compliance with the standards in order to achieve greater uniformity; and 2) the exams test the qualifications for an entry-level position as a producer.

   B. Provide oversight and ongoing updates, as needed, to the State Licensing Handbook. Complete by the 2020 Fall National Meeting.

   C. Monitor and assess the state implementation of the Uniform Licensing Standards (ULS) and update the standards, as needed. Complete by the 2020 Fall National Meeting.

   D. Review and update, as needed, the NAIC’s uniform producer licensing applications and uniform appointment form. Provide any recommended updates to the Producer Licensing (D) Task Force by June 1.
3. The **Uniform Education (D) Working Group** will:
   
   A. Update, as needed, the reciprocity guidelines, the uniform application forms for continuing education (CE) providers, and the process for state review and approval of courses. Provide any recommended updates to the Producer Licensing (D) Task Force by the 2020 Fall National Meeting.
   
   B. Coordinate with NAIC parent committees, task forces and/or working groups to review and provide recommendations, as necessary, on prelicensing education and CE requirements that are included in NAIC model acts, regulations and/or standards.

NAIC Support Staff: Timothy D. Mullen/Greg Welker

W:\National Meetings\2019\Fall\TF\PLTF\PLTF Draft Charges 10.7.19.docx
The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Oct. 30, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Melissa Grisham (AR); Charlene Ferguson (CA); Lisa Tordjman (ID); Leslie Page, Paige McCully and Tracy Lord-Bishop (MI); Kevin Schlautman (NE); Karen Vourvopoulos (OH); Dan Nelson (SD); Randy Overstreet (UT); Mike Beavers and Richard Tozer (VA); and Melody Esquivel (WI).

1. Reviewed the NAIC State Licensing Handbook

Mr. Murray said the intent of this Working Group was to hold a minimum of two conference calls a month since August to review comments submitted over the chapters in the NAIC State Licensing Handbook (Handbook). He said during the Oct. 10 call, the Working Group finalized reviewing the comments received on the last of the remaining chapters. He said the individual chapters, deadlines, conference call dates, comments received, and the redlined chapters have been posted on the Working Group webpage. He said the purpose of this call is to finalize any remaining areas of the Handbook and potentially adopt the revisions.

Mr. Murray said the Producer Licensing (D) Task Force held a conference call on Oct. 25 to review and adopt its 2020 proposed charges in addition to other agenda items, including surplus lines. The Working Group has been holding off the review of Chapter 10 Surplus Lines Producer Licenses pending the Task Force’s discussion and adoption of surplus lines standard language. He advised that during the Task Force conference call, it was determined that further comments and discussion would be accepted before the Task Force finalizes its review. Mr. Murray said the Working Group would not be opening up chapter 10 for review until the Task Force discussion has been completed. He said the Working Group will proceed with adopting all other reviewed chapters, excluding chapter 10.

Mr. Murray said during the first few conference calls, the Working Group discussed the creation of a Handbook webpage under the Working Group. He said the webpage will house the appendix for the Handbook and serve as a centralized location for all information concerning notices regarding the Handbook and potential chapter updates that may be required. He said the webpage is being created and will be available prior to the completion of the Handbook.

Mr. Murray said during its last conference call, the Working Group finished up the review of Chapters 26–30. He said the only comments received were from Nebraska concerning Chapter 29 Title Insurance Agents. He said the Working Group discussed all the comments submitted on this chapter, which were also sent to NAIC staff support for the Title Insurance (C) Task Force to review. He said NAIC staff support confirmed that the suggestions made would not go against NAIC language; however, it would be up to the Working Group to determine whether this language needs to be changed in the Handbook or if it should be kept as is at a broader level. He advised that during the last call, the decision was made to accept the following changes pending further direction from the NAIC staff support:

- Third paragraph, first sentence specifically regarding the word “lender’s policy”; the Working Group’s decision was to remove “lender’s,” and replace it with “Loan.”

- The third paragraph addresses two types of title insurance policies that are commonly used; however, only one type is discussed. The Working Group’s decision was that Nebraska would provide new language to be applied that would address both.

- Third paragraph at the end of the last sentence. The Working Group’s decision was that the current language may cause confusion. The buyer/borrower typically pays for the loan policy, but the buyer/borrower is not covered under the loan policy; only the lender is covered. Therefore, additional language would be supplied by Nebraska to clarify.

- Fourth paragraph, second sentence. The Working Group’s decision was to remove “the title page” and add the language, “Schedule A of the Policy.”
Fourth paragraph, third sentence questioning the language “policy is generally the original amount of the loan.” The Working Group’s decision was to remove “original” from the sentence.

Ninth and last paragraph. The Working Group’s decision was that the language, “[i]n addition to state laws, rebates and referrals related to most residential real estate transactions are prohibited under the federal Real Estate Settlement Procedures Act (RESPA)” should also mention the TILA-RESPA Integrated Disclosure (TRID) Rule.

Mr. Murray said since NAIC staff support has agreed with the changes, the Working Group will accept the changes. He said Nebraska has also submitted language as requested for paragraph three. The Working Group discussed and agreed to the suggested language. The paragraph would now read:

Two types of title insurance policies are commonly issued: the owner's policy and the loan policy. The owner's policy ensures that the title to the real property is vested as described in the policy, that the title is marketable, that there is a right of access to the property, and against defects in or lien or encumbrances on the title. The loan policy is usually based on the dollar amount of the loan and only protects the lender’s interests in the property, should a problem with the title arise. Title insurance does not require a written application. Policies often are ordered by real estate agents or lenders. The title insurance agent issues a commitment or binder basically revealing the current state of title to the property and agreeing to insure the property, provided that the requirements in the commitment are met to the satisfaction of the title insurer. Typically, even though the buyer/borrower pays for the loan policy, only the lender is covered by the loan policy.

Mr. Murray said the next area to be brought before the Working Group is concerning Chapter 2 The Producer Licensing Model Act. He said during the first round of accepting comments, California submitted a comment concerning the “Section-by-Section of the PLMA,” suggesting adding language to the second bullet point under Section 14: Appointments stating, “if states require the appointment to be renewed.” The Working Group discussed and determined that this is language specific to the Producer Licensing Model Act (#218) and could not be changed. Mr. Murray said it was decided that this language could be better addressed in Chapter 11 Appointments. He said after further discussion, the decision was to add language to the “key elements” under chapter 11. The language would now read:

In states that are required to renew appointments, the key elements include:
1. States shall provide or publish a pre-renewal notice to insurers informing them that appointment renewals are imminent.
2. At the time for renewal, a state will deliver an invoice. The invoice may not be altered, amended or used for appointing or terminating producers.
3. Insurers shall return the invoice and the payment to the department or its designee.
4. States shall establish a dispute resolution process to accommodate errors after the fact.

The Working Group discussed the suggestion for chapter 11 and agreed that this would be the best place without affecting language from the Model #218 or changing the meaning of the current language.

Mr. Murray said that concludes the complete review of the Handbook and all the comments submitted.

Mr. Beavers made a motion, seconded by Mr. Nelson, to adopt the revisions to the NAIC State Licensing Handbook, including the changes made to chapters 11 and 29, and excluding revisions to chapter 8 (see NAIC Proceedings – Fall 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Four). The motion passed unanimously.

Mr. Murray said the adopted revisions would be presented to the Producer Licensing (D) Task Force for adoption at the Fall National Meeting.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.
The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Oct. 10, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Lisa Tordjman (ID); Lorelei Brillante (MD); Leslie Page (MI); Greg Nelson (ND); Kevin Schlautman (NE); Otis Phillips (NM); Karen Vourvopoulos (OH); Rachel Chester (RI); Randy Overstreet (UT); Richard Tozer (VA); and Melody Esquivel (WI).

1. Reviewed the NAIC State Licensing Handbook

Mr. Murray said the Working Group last met via conference call Sept. 26 and was able to finalize the review up through chapter 25. He said that would complete the review of all chapters 1–25, excluding Chapter 10 Surplus Lines Producer Licenses. He said the purpose of today’s conference call is to review chapters 26–30, in addition to circling back to chapter 4 concerning the examples of reciprocity.

Mr. Murray said Alaska, California, Rhode Island and Virginia reviewed the reciprocity examples found in chapter 4, on page 18. He said the group submitted revisions for examples A–F, which were exposed and posted on the Working Group webpage. The Working Group discussed the revisions and agreed to all changes made to the reciprocity examples.

Mr. Murray said the Working Group only received comments from one state regarding chapters 26–30 from Nebraska concerning Chapter 29 Title Insurance Agents. He said Nebraska submitted several comments throughout this chapter for the Working Group to review. He said these comments were also shared with the NAIC staff for the Title Insurance (C) Task Force to confirm that the suggestions would fall within the uniformity that are trying to be maintained with the Handbook content. He said the goal will be for the Working Group to review and determine whether these comments should be changed with the final say coming from NAIC staff.

Mr. Murray said the first comment can be found in the first sentence of the third paragraph, specifically regarding the word “lender’s policy.” He said Nebraska submitted the question, “Why did this article not discuss the loan policy coverages like it did for the owner’s policy?” He said Nebraska suggests removing “lender’s” and replacing it with “loan.” The Working Group discussed and agreed that the correct verbiage should be “loan policy.”

Mr. Murray said the next comment in the third paragraph is concerning the language, “that the buyer or borrower typically pays for the loan policy, but the buyer/borrower is not covered under the loan policy—only the lender is covered.” Mr. Schlautman said this relates back to the two types of title insurance policies. The Working Group agreed that this should be added and suggests that Nebraska provide suggested language to be added to this section.

Mr. Murray said the next comment is in the second sentence of the fourth paragraph, suggesting removing, “the title page” and adding the language, “Schedule A of the Policy.” Mr. Schlautman said this suggestion is to correct an inaccuracy with the current language. The Working Group discussed and agreed that adding additional language could be getting too specific and change the chapter to have a granular level, which is not the intent of the Handbook. Mr. Murray said he recommends that Nebraska provide draft language if this is an area, they deem necessary to change. The Working Group agreed.

Mr. Murray said the next comment is in the second sentence of the fourth paragraph, suggesting removing, “the title page” and adding the language, “Schedule A of the Policy.” Mr. Schlautman said this suggestion is to correct an inaccuracy with the current language. The Working Group discussed and agreed that they would verify with NAIC staff whether this would be an accurate statement. The Working Group agreed that if NAIC staff confirms that the suggested language is accurate, it would be added.

Mr. Murray said the next comment was in the third sentence of the fourth paragraph, questioning the language, “policy is generally the original amount of the loan.” Mr. Schlautman said Nebraska suggests that this is not a true statement. The day the policy is issued, the face amount of the policy will be that of the original amount of the loan. The Working Group discussed and agreed to remove “original” from the sentence.

© 2019 National Association of Insurance Commissioner
Mr. Murray said the next comment is within the fifth paragraph concerning the premiums advising that some states also set the rates. The Working Group discussed and agreed to avoid getting too specific with the language, and it would remain with no change.

Mr. Murray said the next comment is within the seventh paragraph, suggesting that some states also separately license escrow agents. The Working Group discussed and determined that no change would be necessary at this time.

Mr. Murray said the final comment from Nebraska is found in the last sentence of the last paragraph stating, “[i]n addition to state laws, rebates and referrals related to most residential real estate transactions are prohibited under the federal Real Estate Settlement Procedures Act (RESPA).” Mr. Schlautman said the suggestion is to also mention the TILA-RESPA Integrated Disclosure (TRID) Rule. The Working Group discussed and agreed that they would defer to NAIC staff on whether this should be added.

Mr. Murray said with the exception of Chapter 10 Surplus Lines Producer Licenses, this concludes the review of the Handbook, aside from and the verification from NAIC staff concerning chapter 29 and some minor outstanding issues that were originally discussed in the first five chapters that the Working Group determined should be applied somewhere else other than the Handbook.

Mr. Murray said the redline for the chapters have been posted on the webpage and that chapters 26–30 would be updated and posted as well. He said the next conference call scheduled for Oct. 24 and the Working Group will utilize that call to finalize any outstanding issues so it can potentially adopt them.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.
The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Sept. 26, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Matt Guy (FL); Lorelei Brillante (MD); Leslie Page (MI); Kevin Schlautman (NE); Karen Vourvopoulos (OH); Randy Overstreet (UT); and Richard Tozer (VA).

1. Reviewed the NAIC State Licensing Handbook

Mr. Murray said the Working Group last met Sept. 12 and finalized the review of Chapter 8 Testing Programs. He said that completes the review of chapters 1–15, excluding Chapter 10 Surplus Lines Producer Licenses since that discussion is on hold pending further discussion from the Producer Licensing (D) Task Force. He reminded everyone that emails have been sent out explaining the game plan to move forward with the review of the entire NAIC State Licensing Handbook (Handbook). He said to meet the Working Group’s Oct. 31 deadline, he has set up an aggressive comment and conference call schedule moving forward.

Mr. Murray said for the purposes of today’s conference call, the Working Group will start with reviewing chapters 16–20. He said the only comments were from California and the Securities and Insurance Licensing Association (SILA). He said the majority of the comments are on Chapter 18 Adjusters and one comment on Chapter 17 Post Licensing Producer Conduct Reviews.

Mr. Murray said the first comment is from California regarding chapter 17, page 65 found within the License Reinstatement or Reissuance After Disciplinary Action section in the first paragraph. He said the suggestion is to add the language, “reconsideration of the action taken on the license whether it be.” The Working Group discussed and agreed to the change. The new language now reads:

Reinstatement or reissuance of a license after disciplinary action usually is not automatic. A producer whose license has been revoked or suspended by order, or who forfeited a license in connection with a disciplinary matter, should be required to make a written request to the insurance commissioner for reconsideration of the action taken on the license whether it be reinstatement or reissuance in accordance with the terms of the order of revocation or suspension or the order accepting the forfeiture.

Mr. Murray said the next comment is from California regarding chapter 18, page 69 found within the second paragraph. He said California suggests changing three kinds of adjusters to “four” so as to include crop. The Working Group discussed and agreed that no change would be made, and the language would remain the same.

Mr. Murray said the next comment is from SILA regarding the same chapter on page 70 found within the Reciprocity section. He said the request is to reference the Public Adjuster Licensing Model Act’s (#228) definition for home state. Linda Brunette (SILA) said under the Reciprocity section within this chapter, there is a reference to Model #228’s definition, but this section does not include the definition of home state noted within the Independent Adjuster Licensing Guideline (#1224). She said SILA recommends adding this language:

“Home State” means the District of Columbia and any state or territory of the U.S. in which an Independent Adjuster maintains his or her principal place of residence or principal place of business and is licensed to act as an independent adjuster. If such a state does not issue an independent adjuster license for the line of business sought, the independent adjuster may designate as their “Home State” any state in which the independent adjuster qualifies pursuant to Section 6 of this Act.

Ms. Brunette said SILA would also recommend modifying the Best Practice for Regulators section to state: “Use the definition of ‘home state’ as defined in Model #228 and Guideline #1224 as the basis of reciprocity.” The Working Group discussed and agreed to the addition.
Mr. Murray said that the next comment from SILA is also on page 70 and concerning Model #228. He said in the Handbook it lists the title as the “New” NAIC Public Adjuster Model Act. SILA recommends that “new” be removed since this is no longer accurate. The Working Group discussed and agreed that “new” would be removed where appropriate.

Mr. Murray said the next comment from SILA on chapter 18 suggests that an inclusion and reference to the Independent Adjuster Reciprocity Best Practices and Guidelines under the Best Practices section be added to state, “use the Independent Adjuster Reciprocity Best Practices and Guidelines as the structure for license qualifications, continuing education (CE), and designated home state (DHS) requirements for nonresident licensing.” The Working Group discussed and agreed that this is already present in the Handbook. Ms. Brunette said SILA would withdraw the comment.

Mr. Murray said this completes the review of chapters 1–20 except for Chapter 10 Surplus Lines Producer Licenses, which is pending further discussion from Producer Licensing (D) Task Force. He said the remaining chapters are very short, and at this point, nothing has been received covering chapters 21–25. He said the deadline for these chapters has passed, unless there are any comments to bring forward to the Working Group. No comments were made, and Mr. Murray said chapters 21–25 would be considered completed as well.

Mr. Murray said there were a few areas that the Working Group agreed it would circle back on for additional discussion as the Working Group moves forward with its conference calls. He said one of those areas can be found in chapter 2, page 8 in the last paragraph under the Change of Home State section concerning the National Insurance Producer Registry (NIPR) launch of Contact Change Request (CCR). He said the Working Group deferred to NIPR to make suggested changes. He said Laurie Wolf (NIPR) submitted a suggestion that this language be eliminated. He said the fact that NIPR has not enhanced its CCR product to allow business entities the ability to change their addresses has no bearing on the Change of Home State language in this section and the need for the states to eliminate paper letters of clearance. Rather than provide language to incorporate the future state of NIPR’s CCR product, NIPR’s recommendation is to remove the last paragraph regarding the Change of Home State. Mr. Murray saidiker Group agreed to the deletion of this chapter.

Mr. Murray said Alaska, California, Rhode Island and Virginia reviewed the reciprocity examples found in chapter 4 on page 18. He said the group submitted revisions for examples A–F, and they have been posted on the Working Group webpage. He said the Working Group will be discussing this during its next conference call.

Mr. Murray said the deadline for chapters 26–30 will be Sept. 27, and at this point, there has been no comment submitted. He said the next call is scheduled for Oct. 10, and the Working Group will review chapters 26–30 in addition to any outstanding issues.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.
The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Sept. 12, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Matt Guy (FL); Lisa Tordjman (ID); Lorelei Brillante (MD); Leslie Page (MI); Karen Vourvopoulos (OH); Rachel Chester (RI); Larry Deiter (SD); Randy Overstreet (UT); Richard Tozer (VA); and Jeff Baughman (WA). Also participating was: Jeannie Keller (MT).

1. Reviewed the NAIC State Licensing Handbook

Mr. Murray said the Working Group’s last conference call was on Aug. 29, during which it finished up the review on chapters 11–15. He said that finalizes the review on chapters 1–15, excluding Chapter 8 Testing Exams and Chapter 10 Surplus Lines.

Mr. Murray said during the last conference call, it was decided that the Working Group would not be adopting the chapters as they are reviewed, but to wait until the review of all chapters has been completed. He said the deadline for this review has not changed and remains to be the end of October.

Mr. Murray said the Working Group has completed the review of all chapters in which comments have been received. During the last conference call, the Working Group did not discuss Chapter 8 Testing Exams since a representative from the American Council of Life Insurers (ACLI) could not be present. Mr. Murray said the ACLI submitted several comments on this chapter, and it will use today’s call to review and finalize any changes.

Mr. Murray said the first comment on chapter 8 can be found at the bottom of page 31. David Leifer (ACLI) stated that he would be speaking to the comments submitted by the ACLI. He said at the bottom of page 31, concerning the fourth item, he suggests adding the following language:

4. Depending on test volume, test performance, and the need for content changes, either an annual (or at least biannual) substantive review of the examination and the psychometric properties of the test items and the test, including:
   o These efforts should include The involvement of content or test development professionals, department personnel, and industry representatives, including recent, entry-level producers. Industry representatives should include a balanced mix of both recently licensed and more experienced producers.

Mr. Leifer said industry is asking the Working Group to adopt some broad criteria for reviews in order to bring uniformity to the process and ensure that these important events are executed in a meaningful manner that is consistent with the goals of maintaining fair, entry-level exams. He said industry is particularly interested in seeing the NAIC State Licensing Handbook (Handbook) include more language stressing the need to involve recently licensed producers in reviews and ensure that a system is in place to make sure all questions get reviewed over a reasonable course of time. This point is raised in an effort to address a situation we see in some states where reviews always begin with the Life & Health Bank and routinely run out of time before getting to the Life-only questions.

Ms. Vourvopoulos said she has concerns with a “balanced mix.” This would be difficult due to the availability of individuals. Mr. Tozer said Virginia would agree with this concern of having a “balance mix.” The Working Group discussed and agreed that the language would be accepted, excluding the word “balance.” The new language would now read:

4. Depending on test volume, test performance, and the need for content changes, either an annual (or at least biannual) substantive review of the examination and the psychometric properties of the test items and the test, including:
   o The involvement of content or test development professionals, department personnel, and industry representatives. Industry representatives should include a mix of both recently licensed and more experienced producers.
Mr. Murray said the next suggestion was to further add a bullet point to the same section reading:

- A determination by the assembled Subject Matter Experts (SMEs) of the difficulty level to be used for the test using proper psychometric procedures.

Ms. Chester said she would have concerns that this language would be beyond the scope of the state insurance regulators. She said the Working Group members are not psychometricians and should not add language to this section that would clearly be from a higher level of expertise than what the licensing directors on the call would possess. Ms. Keller said this suggestion would be adding new unnecessary language that gives a more detailed view, which goes beyond the scope of the Handbook.

Barb Gavitt (A.D. Banker) said these suggested comments are not pertaining to the difficulty of the individual questions, but rather the difficulty of the overall exam. She said there would be a difference from the individual questions and the exam as a whole. Mr. Murray said he would agree that there is more to the psychometricians formula that the state insurance regulators depend on for proper testing to take place.

Paula Sisneros (Pearson VUE) said she would agree that this does bring additional and unnecessary detail, which should actually be discussed and addressed outside of the review of the Handbook. She said she would encourage discussions outside of the Handbook discussion if the Working Group deemed them necessary.

Mr. Murray said he agrees that this should be set aside until further discussion is warranted. The Working Group discussed and agreed that no change would be made for this bulletin point.

Ms. Sisneros said she would echo her comments for the remaining suggestions from the ACLI. Ms. Chester and Ms. Vourvopoulos said they would agree.

The Working Group discussed and agreed that all remaining suggested changes on this section would not be accepted; however, further discussions outside of the Handbook review may be warranted to determine further issues that might be present.

Mr. Murray said the final comment from the ACLI can be found at the bottom of the chapter within the Producer Exam Content and Testing Administration Recommended Best Practices for Insurance Regulators. Mr. Murray said the suggestion is to the sixth bullet point to add “rate” to the second sentence of this bullet point. The Working Group discussed and agreed with adding language. The new language would read:

- At least annually, reports regarding exam pass rates, candidate demographics when collected, and number of exams administered should be made available to the public. Reports should include first-time pass rate, success rate and average scoring by subject area. Whenever possible, the reports should be available by education provider and provided to them.

Mr. Murray said this would conclude the discussion concerning Chapter 8 Testing Exams. He said the review of Chapter 10 Surplus Lines will remain on hold pending the discussion by the Producer Licensing (D) Task Force. He said the deadline for chapters 16–20 ended Aug. 30 and chapters 21–25 will end tomorrow, Sept. 13. He said the next conference call is scheduled for Sept. 26 and the goal will be to start reviewing chapters 16–25. He said at this point, the Working Group has only received two comments on chapter 18; however, since these comments were recently received, they have not been exposed long enough to discuss at this time. He said the deadlines for chapters 26–30 will be Sept. 27. He said the Working Group will have three remaining calls to finalize the review, Oct. 10, Oct. 24 and Oct. 30.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.
The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Aug. 29, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Matt Guy (FL); Lisa Tordjman (ID); Lorelei Brillante (MD); Leslie Page (MI); Karen Vourvopoulos (OH); Rachel Chester (RI); Larry Deiter (SD); Randy Overstreet (UT); Richard Tozer (VA); and Jeff Baughman (WA).

1. Reviewed the NAIC State Licensing Handbook

Mr. Murray said the purpose of this conference call is to continue on with discussions that ended during its Aug. 21 conference call. He reminded everyone that emails have been sent out explaining the plan to move forward with the review of the entire NAIC State Licensing Handbook (Handbook). He said the review would consist of five chapters at a time. He said to meet the Working Group’s Oct. 31 deadline, he has set up an aggressive comment and conference call schedule moving forward.

Mr. Murray said during the last conference call, the Working Group finalized the review of chapters 1–5 and began reviewing chapters 6–10. He said several comments were received from the American Council of Life Insurers (ACLI) concerning chapter 8; however, he has confirmed that a representative from the ACLI would not be able to attend today’s conference call, so he will push off this discussion until the next conference call. He said chapter 10 concerning surplus lines would also be skipped during today’s discussion and potentially even further since the Working Group is awaiting further discussion by the Producer Licensing (D) Task Force on adopting amendments to the Uniform Licensing Standards (ULS) for surplus lines. He said since the review of these two chapters is going to be put on hold, the decision was to be that the Working Group would continue to review the remaining chapters and then circle back to chapters 8 and 10 when appropriate, then a final adoption of the entire Handbook would be made once all the chapters have been reviewed, instead of adopting as each chapter is reviewed.

Mr. Murray said moving forward with the next step is to review chapters 11–15. He said the Working Group only received comments from California, Virginia, and the Securities and Insurance Licensing Association (SILA) concerning these chapters.

Mr. Murray said the first comment was from Virginia on chapter 11, page 51 found in the first paragraph. He said Virginia stated that there is a debate among the states on whether National Association of Registered Agents and Brokers (NARAB) membership would eliminate appointments for nonresidents. NARAB’s goal is to be revenue neutral for the states. The Working Group discussed and agreed that no change would be made.

Mr. Murray said California submitted a comment on chapter 12, page 53. Before the last two paragraphs on the page it states:

The PLMA does require that all producers, including BEs, notify the insurance commissioner prior to using an assumed name. Section 10 of the PLMA states:

An insurance producer doing business under any name other than the producer’s legal name is required to notify the insurance commissioner prior to using the assumed name.

Ms. Ferguson said California submitted the comment to verify whether the intent was to not only notify the commissioner, but also for the commissioner to have the authority to accept or reject it. The Working Group discussed and agreed that there is no reason to add further clarification.

Mr. Murray said the next comment was from SILA concerning chapter 12, page 53 towards the bottom of page found in the second to last paragraph. He said SILA’s comment states that it does not recall that a recent assessment of all state insurance departments licensing units has occurred to determine compliance with state uniformity requirements, so it would suggest removal of the word “recent.” However, SILA strongly agrees with the last sentence. The Working Group discussed and agreed that “recent” be changed to “prior.”

Mr. Murray said the next comment was from California on chapter 14, page 59 found in the second paragraph suggesting that “annuity” be added to the sentence “A specific CE standard, which is derived from federal mandates, may be imposed on nonresidents such as for long-term care insurance (LTCI), annuity, flood or crop insurance and would not violate the ULS.”
The Working Group discussed and agreed that following “long-term care insurance (LTCI),” the word “annuity” would be added.

Mr. Murray said California submitted a comment on chapter 14, page 59 within the third paragraph adding language to clarify that for a contact course, each state is to use its own method to award credit for self-study courses. The Working Group discussed and agreed to change this paragraph to now read:

Under the ULS, producers are to complete 24 credits of CE for each biennial compliance period. Three of the 24 credits must be in ethics.

Calculation of one credit hour of continuing education (CE) should be based on the NAIC Guidelines for CE. If applicable, the CE compliance period should coincide with the license renewal. The ULS indicate that the license term should be tied to the birth date or birth month.

Mr. Murray said the next comment from California on chapter 14, page 60 was within the second paragraph. Ms. Ferguson said California would like to verify what level of quality check is required. The Working Group discussed and agreed that no change would be made.

Mr. Murray said that completes the review of chapters 11–15. He said the deadline for comments on chapters 16–20 will be Aug. 30. He said the next conference call will be on Sept. 12.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.
Attachment Seven
Producer Licensing (D) Task Force
12/7/19

Draft: 11/5/19

Producer Licensing Uniformity (D) Working Group
Conference Call
August 21, 2019

The Producer Licensing Uniformity (D) Working Group of the Producer Licensing (D) Task Force met via conference call Aug. 21, 2019. The following Working Group members participated: Chris Murray, Chair (AK); Melissa Grisham (AR); Charlene Ferguson (CA); Matt Tamplin (FL); Leslie Page (MI); Karen Vourvopoulos (OH); Larry Deiter (SD); Randy Overstreet (UT); Richard Tozer (VA); Jeff Baughman (WA); and Melody Esquivel (WI). Also participating was: Greg Nelson (ND).

1. Reviewed the Handbook

Mr. Murray said the purpose of this conference call is to continue the review of the State Licensing Handbook (Handbook).

Mr. Murray said the review would consist of five chapters at a time. Mr. Murray said to meet the Working Group’s Oct. 31 deadline, he has set up an aggressive comment and conference call schedule moving forward.

Mr. Murray said to continue on with the review from the last conference call, the Working Group will begin with Chapter 2. He said Oregon submitted a question to clarify language pertaining to Chapter 2 that addresses Section 9 of the Producer Licensing Model Act (#218). Mr. Murray said Oregon also submitted a comment concerning the Producer Licensing Database (PDB) and State Producer Licensing Database (SPLD). Mr. Murray said a representative from Oregon is not on the conference call but would accept any discussion on their suggestions. The Working Group had no discussion on these comments.

Mr. Murray said the next comment is from South Carolina. Mr. Murray said the comment was a question concerning the following statement in the Handbook: “Some states still require the producer to provide a letter of clearance from the former state before the new state will grant the producer an active resident status.” South Carolina inquired whether this is still true. The Working Group discussed and agreed that some states require a letter of clearance, and no change was made.

Mr. Murray said Virginia submitted a comment pertaining to the same topic suggesting language be added stating: “despite the fact that all states have access to the PDB.” Mr. Tozer stated Virginia removed that comment.

Mr. Murray said the next comment from Virginia is in regard to the Reciprocity section addressing the National Insurance Producer Registry’s (NIPR) launch of the Contact Change Request (CCR). Mr. Tozer said Virginia suggested adding “individual” after “service allows.” Mr. Tozer said Virginia also recommends changing the current language reading “once all states” have fully implemented the CCR service. Mr. Tozer said all states have fully implemented the CCR service. Laurie Wolf (NIPR) said that NIPR can review the language and provide edits to reflect the appropriate changes. The Working Group discussed and agreed.

Mr. Murray said the next comment from Virginia concerns Chapter 2, page 10 under Section 16: Reciprocity. Mr. Murray said the suggestion is to add language to the second bullet point so that it mirrors the language found in Model #218. The new language would read: “A nonresident producer’s satisfaction of his or her home state’s continuing education requirements for licensed insurance producers shall constitute satisfaction of this state’s continuing education requirements if the non-resident producer’s home state recognizes the satisfaction of its continuing education requirements imposed upon producers from this state on the same basis”.” The Working Group discussed and agreed to add the language.

Mr. Murray said the next few comments from Virginia concern Chapter 2 under the PLMA Implementation FAQ. The first is on Question 1. Mr. Tozer stated that Virginia would like to remove that suggestion. Mr. Tozer said the second comment concerns Question 2. The Working Group discussed and agreed no change would be made.

Mr. Murray said the next comment is on Chapter 4 from California. He said the suggestion is at the beginning of Chapter 4 under the four key components to licensing reciprocity. The suggestion is to add language to the fourth key component so that it would now read: “Reciprocity with Other States.” The Working Group discussed and agreed to make the change and to apply this throughout the chapter in other places were appropriate.

Mr. Murray said California submitted comments concerning the reciprocity examples found in Chapter 4. The Working Group discussed the examples and agreed to further review and provide new language to give further clarification.

© 2019 National Association of Insurance Commissioners
Mr. Murray said the next comment is on Chapter 4, page 18 requesting that the section on Limitations on Nonresident spell out U.S. as United States. The Working Group discussed and agreed with the change.

Mr. Murray said the next comment is from Virginia on Chapter 5, page 23 under the Commissions section. He said Virginia suggests adding language to stay consistent with Model #218 and adding a caveat that reads: “unless the payment would violate a state’s anti-rebating statues.” The Working Group discussed and agreed.

Mr. Murray said Virginia also suggests adding a language from the Model #218 language within the Exceptions to Licensing section specifically to the summary of types of persons and entities that are exempted from licensing. The new language would read:

1. An officer, director or employee of an insurer or insurance producer, provided that the officer, director or employee does not receive any commission on policies written or sold to insure risks residing, located or to be performed in the state.
2. A person who secures and furnishes information for, or enrolls individuals in, group life insurance, group P/C insurance, group annuities or group, or blanket accident and health insurance; where no commission is paid to the person for the service.
3. An employer or association; its officers, directors, employees; or the trustees of an employee trust plan; not in any manner compensated, directly or indirectly, by the company issuing the contracts.
4. Employees of insurers or organizations employed by insurers who are engaging in the inspection, rating or classification of risks.
5. A person whose activities in a state are limited to advertising without the intent to solicit insurance in that state.
6. A person who is not a resident of a state who sells, solicits or negotiates a contract of insurance for commercial P/C risks to an insured with risks located in more than one state insured under that contract.
7. A salaried, full-time employee who counsels or advises the employer relative to the insurance interests of the employer who does not receive commission.

Mr. Murray said that concludes the review on Chapters 1–5. He said since the decision was made to further discuss a few areas, the Working Group will hold off adopting Chapters 1–5 until the additional discussion has been completed.

Mr. Murray said moving forward with the Handbook review, the Working Group will start looking at Chapters 6–10. He said the first comment is from California on Chapter 6, page 25, third paragraph. Mr. Murray said since this section covers continuing education (CE), he would like to discuss with Rachel Chester, Uniform Education (D) Working Group chair, before making a final decision.

Mr. Murray said the next comment from Michigan concerns Chapter 8, page 32 under the PLMA Guidelines on Examination section, in the first paragraph. He said Michigan suggests adding language regarding the use of the PDB. The Working Group discussed and agreed no change would be made.

Mr. Murray said the next comment is also from Michigan on Chapter 8 at the bottom of page 34 concerning the professional test vendor, specifically the first step—“Conducting a committee-based job analysis”—and whether this is preferred over survey-based. The Working Group discussed, and no change was made.

Mr. Murray said California submitted a comment on Chapter 7 under the Fingerprinting section suggesting 1033 waiver guidelines be added to this section. The Working Group discussed and agreed that a link would be provided to Authorization for Criminal History Record Check Model Act (#222).

Mr. Murray said the next comment is from Michigan concerning Chapter 9, page 43 under the CE last sentence stating, “Under federal law, insurance producers selling MPCI are required to attend CE classes each year.” He said the questions is whether this is tracked or monitored by the federal government. There was no discussion by the Working Group.

Mr. Murray said that completes the review on Chapters 1–9. He said, however, the review of chapter 10 will be on hold pending further discussion by the Producer Licensing (D) Task Force on adopting amendments to the Uniform Licensing Standards (ULS) for surplus lines.

Mr. Murray said the redline for Chapters 1–9 would be posted on the Working Group’s web page for review. He said the
deadline for comments on Chapters 11–15 is Aug. 23 and to date, the Working Group has not received any comments. Mr. Murray said depending on what is received, the Working Group will begin discussing Chapter 11 during the Working Group’s next conference call, which is scheduled for Aug. 29.

Having no further business, the Producer Licensing Uniformity (D) Working Group adjourned.

W:\National Meetings\2019\Fall\TF\PLTF\Working Groups\PLUWG\Conference Calls\Minutes\8.21.19 PLUWGmin.docx
The Uniform Education (D) Working Group of the Producer Licensing (D) Task Force met via conference call Oct. 31, 2019. The following Working Group members participated: Rachel Chester, Chair (RI); Mike Beavers, Vice Chair (VA); Katie Damian (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Gene June and Matt Guy (FL); Lorelei Brillante (MD).

1. **Adopted the 2019 CER Agreement**

Ms. Chester said the Working Group has reviewed all comments submitted concerning the draft 2019 Continuing Education Reciprocity (CER) Agreement and made revisions as agreed upon by the Working Group. Ms. Chester said the updated version has been exposed for over several months and is considered complete except for one minor change. Ms. Chester said under “The Commissioners agree as follows:” section number 5(d) the Working Group agreed to add “ethics” to the list of items that are acceptable subject matter. Ms. Chester said the language would not read:

   d. Credits will only be awarded for courses whose subject matter will increase technical knowledge of insurance principles, coverages, ethics, laws or regulations and will not be awarded for topics such as personal improvement, motivation, time management, supportive office skills or other matters not related to technical insurance knowledge. If any credits are awarded for sales and/or marketing those credits will be separately noted on the course approval document. Credits for sales and/or marketing will only be awarded in States that are permitted by law or regulation to accept credit for those topics. Additional guidance can be found in the NAIC’s Recommended Approved/Not Approved Course Topics (APPENDIX C).

Mr. Beavers made a motion, seconded by Mr. Murray, to adopt the 2019 CER Agreement (*see NAIC Proceedings – Fall 2019, Market Regulation and Consumer Affairs (D) Committee, Attachment Five*). The motion passed unanimously.

Having no further business, the Uniform Education (D) Working Group adjourned.
Uniform Education (D) Working Group
Conference Call
August 22, 2019

The Uniform Education (D) Working Group of the Producer Licensing (D) Task Force met via conference call Aug. 22, 2019. The following Working Group members participated: Rachel Chester, Chair (RI); Mike Beavers, Vice Chair (VA); Katie Damian (AK); Peggy Dunlap (AR); Charlene Ferguson (CA); Gene June and Matt Guy (FL); and Lorelei Brillante (MD).

1. Discussed the CER Agreement

Ms. Chester said that during the Working Group’s last conference call on May 15, the recent draft version of the 2019 Continuing Education Reciprocity (CER) Agreement was distributed to the Working Group for review and comment. She said the Working Group previously reviewed comments from Washington and the Securities & Insurance Licensing Association (SILA). She said the Working Group also received comments from Florida, which it will be reviewing today.

Ms. Chester said Florida’s first comment was on page 1 of the draft 2019 CER Agreement pertaining to, “provider has procedures for reviewing course material in order to keep it up to date and timely.” She said Florida feels that it seems to be something more appropriate for a provider approval application vs. a course approval application. Wondering how other states will confirm/address this part of the substantive review. Mr. Gene said Florida does not want the providers to have to send some kind of procedure they have with each course submittal. Mr. June said Florida is questioning if it could either be removed or put in the instructions as some type of “understanding.” In Florida, keeping a course updated is a requirement in the Administrative Rule, but they are not asked to show how they plan to do it. Mr. June said Florida would like an example that would be substantive changes to a course requiring a new course submittal. The Working Group discussed and determined that each state has the duty to review the outlines they have in place for course approval and work with their provider to ensure that these state business rules and requirements are in place.

Ms. Chester said Florida’s second comment was on page 1 pertaining to, “[a] reciprocal State agrees to approve a course submission within 30 days of receipt, provided that the course is filed using the NAIC Uniform CER Course Filing Form (Exhibit A) or an equivalent electronic submission method and contains a home state course approval.” She said Florida advised that this seems to limit the documentation that a reciprocal state can ask for when a course application is submitted using the CER form. She said that Florida has a robust auditing program for education courses. When it comes time to audit one of these courses, which could be two months after approval or two years after approval, the auditor needs most all documentation related to the course. Ms. Chester said Florida would like to confirm that their two options are: 1) ask for the course documentation prior to an audit; or 2) ask for the course documentation during the course submission process, but not use it as part of the approval (the preferred option). The Working Group discussed and confirmed that the CER Form instructions require that details be submitted including an outline for course details to the home state. Ms. Chester said since this is listed in the CER Form and not listed in the CER Agreement, duplication should be avoided. Mr. June said Florida’s concern would be that the submission of course documentation is sent to the home state; however, if Florida wants to audit a non-resident state course, they would not have the course documentation. The Working Group discussed and confirmed with Florida that if they are conducting an audit, they can request documentation from the course provider at that time. Mr. June said that would satisfy Florida’s concerns.

Ms. Chester said Florida’s third comment was on page 2 pertaining to, “[e]ach State agrees that it will notify other States when a CE provider or instructor has been the subject of a formal administrative action or other disciplinary action by that State.” She said Florida’s concerns are that it does not sound like there is currently an electronic/efficient mechanism for doing this, but until one is developed, the states would work together to notify one another via a more manual process. The Working Group discussed using the NAIC Producer Licensing Bulletin Board or other distribution method to assist with distributing an action taken on a continuing education (CE) provider or instructor. Ms. Chester said she would discuss with NAIC staff viewing other potential options, including the bulletin board for distributing these actions amongst the states.

Having no further business, the Uniform Education (D) Working Group adjourned.

Process for Evaluating Qualified and Reciprocal Jurisdictions, Oct. 22, 2019, Draft (Attachment Nine) .... 10-204
The Financial Condition (E) Committee met in Austin, TX, Dec. 9, 2019. The following Committee members participated: David Altmaier, Chair (FL); Kent Sullivan, Vice Chair, and Jamie Walker (TX); Michael Conway represented by Rolf Kaumann (CO); Robert H. Muriel and Kevin Fry (IL); Eric A. Cioppa and Vanessa Sullivan (ME); Steve Kelley and Kathleen Or th (MN); Chlora Lindley-Myers and John Rehagen (MO); Matthew Rosendale represented by Steve Matthews (MT); Marlene Caride (NJ); Glen Mulready represented by Eli Snowbarger (OK); Raymond G. Farmer represented by Lee Hill (SC); James A. Dodrill represented by Justin Parr (WV); and Jeff Rude (WY).

1. **Adopted its Oct. 31, Aug. 29 and Summer National Meeting Minutes**

The Committee met Oct. 31, Aug. 29 and Aug. 5. During its Oct. 31 meeting, the Committee took the following action: 1) adopted its 2020 proposed charges; 2) adopted a Request for NAIC Model Law Development related to the group capital calculation (GCC); and 3) adopted revisions to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556). During its Aug. 29 meeting, the Committee adopted proposed changes to the Annual Statement Instructions – Property/Casualty specifically related to the actuarial opinion, including, among other things, the definition of “qualified actuary.”

Commissioner Sullivan made a motion, seconded by Ms. Orth, to adopt the Committee’s Oct. 31 (Attachment One) Aug. 29 (Attachment Two) and Aug. 5 (see NAIC Proceedings – Summer 2019, Financial Condition (E) Committee) minutes. The motion passed unanimously.

2. **Adopted the Reports of its Task Forces and Working Groups**

Commissioner Altmaier stated that items adopted within the Committee’s task force and working group reports that are considered technical, noncontroversial and not significant by NAIC standards—i.e., they do not include model laws, model regulations, model guidelines or items considered to be controversial—will be considered for adoption by the Executive (EX) Committee and Plenary through the Financial Condition (E) Committee’s technical changes report process. Pursuant to this process, which was adopted by the NAIC in 2009, a listing of the various technical changes will be sent to NAIC members shortly after completion of the Fall National Meeting, and the members will have 10 days to comment with respect to those items. If no objections are received with respect to an item, the technical changes will be considered adopted by the NAIC membership and effective immediately.

Commissioner Lindley-Myers made a motion, seconded by Commissioner Caride, to adopt the following task force and working group reports: Accounting Practices and Procedures (E) Task Force; Capital Adequacy (E) Task Force; Examination Oversight (E) Task Force; Receivership and Insolvency (E) Task Force; Reinsurance (E) Task Force; Risk Retention Group (E) Task Force; Valuation of Securities (E) Task Force; Group Capital Calculation (E) Working Group (Attachment Three); Mortgage Guaranty Insurance (E) Working Group (Attachment Four); National Treatment and Coordination (E) Working Group (Attachment Five); Restructuring Mechanisms (E) Working Group (Attachment Six); and Group Solvency Issues (E) Working Group (Attachment Seven). The motion passed unanimously.

The Financial Analysis (E) Working Group met Oct. 28 and Oct. 7 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss letter responses related to second-quarter 2019 financial results. Additionally, the Valuation Analysis (E) Working Group met Nov. 25 and Nov. 15 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss valuation items related to specific companies.

3. **Adopted the 2019 Examiners’ Suggested Salary Rate**

Commissioner Altmaier reminded the Committee members that each year, NAIC staff provide an average recommended increase for examiners’ salaries based on the consumer price index (CPI) for the prior year ending July 31. Commissioner Altmaier emphasized that in order to avoid negative impact to any states, the base compensation on the current salary and per diem guidelines, NAIC staff have continued to maintain the existing Financial Condition Examiners Handbook guidance on compensation, which is being updated via this memorandum. NAIC staff also recommend that the Risk-Focused
Surveillance (E) Working Group assume the responsibility to oversee development of updates to all compensation-related
guidance.

Commissioner Caride made a motion, seconded by Commissioner Lindley-Myers, to adopt the 2020 examiners’ suggested
salary rate (Attachment Eight). The motion passed unanimously

4. Adopted Revisions to the Process for Evaluating Qualified and Reciprocal Jurisdictions

Mr. Rehagen reminded members of the Committee that the NAIC originally adopted this process now being considered for
modification in 2013 as a method of evaluating the reinsurance supervisory systems of non-U.S. jurisdictions. He stated the
purpose was for developing and maintaining a list of jurisdictions for recognition by the states as qualified jurisdictions for
reinsurance collateral reduction purposes. He described how the process worked well over the years, and noted the NAIC
currently has seven qualified jurisdictions: Bermuda; France; Germany; Ireland; Japan; Switzerland; and the United Kingdom
(UK). He stated the expectation is that the NAIC Executive (EX) Committee and Plenary will approve the re-evaluations of
these seven qualified jurisdictions upon the completion of their initial five-year periods, effective for Jan. 1, 2020, during its
Dec. 10 meeting.

Mr. Rehagen noted that given the NAIC membership’s adopted revisions to the Credit for Reinsurance Model Law (#785) and
the Credit for Reinsurance Model Regulation (#786) in June, the proposed revisions for the process conform the models to the
reinsurance collateral elimination provisions of the “Bilateral Agreement Between the United States of America and the
European Union on Prudential Measures Regarding Insurance and Reinsurance” and the “Bilateral Agreement Between the
United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (Covered
Agreements). In addition, not only are jurisdictions that are subject to Covered Agreements treated as reciprocal jurisdictions
for reinsurance collateral purposes, but other qualified jurisdictions can also qualify for collateral elimination as reciprocal
jurisdictions. States that meet the requirements of the NAIC Financial Regulation Standards and Accreditation Program are
also considered to be reciprocal jurisdictions.

Mr. Rehagen reported that the Reinsurance (E) Task Force amended the process to reflect the revisions to Model #785 and
Model #786 and to add a new section on the review of qualified jurisdictions as reciprocal jurisdictions. In addition, the
Task Force added several improvements with respect to the evaluation of qualified jurisdictions, most important being the
elimination of the five-year re-evaluation requirement. He stated that, as revised, qualified jurisdictions and reciprocal
jurisdictions will remain on the lists until such time that there is a reason identified to remove them from the lists. He stated the
evaluations of Bermuda, Japan and Switzerland as reciprocal jurisdictions under this revised process will be considered by the
Executive (EX) Committee and Plenary during their Dec. 10 meeting, but this Committee needs to first approve the documented
modified process.

Mr. Rehagen made a motion, seconded by Superintendent Cioppa, to adopt the revised process for evaluating qualified and
reciprocal jurisdictions (Attachment Nine).

Having no further business, the Financial Condition (E) Committee adjourned.
The Financial Condition (E) Committee met via conference call Oct. 31, 2019. The following Committee members participated:

David Altmaier, Chair (FL); Kent Sullivan, Vice Chair, represented by Doug Slape, Jamie Walker and James Kennedy (TX); Ricardo Lara represented by Susan Bernard and Kim Hudson (CA); Michael Conway represented by Rolf Kaumann (CO); Robert H. Muriel represented by Susan Berry (IL); Chlora Lindley-Myers represented by John Rehagen (MO); Eric A. Cioppa represented by Vanessa Sullivan (ME); Mike Chaney represented by Chad Bridges (MS); Marlene Caride and Diana Sherman (NJ); Glen Mulready represented by Joel Sander (OK); Raymond G. Farmer represented by Lee Hill (SC); James A. Dodrill represented by Jamie Taylor (WV); and Jeff Rude represented by Linda Johnson (WY).

1. Adopted its 2020 Proposed Charges

Commissioner Altmaier stated that proposed charges had previously been shared and now incorporate final charges from task forces reporting to the Committee.

Mr. Kaumann made a motion, seconded by Commissioner Caride, to adopt its 2020 proposed charges (Attachment One-A). The motion passed unanimously.

2. Adopted a Request for NAIC Model Law Development

Commissioner Altmaier discussed that the Group Capital Calculation (E) Working Group recently adopted a Request for NAIC Model Law Development that requests the authority to make changes to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) to add important confidentiality requirements to a group capital calculation (GCC) filing. He emphasized that the request seeks authority only to require such filing and hold it confidential but does not include any level of regulatory intervention as a result of the filing. He noted that technical changes would be contemplated as the confidentiality language is developed, but first it must seek the approval of the Committee and the Executive (EX) Committee. He noted that the Working Group will work with the Group Solvency Issues (E) Working Group to complete the task if approved.

Mr. Slape made a motion, seconded by Ms. Berry, to adopt the Request for NAIC Model Law Development (Attachment One-B). The motion passed unanimously.

3. Adopted a Guideline for Stay on Termination of Netting Agreements and QFCs

Mr. Kennedy said that the Receivership and Insolvency (E) Task Force drafted amendments to the NAIC’s Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556). He stated that Guideline #1556 was originally adopted in 2013 to provide a temporary stay on qualified financial contracts (QFCs). He stated that currently Section 711 of the Insurer Receivership Model Act (#555) does not allow any type of a stay when a company is placed into receivership. He stated that in 2017, the Board of Governors of the Federal Reserve System (Federal Reserve), the Federal Deposit Insurance Corporation (FDIC) and the Office of the Comptroller of the Currency (OCC) each adopted final rules regarding financial contracts, including a definition of a master netting agreement. This definition recognizes the stay under federal rules but does not recognize stays under state receivership laws. This created a conflict with the current guideline. On Dec. 2, 2017, the Receivership and Insolvency (E) Task Force received a referral from the Financial Stability (EX) Task Force to evaluate whether there are any current misalignments between federal and state laws that could be an obstacle to achieving effective and orderly recovery and resolutions for U.S. insurance groups. To address the conflict with the federal rule, the drafting group proposed amendments to the drafting note of Guideline #1556 explaining the issue.

Mr. Kennedy made a motion, seconded by Mr. Rehagen, to adopt the revised Guideline #1556 (Attachment One-C). The motion passed unanimously.

Having no further business, the Financial Condition (E) Committee adjourned.
The mission of the Financial Condition (E) Committee is to be the central forum and coordinator of solvency-related considerations of the NAIC relating to accounting practices and procedures; blanks; valuation of securities; financial analysis and solvency; multistate examinations and examiner and analysis training; and issues concerning insurer insolvencies and insolvency guarantees. In addition, the Committee interacts with the technical task forces.

Ongoing Support of NAIC Programs, Products or Services

1. The Financial Condition (E) Committee will:
   B. Appoint and oversee the activities of the following: Accounting Practices and Procedures (E) Task Force; Capital Adequacy (E) Task Force; Examination Oversight (E) Task Force; Long-Term Care Insurance (B/E) Task Force; Receivership and Insolvency (E) Task Force; Reinsurance (E) Task Force; Risk Retention Group (E) Task Force; and Valuation of Securities (E) Task Force.
   C. Recommend salary rate adjustments for examiners.
   D. Oversee a process to address financial issues that may compromise the consistency and uniformity of the U.S. solvency framework, referring valuation and other issues to the appropriate committees as needed.
   E. Use the Risk-Focused Surveillance (E) Working Group to address specific industry concerns regarding regulatory redundancy and review any issues industry subsequently escalates to the Committee.

2. The Financial Analysis (E) Working Group will:
   A. Analyze nationally significant insurers and groups that exhibit characteristics of trending toward or being financially troubled; determine if appropriate action is being taken.
   B. Interact with domiciliary regulators and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods and action(s).
   C. Support, encourage, promote and coordinate multistate efforts in addressing solvency problems, including identifying adverse industry trends.
   D. Increase information-sharing and coordination between state regulators and federal authorities, including through representation of state regulators in national bodies with responsibilities for system-wide oversight.

3. The Group Capital Calculation (E) Working Group will:
   A. Construct a U.S. group capital calculation (GCC) using a RBC aggregation methodology. Complete by the 2020 Summer National Meeting. Liaise as necessary with the ComFrame Development and Analysis (G) Working Group on international capital developments and consider group capital developments by the Federal Reserve Board, both of which may help inform the construction of a U.S. group capital calculation.
   B. Provide direction to the Group Solvency Issues (E) Working Group on appropriate changes to existing authority or existing regulatory guidance related to the GCC. Complete by the 2020 Fall National Meeting.
   C. Liaise, as necessary, with the International Insurance Relations (G) Committee on international group capital developments and consider input from participation of U.S. state insurance regulators in the International Association of Insurance Supervisors (IAIS) monitoring process.
   D. Continually review and monitor the effectiveness of the GCC and consider revisions, as necessary, to maintain the effectiveness of its objective under U.S. solvency system.

4. The Group Solvency Issues (E) Working Group will:
   A. Continue to develop potential enhancements to the current regulatory solvency system as it relates to group- solvency-related issues.
B. Critically review and provide input and drafting to the International Association of Insurance Supervisors (IAIS), Insurance Groups Working Group or on other IAIS material dealing with group supervision issues.

C. Continually review and monitor the effectiveness of the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) and consider revisions as necessary to maintain effective oversight of insurance groups.

C-D. Assess the IAIS Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) and make recommendations on its implementation in a manner appropriate for the U.S.

5. The ORSA Implementation (E) Subgroup of the Group Solvency Issues (E) Working Group will:
   A. Continue to provide and enhance an enterprise risk management (ERM) education program for regulators in support of the Own Risk and Solvency Assessment (ORSA) implementation.
   B. Continually review and monitor the effectiveness of the Risk Management and Own Risk and Solvency Assessment Model Act (#505) and its corresponding NAIC Own Risk and Solvency Assessment (ORSA) Guidance Manual; consider revisions as necessary.

6. The Mortgage Guaranty Insurance (E) Working Group will:
   A. Develop changes to the Mortgage Guaranty Insurance Model Act (#630) and other areas of the solvency regulation of mortgage guaranty insurers, including, but not limited to, revisions to Statement of Statutory Accounting Principles (SSAP) No. 58—Mortgage Guaranty Insurance and develop an extensive mortgage guaranty supplemental filing. Oversee the work of the consultant on the testing and finalization of proposed risk-based mortgage guaranty capital model and finalize Model #630 by the 2019 SpringSummer National Meeting.

7. The NAIC/AICPA (E) Working Group will:
   A. Continually review the Annual Financial Reporting Model Regulation (#205) and its corresponding implementation guide; revise as appropriate.
   B. Address financial solvency issues by working with the American Institute of Certified Public Accountants (AICPA) and responding to AICPA exposure drafts.
   C. Monitor the federal Sarbanes-Oxley Act, as well as rules and regulations promulgated by the U.S. Securities and Exchange Commission (SEC), the Public Company Accounting Oversight Board (PCAOB) and other financial services regulatory entities.
   D. Review annually the premium threshold amount included in Section 16 of Model #205, with the general intent that those insurers subject to the Section 16 requirements would capture at least approximately 90% of industry premium and/or in response to any future regulatory or market developments.

8. The National Treatment and Coordination (E) Working Group will:
   A. Increase utilization and implementation of the Company Licensing Best Practices Handbook.
   B. Encourage synergies between corporate changes/amendments and rate and form filing review and approval to improve efficiency.
   C. Continue to monitor the usage and make necessary enhancements to the Form A Database.
   D. Maintain educational courses in the existing NAIC Insurance Regulator Professional Designation Program for company licensing regulators.

9. The Biographical Third-Party Review (E) Subgroup of the National Treatment and Coordination (E) Working Group will:
   A. Increase the uniformity of the third-party vendors that prepare background investigative reports to those state insurance departments that require them. Reduce the inefficiency of applications by developing procedures and approval processes.
   B. Monitor the ongoing adherence of background investigation reports and third-party vendors.
   C. Encourage uniformity of requirements in relation to individuals’ fitness and propriety and the company’s responsibility in notifying state insurance departments of concerns or changes to key individuals.

10. The Restructuring Mechanisms (E) Working Group will:
    A. Evaluate and prepare a White Paper that:
        1. Addresses the perceived need for restructuring statutes and the issues those statutes are designed to remedy.
        Also, consider alternatives that insurers are currently employing to achieve similar results.
2. Summarizes the existing state restructuring statutes.
3. Addresses the legal issues posed by an Order of a Court (or approval by an Insurance Department) in one state affecting the policyholders of other states.

**FINANCIAL CONDITION (E) COMMITTEE (continued)**

4. Considers the impact that a restructuring might have on Guaranty Associations and policyholders that had Guaranty Fund protection prior to the restructuring. Complete by the 2020 Summer National Meeting.
   B. Identifies and addresses the legal issues associated with restructuring using a protected cell. Complete by the 2020 Summer National Meeting.
   B.C. Consider requesting approval from the Executive (EX) Committee on developing changes to specific NAIC models as a result of findings from the development of the White Paper. Complete by the 2020 Fall National Meeting.
   Review and propose changes to the Guaranty Association Model Act to ensure that policyholders that had guaranty fund protection prior to a restructuring continue to have it after the restructuring.
   Review and propose changes to the Protected Cell Companies Model Act to allow for restructuring mechanisms.
   Develop financial solvency and reporting requirements for companies in runoff (create subgroup of qualified financial regulators to address this charge).

11. The Restructuring Mechanisms (E) Subgroup will:
   A. Develop best practices to be used in considering the approval of proposed restructuring transactions, including among other things, the expected level of reserves and capital expected after the transfer along with the adequacy of long-term liquidity needs, and also develop best practices to be used in monitoring the companies after the transaction is completed. Once completed, recommend to the Financial Regulation Standards and Accreditation (F) Committee for their consideration. Complete by the 2020 Summer National Meeting.
   Consider the development of financial surveillance tools that are specifically designed for companies in runoff (companies that are no longer actively writing insurance business or collecting premiums).
   B. Consider the need to make changes to the RBC formula to better assess the minimum surplus requirements for companies in runoff. Complete by the 2020 Fall National Meeting.
   C. Review the various restructuring mechanisms and develop, if deemed needed, protected cell accounting and reporting requirements for referring to the Statutory Accounting Principles (E) Working Group. Complete by the 2020 Fall National Meeting.
      A. Minimum standards of review
      B. Minimum capital requirements
      C. Specific actuarial guidance in determining initial reserving levels
      D. Protected cell reporting requirements
      E. Proposed accreditation standards

12. The Risk-Focused Surveillance (E) Working Group will:
   A. Continually review the effectiveness of risk-focused surveillance and develop enhancements to processes as necessary.
   B. Continually review regulatory redundancy issues identified by interested parties and provide recommendations to other NAIC committee groups to address as needed.
   C. Oversee and monitor the Peer Review Program to encourage consistent and effective risk-focused surveillance processes.
   D. Consider recommendations to the Financial Regulation Standards and Accreditation (F) Committee for the purpose of evaluating the suitability of insurance department staffing in relation to the necessary skill sets. Complete by the 2019 Fall National Meeting.
   E. Continually maintain and update standardized job descriptions/requirements and salary range recommendations for common solvency monitoring positions to assist insurance departments in attracting and maintaining suitable staff.
   F. D. Review the Financial Condition Examiners Handbook salary and per diem guidelines to determine the applicability, value and use to the states; consider alternative approaches based on current financial solvency responsibilities. Complete by the 2019 Fall National Meeting.

13. The Valuation Analysis (E) Working Group will:
   A. Respond to states in a confidential forum regarding questions and issues arising during the course of annual principle-based reserving (PBR) reviews or PBR examination and which also may include consideration of asset adequacy analysis questions and issues.
B. Work with NAIC resources to assist in prioritizing and responding to issues and questions regarding PBR and asset adequacy analysis including actuarial guidelines or other requirements making use of or relating to PBR such as Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation (AG 38), Actuarial Guideline XLVIII—Actuarial Opinion and Memorandum Requirements for the Reinsurance of Policies Required to be Valued Under Sections 6 and 7 of the NAIC Valuation of Life Insurance Policies Model Regulation (AG 48), and the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).

C. Develop and implement a plan with NAIC resources to identify outliers/concerns regarding PBR/asset adequacy analysis.

D. Refer questions/issues as appropriate to the Life Actuarial (A) Task Force that may require consideration of changes/interpretations to be provided in the Valuation Manual.

E. Assist NAIC resources in development of a standard asset/liability model portfolio used to calibrate company PBR models.

F. Make referrals as appropriate to the Financial Analysis (E) Working Group.

G. Perform other work to carry out the Valuation Analysis (E) Working Group procedures.

14. The Variable Annuities Issues (E) Working Group will:
   A. Oversee the NAIC’s efforts to study and address, as appropriate, regulatory issues resulting in variable annuity captive reinsurance transactions.

NAIC Support Staff: Dan Daveline/Julie Gann/Bruce Jenson
2020 Proposed Charges

ACCOUNTING PRACTICES AND PROCEDURES (E) TASK FORCE

The mission of the Accounting Practices and Procedures (E) Task Force is to identify, investigate and develop solutions to accounting problems with the ultimate goal of guiding insurers in properly accounting for various aspects of their operations; modify the Accounting Practices and Procedures Manual (AP&P Manual) to reflect changes necessitated by Task Force action; and study innovative insurer accounting practices that affect the ability of state insurance regulators to determine the true financial condition of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Accounting Practices and Procedures (E) Task Force will:

2. The Blanks (E) Working Group will:
   A. Consider improvements and revisions to the various annual/quarterly statement blanks to:
      1. Conform these blanks to changes made in other areas of the NAIC to promote uniformity in reporting of financial information by insurers.
      2. Develop reporting formats for other entities subject to the jurisdiction of state insurance departments.
      3. Conform the various NAIC blanks and instructions to adopted NAIC policy.
      4. Oversee the development of additional reporting formats within the existing annual financial statements as needs are identified.
   B. Continue to monitor state filing checklists to maintain current filing requirements.
   C. Continue to monitor and improve the quality of financial data filed by insurance companies by recommending improved or additional language for the Annual Statement Instructions.
   D. Continue to monitor and review all proposals necessary for the implementation of statutory accounting guidance to ensure proper implementation of any action taken by the Accounting Practices and Procedures (E) Task Force affecting annual financial statements and/or instructions.
   E. Continue to coordinate with other task forces of the NAIC to ensure proper implementation of reporting and instructions changes as proposed by these task forces.
   F. Coordinate with the Life Actuarial (A) Task Force to use any special reports developed and avoid duplication of reporting.
   G. Review requests for investment schedule blanks and instructions changes in connection with the work being performed by the Investment Risk-Based Capital (E) Working Group.
   H. Review changes requested by the Valuation of Securities (E) Task Force relating to its work on other invested assets reporting for technical consistency within the investment reporting schedules and instructions.

3. The Statutory Accounting Principles (E) Working Group will:
   A. Maintain codified statutory accounting principles by providing periodic updates to the guidance that address new statutory issues and new generally accepted accounting principles (GAAP) pronouncements. Provide authoritative responses to questions of application and clarifications for existing statutory accounting principles. Report all actions and provide updates to the Accounting Practices and Procedures (E) Task Force.
   B. At the discretion of the Working Group chair, develop comments on exposed GAAP and International Financial Reporting Standards (IFRS) pronouncements affecting financial accounting and reporting. Any comments are subject to review and approval by the chairs of the Accounting Practices and Procedures (E) Task Force and the Financial Condition (E) Committee.
   C. Coordinate with the Life Actuarial (A) Task Force on changes to the Accounting Practices and Procedures Manual (AP&P Manual) related to the Valuation Manual VM-A, Requirements, and VM-C, Actuarial Guidelines, as well as other Valuation Manual requirements. This process will include the receipt of periodic reports on changes to the Valuation Manual on items that require coordination.
ACCOUNTING PRACTICES AND PROCEDURES (E) TASK FORCE (continued)

D. Obtain, analyze and review information on permitted practices, prescribed practices or other accounting treatments suggesting that issues or trends occurring within the industry may compromise the consistency and uniformity of statutory accounting, including, but not limited to, activities conducted by insurers for which there is currently no statutory accounting guidance or where the states have prescribed statutory accounting that differs from the guidance issued by the NAIC. Use this information to consider possible changes to statutory accounting.

E. Develop specific statutory accounting guidance for certain limited derivative contracts hedging variable annuity guarantees, subject to fluctuations as a result of interest rate sensitivity, reserved for in accordance with Actuarial Guideline XLIII—CARVM for Variable Annuities (AG 43). This guidance shall place an emphasis on reducing non-economic surplus volatility for these specific hedges in situations where strong risk management is in place, with safeguards to ensure appropriate financial statement presentation and disclosures, sufficient transparency, and regulatory oversight. This charge shall be a high priority, with the earliest effective date feasible that allows for adequate development of guidance and related reporting schedules. Complete by the 2019 Summer National Meeting.

F. Consider whether current or future changes to reserves resulting from implementation of the Variable Annuities Framework will be reported in the annual financial statement as a “change in basis.” Complete by the 2019 Summer National Meeting.

G. Review and possibly modify Schedule F and any corresponding annual financial statement pages to determine how best to reflect the expected changes to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786). Give due consideration to alternatives, including whether an allowance for doubtful accounts is appropriate. Complete by the 2020 Fall National Meeting.

H. Develop a model guideline that represents narrowly defined statutory language the states may use in removing the limitations that may exist within their investment statutes that may otherwise limit the extent of hedges an insurer may use in its risk management. Complete by the 2019 Fall National Meeting.

NAIC Support Staff: Robin Marcotte
Attachment One-A
Financial Condition (E) Committee
12/9/19

Draft: 10/17/19
Adopted by the Executive (EX) Committee and Plenary, Dec. 10, 2019
Adopted by the Financial Condition (E) Committee, Oct. 31, 2019
Adopted by the Capital Adequacy (E) Task Force, Sept. 18, 2019

2020 Proposed Charges

CAPITAL ADEQUACY (E) TASK FORCE

The mission of the Capital Adequacy (E) Task Force is to evaluate and recommend appropriate refinements to capital requirements for all types of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Capital Adequacy (E) Task Force will:
   A. Evaluate emerging “risk” issues for referral to the risk-based capital (RBC) working groups/subgroups for certain issues involving more than one RBC formula. Monitor emerging and existing risks relative to their consistent or divergent treatment in the three RBC formulas.
   B. Review and evaluate company submissions for the schedule and corresponding adjustment to total adjusted capital (TAC).
   C. Review and possibly modify the life and health RBC formulas specific to reinsurance credit risk charges to be based on the financial strength of the reinsurer consistent with the property/casualty (P/C) RBC formula, giving due consideration to public default experience and current factors used by credit rating agencies. Consider also whether adjustments are needed to the P/C RBC formula to consider such information relative to non-rated reinsurers. Complete by the 2020 Fall National Meeting.

2. The Health Risk-Based Capital (E) Working Group, Life Risk-Based Capital (E) Working Group and Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Evaluate refinements to the existing NAIC risk-based capital (RBC) formulas implemented in the prior year. Forward the final version of the structure of the current year life and fraternal, property/casualty (P/C), and health and fraternal RBC formulas to the Financial Condition (E) Committee by June.
   B. Consider improvements and revisions to the various RBC blanks to: 1) conform the RBC blanks to changes made in other areas of the NAIC to promote uniformity; and 2) oversee the development of additional reporting formats within the existing RBC blanks as needs are identified. Any proposal that affects the RBC structure must be adopted no later than April 30 in the year of the change, and adopted changes will be forwarded to the Financial Condition (E) Committee by the next scheduled meeting or conference call. Any adoptions made to the annual financial statement blanks or statutory accounting principles that affect an RBC change adopted by April 30 and results in an amended change may be considered by July 30 for those exceptions where the Capital Adequacy (E) Task Force votes to pursue by super-majority (two-thirds) consent of members present, no later than June 30 for the current reporting year.
   C. Monitor changes in accounting and reporting requirements resulting from the adoption and continuing maintenance of the revised Accounting Practices and Procedures Manual (AP&P Manual) to ensure that model laws, publications, formulas, analysis tools, etc., supported by the Task Force continue to meet regulatory objectives.
   D. Review the effectiveness of the NAIC’s RBC policies and procedures as they affect the accuracy, audit ability, timeliness of reporting access to RBC results and comparability between the RBC formulas. Report on data quality problems in the prior year RBC filings at the summer and fall national meetings.

3. The Investment Risk-Based Capital (E) Working Group will:
   A. Evaluate relevant historical data and apply defined statistical safety levels over appropriate time horizons in developing recommendations for revisions to the current asset risk structure and factors in each of the risk-based capital (RBC) formulas and delivering those recommendations to the Capital Adequacy (E) Task Force.

4. The Variable Annuities Capital and Reserve (E/A) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and risk-based capital (RBC) calculation, and determine if additional revisions need to be made. Develop and recommend changes to C-3 Phase II, Actuarial Guideline XLIII—CARVM for Variable Annuities (AG 43) and VM-21, Requirements for Principle-Based Reserves for Variable Annuities, that implement the Variable Annuities Framework. Complete by the 2019...
Develop and recommend appropriate changes including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

CAPITAL ADEQUACY (E) TASK FORCE (continued)

5. The Longevity Risk (A/E) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Provide recommendations for recognizing longevity risk in statutory reserves and/or risk-based capital (RBC), as appropriate. Complete by the 2020 Spring National Meeting.

6. The Operational Risk (E) Subgroup will:
   A. Evaluate growth-related operational risk for life risk-based capital (RBC) and health RBC. Any recommendations for remaining work on growth risk will be referred to the Life Risk-Based Capital (E) Working Group and/or the Health Risk-Based Capital (E) Working Group, after which the Subgroup will be disbanded. Complete by the 2019 Spring National Meeting.

7. The Catastrophe Risk (E) Subgroup of the Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Recalculate the premium risk factors on an ex-catastrophe basis, if needed.
   B. Continue to update the U.S. and non-U.S. catastrophe event list.
   C. Continue to evaluate the need for exemption criteria for insurers with minimal risk.
   D. Evaluate the risk-based capital (RBC) results inclusive of a catastrophe risk charge.
   E. Refine instructions for the catastrophe risk charge.
   F. Continue to evaluate any necessary refinements to the catastrophe risk formula.
   G. Evaluate other catastrophe risks for possible inclusion in the charge.

NAIC Support Staff: Jane Barr
2020 Proposed Charges

EXAMINATION OVERSIGHT (E) TASK FORCE

The mission of the Examination Oversight (E) Task Force is to monitor, develop and implement tools for the risk-focused surveillance process. For financial examinations and analysis, this includes maintenance of the Financial Condition Examiners Handbook and the Financial Analysis Handbook to provide guidance to examiners and analysts using a risk-focused approach to solvency regulation and to encourage effective communication and coordination between examiners, analysts and other regulators. In addition, the mission of the Task Force is to: monitor and refine regulatory tools of the risk-focused surveillance process, including Financial Analysis Solvency Tools (FAST) such as company profiles and the FAST ratio scoring system; oversee the Analyst Team Project; oversee financial examiner and analyst use of electronic software tools; monitor the progress of coordination efforts among the states in conducting examinations and the sharing of information necessary to solvency monitoring; establish procedures for the flow of information between the states about troubled companies; maintain an effective approach to the review of information technology (IT) general controls; and monitor the timeliness of financial examinations.

Ongoing Support of NAIC Programs, Products or Services

1. The Examination Oversight (E) Task Force will:
   A. Accomplish its mission using the following groups:
      5. IT Examination (E) Working Group.

2. The Electronic Workpaper (E) Working Group will:
   A. Monitor and support the state insurance departments in using electronic workpaper software tools to conduct and document solvency monitoring activities.
   B. Provide ongoing oversight to the NAIC’s Electronic Workpaper Hosting Project.
   C. Develop a framework to meet the long-term hosting and software needs of state insurance regulators in using electronic workpapers to conduct and document solvency monitoring activities. Ensure that solutions developed consider various state insurance regulator uses, as appropriate.

3. The Financial Analysis Solvency Tools (E) Working Group will:
   A. Provide ongoing maintenance and enhancements to the Financial Analysis Handbook and related applications for changes to the NAIC annual/quarterly financial statement blanks, as well as enhancements developed to assist in the risk-focused analysis and monitoring of the financial condition of insurance companies and groups. Monitor the coordination of analysis activities of holding company groups, and coordinate and analyze input received from other state regulators.
   B. Provide ongoing development maintenance and enhancements to the automated financial solvency tools developed to assist in conducting risk-focused analysis and monitoring the financial condition of insurance companies and groups. Prioritize and perform analysis to ensure that the tools remain reliable and accurate.
   C. Coordinate with the Financial Examiners Handbook (E) Technical Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. In compliance with the framework developed by the former PBR Review (EX) Working Group.
   E. Continue to provide advice to regulators, identifying and judging risk, establishing appropriate procedures, identifying frequency of model reviews, and documenting best practices. Address all risks, financial and non-financial; e.g., enterprise risk management (ERM), board, corporate governance and the Own Risk and Solvency Assessment (ORSA).
   F. Continue to adjust the Financial Analysis Handbook and current financial analysis solvency tools for life insurance companies based on any recommendations as requested from the Life Actuarial (A) Task Force to incorporate...
principle-based reserving (PBR) changes.

EXAMINATION OVERSIGHT (E) TASK FORCE (continued)

4. The Financial Examiners Coordination (E) Working Group will:
   A. Develop enhancements that encourage the coordination of examination activities with regard to holding company groups.
   B. Promote coordination by assisting and advising domiciliary regulators and exam coordinating states as to what might be the most appropriate regulatory strategies, methods and actions regarding financial examinations of holding company groups.
   C. Facilitate communication among regulators regarding common practices and issues arising from coordinating examination efforts.
   D. Provide ongoing maintenance and enhancements to the Financial Examination Electronic Tracking System (FEETS).

5. The Financial Examiners Handbook (E) Technical Group will:
   A. Continually review the Financial Condition Examiners Handbook and revise, as appropriate.
   B. Coordinate with the Risk-Focused Surveillance (E) Working Group to monitor the implementation of the risk-assessment process by developing additional guidance and exhibits within the Financial Condition Examiners Handbook, including consideration of potential redundancies affected by the examination process, corporate governance and other guidance as needed to assist examiners in completing financial condition examinations.
   C. Coordinate with the Financial Analysis Handbook (E) Working Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. Coordinate with the IT Examination (E) Working Group and the Financial Examiners Coordination (E) Working Group to maintain specialized areas of guidance within the Financial Condition Examiners Handbook related to the charges of these specific working groups.
   E. In compliance with the framework developed by the former PBR Review (EX) Working Group:
      1. Continue to provide advice to regulators, identifying and judging risk, building repositories, evaluating controls, determining the extent of data quality testing (by actuaries and examiners), identifying frequency of model reviews and documenting best practices. Address all risks, financial and non-financial; e.g., enterprise risk management (ERM), board, corporate governance and the Own Risk and Solvency Assessment (ORSA).
      2. Continue to adjust the Financial Condition Examiners Handbook based upon any recommendations as requested from the Life Actuarial (A) Task Force to incorporate principle-based reserving (PBR) changes.

6. The IT Examination (E) Working Group will:
   A. Continually review and revise, as needed, the “General Information Technology Review” and “Exhibit C—Evaluation of Controls in Information Systems” sections of the Financial Condition Examiners Handbook.
   B. Coordinate with the Market Conduct Examination Standards (D) Working Group to assist in the development of regulatory oversight policy with respect to cybersecurity examination issues, as requested by the Innovation and Technology (EX) Task Force.

NAIC Support Staff: Miguel Romero
LONG-Term CARE INSURANCE (B/E/B) TASK FORCE

Ongoing Support of NAIC Programs, Products or Services

1. The Long-Term Care Insurance (B/E/B) Task Force of the Health Insurance and Managed Care (B) Committee and Financial Condition (E) Committee will:
   A. Coordinate all aspects of the NAIC’s work regarding the long-term care insurance (LTCI) market. In addition to coordinating all current Health Insurance and Managed Care (B) Committee and Financial Condition (E) Committee projects, the Task Force should pursue the following general objectives:
      2. Evaluate the sufficiency of current financial reporting. Complete by the 2019 Fall National Meeting.
      3. Assess state activities regarding the regulatory considerations on rate increase requests on blocks and to identify common elements for achieving greater transparency and predictability.
      5. Provide periodic reports to the Health Insurance and Managed Care (B) Committee and the Financial Condition (E) Committee, as well as the Executive (EX) Committee, regarding key issues and progress toward the general objectives set forth above. Conduct meetings in regulator-to-regulator session, as appropriate.

NAIC Support Staff: Dan Daveline/Jolie Matthews
2020 Proposed Charges

RECEIVERSHIP AND INSOLVENCY (E) TASK FORCE

The mission of the Receivership and Insolvency (E) Task Force shall be administrative and substantive as it relates to issues concerning insurer insolvencies and insolvency guarantees. Such duties include, without limitation, monitoring the effectiveness and performance of state administration of receiverships and the state guaranty fund system; coordinating cooperation and communication among regulators, receivers and guaranty funds; monitoring ongoing receiverships and reporting on such receiverships to NAIC members; developing and providing educational and training programs in the area of insurer insolvencies and insolvency guarantees to regulators, professionals and consumers; developing and monitoring relevant model laws, guidelines and products; and providing resources for regulators and professionals to promote efficient operations of receiverships and guaranty funds.

Ongoing Support of NAIC Programs, Products or Services

1. The Receivership and Insolvency (E) Task Force will:
   A. Monitor and promote efficient operations of insurance receiverships and guaranty associations funds.
   B. Monitor and promote state adoption of insurance receivership and guaranty association related-model acts and regulations and monitor other legislation related to insurance receiverships and guaranty associations.
   C. Provide input and comments to the International Association of Insurance Supervisors (IAIS), the Financial Stability Board (FSB) or other related groups on issues regarding international resolution authority.
   D. Monitor, review and provide input on federal rulemaking and studies related to insurance receiverships.
   E. Provide ongoing review of maintenance and enhancements to the Receiver's Handbook for Insurance Company Insolvencies (Receiver's Handbook), other related NAIC publications, and the Global Receivership Information Database (GRID), and make any necessary updates.
   F. Monitor the work of other NAIC committees, task forces and working groups to identify and address any issues that affect receivership law and/or regulatory guidance.
   G. Perform additional work as directed by the Financial Condition (E) Committee and/or received through referral by other groups.

2. The Receivership Financial Analysis (E) Working Group will:
   A. Monitor receiverships involving nationally significant insurers/groups within receivership to support, encourage, promote and coordinate multistate efforts in addressing problems.
   B. Interacting with the Financial Analysis (E) Working Group, domiciliary regulators and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods and/or action(s) with regard to potential or pending the receiverships.

3. The Receivership Large Deductible Workers' Compensation (E) Working Group will:
   A. Perform Complete work based on recommendations for possible enhancements to the U.S. receivership regime, as approved and directed by the Receivership and Insolvency (E) Task Force, resulting from a study of the states' receivership laws and practices related to the receivership of insurers with significant books of large deductible workers' compensation business. Complete by the 202019 FallSummer National Meeting.

4. The Receivership Model Law (E) Working Group will:
   A. Review and provide recommendations on any issues identified that may affect the states’ receivership and guaranty association model laws; for example, any issues that arise as a result of market conditions, insurer insolvencies, federal rulemaking and studies, international resolution initiatives or as a result of the work performed by other NAIC committees, task forces and/or working groups.
   B. Discuss significant cases that may affect the administration of receiverships.
C. Complete work, as assigned from the Task Force, to address recommendations from the Financial Stability (EX) Task Force’s Macroprudential Initiative (MPI) referral as follows:

RECEIVERSHIP AND INSOLVENCY (E) TASK FORCE (continued)

2. Explore if bridge institutions could be implemented under regulatory oversight pre-receivership to address an early termination of qualified financial contracts (QFCs), and if appropriate, develop applicable guidance. Review the Receiver's Handbook guidance on QFCs and, if necessary, draft enhancements. Identify related pre-receivership considerations related to QFCs and, if necessary, make referrals to other relevant groups to enhance pre-receivership planning, examination and analysis guidance. and,
   — Review and provide recommendations for remedies to ensure continuity of essential services and functions to an insurer in receivership by affiliated entities, including non-regulated entities. Consult with the Group Solvency Issues (E) Working Group as the topic relates to affiliated intercompany agreements.

3. Complete by the 2020 Fall National Meeting.

A. Monitor, and provide recommendations for possible enhancements to the U.S. receivership regime and the states' receivership laws and practices based on, international supervisory and advisory developments regarding recovery, resolution, receivership and liquidation, including, but not limited to, the Financial Stability Board's (FSB) Key Attributes of Effective Resolution Regimes for Financial Institutions (KA) and Assessment Methodology (AM) and the International Association of Insurance Supervisors' (IAIS) Insurance Core Principles (ICPs) and its Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) (particularly ICP 10, Preventive and Corrective Measures and ICP 12, Winding up and Exit from the Market, as well as related ComFrame materials). Complete by the 2019 Fall National Meeting.

NAIC Support Staff: Jane Koenigsman
2020 Proposed Charges

REINSURANCE (E) TASK FORCE

The mission of the Reinsurance (E) Task Force is to monitor and coordinate activities and areas of interest, which overlap to some extent the charges of other NAIC groups—specifically, the International Insurance Relations (G) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Reinsurance (E) Task Force will:
   A. Provide a forum for the consideration of reinsurance-related issues of public policy.
   C. Oversee the activities of the Qualified Jurisdiction (E) Working Group.
   D. Monitor the implementation of the 2011, 2016 and 2019 revisions to the Credit for Reinsurance Model Law (#785), and the 2011 and 2019 revisions to the Credit for Reinsurance Model Regulation (#786), and the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).
   E. Communicate and coordinate with the Federal Insurance Office (FIO) and other federal authorities on matters pertaining to reinsurance.
   F. Consider any other issues related to the revised Model #785, Model #786 and Model #787.
   G. Monitor the development of international principles, standards and guidance with respect to reinsurance. This includes, but is not limited to, monitoring the activities of various groups within the International Association of Insurance Supervisors (IAIS), including the Reinsurance and Other Forms of Risk Transfer Subcommittee, the Reinsurance Mutual Recognition Subgroup and the Reinsurance Transparency Group.
   H. Consider the impact of reinsurance-related federal legislation, including, but not limited to, the federal Nonadmitted and Reinsurance Reform Act (NRRA) and the Federal Insurance Office Act, and coordinate any appropriate NAIC action.
   I. Consider Continue to monitor the impact of reinsurance-related international agreements, including the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Bilateral Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (UK Covered Agreement) between the U.S. and the United Kingdom.
   J. The Reinsurance (E) Task Force is directed to develop revisions to Model #785 and Model #786 to conform to the terms of the Bilateral Agreement.
   K. The Reinsurance (E) Task Force is directed to develop revisions to Model #785 and Model #786 to allow reinsurers domiciled in NAIC-qualified jurisdictions other than within the European Union (EU) to realize reinsurance collateral requirements similar to those provided under the Bilateral Agreement under specified circumstances. In order for an insurer domiciled in a qualified jurisdiction outside of the EU to receive the same collateral requirement treatment as provided to EU-domiciled reinsurers, that non-EU qualified jurisdiction must agree to adhere to all other standards imposed upon the EU in the Bilateral Agreement, including the requirement that the qualified jurisdiction must agree to recognize the states’ approach to group supervision, including group capital. As part of its deliberations, the Task Force should consult with international regulators, in addition to all other interested parties.
   L. The Reinsurance (E) Task Force is directed to develop revisions to Model #785 and Model #786 to address the effect of a breach of the Bilateral Agreement (as determined pursuant to its terms) on a reinsurance’s collateral obligations and the effect of a failure of a non-EU qualified jurisdiction to meet the standards imposed by its agreement or acknowledgment to adhere to the terms of the Bilateral Agreement and/or the model law and regulation.
   M. In conjunction with any revisions to Model #785 and Model #786, the Qualified Jurisdiction (E) Working Group is directed to consider changes to the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions to require that qualified jurisdictions recognize key NAIC solvency initiatives, including group supervision and group capital standards, as well as require strengthening of the information-sharing requirements between the states and qualified jurisdictions, in order for reinsurers domiciled in qualified jurisdictions to receive similar treatment to EU reinsurers under the Bilateral Agreement, and processes of removal of qualified jurisdiction status in the event of a breach.
2. The **Reinsurance Financial Analysis (E) Working Group** will:
   A. Operate in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and operate in open session when discussing certified reinsurance topics and policy issues, such as amendments to the Uniform Application for Certified Reinsurers.
   B. Provide advisory support and assistance to states in the review of reinsurance collateral reduction applications. Such a process with respect to the review of applications for reinsurance collateral reduction and qualified jurisdictions should strengthen state regulation and prevent regulatory arbitrage.
   C. Provide a forum for discussion among NAIC jurisdictions of reinsurance issues related to specific companies, entities or individuals.
   D. Support, encourage, promote and coordinate multistate efforts in addressing issues related to certified reinsurers, including, but not limited to, multistate recognition of certified reinsurers.
   E. Provide analytical expertise and support to the states with respect to certified reinsurers and applicants for certification.
   F. Provide advisory support with respect to issues related to the determination of qualified jurisdictions.
   G. Ensure the public passporting website remains current.
   H. For reinsurers domiciled in Reciprocal Jurisdictions, determine the best and most effective approaches for the financial solvency surveillance to assist the states in their work to protect the interests of policyholders.

3. The **Qualified Jurisdiction (E) Working Group** will:
   A. Maintain the [NAIC List of Qualified Jurisdictions](#) and the [NAIC List of Reciprocal Jurisdictions](#) in accordance with the [Process for Evaluating Qualified and Reciprocal Jurisdictions](#).
REINSURANCE (E) TASK FORCE (continued)

F. Interact with domiciliary regulators of ceding insurers and certifying states to assist and advise on the most appropriate regulatory strategies, methods and actions with respect to certified reinsurers.

G. Provide guidance and expertise on regulatory policy and practices with respect to certified reinsurers.

H. Provide advisory support with respect to issues related to the determination of qualified jurisdictions.

I. Monitor and ensure the public passporting website remains current and provide recommendations to the Task Force if amendments are required.

J. Consider changes in its current methods of monitoring certified reinsurers domiciled in qualified jurisdictions to incorporate changes to state reinsurance collateral requirements caused by the “Bilateral Agreement Between the United States of America and the European Union (EU) on Prudential Measures Regarding Insurance and Reinsurance” (Bilateral Agreement) and any changes to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) to provide similar treatment to reinsurers domiciled in qualified jurisdictions. Complete by the 2019 Fall National Meeting. For reinsurers domiciled in Reciprocal Jurisdictions, determine the best and most effective approaches for the financial solvency surveillance to assist the states in their work to protect the interests of policyholders.

2. The Qualified Jurisdiction (E) Working Group will:

   A. Develop and maintain the NAIC List of Qualified Jurisdictions in accordance with the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions.

   B. In conjunction with any revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786), the Working Group is directed to consider changes to the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions to require that qualified jurisdictions recognize key NAIC solvency initiatives, including group supervision and group capital standards, as well as require strengthening of the information-sharing requirements between the states and qualified jurisdictions, in order for reinsurers domiciled in qualified jurisdictions to receive similar treatment to reinsurers domiciled in Europe under the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Bilateral Agreement), and processes of removal of qualified jurisdiction status in the event of a breach.

   Maintain the NAIC List of Qualified Jurisdictions and the NAIC List of Reciprocal Jurisdictions in accordance with the Process for Evaluating Qualified and Reciprocal Jurisdictions.

   B. Perform a yearly due diligence review of Qualified Jurisdictions to determine whether there have been any significant changes over the prior year that might affect their status as Qualified Jurisdictions.

   C. Consider evaluations of any additional jurisdictions for inclusion on the NAIC List of Qualified Jurisdictions.

NAIC Support Staff: Jake Stultz/Dan Schelp
Draft: 10/17/19
Adopted by the Executive (EX) Committee and Plenary, Dec. 10, 2019
Adopted by the Financial Condition (E) Committee, Oct. 31, 2019
Adopted by the Risk Retention Group (E) Task Force, Oct 7, 2019

2020 Proposed Charges

RISK RETENTION GROUP (E) TASK FORCE

The mission of the Risk Retention Group (E) Task Force is to stay apprised of the work of other NAIC groups as it relates to financial solvency regulation and the NAIC Financial Regulation Standards and Accreditation Program. The Task Force may make referrals to the Financial Regulation Standards and Accreditation (F) Committee and/or other NAIC groups, as deemed appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Risk Retention Group (E) Task Force will:
   A. Monitor and evaluate the work of other NAIC committees, task forces and working groups related to risk retention groups (RRGs). Specifically, if any of these changes affect the NAIC Financial Regulation and Accreditation Standards Program, assess whether and/how the changes should apply to RRGs and their affiliates.
   B. Monitor and analyze federal actions, including any U.S. Government Accountability Office (GAO) reports. Consider any action necessary as a result of federal activity.
   C. Monitor the impacts of recent tools and resources made available to domiciliary and non-domiciliary state insurance regulators pertaining to RRGs. Consider whether additional action is necessary, including educational opportunities, updating resources and further clarifications.

NAIC Support Staff: Becky Meyer
**2020 Proposed Charges**

**VALUATION OF SECURITIES (E) TASK FORCE**

The mission of the Valuation of Securities (E) Task Force is to provide regulatory leadership and expertise to establish and maintain all aspects of the NAIC’s credit assessment process for insurer-owned securities, as well as produce insightful and actionable research and analysis regarding insurer investments.

**Ongoing Support of NAIC Programs, Products or Services**

1. The **Valuation of Securities (E) Task Force** will:
   
   A. Review and monitor the operations of the NAIC Securities Valuation Office (SVO) and the NAIC Structured Securities Group (SSG) to ensure they continue to reflect regulatory objectives.
   
   B. Maintain and revise the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* (P&P Manual) to provide solutions to investment-related regulatory issues for existing or anticipated investments.
   
   C. Monitor changes in accounting and reporting requirements resulting from the continuing maintenance of the *Accounting Practices and Procedures Manual*, as well as financial statement blanks and instructions, to ensure that the P&P Manual continues to reflect regulatory needs and objectives.
   
   D. Consider whether improvements should be suggested to the measurement, reporting and evaluation of invested assets by the NAIC as the result of: 1) newly identified types of invested assets; 2) newly identified investment risks within existing invested asset types; or 3) elevated concerns regarding previously identified investment risks.
   
   E. Identify potential improvements to the credit filing process, including formats and electronic system enhancements.
   
   F. Provide effective direction to the NAIC’s mortgage-backed securities modeling firms and consultants.
   
   G. Coordinate with other NAIC working groups and task forces—including, but not limited to, the Capital Adequacy (E) Task Force, the Investment Risk-Based Capital (E) Working Group, the Statutory Accounting Principles (E) Working Group and the Blanks (E) Working Group—to formulate recommendations and to make referrals to such other NAIC regulator groups to ensure expertise relative to investments, or the purpose and objective of guidance in the P&P Manual, is reflective in the guidance of such other groups and that the expertise of such other NAIC regulatory groups and the objectives of their guidance is reflected in the P&P Manual.
   
   H. Identify potential improvements to the filing exempt process (the use of credit rating provider ratings to determine an NAIC designation) to ensure greater consistency, uniformity and appropriateness to achieve the NAIC’s financial solvency objectives. Implement to the different areas of the NAIC, and to the state-based insurance regulatory structure, the modification of the existing NAIC credit assessment framework by adding NAIC designation categories. Complete by the 2019 Fall National Meeting.

NAIC Support Staff: Charles Therriault
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is: ☐ New Model Law or ☑ Amendment to Existing Model

1. Name of group to be responsible for drafting the model:

   Group Capital Calculation (E) Working Group

2. NAIC staff support contact information:

   Dan Daveline
ddaveline@naic.org
(816) 783-8134

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

   - Insurance Holding Company System Regulatory Act (#440)
   - Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)

   In 2015, the NAIC adopted the following charge to the Financial Condition (E) Committee who subsequently formed the Group Capital Calculation (E) Working Group to carry out such a change.

   “Construct a U.S. group capital calculation using an RBC aggregation methodology; liaise as necessary with the Comframe Development and Analysis (G) Working Group on international capital developments and consider group capital developments by the Federal Reserve Board, both of which may help inform the construction of a U.S. group capital calculation.”

   The Group Capital Calculation (E) Working Group has been developing the group capital calculation (GCC) since receiving its charge and in May, with the assistance of 33 insurance groups and 15 lead states, began testing the current construction. The lead states are currently reviewing the completed templates and take aways from the testing are expected to be summarized and discussed at the Fall National Meeting in Austin. Upon completion of the field-testing, state regulators will use the results to further improve the construction of the calculation and at this junction, the Working Group is striving to adopt the calculation sometime in 2020. In order to allow states to be able to adopt the GCC, the Working Group is seeking approval to modify the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). While the Working Group has not concluded the exact construct of such changes, the Working Group expects Section 4 of #440 will need to be revised to require a new filing and #450 will need to be revised to add the new filing and a related new section (Form G).

4. Does the model law meet the Model Law Criteria? ☑ Yes or ☐ No (Check one)

   (If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).
a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? 

☐ Yes or ☐ No (Check one)

If yes, please explain why:

State insurance regulators currently perform group analysis on all U.S. insurance groups, including assessing the risks and financial position of the insurance holding company system based on currently available information. However, state regulators currently do not have the benefit of a consolidated statutory accounting system and financial statements to assist them in these efforts. The GCC is expected to fill this void since it requires an aggregation and display of the individual company’s available capital and operating figures. More specifically, the GCC and related reporting will provide more transparency to insurance regulators regarding the insurance group and make risks more identifiable and more easily quantified. In this regard, the tool will assist regulators in holistically understanding the financial condition of non-insurance entities, how capital is distributed across an entire group, and whether and to what degree insurance companies may be subsidizing the operations of non-insurance entities, potentially undermining the insurance company’s financial condition and/or placing upward pressure on premiums to the detriment of insurance policyholders. It is envisioned that this calculation will provide an additional early warning signal to regulators so they can begin working with a company to resolve any concerns in a manner that will ensure that policyholders will be protected. Importantly, the GCC will complement existing group supervisory tools already available to state insurance regulators, such as the Form F Enterprise Risk Report\(^1\), the Own Risk and Solvency Assessment Summary Report\(^2\) and the Form B Holding Company Filings\(^3\). As such, we would expect it to be a national standard.

b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

☐ Yes or ☐ No (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary:

As previously noted, the Working Group is striving to adopt the calculation sometime in 2020 and it is expected that revisions to the model be adopted by the NAIC within that same time period so that states can begin to implement through changes to state law.

\(^1\) Insurance Holding Company System Regulatory Act (#440) and supporting Insurance Holding Company System Model Regulation (#450) require the annual filing of an Enterprise Risk Report (Form F) which requires the disclosure on material risks within the insurance holding company system that could pose enterprise risk to the insurer.

\(^2\) Risk Management and Own Risk and Solvency Assessment (ORSA) Model Act (#505) require the annual filing of an ORSA Summary report that includes 1) Description of the Insurer’s Risk Management Framework; 2) Insurer’s Assessment of Risk Exposure; and 3) Group Assessment of Risk Capital and Prospective Solvency Assessment.

\(^3\) Insurance Holding Company System Regulatory Act (#440) and supporting Insurance Holding Company System Model Regulation (#450) require the annual filing of a Registration Statement (Form B) which includes, among other items, the annual financial statements of the ultimate controlling person in the insurance holding company system and all of its affiliates and subsidiaries.
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1 High Likelihood ☐ 2 ☐ 3 ☐ 4 ☐ 5 Low Likelihood (Check one)

Explanation, if necessary: See previous discussion.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1 High Likelihood ☐ 2 ☐ 3 ☐ 4 ☐ 5 Low Likelihood (Check one)

Explanation, if necessary:

At this juncture, the changes to the NAIC models are expected to 1) require the filing of the GCC with the state; 2) provide important confidentiality protections; 3) provide exemptions for who is not expected to file the GCC. As such, variations by states related to these elements are not expected.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

The Group Capital Calculation (E) Working Group has not discussed whether the GCC should be an accreditation standard. However, because the GCC is expected to be required of the largest and most complex U.S. insurance group who operate in all states, a national standard is appropriate.

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

Yes. Under Title V of the Dodd-Frank Act, the U.S. Department of the Treasury and the Office of the U.S. Trade Representative are authorized to jointly negotiate covered agreements, defined under the Dodd-Frank Act as written bilateral or multilateral agreements between the United States and one or more foreign governments, authorities or regulators regarding prudential measures with respect to insurance or reinsurance, on the condition that the prudential measures subject to a covered agreement achieve a level of protection for insurance or reinsurance consumers that is “substantially equivalent” to the level of protection achieved under U.S. state insurance laws. On Sept. 22, 2017, the U.S. Department of the Treasury and the Office of the U.S. Trade Representative signed the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement). On December 18, 2018, a separate Covered Agreement was signed between the U.S. and the United Kingdom, which is mirrors the language from the agreement with the EU, and has the same timing requirements for implementation.

The Covered Agreement includes requirements on reinsurance collateral, group supervision and group capital. Specifically, Article 4(h) provides that the host supervisor (i.e., a supervisory authority from the territory in which an insurance group has operations but which is not the territory where the worldwide parent is domiciled or headquartered) may not impose a group capital assessment or requirement at the level of the worldwide parent, but only if the insurance group is subject to a group capital assessment imposed by the home supervisor. The group capital assessment of the home supervisor must include a worldwide group capital calculation capturing risk at the level of the entire group, and the home supervisor must have the authority to impose preventive, corrective or otherwise responsive measures on the basis of the assessment, including the authority to impose capital measures where appropriate.

Under Article 10(e) of the Covered Agreement, supervisory authorities in the European Union shall not impose a group capital requirement at the level of the worldwide parent undertaking of the insurance or reinsurance group, with regard to a U.S. insurance or reinsurance group with operations in the European Union, for 60 months after the date of provisional application of the Covered Agreement; i.e., Nov. 7, 2022. The NAIC is developing a group capital calculation intended to serve as an analytical tool for evaluating an insurer’s capital position at the group level, but which is not intended to be applied as a group-level capital requirement or standard. The Statement of the United States on the Covered Agreement with the European Union provides further clarification with respect to this group capital assessment:
The Agreement limits the worldwide application of EU prudential group insurance measures on U.S. insurers operating in the EU. The Agreement provides that U.S. insurers and reinsurers can operate in the EU without the U.S. parent being subject to the group level governance, solvency and capital, and reporting requirements of Solvency II, and reinforces that the EU system of prudential insurance supervision is not the system in the United States. The Agreement does not require development of a group capital standard or group capital requirement in the United States. Article 4(h) contemplates that the states will develop a group-wide capital assessment. Through the National Association of Insurance Commissioners (NAIC), the states are in the process of developing a group capital calculation which is intended to serve as an analytical tool for evaluating a firm’s capital position at the group level. The United States expects that the NAIC’s group capital calculation will satisfy the “group capital assessment” condition of Article 4(h), provided that the work is completed and implemented within five years of the date on which the Agreement is signed. [Emphasis added].

Any state with U.S. groups operating in either the European Union or the United Kingdom will need to adopt these legislative changes by Nov. 7, 2022 in order to effectuate compliance with the Covered Agreement.
GUIDELINE FOR STAY ON TERMINATION OF NETTING AGREEMENTS AND QUALIFIED FINANCIAL CONTRACTS

Drafting Note: State receivership and insolvency laws may permit a contractual right to cause the termination, liquidation, acceleration or close-out obligations with respect to any netting agreement or qualified financial contract (QFC) with an insurer because of the insolvency, financial condition or default of the insurer, or the commencement of a formal delinquency proceeding. These laws are based upon similar provisions contained in the federal bankruptcy code and the Federal Deposit Insurance Act (FDIA). The FDIA also provides for a twenty-four-hour stay to allow for the transfer of QFCs by the receiver to another entity rather than permitting the immediate termination and netting of the QFC. 12 U.S.C. § 1821(e)(9)-(12). States that permit the termination and netting of QFCs may want to consider adopting a similar stay provision following the appointment of a receiver.

States that consider the enactment of a stay should take into account the relevant federal rules. In 2017 the Board of Governors of the Federal Reserve System (the Federal Reserve), the Federal Deposit Insurance Corporation (the FDIC) and the Office of the Comptroller of the Currency (the OCC) each adopted final rules and accompanying interpretive guidance (Final Rules) setting forth limitations to be placed on parties to certain financial contracts exercising insolvency-related default rights against their counterparties that have been designated as a global systemically important banking organization (GSIB). The Final Rules include the definition of master netting agreement that allows netting even though termination of the transaction in the event of an insolvency may be subject to a “stay” under several defined resolution regimes including Title II of Dodd Frank, the FDIA, as well as comparable foreign resolution regimes. Notwithstanding NAIC’s request for inclusion, stays under the state insurance receivership regime (State Receivership Stays) were not included as an exemption within the definition. Therefore, unless the Final Rules are amended to recognize State Receivership Stays, if a state implements a stay as contemplated by the Guideline, insurers would find themselves disadvantaged, potentially resulting in additional costs and/or collateral requirements given the regulatory treatment for contracts that do not meet requirements for QFCs. Therefore, if a state is considering implementation of this Guideline, consideration should be given to whether the rules of the Federal Reserve, FDIC and OCC have been amended to recognize State Receivership Stays. For example, a state could adopt a stay that would be effective if and when the Final Rules recognize State Receivership Stays.

The following statutory language is not an amendment to the NAIC receivership models, but is intended as a Guideline for use by those states seeking to require a stay with respect to the termination of a netting agreement or QFC of an insurer in insolvency:

Stay on Termination of Netting Agreements and Qualified Financial Contracts

A person who is a party to a netting agreement or qualified financial contract under [cite to applicable state law addressing qualified financial agreements] with an insurer that is the subject of an insolvency proceeding may not exercise any right that the person has to terminate, liquidate, accelerate or close-out the obligations with respect to the contract by reason of the insolvency, financial condition or default of the insurer, or by the commencement of a formal delinquency proceeding,

(1) Until 5:00 p.m. (eastern time) on the business day following the date of appointment of a receiver; or

(2) After the person has received notice that the contract has been transferred pursuant to [cite applicable state law addressing transfer of qualified financial contracts].

Chronological Summary of Action (all references are to the Proceedings of the NAIC)

The Financial Condition (E) Committee met via conference call Aug. 29, 2019. The following Committee members participated: David Altmaier, Chair (FL); Kent Sullivan, Vice Chair, represented by Jamie Walker (TX); Ricardo Lara represented by Susan Bernard and Kim Hudson (CA); Robert H. Muriel and Kevin Fry (IL); Chlora Lindley-Myers represented by Debbie Doggett (MO); Matthew Rosendale represented by Steve Matthews (MT); Marlene Caride represented by Daniel Morris (SC); James A. Dodrill represented by Jamie Taylor (WV); and Jeff Rude represented by Linda Johnson (WY). Also participating was: Rich Piazza (LA).

1. **Adopted the Report of the Accounting Practices and Procedures (E) Task Force**

Commissioner Altmaier asked that upon receiving the report of the Accounting Practices and Procedures (E) Task Force, that any motion to adopt exclude both 2019-20BWG and the 2020 proposed charges. He stated that excluding the charges was appropriate, as they will be considered with other task force and working group charges in a conference call that takes place in October.

Ms. Walker provided the report of the Accounting Practices and Procedures (E) Task Force, which met Aug. 22. During this meeting, the Task Force adopted its 2020 proposed charges, including deletion of two completed charges and deletion of one charge proposed to be disposed as unnecessary. All the deleted charges of the Statutory Accounting Principles (E) Working Group related to variable annuities. She stated the report also included adoption of the Aug. 20 report of the Blanks (E) Working Group, with one minor modification to agenda item 2019-20BWG. The Task Force also adopted the July 2 and June 24 minutes of the Blanks (E) Working Group. The two blanks proposals adopted are: 1) 2019-18BWG, which adds an NAIC designation modifier to accommodate the NAIC designation category granularity framework adopted by the Valuation of Securities (E) Task Force, with an annual 2020 effective date; and 2) 2019-20BWG, which will be considered separately, but in summary it adds a “Qualification Documentation” to the property/casualty (P/C) Statement of Actuarial Opinion instructions, as requested by the Casualty Actuarial and Statistical (C) Task Force and the Executive (EX) Committee, requiring the appointed actuary to maintain workpapers explaining how the actuary meets the definition of “qualified actuary.” The minor Accounting Practices and Procedures (E) Task Force modification to the proposal changed the name of the term in the proposal from “NAIC Accepted Actuarial Designation” to “Accepted Actuarial Designation.” The proposal was adopted by the Task Force, with two dissenting votes. Finally, Ms. Walker noted that blanks proposal 2019-19BWG on unaffiliated certificates of deposit was withdrawn to allow for further work, and the Blanks (E) Working Group also: 1) deferred revisions to its procedures to allow for further discussion; 2) exposed three proposals for a public comment period ending Oct. 8; and 3) adopted the editorial listing.

Mr. Sirovetz made a motion, seconded by Ms. Walker, to adopt the Task Force’s report, except for its 2020 proposed charges and blanks proposal 2019-20BWG. The motion passed, with Missouri dissenting.

2. **Adopted Blanks Proposal 2019-20BWG**

Commissioner Altmaier asked Mr. Piazza to summarize the proposal. Mr. Piazza noted that he was the chief actuary in Louisiana. He said over the past 10 years, he served as chair of the Casualty Actuarial and Statistical (C) Task Force for seven years and as vice chair for three years. He stated that the proposal concerns the qualification definition of the appointed actuary contained in the Annual Statement Instructions – Property/Casualty. He described the role of the appointed actuary and how it may be the most important role actuaries serve in the state insurance regulator’s eyes.

Mr. Piazza indicated that state insurance regulators that review reserve adequacy for company solvency in order to protect the interests of their state’s consumers rely heavily upon the accuracy of the appointed actuary’s reserve assessment and information contained in the appointed actuary’s Statement of Actuarial Opinion. To be able to provide the Statement of Actuarial Opinion, an appointed actuary must meet the qualification requirements defined in the Annual Statement Instructions – Property/Casualty.
Mr. Piazza stated that the proposal has a long history at the NAIC. It began about seven years ago, when the Task Force was asked to determine if the Society of Actuaries’ (SOA) new educational track met the NAIC’s basic education requirement for the qualified actuary. After many open discussions, the Task Force realized this was a time-consuming project that needed help from an independent, unbiased education expert. So, the Task Force asked for outside help. This request went to the Property and Casualty Insurance (C) Committee and then to the Executive (EX) Committee.

The Executive (EX) Committee set out to develop an objective, principled-based definition for the qualified actuary and to determine if the SOA and Casualty Actuarial Society’s (CAS) designations meet the basic education requirement of that definition. The Executive (EX) Committee hired a consultant, and with many months of hard work from more 30 subject-matter experts (SMEs), it completed a job analysis for the appointed actuary. The Executive (EX) Committee then, again with assistance from SMEs, established basic education standards for the qualified actuary and evaluated the examination syllabi of the actuarial organizations to see if they met those standards. These projects resulted in the proposal.

Mr. Piazza provided a summary of the highlights in the proposal. The proposal sets forth a workable, objective and principle-based definition of a property/casualty (P/C) qualified actuary and recognizes the SOA’s general insurance track designation, along with the CAS designations, as meeting the minimum basic education requirement for a qualified actuary. He described how the proposal adds qualification documentation to the instructions, which effectively pulls together an actuary’s resume and continuing education documentation as a workpaper so state insurance regulators can view that information if they wish and companies can use it in their governance review of the appointed actuary. The proposal has an effective date coinciding with the 2019 annual financial statement. He stated that the 2019 effective date was agreed to by all three actuarial organizations.

Mr. Piazza noted that the proposal has little impact to any actuary currently appointed. All former appointed actuaries remain “qualified” under the new definition, with the only impact being they must document their qualifications. During the Accounting Practices and Procedures (E) Task Force’s Aug. 22 conference call, Texas offered a friendly amendment to original blanks proposal 2019-20BWG that removed “NAIC” from the label that is now called the “acceptable actuarial designations.”

Mr. Piazza noted that this proposal was not performed in a vacuum as the proposed instruction changes were vetted many times since the beginning of this project. He described how in the past year-and-a-half, there were four exposures and one hearing with input considered from interested parties, the Task Force and commissioners directly. He stated that like other large, multi-faceted NAIC projects, there was a bit of compromise in the development of the proposal, and not all participants in the development process were 100% satisfied with the result.

Mr. Piazza closed by stating that the proposal clearly met the Executive (EX) Committee’s objective at the start of its project by setting forth a workable, objective and principle-based “qualified actuary” definition that includes actuarial designations from both the SOA and the CAS that meet the minimum basic education standard in that definition. He asked the Committee to adopt the proposal without further revision.

Having no further business, the Financial Condition (E) Committee adjourned.
The Group Capital Calculation (E) Working Group of the Financial Condition (E) Committee met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: David Altmaier, Chair, and Ray Spudeck (FL); Kathy Belfi, Vice Chair, (CT); Philip Barlow (DC); Jim Armstrong and Mike Yanachea (IA); Kevin Fry, Bruce Sartain and Vincent Tsang (IL); Roy Eft (IN); Christopher Joyce (MA); Judy Weaver (MI); Kathleen Orth (MN); John Rehagen (MO); Jackie Obusek (NC); Justin Schrader (NE); Marlene Caride and Diana Sherman (NJ); James Regalbuto (NY); Dale Bruggeman and Tim Biler (OH); Joe DiMemmo (PA); Trey Hancock and Patrick Merkel (TN); Doug Slape and Jamie Walker (TX); Doug Stolte and David Smith (VA); and Amy Malm (WI).

1. Adopted its Oct. 30, Aug. 29 and Summer National Meeting Minutes

Commissioner Altmaier said the Working Group met Oct. 30 and Aug. 29. During its Oct. 30 meeting, the Working Group adopted a revised memorandum on debt and a Request for NAIC Model Law Development related to the group capital calculation (GCC). During its Aug. 29 meeting, the Working Group discussed needed confidentiality protections.

Ms. Belfi made a motion, seconded by Mr. Schrader, to adopt the Working Group’s Oct. 30 (Attachments Three-A), Aug. 29 (Attachment Three-B) and Aug. 3 (see NAIC Proceedings – Summer 2019, Financial Condition (E) Committee, Attachment Two) minutes. The motion passed unanimously.

2. Received a Summary of Data Review and Initial Observations from the Field Test

Commissioner Altmaier stated that NAIC staff would be presenting preliminary observations from the group capital calculation (GCC) field test (Attachment Three-C) and asked Lou Felice (NAIC) to begin that summary.

Mr. Felice highlighted some of the more significant aspects of that summary, including how suggestions were made on how the template and instructions could be improved. He said those types of suggestions were included in the observations and that the NAIC supported many of those. He said that testing was near complete, pending only final meetings with some of the volunteers, which is driven more by the difficulty of coordinating schedules than anything else. He emphasized that for capital instruments, there would need to be clarifications for the reporting of foreign debt, what is meant by tracked debt and the reporting of surplus notes.

Dan Daveline (NAIC) stated the with respect to XXX/AXXX assets and liabilities, several commenters suggested this information be disclosure only and not included in the actual calculation. Mr. Felice noted that in the area of materiality, some companies did use different approaches, but the test did not provide any type of clear indication of one approach to use.

Ned Tyrrell (NAIC) noted that one issue that still needs to be dealt with is scalars in regimes not considered thus far. He said another issue arises when the underlying capital calculation is fixed.

Mr. Felice said NAIC staff used the inventory as the base GCC ratio and that the rest of the observations were based on factors that cause that base to go up or down.

Mr. Tyrrell discussed the results of the GCC base calculation based on the trend test level. He reinforced Mr. Felice’s point that the subsequent charts in the observations show the impact from the base calculation, meaning the item is either an increase or a decrease from that base. With respect to the observations on included business, most groups had no difference when the groups included all their companies, but there were a small number of property/casualty (P/C) companies that had a larger difference.
Mr. Tyrrell described how there were similar observations when it comes to the non-insurance tests where the revenue tests generally did not show a significant impact, but there were a handful of outlier groups. However, he said that the book/adjusted carrying value (BACV) test tended to have a large impact on a number of groups. He also noted that the banking tests had little impact on the groups with such entities.

Mr. Felice described the impact of using 30% for debt, noting that when the test did so, it picked up most companies.

Mr. Tyrrell highlighted how the differences in the scalar testing was largely driven by the three different types of groups participating in the field-testing, including specifically that some non-U.S. groups chose to participate and were most impacted, while most groups had no or little non-U.S. business, including most of the internationally active insurance groups (IAIGs).

Bill Schwegler (Transamerica) reiterated Transamerica’s concerns with on-top adjustment that have the impact of modifying state legal entity rules. He stated Transamerica appreciated the work to assemble the results, but stated he hopes that further information would be disclosed in the future regarding: 1) non-XXX/AXXX captives; 2) treatment of subsidiaries where the GCC amends; 3) nonadmitted entities that are zeroed out; and 4) use of the trend test level versus the company act level.

Mariana Gomez-Vock (American Council of Life Insurers—ACLI) asked if clarity could be provided between the GCC and the aggregation method, noting that it was the GCC that the U.S. intends to submit.

Commissioner Altmaier stated the short answer is “yes,” but this specific matter is more of an issue for the International Insurance Relations (G) Committee. He stated that an aggregate-based framework that is jurisdictional-agnostic is preferred to allow, for example, Hong Kong to use its own version of the aggregation method.

Ms. Gomez-Vock said she recognizes that this was also probably a more appropriate question for the International Insurance Relations (G) Committee, but she asked whether the GCC would have a trigger of intervention.

Commissioner Altmaier responded that nothing has changed and the GCC does not intend to have any type of trigger for intervention. (Editor’s Note: For more discussion on this issue, see NAIC Proceedings – Fall 2019, International Insurance Relations (G) Committee, agenda item #4.)

Commissioner Altmaier said conversations regarding the information would begin in the future weeks.

Having no further business, the Group Capital Calculation (E) Working Group adjourned.
The Group Capital Calculation (E) Working Group of the Financial Condition (E) Committee met via conference call Oct. 30, 2019. The following Working Group members participated: David Altmaier, Chair, and Ray Spudeck (FL); Kathy Belfi, Vice Chair (CT); Kim Hudson (CA); Carrie Mears (IA); Susan Berry (IL); Roy Eft (IN); Judy Weaver (MI); Barbara Carey (MN); John Rehagen (MO); Justin Schrader (NE); Edward Kiffel (NY); Dale Bruggeman (OH); Kimberly Rankin (PA); Trey Hancock (TN); Mike Boerner (TX); Doug Stolte (VA); and Amy Malm (WI).

1. **Adopted a Revised Debt Memorandum**

Commissioner Altmaier stated that the issue of debt was one that had received considerable discussion by the Working Group in the past and that it was currently testing different approaches during field testing. He noted that the way the original memorandum on this topic was drafted created some confusion, and over the past several months, there had been some work to try to resolve the confusion. He stated the purpose of revisions was not to change any of the approaches being tested, but to clarify language to alleviate some of the concerns that had been presented. He stated the revisions specifically remove some of the language related to rating agencies that seem to be causing most of the confusion.

Mr. Hudson stated his understanding was that the Working Group was moving forward with field testing and that after receiving additional data, the Working Group would be in a better position to make a final decision. Commissioner Altmaier agreed, noting the revisions do not change that fact.

Ms. Belfi highlighted the fourth page of the memorandum where field testing is discussed and noted that none of that language had been revised outside of minor cosmetic editorial changes along with the information related to rating agencies.

Ms. Belfi made a motion, seconded by Mr. Hudson, to adopt the revised changes and to have the revised memorandum posted to the website (Attachment Three-A1). The motion passed unanimously.

2. **Adopted a Request for NAIC Model Law Development**

Commissioner Altmaier stated the Working Group previously discussed the need for the group capital calculation (GCC) to be confidentially filed with the state insurance department and the need for legal authority for this to occur, which requires an NAIC model law. He stated that included in the materials is a document that requires adoption by the Working Group, the Financial Condition (E) Committee and the Executive (EX) Committee before a project to make such changes to an NAIC model law can begin.

Commissioner Altmaier stated the document specifically requests changes to the *Insurance Holding Company System Regulatory Act* (#440) and the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions* (#450). Commissioner Altmaier emphasized that the request envisions changes to the model that will not create a regulatory intervention point for the GCC. He stated this is only for the purpose of requiring the filing and its confidentiality.

Mr. Bruggeman said this does not preclude the incorporation of something that already exists within confidentiality provisions and noted, for example, the *Risk Management and Own Risk and Solvency Assessment Model Act* (#505).

Mr. Hudson asked Commissioner Altmaier if he expects the work to be completed by the Group Solvency Issues (E) Working Group. Commissioner Altmaier stated that the Group Solvency Issues (E) Working Group owns that model. He stated he envisions a liaison with that Working Group and a process where both groups are heavily involved. He stated that with all the past discussions of the GCC on its purpose and its goal, it will be important for the Working Group to stay involved in the process.

Mariana Gomez-Vock (American Council of Life Insurers—ACLI) expressed appreciation for the recognition that confidentiality needs to be addressed in the GCC. She asked for clarification that the model law amendment process deals with the confidentiality and for the regulatory authority of filing the GCC.
Commissioner Altmaier responded that if the Working Group determines that authority is needed for the filing, the changes to the model can address such. He noted, however, that he is primarily focused on a very narrow change to the model since the primary purpose is the confidentiality.

Ms. Gomez-Vock stated it would be good to be mindful of the process for addressing other items. Commissioner Altmaier stated they would try to be mindful of such items as they began the process and simply reiterated his desire for the changes to be very narrow and related to the GCC only.

Mr. Hudson made a motion, seconded by Mr. Bruggeman, to adopt the Request for NAIC Model Law Development (see NAIC Proceedings – Fall 2019, Financial Condition (E) Committee, Attachment One-B). The motion passed unanimously.

3. **Discussed Other Matters**

Commissioner Altmaier asked NAIC staff to provide an update on the field testing.

Lou Felice (NAIC) reminded the Working Group of the multiple levels of testing debt within the GCC like the language in the revised memorandum previously adopted by the Working Group earlier in the conference call. He discussed that the testing criteria is being applied over regulatory capital and over regulatory capital plus debt. He discussed that restacked regulatory capital is being used to include all entities, permitted and prescribed practices, but it does not include the XXX/AXXX captive information as they would be considered separately. He also discussed the ongoing openness of considering other options offered by volunteers.

Mr. Felice described that they are working their way through the volunteer filings, noting one had dropped out. He stated that they have come in slower than desired. He stated that most of the filings had been reviewed by NAIC staff, with comments sent to the lead states for incorporation of the input from the lead state. He stated that once such input is added, a document would be shared with the volunteer and that companies are then allowed to have a written response and/or a final conference call. He said the greatest difficulty has been the coordinating of schedules for conference calls between each volunteer, their lead state and NAIC staff. They hope to have all completed by the end of November. However, he stated this will not change the summarizing charts that are expected to be provided in the open meeting where public feedback is provided.

Having no further business, the Group Capital Calculation (E) Working Group adjourned.

MEMORANDUM

TO: Group Capital Calculation (E) Working Group

FROM: David Altmaier, Chair, Group Capital Calculation (E) Working Group

DATE: October 7, 2019

RE: Treatment of Senior Debt and Surplus Notes in the Group Capital Calculation

As part of the discussions related to the determination of available capital under an RBC aggregation approach to a group capital calculation (GCC), the issue of how to treat senior debt and surplus notes needs to be considered. As noted below, the treatment of Surplus Notes within the calculation is much more clearly guided by available accounting guidance. Less direction is found for the appropriate consideration of senior debt.

Background

Statement of Statutory Accounting Principles (SSAP) 41 establishes a strong State-based entity specific regulatory structure for surplus notes issued by insurers which is further supported by state receivership laws. SSAP 15 requires all types of debt, including senior debt to be recorded as a liability. However, SSAP 15 is based upon insurance legal entity principles that are not designed to consider the financial flexibility that senior debt issued by a non-insurer holding company can provide the insurance group. In addition, the current guidance does not consider any prohibitions / limitations on the investments of holding company debt instruments. Part of the reason for less regulatory guidance on holding company issuers of senior debt is related to the States’ focus on insurance legal entities (a bottom up approach) vs. a GAAP consolidated approach to available capital that views the group as a single economic construct and eliminates any intra-group double-counting (a top down approach). Further, current guidance does not apply an economic valuation approach which considers how such debt should be characterized when the insurance holding company receives assets that can be allocated to provide capital to the legal entity insurer(s). Surplus notes are generally issued by insurers or mutual holding companies in a holding company structure. They may be issued to insurers within the group or to outside investors. Senior debt is generally issued by non-operating holding companies and is issued to investors that are outside the group (or outside the definition of control within the group). Other issues related to these instruments include the manner in which “subordination” of debt (other than surplus notes) is established, the quality of capital generated, and what becomes of the capital generated via issuance of such debt.

Entity vs. Consolidated view:

In a consolidated calculation the value of intra-group surplus notes or loans are offset and eliminated (i.e. the asset held by the purchaser and the debt reported by the issuer are offset). When surplus notes (or any type of debt) are issued to entities outside the group, consolidated GAAP will treat them as a liability along with any associated accrued interest on the issuer’s balance sheet (See APB 15). Where the proceeds of other debt issued are held within the holding company structure, consolidated GAAP would offset that portion of debt issued against related capital that is held by affiliated entities or retained by the issuer. Any excess debt issues would be treated as a liability of the issuer.

By contrast, in the statutory entity-based calculation where surplus notes are issued intra-group to an affiliated insurer it creates capital value at the issuer level since such obligations are subordinated to policyholder claims, but is capital neutral to the purchaser at the entity level. In the group’s capital structure SSAP 97 eliminates the value from the purchaser’s surplus making the surplus note capital neutral at the group level. In addition, U.S. Risk-based Capital (RBC) assigns an asset risk charge (typically based on holding the note as a Schedule BA asset) to the purchaser. Therefore, the investment carried by the affiliate and any associated capital (e.g. RBC) charge to the affiliated purchaser(s) needs to be addressed in an aggregation approach. Under current SAP, senior or other debt instruments issued by a non-insurance holding company to the insurance company is
generally considered an asset if the purchase of the debt is approved by the domestic regulator and to the extent criteria demonstrating the financial strength of non-insurance holding company is met. Its value would be eliminated under GAAP consolidated statement, however, since the non-insurance holding company would treat it as a liability.

Nature of subordination
For surplus notes, the State-based regulatory framework applies “contractual subordination” in that the subordination provisions to restrict movement of funds from the licensed insurer to repay the note are contained within the language of the note itself. For senior debt issued by a holding company, the State-based regulatory system relies on what is referred to as “structural subordination”. In general, subordination ranks other creditors behind policyholders in priority of repayment. Structural subordination is achieved via regulation of movement of funds between insurers and other entities within the holding company structure. An example of how regulatory practices work under structural subordination is demonstrated in the regulatory review and oversight of stockholder dividends paid to the holding company. Dividends paid to the holding company are generally the primary source of income for holding companies which are then used to service their outside debt.

Treatment of Surplus Notes
Treatment of issuers of surplus notes and holders of surplus notes or capital notes is specified in SSAP #41 as follows:

3. Surplus notes issued by a reporting entity that are subject to strict control by the commissioner of the reporting entity’s state of domicile and have been approved as to form and content shall be reported as surplus and not as debt only if the surplus note contains the following provisions:
   a. Subordination to policyholders;
   b. Subordination to claimant and beneficiary claims;
   c. Subordination to all other classes of creditors other than surplus note holders; and
   d. Interest payments and principal repayments require prior approval of the commissioner of the state of domicile.

9. Investments in capital or surplus notes meet the definition of assets as defined in SSAP No. 4—Assets and Nonadmitted Assets and are admitted assets to the extent they conform to the requirements of this statement. Additionally, the amount admitted is specifically limited to the following two provisions:
   a. The admitted asset value of a capital or surplus note shall not exceed the amount that would be admitted if the instrument was considered an equity instrument and added to any other equity instruments in the issuer held directly or indirectly by the holder of the capital or surplus note.
   b. The surplus note shall be nonadmitted if issued by an entity that is subject to any order of liquidation, conservation, rehabilitation or any company action level event based on its risk-based capital. Subsequent to this nonadmittance, if any of the conditions described ceased to exist, the holder may admit the surplus note at the value determined under paragraph 11. If a surplus note was nonadmitted pursuant to this paragraph, and the surplus note was ultimately determined to be other-than-temporarily impaired, the reporting entity shall recognize a realized loss for the portion of the surplus note determined to be other-than-temporarily impaired, with elimination of a corresponding amount of the previously nonadmitted assets.

In addition, SSAP 97 is referenced in SSAP#41 as follows:

Holders of Capital or Surplus Notes
13. For surplus notes issued and held (directly or indirectly), between insurance reporting entities and subsidiary, controlled and affiliated entities, the guidance in SSAP No. 97 requires adjustment to prevent double-counting of surplus notes. For example, an insurance reporting entity is not permitted to report the issuance of a surplus note as an increase in surplus and have an asset representing an investment in the SCA that includes the issued surplus note (held by an SCA). Pursuant to SSAP No. 97, the “investment in the SCA” shall be adjusted to eliminate the surplus note issued by the direct or indirect parent insurance reporting entity. This treatment shall also apply for instances in which the SCA acquires any portion of outstanding surplus notes issued by the direct or indirect parent through any means (e.g., directly acquired from the parent, acquired through a third-party broker, or via the market.).

SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities
Investment in Preferred Stock or Surplus Notes of a Subsidiary, Controlled and Affiliated Entity
20. Any parent reporting entity that has issued a surplus note, which has been acquired by an SCA (held directly or indirectly), shall adjust the investment in the SCA to eliminate the issued surplus note to prevent double counting of the surplus note...
at the parent reporting entity. Without adjustment, the issued surplus note would be reported both as an increase in surplus by the parent reporting entity, as well as an admitted asset of the parent through the “investment in an SCA.” The surplus note shall also be eliminated for instances in which the SCA acquires any portion of outstanding surplus notes issued by the parent through any means (e.g., directly acquired from the parent, acquired through a third-party broker, or via the market.).

By operation of SSAP97 the value of the surplus note in an affiliate purchaser is eliminated in the RBC roll-up of that entity. However, in the GCC aggregation approach, the group is de-stacked and stand-alone entities are established at their specified accounting values. These stand-alone values will include an asset for the investment in surplus note(s). So in such cases that investment must be eliminated along with any regulatory capital charge where applicable. Thus, surplus notes issued to non-affiliated entities outside of the group create new capital for the group while those issued within the group do not create new capital at the group level.

**Treatment of Senior Debt**

While there is no specific SAP regulatory treatment (independent of GAAP treatment as a liability) for debt issued by a non-operating holding company, it is recognized that in an insurance-led holding company structure that funds needed to repay the holders of the debt may be generated and provided by the insurers in the group in the form of stockholder dividends. Therefore, it is reasonable to recognize the structural subordination described above in considering how to treat the debt for purposes of available capital. However, because the issuance of debt within a holding company structure makes assets available within the holding company system that could be used to help absorb losses originating from the insurer or another entity within the holding company structure for which the group capital calculation attempts to require capital, it may be appropriate to develop criteria within the GCC that permit some amount of subordinated senior debt to be added back to capital.

The Working Group will need to come to a consensus agreement on the most logical way to field test the impact of including structurally subordinated senior debt as additional group capital within the GCC. If this capital resource is to be included, why? If it is to be is to be constrained or capped, to what level and why?

If it can be demonstrated that higher amounts of the debt can be tied to the principle of structural subordination (e.g. a higher percentage of the proceeds were downstreamed to the insurers or entities under similar regulatory supervision as U.S. insurers), then a higher allowance could be considered consistent with the amount of proceeds that are downstreamed to insurers in the group.

It is also important to consider that the base for total available capital under the U.S. insurance regulatory structure is generally lower than what is recognized under consolidated GAAP rules. Therefore, if the addition of subordinated debt to be included as capital is deemed appropriate, a case for a slightly higher allowance, based on regulatory accounting rules combined with the strength of structural subordination may be considered.

**Quality of Capital**

Under SAP (or GAAP) there is no distinction in quality of capital (i.e. tiering) for assets that meet the definition of admitted assets such as surplus notes. Based on this, it seems logical that any other asset values allowed in an aggregation approach should be treated similarly. However, there is such a distinction under U.S. banking rules and there may be under other sectoral rules. So it seems logical to respect the available calculations of the regulators in those sectors.

**Recommendations for an aggregation approach to a GCC:**

1. Surplus Notes – In all cases, treat the assets transferred to the issuer of the surplus note as available capital. If the purchaser is an affiliate, eliminate the investment value from the affiliated purchaser of the surplus note. If the purchaser is an insurer or other regulated entity, eliminate the purchaser’s capital charge (e.g. RBC charge) on the Surplus note investment.

2. Subordinated Senior Debt issued – Recognize structurally subordinated debt as available capital to some degree and only to the extent funded (i.e. any receivables for non-paid-in amounts would not be included for purposes of calculating the allowance). For purposes of recognition both of the following criteria are required to be met:

   a. The instrument must have a fixed term (a minimum of five years at the date of issue or refinance, including any call options).
b. Supervisory approval is required for any extraordinary dividend or distribution from any insurance subsidiary to fund the repurchase or redemption of the instrument. There shall be no expectation, either implied or through the terms of the instrument, that such approval will be granted without supervisory review.

3. For initial field testing:
   a) Construct the initial field testing template so as to collect data on senior debt issued to be included as capital such that a range of caps relative to total available capital can be evaluated to assess the level. For purposes of testing a range of caps as a percentage of total available capital, the total available capital base should be defined as aggregated entity based capital (e.g. SAP available capital for U.S insurers) plus the outstanding value of the senior debt.
   b) In addition to 3a, construct the initial field testing template so as to collect data on debt that includes equity like features (so-called hybrids) and other subordinated debt issued, including the extent that the proceeds are downstreamed to the regulated entities or otherwise used for the benefit of those entities at the time of issuance of the debt instruments, such that an additional cap for these instruments can be evaluated. For purposes of testing an allowance as a percentage of total available capital, the total available capital base should be defined as aggregated entity based capital (e.g. SAP available capital for U.S insurers) plus the outstanding value of the senior debt and hybrids or other subordinated debt.
   c) As one option for field testing, a cap should be tested based on the amount of proceeds of the debt that is downstreamed to the regulated entities or otherwise used for the benefit of those entities at the time of issuance of the debt instruments.
   d) Recognize the proceeds of surplus notes and structurally subordinated senior debt as capital in line with the criteria described above, but respect quality of capital classifications defined by other U.S. sectoral regulators on their regulated entities’ available capital.

4. Other recommendations:
   a) Review and establish appropriate allowance criteria for hybrid debt that recognizes the instruments’ required equity features.
   b) Continue discussion, in consultation with NAIC international team, to maintain consistency on the boundaries of what constitutes structural subordination and how it should be measured.
Commissioner Altmaier stated the purpose of the conference call is to continue discussions about the confidentiality of the group capital calculation (GCC). He stated prior to the Summer National Meeting, he had previously asked NAIC staff to draft an initial memorandum on this topic to allow the Working Group to begin its discussions. He stated during that meeting, the Working Group discussed that initial memorandum briefly, and began some discussions with interested stakeholders. He noted that since that time, additional comment letters have been received on the topic.

Commissioner Altmaier reminded members about the previous discussions as the Summer National meeting, where he reiterated that during the development of the GCC, the Working Group had been clear that once completed, confidentiality would be needed. He stated there had been some discussions about the NAIC model to place such confidentiality provisions, and the Working Group has initially identified the Risk-Based Capital (RBC) for Insurers Model Act (#312) as a logical place to insert language. He stated another issue is preventing rating agencies and other third parties’ access to the GCC. He stated that during today’s conference call, he wants to focus on some of the comments received since the Summer National Meeting.

Michael Gugig (Transamerica), representing a coalition of 10 companies, summarized the basis for some of the more significant elements of their comments on this topic (Attachment Three-B1). He stated that from their vantage point, the need for robust confidentiality protections is absolutely critical to the ultimate success of the GCC in part because of the coalition’s views about deviating from legal entity rules with certain on-top adjustments, which he said they would continue to fight for at the appropriate times. He stated that a GCC for such companies with on-top adjustments will end up with a GCC ratio lower for those companies to which the on-top adjustments would apply than the stated capital in statutory reporting. Mr. Gugig said the coalition thinks the difference between the GCC ratio and the risk-based capital (RBC) ratio would be of significant concern to many stakeholders, not the least of which would be rating agencies or other regulators, or stockholders to the extent that the company has a stock company where policyholders would be confused if they are doing research on an RBC and the GCC ratio. He stated that if the GCC ratio is public information, it is likely to lead to consumer confusion about the actual financial position of the ensure that they have either purchased a policy from or are considering purchasing a policy from. He discussed how there is precedent in the current Insurance Holding Company System Regulatory Act (#440) and said in their draft proposal, the coalition included similar provisions. He stated that their initial view is that Model #440 is the appropriate placement for such protections.

Andrew Vedder (Northwestern Mutual), also representing New York Life and Travelers, summarized the basis for the more significant elements of their comments on the topic (Attachment Three-B2). He stated that while the confidentiality question is important, it should be viewed in the context of the other important decisions to be made about the GCC, including the regulatory filing mechanism that will be chosen. He stated that the NAIC draft memorandum suggests that Model #440 will be that mechanism and they do see merit to that, given that the #440 already addresses supervision of an insurance group, including insurance and non-insurance entities. He noted, however, that given the importance of the regulatory mechanism decision, they would recommend that there be some focus on that question and suggest that a logical next step might be for the Working Group to assess: 1) how it would serve the purposes of the GCC; 2) the relationship to existing regulatory tools; and 3) filing mechanisms under the act in the comparison of alternatives. He stated that their second point is that when it comes to defining the appropriate degree of confidentiality, the question should be viewed in the context of what the GCC is intended to be, which is a new regulatory tool to provide a group-level perspective on capital strength aggregated from legal entity RBC with the adjustments needed to make it a credible group-level measure done in a straightforward and transparent way. These considerations seem more important than how a company’s results may differ from an entity-level view. Commissioner
Altmaier asked for clarification. Mr. Vedder stated that they were operating under the expectation that there will be some regulatory attachment point for the GCC as a requirement and that where it fits in the regulatory toolkit needs to be considered before settling on the confidentiality language.

Bob Ridgeway (America’s Health Insurance Plans—AHIP) summarized AHIP’s comments on the topic (Attachment Three-B3). He noted that throughout the development of this GCC, Commissioner Altmaier has stated that it is more important to get this done right than quickly, and he stated his appreciation for that point. He stated this was particularly the case regarding the confidentiality. He stated that while AHIP cannot say that Model #440 is the perfect place to put language, it cannot think of a better place for it to be. He stated AHIP would also like to give at least a preliminary agreement or support to the coalition of 10 recommended revisions to section eight of Model #440 as the confidentiality language. He discussed that during a prior NAIC project, NAIC legal staff indicated that it was important to keep the confidentiality protections consistent from each NAIC model and from state to state, and AHIP believes that is still good advice for this topic.

Mariana Gomez-Vock (American Council of Life Insurers—ACLI) said the ACLI appreciates the Working Group’s recognition of the need for confidentiality of the GCC. She stated its members just met via conference call on this topic and that it wants to provide a summary of its views. First, the GCC should be a confidential regulatory filing, and the ACLI agrees with the NAIC’s view, as espoused in the May 29 “Proposed Group Capital Calculation” memorandum, that the GCC “will be a confidential regulatory filing” and that state insurance regulators will implement the appropriate confidentiality protections. Confidentiality should also be strictly observed while the GCC is under construction and before it is finalized in a version that stakeholders believe is fit for purpose.

Second, Ms. Gomez-Vock stated that strict confidentiality of the GCC results are necessary because if the GCC results are published by the NAIC or affected companies, the potential for misuse and abuse of the GCC ratio/data is high. Non-regulators who view the numbers will not have insight into the details of the calculation to be able to interpret and understand the GCC results. As a result, there is a strong likelihood the GCC would be misused to make comparisons between companies instead of being used as a sophisticated regulatory tool that is “intended to provide comprehensive accounting and transparency to state insurance regulators and facilitate earlier engagement with company management regarding potential business operations of concern and communication with other insurance regulators.” She noted that the NAIC has historically acknowledged and recognized the potential for the misuse of certain regulatory filings like non-public RBC reports or plans by limiting the ability of companies or state insurance regulators to disclose these reports. The GCC, as contemplated by the NAIC, will be a regulatory tool that helps state insurance regulators “better understand an insurance group’s financial risk profile for the purpose of enhancing policyholder protections.” A high degree of regulatory acumen will likely be necessary to ensure that the results, and the nuances contained within them, are understood in the appropriate context.

Finally, Ms. Gomez-Vock stated that the ACLI has a question. She said they appreciate that the Working Group is giving serious thoughts to the need for robust confidentiality protections and is considering using the Model #440 as a vehicle to incorporate those protections, but the ACLI has a question about the timing and implementation of the confidentiality protections and the timing and implementation of the calculation. Specifically, the NAIC has said it hopes to finalize the GCC in 2019 or early 2020 and begin implementation as soon as possible. The ACLI’s question is: How does the NAIC plan to handle the potential discrepancies between the two timelines? If the goal is to finalize the GCC and begin implementation in 2020, how does that affect the placement and implementation of the necessary confidentiality protections? Are we setting up a scenario where the GCC is ready to be implemented but the confidentiality protections have not been incorporated into Model #440 yet, much less adopted into state law yet? She stated the ACLI is not opposed to including the confidentiality protections in Model #440, but it believes it would be beneficial to have a discussion on the implementation of the GCC and confidentiality protections, and what the plan is to ensure that the protections are in place if the NAIC begins implementing the GCC prior to the adoption of Model #440 amendments. It may also be appropriate to consider a vehicle other than the HCA, and just in case, the ACLI wants the confidentiality and placement discussions to proceed hand in hand.

Commissioner Altmaier responded that it was a good question and stated he believes Mr. Slape touched upon this issue at the Summer National Meeting. He stated that there probably is a little bit of misalignment between the two timelines but that he sees a duel track approach to where progress is made on both during 2020 to where they become aligned once the GCC is completed. He also talked about how state insurance regulators have done things in the past with respect to, for example, the Own Risk and Solvency Assessment (ORSA) pilot project, where examination statutes were used in the interim.

Mr. Barlow stated he was confused by the comments from Mr. Vedder from the standpoint that the NAIC is not planning to create a model law with authority for the GCC. Commissioner Altmaier responded that he does not envision a group capital law like the RBC model law, which establishes thresholds under which regulatory regulators could act. He stated he believes
Mr. Vedder was suggesting that if the intent is for state insurance regulators to require all their insurers to provide a copy of their GCC, there might need to be somewhere in a model that that is a required filing. Mr. Slape agreed with Commissioner Altmaier and noted how certain ratios were developed using data supplied by annual statement filings required by law. He said the GCC would need a specific statutory framework on which to collect data. He also agreed that the work can be dual tracked in some respects as not to distract the GCC work. Commissioner Altmaier asked Mr. Vedder if he agrees with others on the non-disclosure issue; not only should the calculation be confidential when it was given to state insurance regulators, but also to have prohibition placed upon them so that insurers are not permitted to share their calculation with someone like a rating agency. Mr. Vedder responded that when it’s taken to something like rating agencies, it does get more complicated because rating agencies are going to have their own tools, and they do receive confidential information from insurers already. He stated he agrees with the idea that it is not something that companies should be advertising. However, he said he considers the GCC a relevant tool and rating agencies ask about relevant tools and including things like the Risk Management and Own Risk and Solvency Assessment Model Act (#505).

Mr. Gugig responded that Transamerica agrees with Mr. Slape but with respect to the rating agencies, those are exactly the type of entities that Transamerica referred to when it talked about the inability to understand. He stated that there are lots of nuances that state insurance regulators would understand that he does not think even rating agencies would. He said Transamerica thinks that rating agencies might use the information to publicly create winners and losers.

Commissioner Altmaier stated that he would work with NAIC staff to update the memorandum to reflect some of the conversations and bring back for discussion on a future conference call.

Having no further business, the Group Capital Calculation (E) Working Group adjourned.

Re: August 3, 2019 Working Group Discussion of Group Capital Calculation Confidentiality

Dear Commissioner Altmaier:

On behalf of a coalition of ten companies (Athene Holding Ltd., Brighthouse Financial, Global Atlantic Financial Group, Jackson National, Lincoln Financial, National Life Group, Pacific Life, Protective Life, Reinsurance Group of America, and Transamerica; collectively “the Coalition”), we write in advance of the August 3, 2019 Group Capital Calculation Working Group (GCCWG) meeting to provide our Coalition’s initial thoughts on the need for significant confidentiality protections once the Group Capital Calculation (GCC) becomes final. The Coalition greatly appreciates the opportunity to engage with the GCCWG and interested stakeholders regarding the confidentiality issue.

Initially, we want to make clear that the Coalition continues to strenuously urge the GCCWG to create a GCC that is faithful to the legal entity rules that NAIC has itself adopted through rigorous processes, and which state legislatures have in large part adopted in law. State regulators should avoid creating a complex and costly “dual system,” with one set of solvency measures at the legal entity level and a somewhat different set of measures at the group level. Moreover, we believe that international regulators may misunderstand the import of a GCC that disregards current capital rules (such as those for XXX/AXXX captives). Some will likely ask why the NAIC feels the need to reassess capital measures that insurers hold in accordance with state laws.

A. Broad Confidentiality Protections Are Necessary

The GCC for each group should receive the highest level of confidentiality permitted by law. The GCCWG has repeatedly made clear that the GCC is not intended to create a new capital requirement or standard. Instead, it is merely designed to be “one tool in the toolbox” for regulators to assess how capital at the group level might impact regulated insurance companies. Thus, we see no legitimate reason for regulators, the NAIC, insurers or other entities to be able to disclose any particular group’s GCC for any non-regulatory purpose.

We believe that on-top adjustments being considered by the GCCWG increase the risk of harmful disclosure. As we have previously pointed out in comment letters and conversations with GCCWG members, on-top adjustments in the GCC create “winners” and “losers.” The “winners” would benefit from an optical windfall, while the perceived financial strength of the “losers” will be undermined.
“Winners” could then attempt to use the GCC as a competitive weapon by disclosing their own results, implicitly opening non-disclosing groups to criticism and scrutiny from interested parties. For example, if a company were to disclose its GCC to rating agencies, analysts, or the general public, it would likely prompt those entities to pressure other groups to disclose their own GCC ratios. This would be unfair to insurers that have done nothing untoward, but which are nonetheless among the “losers.”

Therefore, disclosure of any group’sGCC outside the regulatory community would foster a competitive imbalance, undermining the NAIC’s stated mission of “facilitating...an effective and efficient marketplace for insurance products.”\(^1\) We therefore urge the GCCWG to adopt strict confidentiality protections that would preclude disclosure of any group’s GCC outside the regulatory community, whether by regulators, insurers, insurance groups or others.

**B. Proposed Holding Company Act Amendments To Ensure GCC Confidentiality**

We believe that the NAIC Model Insurance Holding Company System Regulatory Act (“Holding Company Act”) is likely to be the preferred place to address GCC confidentiality as well as a prohibition on disclosure of the GCC and resulting Group Capital Ratio. Our reasons include that the Holding Company Act: (1) is referenced within the NAIC’s May 29, 2019 GCC report; (2) is the only model act that addresses both an insurer and other members of an insurance group; and (3) already includes authority for a regulator to examine non-insurer members of an insurance holding company system. To this end, we are providing our preliminary thoughts regarding possible changes to Section 8 (Confidentiality) of the Holding Company Act.

Our proposed language draws from and strengthens confidentiality provisions in other NAIC models. One such model is the RBC for Insurers Model Act, which includes a specific prohibition on public disclosure/advertising of RBC ratios. Because the NAIC describes the GCC as an “RBC aggregation methodology” and incorporates the RBC throughout the calculation, incorporating confidentiality provisions from the RBC Model Act seems logical.

Another model from which we propose to borrow language is the ORSA Model Act. Given the sensitivity of ORSA information, the ORSA model includes an enhanced level of confidentiality protection. The GCC is likely to be at least as commercially sensitive as ORSA.

***

In conclusion, the Coalition respectfully submits that, because the GCC may deviate from how available and required capital is calculated under legal entity rules and thus would

---

almost certainly lead to confusion and misunderstanding by non-regulatory stakeholders, the most robust possible confidentiality protections are warranted.

The Coalition appreciates the opportunity to provide a summary of its position on confidentiality in advance of the National Meeting. We look forward to engaging with the GCCWG on this important issue.

Sincerely,

Model 440 – Insurance Holding Company System Regulation Act

Recommended Revisions

Section 8. Confidential Treatment: Prohibition on Announcements

A. Documents, materials or other information in the possession or control of the Department of Insurance that are obtained by or disclosed to the commissioner or any other person in the course of an examination or investigation made pursuant to Section 6 and all information reported or provided to the Department of Insurance pursuant to Section 3B(12) and (13), Section 4, Section 5 and Section 7.1 shall be confidential by law and privileged, shall not be subject to [insert open records, freedom of information, sunshine or other appropriate phrase], shall not be subject to subpoena, and shall not be subject to discovery or admissible in evidence in any private civil action. However, the commissioner is authorized to use the documents, materials or other information in the furtherance of any regulatory or legal action brought as a part of the commissioner's official duties, but shall seek to maintain the confidentiality of such documents during the course of any such regulatory or legal action. The commissioner shall maintain the confidentiality of the group capital calculation and Group Capital Ratio. With respect to all other documents, materials or other information covered by this paragraph, the commissioner will not otherwise make such the documents, materials or other information public without the prior written consent of the insurer to which it pertains unless the commissioner, after giving the insurer and its affiliates who would be affected thereby notice and opportunity to be heard, determines that the interest of policyholders, shareholders or the public will be served by the publication thereof, in which event the commissioner may publish all or any part in such manner as may be deemed appropriate.

B. Neither the commissioner nor any person who received documents, materials or other information while acting under the authority of the commissioner or with whom such documents, materials or other information are shared pursuant to this Act shall be permitted or required to testify in any private civil action concerning any confidential documents, materials, or information subject to Subsection A.

C. In order to assist in the performance of the commissioner's duties, the commissioner:

(1) May share documents, materials or other information, including the confidential and privileged documents, materials or information subject to Subsection A, with other state, federal and international regulatory agencies, with the NAIC and its affiliates and subsidiaries, with any third-party consultants, and with state, federal, and international law enforcement authorities, including members of any supervisory college described in Section 7, provided that the recipient agrees in writing to maintain the confidentiality and privileged status of the document, material or other information, and has verified in writing the legal authority to maintain confidentiality.

(2) Notwithstanding paragraph (1) above, the commissioner may only share confidential and privileged documents, material, or information reported pursuant to Section 4L with commissioners of states having statutes or regulations substantially similar to Subsection A and who have agreed in writing not to disclose such information.

(3) May receive documents, materials or information, including otherwise confidential and privileged documents, materials or information from the NAIC and its affiliates and subsidiaries and from regulatory and law enforcement officials of other foreign or domestic jurisdictions, and shall maintain as confidential or privileged any document, material or information received with notice or the understanding that it is confidential or privileged under the laws of the jurisdiction that is the source of
the document, material or information; and

(4) Shall enter into written agreements with the NAIC and any third-party consultant governing sharing and use of information provided pursuant to this Act consistent with this subsection that shall:

(i) Specify procedures and protocols regarding the confidentiality and security of information shared with the NAIC and its affiliates and subsidiaries or a third-party consultant pursuant to this Act, including procedures and protocols for sharing by the NAIC with other state, federal or international regulators. The agreement shall provide that the recipient agrees in writing to maintain the confidentiality and privileges status of the documents, materials or other information and has verified in writing the legal authority to maintain confidentiality;

(ii) Specify that ownership of information shared with the NAIC and its affiliates and subsidiaries or a third-party consultant pursuant to this Act remains with the commissioner and the NAIC’s or a third-party consultant’s use of the information is subject to the direction of the commissioner:

(iii) Prohibit the NAIC or third-party consultant from storing the information shared pursuant to this Act in a permanent database after the underlying analysis is completed;

(iv) Require prompt notice to be given to an insurer whose confidential information in the possession of the NAIC or a third-party consultant pursuant to this Act is subject to a request or subpoena to the NAIC or a third-party consultant for disclosure or production; and

(v) Require the NAIC and its affiliates and subsidiaries or a third-party consultant to consent to intervention by an insurer in any judicial or administrative action in which the NAIC and its affiliates and subsidiaries or a third-party consultant may be required to disclose confidential information about the insurer shared with the NAIC and its affiliates and subsidiaries or a third-party consultant pursuant to this Act.

(vi) In the case of an agreement involving a third-party consultant, provide for the insurer’s written consent.

D. The sharing of information by the commissioner pursuant to this Act shall not constitute a delegation of regulatory authority or rulemaking, and the commissioner is solely responsible for the administration, execution and enforcement of the provisions of this Act.

E. No waiver of any applicable privilege or claim of confidentiality in the documents, proprietary and trade-secret materials or information shall occur as a result of disclosure to the commissioner under this section or as a result of sharing as authorized in Subsection C.

F. Documents, materials or other information in the possession or control of the NAIC or third-party consultants pursuant to this Act shall be confidential by law and privileged, shall not be subject to [insert open records, freedom of information, sunshine or other appropriate phrase], shall not be subject to subpoena, and shall not be subject to discovery or admissible in evidence in any private civil action.

G. It is the judgment of the legislature that the group capital calculation and resulting Group Capital Ratio is a regulatory tool for assessing group risks and capital adequacy, and is not intended as a means to rank insurers or insurer groups generally. Therefore, except as otherwise may be required under the provisions of
this Act, the making, publishing, disseminating, circulating or placing before the public, or causing, directly or indirectly to be made, published, disseminated, circulated or placed before the public, in a newspaper, magazine or other publication, or in the form of a notice, circular, pamphlet, letter or poster, or over any radio or television station, or in any other way, an advertisement, announcement or statement containing an assertion, representation or statement with regard to the group capital calculation or Group Capital Ratio of any insurer or any insurer group, or of any component derived in the calculation, by any insurer, agent, broker or other person engaged in any manner in the insurance business would be misleading and is therefore prohibited; provided, however, that if any materially false statement with respect to the group capital calculation or resulting Group Capital Ratio or an inappropriate comparison of any other amount to an insurer’s or insurance group’s group capital calculation or resulting Group Capital Ratio is published in any written publication and the insurer is able to demonstrate to the commissioner with substantial proof the falsity of such statement, or the inappropriateness, as the case may be, then the insurer may publish an announcement in a written publication if the sole purpose of the announcement is to rebut the materially false statement.

Re: Confidentiality of GCC Results

Commissioner Altmaier:

The issue of confidentiality protection of the group capital calculation (“GCC”) has been presented for discussion by the Group Capital Calculation Working Group (the “Working Group”). Arriving at the appropriate answer to this question is integral to regulators receiving high quality information from insurance groups. As continued supporters of the NAIC’s development of a robust capital calculation, we appreciate the opportunity to comment on this issue. An appropriately designed GCC that promotes comparable and consistent approaches across companies will be a useful supervisory tool to assist lead states in analyzing the financial condition of insurance groups by complementing entity-based solvency requirements. While the issue of appropriate confidentiality should be considered with any new supervisory tool, a narrow or premature focus on confidentiality could distract from resolution of all the other important issues that need to be addressed to develop a credible capital standard. Confidentiality must be approached and sequenced within the broader development process, taking into consideration a variety of interdependent issues, including the supervisory purpose, the relationship to existing regulatory tools, the statute or regulation under which the filings would be made (i.e., the regulatory filing mechanism) and how confidentiality is provided within statutes or regulations.

We have reviewed the draft memorandum from the Working Group to the Group Solvency Issues Working Group (“GSIWG”), including its recommendation that the Insurance Holding Company System Regulatory Act (#440) be revised to incorporate appropriate confidentiality protections for the GCC. The memorandum alludes to other key decisions that remain with respect to the GCC, including several with respect to the filing mechanism. We believe that a determination as to the appropriate filing mechanism is a critical pre-condition that should be discussed and agreed upon before language regarding confidentiality can be developed. Different confidentiality considerations may apply depending on the regulatory framework that is ultimately chosen to facilitate filing of the GCC with regulators.
When the Working Group discusses the appropriate level of confidentiality protections, we would respectfully suggest that it consider the appropriate level of confidentiality for the results of a regulatory tool that provides insight into group-level risk, and how that should differ, if at all, from the confidentiality applied to other information provided under the Holding Company Act. One of the advantages of the GCC over consolidated group capital methods is that it aggregates existing entity-level RBC results, with appropriate adjustments, in a straightforward and transparent manner. The resulting GCC will be, as members of the Working Group have noted, another tool in the regulatory toolbox that assists with group-wide surveillance and solvency regulation. We view these considerations as more relevant to the determination of an appropriate degree of confidentiality than speculation as to whether and how the results will differ from a legal-entity view.

We understand that the Working Group may be concerned with ratings agencies seeking to access GCC results. Even if the Working Group were to draft confidentiality protections that would prevent groups from sharing their GCC results with ratings agencies, we would still expect that those agencies could conduct their own calculations that would approximate the GCC’s results or provide a similar group-level perspective on capital.

Our companies will be pleased to provide further input into this process as the Working Group completes the work necessary to establish a robust GCC, including resolving important issues such as the appropriate degree of confidentiality, as well as the related and equally important issue of the filing mechanism for GCC results.
We are grateful for your time and attention to our comments. If you would like to discuss this letter with us, please let us know.

Re: August 3, 2019 Discussion of Group Capital Calculation Confidentiality

Dear Commissioner Altmaier;

As several companies, including some of AHIP’s members, engage in the Group Capital Calculation Field Testing, AHIP and its members appreciate the continuing cooperation displayed by you and other regulators and staff on the Working Group, and we welcome the opportunity to offer comments to the proposal concerning confidentiality which has been set out as a draft memo to Justin Schrader, Chair of the Group Solvency Issues (E) Working Group.

We have reviewed the letter of July 30, 2019, from the Coalition, and generally support the views expressed there. Although we also believe that the confidentiality language should be consistent not only from NAIC Model to NAIC Model, and also from state to state in their enactments of those Models, we are open to discussing some changes to the confidentiality language in the Holding Company Act, not only to increase the consistency between it and the confidentiality protections in the ORSA Model, but also to address any specific gaps that have come to light in recent years.

What we cannot support, however, would be any initiative which could weaken or otherwise restrict the strongest possible confidentiality protections for the GCC’s calculations or any final figures resulting from them.

We look forward to continuing the cooperative atmosphere set by you and your fellow regulators as we continue working on this issue, and we hope you will let us know if there is further assistance we can offer.
Sincerely,

Bob Ridgeway
America’s Health Insurance Plans
NAIC GROUP CAPITAL CALCULATION FIELD TESTING
INITIAL REVIEW OBSERVATIONS AND DATA SUMMARIES
December 6, 2019

Status of Field Test

- 32 Submissions Reviewed by NAIC (1 Volunteer withdrew)
- 28 Review Summaries Provided to / Discussed with Lead—States
- 14 Submissions Presented and Discussed with Volunteer
- NAIC / Lead-States will Schedule Calls with Remaining Volunteers (est. completion before 1/15/2020)

Field Test Feedback (Template and Instructions)

- Comments and Observations Thus Far on:
  - Template
    - Additions / deletions
    - Formula revisions
  - Instructions:
    - Additions and clarifications

Schedule 1

- Instructions
  - Clarify required entries in Schedule 1B, Column 16 (Treatment of Entity for RBC purposes)
  - Clarify instructions or eliminate Section 1D, Column 4 (Notional Value of Contract)
  - Add / delete instructions for new data columns and delete for any that are removed
  - Clarify definition of regulated vs. non-regulated financial entity
  - Clarify Instructions for Tests in Schedule 1E
- Template
  - Add Columns in Schedule 1C to report stand-alone revenue and equity amounts for each entity (+ instructions). This will avoid double counting in the tests applied to non-insurance entities
  - Remove the following data:
    - Financial strength ratings?
    - Assumed and ceded premiums?
  - Add the following data:
    - Dividends Paid and Received
    - Capital Contributions Paid and Received
    - Inter-group reinsurance assumed and ceded
    - Income/other data for insurers as well (for trending/better picture of group)

© 2019 National Association of Insurance Commissioners
Inventory Tab

- Instructions
  - Enhance instructions regarding carrying values to be reported in Columns 1 and 2 of Inventory B (Parent and Local carrying values)
  - Clarify when values should be reported in Inventory C for non-insurance / non-financial entities including holding companies
  - Clarify where and which intercompany receivables and payables should be reported in Inventory C.
  - Clarify reporting of prescribed and permitted practices of subsidiaries in Inventory B and C, columns 9 and 10
  - Clarify handling of de-stacking of Schedule BA financial affiliates and intragroup surplus notes
- Template
  - Add columns (+ instructions) in Section 1B for GAAP to SAP (or other regulatory) adjustments
  - Address (+ instructions) cases where a foreign regulator does not impose an insurer entity capital requirement.
  - Add columns (+ instructions) in Section 1B and 1C for foreign currency adjustments to U.S. dollars (may be better to handle in Schedule 1)

Capital Instruments

- Instructions
  - Clarify what should be reported in Section A, column 9 ("Amount recognized or credited as capital in local regulatory regime")
  - Clarify what should be reported in Section A, column 10 ("Amount Down-streamed") and clarify criteria for “tracking”
  - Clarify instructions as relates to debt issued to affiliates (avoid double hit for captive adjustments)
- Template
  - Adjust formulas to bring the correct amount of outstanding debt into the calculation base in Section B.
  - Review allowance options for hybrid debt
  - Cleaner separation of intra-group debt vs. debt issued to parties outside the group
  - Include all debt and improve tie with Schedule 1C, Column 12

XXX / AXXX Assets and Liabilities

- Template
  - Very few comments on the template and instructions
    - Recommendation to delete tax affecting the calculation
  - Most comments suggested information should not be included in ratio, but more as FYI

Questions and Other Information

- Instructions
  - Materiality information TBD
  - Should there be a materiality threshold for non-insurance / non-financial Schedule BA affiliates (Similar to such entities in Schedule D)?
- Template
  - Add a description of debt instruments listed in the Capital Instruments Tab that are reported as other than senior debt or hybrid debt.
  - Add question on intangible assets held by positive value Hold Co’s + instructions
Scalors

- Instructions
  - TBD

- Template
  - Separate alternative charges for Hold Cos from other scaled values for foreign insurers

Guide to Hi-Level Charts

Base GCC Ratio

- All Entities
- All Entities at Values Reported in the Inventory Tab
  - Trend test calibration for RBC filers and non-insurance / non-financial subsidiaries (300% x ACL)
  - Available capital from Inventory B, Column 8 (negative values included)
  - Capital calculation from Inventory C, Column 8 (floored at zero)
  - All permitted and prescribed practices allowed
  - All non-operating hold cos at zero capital calculation
  - All values foreign insurance values scaled at 100%
  - Captives at reported regulatory values
  - No additional allowance for senior / hybrid debt

Attach Chart A - Base GCC Ratios
Defining the Insurance Group

- Field Test includes the ultimate controlling party and all entities within the group.
  - Only non-insurance / non-financial entities without material risk that are outside the defined insurance group may be marked as ‘exclude’.
- Current Definition of Insurance Group

  An insurance Group is comprised of the head of the Insurance Group (insurer, mutual holding, or other holding company) and all entities under its direct or indirect control and includes all members of the Broader Group that exercise significant influence on the insurance entities and/or facilitate, finance, or exercise the insurance operations.

  An Insurance Group may be:
  - a substantial part of a bank-led or securities-led financial conglomerate; or
  - a subset of a wider group.

- Materiality and Excluding Non-insurance / Non-financial entities
  - No single suggestion for a threshold-led consensus from the volunteers
  - 17 volunteers excluded some amount for non-material entities (Range from <1% of Available Capital to 46%)
  - Range of results is shown in Chart B

- Treatment of Non-insurance / Non-financial Entities
  - Owned by insurers (may not be excluded) – consider not de-stacking due to coverage issues in RBC
  - Owned by non-insurers within defined group (may not be excluded)
  - Owned outside the defined insurance group (may be excluded based on materiality threshold)
  - Tested using 5 alternative equity and revenue-based measures – See Chart C

Included Business; Stock Companies Only [Chart B Hi-Level]

- Impact of removing ‘Excluded’ entities is small for most Volunteers but leads to a large reduction for a small number of them.

Range of NI Tests [Chart C Hi Level]

- Tests 2a is reported at 2 calibration levels (12% Scaled to RBC CAL & Revenue and 12% Scaled to RBC Trend Test & Revenue
- Treatment of Non-insurance / Non-Financial entities is material for three volunteers and not material for the rest.
- Of these three entities, one sees sizable benefit from the revenue-based tests (i.e. . 1a, . 7b and 2a) and
- The average impact is positive. Tests based on carrying value (i.e. . 25 and 3) have less impact on all.
Banks and Other Financial Entities

- Banks are valued at regulatory available capital and regulatory capital requirements (risk weighted assets calculation) [Chart D]
- Other Financial Entities (e.g., asset managers) were run through several equity and revenue-based tests
  - Chart E displays the range of results for the calculations that were tested

Chart D Bank

- There are 9 volunteers with banking operations. Of those, 5 have more than 1% of available capital in banking entities.
- Capital ratios for banking within these volunteers are in range of 100-300%.

Non-Bank Range of Fin Tests [Chart E Hi-Level]

- The revenue based tests tend to lead to higher charges than the BACV and notional value based test.

Treatment of Hold Cos

- Non-operating Hold Cos (Ungrouped)
  - Negative values included
  - Zero Capital charge
  - Alternative charge @ 22.5% x stand-alone value
  - Chart F indicates impact of 22.5% charge on the OCC ratio
- Operating Hold Cos
  - Treated based on operating activities (and included with data on applicable entity type)
  - Grouped Hold Cos (Excludes regulated insurance and bank entity Hold Cos)
    - Categorized based on entity type of grouped subsidiaries and included with data on applicable entity type
    - Must all conduct similar operating activities and reported under same basis of accounting

Impact on Capital Ratio of 22.5% Charge on HC (floored at 0)
Perm/ Prescribed Practices

- Permitted and prescribed practices can both increase and decrease capital ratios.
- In dollar terms, the bulk of the impact was in P&C entities. As a %, the entity category most impacted was Property & Casualty Insurers (not GAAP Captives)
  - Does not include asset adjustments for AGAII Captives that are shown separately.

Capital Instruments (1)

- 23 Volunteers Issued Debt other than Surplus Notes from either Top or Downstream Hold Cos
- Tested Allowances from 20% to 100% for Senior Debt and 10% to 100% for Other Debt
- Ratio Of All Listed and Qualifying (i.e. at least 5-year term) Debt to Equity Ranges was calculated in two ways
  - The straight debt to equity ratio ranges from 1% to 95%
  - When the qualifying debt is included in the denominator, the range is 1% to 48% (7 > 30% / 3 = 40%)
- Chart D shows the average ratio of debt to base available capital for the individual groups for debt adjusted (with debt included in the denominator)

Capital Instruments EXAMPLE (2)

- Some Volunteers’ Description of Debt Listed as “Other” or “Capital Instruments” is Still Required
- Chart H shows the impact on the GCC ratio for stock groups by Industry Segment using (i) expanded ratio definition and applying a sample allowance of 30% for senior debt and 15% of other debt and (ii) No limit on debt

Note: Allowing Senior Debt may require reconsideration of capital calculation for hold cos.

XXX / AXXX

- Test 3 generally considered most favorable
  - Uses economic reserve approved by regulator on captives
  - Uses factor approach as proxy for companies not modeling
- Test 1 factor for XXX considered somewhat reasonable
- Test 1 factor for AXXX less desired but at least recognizes reserve likely overstated
- Test 2 not able to be completed by many companies due to lack of data (would require estimations);
- Test 4-Despite some negative feedback on Test 1 factor approach, only 5 utilized a different factor, and none pushed it as being right for rest of industry
- Test 5-Only 5 companies provided (GAAP or GAAP based)
22 Volunteers Reported Insurance Entities Located in Non-U.S. Jurisdictions > 1% of Available Capital. The range was from 1.9% - 83.8%.
- 13 Volunteers Reported Insurance Entities Located in Non-U.S. Jurisdictions > 10% of Available Capital (9 reported > 30%).
- 4 scaling methods were tested – 2 at RBC Trend Test Level (300% x ACL) and 2 at RBC CAL.
- Over 90% of entities (as measured by available capital) were mapped to named entity category. Remainder were mapped to Region A, B, etc.
- Some of these regimes do not have req’d capital; in such cases suggestion made to set “calc capital” = “available capital.”

NOTE: One suggestion to use Group Specific (Rather than U.S. Industry) Average RBC Ratio and Excess Ratio compared to Jurisdiction Ratios to Scale.

- Chart above shows impact of scalar options for all volunteers and the subset that are likely IAIG’s.
- Main driver of the differences is calibration level: Premise 1 and Premise 2 are at “Trend Test” level (i.e. 300% of ACL) while Premise 3 and Premise 4 are at Company Action Level (i.e. 200% of ACL).
- Likely US ‘Internationaly Active Insurance Groups’ are actually less sensitive, on average, to scalars than other volunteers. This is mostly due to inclusion of non-US domiciled insurers in the sample.
Other Input Provided

- Consider Materiality Threshold for Schedule BA Non-financial Affiliates
- Do Not De-stack Non-insurance / Non-financial entities from RBC Filers
- RBC Equity Charges are Too High for Non-insurance / Non-financial Affiliates Outside the Defined Insurance Group.
- Consider Other Options for Non-RBC Filing U.S. Insurers
- Consider a capital charge on Des-stacked Hold Cos material positive values (Due to investment risk or holding of significant intangible assets)

Template Revisions Since Version 2

- Fixes / Changes to address data quality:
  - Added separate row to ‘Calc.2’ to allow adjustment to calculated capital due to permitted / prescribed practices
  - Several adjustments to fill in missing data: used ‘Revenue’ as proxy for ‘Revenue during year of greatest loss’ and ‘Average 3 yr. Revenue’; ‘Adj Carrying Value’ for Equity and BACV, etc.
  - Any capital instrument with blank/error in maturity date was assumed to be included
- Suggested improvements:
  - Req’d capital should be entered Company Action Level and then multiplied by 1.5 in the template
The Mortgage Guaranty Insurance (E) Working Group of the Financial Condition (E) Committee met in Austin, TX, Dec. 8, 2019. The following Working Group members participated: Kevin Conley, Chair and Rick Kohan (NC); Kurt Regner (AZ); Virginia Christy (FL); John Rehagen (MO); Joe DiMemmo and Melissa Greiner (PA); Miriam Fisk (TX); and Amy Malm (WI).

1. Exposed the Mortgage Guaranty Capital Model

Mr. Conley indicated that the goal of the mortgage guaranty capital model is to construct a counter-cyclical model similar to risk-based capital (RBC). Further, he indicated that the capital model is intended to help the state insurance regulator understand the relative capital position and strength of the mortgage insurer. He indicated that in late 2017, Milliman was brought on to audit the original work conducted by Oliver Wyman to determine if anything could be salvaged. He stated that by the summer of 2018, the Working Group moved ahead and asked Milliman to develop a new capital model. He commented that the Working Group asked Milliman to utilize the Oliver Wyman data set in order to summarize the data and drop it into an excel format so that North Carolina could follow along and build the capital model block by block, allowing for continuous state insurance regulator involvement, transparency and buy-in. He indicated that North Carolina initiated a lot of collaboration with Milliman to get to this point in the development process. He commented that he believes that the capital model predicts ultimate capital losses accurately on a book year and accurately across numerous years as determined through a testing process. He indicated that the Working Group was introduced to the concept of State Regulatory Mortgage Insurer Capital Standards (SRMICS) in September of this year. He indicated that the Working Group is implementing revisions to the capital model through the interaction with the industry trade group. Ed Hartman (Genworth Financial) commented that the original intention was to eliminate the 25:1 risk-to-capital standard and replace the contingency reserve. He stated that given the implementation of the new capital model, these two capital requirements should be evaluated to determine if they are still necessary. He commented that there is also a request for additional blanks reporting of sensitive data from a competitive perspective and would rather not have this data available to the public but make them prescribed schedules. Mr. Conley indicated that a letter was received from the industry trade group that addresses these concerns among other observations and suggestions by the industry trade group. He stated that the Working Group has not yet had time to review the letter and discuss.

Following the update on the capital model, Mr. Regner made a motion, seconded by Mr. DiMemmo, to expose the mortgage guaranty capital model and supporting documentation for a 45-day public comment period. The motion passed unanimously.

2. Exposed Model #630 and the Mortgage Guaranty Insurance Standards Manual

Ms. Malm commented that Wisconsin has submitted revisions to both the Mortgage Guaranty Insurance Model Act (#630) and the Mortgage Guaranty Insurance Standards Manual. She stated that there are four major areas of change:

- RBC standards were removed and replaced them with the SRMICS.
- Technical details, such as those related to underwriting standards, were removed from Model #630, due to the frequency of changes in best practices, and added to the Mortgage Guaranty Insurance Standards Manual.
- Reinsurance requirements were changed to make them compatible with the Credit for Reinsurance Model Act (#785).
- Dividend restrictions were rewritten to improve clarity and make them more enforceable.

Ms. Malm indicated that SRMICS establishes a capital requirement, based on a risk-modeled ultimate loss estimate, at the level of each insured mortgage loan based on the risk characteristics and economic conditions at origination. Further, she indicated that there are adjustments made at the book year level and the aggregate level of the calculation, but the foundation of the capital requirement is established at the loan level.

Ms. Malm stated that the economic factor that is applied at the individual mortgage loan level compares the rolling four-year change in state-level per capita income relative to the four-year change in state-level home prices at the time the mortgage loan...
is originated. By so doing, the capital requirement addresses geographic concentration risk and recognizes variations in market conditions across the U.S. Ms. Malm stated that this is far more effective in addressing geographic concentration risk than any fixed percentage limitation on the amounts of writings in any one state.

Ms. Malm commented that the SRMICS is economically countercyclical. She continued that the capital requirements rise as home prices become less affordable relative to per capita incomes, and very substantially so when there is indication of a housing market bubble. Further, she stated that this is intended to prompt mortgage insurers to become progressively more selective in their underwriting standards. Conversely, as home prices decline and become objectively more affordable relative to per capita incomes, capital requirements decline. She commented that while the viewpoints of members of this Working Group differed, a consensus was reached to maintain the 25:1 risk-to-capital ratio from the previous 1976 version of Model #630 as a floor below which the capital requirement could not go. She also stated that the reduction in capital requirements occasioned by a decline in home prices, which generally coincides with adverse economic conditions, is intended to encourage mortgage insurers to become prudently more expansive in their underwriting standards and thereby aid economic recovery.

Ms. Malm commented that the SRMICS Mandatory Control Level Event, which has been set at a ratio of total adjusted capital to SRMICS of 50% or less, is where the domiciliary commissioner must take actions necessary to place the company in receivership. She stated that this would not be the first option explored in such a circumstance. She indicated that a capital plan would be prepared by the company; the domiciliary commissioner would be either conducting an examination or an intensive analysis, and there is the likelihood of a corrective order being issued by the domiciliary commissioner. She concluded that the fact of the insurer’s failure to maintain its capital above the SRMICS is by itself sufficient grounds for receivership.

Ms. Malm commented that the SRMICS is a capital requirement with definite consequences. Although the domiciliary commissioner is not mandated to do so, a mortgage insurer whose capital falls below its SRMICS could be placed into receivership. She stated that this would not be the first option explored in such a circumstance. She indicated that a capital plan would be prepared by the company; the domiciliary commissioner would be either conducting an examination or an intensive analysis, and there is the likelihood of a corrective order being issued by the domiciliary commissioner. She concluded that the fact of the insurer’s failure to maintain its capital above the SRMICS is by itself sufficient grounds for receivership.

Ms. Malm commented that by the time a mortgage insurer were to fail its SRMICS, the domiciliary commissioner should have assembled a team to assist insurance department staff in the assessment of the company’s financial condition, risk exposures, and remediation plans, so that the company’s financial condition is either restored or there can be an orderly run-off, whether that is with or without a receivership proceeding. She stated that given the lead times required under responsible government contracting practices, Model #630 authorizes the domiciliary commissioner to retain consultants once the ratio of total adjusted capital to SRMICS is 125% or less. She indicated that consultants could also be retained by the domiciliary commissioner if an examination or investigation has indicated material deficiencies in underwriting procedures or in the Mortgage Guaranty Quality Control Program.

Ms. Malm commented that the SRMICS Mandatory Control Level Event, which has been set at a ratio of total adjusted capital to SRMICS of 50% or less, is where the domiciliary commissioner must take actions necessary to place the company in receivership. She stated that as with the Mandatory Control Level under the RBC structure, there is provision to allow the domiciliary commissioner to forego actions for up to one year after a SRMICS Mandatory Control Level Event if there is a reasonable expectation that the capital deficiency could be eliminated in a reasonable period of time. She countered, as a practical matter, that this would effectively require broad acceptance from commissioners throughout the U.S. She stated that the insurer must stop writing new business following an SRMICS Mandatory Control Level Event.

Ms. Malm indicated that SRMICS is a capital requirement with definite consequences. Although the domiciliary commissioner is not mandated to do so, a mortgage insurer whose capital falls below its SRMICS could be placed into receivership. She stated that this would not be the first option explored in such a circumstance. She indicated that a capital plan would be prepared by the company; the domiciliary commissioner would be either conducting an examination or an intensive analysis, and there is the likelihood of a corrective order being issued by the domiciliary commissioner. She concluded that the fact of the insurer’s failure to maintain its capital above the SRMICS is by itself sufficient grounds for receivership.

She stated that given the lead times required under responsible government contracting practices, Model #630 authorizes the domiciliary commissioner to retain consultants once the ratio of total adjusted capital to SRMICS is 125% or less. She indicated that consultants could also be retained by the domiciliary commissioner if an examination or investigation has indicated material deficiencies in underwriting procedures or in the Mortgage Guaranty Quality Control Program.
Control Level Event. She closed by stating that having a set of common parameters for this financial projection would allow for comparability if adverse economic circumstances were to affect all or most of the mortgage guaranty insurance industry.

Ms. Malm indicated that there are four major revisions to the reinsurance requirements within Model #630:

- Prior regulatory approval is required for all reinsurance agreements.
- There is a limit for aggregate concentration of mortgage guaranty risk in a multiline reinsurer, which is 15% of the assuming reinsurer’s gross written premium in the prior calendar year, and its aggregate maximum loss exposure to mortgage guaranty insurance risk should not exceed 30% of its capital and surplus as of the end of the immediately preceding calendar year.
- Subterfuge in reinsurance is prohibited. Under any reinsurance agreement, the unearned premium reserve, loss reserve, and contingency reserve must be established and maintained by the original insurer or by the assuming reinsurer so that the aggregate reserves of both shall be equal to or greater than the reserves required by Section 8 -Contingency Reserves of the Model Act.
- There are specific standards for a domiciliary commissioner disapproving a reinsurance agreement.

Ms. Malm stated that the section on dividend restrictions was revised to prohibit a mortgage insurer whose total adjusted capital is below its SRMICS from paying dividends. She stated that an insurer that has made releases from its contingency reserve at any time in the preceding 12 calendar months could only pay dividends if its domiciliary commissioner does not disapprove. She indicated that this rewrite presumes that contingency reserves will remain at the same level they are now, but an insurer would be allowed to make contingency reserve withdrawals, with domiciliary commissioner approval, to the extent that aggregate contingency reserves exceed the dollar equivalent of its SRMICS.

Following the update, Ms. Malm made a motion, seconded by Mr. Regner, to expose Model #630 and the Mortgage Guaranty Insurance Standards Manual for a 45-day public comment period. The motion passed unanimously.

3. Exposed the Draft Blanks Proposal Regarding a Mortgage Guaranty Insurance Exhibit

Mr. Conley commented that in order to get a better understanding of the mortgage guaranty business, better financial reporting is needed. As result, the Working Group proposes an exhibit that collects 20 years of data triangle experience and includes risk-in-force, earned premiums, paid loss and other elements.

Following the update, Mr. DiMemmo made a motion, seconded by Ms. Malm, to expose the mortgage guaranty capital model and supporting documentation for a 45-day public comment period. The motion passed unanimously.

Having no further business, the Mortgage Guaranty Insurance (E) Working Group adjourned.
The National Treatment and Coordination (E) Working Group of the Financial Condition (E) Committee met via conference call Nov. 6, 2019. The following Working Group members participated: Joel Sander, Co-Chair, and Cuc Nguyen (OK); Linda Johnson, Co-Chair (WY); Cindy Hathaway (CO); Maura Welch and Joan Nakano (CT); Carolyn Morgan (FL); Mike Boutwell and Stewart Guerin (LA); Debbie Doggett (MO); Ursula Almada (NM); Cameron Piatt (OH); Greg Lathrop and Ryan Keeling (OR); Robert Rudnai (TX); Jay Sueoka (UT); and Jason Carr and Susan Baker (WA). Also participating were: Cary Cook (AZ); and Michelle Scaccia (MT).

1. Adopted its Sept. 12 Minutes

The Working Group met Sept. 12 and took the following action: 1) adopted proposal 2019-06, Form 12 Consent Service for Service of Process, clarifying language to include “statutory” for the reference to the home address and regulated state in addition to the state where it was organized; 2) exposed two proposals—2019-07, expansion and corporate amendment instructions, and the Form 11 biographical affidavit—for a 30-day public comment period ending Oct. 11; and 3) adopted revisions to the Company Licensing Best Practices Handbook (Best Practices Handbook).

Mr. Piatt made a motion, seconded by Mr. Guerin, to adopt the Working Group’s Sept. 12 minutes with the modification to include Mr. Lathrop as a participating member during the conference call (Attachment Five-A). The motion passed unanimously.

2. Adopted Proposal 2019-05

Mr. Sander said that proposal 2019-05 was previously exposed for a 30-day public comment period for changes to the biographical affidavit (Form 11). No comments were received during the comment period. Crystal Brown (NAIC) said that addendum pages were incorporated into the proposal as a friendly amendment to be used for additional responses that will carry over from the questions on the biographical affidavit. Ms. Brown explained that these pages were added in response to formatting constraints within the fillable portable document format (PDF) version of the form. For uniformity purposes, the addendum pages were also included in the word version of the form. Ms. Brown noted that responses included on the addendum pages should be labeled and each page signed, or pages labeled as 1 of X and the last page signed.

Gina Hudson (Liberty Mutual Insurance) asked what option should be checked in the Purpose for Completion section for a new officer or director. Ms. Brown said the annual update option would be selected. Mr. Boutwell said he had a similar question and suggested removing “Annual” and having it listed just as “Update.” Ms. Brown suggested that a Frequently Asked Questions (FAQ) document could be drafted to clarify that the “Update” option would be checked for promotions, new officers/directors, changes and annual updates. Ms. Doggett said if the affiant is a new officer or director, it would be the first time they are filing a biographical affidavit, and it would not necessarily be an update. She agreed that drafting an FAQ could clarify that. Ms. Scaccia suggested changing it to “Other Updates.” Ms. Brown suggested removing “update” and include it only as “Other” as this would capture all updates and new officer/director options. Ms. Scaccia, Ms. Doggett and Ms. Johnson agreed.

Mr. Rudnai made a motion, seconded by Mr. Lathrop, to adopt proposal 2019-05 – Biographical Affidavit (Attachment Five-B) with an effective date of Jan. 1, 2020, that included a friendly amendment to include the addendum pages, modify the “Purpose for Completion” reference from “Annual Update” to “Other,” and draft an FAQ for when the “Other” option should be selected. The motion passed unanimously.

The Working Group unanimously agreed via email to an editorial change to add the word “specify” before “purpose for completion” and move “Specify Purpose for Completion” as the heading. In addition, the Uniform Certificate of Authority Application (UCAA) will include the word “type” to make it clear to the user that a check mark is not acceptable and to include a response on the blank. Examples will be provided on the FAQs.
3. **Adopted Proposal 2019-07**

Ms. Johnson said one comment was received from Montana on proposal 2019-07 for the lines of business instructions. Montana suggested clarifying the first statement of the tracked changes to include the words “to transact” to the corporate amendment instructions so that the sentence would read: “The application must identify all lines of insurance that the Applicant Company is currently authorized to transact and specify the lines of authority to add or delete from an existing Certificate of Authority, as identified in the plan of operation.”

Ms. Doggett made a motion, seconded by Mr. Sueoka, to adopt proposal 2019-07 (Attachment Five-C) with the friendly amendment to incorporate the words “to transact” into corporate amendment instructions. The motion passed unanimously.

4. **Discussed Other Matters**

Mr. Boutwell said that Louisiana requires biographical affidavits for certain new officers or directors that are appointed or elected to a company and that it is not uncommon for an officer or director to be named as an officer or director for multiple companies within a holding company group. He said that Louisiana is receiving multiple copies of biographies for the same officer because the company has been instructed to submit separate biographies for each company that the affiant is an officer of. Mr. Boutwell said that since the information contained in the biographical affidavit is about the individual, Louisiana does not require separate biographical affidavits for each company that the affiant is an officer or director of and will allow the affiant to list multiple company names on page 1 and page 7 of the biographical affidavit. Mr. Boutwell asked if a state-specific chart could be created to list which states will allow for multiple company names to be listed on the biographical affidavit and which states require a separate biographical affidavit for each company the affiant is an officer or director of.

Ms. Brown said that the UCAA FAQ instruct that the biographical affidavit should only list one company name and that the third-party vendors have been notified that only one company name should be listed on the biographical affidavit. Mr. Boutwell said he understands the concern of having multiple companies listed on a biographical affidavit for a UCAA application or a Form A filing. He said Louisiana’s concern arises from its statutorily mandated filing of biographical affidavits when a new officer or director is named because it is creating a large number of unnecessary and redundant filings of the biographical affidavits, which would be under the new category of “Other.” He said he was under the impression that Louisiana was not the only state that discourages multiple filings of the biographical affidavits under those circumstances.

Mr. Boutwell said that Louisiana’s approach for the biographical affidavit is that is for the individual, and the information contained within the biographical affidavit is about that person, even if it is filed in conjunction with a UCAA application. Mr. Piatt asked if Louisiana defined in its statute that the UCAA forms were required. Mr. Boutwell said that administratively, Louisiana always requires the UCAA form. Mr. Piatt said that the UCAA form instructions were defined more specifically for a UCAA application and not necessarily in the scenario of changes in officers. Ms. Brown said that other changes were made to the biographical affidavit under proposal 2019-05 that specifically break out the company name, address and phone number with regard to the requirement that only one company name should be listed on each biographical affidavit and in conjunction with changes in the future on the biographical database. Ms. Brown said that the NAIC has a current chart that shows what states require an updated biographical affidavit after licensure.

Mr. Boutwell said he is not suggesting a change to the biographical affidavit form, but rather a change to the FAQ to allow for multiple company names to be listed. He asked how many states will accept a “see attached” on the officer position and company name. Ms. Scaccia suggested modifying the FAQ rather than creating a state chart. Ms. Brown said that there is an FAQ that currently states that the biographical affidavit is not to have multiple companies listed. She said that the third-party vendors also verify that only one company is listed per affidavit and that if this was a change, they would need to be notified as well. Mr. Piatt suggested that the Biographical Third-Party Review (E) Subgroup review this issue further. The Working Group agreed to have the Subgroup look into this issue further.

In regard to multiple applications being submitted to various states within a short time period, Ms. Brown asked if the states had any concerns with separate applications being submitted rather than one application submitted to all the states at the same time. Liane Birchler (Westmont Associates) said that they may submit them in separate batches based on the state’s requirements. Mr. Boutwell said he has seen this before and would prefer to see them as one filing, but if they are filed separately for business reasons, the company should make them aware of the pending applications.

Having no further business, the National Treatment and Coordination (E) Working Group adjourned.
The National Treatment and Coordination (E) Working Group of the Financial Condition (E) Committee met via conference call Sept. 12, 2019. The following Working Group members participated: Joel Sander, Co-Chair (OK); Linda Johnson, Co-Chair (WY); Cindy Hathaway (CO); Maura Welch and Joan Nakano (CT); Alison Sterett (FL); Stewart Guerin (LA); Debbie Doggett (MO); Victoria Baca (NM); Cameron Piatt (OH); Greg Lathrop (OR); Cressinda Bybee (PA); Robert Rudnai (TX); Jay Sueoka (UT); and Ron Pastuch (WA). Also participating was: Pat Mulvihill (KS); Carol Anderson (ID); Laurelyn Cooper (ME); and James B. Ware (VA).

1. **Reviewed its July 17 Minutes**

Mr. Sander said the Financial Condition (E) Committee adopted the Working Group’s July 17 minutes during the Summer National Meeting. There were no questions or concerns with the July 17 minutes.

2. **Adopted Proposal 2019-04**

Mr. Sander said the purpose of this proposal is to add the word “statutory” in front of the home office address listing and to add an additional requirement for the state where the company is regulated if different from the state where the company was organized. He added that this proposal was exposed for a 30-day public comment period, and no comments were received.

Ms. Baca made a motion, seconded by Mr. Lathrop, to adopt proposal 2019-04; clarification to Form 12, Uniform Consent to Service of Process (Attachment Five-A1). The motion passed unanimously.

3. **Disposed Proposal 2019-06**

Mr. Sander explained that when Form 8, Questionnaire was modified in 2012, several questions were moved and reworded, and during this update, a question was inadvertently deleted. It was suggested during the review of the *Company Licensing Best Practices Handbook* (Best Practices Handbook) updates that this question be moved and renumbered as question 31 and made as an optional question for expansion applications.

Mr. Sander added that this proposal was exposed for a 30-day public comment period specifically asking the state to respond: 1) that this question be placed back into the questionnaire and that subpart b be optional; or 2) that this question not be placed back into the questionnaire because this information is already located in the general interrogatories of the annual financial statement.

Ms. Doggett reiterated that this question has not been noticed as missing by the states in the past five years and deemed it not necessary to add back to the application since this information is provided in the annual financial statement. She added that the application already contains so much information and that licensing should be more risk-focused. She said if the information is necessary, states can request additional information.

Ms. Doggett made a motion, seconded by Mr. Guerin, to dispose proposal 2019-06, with no action to add the question back to the questionnaire (Attachment Five-A2). The motion passed unanimously.

4. **Received Comments on Edits to the Best Practices Handbook – Appendix D**

Ms. Johnson summarized that this proposal was exposed separately from the Best Practices Handbook. He said the additional items added to the Form A review checklist were in response to a referral from the Financial Analysis (E) Working Group regarding caution to state insurance regulators when reviewing applications to not place reliance on parental guarantees to resolve capital issues with the insurer. No comments were submitted opposing the edits.
5. **Adopted Proposal 2019-03**

Ms. Johnson said the Best Practices Handbook was exposed for a public comment period and that the proposal brought before the Working Group includes suggested edits to the Best Practices Handbook based on the comments received. She noted that page 46 will remove the reference to the questionnaire that the Working Group agreed could be eliminated.

Mr. Lathrop made a motion, seconded by Mr. Pastuch, to adopt proposal 2019-03; revisions to the Best Practices Handbook (Attachment Five-A3). The motion passed unanimously.

6. **Exposed Proposal 2019-07**

Ms. Johnson summarized the purpose of this proposal is to clarify in the instructions that Form 3, Lines of Business must include all lines where the applicant company is authorized to transact business. She added that NAIC staff have recently received inquiries asking for clarification and noted that the current wording was causing confusion.

Ms. Johnson suggested, and the Working Group agreed, to expose proposal 2019-17 for a 30-day public comment period ending Oct. 11.

7. **Exposed Proposal 2019-05**

Mr. Piatt said the purpose of edits to the biographical affidavit are to: 1) identify the reason for submitting a biographical affidavit; 2) include space for multiple government identification numbers and the country of origin; and 3) provide separate fields for address information and applicant name.

Jane Barr (NAIC) added that this will be the last update to this form until the electronic database is available in production.

Gina Hudson (Liberty Mutual Insurance) asked when the database would be available. Ms. Barr said the projected date is 2022.

Ms. Johnson suggested, and the Working Group agreed, to expose proposal 2019-05 for a 30-day public comment period ending Oct. 11.

8. **Discussed Other Matters**

Ms. Barr summarized a concern she received from Ms. Bybee regarding state-specific requests from expansion states when the information requested is already provided on the Uniform Certificate of Authority Application (UCAA) forms.

Ms. Bybee asked if the Working Group could reach out to those states regarding uniformity and the need for additional duplicative information or meet via conference call in regulator-to-regulator session to discuss state uniformity.

Ms. Doggett concurred that Missouri receives additional requests for retaliatory fee information when that information is already provided on the UCAA website.

Mr. Mulvihill asked if there were any states on the conference call with a seasoning requirement that considers the length of time that management has been overseeing the company with regards to seasoning requirements and if they would consider new management as a new company with regard to seasoning or if states are only looking at the length of time the company has been writing the line, regardless of how long the management has been in place, and would that be applicable for their conditions for waiver.

Mr. Ware said Virginia’s seasoning requirement is an administrative policy that gives the state some leeway on the interpretation of seasoning. For this example, if the applicant had new management that would void their seasoning, the next step would be to look for affiliates in the state that would serve for a waiver of the seasoning requirement.

Ms. Anderson said Idaho would also look at this example as a new company; its seasoning looks at five years.

Ms. Welch said Connecticut would look at new management as a red flag and would look for affiliates. She added that seasoning is on a line-by-line basis. She said seasoning requirements are covered in the Best Practices Handbook on page 16.
Ms. Cooper said Maine would also look at the company in this example as a new company based on new leadership of the company.

Ms. Johnson said Wyoming statute looks at the insurer and how long it has been conducting business. She added that under other areas of review, management would be looked at, but not as a seasoning requirement.

Mr. Pastuch said Washington’s requirement is similar to Wyoming, in that its statute also looks at the length of business by the insurer by line. He added that new products would not fall under the seasoning requirement and that new management would be reviewed in other areas of the application review process.

Ms. Johnson suggested that quarterly regulator-to-regulator conference calls be scheduled to discuss issues with uniformity, applications or requirements and asked if there would be any interest from the company licensing regulators.

Ms. Anderson agreed that would be useful.

Ms. Barr said a state shared an issue with an expansion application that was submitted in hardcopy, and there were several noted errors on the biographical affidavits, such as old forms, missing information, signature dates, etc. Their concern was whether the other applicant states would accept the application without requesting that the applicant company resubmit a corrected form. She added that uniformity is a concern and whether the states would adhere to the application instructions and requirements.

Ms. Cooper said Maine is the state that was going to send the affidavits back because they were sloppy and incomplete.

Ms. Johnson said Wyoming received a similar application and that was the reason that prompted the request to meet quarterly via conference call in regulator-to-regulator session.

Ms. Barr asked if she would like the first call scheduled as early as October.

Ms. Cooper said she has reached out to the company and has not heard a response.

The Working Group plans to meet Nov. 6 via conference call.

Having no further business, the National Treatment and Coordination (E) Working Group adjourned.

Forms:

[ ] Form 1 – Checklist [ ] Form 2 - Application [ ] Form 3 – Lines of Business

[ ] Form 6- Certificate of Compliance [ ] Form 7 – Certificate of Deposit [ ] Form 8 - Questionnaire

[ ] Form 8C- Corporate Amendment Questionnaire [ ] Form 11-Biographical Affidavit [ x ] Form 12-Uniform Consent to Service of Process [ ] Form 13- ProForma [ ] Form 14- Change of Address/Contact Notification

[ ] Form 15 – Affidavit of Lost C of A [ ] Form 16 – Voluntary Dissolution [ ] Form 17 – Statement of Withdrawal

DESCRIPTION OF CHANGE(S)

Insert the word “Statutory” before “Home Office Address” on page 1 of the Uniform Consent to Service of Process. Include the state where the company is regulated if different than the state where it was organized.

REASON OR JUSTIFICATION FOR CHANGE **

This change would clarify that the address to be listed is the statutory home office address. Further clarification to include the state where the company is regulated if different than the state where it is organized.

Additional Staff Comments:

6/12/19-jdb NAIC staff added further clarification for companies that are organized in one state and domiciled (regulated) in another.

7-17-19-cgb NTCWG exposed proposal 2019-04 for 30-day comment period.

9/12/19-cgb No comments were received. NTCWG adopted proposal 2019-04.

** This section must be completed on all forms. Revised 01-2019

[ ] Form 15 – Affidavit of Lost C of A  [ ] Form 16 – Voluntary Dissolution  [ ] Form 17 – Statement of Withdrawal

DESCRIPTION OF CHANGE(S)
To clarify that the following question must be answered for Expansion applications and Sub-section “B” would be optional, per the state’s discretion.

31. Does the Applicant Company use a third party (affiliated or unaffiliated) to manage the Applicant Company’s investments?
   Yes ____  No ____
   A. If yes, provide detailed information as to the compensation that will be paid for management of the Applicant Company’s investments.
   B. Provide copies of the Applicant Company’s investment management agreements and any investment guidelines.

REASON OR JUSTIFICATION FOR CHANGE **
In 2010 some Form 8 questions were revised, combined and/or reorganized. During these revisions Q23 (worded above as Q31) was inadvertently removed from the questionnaire. Discussions during the July 17 conference call clarified that this information is located in the Annual Statement Interrogatories and may not be necessary for inclusion on the Questionnaire.

Additional Staff Comments:
5/15/19- Discussions during the May 15, 2019 conference call suggests this question would be better located after Q30, as optional for expansion (electronic) applications. Questions 1-30 are required to be completed for both Primary and Expansion applications.
7/17/2019-Discussions during the July 17, 2019 conference call suggest that this question does NOT need to be placed back on the Questionnaire or if it is placed back on the Questionnaire then sub-section “B” could be at the state’s discretion if copies are required. This proposal will be exposed for a 30-day comment period asking which option to proceed with. 
9/12/19 cgb – NTCWG agreed to dispose of proposal 2019-06 with no action to add the question back to the questionnaire.

** This section must be completed on all forms.

Uniform Certificate of Authority Application
QUESTIONNAIRE

Directions: Each "Yes" or "No" question is to be answered by marking an "X" in the appropriate space. All questions should be answered. If the Applicant Company denotes a question as "Not Applicable" (N/A) an explanation must be provided. Other answers and additional explanations or details may be provided in writing attached to the questionnaire. Please complete this form and file it with the Applicant Company's application for a Certificate of Authority.

1. I hold the position(s) of ___________________________ with the Applicant Company.

Eliminated To Conserve Space  Detail

30. Does the Applicant Company pay, directly or indirectly, any commission to any officer, director, actuary, medical director or any other physician charged with the duty of examining risks or applications?

Yes____ No ____ Not Applicable____

If yes, provide the details in writing and attach to the Questionnaire.

The following question pertains if the Applicant Company is filing a Primary Application, the application state may request this question be answered for an expansion application.

31. Does the Applicant Company use a third party (affiliated or unaffiliated) to manage the Applicant Company’s investments?

Yes ____ No ____

A. If yes, provide detailed information as to the compensation that will be paid for management of the Applicant Company’s investments.

B. Provide copies of the Applicant Company’s investment management agreements and any investment guidelines.

The following questions are to be completed only if the Applicant Company is redomiciliating to another state.

32. Does the Applicant Company have any permitted practices allowed by its current state of domicile?

Yes____ No ____ Not Applicable____

If yes, provide the details in writing and attach a copy of the state of domicile’s approval to the Questionnaire.

DESCRIPTION OF CHANGE(S)
Updates to the Best Practices included changes for the Risk-Based prioritization to align with the Financial Analysis Handbook. Updates to align with recent changes to the Part D Organization Licensing Standards; Updates to include information for states that have adopted the NAIC Insurance Data Security Model Law (#668) Updates to the biographical affidavit review process, addition of corporate amendment change type Statement of Withdrawal/Complete Surrender and the addition of Appendix E – Speed to Market.

REASON OR JUSTIFICATION FOR CHANGE **
The Company Licensing Best Practices Handbook was developed in 2005 and has only been updated for changes to the UCAA without the entire handbook being evaluated for content and updates to outside sources.

Additional Staff Comments:
5/15/2019 jdb- The Working Group agreed to expose the Best Practices for a 30-day comment period.
7/15/19 jdb – The Working Group exposed Appendix D for a 30-day comment period.
9-12-19 cgb – The Working Group received comments on Appendix D and adopted the revisions to the BP Handbook.

NAIC Company Licensing Best Practices Handbook

Introduction

BACKGROUND

In conjunction with the NAIC, the various states, as a part of the former Accelerated Licensing Evaluation Review Technique (ALERT) Subgroup, have worked toward the goal of streamlining and achieving uniformity in the insurer licensing process. To that end, a Uniform Certificate of Authority Application (UCAA) was developed by the former Accelerated Licensing Evaluation Review Technique (ALERT) Subgroup and is currently in use. However, the implementation of UCAA requirements and the standards and procedures involved in the reviewing of applications has not proven to be consistent among the members of the NAIC.

The objective of the Company Licensing Best Practices Handbook (Best Practices Handbook) is to provide a framework that, while not preempting a state’s authority, promotes consistent decisions while reviewing the standardized UCAA and improves the efficiency of the review process. This Best Practices Handbook is not intended to constitute a comprehensive company licensing procedures manual. Each state must assess its ability, within the confines of existing statutes, regulations and resource constraints, to implement the recommendations contained herein.

UCAA INSTRUCTIONS vs. BEST PRACTICES HANDBOOK

The ALERT Subgroup performed a monumental task in bringing order to the various state rules, regulations, requirements and forms facing an applicant. That work is thoroughly documented on the UCAA website. This Best Practices Handbook contains numerous references to the forms and processes described on the UCAA website.

This Best Practices Handbook deals primarily with the qualitative processes involved in reviewing an application. The concepts and recommended processes and procedures described herein were developed through interviews with various state regulatory personnel involved in the company licensing process and a compilation of the observed best practices. During those interviews several “best practices” concepts became evident. They were:

- **LICENSING PROCESSES**: The company licensing function can be viewed in light of its component processes:
  - Administrative Filings: Receipt and processing of certain corporate documents that are needed to establish a corporate existence, but are not subject to qualitative review.
  - Analysis of Current Financial Condition: Documentation of the current operating condition of the company.
  - Analysis of Business Plan: Review of the company’s explanation for the proposed expansion and/or change in its operations and how those changes will affect the company’s operating condition.
NAIC Company Licensing Best Practices Handbook

Introduction

- INTERSTATE COMMUNICATION: The licensing process in many states involved the re-determination of the current financial condition of the company. This information should already be known by the domestic state and can be conveyed to the applicant state. The effort saved by not reanalyzing company condition in the company license process can be used to communicate financial condition information to other states when requested.

- PRIORITIZATION FRAMEWORK: Several states incorporated more or less sophisticated prioritization systems as a part of the licensing function. The scope of the financial review may be adjusted based upon the prioritization of the insurer. The resources saved by reducing effort in reviewing companies on the top and bottom of the scale can be better spent performing a more thorough review of those companies where the effect of an expansion or amendment of the business plan is not so easily evident.

In addition to gathering information necessary to evaluate an applicant, the UCAA was developed to incorporate the majority of state’s rules, regulations and requirements relative to company licensing. The goals of this Best Practices Handbook are uniformity and efficiency in the review of company licensing applications. In some instances, those goals conflict with filing requirements noted in the UCAA. Therefore, it is acknowledged that there may be inconsistencies between this Best Practices Handbook and any specific state’s filing requirements.

DESCRIPTION OF THE BEST PRACTICES HANDBOOK

The Company Licensing Function
This chapter provides an overview of the role of the company licensing function as the initial step in state regulatory oversight. The goals of the company licensing function and the risk-based approach to achieving them are described.

Interstate Communication
This chapter discusses a framework for communication and cooperation between an applicant state, the state of domicile and other stakeholder states (if any).

Best Practices

Conceptual Framework
This chapter presents a risk-based framework for the processes involved in analyzing the application.

Review of Forms
This chapter presents a summation of best practices compiled as guidance relative to the analysis and decision making regarding the application.
NAIC Company Licensing Best Practices Handbook
Introduction

Appendix A – The Uniform Certificate of Authority Application (UCAA)
This appendix presents a brief overview of the UCAA and how it is referenced in the “Best Practices: Application Review” chapter.

Appendix B – Use of Electronic Documents
This appendix presents a description of UCAA contents that are available in electronic media.

Appendix C – Review of Electronic Application Coordination and Processing (REACAP)
This appendix presents the criteria for requesting the National Treatment and Coordination (E) Working Group to monitor the timing, technology and substantive issues regarding the insurers’ electronic UCAA filings.

Appendix D – Form A Review Best Practices
This appendix presents a guide for regulatory review and analysis of Form A acquisitions, recognizing that this list may not be comprehensive and not all items will apply to every acquisition.

Appendix E – Speed to Market
This appendix presents the criteria for requesting the National Treatment and Coordination (E) Working Group to monitor the timing and coordination of expansion applications for insurers in good standing with their state of domicile (lead state).
The company licensing function stands at the threshold of an insurance department’s oversight of an applicant’s future operations within the state. The function encompasses virtually all areas of regulatory oversight, from solvency surveillance to market conduct, to rates and forms and producers’ licensing — and not only within the applicant state insurance department, but also within the insurance department of the domiciliary state. The most difficult stages of regulatory oversight occur at the very beginning and at the very end of an insurer’s regulatory life cycle. Never is a more comprehensive understanding of an insurer and its potential for success more critical than when a regulator must grant authority to conduct business and in those even more difficult circumstances when the regulator must withdraw the authority to conduct business.

In developing this Handbook, a great deal of consideration was given to the assessment of risk in the review of a company license application. All of the current NAIC guidance provided to insurance department personnel relative to insurance company surveillance deals with the assessment of risk present in the individual insurers comprising the population to be regulated. That risk, the risk of financial failure or risk of marketplace improprieties is to be measured and graded. Current guidance defines procedures in such a manner that regulators maximize the effectiveness of the surveillance process by concentrating on the areas, or companies, of greatest risk. This approach by its nature, forgoes the idea of “zero” risk. The cost of obtaining zero risk is prohibitive and the effort expended in its pursuit is better spent in other endeavors.

Similarly, regulators involved in reviewing company licensing applications must adhere to the same goals. The review of the company licensing application should be structured so that applicants’ risks of financial failure or marketplace impropriety are identified and addressed. Procedures exist in the Financial Analysis Handbook, the Financial Condition Examiners Handbook and the Market Regulation Handbook for monitoring companies subsequent to admission. Company licensing personnel should concentrate on those issues that indicate an applicant may harm the citizens of their state, either through financial failure or marketplace improprieties, as a result of granting or amending a certificate of authority.

Therefore, the procedures described herein represent a departure from the conventional approach to the review of a company license application. In some instances, it is recommended that documents submitted with an application should be subject to minimal review. Those documents, although necessary to establish an applicant as a legal entity, do not provide significant insight into the risk profile of a company. By accepting the risk of a minor compliance violation (that, after all, will still be the subject of ongoing monitoring), the regulator will maximize the effectiveness of their department and better fulfill their responsibilities to the citizens of their state.
NAIC Company Licensing Best Practices Handbook
Interstate Communication

INITIATING INTERSTATE COMMUNICATION

The expansion and/or alteration of a company’s operations are of equal importance to the regulators in both the expansion states and the domestic state. The results of unsuccessful expansion plans cut across state boundaries — a troubled company is “troubled” in all states. It follows that the analysis of a company’s condition and business plan should be accomplished through a coordinated effort. Ultimately, each state operates under its own statutory authority and is responsible for the protection of its own policyholders. Interstate communication and cooperation is not intended to relinquish the authority of any state or to disadvantage any state; rather, it is intended to facilitate efficiencies that will be achieved when applicant states coordinate the company licensing process with all states involved, including, most importantly, the domestic state.

The NAIC Financial Regulation Standards and Accreditation Program requires states to provide for the sharing of otherwise confidential information, administrative or judicial orders, or other action, with other state regulatory officials, provided that those officials are required under their law to maintain its confidentiality. The NAIC “Master Information Sharing and Confidentiality Agreement” allows signatory states to share confidential information with other signatory states. As of this writing, 50 states and the District of Columbia have signed the agreement. Current information can be accessed through the NAIC I-SITE application under StateNet or https://i-site-state.naic.org/cgi-bin/statenet.

Prior to submitting an application in a foreign state, the insurer should inform the state of domicile of its plans in the foreign state(s). If the state of domicile holds important concerns regarding the applicant’s plans, such concerns should be communicated to the senior financial regulator in the applicant state(s). Similarly, after receipt and an initial review of an application, the applicant state may contact the senior financial regulator in the domiciliary state to open a dialogue regarding the applicant. Preferably, this communication should occur as early in the application process as possible to allow consideration of the information within an appropriate timeframe. The dialogue should include:

- Is the Applicant Company concurrently applying to additional states?
  - If so, contact other states to coordinate information available from the domiciliary state.
  - If so, and the applicant is part of a holding company structure, contact the “Lead State” to coordinate information sharing.
  - If the Applicant Company does the majority of its business in a state other than the domiciliary state, the Applicant Company and domiciliary states may consider communication with a “Key State” as discussed below. However, even if a key state is identified, the domiciliary state will remain the primary regulator.

- Domiciliary (and key) state’s analysis of current condition of the applicant.
  - Has the domiciliary state performed a risk analysis of the applicant?
  - If the risk analysis performed by the domiciliary state is understandable to the applicant state and is substantially similar to the prioritization system defined in this Handbook, the...
applicant state should consider accepting the analysis in lieu of performing an additional financial analysis of the Applicant Company.

- Analysis of Business Plan by Applicant State(s)
  - Are the operations described in the business plan consistent with the demonstrated experience and expertise of the Applicant Company?
  - Does the business plan have the potential to significantly alter the condition of the Applicant Company?
  - After consideration of the Applicant Company’s condition, business plan and any other relevant information, has the domiciliary state transmitted any information having a bearing on the application?

LEAD STATE

Lead state(s) or designee assumes the role of coordinator and communication facilitator. The lead state(s) serves as the facilitator and central point of contact for purposes of gathering and distributing information to all regulators involved.

KEY STATE

In some instances other states may have information pertinent to the application. In those instances, a “Key State” may be considered for consultation in addition to the domiciliary state. The Key State may emerge based on the state with the largest premium volume, the state of domicile of the parent of the holding company, or other reasons. The “Key State” should not assume the responsibilities of either the applicant state or the domiciliary state. A “Key State” should be identified solely as an additional source of information regarding the applicant.

COMMUNICATIONS AND THE DOMICILIARY STATE

As previously stated, the Applicant Company should inform the domiciliary state of its plans to file company licensing applications in foreign states. In addition, communications between the applicant state(s) and the insurer may contain information regarding specifics of the applicant state’s marketplace that may significantly impact the insurer’s proposed business plan. The use of the electronic UCAA provides a mechanism for tracking such correspondence. This will allow the domiciliary state to remain cognizant of these communications and the relevant information, while the decision on the expansion remains with the expansion state.
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

CHAPTER OVERVIEW

This chapter will discuss a framework for the process flows that occur within the Company Licensing Function. The significant procedures within those process flows are discussed in detail, although guidance on the review of specific UCAA forms is contained in the “Best Practices: Application Review” chapter.

COMPONENTS OF THE COMPANY LICENSING FUNCTION

Depending on the type of application, the processing of a company license application can be broken down into one or more of the following components as shown in the graphic below.

![Diagram showing the components of the company licensing function]

**Administrative**

**Coordination:** This component begins with the receipt and recording of an application and its supporting documentation. The application should be reviewed to determine that a response exists for all inquiries. Supporting documents should then be reviewed to determine that they are, in fact, responsive to the UCAA requirement. The degree of the completeness and/or responsiveness of the application must be assessed to determine if processing of the application can proceed without further input from the Applicant Company. It is recommended that the state issue a letter to the Applicant Company acknowledging receipt of the application.
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

**Timeliness:** If processing can commence, an “application coordinator” should employ a spreadsheet, database, TeamMate file, or other mechanism (if the application was not received via the NAIC electronic UCAA utility) to record the assignment of application review responsibilities and the progress of the review against the Department or UCAA timelines:

- The Department should have a policy that establishes timing requirements for the review of applications for primary licensure of new companies and redomestications and Form A filings. If not, then the following guidelines are acceptable.
- Fourteen days to review an application for completeness.
- The goal is to notify the Applicant Company of supplemental information required from the Applicant Company within 30 days of applications. However, there may be situations where supplemental information provided requires clarification or a second review of the application requires requesting additional information.
- It should be noted, if additional information is needed to complete the review of an application, the review may also take longer to complete. Once a request for additional information has been made, the 60-day or 90-day goal is suspended until the requested information is received.
- Ninety days to process a primary application. Effective January 1, 2012, company licensing will be part of the accreditation program, Part D of the NAIC Policy Statement on Financial Regulation Standards, which provides that if a state does not have timing requirements in statute or regulation, the state will be expected to meet the 90-day goal for accreditation purposes.
- Sixty days to process all other types of applications.

It is recommended that the state send the company regular correspondence regarding the progress of the application.

**Administrative Filing:** This component consists of the review and filing of administrative documentation, which, while critical to the establishment of the Applicant Company as an operating business organization, is generally not subject to substantial qualitative analysis. This includes receipt of filing fees, articles of incorporation and bylaws, statutory deposits, membership in mandatory associations, consent to service of process, as well as other state-specific requirements. (See discussion of specific forms in “Best Practices: Application Review” chapter.)

**Analytical Review**

**Analysis of Current Condition:** The financial condition and management practices of the Applicant Company must be ascertained to determine they are of sufficient quality to permit the applicant to sell insurance products to the citizens of the state.

Except for a primary application, the analysis of the Applicant Company’s current condition should begin with contact to the domiciliary (and key) state as described in the “Interstate Communications” chapter. Company licensing analysts should confer with financial analysts in the domiciliary (and key) state to determine the overall operating condition of the Applicant Company based on a prioritization system and plan the scope of review activities accordingly.
Prioritization Framework

The utilization of a prioritization framework is the key to the efficient analysis of an Applicant Company’s current condition. The Financial Analysis Handbook suggests that domestic insurers be “prioritized” or ranked according to each insurer’s “relative stability.”

The Financial Analysis Handbook provides general guidance regarding the framework, but leaves the determination of specific prioritization metrics up to the domiciliary state. Tools currently available for use in reviewing the financial condition include: Insurance Regulatory Information System (IRIS) ratios, Analyst Team System results and Financial Analysis Solvency Tools (FAST). In addition to the financial review, any market conduct information available from the market analysis chief or collaborative action designee in the state’s market analysis department should be considered along with data available in the following market analysis tools and systems that are available on I-SITE: Complaints Database System (CDS), Examination Tracking System (ETS), Market Analysis Profile (MAP), Market Analysis Review System (MARS), Market Initiative Tracking System (MITS), Regulatory Information Retrieval System (RIRS), Market Conduct Annual Statement (MCAS), Producer Database (PDB), and 1033 State Decision Repository (SDR)-Data Entry Tool. The analyst should note any unusual items that translate into financial risks or indicate further review or communication is needed with the insurance department’s market analysis staff.

Other initiatives have been undertaken to more specifically define a broad-based system of prioritizing insurers based on operational practices as well as financial condition. During the development of this Handbook, it was noted that several states have developed such holistic models. The use of these models is clearly the best practice for determining the current overall condition of an insurer, and then assigning a prioritization that can be used to determine the appropriate scope of analytical review for a specific application. However, in each case, the specifics of the model are considered confidential.

Therefore, for the purpose of this Handbook, a prioritization framework will be discussed, and the general characteristics of each prioritization category will be described.

Use of Prioritization Framework in Application Review

The use of prioritization in the application review process carries the same risks and benefits inherent in any prioritization evaluation system. The goal of all such systems are to eschew the costly practice of reducing risk to zero, and instead to define a level of acceptable risk. The use of prioritization means that, in some instances, all the documents included with an application will not be reviewed in detail. However, the risk of not reviewing those documents in detail is mitigated by a company’s low risk of financial failure and by providing additional time to review the company’s business plan.
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

During the development of this Handbook, almost all company licensing personnel interviewed indicated that they were able to quickly, even if only informally, identify companies whose applications were likely to be approved. States that utilized prioritization systems were able to more formally document those applicants. Through the use of a formal prioritization system, company licensing analysts can reduce the scope of their review of strong applicants, thus conserving effort better served in the review of marginal applicants. The following guidance provides a recommended scope of review for each prioritization category.

Priority 1

Insurers included in Priority 1 are considered troubled and subject to comprehensive annual and quarterly analysis procedures, detailed considerations outlined with the Troubled Insurance Company Handbook, and a significantly elevated level of ongoing regulatory monitoring and oversight. Upon designating an insurer as a Priority 1, the domestic state should follow required procedures for troubled companies in communicating with other state insurance regulators. Insurers prioritized at this level would also be considered priority insurers for accreditation timeliness purposes and should generally be analyzed ahead of Priority 2, Priority 3, and Priority 4 insurers.

Insurers in this group generally are not capable of withstanding even moderate business fluctuations. There may be significant noncompliance with laws and regulations. Risk-management practices are generally unacceptable relative to the insurer’s size, complexity and risk profile. Corporate and group structures or framework may be of a nature that is not conductive to effective regulation. Close regulatory attention is required, which means formal action is necessary in most cases to address the problems. Insurers in this group pose a risk to the state guaranty fund. Failure of the insurer is probable if the problems and weaknesses are not satisfactorily addressed and resolved. Priority 1 companies should not be considered for expansion.

Priority 2

Insurers in Priority 2 are – high-priority insurers that are not yet considered troubled but may become so if recent trends or unfavorable metrics are not addressed. High-priority insurers may also include those subject to heightened monitoring for reasons other than financial solvency risks, as determined by the department. Insurers prioritized at this level may be subject to full quarterly analysis procedures and are subject to comprehensive annual analysis and an elevated level of ongoing regulatory monitoring and oversight. Insurers prioritized at this level would also be considered priority insurers for accreditation timeliness purposes and should generally be analyzed ahead of Priority 3 and Priority 4 insurers. Priority 2 companies are generally not considered good candidates for expansion. However, senior-level department personnel should contact their counterparts in the domiciliary state to determine if there is any reason to perform further analysis in consideration of approval of the application. In certain unique circumstances, based on the line of business offered and the market conditions in the expansion state, it may be appropriate to pursue licensure under heavily monitored criteria.
NAIC Company Licensing Best Practices Handbook  
Best Practices: Conceptual Framework of Processes and Procedures

These insurers, or their holding company groups, have a combination of moderate to severe weaknesses that may exhibit unsafe and unsound practices or conditions. The insurer is moving toward meeting criteria indicative that it is operating in a manner that is financially hazardous to policyholders and/or the public. They have serious financial or managerial deficiencies that result in unsatisfactory performance and problems are not being satisfactorily addressed or resolved by the board of directors and management.

Priority 3

Insurers in Priority 3 are considered moderate priority insurers that indicate some need for additional monitoring. Insurers prioritized at this level should be subject to comprehensive annual analysis procedures, should generally be analyzed ahead of Priority 4 insurers, and may be subject to an enhanced level of ongoing regulatory monitoring and oversight.

Priority 3 companies present the greatest challenge to the company licensing analyst. They are neither an obvious candidate for approval nor for denial, based on their current overall condition. Insurers in Priority 3 appear fundamentally sound, but may exhibit some degree of regulatory concern in one or more areas. These insurers and their parent and other members of the holding company group are relatively stable, could withstand moderate business fluctuations, and are in substantial compliance with laws and regulations. While the overall, risk-management practices are satisfactory relative to the insurer’s size, complexity, and risk profile, these companies exhibit certain notable adverse risk characteristics. There are no current material supervisory concerns and, as a result, the regulatory response is informal and limited. The risk to policyholders and/or guaranty funds is currently viewed as remote, however significant factors exist that may result in financial stress in the longer term.

In this instance the company licensing analyst should re-analyze the financial information provided with the application in order to better understand the exact nature of the Applicant Company’s weaknesses. However, it is important that communication between senior-level department personnel in the domiciliary (and key) state remains active. The domiciliary state can provide insight into the resolution of adverse financial or market conduct examination findings and the extent to which the company has remediated the deficiencies. Once the analyst has gained comfort with his/her knowledge of the Applicant Company’s current operational condition, the business plan should be diligently reviewed in order to determine whether:

- The Applicant Company has a demonstrated history (e.g., five years) with the lines of business for which it is applying.
  - If the Applicant Company is applying for lines of business for which it has less than five years of history, the analyst should review the business plan to identify, and/or request additional information regarding, key managerial personnel responsible for administering the new lines of business.
- Key personnel have been in place for a sufficient period of time to demonstrate their insurance management expertise.
- The scope of the expanded operations is not imprudent relative to the financial strength of the Applicant Company, its parent and other members of the holding company group. If the
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

expanded operations are in new lines of business, more stringent standards should be applied when assessing the potential effect of expanded operations on the condition of the Applicant Company.
- The domiciliary state noted any operational or compliance deficiencies in lines of business similar to those planned for the expanded operations.

Priority 4

Priority 4 are lower priority insurers that do not currently indicate a need for additional monitoring. These insurers should be subject to a basic level of regulatory monitoring and oversight, including annual analysis.

For these companies, the analysts should consider foregoing an in-depth review of information relevant to the Applicant Company’s current operating condition (e.g., financial documents included with public records package or the holding company statements). Rather, the company licensing analyst should focus on the quality and assumptions of the business plan to determine whether:
- The Applicant Company has a demonstrated history (e.g., three years) with the lines of business for which it is applying.
  - If the Applicant Company is applying for lines of business for which it has less than three years of history, the analyst should review the business plan to identify, and/or request additional information regarding, key managerial personnel responsible for administering the new lines of business.
- Key personnel have been in place for a sufficient period of time to demonstrate their insurance management expertise.
- The scope of the expanded operations is not imprudent relative to the financial strength of the company and its parent and other members of the holding company group.

Analysis of Business Plan

The Applicant Company’s plan for conducting business in new jurisdictions must be evaluated to determine if the plan is consistent with the Applicant Company’s demonstrated capabilities and the state’s marketplace. Further guidance for the analysis of business plans is included in the “Best Practices: Application Review” chapter.

Intrafdepartmental Communications

In addition to communications with other jurisdictions, it is important that the company licensing coordinator convey information regarding pending applications to other divisions within the insurance department. The licensing of a new entity or expansion of authority will impact other divisions once the new or amended certificate of authority is issued.

Actuarial: This section should understand the business plan filed with an application in order to adequately monitor any future reserving issues or other actuarial concerns.
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

Financial Analysis: Once a new or amended certificate of authority has been issued the financial analysis division of the insurance department will assume monitoring responsibilities. The financial analysis section should understand the business plan filed with an application in order to monitor future results against that plan.

Market Conduct and/or Analysis (including consumer complaints and enforcement): The Market Conduct/Analysis section should understand the business plan to anticipate any issues and to monitor future results against the plan.

Policy Approval: Although policy forms are not a required component of the company license application, they are one of the most significant indicators of an Applicant Company’s actual business intentions. The financial analysis section should coordinate with the policy approval section to monitor policy filings from the newly licensed company to determine that they are consistent with the filed business plan.
NAIC Company Licensing Best Practices Handbook
Best Practices: Conceptual Framework of Processes and Procedures

Producer Licensing: Similar to policy approval, the appointment of producers must be consistent with the scope of the new company’s business plan. The financial analysis section should similarly coordinate with the producer licensing section to monitor producer appointments by the new company.

Timeliness of Review

Perhaps no issue surrounding the company licensing process creates greater interest than that of timeliness. The UCAA website contains suggested guidance for the processing of various types of applications, including interim timelines. Although regulators should not sacrifice an appropriate level of review solely in the pursuit of expediency, it is imperative that every effort be made to adhere to the processing times recommended on the UCAA website when reviewing Priority 4 companies:

- Fourteen days to review an application for completeness.
- The goal is to notify the company of supplemental information required from the applicant within 30 days of applications. However, there may be situations where supplemental information provided requires clarification or a second review of the application requires requesting additional information.
- It should be noted, if additional information is needed to complete the review of an application, the review may also take longer to complete. Once a request for additional information has been made, the 60-day or 90-day goal is suspended until the requested information is received.
- Ninety days to process a primary application.
- Sixty days to process all other types of applications.
- Complexities involved with the review of Priority 2 and Priority 3 companies may adversely affect a state’s ability to meet these timelines recommendations. Notwithstanding these complexities, the regulator should make all reasonable efforts to maintain timely communication with the applicant companies.
NAIC Company Licensing Best Practices Handbook

Introduction

In this chapter, recommendations for the review of each type of application are presented. The recommendations are based on the concepts of prioritization framework and interstate communications presented in the previous sections of this Handbook.

Within each application type, the review recommendations are presented in the following format:

- Application Type:
  - Chart Illustrating the UCAA sections of the application.
  - Recommendations for reviewing the “Administrative Filings” sections of an application.
  - Recommendations for reviewing the “Analysis of Current Condition” sections of an application.
    - Depending on the type of application, there may be subsections based on the risk profile of the Applicant Company.
  - Recommendations for reviewing the “Analysis of Business Plan” sections of an application.
    - Depending on the type of application, there may be subsections based on the risk profile of the Applicant Company.

Confidentiality and Safeguarding of Biographical Affidavit Information

The insurance department shall implement a written information security program that includes administrative, technical, and physical safeguards to protect the security and confidentiality of the biographical affidavit, fingerprint card (where applicable), independent third-party background report, and all associated notes, emails or work papers (collectively referred to hereafter as “documents or records”).

Given: (i) the size and complexity of the insurance department and the nature and scope of its activities; (ii) the variations in state laws; and (iii) the sensitive and personal information it maintains, the insurance department is referred to the NAIC Standards for Safeguarding Customer Information Model Regulation (#673) for further guidance with respect to an information security program. In addition, the insurance department should be aware that there may be other state-specific and federal laws and regulations regarding record retention and confidentiality, including the federal Fair Credit Reporting Act and the Federal Trade Commission regulations.

The following actions and procedures are recommended to the insurance department in implementing a written information security program.

Administrative Safeguards

- Identify reasonably foreseeable internal or external threats, assess the risk of harm from these threats, and develop and implement written procedures and policies that will safeguard the information and minimize the threats.

- Annually assess the sufficiency of current practices and adjust the written program as necessary to adapt to new threats and technologies.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Train employees on the policies and procedures developed to safeguard documents or records and personal information contained therein. Periodically review the training process and refresh employees on old and new processes. Provide training and training materials relevant to the safeguards to employees outside the company licensing division that may handle a public records request for the documents or records. Educate employees on any state enforcement rules and/or polices regarding their failure to abide by the training they receive.

- Develop procedures to search for Social Security numbers imbedded in licensure or registration numbers provided. Licenses or registrations from prior years may have included Social Security numbers within the number.

- Develop procedures and policies specific to the security of laptops and other portable devices that may contain personal information from the documents or records.

- Prohibit the sale of personal information, including names and addresses of any affiant for any purpose.

- Exercise appropriate due diligence in selecting service providers, and require thorough appropriate confidentiality agreements, that they implement measures to meet the relevant objectives of the security program.

Technical Safeguards

- Maintain personal information in a secure manner that is appropriate to the size and complexity of the insurance department and the nature and scope of its activities.

- Transmit documents or records and personal information between the third-party vendor and insurance department in a secure manner.

Physical Safeguards

- Develop policies and procedures to address retention and destruction of paper and electronic documents or records.

- Place access controls to the documents or records, whether in paper or electronic form, only to those individuals that need to know the information contained therein to complete a company’s review for licensure or to investigate a response to an open records or Freedom of Information Act (FOIA) request.

- Keep the documents or records out of public view and secure when not being utilized.
**NAIC Company Licensing Best Practices Handbook**

**Best Practices: Application Review**

- Maintain and secure all electronic and paper documents or records in accordance with state laws or record retention policies. The insurance department must comply with its written information security program when responding to the public records request for biographical information that is outdated or for which the authorization has been revoked by the affiant. In addition, the Department should include a statement with the documents that notifies the individual requesting disclosure through a public records request that the information contained therein may be outdated. (According to the UCAA Instructions, a biographical affidavit is only good for 6 months after executed, and an affiant may revoke authorization at any time.)

- Destroy documents or records in a manner that renders the information unreadable and undecipherable; document and maintain those procedures for secure disposal of Nonpublic information.

- Develop standards for notifying the affiant and affiant’s employer in the event of a security breach.

- Store the electronic and hardcopies of these documents or records in a secure manner. (Examples include storage in a cabinet or room accessible only by individuals that need the information for permitted purposes.)

For the states that have enacted the **NAIC Insurance Data Security Model Law (#668)** refer to the guidance provided in the Financial Examiners Handbook.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Primary Application

A Primary Application is to be used for domestic insurers. See Appendix A for the Primary Application Review Checklist.

The classification of the application instruction items is illustrated in the following chart:

Administrative Filing

Application Instruction Items

Item 1. Application Form and Attachments
- Form 1P “Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application.
- Form 2P “Primary Application” – The coordinator should review the form for completeness.
- Form 3 “Lines of Insurance” – Only the applied for lines will be required for a newly formed company. The entire Form 3 will be required for a redomestication.

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances, the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $5,000 and are generally retaliatory.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 4. Statutory Deposit Requirements
- Form 7 “Certificate of Deposit” – The coordinator should review the form and compare the amount of the deposit to the state’s requirement.
- These funds are deposited with the commissioner, generally through a safekeeping or trust receipt, to be held for the benefit and protection of, and as security for, all policyholders and, in some instances, creditors of the insurer making the deposit. Additional deposits are generally required of those insurers applying to write lines of business not covered under state insurance guaranty funds (e.g., guaranty, fidelity, surety, and bond business) or otherwise (e.g., workers’ compensation). The ultimate purpose of these funds is to ensure that liquid assets are unencumbered and available for use by the commissioner, or his/her designee, for the administration of the insurer’s estate should it become insolvent.

Item 5. Name Approval
- The coordinator should determine that a name approval request consistent with the state’s requirements has been filed. If state requirements dictate, the request should be forwarded to the appropriate area for processing.
- Typically, state insurance departments incorporate insurers, but some states require the involvement of the secretary of state or the attorney general. Names are submitted for preapproval because the public has the right to know with whom it is dealing and, therefore, someone must determine that the name is not so similar to another as to be likely to deceive or mislead. The name should be such as to show that the company is engaged in the insurance business and preferably to show the type of business. Some states provide for publication and subsequent hearing to ensure that any objections are addressed.

Item 8. Statutory Memberships
- The coordinator should compare the application to the state requirements for statutory memberships and determine that appropriate documentation supporting the membership application is included.
- Some states require a positive application and confirmation regarding membership in state-mandated risk pools or other organizations. In other words, an insurer may not automatically be a member by virtue of its certificate of authority, but may be required to join outside the jurisdiction of the insurance department.

Item 12. Public Records Package
- The coordinator should compare the contents of the public records package with state requirements. Financial documents should be forwarded to the areas expected to utilize the documents. Operational documents (other than the application form) should be filed as required.
Analysis of Current Condition

Note: Generally, the scope of the analysis of current condition would depend on the prioritization of the Applicant Company. With a primary application (not a redomestication):

i. If it is a stand-alone company, there is no information upon which to establish a prioritization and the use of that technique is inapplicable.

ii. However, if the Applicant Company is part of a holding company structure, the reviewer may want to consider the strengths, structure, ratings, etc. of the holding company.

Application Instruction Items

Item 3. Minimum Capital and Surplus Requirements

- This document should make it clear that the Applicant Company understands state law with respect to the amount of capital and surplus that must be maintained at a minimum. In some states, the minimum capital and surplus requirements are determined by the classes of insurance that the applicant is requesting authority to transact and the classes of insurance the applicant is authorized to transact in all other jurisdictions. The analyst should determine the level of surplus required after considering the Applicant Company’s plan of operation. Compliance with the statutorily prescribed minimum surplus requirement may not be sufficient for all applicants.

Item 7. Holding Company Act Filings

If the Applicant Company is a member of a holding company system, the application must include either the most recent Holding Company Act (HCA) filings, including the annual Form B registration statement and related Form F, or a statement substantially similar to the Insurance Holding Company System Regulatory Act (#440). Holding Company Act filing information should be considered to determine the role of the Applicant Company within the holding company structure, enterprise risk, the financial capacity of the parent to support an insurance operation and the existence of relevant insurance operations experience in the proposed parent or affiliates. Affiliates are identified along with a description of any transactions between the insurer and an affiliate currently outstanding or during the last calendar year. Copies of all advisory, management and service agreements and other attachments need be reviewed for fair and equitable terms. Refer to the Form A Review Best Practices located under Appendix D.

- The applicant state should bear in mind that Holding Company Act filings, including the Holding Company Form F, are highly confidential, but that state laws providing confidentiality protections may vary from those of the applicant state. A state that has not enacted language specified under HCA Item 8 in its entirety will not have the same confidentiality protections afforded in a state where the language has been enacted. State confidentiality statutes applicable to HCA filings should be reviewed by Regulators of each state before any information is exchanged and where an apparent inconsistency is noted, the state’s legal division should be contacted. Regulators should treat all such materials with the highest level of protections afforded by any relevant state, in order to preserve the confidentiality of such materials and to encourage candor and openness in company discussions and disclosures.
NAIC Company Licensing Best Practices Handbook

Best Practices: Application Review

Item 9. SEC Filings or Consolidated GAAP Financial Statement
- If the Applicant Company, its parent or its ultimate holding company has made a filing or registration with the U.S. Securities and Exchange Commission (SEC) in connection with a public offering within the past three years, or filed an 8K, 10K or 10Q within the past 12 months, the filing, including any supplements or amendments, is available electronically from the SEC. If the applicant, its parent or its ultimate holding company is not publicly traded, the application must include a copy of the Applicant Company’s most recent consolidated generally accepted accounting principles (GAAP) financial statement.
- Similar to the Holding Company Act filings, these filings will provide insight into the financial capacity of the parent to support an insurance operation and the existence of relevant insurance operations experience in the proposed parent or affiliates, as well as information regarding control, enterprise risk, and corporate governance.

Item 10. Debt-to-Equity Ratio Statement
- The debt-to-equity ratio statement should be reviewed to determine the debt service burden that is likely to be placed upon the Applicant Company. Debt service should only be provided through earnings not needed by the insurer to service its own operations.

Item 13. NAIC Biographical Affidavits
- These documents are used to perform a background check (if required by the state) to evaluate the suitability, competency, character and integrity of those persons ultimately responsible for the operations of the insurer. Persons to be reviewed are the controlling owners, officers, directors and key managerial personnel with the ultimate authority over the financial and operational decisions of the insurer, such as the chief executive officer (CEO), chief operating officer (COO), chief financial officer (CFO), secretary, chief marketing officer and treasurer.
- Independent third-party background reports are used to identify discrepancies in the biographical affidavit and evaluate the suitability of the controlling owners, officers, directors or key managerial personnel of the Applicant Company and competency to perform the responsibilities of the position held with the company. Issues regarding competency, character and integrity may be self-evident from the information provided in the affidavit or may be determined from the related background review or criminal background check.
  - Regulators will review the biographical affidavit for completeness – each question should have a response. The affiant must use the most current form available and posted on the UCAA website. Insufficient affidavits or affidavits where signature dates are more than six months from the application submit date should not be accepted.
  - Regulators will review the comparison of information provided on the biographical affidavit and the results of the independent third-party background reports.
  - Regulators will note any discrepancies found in the independent third-party background reports and follow up with the Applicant Company.
  - Any key concerns will be addressed with the Applicant Company.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Fingerprint data, if available, can be used to validate the identity of personnel and check for criminal background. Information in the biographical affidavit can then be utilized to verify employment and educational background.

Analysis of Business Plan

Note: Generally, the scope of the analysis of current condition would depend on the prioritization of the Applicant Company. With a primary application (not a redomestication):

i. If it is a stand-alone company, there is no information upon which to establish a prioritization and the use of that technique is inapplicable.

ii. However, if the Applicant Company is part of a holding company structure, the reviewer may want to consider the strengths, structure, ratings, etc. of the holding company.

Application Instruction Items

Item 6. Plan of Operation

- Business plans are written descriptions of expected market conditions, company operations, and related forecasted financial results. The plan of operation section of the UCAA refers to three components: a brief narrative, proforma financial statements/projections and a completed questionnaire (Form 8).
- Overly rapid growth in premium volume, inappropriate pricing, inappropriate underwriting, and product mix are important areas of concern when reviewing a business plan.
- The pricing of insurance products is a difficult task. The premium is established based on estimates of a number of unknown future events. The effects of a failure to accurately estimate the cost of those events or to provide a sufficient margin for adverse deviation from the estimate may not be apparent for a long time. The types of business written by an insurer affect the ability of the insurer to estimate future costs. Certain lines of business are, by their nature, more volatile than others in claim cost experience. Also, the long-tail nature of some lines of business increases the level of uncertainty in estimating future costs. Setting premium rates solely on the basis of rates charged by competitors, without consideration for possible differences in the quality of the business that the insurer and its competitors are writing, should be a concern. The description of pricing should indicate the coordination between the Applicant Company’s actuarial and underwriting and marketing departments.
- The proforma financials should be reviewed for consistency with the stated business plan and reasonableness with respect to assumptions. Projections should be based upon well-described and defensible assumptions that are attainable under the circumstances described in the business plan. The department should consider a review of the business plan and proforma financials by department actuaries and/or other experts.
- The insurance department should consider obtaining a pledge from the Applicant Company to notify the insurance department if any deviations from the filed plan of operation are initiated by the Applicant Company within three years of admission.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

The depth of the review will depend on the complexity and financial strength as well as known risks of the insurer(s). Therefore, the analyst may consider a tailored set of procedures that addresses the specific risks of the insurer(s). The following best practices are presented as a guide for regulatory review and analysis of the plan of operations and financial projections related to UCAA primary and expansion applications, recognizing that this is not an all-inclusive list and not all items on this list will apply to each and every application. This list is intended to be a regulatory tool only. The analyst may find it useful to utilize the Financial Analysis Handbook in conjunction to this checklist during their financial review.

1. Background Analysis
   - Request the Applicant Company’s Insurer Profile Summary (IPS) from the lead state. Upon receipt and review of the IPS, document your findings related to the following:
     - State’s Priority Designation
     - Scoring System Result
     - IRIS Ratio Result
     - Analyst Team System Validation Level
     - RBC Ratio
     - Trend Test
     - Review any material issues or concerns of prospective risks noted in the IPS
     - Review the Applicant Company’s most recent Annual Financial Statement, General Interrogatories, Part 1:
       - #5.1 and #5.2 in order to ascertain if the insurer has been a party to a merger or consolidation; and #6.1 and #6.2 in order to ascertain if the insurer had any certificate of authority, licenses or registrations suspended or revoked by any governmental entity during the reporting period
     - Review the most recent report from a credit rating provider in order to ascertain the current financial strength and credit rating of the insurer
     - Document assessment.

2. Management Assessment
   - Review the entity’s biographical affidavits and third-party verifications
   - Note any areas of concern that would indicate further review is necessary. In conducting such review, also consider whether officers, directors and trustees are suitable (e.g. does the individual have the appropriate background and experience to perform the duties expected) for the positions within the insurer. The analyst could also reference the Best Practices for Background Investigations, Background Guidelines and Red Flags on StateNet.
   - Review of the Applicant Company’s Corporate Governance
   - Review the NAIC Form A and Market Action Tracking System (MATS) databases for related information about the primary applicant and other key persons
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Document assessment.

3. Capital and Surplus Assessment
- Review the proposed Financial Projections, request assumptions used if not provided
- For HMO’s, determine the minimum capital and surplus requirements based on projections
- Review and verify if the following are at or above the statutory minimum requirement for each of the projected years for:
  - Capital
  - Surplus
- Review and verify if the RBC ratio is adequate for each of the projected years
- Review for indications if any surplus notes will be issued as part of the funding component
- Review and assess the surplus note’s impact on overall capitalization
- Review for indications if any capital contributions are contemplated as part of the projections
- Review and assess the capital contributions’ impact on overall capitalization
- Review for indications if any dividend distributions are contemplated as part of the projections
- Review and assess the dividend distributions’ impact on overall capitalization
- Document assessment.

4. Operations Assessment
- Review the projected Statement of Income
- Assess if the company appears to be overleveraged based on the NPW to C&S or RBC ratios
- Review and assess if the combined ratio exceeds 100% for any of the projected years
- For each year projecting net losses, assess the Applicant Company’s ability to absorb and recover from such losses
- For each year projecting negative cash flow from operations, assess the Applicant Company’s ability to absorb and recover from such negative cash flows
- Review the Applicant Company’s most recent audited financial statement to identify any unusual items or areas that indicate additional review is required
- Document assessment.

5. Ultimate Controlling Party (UCP) Financials
- Review the most recent audited financial statements or SEC reports of the UCP
- Assess whether or not the UCP is capable of providing adequate financial support and management experience in operating the Applicant Company
- Calculate the UCP’s total debt to equity ratio and assess the impact of this ratio on Applicant Company’s overall operations and future solvency
- Review lead state Group Profile Summary
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Determine if financial projections are needed for the immediate parent or UCP
- Document assessment.

6. Business Plan
- Review the Business Plan
- Review the Business Plan narrative including the types of products to be sold or lines of business and how they will be distributed
- Review the Applicant Company’s geographic service area and the marketing plan
- Review and explain the insurer’s processes for claim processing and claim payments
- Assess reasonableness of Officer/Director compensation information
- Identify if Managing General Agents (MGA) and Third-Party Administrator (TPA) are properly licensed or registered in the state
  - Review the items related to MGA’s and TPA’s as appropriate
    - Contract
    - Oversight
    - Subcontracting provisions
    - Financials
    - Control
    - Delegation
    - Fees
- Review the Applicant Company’s investment policy and investment management of the applicant
- Review custodial agreements and compliance with statutory deposit safekeeping requirements in accordance with the Financial Condition Examiners Handbook
- Review any financial guarantees involved with this transaction
- Document assessment.

7. Reinsurance
- Review and assess the Applicant Company’s reinsurance program and activities; including the impact of assumed and ceded premiums, retention and limitation levels
- Review the financial condition and AM Best ratings of reinsurers with material reinsurance arrangements
  - Consider separately affiliated and non-affiliated reinsurers, which may require separate financial review
  - Consider financial requirements for licensed, authorized or unauthorized material reinsurance arrangements
- Document assessment.

8. Market Share Report
- Review market share reports
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Assess the impact of the Applicant Company’s projected premiums on the state’s market share and whether there are any areas of concern regarding market share percentages for any of the proposed lines of business
- Determine if a Form E filing is required
- Document assessment.

9. Summary
- Develop and document an overall summary of findings based on the analysis and all other factors that are relevant to evaluating the Applicant Company’s plan of operation and overall financial condition
- Itemize each issue that warrants a company inquiry or resolution
- Send correspondence to Applicant Company.

10. Follow-up
- Upon receipt of the Applicant Company’s response to the inquiry, review and assess the status of each outstanding issue
- Determine if additional company correspondence is required.

Item 11. Custody Agreements
- Custody agreements should be reviewed to determine that the proposed insurer will actually possess its proposed start-up funding. Also, because invested assets make up a significant portion of the asset side of the balance sheet, control of those assets are of utmost importance. The Financial Condition Examiners Handbook provides excellent guidance in reviewing this item.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Primary Application – Redomestication

The redomestication of an insurer presents unique challenges. It is the only licensing-related transaction in which a foreign insurer becomes a domestic insurer of the applicant state. As such, the applicant state will assume primary regulatory oversight of the applicant. Therefore, it is important that the applicant state obtain a level of understanding of the insurer’s condition and operations equivalent to that of its other domestic companies.

The department should effectively communicate with the domestic state to gain an understanding of the reason for redomestication and any concerns of the domestic state. Any concerns raised should be assessed and documented with rationale to support the conclusion.

It is recommended that both the current and proposed domiciliary states have a thorough understanding of the underlying reasons for redomestication. To that end, a meeting with company representatives should be held prior to the filing of an application. See Appendix A for the Primary Application Review Checklist.

The classification of the of the application instruction items is illustrated in the following chart.

Application Instruction Items

The information provided in the application instruction items noted in the primary application should be viewed in conjunction with the items above. The department should assess the redomestication application and accompanying information to effectively reach the appropriate conclusions regarding whether the application is approved or denied. The department should document each assessment for the items listed above.

Item 15. Annual Statements with Attachments

- The Level 1 review as outlined in the Financial Analysis Handbook should be performed.
- Management’s Discussion and Analysis
  - The narrative should be reviewed for explanations of fluctuations in areas such as losses and premium income. Significant events such as expansion into a new line of business or territory will be explained along with other changes that will have been noticed in
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

the review of the annual statement. The information provided in this document should be consistent with the plan of operations.

- Actuarial Opinion
  - The actuarial opinion is reviewed for any qualifications or unusual comments along with any explanation of material risk factors.

Item 16. Quarterly Statements
- The quarterly statements are reviewed for any unexplained inconsistencies or fluctuations from the annual statement.

Item 17. Risk-Based Capital (RBC) Report
- The RBC report should be reviewed for significant risk components such as reserves, premium, reinsurance recoverables and investments. The support for those significant risk components should be reviewed for appropriateness. In addition to comparing the action and control levels to the total adjusted capital, the business plan and other information should be reviewed to ensure all risks are adequately addressed.

Item 18. Independent CPA Audit Report
- The statutory audited financial statement should be reviewed for any differences with the annual statement. The opinion should be non-qualified. The notes should be read for a better understanding of the Applicant Company along with any comments or concerns.

Item 19. Reports of Examination
- The financial examination report provides an understanding of the insurer, addresses the accuracy of the filed financial statements and identifies any issues noted with respect to corporate governance. Review of this document should concentrate on compliance issues, comments and recommendations. The Applicant Company should provide follow-up documentation regarding any concerns noted by the domestic state.
- The applicant state should consider contacting the domiciliary state if concerns exist regarding the insurer’s complaint levels, response times, etc.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

The department should meet with the domestic regulator to obtain, discuss and conclude on, at a minimum, the items listed below. The meeting should be held via conference call; an email exchange is not considered sufficient.

- Most recent Insurer Profile Summary (IPS) and supervisory plan, including supporting analysis detail for significant risks
- Reason for redomestication
- Concerns identified with the insurer/group
- History of communication with the insurer/group
- History of regulatory actions
- Results of recent examinations (financial and market conduct), including findings and resolutions
- Status of and responsibilities for annual financial analysis and group analysis, if applicable
- Status of and responsibilities for financial examinations

The department should notify the lead state of the insurance holding company group on receipt of a redomestication application and obtain a copy of the most recent Group Profile Summary (GPS), if applicable.
Expansion Application

The classification of the application instruction items is illustrated in the following chart.

Administrative Filing

Overall Responsibilities

One person in the insurance department should be assigned as the key administrative coordinator for company licensing applications. This person will be responsible for maintaining a record of applications received, correspondence regarding the application, information received relative to an application, distribution of application materials and the monitoring of time frames regarding the processing of the application. It is recommended that the coordinator utilize a method for tracking the progress of the application; whether it is through the use of the electronic UCAA filing status updates, a database, a word processing document, a spreadsheet or even a TeamMate file.

The completeness of an application is expected prior to the official initiation of the review process and the corresponding start of the “clock.” However, the absence of certain items should not preclude the initial contact with the state of domicile and the start of the review of the significant aspects of the application. For example, the absence of corporate documents such as the current articles of incorporation or an incomplete response on a form should not preclude the contact with the domestic state and a preliminary review of the plan of operations and the biographical affidavits and background reports (if applicable).
Application Instruction Items

The prioritization of the Applicant Company has no effect on the administrative filings processes.

Item 1. Expansion Application Form
- Form 1E “Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application.
- Form 2E “Expansion Application” – The coordinator should review the form for completeness.
- Form 3 “Lines of Insurance” – The coordinator should utilize the Lines of Business Matrix to compare the lines of business authorized in the Applicant Company’s domiciliary state (per the certificate of compliance) with the applied for lines of business.

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances, the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.

Item 4. Statutory Deposit Requirements
- Form 7 “Certificate of Deposit” – The coordinator should review the form and compare the amount of the deposit to the state’s requirement.
- These funds are deposited with the commissioner, generally through a safekeeping or trust receipt, to be held for the benefit and protection of, and as security for, all policyholders and, in some instances, creditors of the insurer making the deposit. Additional deposits are generally required of those insurers applying to write lines of business not covered under state insurance guaranty funds (e.g., guaranty, fidelity, surety, and bond business) or otherwise (e.g., workers’ compensation). The ultimate purpose of these funds is to ensure that liquid assets are unencumbered and available for use by the commissioner, or his/her designee, for the administration of the insurer’s estate should it become insolvent.

Item 5. Name Approval
- The coordinator should determine that a name approval request consistent with the state’s requirements has been filed. If state requirements dictate, the request should be forwarded to the appropriate area for processing.
- Typically, state insurance departments incorporate insurers, but some states require the involvement of the secretary of state or the attorney general. Names are submitted for preapproval because the public has the right to know with whom it is dealing and therefore, someone must determine that the name is not so similar to another as to be likely to deceive or mislead. The name should be such as to show that the company is engaged in the insurance business and preferably to show the type of business. Some states provide for publication and subsequent hearing to ensure that any objections are addressed.

Item 10. Statutory Memberships
The coordinator should compare the application to the state requirements for statutory memberships and determine that appropriate documentation supporting the membership application is included.

Some states require a positive application and confirmation regarding membership in state-mandated risk pools or other organizations. In other words, an insurer may not automatically be a member by virtue of its certificate of authority, but may be required to join outside the jurisdiction of the insurance department.

Item 11. Public Records Package
- The coordinator should compare the contents of the public records package with state requirements. Financial documents should be forwarded to the areas expected to utilize the documents. Operational documents (other than the application form) should be filed as required.

Item 13. Consent to Service of Process
- Form 12 “Consent to Service of Process” – The coordinator should review the form for completeness and file as appropriate.
- This document designates the commissioner or a resident of the state to receive consent to service of process on behalf of the company. Persons or entities to receive forwarded consent to service of process from the commissioner are also provided.

Analysis of Current Condition

Priority 4

The expansion state should determine the prioritization category of the Applicant Company based upon its analysis. For applicants prioritized as Priority 4, the applicant state should contact the domiciliary state if there are any questions or concerns.

Priority 3

If, after discussion with the domiciliary state it is determined the Applicant Company is a Priority 3 company, the expansion state should perform sufficient analysis to fully understand the financial condition and operating practices of the insurer in order to assess the effect of the proposed business plan.

Item 3. Minimum Capital and Surplus Requirements
- This document should make it clear that the Applicant Company understands the expansion state law with respect to the amount of capital and surplus that must be maintained at a minimum. The expansion state processor or analyst can easily determine the Applicant Company’s capital and surplus position by looking at the filed financial statement. The requirement for this document should make it clear that the insurer has read and understands the underlying surplus requirements. The amount required varies from stated capital and free surplus of specific dollar amounts based on lines of authority to a percentage of RBC.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 7. Holding Company Act Filings
- The current registration statement will provide the insurer’s capital structure, general financial condition, ownership and management, along with that of any person controlling the insurer. Affiliates are identified along with a description of any transactions between the Applicant Company and an affiliate that is currently outstanding or was incurred during the last calendar year. A review of this document by an expansion state provides insight into the operations of the insurer and its relationships with its affiliates. Attachments and agreements should only be requested for transactions or items material to the business plan for that state. For additional guidance refer to the Form A Review Best Practices located in Appendix D.

Item 9. Reports of Examination
- As the record of periodic on-site examinations of the Applicant Company’s compliance and accuracy of its financial statements, review of this document should concentrate on compliance issues, comments and recommendations. The Applicant Company should provide follow-up documentation regarding any concerns noted by the domestic state.
- The applicant state may consider contacting the domiciliary state if concerns exist regarding the insurer’s complaint levels, response times, etc.

Item 11. Public Records Package
- The items included in the Public Records Package are familiar to all financial analysts and can be utilized to complete the reviews described in the Financial Analysis Handbook. Unusual results should be discussed with the domiciliary state.

Item 12. NAIC Biographical Affidavits
- These documents are used to perform a background check (if required by the state) to evaluate the suitability, competency, character and integrity of those persons ultimately responsible for the operations of the insurer. Persons to be reviewed are the controlling owners, officers, directors and key managerial personnel with the ultimate authority over the financial and operational decisions of the insurer, such as the chief executive officer (CEO), chief operating officer (COO), chief financial officer (CFO), secretary, chief marketing officer and treasurer.
- Independent third-party background reports are used to identify discrepancies in the biographical affidavit and evaluate the suitability of the controlling owners, officers, directors or key managerial personnel of the Applicant Company and competency to perform the responsibilities of the position held with the company. Issues regarding competency, character and integrity may be self-evident from the information provided in the affidavit or may be determined from the related background review or criminal background check.
  o Regulators will review the biographical affidavit for completeness – each question should have a response. The affiant must use the most current form available and posted on the UCAA website. Insufficient affidavits or affidavits where signature dates are more than six months from application submit date should not be accepted.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Regulators will review the comparison of information provided on the biographical affidavit and the results of the independent third-party background reports.
- Regulators will note any discrepancies found in the independent third-party background reports and follow up with the Applicant Company or domestic regulator for further clarification.
- Any key concerns will be addressed with the Applicant Company or domestic regulator for further clarification.

Fingerprint data, if available, can be used to validate the identity of personnel and check for criminal background. Information in the biographical affidavit can then be utilized to verify employment and educational background, if necessary.

Priority 1 and Priority 2

Priority 1 and 2 companies are generally not considered good candidates for expansion. There is little to be gained from the processing of the administrative filing sections of the application that is destined to be rejected once the analytical review is conducted. If, after discussion with the domiciliary state, it is determined the applicant is a Priority 1 or 2, the expansion state should determine if there is a reason to further analyze the financial condition of the company.

Based on the business plan there may be a reason to further analyze the financial condition of the company (see Analysis of Business Plan: Priority 2, below). The expansion state should communicate with the domiciliary state to understand the circumstances under which expansion may be advisable. In such situations, the expansion state must perform sufficient analysis (at least those required of a Priority 2 company) of the Applicant Company’s financial condition and operating practices to determine that the risks associated with the proposed business plan are within the Applicant Company’s expertise and financial capacity to assume.

Analysis of Business Plan

Priority 4

Item 6. Plan of Operation

- The plan of operation should be reviewed to ensure that the proposed business plan is consistent with the Applicant Company’s demonstrated experience. See Priority 3 Best Practices—Review of Plan of Operations (Proforma Financial Statements, Narrative/Business Plan and Questionnaire).

Priority 3

Item 6. Plan of Operation

- Business plans are written descriptions of expected market conditions, company operations, and related forecasted financial results. The plan of operation section of the UCAA refers to three components: a brief narrative, pro-forma financial statements/projections and a completed questionnaire (Form 8).
By virtue of the filing of the UCAA, the applicant is notifying the state insurance department of recent or planned changes in the insurer’s operations. One recurring factor that appears in many troubled insurance company situations is a recent change in operations, management or ownership. Therefore, overly rapid growth in premium volume, expansion into new geographic areas or new lines of business, inappropriate pricing, inappropriate underwriting, and product mix are important areas of concern when reviewing a business plan.

Geographic growth can lead to less control by the insurer over new producers, underwriting operations, and claims administration. The insurance laws and regulations in the expansion state and the nature of the various operational risks may differ from those of jurisdictions to which the business was previously limited. Similarly, rapid expansion into new lines of business can lead to difficulties if the insurer’s management and personnel lack an adequate knowledge and understanding of the characteristics and risks of the business proposed to be written. Extremely rapid geographic or product line expansion may cause the insurer’s training of new producers, underwriters, and claims personnel to trail growth of the business. A change to specialized lines of business should be accompanied by concurrently obtaining the additional specialized expertise or qualified personnel required to understand and administer that specialized business. Additionally, a rapidly growing insurer may fail to add enough experienced personnel to keep up with its expanding operations. Existing personnel may not have sufficient skills to manage the additional growth.

The pricing of insurance products is a difficult task. The premium is established based on estimates of a number of unknown future events. The effects of a failure to accurately estimate the cost of those events or to provide a sufficient margin for adverse deviation from the estimate may not be apparent for a long time. The types of business written by an insurer affect the ability of the insurer to estimate future costs. Certain lines of business are, by their nature, more volatile than others in claim cost experience. Also, the long-tail nature of some lines of business increases the level of uncertainty in estimating future costs. Setting premium rates solely on the basis of rates charged by competitors, without consideration for possible differences in the quality of the business that the insurer and its competitors are writing, should be a concern. The description of pricing should indicate coordination between the Applicant Company’s actuarial and underwriting and marketing departments.

Concern should be noted when management of the insurer has focused excessively on the agency or marketing aspects of the business. Management may have a tendency to measure success by the volume of business written and ignore the underwriting aspects. Also, while most insurers may establish production or profit goals, these goals may be deemed so important by certain management groups that producers and underwriters may be allowed to relax underwriting standards to permit the acceptance of additional business so as to meet the insurer’s production goals.

The proforma financials should be reviewed for consistency with the stated business plan and reasonableness with respect to assumptions. Projections should be based upon well described and defensible assumptions that are attainable under the circumstances described in the business plan. The insurance department should consider a review of the business plan and proforma financials by department actuaries and/or other experts.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- The insurance department should consider obtaining a pledge from the Applicant Company to notify the insurance department if any deviations from the filed plan of operation are initiated by the entity within three years of admission.

The depth of the review will depend on the complexity and financial strength as well as known risks of the insurer(s). Therefore, the analyst may consider a tailored set of procedures that addresses the specific risks of the insurer(s). The following best practices are presented as a guide for regulatory review and analysis of the plan of operations and financial projections related to UCAA primary and expansion applications, recognizing that this is not an all-inclusive list and not all items on this list will apply to each and every application. This list is intended to be a regulatory tool only. The analyst may find it useful to utilize the Financial Analysis Handbook in conjunction to this checklist during their financial review.

1. **Background Analysis**
   - Request the applicant’s Insurer Profile Summary (IPS) from the lead state. Upon receipt and review of the IPS, document your findings related to the following:
     - State’s Priority Designation
     - Scoring System Result
     - IRIS Ratio Result
     - Analyst Team System Validation Level
     - RBC Ratio
     - Trend Test
     - Review any material issues or concerns of prospective risks noted in the IPS
     - Review the applicant’s most recent Annual Financial Statement, General Interrogatories, Part 1:
       - #5.1 and #5.2 in order to ascertain if the insurer has been a party to a merger or consolidation; and #6.1 and #6.2 in order to ascertain if the insurer had any certificate of authority, licenses or registrations suspended or revoked by any governmental entity during the reporting period
     - Review the most recent report from a credit rating provider in order to ascertain the current financial strength and credit rating of the insurer.

2. **Management Assessment**
   - Review the entity’s biographical affidavits and third-party verifications
   - Note any areas of concern that would indicate further review is necessary. In conducting such review, also consider whether officers, directors and trustees are suitable (e.g. does the individual have the appropriate background and experience to perform the duties expected) for the positions within the insurer. The analyst could also reference the Best Practices for Background Investigations, Background Guidelines and Red Flags on StateNet.
   - Review of the Applicant Company’s Corporate Governance.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

3. **Capital and Surplus Assessment**
   - Review the proposed Financial Projections, request assumptions used if not provided
   - For HMO’s, determine the minimum capital and surplus requirements based on projections
   - Review and verify if the following are at or above the statutory minimum requirement for each of the projected years for:
     - Capital
     - Surplus
   - Review and verify if the RBC ratio is adequate for each of the projected years
   - Review for indications if any surplus notes will be issued as part of the funding component
   - Review and assess the surplus note’s impact on overall capitalization
   - Review for indications if any capital contributions are contemplated as part of the projections
   - Review and assess the capital contributions’ impact on overall capitalization
   - Review for indications if any dividend distributions are contemplated as part of the projections
   - Review and assess the dividend distributions’ impact on overall capitalization.

4. **Operations Assessment**
   - Review the projected Statement of Income
   - Assess if the company appears to be overleveraged based on the NPW to C&S or RBC ratios
   - Review and assess if the combined ratio exceeds 100% for any of the projected years
   - For each year projecting net losses, assess the Applicant Company’s ability to absorb and recover from such losses
   - For each year projecting negative cash flow from operations, assess the company’s ability to absorb and recover from such negative cash flows
   - Review the company’s most recent audited financial statement to identify any unusual items or areas that indicate additional review is required.

5. **Ultimate Controlling Party (UCP) Financials**
   - Review the most recent audited financial statements or SEC reports of the UCP
   - Assess whether or not the UCP is capable of providing adequate financial support and management experience in operating the Applicant Company
   - Calculate the UCP’s total debt to equity ratio and assess the impact of this ratio on Applicant Company’s overall operations and future solvency
   - Review lead state Group Profile Summary
   - Determine if financial projections are needed for the immediate parent or UCP.

6. **Business Plan**
   - Review the Business Plan
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Review the Business Plan narrative including the types of products to be sold or lines of business and how they will be distributed
- Review the applicant’s geographic service area and the marketing plan
- Review and explain the insurer’s processes for claim processing and claim payments
- Assess reasonableness of Officer/Director compensation information
- Identify if Managing General Agents (MGA) and Third-Party Administrator (TPA) are properly licensed or registered in the state
  - Review the items related to MGA’s and TPA’s as appropriate
    - Contract
    - Oversight
    - Subcontracting provisions
    - Financials
    - Control
    - Delegation
    - Fees
- Review the Applicant Company’s investment policy and investment management of the applicant
- Review custodial agreements and compliance with statutory deposit safekeeping requirements in accordance with the Financial Condition Examiners Handbook
- Review any financial guarantees involved with this transaction.

7. Reinsurance
   - Review and assess the Applicant Company’s reinsurance program and activities; including the impact of assumed and ceded premiums, retention and limitation levels
   - Review the financial condition and AM Best ratings of reinsurers with material reinsurance arrangements
     - Consider separately affiliated and non-affiliated reinsurers, which may require separate financial review
     - Consider financial requirements for licensed, authorized or unauthorized material reinsurance arrangements.

8. Market Share Report
   - Review market share reports
   - Assess the impact of the applicant projected premiums on the state’s market share and whether there are any areas of concern regarding market share percentages for any of the proposed lines of business
   - Determine if a Form E filing is required.

9. Summary
   - Develop and document an overall summary of findings based on the analysis and all other factors that are relevant to evaluating the Applicant Company’s plan of operation and overall financial condition
Best Practices: Application Review

- Itemize each issue that warrants a company inquiry or resolution
- Send correspondence to Applicant Company.

10. Follow-up
- Upon receipt of the Applicant Company’s response to the inquiry, review and assess the status of each outstanding issue
- Determine if additional company correspondence is required.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Form 8 – Interrogatories from Form 8 that provide insight into the Applicant Company’s business plan are discussed below.

Interrogatory 2: Encumbered assets must be explored for propriety; Pledged capital stock is a sign of borrowing and repayment terms and conditions must be investigated; Merger or consolidation might explain significant fluctuations in a historical financial analysis.

Interrogatory 4: Historical information in order to do further research, if necessary. An explanation is adequate. The initial request of copies of documentation is unnecessary unless questions arise concerning the veracity of the Applicant Company’s response to this and other questions.

Interrogatory 5: A change in management or control may have a significant impact on operations.

Interrogatory 6: The most recent Holding Company Filings should suffice to explain the holding company structure and intercompany relationships. If no holding corporation, then an explanation should suffice initially.

Interrogatory 8: Revocation of a certificate of authority or denial of licensure should be discussed with the domiciliary state to determine if the proximate causes for such actions are still in existence.

Interrogatory 9: Positive responses to this interrogatory should be discussed with the domiciliary state. All responses should be compared to the results of criminal background checks.

Interrogatory 10: Such dispute may affect the financial condition and may be an indication of inappropriate business practices.

Interrogatory 11: Such legal action may affect the financial condition and may be an indication of inappropriate business practices.

Interrogatory 12: Conflicts of interest can detrimentally affect the operations of an insurer.

Interrogatory 13: Positive responses to this interrogatory may affect the manner in which the company’s products are marketed. Additionally, the Applicant Company’s parent or affiliates will be subject to regulatory restrictions.

Interrogatory 14: Conflicts of interest can detrimentally affect the operations of an insurer.

Interrogatory 15: The organizational flow chart should depict the day-to-day management and internal controls within the company. The map or narrative depicting the location(s) of the office(s) should also contain the approximate number of employees for each location. Copies of agreements should be attached.

Interrogatories 16 and 17: The marketing plan is the core of the applicant’s business plan narrative. The use, oversight, and compensation of producers are important aspects of product delivery. Since each state or region inherently may have unique market conditions related to products, distribution systems, or competition, serious thought must be put into these areas. Copies of agreements should initially be required with the primary application.

Interrogatory 18: The applicant should be able to provide benefits to the citizens that do not already exist.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Interrogatory 19: One of the state’s responsibilities is to prevent unfair trade practices. Deceptive advertising and sales are prohibited.

Interrogatories 20 and 21: Product administration should be included in the narrative of the business plan. Knowledge, experience and capacity are necessary ingredients. Service agreements and personnel oversight need only be initially provided in the primary application.

Interrogatory 22: Affiliated agreements for tax allocation, services and facilities are necessary to be reviewed with the primary application to ensure fairness and equity. Rates should be on an actual cost basis, but should be no less than market rates.

Interrogatory 24: Conflicts of interest can detrimentally affect the operations of an insurer.

Interrogatory 25: The expense of the options can affect the financial condition. The exercising of those options can affect control of the insurer. The existence of those options can affect the insurer’s ability to raise other capital.

Interrogatories 26-29: Review the responses to these interrogatories if specific state laws address these issues.

Interrogatory 30: Conflicts of interest can detrimentally affect the operations of an insurer.

The following questions apply only if the Applicant Company is filing a primary redomestication application.

Interrogatories 31 and 32c: It is important to understand the effect of prescribed or permitted practices on the reported financial condition of the company.

Interrogatories 32 and 33: It is important for both the applicant and the state of redomestication to know and address any regulatory differences.

Interrogatory 34: Interest and principal payment restrictions need to be clearly understood and agreed upon.
Priority 2

Priority 2 companies are generally not considered good candidates for expansion. There is little to be gained from the processing of the administrative filing sections of the application that is destined to be rejected once the analytical review is conducted.

However, in certain unique circumstances, based on the line of business offered and the market conditions in the expansion state, it may be appropriate to pursue licensure under heavily monitored criteria. For example, a small, specialty insurer (such as a captive insurer) may not demonstrate the qualities of a Priority 4 or Priority 3 company. Such a company may have a commercial policyholder with operations located in a state where it is not licensed. In order to continue to provide coverage to the policyholder, the insurer must seek licensure in the additional state. In this circumstance, the expansion state may grant a certificate of authority with additional restrictions that only identified risks be written.

In such situations, the expansion and domiciliary state must perform sufficient analysis (at least those required of a Priority 2 company) of the company’s financial condition and business plan to determine that such risks are within the company’s expertise and financial capacity to assume. The reasons why the proposed expansion would be tolerable should then be delineated.

Priority 1

Insurers included in Priority 1 are considered troubled and subject to comprehensive annual and quarterly analysis procedures, detailed considerations outlined with the Troubled Insurance Company Handbook, and a significantly elevated level of ongoing regulatory monitoring and oversight.

Insurers in this group generally are not capable of withstanding even moderate business fluctuations. There may be significant noncompliance with laws and regulations. Risk-management practices are generally unacceptable relative to the insurer’s size, complexity and risk profile. Corporate and group structures or framework may be of a nature that is not conducive to effective regulation. Close regulatory attention is required, which means formal action is necessary in most cases to address the problems. Insurers in this group pose a risk to the state guaranty fund. Priority 1 companies should not be considered for expansion.
Corporate Amendment Application – Adding and Deleting Lines of Business

The classification of the application instruction items is illustrated in the following chart.

**Administrative Items**

**Item 1. Application Form and Attachments**
- Form 1C “Corporate Amendments Application Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application. As stated on the checklist form, this document is simply a guide. It is a reminder of what should initially be included in the application package in order for it to be considered complete. This form is all-inclusive but should be completed with due consideration to the specific amendment(s) requested. Items required are dependent upon the request of the applicant.
- Form 2C “Corporate Amendments Application” – The coordinator should review the form for completeness. This form contains minimum required information.
- Form 3 “Lines of Insurance” – The coordinator should utilize the [Lines of Business Matrix](#) to compare the lines of business authorized in the company’s domiciliary state (per the certificate of compliance) with the applied for lines of business.

**Item 2. Filing Fee**
- Review check submitted in payment of fees for correct amount. In some instances, the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $500 and are generally retaliatory.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 3. Articles of Incorporation
• In some instances, the articles of incorporation contain specific references to the lines of business the entity is authorized to engage. Such language should be consistent with the proposed changes to the certificate of authority.

Item 4. Bylaws
• The bylaws generally should not have to be reviewed in connection with the addition or deletion of a line of business.

Item 6. Statutory Deposit Requirements
• These funds are deposited with the commissioner, generally through a safekeeping or trust receipt, to be held for the benefit and protection of, and as security for, all policyholders and, in some instances, creditors of the insurer making the deposit. Additional deposits are generally required of those insurers applying to write lines of business not covered under state insurance guaranty funds (e.g., guaranty, fidelity, surety, and bond business) or otherwise (e.g., workers’ compensation). The ultimate purpose of these funds is to ensure that liquid assets are unencumbered and available for use by the commissioner, or his/her designee, for the administration of the insurer’s estate should it become insolvent. Unless a line of business is being applied for that is not protected by a guaranty fund, the domestic state should hold the deposit in an aggregate amount of no less than the minimum required capital.

Item 8. Statutory Memberships
• May be required, dependent upon line of business requested.
• Some states require a positive application and confirmation regarding membership in state-mandated risk pools or other organizations. In other words, an insurer may not automatically be a member by virtue of its certificate of authority, but may be required to join outside the jurisdiction of the insurance department.

Analysis of Current Condition

Priority 4

If the company is prioritized as 4, then typically only the certificate of compliance need be reviewed by the applicant state. However, some circumstances may exist that would warrant additional analysis by the applicant state. For example, differing capital and surplus requirements in the states may require some consideration by a particular applicant state. In addition, permitted practices granted to an applicant insurer by its domiciliary state may account for a significant amount of the insurer’s surplus, in which case the applicant state may need to perform a bit more analysis than just reviewing the comment.
Priority 3

If the company is prioritized as 3, then the following review of application documents is suggested:

Item 5. Minimum Capital and Surplus Requirements
  • This document should make it clear that the Applicant Company understands the state law with respect to the amount of capital and surplus that must be maintained at a minimum with respect to the line of business to be added. The analyst can easily determine the Applicant Company’s capital and surplus position by looking at the filed financial statement. The requirement for this document should make it clear that the insurer has read and understands the underlying surplus requirements. The amount required varies from stated capital and of specific dollar amounts based on lines of authority to a percentage of risk-based capital.

Priority 2

If the company is prioritized as Priority 2, then the Applicant Company state should discuss with the domiciliary state whether there exists any extraordinary circumstance that might outweigh the Applicant Company’s operating condition.

Analysis of Business Plan

Priority 4

If the Applicant Company is prioritized as Priority 4, then Item 7, Plan of Operation, should be reviewed to determine that the company has experience with the requested new line of business. Regardless of risk category, a line of business should not be deleted unless all liabilities in that line are extinguished. See Corporate Amendment – Adding and Deleting Lines of Business, Priority 3, Plan of Operation for Best Practices – Review of Plan of Operations (Proforma Financial Statements, Narrative/Business Plan and Questionnaire).

Priority 3

If the Applicant Company is prioritized as 3, then the following review of application documents is suggested.

Item 7. Plan of Operation
  • The narrative business plan including the rationale for adding lines of business and the sales and administration of that business along with the accompanying pro-forma financial statements/projections should provide the information initially required in this section. Dependent upon the prioritization of the Applicant Company and the specific line of business requested, along with the experience in that line of the insurer, Form 8C may be required.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

The depth of the review will depend on the complexity and financial strength as well as known risks of the insurer(s). Therefore, the analyst may consider a tailored set of procedures that addresses the specific risks of the insurer(s). The following best practices are presented as a guide for regulatory review and analysis of the plan of operations and financial projections related to UCAA primary and expansion applications, recognizing that this is not an all-inclusive list and not all items on this list will apply to each and every application. This list is intended to be a regulatory tool only. The analyst may find it useful to utilize the Financial Analysis Handbook in conjunction to this checklist during their financial review.

1. Background Analysis
   • Request the applicant’s Insurer Profile Summary (IPS) from the lead state. Upon receipt and review of the IPS, document your findings related to the following:
     • State’s Priority Designation
     • Scoring System Result
     • IRIS Ratio Result
     • Analyst Team System Validation Level
     • RBC Ratio
     • Trend Test
   • Review any material issues or concerns of prospective risks noted in the IPS
   • Review the applicant’s most recent Annual Financial Statement, General Interrogatories, Part 1:
     o #5.1 and #5.2 in order to ascertain if the insurer has been a party to a merger or consolidation; and #6.1 and #6.2 in order to ascertain if the insurer had any certificate of authority, licenses or registrations suspended or revoked by any governmental entity during the reporting period
   • Review the most recent report from a credit rating provider in order to ascertain the current financial strength and credit rating of the insurer.

2. Management Assessment
   • Review the entity’s biographical affidavits and third-party verifications
   • Note any areas of concern that would indicate further review is necessary. In conducting such review, also consider whether officers, directors and trustees are suitable (e.g. does the individual have the appropriate background and experience to perform the duties expected) for the positions within the insurer. The analyst could also reference the Best Practices for Background Investigations, Background Guidelines and Red Flags on StateNet.
   • Review of the Applicant Company’s Corporate Governance.

3. Capital and Surplus Assessment
   • Review the proposed Financial Projections, request assumptions used if not provided
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- For HMO’s, determine the minimum capital and surplus requirements based on projections
- Review and verify if the following are at or above the statutory minimum requirement for each of the projected years for:
  - Capital
  - Surplus
- Review and verify if the RBC ratio is adequate for each of the projected years
- Review for indications if any surplus notes will be issued as part of the funding component
- Review and assess the surplus note’s impact on overall capitalization
- Review for indications if any capital contributions are contemplated as part of the projections
- Review and assess the capital contributions’ impact on overall capitalization
- Review for indications if any dividend distributions are contemplated as part of the projections
- Review and assess the dividend distributions’ impact on overall capitalization.

4. Operations Assessment
- Review the projected Statement of Income
- Assess if the Applicant Company appears to be overleveraged based on the NPW to C&S or RBC ratios
- Review and assess if the combined ratio exceeds 100% for any of the projected years
- For each year projecting net losses, assess the Applicant Company’s ability to absorb and recover from such losses
- For each year projecting negative cash flow from operations, assess the company’s ability to absorb and recover from such negative cash flows
- Review the Applicant Company’s most recent audited financial statement to identify any unusual items or areas that indicate additional review is required.

5. Ultimate Controlling Party (UCP) Financials
- Review the most recent audited financial statements or SEC reports of the UCP
- Assess whether or not the UCP is capable of providing adequate financial support and management experience in operating the Applicant Company
- Calculate the UCP’s total debt to equity ratio and assess the impact of this ratio on Applicant Company’s overall operations and future solvency
- Review lead state Group Profile Summary
- Determine if financial projections are needed for the immediate parent or UCP.

6. Business Plan
- Review the Business Plan
- Review the Business Plan narrative including the types of products to be sold or lines of business and how they will be distributed
- Review the insurer’s geographic service area and the marketing plan
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

- Review and explain the insurer’s processes for claim processing and claim payments
- Assess reasonableness of Officer/Director compensation information
- Identify if Managing General Agents (MGA) and Third-Party Administrator (TPA) are properly licensed or registered in the state
  o Review the items related to MGA’s and TPA’s as appropriate
    - Contract
    - Oversight
    - Subcontracting provisions
    - Financials
    - Control
    - Delegation
    - Fees
- Review the Applicant Company’s investment policy and investment management of the insurer
- Review custodial agreements and compliance with statutory deposit safekeeping requirements in accordance with the Financial Condition Examiners Handbook
- Review any financial guarantees involved with this transaction.

7. Reinsurance
   - Review and assess the Applicant Company’s reinsurance program and activities; including the impact of assumed and ceded premiums, retention and limitation levels
   - Review the financial condition and AM Best ratings of reinsurers with material reinsurance arrangements
     o Consider separately affiliated and non-affiliated reinsurers, which may require separate financial review
     o Consider financial requirements for licensed, authorized or unauthorized material reinsurance arrangements.

8. Market Share Report
   - Review market share reports
   - Assess the impact of the Applicant Company’s projected premiums on the state’s market share and whether there are any areas of concern regarding market share percentages for any of the proposed lines of business
   - Determine if a Form E filing is required.

9. Summary
   - Develop and document an overall summary of findings based on the analysis and all other factors that are relevant to evaluating the Applicant Company’s plan of operation and overall financial condition
   - Itemize each issue that warrants a company inquiry or resolution
   - Send correspondence to Applicant Company.
10. Follow-up

- Upon receipt of the Applicant Company’s response to the inquiry, review and assess the status of each outstanding issue
- Determine if additional company correspondence is required.

Item 11. Deleting Lines of Business

- Deletion of a line of business requires notification and adequate establishment or extinguishment of liabilities. A line of business should not be deleted unless all liabilities in that line are extinguished.

Priority 2

If the company is prioritized as 2, then the applicant state should discuss with the domiciliary state whether there exists any extraordinary circumstance that might outweigh the Applicant Company’s operating condition. In certain instances the proposed plan of operation might provide for a limited expansion of authority in order to maintain its current policyholder base. Should approval be granted, the business plan should be carefully reviewed and closely monitored. See Corporate Amendment – Adding and Deleting Lines of Business, Priority 2, Plan of Operation for Best Practices – Review of Plan of Operations (Proforma Financial Statements, Narrative/Business Plan and Questionnaire).
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Corporate Amendment Application – Name Change – For Filing with Non-Domiciliary States

Corporate amendment applications involving a change of name or location of the insurer are often accompanied by related policy form approval filings reflecting the change in name or location. In some instances, the company license application process is held in abeyance until a complete review of policy forms has been completed. It is recommended that in such instances a policy form endorsement be approved for only the change in name or location, in lieu of a complete policy form review.

The classification of the application instruction items is illustrated in the following chart.

Administrative Filing

Application Instruction Items

Item 1. Application Form and Attachments
- Form 1C “Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application.
- Form 2C “Corporate Amendment Application” – The coordinator should review the form for completeness.

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.

Item 3. Articles of Incorporation
- The amended articles of incorporation should be reviewed to determine that the new name is reflected.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 4. Bylaws
  • The amended bylaws should be reviewed to determine that the new name is reflected.

Item 5. Consent to Service of Process
  • The amended consent to service of process should be reviewed to determine that the new
  name is reflected.

Item 6. State of Domicile Approval
  • The domiciliary state should have already approved the name change.

Item 8. Name Approval
  • Typically state insurance departments incorporate insurers, but some states require the
    involvement of the secretary of state or the attorney general. Names are submitted for
    preapproval because the public has the right to know with whom it is dealing and therefore,
    someone must determine that the name is not so similar to another as to be likely to deceive
    or mislead. The name should be such as to show that the company is engaged in the
    insurance business and preferably to show the type of business. Some states provide for
    publication and subsequent hearing to ensure that any objections are addressed.
  • The coordinator should determine that a name approval request consistent with the state’s
    requirements has been filed. If state requirements dictate, the request should be forwarded
    to the appropriate area for processing.
Corporate Amendment Application – Redomestication of a Foreign Insurer

Administrative Filing

Application Instruction Items

Item 1. Application Form and Attachments
- Form 1P “Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application.
- Form 2C “Corporate Amendment Application” – The coordinator should review the form for completeness.
- The coordinator should utilize the Lines of Business Matrix to compare the lines of business in the Applicant Company’s new domicile state with the authorized lines of business in the applicant state.

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.

Item 3. Articles of Incorporation
- The amended articles of incorporation should be reviewed to determine that the new state of domicile is reflected.

Item 4. Bylaws
- The amended bylaws should be reviewed to determine that the new state of domicile is reflected.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 5. Statutory Deposit Requirements
- Form 7 – The Certificate of Deposit should be reviewed to determine that the new state of domicile is reflected and compare the amount of the deposit of the new state of domicile to the state’s requirement.

Item 6. Consent to Service of Process
- The amended consent to service of process should be reviewed to determine that the new state of domicile is reflected.

Item 7. State of Domicile Approval
- The domiciliary state should have already approved the redomestication.
**Corporate Amendment Application – Change of Statutory Home Office Address**

The classification of the application instruction items is illustrated in the following chart.

**Administrative Filing**

**Application Instruction Items**

**Item 1. Application Form and Attachments**
- Form 1C “Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application.
- Form 2C “Corporate Amendment Application” – The coordinator should review the form for completeness.
- Old Certificate of Authority – The Applicant Company should have surrendered the old certificate of authority or filed an affidavit of a lost certificate of authority.

**Item 2. Filing Fee**
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance Department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.

**Item 3. Articles of Incorporation**
- The amended articles of incorporation or other documentation required or permitted by the domiciliary state should be reviewed to determine that the new location is reflected.

**Item 4. Bylaws**
- The amended bylaws should be reviewed to determine that if a location for the insurer is stated, the bylaws have been updated to reflect the new location.
NAIC Company Licensing Best Practices Handbook

Best Practices: Application Review

Item 5. Consent to Service of Process
- The amended consent to service of process should be reviewed to determine that the new location is reflected.

Item 6. State of Domicile Approval
- The domiciliary state (if the applicant is a foreign company) should have already approved the location change.
NAIC Company Licensing Best Practices Handbook

Administrative Items

A merger requires notification to all states in which the Applicant Company is licensed. Corporate documents must be amended to incorporate the new address along with other requirements that may be state-specific.

Item 1. Application Form and Attachments
- Form 1C “Corporate Amendments Application Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application. As stated on the checklist form, this document is simply a guide. It is a reminder of what should initially be included in the application package in order for it to be considered complete. This form is all-inclusive, but should be completed with due consideration to the specific amendment(s) requested. Items required are dependent upon the request of the applicant.
- Form 2C “Corporate Amendments Application” – The coordinator should review the form for completeness. This form contains minimum required information.
- Form 3 “Lines of Insurance” – The coordinator should verify if the Applicant Company is authorized to write all lines of business, including variable products in the state. If the Applicant Company is not authorized to write all lines of business in the state, then the Applicant Company should also complete Section I (Adding and Deleting Lines of Business) in the UCAA Corporate Amendment Application.
Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.

Item 3. Articles of Incorporation/Articles of Merger
- The certificate of merger from the domestic state of the surviving entity serves as the “marriage license” and notes the approval of that state. The articles of merger serve as the “marriage contract” and specify the terms of the merger. These documents should be retained as permanent corporate records as part of the articles of incorporation.

Item 4. Bylaws
- The bylaws need only be reviewed if they have been amended.

Item 6. Statutory Deposit Requirements
- Form 7 “Certificate of Deposit” – The coordinator should review the form and compare the amount of the deposit to the state’s requirement.
- These funds are deposited with the commissioner, generally through a safekeeping or trust receipt, to be held for the benefit and protection of, and as security for, all policyholders and, in some instances, creditors of the insurer making the deposit. Additional deposits are generally required of those insurers applying to write lines of business not covered under state insurance guaranty funds (such as guaranty, fidelity, surety, and bond business) or otherwise (e.g., workers’ compensation). The ultimate purpose of these funds is to ensure that liquid assets are unencumbered and available for use by the commissioner, or his/her designee, for the administration of the insurer’s estate should it become insolvent.

Item 8. Statutory Memberships
- This item may be applicable depending on any new lines of business added.
- Some states require a positive application and confirmation regarding membership in state-mandated risk pools or other organizations. In other words, an insurer may not automatically be a member by virtue of its certificate of authority, but may be required to join outside the jurisdiction of the insurance department.

Item 10. Consent to Service of Process
- This document designates the commissioner or a resident of the state to receive consent to service of process on behalf of the entity. Persons or entities to receive forwarded consent to service of process from the commissioner are also provided.

Item 11. State of Domicile Approval
- The certificate of merger is the approval of the domestic state of the surviving entity. It should be accompanied by a certificate of compliance from the other state involved, if applicable.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Analysis of Current Condition

Item 5. Minimum Capital and Surplus Requirements
- This item may be applicable depending on any new lines of business added.

Item 9. NAIC Biographical Affidavits
- A review of biographical affidavits is only necessary if there is a change in officers, directors or ownership.
- These documents are used to perform a background check (if required by the state) to evaluate the suitability, competency, character and integrity of those persons ultimately responsible for the operations of the insurer. Persons to be reviewed are the controlling owners, officers, directors and key managerial personnel with the ultimate authority over the financial and operational decisions of the insurer, such as the chief executive officer (CEO), chief operating officer (COO), chief financial officer (CFO), secretary, chief marketing officer and treasurer.
- Independent third-party background reports are used to identify discrepancies in the biographical affidavit and evaluate the suitability of the controlling owners, officers, directors or key managerial personnel of the applicant and competency to perform the responsibilities of the position held with the company. Issues regarding competency, character and integrity may be self-evident from the information provided in the affidavit or may be determined from the related background review or criminal background check.
  - Regulators will review the biographical affidavit for completeness- each question should have a response. The affiant must use the most current form available and posted on the UCAA website. Insufficient affidavits or affidavits where signature dates are more than six months from application submit date should not be accepted.
  - Regulators will review the comparison of information provided on the biographical affidavit and the results of the independent third-party background reports.
  - Regulators will note any discrepancies found in the independent third-party background reports and follow up with the Applicant Company or domestic regulator for further clarification.
  - Any key concerns will be addressed with the Applicant Company or domestic regulator for further clarification.

Analysis of Business Plan

Item 7. Plan of Operation
- The articles of merger and/or the accompanying business plan of the surviving entity should be reviewed for informational purposes. See Corporate Amendment – Adding and Deleting Lines of Business. Plan of Operation for Best Practices – Review of Plan of Operations (Proforma Financial Statements, Narrative/Business Plan and Questionnaire).

Administrative Items

Proposed change of control transaction information (proposed transaction) and a second filing of actual information after the change of control are complete (completed transaction). This application is not applicable for filing in a state if the insurer is a domestic insurer in that state.

Item 1. Application Form and Attachments

- Form 1C “Corporate Amendments Application Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application. As stated on the checklist form, this document is simply a guide. It is a reminder of what should initially be included in the application package in order for it to be considered complete. This form is all-inclusive, but should be completed with due consideration to the specific amendment(s) requested. Items required are dependent upon the request of the Applicant Company.
- Form 2C “Corporate Amendments Application” – The coordinator should review the form for completeness. This form contains minimum required information.

Item 2. Filing Fee

- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

Item 3. Articles of Incorporation
- If the Articles of Incorporation have changed as a result of the change of control, file the amended Articles. If the most recently filed (in the state for which you are applying) Articles of Incorporation have not changed, do not file the Articles of Incorporation. Simply state that the current articles are already on file with the state to which this application relates. If it is expected that revised Articles of Incorporation will be submitted in the completed transaction filing, indicate that in the proposed transaction filing.

Item 4. Bylaws
- The bylaws need only be submitted if they have been amended. If it is expected that revised bylaws will be submitted in the completed transaction filing, indicate that in the proposed transaction filing.

Item 7. Consent to Service of Process
- This document designates the commissioner or a resident of the state to receive consent to service of process on behalf of the company. Persons or entities to receive forwarded consent to service of process from the commissioner are also provided.

Item 8. State of Domicile Approval
- Verify that the domiciliary state approved the change of control.
- Refer to Appendix D, Form A Review Best Practices for additional guidance.

Item 9. State-Specific Information
- Some jurisdictions may have additional requirements that must be met before a proposed change of control can be completed. For example, some states require the filing of a Form E (Pre-Acquisition Notification Form Regarding the Potential Competitive Impact of a Proposed Merger or Acquisition by a Non-Domestic Insurer Doing Business in this State or by a Domestic Insurer) at least 30 days before the completion of a change of control transaction. In addition, some states may require a Form B amended statement, in accordance with the Insurance Holding Company System Regulatory Act (#440), after completion of the change of control transaction. Before completing a UCAA Corporate Amendments Application the applicant should review a listing of requirements for the state to which you are applying. State-specific information is listed on the state-specific chart.

Analysis of Current Condition

Item 6. NAIC Biographical Affidavits
- A review of biographical affidavits is only necessary if there is a change in officers, directors or ownership.
- These documents are used to perform a background check (if required by the state) to evaluate the suitability, competency, character and integrity of those persons ultimately responsible for the operations of the insurer. Persons to be reviewed are the controlling owners, officers, directors and key managerial personnel with the ultimate authority over the financial and operational decisions of the insurer, such as the chief executive officer.
NAIC Company Licensing Best Practices Handbook
Best Practices: Application Review

(CEO), chief operating officer (COO), chief financial officer (CFO), secretary, chief marketing officer and treasurer.

- Independent third-party background reports are used to identify discrepancies in the biographical affidavit and evaluate the suitability of the controlling owners, officers, directors or key managerial personnel of the Applicant Company and competency to perform the responsibilities of the position held with the entity. Issues regarding competency, character and integrity may be self-evident from the information provided in the affidavit or may be determined from the related background review or criminal background check.
  - Regulators will review the biographical affidavit for completeness- each question should have a response. The affiant must use the most current form available and posted on the UCAA website. Insufficient affidavits or affidavits where signature dates are more than six months from application submit date should not be accepted.
  - Regulators will review the comparison of information provided on the biographical affidavit and the results of the independent third-party background reports.
  - Regulators will note any discrepancies found in the independent third-party background reports and follow up with the Applicant Company or domestic regulator for further clarification.
  - Any key concerns will be addressed with the Applicant Company or domestic regulator for further clarification.

Analysis of Business Plan

Item 5. Plan of Operation

- If the business plan of the insurer will change as a result of the change of control transaction, a plan of operation must be submitted; otherwise, a statement that the business plan will not change will suffice and should be submitted. The plan of operation is made up of two components: a brief narrative and proforma financial statements/projections (Form 13). The narrative should include significant information in support of the application. Projections must support all aspects of the proposed plan of operation, including reinsurance arrangements and any delegated function agreements. Include the assumptions used to arrive at these projections. See Corporate Amendment – Adding and Deleting Lines of Business. Plan of Operation for Best Practices – Review of Plan of Operations (Proforma Financial Statements, Narrative/Business Plan and Questionnaire).

Administrative Items

Amended articles of incorporation require notification to all states in which the Applicant Company is licensed. This application is not applicable for filing in a state if the insurer is a domestic insurer in that state.

Item 1. Application Form and Attachments
- Form 1C “Corporate Amendments Application Checklist” – The coordinator should review the Checklist for completeness and that all described documents are included in the application. As stated on the checklist form, this document is simply a guide. It is a reminder of what should initially be included in the application package in order for it to be considered complete. This form is all-inclusive, but should be completed with due consideration to the specific amendment(s) requested. Items required are dependent upon the request of the applicant.
- Form 2C “Corporate Amendments Application” – The coordinator should review the form for completeness. This form contains minimum required information.

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.
- Filing fees range from $0 to in excess of $200 and are generally retaliatory.

Item 3. Articles of Incorporation
- Indicate the location of the language within the articles of incorporation that reflects the change. (Page number, section number, etc., of the articles of incorporation).
Item 4. Bylaws
- The bylaws need only be submitted if they have been amended.

Item 5. State of Domicile Approval
- Provide a copy of the amended articles of incorporation approval from the Applicant Company’s state of domicile.

Item 6. State-Specific Information
- Some jurisdictions may have additional requirements that must be met before articles of incorporation can be amended. Before completing a UCAA Corporate Amendments Application the Applicant Company should review a listing of requirements for the state to which you are applying.

Item 1. Application Form and Attachments
- Form 1C “Corporate Amendments Application Checklist” – The coordinator should review the checklist for completeness and that all described documents are included in the application. As stated on the checklist form, this document is simply a guide. It is a reminder of what should initially be included in the application package in order for it to be considered complete. This form is all-inclusive, but should be completed with due consideration to the specific amendment(s) requested. Items required are dependent upon the request of the applicant. If the Applicant Company cannot return its original certificate of authority, they must complete and attach an Affidavit of Lost Certificate of Authority (Form 15).

Item 2. Filing Fee
- Review check submitted in payment of fees for correct amount. In some instances the check may be held by another section of the insurance department. In that case, review the description of the check received.
- Forward check for deposit or provide information for proper processing of check.

Item 3. Statement of Withdrawal and Attachments
- The statement for withdrawal must include a thorough explanation for the surrender of its certificate of authority.
- The Applicant Company must provide sufficient explanations for outstanding claims, contingent liabilities, or laws suits currently existing.
- The Applicant Company must also state whether any business will be transferred to another insurer and attach any reinsurance agreements.

Item 4. State-Specific Information
- Some jurisdictions may have additional requirements that the Applicant Company must meet before the state can cancel a Certificate of Authority. Before completing a UCAA Corporate Amendment Application, the Applicant Company should review the listing of State-Specific Requirements for the application state.
**NAIC Company Licensing Best Practices Handbook**

Appendix A – The Uniform Certificate of Authority Application (UCAA)

**THE UCAA**

In conjunction with the NAIC, the various states have worked toward the goal of streamlining and achieving uniformity in the insurer licensing process. The insurer licensing process encompasses the initial licensing of an insurer, as well as licensing in additional states and filings that modify or expand an existing certificate of authority. It was the intent of the former Accelerated Licensing Evaluation Review Technique (ALERT) Subgroup that each of the adopted application packages contains a complete listing of the requirements for licensing in a state. The Uniform Certificate of Authority Application (UCAA) website that provides a consistent frame of reference for all participants in the licensing process. There are three types of applications: primary, expansion and corporate amendments. Those application types and their component items are described below.

**Primary Application**

The UCAA primary application is for use in the formation of a new insurer, or for an existing insurer to use in making application to redomesticate to another state. It contains the following items:

1. Application Form and Attachments
2. Filing Fee
3. Minimum Capital and Surplus Requirements
4. Statutory Deposit Requirements
5. Name Approval
6. Plan of Operation
7. Holding Company Act Filings
8. Statutory Membership(s)
9. SEC Filings or Consolidated GAAP Financial Statement
10. Debt-to-Equity Ratio Statement
11. Custody Agreements
12. Public Records Package
13. NAIC Biographical Affidavits
14. State-Specific Information

**Primary Application – Redomestications Only**

The requirements of this section are only for those insurers seeking to redomesticate from one state to another and are in addition to the requirements of Section I, Item #1 through Item #14 of the primary checklist. A redomestication is the process where any insurer organized under the laws of any state may become a domestic insurer that transfers its domicile to another state by merger or consolidation or any other lawful method.
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

The Applicant Company files the primary application with the insurer’s new state of domicile when used for a redomestication. In addition to the items included with the primary application, the redomestication application will include the following items:

15. Annual Statements with Attachments
16. Quarterly Financial Statements
17. Risk-Based Capital Report
18. Independent CPA Audit Report
19. Reports of Examination
20. Certificate of Compliance
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

**Uniform Certificate of Authority Application (UCAA)**
**Primary Application Review Checklist**
**(Regulator Use Only)**

1. **Company and Structure**
   a. Identify if the Applicant Company is a stock, mutual, etc.
      i. Identify the type of business the Applicant Company will be providing (life, property & casualty, title, etc.).
   b. Articles (for compliance and/or approval in accordance with state law).
      i. Committee Structure
      ii. Par Value
      iii. Capitalization
      iv. Audit Committee – Were independence requirements met?
   c. Bylaws (for compliance and/or approval in accordance with state law) (if applicable).
      i. Committee Structure.
      ii. Audit Committee – Were independence requirements met?
   d. Board of Directors and Designated Committees.
      i. Minimum/maximum number of directors.
      ii. Number of directors.
      iii. Residency requirements.
      iv. Independence requirements.

2. **Review Quality and Expertise, including Biographical Affidavits**
   a. Review the biographical affidavits for fitness and propriety (the biographical affidavit should be completed on the most current revision date of the form and no more than six months (6 months)).
   b. Review third party verifications and fingerprint (where required).
   c. Review Form A database for other transactions and outcomes.
   d. Review SAD database for regulatory actions against the officer or director.
   e. Review biographical sketches (Form B).
   f. Review the quality and expertise of the ultimate controlling person, officers and directors and actuary.
   g. Review appointment letters for appointed actuary and appointed CPA.
   h. Verify Licenses.
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

3. Holding Company (if applicable)

   a. Organizational Chart.
   b. Affiliated Organizations (affiliated agreements will be reviewed for licensing purposes, however, affiliated agreements are not being approved, a Form D filing is required for approval).
      i. Identify the type’s organizations (affiliated and unaffiliated).
      ii. List of services provided by affiliates.
      iii. Reimbursement terms fair & reasonable to the Applicant Company.
      iv. Financial condition.
   c. Review Holding Company Registration Statement (Form B), including amendments (if applicable); and Holding Company Filings.
   d. Review Ultimate Controlling Party (UCP) Financials - Verify if UCP is capable of providing support and experience level in operating the type of company proposed.
   e. Review Debt-to-Equity statement.
   f. Review lead state holding company system analysis and reports.
   g. Review Applicant Company contemplated and/or existing agreements with affiliates.
   h. Review and identify any concerns:
      i. five years of audited financial statements;
      ii. current financial statements (as of date within 90 days of filing); and
      iii. SEC reports, if applicable.
   i. Determine if financial projections are needed for the immediate parent or UCP. If obtained, are the financial projections for the Applicant Company and/or UCP consistent with business plan.

4. Business Plan and Operations

   a. Review the Applicant Company’s business plan.
   b. Review the Applicant Company’s business narrative including the types of products to be sold and how they will be distributed.
   c. Review Form 8 Questionnaire for the Applicant Company.
   d. Consider Officers/Directors compensation information as reported in annual statement.
   e. Identify if any Managing General Agents (MGA) and Third Party Administrator (TPA) will be used. If so, are they properly licensed or registered in the state?
   f. Determine if the Applicant Company will use any Professional Employer Organizations (PEO). If so, are they properly licensed or registered?
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

5. Reasonableness of Projections

a. Identify if the projections appear to be reasonable, in relation to the business plan as provided.
b. What assumptions did the Applicant Company use in their projections, include feasibility study of projections if available.
c. Review the financial statement and exhibits and consider reasonableness of projections provided.
d. Does the Applicant Company appear to be aggressive or realistic in their growth projections?
e. Determine if the GWP and NWP ratios are within industry standards.
f. Review the projected RBC. Is it within the norms and does it make sense based on projections.
g. Review the capitalization of the Applicant Company.
   i. Where is it coming from?
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

   ii. Will there be any Parental Guarantees, etc.?
   iii. Are there any short or long-term financing arrangements contemplated?
   iv. Consider quality of capitalization.
   h. Did the Applicant Company project any growth? If so:
      i. What will be the source and type (cash, surplus notes) of any such contributions?
      ii. Are there any capital contributions that are being contemplated?
   i. For HMO’s, determine the minimum capital, surplus and deposit requirements based on the Applicant Company’s projections.

6. Company Financials (if redomicating)

   b. Request and review a copy of the Applicant Company’s Insurer Profile Summary from the domestic state.
   c. Request and review a copy of the latest holding company system analysis from the lead state.
   d. Review the Applicant Company’s FAST and Financial Profile
   e. Review AM Best and other rating agency ratings.
   f. Identify if the company was redomicating, was the company formed by the Secretary of State or under the business laws or insurance laws of the state.
   g. Verify the date the last financial examination was completed and determine if it met all state requirements.

7. Other

   a. Determine if Network Adequacy requirements are met, if HMO.
   b. Determine if a pre-licensing examination needs to occur.
   c. Designation of Registered Agent.
   d. Review applications filed in other states in the prior 12 months.
   e. Review the terms of any agreements with a broker-dealer.
   f. Review the market share impact.
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

Expansion Application

The UCAA expansion application is for use by an insurer that wishes to expand into one or more states. An insurer may file expansion applications simultaneously in as many states as desired. The expansion application is an abbreviated version of the UCAA designed to allow solidly performing companies that are in good standing in all admitted states to gain admission into new states quickly and easily. It is the goal to complete the review of expansion applications within 60 calendar days of receipt. The 60-day review process includes two weeks to determine if the application is complete and acceptable. During the remaining 45–60 day time span, the application will receive a financial and operational review. Based on the circumstances of a particular application, it may be necessary for the reviewing state to request additional information.

The UCAA expansion application has the following items:

1. Expansion Application Form
2. Filing Fee
3. Minimum Capital and Surplus Requirements
4. Statutory Deposit Requirements
5. Name Approval
6. Plan of Operation
7. Holding Company Act Filings
8. Certificate of Compliance
9. Report of Examination
10. Statutory Memberships
11. Public Records Package
12. NAIC Biographical Affidavits
13. Consent to Service of Process
14. State-Specific Information
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

Corporate Amendments Application

An existing insurer uses the UCAA corporate amendments application for requesting amendments to its certificate of authority. The Applicant Company can use the corporate amendments application to file more than one change in the same submission. The Applicant Company should mark all changes it files on the application form and submit all items required for those changes. This UCAA corporate amendments application has the following items:

1. Application Form and Attachments
2. Filing Fee
3. Articles of Incorporation
4. Bylaws
5. Minimum Capital and Surplus Requirements
6. Statutory Deposit Requirements
7. Plan of Operation
8. Statutory Membership(s)
9. Certificate of Compliance
10. State-Specific Information
11. Deleting Lines of Business

There are slightly different filing requirements for corporate amendments applications involving name changes, redomestication of foreign insurers, change of city within the state of domicile, change of mailing address/contact information and mergers of two or more foreign insurers.

UCAA Forms

In order to facilitate the uniform submission of information pertinent to each of the items of the various applications, a variety of forms were promulgated by the ALERT Subgroup. There is a matrix of the forms and the items to which they apply on the UCAA website.
NAIC Company Licensing Best Practices Handbook
Appendix A – The Uniform Certificate of Authority Application (UCAA)

REVIEW OF THE UCAA

The “Best Practices: Application Review” chapter of the Best Practices Handbook describes the recommended best practices for the review of the items and forms associated with the various types of UCAA applications.

Review of UCAA State Charts

In order to maintain accurate and current state requirements, the UCAA state charts should be reviewed by the insurance department at least on an annual basis. In addition, whenever the state is aware of a change, notify the company licensing coordinator as soon as practicable. Each chart listed should be reviewed for:

- State requirements
- Statutory references
- Department website links
- Contact information, including email, telephone number and extension.

All updates should be sent to the company licensing coordinator listed on the NAIC website.
NAIC Company Licensing Best Practices Handbook
Appendix B – Use of Electronic Documents

Many of the documents filed in the UCAA process are currently housed in electronic format at the NAIC or lend themselves easily to electronic storage and viewing.

The items included in the public records package that are already stored in either data tables or PDF file format, or both, at the NAIC are:

- Annual Financial Statements (in data tables and PDF files) with Attachments, Including the Actuarial Opinion and Management’s Discussion and Analysis (in PDF file format)
- Quarterly Financial Statements (in data tables and PDF files)
- Risk-Based Capital Reports (in data tables and PDF files)
- CPA Audit Reports (in PDF files)
- Examination Reports (in PDF files and in I-SITE in the Financial Exam Electronic Tracking System on a voluntary basis)
- SEC Filings (can be found at www.sec.gov/edgar.shtml)

The following documents are not currently stored in an explicit location in an NAIC database, but should at least be stored and made available in electronic format:

- Form B Registration Statement
- Consolidated GAAP Financial Statements
- Articles of Incorporation
- Bylaws

A concerted effort should be made to reduce the amount of paperwork created and stored with respect to the review of UCAA applications.
NAIC Company Licensing Best Practices Handbook
Appendix C – Review of Electronic Application Coordination and Processing (REACAP)

Companies may file an NAIC Uniform Certificate of Authority Application (UCAA) under the REACAP program upon application to and acceptance by the National Treatment and Coordination (E) Working Group (Working Group). Applications that are accepted into the REACAP program will have the timing, technology and substantive processing monitored, issues encountered will be reported to the Working Group and the applicant will provide feedback to the Working Group about the process. UCAA electronic applications are encouraged, and acceptance into the REACAP program is an option, not a requirement, when submitting an electronic application.

To apply for REACAP, companies should send to the co-chairs of the Working Group and the NAIC coordinator (www.naic.org/industry_ucaa.htm) an explanatory letter setting forth the basis for their application that meets the criteria for acceptance into the REACAP program. Companies should be aware that other factors, such as regulatory workload, may impact acceptance into the REACAP program.

For an expansion application, the explanatory letter must include all of the following for consideration for acceptance into the REACAP program:

1. A commitment to file application electronically and to work with the Working Group.
2. A commitment letter (attached) from the domestic regulator indicating their willingness to work with the Working Group should the REACAP application be accepted.
3. Whether the application will serve a national or regional market need and quantification of that need.
4. The number and name of states to which the expansion application will be submitted.
5. A description of the current affiliations with insurers licensed in one or more states.
6. The basic financial condition of the applicant (e.g., capital, surplus, RBC) and the “as-of” date of the most recent financial exam.
7. Whether the company is a start-up company.
8. The nature and extent of any parental guarantees.
9. Experience of the management team with the lines of business being applied for.
10. A brief description of all regulatory compliance enforcement actions by state for the past five years.
NAIC Company Licensing Best Practices Handbook
Appendix C – Review of Electronic Application Coordination and Processing (REACAP)

For a corporate amendment application, the explanatory letter must include all of the following for consideration for acceptance into the REACAP program:

1. A commitment to file application electronically and to work with the Working Group.
2. A commitment letter (attached) from the domestic regulator indicating their willingness to work with the Working Group should the REACAP application be accepted.
3. The number and name of states to which the corporate amendment application will be submitted.
4. If adding line(s) of business or merger:
   a. Whether the application will serve a national or regional market need and quantification of that need.
   b. A description of the current affiliations with insurers licensed in one or more states.
   c. The basic financial condition of the applicant (e.g., capital, surplus, RBC) and the “as-of” date of the most recent financial exam.
   d. Experience of the management team with the lines of business being applied for.
   e. Indicate if the transaction is date-specific.
5. If a name change, merger, redomestication, etc.:
   a. Indicate national or regional impact, including marketing and quantification of that impact.
   b. Provide a description of the affiliations with already licensed insurers involved in the transaction.
   c. Indicate if the transaction is date-specific.
6. Provide a brief description of all regulatory compliance enforcement actions by state for the past five years.

REACAP Expedited Review Guidelines

Some companies may request expedited review of a REACAP application. If so, the Applicant Company will need to clearly state, in writing, that request and the basis for it. The National Treatment and Coordination (E) Working Group will consider the request for expedited review with the request for acceptance into the REACAP program, including substantiation of market need, urgent circumstances, as well as the regulators’ other workload. Requests for expedited treatment may result in a REACAP request being denied. Further, applicants should be aware that state regulators cannot be compelled by the Working Group to complete an expedited review.
NAIC Company Licensing Best Practices Handbook
Appendix D – Form A Review Best Practices

Every Form A review should be tailored to the risks associated with the proposed acquisition, including the target company, acquiring entity, and the complexity of the transaction. The following best practices are presented as a guide for regulatory review and analysis of Form A acquisitions, recognizing that this list may not be comprehensive and not all items will apply to every acquisition. This list is intended to be a regulatory tool. The NAIC Form A database should be updated as applicable throughout the Form A review process.

1. Initial Review
   a) Determine if the filing is complete, note the missing items and promptly send a deficiency letter to the Applicant
   b) Identify attorneys, party contacts, and the other insurance regulator reviewing the Form A, including the lead regulator.
   c) The lead regulator should obtain key contact information from each state reviewing the Form A and consider organizing a regulator to regulator call to discuss concerns with the filing
   d) Assign appropriate analyst, legal and other professional staff to conduct regulatory review
   e) Carefully consider whether regulatory review can be completed by Applicant’s target close date, including any interim deadlines and obtain deemer extension or waiver if appropriate, and
   f) Schedule and notice hearing/consolidated hearing, if applicable, within statutory timeframes

2. Background, Identity and Risk Profile of Acquiring Persons
   a) Identify and review all relevant parties to the proposed acquisition
   b) Assess the feasibility of the acquiring persons holding company structure including location and control (direct/indirect) of the target company post acquisition
   c) Review the lead state’s assessment of the acquiring persons most recent ORSA Summary Report and Form F ERM, if applicable, to better understand the related risks
   d) Determine Ultimate Controlling Person and/or Parent (UCP), cross check with source of funds and consider debt funding sources
   e) Review NAIC and other external sources to gain a better understanding of the acquiring persons, its affiliates, and the UCP.
   f) Carefully scrutinize and understand complex organization and ownership structures
   g) Review Audited Financial Statements (or CPA reviewed financial statements for individuals) of the acquiring persons, its holding company, and the UCP, 10K and 10Qs, and other current financial information for enterprise condition, potential debt service by the UCP and its ability to service such debt. Understand the level of reliance on cash flow/dividends from the target company to service debt and other obligations of the holding company and UCP.
   h) Based upon nature of acquiring party, review detailed audited financial statement of all individuals who are source of funds.
NAIC Company Licensing Best Practices Handbook
Appendix D – Form A Review Best Practices

a. If not available, consider acceptability of unaudited financial statements, compiled personal financial or net worth statements and/or tax returns.
   i) Consider suitability of UCP through background review and regulatory review of the prospective new owners, using UCAA biographical affidavits and third-party background reviews by NAIC listed independent third-party reviewing companies or fingerprinting criminal checks if applicable, and
   j) Consider acceptability of SEC disclosures by board members of publicly traded UCPs in suitability review.

3. Communication and Record Maintenance
   a) Communicate response to any confidentiality requests in writing as soon as possible
   b) Create a contact list of relevant persons and representatives
   c) Separate confidential and public documents, information, and communications and maintain as appropriate
   d) Contact and collaborate with other reviewing regulators involved in the review process, as appropriate, including the lead state regulator regarding ORSA and ERM reviews
   e) As applicable, contact other regulators of noninsurance entities of the acquiring party or target
   f) Respond as appropriate to questions from third parties and interested regulators
   g) Keep the acquiring party representatives informed as to status of review
   h) Receive and consider any information provided by external sources, including possible financial or other incentives or motivation of those commenting on a particular transaction
   i) Summarize review, findings, conclusions and action taken on Form A review in final action document, including stipulations, and conditions subsequent, and
   j) File and maintain documents under state procedures.

4. Transaction Review
   a) Determine how acquisition will be achieved by carefully reviewing transactional documents, e.g. merger, stock purchase, stock exchange
   b) Consider disposition of all classes of target shares, including addressment of any beneficial owners
   c) Ascertain propriety of disposition of minority interests and concerns, if applicable
   d) Consider any affiliate or employee benefit as appropriate
   e) Determine how any ancillary regulatory reviews or other interim procedural steps will be completed, including Form E-Pre-Acquisition Notification Form, for other licensed states
   f) Obtain copies of shareholder communications or sole shareholder consent
   g) Consider obtaining copies of fairness and other contractually required opinions if available
   h) Review relevant portions of board resolutions, power points and related board minutes pertinent to the Form A transaction, use care to keep documents confidential, and
   i) Determine whether additional professional transaction review is warranted.
5. **Purchase Consideration**
   a) Determine fairness (equivalency) of total amount to be paid to total value to be received, including derivation of price and value of target under standard valuation methodologies or to book value
   b) Consider quality of consideration, giving careful scrutiny to payments other than cash or cash equivalents which are disfavored particularly when any funds are being transferred to the target.
   c) Consider fairness opinions and actuarial appraisals, if provided
   d) Consider source, type and valuation basis of funds to be used for consideration
      i. If funds are from a regulated entity, confirm the existence and valuation of such assets with that entity’s regulator
   e) If applicable, consider implications of any debt financing including
      i. The mechanics of any debt financing to be used to fund the transaction, whether funds are being borrowed in the ordinary course of business or on terms that are less favorable than generally commercial loans.
      ii. The percentage of debt versus non-debt funds to be used
      iii. The source of funds or stream of income to be used by parent for repayment and the ability of the acquiring party to repay the debt from sources other than the target
      iv. Identity of the creditor(s) and creditors’ financial condition.
      v. How will debt be secured; consider prohibiting securing of debt on shares of target or target’s assets if not already prohibited by state statute,
      vi. Compare time period of loan commitment with parent’s income stream over the same time period, including the ability of the acquiring party to repay the debt from sources other than the target until loan is repaid/retired, and
      vii. Consider the long term impact of parent’s debt service on operations of the target company and group.
      viii. Follow-up on Parent’s financial commitment to underlying insurer.

6. **Target License Qualification /Insurer Operations**
   a) Determine whether target insurer meets license qualifications upon change of control
   b) Consider operational changes post-acquisition, including business plans and projections
   c) Review required statutory deposits and authorized lines of business
   d) Consider changes to target management and key employees
   e) Consider suitability of changes to target management and key employees through background review and regulatory review of new owners, using UCAA biographical affidavits and third-party background reviews or fingerprinting criminal checks, if applicable
   f) Consider plans for technological interfacing with new affiliates and any potential adverse impact on operations including claims
NAIC Company Licensing Best Practices Handbook
Appendix D – Form A Review Best Practices

  g) Consider suitability of any new affiliated and non-affiliated material agreements, including managing general agents, third party administrators, any professional organizations and reinsurance arrangements

  h) Review any ERM analysis of the transaction performed by the acquiring entity, including impacts on risk assessment, risk appetite and tolerances, and prospective solvency (capital and liquidity)

  i) Require Form D filings for any affiliated material transactions, post-acquisition; consider including language in the approval order

  j) Determine target’s estimated financial condition and stability, post-acquisition, and

  k) Consider with disfavor any plans to liquidate the target or sell its assets, consolidate or merge, that may be unfair, unreasonable, or hazardous to policyholders

  l) Consider impact of U.S. insurer merging into an international insurer and/or alerting the legal entity structure and regulatory oversight performed by domestic state(s).

7. Market Impact
   a) Consider anticompetitive impact of acquisition on lines or products, including whether transaction will create a monopoly or lessen competition in insurance in the state; Disapprove transaction if completion will create a monopoly

   b) Consider Form E information and market concentration for combined lines and other appropriate information to assess market impact if warranted by nature of transaction, including coordination with other states where the target is admitted, and

   c) Consider imposing tailored conditions subsequent or undertakings as necessary to address competitive market concerns

8. Post-Approval Considerations, if applicable
   a) Receive notification of changes to effective closing date

   b) Confirm compliance with conditions precedent

   c) Receive waivers for market conduct or financial examination, and

   d) Receive notification if transaction does not close and consider withdrawal of approval.

9. Post-Acquisition Considerations
   a) Receive confirmation of the transaction following the closing, per your state’s statutory requirement timeframe

   b) Request written details of the final purchase price after all adjustments are complete on the transaction

   c) Request confirmation of any capital contribution contemplated in the transaction.

   d) Request the names and titles of those individuals whom will be responsible for the filing of the amended Insurance Holding Company System Annual Registration Statement

   e) Request an amended Insurance Holding Company System Registration statement per your state’s statutory timeframe within each applicable state’s statutory required timeframe after the close of the proposed transaction.

   f) Consider requesting for a period of two years, commencing six months from closing, a semiannual report under oath of its business operations in your state, including but not
limited to, integration process; any changes to the business of the Domestic Insurers; changes to employment levels; changes in offices of the Domestic Insurers; any changes in location of its operations in your state; and notice of any statutory compliance or regulatory actions taken by other state regulatory authorities against the acquiring parties or the Domestic Insurers

g) Consider prior approval of all dividends for a two-year period from the close date
h) Consider undergoing a target financial and/or market conduct examination following the closing or
i) In lieu of an examination a meeting, conference call or receipt of certain information can be requested
j) Confirm compliance or satisfaction with any other conditions subsequent or undertakings, and
k) Monitor target’s market performance to projections two years after transaction close date
l) Consider proactive communication with state(s) where the insurer conducts business if changes to the insurer’s corporate structure occurs post-acquisition.
NAIC Company Licensing Best Practices Handbook

Appendix E – Speed to Market

**Speed to Market** – Insurance company working in conjunction with state of domicile (lead state), where seeking expansion (target) states and facilitated by the National Treatment and Coordination (E) Working Group (NTCWG) to expand operations into multiple States.

1. **Applicant Company** must work in concert with lead state to ensure baseline compliance:
   - Applicant Company is in good standing with its lead State. It is not presently under or pending any regulatory actions, unless regulators have agreed upon a strategic plan to address such regulatory actions and a speed to market approach is needed.
   - Applicant company meets the minimum cap, surplus or net worth requirements of the target States.
   - Applicant Company meets or has approval to waive seasoning requirements of the target States.
   - Applicant Company has the appropriate or like kind licensing authority in its state of domicile as to what it is seeking in the target States.
   - Applicant Company has identified all state specific issues related to the target states and is willing to meet them.

2. **Applicant Company and Lead State** will request from NTCWG the speed to market process:
   - Applicant Company must have ownership commitment, managerial competence and financial wherewithal to ensure it can successfully operate in all target states.
   - Applicant Company will ensure compliance and management commitment to the UCAA electronic expansion application process.
   - Lead State will assist target states by sharing of information (IPS, etc.) and regulatory thought processes (addressing any RBC, funding, reinsurance issues and how the Applicant company addressed the issues raised by lead state)
   - Outline timelines and expectations.
   - Establish both universal points of contact for the Applicant Company, lead state, and target states.
   - Note any regulatory issues that might arise.

If NTCWG approves and 2 weeks after the Applicant Company has filed an expansion application:

- NTCWG will initiate a “kick off meeting” with Applicant Company, lead state, target states, NTCWG co-chairs and NAIC staff noting the following:
  - General background of the Applicant Company.
  - Address timelines/expectations.
  - Note any potential regulatory concerns.

**Lead State** will work in concert with NTCWG (via staff support) to set up Regulator to Regulator only call (Lead State, target States, NTCWG co-chairs):

- Discuss lead state IPS.
- Get initial consideration as to status of application and proposed timeline for licensing:
  - target states still have deficiencies and concerns.
  - What target states are ready to recommend approval.
  - If needed, schedule call to include Applicant Company.
NAIC Company Licensing Best Practices Handbook
Appendix E – Speed to Market

• Schedule date and time for next conference call to continue discussion.

As needed, all stakeholders follow up calls to address deficiencies and status of application.
National Treatment and Coordination (E) Working Group

[ ] Form 8C - Corporate Amendment Questionnaire  [ x ] Form 11-Biographical Affidavit  [ ] Form 12-Uniform
Consent to Service of Process  [ ] Form 13- ProForma  [ ] Form 14- Change of Address/Contact Notification
[ ] Form 15 – Affidavit of Lost C of A  [ ] Form 16 – Voluntary Dissolution  [ ] Form 17 – Statement of Withdrawal

DESCRIPTION OF CHANGE(S)
Add a Purpose for Completion Section and added new lines for company name, address and phone number as well as a table for govt. id numbers.

REASON OR JUSTIFICATION FOR CHANGE **
The purpose of completion section will allow users to clearly define the purpose of why the biographical affidavit is being completed.

The company name, address and phone number were required previously, but by clearly defining them it will allow for greater ease of complete and clarity that each bio should be completed for only the Applicant Company.

The table for government id’s was added because some countries have more than one government id or the affiant may have more than one government id. The table allows for the affiant to list multiple id’s and to identify the country in which that id is associated.

Additional Staff Comments:
9-12-19 cgb – exposed proposal for 30-day comment period
11-6-19 cgb – no comments received and the Working Group adopted with an effective date of 1/1/20 with a friendly amendment to include the addendum pages, modify the “Purpose for Completion” reference from “Annual Update” to “Other,” and draft an FAQ for when the “Other” option should be selected.
11-19-19 jdb – email sent to regulators regarding the following clarifications: add “Specify” and move “Specify Purpose for Completion” as the heading above and centered over the following:
Form A: ____________  UCAA Type: ____________  Other: ____________
And include in the FAQs that the three options include one or more of the options listed and not a check mark.

Form A: Acquisition, Change of Control, Merger

UCAA: Primary, Expansion or Corporate Amendment

Other: New or Change Officer, Director, Annual Update, etc.

The Working Group Members agreed that this should be an editorial change to the original adoption.

** This section must be completed on all forms.

**IDENTIFICATION OF SOURCE AND FORM(S)/INSTRUCTIONS TO BE CHANGED**

[ ] UCAA Forms  [X] UCAA Instructions  [ ] Enhancement to the Electronic Application Process

[ ] Company Licensing Best Practices HB

**DESCRIPTION OF CHANGE(S)**

To clarify that all lines of business the Applicant Company is currently transacting must be included on Form 3, and for the lines requested the Applicant Company must currently be authorized in their domiciliary state.

**REASON OR JUSTIFICATION FOR CHANGE **

The current wording was confusing, whereas the Applicant Company thought they only need to provide the authorized lines for their domiciliary state.

**Additional Staff Comments:**

9-12-19 cgb – The Working Group exposed the proposal for a 30-day comment period.
10-11-19 cgb – One comment received.
11-6-19 cgb – The Working Group adopted the proposal with the amendment to include the reference “to transact” in the corporate amendment instructions.

**This section must be completed on all forms.** Revised 01-2019
Corporate Amendments Application Section I

Filing Requirements (Adding and/or Deleting Lines of Business)

This section provides a guide to understanding the focus of each document of the Corporate Amendment Application. However, there typically are multiple purposes for documents. Therefore, it is important that applications be complete.

All documents submitted in support of the application must be current. However, in certain instances, some states have limited latitude to accept older documents. Please review the state specific requirements in the state charts and state-specific requirements prior to contacting the states individually if there are questions about a specific document.

All forms required for the Corporate Amendment Application are located under the Corporate Amendment Application tab in the UCAA Forms Section. For electronic application submissions, required forms are provided for the application change type selected, therefore it is important to read the instructions prior to starting an electronic filing to ensure the necessary corporate amendment change type is selected and the appropriate forms are provided.

Table of Contents/ Application Requirements

1. Application Form and Attachments
2. Filing Fee
3. Articles of Incorporation
4. Bylaws
5. Minimum Capital and Surplus Requirements
6. Statutory Deposit Requirements
7. Plan of Operation
8. Statutory Membership(s)
9. Certificate of Compliance
10. State-Specific Information
11. Deleting Lines of Business

1. Application Form and Attachments - Item 1 of the application

The application must identify all lines of insurance that the Applicant Company is currently authorized to transact and specify the requesting lines of authority to add or delete from an existing Certificate of Authority, as identified by the Applicant Company’s in the plan of operation. The Applicant Company must be authorized in their domiciliary state for the lines of business requested to add in the application. The Applicant Company should review the Seasoning Requirements chart for each submission state. For hard-copy filings submit a completed Checklist (Form 1C), and an original executed Application Form (Form 2C), completed Lines of Business (Form 3) and a copy of the Applicant Company’s original Certificate of Authority or an affidavit of lost Certificate of Authority (Form 15) as Item 1 of the application. A cover letter may be included. The Checklist is automatically created in the electronic application and cannot be edited.
Expansion Application Section II
Filing Requirements

This section provides a guide to understanding the focus of each document of the Expansion Application. However, there typically are multiple purposes for the documents. Therefore, it is important that applications be complete.

All documents submitted in support of the application must be current. However, in certain instances, some states have limited latitude to accept older documents, although generally no more than five (5) years old. Please contact the states individually if there are questions about a specific document.

All forms required for the Expansion Application are located under the Expansion Application tab in the UCAA Forms Section.

Table of Contents

1. Expansion Application Form
2. Filing Fee
3. Minimum Capital and Surplus Requirements
4. Statutory Deposit Requirements
5. Name Approval
6. Plan of Operation
7. Holding Company Act Filings
8. Certificate of Compliance
9. Reports of Examination
10. Statutory Memberships
11. Public Records Package
12. NAIC Biographical Affidavits
13. Uniform Consent to Service of Process
14. State-Specific Information

1. Application Form and Attachments

The application must identify all lines of insurance (Form 3) the Applicant Company is currently licensed to transact in its state of domicile and all lines of insurance the Applicant Company is requesting authority to transact, as identified by the Applicant Company’s plan of operation. The Applicant Company must be authorized in their domiciliary state for the lines of business requested in the application. Submit a completed checklist (Form 1E) and original executed application form (Form 2E) as Item 1 of the application. A cover letter may be included as a component of Item 1 of the application. The Applicant Company should review the Seasoning Requirements chart for each state where the company plans to expand.
Restructuring Mechanisms (E) Working Group  
Austin, Texas  
December 8, 2019

The Restructuring Mechanisms (E) Working Group of the Financial Condition (E) Committee met in Austin, TX, Dec. 8, 2019. The following Working Group members participated: Elizabeth Kelleher Dwyer, Co-Chair, Matt Gendron and Jack Broccoli (RI); Buddy Combs, Co-Chair (OK); Mel Anderson (AR); Rolf Kaumann (CO); Kathy Belfi and Jared Kosky (CT); Kevin Fry (IL); Judy Weaver (MI); Fred Andersen (MN); John Rehagen (MO); Matt Holman (NE); John Sirovetz (NJ); Marshal Bozzo (NY); Joe DiMemmo (PA); Joe Cregan (SC); Jamie Walker and Amy Garcia (TX); Doug Stolte and David Smith (VA); David Provost (VT); Melanie Anderson (WA); and Amy Malm (WI). Also participating was: Bob Wake (ME).

1. **Adopted its Oct. 1 and Summer National Meeting Minutes**

The Working Group met Oct. 1 and Aug. 4. During its Oct. 1 meeting, the Working Group asked follow-up questions and heard answers from Enstar Group and Aon Service Corporation on their respective views on different restructuring mechanisms.

Ms. Malm made a motion, seconded by Mr. Kaumann, to adopt the Working Group’s Oct. 1 (Attachment Six-A) and Aug. 4 (see NAIC Proceedings – Summer 2019, Financial Condition (E) Committee, Attachment Five) minutes. The motion passed unanimously.

2. **Discussed Plans for Drafting a White Paper**

Superintendent Dwyer reminded the Working Group that its key charge is drafting a white paper that will consist largely of the information gathered to date by the Working Group. She stated that most of the information-gathering process should now be completed, but as the Working Group starts drafting the white paper, the co-chairs would like to hear views from Working Group members on the general organization for such a white paper. She stated that the 1997 *Liability-Based Restructuring White Paper* seems to provide an excellent jumping off point.

Mr. Rehagen asked if the Working Group could get a copy of all the issues that have been presented and discussed, emphasizing that Missouri is concerned about any conflict with its assumption reinsurance law, for which the transactions requires certain approvals. He stated another example is the guaranty fund issue.

Superintendent Dwyer discussed how the minutes would reflect discussions on each of these items, and suggested the Working Group could ask NAIC staff to review prior minutes, including discussion of the United Kingdom’s Part VII Control of Business (UK Part VII) requirements, and pull together a list of the issues discussed and circulate something to the Working Group.

Mr. Kaumann agreed, noting that that list, in combination with a copy of the 1997 *Liability-Based Restructuring White Paper*, might be a good start.

Mr. Gendron suggested more specifically that the table of contents from that 1997 *Liability-Based Restructuring White Paper* be used as a starting point for such a list, then with additions into that document where the minutes reflect other specific areas of discussion.

Superintendent Dwyer agreed, and suggested that listing also consider the table of contents from the 2009 *Alternative Mechanisms for Troubled Insurance Companies*. It was further recommended that the white paper focus on non-troubled companies, or at least note that at the outset of the paper; however, that was rejected on the basis that ignoring such seemed to be problematic. Therefore, it was agreed that some initial scoping in the paper should discuss both, but have an emphasis on the non-troubled company situations.
3. **Heard an Update from the ACLI on its Restructuring Transaction Principles**

Wayne Mehlman (American Council of Life Insurers—ACLI) and Rich Bowman (New York Life) discussed the finalized principles developed by the ACLI on restructuring techniques. Mr. Mehlman noted that, as presented to the Working Group during its July 8 conference call, the ACLI’s board of directors approved insurance business transfer (IBT) and corporate division principles and guidelines in June after many months of member deliberation.

Mr. Mehlman stated that the five main principles addressed are the following: 1) policyholders and other impacted stakeholders must have access to the process; 2) the regulatory review process must be robust; 3) independent experts must be utilized as part of the process; 4) court approval is required for IBT transactions but not necessarily for corporate division transactions; and 5) policyholders and state-based guaranty associations should be protected. He stated that the ACLI will not oppose legislation that substantially contains those principles; however, the ACLI will oppose legislation that does not substantially contain those principles. He stated that the ACLI will support corrective legislation that makes existing state legislation substantially adhere toward the ACLI principles, so long as the ACLI steering committee concurs.

Mr. Mehlman stated that the National Council of Insurance Legislators (NCOIL) is currently drafting a model act on this issue, noting that the ACLI is working with state legislators to incorporate the ACLI principles into that model. He stated that the ACLI will be glad to continue aiding this Working Group as it addresses its charges, including involvement in the white paper and related discussions, as well as those related to guaranty fund protection and protected cell companies and potential changes to NAIC models.

Mr. Bowman discussed the ACLI’s views on the National Conference of Insurance Guaranty Funds (NCIGF) position paper. He noted that the NCIGF will be discussing its views on restructuring and stated that while the ACLI appreciate the work the NCIGF is completing, the ACLI will talk about the significant differences in property/casualty (P/C) products and life insurance, annuity, disability and long-term care (LTC) products, which make it imperative that ACLI’s broader principles and guidelines also be considered.

Mr. Bowman discussed that IBT and corporate division transactions involving life, annuity, LTC or disability policies typically represent long-term obligations and a longer commitment by an insurer to its policyholders. In other words, consumers who buy life insurance and annuity contracts are relying on the insurer that they chose to be there for them for decades—in many cases, for the balance of their lives. Additionally, P/C insurance is generally yearly renewable and does not rely on an individual’s physical health for underwriting purposes. He stated that with the passage of time, it becomes increasingly difficult for a life, annuity, LTC or disability policyholder to obtain replacement coverage on comparable terms to be provided by insurance company. As such, it is difficult to have the flexibility to replace coverage. Given these considerations, is important from a consumer standpoint that, for IBT and corporate division transactions involving life annuity business, the successor company be licensed and regulated in a similar fashion to that of the original insurer.

Mr. Bowman said the *Life and Health Insurance Guaranty Association Model Act (#520)* requires an insurer to be licensed or formerly licensed in a state and be considered a member of that state’s guaranty fund association. He stated that the ACLI understands that the *Property and Casualty Insurance Guaranty Association Act (#540)* may not have the same strict licensing and requirements for companies to have eligible coverage, unlike the life industry. This difference in approach might be attributed to the fact that P/C funds have different coverage obligations than life and health guaranty associations. For example, P/C guaranty funds are obligated to retrospectively cover outstanding claims that were in existence at the time of liquidation. On the other hand, life and health guaranty associations are typically principally responsible for prospectively continuing coverage from long-term obligations under life and annuity LTC disability contracts. So, in order to mitigate the financial risk, the life and health guaranty association must cover those long-term obligations, and it is critical that insurers be subject to the relevant state licensing regulatory requirements to be eligible for guaranty association coverage. Mr. Bowman stated that the ACLI believes the ACLI principles and guidelines will help ensure the liability of those long-term obligations in the context of IBT or corporate division transactions.

Ms. Belfi asked Mr. Mehlman to clarify the ACLI’s position on independent experts, which, as he stated, the ACLI would oppose any legislation without this provision. Mr. Mehlman responded the ACLI would oppose legislation that does not substantially include the ACLI principles and guidelines.
Ms. Belfi asked if there had been any discussion about putting those principles somewhere else, such as in the Financial Analysis Handbook or Financial Condition Examiners Handbook, or something to that nature. Mr. Mehlman responded that the ACLI members prefer that the principles and guidelines be included in legislation to the extent possible.

Ms. Belfi stated that while she appreciates the need to utilize an independent expert in some cases, she could think of several examples where the regulator would want to utilize in-house personnel. She stated specifically that when a state has a potential transaction where a state insurance regulator is familiar with both companies, using in-house actuaries that understand the companies and the plans, there is no need for an independent expert to perform additional analysis. Ms. Belfi stated that for that reason, Connecticut’s corporate division bill uses the word “may.” She noted that she believes it is appropriate that there be regulator discretion when analyzing these transactions.

Mr. Mehlman thanked Ms. Belfi for her question and clarified the ACLI’s position, noting that the Connecticut position is certainly understandable. He stated that the ACLI members discussed this thoroughly for many months and noted that they were able to reach consensus on almost all of the elements that are imbedded in the principles and guidelines, and one of those relates to having not just an expert but an independent expert that is outside of the department. He noted that no one is an expert at everything, so it is the idea that if there should be an external party that is objective to look at these types of transactions. He stated it provides two things: 1) coverage protection for policyholders that an objective outside party has looked at this; and 2) protection for regulators from lawsuits.

Ms. Belfi stated that she respectfully disagrees. She said Connecticut believes it should be the regulator’s discretion as to whether it is appropriate to hire an outside expert. She noted that the applicant will be paying for the transaction and it is costly to hire outside experts. If it is a case where the department has actuaries who fully understand the transaction, then the department should be given discretion over whether to hire an outside expert.

Mr. Mehlman responded that he completely understands Ms. Belfi’s position, but said the ACLI members, after a long iteration, concluded that an expert outside the department—no matter how qualified experts may be within the department—should be required, not optional.

Mr. Bowman responded to a question dealing with whether existing state laws conform to the ACLI principles by stating the ACLI has not reviewed each one of those laws and performed that type of analysis. He stated that the ACLI has looked at Oklahoma’s statute and a proposed NCOIL model law that was drafted based on Oklahoma’s law. He stated that those laws lack many of the ACLI principles and guidelines, noting that the ACLI is currently trying to get changes incorporated into the NCOIL model.

Mr. Bowman stated that the ACLI prepared its principles by looking at all the state laws that are on the books, noting particular concern with corporate division laws that seem to have low regulation or little guidelines on how the process should occur. He stated that the IBT laws of many of the states try to cover at least some of the requirements included in the UK Part VII requirements, but not all the protections. He stated that the concern of the ACLI is that if there is an insurance company failure, the member companies end up paying for that failure.

Superintendent Dwyer asked if the ACLI principles could be included in regulation, because those have the same enforcement as law in most states. Mr. Mehlman responded that the ACLI certainly prefers the principles to be included in legislation and, to the extent they are not, the ACLI would be willing to have them included in regulation. The only problem is there is no guarantee that a particular state is going to follow up with regulations. He noted that the ACLI has heard presentations already through this Working Group where the states have indicated that they plan to proceed without any regulation, and the ACLI has concerns that if the principles are not embedded in statute, the ACLI will lose the opportunity for change upfront.

Superintendent Dwyer agreed with Ms. Belfi, noting that the Rhode Island statute provides an independent expert that reports to the department. She stated that she finds it troubling to completely skip the opinion of state, as a third-party does not have any requirements of a government official to look out for the consumer interest, and it is assumed this person has the consumer interest at heart because he or she has not worked for an insurance company in a couple of years. She stated that it makes no sense, as the department has a requirement to do an analysis for the consumer’s best interest and the state can use a disinterested consultant, but she does not believe that the requirement to use a disinterested consultant is getting any better results; it depends on the case.
Mr. Fry stated that Illinois has a division law, but it has not yet developed a regulation yet. He said the department is interested in developing a regulation someday, but he would like the flexibility to look at some of these deals before developing any kind of regulation. He echoed the comments from Ms. Belfi, noting that Illinois has been looking at these deals and they already consider similar issues in proposed Form As. He stated that while the bias of Illinois is going to be using outside experts, the reality is if you have seen one division transaction, then you have seen one division transaction. So, in talking about division transactions, he questioned whether an expert would be needed. Mr. Fry noted that Illinois has the same views as most of what has already been mentioned, and noted specifically that Illinois does know their companies better than anyone.

Mr. Bowman noted that some of the ACLI’s positions are because ACLI members have transactions that affect policyholders across the country, not just in the state where the transaction is occurring.

Ms. Weaver stated that she would agree with the ACLI principle from the standpoint that while she may have expertise in-house, she may choose to use an outside expert when dealing with states that do not always exercise the discretion other regulators would like. She stated that a state might think it has expertise or it might get political pressure to do something, and noted that having an outside expert opinion could add some value to the process. She stated that where she thinks a regulator needs to have discretion is once the regulator has the outside expert opinion. At that point, the commissioner or superintendent needs discretion on whether they agree with that opinion or whether they want to factor in other consumer concerns that need to be considered.

Mr. Combs said he completely agrees, noting that the way the Oklahoma process works is the independent expert works for the commissioner. He stated that he likes that idea, at least in terms for an IBT but not so much for a division, which is a different type of transaction. Mr. Combs stated that for an IBT, there needs to be a requirement for an independent expert who answers to the commissioner. He stated Oklahoma really sees it as a three-part transaction: 1) independent expert; 2) commissioner; and 3) the court. He discussed, however, that the way Oklahoma’s first transaction worked, department staff would have regular conference calls with the independent expert and then they would provide the department with information, which in turn would lead to back-and-forth on requests for deeper work in particular areas. At the completion of the work, the department was provided with a report and then the department did its own analysis of the transaction and a review of the report before moving to the next stage. Mr. Combs said Oklahoma sees it as a highly cooperative process.

Mr. Wake stated that he believes leaving corporate divisions out of the need for court approval and treating that as somehow fundamentally different is probably one of those points that was debated and stated that he is skeptical that divisions really deserve any less thorough or independent process. He stated there are many situations where specialized expertise is needed, noting that the department is going to try to find the best outside expert they can to at least assist the in-house staff. He stated he accepts the point that some departments will handle in-house review better than others, but said the departments that do a less than perfect job with deciding when they can do it themselves are also the ones that are going to do a less than perfect job in hiring an outside expert. He stated he does not think the fact that outside experts are in business for themselves makes them a better decision-maker or a more reliable decision-maker than a public servant.

4. Heard from the NCIGF Regarding its Adopted Position on Restructuring.

Barbara Cox (Barbara F. Cox LLC), representing the National Conference of Insurance Guaranty Funds (NCIGF), provided a summary of the NCIGF’s adopted position on restructuring (Attachment Six-B).

Ms. Cox described that the NCIGF recently adopted the statement and noted that essentially what it requires is guaranty fund coverage before the transaction. Conversely, if there was no guaranty fund coverage before the transaction, there should not be coverage after the transaction. She stated that the NCIGF is working on template language, but it likely will not be completed for about 30 days. She stated that because most of the states’ P/C guaranty fund laws would not provide for that result, it will take nationwide amendments.

Ms. Cox noted how the ACLI spoke about the licensing issue and said the NCIGF grappled with that issue for a long time in its Legal Committee and its Public Policy Committee. She stated that ultimately what NCIGF developed was just the broad carve-out in the guaranty fund that—notwithstanding the plain definition of “insolvent insurer” which does have licensing requirements—these transactions would be covered. She stated that not all NCIGF members will agree, but she believes most will. She stated that it has been vetted with the industry members and the guaranty fund members on the NCIGF’s Public Policy Committee and its board of directors, so it is widely supported.
Ms. Cox noted that on the topic of protected cells, some of the top guaranty fund lawyers in the country could not wrap their heads around protected cells and the impact the guaranty funds covered line of business placed into one of those cells by virtue of a transaction. She stated they had not yet solved that problem, noting that she is eager to hear from NAIC staff on that issue. She reiterated her request for support from the state insurance commissioners.

Mr. Wake noted that language in Model #540 might be helpful on this topic. Ms. Cox noted there is assumed business language in that model, but only eight or nine states have enacted that language. She noted, therefore, a wide solution is necessary because there are variances among the states.

Mr. Combs agreed with the point by Ms. Cox regarding policyholders retaining guaranty fund protection, noting that Oklahoma fully agrees with this position. He noted, however, Oklahoma had not spent much time considering a policyholder gaining guaranty fund protection and asked Ms. Cox how the mechanics could be completed on that. She noted that things such as surplus lines are clearly excluded, and discussed how the history of why coverages exist or do not exist should be retained.

5. Discussed Segregated Accounts, Protected Cells and Guaranty Fund Protection

Dan Schelp (NAIC) stated that his remarks would focus on the use of segregated accounts and protected cells, noting that it is from the perspective of the Financial Regulation Standards and Accreditation (F) Committee, for which he provides staff support related to the Part A standards. He stated that while he has not followed the Working Group closely, the use of segregated accounts and protected cells is being used in a different way from that which is contemplated in the Part A standards. Specifically, what is generally considered in NAIC standards is the use for securitizations. He stated he was not going to address specific state laws or specific situations, and that with respect to Part A standards, they do not directly address the use of segregated asset plans because they do not specifically protect or prohibit the use of these.

Mr. Schelp stated that, in the context of guaranty funds, there is some concern that if the segregated asset plan was to become insolvent, guaranty fund coverage may not be triggered unless the parent insurer was itself insolvent. He noted that he had several conversations with members of National Organization of Life and Health Insurance Guaranty Associations (NOLHGA), who have expressed concerns this might be the case. He stated this was not just a Part A Accreditation issue, but rather a concern of all states impacted.

Mr. Schelp stated that he does not have a legal opinion on this issue but did want to report on this concern. He stated that without a change to Model #520, we may not know the answer to this question, and even then, it is possible some of the guaranty funds would take one view while other guaranty funds may take the opposite view. He stated that several questions arise, including how the assets are considered, either with the general account and segregated assets together or separate, and whether each is required to meet risk-based capital (RBC) requirements or both combined. He stated similar questions exist with respect to annual financial statement reporting or use of the Accounting Practices and Procedures Manual. He stated there are potentially several other issues but that this identifies some of them.

Mr. Wake discussed the use of separate account for variable annuities and how that issue was easier because in that case the amount retained in the separate account provides that the policyholder is at risk. He noted that the Protected Cell Company Model Act (#290) is opaquely worded but is to be used for securitizations and, therefore, it does not address the underlying issues being considered. He discussed how, in those cases, Model #290 is related to the investor who is funding the transaction and, therefore, would not be provided guaranty fund coverage. He stated that policyholder liabilities should always be liabilities of the insurance company, and the NAIC should treat them as subsidiaries and they should be subject to all the same NAIC requirements as the insurance company. However, if a state does not conform, it is possible they have broader powers, so some modification may be necessary, but, at the end of the day, prevention of issues ought to be the focus.

Superintendent Dwyer discussed how what was contemplated was modifying the protected cell model to address these situations and at the same time make sure the policyholder has guaranty fund coverage.

Mr. Wake noted that the most logical solution is that these things ought to be treated as subsidiary insurance companies and be subject to the same accounting and RBC requirements of an insurance company.
Ms. Malm discussed a situation that occurred in Wisconsin through rehabilitation years ago and how in that situation they realized quickly that the segregated account needed to be merged with the general account to make sure everyone had guaranty fund coverage.

6. Received the Report of the Restructuring Mechanisms (E) Subgroup

Mr. Smith reminded the Working Group of the Subgroup’s three primary charges, highlighting that their current focus will be on developing best practices. He stated that while the Subgroup has not met since the Summer National Meeting, he noted that in the past the Subgroup had previously distributed the Liability-Based Restructuring White Paper, which was drafted by the Liability-Based Restructuring Working Group of the Financial Condition (EX4) Subcommittee and was adopted in June 1997. He noted how this white paper noted key legal concerns, policyholder protections needed, guaranty fund concerns and the need for more stringent ongoing oversight.

Mr. Smith provided a summary of the activity that occurred prior to the Summer National Meeting, when the Subgroup heard from 12 commenters who provided letters. He stated that Subgroup members have also participated on Working Group calls to understand the core issues and noted how some of the comment letters referred to some of this specific information.

Mr. Smith noted that the Subgroup directed NAIC staff to develop a survey to send to the states to gain more insight into these transactions and what the states have been doing or plan to do to review, approve and monitor IBT and other restructuring transactions, including companies in run-off. He stated that the survey information has been compiled and most of the state-specific identifying information was removed to allow for public discussion on an upcoming call, which is planned for early January 2020.

Mr. Smith also discussed that there had been some discussions at the Statutory Accounting Principles (E) Working Group but that no guidance has been developed by that group. The Subgroup will continue to focus on the initial charge of developing best practices by utilizing: 1) best practices from the Liability-Based Restructuring White Paper; 2) best practices from the states; and 3) aspects of the United Kingdom (UK) Prudential Regulatory Authority (PRA) used in the UK Part VII requirements.

7. Discussed the Prudential and Rothesay Life Decision and Various Viewpoints

Casey McGraw (NAIC) discussed how the NAIC made this case available on the Working Group’s web page and described how it would be helpful to have a discussion on the topic.

Carey Child (Norton Rose Fulbright US LLP) presented a summary of the decision and related issues by providing a presentation (Attachment Six-C) based on his consultation with his firm’s London office, as they are involved in a number of these types of transactions. He emphasized certain aspects of the presentation, including a timeline of the key events for which he noted in particular how the transaction by Prudential was driven by their desire to separate the high growth Asian business from the slower growth business in other parts of the world. He also discussed how there have since been two UK Part VII decisions since the Rothesay decision, but neither of which were annuities. He also highlighted the standards that must be met under any proposed transaction, including both security and service. He noted the requirement of meeting reasonable expectations of policyholders.

Mr. Child also highlighted an important aspect of the requirements includes a communication plan, noting the PRA standards in the area. He emphasized how during the court approval stage, they court had received 7,300 responses to the notices and of those, 1,300, or 15% were characterized as objections. He stated that the court determined that was a significant level of objections for a Part VII transfer. Mr. Child noted how the reason for the rejection of the transaction was not one of capitalization or financial strength, as it was considered equal or better under the new party. He stated it was also not a service standard issue, nor was it an issue of independence or one related to the underlying business being annuities where the judge believed those type of annuities could be transferred.

Mr. Child stated that the primary issue was more related to how pensions operate in the UK, where all citizens are required to purchase pensions. He stated the court emphasized the nature of these liabilities and how these were marketed upon a well-known brand. He stated the court recognized created a reasonable expectation on the policyholders for the policyholders and
how the real difference came down to a different opinion on support. He stated the independent expert noted this more as a remote risk.

Mr. Child stated that, in closing, reading through the ruling, the judge seemed to have a concern that seemed to be related to private contracted rights being changed and how the judge noted that policyholders were getting nothing out of the transaction. Mr. Child described how the legal press had written on the topic after the ruling and one press outlet questioned if populism had come to Part VII transfers. Mr. Child stated that he believes the U.S. will have a different setup, because the U.S. constitution does have explicit provisions on state powers on contract rights including the contract clause and the due process clause, both of which have been litigated in the GTE Reinsurance Company Limited case.

Superintendent Dwyer asked about the two UK Part VII transactions approved since the decision and asked if he knew the specific types of each. Mr. Child indicated that one of the two was life protection, but he did not recall the other and would have to get back to the Working Group.

Superintendent Dwyer asked if the court in those situations referred to the Prudential Rothesay decision. Mr. Child stated his understanding is that it was referred to in one of the two cases.

Mr. Cregan asked if those objecting to the transaction had counsel and whether perhaps their lack of counsel may have led to the decision. Mr. Child responded that while he did not know if they had counsel, it did not appear part of the basis for the decision and noted several individuals appeared directly before the court. Mr. Child stated he would find out more from his colleagues.

Birny Birnbaum (Center for Economic Justice—CEJ) stated that he believes the independent expert in the case discussed was not an appropriate representative for policyholders. He also described how while the UK Part VII transfer process does allow objections to be made by policyholders, those policyholders are not privy to the same confidential information that is provided to the independent expert. He stated that the CEJ’s view is that the independent expert does not do justice, noting that there should be a policyholder advocate who not only represents the policyholders but also has access to confidential information that can be used to represent the policyholders’ interest.

Mr. Birnbaum summarized that, with respect to this case, the summary of the expert (Attachment Six-D) describes how the conclusion reached in terms of service was based on the policies and procedures of the two companies. He stated that this was inadequate in his view, noting that his proposed use of a policyholder advocate is needed to look at the actual outcome on the policyholders.

Mr. Combs emphasized that Oklahoma’s view is that the specific purpose of the independent expert is to look out for the protection of policyholders. He stated that, on this point, he disagrees that there is not an advocate of the policyholders with access to confidential information.

Mr. Birnbaum noted that presumably that is also the standard in the UK, but what he noticed was that the expert is focused on the financial condition of the companies and not the service to the policyholders. He described that there are certain skills that are needed to look at financial condition, noting that those differ from the skills needed to look at customer treatment. He described how this is like the difference between a financial regulator and a market conduct regulator.

Superintendent Dwyer said this discussion will continue in the future.

8. Discussed the APCIA’s Principles Regarding Restructuring Mechanism Transactions

Steven Broadie (American Property Casualty Insurance Association—APCIA) summarized the APCIA principles as it relates to restructuring mechanism transactions (Attachment Six-E) and stated the APCIA’s support for the NCIGF principles.

Mr. Broadie stated that the APCIA’s principles focus on: 1) robust due process to all stakeholders; 2) no impacted policyholders should lose or gain coverage as the result of a transaction; 3) robust regulatory review process; 4) an independent expert who is an advocate for policyholders and advise the department of insurance; and 5) court approval required for IBTs but not for corporate divisions.
Dennis Burke (Reinsurance Association of America—RAA) stated that the RAA does not believe there is a difference between IBTs and corporate divisions and should be treated as such, including court approval should be required on all such transactions.

With respect to this issue, Mr. Broadie noted that he was not part of the conversation when the APCIA made a distinction between IBTs and corporate divisions.

Mr. Combs asked about the position of a public hearing and the stage it should be conducted. Mr. Broadie noted that the APCIA had not addressed that point thus far.

9. Heard an Announcement from Oklahoma Regarding Approval of its First IBT

Mr. Combs noted that on Nov. 26, Commissioner Glen Mulready (OK) approved the first IBT between Providence Washington Insurance Company, a Rhode Island-based company, and Yosemite Insurance Company, an Oklahoma-based insurance company, both of which are Enstar companies. He noted that it involves all P/C liabilities, including asbestos and environment, workers’ compensation, other liability and a small amount of personal lines. He noted that the same day it was approved by the commissioner, the company filed it with the court and noted that the communication plan will begin later in December after the judge determines his position on that communication. He stated that the Oklahoma Insurance Department has spent a considerable amount of time on the transaction, including the greatest amount on the communication plan to policyholders. He noted that it is posted on the Oklahoma Insurance Department website.

Having no further business, the Restructuring Mechanisms (E) Working Group adjourned.
Restructuring Mechanisms (E) Working Group
Conference Call
October 1, 2019

The Restructuring Mechanisms (E) Working Group of the Financial Condition (E) Committee met via conference call Oct. 1, 2019. The following Working Group members participated: Elizabeth Kelleher Dwyer, Co-Chair, Matt Gendron and Jack Broccoli (RI); Buddy Combs, Co-Chair (OK); Jon Arsenault (CT); Shannon Whalen (IL); Steve Mayhew (MI); Barb Carey (MN); John Rehagen (MO); Matt Holman and Justin Schrader (NE); John Sirovetz and Diane Sherman (NJ); Joe DiMemmo (PA); Daniel Morris and Lee Hill (SC); Amy Garcia (TX); David Smith (VA); and Amy Malm and Richard Wicka (WI).

1. Heard Opening Comments from Co-Chair

Superintendent Dwyer reminded members of the Working Group that at the Summer National Meeting, the Working Group did not have enough time during its meeting to ask the speakers all the questions that they may have had. She said the purpose of today’s conference call is to give members an opportunity to ask questions of Paul Brockman (Enstar), whose presentation focused on the industry need for restructuring mechanisms, and Kelly Superczynski (Aon), whose presentation focused on the benefits of restructuring mechanisms.

2. Asked Enstar Questions

Superintendent Dwyer asked Mr. Brockman if he was aware that there are guaranty fund issues that arise with restructuring arrangements for personal lines, and whether Enstar had completed such a transaction with personal lines. Mr. Brockman responded Enstar had with a personal lines transaction in the United Kingdom (UK). Superintendent Dwyer asked if there was a difference in the guaranty funds in the U.S. and the UK. Robert Redpath (Enstar) responded that there really is nothing equivalent to the concept of guaranty funds in the UK. Superintendent Dwyer asked what would occur when a company is restructured and in a state where it was not domiciled at the time the business was written, how would the guaranty funds respond in the event of an insolvency. Mr. Brockman said there would be several areas where the laws would be affected, including guaranty funds, and that each transaction must be analyzed for the blocks of business being transferred and the existing licenses possessed by the company. He added that it was difficult to provide a general answer and noted that the state insurance regulator, the independent expert and the guaranty fund of the affected states would have to look at the transaction closely. Mr. Redpath stated Enstar intended to have licenses in each of the states in which the issuing company had conducted business. Superintendent Dwyer asked if Enstar had completed one of these transactions where these guaranty funds have been at issue. Mr. Brockman stated that they had not yet completed such a transaction and the issue would be more relevant to a U.S. transaction. Mr. Combs asked if a company should aim to have licenses in each of the states for which they are going to assume business. He asked if there are other ways to deal with a situation where they do not have such licenses, such as an agreement where the transfer for the policies does not take place until licenses are obtained in that state. Mr. Redpath agreed, noting the business transfer should wait until a license is obtained. There is an issue with getting a license when an entity is not actively writing business, and this might be something the states could investigate.

Birny Birnbaum (Center for Economic Justice—CEJ) asked if the Enstar representatives were familiar with the Prudential Rosebay transaction that the UK high court rejected in August. Mr. Redpath responded “yes.” Mr. Birnbaum asked if they could describe the reasons for the rejection. Mr. Redpath responded that it is his understanding the Court had some concerns with a transfer from of an old established insurance company compared to the assuming insurer, which was a new company. He stated he believes these were factors and noted that the various levels of review show that the process works, with a different view by the court than the prudential insurance regulator and the independent expert. Mr. Birnbaum asked if it was a capitalization issue. Mr. Redpath said he is not sure, noting that these were annuities and that the history of the companies may have been a larger factor. Mr. Birnbaum asked if there was a public hearing, if the policyholders had an advocate and if the expert recommended approval of the transaction. Mr. Brockman stated that it might be better if the company came back to the discussion later with a write-up of the facts. Mr. Birnbaum asked if the high court opinion could be distributed. Casey McGraw (NAIC) stated he would work to have the opinion distributed. Superintendent Dwyer asked that the issue be discussed at the Fall National Meeting. Mr. Birnbaum shared information from a news article noting that the judge rejected the transaction. He referenced comments from consumers in the article that each highlighted the policyholder concerns. He noted more specifically that there appears to be a need for different consumer rights for personal versus commercial business. Those transactions that do not require policyholder approval and that are confidential are concerning. He referenced the expert report in the UK.
transaction, which was brief in terms of consumer considerations. He stated he is concerned about the presentations at the Summer National Meeting where the ceding companies may be a weaker capitalized companies and were ceding from strongly capitalized companies. He noted that while that might be the case for commercial run-off business, that would not be the case with personal lines business. He noted that the expert report described policyholder benefits in terms of the capital base of the acquiring company. He stated for personal lines consumers, there should be more consumer considerations. He noted that at that the Summer National Meeting, the idea of freeing up capital for innovation was also noted, which was concerning given companies that provide such will certainly have access to capital due to demand. He noted concerns about consultants’ profiting off such transactions. He emphasized concerns with transfers of these business for personal lines, and if that does take place, there needs to be a consumer advocate for the transactions just as there is an independent expert. There were some questions about the specific independent report Mr. Birnbaum was referring to where the discussion was not completed given all the parties were not privy to the information. However, that does not change Mr. Birnbaum’s views. This also does not change Mr. Brockman’s view that the process works as Enstar has seen transactions stopped at different stages.

Mr. Rehagen asked how this issue would correspond with the assumption reinsurance law that exists in their state, and more specifically how that state requirement would be complied with such a transaction. Mr. Brockman stated that in Oklahoma, the independent expert acts on behalf of the department of insurance (DOI) and would reach a recommendation and would consider the notice requirements of Oklahoma. Mr. Rehagen responded the answer sounded to be “no.” Mr. Brockman stated they have a right to show up at the hearing, but that it is correct there is no standard to essentially veto the decision. Mr. Rehagen asked if his director and Missouri policyholders would need to travel and appeal to the Oklahoma court. Mr. Redpath responded “yes.” Superintendent Dwyer asked if any of the assumption reinsurance laws have any impact on the insurance business transfer laws. Mr. Redpath responded he is not aware. Albert Miller (ProTucket Insurance) stated that with respect to assumption reinsurance law, in Missouri, like many states, there is an exception for reinsurance transactions where the ceding company remains liable to the original policyholders. Therefore, in the case of an insurance business transfer for a reinsurance transaction, the assumption reinsurance law will not apply. Superintendent Dwyer asked if any court had addressed whether the assumption reinsurance law applies in an insurance business transfer and did not receive an affirmative response.

3. Asked Aon Questions

Superintendent Dwyer asked Ms. Superczynski if she is aware of any completed transactions that contained the guaranty fund issue that was asked of Mr. Brockman. Ms. Superczynski responded she is not aware of any completed transactions that had personal lines. She said she recognizes the guaranty fund issue is one the industry will need to overcome. However, assuming that the subject is a runoff book of business, the companies had already paid into the guaranty fund, and the scenario was that they had already contributed their fair share, then in theory coverage should be provided. She stated there were issues in terms of moving the policyholders and the logistics of payment, but funding had taken place from an economics basis. Therefore, the issues were more about how to address in a fair and equitable manner. Ken Selzer (Aon) stated he agrees and Aon sees the market first developing on commercial lines, excess workers compensation and assumed reinsurance transactions. Therefore, there may be time for the identified issues to be addressed that will require some focused attention. Superintendent Dwyer stated that she agrees that economically, consumers should receive guaranty fund coverage if they would have received it with the original company and the Working Group is most concerned about consumers losing that protection. Peter Gallanis (National Organization of Life and Health Insurance Guaranty Associations—NOLHGA) noted that different people use different definitions for closed blocks of business. It would encompass businesses that were no longer premium pay, such as structured settlements. However, he stated he would consider closed blocks, but they would be premium paying and very important, such as long-term disability and long-term care insurance (LTCI). He stated his comment was not germane to the presentations made but rather things that would need to be understood by the Working Group members. Superintendent Dwyer stated Rhode Island’s law is limited to property/casualty (P/C) commercial business. Superintendent Dwyer asked Ms. Superczynski if Aon had any views on the assumption reinsurance issue previously discussed. Ms. Superczynski asked Mr. Selzer to respond, who indicated Aon would give the issue more thought.

Having no further business, the Restructuring Mechanisms (E) Working Group adjourned.

NCIGF Position Statement on Restructuring
Adopted by NCIGF Board October 1, 2019

**Background.** Efforts in states to enact restructuring statutes are progressing quickly. To date, eight states have enacted a restructuring statute in some form. These statutes permit an ongoing insurance company to divest itself of certain liabilities, along with a calculated amount of corresponding assets, **and relinquish any ongoing responsibility for the divested business.** This can be accomplished by a division, in which the dividing entity may or may not survive, and in which resulting companies are created, or an IBT, described in Oklahoma as a transaction that would “transfer insurance obligations or risks, or both, of existing or in-force contracts of insurance or reinsurance from a transferring insurer to an assuming insurer.”

IBT’s (like Oklahoma) and division statutes (like Illinois) are very different types of transactions. An IBT is intended to accomplish an assumption transaction by a “statutory” novation effectuated by operation of law (e.g., by court order), rather than by a novation that requires individual policyholder consent. (We believe that a number of guaranty fund laws already have language that may cover certain assumptions, but a complete analysis of guaranty fund laws as they will be applied to an IBT is still needed.)

In either case, the business divested would be put into a different insurance company or companies. In some states the business could be put into a protected cell. The statutes proposed typically call for a divestment plan to be filed with and approved by the state’s commissioner of insurance. Sometimes review and approval by the court is also required. Requirements for notice to policyholders and public hearings on the proposals vary from state to state. The most recent proposals do not limit the lines of business that can be subject to divisions. Hence, all types of insurance such as personal lines, workers compensation and long-term care insurance could be involved.

The NCIGF supports member guaranty funds in meeting immediate and future obligations to policyholders. The NCIGF does not take a position on any current or contemplated industry business practice.

NCIGF public policy is focused on preserving guaranty fund (GF) coverage for policies and claimants where there has been a division or an IBT:

- Where there was guaranty fund coverage before the division or IBT, state regulators should ensure that there is coverage after the division or IBT. A division or IBT should not reduce, eliminate or in any way impact GF coverage.
Where there was no coverage before the division or IBT, there should be no coverage after the transactions are completed. A division or IBT should not create, expand, or in any way impact GF coverage.

Guaranty fund representatives are a good resource for any guaranty fund coverage issues that arise in evaluating these transactions.

**NCIGF observes that insurance company divisions and IBTs that are reviewed and approved by state regulators may impact potential guaranty fund coverage for policyholders.** Existing P & C guaranty fund laws were generally not drafted with the division or IBT concepts in mind. Because of how some of the definitions in the guaranty fund laws were drafted, and because of how the division and IBT legislation operates, it is quite possible that some policyholders that now have guaranty fund coverage might no longer have that coverage if their policies are moved as a result of a division or IBT.

Possible technical gaps may be created if a state has adopted the NAIC P&C Guaranty Association Model Law. These gaps could include the definitions of Covered Claim, Member Insurer, Insolvent Insurer, and the Assumed Claims Transaction found in Section 5 of the P&C Guaranty Association Model Law.

Again, where the original company was a member of one or more guaranty funds and potential claimants and policyholders had been covered by a guaranty fund prior to the transaction, care should be taken to make sure that those same claimants and policyholders are covered by a guaranty fund after the transaction. This may require guaranty fund laws and/or other insurance laws to be amended in each of the states where the original company was a member of a guaranty fund before the transaction becomes final.

Although this is a developing issue, restructuring statutes as described above are part of the existing insurance landscape. Currently, the best course of action is for the guaranty fund system to work with industry, state and national trades, and regulators to resolve the guaranty fund coverage issues in a tailored fashion, taking account of variances in state laws and restructuring statutes that may come in to play.

In order to facilitate the needed amendments of the guaranty fund laws and or other insurance laws across the country that will be required to implement this policy, the NCIGF Board directs the Public Policy Committee to appoint a subcommittee to work with NCIGF members, industry, trade associations (national and local) regulators and other interested stakeholders to oversee a coordinated, national effort to enact the necessary changes in each state. This subcommittee will also assist in developing the requisite language needed in each state to accomplish this goal as it is recognized that
each state’s law may vary in terms of what amendments may be necessary. It is also recognized that the changes needed to be made to guaranty fund laws to address divisions may be different from those changes that are needed to address IBTs. The Public Policy Committee Chair will provide updates on the progress of this effort to the Board at each NCIGF Board meeting. NCIGF staff is instructed to provide the necessary support to the subcommittee.
Assessment of UK Part VII Decision: Prudential and Rothesay

Cary S. Child

Key Events

Regulatory Review Stage
Independent Experts Consider Policyholder Welfare

Selection

Approved (or nominated) by the Prudential Regulatory Authority ("PRA") after consulting with Financial Conduct Authority ("FCA")

The regulators expect the independent expert making the scheme report to be a neutral person, who:

1. is independent, that is any direct or indirect interest or connection he, or his employer, has or has had in either the transferor or transferee should not be such as to prejudice his status in the eyes of the court;

2. has relevant knowledge, both practical and theoretical, and experience of the types of insurance business transacted by the transferor and transferee.

Standards

(PRA's Policy Statement)

Regulators Consider Policyholder Welfare

The assessment is a continuing process, starting when the scheme promoters first approach the regulators about a proposed scheme. Among the considerations that the regulators may consider when reviewing the scheme are:

... (3) how the security of policyholders’ (who include persons with certain rights and contingent rights under the policies) contractual rights appears to be affected;

... (5) how policyholders’ rights and reasonable expectations appear to be affected;

... (6) the compensation offered to policyholders for any loss of rights or expectations;

... (9) the opportunity given to policyholders and other persons affected by the scheme to consider the scheme, that is whether they have been properly notified, whether they have had adequate information and whether they have had adequate time to consider that information.

(Draft for decision at 2.18)

Regulators Consider Policyholder Welfare

"Our approach to assessing Part VII Transfers is based on the application of our statutory objectives, which are to:

• secure an appropriate degree of protection for consumers
• protect and enhance the integrity of the UK financial system
• promote effective competition in the interests of consumers" (4.2)

"Applicants should clearly explain the reasons why they are proposing a transfer. We want to ensure that the transfer is not motivated by a desire to benefit either Applicant to the material detriment of Policyholders, or to unfairly bring benefit to one class of Policyholder to the detriment of another class." (Guidance at 4.5)
Regulators Consider Policyholder Welfare

“Both the PRA and the FCA are entitled to be heard in the proceedings. Both the PRA and the FCA may provide the court with written representations setting out their views on the proposed transfer scheme, for example, by way of a report to the court. The PRA will decide in relation to each insurance business transfer whether it is necessary or appropriate to prepare a report, bearing in mind its objectives and other relevant matters.” [PRA Policy Note at 2.8]

In the Prudential and Rothesay case, the FCA made two submissions to the court, and the PRA made three submissions to the court. [Decision at 81]

Policyholders Opportunity To Be Heard

Development of an agreed communications plan is a key step in the process.

Absent court approval, “notice of the application must be sent to all policyholders of the parties,” among others. [Policy Note at 2.9]

The PRA must “approve in advance the notices sent to policyholders and published in the press.” [id. at 2.51]

“ideally every recipient should understand in broad terms from the summary how the scheme is likely to affect them. This objective will be most nearly achieved if the summary is clear and concise while containing sufficient detail for the purpose.” [id. at 2.51]

Court found: requirement is “that policyholders were given sufficient time to consider and respond to the Finalised Scheme proposal and to participate fully at the hearings before me if they chose to do so. The FCA was satisfied that sufficient time was given to policyholders in that regard, and I am also satisfied that this was the case.” [Decision at 88]
Policyholders Opportunity To Be Heard

Mr. Justice Snowden confirmed that policyholder welfare was the focus of his inquiry, which was not a "rubber stamp." The court's inquiry will focus on the questions of whether policyholders' security of benefits and reasonable expectations of service standards will be adversely affected by the proposed scheme. As the authorities also indicate, the court will regard the first of those issues as 'primarily a matter of actuarial judgment, and in that respect will give close attention to the views of the independent expert and the regulators. (Decision at 85.)

But, the "court has a discretion of very real importance, which is not in any way intended simply as a 'rubber-stamp', for the opinion of the independent expert or the views of the regulators." (Decision at 85.)

Not a Capitalization or Size Issue

Mr. Justice Snowden took as undisputed that:

1. As measured by coverage ratios, "the relative financial strengths of PAC and Rothsay are currently comparable, or indeed that Rothsay could be considered to be slightly stronger than PAC."
2. Because the material consideration is capital relative to liabilities, "the fact that PAC is larger than Rothsay does not, of itself, mean that policyholders would have less security of benefits at Rothsay;" and
3. Although "Rothsay is less resilient than PAC due to having less diversification of risk,... this should be taken into account through Rothsay having a proportionately higher SCR." (Decision at 122 to 123.)
Not a Service Standards Issue

Both Prudential and Rothszen are subject to regulation by the PRA and FCA, and the IE concluded that “the administration, management and governance of the Transferring Policies will continue to be of the same standard following” the transfer. (Decision at 71.)

The court found no basis on the evidence for concluding that Rothszen would be unable to manage that expansion of its business. PAC has already outsourced the administration of the Transferring Policies to Diligent, and given the arrangements for that or a similar arrangement to continue if the policies are transferred to Rothszen, I see no reason to conclude that policyholders will be adversely affected by the Scheme in relation to the standards of service that they are likely to experience.”

(Decision at 175 to 176.)

Not An Issue of the Compensation Paid to the IE

That the independent expert was paid by Prudential and Rothszen is an issue that is frequently raised at scheme hearings, but there is nothing in it. Mr Dumbreck’s appointment was, as it had to be, approved by the PRA after consultation with the FCA, and there is no realistic alternative to him being paid by the applicants. Mr Dumbreck is suitably qualified and experienced, having been the independent expert in a number of other scheme cases, including Scottish Equitable. I have no reason to doubt that Mr Dumbreck understood the importance of his role and the need for independence, and he expressly acknowledged that he was aware of and had complied with his overriding duty to the Court.” (Decision at 84.)

Not A Per Se Rule About Personal Lines, or Annuities

Mr. Justice Snowden accepted that:

1. “A significant number of decisions show that the transfer of annuity policies is within the scope of Part VII” and that it was important for regulatory policy that the capability of transfer exist;

2. the court had the power to approve a “transfer of liabilities that would not otherwise be capable of being transferred without a person’s consent or concurrence; and

3. it is “not for the court to insist on an opt out” right for policyholders. (Decision at 102, 104 and 105.)

Instead, Turned On The Nature of Annuities Generally, Combined With The Manner In Which These Particular Annuities Were Marketed

Given the nature of annuities, it "was entirely reasonable for policyholders reading statements" made by Prudential in marketing its annuities to make the assumption that "it would be PAC and no other company that would be providing them with the resultant annuity for the rest of their life." (Decision at 127–128.)
Even That Expectation Was Not Itself Sufficient

The policyholder’s reasonable expectation regarding Prudential “does not mean that as a matter of law PAC could not seek to transfer the annuity policies under Part VIII…” (Decision at 131.)

I nevertheless consider that it is a matter that can and should be taken into account in the exercise of my discretion…” (Jay)

Specifically, Court Reassessed Parental Support

“In an adverse scenario that threatened PAC’s solvency, the financial resources of Prudential plc available to support PAC may be similarly constrained…”

[It is currently planned that Prudential plc will demerge its UK and European operations from its operations elsewhere, and if the demerger goes ahead as planned, it is likely that PAC will no longer benefit from parental support to the same degree as is currently the case…]

Additionally, Rothesay and its parent are able to undertake capital-raising activities… and have done so in the past.

…I am satisfied that both firms have an adequate range of actions at their disposal to mitigate a scenario in which their solvency position starts to deteriorate, and therefore there is no material adverse impact…” (Decision at 8.27-8.31)

Specifically, Court Reassessed Parental Support

“…any comfort that may be drawn from the potential for capital support from Prudential plc must be considered in the context of the likelihood of it being called upon, which is remote. Therefore it should not be considered material in comparison to the comfort that can be drawn from the capital resources of, and the strength of the regulatory capital requirements and capital management policies applicable to, PAC and Rothesay.” (Decision 8.6.2)

Specifically, Court Reassessed Parental Support

“But the fact that the PRA (or an actuary) cannot quantify a firm’s vulnerability or reputation in capital terms, does not mean that it also has to be disregarded by the court. I have already made the point that the court’s role under section 111(3) is not simply intended to replicate, or to be limited by, the risk-based approach of the regulators to the assessment of the scheme, or the actuarial approach of the independent expert…” (Decision 110.)
Specifically, Court Reassessed Parental Support

“...consider that the opposing policyholders were justified in their submission that such matters do not provide equivalent comfort to the existing availability of capital in the Prudential group and the commercial imperative that would motivate the other Prudential group companies to stand behind PAC. The provision of capital to enable the initial development and expansion of Rothsay’s business by acquisition of annuities from other insurers is not the same as the provision of restorative capital to make good an unexpected deterioration in the financial position of the company or to avoid its insolvency. Moreover, the business operations, names and reputations of Blackstone, GIC and MassMutual (or any investors that might replace them) are not integrated with, or inherently tied to the business of Rothsay in the same way as the business operations, name and reputation of other parts of the Prudential group are tied to the business of PAC.” (Decision at 144.)

Specifically, Court Reassessed Parental Support

“...prima facie, I consider that this disparity between the external support potentially available for PAC and Rothsay is a material factor affecting the interests of policyholders to be taken into account in the exercise of my discretion.” (Decision at 143.)

A concern about bare private commercial interest?

“The Scheme has been motivated by PAC’s desire to reduce its regulatory capital requirements in connection with a planned demerger of the group headed by Prudential plc... of which PAC is a significant member. The Scheme... offers no benefits to the transferring policyholders in connection with the enforced change of their annuity provider from PAC to Rothsay.” (Decision at 2, emphasis added.)

The “question of whether a particular policy was selected by PAC to be... transferred to Rothsay under the Scheme, depended entirely on whether or not it suited the commercial requirements of PAC and Rothsay. In particular, the selection of the affected policyholders was designed to provide PAC with its target level of regulatory capital release in order to facilitate the Demerger.” (at 66, emphasis added.)
**U.S. Constitution**

- **Contracts Clause**
  - No state shall ... pass any ... law impairing the obligation of contracts. U.S. Constitution, Art. I, § 10, Issue 1

- **Due-Process Clause**
  - No state shall ... deprive any person of life, liberty, or property without due process of law.
  - 14th Amendment to U.S. Constitution,

**Framework for similar arguments in the U.S.**

As a general rule, parties do not have a right to expect performance from a particular party.

An obligor can generally delegate performance of duties capable of being performed by a number of different persons (looking to whether individual traits, skill, or judgment required).
Summary of the report of the Independent Expert

Background

I have been instructed by The Prudential Assurance Company Limited (“PAC”)1 and Rothesay Life Plc (“Rothesay”) to report to the High Court of Justice of England and Wales (the “Court”) on the terms of the proposed transfer of certain non-profit annuity insurance business of PAC (“the transferring policies”) to Rothesay. The transfer will be effected by means of a scheme of transfer (the “Scheme”) in accordance Part VII of the Financial Services and Markets Act 2000. Subject to Court approval, the date on which the transfer takes place (“the transfer date”) is expected to be 26 June 2019.

On 14 March 2018, Rothesay entered into an agreement to acquire the transferring policies from PAC. While the formal transfer of the transferring policies to Rothesay requires the sanction of the Court, PAC and Rothesay agreed that PAC’s economic interest in the material risks and rewards of the transferring policies should be transferred to Rothesay in the meantime2. This was achieved by putting in place a reinsurance agreement between PAC and Rothesay (“the Reinsurance Agreement”). Under the Reinsurance Agreement, Rothesay must reimburse PAC for all benefit payments made to holders of the transferring policies3 unless and until the transferring policies are formally transferred to Rothesay under the Scheme, after which Rothesay will make the payments directly. There are a number of policies that are covered by the Reinsurance Agreement which are not transferring policies. These policies will instead remain reinsured to Rothesay after the transfer date.

I am a Fellow of the Institute and Faculty of Actuaries in the UK and a partner of Milliman LLP. I have fulfilled the role of Independent Expert for over 20 insurance business transfers that have been approved by the Court. I confirm that I do not have any direct or indirect interest in PAC, Rothesay or any other related firms that could compromise my independence.

My assessment of the effect of the transfer has been informed by the financial positions of PAC and Rothesay at 30 June 2018, the most recent date at which both sets of financial results are available at the time of writing.

This is a summary of my full report dated 21 January 2019. Please refer to my full report (which is available from the PAC and Rothesay websites) for the scope of my work and my conclusions, and the reliances, limitations and standards applying to my work. The full report and this summary do not provide financial or other advice to individual policyholders.

Before the final Court Hearing I will prepare a further report (the “Supplementary Report”) to provide an update on my conclusions regarding the effect of the proposed transfer on the different groups of policyholders in light of any significant events arising after my full report has been finalised. The Supplementary Report will include information on the financial position of the companies at 31 December 2018.

The effect of the transfer on transferring policies of PAC

Benefit security

Transferring PAC policyholders will be transferred from a very large, long established company with a familiar brand name to a smaller, less well-known company founded only twelve years ago. However, the security of policyholders’ benefits depends primarily on factors other than the size and age of the company, and in reviewing the transfer I have considered, among other things:

---

1 PAC is a UK insurance company and is the primary European insurance entity of the Prudential plc group.
2 With effect from 1 April 2018 for deferred annuities and 1 July 2018 for annuities in payment.
3 With the exception of differences in payments to policyholders that arise through differences between PAC’s and Rothesay's commutation factors.
Solvency cover: If the proposed transfer had taken place on 30 June 2018, the level of cover for regulatory solvency requirements\(^5\) would have been lower in Rothesay post-transfer than that in PAC pre-transfer. However, PAC’s solvency cover decreased from 14 December 2018 due to the transfer of the legal ownership of PAC’s Hong Kong subsidiaries to Prudential Corporation Asia, reversing the relative positions of the two companies.

Capital policies: PAC and Rothesay have capital policies aimed at maintaining solvency cover\(^5\) within an appropriate range. I have reviewed the capital policies of both companies and have concluded that they are of broadly comparable strength. At 30 June 2018 the solvency cover of each company exceeded the upper end of the target range set by its respective Board, and this would also have been the case after the transfer if it had taken place on that date. Each company is free to distribute to its shareholders any surplus capital which is not ring-fenced or expected to be needed by the business, and this means that additional security provided by solvency cover in excess of the target range may be temporary.

Risk exposures: Differences in the risks to which each fund is exposed may lead to differences in the variability of solvency cover as financial and other conditions change, and it is also necessary to take account of any such differences.

Based on my review of all the relevant factors, I am satisfied that the transfer will not have a material adverse impact on the security of benefits of the transferring policies.

Reasonable expectations of transferring policyholders

The transferring policies are all non-profit annuities\(^6\) and therefore, in my view, policyholders’ reasonable expectations in respect of their policies are principally that:

- They receive their income as guaranteed under the policy, on the dates specified, from the point of purchase;
- The administration, management, and governance of the policies are in line with the contractual terms of the policies; and
- The standards of service received after the transfer are at least as good as those they currently receive.

No changes are proposed to the terms and conditions of the transferring policies, and so the contractual benefits will be unchanged by the Scheme.

Holders of some of the transferring policies are able to elect to commute some or all of the contractual benefits of their policy in certain limited circumstances\(^7\); that is, the policyholder or contingent beneficiary may choose to forgo some or all of their annuity income in return for a lump sum payment. The amount of lump sum received is, in almost all cases, at the discretion of the insurer (subject to the overriding requirement to treat customers fairly), and is determined by a commutation factor\(^8\) that depends on the insurer’s estimate of the life expectancy of the customer, as well as prevailing market conditions (in particular the level of long-term interest rates). PAC is in the process of implementing a change to its commutation factors which will, by and large, result in the factors reducing. I have received analysis from PAC and Rothesay showing that, while PAC’s commutation factors (after the planned change) may be higher or lower than those of Rothesay depending on the features of the policy, the two sets of

---

\(^4\) The UK insurance regulations specify minimum levels of capital that an insurer must hold based upon the risks that the insurer has written.

\(^5\) The capital that an insurer holds expressed as a percentage of the minimum level permitted by regulations.

\(^6\) All transferring policies are in-payment annuities with the exception of a very small number of deferred annuity policies.

\(^7\) For in-payment annuities, these circumstances comprise:
- a situation in which a pension sharing order has been issued; or
- a situation where the benefits of a contingent beneficiary are small enough to qualify for trivial commutation following the death of the main policyholder.

\(^8\) A commutation factor is the lump sum received by the policyholder for each £1 p.a. of pension income forgone. For example, a commutation factor of 20 means that the policyholder would receive a £20 lump sum for each £1 p.a. of pension forgone.
factors will not differ materially. I have provided more details on this aspect in my full report and I will provide an update in my Supplementary Report.

Since October 2018, the administration and servicing of all of PAC’s annuity business (including the transferring policies) has been carried out by Tata Consultancy Services ("TCS") and Diligenta, its UK subsidiary. Subject to putting in place a suitable transitional services agreement, PAC will continue to provide administration and servicing (undertaken by TCS on its behalf) to Rothesay for 12 to 24 months after the transfer date, which means that no changes to administration or service standards are expected as a result of the transfer during this period. While this transitional services agreement is in place, there is no reason to expect that administration and service standards will differ from those that the transferring business would have received if the Scheme had not been implemented. After the expiry of the transitional services agreement, Rothesay would choose either to put in place a direct relationship with TCS/Diligenta or the administration would migrate to a service provider of Rothesay’s choice. Rothesay already manages approximately 380,000 non-profit annuities and administers these via outsourcing agreements. I have reviewed the target service standards for these policies and I consider the service standards to be reasonable. I have no reason to believe that the future outsourcing arrangements for the transferring policies organised by Rothesay will result in materially different service standards from those applicable to Rothesay’s existing non-profit annuities. I will comment on the outcome of the discussions surrounding the Transitional Services Agreement in my Supplementary Report. However, assuming that a suitable Transitional Services Agreement is put in place, I am satisfied that the implementation of the Scheme will not result in a material adverse impact on service standards applicable to the Transferring Policies.

Following the transfer, the transferring policies will be managed by Rothesay and subject to the governance of the Rothesay Board of Directors. As noted above, Rothesay currently manages large volumes of non-profit annuity business, and is therefore experienced in the management and governance of such business.

After the transfer date it will be necessary to use Rothesay’s Pay As You Earn ("PAYE") reference for transferring policies. For some holders of transferring policies, this may trigger a change in their PAYE tax code, either at or directly after the transfer date. Rothesay and PAC are liaising with HMRC to establish the best approach to minimise any inconvenience for affected policyholders. I will comment further on this aspect in my Supplementary Report.

In October 2016, the Financial Conduct Authority (the “FCA”) announced the findings of its Thematic Review of Annuity Sales Practices ("TRASP") which assessed whether firms had provided new annuity customers with sufficient information about the availability of enhanced annuities at the point of sale. As a result of TRASP a number of firms, including PAC, were asked by the FCA to review all non-advised annuity sales since July 2008 and provide compensation where appropriate. PAC is currently conducting this review.

Depending on the outcome of the TRASP review, PAC may need to make lump sum compensation payments and/or augment the level of annuity payments for certain policies, including some of the transferring policies. The planned processes for reviewing and, where appropriate, providing TRASP compensation after the transfer have been designed with the aim that a transferring policyholder’s experience would be the same as that of a non-transferring policyholder of PAC. Therefore, transferring policyholders should not experience a delay in receiving any compensation due as a result of the implementation of the Scheme, nor will the amount of compensation they receive be affected.

Conclusions for transferring policies

I am satisfied that the implementation of the Scheme will not have a material adverse effect on:

- The security of benefits under the transferring policies;
- The reasonable expectations of the transferring policyholders; or

---

8 An annuity sold to an individual in poorer than average health, which pays out a higher annuity amount to reflect their lower life expectancy relative to a healthy individual.

9 When a customer does not receive financial advice when purchasing an annuity, it is called a ‘non-advised annuity sale’.
The service standards and governance applicable to the transferring policies.

The effect of the transfer on non-transferring policies of PAC

Benefit security

If the proposed transfer had taken place on 30 June 2018, there would have been an improvement to PAC’s financial strength as a result of the transfer. However, this improvement would be relatively small as PAC has already transferred the risks and rewards associated with the transferring policies to Rothesay through the Reinsurance Agreement, and so has already realised most of the financial benefits of the transfer.

The proposed transfer will not lead to any material change in the risk appetite\textsuperscript{11} or capital policy in accordance with which PAC is managed, and PAC’s ability to comply with its capital policy will not be materially affected by the transfer.

Reasonable expectations of non-transferring PAC policyholders

No changes will be made to the terms and conditions of non-transferring policies in PAC as a result of the transfer. Furthermore, there will be no change to the operation of PAC and the governance of non-transferring PAC policies will continue to be the responsibility of the PAC Board of Directors and, in the case of with-profits policyholders (none of which will transfer to Rothesay), the role of the PAC With-Profits Committee will be unchanged.

The non-transferring policies in PAC will continue to be administered under the same arrangements and will therefore not experience any change to service standards as a result of the transfer.

The Scheme will have no effect on the benefits payable under policies remaining in PAC.

Conclusions for non-transferring policies

I am satisfied that the implementation of the Scheme will not have a material effect on:

- The security of benefits under non-transferring policies in PAC;
- The reasonable benefit expectations of non-transferring policyholders of PAC; or
- The service standards and governance applicable to non-transferring policies of PAC.

The effect of the transfer on Rothesay policies

Benefit security

Based on the financial information I have received as at 30 June 2018, there will be no material change to the financial strength of Rothesay as a result of the transfer as PAC has already transferred the risks and rewards associated with the transferring policies to Rothesay through the Reinsurance Agreement.

Rothesay’s existing business consists solely of annuities in payment and deferred annuities, and while the Reinsurance Agreement significantly increased the volume of business in Rothesay, it did not materially change the nature of the risks to which its policies are exposed (principally longevity risk\textsuperscript{12} and credit risk\textsuperscript{13}). As the risks on the transferring policies have already been passed to Rothesay through the Reinsurance Agreement, the transfer itself will not add to these risks.

\textsuperscript{11} Risk appetite is the amount and type of risk that an organisation is willing to take in order to meet its strategic objectives.

\textsuperscript{12} Longevity risk is the risk of an adverse financial impact arising from annuity policyholders living longer than expected.

\textsuperscript{13} Credit risk is the risk of losses arising from a loan made to a third party. A loss may arise from failure of the counterparty to make payments when due. A loss may also arise because the market considers the likelihood of the counterparty defaulting has increased, and so the value at which the loan may be traded falls.
The proposed transfer will not lead to any material change in the risk appetite or capital policy in accordance with which Rothesay is managed, and Rothesay’s ability to comply with its capital policy will not be materially affected by the transfer.

Reasonable expectations of existing Rothesay policyholders

The transfer will not alter the terms and conditions of existing policies in Rothesay. The transfer will not lead to any changes to the servicing and administration arrangements for existing Rothesay policies, and no change is expected to service standards for these policies as a result of the Scheme. The governance of the existing policies will continue to be the responsibility of the Rothesay Board of Directors.

Conclusions for existing Rothesay policies

I am satisfied that the implementation of the Scheme will not have a material effect on:

- The security of benefits of the policyholders of Rothesay;
- The reasonable expectations of the policyholders of Rothesay; or
- The service standards and governance applicable to the policyholders of Rothesay.

Overall Conclusions

I am satisfied that the implementation of the Scheme will not have a material adverse effect on:

- The security of benefits of the policyholders of PAC and Rothesay;
- The reasonable benefit expectations of the policyholders of PAC and Rothesay; or
- The service standards and governance applicable to the PAC and Rothesay policies.

I am also satisfied that the Scheme is equitable to all classes and generations of PAC and Rothesay policyholders.

The Independent Expert’s full report is available online at pru.co.uk/annuitytransfer. It shows in much more detail how the Independent Expert has reached his conclusions. You can also request a copy by post, by calling PAC’s helpline on 0800 640 9164 or +44 203 755 9194 if calling from outside the UK, or by writing to PAC at Rothesay Life Transfer, Prudential, PO Box 3122, Lancing BN15 8GB.
APCIA Principles for Insurance Business Transfers (IBT) and Division Statutes

Due Process

- Robust due process must be afforded to stakeholders impacted by a transaction (policyholders, reinsurers, guaranty associations). This should include:
  - Notice to stakeholders as determined by the regulator
  - Public hearing
  - Opportunity to submit written comments

Guaranty Fund Coverage

- No impacted policyholder should lose or gain guaranty fund protection as a result of a transaction.

Robust Regulatory Review Process

- The regulatory review must be robust and should, at a minimum, include the following findings:
  - The assets to be allocated to insurers involved in the transaction are adequate to cover the insurer’s liabilities.
  - The impact and terms of the transaction do not have a material adverse impact on policyholders, reinsurers, or guaranty associations.
  - The review should consider the plans of any insurer involved in the transaction to liquidate another involved insurer, sell its assets, consolidate, merge, or make other changes, and the resulting impact on policyholders, reinsurers, and guaranty associations.

Independent Expert

- The regulatory review process for insurance business transfers will utilize an independent expert to advise and assist the regulator in reviewing proposed transactions (including advising on any material adverse impact on policyholders, reinsurers, or guaranty associations) and to provide any other assistance or advice the regulator may require.

Court Approval

- Court approval must be required for insurance business transfer transactions but not for divisions.
The Group Solvency Issues (E) Working Group of the Financial Condition (E) Committee met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: Justin Schrader, Chair (NE); Doug Slape, Vice Chair (TX); Kathy Belfi and Michael Shanahan (CT); Virginia Christy and Carolyn Morgan (FL); Kim Cross and Mike Yanacheak (IA); Cindy Andersen and Eric Moser (IL); Roy Eft (IN); John Turchi (MA); Judy Weaver (MI); Shannon Schmoeger (MO); Marlene Caride (NJ); Stephen Doody (NY); Tim Biler and Dale Bruggeman (OH); Joe DiMemmo and Kimberly Rankin (PA); Doug Stolte (VA); and Amy Malm (WI).

1. Received an Update from the ORSA Implementation (E) Subgroup

Ms. Belfi provided an update of recent activities of the ORSA Implementation (E) Subgroup, which has not met since the Summer National Meeting but has been engaged in ongoing projects. She said the NAIC held its first Own Risk and Solvency Assessment (ORSA) Peer Review session in August, which was led by the Risk-Focused Surveillance (E) Working Group but supported by the Subgroup. She stated that she was able to attend the session as an observer. During the session, several sound practices and opportunities for improvement were identified for use in reviewing and incorporating ORSA work into ongoing analysis and examination processes. Ms. Belfi stated that Subgroup leadership has worked with NAIC staff to develop a state insurance regulator only ORSA Review Sound Practices document to share these takeaways with other states. In addition, as the session was very well received, the NAIC intends to conduct another ORSA Peer Review session in 2020 to allow other states to participate.

Ms. Belfi stated that in addition to its support for ORSA Peer Review work, the Subgroup has also been engaged in the development of guidance for use in reviewing and evaluating an insurer’s use of internal capital models. She said this guidance is not intended as a standard set of procedures to be performed at all ORSA filers, but it will instead be optional supporting guidance for those states that want to dig deeper into their insurers’ use of internal capital models. As such, the guidance is intended for use as a state insurance regulator-only tool, and it is being discussed and developed during regulator-to-regulator calls of the Subgroup. At this point, a first draft of guidance was developed and exposed for state insurance regulator comment. Comments were received from several states, and the proposed guidance is currently being revised to address comments received. Ms. Belfi stated that once a revised draft is developed, it will be reviewed by the Subgroup and approved for use as an optional state insurance regulator-only tool.

2. Heard a Report on IAIS Activities

Mr. Schrader provided a report on recent group-related activities of the International Association of Insurance Supervisors (IAIS), including the status of ongoing projects of the Insurance Groups Working Group. He said that now that the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) has been adopted, several supporting activities are underway at the IAIS to assist in implementation. A supervisory college workshop is in development to assist supervisors in learning best practices for use in conducting college sessions. Other related projects include the ongoing development of an aide memoire to assist in post-implementation review, as well as a frequently asked questions (FAQ) document for supervisors.

3. Discussed State Insurance Regulator Approach to ComFrame Implementation

Mr. Schrader stated that the Working Group will be receiving a significant new charge for 2020 related to ComFrame implementation. The IAIS adopted ComFrame on Nov. 14, which establishes supervisory standards and guidance focusing on the effective group-wide supervision of Internationally Active Insurance Groups (IAIGs). ComFrame is a comprehensive and outcome-focused framework aimed at facilitating effective group-wide supervision of IAIGs by providing qualitative and (in a future phase) quantitative supervisory minimum requirements tailored to the international activity and size of IAIGs. The intent of ComFrame is to help supervisors address group-wide risks and avoid supervisory gaps by supporting coordination across jurisdictions.
Mr. Schrader stated that ComFrame builds on, and expands upon, the high-level standards and guidance currently set out in the Insurance Core Principles (ICPs) of the IAIS, which generally apply on both an insurance legal entity and group-wide level. Consistent with the application of the ICPs, the minimum requirements established by ComFrame are expected to be implemented and applied in a proportionate manner. However, supervisors have the flexibility to tailor implementation of supervisory requirements and application of insurance supervision to achieve the outcomes described in ComFrame Standards.

Mr. Schrader stated that certain elements of ComFrame were incorporated into the 2014 revisions to the Insurance Holding Company System Regulatory Act (#440), which were developed by the Working Group. However, there have been a number of additions and enhancements to ComFrame since that time, which is why the Working Group is intended to receive the following charge for 2020: “Assess the IAIS Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) and make recommendations on its implementation in a manner appropriate for the U.S.”

Mr. Schrader stated that ComFrame requirements are quite broad and extensive, with elements included in 10 of the 25 ICPs, as well as the ICP Introduction and Assessment Methodology. He said that many of the key elements of ComFrame may already be incorporated into the U.S. system of state insurance regulation, at least partially; but it will be the Working Group’s assignment to identify other elements that may not yet be incorporated and discuss how to address them. He stated that the Working Group asked for comments on how to proceed with addressing this charge in 2020, and it received requests to speak on this topic from several interested parties.

Tom Finnell (America’s Health Insurance Plans—AHIP) stated his agreement that many of the ComFrame elements are already at least partially incorporated into the U.S. system of state-based regulation. In addition, while the ComFrame language and wording tends to emphasize or encourage a centralized approach to group management and oversight, he encouraged state insurance regulators to consider the introductory guidance and assessment methodology that allows for additional flexibility in applying oversight to different types of insurance groups. He stated that the guidance related to who is considered the head of an insurance group is very important, and it should be carefully considered in applying ComFrame concepts in the U.S.

Stephen Broadie (American Property Casualty Insurance Association—APCIA) stated that the language in the charge stating that ComFrame should be implemented “in a manner appropriate for the U.S.” is very important as new requirements should not be adopted or implemented if they do not make sense within the U.S. system of state-based insurance regulation. He also stated that ComFrame is designed to produce equivalent outcomes, but such outcomes can be achieved in different ways. As such, he encouraged state insurance regulators to not adopt ComFrame elements that would promote a prescriptive approach to company management and oversight.

Mariana Gomez-Vock (American Council of Life Insurers—ACLI) stated her support for an approach that identifies existing practices in the U.S. system that address ComFrame elements before identifying and addressing any gaps that may need to be considered.

Bill Schwegler (Transamerica) stated that he was speaking on behalf of several U.S. insurance groups, including Jackson National Life Insurance and Protective Live Insurance, that are subsidiaries of foreign-based groups that will be subject to ComFrame requirements imposed by their group-wide supervisors. Therefore, to ensure that these groups are not put at a disadvantage in U.S. ComFrame implementation, he recommended that state insurance regulators consider three important points. First, state insurance regulators should create an appropriate legal architecture to coordinate and share information across jurisdictions. Second, state insurance regulators should avoid placing additional requirements on IAIGs that are not specifically associated with their international activities. Third, as the distinction between IAIGs and other large insurers is not very significant in the U.S. market, state insurance regulators should avoid setting an inappropriate scope in implementing ComFrame requirements.

Mr. Shrader thanked interested parties for their comments, and he committed to hold implementation discussions in an open manner while keeping the interested party comments in mind. Ms. Belfi asked if the ComFrame guidance could be separated out from the ICPs and distributed to Working Group members for review. Mr. Schrader asked NAIC staff to extract the ComFrame elements from the ICPs and distribute the guidance to the Working Group. Mr. Schrader also asked NAIC staff to begin work on a document comparing ComFrame elements to existing practices in the U.S. system of state-based regulation for Working Group review.
4. **Discussed Other Matters**

Mr. Schrader said the Group Capital Calculation (E) Working Group has been discussing the need to revise the holding company models to allow for the collection of data associated with the calculation, and he has submitted a Request for NAIC Model Law Development to the Executive (EX) Committee for approval. He said that the Group Solvency Issues (E) Working Group will be involved in the project due to its role in overseeing Model #440.

Mr. Bruggeman stated that the Statutory Accounting Principles (E) Working Group exposed agenda item 2019-34 for public comment and would be asking the Working Group to review and provide comment on the proposed changes that are intended to clarify accounting and reporting requirements for related parties. As related parties are more difficult to appropriately identify and disclose in large insurance groups, the proposed revisions should be relevant to the Group Solvency Issues (E) Working Group.

Having no further business, the Group Solvency Issues (E) Working Group adjourned.
MEMORANDUM

TO: Financial Condition (E) Committee

FROM: NAIC Staff

DATE: November 15, 2019

RE: Examiners’ Suggested Salary

For its work in 2020, the Risk-Focused Surveillance (E) Working Group received the following charges from the Financial Condition (E) Committee:

Continually maintain and update standardized job descriptions/requirements and salary range recommendations for common solvency monitoring positions to assist insurance departments in attracting and maintaining suitable staff.

In 2019, the Working Group developed and referred Handbook revisions that would provide clearer compensation suggestions to both the Financial Analysis Solvency Tools (E) Working Group and the Financial Examiners Handbook (E) Technical Group. Both groups adopted their revisions earlier this year and will therefore include related guidance in 2020 editions of their respective Handbooks. The Working Group has also sent a referral to the Financial Regulation Standards and Accreditation (F) Committee to enhance consideration of Department compensation during the Accreditation review process. Those revisions were also adopted in 2019.

To avoid negatively impacting states that base compensation on the current Salary and Per Diem Guidelines, NAIC staff have continued to maintain the existing Handbook guidance on compensation which is being updated via this memorandum. NAIC staff also recommend that the Risk-Focused Surveillance (E) Working Group assume the responsibility to oversee development of updates to all compensation related guidance pursuant to the charge outlined above.

The Consumer Price Index (CPI), as defined by the U.S. Bureau of Labor Statistics (BLS), is a measure of the average change in prices of goods and services purchased by households over time. The CPI is based on prices of food, clothing, shelter, fuels, transportation fares, charges for doctors’ and dentists’ services, drugs, and other goods and services purchased for day-to-day living. In 2008, it was decided that because the CPI takes into consideration most costs incurred by the average household, it is reasonable that an increase in salary should be within the same parameters as the increase in the cost of living. It was therefore proposed, and that proposal accepted, that the CPI be used as a basis for examiner salary increases. In years in which the CPI does not accurately reflect market conditions, additional work—including surveys and salary studies—may be completed to ensure proper salary suggestions. Consistent with past years, inflation has continued to show modest increases in prices and appears appropriate as a metric on which to base a suggested compensation increase.

The following data table shows the average annual salary increases adopted in the previous five years as compared to the CPI, as well as the proposed increase for the following year. The information “as published by BLS” compares the CPI as of July of each year, consistent with the analysis performed in past years.
As shown above, in recent years, the rates suggested by the NAIC were consistently comparable to those published by the BLS, regardless of the method used.

Based upon the current CPI data available (July 2018–July 2019), the estimated annual change in CPI is approximately 1.81%. As such, if the Committee intends to base salary increases on changes in the CPI, we would recommend a 2% increase in all classification categories as shown below.

I. Preamble

Purpose

The revised Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the Credit for Reinsurance Models) require an assuming insurer to be licensed and domiciled in a “Qualified Jurisdiction” in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes. In 2012, the NAIC Reinsurance (E) Task Force was charged to develop an NAIC process to evaluate the reinsurance supervisory systems of non-U.S. jurisdictions, for the purposes of developing and maintaining a list of jurisdictions recommended for recognition by the states as Qualified Jurisdictions. This charge was extended in 2019 to encompass the recognition of Reciprocal Jurisdictions in accordance with the 2019 amendments to the Credit for Reinsurance Models, including the maintenance of a list of recommended Reciprocal Jurisdictions. The purpose of the Process for Developing and Maintaining the NAIC List of Evaluating Qualified and Reciprocal Jurisdictions is to provide a documented evaluation process for creating and maintaining these NAIC lists.

Background

On November 6, 2011, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions serve to reduce reinsurance collateral requirements for certified reinsurers that are licensed and domiciled in Qualified Jurisdictions. Under the previous version of the Credit for Reinsurance Models, in order for U.S. ceding insurers to receive reinsurance credit, the reinsurance was required to be ceded to U.S.-licensed reinsurers or secured by collateral representing 100% of U.S. liabilities for which the credit is recorded. When considering revisions to the Credit for Reinsurance Models, the Reinsurance (E) Task Force contemplated establishing an accreditation-like process, modeled on the current NAIC Financial Regulation Standards and Accreditation Program, to review the reinsurance supervisory systems of non-U.S. jurisdictions. Under the revised Credit for Reinsurance Models, the approval of Qualified Jurisdictions is left to the authority of the states; however, the models provide that a list of Qualified Jurisdictions will be created through the NAIC committee process, and that individual states must consider this list when approving jurisdictions.

The enactment in 2010 of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) created the Federal Insurance Office (FIO), which has the following authority: (1) coordinate federal efforts and develop federal policy on prudential aspects of international insurance matters; (2) assist the Secretary of the U.S. Department of the Treasury in negotiating covered agreements (as defined in the Dodd-Frank Act); (3) determine whether the states’ insurance measures are preempted by covered agreements; and (4) consult with the states (including state insurance regulators) regarding insurance matters of national importance and prudential insurance matters of international importance. Further, the Dodd-Frank Act authorizes the U.S. Treasury Secretary and the U.S. Trade Representative (USTR), jointly, to negotiate and enter into covered agreements on behalf of the United States. It is the NAIC’s intention to communicate and coordinate with the FIO and related federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.

On September 22, 2017, the United States and the European Union (EU) entered into the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance
collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.

**Reciprocal Jurisdictions**

On June 25, 2019, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions were intended to conform the Models to the relevant provisions of the Covered Agreements. The Covered Agreements would eliminate reinsurance collateral requirements for EU and UK reinsurers that maintain a minimum amount of own funds equivalent to $250 million and a solvency capital requirement (SCR) of 100% under Solvency II, among other conditions. Conversely, U.S. reinsurers that maintain capital and surplus equivalent to 226 million euros with a risk-based capital (RBC) of 300% of authorized control level would not be required to maintain a local presence in order to do business in the EU or UK or post reinsurance collateral. Under the revised Credit for Reinsurance Models, jurisdictions that are subject to in-force Covered Agreements are considered to be Reciprocal Jurisdictions, and reinsurers that have their head office or are domiciled in a Reciprocal Jurisdiction are not required to post reinsurance collateral if they meet all of the requirements of the Credit for Reinsurance Models.

Under the revised Credit for Reinsurance Models, not only are jurisdictions that are subject to Covered Agreements treated as Reciprocal Jurisdictions for reinsurance collateral purposes, but any other Qualified Jurisdictions can also qualify for collateral elimination as Reciprocal Jurisdictions. States that meet the requirements of the NAIC Financial Standards and Accreditation Program are also considered to be Reciprocal Jurisdictions.

The NAIC has updated and revised this *Process for Evaluating Qualified and Reciprocal Jurisdictions* to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.
II. Principles for the Evaluation of Non-U.S. Jurisdictions

1. The NAIC model revisions applicable to certified reinsurers are intended to facilitate cross-border reinsurance transactions and enhance competition within the U.S. market, while ensuring that U.S. insurers and policyholders are adequately protected against the risk of insolvency. To be eligible for certification, a reinsurer must be domiciled and licensed in a Qualified Jurisdiction as determined by the domestic regulator of the ceding insurer. A Qualified Jurisdiction not subject to an in-force Covered Agreement under the Dodd-Frank Act may also be determined to be a Reciprocal Jurisdiction, and reinsurers that have their head office or are domiciled in any such Reciprocal Jurisdiction will not be required to post reinsurance collateral, provided they meet the minimum capital and financial strength requirements and comply with the other requirements of the Credit for Reinsurance Models.

2. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions and Reciprocal Jurisdictions will be conducted in accordance with the provisions of the Credit for Reinsurance Models and any other relevant guidance developed by the NAIC.

3. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Financial Regulation Standards and Accreditation Program (Accreditation Program), adherence to international supervisory standards, and relevant international guidance for recognition of reinsurance supervision. It is not intended as a prescriptive comparison to the NAIC Accreditation Program. In order for a Qualified Jurisdiction that is not subject to an in-force Covered Agreement to be evaluated as a Reciprocal Jurisdiction, that Qualified Jurisdiction must agree to recognize the states’ approach to group supervision, including group capital, and other such requirements as provided under the Credit for Reinsurance Models.

4. The states shall evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the Qualified Jurisdiction, both initially and on an ongoing basis, and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of Qualified Jurisdiction status is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

5. Each state may evaluate a non-U.S. jurisdiction to determine if it is a Qualified Jurisdiction. A list of Qualified Jurisdictions will be published through the NAIC committee process. A state must consider this list in its determination of Qualified Jurisdictions, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Qualified Jurisdictions contained in the Credit for Reinsurance Models. The creation of this list does not constitute a delegation of regulatory authority to the NAIC. The regulatory authority to recognize a Qualified Jurisdiction resides solely in each state and the NAIC List of Qualified Jurisdictions is not binding on the states.

6. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models.
7. In order to facilitate multi-state recognition of assuming insurers and to encourage uniformity among the states, the NAIC has initiated a process called “passporting” under which the commissioner has the discretion to defer to another state’s determination that a jurisdiction is a Qualified or Reciprocal Jurisdiction. Passporting is based upon individual state regulatory authority, and states are encouraged to act in a uniform manner in order to facilitate the passporting process. States are also encouraged to utilize the passporting process to reduce the amount of documentation filed with the states and reduce duplicate filings. The NAIC Lists of Qualified and Reciprocal Jurisdictions are intended to facilitate the passporting process.

6-8. Both Qualified Jurisdictions and Reciprocal Jurisdictions must agree to share information and cooperate with the state with respect to all certified applicable reinsurers domiciled within that jurisdiction. Critical factors in the evaluation process include but are not limited to the history of performance by assuming insurers in the applicant jurisdiction and any documented evidence of substantial problems with the enforcement of final U.S. judgments in the applicant jurisdiction. A jurisdiction will not be a Qualified Jurisdiction if the commissioner has determined that it does not adequately and promptly enforce final U.S. judgments or arbitration awards.

7.9. The determination of Qualified Jurisdiction status can only be made with respect to the reinsurance supervisory system in existence and applied by a non-U.S. jurisdiction at the time of the evaluation.

8-10. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.
III. Procedure for Evaluation of Non-U.S. Jurisdictions

   a. The NAIC will initially evaluate and expedite the review of those jurisdictions that were approved by the states of Florida and New York prior to the adoption of the revised Credit for Reinsurance Models (i.e., Bermuda, Germany, Switzerland and the United Kingdom). The NAIC may also consider expediting the review of additional jurisdictions, as outlined in paragraph 1(d) below. While the same evaluation procedure and methodology will be applicable to any jurisdiction under review, U.S. state insurance regulators’ familiarity with these particular jurisdictions may lead to a more expeditious review. Subsequent priority will be on the basis of objective factors including but not limited to ceded premium volume and reinsurance capacity issues raised by the states. Priority will also be given to requests from the states and from those jurisdictions specifically requesting an evaluation by the NAIC.

   b. Formal notification of the NAIC’s intent to initiate the evaluation process will be sent by the NAIC to the reinsurance supervisory authority in the jurisdiction selected, with copies to the FIO and other relevant federal authorities as appropriate. The NAIC will issue public notice on the NAIC website upon confirmation that the jurisdiction is willing to participate in the evaluation process. The NAIC will at this time request public comments with respect to consideration of the jurisdiction as a Qualified Jurisdiction. The process of evaluation and all related documentation are private and confidential matters between the NAIC and the applicant jurisdiction, unless otherwise provided in this document, subject to a preliminary confidentiality and information sharing agreement between the NAIC, relevant states and the applicant jurisdiction.

   c. Relevant U.S. state and federal authorities will be notified of the NAIC’s decision to evaluate a jurisdiction.

   d. Expedited Review Procedure. Based on the prior review and approval by Florida and New York of reinsurers domiciled in Bermuda, Germany, Switzerland and the United Kingdom, the NAIC will apply an expedited review procedure with respect to these jurisdictions. The NAIC may also consider extending this expedited review procedure to other jurisdictions approved by a state as a Qualified Jurisdiction, provided that:

      i. The state provides a report to the Qualified Jurisdiction Working Group confirming that it has completed a full review of the jurisdiction in accordance with that set forth in Part IV: Evaluation Methodology. If current information as outlined in paragraph 1(e)(i) (i.e., FSAP Report and ROSC) is not available to the state, it must demonstrate that it has obtained and reviewed information consistent with Appendix A and Appendix B.

      ii. The state completes the full review and lists the jurisdiction as a Qualified Jurisdiction within 60 days of the NAIC’s adoption of the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions.

This procedure is not intended to eliminate or reduce any element provided under Part IV: Evaluation Methodology, but is intended to allow for a designation of Conditional Qualified Jurisdiction of these jurisdictions in order to facilitate the certification of reinsurers domiciled therein. Final qualification of each jurisdiction will be contingent upon completion of the full, outcomes-based evaluation procedure.
Upon confirmation that a jurisdiction is willing to be considered for designation as a Conditional Qualified Jurisdiction, the following expedited review procedure will apply:

i. The Qualified Jurisdiction Working Group will perform an initial review of the jurisdiction’s most recent Detailed Assessment of Observance on Insurance Core Principles under the International Monetary Fund (IMF)/World Bank Financial Sector Assessment Program (FSAP Report), Report on Observance for Standards and Codes (ROSC), and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system in conjunction with the information provided under Section C through Section G of the Evaluation Methodology. The NAIC will invite each jurisdiction (or its designee) to provide information relative to Section C through Section G of the Evaluation Methodology in order to complete or supplement publicly available information. The NAIC may designate the jurisdiction as a Conditional Qualified Jurisdiction, to be effective immediately, upon: (1) receipt of all necessary initial information requested in this section; (2) opportunity for comment by interested parties; and (3) conclusion of any appropriate communication with the FIO, USTR and other relevant federal authorities.

ii. During this period as a Conditional Qualified Jurisdiction, the Qualified Jurisdiction Working Group will complete its full analysis of the information provided by the jurisdiction, in addition to any specific information that is subsequently requested by the NAIC, in order to evaluate the jurisdiction’s laws, regulations, practices and procedures from an outcomes-based perspective in accordance with the guidance provided under Appendix A and Appendix B of the Evaluation Methodology. Upon satisfactory completion of the outcomes-based review of this information, the NAIC may upgrade the jurisdiction’s designation to Qualified Jurisdiction. The NAIC may also address any issues identified within the review or revoke the designation of Conditional Qualified Jurisdiction.

iii. A jurisdiction may be permitted to maintain the designation of Conditional Qualified Jurisdiction for one year, unless: (1) an extension is granted by the Qualified Jurisdiction Working Group; or (2) a determination is made that the jurisdiction is not a Qualified Jurisdiction.

2. Evaluation of Jurisdiction

a. Evaluation Materials. The Qualified Jurisdiction Working Group will initiate evaluation of a jurisdiction’s regulatory system by using the information identified in Section A through Section G of the Evaluation Methodology (Evaluation Materials). The Qualified Jurisdiction Working Group will begin by undertaking a review of the most recent Financial Sector Assessment Program (FSAP) Report, prepared by the International Monetary Fund (IMF), including the Technical Note on Insurance Sector Supervision, ROSC and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Qualified Jurisdiction Working Group will also invite each jurisdiction or its designee to provide information relative to Section A through Section G of the Evaluation Methodology in order to update, complete or supplement publicly available information. The Qualified Jurisdiction Working Group may also request or accept relevant information from reinsurers domiciled in the jurisdiction under review.

b. The Qualified Jurisdiction Working Group will notify the jurisdiction of any information upon which the Working Group is relying—that was not otherwise provided by the jurisdiction. In that communication, the NAIC will invite the supervisory authority to compare the materials identified by the NAIC to the materials...
described in Appendix A and Appendix B, and provide information required to update the identified public information or supplement the public information, as required, to address the topics identified in Section G of the Evaluation Methodology. The use of publicly available information (e.g., the FSAP Report and/or the ROSECInsurance Sector Technical Note) is intended to lessen the burden on applicant jurisdictions by requiring the production of information that is readily available, while still addressing substantive areas of inquiry detailed in the Evaluation Methodology. The Qualified Jurisdiction Working Group’s review at this stage will be focused on how the jurisdiction’s laws, regulations, administrative practices and procedures, and regulatory authorities regulate the financial solvency of its domestic reinsurers in comparison to key principles underlying the U.S. financial solvency framework\(^{1}\) and other factors set forth in the Evaluation Methodology.

c. After reviewing the Evaluation Materials, the Qualified Jurisdiction Working Group may request that the applicant jurisdiction submit supplemental information as necessary to determine whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. The Working Group will address specific questions directly with the jurisdiction related to items detailed in the Evaluation Methodology that are not otherwise addressed in the Evaluation Materials.

d. The NAIC will request that all responses from the jurisdiction being evaluated be provided in English. Any responses submitted with respect to a jurisdiction’s laws and regulations should be provided by a person qualified in that jurisdiction to provide such analyses and, in the case of statutory analysis, qualified to provide such legal interpretations, to ensure that the jurisdiction is providing an accurate description.

e. The NAIC does not intend to review confidential company-specific information in this process, and has focused the procedure on reviewing publicly available information. No confidential company-specific information shall be disclosed or disseminated during the course of the jurisdiction’s evaluation unless specifically requested, subject to appropriate confidentiality safeguards addressed in a preliminary confidentiality and information-sharing agreement. If no such agreement is executed or the jurisdiction is unable to enter into such an agreement under its regulatory authority, the NAIC will not accept any confidential company-specific information.

### 3. NAIC Review of Evaluation Materials

a. NAIC staff and/or outside consultants with the appropriate knowledge, experience and expertise will review the jurisdiction’s Evaluation Materials.

b. Expenses with respect to the evaluations will be absorbed within the NAIC budget. This will be periodically reviewed.

c. Timeline for review. A project management approach will be developed with respect to the overall timeline applicable to each evaluation.

d. Upon completing its review of the Evaluation Materials, the internal reviewer(s) will report initial findings to the Qualified Jurisdiction Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation. Copies of the initial findings may also be made available to FIO and other relevant federal authorities subject to appropriate confidentiality and information-sharing agreements being in place.

---

\(^{1}\) The U.S. financial solvency framework is understood to refer to the key elements provided in the NAIC Financial Regulation Standards and Accreditation Program. Appendix A and Appendix B are derived from this framework.
4. Discretionary On-site Review

a. The NAIC may request or ask the jurisdiction under consideration for the opportunity to perform an on-site review of the jurisdiction’s reinsurance supervisory system. Factors that the Qualified Jurisdiction Working Group will consider in determining whether an on-site review is appropriate include the completeness of the information provided by the jurisdiction under review, the general familiarity of the jurisdiction by the NAIC staff or other state regulators participating in the review based on prior conduct or dealings with the jurisdiction, and the results of other evaluations performed by other regulatory or supervisory organizations. If the review is performed, it will be coordinated through the NAIC, utilizing personnel with the appropriate knowledge, experience and expertise. Individual states may also request that representatives from their state be added to the review team.

b. The review team will communicate with the supervisory authority in advance of the on-site visit to clearly identify the objectives, expectations and procedures with respect to the review, as well as any significant issues or concerns identified within the review of the Evaluation Materials. Information to be considered during the on-site review includes, but is not limited to, the following:
   i. Interviews with supervisory authority personnel.
   ii. Review of organizational and personnel practices.
   iii. Any additional information beneficial to gaining an understanding of document and communication flows.

c. Upon completing the on-site review, the reviewer(s) will report initial findings to the Qualified Jurisdiction Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation.

5. Standard of Review

The evaluation is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction, that the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system, and that the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

6. Additional Information to be Considered as Part of Evaluation

The NAIC may also consider information from sources other than the jurisdiction under review. This information includes:

a. Documents, reports and information from appropriate international, U.S. federal and U.S. state authorities.

b. Public comments from interested parties.

c. Rating agency information.

d. Any other relevant information.
7. Preliminary Evaluation Report

a. NAIC staff and/or outside consultants will prepare a Preliminary Evaluation Report for review by the Qualified Jurisdiction Working Group. This preliminary report will be private and confidential (i.e., may only be reviewed by Working Group members, designated NAIC staff, consultants, the states, the FIO and other relevant federal authorities that specifically request to be kept apprised of this information, provided that such entities have entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction. Any outside consultants retained by the NAIC will be required to enter into a confidentiality and nondisclosure agreement.).

b. The report will be prepared in a consistent style and format to be developed by NAIC staff. It will contain detailed advisory information and recommendations with respect to the evaluation of the jurisdiction’s reinsurance supervisory system and the documented practices and procedures thereunder. The report will contain a recommendation as to whether the NAIC should recognize the jurisdiction as a Qualified Jurisdiction.

c. All workpapers and reports, including supporting documentation and data, produced as part of the evaluation process are the property of the NAIC and shall be maintained at the NAIC Central Office. In the event that the NAIC shall come into possession of any confidential information, the information shall be held subject to a confidentiality and information-sharing agreement, which will outline the appropriate actions necessary to protect the confidentiality of such information.

a. The Qualified Jurisdiction Working Group’s review of the Preliminary Evaluation Report will be held in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings.

b. The Qualified Jurisdiction Working Group will make a preliminary determination as to whether the jurisdiction under consideration satisfies the Standard of Review and is deemed acceptable to be included on the NAIC List of Qualified Jurisdictions. If the preliminary determination is that the jurisdiction should not be included on the NAIC List of Qualified Jurisdictions, the Qualified Jurisdiction Working Group will set forth its specific findings and identify those areas of concern with respect to this determination.

c. The results of the Preliminary Evaluation Report will be immediately communicated in written form to the supervisory authority of the jurisdiction under review.

a. Upon receipt of the Preliminary Evaluation Report, the supervisory authority will have an opportunity to respond to the initial findings and determination. This is not intended to be a formal appeals process that would initiate U.S. state administrative due process requirements.

b. The Qualified Jurisdiction Working Group will consider any response, and will proceed to prepare its Final Evaluation Report. The Qualified Jurisdiction Working Group will consider the Final Evaluation Report for approval in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings. This report will be approved upon an affirmative vote of a majority of the members in attendance at this meeting.
c. Upon approval of the Final Evaluation Report, the Qualified Jurisdiction Working Group will issue a public statement and a summary of its findings with respect to its determination. At this time, the Working Group will release the summary for public comment. The detailed report will be a confidential, regulator-only document. The report may be shared with any state indicating that it is considering relying on the NAIC List of Qualified Jurisdictions and has entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction.

10. NAIC Determination regarding List of Qualified Jurisdictions

a. Once the Qualified Jurisdiction Working Group has adopted its Final Evaluation Report, it will submit the summary of its findings and its recommendation to the Reinsurance (E) Task Force at an open meeting. Upon approval by the Reinsurance (E) Task Force, the summary and recommendation will be submitted to the Executive (EX) Committee and Plenary, as well as to the FIO, USTR and other relevant federal authorities for consultation purposes. Upon approval as a Qualified Jurisdiction by the Executive (EX) Committee and Plenary, the jurisdiction will be added to the NAIC List of Qualified Jurisdictions. The NAIC will maintain the List of Qualified Jurisdictions on its public website and in other appropriate NAIC publications.

b. In the event that a jurisdiction is not approved as a Qualified Jurisdiction, the supervisory authority will be eligible for reapplication at the discretion of the NAIC.

c. Upon final adoption of the Qualified Jurisdiction Working Group’s determination with respect to a jurisdiction, the Final Evaluation Report will be made available to individual U.S. state insurance regulators upon request and confirmation that the information contained therein will remain confidential.

11. Memorandum of Understanding (MOU)

a. A Qualified Jurisdiction must agree to share information and cooperate on a confidential basis with the U.S. state insurance regulatory authority with respect to all certified reinsurers domiciled within that jurisdiction.

b. The International Association of Insurance Supervisors (IAIS) Multilateral Memorandum of Understanding (MMoU) is the recommended method under which a Qualified Jurisdiction will agree to share information and cooperate with U.S. state insurance regulatory authorities. However, until such time as a state has been approved as a signatory to the MMoU by the IAIS, the such state may rely on an MOU entered into by a “Lead State” designated by the NAIC. This Lead State will act as a conduit for information between the Qualified Jurisdiction and other states that have certified a reinsurer domiciled and licensed in that jurisdiction, and will share information with these states consistent with the terms governing the further sharing of information included in the applicable IAIS MMoU or bilateral MOU between the Lead State and the Qualified Jurisdiction and pursuant to the NAIC Master Information Sharing and Confidentiality Agreement. The jurisdiction must also confirm in writing that it is willing to permit this Lead State to act as the contact for purposes of obtaining information concerning its certified reinsurers, provided the Lead State share that information with the other states requesting the information consistent with the terms governing the further sharing of information included in the applicable IAIS MMoU or bilateral MOU between the Lead State and the Qualified Jurisdiction.
c. If a Qualified Jurisdiction has not been approved by the IAIS for use of the MMoU, it must enter into an MOU with a Lead State. The MOU will also provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions.

d. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.

12. Process for Periodic Evaluation after Initial Approval

a. The process for determining whether a non-U.S. jurisdiction is a Qualified Jurisdiction is ongoing and subject to periodic review. The Qualified Jurisdiction Working Group will perform a yearly review of Qualified Jurisdictions to determine whether there have been any significant changes over the prior year that might affect their status as Qualified Jurisdictions. This yearly review shall follow such abbreviated process as may be determined by the Qualified Jurisdiction Working Group to be appropriate.

b. Qualified Jurisdictions must provide the Qualified Jurisdiction Working Group with notice of any material change in the applicable reinsurance supervisory system that may affect the status of the Qualified Jurisdiction. A U.S. jurisdiction should also notify the Qualified Jurisdiction Working Group if it receives notice of any material change in the applicable reinsurance supervisory system, or any adverse developments with respect to enforcement of final U.S. judgments, that may affect the status of the Qualified Jurisdiction. Upon receipt of any such notice, the Qualified Jurisdiction Working Group will consider whether it is necessary to re-evaluate the status of the Qualified Jurisdiction.

e. Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate.

d-e. If the Qualified Jurisdiction Working Group finds the jurisdiction to be out of compliance at any time with the requirements to be a Qualified Jurisdiction, the specific reasons will be documented in a report to the jurisdiction under review, and the status as a Qualified Jurisdiction may be placed on probation, suspended or revoked.

e-d. The Qualified Jurisdiction Working Group will monitor those jurisdictions that have been approved as Qualified Jurisdictions by individual states, but are not included on the NAIC List of Qualified Jurisdictions.

13. Review of Qualified Jurisdictions as Reciprocal Jurisdictions

a. In undertaking the evaluation of a Qualified Jurisdiction as a Reciprocal Jurisdiction, the Qualified Jurisdiction Working Group shall utilize such processes and procedures as outlined in the immediately-preceding paragraphs 1 – 12 of Section III. Procedure for Evaluation of Non-U.S. Jurisdictions such as the Qualified Jurisdiction Working Group deems is appropriate. Specifically, the Qualified Jurisdiction Working Group will use processes and procedures outlined in paragraph 1 (Initiation of Evaluation of the Reinsurance Supervisory System of an Individual Jurisdiction), paragraph 3 (NAIC Review of Evaluation Materials), paragraph 7 (Preliminary Evaluation Report), paragraph 8 (Review of Preliminary Evaluation Report), paragraph 9 (Opportunity to Respond to Preliminary Evaluation Report), paragraph 10 (NAIC Determination regarding List of Qualified Jurisdictions), paragraph 11 (Memorandum of Understanding) and paragraph 12 (Process for Evaluation after Initial Approval), as modified for use with Reciprocal Jurisdictions.
b. A Qualified Jurisdiction may not be reviewed for inclusion on the NAIC List of Reciprocal Jurisdictions, unless it has undergone the Evaluation Methodology outlined in Section IV, and remains in good standing with the NAIC as a Qualified Jurisdiction. The Qualified Jurisdiction Working Group may, if it determines an extended review period to be appropriate after its initial approval of a new Qualified Jurisdiction, defer consideration of that jurisdiction as a possible Reciprocal Jurisdiction until there has been sufficient United States experience with that jurisdiction and its Certified Reinsurers that the Working Group believes it is appropriate to progress from collateral reduction to collateral elimination. Nothing in this process requires a finding that a Qualified Jurisdiction meets the standards for recognition as a Reciprocal Jurisdiction, and the Qualified Jurisdiction Working Group may base such recommendation on factors not specifically included in this process.

c. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the NAIC List of Reciprocal Jurisdictions. In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the NAIC List of Reciprocal Jurisdictions, the Qualified Jurisdiction Working Group shall undertake the following analysis in making its evaluation:

   i. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in that jurisdiction is received by United States ceding insurers;

   ii. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

   iii. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the Qualified Jurisdiction;

   iv. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC. This requirement may be satisfied by an MOU with a Lead State,
which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

v. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in Section 9C(2) and (3) of Model #786; i.e., must maintain minimum capital and surplus of no less than $250,000,000, and maintains on an ongoing basis the required minimum solvency or capital ratio, as applicable.

d. In order to satisfy the requirements of subsection (c) above, the chief insurance supervisor of the Qualified Jurisdiction being evaluated as a Reciprocal Jurisdiction may provide the NAIC with a written letter confirming, as follows:

[Jurisdiction] is a Qualified Jurisdiction under the NAIC Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786), and is currently in good standing on the NAIC List of Qualified Jurisdictions. As the lead insurance regulatory supervisor for [Jurisdiction], I hereby confirm to the National Association of Insurance Commissioners (NAIC) and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories the following:

- An insurer which has its head office or is domiciled in [Jurisdiction] shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in [Jurisdiction] is received by United States ceding insurers. [Jurisdiction] does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by [Jurisdiction] or as a condition to allow the ceding insurer to recognize credit for such reinsurance.

- [Jurisdiction] recognizes the U.S. state regulatory approach to group supervision and group capital, and confirms that insurance groups that are domiciled or maintain their worldwide headquarters in jurisdictions accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the [Jurisdiction].

- [Jurisdiction] confirms that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the [Jurisdiction].

- [Jurisdiction] will annually provide to the states confirmation that applicable assuming insurers domiciled in [Jurisdiction] maintain minimum capital and surplus of no less than $250,000,000, and maintain on an ongoing basis the required minimum solvency or capital ratio, as applicable.
Finally, I confirm that [Jurisdiction] will immediately notify the NAIC upon any changes to the assurances provided in this letter.

e. The Qualified Jurisdiction Working Group will perform a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate, and will prepare for the review by the Reinsurance Task Force a Summary of Findings and Determination recommending that the Qualified Jurisdiction be recognized as a Reciprocal Jurisdiction. Upon approval by the Task Force, the Summary of Findings and Determination must be adopted by a vote of the NAIC Executive (EX) Committee and Plenary for inclusion on the List of Reciprocal Jurisdictions.

f. The Qualified Jurisdiction Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable equivalency assessment conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

g. Except for Reciprocal Jurisdictions entitled to automatic recognition, a jurisdiction’s status as a Reciprocal Jurisdiction may be placed on probation, suspended or revoked for good cause in the same manner as provided for Qualified Jurisdictions under paragraph 12. If cause is found to question the fitness of a Reciprocal Jurisdiction that is subject to an in-force covered agreement, or its compliance with applicable requirements of the covered agreement, the Qualified Jurisdiction Working Group would report any concerns to its parent Task Force for further discussion and communication with appropriate federal and/or international authorities.
IV. Evaluation Methodology

The Evaluation Methodology was developed to be consistent with the provisions of the NAIC Credit for Reinsurance Models. It is intended to provide an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. Although the methodology includes a comparison of the jurisdiction’s supervisory system to a number of key elements from the NAIC Accreditation Program, it is not intended as a prescriptive assessment under the NAIC Accreditation Program. Rather, the NAIC Accreditation Program simply provide the framework for the outcomes-based analysis. The NAIC will evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the jurisdiction and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of a Qualified Jurisdiction is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

The Evaluation Methodology consists of the following:

- Section A: Laws and Regulations
- Section B: Regulatory Practices and Procedures
- Section C: Jurisdiction’s Requirements Applicable to U.S.-Domiciled Reinsurers
- Section D: Regulatory Cooperation and Information Sharing
- Section E: History of Performance of Domestic Reinsurers
- Section F: Enforcement of Final U.S. Judgments
- Section G: Solvent Schemes of Arrangement

This information will be the basis for the Final Evaluation Report and the determination of whether the jurisdiction will be included on the NAIC List of Qualified Jurisdictions.
Section A: Laws and Regulations

The NAIC will review publicly available information, as well as information provided by an applicant jurisdiction with respect to its laws and regulations, in an effort to evaluate whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. This will include a review of elements believed to be basic building blocks for sound insurance/reinsurance regulation. A jurisdiction’s effectiveness under Section A may be demonstrated through law, regulation or established practice that implements the general authority granted to the jurisdiction, or any combination of laws, regulations or practices that meet the objective.

The Qualified Jurisdiction Working Group will initiate evaluation of a jurisdiction’s regulatory system by gathering and undertaking a review of the most recent FSAP Report, ROSC and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Qualified Jurisdiction Working Group will simultaneously invite each jurisdiction (or its designee) to provide information relative to Section A (and other sections, as relevant) to assist the NAIC in evaluating its laws and regulations. The NAIC will review this information in conjunction with Appendix A, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix A is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction is requested to address the following information, which the NAIC will consider, at a minimum, in determining whether the outcomes achieved by the jurisdiction’s laws and regulations meet an acceptable level of effectiveness for the jurisdiction to be included on the NAIC List of Qualified Jurisdictions:

1. Confirmation of the jurisdiction’s most recent FSAP Report, including relevant updates with respect to descriptions or elements of the FSAP Report in which changes have occurred since the assessment or where information might otherwise be outdated.

2. Confirmation of the jurisdiction’s ROSC, including relevant updates with respect to descriptions or elements of the ROSC in which changes have occurred since the report was completed or where information might otherwise be outdated.

3. If materials responsive to the topics under review have been provided in response to information exchanges between the jurisdiction under review and the NAIC, such prior responses may be cross-referenced provided updates are submitted, if required to address changes in laws or procedures.

4. Any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix A.

The NAIC will review the information provided by the applicant jurisdiction and determine whether it is adequate to reasonably conclude whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. After reviewing the initial submission, the NAIC may request that the applicant jurisdiction

---

2 The basic considerations under this section are derived from Model #786, Section 8C(2), which include: (a) the framework under which the assuming reinsurer is regulated; (b) the structure and authority of the jurisdiction’s reinsurance supervisory authority with regard to solvency regulation requirements and financial surveillance; (c) the substance of financial and operating standards for reinsurers domiciled in the jurisdiction; and (d) the form and substance of financial reports required to be filed or made publicly available by reinsurers domiciled in the jurisdiction and the accounting principles used.
submit supplemental information as necessary in order to make this determination. An applicant jurisdiction is strongly encouraged to provide thorough, detailed and current information in its initial submission in order to minimize the number and extent of supplemental information requests from the NAIC with respect to Section A of this Evaluation Methodology. The NAIC will provide a complete description in the Final Evaluation Report of the information provided in the Evaluation Materials, and any updates or other information that have been provided by the applicant jurisdiction.

Section B: Regulatory Practices and Procedures

Section B is intended to facilitate an evaluation of whether the jurisdiction effectively employs baseline regulatory practices and procedures to supplement and support enforcement of the jurisdiction’s financial solvency laws and regulations described in Section A. This evaluation methodology recognizes that variation may exist in practices and procedures across jurisdictions due to the unique situations each jurisdiction faces. Jurisdictions differ with respect to staff and technology resources that are available, as well as the characteristics of the domestic industry regulated. A determination of effectiveness may be achieved using various financial solvency oversight practices and procedures. This evaluation is not intended to be prescriptive in nature.

The NAIC will utilize the information provided by the jurisdiction as outlined under Section A in completing this section of the evaluation. The NAIC will review this information in conjunction with Appendix B, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix B is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction should also provide any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix B.

Section C: Jurisdiction’s Requirements Applicable to U.S. Domiciled Reinsurers

The jurisdiction is requested to describe and explain the rights, benefits and the extent of reciprocal recognition afforded by the non-U.S. supervisory authority to reinsurers licensed and domiciled in the U.S.

Section D: Regulatory Cooperation and Information-Sharing

The Credit for Reinsurance Models require the supervisory authority to share information and cooperate with the U.S. state insurance regulators with respect to all certified reinsurers domiciled within their jurisdiction. The jurisdiction is requested to provide an explanation of the supervisory authority’s ability to cooperate, share information and enter into an MOU with U.S. state insurance regulators and confirm that they are willing to enter into an MOU. This should include information with respect to any existing MOU with U.S. state and/or federal authorities that pertain to reinsurance. Both the jurisdiction and the states may rely on the IAIS MMoU to satisfy this requirement, and any states that have not yet been approved by the IAIS as a signatory to the MMoU may rely on an MOU entered into by a Lead State with the jurisdiction until such time that the state has been approved as a signatory to the IAIS MMoU. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.
Section E: History of Performance of Domestic Reinsurers

The jurisdiction is requested to provide a general description with respect to the historical performance of reinsurers domiciled in the jurisdiction. The NAIC does not intend to review confidential company-specific information under this section. Rather, it is intended that any information provided would be publicly available, unless specifically addressed with the jurisdiction under review. This discussion should address, at a minimum, the following information:

a. Number of reinsurers domiciled in the jurisdiction, and a list of any reinsurers domiciled in the jurisdiction that have and maintain, on an ongoing basis, minimum capital and surplus, or its equivalent, of no less than $250,000,000.

b. Up to a 10-year history of any regulatory actions taken against specific reinsurers.

c. Up to a 10-year history listing any reinsurers that have gone through insolvency proceedings, including the size of each insolvency and a description of the related outcomes (e.g., reinsurer rehabilitated or liquidated, payout percentage of claims to priority classes, payout percentage of claims to domestic and foreign claimants).

d. Up to a 10-year history of any significant industry-wide fluctuations in capital or profitability with respect to domestic reinsurers.

Drafting Note: The NAIC will determine the appropriate time period for review on a case-by-case basis with respect to this information.

Section F: Enforcement of Final U.S. Judgments

The NAIC has previously collected information from a number of jurisdictions with respect to enforcement of final U.S. judgments. The jurisdiction is also requested to provide a current description or explanation of any restrictions with respect to the enforcement of final foreign judgments in the jurisdiction. Based on the foregoing information, the NAIC will make an assessment of the effectiveness of the ability to enforce final U.S. judgments in the jurisdiction. This will include a review of the status, interpretations, application and enforcement of various treaties, conventions and international agreements with respect to final judgments, arbitration and choice of law. The Qualified Jurisdiction Working Group will monitor the enforcement of final U.S. judgments and the Qualified Jurisdiction is requested to notify the NAIC of any developments in this area.

Section G: Solvent Schemes of Arrangement

The jurisdiction is requested to provide a description of any legal framework that allows reinsurers domiciled in the jurisdiction to propose or participate in any solvent scheme of arrangement or similar procedure. In addition, the jurisdiction is requested to provide a description of any solvent scheme of arrangement or similar procedure that a domestic reinsurer has proposed or participated in and the outcome of such procedure.
V. Appendices: Specific Guidance with Respect to Section A and Section B

It is important to note that Part IV, Section A: Laws and Regulations, and Part IV, Section B: Regulatory Practices and Procedures, are derived from the NAIC Financial Regulation Standards and Accreditation Program, which is intended to establish and maintain standards to promote sound insurance company financial solvency regulation among the U.S. states. As such, the NAIC Accreditation Program requires the states to employ laws, regulations and administrative policies and procedures substantially similar to the NAIC accreditation standards in order to be considered an accredited state.

However, it is not the intent of the Evaluation Methodology to require applicant jurisdictions to meet the standards required by the NAIC for accreditation. Instead, Section A and Section B (and their corresponding appendices) are intended to provide a framework to facilitate an outcomes-based evaluation by the NAIC and state insurance regulators of the effectiveness of the jurisdiction’s supervisory authority. This framework consists of a description of the jurisdiction’s laws, regulations, practices and procedures applicable to the supervision of its domestic reinsurers. The amount of detail provided within these appendices should not be interpreted as specific requirements that must be met by the applicant jurisdiction. Rather, the information is intended to provide direction to the applicant jurisdiction in an effort to facilitate a complete response and increase the efficiency and timeliness of the evaluation process.
Appendix A: Laws and Regulations

1. Examination Authority

Does the jurisdiction have the authority to examine its domestic reinsurers? This description should address the following:

a. Frequency and timing of examinations and reports.

b. Guidelines for examination.

c. Whether the jurisdiction has the authority to examine reinsurers whenever it is deemed necessary.

d. Whether the jurisdiction has the authority to have complete access to the reinsurer’s books and records and, if necessary, the records of any affiliated company.

e. Whether the jurisdiction has the authority to examine officers, employees and agents of the reinsurer when necessary with respect to transactions directly or indirectly related to the reinsurer under examination.

f. Whether the jurisdiction has the authority to share confidential information with U.S. state insurance regulatory authorities, provided that the recipients are required, under their law, to maintain its confidentiality.

2. Capital and Surplus Requirement

Does the jurisdiction have the authority to require domestic reinsurers to maintain a minimum level of capital and surplus to transact business? This description should address the following:

a. Whether the jurisdiction has the authority to require reinsurers to maintain minimum capital and surplus, including a description of such minimum amounts.

b. Whether the jurisdiction has the authority to require additional capital and surplus based on the type, volume and nature of reinsurance business transacted.

c. Capital requirements for reinsurers, including reports and a description of any specific levels of regulatory intervention.

3. Accounting Practices and Procedures

Does the jurisdiction have the authority to require domestic reinsurers to file appropriate financial statements and other financial information? This description should address the following:

a. Description of the accounting and reporting practices and procedures.

b. Description of any standard financial statement blank/reporting template, including description of content/disclosure requirements and corresponding instructions.

4. Corrective Action

Does the jurisdiction have the authority to order a reinsurer to take corrective action or cease and desist certain practices that, if not corrected or terminated, could place the reinsurer in a hazardous financial condition? This description should address the following:

a. Identification of specific standards which may be considered to determine whether the continued operation of the reinsurer might be hazardous to the general public.

b. Whether the jurisdiction has the authority to issue an order requiring the reinsurer to take corrective action when it has been determined to be in hazardous financial condition.
5. Regulation and Valuation of Investments

What authority does the jurisdiction have with respect to regulation and valuation of investments? This description should address the following:

a. Whether the jurisdiction has the authority to require a diversified investment portfolio for all domestic reinsurers as to type, issue and liquidity.

b. Whether the jurisdiction has the authority to establish acceptable practices and procedures under which investments owned by reinsurers must be valued, including standards under which reinsurers are required to value securities/investments.

6. Holding Company Systems

Does the jurisdiction have laws or regulations with respect to supervision of the group holding company systems of reinsurers? This description should address the following:

a. Whether the jurisdiction has access to information via the parent or other regulated group entities about activities or transactions within the group involving other regulated or non-regulated entities that could have a material impact on the operations of the reinsurer.

b. Whether the jurisdiction has access to consolidated financial information of a reinsurer’s ultimate controlling person.

c. Whether the jurisdiction has the authority to review integrity and competency of management.

d. Whether the jurisdiction has approval and intervention powers for material transactions and events involving reinsurers.

e. Whether the jurisdiction has authority to monitor, or has prior approval authority over:

   i. Change in control of domestic reinsurers.

   ii. Dividends and other distributions to shareholders of the reinsurer.

   iii. Material transactions with affiliates.

7. Risk Management

Does the jurisdiction have the authority to require its domestic reinsurers to maintain an effective risk-management function and practices? This description should address the following:

a. Whether the jurisdiction has Own Risk and Solvency Assessment (ORSA) requirements and reporting.

b. Any requirements regarding the maximum net amount of risk to be retained by a reinsurer for an individual risk based on the reinsurer’s capital and surplus.

c. Whether the jurisdiction has authority to monitor enterprise risk, including any activity, circumstance, event (or series of events) involving one or more affiliates of a reinsurer that, if not remedied promptly, is likely to have a material adverse effect on the financial condition or liquidity of the reinsurer or its insurance holding company system as a whole.

d. Whether the jurisdiction has corporate governance requirements for reinsurers.
8. **Liabilities and Reserves**

Does the jurisdiction have standards for the establishment of liabilities and reserves (technical provisions) resulting from reinsurance contracts? This description should address the following:

a. Liabilities incurred under reinsurance contracts for policy reserves, unearned premium, claims and losses unpaid, and incurred but not reported (IBNR) claims (including whether discounting is allowed for reserve calculation/reporting).

b. Liabilities related to catastrophic occurrences.

c. Whether the jurisdiction requires an opinion on reserves and loss and loss adjustment expense reserves by a qualified actuary or specialist for all domestic reinsurers, and the frequency of such reports.

9. **Reinsurance Ceded**

What are the jurisdiction’s requirements with respect to the financial statement credit allowed for reinsurance retroceded by its domestic reinsurers? This description should address the following:

a. Credit for reinsurance requirements applicable to reinsurance retroceded to domestic and non-domestic reinsurers.

b. Collateral requirements applicable to reinsurance contracts.

c. Whether the jurisdiction requires a reinsurance agreement to provide for insurance risk transfer (i.e., transfer of both underwriting and timing risk).

d. Requirements applicable to special purpose reinsurance vehicles and insurance securitizations.

e. Affiliated reinsurance transactions and concentration risk.

f. Disclosure requirements specific to reinsurance transactions, agreements and counterparties, if such information is not provided under another item.

10. **Independent Audits**

Does the jurisdiction require annual audits of domestic reinsurers by independent certified public accountants or similar accounting/auditing professional recognized in the applicant jurisdiction? This description should address the following:

a. Requirements for the filing of audited financial statements prepared in conformity with accounting practices prescribed or permitted by the supervisory authority.

b. Contents of annual audited financial reports.

c. Requirements for selection of auditor.

d. Allowance of audited consolidated or combined financial statements.

e. Notification of material misstatements of financial condition.

f. Supervisor’s access to auditor’s workpapers.

g. Audit committee requirements.

h. Requirements for reporting of internal control-related matters.

11. **Receivership**

Does the jurisdiction have a receivership scheme for the administration of reinsurers found to be insolvent? This should include a description of any liquidation priority afforded to policyholders and the liquidation priority of
reinsurance obligations to domestic and non-domestic ceding insurers in the context of an insolvency proceeding of a reinsurer.

12. Filings with Supervisory Authority

Does the jurisdiction require the filing of annual and interim financial statements with the supervisory authority? This description should address the following:

a. The use of standardized financial reporting in the financial statements, and the frequency of relevant updates.

b. The use of supplemental data to address concerns with specific companies or issues.

c. Filing format (e.g., electronic data capture).

d. The extent to which financial reports and information are public records.

13. Reinsurance Intermediaries

Does the jurisdiction have a regulatory framework for the regulation of reinsurance intermediaries?

14. Other Regulatory Requirements with respect to Reinsurers

Any other information necessary to adequately describe the effectiveness of the jurisdiction’s laws and regulations with respect to its reinsurance supervisory system.
Appendix B: Regulatory Practices and Procedures

1. Financial Analysis

What are the jurisdiction’s practices and procedures with respect to the financial analysis of its domestic reinsurers? Such description should address the following:

a. Qualified Staff and Resources
   The resources employed to effectively review the financial condition of all domestic reinsurers, including a description of the educational and experience requirements for staff responsible for financial analysis.

b. Communication of Relevant Information to/from Financial Analysis Staff
   The process under which relevant information and data received by the supervisory authority are provided to the financial analysis staff and the process under which the findings of the financial analysis staff are communicated to the appropriate person(s).

c. Supervisory Review
   How the jurisdiction’s internal financial analysis process provides for supervisory review and comment.

d. Priority-Based Analysis
   How the jurisdiction’s financial analysis procedures are prioritized in order to ensure that potential problem reinsurers are reviewed promptly.

e. Depth of Review
   How the jurisdiction’s financial analysis procedures ensure that domestic reinsurers receive an appropriate level or depth of review commensurate with their financial strength and position.

f. Analysis Procedures
   How the jurisdiction has documented its financial analysis procedures and/or guidelines to provide for consistency and continuity in the process and to ensure that appropriate analysis procedures are being performed on each domestic reinsurer.

g. Reporting of Material Adverse Findings
   The process for reporting material adverse indications, including the determination and implementation of appropriate regulatory action.

h. Early Warning System/Stress Testing
   Whether the jurisdiction has an early warning system and/or stress testing methodology that is utilized with respect to its domestic reinsurers.
2. **Financial Examinations**

What are the jurisdiction’s practices and procedures with respect to the financial examinations of its domestic reinsurers? Such description should address the following:

a. **Qualified Staff and Resources**
   The resources employed to effectively examine all domestic reinsurers. This should include whether the jurisdiction prioritizes examination scheduling and resource allocation commensurate with the financial strength and position of each reinsurer, and a description of the educational and experience requirements for staff responsible for financial examinations.

b. **Communication of Relevant Information to/from Examination Staff**
   The process under which relevant information and data received by the supervisory authority are provided to the examination staff and the process under which the findings of the examination staff are communicated to the appropriate person(s).

c. **Use of Specialists**
   Whether the supervisory authority’s examination staff includes specialists with appropriate training and/or experience or whether the supervisory authority otherwise has available qualified specialists that will permit the supervisory authority to effectively examine any reinsurer.

d. **Supervisory Review**
   Whether the supervisory authority’s procedures for examinations provide for supervisory review.

e. **Examination Guidelines and Procedures**
   Description of the policies and procedures the supervisory authority employs for the conduct of examinations, including whether variations in methods and scope are commensurate with the financial strength and position of the reinsurer.

f. **Risk-Focused Examinations**
   Does the supervisory authority perform and document risk-focused examinations and, if so, what guidance is utilized in conducting the examinations? Are variations in method and scope commensurate with the financial strength and position of the reinsurer?

g. **Scheduling of Examinations**
   Whether the supervisory authority’s procedures provide for the periodic examination of all domestic reinsurers, including how the system prioritizes reinsurers that exhibit adverse financial trends or otherwise demonstrate a need for examination.

h. **Examination Reports**
   Description of the format in which the supervisory authority’s reports of examinations are prepared, and how the reports are shared with other jurisdictions under information-sharing agreements.

i. **Action on Material Adverse Findings**
   What are the jurisdiction’s procedures regarding supervisory action in response to the reporting of any material adverse findings.
3. **Information Sharing**

Does the jurisdiction have a process for the sharing of otherwise confidential documents, materials, information, administrative or judicial orders, or other actions with U.S. state regulatory officials, provided that the recipients are required, under their law, to maintain its confidentiality?

4. **Procedures for Troubled Reinsurers**

What procedures does the jurisdiction follow with respect to troubled reinsurers?

5. **Organization, Licensing and Change of Control of Reinsurers**

What processes does the supervisory authority use to identify unlicensed or fraudulent activities? The description should address the following:

   a. **Licensing Procedure**
      Whether the supervisory authority has documented licensing procedures that include a review and/or analysis of key pieces of information included in a primary licensure application.

   b. **Staff and Resources**
      The educational and experience requirements for staff responsible for evaluating company licensing.

   c. **Change in Control of a Domestic Reinsurer**
      Procedures for the review of key pieces of information included in filings with respect to a change in control of a domestic reinsurer.

The Accounting Practices and Procedures (E) Task Force met in Austin, TX, Dec. 8, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Jamie Walker (TX); Jeff Rude, Vice Chair, represented by Linda Johnson (WY); Lori K. Wing-Heier represented by David Phifer (AK); Jim L. Ridding represented by Sheila Travis (AL); Allen W. Kerr represented by Mel Anderson (AR); Andrew N. Mais represented by William Afantis and Kathy Belfi (CT); Stephen C. Taylor represented by N. Kevin Brown (DC); Trinidad Navarro represented by Ryllyn Brown (DE); David Altmaier represented by Virginia Christy (FL); Dafne M. Shimizu represented by Alice Sebastian-Cruz (GU); Colin M. Hayashida represented by Andrew Kurata (HI); Doug Ommen represented by Carrie Mears (IA); Dean L. Cameron represented by Nathan Faragher (ID); Stephen W. Robertson represented by Roy Eft (IN); Vicki Schmidt represented by Tish Becker (KS); Nancy G. Atkins represented by Sandy Batts (KY); James J. Donelon represented by Stewart Guerin (LA); Gary Anderson represented by James A. McCarthy (MA); Eric A. Cioppa represented by Vanessa Sullivan (ME); Anita G. Fox represented by Judy Weaver (MI); Steve Kelley represented by Kathleen Orth (MN); Chloria Lindley-Myers represented by John Rehagen (MO); Mike Chaney represented by David Browning (MS); Mike Causey represented by Jackie Obusek (NC); Jon Godfred represented by Matt Fischer (ND); Bruce R. Ramge represented by Justin Shadrer and Lindsay Crawford (NE); Marlene Caride represented by Diana Sherman (NJ); John G. Franchini represented by Lea Geckler (NM); Jillian Froment represented by Dale Bruggeman (OH); Glen Mulready represented by Eli Snowberger (OK); Jessica Altman represented by Kimberly Rankin (PA); Elizabeth Kelleher Dwyer represented by Jack Broccoli (RI); Larry Deiter represented by Johanna Nickelson (SD); Hodgen Mainda represented by Trey Hancock (TN); Todd E. Kiser represented by Jake Garn (UT); Scott A. White represented by Doug Stolte and Dave Smith (VA); Michael S. Piecik represented by Karen Ducharme (VT); Mike Kreidler represented by Patrick McNaughton (WA); Mark Afable represented by Amy Malm (WI); and James A. Dodrill represented by Justin Parr (WV).

1. Adopted its Minutes

Ms. Walker directed the Task Force to its Aug. 22 and Summer National Meeting minutes, which were previously distributed.

Mr. Phifer made a motion, seconded by Mr. Bruggeman, to adopt the Task Force’s Aug. 22 minutes (Attachment Three) and its Aug. 4 minutes (see NAIC Proceedings – Summer 2019, Accounting Practices and Procedures (E) Task Force). The motion passed unanimously.

Mr. Bruggeman provided the Dec. 7 report of the Statutory Accounting Principles (E) Working Group. Mr. Bruggeman stated that the Working Group adopted its Sept. 9 and Summer National Meeting minutes.

Mr. Bruggeman stated that the Working Group adopted the following nonsubstantive revisions to statutory accounting guidance:

a. Revisions to Statement of Statutory Accounting Principles (SSAP) No. 61R—Life, Deposit-Type and Accident and Health Reinsurance adopt: 1) SSAP No. 61R disclosures with an effective date of Dec. 31, 2020; 2) A-791 Question and Answer (Q&A) updates regarding contracts with medical loss ratios (MLRs); and 3) updates to the 2c. Q&A regarding risk transfer and group term life yearly renewable term (YRT) reinsurance with an effective date of Jan. 1, 2021. The proposed revisions to the A-791 Q&A regarding the scope of nonproportional contracts subject to Appendix A-791 were referred to the informal Life and Health Reinsurance Drafting Group to address application questions. The Working Group directed notification to the Life Actuarial (A) Task Force.

b. Revisions to SSAP No. 68—Business Combinations and Goodwill clarify that goodwill resulting from the acquisition of a subsidiary, controlled or affiliated (SCA) entity by an insurance reporting entity that is reported on the SCA financial statements (resulting from the application of pushdown) is subject to the 10% admittance limit based on the acquiring entity’s capital and surplus. The remainder of the agenda item was re-exposed to consider comments received on pushdown accounting and receive specific examples from interested parties.

c. Revisions clarify the recognition and measurement guidance for derivatives that do not qualify as hedging, income generation or replication transactions.
d. Revisions clarify that nonadmittance is required when there is an unalleviated substantial doubt about an SCA’s ability to continue as a going concern identified in any part of the audit report, accompanying financial statements or notes to the financial statements.

e. Revisions clarify that only wash sales that cross reporting period-end dates are subject to the wash sale disclosure.

f. Revisions clarify what should be captured in Supplemental Investment Risk Interrogatory Line 13: 10 Largest Equity Interests, noting that a look-through should only occur for non-diversified funds. The Working Group directed a Blanks (E) Working Group proposal for 2020 year-end application.

g. Revisions to Appendix A-785, Credit for Reinsurance adopted to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) related to the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement).

h. Revisions reject the following Accounting Standards Updates (ASUs):

1. ASU 2019-03, Updating the Definition of Collections
2. ASU 2019-31, Clarifying the Scope and Accounting Guidance for Contributions Received and Contributions Made
3. ASU 2019-05, Targeted Transition Relief.
4. ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities

Mr. Bruggeman stated that the Working Group adopted the following editorial revisions to:

a. SSAP No. 62R—Property and Casualty Reinsurance: Revisions clarify wording in an existing disclosure.

b. SSAP No. 86—Derivatives: Revisions reference the definition of a structured note in SSAP No. 26R—Bonds.

c. SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities: Revisions add two new suffixes for Securities Valuation Office (SVO) filings that have been carried over from the prior year.

Mr. Bruggeman stated that the Working Group exposed a revised issue paper and a draft substantively revised SSAP No. 32—Preferred Stock as part of the Investment Classification Project to revise the definitions, measurement guidance and impairment guidance for preferred stock. He stated that SSAP No. 105—Working Capital Finance Investments was also to incorporate industry revisions to program requirements, as directed by the Working Group during the Summer National Meeting. The Working Group directed NAIC staff to draft an issue paper related to the SSAP No. 105 revisions.

Mr. Bruggeman stated that the Working Group exposed the following nonsubstantive revisions to statutory accounting guidance:

a. Revisions specify that cash pooling structures that meet specified criteria qualify as cash equivalents.

b. Revisions incorporate additional principle concepts in classifying investments as cash equivalents or short-term investments to prevent the “rolling” of certain investments. Revisions exclude qualifying cash pools from the short-term rolling provisions.

d. Revisions reject ASU 2017-11, Accounting for Certain Financial Instruments with Down Round Features; Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Noncontrolling Interests with a Scope Exception and incorporate guidance for when certain freestanding instruments shall be recognized as liabilities, not equity.
e. Revisions expand guidance regarding financial guarantees and the use of the equity method for when losses exceed the equity value. With the revisions, the equity value of an SCA would not go negative, and guarantee liabilities would be reported to the extent that there is a financial guarantee or commitment. The “Illustration of the Application of INT 00-24” will be inserted into SSAP No. 97 as Exhibit F.

f. Revisions data-capture existing related party and affiliate disclosures currently completed in a narrative format.

g. Revisions clarify the types of entities that are included as related parties, that a non-controlling ownership interest greater than 10% is a related party and subject to the related party disclosures, the guidance for disclaimers of affiliation and control for statutory accounting; reject seven ASUs for statutory accounting and directed notification to the Group Solvency Issues (E) Working Group. The exposure includes an intent to dispose agenda item 2011-16, a historical item, drafted to consider the definition in SSAP No. 25—Affiliates and Other Related Parties.

h. Revisions provide enhanced surplus notes disclosures to identify when an issued surplus note’s anticipated or typical cash flows have been partially or fully offset by a held asset.

i. Revisions eliminate the multi-step financial modeling designation guidance in determining final NAIC designations for residential mortgage-backed securities (RMBS)/commercial mortgage-backed securities (CMBS). The Working Group noted action would be coordinated with the Valuation of Securities (E) Task Force.

j. Revisions include footnote excerpts in the reporting exhibits to aggregate deposit-type contracts captured in Exhibit 5 – Life Contracts and an inquiry as to whether a similar footnote would be beneficial for Exhibit 6 – Accident and Health Contracts. Additionally, feedback regarding instruction clarifications for Exhibit 7 – Deposit-Type Contracts has been requested. With exposure, directed notification to the Financial Stability (EX) Task Force.

k. Revisions propose minor edits to the liquidity disclosures regarding withdrawal characteristics for life and deposit-type contracts to match noted reporting clarifications.

l. Revisions expand managing general agent and third-party administrator disclosures.

m. Revisions incorporate interested parties’ recommendations to separate the guidance by product type and emphasize guidance that loss and loss adjusting expense liabilities are established regardless of payments to third parties (except for capitated health claim payments). The revisions emphasize existing guidance that claims and related adjusting liabilities are not recognized as paid until the losses are paid to claimants or claims are adjusted.

n. Revisions incorporate disclosure updates for reinsurers from reciprocal jurisdictions.

o. Comments are requested on the preferred approaches for reporting retroactive contracts that meet the exception for prospective accounting and the disadvantages to approaches being used. Industry and state insurance regulator volunteers are requested to assist with developing this guidance. The Working Group directed notification to the Casualty Actuarial and Statistical (C) Task Force and the Property and Casualty Risk-Based Capital (E) Working Group will be notified of the exposure.

p. Revisions include additional NAIC staff modifications regarding persistency commission and levelized commission arrangements to address certain comments received to allow for further discussion. With exposure, directed a referral to the Life Actuarial (A) Task Force.

q. Revisions clarify the reporting of derivatives with financing premiums and requested comments as to whether guidance allowing offset should be considered derivatives and related financing provisions that would not meet the SSAP No. 64—Offsetting and Netting of Assets and Liabilities right of offset criteria.

r. Revisions clarify that the fair value of collateral received or held for derivative disclosure purposes shall be reported net of collateral paid/pledged if a counterparty has the legal right to offset.
s. Revisions clarify that the “assignment” of goodwill is a disclosure element. The Working Group also directed revisions to the Sub-1 Acquisition Overview filing template to capture this information for new SCA acquisitions.

t. Revisions clarify that a look-through of a more than one holding company structure is permitted if each of the holding companies within the structure complies with the requirements in SSAP No. 97.

v. Revisions reject ASU 2016-14, Presentation of Financial Statements of Not-for-Profit Entities.

w. Exposed the following editorial revisions to statutory accounting:

   1. Update references in Exhibit A – Implementation Questions and Answers, which provides a retroactive reinsurance illustration and update, and paragraph 85 to match the current format of property/casualty (P/C) annual statement Schedule F – Reinsurance.

   2. Revise references to the annual statement instructions for consistency and combine the life and fraternal references.

Mr. Bruggeman noted that the Working Group received an update on the following projects and referrals:

a. The Working Group has scheduled a conference call on Jan. 8, 2020, to discuss comments received on Ref #2019-21: SSAP No. 43R – Equity Interests.

b. NAIC staff are in the process of collecting information from a data call on “linked” surplus notes, with responses requested by Dec. 31, 2019.

c. Received an update that the Financial Accounting Standards Board (FASB) delayed implementation of ASU 2016-13: Credit Losses until 2023 for everyone except large U.S. Securities and Exchange Commission (SEC) filers, which are required to follow the ASU in 2020.

e. Received an update on current U.S. generally accepted accounting principles (GAAP) exposures, noting that no comments by the Working Group are planned.

f. Received information from the industry on recent FASB discussions. NAIC staff are closely monitoring the expected Reference Rate Reform FASB project and will review the update upon issuance.

Mr. Bruggeman stated that the comment deadline for new and exposed items is Jan. 31, 2020, except for the editorial agenda item (Ref #2019-44EP), which has a Dec. 20, 2019, comment deadline.

Mr. Bruggeman made a motion, seconded by Ms. Obusek, to adopt the report of the Statutory Accounting Principles (E) Working Group (Attachment One). The motion passed unanimously.

Mr. Garn provided the report of the Blanks (E) Working Group, which met via conference call Oct. 22 and took the following action:

a. Adopted its Sept. 5 and Aug. 22 minutes, which included:

   1. An e-vote for exposure of blanks proposal 2019-24BWG. The proposal adds a life experience data contact to the electronic Jurat page for life/fraternal company filers only to allow NAIC staff and state insurance regulators to locate a contact person more easily from each legal entity life insurance company to facilitate communication regarding data studies and submissions to the NAIC.
b. Adopted four blanks proposals:

1. 2019-21BWG – Modify the illustrations for Note 33 to disclose individually the separate account with guarantees products and separate account nonguaranteed products.

2. 2019-22BWG – Add a question regarding the Executive Summary of the principle-based reserving (PBR) actuarial opinion to the Supplemental Exhibits and Schedules Interrogatories.

c. Exposed its revised procedures.

d. Exposed three proposals for a public comment period ending Nov. 22.

e. Adopted the editorial listing.

f. Approved the State Filing Checklist templates.

g. Approved the posting of clarifying 2019 filing guidance for the Life Analysis of Operations by Lines of Business.

Mr. Garn made a motion, seconded by Mr. Eft, to adopt the report of the Blanks (E) Working Group (Attachment Two). The motion passed unanimously.

Having no further business, the Accounting Practices and Procedures (E) Task Force adjourned.
The Statutory Accounting Principles (E) Working Group of the Accounting Practices and Procedures (E) Task Force met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: Dale Bruggeman, Chair (OH); Jim Armstrong, Vice Chair, and Carrier Mears (IA); Sheila Travis (AL); Kathy Belfi and William Arfanis (CT); Ryllynn Brown (DE); Eric Moser and Cindy Andersen (IL); Stewart Guerin (LA); Judy A. Weaver (MI); Doug Bartlett (NH); Tom Dudek (NY); Joe DiMemmo and Kimberly Rankin (PA); Jamie Walker (TX); Doug Stolte and David Smith (VA); and Amy Malm (WI).

1. **Adopted its Sept. 9 and Summer National Meeting Minutes**

The Working Group met Sept. 9 to consider draft statutory accounting guidance for insurance and reinsurance operations reported within segregated accounts.

Ms. Walker made a motion, seconded by Ms. Malm, to adopt the Working Group’s Sept. 9 (Attachment One-A) and Aug. 3 (see NAIC Proceedings – Summer 2019, Accounting Practices and Procedures (E) Task Force, Attachment One) minutes. The motion passed unanimously.

2. **Adopted Non-Contested Statutory Accounting Revisions During its Public Hearing**

The Working Group held a public hearing to review comments (Attachment One-B) on previously exposed items.

Ms. Malm made a motion, seconded by Mr. Bartlett, to adopt the statutory accounting revisions detailed below as non-contested statutory accounting revisions. The motion passed unanimously.

a. **Agenda Item 2019-19**

Mr. Bruggeman directed the Working Group to agenda item 2019-19: SIRI – Equity Interests. Julie Gann (NAIC) stated that during the Summer National Meeting, the Working Group exposed revisions to clarify what should be captured in the Supplemental Investment Risk Interrogatory (SIRI) Line 13: Largest Equity Interests. With the exposed revisions, a look-through to the underlying investments shall occur for non-diversified funds. However, underlying investments in diversified funds would not need to be individually assessed and aggregated in determining the top 10 largest equity interests. Ms. Gann stated that if an individual equity fund (diversified or non-diversified) was one of the top 10 largest equity interests, the fund shall be reported in the top 10 listing. Ms. Gann stated no comments were received and no statutory accounting revisions would be required, but the Working Group will sponsor a blanks proposal to update Annual Statement Instructions for year-end 2020. (Attachment One-C)

b. **Agenda Item 2019-22**

Mr. Bruggeman directed the Working Group to agenda item 2019-22: Wash Sales Disclosures. Jake Stultz (NAIC) stated that this nonsubstantive agenda item clarified wash sale disclosures would only be required when applicable transactions took place over quarterly or year-end reporting periods. Wash sales occurring within a reporting period do not need to be reported. Mr. Stultz stated that interested parties were supportive of the proposal. (Attachment One-D)

c. **Agenda Item 2019-23**

Mr. Bruggeman directed the Working Group to agenda item 2019-23: Going Concern. Mr. Stultz stated this nonsubstantive agenda item expands language to clarify that if an unalleviated going concern is noted in any location within an audit opinion or in the financial statements, an investment in a subsidiary, controlled and affiliated (SCA) entity shall be nonadmitted. No comments were received. (Attachment One-E)
d. Agenda Item 2019-26

Mr. Bruggeman directed the Working Group to agenda item 2019-26: A-785 Covered Agreements. Mr. Stultz stated that this nonsubstantive agenda item adopts language to incorporate covered agreements into Appendix A-785. Interested parties noted one paragraph reference edit was required. Mr. Stultz recommended adoption with the editorial change as requested by interested parties. (Attachment One-F)

e. Agenda Item 2019-27EP

Mr. Bruggeman directed the Working Group to agenda item 2019-27EP: Editorial Updates. Mr. Stultz stated this nonsubstantive agenda item covered three editorial revisions exposed from the Summer National Meeting and that no comments were received. (Attachment One-G)

f. Agenda Item 2019-28

Mr. Bruggeman directed the Working Group to agenda item 2019-28: Accounting Standards Update (ASU) 2019-05, Targeted Transition Relief. Jim Pinegar (NAIC) stated this nonsubstantive agenda item provides an alternative accounting treatment for certain financial assets previously held at amortized cost. He advised the ASU was proposed for rejection as it allows alternative measurements methods, which are not permitted in the applicable investment Statements of Statutory Accounting Principles (SSAPs). Interested parties’ comments supported the proposed action. (Attachment One-H)

g. Agenda Item 2019-29

Mr. Bruggeman directed the Working Group to agenda item 2019-29: ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities. Mr. Pinegar stated that this ASU extends goodwill alternatives currently allowed for private companies to not-for-profit entities, in that either an impairment only or amortization method is permitted. This nonsubstantive agenda item proposes to reject the ASU as it allows optionality in goodwill accounting. Interested parties’ comments supported the proposed revisions. (Attachment One-I)

3. Adopted Revisions to Reject U.S. GAAP as Not Applicable to Statutory Accounting

Ms. Walker made a motion, seconded by Mr. Dudek, to revise Appendix D—Nonapplicable GAAP Pronouncements to reject the following U.S. generally accepted accounting principles (GAAP) ASUs as not applicable. The motion passed unanimously.

- ASU 2019-03, Updating the Definitions of Collections (Agenda Item 2019-30 – Attachment One-J)
- ASU 2018-08, Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made. (Agenda Item 2019-31 – Attachment One-K)

4. Reviewed Comments and Considered Action on Exposed Items with Minimal Discussion

The Working Group held a public hearing to review comments (Attachment One-B) on previously exposed items.

a. Agenda Item 2018-26

Mr. Bruggeman directed the Working Group to agenda item 2018-26: SCA Loss Tracking – Accounting Guidance. Ms. Gann stated that during the Summer National Meeting, the Working Group exposed nonsubstantive revisions to update the existing financial reporting requirements when a reporting entity has a negative equity value in an SCA investment and the reporting entity has provided a financial guarantee or commitment. She stated that with the last exposure, the SCA investment would be reported at zero on the investment schedule, and the financial guarantee or commitment would be recognized as a liability pursuant to SSAP No. 5R—Liabilities, Contingencies and Impairments of Assets. Ms. Gann stated that NAIC staff support the comments received and believe the Working Group could consider adoption of the guidance, as revised by the interested parties’ comments. However, she stated that since the change would result in a distinct change from current reporting guidance and it is close to year-end, NAIC staff were recommending exposure of the proposed guidance to ensure adequate time to review the revisions and incorporate system changes. Additionally, she noted that the intent was to incorporate a new exhibit into SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities to pull in guidance from an existing statutory accounting
Ms. Walker made a motion, seconded by Ms. Mears, to expose the nonsubstantive revisions to SSAP No. 5R and SSAP No. 97 to revise the reporting guidance for SCAs that have a negative equity value when there is a reporting entity financial guarantee or commitment, as modified from the interested parties’ comments, along with the proposed SSAP No. 97, Exhibit F, for a public comment period. The motion passed unanimously.

b. **Agenda Item 2019-04**

Mr. Bruggeman directed the Working Group to agenda item 2019-04: SSAP No. 32 – Investment Classification Project. Ms. Gann stated that during the Summer National Meeting, the Working Group exposed an issue paper to revise the definitions, measurement and impairment guidance for SSAP No. 32—Preferred Stock, pursuant to the investment classification project. She stated that most of the comments received had been reflected in a revised issue paper, with the key exception proposed modifications from the U.S. GAAP definitions for redeemable and perpetual preferred stock. Although NAIC staff agree that some aspects of the definitions primarily reflect the perspective of the issuer (e.g., whether redemption is within control of the issuer), these characteristics should be considered by the holder in properly classifying preferred stock as redeemable or perpetual. She stated that NAIC staff support retaining consistency between U.S. GAAP and statutory accounting principle (SAP) definitions.

Resh Reese (Teachers Insurance and Annuity Association of America—TIAA), representing interested parties, stated support for the consideration of submitted comments and will review the revised issue paper and draft SSAP during the exposure period.

Ms. Brown made a motion, seconded by Mr. Bartlett, to expose the revised issue paper and substantively revised SSAP No. 32 for a public comment period. The motion passed unanimously.

c. **Agenda Item 2019-08**

Mr. Bruggeman directed the Working Group to agenda item 2019-08: Reporting Deposit Type Contracts. Ms. Gann stated that this nonsubstantive agenda item originated to gather information on deposit-type contracts that were being reported in the annual statement exhibits as life (Exhibit 5) or accident and health (A&H) (Exhibit 6) contracts. She stated that the long-standing practice is to classify and report contracts at policy inception. As a significant redesign of classifying insurance contracts is not supported, a footnote excerpt is proposed to detail amounts reported as life contracts that no longer have an associated mortality or morbidity risk. The exposure proposes the footnote for exhibit 5 and requests feedback if a similar footnote is needed for Exhibit 6. Finally, state insurance regulator and industry feedback is requested regarding the Annual Statement Instructions for classifying deposit-type contracts in Exhibit 7.

Mr. Bruggeman stated NAIC staff conferred with the Financial Stability (EX) Task Force staff to ensure the proposal would address the current concerns on aggregating contracts without mortality or morbidity risks for liquidity analysis. He also stated that in response to interested party comments, the intent of collecting this information was to identify the amount based on risk type. This is different from the degree of risk as referenced in the interested parties’ comments. John Bauer (Prudential), representing interested parties, stated agreement with the suggested recommendation and noted that interested parties will provide additional information as requested with the proposed exposure.

Ms. Walker made a motion, seconded by Ms. Weaver, to expose the nonsubstantive agenda item with the proposed footnote to Exhibit 5 and the inquiries for additional information regarding Exhibit 6 and Exhibit 7 for a public comment period. The motion passed unanimously. The Working Group directed NAIC staff to notify the Financial Stability (EX) Task Force of the exposure.

d. **Agenda Item 2019-18**

Mr. Bruggeman directed the Working Group to agenda item 2019-18: Other Derivatives. Ms. Gann stated that this nonsubstantive agenda item was re-exposed at the Summer National meeting in response to interested parties’ comments requesting more time to evaluate investments to determine if there would be unintended consequences with the proposed
accounting guidance. She stated that the proposed revisions clarify the accounting guidance in SSAP No. 86 — Derivatives when a derivative is not part of a hedging, an income generation or an asset replication transaction. Ms. Gann stated that the exposed revisions clarify that other derivatives shall be reported at fair value and nonadmitted. Ms. Gann stated that the nonadmitted classification is consistent with the current guidance applicable pursuant to SSAP No. 4 — Assets and Nonadmitted Assets, as other derivatives are not currently identified as admitted assets. As the exposed language is a clarification of existing guidance, adoption for year-end 2019 was recommended.

Mr. Bruggeman stated statutory accounting guidance does not override state investment code and does not preclude a permitted or prescribed practice. Joshua Bean (Transamerica), representing the American Council of Life Insurers (ACLI), stated that in conjunction with the North American Securities Valuation Association (NASVA), the ACLI has submitted a comment letter to the Capital Adequacy (E) Task Force in response to the referral sent from the Working Group to the Task Force pertaining to this item. He advised that their comment letter requested that risk-based capital (RBC) charges not be imposed on structured notes reported as other derivatives and nonadmitted.

Ms. Brown made a motion, seconded by Ms. Mears, to adopt the exposed nonsubstantive revisions to SSAP No. 86 (Attachment One-L) for a public comment period. The motion passed unanimously.

5. Reviewed Comments and Considered Action on Exposed Items

The Working Group held a public hearing to review comments (Attachment One-B) on previously exposed items.

a. Agenda Item 2017-28

Mr. Bruggeman directed the Working Group to agenda item 2017-28: Reinsurance Credit – Informal Life and Health Reinsurance Drafting Group Recommendations. Robin Marcotte (NAIC) stated that during the Summer National Meeting, the Working Group exposed for comment four items that were recommended by the informal life and health reinsurance drafting group, including SSAP No. 61R — Life, Deposit-Type and Accident and Health Reinsurance disclosures and three A-791 Life and Health Insurance Question and Answers. Ms. Marcotte recommended that the Working Group adopt the nonsubstantive SSAP No. 61R disclosures with paragraph number updates with an initial effective date of Dec. 31, 2020. She noted that the disclosures were originally requested by the Financial Analysis (E) Working Group. Ms. Marcotte also recommended that the Working Group adopt the new A-791 question and answer (Q&A) item regarding contracts with medical loss ratios (MLRs).

Ms. Marcotte then recommended that the Working Group adopt the A-791 Q&A revisions regarding paragraph 2c with the addition of applying to contracts in effect Jan. 1, 2021. She stated that after discussion with industry representatives, their comments are supportive of the adoption of the exposed Q&A for A-791, question 2c. She noted that these revisions would prevent risk transfer for group term yearly renewable term (YRT) contracts, which have risk-limiting features when the reinsurance contract premium exceeds the underlying direct premium. She stated that the interested parties’ recommendation was that this Q&A have a Jan. 1, 2021, effective date. She stated that while some of the informal state insurance regulator comments received by NAIC staff note that they are not in full agreement with the industry provided comments on other non-group YRT contracts, there is agreement on the item exposed and that the exposed language is specific to the described contracts. She noted that NAIC staff also recommend that the Working Group send a notification to the Life Actuarial (A) Task Force as part of its YRT project.

Ms. Marcotte recommended that the Working Group refer to the informal life and health reinsurance drafting group the exposed revisions to the A-791 Q&A update to clarify the phrase “certain non-proportional contracts” to address informal questions received by NAIC staff regarding: 1) the application of the exposed language regarding measurement period and settlement period; and 2) the application of substantially less likely than not. She stated that based on informal input from various drafting group members, more discussion is needed regarding this Q&A item, and she believes that this is an issue that the drafting group can lend some useful expertise. She noted that a few of the technical members did not fully agree on the application of certain wording.

Mr. Bruggeman noted that the Life Actuarial (A) Task Force is continuing its work on the reinsurance credit that a YRT contract can generate under principle-based reserving (PBR) and that a notification would be beneficial.
Steve Clayburn (ACLI) stated support for a Jan. 1, 2021, effective date of the paragraph 2c A-791 QA.

Mr. Stolte made a motion, seconded by Ms. Travis, to: 1) adopt the SSAP No. 61R disclosures with a year-end 2020 effective date; 2) adopt the A-791 Q&A on products subject to MLRs; 3) adopt the A-791 Q&A on paragraph 2c regarding group term life YRT contracts with an effective date of Jan. 1, 2021; and 4) refer the initial A-791 Q&A on the phrases “certain non-proportional contracts” back to the informal drafting group (Attachment One-M). The motion passed unanimously.

b. Agenda Item 2018-38

Mr. Bruggeman directed the Working Group to agenda item 2018-38: Prepaid Providers. Ms. Marcotte stated that this nonsubstantive agenda item was exposed during the Summer National Meeting with revisions to emphasize existing guidance that unpaid loss and loss adjusting expense (LAE) liabilities are established regardless of payments to third parties. She stated industry comments suggested separating guidance by product type.

Tom Finnell (America’s Health Insurance Plans—AHIP) stated support for the Working Group’s continued work on this topic and said he looks forward to providing additional feedback as a result of this exposure.

Ms. Malm made a motion, seconded by Ms. Walker, to expose agenda item 2018-38 with revisions to SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses incorporating a majority of interested parties’ comments for a public comment period. The motion passed unanimously.

c. Agenda Item 2019-12

Mr. Bruggeman directed the Working Group to agenda item 2019-12: ASU 2014-17, Business Combinations, Pushdown Accounting. Ms. Gann stated this nonsubstantive agenda item was exposed during the Summer National Meeting with three options presented for Working Group consideration: 1) full rejection of pushdown accounting; 2) allowing pushdown for non-insurance SCAs; or 3) allowing pushdown for non-insurance U.S. Securities and Exchange Commission (SEC) registrants. She stated that interested parties have requested additional time in order to provide specific examples for consideration. Ms. Gann stated that while re-exposure is recommended, a nonsubstantive revision for year-end 2019 was proposed to clarify in SSAP No. 68—Business Combinations and Goodwill that admitted goodwill is limited to 10% of the acquiring entity’s adjusted capital and surplus, regardless if pushdown was used. She stated that the proposed edit is specific to SCAs acquired directly by an insurance reporting entity. Ms. Gann stated that in order to prevent questions on whether the proposed edit will require amortization of goodwill pushed down to U.S. GAAP SCAs (instead of the U.S. GAAP impairment test), a proposal to separate the existing paragraph 9 into two separate paragraphs was suggested.

Ms. Brown stated support for the proposed edit to clarify the statutory admitted goodwill limitation. She asked whether additional disclosures will be presented to capture supplemental information on the use of pushdown in the statutory financial statements. Ms. Gann stated that a new agenda item is planned to capture additional goodwill disclosures and the use of pushdown as insurance reporting entities do not appear to currently be including this information in the statutory financial statements. Mr. Bruggeman asked whether the proposed edit to clarify the 10% admittance limitation should be effective immediately or for year-end 2020. Mr. Stolte and Mr. Smith responded for an immediate effective date.

Ms. Reese stated appreciation for the clarification of the history of goodwill and the assessment of nonsubstantive changes provided in the agenda and indicated that the TIAA would be involved in the continued pushdown discussion.

Keith Bell (The Travelers Companies) requested clarification of the Working Group direction regarding pushdown disclosures. He stated that there are concerns with pushdown disclosures as entities have pushed down goodwill on a U.S. GAAP basis, not a statutory accounting basis. Ms. Gann stated that the existing guidance in SSAP No. 68, paragraph 4 provides the calculation of goodwill and explicitly encompasses acquired SCAs reported on the basis of the audited U.S. GAAP equity of the investee (entities captured under paragraph 8.b.iii of SSAP No. 97.) Ms. Gann stated that the calculation of goodwill is different between U.S. GAAP and SAP, and if goodwill was pushed down on the basis of the U.S. GAAP calculation, it would seem that the existing guidance in SSAP No. 68 was not followed. Mr. Bell stated that in order to obtain a clean audit opinion for an SCA, pushdown may have been required on a U.S. GAAP basis and asked if the requested disclosures would only apply to U.S. GAAP SCAs. Mr. Bruggeman stated anticipated disclosures would detail the amount of goodwill pushed down if a reporting
entity directly purchased an SCA. He stated that the disclosures would likely include only SCAs reported on the basis of U.S. GAAP equity and requested feedback when the agenda item is exposed.

Ms. Brown made a motion, seconded by Mr. Stolte, to adopt the clarification edit indicating that goodwill from an insurance reporting entity’s acquisition of an SCA that is pushed down and reported on the SCA’s financial statements is subject to the 10% admittance limitation as a nonsubstantive change effective for year-end 2019, and to separate SSAP No. 68, paragraph 9 into two paragraphs. This motion also included re-exposure of agenda item 2019-12 with a request for comments on the three options for future consideration of pushdown and the request of explicit examples on the historical use of pushdown. The motion passed unanimously (Attachment One-N). The Working Group also directed NAIC staff to develop a new agenda item to capture statutory accounting disclosures on the use of pushdown and other goodwill/intangible asset items.

d. Agenda Item 2019-14

Mr. Bruggeman directed the Working Group to agenda item 2019-14: Attribution of Goodwill. Ms. Gann stated this nonsubstantive agenda item is a disclosure item when a reporting entity purchases a holding company, and the holding company owns multiple entities, goodwill shall be allocated/assigned to each entity at the time of purchase. She stated that comments received from interested parties on this item were combined with the comments received for agenda item 2019-12 and requested additional time for assessment. Ms. Gann stated that although this agenda item is strictly a disclosure item and is not planned for data-capture, it may be difficult to compile the disclosure information for year-end 2019 reporting. As such, re-exposure could occur to provide additional time for comments and still allow for disclosures to be adopted for year-end 2020. Ms. Gann suggested that the Working Group direct NAIC staff to revise the Sub-1 SCA filing template to capture this information beginning with Sub-1 submissions in 2020.

Ms. Walker made a motion, seconded by Mr. Dudek, to re-expose agenda item 2019-14 and directed NAIC staff to revise the Sub-1 filing template to capture this information for new SCA acquisitions. The motion passed unanimously.

e. Agenda Item 2019-20

Mr. Bruggeman directed the Working Group to agenda item 2019-20: Rolling Short-Term Investments. Ms. Gann stated that this nonsubstantive agenda item was originally exposed during the Summer National Meeting to address certain investments that were structured to mature at or around 364 days in order to be classified as short-term investments, with those investments being rolled or renewed. She stated that the definition of a cash equivalent is an investment, that when acquired, has a remaining maturity of three months or less, while a short-term investment, when acquired, has a remaining maturity of one year or less. Ms. Gann stated that while investments default to a long-term reporting schedule, if they meet the maturity date parameters at acquisition, they are reported as cash equivalents or short-term investments. She stated that examples have risen where entities purchase affiliated investments that are scheduled to mature within one year. However, the investments continuously roll or have the expectation of being renewed or rolled with recurring short-term maturity dates. Under existing statutory accounting guidance, these investments are continuously reported as short-term investments, and this reporting results with favorable RBC charges and avoids other requirements imposed on long-term investments, including the requirement to obtain an NAIC designation.

Ms. Gann stated this agenda item proposes that if a short-term investment is expected to renew, it shall be reported as a long-term investment. Further, if a short-term investment is renewed or rolled, upon subsequent renewal, it shall be reported as a long-term investment, in effect acting as a tainting rule to prevent continuous reporting as a short-term investment. Ms. Gann stated that comments from interested parties expressed concerns that cash pooling arrangements were not excluded from the exposed short-term rolling guidance. She stated cash pools were not originally excluded as they are not currently addressed in SSAP No. 2R—Cash, Cash Equivalents, Drafts and Short-Term Investments. However, from information received, entities have been reporting pooling arrangements as cash equivalents. She stated NAIC staff recommend exposure of this agenda item with revisions to exclude qualifying cash pooling arrangements as defined in agenda item 2019-42 from the rolling short-term guidance and to request industry and state insurance regulator feedback on other investments that should be considered in scope of the short-term rolling guidance, or excluded from the guidance and permitted to be continuously reported as short-term. In response to comments received on other investments, Ms. Gann stated NAIC staff do not recommend expanding exemptions for affiliate loans or collateral loans and noted that collateral loans already receive favorable RBC charges under their designation reporting line on Schedule BA – Other Long-Term Invested Assets. She also indicated that using re-underwriting
provisions as a threshold for continuous short-term reporting may be difficult for state insurance regulators and auditors to assess.

Lyle Rudin (State Farm), representing interested parties, stated support for the cash pool exemption from the proposed short-term rolling guidance and stated that it will review the qualifying conditions for cash pools in that exposure.

Ms. Belfi made a motion, seconded by Ms. Weaver, to expose agenda item 2019-20 with the revisions to exclude qualifying cash pools from the short-term rolling restrictions and to request comments on other investments that should be considered within or excluded from the short-term rolling restrictions for a public comment period. The motion passed unanimously.

f. Agenda Item 2019-24

Mr. Bruggeman directed the Working Group to agenda item 2019-24: Levelized and Persistency Commission. Ms. Marcotte stated that during the Summer National Meeting, the Working Group exposed nonsubstantive revisions to SSAP No. 71—Policy Acquisition Costs and Commissions to clarify the existing levelized commissions guidance and provide additional guidance regarding commissions based on policy persistency. She stated that the exposed recommendations were intended to be consistent with the original intent of SSAP No. 71, as well as the Statutory Statement of Concept on Recognition, which states that liabilities require recognition as they are incurred and accounting treatments, which tend to defer expense recognition, do not generally represent acceptable SAP treatment. Ms. Marcotte noted that three comment letters were received from the original exposure. For the current Fall National Meeting, Ms. Marcotte recommended that the Working Group expose the agenda item with additional NAIC staff modifications regarding persistency and levelized commission guidance to allow for further discussion. She stated that the intent of the additional revisions was to focus on levelized commission arrangements, particularly those that are currently being miscategorized.

In response to comments received about the intent of the guidance, Ms. Marcotte stated that Issue Paper No. 71—Policy Acquisition Costs and Commissions, paragraph 10, identifies the pre-codification statutory accounting guidance, which is the basis for the existing SSAP No. 71 guidance. She stated that the pre-codification guidance quoted in the 1996 issue paper also notes the same concerns regarding reporting entities’ use of levelized commission arrangements, which operate as funding agreements. She stated that the referenced paragraph provides that, “The accounting treatment for certain transactions, characterized as levelized commissions, which results in enhancement of surplus, has been determined to be inappropriate for statutory reporting.” She stated that the intent of SSAP No. 71 for levelized commissions is that repayment of a funding advance, even if it has been labeled as a commission, requires the establishment of a liability for the full amount of unpaid principal and accrued interest.

Ms. Marcotte noted that additional edits proposed for exposure attempts to address some of the industry concerns on traditional persistency commissions. She stated that one of the challenges is trying to make a distinction between a true persistency commission and the use of a levelized commission arrangement that functions as a funding agreement as described in SSAP No. 71. She noted that it is more difficult because some of the identified funding agreements are calling the repayment a persistency commission. She stated that the intent of the exposed guidance was not to change the annual accrual of normal persistency commission, but rather to require accrual of levelized commission arrangements, which are being termed persistency. Some of the proposed edits remove previously exposed revisions and add clarifying phrases regarding persistency commission accrual, with the addition of clarifying phrases to assist with identifying levelized commission funding agreements and redrafting of the footnote to remove double negative wording.

Ms. Marcotte stated that the levelized commission arrangements described to NAIC staff had a third-party (“super-agent”) paying agents upfront, which represents a large commission similar to normal initial sales commission policy acquisition costs for business directly written on behalf of the reporting entity in the year of policy issuance. She stated that repayment to the third party by the reporting entity was expected, but not necessarily guaranteed, and was over a period of years. She stated that consistent with the guidance in SSAP No. 71, paragraph 4, the levelized commission arrangement was repaying the super-agent amounts “which are less than the normal first-year commissions but exceed the normal renewal commissions.”

Marty Carus (Marty Carus Consulting) noted that they looked forward to reviewing the updated revisions during the exposure. He stated that a significant segment of the industry views the change as substantive and that the revisions affect a wide range of products. He said the Working Group should take this into account when reviewing this item. He stated that the NAIC staff comments noted preliminary discussion with the Life Actuarial (A) Task Force staff regarding the industry comments about
PBR methodology, and he recommended additional dialogue with the Task Force on this aspect. Ms. Marcotte stated that the PBR methodology takes commission into account when projecting future cash flows. However, per discussion with the Task Force staff, the projected future cash flows would not be double-counted if there is an existing liability. She requested if there is specific Valuation Manual language in VM-20, Requirements for Principle-Based Reserves for Life Products, and VM 21, Requirements for Principle-Based Reserves for Variable Annuities, that needs to be addressed in the coordination process, to provide specific concerns. Mr. Bruggeman noted that his understanding is that PBR takes into account future commissions when determining the present value of future cash flows, but would not set up an additional liability if there is an existing liability. Mr. Bruggeman noted that it would be beneficial to notify the Life Actuarial (A) Task Force of the exposure.

Lynn Kelley (Delaware Life), representing interested parties, stated support for the consideration of their comments and the additional exposure to allow time for discussion to distinguish between levelized commission arrangements and other commission arrangements.

Ms. Walker made a motion, seconded by Ms. Travis, to expose nonsubstantive revisions to SSAP No. 71, modified from the prior exposure as discussed during the meeting, regarding levelized commissions for a public comment period and to notify the Life Actuarial (A) Task Force of the exposure. The motion passed unanimously.

6. Considered Maintenance Agenda—Pending Listing—Exposures

Mr. Dudek made a motion, seconded by Ms. Mears to move agenda items 2019-32 through 2019-49 to the active listing, and expose all items for a public comment period, with distinction of each item as either substantive or nonsubstantive, and with corresponding referrals as recommended by NAIC staff. The motion passed unanimously.

a. Agenda Item 2019-32

Mr. Bruggeman directed the Working Group to agenda item 2019-32: Look-Through with Multiple Holding Companies. Ms. Gann stated that this nonsubstantive agenda item was drafted from Working Group direction at the Summer National Meeting. Ms. Gann stated that it was agreed that multiple holding companies in a structure could be looked-through if each holding company qualifies with the look-through requirements in SSAP No. 97. With this conclusion from the Summer National Meeting, interested parties had requested that this be clarified within the SAP guidance.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

b. Agenda Item 2019-33

Mr. Bruggeman directed the Working Group to agenda item 2019-33: SSAP No. 25 – Disclosures. Ms. Gann stated that this nonsubstantive agenda item has been drafted to data-capture disclosures from SSAP No. 25—Affiliates and Other Related Parties. She noted that disclosures from SSAP No. 25 are currently completed in a narrative (portable document format [PDF]) format. With the proposal to data-capture disclosures, state insurance regulators can aggregate and query party relationships. She noted that there are items that are proposed to be data-captured that are not explicitly included in the narrative description but are presumed to be currently captured in the existing general references for “information considered necessary to obtaining an understanding of the effects of the transactions on the financial statements.” She stated that all of these instances are specifically noted in the agenda item. Ms. Gann stated that this item is separate from agenda item Ref #2019-34, which is considering revisions to clarify what is captured in SSAP No. 25, in order to follow a separate workstream to allow for year-end 2020 data-capturing. If the revisions being considered under the separate agenda item are adopted by June 2020, then those disclosures may modify or expand the data templates proposed in this agenda item.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

c. Agenda Item 2019-34

Mr. Bruggeman directed the Working Group to agenda item 2019-34: Related Parties, Disclaimer of Affiliation and Variable Interest Entities. Mr. Stultz stated that the intent of this nonsubstantive agenda item is to clarify identification of related parties and affiliates in SSAP No. 25 and to incorporate new disclosures to ensure state insurance regulators have a full picture of complicated business structures. He noted that this agenda item intends to have the related party and affiliate reporting more
closely match that of SEC filings, and this will be done by adding language from SEC guidance and by clarifying the disclaimer of affiliation or control from a statutory reporting standpoint. He noted that the proposed revisions intend to address the following key aspects: 1) clarify the identification of related parties and ensure that any related party identified under U.S. GAAP or SEC reporting requirements would be considered a related party under statutory accounting principles; 2) clarify that non-controlling ownership over 10% results in a related party classification regardless of any disclaimer of control or disclaimer of affiliation; 3) clarify the impact of a disclaimer of control or disclaimer of affiliate under SAP. He stated that disclaimers of control or affiliation may affect holding company group allocation or reporting as an SCA under SSAP No. 97, but do not eliminate the classification as a “related party” and the disclosure of material transactions as required under SSAP No. 25; and 4) propose rejection of several Financial Accounting Standards Board (FASB) ASUs related to Variable Interest Entities (VIE) and Consolidation (FASB Codification Topic 810). Mr. Stultz stated the concept of consolidation has been rejected for statutory accounting. As such, the main concepts included in the FASB ASUs discussed in this agenda item are proposed to be rejected for statutory accounting. While this agenda item is not intended to change the concept of consolidation for statutory accounting, Mr. Stultz noted that there is a need and justification for enhanced disclosures to supplement the reporting process of related parties and affiliates within a company structure. Mr. Stultz noted that the requirements for the SEC filings do not allow for a disclaimer of affiliation, as is allowed in the Insurance Holding Company System Regulatory Act and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions and included in Appendix A-440.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

d. **Agenda Item 2019-35**

Mr. Bruggeman directed the Working Group to agenda item 2019-35: Update Withdrawal Disclosures. Ms. Marcotte stated that the Working Group updated the life, health and separate account liquidity disclosures to provide more granularity of the withdrawal characteristics by product type. These updates were developed by the Financial Stability (EX) Task Force and were adopted in agenda item 2018-28: Updates to Liquidity Disclosures, with an effective date of year-end 2019. Ms. Marcotte stated that this nonsubstantive agenda item proposes minor clarifying edits to the disclosures identified subsequent to the adoption of the related 2019 annual statement blanks proposal. She stated that revisions are proposed as follows: 1) add a consistency revision to SSAP No. 51R—Life Contracts to ensure separate account guaranteed products are referenced in all applicable paragraphs of the withdrawal characteristics disclosures; 2) correct an identified inconsistency in one of the new disclosures that was added regarding products that will move from the reporting line of having surrender charges at 5% or more to the reporting line of surrender charges at less than 5%. A clarification is being recommended to ensure consistency in annual statement reporting; and 3) add a cross reference from SSAP No. 56—Separate Accounts to the existing disclosures by withdrawal characteristics in SSAP No. 51R and SSAP No. 61R as the disclosures include separate account products.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

e. **Agenda Item 2019-36**

Mr. Bruggeman directed the Working Group to agenda item 2019-36: Expanded MGA and TPA Disclosures. Ms. Marcotte stated that this nonsubstantive agenda item was drafted pursuant to a request from two states that the existing annual statement disclosure regarding managing general agents or third-party administrators (TPAs) be expanded to include additional information. She stated that state insurance regulators and policyholders should be able to fully understand the level and extent that core services and binding authority are provided by managing general agents (MGA) and TPAs. The state sponsors have advocated that this understanding would also help in the assessment of the enterprise risk management (ERM) framework, Own Risk Solvency Assessment (ORSA) report, market analysis reviews, operational risks, group analysis, and recovery and resolution considerations. Ms. Marcotte noted that the enhanced disclosure would list any MGA and TPA and the respective core service(s) provided to the insurer or authority granted by the insurer. Additionally, the affiliated, related party or unaffiliated relationship would be disclosed, along with whether the entity is independently audited and/or bonded.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.
f. **Agenda Item 2019-37**  
Mr. Bruggeman directed the Working Group to agenda item 2019-37: Surplus Notes – Enhanced Disclosures. Mr. Pinegar stated this nonsubstantive agenda item was drafted from the Working Group’s request that additional disclosures be captured in SSAP No. 41R—Surplus Notes. He stated the disclosure reflects items detailed in the current surplus note data call. While numerous disclosures are proposed, key concepts relate to the cashflows (or lack thereof) between the surplus note issuer and holder, related party identification, descriptions of the types and fair value of the assets received, and information regarding the third-party financial guarantor, which is commonly referred to a source of liquidity for the surplus note issuer.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

g. **Agenda Item 2019-38**  
Mr. Bruggeman directed the Working Group to agenda item 2019-38: Financing Derivatives. Ms. Gann stated this topic was discussed a few years ago. However, after reviewing the year-end 2018 financial statements, the issue is being reintroduced as a nonsubstantive revision to clarify the reporting of derivatives with financing components on derivative schedules DB-A and DB-B. NAIC staff stated that financing derivatives represent situations where the premium due as a result of acquiring or writing a derivative is paid throughout the derivative term or at maturity. She stated that the agenda item proposes the elimination of the allowance of net reporting, with a requirement for gross reporting for derivatives purchased or sold. Ms. Gann said that the current process to net the derivative asset and premium due generally results in a net zero-value at inception, which does not present a clear picture on derivative activity in the statutory financial statements. Ms. Gann stated that the original discussion on this item focused on acquired financed derivatives. However, from the review of the 2018 financial statements, it was identified that reporting entities also use financing components in the writing of derivatives. She stated that the proposed revisions to SSAP No. 86 would require gross reporting of derivatives, without the effect of financing premiums due or payable and would present the true financial asset and liability position associated with the use of derivatives. She noted that proposed concepts included in the agenda item suggest revisions to the RBC calculations so that the premium due can be considered similar to derivative collateral. If the statutory accounting revisions are supported, a future referral would be considered to the Capital Adequacy (E) Task Force for consideration of these RBC changes.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

h. **Agenda Item 2019-39**  
Mr. Bruggeman directed the Working Group to agenda item 2019-39: Acceptable Collateral for Derivatives. Mr. Pinegar stated that a potential misinterpretation exists in the annual statement instructions regarding the reporting of collateral for derivatives. Currently, the instructions indicate reporting “net positive variation margin,” which by definition only reflects collateral flows due to daily changes in market values. He stated that an additional type of margin should be considered—i.e., initial margin, which reflects the original collateral given to initiate a position. SSAP No. 86 refers to disclosures of “net assets held,” which infers a totality of assets. Mr. Pinegar stated this nonsubstantive agenda item is to clarify that collateral held reflects both initial and variation margin.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

i. **Agenda Item 2019-40**  
Mr. Bruggeman directed the Working Group to agenda item 2019-40: Reporting of Installment Fees and Expenses. Ms. Marcotte noted that SSAP No. 53—Property Casualty Contracts—Premiums, paragraph 6, provides specific guidance that allows for installment fees that meet specified criteria to be excluded from premium and reported as other income. She stated that an installment fee is the amount policyholders pay if they make the choice to pay their premium on an installment basis and that the fee is allowed to be excluded from premium income if it is an avoidable amount by the policyholders and the policy would not be cancelled for nonpayment of the installment fee.

Ms. Marcotte stated that NAIC staff have received state insurance regulator-requested clarifications regarding potential diversity in the application of the SSAP No. 53 installment fee guidance. She stated that the recommendation in the nonsubstantive agenda item is to expose revisions to SSAP No. 53 and request comments. She stated that the revisions note
that the installment fee and services charges guidance should be applied narrowly to the specific situation described and not analogized to exclude other fees from written premium. Ms. Marcotte stated that in addition, notification of the exposure to the Casualty Actuarial and Statistical (C) Task Force and the Property and Casualty Risk Based Capital (E) Working Group was recommended. She stated that the questions for exposure are as follows:

- Should the Working Group develop guidance to allow reporting of installment fee expenses associated with fees that are reported in other income according to the criteria in SSAP No. 53, be categorized as an expense in “Other Income”?

- If included in “Other Income,” there is no line to report “other expenses” in the annual statement blank. Therefore, should the expense be classified as a contra revenue in or an “Aggregate Write-Ins for Miscellaneous Income”?

- Installment fees and expenses are often immaterial for property/casualty (P/C) except for nonstandard writers. Should diversity be allowed in reporting installment fee expenses (that is optional to report as other expense category of contra other revenue “Aggregate Write-Ins for Miscellaneous Income”), particularly for immaterial amounts?

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure with the request for comments on the noted questions and with notifying the Casualty Actuarial and Statistical (C) Task Force and the Property and Casualty Risk Based Capital (E) Working Group of the exposure.

j. Agenda Item 2019-41

Mr. Bruggeman directed the Working Group to agenda item 2019-41: SSAP No. 43R – Financial Modeling. Mr. Pinegar stated the current residential mortgage-backed securities (RMBS)/commercial mortgage-backed securities (CMBS) multi-step modeling practice is the only remaining approach that uses breakpoints to determine final NAIC designations. During the Spring National Meeting, the Working Group adopted modifications to eliminate reference to multi-step modeling for modified filing exempt (MFE) securities. He stated this nonsubstantive agenda item was in conjunction with an expected proposal from the Valuation of Securities (E) Task Force, in which it is also proposing to eliminate multi-step modeling. Mr. Pinegar stated exposure is contingent upon the Task Force exposure and that final action will not occur on this agenda item until the Task Force adopts elimination of the multi-step modeling. Mr. Bruggeman stated that this agenda item was proposed to remain current with the Task Force and that the exposure of this agenda item will be removed from the exposure listing if the Task Force does not expose its corresponding agenda item.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

k. Agenda Item 2019-42

Mr. Bruggeman directed the Working Group to agenda item 2019-42: Cash Equivalent – Cash & Liquidity Pools. Mr. Pinegar stated this nonsubstantive agenda item arose as a result of the short-term rolling agenda item (Ref #2019-20), in which interested parties commented that cash pools were not appropriately scoped out of the proposed short-term restriction guidance. He stated cash pools are techniques in which affiliates combine excess cash in order to earn additional interest, access additional short-term investment markets and improve liquidity management. Mr. Pinegar stated that this agenda item proposes to allow cash pools that meet certain requirements to be reported as cash equivalents. He stated several safeguards were proposed, including restrictions related to investments, liquidity requirements and the disallowance of notional pooling where one participant can cover the expenses of another.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

l. Agenda Item 2019-43

Mr. Bruggeman directed the Working Group to agenda item 2019-43: ASU 2017-11, Earning Per Share, Distinguishing Liabilities from Equity, Derivatives & Hedging. Mr. Pinegar stated this ASU primarily details accounting guidance for financial instruments with “down round” features. A down round feature is a provision in certain financial instruments that allows for a reduction in an option’s strike price in certain situations. He stated that as a result of this ASU, down round features are allowed to be considered indexed to stock in which the value of the instrument is reclassified from a liability to equity. Mr. Pinegar stated that this specific guidance is proposed for rejection. However, the nonsubstantive agenda item proposes language for
SSAP No. 5R and SSAP No. 72—*Surplus and Quasi-Reorganizations* to reflect that freestanding financial instruments with characteristics of both liability and equity shall be reported as a liability to the extent the instrument embodies an unconditional obligation of the issuer. Mr. Pinegar stated that while this language is new for these particular SSAPs, the liability versus equity concept is not new to statutory accounting. He stated that the concepts are materially consistent with guidance that currently exists in Exhibit A in SSAP No. 104R—*Share-Based Payments*.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

m. *Agenda Item 2019-44EP*

Mr. Bruggeman directed the Working Group to agenda item 2019-44EP: Editorial Updates. Ms. Marcotte stated that this nonsubstantive agenda item proposes editorial revisions to update paragraph references for SSAP No. 62R—*Property and Casualty Reinsurance* and update references to the Annual Statement Instructions to reflect proper titles. In order to ensure revisions are in the 2020 *Accounting Practices and Procedures Manual* (AP&P Manual), a shortened exposure period was suggested ending Dec. 20.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

n. *Agenda Item 2019-45*

Mr. Bruggeman directed the Working Group to agenda item 2019-45: *ASU 2013-11, Income Taxes – Presentation of Unrecognized Tax Benefits*. Mr. Pinegar stated this ASU addressed the financial statement presentation of unrecognized tax benefits. An unrecognized tax benefit represents a tax position that does not meet the more-likely-than-not recognition threshold and in essence is a tax deduction that has a less than 50% likelihood of being used or upheld. He stated that this nonsubstantive agenda item proposes to reject the ASU as items having less than a 50% likelihood of being upheld require current year expense recognition per SSAP No. 101—*Income Taxes*.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

o. *Agenda Item 2019-46*

Mr. Bruggeman directed the Working Group to agenda item 2019-46: *ASU 2016-14, Presentation of Financial Statements for Not-for-Profit Entities*. Mr. Pinegar stated this ASU requires financial statement presentation of two classes of net assets for not-for-profit entities: 1) with donor restrictions; and 2) without donor restrictions. He stated this nonsubstantive agenda item proposes to reject the ASU as not being applicable for statutory accounting.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

p. *Agenda Item 2019-47*

Mr. Bruggeman directed the Working Group to agenda item 2019-47: VM-21 Grading. Ms. Marcotte stated that at the Summer National Meeting, the NAIC Executive (EX) Committee and Plenary adopted comprehensive revisions drafted by the Life Actuarial (A) Task Force to Section 21 VM-21 and also to *Actuarial Guideline XLIII—CARVM for Variable Annuities* (AG 43), which provide guidance on reserving for variable annuities. The revisions adopted to VM-21 and AG 43 represent a change in accounting principle that must be recognized as a change in valuation basis under SSAP No. 51R.

Ms. Marcotte stated that this nonsubstantive agenda item proposes revisions to SSAP No. 51R and reference to the additional grade-in disclosure requirements in SSAP No. 3—*Accounting Changes and Corrections of Errors* for reporting years beginning Jan. 1, 2020. She stated that the revisions are to remove the existing guidance, which prohibits grading-in changes in valuation basis unless provided for in the statement, to allow a grade-in for changes in valuation basis if permitted by the statement or the *Valuation Manual* in VM-21. She stated that in deferring to VM-21 on grade-in options, there will be less comparability in reporting because there is more optionality in reserve reporting.

Ms. Marcotte stated that to address the issue of lack of comparability, additional disclosure regarding grade-in has been proposed. She stated that the proposed revisions to SSAP No. 51R expand the disclosure for changes in valuation basis as a...
change in accounting principle under SSAP No. 3 to also include details regarding grade-ins of changes in valuation basis, including the grade-in period applied, the remaining amount to be graded-in, remaining time for the grade-in period, and the initial grade-in amount and any adjustments to the original amount. She noted that a reference in SSAP No. 3 regarding additional disclosures of grade-in features is also proposed.

Ms. Marcotte stated that a change in valuation basis under SSAP No. 51R is recognized through surplus. As the unrecognized graded-in reserve represents an unrecognized adjustment to surplus, the proposed revisions require the unrecognized grade-in amount from a change in valuation basis, if resulting with an increase in reserves (decrease from surplus), to be reported as an allocation from unassigned funds to special surplus until the amount has been fully graded into unassigned funds. She stated that the proposed reclassification from unassigned funds to special surplus does not reduce total surplus. She said this proposal is to provide transparency regarding the increased reserve amount that has not been reflected into surplus. As amounts are graded-in to reduce surplus, the amount in special surplus is reclassified to unassigned funds.

Mr. Bruggeman noted that statutory accounting does not typically allow optionality and that providing disclosure for comparability and having some accounting transparency seems to be useful. Ms. Marcotte noted that NAIC staff plan a future agenda item regarding exercise of commissioner discretion in the Valuation Manual.

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

q. Agenda Item 2019-48

Mr. Bruggeman directed the Working Group to agenda item 2019-48: Disclosure Update for Reciprocal Jurisdiction Reinsurers. Mr. Stultz stated that on June 25, the Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) to incorporate relevant provisions from the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” and the “Bilateral Agreement Between the United States of America and the United Kingdom Regarding Insurance and Reinsurance” (collectively referred to as the Covered Agreement). He stated that while developing the blanks proposal to include reciprocal jurisdictions reinsurers, a needed change to the disclosure was identified. He stated that the purpose of this nonsubstantive agenda item is to revise one disclosure in SSAP No. 62R to reference “reciprocal jurisdictions.”

In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

r. Agenda Item 2019-49

Mr. Bruggeman directed the Working Group to agenda item 2019-49: Retroactive Reinsurance Exception. Ms. Marcotte noted that at the Summer National Meeting, the Working Group, the Casualty Actuarial and Statistical (C) Task Force and the Surplus Lines (C) Task Force received a request from the Committee on Property and Liability Financial Reporting (COPLFR) of the American Academy of Actuaries (Academy) Working Group. She stated that the request was to clarify the accounting and reporting for retroactive reinsurance that meets the SSAP No. 62R exceptions to be accounted for as prospective reinsurance.

Ms. Marcotte stated that the request was for the various NAIC groups to develop guidance to address the inconsistencies in application of the reinsurance accounting and reporting guidance, particularly the impact on Schedule P – Analysis of Losses and Loss Expenses (Schedule P) and data that is used for RBC. She stated that the recommendation is to request comments and to ask for industry and state insurance regulator volunteers to assist with developing guidance. She stated that the request asks for guidance on both the accounting and reporting for retroactive contracts that are accounted for prospectively, including situations in which both the ceding entity and assuming entity are members of the same group and are consolidated in the same combined annual statement, as well as the reporting method to be used if the ceding entity and assuming entity are not in the same group.

Ms. Marcotte stated that comments are specially requested regarding the preferred approaches to reporting and the advantages and disadvantages to each approach being used, including both the Schedule P (and related loss analysis) and RBC impacts. She stated that a Working Group notification to the Casualty Actuarial and Statistical (C) Task Force of the request for comments and to highlight the need for coordination will occur with exposure.
In response to an inquiry from Mr. Bruggeman, there was no objection to exposure.

7. Considered Maintenance Agenda—Active Listing
   a. Agenda Item 2019-25

Mr. Bruggeman directed the Working Group to agenda item 2019-25: Working Capital Finance Notes. Ms. Marcotte noted that the materials contain the proposed substantive revisions incorporating the industry proposed language for the six specific items directed by the Working Group at the Summer National Meeting to SSAP No. 105—Working Capital Finance Investments. She stated that the revisions: 1) remove the requirement that the Securities Valuation Office (SVO) determine if the international finance agent is the functional equivalent of the U.S. state insurance regulator; 2) remove the finance agent prohibitions on commingling; 3) remove duplicative text regarding exercise of investor rights; 4) remove requirements, with revisions allowing the SVO to determine if a first priority perfected interest has been obtained; 5) lower the independent review requirements to allow independent review of the finance agent by either audit or through an internal control report; and 6) change the default provisions from 15 days to 30 days so the default date and the cure period are consistent.

Ms. Weaver made a motion, seconded by Mr. Bartlett, to expose the substantively revised SSAP No. 105 and direct NAIC staff to draft an issue paper. The motion passed unanimously.

8. Discussed Other Matters
   a. Agenda Item 2019-21: SSAP No. 43R – Equity Interests

Ms. Gann stated that a conference call to discuss agenda item 2019-21 is scheduled for Jan. 8, 2020. She stated a conference call was preferable so sufficient time can be dedicated to the topic and to allow multiple commenters the opportunity to participate in the discussion. Mr. Bruggeman stated that final resolution of this topic is not expected during the conference call.

   b. Agenda Item 2018-07: Surplus Notes

Mr. Pinegar stated that in response to the Working Group direction from the Summer National Meeting, a data call regarding “linked” surplus notes was developed and issued. He reminded the Working Group that a data call response is not required if reporting entities do not have issued surplus notes that meet the criteria detailed in the instructions and that submissions are due Dec. 31. Mr. Bruggeman stated this data call was issued as there was not sufficient time to data-capture the information in year-end 2019 statutory financial statements. He stated any questions should be directed to NAIC staff or state insurance regulators.

   c. Agenda Item 2016-20: Credit Losses

Mr. Pinegar stated that since the ASU regarding credit losses was originally released in 2016, numerous technical updates have been issued from the FASB and further updates continue as evidenced by a subsequent update issued in late November 2019. He stated that on Oct. 18, 2019, the FASB voted unanimously to delay the credit loss standard for most entities until 2023. While large SEC filers are required to follow the standard in 2020, all remaining entities were granted a reprieve until 2023. Mr. Pinegar stated NAIC staff recommend continual monitoring of FASB for updates and will keep the Working Group informed regarding developments. Mr. Bruggeman stated that only large SEC filers will be required to follow the credit loss standard in the near future and that the Working Group will continue to defer and monitor for updates.

   d. AP&P Update – Manual & Electronic Version

Mr. Pinegar stated that the reserving process to obtain a printed Accounting Practices and Procedures Manual will continue, and reservations must be made by Dec. 13, 2019 in order to secure a printed version. He stated those who do not reserve printed copies by this date may only have an electronic version available. Ms. Gann stated that members of the Working Group will receive complimentary printed versions, however if additional copies are requested, the reservation process should be utilized.
e. **U.S. GAAP Exposures**

Mr. Pinegar stated that NAIC staff have reviewed U.S. GAAP exposures and noted that comments during the exposure periods are not recommended, but a review will occur once issued as final ASUs under the statutory maintenance process. Mr. Pinegar briefly discussed two such items. First, he discussed an exposed ASU regarding proposed guidance for cash-flow hedges and the FASB’s proposal to allow prospective or retrospective review of hedged risk. The second topic he discussed was the FASB’s Reference Rate Reform project. This initiative is in conjunction with the move away from the London Interbank Offered Rate (LIBOR) as a primary reference rate. Mr. Pinegar stated that once the rate reform ASU is issued, NAIC staff will immediately review and will likely request an interim exposure of an applicable agenda item.

Mike Monahan (ACLI) stated that the ACLI is pleased with the Working Group’s attention to the Reference Rate Reform project as the FASB has indicated an expected release in early 2020. He stated this project provides temporary relief for certain hedging and contract modifications due to the discontinuance of LIBOR as a primary reference rate. He stated that the ACLI was supportive of the FASB proposal. Mr. Monahan also stated that the ACLI continues to work with FASB staff in an attempt to obtain additional temporary relief for *ASU 2018-12, Targeted Improvements to the Accounting for Long-Duration Contracts*. He stated the ACLI’s concerns are large SEC filers will be required to follow the standard earlier than smaller reporting companies and entities, and this misalignment of accounting guidance could negatively affect the reinsurance marketplace. Due to the significant volume of reinsurance placed, the ACLI will continue to seek a favorable resolution with the FASB.

Mr. Bruggeman stated that Jan. 31, 2020, is the public comment deadline for all exposures other than the editorial agenda item (Ref #2019-44EP), which has a comment deadline of Dec. 20, 2019.

Having no further business, the Statutory Accounting Principles (E) Working Group adjourned.
1. **Considered Maintenance Agenda Item 2019-32**

Mr. Bruggeman directed the Working Group to agenda item 2019-32: Segregated Accounts. Ms. Gann stated this agenda item was drafted to clarify statutory accounting provisions for insurance and reinsurance operations reported within segregated accounts that are not captured in scope of *Statement of Statutory Accounting Principles (SSAP) No. 56—Separate Accounts or SSAP No. 74—Insurance-Linked Securities Issued Through a Protected Cell*. Ms. Gann stated that the term “segregated account” within this agenda item was intended to capture all scenarios in which a reporting entity has legally separated specific assets and liabilities for certain insurance risks. The legal classification and use of segregated accounts is determined based on domiciliary state law and state insurance regulator approval. Ms. Gann stated that while segregated accounts are considered separate and distinct from items captured in SSAP No. 56 or SSAP No. 74, the draft agenda item clarifies that all assets and liabilities within segregated accounts shall be captured within the principles detailed in the NAIC *Accounting Practices and Procedures Manual* (AP&P Manual). Further, any departure from the AP&P Manual shall be captured as a permitted or prescribed practice as detailed in *SSAP No. 1—Accounting Policies, Risks & Uncertainties, and Other Disclosures*. Ms. Gann stated that this agenda item was proposed for initial exposure to solicit comments and feedback from state insurance regulators and interested parties.

Ms. Gann stated that the primary focus of the proposed SSAP was to clarify that statutory accounting principles apply to segregated accounts. She stated that two reporting options were proposed within the SSAP. The first option was to report the segregated account aggregated into the general account. The second was to report the segregated account disaggregated from the general account. Ms. Gann stated the two reporting methods were proposed in order to comply with differing domiciliary laws that dictate a certain reporting method.

Mr. Smith stated the legal status of segregated accounts remains uncertain and questioned why an SSAP would be created before the legal questions were resolved. He stated that questions continue on whether segregated accounts should be used for insurance purposes and that the issuance of an SSAP addressing segregated accounts may be premature. Mr. Bruggeman stated that there are known situations where segregated accounts are being used. However, he said there is a current lack of direction on accounting and reporting, regardless of outstanding legal status questions. Mr. Bruggeman stated that the Restructuring Mechanisms (E) Subgroup should lead the legal discussion. However, he said the proposed SSAP exposure was intended to begin the process for obtaining feedback on how segregated accounts should be reported, irrespective of legal status.

Mr. Stolte stated he believes the issuance of an SSAP was getting ahead of the Restructuring Mechanisms (E) Subgroup as the legal status of this type of structure remains an outstanding question. Mr. Stolte stated that this type of structure may not be in the best interest of policyholders and that if an SSAP were issued, it may legitimize the practice. He stated that Virginia is concerned with moving forward until the legal questions regarding segregated accounts are addressed.

Ms. Gann stated that NAIC staff agreed with the comments mentioned. However, she said the SSAP was designed so that in the event a state has approved a segregated account structure, the reporting of assets and liabilities would be captured in existing statutory accounting principles. She stated that the proposed guidance was to clarify how segregated accounts should be reported until the Restructuring Mechanisms (E) Subgroup comes to a final conclusion regarding the use of segregated account structures. She stated that NAIC staff support referring the proposal to the Restructuring Mechanisms (E) Subgroup.

Mr. Stolte stated that statutory accounting, through Note 1, already provides guidance on reporting if practices deviate from current codified statutory accounting principles. He stated that if companies were using an existing SSAP for reporting such a structure, the domiciliary states should require a Note 1 disclosure for oversight and risk-based capital (RBC) purposes. In
response to an inquiry from Mr. Bruggeman, Mr. Stolte confirmed he was referring to the prescribed practice disclosure that should be completed when state laws permit segregated accounts.

Mr. Hudson stated that California was supportive of Mr. Stolte and Mr. Smith’s comments. He stated that while a segregated account’s assets and liabilities should be reported, the process of reviewing a segregated account should begin with a different group and agreed with a referral to the Restructuring Mechanisms (E) Subgroup. Ms. Malm stated that she agreed with Mr. Hudson’s comments and suggested that an annual statement blank instruction should be developed detailing how segregated accounts should be reported. Mr. Hudson agreed with Ms. Malm.

Mr. Bruggeman stated that he understands the comments and clarified that if a state law permits a segregated account to be formed, the reporting entity should be detailing the provision in Note 1 as a prescribed practice.

Ms. Gann stated that the annual statement blanks currently indicate a reporting line for “segregated accounts, protected cells, and separate accounts.” However, she said only protected cells and separate accounts are addressed by statutory accounting. She stated that NAIC staff agree with the comments made, but an SSAP update is warranted to clarify reporting for items that are not captured in SSAP No. 56 or SSAP No. 74. She stated that reporting “segregated accounts” on the noted reporting line results with distinct RBC effects that do not reflect the same RBC impact that would have occurred if the items were reported in the general account.

Mr. Smith inquired if an SSAP interpretation would be an appropriate method in lieu of the issuance of a new SSAP. Mr. Bruggeman stated that an interpretation may be an appropriate method, but it may not be substantial enough due to the nature of these structures and as interpretations are generally used to clarify an existing SSAP. Mr. Bruggeman said that due to the circumstances, specific guidance on how to report segregated accounts is warranted.

Ms. Gann stated that due to the comments noting concerns on the aggregated or disaggregated reporting options, the proposed SSAP could be modified to remove these options and clarify that segregated accounts are not captured within SSAP No. 56 or SSAP No. 74 and require disclosure of segregated accounts. Mr. Hudson stated support for this suggested edit.

Mr. Broccoli stated that while the legal status of segregated accounts remains in question, the proposed draft SSAP provides an appropriate reporting mechanism. He stated that the general account does not have legal access to the assets in the segregated account. As such, it is important for state insurance regulators to review the financial condition of the segregated account independent of the general account because if combined, a strong general account could mask an insolvent segregated account. Mr. Broccoli stated that the draft SSAP provides a transparent method of assessing the segregated account as its policyholders do not have access to general account assets in the event a segregated account becomes insolvent.

Mr. Bruggeman stated that a Note 1 option could be employed to capture all items not specifically identified in statutory accounting, detailing the segregated account effect on the reporting entity’s surplus and income. However, as assets from the general account and segregated account are not transferable between the two entities, increased reporting and disclosure could be beneficial for assessing the segregated account. Mr. Stolte stated Virginia has seen the surplus of segregated accounts being combined into the general account, even though the segregated account surplus is not free and unencumbered for use by the general account. He said that Note 1, if properly used, could properly report a segregated account.

In response to an inquiry from Mr. Bruggeman on next steps, Mr. Hudson and Ms. Malm stated they support the discussed editorial updates to the proposed SSAP for subsequent review by the Working Group. Mr. Bruggeman inquired if there were any objections to this approach. No objections were noted.

2. Discussed Other Matters

Ms. Gann stated that a data call template regarding surplus notes has been provided to members of the Working Group and that feedback should be provided by Sept. 13.

Having no further business, the Statutory Accounting Principles (E) Working Group adjourned.

Mr. Dale Bruggeman, Chairman
Statutory Accounting Principles Working Group
National Association of Insurance Commissioners
1100 Walnut Street, Suite 1500
Kansas City, MO 64106-2197

RE: Exposure Drafts Released for Comment During NAIC National Meeting with Comments due October 11

Dear Mr. Bruggeman:

Interested parties appreciate the opportunity to comment on the exposure drafts released for comment by the Statutory Accounting Principles (E) Working Group (the “Working Group”), during the NAIC Summer National Meeting in New York. We offer the following comments:

Ref #2017-28: Reinsurance Credit

The Working Group adopted, as final, Issue Paper No. 162—Property and Casualty to document for historical purposes the revisions related to SSAP No. 62R—Property and Casualty Reinsurance, which was adopted at the 2018 Fall National Meeting.

In addition to the issue paper adoption, on August 3, 2019, the Working Group also exposed for comment the following items applicable to SSAP No. 61R – Life, Deposit-Type and Accident and Health Reinsurance (SSAP No. 61R) and Appendix A-791 – Life and Health Reinsurance Agreements (A-791):

1. Disclosures, (previously exposed) and concurrent with the exposure, directed notification to the Financial Analysis (E) Working Group of the exposure as the disclosures were originally developed at their request.

2. The two A-791 QA items related to certain nonproportional reinsurance contracts” covered under the A-791 and medical loss ratios (previously exposed – the drafting group reviewed the comments).

3. Regulator proposed revisions to add A-791 QA under paragraph 2c regarding group term life YRT reinsurance contracts.
Interested parties appreciate the outreach the NAIC has made to the industry through the informal SSAP No. 61R Life and Health reinsurance drafting group. We believe the drafting group has allowed us to better understand the issues raised by regulators.

In summary, we do not have any concerns with the re-exposed disclosures and the two Q&A’s regarding short-duration health reinsurance treaties and offer the following comments.

With respect to the group term life YRT exposure, in general interested parties believe this draft exposure language addresses the concerns expressed by regulators in the drafting group and in prior exposures, and we would support this Q&A being added to 2.c in Appendix A-791, as long as the guidance does not impact contracts that do not raise such concerns as described below.

The proposed Q&A would deny risk transfer for specific group term life YRT reinsurance transactions if the reinsurer has the right to charge reinsurance premiums higher than the premiums received by the ceding company on the business reinsured. However, SSAP 61R and Appendix A-791 specifically exempt YRT reinsurance arrangements from paragraph 2.e of Appendix A-791, which denies risk transfer if the reinsurance agreement charges reinsurance premiums greater than the direct premiums collected by the ceding company.

There are specific circumstances where YRT reinsurance agreements do have reinsurance premiums greater than direct premiums, yet reinsurance accounting is appropriate, and this 2.e exemption has allowed those circumstances to meet risk transfer regulations. Examples of such reinsurance agreements include:

1. High level excess YRT agreements. High amount policies have higher volatility in claims. It is reasonable and appropriate for a reinsurer to charge a higher amount to cover these claims.
2. Level term premiums, where a true one-year risk premium in later years is likely to exceed the level premium.
3. In force business, where a ceding company has realized they are not charging sufficient premiums for the true risk. The ceding company may have to accept higher reinsurance premiums than they charge to appropriately discharge the risk going forward.
4. YRT for universal life. YRT premiums often will not have a direct or proportional relationship to either the premiums or cost of insurance rates charged by the ceding company.

The concerns about group term life YRT reinsurance raised by regulators are focused on reinsurance agreements with risk limiting features. As the exposure is phrased, the guidance here would be limited to group term life YRT reinsurance agreements where future experience refunds can be offset against current and prior year losses. Reinsurance agreements such as those in the examples above are unlikely to have such a loss carryforward provision, and thus should not be impacted by this guidance. Additionally, we would like to comment on the implementation/timing of the proposed exposure, when it is finalized. We believe that there are reinsurance transactions in place today which meet current regulations for risk transfer that would not meet risk transfer under this new guidance. This new Q&A may impact some company’s financial statements. Consideration should be given to grandfathering these transactions, or to establishing a prospective effective date that would provide enough time for these companies to make appropriate changes to their reinsurance agreements or to otherwise prepare for this impact. If a prospective effective date is the approach chosen, we recommend an effective date of 1/1/2021.
Ref #2018-26: SCA Loss Tracking – Accounting Guidance

The Working Group exposed revisions to SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, to revise the existing reporting requirements for when a reporting entity has a negative value in an SCA investment when the reporting entity has provided a financial commitment or guarantee. The illustration from the existing INT 00-24: EITF 98-13: Accounting by an Equity Method Investor for Investee Losses When the Investor Has Loans to and Investments in Other Securities of the Investee and EITF 99-10: Percentage Used to Determine the Amount of Equity Method Losses has also been moved to SSAP No. 97, in its entirety, as a new exhibit. This INT provides examples of how losses in an SCA shall be applied to other investments once the SCA equity investment has been halted at zero.

On August 3, 2019, the Working Group re-exposed revisions to SSAP No. 5R—Liabilities, Contingencies and Impairments of Assets and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, to require a financial commitment or guarantee for a subsidiary, controlled, or affiliated (SCA) entity to be recognized as a non-contingent guarantee liability. These proposed revisions differ from the prior exposure as they would capture the entire financial guaranty or commitment for an SCA within scope of SSAP No. 5R and report a zero value for SCAs with a negative equity value.

Interested parties believe that additional clarifications are necessary regarding the proposed revisions to paragraphs 18 and 24 of SSAP No. 5R. Regarding paragraph 18, we believe a parent’s guarantee on behalf of an SCA entity with negative equity could result in the recognition of either an initial guarantee liability or a liability subsequent to the initial recognition. Therefore, we propose more general wording to the end of paragraph 18 as follows:

18. The following types of guarantees are exempted from the initial liability recognition in paragraphs 20-25, but are subject to the disclosure requirements in paragraphs 29-32. For the guarantees addressed in paragraphs 18f and 18g, recognition of a contingent guarantee may be required subsequent to initial recognition in accordance with paragraph 24a:

   a. Guarantee that is accounted for as a derivative instrument, other than credit derivatives within SSAP No. 86;
   b. Guarantee for which the underlying is related to the performance of nonfinancial assets that are owned by the guaranteed party, including product warranties;
   c. Guarantee issued in a business combination that represents contingent consideration;
   d. Guarantee in which the guarantor’s obligation would be reported as an equity item;
   e. Guarantee by an original lessee that has become secondarily liable under a new lease that relieved the original lessee from being the primary obligator;
   f. Guarantees (as defined in paragraph 16) made to/or on behalf of directly or indirectly wholly-owned insurance or non-insurance subsidiaries; and
   g. Intercompany and related party guarantees that are considered “unlimited” (e.g., typically in response to a rating agency’s requirement to provide a commitment to support).

The exemptions for items f and g above do not apply in situations in which a reporting entity has provided a financial guarantee or commitment to support a subsidiary, controlled or affiliated entity (SCA), and the SCA’s equity is negative (see paragraph 24).
We find the new paragraph 24 wording confusing in that it tells the preparer in the first sentence to recognize the greater of the guarantee liability or the negative equity of the SCA. However, the third sentence clarifies that the guarantee liability shall not exceed the maximum amount of the guarantee. We propose condensing these items into one sentence in our recommended revisions below, and also clarifying that the “greater” term actually refers to the greater negative impact to the reporting entity’s financial statements. We also recommend that the new proposed paragraph be a stand-alone paragraph (i.e., new paragraph 25, with re-numbering of all subsequent paragraphs):

“In situations in which a reporting entity has provided a financial guarantee or commitment to support a subsidiary, controlled or affiliated entity (SCA), and the reporting entity’s share of losses in the SCA exceed the equity method carrying amount of the SCA (resulting in a negative equity value in the SCA), the reporting entity shall adjust the initially-recognized guarantee obligation to reflect the greater impact of (i) the then-current fair value liability for of the guarantee or (ii) the negative equity position, limited to the maximum amount of the financial guarantee or commitment provided by the reporting entity. (For This guidance requires the recognition of a guarantee liability for guarantees captured in paragraphs 18f and 18g this guidance requires recognition of a contingent guaranty when negative equity exists in an SCA.) The recognized guarantee liability shall not exceed the maximum amount of the financial guarantee or commitment provided by the reporting entity. The guidance in paragraphs 24 and 25 20 through 26 shall be followed for the recognition of recognizing a contingent liability and subsequent re-recognition of a noncontingent liability, as applicable.”

Ref #2019-04: SSAP No. 32 – Investment Classification Project

The Working Group exposed for comment Issue Paper No. 1XX—Preferred Stock to revise the definitions, measurement guidance and impairment guidance for preferred stock pursuant to the investment classification project.

Interested parties substantially agree with the objectives of the proposal to:

a. Improve preferred stock definitions, with inclusion of information from U.S. generally accepted accounting principles (GAAP) for classifying preferred stock as redeemable or perpetual. The revisions also incorporate a new exhibit to capture various terms prevalent in preferred stock.

b. Revise the measurement guidance to ensure appropriate, consistent measurement based on the type of preferred stock held and the terms of the preferred stock. The revisions also incorporate guidance for mandatory convertible preferred stock.

c. Incorporate revisions to clarify impairment guidance as well as guidance for dividend recognition and redemption of preferred stock with the issuer.

Interested parties have the following comments related to the issue paper:

Overall:

The issue paper refers to preferred stock throughout the document, at times the paper references the instruments as securities. For purposes of definitional clarity we do not believe the use of the term security is interchangeable as it pertains to preferred stock. As such, we recommend that all references to security be changed to interest or directly reference the type of stock under discussion.
Scope:

Interested parties note that the scope retains, albeit edited, the guidance that preferred stock of subsidiary, controlled and affiliated entities is included and therefore accounted for under the guidance for preferred stock regardless of their SCA character. Interested parties also note that preferred stock in SCAs other than preferred stock issued by domestic insurance entities is required to be filed with the NAIC pursuant to paragraph 50 of SSAP No. 97 Exhibit A – SCA Reporting Process. For the avoidance of doubt, interested parties suggest a clarifying sentence in double underline below. The existing wording in SSAP No. 32 and the exposed language for SSAP No. 32 is below with interested parties suggested clarifying sentence (underlined).

Existing language in SSAP No. 32

SCOPE OF STATEMENT

1. This statement establishes statutory accounting principles for preferred stock.

2. Investments in preferred stock of subsidiaries, controlled or affiliated entities, including preferred stock interests of certified capital companies (CAPCO) per INT 06-02: Accounting and Reporting for Investments in a Certified Capital Company (CAPCO) are included within the scope of this statement.

Exposed language in SSAP No. 32 and interested parties suggested clarifying sentence in underline

SCOPE OF STATEMENT

1. This statement establishes statutory accounting principles for preferred stock.

2. Investments in preferred stock of entities captured in SSAP No. 97—Investments in subsidiaries, controlled or affiliated entities or SSAP No. 48—Joint Ventures, Partnerships and Limited Liability Companies, as well as preferred stock interests of certified capital companies per INT 06-02: Accounting and Reporting for Investments in a Certified Capital Company (CAPCO) are included within the scope of this statement. The requirement to file investments in preferred stock of certain subsidiaries, controlled or affiliated entities with the NAIC pursuant to SSAP No. 97 does not affect the application of the accounting under this statement.

Definitions:

The proposed definitional guidance could potentially change the scope of what is considered redeemable preferred stock vs perpetual preferred stock and create an inconsistency as to how the preferred stock would be treated. Under the previous guidance, redeemable preferred stock included stock that was mandatorily redeemable or redeemable at the option of the holder. This definition was consistent with how GAAP distinguishes between debt and equity security classification under ASC 321, Investments – Equity Securities. We believe the intention of the Staff was to align the definitions with the treatment under GAAP. However, using the language from ASC 480, which addresses the accounting from the issuer’s perspective, does not align with how the investor in the security accounts for the asset under GAAP. As such we propose the following revisions (indicated with edit marks) to the definitions:

3. Preferred stock shall include:

   a. Redeemable preferred stock, which is preferred stock subject to mandatory redemption requirements or whose redemption is outside the control of the issuer. Redeemable preferred stock is any stock which 1) the issuer undertakes to redeem at a fixed or determinable price on the fixed or determinable date or dates, whether by operation of a sinking fund or otherwise; 2) is redeemable
at the option of the holders; or 3) has conditions for redemption which are not solely within the control of the issuer, such as stock which must be redeemed out of future earnings. Preferred stock which meet one or more of these three criteria would be classified as redeemable preferred stock[1] regardless of other attributes such as voting rights or dividend rights. (Staff Note – this definition comes from FASB ASC 480-10-S99, modified to eliminate reference to conversion features as mandatory convertible preferred stock has special treatment under this SSAP.) ; and to be consistent with the description of redeemable preferred stock for a holder in the ASC Master Glossary definition of debt security.)

b. Perpetual preferred stock, which is preferred stocks which are not redeemable or are redeemable other than solely at the option of the issuer holder (non-redeemable preferred stock). Perpetual preferred stock is any preferred stock which does not meet the criteria to be classified as redeemable preferred stock pursuant to paragraph 3.a. Staff Note – this definition comes from FASB ASC 480-10-S99 modified to be made consistent with the description of redeemable preferred stock for a holder in the ASC Master Glossary definition of debt security.)

**Fair Value Cap for Callable Perpetual Preferred Stock:**

The issue paper broadly requires fair value measurement for redeemable preferred stock, perpetual preferred stock, mandatory convertible preferred stock and dividends (paras 16.a-d, para 18), depending on the quality rating expressed as an NAIC designation. Interested parties note that these assets may not have readily determinable fair values, and as such, fair value techniques using the cost approach, Level 3 inputs and practical expedients may be prevalent and necessary for these assets.

The issue paper discusses carrying perpetual preferred at fair value capped by any call price. However, it did not provide guidance on timing for application of the cap. Because the call may not be effective for a period of time, we propose the language be modified to state that “the measurement for these preferred stocks reflects fair value, not to exceed any currently effective buy back rates (call prices) that the issuer can utilize to redeem the stock.” These provisions would ensure that purchases of perpetual preferred stock could still be carried at values greater than par (assuming market values remain above par).

**Other Than Temporary Impairment (OTTI):**

For perpetual preferred stock, if the intent of the clarification is to provide OTTI guidance when the asset is already recorded at fair value then we would suggest OTTI language consistent with SSAP No. 30R, revised for preferred stock as follows:

For any decline in the fair value of a perpetual preferred stock, reported at fair value, for which the decline is determined to be other than temporary the perpetual preferred stock shall be written down to the new fair value basis and the amount of the write down shall be accounted for as a realized loss. For those reporting entities required to maintain an AVR, realized losses shall be accounted for in accordance with SSAP No. 7. Future declines in fair value which are determined to be other than temporary shall be recorded as realized losses. A decline in fair value which is other than temporary includes situations where a reporting entity has made a decision to sell a security at an amount below its carrying value.

© 2019 National Association of Insurance Commissioners
Ref #2019-08: Reporting Deposit-Type Contracts

The Working Group exposed this agenda item with the inclusion of the items and questions that were noted, with a request for additional comments from industry and state insurance regulators, and directed notifications of the exposure with a request for comments to the Financial Stability (EX) Task Force and the Life Actuarial (A) Task Force on the reporting of insurance contracts that do not have a mortality or morbidity risk.

This agenda item was initially drafted in response to questions identified by the Financial Stability Task Force (“FSTF”) in developing liquidity disclosure changes to the 2019 life blank. An agenda item was exposed with a request for comments on why guaranteed investment contracts (“GICs”), or other deposit-type contracts, are reported in Exhibit 5 – Life Contracts or Exhibit 6 – Accident and Health Contracts, instead of Exhibit 7 – Deposit Type Contracts.

On August 3, 2019, this agenda item was re-exposed with the inclusion of the items and questions noted below, with a request for additional comments from industry and state insurance regulators, and directed notifications of the exposure with a request for comments to the FSTF and the Life Actuarial Task Force on the reporting of insurance contracts that do not have a mortality or morbidity risk.

Before responding to the questions raised, interested parties note that the comments from the FSTF anticipates a classification system based on degree of risk. This is entirely new. The current classification is based strictly on mortality guarantees (Exhibit 5), morbidity guarantees (Exhibit 6), or neither (Exhibit 7). There is no concept of degree of risk in the current statutory classification. If the benefits of such fundamental changes to Exhibits 5, 6, and 7 were demonstrated to outweigh the costs, this would be a significant undertaking and companies would need significant lead time to implement systems changes. Please see the questions and interested parties (IP) responses below:

1. **Classification at Issuance** – The interested parties noted that because a contract was life-contingent at issue, it is reported in Exhibit 5, and then it remains in Exhibit 5 after the death of the annuitant.

   **Question** – Is it appropriate to classify products based on original issuance when the original risks are no longer present in the contract? Is this simply past industry practice, or is there direction that prevents reclassification to the category that most appropriately reflects the risk? Preliminary information received from the Financial Stability (EX) Task Force (FSTF) staff has noted that this practice will make it more difficult to properly aggregate and assess deposit-type contracts, and that this assessment is important as the payouts for deposit-type contracts are significantly different than payouts generated by an insured event. The Task Force has identified that information on liabilities, particularly those that can be called quickly with little or no surrender penalty, is of critical importance to liquidity assessments.

   **IP Response** - Tradition and SSAP No. 50 generally classify contracts with *any* life contingencies as life contracts. In practice, this “any life contingencies” is interpreted as those that are guaranteed.
SSAP No. 50, Paragraph 5, includes the statement, “Such classification shall be made at the inception of the contract and shall not change.” In practice, if there is a new contract, such as a supplementary contract to a life insurance benefit, the contract is re-evaluated as to whether it contains life contingency guarantees. For policyholder election of a payout benefit from a deferred annuity contract, re-evaluation varies depending on the Company’s valuation and risk policies. (For example, two-tiered policies are priced for annuitization, and the election of an annuitization option may be treated as a continuing contract and may not create a re-evaluation.)

For payout contracts issued as life contingent with a minimum guaranteed certain period, death of the original annuitant does not cause a change in contract. It is a change in payee for the remainder of the guaranteed certain period.

2. **State Approval** – The interested parties noted that state insurance departments have the discretion to approve or require a contract to be classified as a life or A/H insurance contract.

   **Question** – If a state directs reporting differently than what is stipulated in the AP&P Manual, is that being captured as a permitted or prescribed practice? (The provisions in SSAP No. 1 require permitted / prescribed practice reporting when it results in different statutory reporting. Examples included in SSAP No. 1 include gross or net presentation, financial statement reporting lines, etc.)

   **IP Response** - In our observation and experience, discretion exercised by state insurance departments on product classification is rare. When it happens, it is generally in the product filing process, generally applies to group products (e.g., association group), and where there is judgement as to whether the benefits should be classified as Exhibit 5 or Exhibit 6.

3. **Annuity Guidance** – The interested parties cited existing annuity guidance in paragraph 20 of SSAP No. 50 - Classifications of Insurance or Managed Care Contracts. Per this guidance, contracts containing well-defined class-based (e.g., age / gender) annuity purchase rates used in defining either a specific or maximum purchase rate guarantee would constitute an annuity contract containing a life contingency that would require it to be classified as a life contract.

   **Question** – NAIC staff agrees with the citation from interested parties on annuities in paragraph 20 of SSAP No. 50 - Classifications of Insurance or Managed Care Contracts. However, with the intent to have more explicit product breakouts to allow for better assessment, is it time to clarify / revise this guidance to result with the appropriate breakouts created by FSTF? It was noted that the current concepts were established a long time ago and there is a focus on non-traditional insurance liabilities (which includes funding agreements) for liquidity risk assessment as they can have higher run risk.

   **IP Response** – We believe the current guidance supports the classification of life annuity contracts within Exhibit 5 regardless of payout status. While we acknowledge the conceptual distinction noted by NAIC Staff with respect to a single life annuity contract for which the life status has changed, we do not believe this represents a significant change in the risk profile of a given block of annuity contracts, for which the majority may not reach term-certain status.
We would also highlight the administrative burden of the proposed changes. As a practical matter, it would be necessary to convert life annuity contracts to new plan codes on the death of the annuitant in order to capture the appropriate information in the Summary of Operations by Line of Business. This change must be implemented at the policy administration system level and would require significant time and effort on the part of industry. We do not believe the perceived benefits of this change justify the cost, particularly given recent significant annual statement changes for product reporting. Rather than implementing additional product granularity at this time, we suggest that regulators and staff work with industry to review the new Note 32 and Note 33 disclosures, which are specifically designed to communicate liquidity risk. We believe these disclosures will fulfill the regulatory objective in a more cost-efficient manner.

4. Materiality of Issue – Although the interested parties cite a “common” scenario, without information in the financial statements, there is no current ability to identify the extent contracts with no remaining mortality or morbidity risk are reflected as life contracts.

Question – To what extent are deposit-type contracts captured in an exhibit other than Exhibit 7? Is it possible to receive information from companies regarding this population for assessment purposes?

IP Response - We contend that by the guidance identified in SSAP No. 50, paragraph 20, a certain and life annuity, or a refund annuity, that continues payments to a surviving beneficiary after the death of the primary annuitant is not re-classified as a deposit-type contract. It is a life annuity contract where additional information on the life-status of the annuitant has become known.

Many deferred annuities contemplated by SSAP No. 50, paragraph 20a, are ultimately surrendered rather than electing a guaranteed lifetime income. These annuities are treated as investment contracts under US GAAP and re-evaluated at the time of election to annuitize. On the other hand, it is becoming more common for deferred annuities to include guaranteed minimum income benefits, minimum death benefits, or similar benefits (collectively GMxBs). A policyholder no longer has to annuitize for the contract to be subject to life contingent risks.

Ref #2019-12: ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force

Ref #2019-14: Attribution of Goodwill

The Working Group re-exposed Ref #2019-12 with a request for comments on whether pushdown accounting should be prohibited, permitted for noninsurance entities, or permitted only for U.S. Securities and Exchange Commission (SEC) registrants. The exposure also clarifies that goodwill resulting from an insurance reporting entity’s acquisition of an SCA when pushdown is applied shall be included in the reporting entity’s goodwill admittance limitation of 10% of surplus.

The Working Group re-exposed Ref #2019-14 to consider revisions to SSAP No. 97 – Investments in Subsidiary, Controlled and Affiliated Entities to require disclosure, upon acquisition of a holding company with downstream subsidiaries, of the carrying value, goodwill and admitted value of the acquired holding company as well as how the assignment of goodwill to the downstream entities was determined.
Interested parties reviewed the options exposed by the Working Group for consideration regarding pushdown accounting in Ref #2019-12. We do not recommend option 1 (“complete rejection of pushdown accounting”). With regard to the second and third options exposed for Working Group consideration, interested parties need additional time to evaluate whether these options are feasible. In our discussions, it was apparent that the proposed changes involve significant changes to insurers’ reporting and the complexities of the reporting mechanics of the annual statement will need to be addressed in applying the 10% goodwill admittance limitation and pushdown accounting. These complexities include the application of an aggregate 10% admittance limitation when multiple SCA entities carry GAAP goodwill on their individual balance sheets, as well as application to an acquired SCA holding company with subsidiaries (or layers of subsidiaries). Because annual statement reporting and disclosure includes considerable details on each investment in an SCA entity, specific guidance will likely be needed to address reporting issues such as presentation on the annual statement balance sheet and the related investment schedules, as well as interpretation related to current disclosures (including the proposed disclosures in Ref #2018-14). We believe these operational complexities need to be addressed before any proposal is considered for adoption by the Working Group.

Interested parties request additional time to evaluate various approaches for allowing pushdown accounting and working though the operational mechanics of a goodwill admittance limitation as well as evaluating the impact on insurers’ capital and surplus. Our goal is to present a recommendation for Ref # 2019-12 to the Working Group during the 2020 Spring National NAIC Meeting that addresses these complexities. Because the proposed disclosures in Ref #2019-14 includes specific SCA entity goodwill and admitted value amounts, interested parties would include those proposed disclosures in our evaluation and recommendation and, therefore, also request additional time to respond to that agenda item.

Given the need to work out clear examples that address the reporting complexities and the need for transition guidance, interested parties do not believe the proposed changes in Ref #2019-12 and Ref # 2019-14 are non-substantive nor do we believe these proposed changes can be applicable to year end 2019 reporting.

**Ref #2019-18: Accounting for “Other” Derivatives**

The Working Group re-exposed revisions to SSAP No. 86—Derivatives, to clarify that “other” derivatives not used in hedging, income generation or replication shall be reported at fair value and do not qualify as admitted assets.

Interested parties are still concerned about potential unintended consequences of the cliff effect (potential non-admission of a bond with a trivial embedded derivative) as capital markets develop. If and when problems develop, interested parties may re-examine this issue.

**Ref #2019-19: SIRI – Equity Interests**

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions that clarify what should be captured in SIRI Line 13: 10 Largest Equity Interests, noting that a look-through should only occur for non-diversified funds. The revisions also exclude Securities Valuation Office (SVO)-Identified Bond Exchange-Traded Funds (ETFs) and SVO-Identified investments with underlying characteristics of fixed-income investments from this equity interrogatory.
With exposure, a referral was directed to the Capital Adequacy (E) Task Force with a request for clarification on the impact, if any, these changes may have to risk-based capital.

Interested parties have no comment on this item.

**Ref #2019-20: Rolling Short-Term Investments**

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 2R—Cash, Drafts and Short-term Investments and SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, to incorporate additional principle concepts in classifying investments as cash equivalents or short-term investments.

Interested parties have concerns about the proposal to prohibit the reporting of certain short-term investments and cash equivalents as such. Certain short-term / cash equivalent investment structures have been identified by industry that are utilized in order to facilitate efficiencies and gain economies of scale and we believe they should continue to be reported as short-term or cash equivalents. While these investments may be regularly renewed, the risk profile continues to be commensurate with that of short-term investments or cash equivalents. Interested parties disagree with the broad-based language of the current exposure and believe there are more direct approaches to addressing concerns about inappropriate investment classification. We welcome the opportunity to discuss alternative approaches with staff.

**Short-Term Cash Pooling Arrangements:**

Many entities maintain short-term cash pooling arrangements. These arrangements have been instituted at insurance entities in order to more effectively invest enterprise cash, gain economies of scale, and reduce transaction costs; they have not been instituted in order to circumvent reporting requirements. Through the use of these arrangements, entities are able to generate higher returns for subsidiaries while reducing cost and personnel time required for investing on a short-term basis for all affiliated companies in an organization. These arrangements are often held within separate legal entities in which each participant invests or withdraws funds as needed on a short-term basis (sometimes daily), with their ownership interest in the arrangement fluctuating accordingly. However, participants maintain some level of interest in the pool for an extended period of time. These cash pooling arrangements have been permitted by model investment law; in addition, many insurers have received guidance from state regulators to report these investments as either short-term investments or cash equivalents depending upon the character of the underlying investments in the pool. We believe, although an insurer may own interest in the pools for longer than 3 months or a year, their investments in the short-term pools should continue to be reported as either short-term or cash equivalents, depending on the maturity dates of the underlying assets in the pool, because the risk of repayment is commensurate with the risk of repayment for the underlying assets.

In addition to the specific structures noted above, interested parties are concerned that the exposed guidance would result in misclassified assets on the balance sheet (e.g., BA asset for short-term pool arrangements instead of a cash equivalent), which would distort the level of cash, impacting liquidity ratios, RBC charges and presentation of cash flows. Thus, for these reasons, interested parties believe that short-term investment / cash equivalent reporting should continue for investments made at fair market terms with contractual maturities within the applicable time periods.

© 2019 National Association of Insurance Commissioners 12
Short-Term Lending:

Regarding short-term lending, interested parties believe that the reporting of the investment should continue to follow the form of the legal agreement, including the contractual maturity. These loans are structured for several important business reasons and have contractual maturities of less than one-year, often with the ability to renew. Upon initial evaluation, lender considerations include borrower repayment ability, value of any collateral provided, current market conditions and the presence of subordinated capital. Diligent underwriting and structuring are performed, with the completed loan agreement representing a binding contract with an unconditional obligation to repay upon contractual maturity (<12 months). Neither lender nor borrower has an obligation to extend the loan; however, at maturity, both lender and borrower have the ability to re-evaluate the transaction. If either or both parties wish to extend, the lender re-evaluates the financial position of the borrower, current value of existing collateral, and terms of the loan. If the lender decides to renew the loan, the terms are reviewed and renegotiated/re-underwritten with new terms reflecting then current market rates, consistent with the provisions of SSAP 25. Therefore, any extension should be considered a new loan transaction with a new maturity date. If extension is not mutually agreed upon, repayment to the lender is contractually required. Further, for short-term lending with affiliates over certain thresholds, prior regulatory approval may be required, providing additional opportunity for regulatory oversight. Thus, as long as these short-term loans have been made at fair market rates and with fair market conditions (which is required for loan admittance in accordance with SSAP No. 25 paragraph 9, if applicable), the economics and risk of the investment is commensurate with short-term investment reporting.

Interested parties recommend that the scope of the issue be identified prior to proposing any changes to the SSAPs. This should include identification of specific problematic investment structures, under which the economics of the transaction are not commensurate with the current classification. Once the scope and magnitude are identified, a decision can be made whether the targeted issue is widespread or limited to a few companies and whether a more direct approach may also have the desired result.

Ref #2019-22: Wash Sale Disclosure

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, to clarify that only investments that meet the definition of a wash sale in accordance with SSAP No. 103R that cross reporting period-end dates would be subject to the wash sale disclosure.

Interested parties support the proposed revisions.

Ref #2019-23: Going Concern

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, to clarify that if an unalleviated going concern is noted in audited financial statements or audit opinion, the SCA shall be nonadmitted.

Interested parties have no comment on this item.
Ref #2019-24: Levelized and Persistency Commission

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 71—Policy Acquisition Costs and Commissions, to clarify levelized commissions guidance and provide additional direction regarding commissions that are based on policy persistency. The revisions also clarify that the recognition of commission expense is based on experience to date.

The proposal as written will be a substantive change to the current guidance and to our industry, despite being categorized as nonsubstantive. The proposed changes do not merely clarify the current SSAP 71 regarding commissions, but substantially change a key point regarding persistency. During the SAP formulation process, there were two Issue Papers issued in 1996 (January and final paper in September 1996), the latter of which introduced the last sentence of paragraph 5 of the current SSAP 71. The addition of this sentence in the final issue paper from 1996 makes a distinction between the levelized commissions described as funding agreements and those which are based on persistency and other traditional elements. The effect of removing that distinction is substantive and requires the protocol of a substantive change. Additional comments and details are as follows:

1. The proposal makes substantive changes to the accounting paradigm for levelized commissions. As written, the proposed changes may have serious unintended consequences to statutory accounting. The nature of the exposed substantive changes separates the issue of “persistency” as a key element of the levelized commission payment mode of operation. This practice is engaged in by several insurers, specifically companies issuing variable life and annuity products. For example, per the exposed language, a liability for trail commissions over possibly decades would be required at policy issuance although not formally due. Persistency is a critical insurance risk. (See proposed language that the only obligating event is initial sale of a policy.) Ignoring persistency runs directly counter to various other principles of statutory accounting, most notably the definition of principle risks for reinsurance consideration in A-791.

2. The newly installed Principles-Based Reserving ("PBR") methodology allowed by regulators now includes the commission element. The effects of the proposal on PBR have not been reviewed or analyzed to determine if there are any unintended consequences, possibly double-counting, that inure to the proposal.

3. The effects of the proposal relative to reinsurance transactions have not been reviewed and analyzed inasmuch as reinsurance transactions must transfer risk, including persistency risk. (See note above regarding A-791.)

4. The issuance of a policy or contract is not the sole triggering event of a commission liability under a levelized commission mode of operation. Persistency requirements under the actual terms of the contract between the payor (the insurer) and the payee (the agent or broker receiving the levelized commission) is a key determinant as to when a liability is incurred. If a policy is issued but the persistency requirement is not met, then no commission liability is due.

5. The current accounting mode is standard in the industry, preceding the formulation of current SAP (reference the Accounting Practices and Procedures Manual-Life which was in force prior to the effective date of current SAP and which includes the same wording as current SSAP No. 71).
6. The proposal does not address policy fees, which can possibly be interpreted in a similar vein as commissions.

7. The proposal’s paradigm could possibly be applied to other items reflecting estimated predictable expenses that have yet to be incurred or for which benefits have not been received.

8. The proposal seems to be at odds with GAAP accounting rules as to the establishment of liabilities, specifically how GAAP treats commissions tied to persistency. Required persistency is deemed a “future” event negating the need for recording a current liability. This is differentiated where payments are merely extended (payment due solely based on passage of time) versus payments requiring ongoing commitments, persistency.

Conclusion

The proposal set forth is certainly substantial and requires additional in-depth analysis. Further, due to the substantive amendment currently proposed has broad and unintended implications, we ask the SAPWG to further consider and deliberate the issues.

Ref #2019-26: Appendix A-785 Revisions from U.S./EU and U.S./UK Covered Agreements

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to Appendix A-785, Credit for Reinsurance, related to the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance And Reinsurance” (Covered Agreement) adopted to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786).

Interested parties note that on page 17 of the exposure, paragraph 13.b refers to “paragraph 12.g” and should be “paragraph 13.g”

Ref #2019-27EP: Editorial and Maintenance Update

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed editorial revisions to SSAP No. 62R—Property and Casualty Reinsurance, SSAP No. 86—Derivatives, and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities.

Interested parties have no comment on this item.

Ref #2019-28: ASU 2019-05, Targeted Transition Relief

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 100R—Fair Value, to reject ASU 2019-05, Targeted Transition Relief for statutory accounting.

Interested parties support the conclusion reached.
Ref #2019-29: **ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities**

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 68—*Business Combinations and Goodwill* and SSAP No. 97—*Investments in Subsidiary, Controlled and Affiliated Entities*, to reject ASU 2019-06, *Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities* for statutory accounting.

Interested parties support the proposed revisions.

Ref #2019-30: **ASU 2019-03, Updating the Definition of Collections**

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to Appendix D—*Nonapplicable GAAP Pronouncements* to reject ASU 2019-03, *Updating the Definition of Collections* as not applicable to statutory accounting.

Interested parties have no comment on this item.

Ref #2019-31: **ASU 2018-08, Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made**

The Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to Appendix D—*Nonapplicable GAAP Pronouncements* to reject ASU 2018-08, *Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made* as not applicable to statutory accounting.

Interested parties have no comment on this item.

Mr. Dale Bruggeman, Chairman
Statutory Accounting Principles Working Group
National Association of Insurance Commissioners
1100 Walnut Street, Suite 1500
Kansas City, MO 64106-2197

RE: Exposure Draft Ref #2018-38: Prepayments to Service and Claims Adjusting Providers for Comment During NAIC National Meeting with Comments due October 11

Dear Mr. Bruggeman:

This item was initially exposed for comment in November 2018 in response to a regulator inquiry regarding prepayments to providers of claims and adjusting services for which the service provider is prepaid by the insurer. Interested parties provided comments to the original exposure draft, specifically regarding the treatment of the prepaid expenses as not being consistent with the classification of such amounts as miscellaneous underwriting expenses if the prepaid expense is for a covered peril in accordance with the underlying insurance contract.

During the 2019 Spring National Meeting, the Working Group incorporated these changes into the exposure draft and re-exposed this item for comment. The proposed accounting treatment would require prepayments for loss and loss adjustment expenses to be classified as a prepaid asset, and nonadmitted in accordance with SSAP No. 29, Prepaid Expenses. Upon payment of the claim to the policyholder, the prepaid asset would be reclassified as a loss or loss adjustment expense, in accordance with the terms of the contract.

As described in the issue summary, NAIC staff noted that this guidance is consistent with existing guidance instead of the approach to “expense and reclassify as amounts are paid” contained in the previous exposure draft. The more recent exposure draft retained the exclusion of this guidance to contracts subject to SSAP No. 84, Health Care and Government Insured Plan Receivables.

The Working Group made additional revisions to the exposure draft during the Summer National Meeting to “emphasize existing guidance that loss and loss adjusting expense liabilities are established regardless of payments to third parties. The liabilities are not recognized as paid until the losses are paid to claimants or claims are adjusted. Payments to third party administrators, which are not for claims or loss adjusting expense, are ‘miscellaneous underwriting expenses.’”

As noted in the 2019 Summer National Meeting minutes, these additional revisions were made in
conjunction with comments primarily from the health insurance industry as the previous exposure draft was not consistent with current accounting requirements.

Interested parties note that there are differences in the treatment of loss and loss adjusting expenses by different sectors of the industry. However, the current exposure removes important clarification from the 2019 Spring National Meeting exposure draft. To address these noted concerns, interested parties propose the following changes which are highlighted in yellow to the 2019 Summer National Meeting exposure draft – these changes incorporate industry specific guidance to address the differences in accounting by industry. Interested parties also propose moving exposed item 4.c. back to the last sentence of paragraph 4, along with proposed wording for the treatment of prepaid loss and loss adjusting expenses by specific sector of the industry. As reflected in the drafting note, there is already existing guidance which will remain unchanged; the additional clarifying guidance is proposed to be added to existing guidance.

**2019 Summer National Meeting exposure:**

**SSAP No. 55—Unpaid Claims, Losses and Loss Adjustment Expenses:**

4. Claims, losses, and loss/claim adjustment expenses shall be recognized as expenses when a covered or insured event occurs. In most instances, the covered or insured event is the occurrence of an incident which gives rise to a claim or the incurring of costs. For claims-made type policies, the covered or insured event is the reporting to the entity of the incident that gives rise to a claim. Until claim payments and related expense payments are made subsequent to the occurrence of a covered or insured event, and in order to recognize the expense of a covered or insured event that has occurred, it is necessary to establish a liability. Liabilities shall be established for any unpaid claims and unpaid losses (loss reserves), unpaid loss/claim adjustment expenses (loss/claim adjustment expense reserves) and incurred costs, with a corresponding charge to income. Claims related extra contractual obligations losses and bad-faith losses shall be included in losses. See individual business types for the accounting treatment for adjustment expenses related to extra contractual obligations and bad-faith lawsuits, as well as the accounting treatment for prepaid expenses as it relates to specific industries.

   a. The liability for unpaid losses and claims shall be established regardless of any payments made to third-party administrators, management companies or other entities except for capitated payments under managed care contracts. The liability for claims on non-capitated payments under managed care contracts shall be established in an amount necessary to pay the losses/claims irrespective of payments made to third-party administrators, etc. The liability for claims on capitated payments under managed care contracts shall be established in an amount necessary to adjust all unpaid claims irrespective of payments to third parties with the exception that the liability is established net of capitated payments to providers. As loss or claims payments occur, from the third-party administrators, management companies or other entities, to the policyholder or claimant, (except for capitated payments for managed care contracts) paid claims, losses or paid loss/paid claim adjusting liabilities are reduced. Note that guidance regarding the admissibility of loans and advances to providers which apply to health insurance and managed care contracts are addressed in SSAP No. 84—
Health Care and Government Insured Plan Receivables.

b. Prepayments to third party administrators or management companies or other entities that do not relate to services or adjusting for the underlying direct policy benefits are reported as 1) Aggregate write ins for miscellaneous expenses – Property and Casualty (Underwriting and Investment Exhibit Part 3); 2) Aggregate write ins for expenses – Life/ Health (Exhibit 2 – General expenses) or 3) aggregate write ins for expenses (General Administrative Expenses) – health (Underwriting and Investment Exhibit Part 3).

c. Claims related extra contractual obligations losses and bad-faith losses shall be included in losses. See individual business types for the accounting treatment for adjustment expenses related.

5. The liability for unpaid LAE shall be established regardless of any payments made to third-party administrators, management companies or other entities except for capitated payments under managed care contracts for which the liability shall be reported net of capitated payments to providers. The liability for claims adjustment expenses on non-capitated payments under managed care contracts shall be established in an amount necessary to adjust all unpaid claims irrespective of payments made to third-party administrators, etc. The liability for claims adjustment expenses on capitated payments under managed care contracts shall be established in an amount necessary to adjust all unpaid claims irrespective of payments to third parties with the exception that the liability is established net of capitated payments to providers.

a. Prepayments to third party administrators or management companies or other entities that do not relate to services or adjusting for the underlying direct policy benefits are reported as 1) Aggregate write ins for miscellaneous expenses – Property and Casualty (Underwriting and Investment Exhibit Part 3); 2) Aggregate write ins for expenses – Life/ Health (Exhibit 2 – General expenses) or 3) aggregate write ins for expenses (General Administrative Expenses) – health (Underwriting and Investment Exhibit Part 3).

Property/Casualty

Drafting Note: the following is within existing guidance. There are no proposed changes to the guidance in pars. 6.a., 6.b., and 6.c. However, there is new guidance proposed in 6.d. and 6.e. that was in pars. 4.a., 4.b., and 5.a. of the previous exposure draft. This wording is underlined.

6. The following are types of future costs related to property and casualty contracts, as defined in SSAP No. 50, which shall be considered in determining the liabilities for unpaid losses and loss adjustment expenses.

d. All prepayments (i.e., variable, fixed or bundled amounts) to third party administrators, management companies, or other entities for unpaid claims, losses and losses/claims adjustment expenses, shall be initially reported as a prepaid asset and nonadmitted in accordance with SSAP No. 29 – Prepaid Expenses.
These payments shall not be offset against any amounts required to be reported in accordance with paragraphs 4 or 5 within this guidance.

Consistent with the recognition criteria in paragraph 4, when the covered or insured events occurs the associated prepayments to third party administrators, management companies or other entities are reclassified proportionately from the prepaid nonadmitted asset to claims, losses or loss/claim adjustment expenses based on the amount of losses/claims or loss/claims adjustment expenses incurred to provide the benefit.

e. Prepayments to third party administrators or management companies or other entities that do not relate to services or adjusting for the underlying direct policy benefits are reported as miscellaneous underwriting benefits and are not included within the scope of SSAP No. 55.

Life, Accident and Health

Drafting Note: the following is within existing guidance. There are no proposed changes to the guidance in pars. 7.a., 7.b., 7.c. and 7.d. However, there is new guidance proposed in 7.e. that was in pars. 4.a., 4.b., and 5.a. of the previous exposure draft. This wording is underlined.

7. The following future costs relating to life and accident and health indemnity contracts, as defined in SSAP No. 50, shall be considered in determining the liability for unpaid claims and claim adjustment expenses:

e. In cases where insurers advance funds to third-party administrators, management companies or other entities prior to the occurrence of the claim who then, on behalf of the insurer, adjudicate the claim and make payments to insureds or other claimants, the guidance in paragraph 9 applies.

Managed Care

Drafting Note: the following is within existing guidance. There are no proposed changes to the guidance in pars. 8.a., 8.b., 8.c. and 8.d. However, there is new guidance proposed in 8.e. that was in pars. 4.a., 4.b., and 5.a. of the previous exposure draft. This wording is underlined.

8. The following costs relating to managed care contracts as defined in SSAP No. 50 shall be considered in determining the claims unpaid and claims adjustment expenses:

e. In cases where insurers advance funds to third-party administrators, management companies or other entities prior to the occurrence of the claim who then, on behalf of the insurer, adjudicate the claim and make payments to insureds or other claimants, the guidance in paragraph 9 applies.
Managed Care and Accident and Health

Drafting Note: New guidance is issued within par. 9, which is underlined. Existing par 9 is renumbered to par. 10, and all other pars within existing guidance (i.e., pars. 10 – 23, will be renumbered to 11 – 24, respectively.

9. In some instances, insurers advance funds to third-party administrators, management companies or other entities prior to the occurrence of the claim who then, on behalf of the insurer, adjudicate the claim and make payments to insureds or other claimants. In such cases the following guidance applies:

   a. For capitated payments under managed care contracts, the liability for claims and claim adjusting expenses shall be established in an amount necessary to adjudicate and pay all unpaid claims irrespective of payments to third-party administrators, management companies or other entities, and is reported net of capitated payments to providers.

   b. For non-capitated advance payments, the liability for unpaid losses/claims and related adjustment expenses shall be established regardless of any payments made to third-party administrators, management companies or other entities, and such payments shall be reported by the insurer as prepayments. Only when loss/claim and related adjusting expense payments are made by the third-party administrators, management companies or other entities, to the policyholder or claimant, shall the insurer’s liability (loss/claim or loss/claim adjustment expense reserves) be reduced. Prepayments to third party administrators or management companies or other entities that do not relate to services or adjusting for the underlying direct policy benefits are reported as (1) Aggregate write ins for expenses - Life/Health (Exhibit 2 – General expenses) or (2) Aggregate write ins for expenses (General Administrative Expenses) - Health (Underwriting and Investment Exhibit Part 3)

   Note that this guidance in paragraph 9 does not alter existing guidance regarding the admissibility of loans and advances to providers which apply to health insurance and managed care contracts which is addressed in SSAP No. 84—Health Care and Government Insured Plan Receivables.

Thank you for considering interested parties’ comments. If you have any questions in the interim, please do not hesitate to contact us.

Sincerely,

D. Keith Bell                      Rose Albrizio
Statutory Accounting Principles (E) Working Group

We have reviewed the proposed changes to SSAP No. 71 – Policy Acquisition Costs and Commissions as outlined in Ref. #2019-24. We question several elements of the proposal and strongly object to the revisions for the following reasons:

1. This is very much a substantive change to existing policy, contrary to the characterization in the published exposure draft.

2. The proposal dramatically alters the fundamental premise of statutory accounting by creating a situation in which certain historically period expenses, trail commission payments, are to be treated differently from other period expenses by way of an accrual methodology. This leads to:
   a. A hybrid of statutory, GAAP and tax accounting.
   b. Fundamentally and permanently different economics for products designed with trail commission payments, leading to the need for significant effort at primary writers to redesign and/or reprice such products, presumably at a cost to the consumer.
   c. Guaranteed renewable products, like Long Term Care Insurance, could be exposed to further rate increases if the fundamental profit dynamics of the products change as a result of the new reserving practices.
   d. New uncertainty within the statutory accounting framework as to which other period expenses should also be accrued or might be targeted for similar treatment.
   e. A situation whereby trail commission expenses have a greater impact on statutory capital than other, similar expenses.
   f. A disincentive for primary writers to align the interests of the writer, broker/agent and policyholder through trail commissions because of the unique treatment and resulting capital implications.

3. Should the proposed changes be adopted, primary writers will be exposed to new and substantial accounting and actuarial workload relating to the determination of accrual methodologies for each effected product and the related periodic ‘true-up’ required to adjust the new statutory reserves for actual performance. All this with no apparent benefit for the consumer, primary writer, investment community, or regulatory bodies.

w:\national meetings\2019\fall\tf\app\sap\minutes\attachments\1bc - acadia comment on ssap 71 exposure draft.docx
The members of the AICPA NAIC Task Force (Task Force, which is a task force of the AICPA) would like to informally request clarifications on the following exposed Statutory Accounting Principles Working Group documents:

Ref No. 2019-12: ASU 2014-17, Business Combinations - Pushdown Accounting, a Consensus of the FASB EITF
Consistent with our comments submitted June 14 on the draft exposed at the 2019 Spring National Meeting, the Task Force believes the proposed revisions could be a significant change to current SAP and requests clarification as to what is meant by "audited reconciliation" and "audited support" in the proposed new paragraph 20 of SSAP 97. Would this be similar to adjustments made to the audited U.S. GAAP carrying value for par. 8.b.ii and 8.b.iv entities? For these adjustments, there is no "audited reconciliation" included in any financial statements. An insurance entity prepares a schedule to determine the required adjustments for purposes of its carrying value of the SCA, which is subject to audit procedures in relation to the insurer’s financial statements taken as a whole, but there is no reconciliation included in the audited financial statements of the SCA.

In the re-exposed document we note that the working group clarified, for companies that receive approval from their domiciliary commissioner to continue to admit the existing goodwill that has been pushed down on or before December 31 2019, that this goodwill would be subject to the 10% of surplus limitation. We suggest that specific transition guidance be provided for companies that have not previously included this goodwill in the goodwill limitation calculation. We also suggest that the working group clarify whether this GAAP goodwill is subject to amortization under SSAP 68 (as it is not amortized under U.S. GAAP). We also request that specific transition guidance be added for companies that do not obtain approval from their domiciliary regulator to continue to admit goodwill pushed down from acquisitions prior to January 1, 2020. Given the proximity of these discussions to year-end 2019, the SAP Working Group may also want to consider whether it is too near year-end to adopt any changes for 2019, since a December 2019 adoption would likely not provide adequate time for capital planning for affected companies.

Re: SSAP No. 71—Policy Acquisition Costs and Commissions

Dear Mr. Bruggeman:

Thank you for the opportunity to provide comments on Proposal 2019-24 from the Statutory Accounting Principles Working Group regarding Policy Acquisition Costs and Commissions. The Working Group voted to expose revisions to SSAP 71 – *Policy Acquisition Costs and Commissions* - for comment at the NAIC Summer Meeting on August 3, 2019, categorized as non-substantive, to clarify levelized commission guidance and to provide additional direction regarding certain commission obligations. I offer comments on behalf of our client, DRB Insurance Solutions, LLC, a licensed insurance producer (“DRB”).

SSAP No. 71 provides that levelized commissions occur in situations in which a third party, such as a funding agent, pays agents non-levelized commissions and the reporting entity pays the third party by levelized payments. The Working Group notes that it is intended, but not necessarily guaranteed, that the amounts paid to the agents by the third-party would ultimately be repaid to the third-party from the reporting entity. SSAP No. 71 identifies such arrangements as “funding agreements” between the reporting entity and the third-party. SSAP No. 71 further provides that the use of a commission arrangement where commission payments are not linked to traditional elements (such as premium payments and policy persistency) requires the establishment of a liability for the full amount of the unpaid principal and accrued interest which is payable to a third-party related to levelized commissions.

The accounting issue is whether levelized commission arrangements that are linked to traditional elements (such as premium payments and policy persistency) should require the establishment of a liability for the full amount of the unpaid principal and accrued interest which may be paid to a third-party in the future based upon the occurrence of defined events outside the control of the parties involved. However, the persistency commission expense should be accrued proportionately over the policy period to which the commission relates and it should accrue only when fully earned and unavoidable, specifically since the payments to the funding agent are theoretically unavoidable until the policy passes the anniversary year-end date.
NAIC Staff indicates that this proposal is to recommend clarifications to the existing levelized commissions guidance and provide additional guidance regarding commission obligations that are based on policy persistency. Questions received by NAIC staff relate to the use of levelized commission arrangements and when the liability for a commission structure that is based on annual persistency is required to be recorded as a liability in accordance with SSAP No. 5R-Liabilities, Contingencies and Impairments of Assets. Staff made the following recommendations:

1. A levelized commission arrangement (whether linked to traditional or nontraditional elements) require the establishment of a liability for the full amount of the unpaid principal and accrued interest payable to a third-party at the time the policy is issued.

2. The persistency commission is accrued proportionately over the policy period in which the commission relates to and is not deferred until fully earned.

However, we respectfully suggest that requiring the expensing at policy issuance of future levelized commission payments that are contingent upon policy persistency will likely establish a dangerous precedent requiring the accrual of liabilities for other predictable future expense payments for services or other benefits that are not yet payable. Examples may include payroll costs, commissions and expense allowances on reinsurance assumed, non-vested postemployment benefits and compensated absences and/or lease obligations.

Further, in accordance with SSAP No. 5R, key characteristics of a liability include: (1) a present duty or responsibility that entails settlement by probable future transfer of assets, (2) with little or no discretion to avoid the future sacrifice, and (3) the obligating event has already occurred. With respect to recognition of commission expense, the proposed revisions to SSAP No. 71 include the justifying statement that “The issuance of the policy is the obligating event under SSAP No. 5R.” However, this statement is factually inaccurate. The insurance company is not contractually obligated to pay future levelized commissions if the policy does not persist. No subsequent levelized commission ever becomes due unless the policy remains in-force through each subsequent anniversary date. Until the policy reaches each anniversary date, the insurance company is not obligated and has no present duty or responsibility to pay the commission.

Statutory Accounting and Principle-Based Reserving

The fundamental objective of statutory accounting is to measure solvency, as expressed in the Preamble to the Accounting Practices and Procedures Manual. Statutory Accounting Principles require expensing current amounts that are no longer available to pay policyholder claims in the future or that will have no value in liquidation. However, probable future levelized commission payments are payments that have not yet been made. Accordingly, the insurance company still has the cash or other assets that will ultimately be used to make those payments should the policies persist. Therefore, required accrual of levelized commissions appears inconsistent with the fundamental objective of measuring solvency.

Principle-Based Reserving (PBR) is a new shift in reserving approach and is expected to include consideration of commission payments within policy reserves. The addition of an accrual for levelized commissions would duplicate expenses on the Statement of Operations and again, function inconsistently with the assumptions contained in PBR.
Non-Substantive Change
Levelized commission programs began over thirty years ago, before the 1998 publication of Statutory Issue Paper No. 71 and the January 1, 2001 codification of Statutory Accounting Principles. The primary objectives of a levelized commission structure include aligning the interests of the customer, the agent, and the company and improved persistency from providing ongoing customer service. There is a duty to act in the best interests of the policyholder, as well as a compensation incentive, to make sure policies are well serviced so they stay in-force.

The proposed revisions to SSAP No. 71 are designated as non-substantive and deemed to be a clarification of intent of the codified statutory guidance. However, levelized commission programs were implemented more than a decade before the codification in 2001. Therefore, this is a material change to historical accounting practices and not a clarification of original intent. Even after codification, levelized commission programs continued for years and were not identified as applying statutory accounting incorrectly.

In conclusion, the proposed revision to SSAP 71 is clearly not “non-substantive” and would have substantial unintended consequences only some of which I have mentioned here. Accordingly, the proposal requires further substantive and policy analysis prior to consideration by the Working Group. Additionally, the expansive effect of this policy decision should be subject to open deliberation and public comment as the Working Group considers further action. Thank you for the opportunity to comment.

Very truly yours
GREENBERG TRAURIG, P.A.

Mr. Dale Bruggeman
Chair of the Statutory Accounting Principles Working Group
1100 Walnut Street, Suite 1500
Kansas City, MO 64106-2197

Dear Mr. Bruggeman,

We appreciate the opportunity to comment on the Statutory Accounting Principles Working Group (the “SAPWG”) exposure regarding NAIC’s Ref #2019-20 - Rolling Short-Term Investments (the “exposure”).

We agree that SSAP No. 2R – Cash, Cash Equivalents, Drafts and Short-Term Investments should not be utilized to mischaracterize long-term investments as short-term investments. We thus support revisions to exclude from SSAP No. 2R short-term investment structures purposely designed to mature at or around 364 days (often with affiliates) with full expectation that the investment structure will be renewed (rolled). We propose modest modifications to the recommendation, however, that we believe will support eliminating abuses of SSAP No. 2R while also ensuring that legitimate short-term investment activity continues under SSAP No. 2R.

The exposure sets forth “an overall principle that investments are permitted for short-term and cash equivalent reporting only if the reporting entity reasonably expects the investment duration to be realized (e.g., terminate / mature) on the designated maturity date” (the “overall principle”). We fully support the overall principle and believe it is essential that it be preserved. We believe, however, that certain elements of the exposure are not fully consistent with the overall principle – namely, commentary and scoping around 1) all affiliated SSAP No. 26R - Bonds investments and 2) the reacquisition of the same or substantially similar short-term investment immediately after maturity of a prior short-term investment. We address each of these items in greater detail below.

**Item 1 - all affiliated SSAP No. 26 investments**

The exposure states that: “by excluding all non-affiliated ‘bonds’ from the new guidance, the ‘normal’ recurring short-term / cash equivalent investments are not expected to be impacted.” This implies that “normal” recurring short-term / cash equivalent investments can only occur between unaffiliated entities. We disagree; we believe that the overall principle should apply to all investments, not just those that are affiliated. We also believe the concern that including unaffiliated investments would inadvertently scope in U.S. Treasury-bills, commercial paper, certificates of deposit, etc., where a reporting entity may continuously reacquire the same or a substantially similar short-term investment of such nature immediately after maturity of such a prior short-term investment, can and should be addressed otherwise (see below).
**Item 2 - the reacquisition of the same or substantially similar short-term investment immediately after maturity of a prior short-term investment**

The exposure states that “the sale or maturity of an investment, with a reacquisition of the same or substantially similar security within a 1-year timeframe, would preclude the reporting entity from reporting the currently held security as a cash equivalent or short-term investment regardless of the maturity date. (This one-year timeframe prevents reporting of recurring ‘re-acquisitions’ as cash equivalents or short-term investments.) (This provision is similar to the one regarding ‘rolled’ securities but clarifies that the ‘settlement’ of a security with a reacquisition does not prevent application of the new concepts in determining cash equivalent or short-term reporting.) (NAIC staff highlights that this restriction is necessary particularly with the use of “net settlement” structures with affiliates in which no cash is exchanged.)

The reacquisition of the same or a substantially similar short-term investment immediately after the maturity of a prior short-term investment should be permitted as long as the following proposed conditions are met that substantiate and evidence that the overall principle has been factually satisfied:

1. The prior short-term investment / cash equivalent has been fully, contractually settled in cash on or prior to a maximum original maturity date of 364 days (this provision would exclude “net settlement” structures from being eligible under SSAP No. 2R).

2. The cash used to satisfy the prior short-term investment / cash equivalent cannot have been directly or indirectly (i.e., through a separate entity) provided by the same reporting entity.

We believe that incorporating the above elements would effectively exclude unaffiliated cash equivalent / short-term investments such as U.S. Treasury bills, commercial paper, certificates of deposits, and other legitimate short-term investment activity from the exposed provisions, but in a manner consistent with the overall principle and the application of SSAP No. 2R.

* * * * * *

We look forward to continue to work with the SAPWG to refine this proposal to help achieve appropriate regulatory objectives while preserving the original principle of SSAP No. 2R for the betterment of the insurance industry, its reporting entities and its policyholders. We welcome any questions you may have for us.

Sincerely,

RE: Exposure Draft Released for Comment During NAIC National Meeting, Ref. #2019-12

Dear Mr. Bruggeman:

Teachers Insurance and Annuity Association of America (“TIAA”) appreciates the opportunity to comment on the exposure drafts released for comment by the Statutory Accounting Principles (E) Working Group (the “Working Group”) during the National Association of Insurance Commissioners (“NAIC”) Summer National Meeting in New York. We respectfully submit the following comments and suggestions for modifications to Exposure Draft Ref. #2019-12, ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force (the “Exposure Draft”).

I. About TIAA

Founded in 1918 in the state of New York, TIAA’s initial mission was to improve the quality of life for teachers in retirement. Today, TIAA is the leading provider of retirement and financial services for those in academic, research, medical, and cultural fields. Over our century-long history, TIAA’s mission has always been to aid and strengthen the institutions and participants we serve and to provide financial products that meet their needs. Today, TIAA is a Fortune 100 company with over $1 trillion in assets under management and administration, and our

---

investment model and long-term approach aim to benefit the five million retirement plan participants we serve across more than 15,000 institutions. We are among the highest rated insurance companies in the U.S. by the four leading rating agencies: A.M. Best, Fitch, Moody’s Investors Service, and Standard & Poor’s. With our strong nonprofit heritage, we remain committed to the mission we embarked on in 1918 of serving the financial needs of those who serve the greater good.

To carry out this mission, our enterprise has evolved to include a diverse group of entities offering our customers a range of financial services, including asset management, retail and banking services. These diverse groups of companies help us serve customers and clients more effectively.

II. Proposed Revisions in the Exposure Draft

The Exposure Draft includes the following proposed revisions (with proposed changes to SSAP No. 68, Section 9):

**Issue:** ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force

**Status:** On April 6, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities to reject ASU 2014-17, Business Combinations – Pushdown Accounting for statutory accounting as well as explicitly prohibit the use of pushdown accounting under statutory accounting, which includes all entities accounted for under SSAP No. 48—Joint Ventures, Partnerships and Limited Liability Companies and SSAP No. 97.

On August 3, 2019, the Statutory Accounting Principles (E) Working Group exposed this agenda item with a request for comments on the three options listed below. Additionally, to ensure that goodwill resulting from an insurance reporting entity’s acquisition of an SCA when pushdown is applied is captured within the goodwill admittance limitation, the exposure includes limited revisions to reference this goodwill in SSAP No. 68—Business Combinations and Goodwill, paragraph 9. (Note: Information provided during the Summer National Meeting on the history of pushdown and information from AICPA and industry representatives has been captured within this agenda item under the “Activity to Date” section.)

**The options for Working Group consideration include:**

1) **Complete rejection of pushdown accounting.** As pushdown is now an election for SEC / U.S. GAAP filers, reporting entities can avoid use of pushdown if prohibited for statutory accounting. (NAIC staff

---

2 Data are as of June 30, 2019.
3 For stability, claims-paying ability, and overall financial strength, TIAA is one of only three insurance groups in the United States to currently hold the highest possible rating from three of the four leading insurance company rating agencies: A.M. Best (A++ rating affirmed as of June 2019), Fitch (AAA rating affirmed as of May 2019) and Standard & Poor’s (AA+ rating affirmed as of October 2018), and the second-highest possible rating from Moody’s Investors Service (Aa1 rating affirmed as of September 2018).
would propose a prospective effective date if electing this option to avoid restatement of those entities that have previously elected pushdown.)

2) Permission to use pushdown for all non-insurance entities. This option would increase optionality into the statutory financial statements. If permitted, this approach would result in different SCA values and goodwill calculations for those that follow the guidance in SSAP No. 68 and those that utilize pushdown. Under SSAP No. 68, acquired SCAs do not write-up their assets or liabilities to fair value and goodwill is calculated as the difference between purchase price and book value. Under U.S. GAAP, pushdown, acquired SCAs write-up their assets and liabilities to fair value, and goodwill is calculated as the difference between the purchase price and the fair value of the acquired entity. With pushdown, the goodwill is reported at the SCA level. As such, goodwill will be an indefinite asset unless it is identified as impaired. (Under U.S. GAAP, private entities and not-for-profit entities can elect to amortize goodwill over a 10-year period, but this is not an election for public entities.) If this option is supported, NAIC staff would recommend that the goodwill admittance limitation capture goodwill from an insurance entity’s acquisition of an SCA that is reported on the SCA financial statements. (This option would not permit pushdown for insurance SCAs (8.b.i entities).)

(If this option is considered, NAIC staff would propose restrictions on the use of pushdown that differ from U.S. GAAP. For example, under U.S. GAAP, a reporting entity could subsequent elect pushdown accounting in any reporting period after original acquisition. If pushdown was permitted, NAIC staff would propose to require the election at original acquisition and not allow subsequent elections.)

3) Permit pushdown if elected by SEC Registrants, excluding non-insurance entities. Although this option would introduce different accounting by type of reporting entity, it is consistent with when pushdown would have been applied under prior statutory accounting guidance. (Under the old SEC provisions, pushdown was only permitted when meeting certain SEC requirements.) This would seemingly allow the companies that have historically utilized pushdown under the SEC rules to continue acquisitions under that prior approach. If this option is supported, NAIC staff would recommend that the goodwill admittance limitation capture goodwill from the acquisition of an SCA that is reported on the SCA financial statements. (Also, NAIC staff would propose restrictions to the provisions to ensure the election is made at the time of original acquisition.) (This option would not permit pushdown for insurance SCAs (8.b.i entities).

Exposed Edits to SSAP No. 68—Business Combinations and Goodwill:

8. For those acquired SCA entities accounted for in accordance with paragraph 8.b.i. of SSAP No. 97 under the statutory purchase method, the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements. Therefore, pushdown accounting is not permitted.

9. Positive goodwill recorded under the statutory purchase method of accounting shall be admitted subject to the following limitation: Positive goodwill from all sources, including life, accident and health, and deposit-type assumption reinsurance and goodwill resulting from the acquisition of an SCA by the insurance reporting entity that is reported on the SCA’s financial statements (resulting from the application of pushdown accounting), is limited in the aggregate to 10% of the acquiring entity’s capital and surplus as required to be shown on the statutory balance sheet of the reporting entity for its most recently filed statement with the domiciliary state commissioner adjusted to exclude any net positive goodwill, EDP equipment and operating system software, and net deferred tax assets. Additionally, all positive goodwill shall be nonadmitted when the underlying investment in the SCA or partnership, joint venture and limited liability company is nonadmitted. When negative goodwill exists, it shall be recorded as a contra-asset. Positive or negative goodwill resulting from the purchase of an SCA, joint venture, partnership or limited liability company shall be amortized to unrealized capital gains and losses on investments over the period in which the acquiring entity benefits economically, not to exceed 10 years. Positive or negative goodwill resulting from life, accident and health, and deposit-type assumption reinsurance shall be amortized to operations as a component of general insurance expenses over the period in which the assuming entity benefits economically, not to exceed 10 years. Goodwill shall be evaluated separately for each transaction. [INT 01-18]
III. TIAA Comments on Proposed Revisions

TIAA strongly encourages the NAIC to thoroughly engage with the industry on Exposure Draft Ref. #2019-12 Business Combinations – Pushdown Accounting and the classification of the proposal as substantive or non-substantive.

We note that the NAIC classifies as “substantive listings” those items that require a new issue paper and SSAP to address the issue. Once items are placed on this listing, they are prioritized and the formal maintenance policy is followed. Conversely, “nonsubstantive listings” are those items that are considered editorial or technical in nature and for which a new SSAP will therefore not be developed. In other words, a revision to a SSAP for these items will not be deemed to modify its conclusion or original intent.4

While the NAIC categorized the revisions in the Exposure Draft as “nonsubstantive,” without industry analysis and further clarity in application, we believe the proposed changes to SSAP No. 68, paragraph 9, which would apply a 10% limitation on goodwill, could represent a substantive change in accounting. Without conducting an impact assessment and publishing a more thorough issue paper, we feel it is difficult for the NAIC to conclude that the proposed revisions do not modify the conclusion or original intent of the guidance with regards to all admitted Subsidiary, Controlled and Affiliated Entities (“SCAs”).

We acknowledge the NAIC staff’s concerns with goodwill; however, we believe staff can gain insight through deeper engagement with the industry regarding the structure of insurance entities, and the creation, accounting, and reporting of goodwill. Additionally, while we understand there are concerns with regards to goodwill treatment to non-insurance entities, we believe the NAIC can more thoroughly consider the purpose of those entities and their support of the insurance parent as these entities typically provide operational support as well as dividends that directly support policyholder obligations.

TIAA supports pushdown accounting Option 2 as proposed by the NAIC.

TIAA does not support a complete rejection of pushdown accounting (Option 1), nor do we believe that pushdown should be permitted if elected by SEC registrants (excluding non-insurance entities) (Option 3), as we predict this approach would create competitive disadvantages and unnecessary inconsistencies in the treatment of goodwill among entities.

owned by an insurer. We recommend that the NAIC continue allowing pushdown for all non-insurance entities (Option 2).

_TIAA recommends the NAIC partner with industry to conduct an impact assessment._

Given the potential substantive nature of the proposal, we recommend that industry participants partner with the NAIC to evaluate the Exposure Draft, including conducting an industry impact assessment. The assessment will include an analysis of the types of insurance entities impacted by the NAIC’s proposal and the potential effects on these entities’ organizational structure and domicile. The information gathered as a result of the impact assessment can assist in preventing the formation of competitive disadvantages and other unintended negative consequences among the affected entities. We welcome the opportunity to assist the NAIC in identifying, evaluating and driving such assessment.

_TIAA encourages the NAIC to discuss transitional guidance with the industry, and consider responses to FASB’s proposed treatment of goodwill._

As noted above, given the potential substantive nature of the NAIC’s proposed accounting changes, and in light of our view that an industry impact assessment be conducted before these changes are finalized, we believe transitional guidance, in any form (i.e., disclosure, prospective, effective dates, etc.), be carefully discussed with all interested parties before proposal.

Additionally, we recognize that the Financial Accounting Standards Board (“FASB”) is also considering the treatment of goodwill and, as such, we recommend that NAIC consider the responses to the FASB Invitation to Comment on File Reference No. 2019-720, Identifiable Intangible Assets and Subsequent Accounting for Goodwill. As many of the SCAs within scope of the NAIC proposal report goodwill on a GAAP basis, any future changes to GAAP could impact or potentially address the NAIC’s concerns.

**IV. Conclusion**

TIAA applauds the NAIC’s continued focus on this issue, and we appreciate the opportunity to comment on the Exposure Draft. We recommend that the NAIC classify Exposure Draft Ref. #2019-12 Business Combinations – Pushdown Accounting as **substantive** and work with the industry to perform an impact assessment that would inform an issue paper. We welcome the

---

opportunity to discuss our views and recommendations in greater detail and any questions you have.

Sincerely,

Oluseun Salami
Statutory Accounting Principles (E) Working Group
Maintenance Agenda Submission Form
Form A

**Issue:** SIRI – Equity Interests

**Check (applicable entity):**

- Modification of existing SSAP: P/C, Life, Health
- New Issue or SSAP: No, No, No
- Interpretation: No, No, No

**Description of Issue:**
This agenda item has been drafted pursuant to direction received during the 2019 Spring National Meeting to clarify what shall be captured in **Line 13: 10 Largest Equity Interests** of the Supplemental Investment Risks Interrogatories (SIRI). The intent of the SIRI is to assist regulators in reviewing compliance with state investment limitations and analyzing the risks inherent in an entity’s investment portfolio. However, from questions received on certain categories, it has been identified that clarity is needed to ensure consistent reporting and that the desired aggregation of risks is reported.

This agenda item is being considered subsequent to revisions incorporated to SIRI **Line 2: 10 Largest Exposures to a Single Issuer / Borrower / Investment** and the proposal of a new reporting category for “fund managers.” These clarification items were exposed by the Blanks (E) Working Group during the 2019 Spring National Meeting and adopted for 2019 year-end reporting during the Blanks (E) Working Group June 24 conference call.

Pursuant to the revisions previously recommended, it is suggested that the following concepts be followed in aggregating investments for SIRI:

- Investments held in diversified funds do not need to be separately aggregated with other investments due to the fund diversification. For this exclusion, only funds in which the issuer can assert that the fund is diversified in accordance with the 1940 Investment Act are excluded from aggregation.

- Investments held in non-diversified funds shall be aggregated with other exposures for reporting in SIRI. This aggregation shall be based on the underlying investments in funds (or other commingled investment structures). For example, if a non-diversified was issued by BlackRock, the investment exposure is not to BlackRock, but the investments captured within the non-diversified fund. To further expand, if the non-diversified fund held investments from Exxon Mobile, then those investments shall be aggregated with other investments held from Exxon Mobile (held directly or in a non-diversified fund) to determine the overall aggregate exposure to Exxon Mobile. (This requires a look-through into non-diversified funds.)

During the 2019 Spring National Meeting, two options were presented to clarify the aggregation of equity interests in Line 13. Pursuant to informal comments received, as well as the concepts noted above, this agenda item proposes revisions in accordance with the proposed “Option 2”. This approach excludes diversified funds from the look-through/ aggregation requirement and clarifies that a look-through is required to non-diversified equity funds for aggregation and reporting. It also clarifies that any equity interest (regardless of diversification) that individually qualifies as one of the largest equity interests shall be captured in SIRI Line 13.
Existing Authoritative Literature:

Supplemental Investment Risk Interrogatories (SIRI)

This set of Supplemental Interrogatories is to assist regulators in identifying and analyzing the risks inherent in the entity’s investment portfolio. The Supplemental Investment Risks Interrogatories apply only to general account assets. These lines were determined based upon the investment categories contained in the NAIC Statutory Statement and considered as invested assets. The reported amounts are to be consistent with net admitted amounts reported by the entity in the statement and supporting schedules, not on a consolidated basis. Compute the percentage calculations by dividing the reported amount by the total admitted assets reported in Line 1 of the Interrogatories unless otherwise indicated. It is recommended that the first step in responding to this set of Interrogatories is for the person preparing this document to read through the Interrogatories to gain an understanding of the reporting requirements.

Line 13.02 through 13.11 Report the amounts and percentages of admitted assets held in the ten largest equity interests (including investments in the shares of mutual funds, preferred stocks, publicly traded equity securities, and other equity securities (including Schedule BA equity interests), and excluding money market and bond mutual funds listed in Part Six, Sections 2(f) and (g) of the Purposes and Procedures Manual of the NAIC Investment Analysis Office as exempt or NAIC 1).

Determine the ten largest equity interests by first aggregating investments included in this line by issuer. For example, the reporting entity owns preferred stock of the XYZ Company of $600,000 and common stock of the XYZ Company of $300,000. The total is $900,000 ($600,000+$300,000). The reporting entity also owns bonds issued by the XYZ Company of $500,000 that are excluded from this calculation because bonds are debt instruments. Other equity securities include partnerships and Limited Liability Companies (LLC) and any other investments reported in Schedule BA classified as equity.

SIRI – As Modified Following the Blanks (E) Working Group June 2019 Conference Call – 2019-13BWG:

Line 2 Report the single 10 largest exposures to a single issuer/borrower/investment.

Determine the ten largest exposures by first, aggregating investments from all investment categories (except the excluded categories) by issuer. The first six digits of the CUSIP number can be used as a starting point; however, please note that the same issuer may have more than one unique series of the first six digits of the CUSIP. For example, the reporting entity owns bonds issued by the XYZ Company of $500,000 and common stock of the XYZ Company of $600,000. In addition, the reporting entity has a mortgage loan to the XYZ Company of $300,000. The total exposure to Issuer XYZ Company is $1.4 million ($500,000+$600,000+$300,000).

For funds that are not diversified within the meaning of the Investment Company Act of 1940, insurance reporting entities are required to identify actual exposures and aggregate those exposures with directly held investments to determine the 10 largest exposures. For example, if a reporting entity directly holds a significant number of investments in Exxon Mobil and holds a non-diversified closed-end fund with a high concentration of Exxon Mobil, the reporting entity shall aggregate the direct investments with the investments in the closed-end funds to determine the aggregate investment risk to Exxon Mobile.
Excluding: U.S. government securities (Part Six, Section 2(e)), U.S. government agency securities (Part Six, Section 2(e)), those U.S. Government money market funds (Part Six, Section 2(f)) listed in the Purposes and Procedures Manual of the NAIC Investment Analysis Office as exempt; property occupied by the company; and policy loans.

Also exclude asset types that are investment companies (mutual funds) and common trust funds that are diversified within the meaning of the Investment Company Act of 1940 [Section 5(b) (1)].

All SEC and foreign registered funds (open-end, closed-end, UIT and ETFs) and common trust funds that are diversified within the meaning of the Investment Company Act of 1940 [Section 5(b) (1)].

Report the investments held in the ten largest fund managers, with allocation between funds that are diversified or non-diversified in accordance with the meaning of the Investment Company Act of 1940. This should include all “funds” regardless of the type of fund (private placement, mutual fund, exchange-traded fund, closed-end fund, money market mutual fund, etc.), reporting schedule or underlying investments captured in a fund.

Determine the ten largest fund managers by aggregating all “fund” investments by fund manager. For example, if a reporting entity holds a BlackRock SVO-Identified Bond ETF (diversified within the meaning of the Investment Company Act of 1940) reported on Schedule D-1 at $500,000, four BlackRock diversified mutual funds reported on Schedule D-2 at $2,200,000 and two BlackRock non-diversified closed-end funds totaling $1,500,000, the reporting entity shall report their aggregated investment in BlackRock funds of $4,200,000, with $2,700,000 in diversified funds and $1,500,000 in non-diversified funds.

Activity to Date (issues previously addressed by the Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups):

During the 2019 Spring National Meeting, the Statutory Accounting Principles (E) Working Group sponsored a blanks proposal (2019-13BWG) to clarify the instructions for Line 2: 10 Largest Exposures and to incorporate a new category for fund managers (Line 14). These revisions were adopted during the Blanks (E) Working Group June 24, 2019 conference call. (The revisions are detailed above.) Also, during the 2019 Spring National Meeting, the Working Group received two options to consider revisions to Line 13: 10 Largest Equity Interests. These proposed revisions would clarify that reporting entities should always look-through funds for aggregation (option one) or add provisions that would remove diversified funds from the look-through requirement (option two):

- **Option One**: Further expansion of the instruction to identify that reporting entities shall always look-through all funds (except for the money market mutual funds and SVO-Identified bond funds) to aggregate equity interests, with explicit identification of any equity fund that qualifies as one of the 10 largest interests. (This option would not be a change in guidance but would explicitly clarify the existing requirement.)
Report the amounts and percentages of admitted assets held in the ten largest equity interests (including equity funds that qualify individually as one of the largest equity interests, and a look-through of investments in the shares of mutual funds, preferred stocks, publicly traded equity securities, and other security securities (including Schedule BA equity interests), and excluding money market and bond mutual funds listed in Part Six, Section 2(f) and (g) of the Purposes and Procedures Manual of the NAIC Investment Analysis Office as exempt or NAIC 1.

Determine the ten largest equity interests by first aggregating investments included in this line by issuer. For example, the reporting entity owns preferred stock of the XYZ Company of $600,000 and common stock of XYZ Company of $300,000 and $100,000 of XYZ identified through a look-through of a diversified stock mutual fund reported on Schedule D-2-2. The total is $91,000,000 (600,000+300,000+100,000). The reporting entity also owns bonds issued by XYZ Company of $500,000 that are excluded from this calculation because bonds are debt instruments. Other equity securities include partnerships and Limited Liability Companies (LLC) and any other investments reported in Schedule BA as equity.

- **Option Two:** Incorporate revisions to exclude aggregation of equity interests in diversified funds.

  With this approach, an entity would only need to look-through funds that are not diversified in accordance with the Investment Company Act of 1940 to aggregate their ten largest equity interests. (This change would still require explicit identification of any equity funds that qualifies as one of the 10 largest interests.)

Report the amounts and percentages of admitted assets held in the ten largest equity interests (including equity funds that qualify individually as one of the largest equity interests, and a look-through of investments in the shares of non-diversified mutual funds and ETFs, preferred stocks, publicly traded equity securities, and other security securities (including Schedule BA equity interests), and excluding money market and bond mutual funds listed in Part Six, Section 2(f) and (g) of the Purposes and Procedures Manual of the NAIC Investment Analysis Office as exempt or NAIC 1. Equity interests in all funds that are diversified in accordance with the Investment Company Act of 1940 do not need to be individually assessed and aggregated to determine the ten largest equity interests. For funds that are not diversified within the meaning of the Investment Company Act of 1940, insurance reporting entities are required to identify actual equity interests within the fund and aggregate those equity interests to determine their ten largest equity interests.

Determine the ten largest equity interests by first aggregating investments included in this line by issuer. For example, the reporting entity owns preferred stock of the XYZ Company of $600,000 and common stock of XYZ Company of $300,000 and $50,000 of XYZ identified through a look-through of a non-diversified stock closed-end fund reported on Schedule D-2-2. The total is $9650,000 (600,000+300,000+50,000). The reporting entity also owns bonds issued by XYZ Company of $500,000 that are excluded from this calculation because bonds are debt instruments. The reporting entity may also have exposure to equity interests in XYZ through mutual funds that are excluded from this calculation as the funds are diversified within the meaning of the Investment Company Act of 1940. Other equity securities include partnerships and Limited Liability Companies (LLC) and any other investments reported in Schedule BA as equity.

**Information or issues (included in Description of Issue) not previously contemplated by the Working Group:** None

**Convergence with International Financial Reporting Standards (IFRS):** Not Applicable.
Staff Recommendation: NAIC staff recommends that the Working Group expose this agenda item with the intent to sponsor a blanks proposal to clarify what should be captured in SIRI Line 13: 10 Largest Equity Interests. These proposed blanks revisions clarify that a look-through should only occur for non-diversified funds, and that investments within a diversified fund investment shall be excluded from an aggregation requirement to other equity investments. It also clarifies that any equity interest (regardless of diversification) that individually qualifies as one of the largest equity interests shall be captured in SIRI Line 13. This is consistent with the Option 2 approach presented at the 2019 Spring National Meeting. Additionally, the revisions expand the guidance to include SVO-Identified Bond ETFs, and SVO-Identified investments with characteristics of fixed-income investments as specific exclusions from the listing. (The exclusions for money market mutual funds and SVO bond mutual funds are currently in the guidance.) Comments from regulators are specifically requested on these exclusions.

Proposed Revisions to the annual statement instructions for SIRI Line 13: Ten Largest Equity Interests:

Report the amounts and percentages of admitted assets held in the ten largest equity interests (including equity funds that qualify individually as one of the largest equity interests, and a look-through of investments in the shares of non-diversified mutual funds and ETFs, preferred stocks, publicly traded equity securities, and other security securities (including Schedule BA equity interests), and excluding money market and bond mutual funds listed in Part Six, Section 2(f) and (g) of the Purposes and Procedures Manual of the NAIC Investment Analysis Office as exempt or NAIC 1. Equity interests in all funds that are diversified in accordance with the Investment Company Act of 1940 do not need to be individually assessed and aggregated to determine the ten largest equity interests. For funds that are not diversified within the meaning of the Investment Company Act of 1940, insurance reporting entities are required to identify actual equity interests within the fund and aggregate those equity interests to determine their ten largest equity interests.

Determine the ten largest equity interested by first aggregating investments included in this line by issuer. For example, the reporting entity owns preferred stock of the XYZ Company of $600,000, and common stock of XYZ Company of $300,000 and $50,000 of XYZ identified through a look-through of a non-diversified stock closed-end fund reported on Schedule D-2-2. The total is $9950,000 (600,000+300,000+50,000). The reporting entity also owns bonds issued by XYZ Company of $500,000 that are excluded from this calculation because bonds are debt instruments. The reporting entity may also have exposure to equity interests in XYZ through mutual funds that are excluded from this calculation as the funds are diversified within the meaning of the Investment Company Act of 1940. Other equity securities include partnerships and Limited Liability Companies (LLC) and any other investments reported in Schedule BA as equity.

The following funds shall also be excluded from aggregation as equity interests: SVO-Identified U.S. Direct Obligations / Full Faith And Credit Exempt List of Money Market Mutual Funds, SVO-Identified Bond ETFs, SVO-Identified Bond Mutual Funds and SVO Identified fund investments with underlying characteristics of fixed-income instruments, which do not contain underlying equities and that are outlined within the Purposes and Procedures Manual of the NAIC Investment Analysis Office.

Staff Review Completed by: Julie Gann – May 2019

Status:
On August 3, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions that clarify what should be captured in SIRI Line 13: 10 Largest Equity Interests, noting that a look-through should only occur for non-diversified funds. The revisions
also exclude Securities Valuation Office (SVO)-Identified Bond Exchange-Traded Funds (ETFs) and SVO-Identified investments with underlying characteristics of fixed-income investments from this equity interrogatory. With exposure, a referral was directed to the Capital Adequacy (E) Task Force with a request for clarification on the impact, if any, these changes may have to risk-based capital.

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted the exposed revisions to SIRI Line 13: 10 Largest Equity Interests of the blanks, as final, to clarify that a look-through should only occur for non-diversified funds, and that investments within a diversified fund investment shall be excluded from an aggregation requirement to other equity investments. Additionally, the revisions expand the guidance to include SVO-Identified Bond ETFs, and SVO-Identified investments with characteristics of fixed-income investments as specific exclusions from the listing. These revisions do not change the Accounting Practices and Procedures Manual, but will be forwarded to the Blanks (E) Working Group.

</tbody>
</table>

Description of Issue: This agenda item has been drafted to consider revisions to the wash sale disclosure captured in SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. The wash sale guidance was revised in 2017 to 1) clarify what types of investment are subject to the wash sale disclosure, 2) respond to several comments from interested parties, and 3) clarify what investments are subject to and what investments were exempt from this disclosure.

NAIC staff have been informed by industry that the tracking of wash sales can be very time-consuming and uses a large amount of resources while not necessarily responding to the main risks associated with these transactions. Investments sold and repurchased during the same reporting period, such as sold on May 1 and repurchased on May 20 and then held at the reporting date do not pose any greater risk than if the investments had been held throughout that period and at the period end date. The real risk with these transactions is investments that are sold prior to the end of a reporting period and then repurchased shortly after that date.

Existing Authoritative Literature:

- SSAP No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities provides the definition of a wash sale and the disclosure requirements.

- U.S. GAAP provides limited guidance on wash sales, mostly to identify that wash sales are captured as “sales” unless there is a concurrent contract to repurchase or redeem the transferred financial asset. (There is no definition or required disclosure for wash sales under U.S. GAAP.)

- The SEC defines a wash sale as follows:

  A wash sale occurs when you sell or trade securities at a loss and within 30 days before or after the sale you:

  - Buy substantially identical securities,
  - Acquire substantially identical securities in a fully taxable trade, or
  - Acquire a contract or option to buy substantially identical securities.

  Internal Revenue Service rules prohibit you from deducting losses related to wash sales. For more information about wash sales, read IRS Publication 550, Investment Income and Expenses (Including Capital Gains and Losses).

- The IRS has a similar definition to the SEC and disallows the recognition of losses for wash sales:

  A wash sale occurs when you sell or trade stock or securities at a loss and within 30 days before or after the sale you:
Buy substantially identical stock or securities,

Acquire substantially identical stock or securities in a fully taxable trade,

Acquire a contract or option to buy substantially identical stock or securities, or

Acquire substantially identical stock for your individual retirement account (IRA) or Roth IRA.

If you sell stock and your spouse or a corporation you control buys substantially identical stock, you also have a wash sale.

If your loss was disallowed because of the wash sale rules, add the disallowed loss to the cost of the new stock or securities (except in (4) above). The result is your basis in the new stock or securities. This adjustment postpones the loss deduction until the disposition of the new stock or securities. Your holding period for the new stock or securities includes the holding period of the stock or securities sold.

**Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups):**

Agenda item 2017-23 included clarification that money market mutual funds are excluded from the wash sale disclosure. Further, agenda item 2017-31 clarified that all cash equivalents, derivative instruments and short-term investments with credit assessments equivalent to an NAIC 1-2 designation are excluded from the disclosure.

**Information or issues (included in Description of Issue) not previously contemplated by the Working Group:** None

**Convergence with International Financial Reporting Standards (IFRS):** None

**Staff Recommendation:**
It is recommended that the Working Group move this agenda item to the active listing, categorized as nonsubstantive, and expose draft revisions to clarify that only investments that meet the definition of a wash sale in accordance with SSAP No. 103R, which are purchased or sold prior to a reporting period end and sold or repurchased after that reporting date would be subject to the wash sale disclosure. This will eliminate the need to report transactions that meet the wash sale criteria in SSAP No. 103R that are sold and purchased within the same reporting period. Wash sales that cross either a quarterly or annual reporting period must be disclosed.

**Proposed Revisions to SSAP No. 103R:**

28.l. A reporting entity shall disclose the following information for wash sales, as defined in paragraph 12, involving transactions for securities with an NAIC designation of 3 or below, or that do not have an NAIC designation (excluding all cash equivalents, derivative instruments as well as short-term investments with credit assessments equivalent to an NAIC 1-2 designation). This disclosure shall be included in the financial statements for when the investment was initially sold and is only applicable for sales and purchases that cross quarter-end or year-end reporting periods. For example, if the investment was sold December 20, 2017, and reacquired on January 10, 2018, the transaction shall be captured in the wash sale disclosure included in the year-end 2017 financial statements, while an investment sold on May 1, 2019 and reacquired on May 20, 2019 would not be required to be disclosed:

i. A description of the reporting entity’s objectives regarding these transactions;
ii. An aggregation of transactions by NAIC designation 3 or below, or that do not have an NAIC designation;

iii. The number of transactions involved during the reporting period;

iv. The book value of securities sold;

v. The cost of securities repurchased; and

vi. The realized gains/losses associated with the securities involved.

</tr>
</tbody>
</table>

Description of Issue:
This agenda item has been drafted due to the prevalence of SCAs being identified as a “going concern” in 2018 audit reports for SCA Sub 2 filings. The going concern principle is the assumption that a company will continue into the foreseeable future, unless there is evidence to the contrary. During a financial statement audit, the auditor has an obligation to review the company’s ability to continue as a going concern. If there is substantial doubt about the company’s ability to continue in the future, a going concern qualification is supposed to be included in the auditor’s opinion of the company’s financial statements. Indicators of going concern can include the following:

- Negative trends such as declining sales, increasing costs, recurring losses, adverse financial ratios, etc.
- Legal proceedings against the company, which may include pending liabilities and penalties related to the violation of environmental or other laws
- Loss or expiration of a key license or patent
- Default on a loan or inability to secure new financing
- Loss of a major customer or key supplier

Under statutory accounting, the investment in a company with a going concern audit opinion must be nonadmitted in the reporting insurance entity’s financial statements. However, statutory accounting procedures do not specify any action to be taken in the event that a going concern is noted in any other part of the audit report aside from the audit opinion. Over the last year there have been a few instances in which the audit opinions did not explicitly detail the going concern, but the notes in the audited financial statements identified that there was a going concern. (In one situation, the audit opinion originally reflected a going concern, but the audit opinion was refiled with the NAIC to eliminate the reference from the audit opinion. In this resubmission, the going concern for the company was still detailed in the audited financial statements.)

One of the key foundation concepts of statutory accounting is conservatism. Conservative valuation procedures provide protection to policyholders against adverse fluctuations in financial condition or operating results. Statutory accounting should be reasonably conservative over the span of economic cycles and in recognition of the primary responsibility to regulate for financial solvency. As such, if an unalleviated going concern is mentioned in any part of the audit report or accompanying financial statements / notes, the value of the SCA should be nonadmitted.

Existing Authoritative Literature:
SSAP No. 97:

Paragraph 8
   c. The following provides guidance regarding the audits for entities covered under paragraph 8.b.:
       i. The investment in the SCA shall be nonadmitted if the audited financial statements include substantial doubt about the entity's ability to continue as a going concern. Additionally, the investment shall be nonadmitted on the basis/contents of the audit opinion as detailed in paragraph 21.

Paragraph 21
   e. The investment shall be nonadmitted if the audit opinion contains explanatory language indicating that there is substantial doubt about the investee's ability to continue as a going concern.

Exhibit C – Implementation Questions and Answers

5. Q - Does the audit opinion provided on the subsidiaries financial statements have to be clean or unqualified in order for the SCA investment to be admitted?

5.1 A – Paragraph 21 addresses various opinions that can be issued in which an entity can record certain investments under the GAAP Equity method of accounting. In certain cases, such as when the audit opinion is a disclaimer of opinion or there is indication that there is substantial doubt about the entity's ability to continue as a going concern, the guidance states the investment shall be nonadmitted. In addition, if there is a qualified opinion due to a departure from GAAP (or an adverse opinion) or due to a scope limitation, the investment shall be nonadmitted unless the impact of the departure is quantified within the audit opinion (see quantification exception related to the valuation of a U.S. insurance entity on the basis of U.S. statutory accounting principles discussed below). In cases where the departure is quantified, the reporting entity would admit the amount after adjusting for the quantified departure from GAAP. An audit report that contains a qualified or adverse opinion for any other reason than for what is stated within paragraph 21 would result in the nonadmissibility of the investment within that subsidiary. There is no need to quantify the impact of a departure from GAAP in either the auditor's report or the footnotes to the financial statements if a qualified audit opinion is issued due to a departure from GAAP and the departure is related to the valuation of an U.S. insurance entity on the basis of U.S. statutory accounting principles. In such cases, the investment shall be admitted without quantifying the departure.

Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups): None

Information or issues (included in Description of Issue) not previously contemplated by the Working Group: None

Convergence with International Financial Reporting Standards (IFRS): None

Staff Recommendation:
Staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive and expose revisions to SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, as detailed below, to expand the parameters for nonadmittance of entities with going concern.

Proposed Revisions:
SSAP No. 97:

Paragraph 8

c. The following provides guidance regarding the audits for entities covered under paragraph 8.b.:

i. The investment in the SCA shall be nonadmitted if the audited financial statements include substantial doubt about the entity’s ability to continue as a going concern. Additionally, the investment shall be nonadmitted on the basis/contents of the audit opinion as detailed in paragraph 21.

Paragraph 21

e. The investment shall be nonadmitted if the audit opinion report or accompanying financial statements / notes contains explanatory language indicating that there is an unalleviated substantial doubt about the investee’s ability to continue as a going concern.

5. Q - Does the audit opinion provided on the subsidiaries financial statements have to be clean or unqualified in order for the SCA investment to be admitted?

5.1 A – Paragraph 21 addresses various opinions that can be issued in which an entity can record certain investments under the GAAP Equity method of accounting. In certain cases, such as when the audit opinion is a disclaimer of opinion or there is indication that there is substantial doubt about the entity’s ability to continue as a going concern, the guidance states the investment shall be nonadmitted. In instances where there is a substantial doubt about the entity’s ability to continue as a going concern listed in any part of the audit report or accompanying financial statements / notes, the investment shall be nonadmitted. In addition, if there is a qualified opinion due to a departure from GAAP (or an adverse opinion) or due to a scope limitation, the investment shall be nonadmitted unless the impact of the departure is quantified within the audit opinion (see quantification exception related to the valuation of a U.S. insurance entity on the basis of U.S. statutory accounting principles discussed below). In cases where the departure is quantified, the reporting entity would admit the amount after adjusting for the quantified departure from GAAP. An audit report that contains a qualified or adverse opinion for any other reason than for what is stated within paragraph 21 would result in the nonadmissibility of the investment within that subsidiary. There is no need to quantify the impact of a departure from GAAP in either the auditor's report or the footnotes to the financial statements if a qualified audit opinion is issued due to a departure from GAAP and the departure is related to the valuation of an U.S. insurance entity on the basis of U.S. statutory accounting principles. In such cases, the investment shall be admitted without quantifying the departure.

</table>

**Description of Issue:**

On June 25, 2019, NAIC Executive Committee and Plenary adopted revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) to incorporate relevant provisions from the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” and the “Bilateral Agreement Between the United States of America and the United Kingdom Regarding Insurance and Reinsurance” (collectively referred to as the Covered Agreement). The purpose of this agenda item is to incorporate those revisions into Appendix A-785, Credit for Reinsurance.

**Existing Authoritative Literature:**

The Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786), as they are adopted by the states are the primary legal guidance for credit for reinsurance, and relevant excerpts from Model #785 and Model #786 are included in Appendix A-785.

**Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups):** None

**Information or issues (included in Description of Issue) not previously contemplated by the Working Group:** None

**Convergence with International Financial Reporting Standards (IFRS):** None

**Staff Recommendation:**

NAIC Staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive and expose revisions to Appendix A-785 to incorporate the updates from the adopted Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) that incorporate the relevant provisions from the Covered Agreement. The proposed revisions to the full Appendix A-785 are included in the subsequent pages. With this exposure, NAIC staff request input from regulators and interested parties on how best to establish effective dates for these revisions in Appendix A-785.

**Staff Review Completed by:**

Jake Stultz—July 2019

**Status:**

On August 3, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to Appendix A-785, Credit for Reinsurance, as illustrated below, related to the “Bilateral Agreement Between the United States of America and the European..."
Union on Prudential Measures Regarding Insurance And Reinsurance” (Covered Agreement) adopted to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786).

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted the exposed revisions, with a paragraph reference change in paragraph 13.b. from 12.g. to be 13.g., to Appendix A-785, Credit for Reinsurance, as final, to incorporate the updates from the adopted Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) that incorporate the relevant provisions from the Covered Agreement.
Appendix A-785

Credit For Reinsurance

Relevant SSAPs:
SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance
SSAP No. 62R—Property and Casualty Reinsurance
SSAP No. 66—Retrospectively Rated Contracts

Definitions

Note: There are references to where the changes came from in the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) in the paragraphs below. These are only to assist in reviewing and will be removed from the final version of Appendix A-785 when it is adopted.

1. “Commissioner” refers to the commissioner of insurance in the state where credit or a reduction from liability is taken.

2. “Jurisdiction” refers to any state, district or territory of the United States and also to territories, provinces or jurisdictions other than the United States.

3. “Liabilities” shall mean the assuming insurer’s gross liabilities attributable to reinsurance ceded by U. S. domiciled insurers that are not otherwise secured by acceptable means.

4. “Beneficiary” means the entity for whose sole benefit the trust has been established and any successor of the beneficiary by operation of law. If a court of law appoints a successor in interest to the named beneficiary, then the named beneficiary includes and is limited to the court appointed domiciliary receiver (including conservator, rehabilitator or liquidator).

5. “Grantor” means the entity that has established a trust for the sole benefit of the beneficiary. When established in conjunction with a reinsurance agreement, the grantor is the unlicensed, unaccredited assuming insurer.

6. “Obligations,” as used in paragraph 3029 of this appendix means:
   a. Reinsured losses and allocated loss expenses paid by the ceding company, but not recovered from the assuming insurer;
   b. Reserves for reinsured losses reported and outstanding;
   c. Reserves for reinsured losses incurred but not reported; and
   d. Reserves for allocated reinsured loss expenses and unearned premiums.

Credit Allowed a Domestic Ceding Insurer

7. Credit for reinsurance shall be allowed a domestic ceding insurer as either an asset or a reduction from liability on account of reinsurance ceded only when the reinsurer meets the requirements of paragraphs 8, 9, 10, 11, 12, or 13 or 14 of this appendix. Credit shall be allowed under paragraphs 8, 9, or 10 of this appendix only as respects cessions of those kinds or classes of business which the assuming insurer is licensed or otherwise allowed to write or assume in its state of domicile or, in the case of a U.S. branch of an alien assuming insurer, in the state...
through which it is entered and licensed to transact insurance or reinsurance. Credit shall be allowed under paragraphs 10 or 11 of this appendix only if the applicable requirements of paragraph 1544 have been satisfied.

8. Credit shall be allowed when the reinsurance is ceded to an assuming insurer that is licensed to transact insurance or reinsurance in the domiciliary state of the ceding insurer.

9. Credit shall be allowed when the reinsurance is ceded to an assuming insurer that is accredited as a reinsurer by the domiciliary state of the ceding insurer. In order to be eligible for accreditation, a reinsurer must:
   a. File with the commissioner evidence of its submission to the domiciliary state’s jurisdiction;
   b. Submit to the domiciliary state’s authority to examine its books and records;
   c. Be licensed to transact insurance or reinsurance in at least one state, or in the case of a U.S. branch of an alien assuming insurer, is entered through and licensed to transact insurance or reinsurance in at least one state;
   d. File annually with the commissioner a copy of its annual statement filed with the insurance department of its state of domicile and a copy of its most recent audited financial statement; and
   e. Demonstrate to the satisfaction of the commissioner that it has adequate financial capacity to meet its reinsurance obligations and is otherwise qualified to assume reinsurance from domestic insurers. An assuming insurer is deemed to meet this requirement as of the time of its application if it maintains a surplus as regards policyholders in an amount not less than $20,000,000 and its accreditation has not been denied by the commissioner within ninety (90) days after submission of its application.

10. a. Credit shall be allowed when the reinsurance is ceded to an assuming insurer that is domiciled in, or in the case of a U.S. branch of an alien assuming insurer is entered through, a state that employs standards regarding credit for reinsurance substantially similar to those of the domiciliary state of the ceding insurer and the assuming insurer or U.S. branch of an alien assuming insurer:
   i. Maintains a surplus as regards policyholders in an amount not less than $20,000,000; and
   ii. Submits to the authority of the domiciliary state to examine its books and records.
   b. The requirement of paragraph 10.a.i. does not apply to reinsurance ceded and assumed pursuant to pooling arrangements among insurers in the same holding company system.

11. a. Credit shall be allowed when the reinsurance is ceded to an assuming insurer that maintains a trust fund in a qualified U.S. financial institution, as defined in paragraph 5453, for the payment of the valid claims of its U.S. ceding insurers, their assigns and successors in interest. The assuming insurer shall report annually information substantially the same as that required to be reported on the NAIC Annual Statement form by licensed insurers. The assuming insurer shall submit to examination of its books and records by the commissioner and bear the expense of examination.
   b. i. Credit for reinsurance shall not be granted under this paragraph 11 unless the form of the trust and any amendments to the trust have been approved by:
      (a) The commissioner of the state where the trust is domiciled; or
      (b) The commissioner of another state who, pursuant to the terms of the trust instrument, has accepted principal regulatory oversight of the trust.
   ii. The trust instrument shall provide that:
Contested claims shall be valid and enforceable out of funds in trust to the extent remaining unsatisfied thirty (30) days after entry of the final order of any court of competent jurisdiction in the United States;

Legal title to the assets of the trust shall be vested in the trustee for the benefit of the grantor’s U.S. ceding insurers, their assigns and successors in interest;

The trust shall be subject to examination as determined by the commissioner;

The trust shall remain in effect for as long as the assuming insurer, or any member or former member of a group of insurers, shall have outstanding obligations under reinsurance agreements subject to the trust; and

No later than February 28 of each year the trustee of the trust shall report to the commissioner in writing setting forth the balance in the trust and listing the trust’s investments at the preceding year-end, and shall certify the date of termination of the trust, if so planned, or certify that the trust shall not expire prior to the following December 31.

c. The following requirements apply to the following categories of assuming insurer:

i. The trust fund for a single assuming insurer shall consist of funds in trust in an amount not less than the assuming insurer’s liabilities attributable to reinsurance ceded by U.S. ceding insurers, and, in addition, the assuming insurer shall maintain a trusted surplus of not less than $20,000,000, except as provided in paragraph 11.c.ii. of this appendix.

ii. At any time after the assuming insurer has permanently discontinued underwriting new business secured by the trust for at least three full years, the commissioner with principal regulatory oversight of the trust may authorize a reduction in the required trusted surplus, but only after a finding, based on an assessment of the risk, that the new required surplus level is adequate for the protection of U.S. ceding insurers, policyholders and claimants in light of reasonably foreseeable adverse loss development. The risk assessment may involve an actuarial review, including an independent analysis of reserves and cash flows, and shall consider all material risk factors, including when applicable the lines of business involved, the stability of the incurred loss estimates and the effect of the surplus requirements on the assuming insurer’s liquidity or solvency. The minimum required trusted surplus may not be reduced to an amount less than thirty percent (30%) of the assuming insurer’s liabilities attributable to reinsurance ceded by U.S. ceding insurers covered by the trust.

iii. (a) In the case of a group including incorporated and individual unincorporated underwriters:

(1) For reinsurance ceded under reinsurance agreements with an inception, amendment or renewal date on or after January 1, 1993, the trust shall consist of a trusted account in an amount not less than the respective underwriters’ several liabilities attributable to business ceded by U.S. domiciled ceding insurers to any underwriter of the group;

(2) For reinsurance ceded under reinsurance agreements with an inception date on or before December 31, 1992, and not amended or renewed after
that date, not-withstanding the other provisions contained herein, the trust shall consist of a trusteed account in an amount not less than the respective underwriters’ several insurance and reinsurance liabilities attributable to business written in the United States; and

(3) In addition to these trusts, the group shall maintain in trust a trusteed surplus of which $100,000,000 shall be held jointly for the benefit of the U.S. domiciled ceding insurers of any member of the group for all years of account; and

(b) The incorporated members of the group shall not be engaged in any business other than underwriting as a member of the group and shall be subject to the same level of regulation and solvency control by the group’s domiciliary regulator as are the unincorporated members.

(c) Within ninety (90) days after its financial statements are due to be filed with the group’s domiciliary regulator, the group shall provide to the commissioner an annual certification by the group’s domiciliary regulator of the solvency of each underwriter member; or if a certification is unavailable, financial statements, prepared by independent public accountants, of each underwriter member of the group.

iv. In the case of a group of incorporated underwriters under common administration, the group shall:

(a) Have continuously transacted an insurance business outside the United States for at least three (3) years immediately prior to making application for accreditation;

(b) Maintain aggregate policyholders’ surplus of at least $10,000,000,000;

(c) Maintain a trust fund in an amount not less than the group’s several liabilities attributable to business ceded by U.S. domiciled ceding insurers to any member of the group pursuant to reinsurance contracts issued in the name of the group;

(d) In addition, maintain a joint trusteed surplus of which $100,000,000 shall be held jointly for the benefit of U.S. domiciled ceding insurers of any member of the group as additional security for these liabilities; and

(e) Within ninety (90) days after its financial statements are due to be filed with the group’s domiciliary regulator, make available to the commissioner an annual certification of each underwriter member’s solvency by the member’s domiciliary regulator and financial statements of each underwriter member of the group prepared by its independent public accountant.

d. For the purposes of this paragraph 11., the term “liabilities” shall mean the assuming insurer’s gross liabilities attributable to reinsurance ceded by U.S. domiciled insurers excluding liabilities that are otherwise secured by acceptable means, and shall include:

i. For business ceded by domestic insurers authorized to write accident and health, and property and casualty insurance:
Ref #2019-26

(a) Losses and allocated loss expenses paid by the ceding insurer, recoverable from the assuming insurer;

(b) Reserves for losses reported and outstanding;

(c) Reserves for losses incurred but not reported;

(d) Reserves for allocated loss expenses; and

(e) Unearned premiums.

ii. For business ceded by domestic insurers authorized to write life, health and annuity insurance:

(a) Aggregate reserves for life policies and contracts net of policy loans and net due and deferred premiums;

(b) Aggregate reserves for accident and health policies;

(c) Deposit funds and other liabilities without life or disability contingencies; and

(d) Liabilities for policy and contract claims.

12. Credit shall be allowed when the reinsurance is ceded to an assuming insurer that has been certified as a reinsurer in the domestic state of the ceding insurer and secures its obligations in accordance with the requirements of this paragraph 12.

a. In order to be eligible for certification, the assuming insurer shall meet the following requirements:

i. The assuming insurer must be domiciled and licensed to transact insurance or reinsurance in a qualified jurisdiction, as determined by the domestic state of the ceding insurer pursuant to paragraphs 12.c. and 12.k. of this subsection;

ii. The assuming insurer must maintain minimum capital and surplus, or its equivalent, in an amount as provided in paragraph 12.i.iii.(b) of this appendix;

iii. The assuming insurer must maintain financial strength ratings from two or more rating agencies deemed acceptable by the domestic state of the ceding insurer, as provided in paragraph 12.i.iii.(c) of this appendix;

iv. The assuming insurer must agree to submit to the jurisdiction of the domestic state of the ceding insurer, appoint the commissioner of the domestic state of the ceding insurer as its agent for service of process in that state, and agree to provide security for 100 percent of the assuming insurer’s liabilities attributable to reinsurance ceded by U.S. ceding insurers if it resists enforcement of a final U.S. judgment;

v. The assuming insurer must agree to meet applicable information filing requirements as determined by the domestic state of the ceding insurer, both with respect to an initial application for certification and on an ongoing basis; and
vi. The assuming insurer must satisfy any other requirements for certification deemed relevant by the domestic state of the ceding insurer.

b. An association including incorporated and individual unincorporated underwriters may be a certified reinsurer. In order to be eligible for certification, in addition to satisfying requirements of paragraph 12.a. of this appendix:

i. The association shall satisfy its minimum capital and surplus requirements through the capital and surplus equivalents (net of liabilities) of the association and its members, which shall include a joint central fund that may be applied to any unsatisfied obligation of the association or any of its members, in an amount determined by the domestic state of the ceding insurer to provide adequate protection;

ii. The incorporated members of the association shall not be engaged in any business other than underwriting as a member of the association and shall be subject to the same level of regulation and solvency control by the association’s domiciliary regulator as are the unincorporated members; and

iii. Within ninety (90) days after its financial statements are due to be filed with the association’s domiciliary regulator, the association shall provide to the domestic state of the ceding insurer an annual certification by the association’s domiciliary regulator of the solvency of each underwriter member; or if a certification is unavailable, financial statements, prepared by independent public accountants, of each underwriter member of the association.

c. The domestic state of the ceding insurer shall create and publish a list of qualified jurisdictions, under which an assuming insurer licensed and domiciled in such jurisdiction is eligible to be considered for certification by the domestic state of the ceding insurer as a certified reinsurer.

i. In order to determine whether the domiciliary jurisdiction of a non-U.S. assuming insurer is eligible to be recognized as a qualified jurisdiction, the domestic state of the ceding insurer shall evaluate the appropriateness and effectiveness of the reinsurance supervisory system of the jurisdiction, both initially and on an ongoing basis, and consider the rights, benefits and the extent of reciprocal recognition afforded by the non-U.S. jurisdiction to reinsurers licensed and domiciled in the U.S. A qualified jurisdiction must agree to share information and cooperate with the domestic state of the ceding insurer with respect to all certified reinsurers domiciled within that jurisdiction. A jurisdiction may not be recognized as a qualified jurisdiction if the domestic state of the ceding insurer has determined that the jurisdiction does not adequately and promptly enforce final U.S. judgments and arbitration awards. Additional factors may be considered in the discretion of the domestic state of the ceding insurer.

ii. A list of qualified jurisdictions shall be published through the NAIC Committee Process. The domestic state of the ceding insurer shall consider this list in determining qualified jurisdictions. If the domestic state of the ceding insurer approves a jurisdiction as qualified that does not appear on the list of qualified jurisdictions, the state shall provide thoroughly documented justification in accordance with criteria to be developed under regulations.
iii. U.S. jurisdictions that meet the requirement for accreditation under the NAIC financial standards and accreditation program shall be recognized as qualified jurisdictions.

iv. If a certified reinsurer’s domiciliary jurisdiction ceases to be a qualified jurisdiction, the domestic state of the ceding insurer has the discretion to suspend the reinsurer’s certification indefinitely, in lieu of revocation.

d. The domestic state of the ceding insurer shall assign a rating to each certified reinsurer, giving due consideration to the financial strength ratings that have been assigned by rating agencies deemed acceptable to the commissioner pursuant to regulation. The domestic state of the ceding insurer shall publish a list of all certified reinsurers and their ratings.

e. A certified reinsurer shall secure obligations assumed from U.S. ceding insurers under this subsection at a level consistent with its rating, as specified in paragraph 12.h.i. of this appendix.

i. In order for a domestic ceding insurer to qualify for full financial statement credit for reinsurance ceded to a certified reinsurer, the certified reinsurer shall maintain security in a form acceptable to the domestic state of the ceding insurer and consistent with the provisions of paragraph 1918 of this appendix, or in a multibeneficiary trust in accordance with paragraph 11 of this appendix, except as otherwise provided in paragraph 12.e.ii. through 12.e.v. of this appendix.

ii. If a certified reinsurer maintains a trust to fully secure its obligations subject to paragraph 11 of this appendix, and chooses to secure its obligations incurred as a certified reinsurer in the form of a multibeneficiary trust, the certified reinsurer shall maintain separate trust accounts for its obligations incurred under reinsurance agreements issued or renewed as a certified reinsurer with reduced security as permitted by paragraph 12, or comparable laws of other U.S. jurisdictions, and for its obligations subject to paragraph 11 of this appendix. It shall be a condition to the grant of certification under paragraph 12 of this appendix that the certified reinsurer shall have bound itself, by the language of the trust and agreement with the commissioner with principal regulatory oversight of each such trust account, to fund, upon termination of any such trust account, out of the remaining surplus of such trust any deficiency of any other such trust account.

iii. The minimum trusteed surplus requirements provided in paragraph 11 of this appendix are not applicable with respect to a multibeneficiary trust maintained by a certified reinsurer for the purpose of securing obligations incurred under this subsection, except that such trust shall maintain a minimum trusteed surplus of $10,000,000.

iv. With respect to obligations incurred by a certified reinsurer under paragraph 12 of this appendix, if the security is insufficient, the allowable reinsurance credit shall be reduced by an amount proportionate to the deficiency, and the domestic state of the ceding insurer has the discretion to impose further reductions in allowable credit upon finding that there is a material risk that the certified reinsurer’s obligations will not be paid in full when due.

v. For purposes of paragraph 12, a certified reinsurer whose certification has been terminated for any reason shall be treated as a certified reinsurer required to secure 100 percent of its obligations.
Ref #2019-26

(a) As used in paragraph 12.e.v., the term “terminated” refers to revocation, suspension, voluntary surrender and inactive status.

(b) If the domestic state of the ceding insurer continues to assign a higher rating as permitted by other provisions of paragraph 12, this requirement does not apply to a certified reinsurer in inactive status or to a reinsurer whose certification has been suspended.

f. If an applicant for certification has been certified as a reinsurer in an NAIC accredited jurisdiction, the domestic state of the ceding insurer has the discretion to defer to that jurisdiction’s certification, and has the discretion to defer to the rating assigned by that jurisdiction, and such assuming insurer shall be considered to be a certified reinsurer in the domestic state of the ceding insurer.

g. A certified reinsurer that ceases to assume new business in this state may request to maintain its certification in inactive status in order to continue to qualify for a reduction in security for its in-force business. An inactive certified reinsurer shall continue to comply with all applicable requirements of paragraph 12, and the domestic state of the ceding insurer shall assign a rating that takes into account, if relevant, the reasons why the reinsurer is not assuming new business.

h. The credit allowed under paragraph 12 shall be based upon the security held by or on behalf of the ceding insurer in accordance with a rating assigned to the certified reinsurer by the commissioner. The security shall be in a form consistent with the provisions of paragraph 12 and paragraph 1948 of this appendix, and paragraphs 20-5149-50 of this appendix, as applicable. The amount of security required in order for full credit to be allowed shall correspond with the following requirements:

i. **Ratings**  | **Security Required**
--- | ---
Secure – 1 | 0%
Secure – 2 | 10%
Secure – 3 | 20%
Secure – 4 | 50%
Secure – 5 | 75%
Vulnerable – 6 | 100%

ii. Affiliated reinsurance transactions shall receive the same opportunity for reduced security requirements as all other reinsurance transactions.

iii. The commissioner shall require the certified reinsurer to post one hundred percent (100%), for the benefit of the ceding insurer or its estate, security upon the entry of an order of rehabilitation, liquidation or conservation against the ceding insurer.

iv. In order to facilitate the prompt payment of claims, a certified reinsurer shall not be required to post security for catastrophe recoverables for a period of one year from the date of the first instance of a liability reserve entry by the ceding company as a result of a loss from a catastrophic occurrence as recognized by the commissioner. The one year deferral period is contingent upon the certified reinsurer continuing to pay claims in a timely manner. Reinsurance recoverables for only the following lines of business as
reported on the NAIC annual financial statement related specifically to the catastrophic occurrence will be included in the deferral:

(a) Line 1: Fire
(b) Line 2: Allied Lines
(c) Line 3: Farmowners multiple peril
(d) Line 4: Homeowners multiple peril
(e) Line 5: Commercial multiple peril
(f) Line 9: Inland Marine
(g) Line 12: Earthquake
(h) Line 21: Auto physical damage

v. Credit for reinsurance under paragraph 12 of this appendix shall apply only to reinsurance contracts entered into or renewed on or after the effective date of the certification of the assuming insurer. Any reinsurance contract entered into prior to the effective date of the certification of the assuming insurer that is subsequently amended after the effective date of the certification of the assuming insurer, or a new reinsurance contract, covering any risk for which collateral was provided previously, shall only be subject to this section with respect to losses incurred and reserves reported from and after the effective date of the amendment or new contract.

vi. Nothing in paragraph 12 of this appendix shall prohibit the parties to a reinsurance agreement from agreeing to provisions establishing security requirements that exceed the minimum security requirements established for certified reinsurers under this section.

i. Certification Procedure

i. The commissioner of the domestic state of the ceding insurer shall post notice on the insurance department’s website promptly upon receipt of any application for certification, including instructions on how members of the public may respond to the application. The commissioner may not take final action on the application until at least thirty (30) days after posting the notice required by this paragraph.

ii. The commissioner of the domestic state of the ceding insurer shall issue written notice to an assuming insurer that has made application and been approved as a certified reinsurer. Included in such notice shall be the rating assigned the certified reinsurer in accordance with paragraph 12.h. of this appendix. The commissioner shall publish a list of all certified reinsurers and their ratings.

iii. In order to be eligible for certification, the assuming insurer shall meet the following requirements:
(a) The assuming insurer must be domiciled and licensed to transact insurance or reinsurance in a Qualified Jurisdiction, as determined by the commissioner pursuant to paragraph 12.c. and 12.k. of this appendix.

(b) The assuming insurer must maintain capital and surplus, or its equivalent, of no less than $250,000,000 calculated in accordance with paragraph 12.i.iv.(h) of this appendix. This requirement may also be satisfied by an association including incorporated and individual unincorporated underwriters having minimum capital and surplus equivalents (net of liabilities) of at least $250,000,000 and a central fund containing a balance of at least $250,000,000.

(c) The assuming insurer must maintain financial strength ratings from two or more rating agencies deemed acceptable by the commissioner. These ratings shall be based on interactive communication between the rating agency and the assuming insurer and shall not be based solely on publicly available information. These financial strength ratings will be one factor used by the commissioner in determining the rating that is assigned to the assuming insurer. Acceptable rating agencies include the following:

(1) Standard & Poor’s;
(2) Moody’s Investors Service;
(3) Fitch Ratings;
(4) A.M. Best Company; or
(5) Any other Nationally Recognized Statistical Rating Organization.

(d) The certified reinsurer must comply with any other requirements reasonably imposed by the commissioner of the domestic state of the ceding insurer.

iv. Each certified reinsurer shall be rated on a legal entity basis, with due consideration being given to the group rating where appropriate, except that an association including incorporated and individual unincorporated underwriters that has been approved to do business as a single certified reinsurer may be evaluated on the basis of its group rating. Factors that may be considered as part of the evaluation process include, but are not limited to, the following:

(a) The certified reinsurer’s financial strength rating from an acceptable rating agency. The maximum rating that a certified reinsurer may be assigned will correspond to its financial strength rating as outlined in the table below. The commissioner shall use the lowest financial strength rating received from an approved rating agency in establishing the maximum rating of a certified reinsurer. A failure to obtain or maintain at least two financial strength ratings from acceptable rating agencies will result in loss of eligibility for certification:

(b) The business practices of the certified reinsurer in dealing with its ceding insurers, including its record of compliance with reinsurance contractual terms and obligations;

c) For certified reinsurers domiciled in the U.S., a review of the most recent applicable NAIC Annual Statement Blank, either Schedule F (for property/casualty reinsurers) or Schedule S (for life and health reinsurers);

d) For certified reinsurers not domiciled in the U.S., a review annually of Form CR-F (for property/casualty reinsurers) or Form CR-S (for life and health reinsurers);

e) The reputation of the certified reinsurer for prompt payment of claims under reinsurance agreements, based on an analysis of ceding insurers’ Schedule F reporting of overdue reinsurance recoverables, including the proportion of obligations that are more than ninety (90) days past due or are in dispute, with specific attention given to obligations payable to companies that are in administrative supervision or receivership;

(f) Regulatory actions against the certified reinsurer;

(g) The report of the independent auditor on the financial statements of the insurance enterprise, on the basis described in paragraph (h) below;

(h) For certified reinsurers not domiciled in the U.S., audited financial statements (audited U.S. GAAP basis if available, audited IFRS basis statements are allowed but must include an audited footnote reconciling equity and net income to a U.S.
GAAP basis, or, with the permission of the state insurance commissioner, audited IFRS statements with reconciliation to U.S. GAAP certified by an officer of the company), regulatory filings, and actuarial opinion (as filed with the non-U.S. jurisdiction supervisor, with a translation into English). Upon the initial application for certification, the commissioner will consider audited financial statements for the last two/three (23) years filed with its non-U.S. jurisdiction supervisor; \(\text{(Model \#786, Section 8B(4)(h))}\)

(i) The liquidation priority of obligations to a ceding insurer in the certified reinsurer’s domiciliary jurisdiction in the context of an insolvency proceeding;

(j) A certified reinsurer’s participation in any solvent scheme of arrangement, or similar procedure, which involves U.S. ceding insurers. The commissioner shall receive prior notice from a certified reinsurer that proposes participation by the certified reinsurer in a solvent scheme of arrangement; and

(k) Any other information deemed relevant by the commissioner.

v. Based on the analysis conducted under paragraph 12.i.iv.(e) of a certified reinsurer’s reputation for prompt payment of claims, the commissioner may make appropriate adjustments in the security the certified reinsurer is required to post to protect its liabilities to U.S. ceding insurers, provided that the commissioner shall, at a minimum, increase the security the certified reinsurer is required to post by one rating level under paragraph 12.h. if the commissioner finds that:

(a) more than fifteen percent (15%) of the certified reinsurer’s ceding insurance clients have overdue reinsurance recoverables on paid losses of ninety (90) days or more which are not in dispute and which exceed $100,000 for each cedent; or

(b) the aggregate amount of reinsurance recoverables on paid losses which are not in dispute that are overdue by ninety (90) days or more exceeds $50,000,000.

vi. The assuming insurer must submit a properly executed Form CR-1 as evidence of its submission to the jurisdiction of this state, appointment of the commissioner as an agent for service of process in this state, and agreement to provide security for one hundred percent (100%) of the assuming insurer’s liabilities attributable to reinsurance ceded by U.S. ceding insurers if it resists enforcement of a final U.S. judgment. The commissioner shall not certify any assuming insurer that is domiciled in a jurisdiction that the commissioner has determined does not adequately and promptly enforce final U.S. judgments or arbitration awards.

vii. The certified reinsurer must agree to meet applicable information filing requirements as determined by the commissioner, both with respect to an initial application for certification and on an ongoing basis. All information submitted by certified reinsurers which are not otherwise public information subject to disclosure shall be exempted from disclosure under [cite state law equivalent of Freedom of Information Act] and shall be withheld from public disclosure. The applicable information filing requirements are, as follows:
(a) Notification within ten (10) days of any regulatory actions taken against the certified reinsurer, any change in the provisions of its domiciliary license or any change in rating by an approved rating agency, including a statement describing such changes and the reasons therefore;

(b) Annually, Form CR-F or CR-S, as applicable;

(c) Annually, the report of the independent auditor on the financial statements of the insurance enterprise, on the basis described in paragraph 12.i.vii.(d) below;

(d) Annually, the most recent audited financial statements (audited U.S. GAAP basis if available, audited IFRS basis statements are allowed but must include an audited footnote reconciling equity and net income to a U.S. GAAP basis, or, with the permission of the state insurance commissioner, audited IFRS statements with reconciliation to U.S. GAAP certified by an officer of the company), regulatory filings, and actuarial opinion (as filed with the certified reinsurer’s supervisor, with a translation into English). Upon the initial certification, audited financial statements for the last two/three (2/3) years filed with the certified reinsurer’s supervisor; *(Model #786, Section 8B(7)(d))*

(e) At least annually, an updated list of all disputed and overdue reinsurance claims regarding reinsurance assumed from U.S. domestic ceding insurers;

(f) A certification from the certified reinsurer’s domestic regulator that the certified reinsurer is in good standing and maintains capital in excess of the jurisdiction’s highest regulatory action level; and

(g) Any other information that the commissioner may reasonably require.

j. Change in Rating or Revocation of Certification

i. In the case of a downgrade by a rating agency or other disqualifying circumstance, the commissioner shall upon written notice assign a new rating to the certified reinsurer in accordance with the requirements of paragraph 12.i.

ii. The commissioner shall have the authority to suspend, revoke, or otherwise modify a certified reinsurer’s certification at any time if the certified reinsurer fails to meet its obligations or security requirements under this section, or if other financial or operating results of the certified reinsurer, or documented significant delays in payment by the certified reinsurer, lead the commissioner to reconsider the certified reinsurer’s ability or willingness to meet its contractual obligations.

iii. If the rating of a certified reinsurer is upgraded by the commissioner, the certified reinsurer may meet the security requirements applicable to its new rating on a prospective basis, but the commissioner shall require the certified reinsurer to post security under the previously applicable security requirements as to all contracts in force on or before the effective date of the upgraded rating. If the rating of a certified reinsurer is downgraded by the commissioner, the commissioner shall require the certified reinsurer to meet the security requirements applicable to its new rating for all business it has assumed as a certified reinsurer.
iv. Upon revocation of the certification of a certified reinsurer by the commissioner, the assuming insurer shall be required to post security in accordance with paragraph 1918 in order for the ceding insurer to continue to take credit for reinsurance ceded to the assuming insurer. If funds continue to be held in trust in accordance with paragraph 11, the commissioner may allow additional credit equal to the ceding insurer’s pro rata share of such funds, discounted to reflect the risk of uncollectibility and anticipated expenses of trust administration. Notwithstanding the change of a certified reinsurer’s rating or revocation of its certification, a domestic insurer that has ceded reinsurance to that certified reinsurer may not be denied credit for reinsurance for a period of three (3) months for all reinsurance ceded to that certified reinsurer, unless the reinsurance is found by the commissioner to be at high risk of uncollectibility.

k. Qualified Jurisdictions

i. If, upon conducting an evaluation with respect to the reinsurance supervisory system of any non-U.S. assuming insurer, the commissioner of the domestic state of the ceding insurer determines that the jurisdiction qualifies to be recognized as a qualified jurisdiction, the commissioner shall publish notice and evidence of such recognition in an appropriate manner. The commissioner may establish a procedure to withdraw recognition of those jurisdictions that are no longer qualified.

ii. In order to determine whether the domiciliary jurisdiction of a non-U.S. assuming insurer is eligible to be recognized as a qualified jurisdiction, the commissioner shall evaluate the reinsurance supervisory system of the non-U.S. jurisdiction, both initially and on an ongoing basis, and consider the rights, benefits and the extent of reciprocal recognition afforded by the non-U.S. jurisdiction to reinsurers licensed and domiciled in the U.S. The commissioner shall determine the appropriate approach for evaluating the qualifications of such jurisdictions, and create and publish a list of jurisdictions whose reinsurers may be approved by the commissioner as eligible for certification. A qualified jurisdiction must agree to share information and cooperate with the commissioner with respect to all certified reinsurers domiciled within that jurisdiction. Additional factors to be considered in determining whether to recognize a qualified jurisdiction, in the discretion of the commissioner, include but are not limited to the following:

(a) The framework under which the assuming insurer is regulated.

(b) The structure and authority of the domiciliary regulator with regard to solvency regulation requirements and financial surveillance.

(c) The substance of financial and operating standards for assuming insurers in the domiciliary jurisdiction.

(d) The form and substance of financial reports required to be filed or made publicly available by reinsurers in the domiciliary jurisdiction and the accounting principles used.

(e) The domiciliary regulator’s willingness to cooperate with U.S. regulators in general and the commissioner in particular.

(f) The history of performance by assuming insurers in the domiciliary jurisdiction.
(g) Any documented evidence of substantial problems with the enforcement of final U.S. judgments in the domiciliary jurisdiction. A jurisdiction will not be considered to be a qualified jurisdiction if the commissioner has determined that it does not adequately and promptly enforce final U.S. judgments or arbitration awards.

(h) Any relevant international standards or guidance with respect to mutual recognition of reinsurance supervision adopted by the International Association of Insurance Supervisors or successor organization.

(i) Any other matters deemed relevant by the commissioner.

iii. A list of qualified jurisdictions shall be published through the NAIC Committee Process. The commissioner shall consider this list in determining qualified jurisdictions. If the commissioner approves a jurisdiction as qualified that does not appear on the list of qualified jurisdictions, the commissioner shall provide thoroughly documented justification with respect to the criteria provided under paragraphs 12.k.ii.(a) to (i).

iv. U.S. jurisdictions that meet the requirements for accreditation under the NAIC financial standards and accreditation program shall be recognized as qualified jurisdictions.

l. Recognition of Certification Issued by an NAIC Accredited Jurisdiction

i. If an applicant for certification has been certified as a reinsurer in an NAIC accredited jurisdiction, the commissioner has the discretion to defer to that jurisdiction’s certification, and to defer to the rating assigned by that jurisdiction, if the assuming insurer submits a properly executed Form CR-1 and such additional information as the commissioner requires. The assuming insurer shall be considered to be a certified reinsurer in this State.

ii. Any change in the certified reinsurer’s status or rating in the other jurisdiction shall apply automatically in this State as of the date it takes effect in the other jurisdiction. The certified reinsurer shall notify the commissioner of any change in its status or rating within 10 days after receiving notice of the change.

iii. The commissioner may withdraw recognition of the other jurisdiction’s rating at any time and assign a new rating in accordance with paragraph 12.j. of this appendix.

iv. The commissioner may withdraw recognition of the other jurisdiction’s certification at any time, with written notice to the certified reinsurer. Unless the commissioner suspends or revokes the certified reinsurer’s certification in accordance with paragraph 12.j. of this appendix, the certified reinsurer’s certification shall remain in good standing in the domestic state of the ceding insurer for a period of three (3) months, which shall be extended if additional time is necessary to consider the assuming insurer’s application for certification in this State.

m. Mandatory Funding Clause. In addition to the clauses required under SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance and SSAP No. 62R—Property and Casualty Reinsurance, reinsurance contracts entered into or renewed under paragraph 12 of this appendix shall include a proper funding clause, which requires the certified reinsurer to provide and
maintain security in an amount sufficient to avoid the imposition of any financial statement penalty on the ceding insurer under this section for reinsurance ceded to the certified reinsurer.

n. The commissioner shall comply with all reporting and notification requirements that may be established by the NAIC with respect to certified reinsurers and qualified jurisdictions.

13. Credit shall be allowed when the reinsurance is ceded to an assuming insurer meeting each of the conditions set forth in paragraphs 13.a through 13.h. Credit shall be allowed for reinsurance ceded by a domestic insurer to an assuming insurer that is licensed to write reinsurance by, and has its head office or is domiciled in, a Reciprocal Jurisdiction, and which meets the other requirements of paragraph 13. *(Model #786, Section 9A)*

a. The assuming insurer must have its head office or be domiciled in, as applicable, and be licensed in a Reciprocal Jurisdiction. A “Reciprocal Jurisdiction” is a jurisdiction that meets one of the following: *(Model #785, Section 2F(1)(a) Model #786, Section 9B)*

i. A non-U.S. jurisdiction that is subject to an in-force covered agreement with the United States, each within its legal authority, or, in the case of a covered agreement between the United States and European Union, is a member state of the European Union. For purposes of this subsection, a “covered agreement” is an agreement entered into pursuant to Dodd-Frank Wall Street Reform and Consumer Protection Act, 31 U.S.C. §§ 313 and 314, that is currently in effect or in a period of provisional application and addresses the elimination, under specified conditions, of collateral requirements as a condition for entering into any reinsurance agreement with a ceding insurer domiciled in this state or for allowing the ceding insurer to recognize credit for reinsurance;

ii. A U.S. jurisdiction that meets the requirements for accreditation under the NAIC financial standards and accreditation program; or

iii. A qualified jurisdiction, as determined by the commissioner, which is not otherwise described in paragraphs 13.a.i or 13.a.ii. above and which the commissioner determines meets all of the following additional requirements:

(a) Provides that an insurer which has its head office or is domiciled in such qualified jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance is received for reinsurance assumed by insurers domiciled in such qualified jurisdiction;

(b) Does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by the non-U.S. jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

(c) Recognizes the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by a competent regulatory authority, in such qualified jurisdiction, that insurers and insurance groups that are domiciled or maintain their headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to worldwide prudential insurance group
supervision including worldwide group governance, solvency and capital, and reporting, as applicable, by the commissioner or the commissioner of the domiciliary state and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the qualified jurisdiction; and

(d) Provides written confirmation by a competent regulatory authority in such qualified jurisdiction that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the commissioner in accordance with a memorandum of understanding or similar document between the commissioner and such qualified jurisdiction, including but not limited to the International Association of Insurance Supervisors Multilateral Memorandum of Understanding or other multilateral memoranda of understanding coordinated by the NAIC.

b. The assuming insurer must have and maintain on an ongoing basis minimum capital and surplus, or its equivalent, calculated on at least an annual basis as of the preceding December 31 or at the annual date otherwise statutorily reported to the Reciprocal Jurisdiction, and confirmed as set forth in paragraph 13.g, according to the methodology of its domiciliary jurisdiction, in the following amounts: (Model #786, Section 9C(2))

i. No less than $250,000,000; or

ii. If the assuming insurer is an association, including incorporated and individual unincorporated underwriters:

(a) Minimum capital and surplus equivalents (net of liabilities) or own funds of the equivalent of at least $250,000,000; and

(b) A central fund containing a balance of the equivalent of at least $250,000,000.

c. The assuming insurer must have and maintain on an ongoing basis a minimum solvency or capital ratio, as applicable, as follows: (Model #786, Section 9C(3))

i. If the assuming insurer has its head office or is domiciled in a Reciprocal Jurisdiction as defined in paragraph 13.a.i., the ratio specified in the applicable covered agreement;

ii. If the assuming insurer is domiciled in a Reciprocal Jurisdiction as defined in paragraph 13.a.ii, a risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, calculated in accordance with the formula developed by the NAIC; or

iii. If the assuming insurer is domiciled in a Reciprocal Jurisdiction as defined in paragraph 13.a.iii, after consultation with the Reciprocal Jurisdiction and considering any recommendations published through the NAIC Committee Process, such solvency or capital ratio as the commissioner determines to be an effective measure of solvency.

d. The assuming insurer must agree and provide adequate assurance to the commissioner, in a form of a properly executed Form RJ-1, as follows: (Model #786, Section 9C(4))
i. The assuming insurer must provide prompt written notice and explanation to the commissioner if it falls below the minimum requirements set forth in paragraphs 13.b. or 13.c., or if any regulatory action is taken against it for serious noncompliance with applicable law;

ii. The assuming insurer must consent in writing to the jurisdiction of the courts of this state and to the appointment of the commissioner as agent for service of process. The commissioner may require that consent for service of process be provided to the commissioner and included in each reinsurance agreement. Nothing in this provision shall limit, or in any way alter, the capacity of parties to a reinsurance agreement to agree to alternative dispute resolution mechanisms, except to the extent such agreements are unenforceable under applicable insolvency or delinquency laws;

iii. The assuming insurer must consent in writing to pay all final judgments, wherever enforcement is sought, obtained by a ceding insurer or its legal successor, that have been declared enforceable in the jurisdiction where the judgment was obtained;

iv. Each reinsurance agreement must include a provision requiring the assuming insurer to provide security in an amount equal to one hundred percent (100%) of the assuming insurer’s liabilities attributable to reinsurance ceded pursuant to that agreement if the assuming insurer resists enforcement of a final judgment that is enforceable under the law of the jurisdiction in which it was obtained or a properly enforceable arbitration award, whether obtained by the ceding insurer or by its legal successor on behalf of its resolution estate; and

v. The assuming insurer must confirm that it is not presently participating in any solvent scheme of arrangement which involves this state’s ceding insurers, and agree to notify the ceding insurer and the commissioner and to provide security in an amount equal to one hundred percent (100%) of the assuming insurer’s liabilities to the ceding insurer, should the assuming insurer enter into such a solvent scheme of arrangement. Such security shall be in a form consistent with the provisions of paragraph 12 and paragraph 19. The term “solvent scheme of arrangement” means a foreign or alien statutory or regulatory compromise procedure subject to requisite majority creditor approval and judicial sanction in the assuming insurer’s home jurisdiction either to finally commute liabilities of duly noticed classed members or creditors of a solvent debtor, or to reorganize or restructure the debts and obligations of a solvent debtor on a final basis, and which may be subject to judicial recognition and enforcement of the arrangement by a governing authority outside the ceding insurer’s home jurisdiction.

vi. The assuming insurer must agree in writing to meet the applicable information filing requirements as set forth in paragraph 13.e.

e. The assuming insurer or its legal successor must provide, if requested by the commissioner, on behalf of itself and any legal predecessors, the following documentation to the commissioner: *(Model #786, Section 9C(5))*

i. For the two years preceding entry into the reinsurance agreement and on an annual basis thereafter, the assuming insurer’s annual audited financial statements, in accordance with
the applicable law of the jurisdiction of its head office or domiciliary jurisdiction, as applicable, including the external audit report;

ii. For the two years preceding entry into the reinsurance agreement, the solvency and financial condition report or actuarial opinion, if filed with the assuming insurer’s supervisor;

iii. Prior to entry into the reinsurance agreement and not more than semi-annually thereafter, an updated list of all disputed and overdue reinsurance claims outstanding for 90 days or more, regarding reinsurance assumed from ceding insurers domiciled in the United States; and

iv. Prior to entry into the reinsurance agreement and not more than semi-annually thereafter, information regarding the assuming insurer’s assumed reinsurance by ceding insurer, ceded reinsurance by the assuming insurer, and reinsurance recoverable on paid and unpaid losses by the assuming insurer to allow for the evaluation of the criteria set forth in paragraph 13.f.

f. The assuming insurer must maintain a practice of prompt payment of claims under reinsurance agreements. The lack of prompt payment will be evidenced if any of the following criteria is met: (Model #786, Section 9C(6))

i. More than fifteen percent (15%) of the reinsurance recoverables from the assuming insurer are overdue and in dispute as reported to the commissioner;

ii. More than fifteen percent (15%) of the assuming insurer’s ceding insurers or reinsurers have overdue reinsurance recoverable on paid losses of 90 days or more which are not in dispute and which exceed for each ceding insurer $100,000, or as otherwise specified in a covered agreement; or

iii. The aggregate amount of reinsurance recoverable on paid losses which are not in dispute, but are overdue by 90 days or more, exceeds $50,000,000, or as otherwise specified in a covered agreement.

g. The assuming insurer’s supervisory authority must confirm to the commissioner on an annual basis, as of the preceding December 31 or at the annual date otherwise statutorily reported to the Reciprocal Jurisdiction, that the assuming insurer complies with the requirements set forth in paragraphs 13.b. and 13.c. (Model #786, Section 9C(7))

h. Nothing in this provision precludes an assuming insurer from providing the commissioner with information on a voluntary basis. (Model #786, Section 9C(8))

i. The commissioner shall timely create and publish a list of Reciprocal Jurisdictions. (Model #785, Section 2F(2) and Model #786, Section 9D)

i. A list of Reciprocal Jurisdictions is published through the NAIC Committee Process. The commissioner’s list shall include any Reciprocal Jurisdiction as defined under paragraphs 13.a.i. and 13.a.ii., and shall consider any other Reciprocal Jurisdiction included on the NAIC list. The commissioner may approve a jurisdiction that does not appear on the NAIC list of Reciprocal Jurisdictions.
ii. The commissioner may remove a jurisdiction from the list of Reciprocal Jurisdictions upon a determination that the jurisdiction no longer meets one or more of the requirements of a Reciprocal Jurisdiction, except that the commissioner shall not remove from the list a Reciprocal Jurisdiction as defined under paragraphs 13.a.i. and 13.a.ii. Upon removal of a Reciprocal Jurisdiction from this list credit for reinsurance ceded to an assuming insurer domiciled in that jurisdiction shall be allowed, if otherwise allowed pursuant to this appendix.

i. The commissioner shall timely create and publish a list of assuming insurers that have satisfied the conditions set forth in paragraph 13 and to which cessions shall be granted credit in accordance with paragraph 13. *(Model #786, Section 9E)*

i. If an NAIC accredited jurisdiction has determined that the conditions set forth in paragraph 13 have been met, the commissioner has the discretion to defer to that jurisdiction’s determination, and add such assuming insurer to the list of assuming insurers to which cessions shall be granted credit in accordance with this subsection. The commissioner may accept financial documentation filed with another NAIC accredited jurisdiction or with the NAIC in satisfaction of the requirements of paragraph 13.b., 13.c. and 13.d.

ii. When requesting that the commissioner defer to another NAIC accredited jurisdiction’s determination, an assuming insurer must submit a properly executed Form RJ-1 and additional information as the commissioner may require. A state that has received such a request will notify other states through the NAIC Committee Process and provide relevant information with respect to the determination of eligibility.

k. If the commissioner determines that an assuming insurer no longer meets one or more of the requirements under this section, the commissioner may revoke or suspend the eligibility of the assuming insurer for recognition under this section. *(Model #786, Section 9F)*

i. While an assuming insurer’s eligibility is suspended, no reinsurance agreement issued, amended or renewed after the effective date of the suspension qualifies for credit except to the extent that the assuming insurer’s obligations under the contract are secured in accordance with paragraph 19.

ii. If an assuming insurer’s eligibility is revoked, no credit for reinsurance may be granted after the effective date of the revocation with respect to any reinsurance agreements entered into by the assuming insurer, including reinsurance agreements entered into prior to the date of revocation, except to the extent that the assuming insurer’s obligations under the contract are secured in a form acceptable to the commissioner and consistent with the provisions of paragraph 19.

l. Before denying statement credit or imposing a requirement to post security with respect to paragraph 13.k. or adopting any similar requirement that will have substantially the same regulatory impact as security, the commissioner shall. *(Model #786, Section 9G)*

i. Communicate with the ceding insurer, the assuming insurer, and the assuming insurer’s supervisory authority that the assuming insurer no longer satisfies one of the conditions listed in paragraphs 13.a., 13.b. and 13.c.;
ii. Provide the assuming insurer with 30 days from the initial communication to submit a plan to remedy the defect, and 90 days from the initial communication to remedy the defect, except in exceptional circumstances in which a shorter period is necessary for policyholder and other consumer protection;

iii. After the expiration of 90 days or less, as set out in paragraph 13.l.ii., if the commissioner determines that no or insufficient action was taken by the assuming insurer, the commissioner may impose any of the requirements as set out in this subsection; and

iv. Provide a written explanation to the assuming insurer of any of the requirements set out in paragraph 13.l.

m. If subject to a legal process of rehabilitation, liquidation or conservation, as applicable, the ceding insurer, or its representative, may seek and, if determined appropriate by the court in which the proceedings are pending, may obtain an order requiring that the assuming insurer post security for all outstanding liabilities. (Model #786, Section 9H)

o. Nothing in this subsection shall limit or in any way alter the capacity of parties to a reinsurance agreement to agree on requirements for security or other terms in that reinsurance agreement, except as expressly prohibited by this appendix. (Model #785, Section 2F(6))

p. Credit may be taken under this subsection only for reinsurance agreements entered into, amended, or renewed on or after the effective date of the statute adding this subsection, and only with respect to losses incurred and reserves reported on or after the later of (i) the date on which the assuming insurer has met all eligibility requirements pursuant to paragraphs 13.a through 13.h., and (ii) the effective date of the new reinsurance agreement, amendment, or renewal. (Model #785, Section 2F(7))

i. This paragraph does not alter or impair a ceding insurer’s right to take credit for reinsurance, to the extent that credit is not available under this subsection, as long as the reinsurance qualifies for credit under any other applicable provision of this appendix.

ii. Nothing in this subsection shall authorize an assuming insurer to withdraw or reduce the security provided under any reinsurance agreement except as permitted by the terms of the agreement.

iii. Nothing in this subsection shall limit, or in any way alter, the capacity of parties to any reinsurance agreement to renegotiate the agreement.

1413. Credit shall be allowed when the reinsurance is ceded to an assuming insurer not meeting the requirements of paragraphs 8, 9, 10, 11, or 12 of this appendix, but only as to the insurance of risks located in jurisdictions where the reinsurance is required by applicable law or regulation of that jurisdiction.

1544. If the assuming insurer is not licensed, accredited or certified to transact insurance or reinsurance in the domiciliary state of the ceding insurer, the credit allowed by paragraphs 10 and 11 of this appendix shall not be allowed unless the assuming insurer agrees in the reinsurance agreements:

a. i. That in the event of the failure of the assuming insurer to perform its obligations under the terms of the reinsurance agreement, the assuming insurer, at the request of the ceding insurer, shall submit to the jurisdiction of any court of competent jurisdiction in any state of the United States, will comply with all requirements necessary to give the court
jurisdiction, and will abide by the final decision of the court or of any appellate court in the event of an appeal.

ii. To designate the commissioner or a designated attorney as its true and lawful attorney upon whom may be served any lawful process in any action, suit or proceeding instituted by or on behalf of the ceding insurer.

b. This paragraph 1544 is not intended to conflict with or override the obligation of the parties to a reinsurance agreement to arbitrate their disputes, if this obligation is created in the agreement.

1615. If the assuming insurer does not meet the requirements of paragraphs 8, 9 or 10, the credit allowed by paragraph 11 or 12 of this appendix shall not be allowed unless the assuming insurer agrees in the trust agreements to the following conditions:

a. Notwithstanding any other provisions in the trust instrument, if the trust fund is inadequate because it contains an amount less than the amount required by paragraph 11 c. of this appendix, or if the grantor of the trust has been declared insolvent or placed into receivership, rehabilitation, liquidation or similar proceedings under the laws of its state or country of domicile, the trustee shall comply with an order of the commissioner with regulatory oversight over the trust or with an order of a court of competent jurisdiction directing the trustee to transfer to the commissioner with regulatory oversight all of the assets of the trust fund.

b. The assets shall be distributed by and claims shall be filed with and valued by the commissioner with regulatory oversight in accordance with the laws of the state in which the trust is domiciled that are applicable to the liquidation of domestic insurance companies.

c. If the commissioner with regulatory oversight determines that the assets of the trust fund or any part thereof are not necessary to satisfy the claims of the U.S. ceding insurers of the grantor of the trust, the assets or part thereof shall be returned by the commissioner with regulatory oversight to the trustee for distribution in accordance with the trust agreement.

d. The grantor shall waive any right otherwise available to it under U.S. law that is inconsistent with this provision.

1746. If an accredited or certified reinsurer ceases to meet the requirements for accreditation or certification, the domestic state of the ceding insurer may suspend or revoke the reinsurer’s accreditation or certification.

a. The domestic state of the ceding insurer must give the reinsurer notice an opportunity for hearing. The suspension or revocation may not take effect until after the state’s order on hearing, unless:

i. The reinsurer waives its right to hearing;

ii. The state’s order is based on regulatory action by the reinsurer’s domiciliary jurisdiction or the voluntary surrender or termination of the reinsurer’s eligibility to transact insurance or reinsurance business in its domiciliary jurisdiction or in the primary certifying state of the reinsurer under paragraph 12.f. of this appendix; or

iii. The domestic state of the ceding insurer finds that an emergency requires immediate action and a court of competent jurisdiction has not stayed the state’s action.

b. While a reinsurer’s accreditation or certification is suspended, no reinsurance contract issued or renewed after the effective date of the suspension qualifies for credit except to the extent that the reinsurer’s obligations under the contract are secured in accordance with paragraph 1948. If a reinsurer’s accreditation or certification is revoked, no credit for reinsurance may be granted after the effective date of the revocation except to the extent that the reinsurer’s obligations under the contract are secured in accordance with paragraph 12.e. or paragraph 1948.

Valuation of and Requirements for Trust Assets

© 2019 National Association of Insurance Commissioners 24
1847. Assets deposited in the trust shall be valued according to their current fair market value and shall consist only of cash in U.S. dollars, certificates of deposit issued by a U.S. financial institution as defined in paragraph 5352, clean, irrevocable, unconditional and "evergreen" letters of credit issued or confirmed by a qualified U.S. financial institution, as defined in paragraph 5352, and investments of the type specified in this paragraph, but investments in or issued by an entity controlling, controlled by or under common control with either the grantor or beneficiary of the trust shall not exceed five percent (5%) of total investments. No more than twenty percent (20%) of the total of the investments in the trust may be foreign investments authorized under paragraphs 1847.a.v., c., f.ii. or g. of this paragraph, and no more than ten percent (10%) of the total of the investments in the trust may be securities denominated in foreign currencies. For purposes of applying the preceding sentence, a depository receipt denominated in U.S. dollars and representing rights conferred by a foreign security shall be classified as a foreign investment denominated in a foreign currency. The assets of a trust shall be invested only as follows:

a. Government obligations that are not in default as to principal or interest, that are valid and legally authorized and that are issued, assumed or guaranteed by:
   
   i. The United States or by any agency or instrumentality of the United States;
   
   ii. A state of the United States;
   
   iii. A territory, possession or other governmental unit of the United States;
   
   iv. An agency or instrumentality of a governmental unit referred to in paragraphs 1847.a.i. and 1847.a.ii. if the obligations shall be by law (statutory of otherwise) payable, as to both principal and interest, from taxes levied or by law required to be levied or from adequate special revenues pledged or otherwise appropriated or by law required to be provided for making these payments, but shall not be obligations eligible for investment under this paragraph if payable solely out of special assessments on properties benefited by local improvements; or
   
   v. The government of any other country that is a member of the Organization for Economic Cooperation and Development and whose government obligations are rated A or higher, or the equivalent, by a rating agency recognized by the Securities Valuation Office of the NAIC;

b. Obligations that are issued in the United States, or that are dollar denominated and issued in a non-U.S. market, by a solvent U.S. institution (other than an insurance company) or that are assumed or guaranteed by a solvent U.S. institution (other than an insurance company) and that are not in default as to principal or interest if the obligations:
   
   i. Are rated A or higher (or the equivalent) by a securities rating agency recognized by the Securities Valuation Office of the NAIC, or if not so rated, are similar in structure and other material respects to other obligations of the same institution that are so rated;
   
   ii. Are insured by at least one authorized insurer (other than the investing insurer or a parent, subsidiary or affiliate of the investing insurer) licensed to insure obligations in this state and, after considering the insurance, are rated AAA (or the equivalent) by a securities rating agency recognized by the Securities Valuation Office of the NAIC; or
   
   iii. Have been designated as Class One or Class Two by the Securities Valuation Office of the NAIC;
c. Obligations issued, assumed or guaranteed by a solvent non-U.S. institution chartered in a country that is a member of the Organization for Economic Cooperation and Development or obligations of U.S. corporations issued in a non-U.S. currency, provided that in either case the obligations are rated A or higher, or the equivalent, by a rating agency recognized by the Securities Valuation Office of the NAIC;

d. An investment made pursuant to the provisions of paragraph 1847.a., b. or c. shall be subject to the following additional limitations:

i. An investment in or loan upon the obligations of an institution other than an institution that issues mortgage-related securities shall not exceed five percent (5%) of the assets of the trust;

ii. An investment in any one mortgage-related security shall not exceed five percent (5%) of the assets of the trust;

iii. The aggregate total investment in mortgage-related securities shall not exceed twenty-five percent (25%) of the assets of the trust; and

iv. Preferred or guaranteed shares issued or guaranteed by a solvent U.S. institution are permissible investments if all of the institution’s obligations are eligible as investments under paragraphs 1847.b.i. and b.iii. of this paragraph, but shall not exceed two percent (2%) of the assets of the trust.

e. As used in this appendix:

i. “Mortgage-related security” means an obligation that is rated AA or higher (or the equivalent) by a securities rating agency recognized by the Securities Valuation Office of the NAIC and that either:

(a) Represents ownership of one or more promissory notes or certificates of interest or participation in the notes (including any rights designed to assure servicing of, or the receipt or timeliness of receipt by the holders of the notes, certificates, or participation of amounts payable under, the notes, certificates or participation), that:

(1) Are directly secured by a first lien on a single parcel of real estate, including stock allocated to a dwelling unit in a residential cooperative housing corporation, upon which is located a dwelling or mixed residential and commercial structure, or on a residential manufactured home as defined in 42 U.S.C.A. Section 5402(6), whether the manufactured home is considered real or personal property under the laws of the state in which it is located; and

(2) Were originated by a savings and loan association, savings bank, commercial bank, credit union, insurance company, or similar institution that is supervised and examined by a federal or state housing authority, or by a mortgagee approved by the Secretary of Housing and Urban Development pursuant to 12 U.S.C.A. Sections 1709 and 1715-b, or, where the notes involve a lien on the manufactured home, by an institution or by a financial institution approved for insurance by the Secretary of Housing and Urban Development pursuant to 12 U.S.C.A. Section 1703; or
(b) Is secured by one or more promissory notes or certificates of deposit or participations in the notes (with or without recourse to the insurer of the notes) and, by its terms, provides for payments of principal in relation to payments, or reasonable projections of payments, or notes meeting the requirements of paragraphs 1847.e.i.(a)(1) and 1847.e.i.(a)(2);

ii. “Promissory note,” when used in connection with a manufactured home, shall also include a loan, advance or credit sale as evidenced by a retail installment sales contract or other instrument.

e. Equity interests

i. Investments in common shares or partnership interests of a solvent U.S. institution are permissible if:

(a) Its obligations and preferred shares, if any, are eligible as investments under this paragraph; and

(b) The equity interests of the institution (except an insurance company) are registered on a national securities exchange as provided in the Securities Exchange Act of 1934, 15 U.S.C. §§ 78a to 78kk or otherwise registered pursuant to that Act, and if otherwise registered, price quotations for them are furnished through a nationwide automated quotations system approved by the Financial Industry Regulatory Authority, or successor organization. A trust shall not invest in equity interests under this paragraph an amount exceeding one percent (1%) of the assets of the trust even though the equity interests are not so registered and are not issued by an insurance company.

ii. Investments in common shares of a solvent institution organized under the laws of a country that is a member of the Organization for Economic Cooperation and Development, if:

(a) All its obligations are rated A or higher, or the equivalent, by a rating agency recognized by the Securities Valuation Office of the NAIC; and

(b) The equity interests of the institution are registered on a securities exchange regulated by the government of a country that is a member of the Organization for Economic Cooperation and Development.

iii. An investment in or loan upon any one institution’s outstanding equity interests shall not exceed one percent (1%) of the assets of the trust. The cost of an investment in equity interests made pursuant to this paragraph, when added to the aggregate cost of other investments in equity interests then held pursuant to this paragraph, shall not exceed ten percent (10%) of the assets in the trust;

g. Obligations issued, assumed or guaranteed by a multinational development bank, provided the obligations are rated A or higher, or the equivalent, by a rating agency recognized by the Securities Valuation Office of the NAIC.

h. Investment companies:

i. Securities of an investment company registered pursuant to the Investment Company Act of 1940, 15 U.S.C. § 802, are allowable investments if the investment company:
Ref #2019-26

(a) Invests at least ninety percent (90%) of its assets in the types of securities that qualify as an investment under paragraphs 1847.a., 1847.b., or 1847.c., or invests in securities that are determined to be substantively similar to the types of securities set forth in paragraphs 1847.a., 1847.b., or 1847.c.; or

(b) Invests at least ninety percent (90%) of its assets in the types of equity interests that qualify as an investment under paragraph 1847.f.i.;

ii. Investments made by a trust in investment companies under this paragraph shall not exceed the following limitations:

(a) An investment in an investment company qualifying under paragraph 1847.h.i. (a) shall not exceed ten percent (10%) of the assets in the trust and the aggregate amount of investment in qualifying investment companies shall not exceed twenty-five percent (25%) of the assets in the trust; and

(b) Investments in an investment company qualifying under paragraph 1847.h.i. (b) of this paragraph shall not exceed five percent (5%) of the assets in the trust and the aggregate amount of investment in qualifying investment companies shall be included when calculating the permissible aggregate value of equity interests pursuant to paragraph 1847.f.i.

i. Letters of Credit

   i. In order for a letter of credit to qualify as an asset of the trust, the trustee shall have the right and the obligation pursuant to the deed of trust or some other binding agreement (as duly approved by the commissioner), to immediately draw down the full amount of the letter of credit and hold the proceeds in trust for the beneficiaries of the trust if the letter of credit will otherwise expire without being renewed or replaced.

   ii. The trust agreement shall provide that the trustee shall be liable for its negligence, willful misconduct or lack of good faith. The failure of the trustee to draw against the letter of credit in circumstances where such draw would be required shall be deemed to be negligence and/or willful misconduct.

Asset or Reduction from Liability for Reinsurance Ceded by a Domestic Insurer to an Assuming Insurer not Meeting the Requirements detailed above under “Credit Allowed a Domestic Ceding Insurer” (paragraphs 7-1847)

1948. An asset or a reduction from liability for the reinsurance ceded by a domestic insurer to an assuming insurer not meeting the requirements under “Credit Allowed a Domestic Ceding Insurer” (paragraphs 7-1847) shall be allowed in an amount not exceeding the liabilities carried by the ceding insurer. The reduction shall be in the amount of funds held by or on behalf of the ceding insurer, including funds held in trust for the ceding insurer, under a reinsurance contract with the assuming insurer as security for the payment of obligations thereunder, if the security is held in the United States subject to withdrawal solely by, and under the exclusive control of, the ceding insurer; or, in the case of a trust, held in a qualified U.S. financial institution, as defined under “Qualified U.S. Financial Institutions” at paragraph 5453. This security may be in the form of:

a. Cash;

b. Securities listed by the Securities Valuation Office of the National Association of Insurance Commissioners, including those deemed exempt from filing as defined by the Purposes and Procedures Manual of the NAIC Securities Valuation Office, and qualifying as admitted assets;
Drafting Note: The Purposes and Procedures Manual of the NAIC Securities Valuation Office has been renamed the Purposes and Procedures Manual of the NAIC Investment Analysis Office, however, the Model law refers to the previous name.

c. i. Clean, irrevocable, unconditional and evergreen letters of credit, issued or confirmed by a qualified U.S. financial institution, as defined in paragraph 5352, effective no later than December 31 of the year for which the filing is being made, and in the possession of, or in trust for, the ceding insurer on or before the filing date of its annual statement;

ii. Letters of credit meeting applicable standards of issuer acceptability as of the dates of their issuance (or confirmation) shall, notwithstanding the issuing (or confirming) institution’s subsequent failure to meet applicable standards of issuer acceptability, continue to be acceptable as security until their expiration, extension, renewal, modification or amendment, whichever first occurs.

d. An admitted asset or a reduction from liability for reinsurance ceded to an unauthorized assuming insurer pursuant to this appendix shall be allowed only when the requirements of paragraph 1514 and the applicable portions under the sections below titled “Trust Agreements Qualified under Paragraph 1918”, “Letters of Credit Qualified under Paragraph 1918”, and “Other Security” at paragraph 5150.

**Trust Agreements Qualified under Paragraph 1918**

2049. The trust agreement shall be entered into between the beneficiary, the grantor and a trustee, which shall be a qualified U.S. financial institution as defined in paragraph 5453.

2120. The trust agreement shall create a trust account into which assets shall be deposited.

2224. All assets in the trust account shall be held by the trustee at the trustee’s office in the United States.

2322. The trust agreement shall provide that:

a. The beneficiary shall have the right to withdraw assets from the trust account at any time, without notice to the grantor, subject only to written notice from the beneficiary to the trustee;

b. No other statement or document is required to be presented to withdraw assets, except that the beneficiary may be required to acknowledge receipt of withdrawn assets;

c. It is not subject to any conditions or qualifications outside of the trust agreement; and

d. It shall not contain references to any other agreements or documents except as provided for in paragraph 3029.

2423. The trust agreement shall be established for the sole benefit of the beneficiary.

2524. The trust agreement shall require the trustee to:

a. Receive assets and hold all assets in a safe place;

b. Determine that all assets are in such form that the beneficiary, or the trustee upon direction by the beneficiary, may whenever necessary negotiate any such assets, without consent or signature from the grantor or any other person or entity;

c. Furnish to the grantor and the beneficiary a statement of all assets in the trust account upon its inception and at intervals no less frequent than the end of each calendar quarter;

d. Notify the grantor and the beneficiary within ten (10) days, of any deposits to or withdrawals from the trust account;

e. Upon written demand of the beneficiary, immediately take any and all steps necessary to transfer absolutely and unequivocally all right, title and interest in the assets held in the trust account to the beneficiary and deliver physical custody of the assets to the beneficiary; and
f. Allow no substitutions or withdrawals of assets from the trust account, except on written instructions from the beneficiary, except that the trustee may, without the consent of but with notice to the beneficiary, upon call or maturity of any trust asset, withdraw such asset upon condition that the proceeds are paid into the trust account.

2625. The trust agreement shall provide that at least thirty (30) days, but not more than forty-five (45) days, prior to termination of the trust account, written notification of termination shall be delivered by the trustee to the beneficiary.

2726. The trust agreement shall be made subject to and governed by the laws of the state in which the trust is domiciled.

2827. The trust agreement shall prohibit invasion of the trust corpus for the purpose of paying compensation to, or reimbursing the expenses of, the trustee. In order for a letter of credit to qualify as an asset of the trust, the trustee shall have the right and the obligation pursuant to the deed of trust or some other binding agreement, as duly approved by the commissioner, to immediately draw down the full amount of the letter of credit and hold the proceeds in trust for the beneficiaries of the trust if the letter of credit will otherwise expire without being renewed or replaced.

2928. The trust agreement shall provide that the trustee shall be liable for its negligence, willful misconduct or lack of good faith. The failure of the trustee to draw against the letter of credit in circumstances where such draw would be required shall be deemed to be negligence and/or willful misconduct.

3029. Notwithstanding other provisions of this appendix, when a trust agreement is established in conjunction with a reinsurance agreement covering risks other than life, annuities and accident and health, where it is customary practice to provide a trust agreement for a specific purpose, the trust agreement may provide that the ceding insurer shall undertake to use and apply amounts drawn upon the trust account, without diminution because of the insolvency of the ceding insurer or the assuming insurer, only for the following purposes:

a. To pay or reimburse the ceding insurer for the assuming insurer’s share under the specific reinsurance agreement regarding any losses and allocated loss expenses paid by the ceding insurer, but not recovered from the assuming insurer, or for unearned premiums due to the ceding insurer if not otherwise paid by the assuming insurer;

b. To make payment to the assuming insurer of any amounts held in the trust account that exceed 102 percent of the actual amount required to fund the assuming insurer’s obligations under the specific reinsurance agreement; or

c. Where the ceding insurer has received notification of termination of the trust account and where the assuming insurer’s entire obligations under the specific reinsurance agreement remain unliquidated and undischarged ten (10) days prior to the termination date, to withdraw amounts equal to the obligations and deposit those amounts in a separate account, in the name of the ceding insurer in any qualified U.S. financial institution as defined in paragraph 5423 apart from its general assets, in trust for such uses and purposes specified in paragraphs 3028.a. and b. above as may remain executory after such withdrawal and for any period after the termination date.

3130. Notwithstanding other provisions of this appendix, when a trust agreement is established to meet the requirements of paragraph 1948 in conjunction with a reinsurance agreement covering life, annuities or accident and health risks, where it is customary to provide a trust agreement for a specific purpose, the trust agreement may provide that the ceding insurer shall undertake to use and apply amounts drawn upon the trust account, without diminution because of the insolvency of the ceding insurer or the assuming insurer, only for the following purposes:

a. To pay or reimburse the ceding insurer for:
i. The assuming insurer’s share under the specific reinsurance agreement of premiums returned, but not yet recovered from the assuming insurer, to the owners of policies reinsured under the reinsurance agreement on account of cancellations of the policies; and

ii. The assuming insurer’s share under the specific reinsurance agreement of surrenders and benefits or losses paid by the ceding insurer, but not yet recovered from the assuming insurer, under the terms and provisions of the policies reinsured under the reinsurance agreement;

b. To pay to the assuming insurer amounts held in the trust account in excess of the amount necessary to secure the credit or reduction from liability for reinsurance taken by the ceding insurer; or

c. Where the ceding insurer has received notification of termination of the trust and where the assuming insurer’s entire obligations under the specific reinsurance agreement remain unliquidated and undischarged ten (10) days prior to the termination date, to withdraw amounts equal to the assuming insurer’s share of liabilities, to the extent that the liabilities have not yet been funded by the assuming insurer, and deposit those amounts in a separate account, in the name of the ceding insurer in any qualified U. S. financial institution apart from its general assets, in trust for the uses and purposes specified in paragraphs 3130.a. and b. as may remain executory after withdrawal and for any period after the termination date.

3231. Either the reinsurance agreement or the trust agreement must stipulate that assets deposited in the trust account shall be valued according to their current fair market value and shall consist only of cash in United States dollars, certificates of deposit issued by a United States bank and payable in United States dollars, and investments permitted by the Insurance Code or any combination of the above, provided investments in or issued by an entity controlling, controlled by or under common control with either the grantor or the beneficiary of the trust shall not exceed five percent (5%) of total investments. The agreement may further specify the types of investments to be deposited. If the reinsurance agreement covers life, annuities or accident and health risks, then the provisions required by this paragraph must be included in the reinsurance agreement.

3332. Notwithstanding any other provisions in the trust instrument, if the grantor of the trust has been declared insolvent or placed into receivership, rehabilitation, liquidation or similar proceedings under the laws of its state or country of domicile, the trustee shall comply with an order of the commissioner with regulatory oversight over the trust or court of competent jurisdiction directing the trustee to transfer to the commissioner with regulatory oversight or other designated receiver all of the assets of the trust fund. The assets shall be applied in accordance with the priority statutes and laws of the state in which the trust is domiciled applicable to the assets of insurance companies in liquidation. If the commissioner with regulatory oversight determines that the assets of the trust fund or any part thereof are not necessary to satisfy claims of the U.S. beneficiaries of the trust, the assets or any part of them shall be returned to the trustee for distribution in accordance with the trust agreement.

3433. The trust agreement may provide that the trustee may resign upon delivery of a written notice of resignation, effective not less than ninety (90) days after the beneficiary and grantor receive the notice and that the trustee may be removed by the grantor by delivery to the trustee and the beneficiary of a written notice of removal, effective not less than ninety (90) days after the trustee and the beneficiary receive the notice, provided that no such resignation or removal shall be effective until a successor trustee has been duly appointed and approved by the beneficiary and the grantor and all assets in the trust have been duly transferred to the new trustee.

3534. The grantor may have the full and unqualified right to vote any shares of stock in the trust account and to receive from time to time payments of any dividends or interest upon any shares of stock or obligations included in the trust account. Any interest or dividends shall be either forwarded promptly upon receipt to the grantor or deposited in a separate account established in the grantor’s name.
3625. The trustee may be given authority to invest, and accept substitutions of, any funds in the account, provided that no investment or substitution shall be made without prior approval of the beneficiary, unless the trust agreement specifies categories of investments acceptable to the beneficiary and authorizes the trustee to invest funds and to accept substitutions that the trustee determines are at least equal in market value to the assets withdrawn and that are consistent with the restrictions in paragraph 3928.b.

3726. The trust agreement may provide that the beneficiary may at any time designate a party to which all or part of the trust assets are to be transferred. Transfer may be conditioned upon the trustee receiving, prior to or simultaneously, other specified assets.

3837. The trust agreement may provide that, upon termination of the trust account, all assets not previously withdrawn by the beneficiary shall, with written approval by the beneficiary, be delivered over to the grantor.

3938. A reinsurance agreement may contain provisions that:

a. Require the assuming insurer to enter into a trust agreement and to establish a trust account for the benefit of the ceding insurer, and specifying what the agreement is to cover;

b. Require the assuming insurer, prior to depositing assets with the trustee, to execute assignments or endorsements in blank, or to transfer legal title to the trustee of all shares, obligations or any other assets requiring assignments, in order that the ceding insurer, or the trustee upon the direction of the ceding insurer, may whenever necessary negotiate these assets without consent or signature from the assuming insurer or any other entity;

c. Require that all settlements of account between the ceding insurer and the assuming insurer be made in cash or its equivalent; and

d. Stipulate that the assuming insurer and the ceding insurer agree that the assets in the trust account, established pursuant to the provisions of the reinsurance agreement, may be withdrawn by the ceding insurer at any time, notwithstanding any other provisions in the reinsurance agreement, and shall be utilized and applied by the ceding insurer or its successors in interest by operation of law, including without limitation any liquidator, rehabilitator, receiver or conservator of such company, without diminution because of insolvency on the part of the ceding insurer or the assuming insurer, only for the following purposes:

i. To pay or reimburse the ceding insurer for:

(a) The assuming insurer’s share under the specific reinsurance agreement of premiums returned, but not yet recovered from the assuming insurer, to the owners of policies reinsured under the reinsurance agreement because of cancellations of such policies;

(b) The assuming insurer’s share of surrenders and benefits or losses paid by the ceding insurer pursuant to the provisions of the policies reinsured under the reinsurance agreement; and

(c) Any other amounts necessary to secure the credit or reduction from liability for reinsurance taken by the ceding insurer;

ii. To make payment to the assuming insurer of amounts held in the trust account in excess of the amount necessary to secure the credit or reduction from liability for reinsurance taken by the ceding insurer.

4039. The reinsurance agreement also may contain provisions that:

a. Give the assuming insurer the right to seek approval from the ceding insurer, which shall not be unreasonably or arbitrarily withheld, to withdraw from the trust account all or any part of the trust assets and transfer those assets to the assuming insurer, provided:
i. The assuming insurer shall, at the time of withdrawal, replace the withdrawn assets with other qualified assets having a current fair market value equal to the market value of the assets withdrawn so as to maintain at all times the deposit in the required amount; or

ii. After withdrawal and transfer, the current fair market value of the trust account is no less than 102 percent of the required amount.

b. Provide for the return of any amount withdrawn in excess of the actual amounts required for paragraph 3938.d., and for interest payments at a rate not in excess of the prime rate of interest on such amounts;

c. Allow the award by any arbitration panel or court of competent jurisdiction of:

   i. Interest at a rate different from that provided in paragraph 4039.b.;

   ii. Court or arbitration costs;

   iii. Attorney’s fees; and

   iv. Any other reasonable expenses.

4140. Financial Reporting - A trust agreement may be used to reduce any liability for reinsurance ceded to an unauthorized assuming insurer in statutory financial statements when established on or before the date of filing of the statutory financial statement of the ceding insurer. Further, the reduction for the existence of an acceptable trust account may be up to the current fair market value of acceptable assets available to be withdrawn from the trust account at that time, but such reduction shall be no greater than the specific obligations under the reinsurance agreement that the trust account was established to secure.

4241. The failure of any trust agreement to specifically identify the beneficiary as defined in paragraph 4 shall not be construed to affect any actions or rights that the commissioner may take or possess pursuant to the provisions of the laws of the domiciliary state.

Letters of Credit Qualified under Paragraph 1948

4342. The letter of credit must be clean, irrevocable, unconditional and issued or confirmed by a qualified U.S. financial institution as defined in paragraph 5352. The letter of credit shall contain an issue date and expiration date and shall stipulate that the beneficiary need only draw a sight draft under the letter of credit and present it to obtain funds and that no other document need be presented. The letter of credit also shall indicate that it is not subject to any condition or qualifications outside of the letter of credit. In addition, the letter of credit itself shall not contain reference to any other agreements, documents or entities, except as provided in paragraph 5049.a. If a court of law appoints a successor in interest to the named beneficiary, then the named beneficiary includes and is limited to the court appointed domiciliary receiver (including conservator, rehabilitator or liquidator).

4443. The heading of the letter of credit may include a boxed section containing the name of the applicant and other appropriate notations to provide a reference for the letter of credit. The boxed section shall be clearly marked to indicate that such information is for internal identification purposes only.

4544. The letter of credit shall contain a statement to the effect that the obligation of the qualified U.S. financial institution under the letter of credit is in no way contingent upon reimbursement with respect thereto.

4645. The term of the letter of credit shall be for at least one year and shall contain an “evergreen clause” that prevents the expiration of the letter of credit without due notice from the issuer. The “evergreen clause” shall provide for a period of no less than thirty (30) day notice prior to expiration date or nonrenewal.
4746. The letter of credit shall state whether it is subject to and governed by the laws of the ceding insurers state or the Uniform Customs and Practice for Documentary Credits of the International Chamber of Commerce (Publication 600) or International Standby Practices of the International Chamber of Commerce Publication 590 (ISP98), or any successor publication, and all drafts drawn thereunder shall be presentable at an office in the United States of a qualified U.S. financial institution.

4847. If the letter of credit is made subject to the Uniform Customs and Practice for Documentary Credits of the International Chamber of Commerce Publication 600 (UCP 600) or International Standby Practices of the International Chamber of Commerce Publication 590 (ISP98), or any successor publication, then the letter of credit shall specifically address and provide for an extension of time to draw against the letter of credit in the event that one or more of the occurrences specified in Article 36 of Publication 600 or any other successor publication, occur.

4948. If the letter of credit is issued by a financial institution authorized to issue letters of credit, other than a qualified U.S. financial institution as described in paragraph 4342, then the following additional requirements shall be met:

a. The issuing financial institution shall formally designate the confirming qualified U.S. financial institution as its agent for the receipt and payment of the drafts; and

b. The “evergreen clause” shall provide for thirty (30) days notice prior to expiration date for nonrenewal.

5049. Reinsurance agreement provisions:

a. The reinsurance agreement in conjunction with which the letter of credit is obtained may contain provisions that:

i. Require the assuming insurer to provide letters of credit to the ceding insurer and specify what they are to cover;

ii. Stipulate that the assuming insurer and ceding insurer agree that the letter of credit provided by the assuming insurer pursuant to the provisions of the reinsurance agreement may be drawn upon at any time, notwithstanding any other provisions in the agreement, and shall be utilized by the ceding insurer or its successors in interest only for one or more of the following reasons:

(a) To pay or reimburse the ceding insurer for:

   (1) The assuming insurer’s share under the specific reinsurance agreement of premiums returned, but not yet recovered from the assuming insurers, to the owners of policies reinsured under the reinsurance agreement on account of cancellations of such policies;

   (2) The assuming insurer’s share, under the specific reinsurance agreement, of surrenders and benefits or losses paid by the ceding insurer, but not yet recovered from the assuming insurers, under the terms and provisions of the policies reinsured under the reinsurance agreement; and

   (3) Any other amounts necessary to secure the credit or reduction from liability for reinsurance taken by the ceding insurer;

(b) Where the letter of credit will expire without renewal or be reduced or replaced by a letter of credit for a reduced amount and where the assuming insurer’s entire
obligations under the reinsurance agreement remain unliquidated and undischarged ten (10) days prior to the termination date, to withdraw amounts equal to the assuming insurer’s share of the liabilities, to the extent that the liabilities have not yet been funded by the assuming insurer and exceed the amount of any reduced or replacement letter of credit, and deposit those amounts in a separate account in the name of the ceding insurer in a qualified U.S. financial institution apart from its general assets, in trust for such uses and purposes specified in paragraph 5049.a.ii.(a) as may remain after withdrawal and for any period after the termination date.

iii. All of the provisions of paragraph 5049.a. shall be applied without diminution because of insolvency on the part of the ceding insurer or assuming insurer.

b. Nothing contained in paragraph 5049.a. shall preclude the ceding insurer and assuming insurer from providing for:

i. An interest payment, at a rate not in excess of the prime rate of interest, on the amounts held pursuant to paragraph 5049.a.ii.; or

ii. The return of any amounts drawn down on the letters of credit in excess of the actual amounts required for the above or any amounts that are subsequently determined not to be due.

Other Security

5150. A ceding insurer may take credit for unencumbered funds withheld by the ceding insurer in the United States subject to withdrawal solely by the ceding insurer and under its exclusive control.

5254. Credit will not be granted, nor an asset or reduction from liability allowed, to a ceding insurer for reinsurance effected with assuming insurers meeting the requirements of this appendix or otherwise in compliance with this appendix unless the reinsurance agreement:

a. Includes a proper insolvency clause, which stipulates that reinsurance is payable directly to the liquidator or successor without diminution regardless of the status of the ceding company;

b. Includes a provision pursuant to Section [cite state law equivalent to Section 2 of the Credit for Reinsurance Model Law] whereby the assuming insurer, if an unauthorized assuming insurer, has submitted to the jurisdiction of an alternative dispute resolution panel or court of competent jurisdiction within the United States, has agreed to comply with all requirements necessary to give the court or panel jurisdiction, has designated an agent upon whom service of process may be effected, and has agreed to abide by the final decision of the court or panel; and

c. Includes a proper reinsurance intermediary clause, if applicable, which stipulates that the credit risk for the intermediary is carried by the assuming insurer.

Qualified U.S. Financial Institutions

5352. For purposes of paragraphs 1847, 1948.c., 4342 and 4948, a “qualified U.S. financial institution” means an institution that:

a. Is organized or (in the case of a U.S. office of a foreign banking organization) licensed, under the laws of the United States or any state thereof;

b. Is regulated, supervised and examined by U.S. federal or state authorities having regulatory authority over banks and trust companies; and
c. Has been determined by either the commissioner or the Securities Valuation Office of the National Association of Insurance Commissioners to meet such standards of financial condition and standing as are considered necessary and appropriate to regulate the quality of financial institutions whose letters of credit will be acceptable to the commissioner.

5453. A “qualified U.S. financial institution” means, for purposes of those provisions of this appendix specifying those institutions that are eligible to act as a fiduciary of a trust, an institution that:

a. Is organized, or in the case of a U.S. branch or agency office of a foreign banking organization, licensed, under the laws of the United States or any state thereof and has been granted authority to operate with fiduciary powers; and

b. Is regulated, supervised and examined by federal or state authorities having regulatory authority over banks and trust companies.
Maintenance updates provide revisions to the *Accounting Practices and Procedures Manual*, such as editorial corrections, reference changes and formatting.

**Status:**
On August 3, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed editorial revisions to SSAP No. 62R—Property and Casualty Reinsurance, SSAP No. 86—Derivatives, and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, as illustrated below.

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted the exposed editorial revisions to SSAP No. 62R—Property and Casualty Reinsurance, SSAP No. 86—Derivatives, and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, as final.

1. **SSAP No. 62R, paragraph 116**

   *The below revisions are for readability and are not intended to change the content of the disclosure.*

   116. Disclose if the reporting entity during the period covered by the statement ceded any risk under any reinsurance contract (or under multiple contracts with the same reinsurer or its affiliates) for which during the period covered by the statement it recorded a positive or negative underwriting result greater than 5% of prior year-end surplus as regards policyholders or it reported calendar year written premium ceded or year-end loss and loss expense reserves ceded greater than 5% of prior year-end surplus as regards policyholders. This disclosure is limited to reinsurance contracts with written premium cessions or loss and loss expense reserve cessions described in this paragraph that meet the criteria of paragraph 95.a. or paragraph 95.b. This disclosure excludes cessions to approved pooling arrangements or to captive insurance companies that are directly or indirectly controlling, controlled by, or under common control with (i) one or more unaffiliated policyholders of the reporting entity, or (ii) an association of which one or more unaffiliated policyholders of the reporting entity is a member. where:

   a. The written premium ceded to the reinsurer by the reporting entity or its affiliates represents fifty percent (50%) or more of the entire direct and assumed premium written by the reinsurer based on its most recently available financial statement; or

   b. Twenty-five percent (25%) or more of the written premium ceded to the reinsurer has been retroceded back to the reporting entity or its affiliates in a separate reinsurance contract.
2. **SSAP No. 86, Exhibit A, paragraph 5g:**

Derivative instruments include, but are not limited to; options, warrants used in a hedging transaction and not attached to another financial instrument, caps, floors, collars, swaps, forwards, futures, structured notes with risk of principal/original investment loss based on the terms of the agreement (in addition to default risk), and any other agreements or instruments substantially similar thereto or any series or combination thereof.

5g. “Structured Notes” in scope of this statement are instruments defined in SSAP No. 26R (often in the form of debt instruments), in which the amount of principal repayment or return of original investment is contingent on an underlying variable/interest. Structured notes that are “mortgage-referenced securities” are captured in SSAP No. 43R—Loan-backed and Structured Securities.

Footnote 1: The “structured notes” captured within scope of this statement is specific to instruments in which the terms of the agreement make it possible that the reporting entity could lose all or a portion of its original investment amount (for other than failure of the issuer to pay the contractual amounts due). These instruments incorporate both the credit risk of the issuer, as well as the risk of an underlying variable/interest (such as the performance of an equity index or the performance of an unrelated security). Securities that are labeled “principal-protected notes” are captured within scope of this statement if the “principal protection” involves only a portion of the principal and/or if the principal protection requires the reporting entity to meet qualifying conditions in order to be safeguarded from the risk of loss from the underlying linked variable. Securities that may have changing positive interest rates in response to a linked underlying variable or the passage of time, or that have the potential for increased principal repayments in response to a linked variable (such as U.S. Treasury Inflation-Indexed Securities) that do not incorporate risk of original investment /principal loss (outside of default risk) are not captured as structured notes in scope of this statement.

3. **SSAP No. 97, Exhibit A, paragraph 49**

By August 31 or one month after the audit report date of each year, the NAIC shall initiate a review of all SCA investments for which new Sub 2 form filings have been received as well as an annual update review of Sub 2 SCA investments already logged in the VISION database. The NAIC review shall encompass a review of the most recent annual statutory reporting by the parent insurance company's Schedule Y (to ascertain the identity of the members of the holding company system and to ensure that information for all SCA companies has been submitted), a review of the parent's financial statement blank to review the last reported value for the SCA investments and a review of the VISION database to determine whether SCA debt and SCA preferred securities have been assigned NAIC designations. As part of its analysis, the NAIC shall review the portion of the bond investments carried by the parent or a subsidiary insurer with a Z notation. If the NAIC determines that the portion of the Z bonds shown on the documentation is significant, the NAIC shall not process the Sub 2 filing until the insurance company reports the bonds to permit removal of the Z notation. Beginning with year-end 2019, two new suffixes will apply: YE and IF. YE means that the security is a properly filed annual update that the SVO has determined will not be assigned an NAIC Designation by the close of the year-end reporting cycle. The symbol YE is assigned by the SVO pursuant to the carryover administrative procedure described in Part One, Section 3 f) (iii) of this Manual. When the SVO assigns the symbol YE it also assigns the NAIC Designation in effect for the previous reporting year. IF means that the security is an initial filing that has been properly filed with the SVO but which the SVO has determined will not be assigned an NAIC Designation by the close of the year-end reporting cycle. The symbol IF is assigned by the SVO and communicates that the insurer should self-designate the security for year-end and identify it with the symbol IF. IF therefore also communicates to the regulator that the NAIC Designation reported by the insurance company was not derived by or obtained from the SVO, but has been determined analytically by a reporting insurance company.

**Description of Issue:** In June 2016, the FASB issued *ASU 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*, which introduced the expected credit losses methodology for the measurement of credit losses on financial assets measured at amortized cost basis, replacing the previous incurred loss methodology. *ASU 2016-13* also modified the accounting for available-for-sale debt securities, which must be individually assessed for credit losses when fair value is less than the amortized cost basis.

The FASB noted that financial statement preparers have begun to elect the fair value option on newly originated or purchased financial assets, although those entities historically have measured similar financial assets at an amortized cost basis. This adoption would require the maintenance of dual measurement methodologies for identical or similar financial instruments that are being managed in a similar manner. With this approach, users would not have decision useful information because the financial statements would not be comparable (i.e., a portion of an entity’s financial instruments measured at fair value versus other identical instruments measured at amortized costs that are owned by the same entity).

The amendments in this update provide an alternative accounting treatment to elect the fair value option for certain financial assets previously measured at amortized cost basis. The fair value option in this update does not apply to GAAP classified held-to-maturity debt securities.

**Existing Authoritative Literature:**
The existing guidance for the fair value is captured *SSAP 100R—Fair Value*. However, pursuant to statutory accounting, assets are required to be reported at the measurement method stipulated under the applicable SSAP. An election to utilize fair value in lieu of the stipulated measurement method (e.g., amortized cost) is not allowed under statutory accounting.

**Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups):** Significant activity has taken place regarding the analysis of *ASU 2016-13: Financial Instruments – Credit Losses*. Additional review and consideration is included in agenda item 2016-20.

**Information or issues (included in Description of Issue) not previously contemplated by the Working Group:** None

**Convergence with International Financial Reporting Standards (IFRS):** The IASB issued *IFRS 9, Financial Instruments* in July 2014 as a response to concerns identified pertaining to the delayed recognition of credit losses; however, the IASB’s stakeholders strongly preferred an impairment model that uses a dual measurement approach, while U.S. stakeholders strongly preferred the current expected credit loss model.
Staff Recommendation: NAIC staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive, and expose revisions to SSAP No. 100R to reject ASU 2019-05 for statutory accounting.

This item is proposed to be rejected as ASU 2019-05 provides an alternative accounting treatment for certain financial assets (excluding held-to-maturity debt securities) previously measured at amortized cost. Pursuant to statutory accounting, assets are required to be reported at the measurement method stipulated under the applicable SSAP. An election to utilize fair value in lieu of the stipulated measurement method (e.g., amortized cost) is not allowed under statutory accounting.

Proposed Revisions to SSAP No. 100R:

Staff Review Completed by: Jim Pinegar – June 2019

Status:
On August 3, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 100R—Fair Value, as illustrated above, to reject ASU 2019-05, Targeted Transition Relief for statutory accounting.

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted the exposed revisions to SSAP 100R—Fair Value, as final, to reject ASU 2019-05, Financial Instruments—Credit Losses: Targeted Transition Relief for statutory accounting.

</tbody>
</table>

Description of Issue:
In 2014, the FASB issued 1) ASU 2014-02, Intangibles—Goodwill and Other (Topic 350): Accounting for Goodwill, and 2) ASU 2014-18, Business Combinations (Topic 805): Accounting for Identifiable Intangible Assets in a Business Combination, which simplify the subsequent accounting for goodwill and certain identifiable intangible assets in business combinations. Those amendments were in response to concerns expressed by private companies regarding the cost and complexity of goodwill impairment tests and the accounting for certain identifiable intangible assets. When FASB issued both updates, it acknowledged that the issues addressed were not limited to private companies; they also pertain to not-for-profit entities.

Accordingly, FASB received feedback questioning the relevance and benefit of an impairment-only approach to goodwill and the accounting for identifiable intangible assets acquired in an acquisition by a not-for-profit entity. By providing an accounting alternative, this update will reduce the cost and complexity associated with the accounting for goodwill and the measurement of certain acquired identifiable intangible assets without significantly diminishing decision-useful information in not-for-profit financial statements.

The amendments in this update extend the private company alternatives from Topic 350 (ASU 2014-02) and Topic 805 (ASU 2014-18) to not-for-profit entities. Under this update, an alternative accounting treatment is offered to where if elected, a not-for-profit entity shall amortize goodwill on a straight-line basis over the lesser of 10 years or the demonstrated useful life. Additionally, a not-for-profit entity that elects this accounting alternative is required to make an accounting policy election to test goodwill for impairment at either the entity level or the reporting unit level. A not-for-profit entity is required to test goodwill for impairment when a triggering event occurs that indicates that the fair value of the entity may be below its carrying amount. Finally, certain identifiable intangible assets such as customer related intangibles (i.e. mortgage servicing rights) and noncompete agreements would no longer be separately recognized from goodwill.

Existing Authoritative Literature:
The existing guidance for goodwill and subsequent amortization is referenced in SSAP No. 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities.

Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups): None

Information or issues (included in Description of Issue) not previously contemplated by the Working Group: None
Convergence with International Financial Reporting Standards (IFRS):
IFRS standards do not provide industry guidance for not-for-profit entities regarding goodwill. However, the IASB is currently reviewing if it should retain the existing impairment only model for the subsequent accounting of goodwill, or reintroduce an amortization method, as noted in IFRS Agenda Paper 18B.

Staff Recommendation: NAIC staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive, and expose revisions to SSAP No. 68 and SAP No. 97 to reject ASU 2019-06 for statutory accounting.

While the initial calculation of goodwill was not in scope of ASU 2019-06, this update provides optionality of an alternative accounting treatment for the straight-line amortization of goodwill for not-for-profit entities over the lesser of 10 years or the demonstrated useful life, subject to an impairment analysis performed in the event a triggering event occurs. Additionally, certain other identifiable intangible assets are no longer separately recorded and shall be combined into goodwill. As a point of reference, ASU 2019-06 is an extension of ASU 2014-02 to not-for-profit entities; ASU 2014-02 was previously rejected for SSAP.

This item is proposed to be rejected as ASU 2019-06 provides alternative accounting treatments for goodwill. Optionality treatment is not consistent with SSAP 68, specifically paragraphs 7 & 8, and SAP 97; however current SSAP guidance is similar as goodwill shall be amortized over the period in which the acquiring entity benefits economically, not to exceed 10 years. Additionally, impairment analysis shall occur in the event that a decline in an acquired entity’s fair value, that is other than temporary, may be below its carrying amount.

Proposed Revisions to SSAP No. 68:

20. This statement rejects ASU 2019-06, Intangibles—Goodwill and Other Business Combinations, and Non-for-Profit Entities, ASU 2017-04, Simplifying the Test for Goodwill Impairment, ASU 2016-03, Intangibles—Goodwill and Other, Business Combinations, Consolidation, Derivatives and Hedging, ASU 2014-02, Accounting for Goodwill (a consensus of the Private Company Council), ASU 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment, ASU 2011-08, Testing Goodwill for Impairment and ASU 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts; Accounting Principles Board Opinion No. 16, Business Combinations; FASB Statement No. 38, Accounting for Preacquisition Contingencies of Purchased Enterprises, an amendment of APB Opinion No. 16; Accounting Principles Board Opinion No. 17, Intangible Assets; FASB Statement No. 79, Elimination of Certain Disclosures for Business Combinations by Nonpublic Enterprises; FASB Statement No. 141, Business Combinations; and FASB Statement No. 142, Goodwill and Other Intangible Assets. The following related interpretative pronouncements are also rejected.

Proposed Revisions to SSAP No. 97:

48. This statement rejects ASU 2019-06, Intangibles—Goodwill and Other Business Combinations, and Non-for-Profit Entities, ASU 2011-10, Derecognition of in Substance Real Estate, APB Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock, AICPA Accounting Interpretations APB 18, The Equity Method of Accounting for Investments in Common Stock: Accounting Interpretations of APB Opinion No. 18, FASB Technical Bulletin No. 79-19, Investor’s Accounting for Unrealized Losses on Marketable Securities Owned by an Equity Method Investee, FASB Emerging Issues Task Force No. 87-21, Change of Accounting Basis in Master Limited Partnership Transactions, FASB Emerging Issues Task Force No. 96-16, Investor’s Accounting for an Investee When the Investor Has a Majority of the Voting Interest but the Minority Shareholder or Shareholders Have Certain Approval or Veto Rights, FASB Emerging Issues Task Force No. 98-2: Accounting by a Subsidiary or Joint Venture for an Investment in the stock of Its Parent Company or Joint Venture Partner and FASB Staff Position No. APB 18-1, Accounting by an Investor for Its
Proportionate Share of Accumulated Other Comprehensive Income of an Investee Accounted for under the Equity Method in Accordance with APB Opinion No. 18 upon a Loss of Significant Influence.

Staff Review Completed by: Jim Pinegar – June 2019

Status:
On August 3, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, as illustrated above, to reject ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities for statutory accounting.

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted the exposed revisions to SSAP No. 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, as final, to reject ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable Intangible Assets to Not-for-Profit Entities for statutory accounting.

**Description of Issue:**
The term “collections” in the Master Glossary of the FASB Accounting Standards Codification is not fully aligned with the definition used in the American Alliance of Museums’ (AAM) Code of Ethics for Museums. Collections are to be defined as works of art, historical treasures, or similar assets that meet certain criteria: 1) held for public exhibition / education / research; 2) are protected, cared for, and preserved; 3) are subject to the organization’s policy that requires the use of proceeds from the sale of such items be used to acquire new collection items, the direct care of existing collections, or both.

The AAM definition used, which served as the basis for the guidance on collections in FASB Statement No. 116, Accounting for Contributions Received and Contributions Made, was revised by the AAM after the issuance of Statement 116. The FASB is issuing this update to improve the definition of collections in the Master Glossary by realigning it with the definition used by the AAM. The FASB also is making a technical correction in Topic 360, Property, Plant, and Equipment, to clarify that the accounting and disclosure guidance for collections in Subtopic 958-360, Not-for-Profit Entities—Property, Plant, and Equipment.

**Existing Authoritative Literature:**
There is no current SAP guidance for business entities that maintain collections. U.S. GAAP guidance for collections, primarily an issue for certain not-for-profit entities, is included in Topic 958.

**Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E) Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups):** None

**Information or issues (included in Description of Issue) not previously contemplated by the Working Group:** None

**Convergence with International Financial Reporting Standards (IFRS):**
IFRS standards do not provide industry guidance for entities that maintain collections.

**Staff Recommendation:**
NAIC staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive, and expose revisions to Appendix D—Nonapplicable GAAP Pronouncements to reject ASU 2019-03, Updating the Definition of Collections as not applicable to statutory accounting.

This item is proposed to be rejected as not applicable as ASU 2019-03 provides specific guidance, primarily for certain not-for-profit entities that maintain collections, which is not applicable for statutory accounting purposes.

**Staff Review Completed by: Jim Pinegar – June 2019**

Issue: ASU 2018-08, Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made

Check (applicable entity):

- Modification of existing SSAP
- New Issue or SSAP
- Interpretation

P/C  Life  Health

Modification of existing SSAP  ☒  ☐  ☒
New Issue or SSAP  ☐  ☒  ☐
Interpretation  ☐  ☐  ☐

Description of Issue:
The FASB issued ASU 2018-08, Not-for-Profit Entities - Clarifying the Scope and the Accounting Guidance for Contributions Received and Contributions Made (ASU 2018-08) in June 2018. Its intent is to clarify and improve the scope and accounting guidance for contributions received and contributions made. ASU 2018-08 should assist entities in evaluating whether transactions should be accounted for as contributions (nonreciprocal transactions) or exchange (reciprocal) transactions and in determining whether the contribution is conditional. Distinguishing between contributions and exchange transactions is important as it determines which guidance to apply.

Diversity in application exists for grants and other similar contracts but is most prevalent for government grants and contracts. It has also been noted that it can be difficult to determine when a contribution is conditional, especially when an entity receives assets accompanied by certain stipulations but with no specified return requirement for when the stipulations are not met. There also isn’t uniformity in assessments of whether the likelihood of failing to meet a condition is remote and in evaluating whether and how remote provisions affect the timing of when a contribution is recognized.

Although accounting for contributions is primarily an issue for not-for-profit entities, the amendments in ASU 2018-08 are applicable to all entities, including business entities, that receive or make contributions of cash and other assets, including promises to give and contributions made. However, the amendments herein do not apply to transfers of assets from government entities to business entities. Contribution revenue may be presented in the financial statements of an entity using different terms (i.e. gift, grant, donation, etc.), but this should not be a factor for determining whether an agreement is within the scope of this guidance.

The amendments in this ASU clarify and improve the current guidance regarding whether a transfer of assets (or the reduction, settlement, or cancellation of liabilities) is a contribution or an exchange transaction. The amendments clarify how an entity determines whether a resource provider is participating in an exchange transaction by evaluating whether the resource provider is receiving commensurate value in return for the resources transferred based on the following:

1. A resource provider is not synonymous with the general public. A benefit received by the public as a result of the assets transferred is not equivalent to commensurate value received by the resource provider.

2. Execution of a resource provider’s mission or the positive sentiment from acting as a donor does not constitute commensurate value received by a resource provider for purposes of determining whether a transfer of assets is a contribution or an exchange.
Existing Authoritative Literature:

SSAP No. 67—Other Liabilities

Amounts Withheld or Retained by Company as Agent or Trustee
7. A reporting entity may, in the normal course of its business, withhold funds as an agent or trustee which will ultimately be paid to others.

8. Amounts withheld or retained by an entity as trustee or agent shall be recorded as a liability when the salaries or other compensation are expensed (paragraphs 8.a. and 8.b.) or the funds are received (paragraphs 8.c. through 8.e.). Examples of such occurrences are:
   
   a. As an employer, the reporting entity deducts and withholds federal and state income taxes, social security taxes, charitable contributions, savings plan deductions, garnishments, employee contributions to pension plans, employee share of group life and health insurance premiums, and other employee salary withholdings or deductions;

   b. Amounts due under deferred compensation arrangements shall be accrued in accordance with the provisions of SSAP No. 92—Postretirement Benefits Other Than Pensions (SSAP No. 92). Segregated funds (i.e., Rabbi trusts and similar arrangements) shall not be netted against the accrued liability unless the requirements of SSAP No. 64—Offsetting and Netting of Assets and Liabilities (SSAP No. 64) are met.

   c. For a reporting entity that invests in commercial and residential mortgages, the entity may require the mortgagor to prepay real estate taxes and property insurance premiums which the entity will hold in escrow and pay when due;

   d. The reporting entity holds deposits in connection with leases of investment property; and

   e. The reporting entity may receive and hold other funds in a fiduciary capacity.

Remittances and Items Not Allocated
9. Cash receipts cannot always be identified for a specific purpose or, for other reasons, applied to a specific account when received. The reporting entity shall record a liability for these cash receipts when the funds are received. These liability accounts are generally referred to as suspense accounts. Examples include:

   a. Premium payments received with the application for policies which have not yet been issued;

   b. Premium payments in an amount different than the amount billed by the reporting entity; and

   c. Unidentified cash receipts.

Interest Payable
10. Interest payable includes interest on debt, interest on real estate obligations, and approved interest on surplus notes. It also includes interest on funds held as a deposit or security, such as those held by a ceding company against a reinsurer. The amount to be reported is the amount which has accrued and is unpaid at the balance sheet date.

Payable to Parent, Subsidiaries and Affiliates
11. A liability shall be recognized and identified as due to affiliates for expenditures incurred on behalf of the reporting entity by a parent, affiliates, or subsidiaries or for amounts owed through other intercompany transactions. Amounts due to or from affiliates shall be offset and reported net only when the provisions of SSAP
No. 64 are met. Examples of these expenses are executive salaries, workers’ compensation insurance premiums, and pension contributions.

Description of Issue:
This agenda item has been drafted to consider statutory accounting guidance for derivatives that are not used in hedging transactions, income generation transactions or replication (synthetic asset) transactions. This agenda item was directed with the adoption of agenda item 2018-18, Structured Notes, as it was noted that structured notes captured within scope of SSAP No. 86—Derivatives, would be unlikely to be used in the transactions with existing recognition and measurement guidance in SSAP No. 86.

Although the guidance of SSAP No. 86 is limited to the derivatives captured in the noted transactions (hedging, income generation or replication), the reporting schedule for derivatives (Schedule DB) currently includes an “other” derivative reporting category. Although this agenda item clarifies the accounting (measurement) value for these derivatives, as detailed within the proposed revisions, “other” derivatives do not qualify as admitted assets under the SSAP. Derivatives classified as “other” shall only be admitted in accordance with state investment laws that provide prescribed practices that permit admittance. These prescribed practices shall be detailed in Note 1. Derivatives reported in the “hedging-other” are derivatives subject to the “hedging” guidance in SSAP No. 86 and are not intended to be captured by this agenda item. This agenda item is strictly for the derivatives reported as “other” derivatives.

Existing Authoritative Literature:
SSAP No. 86—Derivatives establishes statutory accounting principles for derivative instruments and hedging, income generation and replication (synthetic asset) transactions using selected concepts outlined in FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities.

Although the scope of SSAP No. 86 references “all derivative instruments” recognition and measurement provisions are only provided for specific transactions identified in paragraph 3:

3. This statement addresses the recognition of derivatives and measurement of derivatives used in:
   a. Hedging transactions;
   b. Income generation transactions; and
   c. Replication (synthetic asset) transactions.

4. “Derivative instrument” means an agreement, option, instrument or a series or combination thereof:
   a. To make or take delivery of, or assume or relinquish, a specified amount of one or more underlying interests, or to make a cash settlement in lieu thereof; or
b. That has a price, performance, value or cash flow based primarily upon the actual or expected price, level, performance, value or cash flow of one or more underlying interests.

Activity to Date (issues previously addressed by the Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups): Revisions have recently adopted to SSAP No. 86 and additional revisions are expected to consider ASU 2017-12, Derivatives and Hedging. Recent revisions include:

- Ref #2016-48 – Incorporated disclosures for financing derivatives.
- Ref# 2018-08 – Incorporate guidance to include structured notes in scope.
- Ref #2018-30 – Incorporated hedge documentation and assessment efficiencies from ASU 2017-12.

Information or issues (included in Description of Issue) not previously contemplated by the Working Group: None

Convergence with International Financial Reporting Standards (IFRS): U.S. GAAP and IFRS are consistent that all derivatives are reported at fair value, with changes recognized through income unless there is an election to apply hedge accounting. With hedge accounting, under IFRS and U.S. GAAP, derivatives are still reported at fair value, but the gain/loss may be recognized through other comprehensive income (instead of income).

Staff Recommendation: NAIC staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive, and expose revisions to SSAP No. 86—Derivatives to include recognition and measurement guidance for derivatives that do not qualify as hedging, income generation or replication transactions. In addition to the proposed revisions specific for “other” derivatives, revisions are reflected in the headers to separate the application of existing guidance.

Working Group Question – With the language proposed, admittance of “other” derivatives under state investment laws will require a prescribed practice disclosure in Note 1. Working Group comments are requested on whether the language in the SSAP should permit admittance under state investment law. If this language was included, then a prescribed practice detailed in Note 1 would not be required.

Proposed Revisions to SSAP No. 86—Derivatives:

3. This statement addresses the recognition of derivatives and measurement of derivatives used in:
   a. Hedging transactions;
   b. Income generation transactions; and
   c. Replication (synthetic asset) transactions.
   d. Other Derivatives – (Derivatives that are not used in hedging, income generation or replication transactions.)

Impairment

17. This statement adopts the impairment guidelines established by SSAP No. 5R—Liabilities, Contingencies and Impairments of Assets (SSAP No. 5R) for the underlying financial assets or liabilities.
Recognition of Derivatives Recognition and Measurement of Derivatives Used in Hedging Transactions

18. Derivative instruments represent rights or obligations that meet the definitions of assets (SSAP No. 4—Assets and Nonadmitted Assets) or liabilities (SSAP No. 5R) and shall be reported in financial statements. In addition, derivative instruments also meet the definition of financial instruments as defined in SSAP No. 27—Off-Balance-Sheet and Credit Risk Disclosures (SSAP No. 27). Should the cost basis of the derivative instrument be undefined (i.e., no premium is paid), the instrument shall be disclosed in accordance with paragraphs 44-48 of SSAP No. 100R—Fair Value (SSAP No. 100R). Derivative instruments used in hedging, income generation or replication (synthetic asset) transactions shall be recognized and measured in accordance with the specific provisions within this statement and are admitted assets to the extent they conform to the requirements of this statement.

19. Derivative instruments that are not used in hedging, income generation or replication (synthetic asset) transactions shall be considered “Other” derivatives. These derivatives shall be accounted for at fair value and the changes in fair value shall be recorded as unrealized gains or losses. These derivatives do not qualify as admitted assets.

Derivatives Used in Hedging Transactions

49-20. Derivative instruments used in hedging transactions that meet the criteria of a highly effective hedge shall be considered an effective hedge and are permitted to be valued and reported in a manner that is consistent with the hedged asset or liability (referred to as hedge accounting). For instance, assume an entity has a financial instrument on which it is currently receiving income at a variable rate but wishes to receive income at a fixed rate and thus enters into a swap agreement to exchange the cash flows. If the transaction qualifies as an effective hedge and a financial instrument on a statutory basis is valued and reported at amortized cost, then the swap would also be valued and reported at amortized cost. Derivative instruments used in hedging transactions that do not meet or no longer meet the criteria of an effective hedge, or that meet the required criteria but the entity has chosen not to apply hedge accounting, shall be accounted for at fair value and the changes in the fair value shall be recorded as unrealized gains or losses (referred to as fair value accounting).

Recognition and Measurement of Derivatives Used in Income Generation Transactions

General

43-44. Income generation transactions are defined as derivatives written or sold to generate additional income or return to the reporting entity. They include covered options, caps, and floors (e.g., a reporting entity writes an equity call option on stock that it already owns).

Recognition and Measurement of Derivatives Used in Replication (Synthetic Asset) Transactions

53-54. Replication (Synthetic Asset) transaction means a derivative transaction entered into in conjunction with other investments in order to reproduce the investment characteristics of otherwise permissible investments. A derivative transaction entered into by an insurer as a hedging or income generation transaction shall not be considered a replication (synthetic asset) transaction.

Staff Review Completed by: Julie Gann – April 2019

Status:
On May 29, 2019, the Statutory Accounting Principles (E) Working Group moved this item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 86—Derivatives, as shown above, to include
recognition and measurement guidance for derivatives that do not qualify as hedging, income generation or replication transactions.

On August 3, 2019, the Statutory Accounting Principles (E) Working Group re-exposed revisions to SSAP No. 86—Derivatives, as illustrated above, to clarify that “other” derivatives not used in hedging, income generation or replication shall be reported at fair value and do not qualify as admitted assets.

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted, as final, revisions to SSAP No. 86—Derivatives, as detailed under Proposed Revisions, to clarify the recognition and measurement guidance for derivatives that do not qualify as hedging, income generation or replication transactions.

Description of Issue:
Regulators brought to the attention of the Working Group concerns regarding short-duration health reinsurance contracts which were termed quota share treaties but had features that limited the reinsurer’s risk. Concerns were noted that the reinsurance contracts were reported as meeting the “risk transfer” requirements under statutory accounting, but were not meeting “risk-transfer” requirements under U.S. GAAP. In addition, concerns were raised on whether similar reinsurance contracts that may meet risk transfer requirements for statutory accounting were taking a larger reinsurance accounting benefit than appropriate because the risk limiting features in the reinsurance contracts were limiting the actual amount of risks transferred. The Working Group directed NAIC staff to research and prepare an agenda item for subsequent discussion. Subsequent to this direction, the Working Group also received a referral from the Financial Analysis (E) Working Group noting additional concerns with short-duration contracts in particular and with a request that reinsurance disclosures designed to identify contracts with risk limiting features or noncompliant contracts that are required for SSAP No. 62R also be in SSAP No. 61R (See Activity to Date).

This agenda item addresses reinsurance risk transfer and accounting issues for clarification in statutory accounting primarily focused on reinsurance of short-duration products.

Overview of SSAP No. 61R (See Authoritative Literature in appendix for quotes of referenced material)

1. The scope of SSAP No. 61R is reinsurance of life deposit type and accident and health contracts.
2. While the majority of life contracts are long-duration, health has both long-duration (examples are long-term care and long-term disability) and short-duration products (example is group comprehensive health).
3. SSAP No. 61R explicitly quotes more of the FAS 113 long-duration contract risk transfer guidance.
4. Because SSAP No. 61R has more of a life contract (long-duration) focus it does not explicitly quote as much of short-duration risk transfer guidance from U.S. generally accepted accounting principles (GAAP) as SSAP No. 62R—Property and Casualty Reinsurance.
5. SSAP No. 61R adopts the following:
   a. GAAP guidance - FASB Statement No. 113, Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts (FAS 113) with modifications; FAS 113 provides general risk transfer guidance but the majority of the guidance is different based on the classification categories of long-duration contracts and short-duration contracts. (FAS 113 requirements were incorporated into FASB codification primarily in ASC 944-20 and the key risk transfers aspects of FAS 113 are unchanged by FASB codification.)
   b. Appendix A-791—Life and Health Reinsurance Agreements (Appendix A-791) is based on NAIC Model Law 791—Life and Health Reinsurance Agreements (Model 791). It provides criteria for reinsurance accounting for proportional reinsurance contracts (see additional detail in following pages). Reinsurance contracts which receive reinsurance accounting under Appendix A-791 do not contain identified features.
which negate risk transfer. In addition, Appendix A-791 identifies significant risk categories by line of business that must be 100% ceded. The major risk categories are morbidity, mortality, lapse, credit quality, reinvestment and disintermediation. The current version of Model 791 was adopted by the NAIC in 1992.

c. Appendix A-785 is based on NAIC *Model Law 785- Credit for Reinsurance* (Model 785) which contains detailed information regarding when collateral is required and what types of collateral are acceptable in order to obtain credit for reinsurance. In general, collateral is required for unauthorized reinsurers and there is a sliding scale of collateral required for certified reinsurers. Model 785 is not the focus of this agenda item.

**SSAP No. 61R adopts FAS 113 with modifications** *(See Authoritative Literature in appendix for quotes of referenced material)*

SSAP No. 61R, paragraph 78, adopts FAS 113 with modifications noting that the statutory accounting principles established, reflect much more detailed guidance which differ substantially from GAAP. The documented list of statutory accounting modifications from FAS 113 includes 7 listed topics which are summarized below:

1. Reinsurance accounting reserve credits reduce reserves for policies, claims and unpaid claims (¶78.a.);
2. First year and renewal ceding commissions on indemnity reinsurance of new business are recognized as income and ceding commissions on ceded in-force business are included in the calculation of initial gain or loss (¶78b);
3. Initial gains on indemnity reinsurance of in-force blocks of business have unique accounting treatment which restricts the gains to the ceding entity until profits emerge (¶78d).
4. SSAP No. 61R prohibits recognition of a gain or loss in connection with the sale, transfer or reinsurance of an in-force block of business between affiliated entities in a non-economic transaction (¶78e).
5. SSAP No. 61R requires that a liability be established through a provision reducing surplus for unsecured reinsurance recoverables from unauthorized reinsurers (¶78f).
6. SSAP No. 61R prescribes offsetting certain reinsurance premiums (¶78g).
7. SSAP No. 61R, paragraph 78 explicitly notes the modifications to the FAS 113 risk transfer requirements regarding differences in GAAP and SAP classification of investment contracts, but does not note other modifications. The modification identifies contracts with insignificant mortality or morbidity risk. (¶78c).

78c. As discussed in SSAP No. 50, statutory accounting defines deposit-type contracts as those contracts which do not include any mortality or morbidity risk. GAAP defines investment contracts as those that do not subject the insurance enterprise to significant policyholder mortality or morbidity risk. (The distinction is any mortality or morbidity risk for statutory purposes vs. significant mortality or morbidity risk for GAAP purposes.) Therefore, a contract may be considered an investment contract for GAAP purposes, and that same contract may be considered other than deposit-type for statutory purposes. A **reinsurance treaty covering contracts that have insignificant mortality or morbidity risk** (i.e., contracts classified as other than deposit-type contracts for statutory purposes, but investment contracts for GAAP purposes) that does not transfer that mortality or morbidity risk, but does transfer all of the significant risk inherent in the business being reinsured (e.g., lapse, credit quality, reinvestment or disintermediation risk) qualifies for reinsurance accounting for statutory reporting purposes, but would not qualify for reinsurance accounting treatment for GAAP purposes;

**A-791** *(See Authoritative Literature in appendix for quotes of referenced material)*

The Model 791 proceedings citations (formerly known as the legislative history) notes that in 1985 the model was developed to prohibit reinsurance surplus aid abuses. Major revisions to Model 791 which are consistent with Appendix A-791, were adopted in 1992. The intent of the 1992 revisions was to provide more information to regulators on risk transfer, liability transfer and other considerations in regard to “surplus aid” reinsurance.
contracts in order to promote more uniformity in their treatment. Included as part of the revision was a name change from “Model Regulation—Life Reinsurance Agreements” to “Life and Health Reinsurance Agreements Model Regulation.” While a review of the minutes, proceedings citations and the model indicate that Model 791 includes accident and health within its scope; most of the guidance in Model 791 is focused on life and the small amount of health specific guidance provided is secondary.

Scope – Appendix A-791 excludes assumption reinsurance, yearly renewable term reinsurance and certain non-proportional reinsurance such as stop loss or catastrophe reinsurance. Appendix A-791 refers the reader to paragraphs 19 and 20 of SSAP No. 61R for yearly renewable term reinsurance and non-proportional reinsurance. Therefore, the primary focus of Appendix A-791 is proportional reinsurance agreements.

The preamble to Model 791 notes that there are legitimate forms of surplus relief and forms that are improper. This preamble is similar to paragraph 2.k. of Appendix A-791, but includes additional information regarding intent. This preamble paragraph was noted in the 1992 minutes as significant to enforcing the provisions of the model; however, this paragraph is not included in Appendix A-791.

Appendix A-791 includes reinsurance contract provisions or functions that require deposit accounting by prohibiting reinsurance reserve credit (loss reserve reductions) or establishment of assets related to the reinsurance contracts that contain specified clauses and or functions. Loss reserve reductions and establishment of admitted reinsurance assets is referred to as reinsurance accounting or reinsurance credit. Appendix A-791 also contains a chart which notes “significant risks” inherent in lines of business reinsured. It notes that 100% of the identified significant risks must be reinsured to allow any reinsurance accounting treatment. Appendix A-791, paragraphs 2, 4, and 5 seek to ensure that the reinsurer has taken on the risks that result in the reinsurer “standing in the shoes” meaning that the reinsurer is in the same economic position as the ceding entity. Appendix A-791 also provides guidance that contract features which result in “impermanent” risk transfer or surplus aid which result in deposit accounting.

Summary of Appendix A-791, by paragraph is below:

Appendix A-791, paragraph 2 provides a list of items that can prohibit reinsurance accounting (resulting in deposit accounting instead). If any of the noted conditions are present in substance or effect, then the ceding entity is prohibited from establishing assets or reducing liabilities based on that reinsurance contract.

a. Renewal expense allowances are not enough to cover future administrative expenses (unless a liability is established for the present value of the shortfall).

b. Ceding insurer can be deprived of surplus/assets at the reinsurer’s option or automatically on the occurrence of an event (termination for nonpayment of premium or other amounts due is an exception).

c. Ceding insurer is required to reimburse the reinsurer for negative experience under the contract. Exceptions: netting losses against gains for experience refunds and payments upon voluntary recapture. It notes that a reinsurer cannot force recapture by excessive premium increases.

d. The ceding insurer must, at scheduled points in time terminate or recapture the contract.

e. The reinsurance agreement has the possibility of payments from the ceding company that exceed the direct premiums charged to the insured.

f. The treaty does not transfer 100% of the identified significant risks inherent in the business being reinsured. A table of product types and significant risks are identified (morbidity, mortality, lapse, credit quality, reinvestment, disintermediation). Short-duration health is required to transfer all of the morbidity and lapse risks.

g. The assets are not transferred or are not put in a segregated account when credit quality, reinvestment, and disintermediation risk are required to be transferred.
h. Settlements are made less frequently than quarterly.
i. The ceding company must make warranties not reasonably related to the business being reinsured.
j. The ceding company must make warranties about the future performance of the business being reinsured.
k. The reinsurance agreement is entered into for the principal purpose of producing significant surplus aid for the ceding insurer, typically on a temporary basis, while not transferring all of the significant risks inherent in the business reinsured and, in substance or effect; the expected potential liability to the ceding insurer remains basically unchanged.

Paragraph 3 provides accounting guidance regarding reinsurance of in-force blocks of business, which requires restriction of surplus gains until profits emerge.

Paragraphs 4-5 are contract features that are required to be present to achieve reinsurance accounting.

Paragraph 4: Letter of intent (or signed treaty) must be in place before the as-of date of the financial statement in order to apply reinsurance accounting.

Paragraph 5: Treaty must be signed within 90 days after the execution of a letter of intent.

Appendix A-791 also contains questions and answers for certain paragraphs that were incorporated from actuarial guideline JJJ. The questions and answers provide practical implementation information and are helpful regarding intent of some items. The rest of Actuarial Guideline JJJ was incorporated in Actuarial Guideline 33 Determining CARVM Reserves for Annuity Contracts with Elective Benefits, to provide guidance on elective versus non-elective benefits and language which described integrated benefit streams. Therefore, Actuarial Guideline JJJ does not currently exist as a separate guideline.

Current Issues

FAS 113 and Appendix A-791

The FAS 113 risk transfer guidance is adopted by reference, and is also affected by the modifications to FAS 113 listed in SSAP No. 61R. Such modifications include the differences between GAAP and SAP classification of certain contracts, such as contracts that statutory accounting classifies as other than deposit type contracts and GAAP classifies as investment type contracts. Appendix A-791 plays a crucial role in the application of risk transfer guidance for proportional life and health reinsurance contracts. However, both the FAS 113 and Appendix A-791 have to be reviewed in conjunction with each other. The interaction of SSAP No. 61R guidance with Appendix A-791 needs to be more explicit in SSAP No. 61R.

Appendix A-791 creates differences between GAAP and SAP definitions of risk transfer for proportional life and health reinsurance contracts. The SAP risk transfer threshold for proportional life and health reinsurance contracts can be either higher or lower than GAAP depending on the facts and circumstances. The different standard in Appendix A-791 applies to products that both GAAP and SAP classify as insurance and to products in which there are differences in insurance or non-insurance classification between GAAP and SAP. The provisions of Appendix A-791 result in reinsurance accounting only for proportional reinsurance contracts that 1) do not result in “impermanent” surplus and 2) result in the reinsurer being in a relatively equivalent economic position as the direct writer. Below are some examples of the different results that can occur:

1. GAAP and SAP are different - For a proportional reinsurance on products that both GAAP and SAP classify as an insurance contract, Appendix A-791 creates a different standard for determining risk
transfer than GAAP. This standard can be either higher or lower than GAAP risk transfer requirements depending on the facts and circumstances.

a. Appendix A-791 requires 100% of identified significant risks to be transferred.

b. Appendix A-791 has several features that are prohibited in reinsurance contracts and also requires certain contractual features. These requirements and prohibitions are to ensure that the reinsurer is in a similar economic position as the ceding entity.

c. Appendix A-791 does not require reasonable possibility of significant loss to the reinsurer for proportional reinsurance contracts; however, as noted above, a reinsurance contract that complies with Appendix A-791 will result in a reinsurer that is in a similar economic position as the ceding entity.

To the extent a proportional reinsurance contract does not transfer 100% of the identified risks SAP has a higher threshold, because GAAP would allow reinsurance accounting for reinsurance contracts with less than 100% of the identified significant risks provided the reinsurer has reasonable possibility of loss. For these reinsurance contracts SAP (Appendix A-791) would require deposit accounting.

To the extent that a proportional contract transfers 100% of the identified risks and the reinsurer does not have a reasonable possibility of loss, SAP has a lower threshold because it would allow reinsurance accounting and GAAP would require deposit accounting.

To the extent that a proportional contract has reasonable possibility of loss to the reinsurer, but the reinsurance contract contains features prohibited by Appendix A-791, the SAP standard would require deposit accounting and be stricter than GAAP which would allow reinsurance accounting.

2. SAP allows reinsurance accounting in situations that GAAP prohibits - For a life or health product that GAAP classifies as an investment contract and SAP classifies as an insurance contract, SAP allows proportional reinsurance contracts which are compliant with Appendix A-791 to receive reinsurance accounting treatment. GAAP prohibits reinsurance accounting for these underling products because the products do not contain sufficient insurance risk. This is an intentional difference between SSAP No. 61R and FAS 113 and was necessary because some products are classified as life or other than deposit type insurance in statutory accounting based on the inclusion of any mortality or morbidity risk. The same products would likely be classified as an investment type contract for GAAP because the morbidity and mortality risk is not significant. SSAP No. 61R notes that a FAS 113 modification allows the transfer of risk for other than deposit type products if the reinsurance contract transfers 100% of the identified significant risks of the contract. Under FAS 113 such a reinsurance contract would not be classified as an investment contract, and not as insurance, due to the insignificant insurance risk. This is an intentional difference that can result in reinsurance accounting treatment for statutory accounting but not for GAAP.

Nonproportional Guidance in SSAP No. 61R

The rest of the text on risk transfer in SSAP No. 61R includes some of the FAS 113 long-duration guidance, and the rest of FAS 113 is adopted with the noted modifications by reference. SSAP No. 62R is more explicit on evaluation of non-proportional contracts and contains more of the FAS 113 short-duration risk transfer guidance. As a result, SSAP No. 62R is clearer than SSAP No. 61R regarding risk transfer for reinsurance contracts which transfer less than all of the insurance risks, such as non-proportional reinsurance contracts. SSAP No. 61R, paragraph 38, notes that reinsurance accounting for non-proportional reinsurance contracts is determined in a way that is similar to how property and casualty reinsurance accounting is determined. This agenda item recommends additional language on nonproportional contracts for SSAP No., 61R.
Amount of Reinsurance Accounting Credit

Additional language in SSAP No. 61R and SSAP No. 62R is recommended to clarify that reinsurance contracts which pass reinsurance risk transfer can and will result in different reinsurance accounting credit (financial benefits) based on the terms and circumstances of the reinsurance contracts. There appears to be a misunderstanding that passing risk transfer always results in full proportional reinsurance accounting credit. However, a reinsurance contract which passes risk transfer still has to have the amount of reinsurance accounting credit separately determined. An example of this concept is that a catastrophe reinsurance treaty can pass risk transfer and still result in no initial reinsurance accounting credit. Principles-based guidance on the separate calculation of the reinsurance accounting credit would be beneficial for SSAP No. 61R and SSAP No. 62R.

Provisions of Appendix A-791 that Prohibit Reinsurance Accounting

a. Expected potential liability remains unchanged

Some of the short-duration reinsurance contracts that were brought to the attention of the Working Group were noted as RBC relief treaties and had a primary purpose of providing capital relief (as opposed to surplus relief). These reinsurance contracts were noted as not having an impact to the ceding entity’s expected liabilities – (e.g., the total liabilities were basically unchanged). Reflected reinsurance accounting for a proportional reinsurance treaty when the surplus of the ceding entity remain basically unchanged in substance or effect would seem to be a violation of Appendix A-791, paragraph 2.k. Appendix A-791 Life and Health Reinsurance agreements prohibit reducing reinsurance liabilities of establishing reinsurance assets of a ceding entity if:

k. The reinsurance agreement is entered into for the principal purpose of producing significant surplus aid for the ceding insurer, typically on a temporary basis, while not transferring all of the significant risks inherent in the business reinsured and, in substance or effect, the expected potential liability to the ceding insurer remains basically unchanged.

b. All (100%) of the identified significant risks

Note that Appendix A-791, paragraph 2.f. requires all (100%) of the identified significant risks to be transferred. To the extent that the reinsuring clause or risk limiting features prevent all of the significant risk identified being transferred, the contract would not be eligible for reinsurance accounting treatment under Appendix A-791.

c. Proportional versus non-proportional reinsurance contracts

Appendix A-791 is for proportional reinsurance contracts and SSAP No. 61R includes additional guidance on risk transfer for non-proportional reinsurance contracts. SSAP No. 61R, paragraph 38 on non-proportional reinsurance, notes that reinsurance accounting credit is determined in a way that is similar to the way property and casualty reinsurance accounting credit is determined. This is because these modes of reinsurance more closely follow property and casualty indemnification principles than life insurance formula basis and these coverages are very similar to excess insurance on property and casualty products. In determining the appropriate reserve credit, the probability of a loss penetrating to the reinsurer's level of coverage (using reasonable assumptions) must be multiplied by the expected amount of recovery. That means that the determination of the amount of acceptable reinsurance accounting credit should take into account the amounts that the reinsurer is reasonably expected to pay.
Reinsurance contracts with large sliding scale commissions, loss corridors and other risk limiting features raise questions regarding whether a reinsurance contract that starts out as being labeled proportional, is proportionate in substance, or if the risk limiting features cause the contract to perform more like a non-proportional contract. Barron’s dictionary of Insurance Terms notes proportional reinsurance is:

A type of reinsurance whereby the reinsurer shares losses in the same proportion as it shares premium and policy amounts.

The FAWG referral, noted in the activity to date section, provides a similar concern and seems to describe a contract that would not be compliant with Appendix A-791 paragraphs 2.k. and 2.f.:

Some of the short-duration health reinsurance contracts that regulators have brought to the attention of the Working Group and noted by the Financial Analysis (E) Working Group utilize loss corridors, sliding scale commissions, or other risk-limiting features to significantly limit the risk transferred to the reinsurer. Often these limitations result in a quota share reinsurance agreement operating more like an excess of loss reinsurance agreement, but the ceding insurer is accounting for the contract as if full, proportional reinsurance were in place. In certain cases, the ceding insurers have lost millions of dollars on certain blocks of business and even reached insolvency, while the reinsurers have continued to recognize profits on the contracts.

Some treaties that were labeled as proportional do not operate proportionately when the risk limiting features in total are considered and some treaties seem to be taking a larger reinsurance accounting credit than the risk transferred under the contract indicates or are taking a reinsurance accounting credit when transfer is not indicated. **Note that classifying a contract as proportional when it is not, or taking a reinsurance accounting credit when a contract is not compliant with SSAP No. 61R and Appendix A-791, can result in either an inappropriate reinsurance accounting credit or result in a reinsurance accounting credit that is greater than allowed when the cash flows of the contract are evaluated for the possibility of loss.**

**Disclosure (See Authoritative Literature in appendix for quotes of referenced material)**

The short-duration health reinsurance contracts that were brought to the attention of the Working Group members have risk limiting features. SSAP No. 62R—Property and Casualty Reinsurance, paragraphs 93-98, began requiring audited disclosures in the statutory annual statement interrogatories and supplements related to reinsurance contracts with risk limiting features in 2006. The purpose of the disclosures is to identify certain reinsurance contracts with risk limiting features with provisions that limit losses below the stated quota share percentage or delay timely reimbursement for further regulatory review. The disclosures also require reporting entities to affirm that they have verified risk transfer in the reinsurance contracts which received prospective reinsurance accounting credit.

The FAWG referral noted health disclosure concerns noting:

While P&C insurers are required to disclose some of these features in the interrogatories, health insurers are not, and FAWG continues to be surprised by the fact that GAAP seems to prevent some of these contracts from being recorded as meeting risk transfer requirements while SAP may not. Although the number of P&C companies reporting these features and differences in GAAP/SAP reporting may be limited, they appear to be more prevalent in troubled company situations and are being offered by otherwise well-regarded reinsurers.

This agenda item recommends additional disclosures for SSAP No. 61R.
Existing Authoritative Literature:
- **SSAP No. 61R—Life, Deposit-Type, and Accident and Health Reinsurance**
- **SSAP No. 62R—Property and Casualty Reinsurance**
- **Statement of Financial Accounting Standards No. 113, Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts**
- **Appendix A-791 Life and Health Reinsurance Agreements**

In researching reinsurance risk transfer in SSAP No. 61R, staff notes the following key points:
- SSAP No. 61R, paragraph 78 adopts the FAS 113 with modifications.
- FAS 113 requirements were incorporated into FASB codification primarily in ASC 944-20 and the key risk transfers aspects of FAS 113 are unchanged by FASB codification.
- SSAP No. 61R includes a risk transfer discussion that is similar to the long-duration risk transfer discussion in FAS 113, however slightly more GAAP text on risk transfer was explicitly incorporated into SSAP No. 62R.
- In addition to the FAS 113 risk transfer requirements, SSAP No. 61R, paragraph 79 incorporates requirements from the Credit for Reinsurance (Model 785) and the Life and Health Reinsurance (Model 791).
- Model 785 contains detailed information regarding when collateral is required and what types of collateral are acceptable in order to obtain credit for reinsurance. In general, collateral is required for unauthorized reinsurers and there is a sliding scale of collateral required for certified reinsurers.
- Model 791 contains examples of contract clauses that negate risk transfer and identifies significant insurance risk that must be ceded in full. (summarized above)
- Model 791 excludes yearly renewable term (YRT) which is a type of life reinsurance under which the risks, but not the permanent plan reserves, are transferred to the reinsurer for a premium that varies each year with the amount at risk and the ages of the insured. Although the model excludes YRT, most of the requirements from paragraph 2 and 3 of A-791 are required to be followed in SSAP No. 61R. This agenda item is not focused on Yearly Renewable Term reinsurance contracts.

Activity to Date (issues previously addressed by the SAPWG, Emerging Accounting Issues WG, SEC, FASB, other State Departments of Insurance or other NAIC groups):

At the 2016 Fall National Meeting the chair of the Working Group, Mr. Bruggeman stated that he had been contacted by a regulator regarding the application of reinsurance risk transfer under **SSAP No. 61R—Life, Deposit-Type, and Accident and Health Reinsurance**. The Working Group directed NAIC staff to research this issue and, if necessary, prepare an interpretation or draft changes to SSAP No. 61R for future discussion. In providing more detail on the issue, Mr. Bruggeman stated that reporting entities may be concluding that risk-transfer requirements under U.S. GAAP are higher than the risk-transfer requirements under SSAP No. 61R. As both requirements are based on the same standard in **Statement of Financial Accounting Standards No. 113, Accounting and Reporting for Reinsurance of Short-Duration and Long-Duration Contracts**, he stated that this reporting entity interpretation is difficult to substantiate. NAIC staff was directed to provide subsequent information on their research.

Risk Limiting Features (E) Working Group was inactive in 2016, but it is charged with reviewing risk transfer guidance for property and casualty reinsurance. This group will re-activate this year and work on clarifying aspects of Financial Condition Examiner’s Handbook and Financial Analysis Handbook guidance.

The Financial Analysis (E) Working Group (FAWG) provided a referral to the Statutory Accounting Principles (E) Working Group in April 2017, which also noted and risk limiting features concerns and including for property and casualty entities and concerns regarding health disclosures. The following provides a summary of this referral:
The referral notes that the FAWG has recently discussed a number of troubled and potentially troubled insurers that have participated in quota share/proportional reinsurance contracts with significant risk-limiting features. In many of these situations, the motivation for the contracts appears to be surplus relief, without a significant amount of insurance risk being transferred to the reinsurer. The contracts often utilize loss corridors, sliding scale commissions, or other risk-limiting features to significantly limit the risk transferred to the reinsurer. Often these limitations result in a quota share reinsurance agreement operating more like an excess of loss reinsurance agreement, but the ceding insurer is accounting for the contract as if full, proportional reinsurance were in place. In certain cases, the ceding insurers have lost millions of dollars on certain blocks of business and even reached insolvency, while the reinsurers have continued to recognize profits on the contracts. While P&C insurers are required to disclose some of these features in the interrogatories, health insurers are not, and FAWG continues to be surprised by the fact that GAAP seems to prevent some of these contracts from being recorded as meeting risk transfer requirements while SAP may not. Although the number of P&C companies reporting these features and differences in GAAP/SAP reporting may be limited, they appear to be more prevalent in troubled company situations and are being offered by otherwise well-regarded reinsurers. Therefore, FAWG suggests further changes to SAP to prevent these situations.

Information or issues (included in Description of Issue) not previously contemplated by the SAPWG:
None

Staff Review Completed by:
Robin Marcotte, NAIC Staff - July 2017

Staff Recommendation:
NAIC staff recommends that the Working Group receive the referral from the Financial Analysis (E) Working Group, move this item to the active listing, categorized as nonsubstantive, and expose revisions to SSAP No. 61R, SSAP No. 62R, Appendix A-791 and the Master Glossary as illustrated in Exhibit A (omitted from the 2019 Summer National Meeting Materials for brevity). The recommended course of action is summarized below, and the related revisions are illustrated on the following pages. The draft revisions and the noted exposure questions are recommended for exposure.

1. **Risk transfer clarifications SSAP No. 61R—Life and Health Reinsurance** – Expose clarifications to the guidance in SSAP No. 61R that emphasize categorizing reinsurance contracts correctly as either being proportional or non-proportional and make more explicit the interaction between Appendix A-791 which identifies the significant risks that must be 100% transferred for proportional reinsurance contracts and the remaining SSAP No. 61R risk transfer guidance. The proposed revisions also emphasize that the reinsurance accounting credit taken for reinsurance contracts that meet risk transfer criteria in SSAP No. 61R/ Appendix A-791 is only for the portion of risks actually transferred. Reinsurance credit should take into account all features of a contract including deductibles, loss ratio corridors, a loss caps, aggregate limits or any similar provisions.

2. **Risk transfer clarifications SSAP No. 62R—Property and Casualty Reinsurance** – Expose clarifications to the risk transfer guidance in SSAP No. 62R to make the existing guidance more clear reinsurance accounting credit taken for reinsurance contracts that meet risk transfer criteria only for the portion of risks actually transferred. These clarifications are intended to be consistent with the existing concepts highlighted in the SSAP No. 62R, paragraph 93 disclosure. This guidance notes that reinsurance contracts,
which contain features that limit the reinsurer’s losses below the stated quota share percentage (e.g. a deductible, a loss ratio corridor, a loss cap, an aggregate limit or any similar provisions), should reduce the amount of reinsurance accounting credit taken by the effects of any applicable limiting provision(s).

3. **Disclosures** – Expose disclosures, for 2018 reporting year in SSAP No. 61R based on the existing reinsurance disclosures in SSAP No. 62R in paragraphs 93-98 (adapted as needed using concepts from A-791). The disclosures would be to assist regulators in identifying reinsurance contracts that may require from additional regulatory scrutiny regarding risk transfer and or compliance with A-791.

   Exposure questions- Request comments regarding the scoping of the disclosures in SSAP No. 61R.

4. **Updates to terminology** –

   a. Expose updates to the glossary in SSAP No. 61R for specific terms including the definition of proportional and non-proportional.
   
   b. Expose clarifications to the existing descriptions of proportional and nonproportional in SSAP No. 62R, paragraph 5 which are consistent with the proposed revisions to SSAP No. 61R (along with edits to subparagraph numbering).
   
   c. Expose updates to the Master Glossary to define how to classify short-duration and long-duration for statutory accounting. These are GAAP terms (quoted in Authoritative literature) which have historically not been adopted in statutory accounting, however, recent updates to SSAP No. 35R also referenced this terminology.

   **Exposure questions** – Request comments on the current SSAP No. 61R glossary definitions, which are currently defined in a life specific context: coinsurance, modified coinsurance and retention. Request comments on if adding short-duration and long-duration terms (modified for statutory accounting differences in classification) to the Master Glossary would be useful especially in the context of adopted GAAP guidance.

5. **Appendix A-791 updates to include the Model 791 preamble** – Expose updates to Appendix A-791 to incorporate language from the preamble of Model Law 791. This language from the model is indicative of the intent behind the Model, which was to prevent reinsurance accounting for reinsurance contracts that provide temporary surplus aid without transferring all of the significant risks so that the expected potential liability of the ceding insurer remains “basically unchanged.” This includes much of the existing language in paragraph 2.k. of Appendix A-791, but also provides additional detail regarding intent.

   Exposure questions – Request comments on whether additional clarifications are needed on the interaction of Appendix A-791 and the risk transfer guidance or if the proposed changes to SSAP No. 61R are sufficient. Would adding to the questions and answers in A-791 regarding application be useful? If so, what questions should be addressed?

**Status:**

On August 6, 2017, the Statutory Accounting Principles (E) Working Group moved this item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance, SSAP No. 62R—Property and Casualty Reinsurance and Appendix A-791—Life and Health Reinsurance, as illustrated in Exhibit A (omitted from the 2019 Summer National Meeting Materials for brevity), to clarify reinsurance contracts risk transfer requirements and to provide clarifications that reinsurance accounting credit for contracts that pass risk transfer is only for the amount of risk ceded. The agenda item also
updates terminology and incorporates new SSAP No. 61R disclosures to assist in reviewing contracts, similar to existing disclosures in SSAP No. 62R.

On November 6, 2017, the Statutory Accounting Principles (E) Working Group received comments. The Working Group provided the following direction for the next phase of work on this project:

1. NAIC staff was directed to work with Working Group and industry representatives to hold informal drafting calls to refine the exposure drafts for future Working Group consideration. The bi-weekly calls will generally be separate (P/C and Life) as feasible, with some combined calls for consistency issues.

2. The previously exposed revisions to add the GAAP definitions of short duration and long duration contracts to the master glossary would be removed going forward, as the comments from the Interested Parties and the ACLI responded that the proposed additional definitions were not helpful.

3. The suggested revisions to SSAP No. 62R, paragraph 29 on non-proportional reinsurance credit proposed by the interested parties provide a better starting point to redraft this paragraph. NAIC staff was directed to use this language and work with the informal drafting groups to add some non-proportional examples in the next phase of discussion. The proposed starting point language for SSAP No. 62R, paragraph 29 is as follows:

   29. Reporting entities shall not record reinsurance credit for non-proportional reinsurance until such time as losses have been incurred on the underlying business, which exceed the attachment point of the applicable reinsurance contract(s).

Recommendation for 2018 Summer National Meeting Discussion

The Informal Property and Casualty Drafting Group and an Informal Life and Health Drafting Group both of which include regulators and industry representatives have held several calls and recommend exposing the revisions described below:

1. **Informal Property and Casualty Drafting Group** - The drafting group recommends updates to SSAP No. 62R—Property and Casualty Reinsurance to incorporate GAAP guidance to be more consistent with ASC topic 994-20. The proposed revisions specifically incorporate more guidance from FASB Emerging Issues Task Force No. 93-6, Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises (EITF 93-6) and its related interpretation EITF D-035, FASB Staff Views on Issue No. 93-6, "Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises." SSAP No. 62R already, adopts EITF 93-6 with modification; however, it is incorporated by reference rather than explicitly quoted. As the informal drafting groups agrees that SSAP No. 62R intends to match GAAP to the extent feasible, the drafting group has recommended revisions to SSAP No. 62R text, and the existing Appendix to assist with addressing the concerns noted in the agenda item. These concerns include ensuring that credit for reinsurance reported by the cedant is not greater than the amount of risk ceded.

   Although the subgroup views the revisions as consistent updates, because of the extent of revisions, NAIC staff recommends categorizing these revisions to SSAP No. 62R as substantive and exposing the revisions to SSAP No. 62R as reflected in agenda item 2017-28 - Attachment Q1. (The attachment has several drafting notes to assist with review. These drafting notes are not planned to be in the final document.) During the exposure period, input on the effective date is also requested.

2. **Informal Life and Health Drafting Group** – The primary issue under discussion is how to provide clear pointers from SSAP No. 61R—Life and Health Reinsurance to the Appendix A-791 guidance so that users understand which contracts are subject to the guidance in the appendix, and to identify the contracts which not
subject to the appendix. The challenge is providing clear guidance that does not conflict with the existing appendix A-791, which is an accreditation standard model law. The Informal Life and Health Drafting Group recommends a partial exposure to obtain wider feedback on the scope of Appendix A-791 and proposed disclosures. The Informal Life and Health Drafting Group has prepared updates to the Appendix A-791 Q&A to assist with further defining the applicability of the Appendix. The drafting group will continue to work on revisions to the body of the statement, but believes feedback on the exposed QA revisions will assist with drafting further revisions. In addition, the drafting group has prepared disclosures for exposure also.

NAIC staff recommends exposing revisions to the SSAP No. 61R disclosure and the A-791 Q&A as reflected in agenda item 2017-28 - Attachment Q2. The Informal Life and Health Drafting Group is not recommending adoption of these revisions until the other revisions to the guidance in SSAP No. 61R are developed.

On August 4, 2018, the Statutory Accounting Principles (E) Working Group:

1. Exposed substantive revisions to SSAP No. 62R—Property and Casualty Reinsurance to incorporate guidance from EITF 93-6, Accounting for Multiple-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises and from EITF D-035, FASB Staff Views on Issue No. 93-6. (Drafting notes are not planned to be in the final document.) The Working Group also requested, input on the effective date. See separate document.

2. Exposed nonsubstantive revisions to SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance to incorporate disclosures. The proposed revisions also update the question-and-answer guidance in Appendix A-791—Life and Health Reinsurance Agreements to clarify the applicability of A-791. Note that the exposure includes a request for comments on whether the proposed disclosures adequately address the Financial Analysis (E) Working Group referral with a notation, that the feedback will assist with ongoing drafting group work. See Exhibit B (omitted from the 2019 Summer National Meeting Materials for brevity).

Comments are requested on the following items related to the exposed SSAP No. 61R disclosures:

1. The drafting group discussion determined that the prior exposure for SSAP No. 61R, paragraph 83, which was based on SSAP No. 62, paragraph 94 with modifications to be consistent with A-791 was repetitive on compliance with A-791. The subgroup reviewed existing paragraph 94 a-d, in SSAP No. 62R and determined it was not useful in the context of SSAP No. 61R. Regulator and industry input is requested on any additional contract features that should be identified for disclosure.

2. The FAWG, requested disclosures similar to existing disclosures in SSAP No. 62R—Property and Casualty Reinsurance for SSAP No. 61R. However, the existing SSAP No. 62R disclosures could not copied into SSAP No. 61R exactly because of variations between product types and the Appendix A-791. Regulator input is requested regarding whether proposed disclosures would be sufficient to address regulatory concerns and or the FAWG request

3. Comments are requested regarding contracts identified for disclosure in paragraph 85 should be identified in the annual statement reinsurance schedule S with a signifier to avoid repeating details in the annual statement note, which may be in the statement schedule.

On November 15, 2018, the Statutory Accounting Principles (E) Working Group adopted, as final, substantive revisions to SSAP No. 62R that clarify the determination of reinsurance credit and incorporate language from
EITF 93-6, Accounting for Multi-Year Retrospectively Rated Contracts by Ceding and Assuming Enterprises and EITF D-035, FASB Staff Views on Issue No. 93-6, with a January 1, 2019 effective date. The Working Group directed NAIC staff to draft an issue paper documenting the substantive revisions. The Working Group directed that comments received from Connecticut and New Jersey regarding SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance and Appendix A-791 be forwarded to the informal Life and Health Reinsurance Drafting Group for subsequent consideration.

On April 6, 2019, the Statutory Accounting Principles (E) Working Group exposed revisions to an issue paper to document for historical purposes the adopted revisions to SSAP No. 62R—Property and Casualty Reinsurance. Also, on April 6, 2019, the Working Group received an update from the Informal Life and Health Reinsurance Drafting Group, noting the following:

**Prior Actions** - At the 2018 Fall National Meeting, the Working Group heard comments on the exposure recommended by the informal life and health reinsurance drafting group. The revisions proposed updates to the A-791 Life and Health Reinsurance QA to clarify the applicability of A-791 and expand questions and answers to address business that has a statutorily required medical loss ratio or similar refund / rebate. In addition, the exposure proposed revised disclosures as requested by the Financial Analysis (E) Working Group. The Working Group directed the subgroup to expand their work to address group term life yearly renewable term (YRT) comments raised in comment letters from two states.

**Interim Activity** - The informal drafting group updated the membership to address the YRT issues raised and has held four calls. The YRT issues related to group term life risk that were raised are complex. While the informal drafting group does not have a recommendation for exposure at this time, they are making steady progress and appreciate the active engagement from regulators and industry. The primary areas that are being considered for updating are to the A-791 QA guidance and to the YRT guidance in SSAP No. 61R—Life and Health Reinsurance, paragraph 19. The drafting group will continue to hold calls on this topic in the interim and intends to have something to recommend for exposure by the 2019 Summer National Meeting.

**Recommendation for 2019 Summer National Meeting Discussion**

Receive Report of Interim Activity

The YRT issues related to group term life risk that were raised are complex. The informal drafting group is making steady progress and appreciates the active engagement from regulators and industry. The primary areas that were discussed in the interim were on updating the A-791 QA guidance and to the YRT guidance in SSAP No. 61R—Life and Health Reinsurance, paragraph 19.

The Informal Drafting Life and Health Reinsurance Drafting Group met 4 times during the interim year primarily focused on YRT issues. Additional meeting will continue as the Drafting Group works to address YRT issues also works on other topics such as non proportional reinsurance.

The informal drafting group reviewed prior exposures and their comments and recommends exposure of the following:

1. **SSAP No. 61R Disclosures** - These disclosures were previously exposed and the comments on the prior exposure have been reviewed by the drafting group. The disclosures are to address the request from the Financial Analysis (E) Working Group for life and health reinsurance contracts to have disclosure, which identify contracts with certain features including, risk limiting features. similar to existing disclosures in SSAP No. 62R—Property and Casualty Reinsurance for SSAP No. 61R. However, the existing SSAP No. 62R disclosures could not copied into SSAP No. 61R exactly because of variations between product types.
and the Appendix A-791. The drafting group also recommends notifying the Financial Analysis (E) Working Group of the exposure.

2. Two updates to the Appendix A-791 question and answers (QA)

   a. The informal life and health reinsurance-drafting group identified that the existing phrase “certain non-proportional reinsurance arrangements” in the current A-791 could benefit from additional guidance to promote consistent application. The proposed revisions to the answer below are to help identify non-proportional contracts, which are not subject to the Appendix A-791. The drafting group also reviewed the comments from Connecticut received from the August 2018 exposure and determined not to incorporate the YRT/RBC comments at this time as the YRT discussion is ongoing.

   b. The proposed Appendix A-791 question and answer regarding business that has a statutorily required medical loss ratio or similar refund / rebate. This item was previously exposed, and no questions were received. The drafting group did not recommend any additional revisions.

3. Add A-791 QA under paragraph 2c on YRT

   Regarding the YRT issues, industry drafted a Q&A in relation to paragraph 2c of A-791 for consideration. The regulator members agreed to the suggested approach to add the Q&A but eliminated the second part of the Answer that would continue to allow the reinsurer to charge premiums in excess of the underlying direct proportionate premium if the ceding entity established a liability for the excess amount. After further discussion, the regulator and industry members of the subgroup could not come to agreement.

   The industry members prefer to seek ways to explicitly allow the group term life YRT reinsurance contracts to exceed the amount of the underlying direct proportionate premium. The most recent industry proposal was to allow this, provided the ceding entity establishes a liability for the amount of reinsurance premium in excess of the direct premium. Industry discussed the commercial reasoning and argued that risk would still be transferred.

   The regulator members continued to question whether such group term life YRT contracts appropriately transferred risk if a reinsurer could charge premiums in excess of the underlying direct proportionate premium. It was noted that these contracts generally included other risk limiting features such as loss carry forward provisions and would typically not pass risk transfer requirements under GAAP. They also noted concerns that codifying the industry proposed exception in statutory accounting could result in unintended consequences and appeared to be designed address a commercial concern. Therefore, the regulator members proposed to accept the Q&A drafted by the industry but without wording that would allow reinsurers to charge premiums in excess of the underlying direct proportionate premium. The regulator members of the drafting group have requested exposure of the guidance to allow for specific concerns to be raised and addressed. This guidance provides that group term life YRT contracts which exceed the underlying direct premium are unreasonable and violate the provisions of paragraph 2c of A-791, and therefore, would not be subject to reinsurance accounting.
August 2019 Recommendation:
NAIC Staff recommends that the Working Group receive the drafting group recommendation on interim activity and expose for comment the following items which are illustrated below:

1. Disclosures, (previously exposed) Concurrent with the exposure, NAIC staff recommends that the Working Group also notify the Financial Analysis (E) Working Group of the exposure as the disclosures were originally developed at their request.

2. The two A-791 QA items one the topic of certain nonproportional reinsurance contracts covered under the A-791 and medical loss ratios (previously exposed – the drafting group reviewed the comments).

3. Regulator proposed revisions to add A-791 QA under paragraph 2c regarding group term life YRT reinsurance contracts. (which are not supported by industry members).

On August 3, 2019, the Statutory Accounting Principles (E) Working Group adopted, as final, Issue Paper No. 162—Property and Casualty to document for historical purposes the revisions related to SSAP No. 62R—Property and Casualty Reinsurance, which was adopted at the 2018 Fall National Meeting.

In addition to the issue paper adoption, on August 3, 2019, the Working Group also exposed for comment the following items which are illustrated below:

1. Disclosures, (previously exposed) and, directed notification to the Financial Analysis (E) Working Group of the exposure as the disclosures were originally developed at their request.

2. The two A-791 QA items related to certain nonproportional reinsurance contracts” covered under the A-791 and medical loss ratios (previously exposed – the drafting group reviewed the comments).

3. Regulator proposed revisions to add A-791 QA under paragraph 2c regarding group term life YRT reinsurance contracts.

Illustration of proposed revisions to SSAP No. 61R and A-791 exposed on August 3, 2019:

1. The revisions to SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance to incorporate disclosures proposed for exposure are as follows:

   Drafting Note: These disclosures were previously exposed, the shading is for minor edits recommended by the drafting group on June 11, 2019

   December 2019 Drafting Note: The disclosure paragraph numbering was updated from 81 – 87 as exposed to be 78 to 84 to reflect that the following disclosures will be inserted before existing paragraph 78. In addition, recommendations for Fall National meeting is illustrated language for Fall 2019 discussion illustrating the proposed December 31, 2020 effective date for the new disclosures.

   78. Disclosures for paragraphs 82-87, which are required to be included with the annual audit report financial statements beginning with the period ended December 31, 201X regarding reinsurance contracts. The disclosures required within paragraphs 82-87 shall be included in accompanying supplemental schedules of the annual audit report beginning in year-end 201X. These disclosures shall be limited to reinsurance contracts entered into, renewed or amended on or after January 1, 1996. This limitation applies to the annual audit report only and does not apply to the statutory annual statement
interrogatories and the property and casualty reinsurance summary supplemental filing. *(Drafting Note: From SSAP No. 62R, paragraph 92)*

79. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) subject to A-791 that includes a provision, which limits the reinsurer's assumption of significant risks identified as in A-791. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. For contracts subject to A-791, indicate if deposit accounting was applied for all contracts, which limit significant risks. *(Drafting Note: Similar to SSAP No. 62R, paragraph 93, and is also relevant to A-791 evaluations.)*

80. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) not subject to A-791, for which reinsurance accounting was applied and includes a provision that limits the reinsurer's assumption of risk. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. If affirmative, indicate if the reinsurance credit was reduced for the risk limiting features. *(Drafting Note: Similar to SSAP No. 62R, paragraph 93.)*

81. Disclose if any reinsurance contracts which contain features (except reinsurance contracts with a federal or state facility) described below which result in delays in payment in form or in fact:

   a. Provisions which permit the reporting of losses, or settlements are made, less frequently than quarterly or payments due from the reinsurer are not made in cash within ninety (90) days of the settlement date (unless there is no activity during the period). *(Drafting Note: From SSAP No. 62R, paragraph 94.e and Appendix A-791, paragraph 2.e.)*

   b. Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. *(Drafting Note: From SSAP No. 62R, paragraph 94.f, also relevant to risk transfer guidance in SSAP No. 61R)*

82. Disclose if the reporting entity has reflected reinsurance accounting credit for any contracts not subject to Appendix A-791 and not yearly renewable term, which meet the risk transfer requirements of SSAP No. 61R and identify the type of contracts and the reinsurance contracts.

   a. Assumption Reinsurance – new for the reporting period.

   b. Non-proportional reinsurance, which does not result in significant surplus relief. If yes, indicate if the insured event(s) triggering contract coverage has been recognized.

83. Disclose if the reporting entity ceded any risk which is not subject to A-791 and not yearly renewable term reinsurance, under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either: *(Drafting Note: From SSAP No. 62R, paragraph 97)*

   a. Accounted for that contract as reinsurance under statutory accounting principles (“SAP”) and as a deposit under generally accepted accounting principles (“GAAP”); or

   b. Accounted for that contract as reinsurance under GAAP and as a deposit under SAP.

84. If affirmative disclosure is required for paragraph 86, explain why the contract(s) is treated differently for GAAP and SAP. *(Drafting Note: From SSAP No. 62R, paragraph 98)*
Drafting Note - These disclosures are expected to begin at existing paragraph 77 in SSAP No. 61R. The paragraph numbering will be updated in the final draft.

2. Proposed updates to A-791 QA (previously exposed)

   a. Update to A-791 QA under paragraph 1 to address the phrase “certain non-proportional”

      1. This Appendix shall not apply to assumption reinsurance, yearly renewable term reinsurance or certain non-proportional reinsurance such as stop loss or catastrophe reinsurance.

      Q – Aside from assumption reinsurance, what other types of reinsurance are exempt from the accounting requirements?

      A – Yearly renewable term (YRT) and certain nonproportional reinsurance arrangements, such as stop loss and catastrophe reinsurance are exempt because these do not normally provide significant surplus relief and therefore are outside the scope of this Appendix. If a catastrophe arrangement takes a reserve credit for actual losses beyond the attachment point or the unearned premium reserve (UPR) of the current year's premium, there will most likely be no regulatory concern.

      Similarly, if a YRT treaty provides incidental reserve credits for the ceding insurer's net amount at risk for the year with no other allowance to enhance surplus, there will most likely be no regulatory concern. For purposes of this exemption, a treaty labeled as YRT does not meet the intended definition of YRT if the surplus relief in the first year is greater than that provided by a YRT treaty with zero first year reinsurance premium and no additional allowance from the reinsurer.

      Additional pertinent information applicable to all YRT treaties and to non-proportional reinsurance arrangements is contained in paragraphs 19 and 20 of SSAP No. 61R.

      To further elaborate on the phrase "certain non-proportional reinsurance" in paragraph 1, the beginning of the answer notes that contracts such as stop-loss and catastrophe do not normally provide significant surplus relief, and are therefore not subject to the accounting guidance in Appendix A-791. Non-proportional reinsurance agreements are considered not to provide significant surplus relief if they possess all of the following features. For the purposes of defining these features, the term "triggering event" means the event or sequence of events that would lead to a loss being reimbursable by the reinsurer pursuant to the terms of the reinsurance agreement.

      1. The triggering event has not occurred at the time of the inception of the reinsurance agreement.

      2. The triggering event is materially less likely than not to occur during each settlement period of the reinsurance agreement.

      3. There is no initial reinsurance credit for ceded policy reserves and any reinsurance expense allowance or commission is reported so that surplus is not impacted until the related premium is reported as earned.

      These criteria shall be evaluated separately for each measurement period under the reinsurance agreement, where the measurement period is that period of time for which the direct writer’s experience is used to determine the amounts owed to and from the reinsurer. If there are carry-forwards of experience debits or credits from one calendar year to the next, then those multiple years will be considered one settlement period.
The fact that the triggering event does eventually occur, is not itself evidence that the second criterion above has not been met. The criterion should be evaluated based on reasonable expectations rather than posteriori results.

b. New Appendix A-791 question and answer regarding business that has a statutorily required medical loss ratio or similar refund / rebate.

Q: If a company cedes health insurance business that is subject to a Medical Loss Ratio (MLR), or similar statutorily required refunds / rebates, must the reinsurer participate in the payment of any refunds / rebates?

A: The reinsurer needs to participate in the payment of its share of any statutorily required MLR or similar refund or rebate based on loss ratio calculations to the extent that the experience of the health business reinsured, during the period that it is reinsured, contributes to the calculation of the refund. Although the payment of such a refund based on the experience of business that is currently reinsured could result in a reduction of surplus on the part of the ceding insurer, if the reduction in surplus of the ceding insurer is entirely attributable to the experience prior to the effective date of the reinsurance, then it is outside of the contract requirements. Accordingly, such a provision should not cause a reinsurance agreement to be out of compliance with Appendix A-791 of the Accounting Practices and Procedure Manual. It is recognized that some refund calculations may involve multiple years.

Furthermore, just as an experience refund is not considered in the determination as to whether a reinsurance agreement is proportional, the requirement for the payment of a refund to policyholders based on a Medical Loss Ratio requirement should also not be considered.

Note: This Q&A only applies to refunds related to a statutory MLR or similar refund or rebate requirement for health insurance and should not be applied to any other situation.

3. Regulator Proposed Revisions Regarding YRT

Suggested new Q&A on group term life YRT for placement under paragraph 2c of A-791

2c. The ceding insurer is required to reimburse the reinsurer for negative experience under the reinsurance agreement, except that neither offsetting experience refunds against current and prior years' losses under the agreement nor payment by the ceding insurer of an amount equal to the current and prior years' losses under the agreement upon voluntary termination of in force reinsurance by the ceding insurer shall be considered such a reimbursement to the reinsurer for negative experience. Voluntary termination does not include situations where termination occurs because of unreasonable provisions which allow the reinsurer to reduce its risk under the agreement. An example of such a provision is the right of the reinsurer to increase reinsurance premiums or risk and expense charges to excessive levels forcing the ceding company to prematurely terminate the reinsurance treaty;

Q: If group term life business is reinsured under a YRT reinsurance agreement (which includes risk limiting features such as with an experience refund provision which offsets refunds against current and/or prior years' losses (i.e., a "loss carryforward" provision), under what circumstances would any provisions of the reinsurance agreement be considered "unreasonable provisions which allow the reinsurer to reduce its risk under the agreement" thereby violating subsection 2.c.?

A: Unlike individual life insurance where reserves held by the ceding insurer reflect a statutorily prescribed valuation premium above which reinsurance premium rates would be considered unreasonable, group term life has no such guide. So long as the reinsurer cannot charge premiums in
excess of the premium received by the ceding insurer under the provisions of the YRT reinsurance agreement, such provisions would not be considered unreasonable. Any provision in the YRT reinsurance agreement which allows the reinsurer to charge reinsurance premiums in excess of the proportionate premium received by the ceding insurer would be considered unreasonable.

For Fall 2019 Discussion

NAIC Staff recommends that the Working Group take the following actions regarding the exposed items:

1. **Adopt the exposed SSAP No. 61R disclosures (with paragraph number updates)** reflected below and with an initial effective date of year end 2020 reporting. Proposed effective date language for the disclosures is illustrated below.

   **Fall 2019 Drafting Note:** The disclosure paragraph numbering was updated from 81 – 87 as exposed to be 78 to 84 to reflect that the following disclosures will be inserted before existing paragraph 78. In addition, recommendations for Fall National meeting is illustrated language for Fall 2019 discussion illustrating the proposed December 31, 2020 effective date for the new disclosures:

   78. Disclosures for paragraphs 82-87, which are required to be included with the annual audit report financial statements beginning with the period ended December 31, 201X regarding reinsurance contracts. The disclosures required within paragraphs 82-87 shall be included in accompanying supplemental schedules of the annual audit report beginning in year-end 201X. These disclosures shall be limited to reinsurance contracts entered into, renewed or amended on or after January 1, 1996. This limitation applies to the annual audit report only and does not apply to the statutory annual statement interrogatories and the property and casualty reinsurance summary supplemental filing. *(Drafting Note: From SSAP No. 62R, paragraph 92)*

   79. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) subject to A-791 that includes a provision, which limits the reinsurer’s assumption of significant risks identified as in A-791. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. For contracts subject to A-791, indicate if deposit accounting was applied for all contracts, which limit significant risks. *(Drafting Note: Similar to SSAP No. 62R, paragraph 93, and is also relevant to A-791 evaluations.)*

   80. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) not subject to A-791, for which reinsurance accounting was applied and includes a provision that limits the reinsurer’s assumption of risk. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. If affirmative, indicate if the reinsurance credit was reduced for the risk limiting features. *(Drafting Note: Similar to SSAP No. 62R, paragraph 93.)*

   81. Disclose if any reinsurance contracts which contain features (except reinsurance contracts with a federal or state facility) described below which result in delays in payment in form or in fact:

   c. Provisions which permit the reporting of losses, or settlements are made, less frequently than quarterly or payments due from the reinsurer are not made in cash within ninety (90) days of the settlement date (unless there is no activity during the period). *(Drafting Note: From SSAP No. 62R, paragraph 94.e. and Appendix A-791, paragraph 2.e.)*

   d. Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity. *(Drafting Note:)*
82. Disclose if the reporting entity has reflected reinsurance accounting credit for any contracts not subject to Appendix A-791 and not yearly renewable term, which meet the risk transfer requirements of SSAP No. 61R and identify the type of contracts and the reinsurance contracts.
   a. Assumption Reinsurance – new for the reporting period.
   b. Non-proportional reinsurance, which does not result in significant surplus relief. If yes, indicate if the insured event(s) triggering contract coverage has been recognized.

83. Disclose if the reporting entity ceded any risk which is not subject to A-791 and not yearly renewable term reinsurance, under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either: (Drafting Note: From SSAP No. 62R, paragraph 97)
   a. Accounted for that contract as reinsurance under statutory accounting principles (“SAP”) and as a deposit under generally accepted accounting principles (“GAAP”); or
   b. Accounted for that contract as reinsurance under GAAP and as a deposit under SAP.

84. If affirmative disclosure is required for paragraph 86, explain why the contract(s) is treated differently for GAAP and SAP. (Drafting Note: From SSAP No. 62R, paragraph 98)

Effective Date (not previously exposed)
86. The disclosure for compliance with Model #787 or AG 48 shall be effective for reporting periods ending on or after December 31, 2015. The revisions adopted in November 2018 to expand liquidity disclosures are effective year-end 2019, concurrent with the inclusion of data-captured financial statement disclosures. The disclosures captured in paragraphs 78-84 which help to identify certain reinsurance contract features are effective for reporting periods ending on or after December 31, 2020.

2. Adopt the exposed revisions to A-791 question and answer regarding contracts with medical loss ratios.

3. Refer to the informal life and health reinsurance drafting group the exposed revisions to the A-791 question and answer update to clarify the phrase “certain non-proportional contracts” with informal questions received by NAIC staff regarding: 1) the application of the exposed language regarding measurement period and settlement period and, 2) the application of substantially less likely than not. During the interim the informal questions were distributed to the drafting group. Based on informal input from with various drafting group members, more discussion is needed regarding this question and answer item and this is an issue that the drafting group can lend some useful expertise.

4. Provide direction on the A-791 question and answer, regarding the paragraph 2c exposed regulator language. As noted in the summary section above, regulator and industry members of the drafting group could not come to agreement. Industry comments received still indicate opposition on the topic of limiting group term life YRT reinsurance contracts to being not greater than the amount of the underlying direct proportionate premium reinsurance premium for the contract to receive reinsurance accounting. If preferred, the Working Group could have further discussion and provide direction at a subsequent meeting as the drafting group has noted that the regulators and the industry members are not in agreement on this topic. In addition, request assistance and input from LATF on evaluation of YRT risk transfer.
On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted, as final:

1. Disclosure revisions to SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance, with an effective date of Dec. 31, 2020,
2. A-791—Life and Health Reinsurance Agreements Q&A updates regarding contracts with medical loss ratios
3. A-791—Life and Health Reinsurance Agreements Q&A for paragraph 2c. regarding risk transfer and group term life yearly renewable term reinsurance, with an effective date of Jan. 1, 2021.

The adopted revisions are illustrated below. The Working Group also directed staff to notify the Life Actuarial (A) Task Force of the adoptions.

The proposed revisions to A-791 Q&A regarding the scope of nonproportional contracts subject to Appendix A-791 was referred to the informal life and health reinsurance drafting group to address informal application questions.

1. **Adopted - SSAP No. 61R Disclosures**

78. Disclosures for paragraphs 79-84, are required to be included with the annual audit report financial statements beginning with the period ended December 31, 2020 regarding reinsurance contracts. The disclosures required within paragraphs 79-84 shall be included in accompanying supplemental schedules of the annual audit report beginning in year-end 2020. These disclosures shall be limited to reinsurance contracts entered into, renewed or amended on or after January 1, 1996. This limitation applies to the annual audit report only and does not apply to the statutory annual statement interrogatories and the property and casualty reinsurance summary supplemental filing.

79. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) subject to A-791 that includes a provision, which limits the reinsurer’s assumption of significant risks identified as in A-791. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. For contracts subject to A-791, indicate if deposit accounting was applied for all contracts, which limit significant risks.

80. Disclose any reinsurance contracts (or multiple contracts with the same reinsurer or its affiliates) not subject to A-791, for which reinsurance accounting was applied and includes a provision that limits the reinsurer’s assumption of risk. Examples of risk limiting features include provisions such as a deductible, a loss ratio corridor, a loss cap, an aggregate limit or similar effect. If true, indicate the number of reinsurance contracts to which such provisions apply. If affirmative, indicate if the reinsurance credit was reduced for the risk limiting features.

81. Disclose if any reinsurance contracts contain features (except reinsurance contracts with a federal or state facility) described below which result in delays in payment in form or in fact:

   a. Provisions which permit the reporting of losses, or settlements are made, less frequently than quarterly or payments due from the reinsurer are not made in cash within ninety (90) days of the settlement date (unless there is no activity during the period).
   
   b. Payment schedule, accumulating retentions from multiple years or any features inherently designed to delay timing of the reimbursement to the ceding entity.
82. Disclose if the reporting entity has reflected reinsurance accounting credit for any contracts not subject to Appendix A-791 and not yearly renewable term, which meet the risk transfer requirements of SSAP No. 61R and identify the type of contracts and the reinsurance contracts.

   a. Assumption Reinsurance – new for the reporting period.

   b. Non-proportional reinsurance, which does not result in significant surplus relief. If yes, indicate if the insured event(s) triggering contract coverage has been recognized.

83. Disclose if the reporting entity ceded any risk which is not subject to A-791 and not yearly renewable term reinsurance, under any reinsurance contract (or multiple contracts with the same reinsurer or its affiliates) during the period covered by the financial statement, and either:

   a. Accounted for that contract as reinsurance under statutory accounting principles (“SAP”) and as a deposit under generally accepted accounting principles (“GAAP”); or

   b. Accounted for that contract as reinsurance under GAAP and as a deposit under SAP.

84. If affirmative disclosure is required for paragraph 86, explain why the contract(s) is treated differently for GAAP and SAP.

86. The disclosure for compliance with Model #787 or AG 48 shall be effective for reporting periods ending on or after December 31, 2015. The revisions adopted in November 2018 to expand liquidity disclosures are effective year-end 2019, concurrent with the inclusion of data-captured financial statement disclosures. The disclosures captured in paragraphs 78-84 which help to identify certain reinsurance contract features are effective for reporting periods ending on or after December 31, 2020.

2. Adopted new Appendix A-791 question and answer regarding business that has a statutorily required medical loss ratio or similar refund / rebate. This question relates to more than one topic, but will be placed under paragraph 2f. as a new QA item.

Q: If a company cedes health insurance business that is subject to a Medical Loss Ratio (MLR), or similar statutorily required refunds / rebates, must the reinsurer participate in the payment of any refunds / rebates?

A: The reinsurer needs to participate in the payment of its share of any statutorily required MLR or similar refund or rebate based on loss ratio calculations to the extent that the experience of the health business reinsured, during the period that it is reinsured, contributes to the calculation of the refund. Although the payment of such a refund based on the experience of business that is currently reinsured could result in a reduction of surplus on the part of the ceding insurer, if the reduction in surplus of the ceding insurer is entirely attributable to the experience prior to the effective date of the reinsurance, then it is outside of the contract requirements. Accordingly, such a provision should not cause a reinsurance agreement to be out of compliance with Appendix A-791 of the Accounting Practices and Procedure Manual. It is recognized that some refund calculations may involve multiple years.

Furthermore, just as an experience refund is not considered in the determination as to whether a reinsurance agreement is proportional, the requirement for the payment of a refund to policyholders based on a Medical Loss Ratio requirement should also not be considered.

Note: This Q&A only applies to refunds related to a statutory MLR or similar refund or rebate requirement for health insurance and should not be applied to any other situation.
3. **Adopted A-791—Life and Health Reinsurance Agreements Q&A for paragraph 2c. regarding risk transfer and group term life yearly renewable term reinsurance, with an effective date of Jan. 1, 2021, as detailed below. Placement would be at the end of the current paragraph 2c. QA items.**

   2c. The ceding insurer is required to reimburse the reinsurer for negative experience under the reinsurance agreement, except that neither offsetting experience refunds against current and prior years' losses under the agreement nor payment by the ceding insurer of an amount equal to the current and prior years' losses under the agreement upon voluntary termination of in force reinsurance by the ceding insurer shall be considered such a reimbursement to the reinsurer for negative experience. Voluntary termination does not include situations where termination occurs because of unreasonable provisions which allow the reinsurer to reduce its risk under the agreement. An example of such a provision is the right of the reinsurer to increase reinsurance premiums or risk and expense charges to excessive levels forcing the ceding company to prematurely terminate the reinsurance treaty;

   Q: If group term life business is reinsured under a YRT reinsurance agreement (which includes risk limiting features such as with an experience refund provision which offsets refunds against current and/or prior years' losses i.e., a “loss carryforward” provision), under what circumstances would any provisions of the reinsurance agreement be considered “unreasonable provisions which allow the reinsurer to reduce its risk under the agreement” thereby violating subsection 2.c.?

   A: Unlike individual life insurance where reserves held by the ceding insurer reflect a statutorily prescribed valuation premium above which reinsurance premium rates would be considered unreasonable, group term life has no such guide. So long as the reinsurer cannot charge premiums in excess of the premium received by the ceding insurer under the provisions of the YRT reinsurance agreement, such provisions would not be considered unreasonable. Any provision in the YRT reinsurance agreement which allows the reinsurer to charge reinsurance premiums in excess of the proportionate premium received by the ceding insurer would be considered unreasonable. The revisions to this QA regarding group term life yearly renewable term agreements is effective for contracts in effect as of January 1, 2021.

4. **Referred** the A-791 QA under paragraph 1 to address the phrase “certain non-proportional contracts” to the informal life and health reinsurance drafting group to address informal application questions received. The application questions received include: 1) the application of the exposed language regarding measurement period and settlement period and, 2) the application of substantially less likely than not.

   1. This Appendix shall not apply to assumption reinsurance, yearly renewable term reinsurance or certain non-proportional reinsurance such as stop loss or catastrophe reinsurance.

   Q – Aside from assumption reinsurance, what other types of reinsurance are exempt from the accounting requirements?

   A – Yearly renewable term (YRT) and certain nonproportional reinsurance arrangements, such as stop loss and catastrophe reinsurance are exempt because these do not normally provide significant surplus relief and therefore are outside the scope of this Appendix. If a catastrophe arrangement takes a reserve credit for actual losses beyond the attachment point or the unearned premium reserve (UPR) of the current year's premium, there will most likely be no regulatory concern. Similarly, if a YRT treaty provides incidental reserve credits for the ceding insurer's net amount at risk for the year with no other allowance to enhance surplus, there will most likely be no regulatory concern. For purposes of this exemption, a treaty labeled as YRT does not meet the intended definition of YRT if the surplus relief in the first year is greater than that provided by a YRT treaty with zero first year reinsurance premium and no additional allowance from the reinsurer.
Additional pertinent information applicable to all YRT treaties and to non-proportional reinsurance arrangements is contained in paragraphs 19 and 20 of SSAP No. 61R.

To further elaborate on the phrase "certain non-proportional reinsurance" in paragraph 1, the beginning of the answer notes that contracts such as stop-loss and catastrophe do not normally provide significant surplus relief, and are therefore not subject to the accounting guidance in Appendix A-791. Non-proportional reinsurance agreements are considered not to provide significant surplus relief if they possess all of the following features. For the purposes of defining these features, the term "triggering event" means the event or sequence of events that would lead to a loss being reimbursable by the reinsurer pursuant to the terms of the reinsurance agreement.

1. The triggering event has not occurred at the time of the inception of the reinsurance agreement.

2. The triggering event is materially less likely than not to occur during each settlement period of the reinsurance agreement.

3. There is no initial reinsurance credit for ceded policy reserves and any reinsurance expense allowance or commission is reported so that surplus is not impacted until the related premium is reported as earned.

These criteria shall be evaluated separately for each measurement period under the reinsurance agreement, where the measurement period is that period of time for which the direct writer’s experience is used to determine the amounts owed to and from the reinsurer. If there are carry-forwards of experience debits or credits from one calendar year to the next, then those multiple years will be considered one settlement period.

The fact that the triggering event does eventually occur, is not itself evidence that the second criterion above has not been met. The criterion should be evaluated based on reasonable expectations rather than posteriori results.
**Issue: ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force**

**Check (applicable entity):**

- Modification of existing SSAP
- New Issue or SSAP
- Interpretation

**Description of Issue:**

*ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force* (ASU 2014-17) was issued to provide guidance on whether and at what threshold an acquired entity that is a business or nonprofit activity can apply pushdown accounting in its separate financial statements. Prior to the issuance of this ASU, pushdown accounting was only required under U.S. GAAP for SEC registrants. Pursuant to the provisions in the ASU, acquirees now have the option to apply pushdown accounting. Pushdown accounting is a convention of accounting for the purchase of a subsidiary at the purchase cost rather than its historical basis. In effect, the acquiree’s assets and liabilities are written up (or down) to reflect the purchase price and, to the extent that the purchase price exceeds fair value, to recognize the excess as goodwill. In short, the total amount that is paid to purchase the subsidiary becomes the subsidiary’s new book value on its financial statements.

To illustrate the difference in applying pushdown accounting:

- Acquiree’s Book Value of Assets = $100 and Liabilities = $50.
- Acquiree’s Fair Value of Assets = $120 and Liabilities = $30.

If the purchase price was $90:

- “Normal” Purchase Accounting = Recognize SCA at $50 with the parent recognizing goodwill of $40.
- “Pushdown” Purchase Accounting = Recognize SCA at $90 with no goodwill recognized by the parent.

Under U.S. GAAP, goodwill is calculated as the purchase price of the acquiree less the market value of the acquiree. Any gains and losses associated with the new book value are “pushed down” from the acquirer’s income statement and balance sheet to the acquired company’s income statement and balance sheet. ASU 2014-17 states that an acquired entity may elect the option to apply pushdown accounting in the reporting period in which the change-in-control event occurs, but it also has the option to apply pushdown accounting in a reporting period subsequent to its most recent change-in-control event. If pushdown accounting is applied in a subsequent reporting period, it will be considered a change in accounting principle.

Under statutory accounting, a business combination is accounted for as either a statutory purchase or a statutory merger. A business combination in which one entity is acquired by another, and a parent-subsidiary relationship is created, is accounted for as a statutory purchase. The acquirer reports its investment at cost, which is defined as the sum of (a) any cash payment, (b) the fair value of other assets distributed, (c) the fair value of any liabilities assumed, and (d) any direct costs of the acquisition. For acquired subsidiary, controlled and affiliated (SCA) entities valued...
under an equity method of accounting, goodwill is defined as the difference between the cost of acquiring the SCA and the reporting entity’s share of the book value of the SCA. For U.S. insurance SCAs, the historical basis of the SCA will continue to be used in preparing its statutory financial statements. As such, pushdown accounting is not permitted for this equity method of accounting.

While statutory accounting utilizes the framework that was established by U.S. GAAP, statutory accounting focuses on the balance sheet, as opposed to the income statement, and places additional emphasis on the concepts of consistency and conservatism due to this difference in reporting objectives. The use of pushdown accounting as an accounting method under statutory accounting is problematic for the reasons listed below.

- A change in the ownership of an entity should not result in a new basis of accounting for that entity in its separate financial statements as transactions affecting an entity’s stock should not affect the entity’s accounting.

- If the acquiree has entered into third-party agreements with terms related to financial statements presented on the existing basis of accounting, restatement under pushdown accounting could pose problems in determining or maintaining compliance with those requirements.

- In the event there are still minority ownership interests in the acquired entity, utilization of pushdown accounting would result in a different set of financial statements and these owners would not have a meaningful set of comparative financial statements.

- There isn’t a reasonable way to determine which owner’s transactions should qualify for pushdown accounting, in a scenario in which there are multiple owners who are deemed to control the acquiree (10%+ ownership of outstanding stock measured at the holding company level).

- Goodwill restrictions under statutory accounting, such as the admissibility of goodwill limited to 10% of the reporting entity’s surplus and amortization over a ten-year span, would essentially be eluded.

**Example of U.S. GAAP with and without Pushdown Accounting versus Statutory Accounting**

Entity A purchases 100% of Entity Z (which has a fair value of 200 and is on the books for $100, Assets = $200 and Liabilities = $100) for $500.

**Entity Z’s Accounting on Standalone Financials:**

<table>
<thead>
<tr>
<th></th>
<th>U.S. GAAP without Pushdown</th>
<th>U.S. GAAP with Pushdown</th>
<th>Statutory Accounting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets</td>
<td>300</td>
<td>500</td>
<td>200</td>
</tr>
<tr>
<td>Liabilities</td>
<td>100</td>
<td>100</td>
<td>100</td>
</tr>
<tr>
<td>Equity</td>
<td>200</td>
<td>400</td>
<td>100</td>
</tr>
<tr>
<td>Goodwill</td>
<td>300</td>
<td>0</td>
<td>400</td>
</tr>
</tbody>
</table>

**Result:** Pushdown accounting increases the basis of the acquired entity from $100 under statutory accounting to $400 under U.S. GAAP. It also circumvents the goodwill restrictions under statutory accounting by increasing the basis of the acquired entity on its standalone financial statements.

**Actual SCA Filing**

NAIC Staff also refer to an actual SCA Sub 2 filing that was submitted during 2018 under the 8.b.iii valuation method (Non-Insurance SCA Entity under GAAP Basis). This acquisition was completed.
under the pushdown accounting method for U.S. GAAP. Since the existing guidance in SSAP No. 97 values 8.b.iii entities on the audited “U.S. GAAP equity of the investee,” the existing guidance does not allow for modifications/adjustments to remove the “pushdown accounting” impact. This allowed the parent reporting entity to avoid reporting goodwill for the acquired SCA. (*Entity names and values have been changed.*)

ABC purchased 50% of G for $500. G’s book value was $105 (Assets = $205 and Liabilities = $100) and fair value was $290.

**Entity G’s Accounting on Standalone Financials:**

<table>
<thead>
<tr>
<th></th>
<th>U.S. GAAP without Pushdown</th>
<th>U.S. GAAP with Pushdown</th>
<th>Statutory Accounting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets</td>
<td>390</td>
<td>600</td>
<td>205</td>
</tr>
<tr>
<td>Liabilities</td>
<td>100</td>
<td>100</td>
<td>100</td>
</tr>
<tr>
<td>Equity</td>
<td>290</td>
<td>500</td>
<td>105</td>
</tr>
<tr>
<td>Goodwill</td>
<td>210</td>
<td>0</td>
<td>395</td>
</tr>
</tbody>
</table>

The insurance reporting entity’s investment in G was increased due to the goodwill that was paid as part of the acquisition of G. This results in a value of G that vastly differs between U.S. GAAP where pushdown accounting is used and statutory accounting, which is much more conservative.

**Existing Authoritative Literature:**

**SSAP No. 68—Business Combinations and Goodwill**

**Statutory Purchases of SCA Investments**

3. The statutory purchase method of accounting is defined as accounting for a business combination as the acquisition of one entity by another. It shall be used for all purchases of SCA entities including partnerships, joint ventures, and limited liability companies. The acquiring reporting entity shall record its investment at cost. Cost is defined as the sum of: (a) any cash payment, (b) the fair value of other assets distributed, (c) the fair value of any liabilities assumed, and (d) any direct costs of the acquisition. Contingent consideration issued in a purchase business combination that is embedded in a security or that is in the form of a separate financial instrument shall be recorded by the issuer at fair value at the acquisition date.

4. For those acquired SCA entities accounted for in accordance with paragraphs 8.b.i., 8.b.ii., 8.b.iii. or 8.b.iv. of SSAP No. 97, and joint venture, partnership or limited liability company entities accounted for in accordance with paragraph 8 of SSAP No. 48, goodwill is defined as the difference between the cost of acquiring the entity and the reporting entity’s share of the book value of the acquired entity. When the cost of the acquired entity is greater than the reporting entity’s share of the book value, positive goodwill exists. When the cost of the acquired entity is less than the reporting entity’s share of the book value, negative goodwill exists. Goodwill resulting from assumption reinsurance shall be recorded as a separate write-in for other-than-invested assets. All other goodwill shall be reported in the carrying value of the investment.

5. A business combination accounted for under the statutory purchase method and in which the acquired entity is valued in accordance with paragraphs 8.b.ii., 8.b.iii. or, 8.b.iv. of SSAP No. 97 shall determine the amount of positive goodwill or negative goodwill created by the combination using the reporting entity’s share of the GAAP net book value of the acquired entity, adjusted to a statutory basis of accounting in accordance with paragraph 9 of SSAP No. 97 in the case of acquired entities valued in accordance paragraphs 8.b.ii. or 8.b.iv. of SSAP No. 97. Business combinations accounted for under the
statutory purchase method and in which the acquired entity is valued in accordance with, paragraph 8.b.i. of SSAP No. 97 shall determine the amount of positive or negative goodwill created by the business combination using the insurer’s share of the statutory book value of the acquired entity.

6. For those acquired SCA entities accounted for in accordance with paragraph 8.b.i. of SSAP No. 97 under the statutory purchase method, the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements. Therefore, pushdown accounting is not permitted.

7. Positive goodwill recorded under the statutory purchase method of accounting shall be admitted subject to the following limitation: Positive goodwill from all sources, including life, accident and health, and deposit-type assumption reinsurance, is limited in the aggregate to 10% of the acquiring entity’s capital and surplus as required to be shown on the statutory balance sheet of the reporting entity for its most recently filed statement with the domiciliary state commissioner adjusted to exclude any net positive goodwill, EDP equipment and operating system software, and net deferred tax assets. Additionally, all positive goodwill shall be nonadmitted when the underlying investment in the SCA or partnership, joint venture and limited liability company is nonadmitted. When negative goodwill exists, it shall be recorded as a contra-asset. Positive or negative goodwill resulting from the purchase of an SCA, joint venture, partnership or limited liability company shall be amortized to unrealized capital gains and losses on investments over the period in which the acquiring entity benefits economically, not to exceed 10 years. Positive or negative goodwill resulting from life, accident and health, and deposit-type assumption reinsurance shall be amortized to operations as a component of general insurance expenses over the period in which the assuming entity benefits economically, not to exceed 10 years. Goodwill shall be evaluated separately for each transaction.

SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities

Valuation of Investments in Downstream Holding Companies

22. SSAP No. 48 requires the financial statements of joint ventures, partnerships, and/or limited liability companies in which the downstream noninsurance holding company has a minor ownership interest or otherwise lacks control, i.e., ownership interest is less than 10% (hereinafter referred to as “non SCA SSAP No. 48 entities”), to be valued using U.S. GAAP basis financial statements. Valuation of a downstream holding company, including its investments in SCA entities, depends upon the nature of the SCA entities and non SCA SSAP No. 48 entities it holds in accordance with paragraph 8 of this statement. All liabilities, commitments, contingencies, guarantees or obligations of the downstream noninsurance holding company, which are required to be recorded under applicable statutory accounting guidance, shall be reflected in the parent insurance reporting entity’s determination of the carrying value of the investment in the downstream noninsurance holding company, if not already recorded in the financial statements of the downstream noninsurance holding company. If an SCA investment of the downstream holding company does not meet the provisions of paragraph 8.a. or if it elects not to use the guidance in paragraph 8.a., and instead uses the guidance in paragraph 8.b., the downstream holding company would be valued as the sum of the following (if applicable):

a. Investments by a downstream holding company in U.S. insurance SCA entities are recorded based upon the guidance in paragraph 8.b.i.;

---

1 The “acquiring” entity is intended to reflect the insurance reporting entity that reports the investment resulting in goodwill. The goodwill limitation test shall be completed at the individual reporting company level.

2 This includes, but is not limited to, situations in which the investment is nonadmitted as the audited financial statements for the SCA, joint venture, partnership or limited liability company includes substantial doubt on the entity’s ability to continue as a going concern, or on the basis/contents of the audit opinion pursuant to paragraph 21 of SSAP No. 97.
b. Investments by a downstream holding company in noninsurance SCA entities that are engaged in transactions or activities described in paragraph 8.b.ii., are recorded based upon the guidance in paragraph 8.b.ii.;

c. Investments by a downstream holding company in noninsurance SCA entities that do not qualify under paragraph 21.b. shall be recorded based upon the guidance in paragraph 8.b.iii.;

d. Investments by a downstream holding company in foreign insurance SCA entities shall be recorded based upon the guidance in paragraph 8.b.iv.; and

e. Any other assets and/or liabilities of the downstream holding company (not addressed in paragraphs 21.a. through 21.d.) shall be valued in accordance with the applicable SSAP.

For purposes of applying paragraphs 21-26 of this statement, a downstream holding company shall be considered to be the parent reporting entity’s investment in a SCA entity. See paragraphs 25 and 26 for a limited exception to the audited financial statements requirement for downstream noninsurance holding companies which meet specified conditions.

Admissibility Requirements of Investments in Downstream Holding Companies

23. To meet the admissibility requirements of this statement, unless the limited exception to the audited financial statements requirement discussed in paragraphs 25 and 26 applies, an annual audit of the financial statements of SCA entities, including the downstream holding company valued under paragraphs 8.b.i through 8.b.iv. must be obtained. The requirement for audited financial statements may be met by utilizing any one of the following methods:

a. Audited US GAAP financial statements of the downstream SCA holding company. (Consolidated or combined financial statements are allowed encompassing one or more downstream holding companies, including such holding companies that directly own U.S. insurance entities, provided that the statutory financial statements of such U.S. insurance entities are audited. Annual consolidated or combined audits are allowed for insurance entities if completed in accordance with the Model Regulation Requiring Annual Audited Reports as adopted by the SCA’s domiciliary state.) The audited financial statements of the downstream holding company shall include as other financial information, consolidating or combining balance sheet schedule(s) showing the equity of all relevant SCA entities and non-SCA SSAP No. 48 entities, and any required intercompany eliminations. The consolidating or combining balance sheet schedule shall separately present those entities owned directly by the downstream holding company. The consolidating or combining balance sheet schedule shall then be adjusted for GAAP to SAP differences for paragraph 8.b.i., 8.b.ii. and 8.b.iv. entities owned directly or indirectly by the downstream holding company. The adjusted amount would then be the reported value of the investment in the downstream holding company at the higher-level reporting entity; or

b. Audited foreign GAAP-basis financial statements of the downstream SCA holding company. (Consolidated or combined financial statements are allowed encompassing one or more downstream holding companies, including such holding companies that directly own U.S. insurance entities, provided that the statutory financial statements of such U.S. insurance entities are audited. Annual consolidated or combined audits are allowed for insurance entities if completed in accordance with the Model Regulation Requiring Annual Audited Reports as adopted by the SCA’s domiciliary state.) The audited foreign GAAP basis financial statements shall include an audited footnote disclosure within the financial statements that reconciles each consolidated entity’s net income and equity on a foreign
basis of accounting to a U.S. GAAP basis. The audited financial statements of the
downstream holding company shall include as other financial information, consolidating or
combining balance sheet schedule(s) showing the equity of all relevant SCA entities non
SCA SSAP No. 48 entities, and any required intercompany eliminations. The consolidating
or combining balance sheet schedule shall separately present those entities owned directly
by the downstream holding company. The consolidating or combining balance sheet shall
then be adjusted for GAAP to SAP differences of the insurance entities and paragraph
8.b.ii., and 8.b.iv. entities owned directly or indirectly by the downstream holding company.
The adjusted amount would then be the reported value of the investment in the
downstream holding company at the higher-level reporting entity; or

c. Individual audits of the downstream holding company and the downstream holding
company’s investments in individual SCA entities.

Activity to Date (issues previously addressed by the Working Group, Emerging Accounting Issues (E)
Working Group, SEC, FASB, other State Departments of Insurance or other NAIC groups): During the 2019
Summer National Meeting, the Working Group received information on the history of pushdown and information
from discussions with AICPA and interested party representatives. This information has been captured in the agenda
item for future reference:

Comparison of SAP / GAAP Goodwill Guidance, including GAAP Pushdown:

<table>
<thead>
<tr>
<th>SCA Acquisition</th>
<th>Purchase Price: $300</th>
<th>Asset Book Value: $90</th>
<th>Asset Fair Value: $150</th>
</tr>
</thead>
</table>
| Standard SAP Accounting: | Investment in SCA: $90  
  Goodwill: $210 | The combined $300 is reported as the investment in SCA, but the goodwill is separately reported and is subject to the SSAP No. 68 admittance restrictions and the 10-year amortization. |
| U.S. GAAP Standard: | Investment in SCA: $150  
  Goodwill: $150 | When pushdown is not elected, under U.S. GAAP, goodwill is calculated on the difference between fair value and the purchase price. This is different than SAP where goodwill is calculated based on the difference between book value and the purchase price. |
| U.S. GAAP Pushdown: | Parent Reporting:  
  Investment in SCA: $300 | With pushdown, the reported value at the reporting entity level simply reflects the purchase price. |
| | SCA Reporting:  
  Assets: $150  
  Goodwill: $150 | With pushdown, the acquired SCA increases the book value of their assets to fair value, and reports goodwill on their F/S for any remaining difference. |

Preliminary information from discussions with AICPA and Industry representations

- Insurance reporting entities that were SEC filers have historically used pushdown when acquiring SCAs. This is because pushdown accounting was required for SEC filers and US GAAP allowed pushdown to prevent differences between the SEC and US GAAP.
With ASU 2014-17, the US GAAP guidance became an election for all reporting entities. As such, more entities may have elected to use pushdown, but no information is known as to the extent pushdown accounting has been applied.

**For the SEC registrants that used pushdown, the U.S. GAAP guidance was followed.** As such, at acquisition the assets and liabilities of the SCA were adjusted to fair value, and the goodwill calculated was the difference between the purchase price and the fair value of the SCA. (This is different from the goodwill calculation required under SSAP No. 68.) The goodwill was then recognized as an asset on the SCA books (and not at the insurance reporting entity level). This goodwill was subject to the U.S. GAAP impairment calculation, which requires annual testing of impairment, but was not subject to the admittance or amortization requirements of SSAP No. 68.

**For non-SEC registrants that have elected pushdown under the new GAAP provisions, it is uncertain how goodwill was calculated prior to the pushdown.** (Whether it was calculated under the guidance in SSAP No. 68 or under U.S. GAAP.)

Although U.S. GAAP now permits pushdown beyond SEC filers, pushdown is prohibited under IFRS.

Per the discussion with interested parties’ representatives, the acquisition of a new SCA from a non-related party is considered to be an economic transaction under SSAP No. 25. However, if the acquisition of an SCA was from a related party, it would not be considered an economic transaction. With classification as an economic transaction, the interested parties noted that increase of the SCA to represent fair value is consistent under SSAP No. 25.

**Historical SAP Guidance:**

The original Issue Paper No. 68 noted that pushdown should be prohibited in all SCA acquisitions. Issue Papers are not authoritative, and this guidance was not what was adopted in the original SSAP No. 68. There is no discussion in the original Issue Paper on the expansion that permitted pushdown for the “7.b.iii” entities in the issued SSAP No. 46. The expansion on the use of pushdown to all SCA entities except insurance SCA entities “8.b.i” was then reflected as a modification to SSAP No. 68 from the 2004 adoption of SSAP No. 88—Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 46. (This revision expanded the ability to use pushdown accounting to noninsurance entities that engage in insurance “activities” and meet the revenue test under 8.b.ii.) There was no discussion in the corresponding Issue Paper (No. 118) regarding the expansion to all entities except insurance SCAs. NAIC staff suspects that as pushdown was limited to only SEC registrants under U.S. GAAP, the expansion to all entities that could use audited U.S. GAAP was not concerning as it would be applied only in the SEC-qualifying situations. This aspect of SSAP No. 68 has not been modified since the adoption of SSAP No. 88.

Original Codification of AP&P Manual – Effective Jan. 1, 2001:

**Issue Paper No. 68—Business Combinations and Goodwill:**

8. Under the statutory purchase method the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements except in those instances provided for in paragraph 8.b. of Issue Paper No. 46. Therefore, pushdown accounting is not permitted.
Issue Paper No. 46—Accounting for Investments in Subsidiary, Controlled or Affiliated Entities:

8b. If a SCA investment does not meet the requirements for the market valuation approach in paragraph 7.a. or, if the requirements are met, but a reporting entity elects not to use that approach, investments in SCAs shall be recorded as follows:

i. Investments in insurance SCA entities shall be recorded based on the underlying statutory equity of the respective entity's financial statements, adjusted for unamortized goodwill as provided for in Issue Paper No. 68—Business Combinations and Goodwill (Issue Paper No. 68);

ii. Investments in noninsurance SCA entities that have no significant ongoing operations other than to hold assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates, shall be recorded based on the underlying equity of the respective entity's financial statements adjusted to a statutory basis of accounting and the resultant proportionate share of the subsidiary's adjusted surplus, adjusted for unamortized goodwill as provided for in Issue Paper No. 68. Examples include but are not limited to: 1) an insurer and a SCA entity that leases autos, furniture, office equipment, or computer equipment to the insurer, 2) an insurer and a SCA entity that owns real estate property that is leased to the insurer for office space, and 3) an insurer and an SCA entity which holds investments which an insurer could acquire directly (i.e., "look through" investment subsidiary);

iii. Investments in noninsurance SCA entities that have significant ongoing operations beyond the holding of assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates, shall be recorded based on the audited GAAP equity of the investee. Examples include but are not limited to: 1) a property-casualty or life insurer and a SCA entity that is an oil and gas venture, and 2) a property-casualty or life insurer and a SCA manufacturer.

SSAP No. 68—Business Combinations and Goodwill

8. Under the statutory purchase method the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements except in those instances provided for in paragraph 7.b.iii of SSAP No. 46. Therefore, pushdown accounting is not permitted.

SSAP No. 46—Investments in Subsidiary, Controlled and Affiliated Entities:

7.b.iii. Investments in noninsurance SCA entities that have significant ongoing operations beyond the holding of assets that are primarily for the direct or indirect benefit or use of the reporting entity or its affiliates, shall be recorded based on the audited GAAP equity of the investee. Examples include but are not limited to: (i) a property-casualty or life insurer and a SCA entity that is an oil and gas venture, and (ii) a property-casualty or life insurer and a SCA manufacturer.

AP&P Manual – As of March 2005:

SSAP No. 88—Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 46 detailed the amendments adopted to SSAP No. 68:

26. This statement supersedes paragraphs 4-6 of SSAP No. 68—Business Combinations and Goodwill as follows:

4. For those acquired SCA entities accounted for in accordance with paragraphs 8.b.i., 8.b.ii., 8.b.iii. or 8.b.iv. of SSAP No. 88, goodwill is defined as the difference between the cost of acquiring the entity and the reporting entity’s share of the book value of the acquired entity. When the cost of the acquired entity is greater than the reporting entity’s share of the book
value, positive goodwill exists. When the cost of the acquired entity is less than the reporting entity’s share of the book value, negative goodwill exists. Goodwill resulting from assumption reinsurance shall be recorded as a separate write-in for other-than-invested assets. All other goodwill shall be reported in the carrying value of the investment.

5. A business combination accounted for under the statutory purchase method and in which the acquired entity is valued in accordance with paragraphs 8.b.ii., 8.b.iii. or, 8.b.iv. of SSAP No. 88 shall determine the amount of positive goodwill or negative goodwill created by the combination using the reporting entity’s share of the GAAP net book value of the acquired entity. Business combinations accounted for under the statutory purchase method and in which the acquired entity is valued in accordance with, 8 b. i. SSAP No. 88 shall determine the amount of positive or negative goodwill created by the business combination using the insurer’s share of the statutory book value of the acquired entity.

6. For those acquired SCA entities accounted for in accordance with paragraph 8.b.i. under the statutory purchase method the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements. Therefore, pushdown accounting is not permitted.

Information or issues (included in Description of Issue) not previously contemplated by the Working Group:
None

Convergence with International Financial Reporting Standards (IFRS):
Currently, there is no guidance in IFRS on pushdown accounting as this is not a method of accounting that is accepted under IFRS.

Staff Recommendation:
Staff recommends that the Working Group move this item to the active listing, categorized as nonsubstantive and expose the proposed revisions to SSAP No. 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities to reject ASU 2014-17, Business Combinations – Pushdown Accounting for statutory accounting. This agenda item also explicitly prohibits use of pushdown accounting under the statutory accounting basis, which includes all entities accounting for under SSAP No. 48—Joint Ventures, Partnerships and Limited Liability Companies and SSAP No. 97. These revisions will explicitly prohibit insurance reporting entities that hold SCAs valued on the basis of U.S. GAAP (8.b.ii or 8.b.iii) to utilize a value for the SCA that reflects the impact of pushdown accounting. Insurance reporting entities that hold SCAs that utilized pushdown accounting for U.S. GAAP will be required to adjust their U.S. GAAP financial statements to remove the effect of pushdown accounting, and provide audited support of their modification. The insurance reporting entity shall recognize the difference between the purchase price and the net book value of the entity (prior to pushdown accounting) as goodwill in accordance with SSAP No. 68. This goodwill shall be admitted and amortized in accordance with the limitations and provisions of SSAP No. 68. The effective date of these revisions shall be Jan. 1, 2020.

Staff Note: Staff has considered that it will be more difficult to maintain separate sets of accounting records if multiple entities are acquired, especially with the complex nature of insurance company reporting structures. Staff also notes that the election to apply pushdown accounting under U.S. GAAP is irrevocable; as such, a grandfather provision will allow any SCAs acquired prior to December 31, 2019 to continue to use pushdown accounting in its financial statements.

Staff Review Completed by:
Fatima Sediqzad - NAIC Staff
March 2019
Proposed Revisions:

SSAP No. 68—Business Combinations and Goodwill

Business Combinations
2. A business combination shall be accounted for as either a statutory purchase or a statutory merger. Business combinations that create a parent-subsidiary relationship shall be accounted for as a statutory purchase. Business combinations where equity of one entity is issued in exchange for the equity of another entity, which is then canceled, and prospectively only one entity exists, shall be accounted for as a statutory merger.

Statutory Purchases of SCA Investments
3. The statutory purchase method of accounting is defined as accounting for a business combination as the acquisition of one entity by another. It shall be used for all purchases of SCA entities including partnerships, joint ventures, and limited liability companies. The acquiring reporting entity shall record its investment at cost. Cost is defined as the sum of: (a) any cash payment, (b) the fair value of other assets distributed, (c) the fair value of any liabilities assumed, and (d) any direct costs of the acquisition. Contingent consideration issued in a purchase business combination that is embedded in a security or that is in the form of a separate financial instrument shall be recorded by the issuer at fair value at the acquisition date. Pushdown accounting is not a permitted convention of accounting under statutory accounting, including the acquisition of an entity that follows U.S. GAAP as its basis of accounting.

6. For those acquired SCA entities accounted for using the equity method in accordance with paragraph 8.b.+ of SSAP No. 97 under the statutory purchase method, the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements. Therefore, pushdown accounting is not permitted, as noted in paragraph 20.

20. This statement rejects ASU 2017-04, Simplifying the Test for Goodwill Impairment, ASU 2016-03, Intangibles—Goodwill and Other, Business Combinations, Consolidation, Derivatives and Hedging; ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force; ASU 2014-02, Accounting for Goodwill (a consensus of the Private Company Council), ASU 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment, ASU 2011-08, Testing Goodwill for Impairment and ASU 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts; Accounting Principles Board Opinion No. 16, Business Combinations; FASB Statement No. 38, Accounting for Preacquisition Contingencies of Purchased Enterprises, an amendment of APB Opinion No. 16; Accounting Principles Board Opinion No. 17, Intangible Assets; FASB Statement No. 79, Elimination of Certain Disclosures for Business Combinations by Nonpublic Enterprises; FASB Statement No. 141, Business Combinations; and FASB Statement No. 142, Goodwill and Other Intangible Assets. The following related interpretative pronouncements are also rejected:

SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities

Applying the Market Valuation, Audited Statutory Equity and Audited GAAP Equity Methods
8. The admitted investments in SCA entities shall be valued using either the market valuation approach (as described in paragraph 8.a.), or one of the equity methods (as described in paragraph 8.b.) adjusted as appropriate in accordance with the guidance in SSAP No. 25—Affiliates and Other Related Parties (SSAP No. 25), paragraph 16.d.

a. In order to use the market valuation approach for SCA entities, the following requirements apply:
b. If a SCA investment does not meet the requirements for the market valuation approach in paragraph 8.a. or, if the requirements are met, but a reporting entity elects not to use that approach, the reporting entity’s proportionate share of its investments in SCAs shall be recorded as follows:

i. Investments in U.S. insurance SCA entities shall be recorded based on either 1) the underlying audited statutory equity of the respective entity’s financial statements, adjusted for any unamortized goodwill as provided for in SSAP No. 68—*Business Combinations and Goodwill* (SSAP No. 68)\(^3\) or 2) the underlying audited statutory equity of the respective entity’s financial statements, adjusted for any unamortized goodwill, modified to remove the impact of any permitted or prescribed accounting practices that depart from the NAIC *Accounting Practices and Procedures Manual*. Reporting entities shall record investments in U.S. insurance SCA entities on at least a quarterly basis, and shall base the investment value on the most recent quarterly information available from the SCA. Entities may recognize their investment in U.S. insurance SCA entities based on the unaudited statutory equity in the SCAs year-end Annual Statement if the annual SCA audited financial statements are not complete as of the filing deadline. The recorded statutory equity shall be adjusted for audit adjustments, if any, as soon as the annual audited financial statements have been completed. Annual consolidated or combined audits are allowed if completed in accordance with the Model Regulation Requiring Annual Audited Financial Reports as adopted by the SCA’s domiciliary state;

ii. Investments in both U.S. and foreign noninsurance SCA entities that are engaged in the following transactions or activities:

(a) Collection of balances as described in SSAP No. 6—*Uncollected Premium Balances, Bills Receivable for Premiums, and Amounts Due From Agents and Brokers*

(b) Sale/lease or rental of EDP Equipment and Software as described in SSAP No. 16R—*Electronic Data Processing Equipment and Software*

(c) Sale/lease or rental of furniture, fixtures, equipment or leasehold improvements as described in SSAP No. 19—*Furniture, Fixtures, Equipment and Leasehold Improvements*

(d) Loans to employees, agents, brokers, representatives of the reporting entity or SCA as described in SSAP No. 20—*Nonadmitted Assets*

(e) Sale/lease or rental of automobiles, airplanes and other vehicles as described in SSAP No. 20—*Nonadmitted Assets*

(f) Providing insurance services on behalf of the reporting entity including but not limited to accounting, actuarial, auditing, data processing,

---

\(^3\) If the insurance SCA employs accounting practices that depart from the NAIC accounting practices and procedures, and the reporting insurance entity has not adjusted the valuation of the insurance SCA to be consistent with the NAIC accounting practices and procedures, (i.e., retains the effect of the permitted or prescribed practice in its valuation), disclosure about those accounting practices that affect the insurance SCA’s net income and surplus shall be made pursuant to paragraph 36. If the reporting entity has adjusted the investment in the insurance SCA with the resulting valuation being consistent with the accounting principles of the AP&P Manual, the disclosures in paragraph 36 are not required.
underwriting, collection of premiums, payment of claims and benefits, policyowner services

(g) Acting as an insurance or administrative agent or an agent for a government instrumentality performing an insurance function (e.g. processing of state workers compensations plans, managing assigned risk plans, Medicaid processing etc).

(h) Purchase or securitization of acquisition costs

and if 20% or more of the SCA’s revenue is generated from the reporting entity and its affiliates, then the underlying equity of the respective entity’s audited U.S. Generally Accepted Accounting Principles (GAAP) financial statements shall be adjusted to a limited statutory basis of accounting in accordance with paragraphs 9 and 20FN. For purposes of this section, revenue means GAAP revenue reported in the audited U.S. GAAP financial statements excluding realized and unrealized capital gains/losses. Foreign SCA entities are defined as those entities incorporated or otherwise legally formed under the laws of a foreign country. Paragraphs 232-287 provide guidance for investments in holding companies;

New Footnote – If the audited U.S. GAAP financial statements reflect the pushdown method of accounting, the financial statements must first be modified to eliminate the effects of the pushdown accounting before applying the statutory basis adjustments.

iii. Investments in both U.S. and foreign noninsurance SCA entities that do not qualify under paragraph 8.b.ii., shall be recorded based on the audited U.S. GAAP equity of the investee, adjusted in accordance with paragraph 20. Foreign SCA entities are defined as those entities incorporated or otherwise legally formed under the laws of a foreign country. Additional guidance on investments in downstream holding companies is included in paragraphs 232-287. Additional guidance on the use of audited foreign GAAP basis financial statements for the U.S. GAAP equity valuation amount is included in paragraph 243.b.

iv. Investments in foreign insurance SCA entities shall be recorded based on the underlying U.S. GAAP equity from the audited U.S. GAAP basis financial statements, adjusted to a limited statutory basis of accounting in accordance with paragraphs 9 and 20, if available. If the audited U.S. GAAP basis financial statements are not available, the investment can be recorded on the audited foreign statutory basis financial statements of the respective entity adjusted to a limited statutory basis of accounting in accordance with paragraph 9 and adjusted for reserves of the foreign insurance SCA with respect to the business it assumes directly and indirectly from a U.S. insurer using the statutory accounting principles promulgated by the NAIC in the Accounting Practices and Procedures Manual. The audited foreign statutory basis financial statements must include an audited footnote that reconciles net income and equity on the foreign statutory basis of accounting to the U.S. GAAP basis. Foreign insurance SCA entities are defined as alien insurers formed according to the legal requirements of a foreign country.

**Pushdown Accounting**

20. Pushdown accounting is a convention of accounting for the purchase of a subsidiary at the purchase cost rather than its historical cost. Under pushdown accounting, the acquiree’s assets and liabilities are written up (or down) to reflect the purchase price and, to the extent that the purchase price exceeds fair value, to recognize the excess as goodwill. As such, the total amount that is paid to purchase
the subsidiary becomes the subsidiary's new book value on its financial statements. Pushdown accounting is not permitted under statutory accounting, therefore all SCAs that utilize audited U.S. GAAP financial statements to determine the valuation method under this statement (SCAs valued in accordance with paragraphs 8.b.ii and 8.b.iii) that reflect pushdown accounting must be adjusted, in accordance with an audited reconciliation, to eliminate the effects of pushdown accounting. In addition to adjusting the equity basis of the SCA to eliminate pushdown accounting, the insurance reporting entity shall separately recognize goodwill, as appropriate based on the purchase price and net book value of the entity at acquisition (without pushdown accounting) and report the goodwill in accordance with the provisions of SSAP No. 68. Reporting entities that do not have audited support to eliminate the impact of pushdown accounting shall consider the SCA nonadmitted for statutory reporting purposes. Historical acquisitions of SCAs that have involved pushdown accounting shall continue admittance of the SCA with approval of the domiciliary commissioner. On a prospective basis for newly acquired SCAs, and for historical SCA acquisitions in which domiciliary commissioner approval is not received, reporting entities that do not have audited support to eliminate the impact of pushdown accounting shall report the SCA as a nonadmitted asset for statutory reporting purposes.

Valuation of Investments in Downstream Holding Companies

22. SSAP No. 48 requires the financial statements of joint ventures, partnerships, and/or limited liability companies in which the downstream noninsurance holding company has a minor ownership interest or otherwise lacks control, i.e., ownership interest is less than 10% (hereinafter referred to as “non SCA SSAP No. 48 entities”), to be valued using U.S. GAAP basis financial statements. Valuation of a downstream holding company, including its investments in SCA entities, depends upon the nature of the SCA entities and non SCA SSAP No. 48 entities it holds in accordance with paragraph 8 of this statement. All liabilities, commitments, contingencies, guarantees or obligations of the downstream noninsurance holding company, which are required to be recorded under applicable statutory accounting guidance, shall be reflected in the parent insurance reporting entity’s determination of the carrying value of the investment in the downstream noninsurance holding company, if not already recorded in the financial statements of the downstream noninsurance holding company. The historical basis of the acquired entity shall continue to be used in preparing its financial statements. If an SCA investment of the downstream holding company does not meet the provisions of paragraph 8.a. or if it elects not to use the guidance in paragraph 8.a., and instead uses the guidance in paragraph 8.b., the downstream holding company would be valued as the sum of the following (if applicable):

Admissibility Requirements of Investments in Downstream Holding Companies

23. To meet the admissibility requirements of this statement, unless the limited exception to the audited financial statements requirement discussed in paragraphs 26 and 27 applies, an annual audit of the financial statements of SCA entities, including the downstream holding company valued under paragraphs 8.b.i through 8.b.iv. must be obtained. The requirement for audited financial statements may be met by utilizing any one of the following methods:

a. Audited US GAAP financial statements of the downstream SCA holding company, where the historical basis of the SCA has been used to prepare its financial statements. (Consolidated or combined financial statements are allowed encompassing one or more downstream holding companies, including such holding companies that directly own U.S. insurance entities, provided that the statutory financial statements of such U.S. insurance entities are audited. Annual consolidated or combined audits are allowed for insurance entities if completed in accordance with the Model Regulation Requiring Annual Audited Reports as adopted by the SCA’s domiciliary state.) The audited financial statements of the downstream holding company shall include as other financial information, consolidating or combining balance sheet schedule(s) showing the equity of all relevant SCA entities and non-SCA SSAP No. 48 entities, and any required intercompany eliminations. The consolidating or combining balance sheet schedule shall separately present those entities owned directly by the downstream holding company. The consolidating or combining balance sheet shall then be adjusted for GAAP to SAP differences for paragraph 8.b.i.,
8.b.ii. and 8.b.iv. entities owned directly or indirectly by the downstream holding company. The adjusted amount would then be the reported value of the investment in the downstream holding company at the higher-level reporting entity; or

b. Audited foreign GAAP-basis financial statements of the downstream SCA holding company. (Consolidated or combined financial statements are allowed encompassing one or more downstream holding companies, including such holding companies that directly own U.S. insurance entities, provided that the statutory financial statements of such U.S. insurance entities are audited. Annual consolidated or combined audits are allowed for insurance entities if completed in accordance with the Model Regulation Requiring Annual Audited Reports as adopted by the SCA’s domiciliary state.) The audited foreign GAAP basis financial statements shall include an audited footnote disclosure within the financial statements that reconciles each consolidated entity’s net income and equity on a foreign basis of accounting to a U.S. GAAP basis. The audited financial statements of the downstream holding company shall include as other financial information, consolidating or combining balance sheet schedule(s) showing the equity of all relevant SCA entities non SCA SSAP No. 48 entities, and any required intercompany eliminations. The consolidating or combining balance sheet schedule shall separately present those entities owned directly by the downstream holding company. The consolidating or combining balance sheet shall then be adjusted for GAAP to SAP differences of the insurance entities and paragraph 8.b.ii., and 8.b.iv. entities owned directly or indirectly by the downstream holding company. The adjusted amount would then be the reported value of the investment in the downstream holding company at the higher-level reporting entity; or

c. Individual audits of the downstream holding company and the downstream holding company’s investments in individual SCA entities.

48. This statement rejects ASU 2014-17, Business Combinations – Pushdown Accounting, a Consensus of the FASB Emerging Issues Task Force, ASU 2011-10, Derecognition of in Substance Real Estate, APB Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock, AICPA Accounting Interpretations APB 18, The Equity Method of Accounting for Investments in Common Stock: Accounting Interpretations of APB Opinion No. 18, FASB Technical Bulletin No. 79-19, Investor’s Accounting for Unrealized Losses on Marketable Securities Owned by an Equity Method Investee, FASB Emerging Issues Task Force No. 87-21, Change of Accounting Basis in Master Limited Partnership Transactions, FASB Emerging Issues Task Force No. 96-16, Investor’s Accounting for an Investee When the Investor Has a Majority of the Voting Interest but the Minority Shareholder or Shareholders Have Certain Approval or Veto Rights, FASB Emerging Issues Task Force No. 98-2: Accounting by a Subsidiary or Joint Venture for an Investment in the stock of Its Parent Company or Joint Venture Partner and FASB Staff Position No. APB 18-1, Accounting by an Investor for Its Proportionate Share of Accumulated Other Comprehensive Income of an Investee Accounted for under the Equity Method in Accordance with APB Opinion No. 18 upon a Loss of Significant Influence.

Status:
On April 6, 2019, the Statutory Accounting Principles (E) Working Group moved this agenda item to the active listing, categorized as nonsubstantive, and exposed revisions to SSAP No 68—Business Combinations and Goodwill and SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities to reject ASU 2014-17, Business Combinations – Pushdown Accounting for statutory accounting as well as explicitly prohibit the use of pushdown accounting under statutory accounting, which includes all entities accounted for under SSAP No. 48—Joint Ventures, Partnerships and Limited Liability Companies and SSAP No. 97.

On August 3, 2019, the Statutory Accounting Principles (E) Working Group exposed this agenda item with a request for comments on the three options listed below. Additionally, to ensure that goodwill resulting from an insurance reporting entity’s acquisition of an SCA when pushdown is applied is captured within the goodwill admittance
The options for Working Group consideration include:

1) **Complete rejection of pushdown accounting.** As pushdown is now an election for SEC / U.S. GAAP filers, reporting entities can avoid use of pushdown if prohibited for statutory accounting. (NAIC staff would propose a prospective effective date if electing this option to avoid restatement of those entities that have previously elected pushdown.)

2) **Permission to use pushdown for all non-insurance entities.** This option would increase optionality into the statutory financial statements. If permitted, this approach would result in different SCA values and goodwill calculations for those that follow the guidance in SSAP No. 68 and those that utilize pushdown. Under SSAP No. 68, acquired SCAs do not write-up their assets or liabilities to fair value and goodwill is calculated as the difference between purchase price and book value. Under U.S. GAAP pushdown, acquired SCAs write-up their assets and liabilities to fair value, and goodwill is calculated as the difference between the purchase price and the fair value of the acquired entity. With pushdown, the goodwill is reported at the SCA level. As such, goodwill will be an indefinite asset unless it is identified as impaired. (Under U.S. GAAP, private entities and not-for-profit entities can elect to amortize goodwill over a 10-year period, but this is not an election for public entities.) **If this option is supported, NAIC staff would recommend that the goodwill admittance limitation capture goodwill from an insurance entity’s acquisition of an SCA that is reported on the SCA financial statements.** (This option would not permit pushdown for insurance SCAs (8.b.i entities).

   (If this option is considered, NAIC staff would propose restrictions on the use of pushdown that differ from U.S. GAAP. For example, under U.S. GAAP, a reporting entity could subsequent elect pushdown accounting in any reporting period after original acquisition. If pushdown was permitted, NAIC staff would propose to require the election at original acquisition and not allow subsequent elections.)

3) **Permit pushdown if elected by SEC Registrants, excluding non-insurance entities.** Although this option would introduce different accounting by type of reporting entity, it is consistent with when pushdown would have been applied under prior statutory accounting guidance. (Under the old SEC provisions, pushdown was only permitted when meeting certain SEC requirements.) This would seemingly allow the companies that have historically utilized pushdown under the SEC rules to continue acquisitions under that prior approach. **If this option is supported, NAIC staff would recommend that the goodwill admittance limitation capture goodwill from the acquisition of an SCA that is reported on the SCA financial statements.** (Also, NAIC staff would propose restrictions to the provisions to ensure the election is made at the time of original acquisition.) (This option would not permit pushdown for insurance SCAs (8.b.i entities).

Exposed Edits to SSAP No. 68—Business Combinations and Goodwill:

8. For those acquired SCA entities accounted for in accordance with paragraph 8.b.i. of SSAP No. 97 under the statutory purchase method, the historical bases of the acquired entity shall continue to be used in preparing its statutory financial statements. Therefore, pushdown accounting is not permitted.

9. Positive goodwill recorded under the statutory purchase method of accounting shall be admitted subject to the following limitation: Positive goodwill from all sources, including life, accident and health, and deposit-type assumption reinsurance and goodwill resulting from the acquisition of an SCA by the insurance reporting entity that is reported on the SCA’s financial statements (resulting from the application of
Ref #2019-12

pushdown accounting), is limited in the aggregate to 10% of the acquiring\(^4\) entity’s capital and surplus as required to be shown on the statutory balance sheet of the reporting entity for its most recently filed statement with the domiciliary state commissioner adjusted to exclude any net positive goodwill, EDP equipment and operating system software, and net deferred tax assets. Additionally, all positive goodwill shall be nonadmitted when the underlying investment in the SCA or partnership, joint venture and limited liability company is nonadmitted\(^5\). When negative goodwill exists, it shall be recorded as a contra-asset. Positive or negative goodwill resulting from the purchase of an SCA, joint venture, partnership or limited liability company shall be amortized to unrealized capital gains and losses on investments over the period in which the acquiring entity benefits economically, not to exceed 10 years. Positive or negative goodwill resulting from life, accident and health, and deposit-type assumption reinsurance shall be amortized to operations as a component of general insurance expenses over the period in which the assuming entity benefits economically, not to exceed 10 years. Goodwill shall be evaluated separately for each transaction.\(^{1\text{INT 01-18}}\)

On December 7, 2019, the Statutory Accounting Principles (E) Working Group adopted, as final, a clarification edit to SSAP No. 68—Business Combinations and Goodwill to clarify that all goodwill from an insurance entity’s acquisition of SCAs, regardless of whether pushdown accounting is applied, is subject to the existing 10% admittance limitation. (With adoption of this edit, paragraph 9 was split into two separate paragraphs.) The remainder of this agenda item was re-exposed to allow additional time for specific examples of pushdown accounting to be provided by interested parties, as well as consider comments received on pushdown.

**Dec. 7 - Adopted SSAP No. 68 Revisions:**

9. Positive goodwill recorded under the statutory purchase method of accounting shall be admitted subject to the following limitation: Positive goodwill from all sources, including life, accident and health, and deposit-type assumption reinsurance and goodwill resulting from the acquisition of an SCA by the insurance reporting entity that is reported on the SCA’s financial statements (resulting from the application of pushdown accounting), is limited in the aggregate to 10% of the acquiring\(^6\) entity’s capital and surplus as required to be shown on the statutory balance sheet of the reporting entity for its most recently filed statement with the domiciliary state commissioner adjusted to exclude any net positive goodwill, EDP equipment and operating system software, and net deferred tax assets. Additionally, all positive goodwill shall be nonadmitted when the underlying investment in the SCA or partnership, joint venture and limited liability company is nonadmitted\(^7\). When negative goodwill exists, it shall be recorded as a contra-asset.

10. Positive or negative goodwill resulting from the purchase of an SCA, joint venture, partnership or limited liability company shall be amortized to unrealized capital gains and losses on investments over the period in which the acquiring entity benefits economically, not to exceed 10 years. Positive or negative goodwill resulting from life, accident and health, and deposit-type assumption reinsurance shall be amortized to operations as a component of general insurance expenses over the period in which the

\(^4\) The “acquiring” entity is intended to reflect the insurance reporting entity that reports the investment resulting in goodwill. The goodwill limitation test shall be completed at the individual reporting company level.

\(^5\) This includes, but is not limited to, situations in which the investment is nonadmitted as the audited financial statements for the SCA, joint venture, partnership or limited liability company includes substantial doubt on the entity’s ability to continue as a going concern, or on the basis/contents of the audit opinion pursuant to paragraph 20 of SSAP No. 97.

\(^6\) The “acquiring” entity is intended to reflect the insurance reporting entity that reports the investment resulting in goodwill. The goodwill limitation test shall be completed at the individual reporting company level.

\(^7\) This includes, but is not limited to, situations in which the investment is nonadmitted as the audited financial statements for the SCA, joint venture, partnership or limited liability company includes substantial doubt on the entity’s ability to continue as a going concern, or on the basis/contents of the audit opinion pursuant to paragraph 20 of SSAP No. 97.
assuming entity benefits economically, not to exceed 10 years. Goodwill shall be evaluated separately for each transaction.\((\text{INT \ 01-18})\)

(Remaining paragraphs will be renumbered accordingly.)

**Dec. 7 - Re-Exposure of the Agenda Item Requests Comments and Examples on the Following Options:**

1) **Complete rejection of pushdown accounting.** As pushdown is now an election for SEC / U.S. GAAP filers, reporting entities can avoid use of pushdown if prohibited for statutory accounting. (NAIC staff would propose a prospective effective date if electing this option to avoid restatement of those entities that have previously elected pushdown.)

2) **Permission to use pushdown for all non-insurance entities.** This option would increase optionality into the statutory financial statements. If permitted, this approach would result in different SCA values and goodwill calculations for those that follow the guidance in SSAP No. 68 and those that utilize pushdown. Under SSAP No. 68, acquired SCAs do not write-up their assets or liabilities to fair value and goodwill is calculated as the difference between purchase price and book value. Under U.S. GAAP pushdown, acquired SCAs write-up their assets and liabilities to fair value, and goodwill is calculated as the difference between the purchase price and the fair value of the acquired entity. With pushdown, the goodwill is reported at the SCA level. As such, goodwill will be an indefinite asset unless it is identified as impaired. (Under U.S. GAAP, private entities and not-for-profit entities can elect to amortize goodwill over a 10-year period, but this is not an election for public entities.) (This option would not permit pushdown for insurance SCAs (8.b.i entities).

   (If this option is considered, NAIC staff would propose restrictions on the use of pushdown that differ from U.S. GAAP. For example, under U.S. GAAP, a reporting entity could subsequent elect pushdown accounting in any reporting period after original acquisition. If pushdown was permitted, NAIC staff would propose to require the election at original acquisition and not allow subsequent elections.)

3) **Permit pushdown if elected by SEC Registrants, excluding non-insurance entities.** Although this option would introduce different accounting by type of reporting entity, it is consistent with when pushdown would have been applied under prior statutory accounting guidance. (Under the old SEC provisions, pushdown was only permitted when meeting certain SEC requirements.) This would seemingly allow the companies that have historically utilized pushdown under the SEC rules to continue acquisitions under that prior approach. (Also, NAIC staff would propose restrictions to the provisions to ensure the election is made at the time of original acquisition.) (This option would not permit pushdown for insurance SCAs (8.b.i entities).
The Blanks (E) Working Group of the Accounting Practices and Procedures (E) Task Force met via conference call Oct. 22, 2019. The following Working Group members participated: Jake Garn, Chair (UT); Kim Hudson, Vice Chair (CA); Michael Estabrook (CT); N. Kevin Brown (DC); Adrienne Lupo (DE); Carolyn Morgan, Jason Reynolds and Robert Ridenour (FL); Daniel Mathis (IA); Roy Eft (IN); Dan Schaefer (MI); Debbie Doggett (MO); Lindsay Crawford (NE); Patricia Gosselin (NH); Amal Mechaiel (NJ); Dale Bruggeman and Tracy Snow (OH); Joel Sander (OK); Greg Lathrop (OR); Joe DiMemmo (PA); Hui Wattanaskolpant (TN); Shawn Frederick (TX); Steve Drutz and Patrick McNaughton (WA); Randy Milquet (WI); and Justin Parr (WV).

1. **Adopted its Sept. 5 and Aug. 20 Minutes**

The Working Group conducted an e-vote that concluded Sept. 5 to expose proposal 2019-24BWG, which requests the addition of a life experience data conduct to the electronic Jurat page for life/fraternal company filers only with an effective date for first quarter 2020. During its Aug. 20 meeting, the Working Group took the following action: 1) adopted its July 2 and June 24 minutes; 2) adopted items previously exposed; 3) discussed its procedures; 4) exposed three new items for public comment; and 5) adopted the editorial listing.

Mr. Hudson made a motion, seconded by Mr. Drutz, to adopt the Working Group’s Sept. 5 (Attachment Two-A) and Aug. 20 (Attachment Two-B) minutes. The motion passed unanimously.

2. **Adopted Items Previously Exposed**

   a. **For Note 33, Modify the Illustrations to Disclosure Individually Separate Account with Guarantees Products and Separate Account Nonguaranteed Products (2019-21BWG) Effective 12/31/2020**

   Mr. Garn stated that this proposal breaks out the separate accounts disclosure and related illustration in Note 33 to show the Separate Account with Guarantees products and Separate Account Nonguaranteed products separately. He indicated that there were no interested party comments on this proposal.

   Ms. Crawford made a motion, seconded by Mr. Drutz, to adopt the proposal (Attachment Two-C). The motion passed unanimously.

   b. **Add a Question Regarding the Executive Summary of the PBR Actuarial Opinion to the Supplemental Exhibits and Schedules Interrogatories (2019-22BWG) Effective 12/31/2020**

   Jennifer Frasier (NAIC) stated that this proposal is sponsored by the Life Actuarial (A) Task Force, with an annual 2020 effective date. It adds a question to the Supplemental Exhibits and Schedules Interrogatories asking if the Executive Summary of the PBR Actuarial Report would be filed with the state of domicile by April 1.

   Mr. Hudson made a motion, seconded by Ms. Gosselin, to adopt the proposal (Attachment Two-D). The motion passed unanimously.

   c. **Modify the Instructions and Illustration for Note 8 – Derivatives for Disclosures Adopted by SSAP No. 108. Add Instructions and a Blanks Page for Schedule DB, Part E, to the Quarterly Statement (2019-23BWG) Effective 1/1/2020**

   Mr. Bruggeman stated that this proposal pertains to *Statement of Statutory Accounting Principles (SSAP) No. 108—Derivatives Hedging Variable Annuity Guarantees*. When the annual proposal was adopted in June with proposal 2019-14BWG, the quarterly disclosure was not included. At the Summer National Meeting, it was noted, and the interested parties agreed, that the intent of the Statutory Accounting Principles (E) Working Group change was to capture a quarterly disclosure as well. This agenda item, which was exposed in August, adds that quarterly 2020 disclosure. There was a minor column reference modification, which should be included as a friendly amendment.
Mr. Bruggeman made a motion, seconded by Ms. Gosselin, to adopt the proposal, including the column reference modification as a friendly amendment (Attachment Two-E). The motion passed unanimously.

d. Add a Life Experience Data Contact to the Electronic Jurat Page for Life/Fraternal Companies Only. Health, Property and Title are Included in the Proposal Due to the Jurat Instructions Being Uniform for all Statement Types (2019-24BWG) Effective 1/1/2020

Ms. Frasier stated that the purpose of this proposal is that under the Standard Valuation Law (#820) and supporting Valuation Manual included in each state’s laws, the NAIC serves as the data collection agent for various studies of data (e.g., mortality experience data). NAIC staff need a contact person from each legal entity life insurance company to facilitate communication regarding these data studies and submission of the data to the NAIC. This company contact should be filed in the electronic-only Jurat and will not be included on the hard copy/portable document format (PDF) Jurat. Interested parties had no comments other than the timing of the request.

Mr. Hudson made a motion, seconded by Mr. Milquet, to adopt the proposal (Attachment Two-F). The motion passed unanimously.

3. Exposed its Procedures

Mr. Garn stated the there are several pending issues with regards to the Blanks (E) Working Group procedures. He stated that there has been discussion with the software vendors regarding the changes within the Blanks (E) Working Group procedures document. He stated that during the discussions, for the most part, the vendor software representatives were in favor of the changes. John Bauer (Prudential Financial) stated that while interested parties are in favor of the need for the procedure changes, they would like additional time to review the time frames. He indicated that interested parties would prefer to hold one in-person meeting at one of the NAIC national meetings and to incorporate that language within the procedures document. Connie Woodroof (Sapiens) indicated that while she agrees with the proposed time frames, she wants to encourage state insurance regulators and interested parties to have proposals and comments in early. This way, the proposals should be able to be processed within the given time frames and not have so many last-minute issues. She encouraged everyone to follow related working group and task force projects to be informed of possible impacts to the blanks and instructions. These issues could then be discussed during a Blanks (E) Working Group meeting to get a head start on the issues where possible.

Ms. Caswell confirmed that approval had been obtained to allow the Blanks (E) Working Group time on the 2020 NAIC Spring National Meeting agenda. She also suggested a minor revision to the current edited version of the procedures. The “parent groups” should be defined to include groups above the Blanks (E) Working Group in the statutory hierarchy. This would include the Statutory Accounting Principles (E) Working Group. With the significant amount of changes from the previous exposure, Mr. Garn indicated that there should be another 30-day exposure period to receive comments.

Mr. Drutz made a motion, seconded by Mr. Lathrop, to expose the procedures for a public comment period ending Nov. 22. The motion passed unanimously.

4. Exposed New Items

Mr. Snow stated that this proposal modifies the instructions for column 10 in the Property Schedule F, Part 3, Ceded Reinsurance, and Schedule F Part 2 in the Life/Fraternal statement removing the “exclude” instructions for adjusting other reserves from that column. The proposal adds instructions to include the defense and cost containment reserves in column 10. It adds a new instruction for column 12 for each of those schedules for the “IBNR LAE Reserves” column to include defense and cost containment and adjusting and other expenses consistent with that reported in Schedule P, Part 1.

Mr. Hudson made a motion, seconded by Ms. Crawford, to expose the proposal for a public comment period ending Nov. 22. The motion passed unanimously.

Mr. Garn stated that this proposal adds instructions and crosschecks for line 34 on the Analysis of Operations by Lines of Business – Summary. It adds instructions for column 5, Indexed Life on the Analysis of Operations by Lines of Business for individual life. It adds clarifying instructions to the Analysis of Operations by Lines of Business for individual life and group life indicating that the reporting should be consistent with policy-type language in the contract and reporting of policies issued with secondary guarantees that have expired. He stated that this proposal is to be effective with the annual 2020 filing. There is a guidance document with this language being presented at this meeting, for posting to the NAIC web page to assist companies in reporting the annual 2019 filing.

Ms. Crawford made a motion, seconded by Ms. Gosselin, to expose the proposal for a public comment period ending Nov. 22. The motion passed unanimously.

c. **Remove the Alphabetic Index from Inclusion at the Back of the Annual Statement Blank, Instructions and Blanks (E) Working Group Web page (2019-27BWG)**

Mr. Hudson stated that this proposal requests the removal of the alphabetic index from inclusion at the back of the annual statement blank, instructions and the Blanks (E) Working Group web page. Most people now either use the bookmarks in the PDF, the search features in the PDFs, or the table of contents in the front of the blank. Therefore, the alphabetical index is no longer needed.

Mr. Hudson made a motion, seconded by Mr. Drutz, to expose the proposal for a public comment period ending Nov. 22. The motion passed unanimously.

5. **Adopted the Editorial Listing**

Mr. Hudson made a motion, seconded by Mr. Milquet, to adopt the editorial listing (Attachment Two-G). The motion passed unanimously.

6. **Reviewed the State Filing Checklists**

Mr. Garn asked the Working Group members and interested parties if there were any issues detected upon review of the State Filing Checklists. Receiving no comments, the members approved the checklists and directed NAIC staff to proceed with posting to the appropriate NAIC web page.

7. **Approved Guidance**

Mr. Garn asked the Working Group members and interested parties if there were any issues identified with the Analysis of Operations by Lines of Business 2019 instructional clarification guidance document. Receiving no comments, the members approved the guidance document for posting to the Blanks (E) Working Group web page.

8. **Discussed Life/Fraternal Blank Statement Cover**

Bill Tank (Tank Consulting) asked for clarification as to whether the brown cover would still be used for the fraternal companies filing on the life blank or if they would instead use the blue cover. Ms. Caswell indicated that if both colors cannot appear on the cover, the blue cover should be used by the licensed life filers, and the brown cover should still be used by the licensed fraternal filers that are using the life blank. The reason for retaining the color system is for situations where a state law or regulation might refer to a particular blank color in place of the statement title. The NAIC uses both colors on its blanks and instructions publications.
9. **Discussed Other Matters**

Mr. Garn asked the Working Group members and industry to be mindful of other groups’ work that might affect the annual or quarterly statement blank. As the members or interested parties become aware of potential impacts, those could be reviewed or discussed during future meetings. This could help members and industry prepare for expansive changes, participate in the process and allow more time for vetting of the issue.

Having no further business, the Blanks (E) Working Group adjourned.

w:\national meetings\2019\fall\tf\app\blanks\minutes\att two bwg 10.22.2019.docx
The Blanks (E) Working Group of the Accounting Practices and Procedures (E) Task Force concluded an e-vote on Sept. 5, 2019. The following Working Group members participated: Jake Garn, Chair (UT); Kim Hudson, Vice Chair (CA); Jeffery Bethel (AK); William Arfanis (CT); N. Kevin Brown (DC); Dave Lonchar (DE); Daniel Mathis (IA); Roy Eft (IN); Dan Schaefer (MI); Debbie Doggett (MO); Lindsay Crawford (NE); Steve Kerner (NJ); Tracy Snow (OH); Joel Sander (OK); Ryan Keeling, (OR); Joe DiMemmo (PA); Trey Hancock (TN); Shawn Frederick (TX); Steve Drutz (WA); Jamie Taylor (WV); and Randy Milquet (WI).

1. Exposed Proposal 2019-24BWG

The Working Group conducted an e-vote to consider exposure of proposal 2019-24BWG sponsored by Mike Boerner (TX) as Chair of the Life Actuarial (A) Task Force with an effective date of first quarter 2020. The proposal proposes the addition of a life experience data contact to the electronic Jurat page for life/fraternal company filers only. Health, Property and Title are included in the proposal due to the Jurat instructions being uniform for all statement types. Under the Standard Valuation Law (SVL) and supporting Valuation Manual (VM) included in each state’s laws, NAIC serves as the data collection agent for various studies of data (e.g., mortality experience data). The purpose of this proposal is to allow NAIC staff and regulators to more easily locate a contact person from each legal entity life insurance company to facilitate communication regarding these data studies and submission of the data to the NAIC.

Mr. DiMemmo made a motion, seconded by Mr. Eft, to expose proposal 2019-24BWG for a public comment period ending Oct. 8. The motion passed unanimously by two-thirds of the members present in accordance with the Working Group procedures.

Having no further business, the Blanks (E) Working Group adjourned.
The Blanks (E) Working Group of the Accounting Practices and Procedures (E) Task Force met via conference call Aug. 20, 2019. The following Working Group members participated: Jake Garn, Chair (UT); Kim Hudson, Vice Chair, and Susan Bernard (CA); William Arfanis and Wanchin Chou (CT); N. Kevin Brown (DC); Ryllyn Brown and Tom Hudson (DE); Virginia Christy and Carolyn Morgan (FL); Daniel Mathis (IA); Roy Eft (IN); Dan Schaefer (MI); Julie Lederer (MO); Lindsay Crawford and Justin Schrader (NE); Doug Bartlett and Patricia Gosselin (NH); John Sirovetz (NJ); Dale Bruggeman and Tracy Snow (OH); Joel Sander (OK); Greg Lathrop (OR); Joe DiMemmo (PA); Trey Hancock (TN); Mike Boerner and Shawn Frederick (TX); Steve Drutz (WA); Jerry DeArmond and Randy Milquet (WI); and Jamie Taylor (WV). Also participating were: Rich Piazza (LA); and Stacey Alden and Karen Ducharme (VT).

1. **Adopted its July 2 and June 24 Minutes**

The Working Group conducted an e-vote that concluded July 2 to expose proposal 2019-20BWG sponsored by the Executive (EX) Committee and Casualty Actuarial and Statistical (E) Task Force. The proposal requests changes to the Property and Casualty Actuarial Opinion that the Committee adopted on June 25. The Working Group also met June 24 to: 1) adopt 17 proposals exposed during the Spring National Meeting; expose two new proposals; and 3) adopt the editorial listing. The exposed proposals include requested disclosure changes or reporting clarifications sponsored by the Statutory Accounting Principles (E) Working Group; changes to the investment schedules reporting on behalf of the Valuation of Securities (E) Task Force; and reporting clarifications within the VM-20 Supplement and the life blank Analysis of Operations by Lines of Business.

Mr. Sirovetz made a motion, seconded by Ms. Gosselin, to adopt the Working Group’s July 2 and June 24 minutes (see NAIC Proceedings – Summer 2019, Accounting Practices and Procedures (E) Task Force, Attachment Two and Attachment Three). The motion passed unanimously.

2. **Adopted Items Previously Exposed**

   a. **Add an NAIC Designation Modifier to the NAIC Designation Column for Schedule D, DL and BA to Accommodate the NAIC Designation Category Granularity Framework Adopted by the Valuation of Securities (E) Task Force (2019-18BWG) Effective 12/31/2020**

Mr. Garn stated that this proposal is sponsored by the Valuations of Securities (E) Task Force. It adds an NAIC designation modifier to the NAIC Designation Column for Schedule D, Schedule DL, and Schedule BA to accommodate the NAIC designation category granularity framework. He stated that there have been several modifications to the proposal received during the comment period. One additional comment received was to change the effective date from first quarter 2020 to annual 2020. A contingency may be with regards to the elimination of the residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS) price points to allow the Structured Securities Group (SSG) to produce the designation.

John Bauer (Prudential Financial) stated that interested parties agree with the change to the effective date to annual 2020. He stated that there is a lot of work for vendors in setting up their systems for these new designation modifiers. He stated that there is ongoing work for annual 2019 related to specific designations including the “YE” and “IF” and the removal of the preferred stock prefixes, as well as removal of the market indicators. He stated that interested parties will need to work with the Securities Valuation Office (SVO) staff to be sure that the specifications for the RMBS and CMBS price points are completed by mid-year 2020.

Mr. Hudson made a motion, seconded by Mr. Sirovetz, to adopt the modifications to the proposal, including the effective date of annual 2020. The motion passed unanimously. Mr. Hudson made a motion, seconded by Mr. Arfanis to adopt the modified proposal (Attachment Two-B1). The motion passed unanimously.

   b. **Add a New Category Line for Unaffiliated Certificates of Deposit to Schedules D, DL and E. Add a Line to the Summary Investment Schedule for Unaffiliated Certificates of Deposit. Modify the List of Bonds for Lines 8 Through**
Mary Caswell (NAIC) stated that this proposed change requested by NAIC staff was intended to eliminate validation failures as it relates to unaffiliated certificates of deposit. The proposal adds a new line category for the unaffiliated certificates of deposit to the investment schedules, as well as to the Summary Investment Schedule. The proposal modifies the list of bonds for the respective lines of the Summary by Country to include unaffiliated certificates of deposit. She stated that this additional breakout would help state insurance regulators better identify the unaffiliated certificates of deposit. She stated that instructions would also need to be added to zero fill the Committee on Uniform Security Identification Procedures (CUSIP) and Identification Securities Identification Numbers (ISIN) columns for unaffiliated certificates of deposit.

Mr. Garn stated that based on comments received from interested parties, the Working Group may want to consider the withdrawal of this proposal and a resubmission of a more expansive proposal to include the bigger issue of line number changes. Mr. Bauer stated that this change would require extensive revisions to create the separate recording for unaffiliated certificates of deposit. He stated that interested parties are not sure that there are a lot of these holdings to justify the breakout. He suggested adding a new code to the code column to identify these investments. Mr. Garn stated that the expansion of the line numbering will need to be addressed in the future, similar to the changes for the Schedule DBs, to accommodate the growing number of securities.

Mr. Hudson stated that he is supportive of the withdrawal to give interested parties and NAIC staff additional time to address this issue as, well as the line numbering issue, and resubmit as a new proposal.

Mr. Hudson made a motion, seconded by Mr. Milquet to withdraw the proposal. The motion passed unanimously.

c. Add “Qualification Documentation” to Require the Appointed Actuary to Maintain Workpapers Explaining How the Actuary Meets the Definition of a “Qualified Actuary.” Add a New Objective Definition of “Qualified Actuary” and the Results of an Assessment of Actuarial Educational Syllabi in an “NAIC-Accepted Actuarial Designation” Section (2019-20BWG) Effective 12/31/2019

Mr. Piazza stated that he has served as chair of the Casualty Actuarial and Statistical (C) Task Force for the past seven years and as the vice chair for three years. The role of the appointed actuary is one of the most important roles actuaries serve, in the eyes of state insurance regulators. State insurance regulators review reserve accuracy and company solvency to protect the interest of their states’ consumers and rely heavily on the information contained in the Actuarial Opinion. He stated that this proposal is intended to change the Property and Casualty Actuarial Opinion instructions specifically in the qualification area to include the Society of Actuaries (SOA) general insurance track, as well as the Casualty Actuarial Society (CAS) designations as being qualified for the role of appointed actuary.

Mr. Piazza stated that this proposal has a long history, starting more than seven years ago with the Casualty Actuarial and Statistical (C) Task Force. The Task Force has worked non-stop on the underlying project to include the SOA designation, as well as CAS, since 2012/2013. In the last two years, the Executive (EX) Committee has taken a role in reviewing this proposal. The Task Force was asked to evaluate the SOA educational track to determine if it is acceptable by state insurance regulators for the appointed actuaries, just like the American Academy of Actuaries (Academy) membership is acceptable. Both organizations (SOA and CAS) have been educating, testing and credentialing actuaries for decades, if not a century each. Mr. Piazza stated that both are good at what they do for the education of the actuary profession. When the Task Force was asked if the SOA met the minimum requirements, there was some reluctance from the actuarial organizations to take a direct role in this project. The Academy was asked and refused to take on this project. It did say it would cooperate in changing its qualification requirements to comply with any revised instructions inserted into the NAIC Property and Casualty Actuarial Opinion instructions. The Executive (EX) Committee asked the Task Force to look at this issue and decide whether the SOA should be included in the acceptable designation.

Mr. Piazza stated that the Casualty Actuarial and Statistical (C) Task Force was divided in how to approach this charge. There were at least three different options: 1) do nothing; 2) reevaluate the situation in five or more years; and 3) accept the SOA general insurance definition. He stated that the Task Force sought help to review this and approached the Property and Casualty Insurance (C) Committee, which agreed with getting an independent company to help pursue this review in an independent, unbiased manner. The Executive (EX) Committee funded a project to obtain an independent consultant to create an objective way to evaluate the new actuarial tract—the SOA education track. This was intended to be used by state insurance regulators
Mr. Piazza stated that there were more than 30 subject matter experts (SMEs) involved in the project, nominated by the three major actuarial organizations, to provide information to the consultants and work with them throughout the entire process. The consultant group conducted a job analysis and performed analysis of the examination syllabi of the actual organization. It did a comparison of the knowledge and educational materials for the actuary to see if it was in the syllabi of the other actuarial originsations. This proposal defines the qualified actuary for both the SOA and the CAS and establishes basic educational requirements for the appointed actuary to be qualified per the instructions. The instructions have been vetted many times since the start of this project, and in the last 18 months, there were four separate exposures and one hearing on this issue. The proposal was discussed by the state insurance department commissioners at various levels in the last 18 months. Mr. Piazza stated that this was a large, multi-faceted and open effort to get to this proposal. This proposal follows the charge given to the Casualty Actuarial and Statistical (C) Task Force to define the qualified actuary objectively and to include the SOA if he or she met basic education expectations of the NAIC.

Mr. Garn stated that based on the passed precedents of the Blanks (E) Working Group, it does not appear as though this is the appropriate level to decide policy issues. When the Working Group has received proposals from the Statutory Accounting Principles (E) Working Group, the Valuation of Securities (E) Task Force, the Capital Adequacy (E) Task Force or similar groups, the Working Group will defer on the policy matter that has already been vetted to the groups presenting the proposal. He stated that he would be uncomfortable making any substantive changes to the language in the proposal. He recommended that for those who feel there is still some needed policy language change, that should be taken up with the policy-making group as a new requirement. He stated that any outstanding policy issue could also be taken up by the Accounting Practices and Procedures (E) Task Force or the Financial Condition (E) Committee as the proposal moves through the process.

Ralph Blanchard (Travelers) stated that the Casualty Actuarial and Statistical (C) Task Force was in agreement that the “exception” language within the instructions should revert back to the old language where the exception was available to a member of the Academy only, rather than to any person submitting a request to the Academy. Mr. Blanchard stated that he is a dues-paying member of the Academy and has seen court cases in the past where people sue the Academy. In these cases, frequently one of the actual protections for the professional organizations is whether the person suing is a member of the organization or not. By being a voluntary member of that organization, the member will have to agree to some of the criteria and rules of that organization. As it is currently stated, the actuary could apply through the Academy as a non-member, in which case, if the Academy refuses to hear or evaluate him or her, the Academy could be sued for anti-trust. If the actuary is a member, the Academy would have that protection. He stated that it does not make sense to remove the Academy membership in the wording.

Craig Hanna (Academy) stated that the Academy would not consider any application from a non-member. He stated that reverting the language back to what Mr. Blanchard suggested would be appropriate. Mr. Chou stated that since 2012, the Blanks (E) Working Group has been trying to merge the SOA and CAS, which has caused a lot of the dispute even up to 2019. One of the issues is the Academy membership and how that is treated in the life and health blanks.

Connie Woodroof (Sapiens) stated that there is an electronic data capture element to be added within this proposal that has an effective date of annual 2019, and vendor testing begins in September.

Mr. Garn stated that the Blanks (E) Working Group is not the appropriate entity to make policy decision changes. Mr. Chou stated that he would recommend the motion be withdrawn until there is further discussion. Mr. Frederick seconded the motion. Kay Noonan (NAIC) questioned whether a motion to withdraw would substitute for the original motion. The motion to adopt was considered first to account for any opposition to warrant consideration of a withdrawal motion. Ms. Noonan stated that the Academy membership issue does not affect the overall proposal. She suggested considering the proposal for adoption to include the SOA and taking the Academy membership issue back up with the Casualty Actuarial and Statistical (C) Task Force as a separate issue.

Mr. Piazza stated that the Casualty Actuarial and Statistical (C) Task Force reviews the instructions every year for any needed changes. He stated that the Task Force can review and amend Academy membership issues in the future if so desired. He stated that the framework being discussed with this proposal to add the SOA is recognized as being qualified, well done and objective principles-based and should be adopted as written. Mr. Garn stated that a “no” vote on the primary motion would effectively be a vote to withdraw. Therefore, he called for a vote on the primary motion.
Ann Weber (SOA) stated that there has been a lot of work performed by the 30 volunteers, the Casualty Actuarial and Statistical (C) Task Force, the state insurance department commissioner oversee group, the Executive (EX) Committee, and the Property and Casualty Insurance (C) Committee. She stated that this has been a long and arduous process. There is a subjective, analytical process to review the knowledge basis and educational programs of the CAS and SOA, which has been approved by the Executive (EX) Committee.

Mr. Hudson made a motion, seconded by Mr. Sander, to adopt the proposal (see NAIC Proceedings – Fall 2019, Accounting Practices and Procedures (E) Task Force, Attachment Three-A). The motion passed by roll call vote, with Connecticut, Missouri, Nebraska and Texas dissenting and Ohio abstaining.

3. Discussed the Blanks (E) Working Group Procedures

Mr. Garn stated that there are several pending issues with regards to the Blanks (E) Working Group procedures. He suggested that this issue be deferred to create additional time to address those issues and then discuss the changes during the next Working Group conference call.

Mr. Hudson made a motion, seconded by Mr. Drutz, to defer discussion on the procedures. The motion passed unanimously.

4. Exposed New Items for Public Comment

a. For Note 33, Modify the Illustration to Disclosure Individually Separate Account with Guarantees Products and Separate Account Nonguaranteed Products (2019-21BWG)

Mr. Schrader stated that this proposal is a data-capture item for Note 33 to modify the illustration to disclosure individually the Separate Account with Guarantees products and Separate Account Nonguaranteed products.

Mr. Hudson made a motion, seconded by Mr. Sirovetz, to expose the proposal for a 45-day public comment period ending Oct. 8. The motion passed unanimously.

b. Add a Question Regarding the Executive Summary of the PBR Actuarial Opinion to the Supplemental Exhibits and Schedules Interrogatories (2019-22BWG)

Jennifer Frasier (NAIC) stated that this is a proposal sponsored by the Life Actuarial (A) Task Force to add a question regarding the Executive Summary of the PBR Actuarial Opinion to the Supplemental Exhibits and Schedules Interrogatories.

Mr. Arfanis made a motion, seconded by Mr. Eft, to expose the proposal for a 45-day public comment period ending Oct. 8. The motion passed unanimously.

c. Modify the Instructions and Illustration for Note 8 – Derivatives for Disclosures Adopted by SSAP No. 108. Add Instruction and Blank Page for Schedule DB, Part E, to the Quarterly Statement (2019-23BWG)

Mr. Bruggeman stated that this proposal pertains to Statement of Statutory Accounting Principles (SSAP) No. 108—Derivative Hedging Variable Annuity Guarantees. He stated that when the annual proposal was adopted in June with proposal 2019-14BWG, the quarterly disclosure was not included. He stated that interested parties agreed that the intent of the Statutory Accounting Principles (E) Working Group change was to capture a quarterly disclosure as well. This agenda item adds that quarterly 2020 disclosure.

Mr. Bruggeman made a motion, seconded by Ms. Gosselin, to expose the proposal for a 45-day public comment period ending Oct. 8. The motion passed unanimously.

5. Adopted the Editorial Listing

Mr. Hudson made a motion, seconded by Mr. Sirovetz, to adopt the editorial listing (Attachment Two-B2). The motion passed unanimously.

Having no further business, the Blanks (E) Working Group adjourned.

### NAIC STAFF COMMENTS

Comment on Effective Reporting Date: ________________________________

Other Comments:

This proposal assumes the adoption of 2019-03BWG adding NAIC Designation Column to Schedule D, Part 2, Section 2. It does not assume adoption of 2019-04BWG as a result some of the language for Schedule BA will need to be adjusted to reflect those changes if adopted.

** This section must be completed on all forms. Revised 7/18/2018
REASON, JUSTIFICATION FOR AND/OR BENEFIT OF CHANGE**

The Valuation of Securities (E) Task Force (“VOS TF”) adopted on June 11, 2018 a more granular NAIC Designation Category framework. The new NAIC Designation Category applies wherever an NAIC Designation is reported and produced by the SVO, independently or based on CRP credit ratings for filing exempt and PL securities as well as those assigned to RMBS and CMBS based on financial modelling by the SSG. Upon the determination of an NAIC Designation, the SVO or SSG will produce NAIC Designation Categories which are a subset of each NAIC Designation.

NAIC Designation Category means and refers to 20 more granular delineations of credit risk in the NAIC 1 through NAIC 6 credit risk scale used by the VOS/TF to relate credit risk in insurer owned securities. This granular level of credit risk can be used by the NAIC Capital Adequacy (E) Task Force to assign granular risk-based capital factors when they are adopted. In the meantime, this additional level of credit risk provides NAIC members additional insight into the risk of insurer investments. Each delineation of credit risk is represented by a letter, an NAIC Designation Modifier, which modifies the NAIC Designation grade to indicate a more granular measure of credit risk within the NAIC Designation grade. The more granular delineations of credit risk are called an NAIC Designation Category, a combination of the NAIC Designation and NAIC Designation Modifier, and are distributed as follows: 7 for the NAIC 1 Designation grade indicated by the letters A through G; 3 delineations each for each of the NAIC Designation grades NAIC 2, NAIC 3, NAIC 4 and NAIC 5 indicated by the letters A, B and C and 1 delineation for NAIC Designation grade NAIC 6 with no NAIC Designation Modifier. All NAIC Designation Modifiers roll up into the respective NAIC Designation grade as they are a subset of them.

IDENTIFICATION OF ITEM(S) TO CHANGE

2020 Quarterly Statement:

Instructions:

Schedule D, Part 3  
Add reference to NAIC Designation Modifier in Description of Column 10  
Add instruction for NAIC Designation Modifier for the column  
Add clarification indicating that the column will be three sub-columns in data table  
Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.

Schedule D, Part 4  
Add reference to NAIC Designation Modifier in Description of Column 22  
Add instruction for NAIC Designation Modifier for the column  
Add clarification indicating that the column will be three sub-columns in data table  
Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.

Schedule DL, Part 1  
Add reference to NAIC Designation Modifier in Description of Column 4  
Add reference as to where to find instructions for determining NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol for Schedule DA, Part 1 and Schedule E, Part 2 investments  
Add clarification column will be three sub-columns in data table

Schedule DL, Part 2  
Add reference to NAIC Designation Modifier in Description of Column 4  
Add reference as to where to find instructions for determining NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol for Schedule DA, Part 1 and Schedule E, Part 2 investments  
Add clarification indicating that the column will be three sub-columns in data table
| Schedule BA, Part 2 | Add reference to NAIC Designation Modifier in Description of Column 6  
|                     | Add instruction for NAIC Designation Modifier for the column  
|                     | Add clarification indicating that the column will be three sub-columns in data table  
|                     | Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.  

**Blank:**

| Schedule D, Part 3 | Add reference to NAIC Designation Modifier in Description of Column 10  
| Schedule D, Part 4 | Add reference to NAIC Designation Modifier in Description of Column 22  
| Schedule DL, Part 1 | Add reference to NAIC Designation Modifier in Description of Column 4  
| Schedule DL, Part 2 | Add reference to NAIC Designation Modifier in Description of Column 4  
| Schedule BA, Part 2 | Add reference to NAIC Designation Modifier in Description of Column 6  

**2020 Annual Statement:**

**Instructions:**

| Schedule D, Part 1 | Add reference to NAIC Designation Modifier in Description of Column 6  
| Add instruction for NAIC Designation Modifier for the column  
| Add clarification indicating that the column will be three sub-columns in data table  
| Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.  
| Add instruction for the NAIC Designation Category footnote.  

| Schedule D, Part 2, Section 1 | Add reference to NAIC Designation Modifier in Description of Column 20  
| Add instruction for NAIC Designation Modifier for the column  
| Add clarification indicating that the column will be three sub-columns in data table  
| Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.  
| Add instruction for the NAIC Designation Category footnote.  

| Schedule D, Part 2, Section 2 | Add reference to NAIC Designation Modifier in Description of Column 18  
| Add instruction for NAIC Designation Modifier for the column  
| Add clarification indicating that the column will be three sub-columns in data table  
| Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.  
| Add instruction for the NAIC Designation Category footnote.  

| Schedule DL, Part 1 | Add reference to NAIC Designation Modifier in Description of Column 4  
| Add reference as to where to find instructions for determining NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol for Schedule DA, Part 1 and Schedule E, Part 2 investments  
| Add clarification indicating that the column will be three sub-columns in data table  

Schedule DL, Part 2  Add reference to NAIC Designation Modifier in Description of Column 4
Add reference as to where to find instructions for determining NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol for Schedule DA, Part 1 and Schedule E, Part 2 investments
Add clarification indicating that the column will be three sub-columns in data table

Schedule E, Part 2  Add electronic only Column 11 for Designation Category
Add instruction for NAIC Designation Equivalent for the column
Add instruction for NAIC Designation Modifier Equivalent for the column
Add clarification indicating that the column will be two sub-columns in data table
Provide list of valid NAIC Designation Equivalent and NAIC Designation Modifier Equivalent Combinations.
Add instruction for the NAIC Designation Category footnote.

Schedule DA, Part 1  Add electronic only Column 22 for Designation Category
Add instruction for NAIC Designation Equivalent for the column
Add instruction for NAIC Designation Modifier Equivalent for the column
Add clarification indicating that the column will be two sub-columns in data table
Provide list of valid NAIC Designation Equivalent and NAIC Designation Modifier Equivalent Combinations.
Add instruction for the NAIC Designation Category footnote.

Schedule BA, Part 2  Add reference to NAIC Designation Modifier in Description of Column 7
Add instruction for NAIC Designation Modifier for the column
Add clarification indicating that the column will be three sub-columns in data table
Provide list of valid NAIC Designation and NAIC Designation Modifier Combinations.
Add instruction for the NAIC Designation Category footnote.

Blank:

Schedule D, Part 1  Add reference to NAIC Designation Modifier in Description of Column 6
Add footnote to capture subtotal of B/ACV by NAIC Designation Category

Schedule D, Part 2, Section 1  Add reference to NAIC Designation Modifier in Description of Column 20
Add footnote to capture subtotal of B/ACV by NAIC Designation Category

Schedule D, Part 2, Section 2  Add reference to NAIC Designation Modifier in Description of Column 18
Add footnote to capture subtotal of B/ACV by NAIC Designation Category

Schedule DL, Part 1  Add reference to NAIC Designation Modifier in Description of Column 4
Add footnote to capture subtotal of B/ACV by NAIC Designation Category

QUARTERLY STATEMENT INSTRUCTIONS – LIFE/FRATERNAL, HEALTH, PROPERTY AND TITLE

SCHEDULE D – PART 3

LONG-TERM BONDS AND STOCKS ACQUIRED DURING THE CURRENT QUARTER

Detail Eliminated to Conserve Space

Column 10 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

Provide the appropriate combination of NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol (see below) at the end of the quarter for each security shown. The list of valid SVO Administrative Symbols is shown below.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

For Bond Mutual Funds – as Identified by the SVO, enter 1.

Exchange Traded Funds – as Identified by the SVO should be reported as perpetual securities.

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table.

- NAIC Designation Column 10A
- NAIC Designation Modifier Column 10B
- SVO Administrative Symbol Column 10C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

NAIC Designation Modifier:

The NAIC Designation Modifier should only be used for securities reported on the lines below if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

- Bonds Lines 0199999 through 658299999
- Preferred Stocks Line 8499999 and 8599999
- Common Stocks Line 9499999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.
**SVO Administrative Symbol:**

**Long Term Bond:**

Following are valid SVO Administrative Symbols for bonds. Refer to the P&P Manual for the application of these symbols.

SCHEDULE D – PART 4

LONG-TERM BONDS AND STOCKS SOLD, REDEEMED OR OTHERWISE DISPOSED OF DURING THE CURRENT QUARTER

Detail Eliminated to Conserve Space

Column 22 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

Provide the appropriate combination of the NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol (see below) at date of disposal for each security shown. The list of valid SVO Administrative Symbols is shown below.

Where multiple disposal transactions occurred for the same CUSIP, and those transactions are summarized on one line, enter the appropriate combination of NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol for the last disposal using the last available designation.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

For Bond Mutual Funds—as Identified by the SVO, enter 1.

Exchange Traded Funds—as Identified by the SVO should be reported as perpetual securities.

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed but will be three sub-columns in the data table:

- NAIC Designation Column 22A
- NAIC Designation Modifier Column 22B
- SVO Administrative Symbol Column 22C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

NAIC Designation Modifier:

The NAIC Designation Modifier should only be used for securities reported on the lines below if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

- Bonds Lines 0199999 through 658299999
- Preferred Stocks Line 8499999 and 8599999
- Common Stocks Line 9499999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.

SCHEDULE DL – PART 2

SECURITIES LENDING COLLATERAL ASSETS
Reinvested Collateral Assets Owned Current Statement Date
(Securities lending collateral assets included on Schedules A, B, BA, D, DB and E
and not reported in aggregate on Line 10 of the asset page.)

Detail Eliminated to Conserve Space

Column 4 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol reported for this column should be same for the security as reported in other schedules for the lines shown below:

Lines 0199999 through 7099999 .................. Schedule D, Part 1, Column 6
Lines 7199999 through 7399999 .................. Schedule D, Part 2, Section 1, Column 20
Lines 7499999 through 7999999 .................. Schedule D, Part 2, Section 2, Column 17
Line 8899999 ................................................ Schedule BA, Part 1, Column 7
Line 8899999 ................................................ Schedule BA, Part 1, Column 7
Line 8999999 ................................................ Schedule DA, Part 1, Column 22
Line 909199999 ............................................ Schedule E, Part 2, Column 11

For Lines 8699999, 8799999, 8999999, 9099999, 9199999 and 9299999, the column should be left blank.

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table.

- NAIC Designation Column 4A
- NAIC Designation Modifier Column 4B
- Administrative Symbol Column 4C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).
Column 6 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

This column must be completed for those investments included on Lines 0799999 and 1599999.

For Schedule BA investments with the underlying characteristics of a bond or a preferred stock instrument, insert the appropriate combination of the NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol. The list of valid SVO Administrative Symbols is shown below.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

The NAIC Designation, NAIC Designation Modifier and Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table:

- NAIC Designation Column 6A
- NAIC Designation Modifier Column 6B
- SVO Administrative Symbol Column 6C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

**NAIC Designation Modifier:**

The NAIC Designation Modifier should only be used for securities reported on the lines below if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

- Underlying Characteristics of Bonds Lines 0799999 through 0899999
- Underlying Characteristics of Preferred Stocks Line 1399999 through 1499999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.
SVO Administrative Symbol:

Following are valid SVO Administrative Symbols for bonds and preferred stock. Refer to the P&P Manual – Purposes and Procedures Manual of the NAIC Investment Analysis Office for the application of these symbols.

- S: Additional or other non-payment risk
- YE: Year-end carry over
- FE: Filing Exempt
- F: Sub-paragraph D Company – insurer self-designated

The NAIC designation NAIC Designation Modifier and SVO Administrative Symbol field should be left blank for those Schedule BA investments which have not been assigned an NAIC designation by the Securities Valuation Office (SVO) pursuant to the policies in the Purposes and Procedures Manual of the NAIC Investment Analysis Office.

The NAIC Designation Category is the combination of NAIC Designation and NAIC Designation Modifier. Valid combinations of NAIC Designation and NAIC Designation Modifier for NAIC Designation Category are shown below:

ANNUAL STATEMENT INSTRUCTIONS – LIFE/FRATERNAL, HEALTH, PROPERTY AND TITLE

SCHEDULE D – PART 1

LONG-TERM BONDS OWNED DECEMBER 31 OF CURRENT YEAR

Detail Eliminated to Conserve Space

Column 6 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

Provide the appropriate NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol combination for each security. The list of valid SVO Administrative Symbols is shown below.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table.

- NAIC Designation Column 6A
- NAIC Designation Modifier Column 6B
- SVO Administrative Symbol Column 6C

For Bond Mutual Funds – as Identified by the SVO, enter 1.

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

NAIC Designation Modifier:

The NAIC Designation Modifier should only be used for bonds eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.
SVO Administrative Symbol:

Following are valid SVO Administrative Symbols for bonds. Refer to the Purposes and Procedures Manual of the NAIC Investment Analysis Office for the application of these symbols.

- S Additional or other non-payment risk
- FE Filing Exempt
- FM Financially Modeled RMBS/CMBS subject to SSAP 43R
- AM Analytically Modeled subject to SSAP 43R
- YE Year-end carry over
- IF Initial filing
- PL Private Letter Rating
- PLGI Private Letter Rating – reported on General Interrogatory
- Z Insurer self-designated
- GI General Interrogatory
- F Sub-paragraph D Company – insurer self-designated
- * Limited to NAIC Designations 6

The NAIC Designation Category is the combination of NAIC Designation and NAIC Designation Modifier. Valid combinations of NAIC Designation and NAIC Designation Modifier for NAIC Designation Category are shown below:

<table>
<thead>
<tr>
<th>NAIC Designation</th>

NAIC Designation Category Footnote:

Provide the total book/adjusted carrying value amount by NAIC Designation Category that represents the amount reported in Column 11.

The sum of the amounts reported for each NAIC Designation Category in the footnote should equal Line 8399999.
Column 20  –  NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

Provide the appropriate combination of NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol for each security. The list of valid Administrative Symbols is shown below.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

Exchange Traded Funds should be reported as perpetual securities.

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table.

- NAIC Designation Column 20A
- NAIC Designation Modifier Column 20B
- SVO Administrative Symbol Column 20C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

Designation Modifier:

The NAIC Designation Modifier should only be used for securities reported on lines below if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

- Industrial and Miscellaneous (Unaffiliated) Perpetual Preferred  Line 8499999
- Industrial and Miscellaneous (Unaffiliated) Redeemable Preferred  Line 8599999

The NAIC Designation Modifier should be left blank for securities reported on lines below.

- Parent, Subsidiaries and Affiliates  Line 8699999
- Parent, Subsidiaries and Affiliates  Line 8799999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.
SVO Administrative Symbol:

Following are valid SVO Administrative Symbols for preferred stock. Refer to the P&P Manual Purposes and Procedures Manual of the NAIC Investment Analysis Office for the application of these symbols.

- S Additional or other non-payment risk assigned by the SVO or SSG
- FE Filing Exempt assigned by the SVO
- YE Year-end carry over assigned by the SVO
- IF Initial filing - insurer reported designation with Admin Symbol assigned by the SVO
- PL Private Letter Rating assigned by the SVO
- PLGI Private Letter Rating – insurer assigned and reported on General Interrogatory
- Z Insurer assigned and reported subject to limitation
- GI Insurer assigned and reported on General Interrogatory
- F Sub-paragraph D Company – insurer self-designated
* Limited to NAIC Designations 6 – insurer assigned

The NAIC Designation Category is the combination of NAIC Designation and NAIC Designation Modifier. Valid combinations of NAIC Designation and NAIC Designation Modifier for NAIC Designation Category are shown below:

<table>

Detail Eliminated to Conserve Space

NAIC Designation Category Footnote:

Provide the total book/adjusted carrying value amount by NAIC Designation Category that represents the amount reported in Column 8.

The sum of the amounts reported for each NAIC Designation Category in the footnote should equal the sum of Lines 8499999 and 8599999.
SCHEDULE D – PART 2 – SECTION 2

COMMON STOCKS OWNED DECEMBER 31 OF CURRENT YEAR

Detail Eliminated to Conserve Space

Column 18 – NAIC Designation, and NAIC Designation Modifier and SVO Administrative Symbol

For securities reported on Line 9499999 (Mutual Funds) provide the appropriate NAIC Designation (1 through 6), and NAIC Designation Modifier (A through G) and SVO Administrative Symbol combination as assigned by the Securities Valuation Office. For all other common stock the NAIC Designation and NAIC Designation Modifier administrative symbol field should be left blank.

The listing of valid NAIC Designations, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

The NAIC Designation and Designation Modifier will be shown as one column on the printed schedule but will be two sub-columns in the data table.

- NAIC Designation Column 18A
- NAIC Designation Modifier Column 18B
- SVO Administrative Symbol Column 18C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

NAIC Designation Modifier:

The NAIC Designation Modifier should only be used for securities reported on Line 9499999 (Mutual Funds) if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

The Designation Modifier should be left blank for securities reported on lines below.

- Industrial and Miscellaneous (Unaffiliated) Publicly Traded Line 9099999
- Industrial and Miscellaneous (Unaffiliated) Other Line 9199999
- Parent, Subsidiaries and Affiliates Publicly Traded Line 9299999
- Parent, Subsidiaries and Affiliates Other Line 9399999
- Unit Investment Trusts Line 9599999
- Closed-End Funds Line 9699999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.
SVO Administrative Symbol:

Following are valid SVO Administrative Symbols for common stock. Refer to the P&P Manual for the application of these symbols.

YE Year-end carry over

The NAIC Designation Category is the combination of NAIC Designation and NAIC Designation Modifier. Valid combinations of NAIC Designation and NAIC Designation Modifier for NAIC Designation Category are shown below:

Detail Eliminated to Conserve Space

NAIC Designation Category Footnote:

Provide the total book/adjusted carrying value amount by NAIC Designation Category that represents the amount reported in Column 6.

The sum of the amounts reported for each NAIC Designation Category in the footnote should equal Line 9499999.
SCHEDULE DL – PART 1

SECURITIES LENDING COLLATERAL ASSETS
Reinvested Collateral Assets Owned December 31 Current Year
(Securities lending collateral assets reported in aggregate on Line 10 of the asset page
and not included on Schedules A, B, BA, D, DB and E.)

Detail Eliminated to Conserve Space

Column 4 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol reported for
this column should be determined in a manner consistent with the instructions of other schedules for
the lines shown below:

- Lines 0199999 through 7099999 ................................ Schedule D, Part 1, Column 6
- Lines 7199999 through 7399999 ......................... Schedule D, Part 2, Section 1, Column 20
- Lines 7499999 through 7999999 ......................... Schedule D, Part 2, Section 2, Column 17
- Line 8899999 ............................................. Schedule BA, Part 1, Column 7
- Line 8999999 ............................................. Schedule DA, Part 1, Column 22
- Line 8999999 ............................................. Schedule E, Part 1, Column 11

For Lines 8699999, 8799999, 8899999, 8999999, 9099999, 9199999, 9299999, the column should be left
blank.

The NAIC Designation, Designation Modifier and SVO Administrative Symbol will be shown as one
column on the printed but will be three sub-columns in the data table.

- NAIC Designation Column 4A
- NAIC Designation Modifier Column 4B
- SVO Administrative Symbol Column 4C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation
and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the
SVO Administrative Symbol (e.g., “1.A YE”).

Detail Eliminated to Conserve Space

NAIC Designation Category Footnote:

Provide the total book/adjusted carrying value amount by NAIC Designation Category that represents the amount
reported in Column 6.
SCHEDULE DL – PART 2

SECURITIES LENDING COLLATERAL ASSETS
Reinvested Collateral Assets Owned December 31 Current Year
(Securities lending collateral assets included on Schedules A, B, BA, D, DB and E and not reported in aggregate on Line 10 of the asset page.)

<table>
<thead>
<tr>
<th>Column 4</th>
<th>NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol</th>
</tr>
</thead>
<tbody>
<tr>
<td>The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol reported for this column should be same for the security as reported in other schedules for the lines shown below:</td>
<td></td>
</tr>
<tr>
<td>Lines 0199999 through 7099999 ................................ Schedule D, Part 1, Column 6</td>
<td></td>
</tr>
<tr>
<td>Lines 7199999 through 7399999 ................................ Schedule D, Part 2, Section 1, Column 20</td>
<td></td>
</tr>
<tr>
<td>Lines 7499999 through 7999999 ................................ Schedule D, Part 2, Section 2, Column 17</td>
<td></td>
</tr>
<tr>
<td>Line 8899999 ................................................ Schedule BA, Part 1, Column 7</td>
<td></td>
</tr>
<tr>
<td>Line 8999999 ................................................ Schedule DA, Part 1, Column 22</td>
<td></td>
</tr>
<tr>
<td>Line 9099999 ................................................ Schedule E, Part 2, Column 11</td>
<td></td>
</tr>
</tbody>
</table>

For Lines 8699999, 8799999, 8999999, 9099999, 9199999 and 9299999, the column should be left blank.

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed but will be three sub-columns in the data table.

- **NAIC Designation** Column 4A
- **NAIC Designation Modifier** Column 4B
- **SVO Administrative Symbol** Column 4C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).
** SCHEDULE E – PART 2 – CASH EQUIVALENTS **

** Detail Eliminated to Conserve Space **

** Columns 10 and 11 will be electronic only. **

<table>
<thead>
<tr>
<th>Column 10</th>
<th>Legal Entity Identifier (LEI)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Provide the 20-character Legal Entity Identifier (LEI) for any issuer as assigned by a designated Local Operating Unit. If no LEI number has been assigned, leave blank.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Column 11</th>
<th>NAIC Designation Category</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Provide the appropriate combination of NAIC Designation Equivalent (1 through 6) and NAIC Designation Modifier Equivalent (A through G) (see table below) for each security shown.</td>
</tr>
</tbody>
</table>

** Exchange Traded Funds – as Identified by the SVO should be reported as perpetual securities. **

The NAIC Designation Category will be two sub-columns in the data table:

- **NAIC Designation Equivalent** Column 11A
- **NAIC Designation Modifier Equivalent** Column 11B

** NAIC Designation Equivalent:**

For the NAIC Designation Equivalent, use the NAIC Designation that would have been used for the investment had it been reported on Schedule D, Part 1 if available. If no NAIC Designation is available, the reporting entity should use a Designation Equivalent most closely resembles their credit risk the investment.

** NAIC Designation Modifier Equivalent:**

Bonds (Lines 0199999 through 6599999)

Use the NAIC Designation Modifier that would have been used for the investment had it been reported on Schedule D, Part 1 if available.

If no NAIC Designation Modifier is available, the reporting entity should use a Designation Modifier Equivalent most closely resembles their credit risk the investment.

The NAIC Designation Modifier Equivalent should be left blank for the following lines:

- **Sweep Accounts** Line 8499999
- **Exempt Money Market Mutual Funds – as Identified by the SVO** Line 8599999
- **All Other Money Market Mutual Funds** Line 8699999
- **Other Cash Equivalents** Line 8799999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.
Refer to the *Purposes and Procedures Manual of the NAIC Investment Analysis Office* for the application of these codes.

The NAIC Designation Category Equivalent is the combination of NAIC Designation Equivalent and NAIC Designation Modifier Equivalent. Valid combinations of NAIC Designation Equivalent and NAIC Designation Modifier Equivalent for NAIC Designation Category Equivalent are shown below:

<table>
<thead>
<tr>
<th>NAIC Designation Equivalent</th>
<th>NAIC Designation Modifier Equivalent</th>
<th>NAIC Designation Category Equivalent</th>

</tr>
<tr>
<td>On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier (e.g., “1.A”).</td>
<td></td>
</tr>
</tbody>
</table>

** NAIC Designation Equivalent:**

For the NAIC Designation Equivalent, use the NAIC designation that would have been used for the investment had it been reported on Schedule D, Part 1 if available. If no NAIC Designation is available, the reporting entity should use a NAIC Designation Equivalent most closely resembles their credit risk the investment.

** NAIC Designation Modifier Equivalent:**

Bonds (Lines 0199999 through 6599999)

Use the NAIC Designation Modifier that would have been used for the investment had it been reported on Schedule D, Part 1 if available.

If no NAIC Designation Modifier is available, the reporting entity should use a NAIC Designation Modifier Equivalent most closely resembles their credit risk the investment.

The NAIC Designation Modifier Equivalent should be left blank for the following lines:

- Parent, Subsidiaries and Affiliates – Mortgage Loans Line 8499999
- Parent, Subsidiaries and Affiliates – Other Short-Term Invested Assets Line 8599999
- Mortgage Loans Line 8799999
Other Short-Term Invested Assets

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments using an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the Purposes and Procedures Manual of the NAIC Investment Analysis Office for the application of these codes.

The NAIC Designation Category Equivalent is the combination of NAIC Designation Equivalent and NAIC Designation Modifier Equivalent. Valid combinations of NAIC Designation Equivalent and NAIC Designation Modifier Equivalent for NAIC Designation Category Equivalent are shown below:

NAIC Designation Category Equivalent Footnote:

Provide the total book/adjusted carrying value amount by NAIC Designation Category Equivalent that represents the amount reported in Column 7.

The sum of the amounts reported for each NAIC Designation Category Equivalent in the footnote should equal Line 8399999.
SCHEDULE BA – PART 1

OTHER LONG-TERM INVESTED ASSETS OWNED DECEMBER 31 OF CURRENT YEAR

Column 7 – NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol

This column must be completed for those investments included on Lines 0799999 and 1599999.

For Schedule BA investments with the underlying characteristics of a bond or a preferred stock instrument, insert the appropriate combination of the NAIC Designation (1 through 6), NAIC Designation Modifier (A through G) and SVO Administrative Symbol. The List of valid SVO Administrative Symbols is shown below.

The listing of valid NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol combinations can be found on the NAIC’s website for the Securities Valuation Office (www.naic.org/svo.htm).

The NAIC Designation, NAIC Designation Modifier and SVO Administrative Symbol will be shown as one column on the printed schedule but will be three sub-columns in the data table.

- NAIC Designation Column 7A
- NAIC Designation Modifier Column 7B
- SVO Administrative Symbol Column 7C

On the printed page the sub-columns should be displayed with a “.” between the NAIC Designation and the NAIC Designation Modifier with a space between the NAIC Designation Modifier and the SVO Administrative Symbol (e.g., “1.A YE”).

NAIC Designation Modifier:

The NAIC Designation Modifier should only be used for securities reported on the lines below if eligible to receive one, as defined in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual), otherwise, the field should be left blank.

- Underlying Characteristics of Bonds Lines 0799999 through 0899999
- Underlying Characteristics of Preferred Stocks Line 1399999 through 1499999

As defined in the P&P Manual, there is not an NAIC Designation Modifier for investments reporting an NAIC Designation 6, therefore, and the NAIC Designation Modifier field should be left blank.

Refer to the P&P Manual for the application of these modifiers.

SVO Administrative Symbol:

Following are valid SVO Administrative Symbols for bonds and preferred stock. Refer to the P&P Manual – Purposes and Procedures Manual of the NAIC Investment Analysis Office for the application of these symbols.

S Additional or other non-payment risk
YE Year-end carry over
FE Filing Exempt
F Sub-paragraph D Company – insurer self-designated
The NAIC designation NAIC Designation Modifier and SVO Administrative Symbol field should be left blank for those Schedule BA investments which have not been assigned an NAIC designation by the Securities Valuation Office (SVO) pursuant to the policies in the *Purposes and Procedures Manual of the NAIC Investment Analysis Office*.

The NAIC Designation Category is the combination of NAIC Designation and NAIC Designation Modifier. Valid combinations of NAIC Designation and NAIC Designation Modifier for NAIC Designation Category are shown below:

*Detail Eliminated to Conserve Space*

**Column 26 – Maturity Date**

Use only for securities included in the following subtotal lines.

Fixed or Variable Interest Rate Investments that have the Underlying Characteristics of:

Mortgage Loans

- Unaffiliated............................................................................................................. 0999999
- Affiliated.............................................................................................................. 1099999

State the date the mortgage loan matures.

**NAIC Designation Category Footnote:**

Provide the total book/adjusted carrying value amount by NAIC Designation Category that represents the amount in reported in Column 12.

The sum of the amounts reported for each NAIC Designation Category in the footnote should equal the sum of Lines 0799999, 0899999, 1399999 and 1499999.

</thead>
</table>
| 2019      | Schedule D, Part 1A, Section 2 | CHANGE TO BLANK  
Make the following changes for consistency with the bond categories for Schedule D, Part 1.  
Add the “Unaffiliated” to the description of Section 10.  
Add line for “Affiliated Bank Loans” and add “Unaffiliated” to the existing line for bank loans to Sections 11 through 14 of the schedule.  
Add lines for “Affiliated bank loans – issued” and “Affiliated bank loans – acquired” to Sections 8 and 11 of the schedule.  
Because the number of lines in some to the sections exceed 9, the format of the line numbers is changed from X.X to X.XX. | 08/20/2019 | H, L/F, P/C, T, SA | Annual |
| 2019      | Schedule D – Summary by Country | CHANGE TO BLANK  
For Lines 8 through 11, The description of bonds should be modified to refer to “Unaffiliated Bank Loans”. | 08/20/2019 | H, L/F, P/C, T, SA | Annual |

**CHANGE TO INSTRUCTIONS**

Modify the line description for Line 12 to read "Other Invested Assets (Page 2, Line 11)." Line 12 is not a write-in line on this schedule.

**CHANGE TO INSTRUCTIONS**

Modify the line description as shown below. Line 12 is not a write-in line on this schedule. The included statement should read similar to the prior year.

Line 12 - Aggregate Write-Ins for Other Invested Assets (Page 2, Line 11).

The value of all other invested assets that have not been included in Lines 1 to 11 above, Enter the total of the write-ins listed in schedule detail line 12 for invested Assets.

Column 1 should equal the amount reported in Line 11, Column 1, Page 2, Assets.

Column 3 should equal the amount reported in Line 11, Column 3, Page 2, Assets.

**CHANGE TO INSTRUCTIONS**

For Column 6 delete the "AM" administrative symbol for the line in the instructions.

### Change to Instructions

Make the changes below to reflect reporting of affiliated and unaffiliated bank loans on the schedule.

Section 10. Unaffiliated Bank Loans

Lines 659999 from Schedule D, Part 1, Column 11; Schedule DA, Part 1, Column 7, and Schedule E, Part 2, Column 7.

For each major section the following subgroups, which are described in the Investment Schedule General Instructions, shall be presented by maturity category:

- Sections 1 through 4:
  - Issuer Obligations
  - Residential Mortgage-Backed Securities
  - Commercial Mortgage-Backed Securities
  - Other Loan-Backed and Structured Securities

- Section 8:
  - Issuer Obligations
  - Residential Mortgage-Backed Securities
  - Commercial Mortgage-Backed Securities
  - Other Loan-Backed and Structured Securities

- Section 9:
  - Affiliated Bank Loans – Issued
  - Affiliated Bank Loans – Acquired
  - Exchange Traded Funds – as identified by...

**This section must be completed on all forms.**  Revised 7/18/2018
ANNUAL STATEMENT INSTRUCTIONS – LIFE/FRATERNAL

NOTES TO FINANCIAL STATEMENTS

33. Analysis of Life Actuarial Reserves by Withdrawal Characteristics

Instruction:

Disclose the amounts of account value, cash value and reserve for the breakouts of life insurance by withdrawal characteristics, separately for General Account products, Separate Account with Guarantees products and Separate Account Nonguaranteed products, as follows:

Note: The difference between the account value and the cash value is the surrender charge, if any. After the surrender period is over, there is no difference. Some contract types have no account value such as traditional whole life, term, etc. So, if there is no account value, leave it blank. UL typically has an account value and a cash surrender value.

Just as account values are not reduced for policy loans taken and outstanding, the cash value amount reported in this note should not be reduced for policy loans taken and outstanding. This will ensure the difference between account value and cash value is the actual surrender charge.

• A. Subject to discretionary withdrawal, surrender values, or policy loans:
  ❖ (1) Term Policies with Cash Value
  ❖ (2) Universal Life
  ❖ (3) Universal Life with Secondary Guarantees
  ❖ (4) Indexed Universal Life
  ❖ (5) Indexed Universal Life with Secondary Guarantees
  ❖ (6) Indexed Life
  ❖ (7) Other Permanent Cash Value Life Insurance
  ❖ (8) Variable Life
  ❖ (9) Variable Universal Life
  ❖ (10) Miscellaneous Reserves

• B. Not subject to discretionary withdrawal or no cash value:
  ❖ (1) Term Policies without Cash Value
  ❖ (2) Accidental Death Benefits
  ❖ (3) Disability - Active Lives
  ❖ (4) Disability - Disabled Lives
  ❖ (5) Miscellaneous Reserves

• C. Total (Gross: Direct + Assumed).

• D. Reinsurance ceded.

• E. Total (net) = (C) – (D).

  Total (net) = Total (Gross: Direct + Assumed) – Reinsurance ceded
- Reconcile total life insurance reserves amount disclosed to the appropriate sections of the Aggregate Reserves for Life Policies and Contracts Exhibit (Exhibit 5) of the Life, Accident and Health Annual Statement and the corresponding lines in the Separate Accounts Statement. The reconciliation is a single presentation including all amounts from the sections on Individual Life Insurance and Group Life Insurance.

**Illustration:**

>This exact format must be used in the preparation of this note for the table below. Reporting entities are not precluded from providing clarifying disclosure before or after this illustration.

### SUPPLEMENTAL EXHIBITS AND SCHEDULES

**INTERROGATORIES**

The following supplemental reports are required to be filed as part of your statement filing unless specifically waived by the domiciliary state. However, in the event that your domiciliary state waives the filing requirement, your response of **WAIVED** to the specific interrogatory will be accepted in lieu of filing a “NONE” report and a bar code will be printed below. If the supplement is required of your company but is not being filed for whatever reason enter **SEE EXPLANATION** and provide an explanation following the interrogatory questions.

Anticipated Effective Date: 1st Quarterly 2020

**IDENTIFICATION OF ITEM(S) TO CHANGE**

Modify the instructions and illustration for Note 8 – Derivatives for disclosures adopted by SSAP No. 108—Derivative Hedging Variable Annuity Guarantees. Add instruction and blank page for Schedule DB, Part E to the quarterly statement.

**REASON, JUSTIFICATION FOR AND/OR BENEFIT OF CHANGE**

The purpose of this proposal is to add a Quarterly Schedule DB, Part E and Note 8 – Derivatives changes included in the annual statement. The quarterly version of the schedule and notes disclosures were not included in 2019-14BWG adopted on 06/24/2019 but is required by the changes to SSAP No. 108—Derivative Hedging Variable Annuity Guarantees.

**NAIC STAFF COMMENTS**

Other Comments: ____________________________

**** This section must be completed on all forms. **Revised 7/18/2018**
### QUARTERLY STATEMENT INSTRUCTIONS – LIFE/FRATERNAL, HEALTH, PROPERTY AND TITLE

**SCHEDULE DB – PART E**  
**Derivatives Hedging Variable Annuity Guarantees as of Current Quarter**

This schedule is specific for the derivatives and the hedging programs captured in SSAP No. 108.

| Column 1 – CDHS Identifier | Column 2 – CDHS Description | Column 3 – Prior Fair Value in Full Contract Cash Flows Attributed to Interest Rates | Column 4 – Ending Fair Value in Full Contract Cash Flows Attributed to Interest Rates | Column 5 – Fair Value Gains (Loss) in Full Contract Cash Flows Attributed to Interest Rates | Column 6 – Fair Value Gain (Loss) in Hedged Item Attributed to Hedged Risk | Column 7 – Current Year Increase (Decrease) in VM-21 Liability | Column 8 – Current Year Increase (Decrease) in VM-21 Liability Attributed to Interest Rates | Column 9 – Change in the Hedged Item Attributed to Hedged Risk Percentage | Column 10 – Current Year Increase (Decrease) in VM-21 Liability Attributed to Hedged Risk |
|---------------------------|---------------------------|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------|--------------------------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------|
| Provide a unique identifier for each Clearly Defined Hedging Strategy (CDHS) reported on this schedule (e.g., 001, 002, etc.). This identifier will also be used for reporting of the SSAP No. 108 CDHS in Column 32 of Schedule DB, Part A, Section 1; Column 31 of Schedule DB, Part A, Section 2; Column 30 of Schedule DB, Part B, Section 1; and Column 26 of Schedule DB, Part B, Section 2. | Provide a description for each uniquely identified CDHS. | Prior period full contract fair value. This reflects all product cash flows, per SSAP No. 108. | Current period full contract fair value. This reflects all product cash flows, per SSAP No. 108. | Change in full contract fair value. This reflects all product cash flows, per SSAP No. 108. | Change in fair value attributable to hedged risk per SSAP No. 108. | VM-21 liability increase (decrease) from beginning of period to end of period. | VM-21 liability increase (decrease) attributable to interest rate movements. | Change in fair value attributed to hedged risk as a percentage of the change in full contract fair value, per SSAP No. 108. | VM-21 liability increase (decrease) attributed to hedged risk. |
| Column 11 | Prior Deferred Balance | Specific CDHS deferred liability (asset) balance at end of prior reporting period. |
| Column 12 | Current Year Fair Value Fluctuation of the Hedge Instruments | Current year total return Fair Value fluctuations in the hedging instruments, per SSAP 108. |
| Column 13 | Current Year Natural Offset to VM-21 Liability | Current year hedging instruments' total return Fair Value fluctuations that offset the current period change in the designated portion of the VM-21 liability. |
| Column 14 | Hedging Instruments’ Current Fair Value Fluctuation Not Attributed to Hedged Risk | Current year hedging instruments' total return Fair Value fluctuations not attributable to hedged risk, per SSAP 108. |
| Column 15 | Hedge Gain (Loss) in Current Year Deferred Adjustment | Current year hedging instruments' total return Fair Value fluctuations that do not offset the current period change in the designated portion of the VM-21 liability (recognized as deferred liabilities/(assets), per SSAP 108). |
| Column 16 | Current Year Prescribed Deferred Amortization | Current year deferred (liability)/asset amortization into realized gains/losses (straight line over a period not to exceed 10 years, per SSAP 108). |
| Column 17 | Current Year Additional Deferred Amortization | Current year deferred (liability)/asset accelerated amortization elected by the reporting entity, per SSAP 108. |
| Column 18 | Current Year Total Deferred Amortization | Total current year deferred (liability)/asset amortization into realized gains/losses. |
| Column 19 | Ending Deferred Balance | Specific CDHS Deferred Liability (Asset) balance at end of current reporting period. |
NOTES TO FINANCIAL STATEMENTS

The interim financial information shall include disclosures sufficient to make the information presented not misleading. It may be presumed that the users of the interim financial information have read or have access to the annual statement for the preceding period and that the adequacy of additional disclosure needed for a fair presentation, except in regard to material contingencies, may be determined in that context. Accordingly, footnote disclosure that would substantially duplicate the disclosure contained in the most recent annual statement or audited financial statements, such as a statement of significant accounting policies and practices, details of accounts that have not changed significantly in amount or composition since the end of the most recently completed fiscal year, may be omitted but the footnote number and annotation such as “no change” should be included. However, provide disclosure for annual Note 1A, 1C(2), 1C(6), 1D, 5D, 5E(3)b, 5F, 5G, 5H, 5I, 5M(2), 5M(3), 5N, 8A(8)H, 8B(2)a, 8B(2)b, 8B(2)c, 11B, 12A(4), 17B(2), 17B(4)a, 17B(4)b, 17C, 20, 24E and 25 in all quarters; and all other Notes where events subsequent to the end of the most recent fiscal year have occurred that have a material impact on the reporting entity. Disclosures shall encompass, for example, significant changes since the end of the period reported on the last annual statement in such items as statutory accounting principles and practices; estimates inherent in the preparation of financial statements; status of long term contracts; capitalization including significant new borrowings or modifications of existing financial arrangements; and the reporting entity resulting from business combinations or dispositions. Notwithstanding the above, where material noninsurance contingencies exist, disclosure of such matters shall be provided even though a significant change since year-end may not have occurred. If the reporting entity has changed the accounting policies since the end of its preceding year, the changes shall be disclosed in the quarterly financial statements. Information should be reported for current year-to-date.

8. Derivative Instruments

Instruction:

A. Derivatives under SSAP No. 86—Derivatives

Disclose the following information by category of derivative financial instrument:

H.(8) Disclose the aggregate, non-discounted total premium cost for these contracts and the premium cost due in each of the following four years, and thereafter. Include the aggregate fair value of derivative instruments with financing premiums, excluding the impact of the deferred or financing premiums.

B. Derivatives under SSAP No. 108—Derivative Hedging Variable Annuity Guarantees (Life/Fraternal Only)

(2) Recognition of gains/losses and deferred assets and liabilities

Provide the following:

Schedule showing the current period amortization, including any accelerated amortization elected by the reporting entity, and the future scheduled amortization of the deferred assets and deferred liabilities.

Information on derivative instruments that were originally captured in SSAP No. 108 and repurposed to be within scope of SSAP No. 86 (or vice versa). If the reporting entity has repurposed derivatives, information on the derivative to reconcile the fair value (realized/unrealize gains or losses) is required. (These disclosures should only be included if open derivatives were reclassified between SSAP No. 86 and SSAP No. 108. It is expected to be uncommon.)
The amortization of deferred assets and liabilities shall be completed on an annual basis only. Quarterly changes (resulting in new amortization projections) from the recognition of new deferred assets/liabilities shall be shown in the quarterly completion of Schedule DB, Part E.
