2019 PROCEEDINGS

OF THE

National Association
of Insurance Commissioners

2019 Fall National Meeting

December 7 – 10, 2019

Held at the

JW Marriott Austin
Hyatt Place Austin

Austin, Texas
The NAIC is the authoritative source for insurance industry information. Our expert solutions support the efforts of regulators, insurers and researchers by providing detailed and comprehensive insurance information. The NAIC offers a wide range of publications in the following categories:

**Accounting & Reporting**
Information about statutory accounting principles and the procedures necessary for filing financial annual statements and conducting risk-based capital calculations.

**Special Studies**
Studies, reports, handbooks and regulatory research conducted by NAIC members on a variety of insurance related topics.

**Consumer Information**
Important answers to common questions about auto, home, health and life insurance — as well as buyer's guides on annuities, long-term care insurance and Medicare supplement plans.

**Statistical Reports**
Valuable and in-demand insurance industry-wide statistical data for various lines of business, including auto, home, health and life insurance.

**Financial Regulation**
Useful handbooks, compliance guides and reports on financial analysis, company licensing, state audit requirements and receiverships.

**Supplementary Products**
Guidance manuals, handbooks, surveys and research on a wide variety of issues.

**Legal**
Comprehensive collection of NAIC model laws, regulations and guidelines; state laws on insurance topics; and other regulatory guidance on antifraud and consumer privacy.

**Capital Markets & Investment Analysis**
Information regarding portfolio values and procedures for complying with NAIC reporting requirements.

**Market Regulation**
Regulatory and industry guidance on market-related issues, including antifraud, product filing requirements, producer licensing and market analysis.

**White Papers**
Relevant studies, guidance and NAIC policy positions on a variety of insurance topics.

**NAIC Activities**
NAIC member directories, in-depth reporting of state regulatory activities and official historical records of NAIC national meetings and other activities.

CERTIFICATE OF INCORPORATION OF
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS
a Nonstock Corporation

I. Name

The name of the Corporation is: National Association of Insurance Commissioners (NAIC).

II. Duration

The period of duration of the NAIC is perpetual.

III. Registered Office and Agent

The NAIC’s Registered Office in the State of Delaware is to be located at: 1209 Orange St., in the City of Wilmington, Zip Code 19801. The registered agent in charge thereof is The Corporation Trust Company.

IV. Authority to Issue Stock

The NAIC shall have no authority to issue capital stock.

V. Incorporators

The name and address of the incorporator are as follows:

Catherine J. Weatherford
National Association of Insurance Commissioners
120 W. 12th St., Suite 1100
Kansas City, MO 64106

VI. Purpose

The NAIC is organized exclusively for charitable and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), including without limitation, to assist state insurance regulators, individually and collectively, in serving the public interest and achieving the following fundamental insurance regulatory goals in a responsive, efficient and cost-effective manner, consistent with the wishes of its members:

(a) Protect the public interest, promote competitive markets and facilitate the fair and equitable treatment of insurance consumers;

(b) Promote, in the public interest, the reliability, solvency and financial solidity of insurance institutions; and

(c) Support and improve state regulation of insurance.

VII. Restrictions

A. No substantial part of the activities of the Corporation shall be the carrying of propaganda, or otherwise attempting to influence legislation except as otherwise permitted by Section 501(h) of the Code and in any corresponding laws of the State of Delaware, and the Corporation shall not participate in or intervene in including the publishing or distribution of statements concerning any political campaign on behalf of or in opposition to any candidate for public office.

B. For any period for which the Corporation may be considered a private foundation, as defined in Section 509(a), the Corporation shall be subject to the following restrictions and prohibitions:

1. The Corporation shall not engage in any act of self-dealing as defined in section 4941(d) of the Code.

2. The Corporations shall make distributions for each taxable year at such time and in such manner so as not to become subject to the tax on undistributed income imposed by section 4942 of the Code.

3. The Corporation shall not retain any excess business holdings as defined in section 4943(c) of the Code.

4. The Corporation shall not make any investments in such manner as to subject it to tax under section 4944 of the Code.

5. The Corporation shall not make any taxable expenditures as defined in section 4945(d) of the Code.

© 2019 National Association of Insurance Commissioners
VIII. Membership

The NAIC shall have one class of members consisting of the Commissioners, Directors, Superintendents, or other officials who by law are charged with the principal responsibility of supervising the business of insurance within each State, territory, or insular possession of the United States. Members only shall be eligible to hold office in and serve on the Executive Committee, Committees and Subcommittees of the NAIC. However, a member may be represented on a Committee or Subcommittee by the member’s duly authorized representative as defined in the Bylaws. Only one official from each State, territory or insular possession shall be a member and each member shall be limited to one vote. Any insurance supervisory official of a foreign government or any subdivision thereof, which has been diplomatically recognized by the United States government, may attend and participate in all meetings of this Congress but shall not be a member and shall not have the power to vote.

IX. Activities

The NAIC is a nonprofit charitable and educational organization and no part of the net earnings or property for the corporation will inure to the benefit of, or be distributable to its members, directors, officers or other private individuals, except that the NAIC shall be authorized and empowered to pay reasonable compensation for services rendered by employees and contractors, and to make payments and distributions in furtherance of the purposes set forth in Article VI hereof.

X. Powers

The NAIC shall have all of the powers conferred by the Delaware General Corporation Law for non-profit corporations, except that, any other provision of the Certificate to the contrary notwithstanding, the NAIC shall neither have nor exercise any power, nor carry on any other activities not permitted: (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); or (b) by a corporation contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986, as amended, (or the corresponding provision of any future United States Internal Revenue law).

XI. Immunity

All officers and members of the Executive Committee shall be immune from personal liability for any civil damages arising from acts performed in their official capacity, and shall not be compensated for their services as an officer or member of the Executive Committee on a salary or a prorated equivalent basis. The immunity shall extend to such actions for which the member of the Executive Committee or officer would not otherwise be liable, but for the Executive Committee member’s or officer’s affiliation with the NAIC. This immunity shall not apply to intentional conduct, wanton or willful conduct or gross negligence. Nothing herein shall be construed to create or abolish an immunity in favor of the NAIC itself. Nothing herein shall be construed to abolish any immunities held by the state officials pursuant to their individual state’s law.

XII. Exculpation and Indemnification

A member of the Executive Committee shall not be liable to the NAIC or its members for monetary damages for breach of fiduciary duty as a member of the Executive Committee, provided that this provision shall not eliminate or limit the liability of a member of the Executive Committee for any breach of the duty of loyalty to the NAIC or its members, for acts or omissions not in good faith, or which involve intentional misconduct or a knowing violation of law, or for any transaction from which the member of the Executive Committee involved derived an improper personal benefit. Any amendment, modification or repeal of the foregoing sentence shall not adversely affect any right or protection of a member of the Executive Committee of the Corporation hereunder in respect of any act or omission occurring prior to the time of such amendment, modification, or repeal. If the Delaware General Corporation Law hereafter is amended to authorize the further elimination or limitation of the liability of the members of the Executive Committee, then the liability of a member of the Executive Committee, in addition to the limitation provided herein, shall be limited to the fullest extent permitted by the amended Delaware General Corporation Law.

The NAIC shall indemnify to the full extent authorized or permitted by the laws of the State of Delaware, as now in effect or as hereafter amended, any person made or threatened to be made a party to any threatened, pending or completed action, suit or proceeding (whether civil, criminal, administrative or investigatory, including an action by or in the right of the NAIC) by reason of the fact that the person is or was a member of the Executive Committee, officer, member, committee member, employee or agent of the NAIC or serves any other enterprise as such at the request of the NAIC.
The foregoing right of indemnification shall not be deemed exclusive of any other rights to which such person may be entitled apart from this Article XII. The foregoing right of indemnification shall continue as to a person who has ceased to be a member of the Executive Committee, officer, member, committee member, employee or agent and shall inure to the benefit of the heirs, the executors and administrators of such a person.

XIII. Dissolution

In the event of the dissolution of the NAIC, the Executive Committee shall, after paying or making provision for the payment of all of the liabilities of the NAIC, dispose of all the assets of the NAIC equitably to any state government which is represented as a member of the NAIC at the time of dissolution, provided that the assets are distributed upon the condition that they be used primarily and effectively to implement the public purpose of the NAIC, or to one or more such organizations organized and operated exclusively for religious, charitable, educational, scientific, or literary purposes or similar purposes as shall at the time qualify: (a) as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); and (b) as an organization contributions to which are deductible under Section 170(c) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), as the Executive Committee shall determine.

XIV. Bylaws

The Bylaws of the NAIC may prescribe the powers and duties of the several officers, members of the Executive Committee and members and such rules as may be necessary for the work of the NAIC provided they are in conformity with the Certificate of Incorporation.

XV. Amendments

This Certificate of Incorporation may be altered or amended at any meeting of the full membership (Plenary Session) of the NAIC by an affirmative vote of two-thirds of the members qualified to vote, or their authorized representatives, provided that previous notice of the proposed amendment has been mailed to all members by direction of the Executive Committee at least thirty (30) days prior to the meeting.

IN WITNESS WHEREOF, this Certificate of Incorporation has been signed this 4th day of October 1999.

/signature/
Catherine J. Weatherford, Incorporator

ADOPTED 1999, Proc. Third Quarter
BYLAWS OF THE
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

ARTICLE I Name, Organization and Location

The name of this corporation is NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS (NAIC). The NAIC is organized under the General Corporation Law of the State of Delaware. The NAIC may have one (1) or more office locations within or without the State of Delaware as the Executive Committee may from time to time determine.

ARTICLE II Membership

The Membership of the NAIC shall be comprised of those persons designated as members in the Certificate of Incorporation. Each member of the NAIC shall have the power to vote and otherwise participate in the affairs of the NAIC as set forth herein or as required by applicable law. This power may be exercised through a duly authorized representative who shall be a person officially affiliated with the member’s department and who is wholly or principally employed by said department.

The organization may charge members an annual assessment, the amount of which shall be determined by the Executive Committee. Members failing to pay all NAIC assessments on a timely basis shall be placed in an inactive status. Members in an inactive status shall not have any voting rights and shall be denied membership on NAIC committees and task forces, access to mailings and services of the NAIC Offices, as well as access to zone examination processes and other benefits of membership in the NAIC.

The NAIC’s receipt of full payment from the inactive member of all current and past due assessments shall serve to immediately remove them from inactive status.

The Membership of the NAIC shall be subject to a conflict of interest policy and disclosure form as adopted by the members.

The Executive Committee is empowered to reinstate, in part or in whole, an inactive member’s participation on the committees and task forces, access to mailings and services of the NAIC Offices and satellite offices, as well as access to zone examination processes, and other benefits of membership in the NAIC upon good cause shown as determined by the Executive Committee.

ARTICLE III Officers

The officers of the NAIC shall be a President, a President-Elect, a Vice President, and a Secretary-Treasurer. Annual officer elections shall be held at the last regular National Meeting of each calendar year or at such other plenary session as agreed to by the members. The voting membership, by secret ballot, shall elect officers as provided in these Bylaws. Officers’ terms shall be for one year, beginning on January 1 following their election. The officers shall hold office until their death, resignation, removal or the election and qualification of their successors, whichever occurs first. Any Officer may resign at any time by giving notice thereof in writing to the President of the NAIC. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

If an interim vacancy occurs in the office of President, the President-Elect shall cease to hold his or her office effective immediately and shall assume the office of President. If an interim vacancy occurs in any one or more of the other officer positions, an interim election shall be held to fill the vacancy. No member may hold any office for more than two consecutive years. Notwithstanding the foregoing, at no time shall more than two officer positions be filled by members of the same Zone during the same term. Any officer may be removed from office by the affirmative vote of two-thirds (2/3) of the members, but only after a resolution for removal is adopted by two-thirds (2/3) of the Executive Committee whenever, in their judgment, the best interests of the NAIC would be served thereby.

The President shall serve as Chairman of the Executive Committee and shall preside at all special and regular meetings of the members. The President shall serve as the leader of the organization and its principal spokesperson. The President shall work closely with the Executive Committee to establish and achieve the strategic, business and operational goals of the organization; ensure appropriate policies and procedures for the organization are implemented and followed; and protect the integrity as well as the resources of the organization. After a member completes his or her term or terms as President, he or she shall not be able to hold another officer position for a period of twelve (12) months from the date such member completes his or her term or terms as President, which shall be referred to as a "waiting period"; provided however, the Executive Committee may waive the twelve month waiting period if warranted by exigent circumstances.
The President-Elect shall serve as Vice-Chairman of the Executive Committee. In the absence of the President at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, the President-Elect shall preside over such meeting to the extent of the President’s absence. The President-Elect shall perform such other duties and tasks as may be assigned by the President. Where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President’s term of office.

The Vice President, in the absence of the President and President-Elect at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, shall preside over such meeting to the extent of the President’s and the President-Elect’s absence; and shall perform such other duties as may be assigned by the President or President-Elect, or in the absence thereof, by the Executive Committee.

The Secretary-Treasurer shall assist the President and, as applicable, the President-Elect or the Vice President in the conduct of meetings of the Executive Committee and members. For member meetings, the Secretary-Treasurer shall call the roll of the membership and certify the presence of a quorum and shall receive, validate and maintain all proxies for elections held at member meetings. The Secretary-Treasurer shall also recommend to the Executive Committee such policies and procedures to maintain the history and continuity of the NAIC. The Secretary-Treasurer shall also assist the President and President-Elect in all matters relating to the budget, accounting, expenditure and revenue practices of the NAIC; including, but not limited to reviewing the financial information of the organization and consulting with NAIC management, independent auditors, and other necessary parties regarding the financial operations and condition of the organization.

**ARTICLE IV Executive Committee**

The business and affairs of the NAIC shall be managed by and under the direction of the Executive Committee. The Executive Committee shall be made up entirely of members of the NAIC. The Executive Committee shall consist of the following members: the officers of the NAIC; the most recent past president; the twelve (12) members of the zones as provided for in Article V of these Bylaws. The members of the Executive Committee shall be subject to a conflict of interest policy as adopted by the members. Any Executive Committee member may resign at any time by giving notice thereof in writing to the members of the NAIC. Resignation as an Executive Committee member also operates as resignation as a Zone officer. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

1. The Executive Committee shall have the authority and responsibility to:
   
   (a) manage the affairs of the NAIC in a manner consistent with the Certificate of Incorporation and Bylaws;
   
   (b) make recommendations to achieve the goals of the NAIC based upon either its own initiative or the recommendations of the Standing Committees or Subcommittees reporting to it, for consideration and action by the members at any NAIC Plenary Session;
   
   (c) create and terminate one or more Task Forces reporting to it to the extent needed and appropriate;
   
   (d) establish and allocate, from time to time, functions and responsibilities to be performed by each Zone;
   
   (e) to the extent needed and appropriate, oversee NAIC Offices to assist the NAIC and the individual members in achieving the goals of the NAIC;
   
   (f) submit to the NAIC at each National Meeting, during which a Plenary Session is held, its report and recommendations concerning the reports of the Standing Committees. All Standing Committee reports shall be included as part of the Executive Committee report;
   
   (g) plan, implement and coordinate communications and activities with other state, federal and local government organizations in order to advance the goals of the NAIC and promote understanding of state insurance regulation.

© 2019 National Association of Insurance Commissioners
2. Duties and Operations of the Executive Committee.

(a) The Executive Committee shall hold at least two (2) regular meetings annually at a designated time and place. Special meetings may be held when called by the President, or by at least three (3) members of the Executive Committee in writing. In any case, the Executive Committee shall meet at least once per calendar month. At least five (5) days notice shall be given of all regular and special meetings. Meetings may be held in person or by means of conference telephone or other communication equipment by means of which all persons participating in the meeting can hear each other, and such participation in a meeting shall constitute presence in person at such meeting in accordance with applicable laws. The presiding member of the Executive Committee shall only cast his or her vote in order to break a tie vote. In addition, the Executive Committee may act by written consent as provided by law.

(b) The Executive Committee may, with the concurrence of two-thirds of the members of the Executive Committee, establish rules for its conduct that shall not conflict with the Certificate of Incorporation and Bylaws. Such rules may be changed only by a concurrence of two-thirds of the members of the Executive Committee after twenty-four (24) hours notice to all members of the Executive Committee.

(c) Any action required or permitted to be taken at any meeting of the Executive Committee or any committee thereof may be taken without a meeting if all members of the Executive Committee or such committee, as the case may be, consent thereto in writing in accordance with applicable law.

(d) The Executive Committee shall cause to be kept minutes of its meeting and have information of any action of a general character taken by it published to members qualified to vote.

(e) NAIC OFFICES

(i) The Executive Committee shall oversee an Executive Office and a Central Office with management and staff personnel and appropriate resources for performance of duties and assigned responsibilities. Additional satellite offices may be established as needed. The Executive Committee shall have the authority to select, employ and terminate a Chief Executive Officer who shall not be a member of the NAIC and who shall have the primary responsibility for the internal management and functioning of the NAIC Offices within the direction of the Executive Committee, as well as other duties assigned by the Executive Committee through execution of an Employment Agreement or other authorization. The Chief Executive Officer appointed by the Executive Committee pursuant to this section shall not be considered an officer for purposes of Article III hereof and shall not be a member of the Executive Committee. The Executive Committee, through the Internal Administration (EX1) Subcommittee, shall provide oversight and direction to the Chief Executive Officer regarding Office operations.

(ii) Consistent with the purposes of the NAIC, the role of the NAIC Offices is to: (1) provide services to the NAIC through support to the NAIC Committees, Subcommittees, Task Forces or otherwise; (2) provide services to individual State insurance departments; and (3) develop recommendations for consideration as to NAIC policy and administrative decisions of the NAIC.

(iii) In performing its role, subject to the oversight and direction specified in (paragraph i) the NAIC Offices may engage in a variety of functions including but not limited to the following: research; analysis; information gathering and dissemination; library services; data collection; data base building and maintenance; report generation and dissemination; government liaison; non-regulatory liaison; securities valuation; administration; litigation; legislative and regulatory drafting; and educational development.

(iv) The Chief Executive Officer shall prepare an annual budget, related to the priorities of the NAIC, for the NAIC Offices to be submitted through the EX1 Subcommittee to the Executive Committee, which shall make its recommendations to the members of the NAIC for action at the next Plenary Session of the NAIC.
3. Internal Administration (EX1) Subcommittee

The Internal Administration (EX1) Subcommittee shall be a Subcommittee reporting to the Executive Committee. Appointments of the Chair and Vice Chair of the Executive Subcommittee and members other than those specifically designated herein shall be made by the President and President-Elect.

This Subcommittee shall be comprised of the President, President-Elect, Vice President, the Secretary-Treasurer, the most recent past President, and three (3) other members of the Executive Committee. The presiding member of the Subcommittee shall only cast his or her vote in order to break a tie vote.

The Internal Administration (EX1) Subcommittee shall:

(a) Exercise such powers and authority as may be delegated to it by the Executive Committee.

(b) Generally oversee the NAIC Offices including, without limitation: (i) periodically monitor operations of the NAIC Offices, (ii) review and revise the budget of the NAIC, hold an annual hearing to receive public comments on the budget of the NAIC, and submit the revised budget to the Executive Committee, (iii) approve emergency expenditures which vary from the adopted budget and promptly certify its action in writing to the Executive Committee, (iv) evaluate the Chief Executive Officer and make appropriate recommendations to the Executive Committee, (v) assist the Chief Executive Officer in resolving competing demands for NAIC resources, (vi) review compensation of all senior management and (vii) quarterly prepare a report containing the current budget and expenditures which the Secretary-Treasurer shall present to the Executive Committee.

4. Audit Committee

The Executive Committee shall appoint an Audit Committee made up of at least four (4) members of the NAIC, including at least one member from each zone, in addition to the NAIC Secretary-Treasurer. The NAIC Secretary-Treasurer shall chair the Audit Committee. The Audit Committee shall report to the Executive Committee without any NAIC employees being present. The Audit Committee shall be directly responsible for the appointment, compensation, and oversight of the independent certified public accountant employed to conduct the audit. The Audit Committee shall also have the power, to the extent permitted by law, to: (i) initiate or review the results of an audit or investigation into the business affairs of the NAIC; (ii) review the NAIC’s financial accounts and reports; (iii) conduct pre-audit and post-audit reviews with NAIC staff, members and independent auditors; and (iv) exercise such other powers and authority as delegated to it by the Executive Committee.

ARTICLE V Zones

To accomplish the purposes of the NAIC in a timely and efficient manner, the United States, its territories and insular possessions shall be divided into four Zones. Each Zone shall consist of a group of at least eight States, located in the same geographical area, with each State being contiguous to at least one other State in the group so far as practicable, plus any territory or insular possession that may be deemed expedient, all as determined by majority of the Executive Committee. Members of each Zone shall annually elect a Chairman, a Vice Chairman and a Secretary from among themselves prior to or during the last regular National Meeting of each calendar year or at such time as agreed to by the Zone members. The Chairman, Vice Chairman and Secretary of each Zone shall be members of the Executive Committee with terms of office corresponding to that of the officers. Each Zone shall perform such functions as are designated by the Executive Committee of the NAIC or by the members of the NAIC as a whole or by the members of the Zone. Each Zone may hold Zone Meetings for such purposes as may be deemed appropriate by members of the Zone.

ARTICLE VI Standing Committees and Task Forces

1. General

The Standing Committees shall not be subcommittees of the Executive Committee and shall have no power or authority for the management of the business and affairs of the NAIC. Each Standing Committee shall be composed of not more than 15 members, including a Chair and one or more Vice Chairs, appointed by the President and President-Elect, and such appointments shall remain effective until the succeeding President and President-Elect appoint members for the following year. Standing Committees shall meet at least twice a year at National Meetings and may meet more often at the call of the Chair as required to complete its assignments from the Executive Committee in a timely manner.
The Executive Committee shall make all assignments of subject matter to the Standing Committees and shall require coordination between Committees and Task Forces of the subject matter if more than one Committee or Task Force is affected. The format of the Committee reports shall be prescribed by the Executive Committee. All appointments or elections of members of the NAIC to any office or Committee of the NAIC shall be deemed the appointment or election of a particular member and shall not automatically pass to a successor in office.

2. Specific Duties

The Standing Committees of the NAIC, their duties and responsibilities shall be as follows:

(a) Life Insurance and Annuities (A) Committee: This Standing Committee shall consider issues relating to life insurance and annuities.

(b) Health Insurance and Managed Care (B) Committee: This Standing Committee shall consider issues relating to health and accident insurance and managed care.

(c) Property and Casualty Insurance (C) Committee: This Standing Committee shall consider issues relating to personal and commercial lines of property and casualty insurance, worker’s compensation insurance, statistical information, surplus lines, and casualty actuarial matters.

(d) Market Regulation and Consumer Affairs (D) Committee: This Standing Committee shall consider issues involving market conduct in the insurance industry; competition in insurance markets; the qualifications and conduct of agents and brokers; market conduct examination practices; the control and management of insurance institutions; consumer services of State insurance departments; and consumer participation in NAIC activities.

(e) Financial Condition (E) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to accounting practices and procedures; blanks; valuation of securities; the Insurance Regulatory Information System (IRIS), as it relates to solvency and profitability; the call, monitoring and concluding report of Zone Examinations; and financial examinations and examiner training.

(f) Financial Regulation Standards and Accreditation (F) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to administration and enforcement of the NAIC Accreditation Program, including without limitation, consideration of standards and revisions of standards for accreditation, interpretation of standards, evaluation and interpretation of states’ laws and regulations, and departments’ practices, procedures and organizations as they relate to compliance with standards, examination of members for compliance with standards, development and oversight of procedures for examination of members for compliance with standards, qualification and selection of individuals to perform the examination of members for compliance with standards, and decisions regarding whether to accredit members.

(g) International Insurance Relations (G) Committee. This Standing Committee shall have the responsibility for issues relating to international insurance.

3. Task Forces

The Executive Committee, its Subcommittee and the Standing Committees may establish one or more Task Forces, subject to approval of the Executive Committee. The parent Committee or Subcommittee, subject to approval of the Executive Committee, may vote to discontinue a Task Force once its charge has been completed.

Vacancies in the positions of Chair or Vice Chair of any Task Force shall be filled by the parent Committee or Subcommittee from within or outside the present Task Force membership; provided, however, that the chief insurance regulatory official of the state of the former Chair or Vice Chair shall become a member of the Task Force. A vacancy in the position of member shall be filled by the chief insurance regulatory official of the vacating member’s state.

If an existing Task Force is dealing with insurance issues that require continuing study, the Executive Committee may adopt the recommendation of the parent Committee or Subcommittee that the Task Force be designated a Standing Task Force. A Standing Task Force shall continue in effect until terminated by the Executive Committee.
ARTICLE VII Meetings of the Membership

1. Regular Meetings.

The NAIC shall hold at least two (2) regular meetings of the members (“National Meetings”) each calendar year. Notice, stating the place, day and hour and any special purposes of the National Meeting, shall be delivered by the Executive Committee not less than ten (10) calendar days nor more than sixty (60) calendar days before the date on which the National Meeting is to be held, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

2. Special Meetings.

Special meetings of the members may be called by any five (5) members of the Executive Committee by giving all members notice of such meeting at least ten (10) but not more than sixty (60) days prior thereto, or by any twenty (20) members of the NAIC by giving all members notice of such meeting at least thirty (30) but not more than sixty (60) days prior thereto. Notice of the special meeting shall state the place, day and hour of the special meeting and the purpose or purposes for which the special meeting is called, and shall be delivered by the persons calling the meeting within the applicable time period set forth herein, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

3. Waiver of Notice; Postponement.

Member meetings may be held without notice if all members entitled to notice are present (except when members entitled to notice attend the meeting for the express purpose of objecting, at the beginning of the meeting, because the meeting is allegedly not lawfully called or convened), or if notice is waived by those not present. Any previously scheduled meeting of the members may be postponed by the Executive Committee (or members calling a special meeting, as the case may be) upon notice to members, in person or writing, given at least two (2) days prior to the date previously scheduled for such meeting.

4. Quorum.

Except as otherwise provided by law or by the Certificate of Incorporation, the presence, by person or proxy, of a majority of the members shall constitute a quorum at a member meeting, a meeting of a Standing Committee, Task Force or a working group. The chairman of the meeting may adjourn the meeting from time to time, whether or not there is such a quorum. The members present at a duly called member meeting at which a quorum is present may continue to transact business until adjournment, notwithstanding the withdrawal of enough members to leave less than a quorum.

5. Any meeting of the NAIC may be held in executive session as defined in the NAIC policy on open meetings. Any member may attend and participate in any meeting of the NAIC or any meeting of a Standing Committee or Task Force whether or not such member has the right to vote. All National Meetings shall provide for a Plenary Session of the NAIC as a whole in order to consider and take action upon the matters submitted to the NAIC.

ARTICLE VIII Elections

1. The election of officers of the NAIC shall be scheduled for the plenary session of the last National Meeting of the calendar year or at such other plenary session as agreed to by the members.

2. At the beginning of such Plenary Session, the Secretary-Treasurer shall ascertain and announce the presence of a quorum.

3. Upon the determination of a quorum, the chair shall briefly review the provisions of the Certificate of Incorporation and Bylaws in regard to voting.

4. The President shall ask for and announce all proxies. Proxies shall be held by the Secretary-Treasurer or a designee throughout the election session. Proxies shall be valid, subject to their term, until superseded by the member and shall be governed by ARTICLE IX of the Bylaws.

5. Every individual voting by proxy must meet the requirements of Article II of the Bylaws of the NAIC which requires that such a person be “...officially affiliated with the member’s (the member delegating authority to vote) department, and is wholly or principally employed by said department.”
6. Prior to opening the nominations for office, the Chair shall appoint three (3) members of the NAIC to act as voting inspectors. The voting inspectors shall distribute, collect, count and/or verify ballots, and report their findings to the Secretary-Treasurer. If a voting inspector is nominated for an office and does not withdraw as a candidate, he or she shall not be a voting inspector for the election of the office to which he or she is nominated and the chair shall appoint another voting inspector in his or her place.

7. The Chair shall announce the opening of nominations for offices in the following order:

(a) President. Provided, however, where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President’s term of office. In those cases where the President runs for re-election or where a vacancy exists because the President-Elect fails or is otherwise unable to assume the Presidency, this office will be subject to an election.

(b) President-Elect.

(c) Vice President.

(d) Secretary-Treasurer.

8. Only members or duly authorized proxyholders may make nominations.

9. One nominating speech, not to exceed three (3) minutes in duration, shall be allowed for each nominee.

10. After nominations are closed for each office, each nominee must indicate whether he or she accepts the nomination and, if he or she accepts, shall be permitted to address the membership for a period of up to seven (7) minutes. Such addresses shall be given in the order by which the nominations were made.

11. The votes of members, in person or by proxy, constituting a majority of the quorum present at the meeting shall be necessary for election to such office. If no candidate receives a majority, the two candidates with the most votes will participate in a run-off election. The candidate with the most votes in the run-off election shall win such election.

12. Voting need not be by written ballot, unless otherwise required by these Bylaws, the Certificate of Incorporation, or applicable law.

ARTICLE IX Proxies; Waiver of Notice

Where the delegation of power to vote or participate in the membership of the NAIC is required by ARTICLE II of these Bylaws to be in writing, such delegation must be effected by proxy. All proxies must be dated, give specific authority to a named individual who meets the requirements of ARTICLE II for duly authorized representatives, and meet any other applicable legal requirement. Documents such as electronic transmission, telegrams, mailgrams, etc. are acceptable as proxies if they otherwise meet the requirements contained herein and applicable law. Proxies should be maintained by NAIC Central Office staff. Notwithstanding the foregoing, a member may not vote by proxy in a meeting of the Executive Committee, Financial Regulation Standards and Accreditation (F) Committee in a vote concerning a state-specific item, Government Relations Leadership Council, or International Insurance Relations Leadership Group, or any respective subcommittees.

Whenever any notice is required to be given to any member (for a meeting of members or the Executive Committee) under the provisions of the Certificate of Incorporation, these Bylaws or applicable law, a written waiver, signed by the person entitled to notice, or a waiver by electronic transmission by person entitled to notice, whether before or after the time stated therein, shall be deemed equivalent to the giving of such notice. Neither the business to be transacted at, nor the purpose of, any annual or special meeting of the members or any committee, subcommittee or task force need be specified in any waiver of notice of such meeting.

Unless otherwise restricted by the Certificate of Incorporation or these Bylaws, Members may participate in a meeting by means of conference telephone or by any means by which all persons participating in the meeting are able to communicate with one another, and such participation shall constitute presence in person at the meeting.

Any notice required under these Bylaws may be provided by mail, facsimile, or electronic transmission.
ARTICLE X Procedures; Books and Records

The Executive Committee shall adopt policies and procedures for the conduct of meetings. In the event such policies and procedures conflict with the NAIC’s Certificate of Incorporation or Bylaws, the Certificate of Incorporation and Bylaws shall govern.

The books and records of the NAIC may be kept outside the State of Delaware at such place or places as may from time to time be designated by the Internal Administration Subcommittee (EX1) of the Executive Committee.

ARTICLE XI Amendments

These Bylaws may be altered or repealed and new Bylaws may be adopted at any regular or special meeting of the members by an affirmative vote, in person or by proxy, of a majority of the members entitled to vote at such meeting; provided, however, that any proposed alteration (except to correct typographical or grammatical errors or article, section or paragraph cross-references caused by other alterations, repeals, or adoptions) or repeal of, or the adoption of any Bylaw inconsistent with, Article II [Membership], Article VII, Paragraph 2 [Special Meetings of Members] and Paragraph 4 [Quorum], Article VIII [Elections], or this Article XI [Amendments] of these Bylaws (the “Supermajority Bylaws”) by the members shall require the affirmative vote, in person or by proxy, of at least two-thirds (2/3) of the members entitled to vote at such meeting and provided, further, that in the case of any such member action at a special meeting of members, notice of the proposed alteration, repeal or adoption of the new Bylaw or Bylaws must be contained in the notice of such special meeting. Corrections for typographical or grammatical errors or to article, section or paragraph cross-references caused by other alterations, repeals or adoption, shall only be made if approved by the affirmative vote of at least two-thirds (2/3) of the Executive Committee.

NAIC Policy Statement on Open Meetings
Revised: April 1, 2014

The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories. NAIC members are the elected and appointed state government officials who, along with their departments and staff, regulate the conduct of insurance companies and agents in their respective state or territory. The NAIC is committed to conducting its business openly. This policy statement applies to meetings of NAIC committees, subcommittees, task forces and working groups. It does not apply to Roundtable discussions, zone meetings, commissioners’ conferences, and other like meetings of the members. Applicable meetings will be open unless the discussion or action contemplated will include:

1. Potential or pending litigation or administrative proceedings which may involve the NAIC, any NAIC member, or their staffs, in any capacity involving their official or prescribed duties, requests for briefs of amicus curiae, or legal advice;

2. Pending investigations which may involve either the NAIC or any member in any capacity;

3. Specific companies, entities or individuals, including, but not limited to, collaborative financial and market conduct examinations and analysis;

4. Internal or administrative matters of the NAIC or any NAIC member, including budget, personnel and contractual matters, and including consideration of internal administration of the NAIC, including, but not limited to, by the Internal Administration (EX1) Subcommittee or any subgroup appointed thereunder;

5. Voting on the election of officers of the NAIC;

6. Consultations with NAIC staff members related to NAIC technical guidance, including, but not limited to, Annual and Quarterly Statement Blanks and Instructions, the Accounting Practices and Procedures Manual, and similar materials;

7. Consideration of individual state insurance department’s compliance with NAIC financial regulation standards by the Financial Regulation Standards and Accreditation (F) Committee or any subgroup appointed thereunder;

8. Consideration of strategic planning issues relating to federal legislative and regulatory matters or international regulatory matters; or

9. Any other subject required to be kept confidential under any Memorandum of Understanding or other agreement, state or federal law or under any judicial or administrative order.

Because not all situations requiring a regulator to regulator discussion can be anticipated at the time a meeting is scheduled, a meeting convened in open session can move into regulator to regulator session on motion by the chair or other member approved by a majority of the members present. Public notice will be provided of all applicable meetings. The reason for holding a meeting in regulator only session will be announced when the meeting notice is published, at the beginning of any regulator only session, and when an open meeting goes into regulator only session.

This revised policy statement shall take effect upon adoption by the membership.

[NOTE: (Effective Jan. 1, 1996, conference call meetings are included in the application of the policy statement, by action of the NAIC on June 4, 1995). This policy statement was originally adopted by the NAIC membership during the 1994 Fall National Meeting in Minneapolis, Minnesota, Sept. 18–20, 1994.]

Revisions Adopted by the NAIC Membership, April 1, 2014

</table>
1. Sept. 23, 1886: John K. Tarbox (MA) was elected President for the 1887 Convention; Samuel H. Cross (RI) was elected Vice-President; and Robert B. Brinkerhoff (OH) was elected Secretary. Mr. Tarbox died before the Convention assembled. Mr. Cross and Mr. Brinkerhoff retired as Vice-President and Secretary. Oliver Pillsbury (NH) was chosen to preside over the 1887 Convention. It is unknown who acted as Vice-President. Jacob A. McEwen (OH) was chosen to act as Secretary.

2. Aug. 21, 1890: Charles B. Allan (NE) was elected Secretary for the 1891 Convention; however, he resigned before the Convention assembled. Sept. 30, 1891: J. J. Brinkerhoff (IL) was elected Secretary for the 1891 Convention.

3. Sept. 18, 1895: William M. Hahn (OH) was elected President for the 1896 Convention and James R. Waddill (MO) was elected Vice-President; however, Mr. Hahn became functus Officio before the Convention assembled. Sept. 22, 1896: Mr. Waddill was elected President for the 1896 Convention and Stephen W. Carr (ME) was chosen to act as Vice-President.

4. Sept. 23, 1896: James R. Waddill (MO) was elected President for the 1897 Convention and Stephen W. Carr (ME) was elected Vice-President; however, Mr. Waddill was out of office at the date of the Convention. Sept. 7, 1897: Commissioner Carr was elected President for the 1897 Convention. It is unknown who acted as Vice-President.
5. Sept. 23, 1896: Frederick L. Cutting (MA) was elected Secretary for the 1897 Convention; however, he was out of office at the date of the Convention. Sept. 7, 1897: J. J. Brinkerhoff (IL) was elected Secretary for the 1897 Convention. 
6. Sept. 7, 1897: Frederick L. Cutting (MA) was elected Secretary for the 1898 Convention; however, he declined the offer. Sept. 13, 1898: J. J. Brinkerhoff (IL) was elected Secretary for the 1898 Convention.
7. Sept. 15, 1898: Elmer H. Dearth (MN) was elected President for the 1899 Convention; however, he was out of office at the date of the Convention. Sept. 5, 1899: Edward T. Orear (MO) was elected President for the 1899 Convention.
8. Sept. 20, 1900: J. A. O'Shaughnessy (MN) was elected President for the 1901 Convention; however, he was out of office at the date of the Convention. September 1901: William H. Hart (IN) was elected President for the 1901 Convention.
9. Sept. 29, 1910: Theodore H. Macdonald (CT) was elected Vice-President for the 1911 Convention; however, he was out of office at the date of the Convention. It is unknown who acted as Vice-President.
10. Aug. 25, 1911: Harry R. Cunningham (MT) was elected Secretary for the 1912 Convention; however, he resigned before the Convention assembled. March 1912: Fitz Hugh McMaster (SC) was elected Secretary for the 1912 Convention.
11. Aug. 1, 1913: Willard Done (UT) was elected First Vice-President for the 1914 Convention; however, he resigned before the Convention assembled. It is unknown who acted as First Vice-President.
12. Aug. 31, 1917: Emory H. English (IA) was elected President for the 1918 Convention; Robert J. Merrill (NH) was elected First Vice-President; and Michael J. Cleary (WI) was elected Second Vice-President. November 1917: Mr. Merrill resigned as First Vice-President. Dec. 6, 1917: Mr. Cleary was elected First Vice-President for the 1918 Convention and Walter K. Chorn (MO) was elected Second Vice-President. Jan. 1, 1918: Mr. English resigned as President and Mr. Cleary was elected President for the 1918 Convention by the Executive (EX) Committee. It is unknown who acted as First Vice-President.
13. Aug. 31, 1917: Fitz Hugh McMaster (SC) was elected Secretary for the 1918 Convention; however, he resigned before the Convention assembled. Dec. 6, 1917: Joseph Button (VA) was elected Secretary for the 1918 Convention.
14. Sept. 12, 1919: John B. Sanborn (MN) was elected Second Vice-President for the 1920 Convention; however, he resigned before the Convention assembled. June 1920: Alfred L. Harty (MO) was chosen to act as Second Vice-President for the 1920 Convention.
15. Sept. 3, 1920: Frank H. Ellsworth (MI) was elected President for the 1921 Convention; Alfred L. Harty (MO) was elected First Vice-President; and Thomas B. Donaldson (PA) was elected Second Vice-President. June 27, 1921: Mr. Ellsworth resigned as President; Mr. Harty was elected President for the 1921 Convention by the Executive (EX) Committee; Mr. Donaldson was elected First Vice-President; and Platt Whitman (WI) was elected Second Vice-President.
16. Sept. 8, 1922: Platt Whitman (WI) was elected President for the 1923 Convention; H. O. Fishback (WA) was elected First Vice-President; and John C. Luning (FL) was elected Second Vice-President. July 1, 1923: Commissioner Whitman resigned as President; Commissioner Fishback was elected President for the 1923 Convention by the Executive (EX) Committee; and Mr. Luning was elected First Vice-President by the Executive (EX) Committee. It is unknown who acted as Second Vice-President.
17. Sept. 18, 1925: W. R. C. Kendrick (IA) was elected President for the 1926 Convention. January 1926: Commissioner Kendrick resigned and Harry L. Conn (OH) was elected President for the 1926 Convention.
18. Nov. 19, 1926: Harry L. Conn (OH) was elected President for the 1927 Convention and Albert S. Caldwell (TN) was elected First Vice-President. April 1927: Superintendent Conn resigned as President. May 3, 1927: Commissioner Caldwell was elected President for the 1927 Convention and James A. Beha (NY) was elected First Vice-President.
19. Sept. 26, 1928: Charles R. Detrick (CA) was elected President for the 1929 Convention; James A. Beha (NY) was elected First Vice-President; and Howard P. Dunham (CT) was elected Second Vice-President. Jan. 1, 1929: Superintendent Beha resigned as First Vice-President. Commissioner Dunham was elected First Vice-President for the 1929 Convention. April 1929: Commissioner Detrick resigned as President. Commissioner Dunham was elected President for the 1929 Convention; Clarence C. Wysong (IN) was elected First Vice-President; and Jess G. Read (OK) was elected Second Vice-President.
20. Sept. 19, 1929: Joseph Button (VA) was elected Secretary for the 1930 Convention. Dec. 10, 1929: Commissioner Button resigned and Albert S. Caldwell (TN) was elected Secretary for the 1930 Convention.
21. Sept. 9, 1930: Clarence C. Wysong (IN) was elected President for the 1931 Convention; Jess G. Read (OK) was elected First Vice-President; and Clare A. Lee (OR) was elected Second Vice-President. January 1931: Commissioner Wysong resigned as President; Commissioner Lee was no longer serving as Second Vice-President; and Commissioner Read was elected President by the Executive (EX) Committee for the 1931 Convention. June 17, 1931: Charles D. Livingston (MI) was elected First Vice-President by the Executive (EX) Committee for the 1931 Convention and William A. Tarver (TX) was elected Second Vice-President by the Executive (EX) Committee.

22. Oct. 20, 1932: William A. Tarver (TX) was elected President for the 1933 Convention; Garfield W. Brown (MN) was elected First Vice-President; and Dan C. Boney (NC) was elected Second Vice-President. 1933: Commissioner Tarver was no longer acting as President and Commissioner Brown was elected President for the 1933 Convention. Commissioner Boney was chosen to act as First Vice-President for the 1933 Convention and George S. Van Shaick (NY) was chosen to act as Second Vice-President.

23. July 1935: It is unclear why no one acted as First Vice-President or Second Vice-President for the 1935 Convention.

24. June 23, 1939: J. Balch Moor (DC) was elected Vice-President; however, he died before the 1940 Convention assembled. John C. Blackall (CT) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

25. June 6, 1945: Edward L. Scheufler (MO) was elected Vice-President for the 1946 Convention; however, he resigned before the Convention assembled. Dec. 3, 1945: Robert E. Dineen (NY) was elected Vice-President by the Executive (EX) Committee for the 1946 Convention.

26. June 11, 1946: Jess G. Read (OK) was elected Secretary for the 1947 Convention; however, he died July 20, 1946. Sept. 4, 1946: Nellis P. Parkinson (IL) was elected Secretary by the Executive (EX) Committee to fill the unexpired term.

27. June 1953: George B. Butler (TX) was elected Vice-President; however, he died Sept. 28, 1953. It is unknown who acted as Vice-President for the November 1953 Convention. December 1953: Donald Knowlton (NH) was elected by the Executive (EX) Committee to fill the unexpired term.

28. May 1956: George A. Bowles (VA) was elected Secretary; however, he died in June 1956. Paul A. Hammel (NV) was elected Secretary to fill the unexpired term.

29. June 1958: Arch E. Northington (TN) was elected President; however, he resigned effective January 1959. Paul A. Hammel (NV) was elected President and Sam N. Beery (CO) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

30. June 1962: Joseph S. Gerber (IL) was elected Vice-President; however, he resigned before the June 1963 Convention assembled. The office of Vice President was vacant for the June 1963 Convention.

31. June 1964: Cyrus E. Magnusson (MN) was elected President; however, he resigned before the June 1965 Convention assembled. William E. Timmons (IA) was elected President by the Executive (EX) Committee to fill the unexpired term.

32. June 1968: Charles R. Howell (NJ) was elected President; however, he resigned effective Feb. 28, 1969. Ned Price (TX) was elected by the Executive (EX) Committee to fill the unexpired term.

33. June 1970: Richard E. Stewart (NY) was elected President; however, he resigned effective December 1970. Lorne R. Worthington (IA) was elected by Plenary to fill the unexpired term.

34. A constitutional amendment moved NAIC officer elections from June to December (commencing December 1974), President Johnnie L. Caldwell (GA) served a six-month term.

35. Ken E. DeShetler (OH) was elected President; however, he resigned effective January 1975. William H. Huff, III (IA) was elected by the Executive (EX) Committee to fill the unexpired term.

36. H. Peter Hudson (IN) was elected President; however, he resigned effective Nov. 15, 1979. It is unknown who presided over the December 1979 Convention.

37. John W. Lindsay resigned effective Sept. 3, 1981, as NAIC Vice-President and South Carolina Director of Insurance. Johnnie L. Caldwell (GA) was elected by the Executive (EX) Committee to fill the unexpired term.

38. David J. Lyons resigned effective June 17, 1994, as NAIC Vice President and Iowa Commissioner of Insurance. A special interim Plenary election was held June 12, 1994: Arkansas Insurance Commissioner Lee Douglass was elected Vice President to serve June 17, 1994, to Dec. 31, 1994.
39. September 2001: NAIC members unanimously agreed that its 2001 Fall National Meeting should be canceled in the wake of the tragic events that occurred Sept. 11, 2001. The meeting was scheduled for Sept. 22–25, 2001, at the Marriott and Westin Copley Place hotels in Boston, Massachusetts.

40. Ernst Csiszar resigned effective Aug. 18, 2004, as NAIC President and South Carolina Director of Insurance. Approximately two weeks later, Jim Poolman resigned as NAIC Vice President but remained as North Dakota’s Insurance Commissioner. A special Plenary interim election was held Sept. 13, 2004, during the Fall National Meeting in Anchorage, Alaska: Pennsylvania Insurance Commissioner Diane Koken was elected President; Oregon Insurance Administrator Joel Ario was elected Vice President; and Maine Insurance Superintendent Alessandro Iuppa was elected Secretary-Treasurer to serve from Sept. 13, 2004, to Dec. 31, 2004.

41. December 2004: NAIC members voted at its 2004 Winter National Meeting to adopt amendments to the NAIC Bylaws, which included the creation of a President-Elect position as an NAIC officer.

42. September 2005: NAIC members agreed to cancel its 2005 Fall National Meeting due to the devastation caused by Hurricane Katrina on Aug. 29, 2005. The meeting was scheduled for Sept. 10–13, 2005, at the Sheraton hotel in New Orleans, Louisiana.

43. Eric Serna resigned effective June 14, 2006, as NAIC Secretary-Treasurer and New Mexico Superintendent of Insurance. A special Plenary interim election was held during the 2006 Summer National Meeting: New Hampshire Insurance Commissioner Roger A. Sevigny was elected Secretary-Treasurer to serve from June 14, 2006, to Dec. 31, 2006.

44. Michael T. McRaith resigned effective May 31, 2011, as NAIC Secretary-Treasurer and Illinois Director of Insurance. A special Plenary interim election was held via conference call May 16, 2011: North Dakota Insurance Commissioner Adam Hamm was elected Secretary-Treasurer to serve from May 31, 2011, to Dec. 31, 2011.

46. Michael F. Consedine resigned effective Jan. 20, 2015, as NAIC President-Elect and Pennsylvania Insurance Commissioner. A special Plenary interim election was held via conference call Feb. 8, 2015: Missouri Insurance Director John M. Huff was elected President-Elect to serve from Feb. 8, 2015, to Dec. 31, 2015.

47. Sharon P. Clark resigned effective Jan. 11, 2016, as NAIC President-Elect and Kentucky Insurance Commissioner. A special Plenary interim election was held in Bonita Springs, Florida, on Feb. 7, 2016: Wisconsin Insurance Commissioner Ted Nickel was elected President-Elect; Tennessee Insurance Commissioner Julie Mix McPeak was elected Vice President; and Maine Insurance Superintendent Eric A. Cioppa was elected Secretary-Treasurer to serve from Feb. 7, 2016, to Dec. 31, 2017.

48. David Mattax, NAIC Secretary-Treasurer and Texas Insurance Commissioner died in office on April 13, 2017. A special Plenary interim election was held via conference call on May 12, 2017: South Carolina Director Raymond G. Farmer was elected Secretary-Treasurer to serve from May 12, 2017, to Dec. 31, 2017.

49. Gordon I. Ito resigned effective Dec. 31, 2018, as NAIC Vice President and Hawaii Insurance Commissioner. A special Plenary interim election was held in La Quinta, California, on Feb. 4, 2019: Florida Insurance Commissioner David Altmaier was elected Vice President to serve from Feb. 4, 2019, to Dec. 31, 2019.

CALL TO ORDER

Welcome to the 228th session of the National Association of Insurance Commissioners (NAIC). The meeting will now come to order.

INTRODUCTION OF HEAD TABLE

Honorable James J. Donelon, NAIC Past President and Louisiana Insurance Commissioner
Honorable Raymond G. Farmer, NAIC President-Elect and South Carolina Insurance Director
Honorable Kent Sullivan, Texas Insurance Commissioner
Honorable Dean L. Cameron, NAIC Secretary-Treasurer and Idaho Insurance Director
Honorable David Altmaier, NAIC Vice President and Florida Insurance Commissioner
Andrew J. Beal, NAIC Chief Operating Officer (COO) and Chief Legal Officer (CLO)
Michael F. Consedine, NAIC Chief Executive Officer (CEO)

WELCOME TO SPECIAL GUESTS

I would like to recognize our new members (video plays).

Next, I would like to take a moment to extend a welcome to special guests of the NAIC.

It is my pleasure to begin with our state legislator colleagues, who represent some of the best elected officials in our states’ capitols.

Each year, we make a special effort to reach out to state government officials. The work they do in our states goes hand in hand with the regulatory framework. Understanding the challenges we all face and getting their unique perspectives is vital to forming solid regulatory policies. Please take a moment to recognize our state official and legislator colleagues. Would our state government officials please stand?

We also have representatives from several federal government agencies, including the Federal Emergency Management Agency (FEMA), the Federal Insurance Office (FIO), the Financial Stability Oversight Council (FSOC), the Federal Reserve, the U.S. Department of the Treasury and the U.S. Department of Labor.

I’d like to also recognize our international colleagues from the International Association of Insurance Supervisors (IAIS), as well as a number of insurance regulators from around the globe.

Please join me in a round of applause to welcome our colleagues from the state and federal government, as well as the international community.

INTRODUCTION OF HOST

It is now my distinct pleasure to invite our Fall National Meeting host to the podium. I’ve asked Texas Insurance Commissioner Kent Sullivan to say a few words as he welcomes us to his home state.

HOST WELCOME

Thank you. Welcome to Austin. Welcome to Texas. They say everything is bigger in Texas, but nothing here is bigger than football. In Texas, this is just your typical $70 million high school football stadium. Well, OK, it’s big too if your “something else” is the big University of Texas (UT)-University of Oklahoma (OU) football rivalry.

Earlier this year, when I was minding my own business, my colleague from Oklahoma, Commissioner Glen Mulready, called and suggested a friendly wager over the UT-OU game. The loser would wear the other team’s jersey at the NAIC Fall National Meeting.
I knew immediately that this was a bad bet. I mean, think about it. If he loses, he wears a UT jersey in Austin, Texas—the home of the University of Texas. That’s no big deal. If I lose, I’m wearing an OU jersey in Austin, Texas. That’s a very big deal. That’s potentially life-threatening. But I felt I needed to uphold my state’s honor and take the bet.

And I had one advantage. I didn’t go to UT. You see, if I’d gone to UT, I’d have been focused on Texas actually winning the football game. Instead, I attended the University of Virginia (UVA), where we were terrible in football—and proud of it. Even our cheerleaders at UVA didn’t think we could win. The primary cheer from the sidelines was “beat the point spread.”

So, I used my UVA skill set and told Glen I’d take the bet, but I needed the line, ten-and-a-half points. He said he’d be good to me and not treat it like a rate increase request. Then he gave me 10. OU won, but only by seven. So, I felt back at home. My team lost, but I’d beat the point spread. So, we have a personalized, custom-fitting Longhorns jersey for Glen to wear. You’ll see it on him soon. He’s a good sport and a good friend.

In all seriousness, welcome to Austin and our Fall National Meeting. We hope you enjoy our fair city and we have a good, productive meeting.

What we do here is important. We regulate an industry that touches the lives of virtually every American. People count on insurance during their toughest times. And that means they count on us. Our task as regulators is constantly growing more difficult. We regulate an industry that is financially complex and technologically sophisticated. The market is growing in scope and speed and that creates a separate and unique set of challenges.

Here’s some of what we’re facing in Texas. You see how issues have grown and resources have stayed the same or even decreased. I suspect your situation isn’t much different. So how do we keep up? Well, we need to work together, and the NAIC can help us do that. It’s an organization that needs to help us share ideas, create coordinated and comprehensive solutions to national issues, and keep pace with potential technological solutions. Our regulated community may think that state agencies create bureaucratic barriers. But try dealing with state procurement rules and legislative appropriation! Sometimes the very nature of government impedes our ability to be nimble and stay ahead of the curve, particularly things like the technological curve. That’s a key area where the NAIC can help us. And it speaks to why our work here is so important.

I’d also like to challenge us to look at the issues we’re facing in a new way. Issues such as narrowing health networks, the use of big data, self-driving cars, artificial intelligence and the sharing economy. In this environment, the old canard “this is the way we’ve always done it” is simply not going to work anymore.

We need meaningful innovation. We need user-friendly solutions to solve practical problems. And we need plain-language communication so that our policyholders can understand how best to purchase and effectively use insurance products.

I look forward to discussing these issues with you over the next few days. And finally, I want to acknowledge a serious problem that I know many of you in the audience have, and that is finding the commissioner you’re looking for when you need to speak with him or her. I think that I can help you in one small way. Starting this afternoon, if you’re looking for the Oklahoma commissioner, he’ll be the guy in the Longhorns jersey.

Thanks to all of you. Thanks to my friend Glen and all of our colleagues in Oklahoma. Welcome to Austin!

**PRESIDENTIAL ADDRESS**

*Eric A. Cioppa, NAIC President*

Thank you, Commissioner Sullivan. Some of you have noticed the theme for our meeting is “Bigger in Texas.” It’s appropriate because the global insurance market is big, with more than $1.2 trillion dollars in net premiums written. Not to mention the size of the NAIC: 56 members strong, backed by nearly 11,000 state insurance regulators and 500 NAIC staff.

It’s a good thing we are so well supported, because our vision is equally ambitious. In Texas fashion, for us it was either “go big or go home.” We chose to “go big” in 2019. Whether it was taking on and achieving critical domestic and international priorities, or the continued progress on our strategic plan, *State Ahead*, we did not shy away from the big, tough issues and challenges. To the contrary, we embraced these challenges and laid out large-scale ideas and overarching objectives to propel us to meet the needs of the insurance markets of the future.

In keeping with the Texas-sized theme, this meeting is sizeable. They say little pieces make up the big picture. With nearly 100 official meetings in five days, it is certainly true here. Looking back to our Spring National Meeting in Orlando, we set out goals for 2019 and made a commitment to achieve real, meaningful progress on each.
I know none of us, myself included, did this for a personal legacy, but because we truly believe each of these areas is critical to the future of insurance regulation, both here in the U.S. and abroad.

This reminds me of my favorite Harry Truman quote: “It is amazing what you can accomplish if you do not care who gets the credit.” That fits for all the members around this table.

I am proud of the work of this body, in both long strides and incremental steps. Let me share with you some of that progress on each of our key initiatives that now form our collective legacy.

Annuities are lifetime protection for many Americans, and it’s important that those products are suitable for those purchasing them. To make sure NAIC guidance reflects changes since the model was first adopted in 2003, we are working through a number of updates.

In 2019 we made significant advancements in revising the NAIC Suitability in Annuity Transactions Model Regulation to evolve into a best interest standard, consistent with market trends and complimentary action at the federal level. The current strategy focuses on alignment, where appropriate, with the U.S. Security and Exchange Commission’s (SEC) regulations to enhance regulatory consistency.

Progress on this important initiative highlighted one of the most enduring qualities of NAIC members—our ability to find consensus in areas where others fall victim to partisanship and politics. It’s often been remarked that regardless of the states we come from, their size, their politics or demographics, we put that all aside when we enter these rooms and are bound by our common duties as regulators and our shared commitment to policyholders.

Related to policyholder protection is the very real issue of solvency and stability in the long-term care insurance market. This year, the NAIC appointed the Long-Term Care Insurance (EX) Task Force, an executive-level task force focused on rate coordination and consistency of long-term care insurance products. Tough topics, and while there is more work to be done, important progress was made this year.

We’ve known for some time there is no “silver bullet” that is going to solve the complex issues surrounding long-term care. If we can tackle individual elements, progress will be made. After all, the best way to eat a Texas-sized plate of barbecue is one bite at a time, and we’re doing just that.

But just as we need to resolve legacy issues, we need to keep an eye to the future. I know many of you joined us yesterday for the Center for Insurance Policy and Research’s (CIPR) fall program, “The State of Long-Term Care Insurance.” There is a need for innovation and fresh thinking in this space, and programs like these should help drive a productive conversation forward.

Health insurance markets remain a focus for insurance regulators. The NAIC supports member efforts to stabilize their markets while advocating for state flexibility and control, especially for the unique challenges faced by the territories. We remain one of the few national organizations not paralyzed on the topic of health care.

That’s not to suggest our members don’t have different points of view on health care; they do. One of our greatest strengths is that the nature of our state-based system can serve as laboratories of innovation, especially when we are united in a common cause for consumers.

An example of our consumer-centric focus on health care was our push for air ambulance balance billing reforms. In September, the U.S. Department of Transportation formed the Air Ambulance and Patient Billing Advisory Committee and appointed 13 members, including a state insurance regulator. This is a great opportunity and huge challenge, so we are lucky to have the world’s tallest politician advocating for us on the committee.

Another record was set this year in our communication collaboration efforts. To help educate consumers about the dangers of flood and wildfire, the NAIC partnered with state insurance departments, the Federal Insurance and Mitigation Administration and FEMA. In partnership, we launched the “Your Risk is Real” integrated consumer campaign. Education leads to preparation, and preparation makes communities more resilient.

For everyone sitting around this table and in this room, this is not just a sector priority; this is a generational priority. I know Director Farmer in his upcoming year as NAIC president is going to take on climate risk and resiliency as his top issue. We are committed to being part of the solution to this global crisis. History will not forgive complacency.
We all know natural disasters are becoming more frequent, costly and Texas-sized. I hope you will join us on Sunday for the “CIPR Policy Workshop: Natural Disaster Resiliency.” Tying together the needs of consumers, businesses large and small, and innovations in mitigation tools, this program promises to open a lively discussion about recovery.

On the federal side, the NAIC continues to support a long-term reauthorization of the National Flood Insurance Program (NFIP). We are hopeful that there will not be another lapse in the program, and all of you can help. Please reach out to your members of Congress and share your support for reauthorization of the NFIP.

Keeping ahead of changes in the insurance sector has always been a challenge this body has faced head-on. Technology-based innovations are no different. In addition to our work on adoption of the NAIC Insurance Data Security Model Law (#668) by the states, we are developing tools and resources to keep this membership informed.

We continue to develop resources for members and for the public, to engage, learn and look forward to upcoming challenges so we can tackle them together.

From a policy perspective, how we balance the regulation of data usage, artificial intelligence and privacy will be a defining moment for this sector. We have taken all that we’ve learned in prior years and are now applying it in the development of informed policymaking in these critical areas.

While innovations are exciting and challenging, the core of what we do is rooted in protecting policyholders through monitoring company solvency. To this end, we have made progress on the development of a group capital calculation. When finalized, this calculation will provide additional analytical information for use in assessing group risks and capital adequacy.

The NAIC finalized group capital calculation specifications for further evaluation and field-testing in 2019. Through our coordination with the Federal Reserve throughout the process, our method largely aligns with their “building block approach,” which, again, will lead to enhanced regulatory consistency in the U.S.

While domestic negotiations are never easy, they are a cakewalk compared to some of the pressures we face internationally. Despite being the world’s largest insurance market—and, for reference, Texas is twice the size of Germany—we are constantly pushing back against other jurisdictions’ approaches to regulation.

In 2019, we saw intense negotiations internationally, regarding the development of an international insurance capital standard by the IAIS.

Despite some extraordinary challenges, the NAIC was ultimately successful in executing our strategy and achieving our objectives for the next stage of development. We took what had only been a beachhead for our aggregation method two years ago and turned it into a global front-line.

While the U.S. does not plan to implement the reference ICS, Team USA remains committed to protecting U.S. consumers and companies that engage globally. I believe we have a clear path forward to that end.

Changes globally will impact companies in the U.S., whether they are international standards or tied to other financial sectors. A global understanding of the factors that impact our insurance markets is imperative. To that end, the NAIC continued to work on the U.S. regulatory framework’s program on liquidity risks, with a focus on life insurers due to their potential for large-scale economic impact. Our Macroprudential Initiative will give regulators more data points to better scope the risks taken on by the insurers they regulate.

In addition to executing on our policy priorities, I’ve been privileged to be president as we have moved forward on many of the objectives laid out in the State Ahead framework. Some highlights include enhanced tools for state insurance departments, better and more training opportunities for state regulators, and improved actuarial modeling resources.

We have enhanced financial analysis tools, improved data modeling capabilities and updated consumer resources. State Ahead is our blueprint for the future of the NAIC. Every person sitting around this table has played a part in helping with the construction of that future. And like so many things with the NAIC, we are not building this just for ourselves, but for the generations of regulators to come. We have a 150-year legacy to protect and we can all be proud of the role we’ve played in adding to the rich tapestry that is the NAIC.
At this point, the outgoing president typically turns to the president-elect to tell him or her about the shoes they have to fill or to offer advice. I’m not going to do that today. I wouldn’t do that do you. Instead, I turn to all of you around the table and in the audience.

I know Ray will do his part. I’m asking that all of you support him and continue to do your part. It is so important that everyone in this room participate, engage, support and—when necessary—push back. Together, we will set our course, adjust and ultimately advance the state-based system of insurance regulation.

Our collective resources and talents are immense. Leveraging these assets can and will position us not only for the next year, but for decades to come.

PERSONAL REMARKS

Eric A. Cioppa, NAIC President

Now I’d like to take a few minutes to offer some thanks. First, to the members around this table.

I’d like to personally thank you for the support, encouragement and, yes, pushback and frank discussions we’ve had. I think we are a better organization for it. I think I’ve made some friendships that will last me a lifetime. I very much appreciate all the support I’ve had this year.

Next, I want to offer my thanks to my staff back at home. The last two years, I think I’ve spent the majority of it on the road. They worked hard to support me. It’s nice to know that at home we didn’t miss a beat. Maybe that says what I’m doing is not necessary, but whatever. I have to thank them.

And next the officers. I can’t tell you how many times every single one of the officers has said to me, “What can I do to help?” And it wasn’t for anything other than they wanted to help. And I know I made life-long friends. I’d personally like to thank each and every officer for their support and a wonderful experience.

And then the NAIC itself. I can’t say enough about the NAIC. Mike and Andy, the faces of the NAIC, do an outstanding job. And the members behind Mike and Andy do an outstanding job. They move heaven and earth to make us succeed. And they work hard with one goal in mind: to enhance state regulation and propel us forward. And I want to thank them for all their work and efforts.

And finally, the most important person in the room, she’s my Mike and Andy rolled into one. My wife, Kathy, who is here somewhere. I think she’s in the row back there. She’s been more than patient in my years as an officer. The last two years, I’ve been on the road. I was sitting in Arizona where it was 80 degrees. I called home three-and-a-half feet of snow on the ground. She didn’t complain.

I was in Kuala Lumpur. In Maine, we have a lot of trees. And where we have a lot of trees and you get a bad storm, you lose power for several days. So, we have a personal generator that we use when we lose power. I usually hook it up, but when I was gone, she had to learn how to hook it up and run the generator. Which is good and I very much appreciate it. But when I got home, my son quipped. “You know, Dad, now that Mom knows how to run the generator, if she learns how to use the chainsaw, you’re pretty much obsolete.” I now hide my chainsaw when I go on the road.

Above all, thanks to my wife, Kathy, of 37 years. Thank you for everything.

AWARDS

Eric A. Cioppa, NAIC President

It is my honor to have the opportunity to recognize a few members who show exceptional dedication to the NAIC and insurance regulation with a special award.

In 1989, the NAIC established the Robert Dineen Award in honor of the founder of the NAIC’s Central Office in Kansas City. Robert Dineen was an attorney, insurance regulator and insurance executive. Throughout his career, he was a strong advocate for the preservation of state-based insurance regulation and played a major role in strengthening state regulation after Congress passed the McCarran-Ferguson Act in the 1930s. He served as superintendent of the New York State Insurance Department from 1943 to 1950. He then joined Northwestern Mutual Life Insurance Company in 1950 as a vice president and, ultimately, became president in 1965. In 1968, he was brought on as a consultant to NAIC.
His impressive career set us on a course of active and significant research and analysis. His work affected insurance legislation and regulation in every state and had a major impact on the structure of the American insurance industry. Each year, we present the Dineen Award to state insurance department staff members who exemplify the best of insurance regulation.

First, from Rhode Island, is Jack Broccoli. Jack, will you and Superintendent Elizabeth Kelleher Dwyer please join me at the podium?

Jack exemplifies in every respect what a regulator should be. He is tough yet balanced and fair, with a work ethic that is truly exceptional. Jack has provided more than 30 years of public service not only to the people of Rhode Island but also to insurance consumers across the country and around the world. He developed his own financial analysis tools that were adopted by many states across the country, including the Comprehensive Annual Analysis (CAA) and the Comprehensive Quarterly Analysis (CQA).

Once again, congratulations to you, Jack, and many thanks for your outstanding work on behalf of state-based insurance regulation.

Next, we would like to recognize Patrick McNaughton. Patrick, will you and Commissioner Mike Kreidler (WA) please join me at the podium?

Patrick has played a significant role in the insurance regulatory system, both at the state and national level, with all he has accomplished in his career with the Washington State Office of the Insurance Commissioner and the NAIC. Given his upcoming retirement at year’s end, Patrick embodies the spirit of the award. He consistently goes the extra mile to further and better the state-based system of insurance regulation.

Again, thank you, Patrick, for your commitment to our efforts. Congratulations!

These two regulators represent what’s greatest about what we do to safeguard consumers and promote a strong insurance regulatory environment. Please join me in congratulating them both.

**ADJOURNMENT**

*Eric A. Cioppa, NAIC President*

With that, I officially conclude this Opening Session of the 228th meeting of the National Association of Insurance Commissioners.
To: Members of the NAIC and Interested Parties
From: The Staff of the NAIC

Committee Action

NAIC staff have reviewed the committee, subcommittee and task force reports and highlighted the actions taken by the committee groups during the Fall National Meeting in Austin, TX. The purpose of this report is to provide NAIC members, state insurance regulators and interested parties with a summary of these meeting reports.

EXECUTIVE (EX) COMMITTEE AND PLENARY (Joint Session)
Dec. 10, 2019

1. Adopted the report of the Executive (EX) Committee, which met Dec. 8 and took the following action:
   a. Adopted the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, which met Dec. 7.
   b. Adopted its Nov. 18 and Oct. 7–8 interim meeting report.
   c. Adopted the reports of its task forces: the Financial Stability (EX) Task Force; the Government Relations (EX) Leadership Council; the Innovation and Technology (EX) Task Force; and the Long-Term Care Insurance (EX) Task Force.
   d. Adopted its 2020 proposed charges.
   e. Adopted Requests for NAIC Model Law Development to amend: 1) the Insurance Holding Company System Regulatory Act (#440); 2) the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450); and 3) the Unfair Trade Practices Act (#880).
   f. Received a status report on the NAIC State Ahead strategic plan implementation.
   g. Received a status report on model law development efforts.
   h. Heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).
2. Adopted by consent the committee, subcommittee and task force minutes of the Summer National Meeting.
3. Adopted the NAIC 2020 proposed budget.
4. Adopted the NAIC 2020 proposed committee charges.
5. Received the following committee reports: the Life Insurance and Annuities (A) Committee; the Health Insurance and Managed Care (B) Committee; the Property and Casualty Insurance (C) Committee; the Market Regulation and Consumer Affairs (D) Committee; the Financial Condition (E) Committee; the Financial Regulation Standards and Accreditation (F) Committee; and the International Insurance Relations (G) Committee.
6. Adopted the 2020 Generally Recognized Expense Table (GRET).
7. Adopted Actuarial Guideline LII—Variable Annuity Early Adoption (AG 52).
9. Adopted the Post-Disaster Claims Guide.
10. Adopted amendments to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556).
12. Adopted the Re-Evaluation of Qualified Jurisdictions and Summary of Findings and Determinations for Bermuda, France, Germany, Ireland, Japan, Switzerland and the United Kingdom (UK) for the NAIC List of Qualified Jurisdictions.
13. Adopted the Evaluation of Reciprocal Jurisdiction and Summary of Findings and Determinations for Bermuda, Japan and Switzerland for the NAIC List of Reciprocal Jurisdictions.
14. Adopted revisions to Part D: Primary Licensing, Redomestications and Change of Control of the Accreditation Standards.
15. Received a status report on state implementation of NAIC-adopted model laws and regulations.
16. Received the results of the 2020 zone officer elections. Midwest Zone: Director Larry Deiter, Chair (SD); Director Jillian Froment, Vice Chair (OH); and Commissioner Doug Ommen, Secretary (IA). Northeast Zone: Commissioner Stephen C. Taylor, Chair (DC); Commissioner Jessica Altman, Vice Chair (PA); and Commissioner Gary Anderson, Secretary (MA). Southeast Zone: Commissioner Jim L. Ridling, Chair (AL); Commissioner Mike Chaney, Vice Chair (MS); and Commissioner James J. Donelon, Secretary (LA). Western Zone: Director Lori K. Wing-Heier, Chair (AK); Commissioner Michael Conway, Vice Chair (CO); and Commissioner Andrew Stolfi, Secretary (OR).
17. Elected the 2020 NAIC officers: Director Raymond G. Farmer, President (SC); Commissioner David Altmaier, President-Elect (FL); Director Dean L. Cameron, Vice President (ID); and Director Chlora Lindley-Myers, Secretary-Treasurer (MO).

EXECUTIVE (EX) COMMITTEE
Dec. 8, 2019
1. Adopted the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, which met Dec. 7 and took the following action:
   a. Adopted its Nov. 18, Oct. 7–8 and Summer National Meeting minutes.
   b. Adopted the Internal Administration (EX1) Subcommittee’s Nov. 26 and Oct. 18 minutes, which included the following action:
      1. Received an update on the Defined Benefit Plan portfolio as of Sept. 30.
      2. Received an update on the NAIC long-term investment plan portfolio as of Sept. 30.
      3. Ratified the vote to begin restructuring the Defined Benefit Plan portfolio to implement the liability driven investment (LDI) strategy.
      4. Approved the 2020 proposed charges for the Internal Administration (EX1) Subcommittee and the Information Systems (EX1) Task Force.
   c. Adopted the report of the Audit Committee, which met Dec. 3 and took the following action:
      1. Received an overview of the Oct. 31 financial statements.
      2. Received an update on the 2019/2020 Service Organization Control (SOC) 1 and SOC 2 reviews and reports.
      3. Received an update on database filing fee payments.
      4. Received an update on zone financials.
   d. Adopted the report of the Information Systems (EX1) Task Force, which met Dec. 6 and took the following action:
      1. Received an update on three draft 2020 fiscals with a technology component.
      2. Received an operational report for the NAIC’s information technology (IT) activities.
      3. Received a portfolio update, which includes 20 active projects, and a summary of three projects completed since the Summer National Meeting.
      4. Reaffirmed the Audit Committee Charter.
   e. Approved a recommendation on a vendor and funding to conduct a System for Electronic Rate and Form Filing (SERFF) assessment.
   f. Approved the release of a fiscal to conduct a principal-based reserve (PBR) yearly renewable term (YRT) reinsurance study for public review and comment.
   g. Heard a presentation on the NAIC branding project, which includes updating the NAIC logo.
   h. Received the joint chief executive officer (CEO)/chief operating officer (COO) report.
   i. Received a cybersecurity briefing.
2. Adopted the report of the Executive (EX) Committee, which met Nov. 18 and Oct. 7–8 and took the following action:
   a. Approved the NAIC 2020 proposed budget and recommended the budget be adopted by the full NAIC membership at the Fall National Meeting.
   b. Approved recommendations for the NAIC’s Defined Benefit Plan Fund Investments.
   c. Adopted the investment policy statement (IPS) for the NAIC’s long-term funds.
   d. Adopted the IPS for the NAIC’s defined benefit plan and the defined contribution plan.
   e. Adopted the Information Systems (EX1) Task Force’s 2020 proposed charges.
   f. Adopted the Internal Administration (EX1) Subcommittee’s 2020 proposed charges.
   g. Exposed the NAIC 2020 proposed budget, including five fiscals, for a public comment period ending Nov. 7.
3. Adopted its 2020 proposed charges.
4. Adopted Requests for NAIC Model Law Development to amend: 1) the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Regulation with Reporting Forms and Instructions (#450); and 2) the Unfair Trade Practices Act (#880).
5. Received a status report on the NAIC State Ahead strategic plan implementation.
6. Received a status report on model law development efforts for amendments to the: Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); Annuity Disclosure Model Regulation (#245); Suitability in Annuity Transactions Model Regulation (#275); Health Maintenance Organization Model Act (#430); Life Insurance Disclosure Model Regulation (#580); Mortgage Guaranty Insurance Model Act (#630); and the following new models: the Real Property Lender-Placed Insurance Model Act; the Pet Insurance Model Act; and the Pharmacy Benefit Manager (PBM) Model Law.
7. Heard reports from NIPR and the Compact.
10. Adopted the report of the Innovation and Technology (EX) Task Force. See the Task Force listing for details.
11. Adopted the report of the Long-Term Care Insurance (EX) Task Force. See the Task Force listing for details.

Financial Stability (EX) Task Force
Dec. 9, 2019
1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Liquidity Assessment (EX) Subgroup.
3. Exposed the proposed 2019 NAIC Liquidity Stress Test Framework jointly with the Liquidity Assessment (EX) Subgroup for a 60-day public comment period ending Feb. 7.
4. Heard an update on Financial Stability Oversight Council (FSOC) developments.
5. Received an update from the Receivership and Insolvency (E) Task Force on its work to address the Task Force’s referral letter to undertake analysis relevant to the Macroprudential Surveillance Initiative.
6. Heard an update on collateralized loan obligations (CLO) stress tests.
7. Heard an update on macroprudential surveillance.
8. Received an update from the Valuation Analysis (E) Working Group on the Task Force’s referral to assess a potential concern related to the American Academy of Actuaries’ (Academy) economic scenario generators (ESGs).

Government Relations (EX) Leadership Council
The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting.

Innovation and Technology (EX) Task Force
Dec. 9, 2019
1. Adopted its Oct. 18 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted the Sept. 5 minutes of the Artificial Intelligence (EX) Working Group.
   c. Adopted its 2020 proposed charges, which include a few relatively minor changes from its 2019 charges.
   d. Heard a consumer representative request for an InsurTech bulletin.
   e. Adopted a Request for NAIC Model Law Development to revise the Unfair Trade Practices Act (#880).
   f. Discussed comments related to the North Dakota anti-rebating bulletin.
2. Adopted the report of the Artificial Intelligence (EX) Working Group, which met Dec. 7 and took the following action:
   a. Reviewed a draft principles document from the North Dakota Insurance Department as a “strawman” for moving forward to complete the deliverable.
   b. Discussed comments related to the Organisation for Economic Co-operation and Development (OECD) Artificial Intelligence Principles as a basis for developing artificial intelligence (AI) principles for the insurance industry.
   d. Decided to meet at least once via conference call prior to the 2020 Spring National Meeting to discuss the comments and the draft.
3. Adopted the report of the Big Data (EX) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Oct. 7 minutes, which included the following action:
      1. Heard a presentation from ISO Claims Solutions regarding the use of big data in fraud detection and claims settlement. The presentation provided information on ISO’s ClaimSearch database.
      2. Discussed the use of big data in fraud detection and claim settlement, which included two presentations from ISO and a presentation from the National Insurance Crime Bureau (NICB), and discussed the Working Group members’ views on whether state insurance regulators have the appropriate regulatory authority under existing unfair trade laws and unfair claims settlement regulations to address marketplace practices.
      3. Received an update on the work of the Casualty Actuarial and Statistical (C) Task Force. The Task Force continues to facilitate training and sharing of expertise on predictive analytics through webinars and conference calls on Nov. 26, Oct. 22, Oct. 8 and Aug. 27. The Task Force continues to work on its draft white paper on best practices for the regulatory review of predictive analytics and is reviewing comments from 11 interested parties.
      4. Discussed an update on the work of the Accelerated Underwriting (A) Working Group, which held an organizing conference call on Oct. 2 to review a work plan for accomplishing its charge. The work plan contemplates three general phases to accomplish its work. The first phase is information gathering. The second phase is to identify issues and the best ways to address them (white paper, model bulletin, model law or something else). The third phase is to develop a work product by the 2020 Fall National Meeting.
      5. Received an update on NAIC technical and non-technical rate review trainings. In addition to “book club” calls, the NAIC is developing technical and non-technical training. The technical training will be conducted by the NAIC’s consultant, Dorothy Andrews (Actuarial & Analytics Consortium LLC), and will focus on training actuaries and statisticians. The non-technical training will target rate filing reviewers and market conduct examiners. This training
will focus on evaluating rate classes for unfair discriminations and understanding when additional actuarial assistance is needed.

f. Received a presentation from Birny Birnbaum (Center for Economic Justice—CEJ) on the role of advisory organizations and the need to create the accountability and regulatory oversight of new vendors of big data algorithms as contemplated in antitrust laws and advisory organization statutes.

4. Adopted the report of the Speed to Market (EX) Working Group, which met Dec. 3 and Sept. 12 and took the following action:
   a. Discussed the System for Electronic Rate and Form Filing (SERFF) enhancements and prioritization of several focus areas, including: submission validations, review tools, workload management, performance and reliability, the Search function, document management, reporting and data export, streamlined correspondence, and user experience.
   b. Heard an update on the survey sent to states about SERFF functionality and received a brief overview of the Request for Proposal (RFP) to conduct a business and technical assessment of SERFF.
   c. Discussed suggestions for 2019 changes to the Life, Accident/Health, Annuity and Credit Uniform Product Coding Matrix (PCM) effective Jan. 1, 2020. Changes related to existing Types of Insurance (TOIs)/sub-TOIs and the addition of new TOIs/sub-TOIs were determined not to be needed, but the Working Group voted to remove references to 2010 dates on Medicare Supplement instructions for all TOIs and sub-TOIs.
   d. Discussed suggestions for 2019 changes to the Property/Casualty (P/C) Uniform PCM effective Jan. 1, 2020, and adopted two description changes and a sub-TOI under 16.0 Workers’ Compensation.

5. Heard a report from NAIC staff on activity of the Innovation and Technology State Contacts group.

6. Discussed options for addressing the anti-rebating issues identified as potentially impeding innovation. Commissioner Jon Godfread (ND) presented an updated version of North Dakota’s draft guideline for addressing the anti-rebating issue in his state. The Task Force decided that work complete and discontinue work on a bulletin to begin work on development of language to amend Model #880 since the Executive (EX) Committee adopted the Request for NAIC Model Law Development to do so. The Task Force asked for volunteers to work on a drafting group to develop this model law language.

7. Heard a report on cybersecurity initiatives. Director Raymond G. Farmer (SC) provided a legislative update on adoption of the Insurance Data Security Model Law (#668) and an update on recent and upcoming cybersecurity tabletop exercises. Cynthia Amman (MO), Privacy Protections (D) Working Group chair, also provided an update on data privacy issues. She said the Working Group is in the process of building the membership list as well as the distribution lists for interested state insurance regulators and interested parties. Additionally, she said that the Working Group met Dec. 8 and took the following action:
   a. Discussed its proposed workplan to meet monthly via conference call to keep on track so it can accomplish its charges by the deadline established.
   b. Received a presentation by Jennifer McAdam (NAIC), during which she reviewed: the NAIC Insurance Information and Privacy Protection Model Act (#670); the Privacy of Consumer Financial and Health Information Regulation (#672); the General Data Protection Regulation (GDPR); the California Consumer Privacy Act (CCPA); and the state data privacy legislation.
   c. Received an update from Kendall Cotton, Montana state auditor, on current legislative activities in the state.
   d. Discussed comments received from the CEJ, the National Association of Mutual Insurance Companies (NAMIC) and the American Property Casualty Association (APCIA).

8. Heard an update on a request from Mr. Birnbaum regarding development of a document that would outline the difference between insurance products and banking and other consumer products for the benefit of startups and other companies new to the insurance industry. The Task Force agreed this should not be a charge to the Task Force but discussed other avenues available to get this information communicated and made available through Center for Insurance Policy and Research (CIPR) products, as well as the NAIC’s Professional Designation Program.

9. Heard an update on the National Conference of Insurance Legislators (NCOIL) insurance modernization activity from U.S. Rep. Matt Lehman (R-IN), vice president of NCOIL.

**Long-Term Care Insurance (EX) Task Force**

**Dec. 9, 2019**

1. Adopted its Oct. 31 and Summer National Meeting minutes, which included adoption of its 2020 proposed charges.

2. Received progress reports on the activities of the Task Force’s workstreams as follows:
   a. The Multi-State Rate Review Practices workstream is refining a set of selection principles and criteria for guiding the development of a recommended rate review methodology.
   b. The Restructuring Techniques workstream is developing its strategic plan.
   c. The Reduced Benefit Options and Consumer Notices workstream conducted a state survey to gather information about states’ practices in reviewing and approving reduced benefit options and the associated consumer notices. The workstream plans to research further and gather more information.
d. The Valuation of Long-Term Care Insurance (LTCI) Reserves workstream continues to focus on work performed at the NAIC on the actuarial review of insurers’ actuarial filings and solvency monitoring.

e. The Non-Actuarial Variance Among States workstream conducted a limited state survey to identify factors affecting rate approvals that are not of an actuarial basis. The workstream plans to gather additional information and begin drafting best practices.

f. The Data Call Design and Oversight workstream issued a request for a proposal to select a consultant to conduct a data call of LTCI insurers in order to accumulate, analyze and describe to NAIC members the current level of rate inequity among the states’ policyholders.

3. Heard comments from interested parties, including Cantilo & Bennett LLP and the American Council of Life Insurers (ACLI).

INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE
See the Executive (EX) Committee and Plenary (joint session) listing for details.

Information Systems (EX1) Task Force
Dec. 6, 2019
1. Adopted its Summer National Meeting minutes.
2. Received an update on three draft 2020 fiscals with a technology component.
3. Received an information technology (IT) operational report on the NAIC’s IT activities, including: a) product highlights; b) innovation and technology; c) service and support; d) data collection metrics; e) team; f) project portfolio summary; and g) technology adoption and system usage. The report provides updates for upcoming improvements, impacts to new state technology offerings from the NAIC and general updates on the activities of the NAIC technology team.
4. Received a project portfolio update, including project status reports for 20 active technical projects and a summary of three projects completed since the Summer National Meeting.
5. Received an update on a new NAIC Technology Products and Services catalog.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE
Dec. 8, 2019
1. Adopted its Nov. 4 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted its 2020 proposed charges.
   c. Adopted the Life Actuarial (A) Task Force’s 2020 proposed charges.
   d. Adopted the 2020 Generally Recognized Expense Table (GRET).
   e. Adopted Actuarial Guideline LII—Variable Annuity Early Adoption (AG 52).
2. Discussed comments received on the draft Suitability in Annuity Transactions Model Regulation (#275) and approved the draft as revised during this meeting, with the exception of the draft templates, which were referred back to the Annuity Suitability (A) Working Group for discussion during a conference call to be scheduled before year-end.
3. Adopted the following working group and task force reports: the Annuity Disclosure (A) Working Group, including its Dec. 2, Sept. 19 minutes and an extension of the Request for NAIC Model Law Development; the Life Insurance Illustration Issues (A) Working Group, including its Oct. 21, Sept. 17, Sept. 3, July 30 minutes and an extension of the Request for NAIC Model Law Development; and the Retirement Security (A) Working Group, including its Nov. 13 and Oct. 23 minutes.
4. Adopted the report of the Accelerated Underwriting (A) Working Group, which met Dec. 8 and took the following action:
   a. Adopted its Oct. 2 minutes, which included the following action:
      1. Discussed its draft work plan for completing its charge by the 2020 Fall National Meeting.
   b. Heard a presentation on accelerated underwriting in life insurance from Patrick L. Brockett (The University of Texas at Austin).
   c. Discussed its next steps, which includes additional presentations prior to the 2020 Spring National Meeting.
5. Adopted the report of the Annuity Suitability (A) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Nov. 5, Oct. 29, Oct. 15, Oct. 8, Sept. 17 and Summer National Meeting minutes, which included the following action:
      1. Reviewed and discussed a draft of proposed revisions to Model #275 developed by the technical drafting group. The draft reflected the framework developed by the Working Group during its discussions at the Summer National Meeting and during its July 29, July 23 and June 20 meetings, which include a best interest standard of conduct in Model #275.
      2. Exposed a draft of proposed revisions to Model #275 for a public comment period ending Sept. 30.
      3. Discussed the comments received by the Sept. 30 public comment period deadline.
      4. Referred the revised draft of Model #275 to the Life Insurance and Annuities (A) Committee for its consideration. As part of that motion, it was noted that in sending the draft to the Committee, it does not mean that each Working
Group member supports every provision in the draft, but that the Working Group has completed its work as directed by the Committee at the Spring National Meeting. The Committee chair exposed the revised draft for a public comment period ending Nov. 26.

6. Adopted the report of the Life Actuarial (A) Task Force, which met Dec. 5–6. See the Task Force listing for details.

**Life Actuarial (A) Task Force**

**Dec. 5–6, 2019**

1. Adopted its Oct. 17, Oct. 3, Sept. 26, Sept. 19 and Sept. 12 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted its 2020 proposed charges.
   c. Adopted the 2020 Generally Recognized Expense Table (GRET).
   d. Provided direction to the IUL Illustration (A) Subgroup on revising *Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest* (AG 49).
   e. Adopted the American Academy of Actuaries (Academy) Life Experience Committee and the Society of Actuaries (SOA) Preferred Mortality Oversight Group Valuation Basic Table Team (Joint Committee) Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with AG 38 and VM-20.
   f. Heard updates on the YRT field test from the Academy YRT Field Test Project Oversight Work Group.

2. Heard an update on the YRT field test from the Academy YRT Field Test Project Oversight Work Group.

3. Heard an update from the Academy Annuity Reserves Work Group on the proposed timeline and approach for the development of a principle-based reserve (PBR) framework for non-variable annuities.

4. Heard an update from the Academy SVL Interest Rate Modernization Work Group on a plan to develop valuation rates for products that pass exclusion tests under the Annuity Reserves Work Group PBR framework for non-variable annuities.

5. Adopted the report of the VM-22 (A) Subgroup.

6. Discussed considerations for changes to the Joint Committee process for developing life mortality improvement factors for use with *Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation* (AG 38) and VM-20, Requirements for Principle-Based Reserves for Life Products.

7. Exposed amendment proposal 2019-33, which applies as appropriate PBR requirements for group insurance contracts with individual risk selection issued under insurance certificates.

9. Exposed amendment proposal 2019-60, which revises the applicability of credibility methods to a company’s business subject to VM-20.

10. Exposed amendment proposal 2019-61, which clarifies that policies with a rider s for universal life with secondary guarantee (ULSG) are excluded from the Life PBR Exemption when the secondary guarantee is material.

11. Heard an update from the SOA on research and education.

13. Submitted a proposal to the Life Insurance and Annuities (A) Committee that it consider forming a guaranteed issue (GI) valuation subgroup.

15. Heard an update on the Request for Proposal (RFP) for the economic scenario generator (ESG).

16. Heard an update on the cessation of the London Interbank Offered Rate (LIBOR) and its possible replacement.

18. Discussed PBR mortality aggregation.

19. Heard an update from the Compact.

20. Adopted the minutes of the IUL Illustration (A) Subgroup, and the Subgroup report, which included directing the Subgroup to revise AG 49 to subject cap buy-ups and index return enhancements to constraints reasonably similar to the constraints to be applied to multipliers.

21. Discussed the Valuation Basic Table (VBT) and Expiring Experience, and comments received on Amendment Proposal Form (APF) 2019-56.

22. Adopted the report of the Experience Reporting (A) Subgroup.

**HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE**

**Dec. 8, 2019**

1. Adopted its Oct. 24 and Summer National Meeting minutes. During its Oct. 24 meeting, the Committee:
   a. Adopted the Health Actuarial (B) Task Force’s 2020 proposed charges, the Regulatory Framework (B) Task Force’s 2020 proposed charges and the Senior Issues (B) Task Force’s 2020 proposed charges.
   b. Adopted its 2020 proposed charges.

2. Adopted the report of the Consumer Information (B) Subgroup, including its Nov. 18, Oct. 21 and Oct. 7 minutes.
3. Adopted the report of the Health Innovations (B) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Oct. 28 and Summer National Meeting minutes.
   b. Heard two presentations on innovative insurer efforts to contain health care costs. A presentation from UnitedHealth Group (UHG) described the prevalence and causes of wasteful spending, the importance of incentives in driving changed health behaviors, and the benefits of more healthy choices on the part of consumers. A presentation from Medica showed the effects of Medica’s engagement with accountable care organizations (ACOs), which resulted in risk-adjusted cost savings in five of six cases.
   c. Heard a presentation on health care costs from the Health Care Cost Institute (HCCI) on trends in health spending. The HCCI pointed out that due to high prices, costs have increased even as utilization has decreased in recent years. It also noted that value-based care may be having an effect on the margins, but such care has only been rigorously studied in the Medicare context.
   d. Heard a presentation on providers’ reactions to insurer cost containment efforts from the Texas Medical Association (TMA). The presentation described the burden of prior authorization and other utilization management practices, and it recommended greater regulation of prior authorization.
   e. Heard a presentation on consumer priorities for cost containment efforts from Families USA. Families USA shared survey data on the difficulties paying for health care services, discussed state efforts regarding the control of prescription drug costs and recommended surprise billing solutions that do not raise premiums.

4. Heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on its recent regulatory activities. The CCIIO provided the Committee with a snapshot of current open enrollment, including data on the number of applications submitted and enrollment by subsidized and unsubsidized individuals. The CCIIO also discussed its efforts to provide price transparency in the health care marketplace, which is a top priority for the Trump administration.

5. Heard a presentation from the co-author of the book *Overcharged: Why Americans Pay Too Much for Health Care*. The presentation highlighted the current problems in the health care system leading to high health care costs and solutions to address them.

6. Heard a panel presentation on state surprise billing laws. Representatives from the Texas Department of Insurance (DOI) and the Washington DOI discussed their surprise bill laws highlighting provisions in the laws related to their scope and method of establishing the out-of-network provider payment.

7. Heard an update on legal actions related to the federal Affordable Care Act (ACA), including: 1) a case challenging the constitutionality of the individual mandate and its potential impact on other key ACA provisions; 2) a case challenging the legality of the recent federal association health plan (AHP) regulation; 3) a case challenging the legality of the recent federal short-term, limited-duration plan (STLD) regulation; and 4) a case challenging the legality of the federal government’s refusal to pay participants for full risk corridor amounts.

8. Heard a federal legislative update on congressional legislation and administrative actions of interest to the Committee.

9. Adopted the report of the Health Actuarial (B) Task Force, which met Dec. 6. See the Task Force listing for details.

10. Adopted the report of the Long-Term Care Insurance (E/B) Task Force. See the Task Force listing under the Financial Condition (E) Committee for details.

11. Adopted the report of the Regulatory Framework (B) Task Force. See the Task Force listing for details.

12. Adopted the report of the Senior Issues (B) Task Force. See the Task Force listing for details.

### Health Actuarial (B) Task Force

Dec. 6, 2019

1. Adopted the report of the Health Care Reform Actuarial (B) Working Group, which included the following action:
   a. Heard an update from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on the risk adjustment data validation (RADV) white paper released on Dec. 6.

2. Adopted its Sept. 17, Aug. 27 and Summer National Meeting minutes, which included the following action:
   a. Adopted its 2020 proposed charges.
   b. Received an update from the American Academy of Actuaries (Academy) and Society of Actuaries (SOA) on progress on changes to the 2005 Group Term Life Waiver Mortality and Recovery Table (2005 Table).

3. Adopted the report of the Long-Term Care Actuarial (B) Working Group, which met Dec. 6 and took the following action:
   a. Accepted its Oct. 24, Sept. 24, Aug. 28, Aug. 20 and Summer National Meeting minutes, which included the following action:
      2. Adopted the Long-Term Care Pricing (B) Subgroup’s Sept. 12 minutes, which included the following action:
         a. Discussed group long-term care insurance (LTCI) pricing.
      3. Adopted the report of the Long-Term Care Valuation (B) Subgroup, which included guidance for year-end 2019 *Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves* (AG 51) filings.
         b. Heard an update from the Academy on LTCI Work Group activities.
c. Heard an update from the Society of Actuaries (SOA) on long-term care insurance (LTCI) research.

5. Heard an update from the SOA on health insurance research.

6. Heard an update from the Academy Health Practice Council.

**Long-Term Care Insurance (E/B) Task Force**

See the Task Force listing under the Financial Condition (E) Committee for details.

**Regulatory Framework (B) Task Force**

Dec. 7, 2019

1. Adopted its Oct. 2 and Summer National Meeting minutes. During its Oct. 2 meeting, the Task Force:
   a. Adopted its 2020 proposed charges.

2. Adopted the report of the Accident and Sickness Insurance Minimum Standards (B) Subgroup, which included its Nov. 25, Nov. 19, Nov. 4, Oct. 28, Oct. 7 and Sept. 16 minutes. During these meetings, the Subgroup:
   a. Discussed the comments received on Sections 1–5 of the *Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act* (#171). The Subgroup plans to complete its review of the comments received via conference call after the Fall National Meeting.

3. Adopted the report of the ERISA (B) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Discussed association health plans (AHPs), including state legislative and regulatory activity addressing multiple employer welfare arrangements (MEWAs).
   c. Heard from the U.S. Department of Labor (DOL) about its reorganization and continuing willingness to coordinate with the NAIC and the states on issues of mutual interest.
   d. Heard from the Georgetown University Center on Health Insurance Reforms (CHIR) about its Freedom of Information Act (FOIA) request to the DOL for information on MEWA investigations.
   e. Adjourned into regulator-to-regulator session pursuant to paragraph 2 (pending investigations which may involve either the NAIC or any member in any capacity), paragraph 3 (specific companies, entities or individuals) and paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings.

4. Adopted the report of the HMO Issues (B) Subgroup, which included its Nov. 21 and Sept. 16 minutes. During these meetings, the Subgroup:
   a. Exposed the Virginia Insurance Bureau’s recommendations for revising the *Health Maintenance Organization Model Act* (#430) to address inconsistencies and redundancies with the provisions in the *Life and Health Insurance Guaranty Association Model Act* (#520) for public a public comment period ending Oct. 15.
   b. Discussed the Virginia Insurance Bureau’s revised recommendations for revising Model #430 and the Maine Bureau of Insurance’s comments on the revised recommendations.
   c. Adopted a motion to accept Maine’s approach for revising Model #430. The Subgroup plans to review and discuss an initial draft of revisions to Model #430 reflecting Maine’s approach via conference call after the Fall National Meeting.

5. Adopted the report of the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup, which included its Dec. 2, Oct. 3, Aug. 29, Aug. 22 and Aug. 15 minutes. During these meetings, the Subgroup:
   a. Heard presentations from various stakeholders, including representatives from health insurers, pharmaceutical manufacturers, pharmacy benefit managers (PBMs), academia and consumers. The Subgroup conducted these information-gathering sessions to help inform its discussions on next steps to carry out its 2019 charge to consider developing a new NAIC model to establish a licensing or registration process for PBMs. As part of its 2019 charge, the Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.
   b. Discussed its next steps in making progress on its 2019 charge during a regulator-to-regulator session pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings.

6. Heard an update from the CHIR’s work related to federal Affordable Care Act (ACA) implementation and other issues of interest to state insurance regulators. The update included a discussion of a forthcoming publication discussing state oversight of health care sharing ministries. There was also discussion of the CHIR’s work related to MEWAs. The CHIR recently published thousands of pages of DOL investigative records regarding MEWAs. The CHIR is continuing to track and analyze state regulatory approaches to MEWAs and short-term, limited-duration plans (STLDPs) in the wake of federal rule changes. The CHIR is also continuing its work to track state reforms affecting the individual market. The presentation also highlighted the CHIR’s future research projects, including projects related to reinsurance and standardized health plans.

7. Heard a presentation on the implementation of the Consumer Purchasing Model in Summit County, CO.
8. Heard a panel presentation from America’s Health Insurance Plans (AHIP) on health care cost trends. The presentation also included affordability recommendations for state insurance regulators to consider.

Senior Issues (B) Task Force
Dec. 7, 2019
1. Adopted its Oct. 16, Sept. 24 and Summer National Meeting minutes, which included the following action:
   a. Adopted a letter to the federal Centers for Medicare & Medicaid Services (CMS).
   b. Adopted its 2020 proposed charges.
2. Heard an update on federal funding for the State Health Insurance Assistance Program (SHIP).
3. Heard about a legislative proposal drafted by U.S. Sen. Pat Toomey (PA), which is based upon one of the long-term care (LTC) policy option recommendations adopted by the Task Force that would allow for retirement account dollars to be used to buy long-term care insurance (LTCI), so families can better plan for long-term services and supports (LTSS) needs.
4. Heard an issue raised by Bonnie Burns (California Health Advocates—CHA) about conflicts between Medicare, the Consolidated Omnibus Budget Reconciliation Act of 1986 (COBRA) and the Coordination of Benefits Model Regulation (§120).

PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE
Dec. 9, 2019
1. Adopted its Nov. 18 minutes, which included the following action:
   a. Adopted its Sept. 10 minutes, which included the following action:
      1. Adopted its Summer National Meeting minutes.
      2. Adopted documents related to the private flood insurance data call.
   b. Adopted additional documents related to the private flood insurance data call, including making the data publicly available.
   c. Discussed proposed blanks changes related to private flood insurance.
   d. Discussed the upcoming Fall National Meeting.
2. Adopted the following working group reports: the Cannabis Insurance (C) Working Group; the Lender-Placed Insurance Model Act (C) Working Group; the Pet Insurance (C) Working Group; and the Transparency and Readability of Consumer Information (C) Working Group.
3. Adopted its 2020 proposed charges.
4. Adopted a blanks request to create a supplement to collect private flood insurance data and to revise the Credit Insurance Experience Exhibit to include private flood coverages.
5. Adopted an extension for revisions to the proposed Real Property Lender-Placed Insurance Model Act.
6. Adopted Considerations for State Insurance Regulators in Building the Private Flood Insurance Market, a document meant to provide state insurance regulators with actions that might be considered to facilitate the growth of the private flood insurance market in their states.
7. Heard a presentation from SBP on work the group does to promote resiliency and mitigation among homeowners pre- and post-disaster.
8. Heard a presentation on underinsurance issues from the American Property Casualty Insurance Association (APCIA) and the National Association of Mutual Insurance Companies (NAMIC).
9. Heard an update on crop insurance from the U.S. Department of Agriculture (USDA) and the National Crop Insurance Services (NCIS).
10. Reported that state insurance regulators are currently reviewing private passenger auto state exhibits created from data collected from statistical agents. The Committee plans to release the private passenger auto report on its website in the near future.
11. Adopted the report of the Catastrophe Insurance (C) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted the report of the State Disaster Response Plan drafting group, which included the following action:
      1. Updated the Working Group regarding the status of the State Disaster Response Plan.
      2. Exposed the draft of the State Disaster Response Plan for a 30-day public comment period ending Jan. 6, 2020.
   d. Adopted the NAIC Considerations for State Insurance Regulators in Building the Private Flood Insurance Market. The document will be sent to the Property and Casualty Insurance (C) Committee with comments provided by the Reinsurance Association of America (RAA) and NAMIC.
   e. Heard from FEMA and Milliman on Risk Rating 2.0. The presentation focused on the limitations of the current NFIP rates, as well as the changes FEMA hopes to incorporate in its new risk rating system.
12. Adopted the report of the Climate Risk and Resilience (C) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Oct. 2 and Summer National Meeting minutes. During its Oct. 2 meeting, the Working Group:
   b. Heard an update on Working Group members’ climate resilience-related activities, which included participation in several key conferences focused on sustainability and resilience.
   c. Discussed the NAIC Climate Risk Disclosure Survey, including climate risk mitigation and resilience measures reported by insurers and the incorporation of the Financial Stability Board (FSB) Task Force on Climate-Related Financial Disclosures (TCFD) guidelines into the response guidelines.
   d. Heard a presentation on the American International Group’s (AIG) newly implemented sustainability strategy and enhanced reporting, including participating in the 2018 TCFD disclosure report.

13. Adopted the report of the Terrorism Insurance Implementation (C) Working Group, which met Dec. 8 and took the following action.
   a. Adopted its Summer National Meeting minutes.
   b. Heard updates on congressional activity related to the federal Terrorism Risk Insurance Act (TRIA), which expires on Dec. 31, 2020. This included a report from NAIC staff on congressional activity related to reauthorization of TRIA, including a summary of testimony from Director Chlora Lindley-Myers (MO) before the House Financial Services Committee. Brooke Stringer (NAIC) also reported the U.S. House of Representatives passed a seven-year TRIA reauthorization bill that does not make substantial changes to the program but requires the Government Accountability Office (GAO) to conduct a study on cyber terrorism risks and calls for further reporting on the affordability and availability of terrorism risk insurance for places of worship.
   d. Heard a presentation from NAIC staff regarding preliminary results from the State Supplement portion of the 2019 terrorism risk insurance data call, including an overview of the quality of the data.

14. Adopted the report of the Casualty Actuarial and Statistical (C) Task Force. See the Task Force listing for details.
15. Adopted the report of the Surplus Lines (C) Task Force. See the Task Force listing for details.
16. Adopted the report of the Title Insurance (C) Task Force. See the Task Force listing for details.
17. Adopted the report of the Workers’ Compensation (C) Task Force. See the Task Force listing for details.

Casualty Actuarial and Statistical (C) Task Force
Dec. 7, 2019
1. Adopted its Summer National Meeting minutes.
2. Adopted its Nov. 12 and Oct. 15 minutes, which included the following action:
   a. Adopted its 2020 proposed charges.
   b. Adopted a revised implementation plan for the Casualty Actuarial Society (CAS)/Society of Actuaries (SOA) Task Force’s Appointed Actuary Continuing Education Verification Process.
   c. Exposed the Best Practices for Regulatory Review of Predictive Analytics white paper for a public comment period ending Nov. 22.
3. Adopted the report of the Actuarial Opinion (C) Working Group, including its Nov. 20 and combined Oct. 4, Oct. 1, Sept. 20, Sept. 12, Sept. 10 and Sept. 6 minutes. During these meetings, the Working Group took the following action:
   e. Discussed Statement of Actuarial Opinion (SAO) statistics.
   f. Discussed the 2019 SAO instructions. The Blanks (E) Working Group issued a correction in October to the version included in the Annual/Quarterly Statement Instructions publication. The revisions are posted on the Blanks (E) Working Group’s web page.
   g. Discussed the 0% intercompany pool and a company’s persistent adverse development.
5. Adopted the oral report of the Statistical Data (C) Working Group. The Dwelling Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance Report (Homeowners Report) has been publicly released. The Report on Profitability by Line by State (Profitability Report) and the Competition Database Report are adopted and should be released in December. The Auto Insurance Database Report will be considered for adoption after the Fall National Meeting.
7. Heard a presentation about current pricing practices in the United Kingdom (UK).
9. Discussed the Actuarial Standards Board’s (ASB) request for input on a potential Property/Casualty (P/C) Rate Filing Actuarial Standard of Practice (ASOP). State insurance regulators are asked to submit potential answers to the questions asked by the ASB by Jan. 7, 2020.

10. Heard reports from the American Academy of Actuaries (Academy) regarding the activities of its Committee on Property and Liability Financial Reporting (COPLFR) and its Casualty Practice Council. COPLFR has conducted a webinar and in-person training and is developing a frequently asked questions (FAQ) document on the changes in the 2019 SAO instructions.

11. Heard reports on actuarial professionalism from the Academy, the Actuarial Board for Counseling and Discipline (ABCD), and the ASB.

12. Heard reports on P/C actuarial research from the CAS and the SOA.

Surplus Lines (C) Task Force
Dec. 7, 2019
1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the Surplus Lines (C) Working Group, which met Sept. 26 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and once during an open session. During the meeting, the Working Group approved four applications for the NAIC Quarterly Listing of Alien Insurers.
3. Discussed comments received regarding a 2020 annual blanks proposal regarding the modification of Schedule T to include a new Part 3 that would add details on “Home State” direct premiums written. The blanks proposal was temporarily tabled, and discussion will continue at the 2020 Spring National Meeting.
4. Received an update on a referral to the Producer Licensing (D) Task Force, including proposed revisions to Standard 37 and Standard 38 of the State Licensing Handbook. Discussion will continue during the Producer Licensing (D) Task Force’s meeting at the Fall National Meeting.
5. Heard details regarding adjustments to exempt commercial purchaser minimum qualifications, which are required every five years.

Title Insurance (C) Task Force
Dec. 8, 2019
1. Adopted its Sept. 25 and Summer National Meeting minutes, which included adoption of its 2020 proposed charges.
2. Heard an update on recent fraudulent activities.
3. Heard a presentation on the title industry, including types of endorsements, market statistics, closing protection letter (CPL) statutes and the effect of mandatory title insurance from Demotech.
4. Heard a presentation on the history of CPLs from Stewart Title and Land Title Guarantee Company of Colorado.
5. Received compiled NAIC information on CPLs.

Workers’ Compensation (C) Task Force
Dec. 9, 2019
1. Adopted its Summer National Meeting minutes.
2. Adopted the report of the NAIC/IAIABC Joint (C) Working Group, which included the following action:
   a. Updated the Task Force regarding the status of the Workers’ Compensation Policy and the Changing Workforce white paper.
   b. Exposed the draft of the Workers’ Compensation Policy and the Changing Workforce white paper for a 30-day public comment period ending Jan. 6, 2020.
3. Heard a presentation regarding official disability guidelines and formularies.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE
Dec. 9, 2019
1. Adopted its Oct. 1 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Appointed a new Privacy Protections (D) Working Group to address the charge: “Review state insurance privacy protections regarding the collection, use and disclosure of information gathered in connection with insurance transactions, and make recommended changes, as needed, to certain NAIC models, such as the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672), by the 2020 Summer National Meeting.”
2. Adopted its 2020 proposed charges, including the charges of the Antifraud (D) Task Force, the Market Information Systems (D) Task Force and the Producer Licensing (D) Task Force.
3. Adopted a workers’ compensation standardized data request, which will be incorporated into the NAIC Market Regulation
Handbook for the states to voluntarily use to determine if a company follows appropriate procedures with respect to the issuance and/or termination of workers’ compensation policies.

4. Adopted property/casualty (P/C) travel insurance examination standards, which will be incorporated into the NAIC Market Regulation Handbook for the states to voluntarily use for conducting travel insurance company examinations. The standards are based upon the Travel Insurance Model Act (#632).

5. Adopted revisions to the NAIC State Licensing Handbook, which was revised to be consistent with established NAIC policy on producer licensing.

6. Adopted the 2019 Continuing Education Reciprocity (CER) Agreement. This agreement is used to support the use of the CER Form. Continuing education (CE) providers may use the CER Form to streamline the course-approval process in multiple states. Through the reciprocal approval process, the CE provider’s home state conducts a substantive review of the CE course; therefore, non-resident states do not need to perform a similar review for a course previously approved by the home state.

7. Adopted the reports of its working groups: the Advisory Organization Examination Oversight (D) Working Group; the Market Conduct Annual Statement Blanks (D) Working Group; the Market Conduct Examination Standards (D) Working Group; the Market Actions (D) Working Group; and the Market Regulation Certification (D) Working Group. The adoption of the reports included adoption of the following:

8. Heard a presentation on mental health parity examinations from the American Psychiatric Association (APA). The APA provided an overview of existing parity market conduct examination areas of interest and encouraged state insurance regulators to use and expand their parity oversight and enforcement authority.

9. Adopted the report of the Market Analysis Procedures (D) Working Group, which met Dec. 8 and took the following action:
   a. Adopted its Nov. 21, Oct. 31 and Aug. 27 minutes, which included the following action:
      1. Adopted its Summer National Meeting Minutes.
      2. Heard an update on the short-term, limited duration (STLD) data call.
      3. Discussed the analysis of lender-placed Market Conduct Annual Statement (MCAS) data.
      4. Discussed a uniform process for addressing MCAS waiver and extension requests.
      5. Agreed not to include fraternals in the MCAS until a formal proposal is received for their inclusion in the MCAS.
      6. Discussed the addition of “Other Health” as the next line of business in the MCAS.
      7. Heard an update on the STLD data call template.
      8. Adopted “Other Health” as a line of business in MCAS.
      9. Discussed a uniform process for addressing MCAS waiver and extension requests.
   b. Heard an update on the STLD data call. A reminder letter was sent to all companies on Dec. 5 reminding them of the Dec. 13 due date.
   c. Discussed the plan for revising the MCAS Best Practices Guide.
   d. Discussed its 2020 proposed charges.
   e. Discussed the “Other Health” line of business for the MCAS and the process for developing the blank in the Market Conduct Annual Statement Blanks (D) Working Group.

10. Adopted the report of the Privacy Protections (D) Working Group, which met Dec. 8 and took the following action:
    a. Heard a presentation by NAIC legal staff, which included the following:
       1. Reviewed Model #670.
       2. Reviewed Model #672.
       4. Reviewed the California Consumer Privacy Act (CCPA).
       5. Reviewed State Data Privacy Legislation.
    b. Discussed the draft briefing document “Privacy Protection (D) Working Group Workplan” and noted that the Working Group will meet on a regular basis via conference call, perhaps every six weeks beginning in 2020.
    c. Asked for additional Working Group members, interested state insurance regulators and interested parties.
    d. Heard comments from the Center for Economic Justice (CEJ), the National Association of Mutual Insurance Companies (NAMIC), the American Property Casualty Insurance Corporation (APCIC) and the American Council of Life Insurers (ACLI).

11. Adopted the report of the Antifraud (D) Task Force. See the Task Force listing for details.

13. Adopted the report of the Producer Licensing (D) Task Force. See the Task Force listing for details.
Antifraud (D) Task Force
Dec. 8, 2019
1. Adopted its Oct. 31 and Summer National Meeting minutes. During its Oct. 31 meeting, the Task Force took the following action:
   a. Adopted its 2020 proposed charges.
   b. Received updates from the National Insurance Crime Bureau (NICB) and the Coalition Against Insurance Fraud (CAIF).
2. Received an update from the Antifraud Education Enhancement (D) Working Group. The Working Group conducted an investigator safety webinar on Oct. 30. The webinar had more than 300 participants and received a 4.6 out of 5 review.
4. Discussed the fraudulent treatment of consumers. The Task Force was presented with a Buzzfeed article bringing awareness to a potential threat claiming that an alliance between insurers and law enforcement is working against innocent consumers. The Task Force decided to further review and provide an additional update at the 2020 Spring National Meeting.
5. Heard a report from the Healthcare Fraud Prevention Partnership (HFPP) and the resources available to states.
6. Heard reports on antifraud activity from NAIC staff and the CAIF.

Market Information Systems (D) Task Force
Dec. 7, 2019
1. Adopted its Oct. 29 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted the report of the Market Information Systems Research and Development (D) Working Group, which met Sept. 19 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings, and took the following action: 1) reviewed the outstanding Uniform System Enhancement Request (USER) forms; and 2) reprioritized outstanding projects.
   c. Adopted its 2020 proposed charges.
2. Adopted the report of the Market Information Systems Research and Development (D) Working Group, which met Nov. 19 and Nov. 15 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings. During these meetings, the Working Group took the following action:
   a. Reviewed and prioritized the outstanding USER forms.
   b. Reviewed the Regulatory Information Retrieval System (RIRS) subject matter expert (SME) group’s report and recommendations for changes to the RIRS coding.
   c. Reviewed the Market Information Systems (MIS) data analysis results.
   d. Adopted improvements to address data quality of the Complaints Database System (CDS); the Market Action Tracking System (MATS); RIRS action and effective dates; and provide training on Market Conduct Annual Statement (MCAS) waiver and extension processes.
   e. Adopted the MIS Data Analysis Metric and Recommendations.
   f. Received a report on the outstanding USER forms.
   g. Discussed its new charge to make recommendations for the use of artificial intelligence (AI) in the MIS. The Task Force will receive comments and hear presentations at the 2020 Spring National Meeting.

Producer Licensing (D) Task Force
Dec. 7, 2019
1. Adopted its Oct. 25 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted its 2020 proposed charges.
   c. Discussed proposed revisions to the NAIC Uniform Licensing Standards (ULS) for surplus lines that would permit a state the flexibility to require both an underlying property/casualty (P/C) license and accident and health (A&H) license, only an underlying P/C license, or only an underlying A&H license prior to the issuance of a resident surplus lines license.
   d. Discussed a draft outline of a white paper to review the role of chatbots in the distribution of insurance.
   e. Discussed NAIC/Financial Industry Regulatory Authority (FINRA) data sharing, which will add new data fields of FINRA’s Central Registration Depository (CRD) number and FINRA active/inactive status to the NAIC’s State Producer Licensing Database (SPLD).
2. Adopted revisions to the NAIC State Licensing Handbook (Handbook), which was revised to be consistent with established NAIC policy on producer licensing.
3. Adopted the 2019 Continuing Education Reciprocity (CER) Agreement. This agreement is used to support the use of the Uniform Continuing Education Reciprocity Course Filing Form (CER Form). Continuing education (CE) providers may use the CER Form to streamline the course-approval process in multiple states. Through the reciprocal approval process, the CE provider’s home state conducts a substantive review of the CE course and, therefore, non-resident states do not need to perform a similar review for a course previously approved by the home state.

4. Discussed the Surplus Lines (C) Task Force request to consider whether the requirement of a resident producer to hold underlying P/C licenses before a surplus lines license is issued should be expanded to permit an A&H license to fulfill this requirement. There continues to be divergent views on what, if any, changes should be made to the ULS for surplus lines. The Task Force decided not to modify the ULS. The Task Force decided it would be better for consumers and industry if each state implements changes to state laws, as needed, as the surplus line market for A&H products develops.

5. Adopted the report of the Producer Licensing Uniformity (D) Working Group, including its Oct. 30, Oct. 10, Sept. 26, Sept. 12, Aug. 29 and Aug. 21 minutes. During these meetings, the Working Group took the following action:
   a. Drafted proposed revisions to the Handbook.
   b. Discussed comments received on the proposed revisions to the Handbook.
   c. Adopted the proposed revisions to the Handbook.

6. Adopted the report of the Uniform Education (D) Working Group, including its Oct. 31 and Aug. 22 minutes. During these meetings, the Working Group took the following action:
   a. Drafted proposed revisions to the CER Agreement.
   b. Discussed comments received on the proposed revisions to the CER Agreement.
   c. Adopted the proposed revisions to the CER Agreement.

7. Heard a report from the NIPR Board of Directors, which met Dec. 6. During this meeting, the Board heard a report from the NIPR Audit Committee, which reported NIPR’s total revenues are $3,555,225 (10.2%) above budget through October, and 13.9% above the prior year. The Board approved NIPR’s 2020 budget, with projected revenues of $46.1 million and projected expenses of $43.3 million. The Board heard an update on the progress of implementing NIPR’s strategic plan, which will be completed in 2020. In addition to the general progress on the plan, two major strategic initiatives have been accomplished this year. NIPR implemented Florida for resident licensing for its individual insurance producers, and it is anticipated Florida’s resident business entities will be available before year-end. Another major accomplishment was a joint NAIC/NIPR security infrastructure initiative, data de-identification. The joint project was part of the NAIC’s State Ahead strategic plan initiative and involved extensive work by the teams to protect personally identifiable information (PII) by masking or de-identifying the PII data in a consistent manner for all NAIC and NIPR non-production technical environments. A third strategic initiative, which is coming in January 2020, is an updated NIPR website design that will provide easier navigation and improve the user experience.

FINANCIAL CONDITION (E) COMMITTEE
Dec. 9, 2019

1. Adopted its Oct. 31, Aug. 29 and Summer National Meeting minutes. During its Oct. 31 and Aug. 29 meetings, the Committee took the following action:
   a. Adopted its 2020 proposed charges.
   b. Adopted a Request for NAIC Model Law Development related to the group capital calculation.
   c. Adopted revisions to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556).
   d. Adopted proposed changes to the Annual Statement Instructions – Property/Casualty, specifically related to the Actuarial Opinion, including, among other things, the definition of “qualified actuary.”

2. Adopted the following working group reports: the Group Solvency Issues (E) Working Group; and National Treatment and Coordination (E) Working Group.

3. Adopted the report of the Mortgage Guaranty Insurance (E) Working Group, which met Dec. 8 and took the following action:
   a. Exposed a proposed mortgage guaranty insurance capital model for a 45-day public comment period ending Jan. 22, 2020. The model measures a mortgage insurer’s expected capital based on a portfolio of mortgage loans for which it provides guaranty insurance.
   b. Exposed the revised Mortgage Guaranty Insurance Model Act (#630) for a 45-day public comment period ending Jan. 22, 2020. The model was last updated July 2000, and as a result, the model was substantially overhauled.

5. Adopted the report of the Group Capital Calculation (E) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Oct. 30, Aug. 29 and Summer National Meeting minutes, which included the following action:
      1. Adopted a revised memorandum on debt.
      2. Adopted a Request for NAIC Model Law Development related to the group capital calculation (GCC).
      3. Discussed needed confidentiality protections.
   b. Heard a summary of data and initial observations from the GCC field test.

6. Adopted the report of the Restructuring Mechanisms (E) Working Group, which met Dec. 8 and took the following action:
   a. Adopted its Oct. 1 and Summer National Meeting minutes, which included the following action:
      1. Asked follow-up questions and heard answers from Enstar Group and Aon Service Corporation on their respective
         views on different restructuring mechanisms.
   b. Discussed plans for drafting a white paper as a deliverable of its charges.
   c. Received final restructuring principles from the American Council of Life Insurers (ACLI) and the American Property
      Casualty Insurance Association (APCIA).
   d. Discussed segregated accounts, protected cells and guaranty fund protection.
   e. Heard from the National Conference of Insurance Guaranty Funds (NCIGF) regarding its adopted position on
      restructuring.
   f. Received a report of the Restructuring Mechanisms (E) Subgroup. The Subgroup has distributed a survey to the states
      regarding the transactions and current activity, including input on the definition of “runoff.”
   g. Discussed the Prudential and Rothesay Life decision and various viewpoints.
   h. Received notification from the Oklahoma Insurance Department that they recently approved their first Insurance
      Business Transfer (IBT).

8. Adopted the report of the Capital Adequacy (E) Task Force. See the Task for listing for details.

9. Adopted the report of the Examination Oversight (E) Task Force. See the Task for listing for details.

10. Adopted the report of the Receivership and Insolvency (E) Task Force. See the Task for listing for details.

11. Adopted the report of the Reinsurance (E) Task Force. See the Task for listing for details.

13. Adopted the report of the Valuation of Securities (E) Task Force. See the Task for listing for details.

Accounting Practices and Procedures (E) Task Force
Dec. 8, 2019

1. Adopted its Aug. 22 and Summer National Meeting minutes.

2. Adopted the report of the Statutory Accounting Principles (E) Working Group, which met Dec. 7 and took the following
   action:
   a. Adopted its Sept. 9 and Summer National Meeting minutes.
   b. Adopted the following nonsubstantive revisions to statutory accounting guidance:
      1. Revisions adopt: a) Statement of Statutory Accounting Principles (SSAP) No. 61R—Life, Deposit-Type and
         Accident and Health Reinsurance disclosures with an effective date of Dec. 31, 2020; b) A-791 Q&A updates
         regarding contracts with medical loss ratios (MLRs); and c) updates to the 2c. Q&A regarding risk transfer and
         group term life yearly renewable term (YRT) reinsurance with an effective date of Jan. 1, 2021. The proposed
         revisions to the A-791 Q&A regarding the scope of nonproportional contracts subject to Appendix A-791 were
         referred to the informal life and health reinsurance drafting group to address informal application questions. The
         Working Group directed notification to the Life Actuarial (A) Task Force.
      2. Revisions clarify that goodwill resulting from the acquisition of a subsidiary, controlled or affiliated (SCA) entity
         by an insurance reporting entity that is reported on the SCA financial statements (resulting from the application
         of pushdown) is subject to the 10% admittance limit based on the acquiring entity’s capital and surplus. The
         remainder of the agenda item was re-exposed.
      3. Revisions clarify the recognition and measurement guidance for derivatives that do not qualify as hedging, income
         generation or replication transactions.
      4. Revisions clarify that nonadmittance is required when there is an unalleviated substantial doubt about an SCA’s
         ability to continue as an ongoing concern identified in any part of the audit report.
   5. Revisions reject:
      i. ASU 2019-05, Targeted Transition Relief
      ii. ASU 2019-06, Extending the Private Company Accounting Alternatives on Goodwill and Certain Identifiable
         Intangible Assets to Not-for-Profit Entities
      iii. ASU 2019-03, Updating the Definition of Collections
      iv. ASU 2018-08, Clarifying the Scope and the Accounting Guidance for Contributions Received and
         Contributions Made
6. Revisions clarify that only wash sales that cross reporting period end-dates are subject to the wash sale disclosure.
8. Revisions incorporate the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (U.K. Covered Agreement), into Appendix A-785—Credit for Reinsurance.
9. Adopted the following editorial revisions to statutory accounting:
   i. Clarify wording in an existing SSAP No. 62R—Property and Casualty Reinsurance disclosure.
   ii. Reference the definition of a structured note.
   iii. Add two new suffixes for Securities Valuation Office (SVO) filings carried over from the prior year.

6. Exposed the following substantive revisions to statutory accounting guidance:
   1. A revised issue paper and a substantively-revised SSAP No. 32—Preferred Stock.
   2. SSAP No. 105—Working Capital Finance Investments incorporating industry revisions to program requirements, as directed by the Working Group, and directed NAIC staff to draft an issue paper.

7. Exposed the following nonsubstantive revisions to statutory accounting guidance:
   1. Revisions specify that cash pooling structures that meet specified criteria qualify as cash equivalents.
   2. Revisions incorporate additional concepts to prevent the “rolling” of certain investments as cash equivalents or short-term investments. Revisions exclude qualifying cash pools from rolling requirements.
   4. Revisions reject ASU 2017-11, Accounting for Certain Financial Instruments with Down Round Features; Replacement of the Indefinite Deferral for Mandatory Redeemable Financial Instruments of Certain Noncontrolling Interests with a Scope Exception and incorporate guidance for when certain freestanding instruments shall be recognized as liabilities, not equity.
   5. Revisions expand guidance regarding financial guarantees and the use of the equity method for when losses exceed the equity value. The “Illustration of the Application of INT 00-24” will be inserted as an exhibit.
   6. SSAP No. 25—Affiliates and Other Related Parties:
      i. Revisions data-capture existing disclosures, which are currently completed in a narrative format. A blanks proposal to expose the data-captured template was proposed to be concurrently exposed.
      ii. Revisions clarify the types of entities that are included as related parties and that a non-controlling ownership interest greater than 10% is a related party and subject to the related party disclosures, the guidance for disclaimers of affiliation, and control for statutory accounting. The revisions also reject seven Financial Accounting Standards Board (FASB) ASUs for statutory accounting. The exposure includes an intent to dispose agenda item 2011-16, which is a historical item drafted to consider the SSAP No. 25 definition. With exposure, directed notification to the Group Solvency Issues (E) Working Group.
   7. Revisions provide enhanced disclosures to identify when an issued surplus note’s anticipated or typical cash flows have been partially or fully offset by a held asset.
   8. Revisions eliminate the multi-step financial modeling designation guidance in determining final NAIC designations for residential mortgage-backed securities (RMBS)/commercial mortgage-backed securities (CMBS) securities. This exposure is contingent on a related action by the Valuation of Securities (E) Task Force.
   9. Revisions include footnote excerpts in the reporting exhibits to aggregate deposit-type contracts captured in Exhibit 5 – Life Contracts and an inquiry as to whether a similar footnote would be beneficial for Exhibit 6 – Accident and Health Contracts. Comments regarding instruction clarifications for Exhibit 7 – Deposit-Type Contracts were requested. With exposure, directed notification to the Financial Stability (EX) Task Force.
   10. Revisions propose minor edits to the liquidity disclosures regarding withdrawal characteristics for life and deposit-type contracts to match noted reporting clarifications.
   11. Revisions expand managing general agent (MGA) and third-party administrator (TPA) disclosures.
   12. Revisions clarify that the installment fee guidance should be narrowly applied. Comments are requested on how related installment fee expenses should be reported, whether guidance to separately identify and reclassify installment fee expenses to other expenses should be provided, and whether diversity should be permitted in reporting installment fee expenses. The Casualty Actuarial and Statistical (C) Task Force and the Property and Casualty Risk-Based Capital (E) Working Group will be notified of the exposure.
   13. Revisions incorporate interested parties’ recommendations to separate the guidance by product type and emphasize guidance that loss and loss adjusting expense liabilities are established regardless of payments to third parties (except for capitated health claim payments). The revisions emphasize existing guidance that claims that related liabilities are not recognized as paid until the losses are paid to claimants or claims are adjusted.
   14. Revisions incorporate disclosure updates for reinsurers from reciprocal jurisdictions.
15. Requested comments on preferred approaches for reporting retroactive contracts that meet the exception for prospective accounting and the characteristics of the approaches. Requested industry and state insurance regulator volunteers, and directed notification to the Casualty Actuarial and Statistical (C) Task Force.

16. Revisions include additional NAIC staff modifications regarding persistency commission and levelized commission arrangements to address certain comments received to allow for further discussion. With exposure, directed a referral to the Life Actuarial (A) Task Force.

17. Revisions clarify the reporting of derivatives with financing premiums, and requested comments on whether guidance allowing offset should be considered for derivatives and related financing provisions.

18. Revisions clarify that the fair value of collateral received or held for derivative disclosure purposes shall be reported net of collateral paid/pledged if a counterparty has the legal right to offset. Updates to applicable annual statement instructions are proposed to be concurrently exposed.

19. Revisions clarify that the “assignment” of goodwill is a disclosure element. Also directed revisions to the Sub-1 Acquisition Overview filing template to capture this information for new SCA acquisitions.

20. Revisions clarify that a look-through of a more-than-one holding company structure is permitted if each of the holding companies within the structure complies with the requirements.

22. Revisions reject ASU 2016-14, Presentation of Financial Statements of Not-for-Profit Entities.

23. Exposed the following editorial revisions to statutory accounting:
   i. Update references in SSAP No. 62R Exhibit A – Implementation Questions and Answers, which provides a retroactive reinsurance illustration and update, and paragraph 85 to match the current format of property/casualty (P/C) annual statement Schedule F – Reinsurance.
   ii. Revise references to the annual statement instructions and combine the life and fraternal references.

e. Received an update on the following projects and referrals:
   2. Responses for the data call on “linked” surplus notes to address the Surplus Note Accounting – Referral from the Reinsurance (E) Task Force are requested by Dec. 31, 2019.
   3. FASB delayed implementation of ASU 2016-13: Credit Losses until 2023 for everyone except large U.S. Securities and Exchange Commission (SEC) filers, which are required to follow the ASU in 2020.
   5. No comments by the Working Group are planned regarding U.S. generally accepted accounting principles (GAAP) exposures. Received information from industry on recent FASB discussions. NAIC staff will address the expected Reference Rate Reform FASB project to ensure that it will be promptly reviewed.
   f. The comment deadline for new and exposed items is Jan. 31, 2020, except for the editorial agenda item (Ref #2019-44EP), which has a Dec. 20, 2019, comment deadline.

13. Adopted the report of the Blanks (E) Working Group, which met Oct. 22 and took the following action:
   a. Adopted its Sept. 5 and Aug. 20 minutes, which included the following action:
      1. Exposed blanks proposal 2019-24BWG. The proposal adds a life experience data contact to the electronic Jurat page for life/fraternal company filers only to allow NAIC staff and state insurance regulators to locate a contact person more easily from each legal entity life insurance company to facilitate communication regarding data studies and submissions to the NAIC.
      b. Adopted four blanks proposals:
         1. 2019-21BWG – Modify the Illustrations for Note 33 to disclose individually the Separate Account with Guarantees Products and Separate Account Nonguaranteed Products.
         2. 2019-22BWG – Add a question regarding the Executive Summary of the PBR Actuarial Opinion to the Supplemental Exhibits and Schedules Interrogatories.
         3. 2019-23BWG – Modify the instructions and illustration for Note 8 – Derivatives for disclosures adopted by SSAP No. 108. Add instructions and a blanks page for Schedule DB, Part E, to the quarterly statement.
         4. 2019-24BWG – Add a Life Experience Data Contact to the electronic Jurat page for life/fraternal companies.
   c. Exposed its revised procedures.
   d. Exposed three proposals for a public comment period ending Nov. 22.
   e. Approved the editorial listing.

**Capital Adequacy (E) Task Force**

Dec. 8, 2019
1. Adopted its Oct. 8 minutes, which included the following action:
a. Adopted its Sept. 18 minutes, which included the following action:
   1. Adopted its 2020 proposed charges.

b. Exposed its referrals:
   1. NAIC Designations for Schedule D, Part 2 – Section 2.
   2. Mutual Funds.
   3. Comprehensive Funds.

2. Adopted the report of the Health Risk-Based Capital (E) Working Group, which met Dec. 8 and took the following action:
   a. Adopted its Oct. 21 and Sept. 9 minutes, which included the following action:
      1. Reported that the Working Group met Oct. 10 in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
      3. Discussed field testing of the Health Test and agreed to move forward.
      4. Referred the Long-Term Care HMO Guaranty Fund Memorandum to the Capital Adequacy (E) Task Force.
      5. Received comments and rejected proposal 2019-04-H (Health Care Receivables).
      6. Received comments on the excessive growth charge.
      7. Received comments on the Health Bond Structure.
      8. Discussed the managed care credit.
      9. Received an update from the Health Test Ad Hoc Group.
   b. Discussed the Health Bond Structure draft.
   c. Received comments on the Health Test Language Proposal.
   e. Adopted updates to the 2020 working agenda.
   f. Received an update from the Excessive Growth Charge Ad Hoc Group.

3. Adopted the report of the Life Risk-Based Capital (E) Working Group, which met Dec. 7 and took the following action:
   a. Adopted its Oct. 23 and Summer National Meeting minutes. During its Oct. 23 meeting, the Working Group:
      1. Rejected the proposal to update the risk-based capital (RBC) charge for unaffiliated common stock supporting long-horizon contractual commitments.
      2. Exposed the memorandum on potential further work on life growth operational risk for public comment.
      3. Adopted its July 22, June 24, June 17, June 6, May 13, April 26 and Spring National Meeting minutes.
   b. Adopted the report of the Longevity Risk (A/E) Subgroup, including adoption of its Nov. 25, Nov. 4, Oct. 7, Sept. 30 and Sept. 18 minutes, which included the following action:
      1. Discussed the Academy Longevity Risk Task Force’s proposal for incorporating a risk charge for longevity in the life and fraternal RBC formula.
      2. Adopted the Subgroup’s recommendation to the Life Risk-Based Capital (E) Working Group for a longevity risk charge.
   c. Exposed the Longevity Risk (A/E) Subgroup’s recommendation for a longevity risk charge along with the Academy’s alternative that includes covariance for a 60-day public comment period. The Working Group also agreed to scope out longevity reinsurance transactions for now with direction to the Subgroup to continue to work on this aspect.
   d. Heard an update from the Academy C2 Work Group.
   e. Heard an update from NAIC staff on the work being done on economic scenario generators (ESGs).
   f. Discussed comments received on life growth risk.
   g. Discussed an issue related to phase-in and spreading of variable annuity reserves and capital. The Working Group will review and identify any needed guidance.

4. Adopted the report of the Property and Casualty Risk-Based Capital (E) Working Group, which met Dec. 8 and took the following action:
   a. Adopted its Nov. 8 minutes, which included the following action:
      1. Adopted the Catastrophe Risk (E) Subgroup’s Summer National Meeting minutes.
      2. Adopted its Summer National Meeting minutes.
      3. Adopted proposal 2019-11-P (Clarification to Instructions Regarding Lloyd’s of London) and the 2019 reporting guideline.
      5. Exposed the 2019 catastrophe event list.
      6. Heard updates from the Academy on reviewing the underwriting risk components.
      7. Discussed the appropriate factor of unrated uncollateralized recoverables.
8. Discussed the factor of using the aggregate exceedance probability (AEP) and occurrence exceedance probability (OEP) basis.

b. Adopted the report of the Catastrophe Risk (E) Subgroup, which met Dec. 6 and took the following action:
1. Adopted its Nov. 8 minutes, which included the following action:
   a. Adopted its Summer National Meeting minutes.
   b. Adopted the Property and Casualty Risk-Based Capital (E) Working Group’s Summer National Meeting minutes.
   c. Adopted proposal 2019-11-P (Clarification to Instructions Regarding Lloyd’s of London) and the 2019 reporting guideline.
   d. Adopted proposal 2019-12-P (Remove PR038 Adjustment for Reinsurance Penalty).
   e. Exposed the 2019 catastrophe event lists.
   f. Heard updates from the American Academy of Actuaries (Academy) on reviewing the underwriting risk components.
   g. Discussed the appropriate factor of unrated uncollateralized recoverables.
   h. Discussed the factor of using the aggregate exceedance probability (AEP) and occurrence exceedance probability (OEP) basis.
3. Heard a presentation from the Academy on “Wildfire: Lessons Learned.” The presentation included topics on wildfire risk, mitigation, and modeling.
4. Heard a presentation from the Academy on “Actuaries Climate Index (ACI).” The presentation included topics on ACI components, and ACI recent index findings.
5. Discussed the factor of using AEP basis versus OEP basis.
6. Discussed the possibility of allowing additional third-party commercial vendor models.
c. Exposed proposal 2018-19-P (Vulnerable 6 or Unrated Risk Charge) for a 45-day public comment period ending Jan. 21, 2020.
d. Discussed 2020 property/casualty (P/C) RBC working agenda.
e. Discussed the possibility of using the NAIC as a centralized location for reinsurer designations.
f. Discussed the possible treatment of the R3 related to the runoff companies and captive companies.
g. Discussed the monoline mortgage guaranty insurers. The Working Group will closely monitor the development of the risk-based mortgage guaranty capital model from the Mortgage Guaranty Insurance (E) Working Group.
h. Discussed the Restructuring Mechanisms (E) Subgroup charge related to the Property and Casualty Risk-Based Capital formula.

5. Adopted its working agenda.
6. Received a Long-Term Care HMO Guaranty Fund Memorandum.
10. Adopted the RBC Preamble.
11. Received comments on referrals for:
   a. NAIC Designations for Schedule D, Part 2, Section 2 – Common Stocks.
   b. RBC Charges for Funds and Comprehensive Funds.
   c. Structured Notes.

**Examination Oversight (E) Task Force**
**Dec. 8, 2019**
1. Adopted its Sept. 13 and Summer National Meeting minutes.
2. Adopted the report of the Electronic Workpaper (E) Working Group, which met Dec. 3 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings.
3. Adopted the report of the Financial Examiners Coordination (E) Working Group, which met Aug. 5 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
4. Adopted the report of the Financial Analysis Solvency Tools (E) Working Group, which met Sept. 4 to discuss proposed revisions to the Financial Analysis Handbook (Handbook) and the Insurance Regulatory Information System (IRIS) for 2019 annual statement filings. The proposals included:
   a. Combined two quantitative procedures under property/casualty (P/C) reserving, where the materiality procedure and the related quantitative benchmark procedure were combined under one procedure.
   b. Exposed enhanced regulatory guidance to the Handbook related to parental guarantees and troubled insurance companies that resulted from referrals from the Financial Analysis (E) Working Group.
c. Adopted Handbook guidance on salary compensation that was drafted by the Risk-Focused Surveillance (E) Working Group and exposed at the 2018 Fall National Meeting.
d. Adopted previously exposed guidance updates to the Handbook related to intercompany pooling, which was referred by the Group Solvency Issues (E) Working Group.
e. Adopted previously exposed changes to the Life IRIS for 2020 annual statement filings due to blank changes.

At the close of the open meeting, the Working Group adjourned into regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings. The Working Group adopted the proposed revisions via e-vote on Oct. 15.

5. Adopted the report of the IT Examination (E) Working Group, which met Sept. 26 to adopt revisions on the following:
   a. Information technology (IT) review conclusions – Revisions are intended to clarify the scope of the IT review and the way examiners should respond to IT review findings.
   b. Use of third-party work – Revisions are intended to clarify the ways that third-party work can be evaluated and used during an exam’s IT review.
   c. Cybersecurity self-assessment tools – Revisions allow state insurance regulators to incorporate the results of a company’s completed self-assessment. Additionally, a drafting group developed a mapping between IT exam guidance and the cybersecurity self-assessment tool developed by the Financial Services Sector Coordinating Council (FSSCC) to facilitate state insurance regulator use of the information contained within the tool.

6. Adopted the report of the Financial Examiners Handbook (E) Technical Group as amended during the Task Force meeting, which met Nov. 14 and Sept. 12 to adopt revisions on the following topics:
   a. Troubled companies – Revisions incorporate insights from the Troubled Company Handbook on the following topics: priority ratings guidance, communication expectations for companies that are troubled or potentially troubled and pre-receivership considerations.
   b. Management letters – Revisions clarify which level of the management letter should be addressed and the level of information that should be included therein. During the Task Force meeting, the Task Force received a proposal from industry to amend the guidance to clarify that the discretion by the state insurance regulators to issue management letters should consider the guidance that immediately follows.
   c. Exhibit V (Prospective Risk Assessment) – Revisions encourage enhanced testing of overarching prospective risks and to better facilitate the communication of examination results with the financial analysts.
   d. Exhibit AA (Summary Review Memorandum) – Revisions address the order in which C-level interviews should be conducted, as well as provide a new interview template for interviewing a chief marketing officer.
   e. Compensation study – Revisions include a description of commonly held roles and responsibilities for commonly held regulatory positions and suggest salary ranges for examiners and analysts based on the results of a state insurance regulator compensation study.

7. Received a report from the NAIC’s Capital Markets Bureau regarding a transition within U.S. financial markets away from using LIBOR as a reference benchmark. The Capital Markets Bureau will provide further state insurance regulator-only educational materials to help state insurance regulators better understand how insurance companies will be affected.

8. Received an update from NAIC staff regarding work performed to update the state insurance regulator-only Jumpstart reports.

Long-Term Care Insurance (E/B) Task Force
The Long-Term Care Insurance (E/B) Task Force did not meet at the Fall National Meeting.

Receivership and Insolvency (E) Task Force
Dec. 8, 2019
1. Adopted its Summer National Meeting minutes.
3. Adopted the report of the Receivership Financial Analysis (E) Working Group, which met Dec. 8 in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings. During this meeting, the Working Group discussed the status of individual receiverships.
4. Adopted the report of the Receivership Large Deductible Workers’ Compensation (E) Working Group, which met Dec. 2 and Oct. 24 and took the following action:
6. Discussed next steps for addressing recommendations from the Macroprudential Initiative (MPI). The Task Force plans to:
   a. Continue discussions during a future conference call regarding possible remedies for ensuring the continuity of essential services and functions to an insurer in receivership.
   b. Delegate to its Receivership Model Law (E) Working Group the development of recommendations for methods to encourage the states to adopt key areas in receivership law to enhance the efficiency and effectiveness of the receivership process across the states.
8. Heard an international resolution update that highlighted activities of the International Association of Insurance Supervisors (IAIS). The IAIS Resolution Working Group met in September to:
   a. Finalize the Application Paper on Recovery Planning.
   b. Continue development of the Application Paper on Resolution Planning.

Reinsurance (E) Task Force
Dec. 8, 2019
1. Adopted its Oct. 22 minutes, which included the adoption of the proposed revisions to the Process for Evaluating Qualified and Reciprocal Jurisdictions, adopted the re-evaluations of France, Germany, Ireland and the United Kingdom as Qualified Jurisdictions, and adopted revisions to the Reinsurance Ceded section of the Accreditation Program Manual, and its Summer National Meeting minutes.
2. Adopted the report of the Reinsurance Financial Analysis (E) Working Group. The Working Group met Nov. 26 and Oct. 10 in regulator-to-regulator sessions, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings, to discuss actions taken with respect to the passporting of certified reinsurers by the states.
3. Adopted the report of the Qualified Jurisdiction (E) Working Group. The Working Group met Nov. 5, Oct. 7 and Aug. 22 via conference call in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings. The Working Group has adopted re-evaluations of Bermuda, France, Germany, Ireland, Japan, Switzerland and the United Kingdom as Qualified Jurisdictions and evaluations of Bermuda, Japan and Switzerland as Reciprocal Jurisdictions.
4. Adopted the re-evaluations of Bermuda, Japan and Switzerland as Qualified Jurisdictions and their evaluations as Reciprocal Jurisdictions.
5. Exposed a Blanks Proposal that incorporates the 2019 revisions from the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) into the Annual Reporting Blanks and Instructions.

Risk Retention Group (E) Task Force
Dec. 7, 2019
1. Adopted its Oct. 7 minutes.
2. Adopted Frequently Asked Questions (FAQ) and Best Practices documents for risk retention groups (RRGs) to further assist the states with the registration of RRGs.
3. Adopted a referral to the Property and Casualty Insurance (C) Committee to consider proposed revisions to the NAIC Uniform Risk Retention Group – Notice and Registration form. The revisions are intended to clarify expectations for RRGs registering in non-domiciliary states and facilitate compliance with the federal Liability Risk Retention Act (LRRA).
4. Discussed next steps for the Task Force, including informing industry and regulators about the new resources and registration form; monitoring the impact of the above adoptions; providing training, such as a webinar; and considering revisions to the Risk Retention and Purchasing Group Handbook or the Company Licensing Best Practices Handbook.

Valuation of Securities (E) Task Force
Dec. 8, 2019
1. Adopted its Sept. 5, Oct. 31; and Summer National Meeting minutes, which included the following action:
   a. Adopted an updated amendment to the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) to add instructions for the new administrative fields “RTS” and “RT” that was exposed for a 14-day comment period that ended Aug. 30.
   b. Adopted its 2020 proposed charges.
   c. Adopted a P&P Manual amendment updating the interim instructions for Mortgage Reference Securities that was exposed for a 30-day comment period that ended Sept. 4.
   d. Discussed a proposed P&P Manual amendment to add instructions for Exchange Traded Funds (ETF) that contain a combination of preferred stocks and bonds and directed Securities Valuation Office (SVO) staff to prepare a memo summarizing issues related to ETFs.
e. Received a proposed P&P Manual amendment to rename the U.S. Direct Obligations/Full Faith and Credit Exempt List and to the NAIC U.S. Government Money Market Fund List and discontinue the Bond Fund List and migrate these funds to the new NAIC Fixed Income-Like SEC (U.S. Securities and Exchange Commission) Registered Funds List in 2020. The amendment was exposed for 45-day comment period ending on Dec. 16.

f. Receive a proposed P&P Manual amendment to add instructions to limit NAIC Designations to the NAIC Assigned Sovereign Rating. The amendment was exposed for 45-day comment period ending on Dec. 16.

g. Received a proposed P&P Manual amendment to add instructions for Ground Lease Transactions. The amendment was exposed for 22-day comment period ending on Nov. 22.

h. Discussed a proposed P&P Manual amendment for Principal Protected Securities.

2. Received an update from NAIC staff on projects before the Statutory Accounting Principles (E) Working Group, including:

- Items Adopted by the Working Group: 1) Other Derivatives – revisions to clarify that other derivatives – which are derivatives that are not used in hedging, income generation or replication transactions – shall be reported at fair value and nonadmitted; 2) Goodwill – for subsidiary, controlled and affiliated investments (SCAs), the Working Group adopted minor revisions to clarify that goodwill from an insurance entity acquisition of an SCA is subject to the 10% adjusted capital and surplus limit, regardless if the goodwill had been “pushed down;” and 3). Wash Sales – revisions to clarify that the wash sale disclosure shall only include wash sale transactions that cross reporting periods. Items Exposed by the SAPWG: 1) Preferred Stock – revised issue paper and proposed substantively revised SSAP No. 32R as part of the investment classification project; 2) Related Party Transactions – proposed to data-capture existing SSAP No. 25 disclosures and exposure to clarify the types of entities that are included as related parties, clarification that non-controlling ownership interest greater than 10% is a related party; 3) Working Capital Finance Investments – substantive revisions to SSAP No. 105 as directed by the Working Group to reflect 6 of the recommendations provided by industry and referred from the Task Force; 4) Rolling Short-Term Investments – revisions to SSAP No. 2R to incorporate principle concepts in classifying investments as cash equivalents or short-term investments; 5) Qualifying Cash Pools – revisions to SSAP No. 2R to incorporate concepts to allow cash pools to be reported as cash equivalents; 6) Financial Modeling – 43R – revisions to eliminate the financial modeling guidance from SSAP No. 43R, noting that this exposure was contingent on the Task Force taking a similar action at the National Meeting; and 7) Financing Derivatives – revisions for the reporting of derivatives with financing premiums.

3. Received a proposed Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) amendment to reflect the U.S. SEC’s adoption of a new Rule 6c-11 under the Investment Company Act of 1940, to modernize regulation of exchange traded funds to operate without first obtaining an exemptive order under from the SEC under the Act and exposed the amendment for a 45-day comment period ending Jan. 23, 2020.

4. Adopted a proposed P&P Manual amendment and refer it to the Statutory Accounting Principles (E) Working Group instructions for Ground Lease Financing (GLF) transaction following a decision tree analysis approach: 1) the SVO would analyze it to see it if meets the credit tenant loan criteria and the SVO could analyze the sub-leases; 2) assess if the Structured Security Group can model the GLF; and 3) if a ratings agency rating was assigned, authorize the SVO to use that analysis in its assessment. The amendment that was exposed for a 22-day comment period that ended on Nov. 22.

5. Received a proposed P&P Manual amendment to remove the financial modeling instructions for RMBS/CMBS securities and direct Investment Analysis Office (IAO) staff to instead produce NAIC designations and NAIC designation categories for these securities and exposed the amendment for a 60-day comment ending Feb. 7, 2020.

6. Received an SVO staff report on their work defining principal protected notes. Staff reported being working iteratively with industry on a general framework to describe repackaged securities that may possess Other Non-Payment Risks that the SVO must assess under its Subscript S authority.

7. Received a CIPR staff report on their infrastructure project. CIPR staff, with assistance from the Capital Markets Bureau, is researching the state of infrastructure investing as it pertains to US insurance companies and has solicited a great deal of information from interested parties. A great deal of progress has been made, including finalizing a definition of economic infrastructure.

8. Received an SVO staff report on various technology projects: integration of security identifiers in the filing exempt process (BECRS/GICRS) has been deferred; inclusion of ratings data the Japan Credit Rating Agency, Ltd. has been deferred; implementation of additional CRP data feeds for securities subject to private rating letters component of filing exemption has been deferred; implementation of the carry-over procedure in 2019 for the administrative symbols “YE” and “IF” completed; and implementation of NAIC designation categories was on schedule for early 2020.

FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE
Dec. 6 – 7, 2019

The Financial Regulation Standards and Accreditation (F) Committee met Dec. 6, in regulator-to-regulator session pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; 2) vote to award continued accreditation to the insurance departments of Connecticut, Massachusetts and New York; and 3) vote to award accreditation for the first time to the insurance department of the U.S. Virgin Islands. The Committee also met Dec. 7, in open session, and
took the following action:
1. Adopted its Summer National Meeting minutes.
3. Adopted revisions to the Review Team Guidelines for troubled companies effective Jan. 1, 2020. The revisions incorporate updated guidance on timely and effective communication of a troubled or potentially troubled company between the domiciliary and non-domiciliary states.
4. Adopted the 2019 revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) as revisions to the Reinsurance Ceded accreditation standard. These revisions address the reinsurance collateral requirements necessary for U.S. ceding companies to take credit for certain reinsurance transactions. The adoption includes a waiver of procedure to expeditiously adopt the accreditation standard. The adopted effective date is Sept. 1, 2022.
5. Adopted the Term and Universal Life Insurance Reserve Financing Model Regulation (#787) as a new accreditation standard effective Sept. 1, 2022. This model establishes uniform, national standards governing reserve financing arrangements pertaining to term life and universal life insurance policies with secondary guarantees.

INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE
Dec. 7, 2019
1. Adopted its Nov. 6, Oct. 15, Aug. 13, and 2019 Summer National Meeting minutes. During its Nov. 6, Oct. 15 and Aug. 13 meetings, the Committee took the following action:
   a. Heard an update on upcoming International Association of Insurance Supervisors (IAIS) committee meetings.
   b. Approved submission of NAIC comments on the IAIS draft Issues Paper on the Use of Big Data Analytics in Insurance and heard updates on IAIS activities and the Financial Sector Assessment Program (FSAP).
   c. Approved submission of NAIC comments on IAIS revised supervisory material and material related to the holistic framework for systemic risk in the insurance sector.
2. Adopted the report of the ComFrame Development and Analysis (G) Working Group, which met Dec. 7 in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss next steps for implementation of the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) and the monitoring period and to hear an update on the aggregation method process.
3. Adopted its 2020 proposed charges.
4. Heard an update on key 2019 projects of the IAIS, including revised Insurance Core Principles (ICPs) and ComFrame, the holistic framework for systemic risk in the insurance sector, and the insurance capital standard (ICS) and monitoring period.
5. Heard an update on international activities, focusing on regional supervisory cooperation and the Organisation for Economic Co-operation and Development (OECD). Regional supervisory cooperation activities include ongoing engagement with regulators in Europe, the Asia-Pacific region and Latin America, as well as the NAIC International Fellows Program.
6. Heard an update on the FSAP. The 2019–2020 International Monetary Fund (IMF) FSAP of the U.S. financial regulatory system is currently underway. The FSAP is comprised of Mission 1 and Mission 2, with much of the work for the FSAP exercise for insurance concentrated in Mission 1, which took place this fall. Mission 2 will take place in early 2020, with meetings both with the NAIC and several states. The IMF is expected to publish a technical note on insurance by the summer of 2020.

NAIC/CONSUMER LIAISON COMMITTEE
Dec. 9, 2019
1. Adopted its Summer National Meeting minutes.
2. Observed the presentation of the Excellence in Consumer Advocacy award from the NAIC consumer representatives to Commissioner Michael Conway (CO).
3. Heard a presentation from the Center for Economic Justice on what state insurance regulators can do to promote retirement security. This presentation focused on the health (long-term care) and non-health (life and annuity) gaps in consumer education and consumer protection, current NAIC committee activities, and a consumer-focused strategy to fill the gaps.
4. Heard a presentation from United Policyholders (UP) on using residual markets. This presentation explained California's current situation; recapped what UP, the California Department of Insurance, California’s FAIR Plan and partners are doing; and briefly reviewed Florida's experience.
5. Heard a presentation from the Automotive Education and Policy Institute on consumers filing complaints or reporting improper insurer behavior in the automobile repair context. This presentation shed light on the fact that critical problems for consumers filing complaints or reporting improper insurer behavior in the automobile repair context is that consumers have no idea why it may be important for them to have particular repair procedures or parts used in the repair of their vehicles.
6. Heard a presentation from Claire McAndrew (Families, USA) and Sarah Lueck (Center on Budget and Policy Priorities—CBPP) on protecting patients from surprise medical bills and the impact of other Federal policy changes on consumers. This presentation discussed the importance of federal protections against surprise medical bills, provided an update on the status of surprise medical bill legislation in Congress, and highlighted implications for state insurance regulators. It also discussed other federal policy changes - including changes made by the federal government, Congress, or the courts - that would impact coverage and care for consumers and the work of state insurance regulators.

7. Heard a presentation from Deborah Darcy (American Kidney Fund-AKF) on clarifying insurance coverage of living donors. This presentation provided recommendations to state insurance regulators on the need for clear guidance in health insurance documentation and how complaints to commissioners should be resolved by the health insurance of the recipient paying the medical bills.

8. Heard a presentation from Katie Keith (Out2Enroll) and Silvia Yee (Disability Rights Education and Defense Fund—DREDF) on raising consumer concerns about wellness programs. In light of a recently announced federal opportunity for states to expand wellness programs to the individual market, this presentation highlighted the latest data on wellness programs, recent legal challenges, consumer concerns, and recommendations for state regulators.

9. Heard a presentation from Matthew Smith (Coalition Against Insurance Fraud—CAIF) and Dan Kreitman (Healthcare Fraud Prevention Partnership—HFPP) on how HFPP is protecting Americans from insurance fraud. This presentation acquainted commissioners and the consumer representatives with the HFPP, its history, purpose and how it could assist regulators in protecting their citizens.

NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE
Dec. 8, 2019
1. Adopted its Summer National Meeting minutes.
3. Heard an update from NAIC legal staff on the removal of health insurance resources from the U.S. Health and Human Services (HHS) website.

NAIC/INDUSTRY LIAISON COMMITTEE
The NAIC/Industry Liaison Committee did not meet at the Fall National Meeting.

NAIC/STATE GOVERNMENT LIAISON COMMITTEE
Dec. 7, 2019
1. Heard welcome remarks from NAIC president, Superintendent Eric A. Cioppa (ME). Superintendent Cioppa discussed how the NAIC has made progress on a number of important initiatives, including the recent amendments to the Credit for Reinsurance Model Law (#785).
2. Adopted its 2018 Summer National Meeting minutes.
4. Discussed health insurance developments. Director Raymond G. Farmer (SC) noted how state insurance regulators are waiting for the draft Notice of Benefit and Payment Parameters for 2021, which sets the rules for federal Affordable Care Act (ACA)-compliant plans. He also discussed how regulators are tracking congressional activity on surprise bills, and how the U.S. Department of Transportation has appointed an Air Ambulance Advisory Committee, to which Commissioner Jon Godfread (ND) was appointed.
5. Discussed long-term care insurance (LTCI). Commissioner Scott A. White (VA) discussed how the NAIC is focused on developing a consistent national approach for reviewing LTCI rates that result in actuarily appropriate increases being granted by the states in a timely manner. He also said state insurance regulators are focused on ensuring consumers are provided with meaningful options to reduce their benefits in situations where the premiums are no longer affordable. He discussed the creation of the Long-Term Care Insurance (EX) Task Force and gave an update on the various workstreams.
6. Discussed big data and data privacy. Commissioner Godfread discussed how big data is reshaping the insurance marketplace, and how state insurance regulators are responding. He also noted how the NAIC has appointed a new Privacy Protections (D) Working Group to review state insurance privacy protections and determine if changes are needed.
7. Discussed the group capital calculation (GCC) and Macroprudential Initiative. Superintendent Cioppa discussed how the GCC will be a tool that state insurance regulators can use in their solvency-monitoring activities. He discussed macroprudential monitoring and how it provides state insurance regulators with a better understanding of how the insurance sector is impacted by various risk exposures in the broader financial markets and economy.

Executive (EX) Committee and Plenary
Austin, Texas
December 10, 2019

The Executive (EX) Committee and Plenary met in joint session in Austin, TX, Dec. 10, 2019. The following members participated: Eric A. Cioppa, Chair (ME); Raymond G. Farmer, Vice Chair (SC); David Altmairer, Vice President (FL); Dean L. Cameron, Secretary-Treasurer (ID); James J. Donelon, Most Recent Past President represented by Nick Lorusso (LA); Lori K. Wing-Heier (AK); Jim L. Ridling represented by Jerry Workman (AL); Allen W. Kerr (AR); Elizabeth Perri (AS); Keith Schraad (AZ); Michael Conway represented by Peg Brown (CO); Andrew N. Mais (CT); Stephen C. Taylor (DC); Trinidad Navarro (DE); John F. King (GA); Dafne M. Shimizu represented by Michele Santos (GU); Colin M. Hayashida represented by Paul Yuen (HI); Doug Ommen (IA); Robert H. Muriel represented by Kevin Fry (IL); Stephen W. Robertson represented by Amy Beard (IN); Vicki Schmidt (KS); Nancy G. Atkins (KY); Gary Anderson (MA); Al Redmer Jr. (MD); Anita G. Fox (MI); Steve Kelley (MN); Chlora Lindley-Myers (MO); Mike Chaney represented by Mark Haire (MS); Matthew Rosendale represented by Kendall Cotton (MT); Mike Causey (NC); Jon Godfread (ND); Bruce R. Ramge (NE); John Elias represented by Christie Rice (NH); Marlene Caride (NJ); John G. Franchini (NM); Barbara D. Richardson (NV); Linda A. Lacewell represented by Stephen Doody (NY); Jillian Froment (OH); Glen Mulready (OK); Andrew Stolfi (OR); Jessica Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry Deiter (SD); Hodgen Mainda (TN); Kent Sullivan (TX); Todd E. Kiser (UT); Scott A. White (VA); Tregenza A. Roach represented by Cheryl Charleswell (VI); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler (WA); Mark Afable represented by Nathan Houdek (WI); James A. Dodrill (WV); and Jeff Rude (WY).

1. Adopted the Report of the Executive (EX) Committee

Superintendent Cioppa reported the Executive (EX) Committee met Dec. 8 and adopted the Dec. 7 report from the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.

The Executive (EX) Committee adopted its interim meeting report from Nov. 18, Oct. 8 and Oct. 7, which included the following action: 1) approved the NAIC 2020 proposed budget and recommended the budget be adopted by the full NAIC membership at the Fall National Meeting; 2) approved recommendations for the NAIC’s Defined Benefit Plan Fund Investments; 3) adopted the investment policy statement (IPS) for the NAIC’s long-term funds; 4) adopted the IPS for the NAIC’s defined benefit plan and the defined contribution plan; 5) adopted the Information Systems (EX1) Task Force’s 2020 proposed charges; 6) adopted the Internal Administration (EX1) Subcommittee’s 2020 proposed charges; and 7) exposed the NAIC 2020 proposed budget, including five fiscals, for a public comment period ending Nov. 7.

The Executive (EX) Committee adopted the reports of its task forces: 1) the Financial Stability (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; and 4) the Long-Term Care Insurance (EX) Task Force.

The Executive (EX) Committee adopted its 2020 proposed charges.

The Executive (EX) Committee adopted Requests for NAIC Model Law Development to amend: 1) the Insurance Holding Company System Regulatory Act (#440); 2) the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450); and 3) the Unfair Trade Practices Act (#880).

The Executive (EX) Committee received a status report on the NAIC State Ahead strategic plan implementation.

The Executive (EX) Committee received a status report on model law development efforts for amendments to: 1) the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); 2) the Annuity Disclosure Model Regulation (#245); 3) the Suitability in Annuity Transactions Model Regulation (#275); 4) the Health Maintenance Organization Model Act (#430); 5) the Life Insurance Disclosure Model Regulation (#580); 6) the Mortgage Guaranty Insurance Model Act (#630); and 7) the following new models: a) the Real Property Lender-Placed Insurance Model Act; b) the Pet Insurance Model Act; and c) the Pharmacy Benefit Manager (PBM) Model Law.

The Executive (EX) Committee heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).
Commissioner Kerr made a motion, seconded by Commissioner Altmaier, to adopt the Dec. 8 report of the Executive (EX) Committee. The motion passed.

2. **Adopted by Consent the Committee, Subcommittee and Task Force Minutes of the Summer National Meeting**

Commissioner Altmaier made a motion, seconded by Director Farmer, to adopt by consent the committee, subcommittee and task force minutes of the Summer National Meeting. The motion passed.

3. **Adopted the NAIC 2020 Proposed Budget**

Director Farmer reported that the 2020 proposed budget was approved for exposure to the public on Oct. 7 and was posted on the NAIC website on Oct. 8. A public briefing for interested parties was held on Oct. 14. A public hearing was held on Nov. 18, and one comment letter received was addressed. The Executive (EX) Committee approved the 2020 proposed budget during the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee meeting held on Nov. 18.

Director Farmer provided an overview of the budget. The proposed budget is based on $114.5 million in operating revenues and operating expenses of $124.5 million and includes five fiscals. In addition, total funding of $324,500 was approved by the Executive (EX) Committee on Dec. 7 to hire a firm to conduct a System for Electronic Rate and Form Filing (SERFF) assessment during the first half of 2020, which increases 2020 operating expenses to $124.8 million.

After including nearly $3.2 million of investment income, the NAIC’s proposed budget reflects a reduction in net assets of $7.2 million. The liquid operating reserve ratio would be approximately 90.8% at the end of 2020.

Director Farmer made a motion, seconded by Commissioner Kerr, to adopt the NAIC 2020 proposed budget, including $324,500 in funding for the SERFF assessment (Attachment One). The motion passed.

4. **Adopted the NAIC 2020 Proposed Committee Charges**

Director Farmer reported that the 2020 proposed committee charges cover the work for the working groups, task forces and committees that operate through the NAIC. These charges have been exposed, discussed and adopted at the letter committees. The charges document is a dynamic document that may change as the work for 2020 proceeds.

Director Farmer made a motion, seconded by Commissioner Kerr, to adopt the NAIC 2020 proposed committee charges (Attachment Two). The motion passed.

5. **Received the Report of the Life Insurance and Annuities (A) Committee**

Commissioner Ommen reported the Life Insurance and Annuities (A) Committee met Dec. 8 and adopted its Nov. 4 minutes, which included the following action: 1) adopted its Summer National Meeting minutes; 2) adopted its 2020 proposed charges; 3) adopted the Life Actuarial (A) Task Force’s 2020 proposed charges; 4) adopted the 2020 Generally Recognized Expense Table (GRET); and 5) adopted Actuarial Guideline LII—Variable Annuity Early Adoption (AG 52).

The Committee adopted the report of the Annuity Suitability (A) Working Group, which met Dec. 7 and adopted its Sept. 17 and Summer National Meeting minutes.

The Committee discussed comments received on the draft Suitability in Annuity Transactions Model Regulation (#275) and approved the draft as revised during this meeting, with the exception of the draft templates, which were referred back to the Annuity Suitability (A) Working Group for discussion during a conference call on Dec. 19.

The Committee adopted the following working group and task force reports: the Annuity Disclosure (A) Working Group, including its Dec. 2 and Sept. 19 minutes, as well as an extension of the Request for NAIC Model Law Development; the Accelerated Underwriting (A) Working Group, including its Oct. 2 minutes; the Life Insurance Illustration Issues (A) Working Group, including its Oct. 21, Sept. 17, Sept. 3 and July 30 minutes, as well as an extension of the Request for NAIC Model Law Development; the Life Actuarial (A) Task Force, including the creation of a new Guaranteed Issue Life Valuation (A) Subgroup; and the Retirement Security (A) Working Group, including its Nov. 13 and Oct. 23 minutes.
6. **Adopted the 2020 Generally Recognized Expense Table (GRET)**

Commissioner Ommen reported that as in previous years, the Society of Actuaries (SOA) Committee on Life Insurance Company Expenses submitted its GRET analysis to the Life Actuarial (A) Task Force for the upcoming year. The SOA followed the same methodology in developing the 2020 GRET as last year for the 2019 GRET. The 2020 GRET was adopted by the Life Insurance and Annuities (A) Committee during its Nov. 4 conference call.

Commissioner Ommen made a motion, seconded by Director Farmer, to adopt the 2020 GRET (Attachment Three). The motion passed.

7. **Adopted Actuarial Guideline LII—Variable Annuity Early Adoption (AG 52)**

Commissioner Ommen reported that AG 52 is informational-only and explains that a company is permitted to adopt the new variable annuity framework early for values used for the Dec. 31, 2019, financial statements.

Commissioner Ommen made a motion, seconded by Commissioner Altmaier, to adopt AG 52 (Attachment Four). The motion passed.

8. **Received the Report of the Health Insurance and Managed Care (B) Committee**

Commissioner Altman reported the Health Insurance and Managed Care (B) Committee met Dec. 8. During this meeting, the Committee adopted its Oct. 24 and Summer National Meeting minutes. During its Oct. 24 meeting, the Committee took the following action: 1) adopted the Health Actuarial (B) Task Force’s 2020 proposed charges, the Regulatory Framework (B) Task Force’s 2020 proposed charges, and the Senior Issues (B) Task Force’s 2020 proposed charges; and 2) adopted its 2020 proposed charges.

The Committee adopted the following subgroup, working group and task force reports: the Consumer Information (B) Subgroup, including its Nov. 18, Oct. 21 and Oct. 7 minutes; the Health Innovations (B) Working Group, including its Oct. 28 minutes; the Health Actuarial (B) Task Force; the Long-Term Care Insurance (E/B) Task Force; the Regulatory Framework (B) Task Force; and the Senior Issues (B) Task Force.

The Committee heard an update from Randy Pate, from the federal Center for Consumer Information and Insurance Oversight (CCIIO) on its recent regulatory activities. Mr. Pate provided the Committee with a snapshot of current open enrollment, including data on the number of applications submitted and enrollment by subsidized and unsubsidized individuals and highlighted the effects of Section 1332 waivers in reducing premium costs. Mr. Pate also discussed its efforts to provide price transparency in the health care marketplace.

The Committee heard a presentation from Charles Silver, the co-author of the book “Overcharged: Why Americans Pay Too Much for Health Care.” The presentation highlighted the current problems in the health care system leading to high health care costs and solutions to address them. The problems discussed include fraud, waste and abuse, opaque prices, surprise bills and high prescription drug costs. Mr. Silver proposed solutions, including letting the insurance-driven spending cycle burn itself out and letting the market resolve the problems through the retail health sector.

The Committee heard a panel presentation on state surprise billing laws. Representatives from the Texas Department of Insurance (DOI) and the Washington DOI discussed their surprise billing laws highlighting provisions in the laws related to their scope and method of establishing the out-of-network provider payment.

The Committee heard an update on legal actions related to the federal Affordable Care Act (ACA), including: 1) a case challenging the constitutionality of the individual mandate and its potential impact on other key ACA provisions; 2) a case challenging the legality of the recent federal association health plan (AHP) regulation; 3) a case challenging the legality of the recent federal short-term, limited-duration plan (STLDP) regulation; and 4) a case challenging the legality of the federal government’s refusal to pay participants for full risk corridor amounts.

9. **Received the Report of the Property and Casualty Insurance (C) Committee**

Superintendent Dwyer reported the Property and Casualty Insurance (C) Committee met Dec. 9 and took the following action: 1) adopted its Nov. 18 minutes, which included the following action: a) adopted its Sept. 10 minutes, which included adoption of its Summer National Meeting minutes and documents related to the private flood insurance data call; b) adopted additional
documents related to the private flood insurance data call, including making the data publicly available; c) discussed proposed blanks changes related to private flood insurance; and d) discussed the upcoming Fall National Meeting.

The Committee adopted the reports of its task forces and working groups: the Casualty Actuarial and Statistical (C) Task Force; the Surplus Lines (C) Task Force; the Title Insurance (C) Task Force; the Workers’ Compensation (C) Task Force; the Cannabis Insurance (C) Working Group; the Catastrophe Insurance (C) Working Group; the Climate Risk and Resilience (C) Working Group; the Lender-Placed Insurance Model Act (C) Working Group; the Pet Insurance (C) Working Group; the Terrorism Insurance Implementation (C) Working Group; and the Transparency and Readability of Consumer Information (C) Working Group.

The Committee adopted its 2020 proposed charges.

The Committee adopted a Blanks’ request to create a supplement to collect private flood insurance data and revise the Credit Insurance Experience Exhibit to include private flood coverages. The proposed Annual Statement changes will split residential from commercial private flood coverages as well as standalone from endorsements and first dollar from excess. This information, along with the data call, will allow regulators and others to better understand the growth of the private flood insurance market.

The Committee adopted an extension for revisions to the proposed Real Property Lender-Placed Insurance Model Act.

The Committee adopted Considerations for State Insurance Regulators in Building the Private Flood Insurance Market, a document meant to provide state insurance regulators with actions that might facilitate the growth of the private flood insurance market.

The Committee also: 1) heard a presentation from SBP on work the group does to promote resiliency and mitigation among homeowners pre- and post-disasters; 2) heard a presentation from the American Property Casualty Insurance Association (APCIA) and the National Association of Mutual Insurance Companies (NAMIC) regarding underinsurance and steps the industry is taking to work on the issue; 3) heard an update from the U.S. Department of Agriculture (USDA) and the National Crop Insurance Services (NCIS) regarding crop insurance and private crop-hail insurance and how the entities continue to work with regulators; and 4) reported that state insurance regulators are currently reviewing private passenger auto state exhibits created from data collected from statistical agents. The Committee plans to release the private passenger auto report on its website in the near future.

Superintendent Dwyer reported the Cannabis Insurance (C) Working Group was appointed in August 2018 with a charge of studying insurance issues related to legal cannabis business and drafting a white paper describing insurance regulatory issues, including coverage gaps. The Working Group drafted the white paper with assistance from cannabis industry groups and other interested parties and adopted the paper in July 2019. The Property and Casualty Insurance (C) Committee adopted the white paper during the Summer National Meeting.

As more states continue to legalize cannabis, the need and demand for cannabis insurance will only continue to increase. The white paper findings show that there are substantial gaps in insurance coverage for the cannabis industry, exposing those who engage with the cannabis industry. The white paper also explores other regulatory issues related to insurance issues in the cannabis industry, including how insurance rates are set; legal and regulatory authority at the federal, state and local levels; and cannabis operations and best practices.

Superintendent Dwyer stated that the white paper provides an excellent overview to the states, and it will assist the states in understanding potential insurance coverage gaps and what regulatory or other considerations might be taken to ensure that legal businesses are properly protected through insurance products.

Superintendent Dwyer made a motion, seconded by Commissioner Richardson, to adopt the white paper Regulatory Guide: Understanding the Market for Cannabis Insurance (Attachment Five). The motion passed.

11. Adopted the Post-Disaster Claims Guide

Superintendent Dwyer reported the Transparency and Readability of Consumer Information (C) Working Group received a referral from the Catastrophe Insurance (C) Working Group to create a claims guide for DOIs to provide to consumers following
a disaster. The claims guide provides information on steps to take following a disaster, including how to report an insurance claim, information on additional living expenses, types of adjusters, depreciation, ordinance and law coverage, assignment of benefits; insurance fraud, and several other topics. The document also includes logs for consumers to record claim information, adjuster information, contractor information, claim communication and emergency repairs.

The Transparency and Readability of Consumer Information (C) Working Group will consider how to put this information onto a website that is readable for consumers.

Superintendent Dwyer made a motion, seconded by Commissioner Altmaier, to adopt the Post-Disaster Claims Guide (Attachment Six). The motion passed.

12. Received the Report of the Market Regulation and Consumer Affairs (D) Committee

Director Lindley-Myers reported the Market Regulation and Consumer Affairs (D) Committee met Dec. 9 and took the following action: 1) adopted its Oct. 1 minutes, which included the following action: a) adopted its Summer National Meeting minutes; and b) appointed a new Privacy Protections (D) Working Group to address the charge to “[r]eview state insurance privacy protections regarding the collection, use and disclosure of information gathered in connection with insurance transactions, and make recommended changes, as needed, to certain NAIC models, such as the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672), by the 2020 Summer National Meeting.”

The Committee adopted its 2020 proposed charges, including the charges of the Antifraud (D) Task Force, the Market Information Systems (D) Task Force, and the Producer Licensing (D) Task Force.

The Committee adopted a Workers’ Compensation Standardized Data Request, which will be incorporated into the NAIC Market Regulation Handbook for the states to voluntarily use to determine if a company follows appropriate procedures with respect to the issuance and/or termination of worker compensation policies.

The Committee adopted Property/Casualty (P/C) Travel Insurance Examination Standards, which will be incorporated into the NAIC Market Regulation Handbook for the states to voluntarily use to conduct travel insurance company examinations. The standards are based upon the Travel Insurance Model Act (#632).

The Committee adopted revisions to the NAIC State Licensing Handbook, which was revised to be consistent with established NAIC policy on producer licensing.

The Committee adopted the 2019 Continuing Education Reciprocity (CER) Agreement used to support the use of the CER Form to streamline the course-approval process in multiple states. Through the reciprocal approval process, the continuing education (CE) provider’s home state conducts a substantive review of the CE course; therefore, non-resident states do not need to perform a similar review for a course previously approved by the home state.

The Committee adopted the reports of its task forces and working groups: the Antifraud (D) Task Force; the Market Information Systems (D) Task Force; the Producer Licensing (D) Task Force; the Advisory Organization Examination Oversight (D) Working Group; the Market Conduct Annual Statement Blanks (D) Working Group; the Market Conduct Examination Standards (D) Working Group; the Market Actions (D) Working Group; the Market Analysis Procedures (D) Working Group; the Market Regulation Certification (D) Working Group; and the Privacy Protections (D) Working Group. The adoption of the reports included the adoption of the following: 1) a recommendation from the Market Analysis (D) Working Group for the Market Conduct Annual Statement Blanks (D) Working Group to begin the development of an “Other Health” Market Conduct Annual Statement (MCAS) blank; and 2) a recommendation of the Market Conduct Annual Statement Blanks (D) Working Group to extend the health MCAS filing deadline to June 30 for 2020, 2021 and 2022.

The Committee heard a presentation from the American Psychiatric Association (APA) on mental health parity examinations, which provided an overview of existing parity market conduct examination areas of interest and encouraged state insurance regulators to use and expand their parity oversight and enforcement authority.

13. Received the Report of the Financial Condition (E) Committee

Commissioner Altmaier reported the Financial Condition (E) Committee met Dec. 9 and adopted its Oct. 31, Aug. 29 and Summer National Meeting minutes. During its Oct. 31 and Aug. 29 meetings, the Committee took the following action:
The Committee adopted the following: 1) adopted its 2020 proposed charges; 2) adopted a Request for NAIC Model Law Development related to the group capital calculation (GCC); 3) adopted revisions to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556); and 4) adopted proposed changes to the Annual Statement Instructions – Property/Casualty, specifically related to the actuarial opinion, including, among other things, the definition of “qualified actuary.”

The Committee adopted the reports of the following task forces and working groups: the Accounting Practices and Procedures (E) Task Force; the Capital Adequacy (E) Task Force; the Examination Oversight (E) Task Force; the Receivership and Insolvency (E) Task Force; the Reinsurance (E) Task Force; the Risk Retention Group (E) Task Force; the Valuation of Securities (E) Task Force; the Group Capital Calculation (E) Working Group; the Group Solvency Issues (E) Working Group; the Mortgage Guaranty Insurance (E) Working Group; the National Treatment and Coordination (E) Working Group; and the Restructuring Mechanisms (E) Working Group.

The Committee also: 1) adopted proposed salary updates to the Financial Condition Examiners Handbook, which retains the current methodology in the handbook and also creates a new methodology that is based on ranges derived from a survey completed last year; and 2) adopted revisions to the Process for Evaluating Qualified and Reciprocal Jurisdictions.

Note: Items adopted within the Financial Condition (E) Committee’s task force and working group reports that are considered technical, non-controversial and not significant by NAIC standards—i.e., they do not include model laws, model regulations, model guidelines or items considered to be controversial—will be considered for adoption by the Executive (EX) Committee and Plenary through the Financial Condition (E) Committee’s technical changes report process. Pursuant to this process, which was adopted by the NAIC in 2009, a listing of the various technical changes will be sent to the NAIC members shortly after completion of the Fall National Meeting, and the members will have 10 days to comment with respect to those items. If no objections are received with respect to a particular item, the technical changes will be considered adopted by the NAIC membership and effective immediately.

14. **Adopted Amendments to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556)**

Commissioner Altmaier reported on the changes to Guideline #1556. The proposed changes are intended to eliminate any misalignments between federal and state laws that could be an obstacle to achieving effective and orderly recovery and resolutions for U.S. insurance groups.

Commissioner Altmaier made a motion, seconded by Director Farmer, to adopt Guideline #1556 (Attachment Seven). The motion passed.

15. **Adopted Revisions to the Process for Evaluating Qualified and Reciprocal Jurisdictions**

Director Lindley-Myers reported that the NAIC adopted revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) in June. These revisions are intended to conform the models to the reinsurance collateral provisions of the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (UK Covered Agreement), known collectively as the Covered Agreements. Not only are jurisdictions that are subject to the Covered Agreements treated as Reciprocal Jurisdictions for reinsurance collateral purposes, but other Qualified Jurisdictions can also qualify for collateral elimination as Reciprocal Jurisdictions. The states that meet the requirements of the NAIC Financial Standards and Accreditation Program are also considered to be Reciprocal Jurisdictions.

The Process for Evaluating Qualified and Reciprocal Jurisdictions was amended to reflect the revisions to Model #785 and Model #786 and add a new section on the review of Qualified Jurisdictions as Reciprocal Jurisdictions. Both the Reinsurance (E) Task Force and Financial Condition (E) Committee have adopted these revisions.

Director Lindley-Myers made a motion, seconded by Commissioner Altmaier, to adopt the revisions to the Process for Evaluating Qualified and Reciprocal Jurisdictions (Attachment Eight). The motion passed.

16. **Adopted the Re-Evaluation of Qualified Jurisdictions and Summary of Findings and Determinations for Bermuda, France, Germany, Ireland, Japan, Switzerland and the United Kingdom for the NAIC List of Qualified Jurisdictions**

Director Lindley-Myers reported that the initial five year evaluation periods for the current NAIC List of Qualified Jurisdictions (Bermuda, France, Germany, Ireland, Japan, Switzerland and the United Kingdom [UK]) are set to expire on Dec. 31, and it is necessary to approve their re-evaluations effective for Jan. 1, 2020. Several improvements were added to the revised process.
with respect to the evaluation of Qualified Jurisdictions, the most important being the elimination of the five-year re-evaluation requirement. Now, Qualified and Reciprocal Jurisdictions will remain on the lists until such time as there is a reason identified to remove them from the lists.

Director Lindley-Myers made a motion, seconded by Commissioner Altmaier, to adopt the Re-Evaluation of Qualified Jurisdictions and Summary of Findings and Determinations for Bermuda, France, Germany, Ireland, Japan, Switzerland and the UK for the NAIC List of Qualified Jurisdictions (Attachment Nine). The motion passed.

17. Adopted the Evaluation of Reciprocal Jurisdiction and Summary of Findings and Determinations for Bermuda, Japan and Switzerland for the NAIC List of Reciprocal Jurisdictions

Director Lindley-Myers made a motion, seconded by Commissioner Altmaier, to adopt the Evaluation of Reciprocal Jurisdiction and Summary of Findings and Determinations for Bermuda, Japan and Switzerland for the NAIC List of Reciprocal Jurisdictions (Attachment Ten) and add them to the NAIC List of Reciprocal Jurisdictions effective Jan. 1, 2020. They will join European Union (EU) member countries that are subject to an in-force Covered Agreement, eliminating reinsurance collateral requirements as automatically included on the NAIC List of Reciprocal Jurisdictions, as well as U.S. jurisdictions meeting requirements for accreditation under the NAIC Financial Standards and Accreditation Program. The motion passed.

18. Received the Report of the Financial Regulation Standards and Accreditation (F) Committee

Commissioner Kiser reported the Financial Regulation Standards and Accreditation (F) Committee met Dec. 6 in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; 2) vote to award continued accreditation to the insurance departments of Connecticut, Massachusetts and New York; and 3) vote to award accreditation for the first time to the insurance department of the U.S. Virgin Islands.

The Committee met in open session Dec. 7 and adopted its Summer National Meeting minutes.

The Committee adopted revisions to Part D: Primary Licensing, Redomestication and Change of Control of the Self-Evaluation Guide (SEG)/Interim Annual Review effective Jan. 1, 2020. The revisions are consistent with updates to the Part D Review Team Guidelines adopted by the Committee at the Summer National Meeting.

The Committee adopted revisions to the Review Team Guidelines for troubled companies effective Jan. 1, 2020. The revisions incorporate updated guidance on timely and effective communication of a troubled or potentially troubled company between the domiciliary and non-domiciliary states.

The Committee adopted the 2019 revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) as revisions to the Reinsurance Ceded accreditation standard. These revisions address the reinsurance collateral requirements necessary for U.S. ceding companies to take credit for certain reinsurance transactions and are designed to incorporate the relevant provisions of the Covered Agreements. The adoption included a waiver of procedure to expeditiously adopt the accreditation standard. The adopted effective date is Sept. 1, 2022, the end of the 60-month period when federal preemption mechanisms must be completed. Enforcement of the standard will commence Jan. 1, 2023. This standard will be considered by the Plenary at the 2020 NAIC Spring National Meeting.

The Committee adopted the Term and Universal Life Insurance Reserve Financing Model Regulation (#787) as a new accreditation standard effective Sept. 1, 2022. This model establishes uniform, national standards governing reserve financing arrangements pertaining to term life and universal life insurance policies with secondary guarantees. This standard will be considered by the Plenary at the 2020 NAIC Spring National Meeting.

19. Adopted Revisions to Part D: Primary Licensing, Re-Domestications and Change of Control of the Accreditation Standards

Commissioner Kiser reported at the Summer National Meeting, the Financial Regulations Standards and Accreditation (F) Committee adopted significant revisions to Part D: Primary Licensing, Redomestications and Change of Control of the Accreditation Standards. These revisions will serve to enhance each state’s ability to rely on the work of other accredited states and emphasize the importance of the functions covered by Part D. Those functions encompass a review of primary licensure for new companies; Form A filings for mergers and acquisitions; and with the revisions, redomestications.
The Committee also took the step of subjecting Part D to a formal recommendation from the Review Team with the result that the outcome could affect a state’s accredited status. Previously, these standards were subject to management comments or improvement suggestions but were not given the same weight as the analysis and examination standards. This element of the proposal appropriately elevates the Part D standards with the goal to achieve more effective regulation.

Commissioner Kiser made a motion, seconded by Commissioner Altmaier, to adopt revisions to Part D: Primary Licensing, Redomestications and Change of Control of the Accreditation Standards, which include the addition of redomestications within the standards, with an effective date of Jan. 1, 2020, and subject all of the Part D standards to Recommendation A or B, with the result that the outcome can affect a state’s accredited status, with an effective date of Jan. 1, 2022 (Attachment Eleven). The motion passed.

20. Received the Report of the International Insurance Relations (G) Committee

Commissioner Anderson reported the International Insurance Relations (G) Committee met Dec. 7 and adopted its Nov. 6, Oct. 15, Aug. 13, and Summer National Meeting minutes. During its Nov. 6, Oct. 15 and Aug. 13 meetings, the Committee took the following action: 1) heard an update on upcoming International Association of Insurance Supervisors (IAIS) committee meetings; 2) approved submission of NAIC comments on the IAIS draft Issues Paper on the Use of Big Data Analytics in Insurance; 3) heard updates on IAIS activities and the Financial Sector Assessment Program (FSAP); and 4) approved submission of NAIC comments on IAIS revised supervisory material and material related to the holistic framework for systemic risk in the insurance sector.

The Committee adopted the report of the ComFrame Development and Analysis (G) Working Group. The Working Group met Dec. 7 in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to: 1) discuss next steps for implementation of the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) and the monitoring period; and 2) hear an update on the aggregation method (AM) process. The Working Group has fulfilled its mandate and will be disbanded with all ongoing work to be absorbed under the existing groups within the Financial Condition (E) Committee.

The Committee also adopted its 2020 proposed charges.

The Committee heard updates on key 2019 projects of the IAIS, including revised Insurance Core Principles (ICPs) and ComFrame, the holistic framework for systemic risk in the insurance sector, and the insurance capital standard (ICS) and monitoring period. While these key IAIS projects were finalized this year, work on implementation and further development will continue into 2020 and the Committee will remain engaged on these projects.

The Committee heard updates on international activities, focusing on regional supervisory cooperation and the Organisation for Economic Co-operation and Development (OECD). Regional supervisory cooperation activities include ongoing engagement with regulators in Europe, the Asia-Pacific region, and Latin America, as well as the NAIC International Fellows Program.

The Committee heard an update on the FSAP. The 2019–2020 International Monetary Fund (IMF) FSAP of the U.S. financial regulatory system is currently underway. The FSAP comprises Mission 1 and Mission 2, with much of the work for the FSAP exercise for insurance concentrated in Mission 1, which took place this fall. Mission 2 will take place in early 2020, with meetings with the NAIC and several states. The IMF is expected to publish a technical note on insurance by the summer of 2020.

21. Received a Status Report on State Implementation of NAIC-Adopted Model Laws and Regulations

Superintendent Cioppa referred to the written report for updates on the states’ implementation of NAIC-adopted model laws and regulations (Attachment Twelve).

22. Heard the Results of the 2020 NAIC Zone Officer Election

The Executive (EX) Committee and Plenary received the results of the 2020 NAIC zone officer elections: Midwest Zone: Director Larry Deiter, Chair (SD); Director Jillian Froment, Vice Chair (OH); and Commissioner Doug Ommen, Secretary (IA). Northeast Zone: Commissioner Stephen C. Taylor, Chair (DC); Commissioner Jessica Altman, Vice Chair (PA); and Commissioner Gary Anderson, Secretary (MA). Southeast Zone: Commissioner Jim L. Ridling, Chair (AL); Commissioner
Mike Chaney, Vice Chair (MS); and Commissioner James J. Donelon, Secretary (LA). Western Zone: Director Lori K. Wing-Heier, Chair (AK); Commissioner Michael Conway, Vice Chair (CO); and Commissioner Andrew Stolfi, Secretary (OR).

23. **Elected the 2020 NAIC Officers**

The NAIC membership elected the 2020 NAIC officers: Director Raymond G. Farmer, President (SC); Commissioner David Altmaier, President-Elect (FL); Director Dean L. Cameron, Vice President (ID); and Director Chlora Lindley-Myers, Secretary-Treasurer (MO).

Having no further business, the Executive (EX) Committee and Plenary adjourned.

Notes:
1. On October 7, 2019 the NAIC Executive (EX) Committee approved the release of a request for proposal (RFP) to identify a firm to conduct a business and technical assessment of the NAIC’s System for Electronic Rate and Form Filing (SERFF). The selection of the firm and cost of the assessment was approved on December 7, 2019.
Executive Summary
NAIC 2020 Budget

The NAIC’s annual budget supports the many valuable services and benefits provided to state insurance regulators, insurance consumers, and the insurance industry. Each year, the budget is developed with the goal of enabling the membership to accomplish its key strategic priorities.

The 2020 budget incorporates funding for the final year of the NAIC’s three-year strategic plan, State Ahead. The plan articulates a comprehensive vision for the future of state insurance regulation and how the NAIC can help the membership stay ahead of the curve in a rapidly evolving marketplace. The budget demonstrates a firm commitment to the initiatives outlined in State Ahead, with its support of technology advancements and the continuing modernization of insurance regulation in areas such as innovation, cybersecurity, and international standard-setting.

The budget also continues the NAIC’s commitment to support the variety of programs, products, and services in the financial solvency and market regulatory arenas. The NAIC offers a wide range of publications, data, and information systems; accreditation reviews; and many other services to assist state insurance regulators in achieving their fundamental insurance regulatory goals in a timely and cost-effective manner.

For many years, the NAIC has collected data on behalf of the states for statutory financial statements, complaints data, and Market Conduct Annual Statements (MCAS). In recent years, the NAIC has expanded its services to include regulatory ad-hoc data collection efforts, such as the short-term limited duration data call. With the expansion of services, the NAIC is utilizing new technologies to develop and expand systems for collecting various regulatory data sets in a timely and cost-effective manner.

Identified in State Ahead as a significant element to achieving the plan’s goals, the NAIC has committed to moving its technology platform to the Cloud. Through mid-2019, the NAIC has nine applications in the Cloud, including the Professional Designation program and MCAS. Cloud solutions will streamline data intake processes, expand the tools offered to the membership and the insurance industry, increase the level and timeliness of analysis, and allow for experimentation of new products and services without a significant financial investment.
Support of the Membership

The mission of the NAIC is to assist the state insurance regulators in serving the public interest and achieving its goals of protecting the public interest; promoting a competitive marketplace; facilitating the fair and equitable treatment of consumers of insurance; promoting the reliability, solvency, and financial solidity of insurers; and supporting and improving state insurance regulation. Leveraging NAIC technology solutions, regulatory tools, and staff resources allow member states to achieve these goals at a significant cost savings. Without these options, many systems would be cost-prohibitive for the states to implement on their own. Without membership in the NAIC, the amount of state funding required to provide or access similar type of services and data the NAIC provides — often at no extra charge — would far exceed what a state pays in member dues to the NAIC.

A Focus on Consumers

The NAIC provides a multi-channel approach to reach and assist consumers in making informed decisions on insurance matters. These multi-pronged public relations campaigns include items like consumer insights and alerts, a consumer section on naic.org, mobile apps, and targeted social campaigns. The NAIC also hosts a consumer hotline to help consumers contact their state insurance departments for assistance.

Valuable Products and Services

The NAIC seeks to support its mission through the wide variety of products and services offered to both the insurance industry and state regulators. NAIC web-based systems automate, standardize, and streamline regulatory processes by transmitting data and facilitating regulatory transactions between insurers, consumers, and state insurance regulators.

The NAIC is committed to maintaining and enhancing these systems to provide high-quality service to all stakeholders. The 2020 budget includes five technology-based fisals, which represent initiatives to automate manual processes, enhance security, streamline billing processes, take advantage of cloud-based solutions, and improve delivery of products and services.

By the Numbers

NAIC products and services make life easier on a number of fronts.

- **Life Policy Locator** – 100,006 requests received in 2018, with 31,385 located life insurance policies for a total claims amount of more than $454 million
- **System for Electronic Rates & Forms Filing (SERFF)** – 557,089 transactions processed in 2018
- **Online Premium Tax for Insurance (OPTins)** – 142,616 transactions processed in 2018
- **State Based Systems (SBS)** – provides back-office services for 30 jurisdictions in 2019
- **Professional Designation Program** – 1,211 designations awarded since the program’s inception in October 2006
- **Center for Insurance Policy and Research (CIPR) Key Research Issues** – 150 briefs currently available online including NAIC key initiatives and topics ranging from cybersecurity and innovation to natural catastrophe risk and resiliency
Building the Budget

The NAIC strives for transparency in its budget process as well as in its operations. The budget process gets underway in the spring each year, when department managers evaluate current-year revenues and expenses in order to assess the year-end picture, then propose a budget for the following year based on their operational objectives and member initiatives. Managers carefully focus on variances between the current year’s budget and projected results and anticipated business needs for the coming year. This process includes a review of all projects, products, programs, services, committee charges, and technology initiatives in light of the NAIC’s mission and the membership’s strategic priorities, particularly those outlined in State Ahead. NAIC senior management reviews each department budget in detail with its division director to make adjustments according to the strategic and financial needs of the association and ultimately consolidates all requests into a single, comprehensive budget.

Following the extensive development and internal review process, the budget is presented to the NAIC Officers, the Executive (EX) Committee and Internal Administration (EX1) Subcommittee, and the full NAIC membership before being released for public review and comment. To ensure transparency, a public hearing is held to receive public comments before final consideration and adoption by the NAIC Executive (EX) Committee and Plenary.

2019: The Halfway Point of State Ahead

State Ahead outlined 94 initiatives to be accomplished over three years. The NAIC is at the halfway mark with the completion of 35 of these initiatives, while 40 are being actively worked and 19 more are slated to start in 2020.

2019: Building Full Speed Ahead

The NAIC continued to focus on building an infrastructure for data, technology, and talent to implement State Ahead.

Expected Results for 2019

Based on actual operating results (before adding investment income) through June 30, 2019, the NAIC projects a net negative operating margin of $8.8 million compared to a budgeted net negative operating margin of $11 million, an improvement of nearly $2.3 million. Investment income is projected to be $13.7 million, resulting in a net asset increase of $4.9 million.

Several initiatives outlined in the State Ahead blueprint resulted in fiscal impact statements for 2019. These fiscals were made available for public comment in advance of membership consideration, approval, and incorporation into the 2019 budget.

Additional information regarding 2019 projected variances is included throughout the detailed footnotes of the budget.

Year Three of the Plan

2020: Transforming

By the end of 2020, the NAIC will be positioned to provide its members with new analytics, technology, and tools to more effectively regulate their markets.

2020 Budget

The 2020 budget demonstrates NAIC’s continued strong focus on prudent financial management.

The 2020 NAIC operating budget (before adding investment income) reflects revenues of $114.5 million and expenses of $124.5 million, which represent a 6.5% and a 5.1% increase, respectively, from the 2019 budget, resulting in $10.0 million in projected expenses over revenues. Viewed in relation...
to the 2019 projected totals, the 2020 budget represents operating revenue increase of 3.8% and operating expense increase of 4.6%. Additional information about the 2020 budget is included throughout the detailed footnotes of the budget.

A fiscal impact statement (fiscal) is prepared for new or existing NAIC initiatives with revenue, expense, or capital impacts of $100,000 or more either in the current budget or within the following few years’ budgets or requires more than 1,150 internal technical resources to accomplish. Each fiscal includes a detailed description of the initiative; the impact on key stakeholders; the financial and operational impact of the initiative; and an assessment of the risks. The total financial impact of the five fiscal included in the 2020 budget is a net of $4.3 million in expenses over revenues. Additional information about each initiative is included in the various Fiscal tabs of the budget.

The 2020 budget includes $3.2 million in investment income from the NAIC’s Long-Term Investment Portfolio. Investment income is composed of interest and dividends earned reduced by investment management fees – investment gains and losses are not projected nor included in the budget.

Combining budgeted results from operations with budgeted investment income, the 2020 budget has a reduction in net assets of $6.9 million.

Preparing for the Unknown

The budget proposal includes all known activities anticipated to occur in 2020. However, situations may arise during the course of the year that require additional funding. In such an event, a funding request is prepared and presented to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee for consideration. Funding for any approved project comes from the Regulatory Modernization and Initiatives Fund, established in 2005 to manage requests for funding for specific projects.

2020 Fiscal Impact Statements

- **Cloud Transition Phase IV (Cloud Migration)** – This fourth phase of the project focuses on minimal change to most of the targeted systems to be migrated, in order to do so quickly and at a minimal cost. This phase continues the culture transformation designed to make the organization nimbler, thus enabling more frequent and faster delivery of products, and provides technical support for cloud projects already in progress.
  - Net 2020 expense of $3.2M after NIPR cost-sharing

- **Enhanced Regulatory Data Collection (RDC)** – This project expands the current system into an enterprise solution that can integrate with other applications, improve data quality, and speed up the review process. This project will enable business owners to be more self-reliant and independent. This project will provide functionality that will be used by the Uniform Certificate of Authority Application (UCAA) redesign.
  - Expense in 2020 of $239K

- **Financial Data Delivery Platform Enhancement** – This initiative moves financial statement data order fulfillment to the Cloud, thereby eliminating outdated platforms and improving the NAIC’s security profile. This project will allow customers to access their data in a more timely manner without manual intervention and support from NAIC staff.
  - Expense in 2020 of $397K

- **SERFF Billing Enhancements** – will simplify the SERFF transaction pricing structure by eliminating SERFF prepaid blocks and instead charging a fee based on prior-period usage. The NAIC will also collect the transaction fee at the time of filing, thereby reducing payment and collection efforts.
  - Expense in 2020 of $86K

- **Uniform Certificate of Authority Application (UCAA) Redesign and Biographical Affidavit Database** – moves the UCAA platform to the Cloud and expands the number of company licensing-related forms and applications, including Biographical Affidavits, by 2022.
  - Expense in 2020 of $390K, with $760K in 2021 and $295K in 2022
that arise following the adoption and implementation of an annual budget. The Fund is based on 1.5% of the NAIC’s projected consolidated net assets as of December 31, 2020, or $1.9 million with the inclusion of fiscals.

**Ensuring Financial Stability**

The NAIC’s operating reserve is designed to ensure the financial stability of the NAIC in the event of emerging business risks and uncertainties and to absorb new priority initiatives pursued by NAIC membership. The association’s reserve status is of paramount consideration in the budgeting process, as is strong and prudent financial management of the NAIC’s assets.

In July 2015, the Executive (EX) Committee and Internal Administration (EX1) Subcommittee approved a report from an independent financial advisory firm which established the NAIC’s liquid operating reserve target range of 83.4% to 108.2%. This range was the result of a comprehensive review of current and future identified risks and an evaluation of comparable organizations. This report recognized the increased level of uncertainty facing the NAIC and anticipated future investments which would be required to enhance the association’s information technology and technical infrastructure, which is represented by many elements of the 2020 budget.

**Contact Information**

The NAIC appreciates the opportunity to present this 2020 budget and believes it provides a comprehensive review of the NAIC’s business and financial operations for the current and upcoming fiscal year. A summary of the 2020 budget’s key components is included in the budget overview.

Please feel free to contact Jim Woody, Chief Financial Officer, at (816) 783-8015, or Carol Thompson, Senior Controller, at (816) 783-8038, should you have any questions or need additional information.

Re: Summary of Comments on the Proposed 2020 NAIC Budget

The NAIC received one comment letter from the National Association of Mutual Insurance Companies (NAMIC) on the proposed 2020 budget after it was released for public comment on October 8, 2019. This document summarizes NAMIC’s comments and includes the NAIC’s response to each comment.

A Public Hearing will be held November 18, 2019, to discuss these comments. Participation instructions for the public hearing can be accessed at http://www.naic.org/about_budget.htm.

Contributions to Regulator Efficiency

- NAMIC noted the NAIC 2020 budget includes several programs and services that contribute to efficiencies in state-based insurance regulation and enable regulators to become more proficient in their roles. NAMIC cited the continued upgrade of financial analysis solvency tools through the FASTR project; the investments in the NAIC Professional Designation Program; the migration to and development of new programs within a cloud computing environment, and the steps taken to strengthen the NAIC’s data security environment. NAMIC went on to provide detailed statements of support for each of these initiatives. NAMIC did caution NAIC “to not inject any regulatory biases or other ill-defined, aspirational goals that do not further state-based insurance regulation but do cause unnecessary compliance costs that are ultimately borne by policyholders.”

NAIC Response: The NAIC appreciates NAMIC’s support of these initiatives. The NAIC’s goal is to ensure state-based insurance regulation keeps pace with a rapidly changing marketplace. The initiatives cited by NAMIC as well as numerous others outlined on the NAIC State Ahead website demonstrate that commitment. NAIC senior leadership developed an internal project review process several years ago, which requires all key initiatives be vetted before starting, to ensure the project is aligned with State Ahead and Member priorities and will provide benefits to state-based regulation. Any project meeting certain thresholds requires a fiscal impact statement, or fiscal. These thresholds are expenses exceeding $100,000, technology resources exceeding 1,150 hours, or any new revenue stream. Fiscals are posted on the NAIC’s website prior to
membership consideration in order to allow for the public to comment. Both the internal vetting and the fiscal process are designed to ensure that all initiatives undertaken by NAIC staff will enhance or improve state-based insurance regulation and will not result in unnecessary costs.

**Internal Data Protection and Security**

- NAMIC noted the NAIC is spending time and financial resources to increase the level of data protection and security around the data and data repositories the NAIC maintains by conducting independent third-party audits. While supporting the direction the NAIC is taking to ensure data and systems are protected, NAMIC also stated it does not necessarily mean the insurance industry is comfortable providing additional data to the NAIC without justification.

**NAIC Response:** As NAMIC noted, the 2020 budget reflects NAIC’s commitment to data protection and security, especially in light of the transition to the Cloud. The NAIC collects a wide variety of data from various sources, primarily from the insurance industry. It does so, however, based on a regulatory business need. There is no intent to collect data simply because of any technology expansion efforts. Data collection has been and will continue to be at the request of the NAIC membership for the purpose of regulating the insurance industry.

**Cloud Development Tools Modernization**

- One of the four initiatives specifically supported by NAMIC was the migration of the NAIC’s applications to the Cloud, which is a significant element to the State Ahead strategic plan. NAMIC pointed out the investments associated with each of the four phases, noting the initiative has the capability to reduce maintenance costs, improve efficiencies, and strengthen security. NAMIC said its members are interested in reviewing a comprehensive cost/benefit analysis of the NAIC’s migration to the Cloud and asked for the costs to develop and maintain the Cloud on an ongoing basis, the benefits and costs savings to operating in a Cloud environment, and the overall security enhancements that go along with managing and housing applications that contain sensitive and proprietary company information on the Cloud.

**NAIC Response:** The NAIC appreciates NAMIC’s support of this critical initiative. Although the NAIC will be entering its fourth phase of the initiative in 2020, the work to complete migrations will continue past year-end 2020. A number of significant systems are scheduled to begin migrations in 2020, such as SERFF, State Based Systems, and I-SITE; however, given the size of these systems, it is not expected that all systems will be fully migrated to the Cloud by year-end 2020. The NAIC does, however, expect to complete the project utilizing internal resources, thereby not requesting additional fiscal funding.

As noted in the 2020 fiscal, the primary benefits of investing in the cloud platform are increased efficiencies including improved system availability; enhanced customer support; predictable costs and flexibility; and greater innovation opportunities. Cost savings are expected long term, but while the migration is in progress, the NAIC recognizes it must continue to invest in the on-premise systems as well as the cloud migrations in order to continue its operations. Having said that, the NAIC has taken steps to reduce costs where feasible. First, the NAIC has engaged an
industry-leading firm to provide consulting expertise as to how best to design and deploy cloud-based solutions. In addition, the NAIC has also implemented a cost management program managed by another industry-leading firm which pinpoints potential cost savings in the Cloud by taking certain actions. The NAIC will continue to investigate opportunities to reduce the cost of maintaining its Cloud infrastructure while taking advantages of the Cloud’s technical capabilities.

IAIS Dues

- NAMIC noted that the NAIC dues paid to the International Association of Insurance Supervisors (IAIS) continue to increase at a significant rate and questioned the value proposition. NAMIC members asked whether the NAIC is one of the highest paying members and/or if they are assessed based on the number of jurisdictions in the United States.

NAIC Response: The IAIS annual dues paid by the NAIC cover the memberships of the NAIC itself and the individual 56 NAIC members. IAIS annual dues are calculated based on two parameters: the written premium within the jurisdiction and the jurisdiction’s GDP per capita. The size of the US insurance market relative to the rest of the world and the US GDP, result in the NAIC’s annual dues level. While the NAIC’s IAIS dues increased 12.5% in 2020 compared to 2019, a 10% increase is expected in 2021 and annual fee increases will continue to decline in subsequent years. Additionally, the NAIC is continuing to work with IAIS Secretariat to control the level of spending and identify further operational improvements that can be reflected in annual budgets. Since the dues are billed in Swiss Francs, the actual rate the NAIC pays in US dollars may be higher or lower depending on the currency exchange rate when the payment is made.

Concluding Comments

The NAIC takes a holistic approach to the development of its annual budget. With the goal of transparency in mind, NAIC leadership welcomes the opportunity to publicly present the proposed 2020 NAIC budget and respond to questions and/or comments raised by interested parties. State insurance regulators, supported by the NAIC, are committed to protecting policyholders as well as ensuring the financial solvency of the insurance industry in a cost-effective and financially prudent manner. The NAIC continuously seeks opportunities to reduce operating costs while providing world-class support to its members, regulators, insurance customers, and interested parties. In addition, the NAIC will continue to utilize a portion of its Net Assets to ensure the products and services required by state insurance departments are delivered with minimal price changes.

RE: NAMIC Comments – NAIC Proposed 2020 Budget

Dear Mr. Woody:

The following comments are submitted on behalf of the members of the National Association of Mutual Insurance Companies1 regarding the NAIC’s proposed 2020 budget.

NAMIC members have long been supporters of the state-based regulatory system and are mindful of the many challenges facing state insurance departments, such as working with limited or dwindling resources or attracting and retaining talent. We therefore believe it is incumbent upon the NAIC to assure streamlined and efficient regulatory standards and guidance so as not to unduly burden states in carrying out their respective duties and responsibilities.

Regarding the 2020 budget, there are several programs and services that NAMIC believes will go a long way to helping state regulators become more efficient and proficient in their critical role as state regulators. Such programs and services include: the continued upgrade of financial analysis solvency tools (FASTR), the new investments made to the NAIC Professional Designation Program, the migration to and development of new programs within a cloud computing environment, and the enhancements made to the NAIC’s own data security environment. These programs and others demonstrate that the NAIC is becoming a more important resource to the states in a society becoming more dependent on the use of new and innovative technology. However, as the NAIC continues to incorporate data analytics and other artificial intelligence into its internal analysis and workstream, caution should be taken not to inject any regulatory biases or other ill-defined, aspirational

1 NAMIC membership includes more than 1,400 member companies. The association supports regional and local mutual insurance companies on main streets across America and many of the country’s largest national insurers. NAMIC member companies write $268 billion in annual premiums. Our members account for 59 percent of homeowners, 46 percent of automobile, and 29 percent of the business insurance markets. Through our advocacy programs we promote public policy solutions that benefit NAMIC member companies and the policyholders they serve and foster greater understanding and recognition of the unique alignment of interests between management and policyholders of mutual companies.
goals that do not further state-based insurance regulation but do cause unnecessary compliance costs that are ultimately borne by policyholders.

The remainder of our comments will focus on these areas of interest but also include some commentary on the overall direction of the NAIC.

Financial Analysis Solvency Tools
The NAIC 2020 budget includes $135,000 in professional services for the continued work on the Financial Analysis Tool Redesign (FASTR). This program, which included dedicated Fiscal Statements in both the 2018 and 2019 budgets, is a long-term program designed to help the state financial analyst become more efficient and to make their jobs easier. As part of the State Ahead strategy, the first phase of FASTR included a redesign of the Financial Profile Report, an automated analysis tool that allows regulators to better identify issues and trends and to navigate financial data more efficiently. The second phase when fully implemented will include an update to the financial risk repositories, a massive database of insurer financial data that allows regulators to monitor the performance of the industry and identify concerns for further investigation. NAMIC members support the upgrades of these tools and are hopeful they will lead to more valuable insurer/regulator interactions.

NAIC Professional Designation Program
In addition to helping the states with new tools and enhanced ways to access and analyze data, another initiative that has potential to help state insurance regulators is the NAIC Professional Designation Program and specifically the increased investment into the program for the 2020 fiscal year. In conjunction with this program, the NAIC budget proposes an increase of $91,400 in professional fees. NAMIC supports this increase in spending and supports the overall program which started in 2006 and has awarded over 1,200 professional designations in that time. As communicated in the State Ahead Initiative, the NAIC wishes to increase regulator enrollment into the program and NAMIC also encourages more states to participate. Given the current state of demographics in the U.S. economy, a program like this is critical if states and the NAIC want to address the issue of the high rate of retiring baby-boomers. Continued investments into programs like this will help train the future regulators of tomorrow to deal with the complex and ever-changing insurance regulatory landscape.

Cloud Development Tools Modernization
A significant element in the State Ahead Initiative includes the migration of all the NAIC’s applications to a Cloud environment. Since 2017, the NAIC has dedicated funds to developing a Cloud strategy and included minimal investments into Cloud programs and services. As the State Ahead Initiative was formalized, so too were increased investments into the NAIC’s Cloud Strategy, starting in 2018 with an investment of $238,000. These initial investments were the start of migrating existing NAIC applications to the Cloud. Last year, according to the 2019 Fiscal Statement regarding the third phase of cloud transition, budgeted spending increased dramatically to $3.5 million; however, this represented the first full year of system migrations. Included in the 2020 budget is an additional request of $3.3 million in expenses. The aggregated
amount of spending for cloud migration projects totals just over $7 million over the last four budget cycles. The sheer volume of these figures speaks to the NAIC’s dedication to running programs and systems in a safer and more secure environment, such as the Cloud, and its’ importance to the overall strength of the organization.

The migration to the Cloud has the opportunity to reduce IT maintenance costs and according to the commentary provided during the Open Hearing for the budget, some of those savings have started to emerge. Further, outdated and obsolete systems are being retired and the systems replacing them that are being hosted on the Cloud are more efficient. In addition, the new applications that are being initially developed on the Cloud have the benefit of being developed utilizing the latest technologies and security enhancements. With these potential benefits and the high development costs, NAMIC members are interested in reviewing a comprehensive cost/benefit analysis of the NAIC’s migration to the Cloud. Included in this analysis would be the costs to develop and maintain the Cloud on an ongoing basis, the benefits and costs savings to operating in a Cloud environment, and the overall security enhancements that go along with managing and housing applications that contain sensitive and proprietary company information on the Cloud.

Internal Data Protection and Security
Data protection and security is another area where NAMIC supports the direction NAIC operations is taking, particularly as it pertains to the increasing amount of company information being shared between the NAIC and the states. Whether that includes financial data included as part of the risk repositories or the nearly 170 systems that will ultimately be run on the Cloud, NAMIC applauds the NAIC for taking steps to enhance the organizations information systems through conducting independent third-party audits to certify each of their systems against industry (SOC 2) standards. A note in the 2020 budgets on professional fees: audits, includes a line item of $180,000 for a SOC 2 gap assessment for cloud computing, $148,400 for a cybersecurity audit, and $90,000 for security testing related to cloud computing. This demonstrates the NAIC’s recognition of how important it is to provide a safe and secure environment for their members (states) to work within. NAMIC strongly encourages the NAIC to continue its commitment the important area of data protection and security.

Simple technology upgrades and security measures, however, do not mean that the industry supports or is comfortable with any enhanced data requirements it may be asked to submit to the NAIC for regulatory approval. Requests should not be inordinate, excessive, or in any way justified simply because the NAIC has engaged in technology expansion. Further, as additional, critical, proprietary, and confidential information is submitted per regulatory requirements, the NAIC as the data hub for this information should continue to implement and explore extremely robust protections from external sources.

General Comments
Each of the last several years, revenues and expenses combined have outperformed the budget. Factoring in investment gains during those years has allowed the NAIC to operate at a deficit yet continue to grow its’ net asset base. For the 2020 budget the NAIC is targeting a slight decrease to its’ liquid operating reserve ratio; however, it remains in the necessary
range for adequate funding. Continued growth and expansion should be in proportion to expected needs and tempered by continued review for efficiencies and removal of redundancies that provide excessive costs to all stakeholders, thereby continuing to be good stewards of public and private funds.

For instance, dues paid to the International Association of Insurance Supervisors continue to increase at a significant rate with no apparent end in sight – and for an increasingly questionable value proposition based on the direction of many of their workstreams. The increase from 2018 to 2019 was just over $50,000 and budgeted 2020 dues includes an additional $91,000 bringing total dues to be paid in 2020 to the IAIS to just over $671,000. NAMIC members inquire whether the NAIC is one of the highest paying members and/or if they are assessed based on the number of jurisdictions in the United States.

Closing
NAMIC members appreciate the opportunity to provide input on the NAIC 2020 annual budget. We believe the association is managing the significant finances of the organization and has invested in several projects that may benefit the states and ultimately the insurers and policyholders they serve.

Thank you for your consideration of these comments on this matter of importance to NAMIC, its member companies, and their policyholders.

Sincerely,

Jon Bergner
Assistant Vice President – Public Policy and Federal Affairs
National Association of Mutual Insurance Companies
Executive (EX) Committee and Plenary, 12/10/19

2020 Committee Charges

EXECUTIVE (EX) COMMITTEE

The mission of the Executive (EX) Committee is to manage the affairs of the NAIC in a manner consistent with its Articles of Incorporation and its Bylaws.

Ongoing Support of NAIC Programs, Products or Services

1. The Executive (EX) Committee will:
   A. Identify the goals and priorities of the organization and make recommendations to achieve such goals and priorities based on input of the membership. Make recommendations by the 2020 Commissioners Conference.
   B. Create/terminate task force(s) and/or Executive (EX) Committee-level working groups to address special issues and monitor the work of these groups. Create necessary task force(s) and/or Executive (EX) Committee-level working groups throughout 2020 as necessary.
   C. Submit reports and recommendations to NAIC members concerning the activities of its subcommittee and the standing committees. Submit a report at each national meeting.
   D. Consider requests from NAIC members for friend-of-the-court briefs.
   E. Establish and allocate functions and responsibilities to be performed by each NAIC zone.
   F. Pursuant to the Bylaws, oversee the NAIC offices to assist the organization and the individual members in achieving the goals of the organization.
   G. Conduct strategic planning on an ongoing basis.
   H. Plan, implement and coordinate communications and activities with the Federal Insurance Office (FIO).
   I. Plan, implement and coordinate communications and activities with other state, federal, local and international government organizations to advance the goals of the NAIC and promote understanding of state insurance regulation.
   J. Review and approve requests for the development of model laws and/or regulations. Coordinate the review of existing model laws and/or regulations.
   K. Select NAIC national meeting sites five and six years in advance of the meeting date to ensure efficient and economical locations and facilities.
   L. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.

NAIC Support Staff: Andrew J. Beal/Kay Noonan
FINANCIAL STABILITY (EX) TASK FORCE

The mission of the Financial Stability (EX) Task Force is to consider issues concerning domestic or global financial stability as they pertain to the role of state insurance regulators.

Ongoing Support of NAIC Program, Products or Services

1. The Financial Stability (EX) Task Force will:

   A. Consider issues concerning domestic and global financial stability as they pertain to the role of state insurance regulators and make recommendations to the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.

   1. Analyze existing post-financial crisis regulatory reforms for their application in identifying macroeconomic trends, including identifying possible areas of improvement or gaps, and propose to the Financial Condition (E) Committee or other relevant committee enhancements and/or additions to further improve the ability of state insurance regulators and the industry to address macroprudential impacts; consult with such committees on implementation, as needed.

   B. Consider state insurance regulators’ input to national and international discussions on macroeconomic vulnerabilities affecting the insurance sector.

   1. Monitor international macroprudential activities at forums like the International Association of Insurance Supervisors (IAIS).

   2. Implement the Macroprudential Initiative (MPI) domestically, which includes enhancements to the U.S. regulatory toolkit as part of the State Ahead initiative.

   C. Serve as a forum to coordinate state insurance regulators’ perspectives on a wide variety of issues arising from the designation of a U.S. insurance group as “systemically important” and “internationally active” both pre- and post-designation, including:

   1. Where appropriate, develop policy recommendations and/or guidance regarding the role, responsibilities and activities of state insurance regulators in the context of consolidated supervision resulting from designation.

   2. Analyze proposed rules by the federal agencies that relate to financial stability.

   3. Analyze proposed policy measures regarding supervisory standards for global systemically important insurers and internationally active insurance groups.

   4. Develop comment letters on such analysis for further consideration by the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.

NAIC Support Staff: Elise Liebers/John Hopman/Mark Sagat/Todd Sells/Tim Nauheimer
GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council coordinates the NAIC’s ongoing work with the federal government and state government officials on legislative and regulatory policy. The Leadership Council, in conjunction with the NAIC’s other standing committees, is responsible for quickly responding to federal legislative and regulatory developments that affect insurance regulation.

The mission of the Government Relations (EX) Leadership Council is to develop, coordinate and implement the NAIC’s legislative, regulatory and outreach initiatives. The Leadership Council will devise strategies for NAIC action and promote the participation of all NAIC members in the NAIC’s government relations initiatives.

Ongoing Support of NAIC Programs, Products or Services

1. The Government Relations (EX) Leadership Council will:
   A. Monitor, analyze and respond to federal legislative and regulatory actions and other issues of importance to the NAIC membership.
   B. Work with other standing committees, task forces and working groups to help develop and communicate the NAIC’s policy views to federal and state officials on pending legislation and regulatory issues by involvement of NAIC members through testimony, correspondence and other approaches.
   C. Develop a strategy and program for directly engaging NAIC members with the U.S. Congress and federal agencies to advocate for NAIC objectives and the benefits and efficiencies of state-based insurance regulation.
   D. Secure broader participation from NAIC membership on all government affairs advocacy initiatives.
   E. Report to the Executive (EX) Committee on all activities and matters relating to the annual charges of the Leadership Council.

NAIC Support Staff: Ethan Sonnichsen/Mark Sagat/Brian R. Webb
INNOVATION AND TECHNOLOGY (EX) TASK FORCE

The mission of the Innovation and Technology (EX) Task Force is to provide a forum for regulator education and discussion of innovation and technology in the insurance sector, to monitor technology developments that affect the state insurance regulatory framework, and to develop regulatory guidance, as appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Innovation and Technology (EX) Task Force will:
   A. Provide forums, resources and materials for the discussion of innovation and technology developments in the insurance sector, including the collection and use of data by insurers and state insurance regulators—as well as new products, services and distribution platforms—in order to educate state insurance regulators on how these developments affect consumer protection, privacy, insurer and producer oversight, marketplace dynamics and the state-based insurance regulatory framework.
   B. Develop regulatory guidance, model laws or model law revisions, and white papers or make other recommendations to the Executive (EX) Committee, as appropriate.
   C. Monitor and discuss regulatory issues that arise with the development of autonomous vehicles. Study and, if necessary, develop recommendations for changes needed to the state-based insurance regulatory framework.
   D. Discuss emerging issues related to companies or licensees leveraging new technologies to develop products for on-demand insurance purposes—in addition to potential implications on the state-based insurance regulatory structure—including, but not limited to, reviewing new products and technologies affecting the insurance space and the associated regulatory implications.
   E. Monitor developments in the area of cybersecurity, including the implementation of the Insurance Data Security Model Law (#668) and representing the NAIC and communicating with other entities/groups, including sharing information as may be appropriate.
   F. Coordinate with other NAIC committees and task forces, as appropriate, on technology, innovation, cybersecurity issues and data privacy.

2. The Big Data (EX) Working Group will:
   A. Review current regulatory frameworks used to oversee insurers’ use of consumer and non-insurance data. If appropriate, recommend modifications to model laws and/or regulations regarding marketing, rating, underwriting and claims, regulation of data vendors and brokers, regulatory reporting requirements, and consumer disclosure requirements.
   B. Propose a mechanism to provide resources and allow the states to share resources to facilitate their ability to conduct technical analysis of, and data collection related to, the review of complex models used by insurers for underwriting, rating and claims. Such a mechanism shall respect and in no way limit the states’ regulatory authority.
   C. Assess data needs and required tools for state insurance regulators to appropriately monitor the marketplace and evaluate underwriting, rating, claims and marketing practices. This assessment shall include gaining a better understanding of currently available data and tools, as well as recommendations for additional data and tools, as appropriate. Based on this assessment, propose a means to collect, house and analyze needed data.
3. The **Speed to Market (EX) Working Group** will:
   A. Consider proposed System for Electronic Rate and Form Filing (SERFF) features or functionality presented to the Working Group by the SERFF Advisory Board, likely originating from the SERFF Product Steering Committee. Upon approval and acquisition of any needed funding, direct the SERFF Advisory Board to implement the project. Receive periodic reports from the SERFF Advisory Board, as needed.
   B. Discuss and oversee the implementation and ongoing maintenance/enhancement of speed to market operational efficiencies related to product filing needs, efficiencies and effective consumer protection. This includes the following activities:
      1. Provide a forum to gather information from the states and the industry regarding tools, policies and resolutions to assist with common filing issues. Provide oversight in evaluating product filing efficiency issues for state insurance regulators and the industry, particularly with regard to uniformity. In 2020, evaluate the state survey results compiled in 2019 regarding the usefulness of existing tools and potential new tools and propose a plan to make improvements.
      2. Use SERFF data to develop, refine, implement, collect and distribute common filing metrics that provide a tool to measure the success of the speed to market modernization efforts as measured by nationwide and individual state speed to market compliance, with an emphasis on monitoring state regulatory and insurer responsibilities for speed to market for insurance products.
      3. Facilitate proposed changes to the product coding matrices (PCMs) and the uniform transmittal document (UTD) on an annual basis, including the review, approval and notification of changes. Monitor, assist with and report on state implementation of any PCM changes.
      4. Facilitate the review and revision of the *Product Filing Review Handbook*, which contains an overview of all of the operational efficiency tools and describes best practices for industry filers and state reviewers with regard to the rate and form filing and review process. In 2020, develop and implement a communication plan to inform states about the *Product Filing Review Handbook*.
   C. Provide direction to NAIC staff regarding SERFF functionality, implementation, development and enhancements. Direct NAIC staff to provide individual state speed to market reports to each commissioner at each national meeting. Receive periodic reports from NAIC staff, as needed.
   D. Conduct the following activities as desired by the Interstate Insurance Product Regulation Commission:
      1. Provide support to the Compact as the speed to market vehicle for asset-based insurance products, encouraging the states’ participation in, and the industry’s usage of the Compact.
      2. Receive periodic reports from the Compact, as needed.

4. The **Artificial Intelligence (EX) Working Group** will:
   A. Study the development of artificial intelligence (AI), its use in the insurance sector, and its impact on consumer protection and privacy, marketplace dynamics, and the state-based insurance regulatory framework. The Working Group will develop regulatory guidance, beginning with guiding principles, and make other recommendations to the Innovation and Technology (EX) Task Force as appropriate by the 2020 Summer National Meeting.

NAIC Support Staff: Scott Morris/Denise Matthews
The Long-Term Care Insurance (EX) Task Force will:
1. Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, this Task Force is charged to:
   A. Develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.
   B. Identify options to provide consumers with choices regarding modifications to LTCI contract benefits where policies are no longer affordable due to rate increases.
   C. Deliver such a proposal to the Executive (EX) Committee by the 2020 Fall National Meeting.
2. Provide periodic reporting to the Long-Term Care Insurance (E/B) Task Force to help ensure coordination between the two task forces on LTCI issues.

Unless otherwise affirmatively extended or modified by the Executive (EX) Committee, the Task Force and its charges will expire Jan. 31, 2021.

NAIC Support Staff: Jeffrey C. Johnston
INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE

The mission of the Internal Administration (EX1) Subcommittee is to monitor the operations of the NAIC, including: 1) preparing a budget for Executive (EX) Committee review; 2) providing direction on personnel issues; 3) approving emergency expenditures; 4) evaluating the chief executive officer (CEO); and 5) assisting the CEO in resolving competing demands for NAIC staff resources.

Ongoing Support of NAIC Programs, Products or Services

1. The Internal Administration (EX1) Subcommittee will:
   A. Review and approve all expenditures of funds not included in the annual budget by considering any fiscal impact statements of unbudgeted resource requests and reporting its actions to the Executive (EX) Committee.
   B. Annually work with the CEO, chief operating officer/chief legal officer (COO/CLO), and chief financial officer (CFO) to review the business operations plan, which will incorporate the Executive (EX) Committee’s strategic management initiatives, and report its actions to the Executive (EX) Committee.
   C. Oversee a review of any management areas of the NAIC that should be designated for formal operational reviews by working with the CEO and COO/CLO.
   D. Oversee the development, revision and delivery of all NAIC education programs, or the addition of new programs, by coordinating with other committees, as appropriate, and providing direction to the CEO and COO/CLO.
   E. Receive a report at each national meeting from the NAIC Audit Committee, which will be chaired by the secretary-treasurer. The NAIC Audit Committee will meet with NAIC management at or before each national meeting, or more frequently as necessary, to review the NAIC financial statements and hear reports from NAIC management on emerging financial issues for the NAIC, and it will report such information to the Internal Administration (EX1) Subcommittee. The NAIC Audit Committee shall also carry out the following activities pursuant to its charter:
      1. Engage the NAIC’s independent accountants with respect to the annual audit. This will include the appointment of an independent audit firm, a review of the results of the annual audit, and discussions with the independent auditors and NAIC management to ensure that all audit comments or suggestions are addressed in a timely manner.
      2. Engage the NAIC’s service advisory firm. This will include the selection of an independent firm to provide Statement on Standards for Attestation Engagements (SSAE) services to the NAIC.
   F. Serve as the primary liaison between the NAIC membership and the NAIC investment advisor, or appoint a subcommittee to act in that capacity, including receiving reports on the performance of the NAIC’s investment portfolio and, from time to time, meeting directly with investment firm representatives to hear periodic reports and recommendations.
   G. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.
   H. Appoint the Information Systems (EX1) Task Force to provide regulator-based technology expertise.
   I. Conduct evaluations of the CEO and COO/CLO, and make appropriate recommendations to the Executive (EX) Committee. Consult with the CEO and COO/CLO on compensation of senior management.

NAIC Support Staff: Andrew J. Beal/Jim Woody
INFORMATION SYSTEMS (EX1) TASK FORCE

The mission of the Information Systems (EX1) Task Force is to: 1) provide regulator-based technology expertise to the Internal Administration (EX1) Subcommittee; and 2) support committee activities and objectives by monitoring projects that provide technical services or systems for state-based insurance regulation, as prioritized by the Executive (EX) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Information Systems (EX1) Task Force will:
   A. Serve as the Internal Administration (EX1) Subcommittee’s project-independent technology monitor and consultant. This involves monitoring the development, deployment and operations of NAIC information technology (IT) systems and services for state insurance regulators and, based on this effort, providing reports and recommendations to the Subcommittee as appropriate. To achieve this, the Task Force will receive regular portfolio and technical operational reports.
   B. Provide consultation to the NAIC technology staff, as well as the interpretation of intent and specific technology direction where needed. For example, from time to time, NAIC technology staff may request approval of a specific technology approach, such as a proposal to drop support for a particular version of software. The Task Force will provide direction in such matters, either directly or through a working group. Task Force members will also communicate current and future state technology changes planned for their state to alert NAIC technology staff of potential impacts and requirements for NAIC systems and services used by state insurance regulators.
   C. Review, with technical recommendations for the Subcommittee: 1) Fiscal Impact Statements Appendix A for all State Ahead projects, as well as others involving a technology component exceeding $100,000 or 1,150 hours of technology staff development and which is not limited to the support of the internal operations; and 2) project requests that involve technology being submitted to the Subcommittee or directly to the Executive (EX) Committee.

NAIC Support Staff: Cheryl McGee/Sherry Stevens
LIFE INSURANCE AND ANNUITIES (A) COMMITTEE

The mission of the Life Insurance and Annuities (A) Committee is to consider issues relating to life insurance and annuities and review new life insurance products.

Ongoing Support of NAIC Programs, Products or Services

1. The Life Insurance and Annuities (A) Committee will:
   A. Monitor the activities of the Life Actuarial (A) Task Force.

2. The Accelerated Underwriting (A) Working Group will:
   A. Consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, drafting guidance for the states.

3. The Annuity Disclosure (A) Working Group will:
   A. Review and revise, as necessary, Section 6—Standards for Annuity Illustrations in the Annuity Disclosure Model Regulation (#245) to take into account the disclosures necessary to inform consumers in light of the product innovations currently in the marketplace.

4. The Annuity Suitability (A) Working Group will:
   A. Review and revise, as necessary, the Suitability in Annuity Transactions Model Regulation (#275).
   B. Consider how to promote greater uniformity across NAIC-member jurisdictions.

5. The Life Insurance Online Guide (A) Working Group will:
   A. Develop an online resource on life insurance, including the evaluation of existing content on the NAIC website, to be published digitally for the benefit of the public.

6. The Life Insurance Illustration Issues (A) Working Group will:
   A. Explore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (#582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (#580) can be enhanced to promote consumer readability and understandability of these life insurance policy summaries, including how they are designed, formatted and accessed by consumers.

7. The Retirement Security (A) Working Group will:
   A. Explore ways to promote retirement security consistent with the NAIC’s continuing “Retirement Security Initiative.”

NAIC Support Staff: Jennifer R. Cook/Jolie H. Matthews
LIFE ACTUARIAL (A) TASK FORCE

The mission of the Life Actuarial (A) Task Force is to identify, investigate and develop solutions to actuarial problems in the life insurance industry.

Ongoing Support of NAIC Programs, Products and Services

1. The Life Actuarial (A) Task Force will:
   A. Work to keep reserve, reporting, and other actuarial-related requirements current. This includes principle-based reserving (PBR) and other requirements in the Valuation Manual, actuarial guidelines, and recommendations for appropriate actuarial reporting in blanks. Respond to charges from the Life Insurance and Annuities (A) Committee and referrals from other groups or committees, as appropriate.
   B. Report progress on all work to the Life Insurance and Annuities (A) Committee and provide updates to the Financial Condition (E) Committee on matters related to life insurance company solvency. This work includes the following:
      1. Work with the American Academy of Actuaries (Academy) and the Society of Actuaries (SOA) to develop new mortality tables for valuation and minimum nonforfeiture requirements, as appropriate, for life insurance and annuities.
      2. Provide recommendations for guidance and requirements for accelerated underwriting, as needed.
      3. Evaluate and provide recommendations regarding the VM-21/AG 43 Standard Projection Amount, which may include continuing as a required floor or providing as disclosure. This evaluation is to be completed prior to year-end 2023.
      4. Monitor the work of the Variable Annuities Issues (E) Working Group, and work with any recommendations from the Variable Annuities Capital and Reserve (E/A) Subgroup.
      5. Work with the SOA on the annual development of the Generally Recognized Expense Table (GRET) factors.
      6. Provide recommendations and changes, as appropriate, to other reserve and nonforfeiture requirements to address issues, and provide actuarial assistance and commentary to other NAIC committees relative to their work on actuarial matters.
      7. Monitor international developments regarding life and health insurance reserving, capital and related topics. Compare and benchmark with PBR requirements.

2. The Variable Annuities Capital and Reserve (E/A) Subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and RBC calculation and determine if additional revisions need to be made.
   B. Develop and recommend appropriate changes, including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

3. The Experience Reporting (A) Subgroup will:
   A. Continue development of the experience reporting requirements within the Valuation Manual. Provide input, as appropriate, for the process regarding the experience reporting agent, data collection, and subsequent analysis and use of experience submitted.

4. The IUL Illustration (A) Subgroup will:
   A. Consider enhancements to Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest (AG 49). Provide recommendations for modifications to AG 49 to the Life Actuarial (A) Task Force.

5. The Longevity Risk (A/E) Subgroup of the Life Actuarial (A) Task Force and the Life Risk-Based Capital (E) Working Group will:
   A. Provide recommendations for recognizing longevity risk in statutory reserves and/or risk-based capital (RBC), as appropriate. Complete by the 2020 Spring National Meeting.
6. The VM-22 (A) Subgroup will:
   A. Recommend requirements, as appropriate, for non-variable (fixed) annuities in the accumulation and payout phases for consideration by the Life Actuarial (A) Task Force. A PBR methodology will be considered, as appropriate.

NAIC Support Staff: Reggie Mazyck/Eric King
HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE

The mission of the Health Insurance and Managed Care (B) Committee is to consider issues relating to all aspects of health insurance.

Ongoing Support of NAIC Programs, Products or Services

1. The Health Insurance and Managed Care (B) Committee will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House and federal agencies; analyze policy implications and their effect on the states of proposed and enacted federal legislation and regulations; and communicate the NAIC’s position through letters and testimony, when requested.
   B. Monitor the activities of the Health Actuarial (B) Task Force.
   C. Monitor the activities of the Regulatory Framework (B) Task Force.
   D. Monitor the activities of the Senior Issues (B) Task Force.
   E. Serve as the official liaison between the NAIC and the Joint Commission on Accreditation of Healthcare Organizations (Joint Commission), the National Committee for Quality Assurance (NCQA), and URAC.
   F. Examine factors that contribute to rising health care costs and insurance premiums. Review state initiatives to address cost drivers.
   G. Coordinate with the Market Regulation and Consumer Affairs (D) Committee, as necessary, to provide policy recommendations regarding uniform state enforcement of the federal Affordable Care Act (ACA).
   H. Coordinate with the Producer Licensing (D) Task Force, as necessary, regarding the regulation and activities of navigators and non-navigator assistance personnel as provided under the ACA and regulations implementing the ACA.
   I. Coordinate with the Antifraud (D) Task Force, as necessary, regarding state and federal antifraud activities related to the implementation of the ACA.
   J. Coordinate with the Market Regulation and Consumer Affairs (D) Committee, as necessary, to collect uniform data and monitor market conduct trends on plans that are not regulated under the ACA, including short-term, limited-duration (STLD) insurance, association health plans (AHPs), and packaged indemnity health products.

2. The Consumer Information (B) Subgroup will:
   A. Develop information or resources, as needed, that would be helpful to state insurance regulators and others in assisting consumers to better understand health insurance.
   B. Review NAIC publications that touch on health insurance to determine if they need updating. If updates are needed, suggest specific revisions to the appropriate NAIC group or NAIC division to make the changes.

3. The Health Innovations (B) Working Group will:
   A. Gather and share information, best practices, experience and data to inform and support health innovation at the state and national levels, including, but not limited to, state flexibility options through the ACA and other health insurance-related policy initiatives.
   B. Discuss state innovations related to health care—i.e., access, insurance plan designs, underlying medical and prescription drug costs, stability for health care and insurance as a whole, health insurer and provider consolidation or competition, the use of data in regulatory and policy decision-making, and health care delivery and financing models—to achieve better patient outcomes and lower spending trends.
   C. Explore sources and methods for state insurance regulators to obtain data to inform health reform initiatives.
   D. Disseminate materials and reports, via the NAIC, to the states and the U.S. territories wishing to utilize the information gathered by the Working Group.
   E. Take up other matters as directed by the Health Insurance and Managed Care (B) Committee.

NAIC Support Staff: Jolie H. Matthews/Brian R. Webb/Jennifer R. Cook
HEALTH ACTUARIAL (B) TASK FORCE

The mission of the Health Actuarial (B) Task Force is to identify, investigate and develop solutions to actuarial problems in the health insurance industry.

Ongoing Support of NAIC Programs, Products or Services

1. The Health Actuarial (B) Task Force will:
   A. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary with respect to model requirements for appropriate long-term care insurance (LTCI) rates, rating practices and rate changes.
   B. Provide support for issues related to implementation of, and/or changes to, the federal Affordable Care Act (ACA).
   C. Continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a principle-based reserving (PBR) framework.
   D. Develop LTCI experience reporting requirements in VM-50, Experience Reporting Requirements, and VM-51, Experience Reporting Formats, of the Valuation Manual.
   E. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary to other NAIC groups relative to their work on health actuarial matters.

2. The Health Care Reform Actuarial (B) Working Group will:
   A. Assist the Health Actuarial (B) Task Force in completing its charge to provide support for issues related to implementation of, and/or changes to, the federal Affordable Care Act (ACA).

3. The Long-Term Care Actuarial (B) Working Group will:
   A. Assist the Health Actuarial (B) Task Force in completing the following charges:
      1. Provide recommendations, as appropriate, to address issues and provide actuarial assistance and commentary with respect to model requirements for appropriate long-term care insurance (LTCI) rates, rating practices and rate changes.
      2. Continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a principle-based reserving (PBR) framework.

4. The Health Reserves (B) Subgroup will:
   A. Assist the Health Actuarial (B) Task Force in completing its charge to continue to develop health insurance reserving requirements (VM-25, Health Insurance Reserves Minimum Reserve Requirements) using a principle-based reserving (PBR) framework.

NAIC Support Staff: Eric King
REGULATORY FRAMEWORK (B) TASK FORCE

The mission of the Regulatory Framework (B) Task Force is to: 1) develop NAIC model acts and regulations for state health care initiatives; and 2) consider policy issues affecting state health insurance regulation.

Ongoing Support of NAIC Programs, Products and Services

1. The Regulatory Framework (B) Task Force will:
   A. Coordinate and develop the provision of technical assistance to the states regarding state-level implementation issues raised by federal health legislation and regulations.
   B. Review managed health care reforms, their delivery systems occurring in the marketplace and other forms of health care delivery. Recommend appropriate revisions to regulatory jurisdiction, authority and structures.
   C. Consider the development of new NAIC model laws and regulations and the revision of existing NAIC model laws and regulations, including those affected by federal legislation and final federal regulations promulgated pursuant to such legislation.
   D. Continue to review NAIC models recommended for revision by the former Affordable Care Act (ACA) Model Review (B) Working Group and, as appropriate, appoint a working group or subgroup to revise the NAIC model(s) prioritized for revision in 2020.
   E. At the direction of the Health Insurance and Managed Care (B) Committee, through the work of the ERISA (B) Working Group, monitor, analyze and report developments related to association health plans (AHPs).
   F. Monitor, analyze and report, as necessary, developments related to short-term, limited-duration (STLD) coverage.

2. The Accident and Sickness Insurance Minimum Standards (B) Subgroup will:
   A. Review and consider revisions to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171).

3. The ERISA (B) Working Group will:
   A. Monitor, report and analyze developments related to the federal Employee Retirement Income Security Act (ERISA), and make recommendations regarding NAIC strategy and policy with respect to those developments.
   B. Monitor, facilitate and coordinate with the states and the U.S. Department of Labor (DOL) related to sham health plans.
   C. Monitor, facilitate and coordinate with the states and the DOL regarding compliance and enforcement efforts regarding the ACA that relate to ERISA.

4. The HMO Issues (B) Subgroup will:
   A. Revise provisions in the Health Maintenance Organization Model Act (#430) to address conflicts and redundancies with provisions in the Life and Health Insurance Guaranty Association Model Act (#520).

5. The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup will:
   A. Consider developing a new NAIC model to establish a licensing or registration process for pharmacy benefit managers (PBMs). The Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.

NAIC Support Staff: Jolie H. Matthews/Jennifer R. Cook
SENIOR ISSUES (B) TASK FORCE

The mission of the Senior Issues (B) Task Force is to: 1) consider policy issues; 2) develop appropriate regulatory standards; and 3) revise, as necessary, the NAIC models, consumer guides and training material on Medicare supplement insurance, long-term care insurance, senior counseling programs and other insurance issues that affect older Americans.

Ongoing Support of NAIC Programs, Products or Services

1. The Senior Issues (B) Task Force will:
   A. Develop appropriate regulatory standards and revisions, as necessary, to the NAIC models, consumer guides and training material on Medicare supplement insurance, senior counseling programs and other insurance issues that affect older Americans. Work with federal agencies to advance appropriate regulatory standards for Medicare supplement and other forms of health insurance applicable to older Americans. Review the Medicare Supplement Insurance Minimum Standards Model Act (#650) and the Medicare Supplement Insurance Minimum Standards Regulation (#651) to determine if amendments are required based on changes to federal law. Work with the U.S. Centers for Medicare & Medicaid Services (CMS) to revise the annual joint publication, Choosing a Medigap Policy: A Guide to Health Insurance for People with Medicare.
   B. Monitor the Medicare Advantage and Medicare Part D marketplace. Assist the states, as necessary, with regulatory issues; maintain a dialogue and coordinate with CMS on regulatory issues, including solvency oversight of waived plans and agent misconduct. Assist the states and serve as a clearinghouse for information on Medicare Advantage plan activity.
   C. Provide the perspective of state insurance regulators to the U.S. Congress, as appropriate, and CMS on insurance issues, including those concerning the effect and result of federal activity on the senior citizen health insurance marketplace and regulatory scheme. Review and monitor state and federal relations with respect to senior health care initiatives and other impacts on the states.
   D. Monitor developments concerning the State Health Insurance Assistance Programs (SHIPs), including information on legislation impacting the funding of SHIPs. Provide assistance to the states with issues relating to SHIPs and support a strong partnership between SHIPs and CMS. Provide the perspective of state insurance regulators to federal officials, as appropriate, on issues concerning SHIPs.
   E. Monitor, maintain and review, in accordance with changes to Model #651, a record of state approvals of all Medicare supplement insurance new or innovative benefits for use by state insurance regulators and others. Review state-approved new or innovative benefits and consider whether to recommend that they be made part of standard benefit plan designs in Model #651.
   F. Develop appropriate regulatory standards and revisions, as necessary, to the NAIC models, consumer guides and training material on long-term care insurance (LTCI), including the study and evaluation of evolving LTCI product design, rating, suitability and other related factors. Review the existing Long-Term Care Insurance Model Act (#640), the Long-Term Care Insurance Model Regulation (#641), the Limited Long-Term Care Insurance Model Act (#642) and the Limited Long-Term Care Insurance Model Regulation (#643) to determine their flexibility to remain compatible with the evolving delivery of long-term care services and remain compatible with the evolving LTCI marketplace. Work with federal agencies as appropriate.
   G. Examine examples of health-related financial exploitation of seniors and work with other NAIC committees, task forces and working groups on possible solutions.

NAIC Support Staff: David Torian
The mission of the Property and Casualty Insurance (C) Committee is to: 1) monitor and respond to problems associated with the products, delivery and cost in the property/casualty (P/C) insurance market and the surplus lines market as they operate with respect to individual persons and businesses; 2) monitor and respond to problems associated with financial reporting matters for P/C insurers that are of interest to regulatory actuaries and analysts; and 3) monitor and respond to problems associated with the financial aspects of the surplus lines market.

Ongoing Support of NAIC Programs, Products or Services

1. The Property and Casualty Insurance (C) Committee will:
   A. Discuss issues arising and make recommendations with respect to advisory organization and insurer filings for personal and commercial lines, as needed. Report yearly.
   B. Monitor the activities of the Casualty Actuarial and Statistical (C) Task Force.
   C. Monitor the activities of the Surplus Lines (C) Task Force.
   D. Monitor the activities of the Title Insurance (C) Task Force.
   E. Monitor the activities of the Workers’ Compensation (C) Task Force.
   F. Provide an impartial forum for considering appeals of adverse decisions involving alien insurers delisted or rejected for listing to the Quarterly Listing of Alien Insurers. Appeal procedures are described in the International Insurers Department (IID) Plan of Operation.
   G. Monitor and review developments in case law and rehabilitation proceedings related to risk-retention groups (RRGs). If warranted, make appropriate changes to the Risk Retention and Purchasing Group Handbook.
   H. Monitor the activities of the Federal Crop Insurance Corporation (FCIC) that affect state insurance regulators:
      1. Serve as a forum for discussing issues related to the interaction of federal crop insurance programs with state insurance regulation.
      3. Monitor the regulatory information exchanges between the FCIC and state insurance regulators, as well as the FCIC and the NAIC, and make recommendations for improvement or revisions, as needed.
   I. Report on the private flood insurance market using data obtained from the state insurance regulator private flood insurance data call.

2. The Cannabis Insurance (C) Working Group will:
   A. Assess and periodically report on the status of federal legislation that would protect financial institutions from liability associated with providing services to cannabis businesses operating legally under state law.
   B. Encourage admitted insurers to ensure coverage adequacy in states where cannabis, including hemp, is legal.
   C. Provide insurance resources to stakeholders and keep up with new products and innovative ideas that may shape insurance in this space.
   D. Collect aggregated insurance availability and coverage gap information, as well as other cannabis and hemp insurance-related data, to then publicly share in a released report by the end of 2021.

3. The Catastrophe Insurance (C) Working Group will:
   A. Monitor and recommend measures to improve the availability and affordability of insurance and reinsurance related to catastrophe perils for personal and commercial lines.
   B. Evaluate potential state, regional and national programs to increase capacity for insurance and reinsurance related to catastrophe perils.
   C. Monitor and assess proposals that address disaster insurance issues at the federal and state levels. Assess concentration-of-risk issues and whether a regulatory solution is needed.
   D. Provide a forum for discussing issues and recommending solutions related to insuring for catastrophe risk, including terrorism, war and natural disasters.
   E. Provide a forum for discussing various issues related to catastrophe modeling, and monitor issues that will result in changes to the Catastrophe Computer Modeling Handbook.
   F. Investigate and recommend ways the NAIC can assist states in responding to disasters, and discuss issues surrounding loss mitigation. Update the State Disaster Response Plan, as needed, so that it provides a blueprint for action by the states to respond to catastrophic events.
PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE (continued)

G. Continue to examine ways to help state insurance regulators facilitate the private flood insurance market.
H. Study, in coordination with other NAIC task forces and working groups, earthquake matters of concern to state insurance regulators. Consider various innovative earthquake insurance coverage options aimed at improving take-up rates.

4. The Climate Risk and Resilience (C) Working Group will:
   A. Engage with industry and stakeholders in the U.S. and abroad on climate related risk and resiliency issues.
   B. Investigate and recommend measures to reduce risks of climate change related to catastrophic events.
   C. Identify insurance and other financial mechanisms to protect infrastructure and reduce exposure to the public.
   D. Identify sustainability, resilience and mitigation issues and solutions related to the insurance industry.
   E. Evaluate private-public partnerships to improve insurance market capacity related to catastrophe perils.
   F. Investigate and receive information regarding the use of modeling by carriers and their reinsurers concerning climate risk.
   G. Review the impact of climate change on insurers through presentations by interested parties.
   H. Review innovative insurer solutions to climate risk, including new insurance products through presentations by interested parties.

5. The Lender-Placed Insurance Model Act (C) Working Group will:
   A. Complete the drafting and adoption of a new model law concerning lender-placed insurance as it relates to mortgages.

6. The Pet Insurance (C) Working Group will:
   A. Complete the development of a model law or guideline to establish appropriate regulatory standards for the pet insurance industry.

7. The Terrorism Insurance Implementation (C) Working Group will:
   A. Coordinate the NAIC’s efforts to address insurance coverage for acts of terrorism. Work with the U.S. Department of the Treasury’s Terrorism Risk Insurance Program (TRIP) Office on matters of mutual concern. Discuss long-term solutions to address the risk of loss from acts of terrorism.
   B. Review and report on data collection related to insurance coverage for acts of terrorism.

8. The Transparency and Readability of Consumer Information (C) Working Group will:
   A. Study and evaluate actions that will improve the capacity of consumers to comparison shop on the basis of differences in coverage provided by different insurance carriers offering personal lines products.
   B. Systematize and improve presale disclosures of coverage.
   C. Facilitate consumers’ capacity to understand the content of insurance policies and assess differences in insurers’ policy forms.
   D. Assist other groups with drafting language included within consumer-facing documents.
   E. Study and discuss whether there is a need for consumer disclosures regarding significant premium increases on property/casualty (P/C) insurance products.
   F. Update and develop webpage and mobile content for A Shopping Tool for Homeowners Insurance and A Shopping Tool for Automobile Insurance.
   G. Discuss and draft a disclosure for state insurance regulators to consider requiring to be added to homeowners’ policies regarding the fact that homeowners policies do not cover losses from flood, earthquake or other specified disasters.

NAIC Support Staff: Aaron Brandenburg/Kris DeFrain
**CASUALTY ACTUARIAL AND STATISTICAL (C) TASK FORCE**

The mission of the Casualty Actuarial and Statistical (C) Task Force is to identify, investigate and develop solutions to actuarial problems and statistical issues in the property/casualty (P/C) insurance industry. The Task Force’s goals are to assist state insurance regulators with maintaining the financial health of P/C insurers; ensuring that P/C insurance rates are not excessive, inadequate or unfairly discriminatory; and ensuring that appropriate data regarding P/C insurance markets are available.

**Ongoing Support of NAIC Programs, Products or Services**

1. **The Casualty Actuarial and Statistical (C) Task Force** will:
   
   **A.** Provide reserving, pricing, ratemaking, statistical and other actuarial support to NAIC committees, task forces and/or working groups. Propose changes to the appropriate work products (with the most common work products noted below) and present comments on proposals submitted by others regarding casualty actuarial and statistical matters. Monitor the activities, including the development of financial services regulations and statistical (including disaster) reporting, regarding casualty actuarial issues.
   
   1. Property and Casualty Insurance (C) Committee – ratemaking, reserving or data issues.
   2. Blanks (E) Working Group – P/C annual financial statement, including Schedule P; P/C quarterly financial statement; P/C quarterly and annual financial statement instructions, including Statement of Actuarial Opinion (SAO) and Actuarial Opinion Summary Supplement.

   **B.** Monitor national casualty actuarial developments and consider regulatory implications.
   
   1. Casualty Actuarial Society (CAS) – Statements of Principles and Syllabus of Basic Education.
   3. Society of Actuaries (SOA) – general insurance track’s basic education.

   **C.** Facilitate discussion among state insurance regulators regarding rate filing issues of common interest across the states through the scheduling of regulator-only conference calls.

   **D.** Work with the CAS and SOA to identify: 1) whether the P/C Appointed Actuaries’ logs of continuing education (CE) should contain any particular categorization to assist regulatory review; 2) what types of learning P/C Appointed Actuaries are using to meet CE requirements for “Specific Qualification Standards” today; and 3) whether more specificity should be added to the P/C Appointed Actuaries’ CE requirements to ensure that CE is aligned with the educational needs for a P/C Appointed Actuary.

   **E.** In coordination with the Big Data (EX) Working Group:
   
   1. Draft and propose changes to the Product Filing Review Handbook to include best practices for the review of predictive models and analytics filed by insurers to justify rates.
   2. Draft and propose state guidance (e.g., information, data) for rate filings that are based on complex predictive models.
   3. Facilitate training and the sharing of expertise through predictive analytics webinars (Book Club).

2. **The Actuarial Opinion (C) Working Group** will:

   **A.** Propose revisions to the following, as needed, especially to improve actuarial opinions, actuarial opinion summaries, and actuarial reports, as well as the regulatory analysis of these actuarial documents and loss and premium reserves:

   1. **Financial Analysis Handbook.**
   2. **Financial Condition Examiners Handbook.**
   3. **Annual Statement Instructions—Property/Casualty.**
   4. Regulatory guidance to appointed actuaries and companies.
   5. Other financial blanks and instructions, as needed.
3. The **Statistical Data (C) Working Group** will:
   A. Consider updates and changes to the *Statistical Handbook of Data Available to Insurance Regulators*.
   B. Consider updates and developments, provide technical assistance, and oversee the production of the following reports and databases. Periodically evaluate the demand and utility versus the costs of production of each product.
   1. *Dwelling Fire, Homeowners Owner-Occupied, and Homeowners Tenant and Condominium/Cooperative Unit Owner’s Insurance*.
   2. *Auto Insurance Database*.

NAIC Support Staff: Kris DeFrain/Jennifer Gardner/Libby Crews
SURPLUS LINES (C) TASK FORCE

The mission of the Surplus Lines (C) Task Force is to monitor the surplus lines market and regulation, including the activity and financial condition of U.S. and alien surplus lines insurers by providing a forum for discussion of issues; and develop or amend relevant NAIC model laws, regulations and/or guidelines.

Ongoing Support of NAIC Programs, Products or Services

1. The **Surplus Lines (C) Task Force** will:
   A. Provide a forum for discussion of current and emerging surplus lines-related issues and topics of public policy and determine appropriate regulatory response and action.
   B. Review and analyze quantitative and qualitative data on U.S. domestic and alien surplus lines industry results and trends.
   C. Monitor federal legislation related to the surplus lines market and ensure that all interested parties remain apprised.
   D. Develop or amend relevant NAIC model laws, regulations and/or guidelines.
   E. Oversee the activities of the Surplus Lines (C) Working Group.

2. The **Surplus Lines (C) Working Group** will:
   A. Operate in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and operate in open session when discussing surplus lines topics and policy issues, such as amendments to the *International Insurers Department (IID) Plan of Operation*.
   B. Maintain and draft new guidance within the *IID Plan of Operation* regarding standards for admittance and continued inclusion on the NAIC *Quarterly Listing of Alien Insurers*.
   C. Review and consider appropriate decisions regarding applications for admittance to the NAIC *Quarterly Listing of Alien Insurers*.
   D. Analyze renewal applications of alien surplus lines insurers on the NAIC *Quarterly Listing of Alien Insurers* and ensure solvency and compliance per the *IID Plan of Operation* guidelines for continued listing.
   E. Provide a forum for surplus lines-related discussion among jurisdictions.

NAIC Support Staff: Andy Daleo/Bob Schump
TITLE INSURANCE (C) TASK FORCE

The mission of the Title Insurance (C) Task Force is to study issues related to title insurers and title insurance producers.

Ongoing Support of NAIC Programs, Products or Services

1. The Title Insurance (C) Task Force will:
   A. Monitor issues and developments occurring in the title insurance industry, and provide support and expertise to other NAIC committees, task forces and/or working groups, or outside entities, as appropriate.
   B. Review and assist various regulatory bodies in combating fraudulent and/or unfair real estate settlement activities. Such efforts could include working with the Antifraud (D) Task Force and other NAIC committees, task forces and/or working groups to combat mortgage fraud and mitigating title agent defalcations through the promotion of closing protection letters and other remedies. Report results at each national meeting.
   C. Consult with the Consumer Financial Protection Bureau (CFPB) and other agencies responsible for information, education and disclosure for mortgage lending, closing and settlement services about the role of title insurance in the real estate transaction process.
   D. Consider the effectiveness of changes in financial reporting by title insurance companies and identify further improvements and clarifications to blanks, instructions, Statement of Statutory Accounting Principles (SSAPs), solvency tools, and other matters, as necessary. Coordinate efforts with the Statutory Accounting Principles (E) Working Group.
   E. Revise the Title Insurance Consumer Shopping Tool Template to include questions and answers about title insurance-related fraud topics, including but not limited to, closing protection letters and wire fraud.
   F. Evaluate the effectiveness of closing protection letters, including but not limited to, intent, state regulation and requirements, consumer protections offered and excluded, and potential alternatives for coverage.

NAIC Support Staff: Anne Obersteadt/Aaron Brandenburg
WORKERS’ COMPENSATION (C) TASK FORCE

The mission of the Workers’ Compensation (C) Task Force is to study the nature and effectiveness of state approaches to workers’ compensation and related issues, including, but not limited to: assigned risk plans; safety in the workplace; treatment of investment income in rating; occupational disease; cost containment; and the relevance of adopted NAIC model laws, regulations and/or guidelines pertaining to workers’ compensation.

Ongoing Support of NAIC Programs, Products or Services

1. The Workers’ Compensation (C) Task Force will:
   A. Oversee activities of the NAIC/IAIABC Joint (C) Working Group.
   B. Discuss issues with respect to advisory organizations, rating organizations, statistical agents, and insurance companies in the workers’ compensation arena.
   C. Monitor the movement of business from the standard markets to the assigned risk pools. Alert state insurance department representatives if growth of the assigned risk pools changes dramatically.
   D. Follow workers’ compensation issues regarding cannabis in coordination with the Cannabis Insurance (C) Working Group.

2. The NAIC/IAIABC Joint (C) Working Group will:
   A. Study issues of mutual concern to insurance regulators and the International Association of Industrial Accident Boards and Commissions (IAIABC). Review relevant IAIABC model laws and white papers and consider possible charges in light of the Working Group’s recommendations.
   B. Complete the drafting and adoption of the white paper, Changing Employee Relationships – Completion date anticipated in early 2020.

NAIC Support Staff: Sara Robben/Aaron Brandenburg
MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE

The mission of the Market Regulation and Consumer Affairs (D) Committee is to monitor all aspects of the market regulatory process for continuous improvement. This includes market analysis, regulatory interventions with companies and multi-jurisdictional collaboration. The Committee will also review and make recommendations regarding the underwriting and market practices of insurers and producers as those practices affect insurance consumers, including the availability and affordability of insurance.

Ongoing Support of NAIC Programs, Products or Services

1. The Market Regulation and Consumer Affairs (D) Committee will:
   A. Monitor the centralized collection and storage of market conduct data, national analysis and reporting at the NAIC, including issues regarding the public availability of data.
   B. Monitor and assess the current process for multi-jurisdictional market conduct activities and provide appropriate recommendations for enhancement, as necessary.
   C. Evaluate all data currently collected in the NAIC Market Information Systems (MIS) and considered confidential to determine what, if any, can be made more widely available.
   D. Oversee the activities of the Antifraud (D) Task Force.
   E. Oversee the activities of the Market Information Systems (D) Task Force.
   F. Oversee the activities of the Producer Licensing (D) Task Force.
   G. Monitor the underwriting and market practices of insurers and producers, as well as conditions of insurance marketplaces, including urban markets, to identify specific market conduct issues of importance and concern. Hold public hearings on these issues at the NAIC national meetings, as appropriate.
   H. In collaboration with other technical working groups, discuss and share best practices through public forums to address broad consumer concerns regarding personal insurance products.
   I. Coordinate with the International Insurance Relations (G) Committee to develop input and submit comments to the International Association of Insurance Supervisors (IAIS) and/or other related groups on issues regarding market regulation concepts.
   J. Coordinate with the Health Insurance and Managed Care (B) Committee to provide policy recommendations regarding uniform state enforcement of the federal Affordable Care Act (ACA).
   K. Review the “Best Practices and Guidelines for Consumer Information Disclosures” (adopted October 2012) and update as needed.

2. The Advisory Organization Examination Oversight (D) Working Group will:
   A. Revise the protocols, as necessary, for the examination of national or multistate advisory organizations (includes rating organizations and statistical agents) to be more comprehensive, efficient and possibly less frequent than the current system of single-state exams. Solicit input and collaboration from other interested and affected committees and task forces.
   B. Monitor the data reporting and data-collection processes of advisory organizations (including rating organizations and statistical agents) to determine if they are implementing appropriate measures to ensure data quality. Report the results of this ongoing charge as needed.
   C. Actively assist with and coordinate multistate examinations of advisory organizations (including rating organizations and statistical agents).

3. The Market Actions (D) Working Group will:
   A. Facilitate interstate communication and coordinate collaborative state regulatory actions.

4. The Market Analysis Procedures (D) Working Group will:
   A. Recommend changes to the market analysis framework based on results over the past five years, including the current set of Level 1 and Level 2 questions. Provide recommendations by the Fall National Meeting.
   B. Discuss other market data-collection issues and make recommendations, as necessary.
   C. Consider recommendations for new lines of business for the Market Conduct Annual Statement (MCAS). Provide recommendations by the Fall National Meeting.
MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE (continued)

5. The Market Conduct Annual Statement Blanks (D) Working Group will:
   A. Review the MCAS data elements and the “Data Call and Definitions” for those lines of business that have been in effect for longer than 3 years and update them, as necessary.
   B. Develop an MCAS blank to be used for the collection of data for additional lines of business, where appropriate.

6. The Market Conduct Examination Standards (D) Working Group will:
   A. Develop market conduct examination standards and uniform market conduct procedural guidance, as necessary.
   B. Monitor the adoption and revision of NAIC models and develop market conduct examination standards to correspond with adopted NAIC models by the Fall National Meeting.
   C. Develop updated standardized data requests for inclusion in the Market Regulation Handbook by the Fall National Meeting.

7. The Market Regulation Certification (D) Working Group will:
   A. Develop a formal market regulation certification proposal for consideration by the NAIC membership that provides recommendations for the following: 1) certification standards; 2) a process for the state implementation of the standards; 3) a process to measure the states’ compliance with the standards; 4) a process for future revisions to the standards; and 5) assistance for jurisdictions to achieve certification.

8. The Privacy Protections (D) Working Group will:
   A. Review state insurance privacy protections regarding the collection, use and disclosure of information gathered in connection with insurance transactions, and make recommended changes, as needed, to certain NAIC models, such as the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672), by the 2020 Summer National Meeting.”

NAIC Support Staff: Timothy B. Mullen/Randy Helder
ANTIFRAUD (D) TASK FORCE

The mission of the Antifraud (D) Task Force is to serve the public interest by assisting the state insurance supervisory officials, individually and collectively, through the detection, monitoring and appropriate referral for investigation of insurance crime, both by and against consumers. The Task Force will assist the insurance regulatory community by conducting the following activities: maintain and improve electronic databases regarding fraudulent insurance activities; disseminate the results of research and analysis of insurance fraud trends, as well as case-specific analysis, to the insurance regulatory community; and provide a liaison function between insurance regulators, law enforcement (federal, state, local and international) and other specific antifraud organizations. The Task Force also will serve as a liaison with the NAIC Information Technology Group (ITG) and other NAIC committees, task forces and/or working groups to develop technological solutions for data collection and information-sharing. The Task Force will monitor all aspects of antifraud activities by its working groups on the following charges.

Ongoing Support of NAIC Programs, Products or Services

1. The Antifraud (D) Task Force will:
   A. Work with NAIC committees, task forces and working groups (e.g., Title Insurance (C) Task Force, etc.) to review issues and concerns related to fraud activities and schemes related to insurance fraud.
   B. Coordinate efforts to address national concerns related to agent fraud and activities of unauthorized agents related to insurance sales.
   C. Coordinate the enforcement and investigation efforts of state and federal securities regulators with state insurance fraud bureaus.
   D. Coordinate with state, federal and international law enforcement agencies in addressing antifraud issues relating to the insurance industry.
   E. Review and provide comments to the International Association of Insurance Supervisors (IAIS) on its Insurance Core Principles (ICPs) related to insurance fraud.
   F. Coordinate activities and information from national antifraud organizations and provide information to state insurance fraud bureaus.
   G. Coordinate activities and information with state and federal fraud divisions to determine guidelines that will assist with reciprocal involvement concerning antifraud issues resulting from natural disasters and catastrophes.
   H. Coordinate efforts with the insurance industry to address antifraud issues and concerns.
   I. Evaluate and recommend methods to track national fraud trends.

2. The Antifraud Education Enhancement (D) Working Group will:
   A. Develop seminars, trainings and webinars regarding insurance fraud. Provide three webinars by the 2020 Fall National Meeting.

3. The Antifraud Technology (D) Working Group will:
   A. Review and provide recommendations for the development of an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions.
   B. Evaluate sources of antifraud data and propose methods for enhancing the utilization and exchange of information among insurance regulators, fraud investigative divisions, law enforcement officials, insurers and antifraud organizations. Complete by the 2020 Fall National Meeting.

NAIC Support Staff: Greg Welker/Lois E. Alexander
MARKET INFORMATION SYSTEMS (D) TASK FORCE

The mission of the Market Information Systems (D) Task Force is to provide business expertise regarding the desired functionality of the NAIC Market Information Systems and the prioritization of regulatory requests for the development and enhancements of the NAIC Market Information Systems.

Ongoing Support of NAIC Programs, Products or Services

1. The Market Information Systems (D) Task Force will:
   A. Ensure the NAIC Market Information Systems support the strategic direction set forth by the Market Regulation and Consumer Affairs (D) Committee.
   B. Develop recommendations for the incorporation of artificial intelligence (AI) abilities in NAIC Market Information Systems for use in market analysis. Complete by the 2020 Fall National Meeting.
   C. Analyze the data in the NAIC Market Information Systems. If needed, recommend methods to ensure better data quality. Complete by the 2020 Fall National Meeting.
   D. Provide guidance on the appropriate use of the NAIC Market Information Systems and the data entered in them.
      1. Complaint Database System (CDS).
      2. Electronic Forums.
      4. Market Analysis Profile.
      5. Market Analysis Prioritization Tool (MAPT).
      9. 1033 State Decision Repository (in conjunction with the Antifraud (D) Task Force).

2. The Market Information Systems Research and Development (D) Working Group will:
   A. Serve as the business partner to review and prioritize submitted Uniform System Enhancement Request (USER) forms to ensure an efficient use of available NAIC staffing and resources.
   B. Assist the Task Force with tasks as assigned, such as:
      1. Analyze NAIC Market Information Systems data.
      2. Provide state users with query access to NAIC Market Information Systems data.
      3. Provide guidance on the appropriate use of the NAIC Market Information Systems.

NAIC Support Staff: Randy Helder
PRODUCER LICENSING (D) TASK FORCE

The mission of the Producer Licensing (D) Task Force is to: 1) develop and implement uniform standards, interpretations and treatment of producer and adjuster licensees and licensing terminology; 2) monitor and respond to developments related to licensing reciprocity; 3) coordinate with industry and consumer groups regarding priorities for licensing reforms; and 4) provide direction based on NAIC membership initiatives to the National Insurance Producer Registry (NIPR) Board of Directors regarding the development and implementation of uniform producer licensing initiatives, with a primary emphasis on encouraging the use of electronic technology.

Ongoing Support of NAIC Programs, Products or Services

1. The Producer Licensing (D) Task Force will:
   A. Work closely with the National Insurance Producer Registry (NIPR) to encourage full utilization of NIPR products and services by all of the states and producers, and encourage accurate and timely reporting of state administrative actions to the NAIC’s Regulatory Information Retrieval System (RIRS) to ensure this data is properly reflected in the State Producer Licensing Database (SPLD) and the Producer Database (PDB).
   B. Facilitate roundtable discussions, as needed, with the state producer licensing directors for the exchange of views, opinions and ideas on producer-licensing activities in the states and at the NAIC.
   C. Discuss, as necessary, state perspectives regarding the regulation and benefit of the activities of the federal Affordable Care Act (ACA) established enrollment assisters (including navigators and non-navigator assisters and certified application counselors) and the activities of producers in assisting individuals and businesses purchasing in the health insurance marketplaces. Coordinate with the Health Insurance and Managed Care (B) Committee and the Antifraud (D) Task Force, as necessary.
   D. Monitor the activities of the National Association of Registered Agents and Brokers (NARAB) in the development and enforcement of the NARAB membership rules, including the criteria for successfully passing a background check.
   E. Coordinate through NAIC staff to provide guidance to NIPR on producer licensing-related electronic initiatives. Hear a report from NIPR at each national meeting.
   F. Coordinate with the Market Information Systems (D) Task Force and the Antifraud (D) Task Force to evaluate and make recommendations regarding the entry, retention and use of data in the NAIC’s Market Information Systems (MIS).
   G. Monitor state implementation of adjuster licensing reciprocity and uniformity; update, as necessary, NAIC adjuster licensing standards.
   H. Finalize the white paper on the role of chatbots and artificial intelligence (AI) in the distribution of insurance and the regulatory supervision of these technologies by the 2020 Spring National Meeting.
   I. Draft procedures for amending the NAIC’s uniform producer licensing applications and uniform appointment form to ensure consistency with the NAIC membership’s goal of maintaining uniform and stable applications that encourage the efficient use of electronic technology.

2. The Producer Licensing Uniformity (D) Working Group will:
   A. Work closely with state producer licensing directors and exam vendors to ensure: 1) the states achieve full compliance with the standards in order to achieve greater uniformity; and 2) the exams test the qualifications for an entry-level position as a producer.
   B. Provide oversight and ongoing updates, as needed, to the State Licensing Handbook. Complete by the 2020 Fall National Meeting.
   C. Monitor and assess the state implementation of the Uniform Licensing Standards (ULS) and update the standards, as needed. Complete by the 2020 Fall National Meeting.
   D. Review and update, as needed, the NAIC’s uniform producer licensing applications and uniform appointment form. Provide any recommended updates to the Producer Licensing (D) Task Force by June 1.

3. The Uniform Education (D) Working Group will:
   A. Update, as needed, the reciprocity guidelines, the uniform application forms for continuing education (CE) providers, and the process for state review and approval of courses. Provide any recommended updates to the Producer Licensing (D) Task Force by the 2020 Fall National Meeting.
PRODUCER LICENSING (D) TASK FORCE (continued)

B. Coordinate with NAIC parent committees, task forces and/or working groups to review and provide recommendations, as necessary, on prelicensing education and CE requirements that are included in NAIC model acts, regulations and/or standards.

NAIC Support Staff: Timothy D. Mullen/Greg Welker
The mission of the Financial Condition (E) Committee is to be the central forum and coordinator of solvency-related considerations of the NAIC relating to accounting practices and procedures; blanks; valuation of securities; financial analysis and solvency; multistate examinations and examiner and analysis training; and issues concerning insurer insolvencies and insolvency guarantees. In addition, the Committee interacts with the technical task forces.

Ongoing Support of NAIC Programs, Products or Services

1. The Financial Condition (E) Committee will:
   B. Appoint and oversee the activities of the following: Accounting Practices and Procedures (E) Task Force; Capital Adequacy (E) Task Force; Examination Oversight (E) Task Force; Long-Term Care Insurance (B/E) Task Force; Receivership and Insolvency (E) Task Force; Reinsurance (E) Task Force; Risk Retention Group (E) Task Force; and Valuation of Securities (E) Task Force.
   C. Recommend salary rate adjustments for examiners.
   D. Oversee a process to address financial issues that may compromise the consistency and uniformity of the U.S. solvency framework, referring valuation and other issues to the appropriate committees as needed.
   E. Use the Risk-Focused Surveillance (E) Working Group to address specific industry concerns regarding regulatory redundancy and review any issues industry subsequently escalates to the Committee.

2. The Financial Analysis (E) Working Group will:
   A. Analyze nationally significant insurers and groups that exhibit characteristics of trending toward or being financially troubled; determine if appropriate action is being taken.
   B. Interact with domiciliary regulators and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods and action(s).
   C. Support, encourage, promote and coordinate multistate efforts in addressing solvency problems, including identifying adverse industry trends.
   D. Increase information-sharing and coordination between state regulators and federal authorities, including through representation of state regulators in national bodies with responsibilities for system-wide oversight.

3. The Group Capital Calculation (E) Working Group will:
   B. Provide direction to the Group Solvency Issues (E) Working Group on appropriate changes to existing authority or existing regulatory guidance related to the GCC. Complete by the 2020 Fall National Meeting.
   C. Liaise, as necessary, with the International Insurance Relations (G) Committee on international group capital developments and consider input from participation of U.S. state insurance regulators in the International Association of Insurance Supervisors (IAIS) monitoring process.
   D. Continually review and monitor the effectiveness of the GCC and consider revisions, as necessary, to maintain the effectiveness of its objective under U.S. solvency system.

4. The Group Solvency Issues (E) Working Group will:
   A. Continue to develop potential enhancements to the current regulatory solvency system as it relates to group- solvency-related issues.
   B. Critically review and provide input and drafting to the International Association of Insurance Supervisors (IAIS), Insurance Groups Working Group or on other IAIS material dealing with group supervision issues.
   C. Continually review and monitor the effectiveness of the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) and consider revisions as necessary to maintain effective oversight of insurance groups.
   D. Assess the IAIS Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) and make recommendations on its implementation in a manner appropriate for the U.S.
5. The **ORSA Implementation (E) Subgroup** of the Group Solvency Issues (E) Working Group will:
   A. Continue to provide and enhance an enterprise risk management (ERM) education program for regulators in support of the Own Risk and Solvency Assessment (ORSA) implementation.
   B. Continually review and monitor the effectiveness of the *Risk Management and Own Risk and Solvency Assessment Model Act* (#505) and its corresponding *NAIC Own Risk and Solvency Assessment (ORSA) Guidance Manual*; consider revisions as necessary.

6. The **Mortgage Guaranty Insurance (E) Working Group** will:
   A. Develop changes to the *Mortgage Guaranty Insurance Model Act* (#630) and other areas of the solvency regulation of mortgage guaranty insurers, including, but not limited to, revisions to *Statement of Statutory Accounting Principles (SSAP) No. 58—Mortgage Guaranty Insurance* and develop an extensive mortgage guaranty supplemental filing. Oversee the work of the consultant on the testing and finalization of proposed risk-based mortgage guaranty capital model and finalize Model #630 by the 2020 Spring National Meeting.

7. The **NAIC/AICPA (E) Working Group** will:
   A. Continually review the *Annual Financial Reporting Model Regulation* (#205) and its corresponding implementation guide; revise as appropriate.
   B. Address financial solvency issues by working with the American Institute of Certified Public Accountants (AICPA) and responding to AICPA exposure drafts.
   C. Monitor the federal Sarbanes-Oxley Act, as well as rules and regulations promulgated by the U.S. Securities and Exchange Commission (SEC), the Public Company Accounting Oversight Board (PCAOB) and other financial services regulatory entities.
   D. Review annually the premium threshold amount included in Section 16 of Model #205, with the general intent that those insurers subject to the Section 16 requirements would capture at least approximately 90% of industry premium and/or in response to any future regulatory or market developments.

8. The **National Treatment and Coordination (E) Working Group** will:
   A. Increase utilization and implementation of the *Company Licensing Best Practices Handbook*.
   B. Encourage synergies between corporate changes/amendments and rate and form filing review and approval to improve efficiency.
   C. Continue to monitor the usage and make necessary enhancements to the Form A Database.
   D. Maintain educational courses in the existing NAIC Insurance Regulator Professional Designation Program for company licensing regulators.

9. The **Biographical Third-Party Review (E) Subgroup** of the National Treatment and Coordination (E) Working Group will:
   A. Increase the uniformity of the third-party vendors that prepare background investigative reports to those state insurance departments that require them. Reduce the inefficiency of applications by developing procedures and approval processes.
   B. Monitor the ongoing adherence of background investigation reports and third-party vendors.
   C. Encourage uniformity of requirements in relation to individuals’ fitness and propriety and the company’s responsibility in notifying state insurance departments of concerns or changes to key individuals.

10. The **Restructuring Mechanisms (E) Working Group** will:
    A. Evaluate and prepare a White Paper that:
        1. Addresses the perceived need for restructuring statutes and the issues those statutes are designed to remedy. Also, consider alternatives that insurers are currently employing to achieve similar results.
        2. Summarizes the existing state restructuring statutes.
        3. Addresses the legal issues posed by an Order of a Court (or approval by an Insurance Department) in one state affecting the policyholders of other states.
        4. Considers the impact that a restructuring might have on Guaranty Associations and policyholders that had Guaranty Fund protection prior to the restructuring. Complete by the 2020 Summer National Meeting.
    B. Identifies and addresses the legal issues associated with restructuring using a protected cell. Complete by the 2020 Summer National Meeting.
FINANCIAL CONDITION (E) COMMITTEE (continued)

C. Consider requesting approval from the Executive (EX) Committee on developing changes to specific NAIC models as a result of findings from the development of the White Paper. Complete by the 2020 Fall National Meeting.

11. The Restructuring Mechanisms (E) Subgroup will:
   A. Develop best practices to be used in considering the approval of proposed restructuring transactions, including among other things, the expected level of reserves and capital expected after the transfer along with the adequacy of long-term liquidity needs, and also develop best practices to be used in monitoring the companies after the transaction is completed. Once completed, recommend to the Financial Regulation Standards and Accreditation (F) Committee for their consideration. Complete by the 2020 Summer National Meeting.
   B. Consider the need to make changes to the RBC formula to better assess the minimum surplus requirements for companies in runoff. Complete by the 2020 Fall National Meeting.
   C. Review the various restructuring mechanisms and develop, if deemed needed, protected cell accounting and reporting requirements for referring to the Statutory Accounting Principles (E) Working Group. Complete by the 2020 Fall National Meeting.

12. The Risk-Focused Surveillance (E) Working Group will:
   A. Continually review the effectiveness of risk-focused surveillance and develop enhancements to processes as necessary.
   B. Continually review regulatory redundancy issues identified by interested parties and provide recommendations to other NAIC committee groups to address as needed.
   C. Oversee and monitor the Peer Review Program to encourage consistent and effective risk-focused surveillance processes.
   D. Continually maintain and update standardized job descriptions/requirements and salary range recommendations for common solvency monitoring positions to assist insurance departments in attracting and maintaining suitable staff.

13. The Valuation Analysis (E) Working Group will:
   A. Respond to states in a confidential forum regarding questions and issues arising during the course of annual principle-based reserving (PBR) reviews or PBR examination and which also may include consideration of asset adequacy analysis questions and issues.
   B. Work with NAIC resources to assist in prioritizing and responding to issues and questions regarding PBR and asset adequacy analysis including actuarial guidelines or other requirements making use of or relating to PBR such as Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation (AG 38), Actuarial Guideline XLVIII—Actuarial Opinion and Memorandum Requirements for the Reinsurance of Policies Required to be Valued Under Sections 6 and 7 of the NAIC Valuation of Life Insurance Policies Model Regulation (AG 48), and the Term and Universal Life Insurance Reserve Financing Model Regulation (AG 787).
   C. Develop and implement a plan with NAIC resources to identify outliers/concerns regarding PBR/asset adequacy analysis.
   D. Refer questions/issues as appropriate to the Life Actuarial (A) Task Force that may require consideration of changes/interpretations to be provided in the Valuation Manual.
   E. Assist NAIC resources in development of a standard asset/liability model portfolio used to calibrate company PBR models.
   F. Make referrals as appropriate to the Financial Analysis (E) Working Group.
   G. Perform other work to carry out the Valuation Analysis (E) Working Group procedures.

NAIC Support Staff: Dan Daveline/Julie Gann/Bruce Jenson
ACCOUNTING PRACTICES AND PROCEDURES (E) TASK FORCE

The mission of the Accounting Practices and Procedures (E) Task Force is to identify, investigate and develop solutions to accounting problems with the ultimate goal of guiding insurers in properly accounting for various aspects of their operations; modify the Accounting Practices and Procedures Manual (AP&P Manual) to reflect changes necessitated by Task Force action; and study innovative insurer accounting practices that affect the ability of state insurance regulators to determine the true financial condition of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Accounting Practices and Procedures (E) Task Force will:

2. The Blanks (E) Working Group will:
   A. Consider improvements and revisions to the various annual/quarterly statement blanks to:
      1. Conform these blanks to changes made in other areas of the NAIC to promote uniformity in reporting of financial information by insurers.
      2. Develop reporting formats for other entities subject to the jurisdiction of state insurance departments.
      3. Conform the various NAIC blanks and instructions to adopted NAIC policy.
      4. Oversee the development of additional reporting formats within the existing annual financial statements as needs are identified.
   B. Continue to monitor state filing checklists to maintain current filing requirements.
   C. Continue to monitor and improve the quality of financial data filed by insurance companies by recommending improved or additional language for the Annual Statement Instructions.
   D. Continue to monitor and review all proposals necessary for the implementation of statutory accounting guidance to ensure proper implementation of any action taken by the Accounting Practices and Procedures (E) Task Force affecting annual financial statements and/or instructions.
   E. Continue to coordinate with other task forces of the NAIC to ensure proper implementation of reporting and instructions changes as proposed by these task forces.
   F. Coordinate with the Life Actuarial (A) Task Force to use any special reports developed and avoid duplication of reporting.
   G. Review requests for investment schedule blanks and instructions changes in connection with the work being performed by the Investment Risk-Based Capital (E) Working Group.
   H. Review changes requested by the Valuation of Securities (E) Task Force relating to its work on other invested assets reporting for technical consistency within the investment reporting schedules and instructions.

3. The Statutory Accounting Principles (E) Working Group will:
   A. Maintain codified statutory accounting principles by providing periodic updates to the guidance that address new statutory issues and new generally accepted accounting principles (GAAP) pronouncements. Provide authoritative responses to questions of application and clarifications for existing statutory accounting principles. Report all actions and provide updates to the Accounting Practices and Procedures (E) Task Force.
   B. At the discretion of the Working Group chair, develop comments on exposed GAAP and International Financial Reporting Standards (IFRS) pronouncements affecting financial accounting and reporting. Any comments are subject to review and approval by the chairs of the Accounting Practices and Procedures (E) Task Force and the Financial Condition (E) Committee.
   C. Coordinate with the Life Actuarial (A) Task Force on changes to the Accounting Practices and Procedures Manual (AP&P Manual) related to the Valuation Manual VM-A, Requirements, and VM-C, Actuarial Guidelines, as well as other Valuation Manual requirements. This process will include the receipt of periodic reports on changes to the Valuation Manual on items that require coordination.
ACCOUNTING PRACTICES AND PROCEDURES (E) TASK FORCE (continued)

D. Obtain, analyze and review information on permitted practices, prescribed practices or other accounting treatments suggesting that issues or trends occurring within the industry may compromise the consistency and uniformity of statutory accounting, including, but not limited to, activities conducted by insurers for which there is currently no statutory accounting guidance or where the states have prescribed statutory accounting that differs from the guidance issued by the NAIC. Use this information to consider possible changes to statutory accounting.

E. Review and possibly modify Schedule F and any corresponding annual financial statement pages to determine how best to reflect the expected changes to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786). Give due consideration to alternatives, including whether an allowance for doubtful accounts is appropriate. Complete by the 2020 Fall National Meeting.

NAIC Support Staff: Robin Marcotte
CAPITAL ADEQUACY (E) TASK FORCE

The mission of the Capital Adequacy (E) Task Force is to evaluate and recommend appropriate refinements to capital requirements for all types of insurers.

Ongoing Support of NAIC Programs, Products or Services

1. The Capital Adequacy (E) Task Force will:
   A. Evaluate emerging “risk” issues for referral to the risk-based capital (RBC) working groups/subgroups for certain issues involving more than one RBC formula. Monitor emerging and existing risks relative to their consistent or divergent treatment in the three RBC formulas.
   B. Review and evaluate company submissions for the schedule and corresponding adjustment to total adjusted capital (TAC).

2. The Health Risk-Based Capital (E) Working Group, Life Risk-Based Capital (E) Working Group and Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Evaluate refinements to the existing NAIC risk-based capital (RBC) formulas implemented in the prior year. Forward the final version of the structure of the current year life and fraternal, property/casualty (P/C) and health RBC formulas to the Financial Condition (E) Committee by June.
   B. Consider improvements and revisions to the various RBC blanks to: 1) conform the RBC blanks to changes made in other areas of the NAIC to promote uniformity; and 2) oversee the development of additional reporting formats within the existing RBC blanks as needs are identified. Any proposal that affects the RBC structure must be adopted no later than April 30 in the year of the change and adopted changes will be forwarded to the Financial Condition (E) Committee by the next scheduled meeting or conference call. Any adoptions made to the annual financial statement blanks or statutory accounting principles that affect an RBC change adopted by April 30 and results in an amended change may be considered by July 30 for those exceptions where the Capital Adequacy (E) Task Force votes to pursue by super-majority (two-thirds) consent of members present, no later than June 30 for the current reporting year.
   C. Monitor changes in data quality problems in the prior year RBC filings at the summer and fall national meetings.

3. The Investment Risk-Based Capital (E) Working Group will:
   A. Evaluate relevant historical data and apply defined statistical safety levels over appropriate time horizons in developing recommendations for revisions to the current asset risk structure and factors in each of the risk-based capital (RBC) formulas and delivering those recommendations to the Capital Adequacy (E) Task Force.

4. The Variable Annuities Capital and Reserve (E/A) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and risk-based capital (RBC) calculation and determine if additional revisions need to be made.
   B. Develop and recommend appropriate changes including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

5. The Longevity Risk (A/E) Subgroup a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force will:
   A. Provide recommendations for recognizing longevity risk in statutory reserves and/or risk-based capital (RBC), as appropriate. Complete by the 2020 Spring National Meeting.
CAPITAL ADEQUACY (E) TASK FORCE  (continued)

6. The **Catastrophe Risk (E) Subgroup** of the Property and Casualty Risk-Based Capital (E) Working Group will:
   A. Recalculate the premium risk factors on an ex-catastrophe basis, if needed.
   B. Continue to update the U.S. and non-U.S catastrophe event list.
   C. Continue to evaluate the need for exemption criteria for insurers with minimal risk.
   D. Evaluate the risk-based capital (RBC) results inclusive of a catastrophe risk charge.
   E. Refine instructions for the catastrophe risk charge.
   F. Continue to evaluate any necessary refinements to the catastrophe risk formula.
   G. Evaluate other catastrophe risks for possible inclusion in the charge.

NAIC Support Staff: Jane Barr
EXAMINATION OVERSIGHT (E) TASK FORCE

The mission of the Examination Oversight (E) Task Force is to monitor, develop and implement tools for the risk-focused surveillance process. For financial examinations and analysis, this includes maintenance of the Financial Condition Examiners Handbook and the Financial Analysis Handbook to provide guidance to examiners and analysts using a risk-focused approach to solvency regulation and to encourage effective communication and coordination between examiners, analysts and other regulators. In addition, the mission of the Task Force is to: monitor and refine regulatory tools of the risk-focused surveillance process, including Financial Analysis Solvency Tools (FAST) such as company profiles and the FAST ratio scoring system; oversee financial examiner and analyst use of electronic software tools; monitor the progress of coordination efforts among the states in conducting examinations and the sharing of information necessary to solvency monitoring; establish procedures for the flow of information between the states about troubled companies; maintain an effective approach to the review of information technology (IT) general controls; and monitor the timeliness of financial examinations.

Ongoing Support of NAIC Programs, Products or Services

1. The Examination Oversight (E) Task Force will:
   A. Accomplish its mission using the following groups:
      5. IT Examination (E) Working Group.

2. The Electronic Workpaper (E) Working Group will:
   A. Monitor and support the state insurance departments in using electronic workpaper software tools to conduct and document solvency monitoring activities.
   B. Provide ongoing oversight to the NAIC’s Electronic Workpaper Hosting Project.
   C. Develop a framework to meet the long-term hosting and software needs of state insurance regulators in using electronic workpapers to conduct and document solvency monitoring activities. Ensure that solutions developed consider various state insurance regulator uses, as appropriate.

3. The Financial Analysis Solvency Tools (E) Working Group will:
   A. Provide ongoing maintenance and enhancements to the Financial Analysis Handbook and related applications for changes to the NAIC annual/quarterly financial statement blanks, as well as enhancements developed to assist in the risk-focused analysis and monitoring of the financial condition of insurance companies and groups. Monitor the coordination of analysis activities of holding company groups, and coordinate and analyze input received from other state regulators.
   B. Provide ongoing development maintenance and enhancements to the automated financial solvency tools developed to assist in conducting risk-focused analysis and monitoring the financial condition of insurance companies and groups. Prioritize and perform analysis to ensure that the tools remain reliable and accurate.
   C. Coordinate with the Financial Examiners Handbook (E) Technical Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. Adjust the Financial Analysis Handbook and current financial analysis solvency tools for life insurance companies based on any recommendations as requested from the Life Actuarial (A) Task Force to incorporate principle-based reserving (PBR) changes.

4. The Financial Examiners Coordination (E) Working Group will:
   A. Develop enhancements that encourage the coordination of examination activities with regard to holding company groups.
   B. Promote coordination by assisting and advising domiciliary regulators and exam coordinating states as to what might be the most appropriate regulatory strategies, methods and actions regarding financial examinations of holding company groups.
   C. Facilitate communication among regulators regarding common practices and issues arising from coordinating examination efforts.
   D. Provide ongoing maintenance and enhancements to the Financial Examination Electronic Tracking System (FEETS).
EXAMINATION OVERSIGHT (E) TASK FORCE (continued)

5. The **Financial Examiners Handbook (E) Technical Group** will:
   A. Continually review the *Financial Condition Examiners Handbook* and revise, as appropriate.
   B. Coordinate with the Risk-Focused Surveillance (E) Working Group to monitor the implementation of the risk-assessment process by developing additional guidance and exhibits within the *Financial Condition Examiners Handbook*, including consideration of potential redundancies affected by the examination process, corporate governance and other guidance as needed to assist examiners in completing financial condition examinations.
   C. Coordinate with the Financial Analysis Handbook (E) Working Group and the Risk-Focused Surveillance (E) Working Group, as appropriate, to develop and maintain guidance in order to provide effective solvency monitoring.
   D. Coordinate with the IT Examination (E) Working Group and the Financial Examiners Coordination (E) Working Group to maintain specialized areas of guidance within the *Financial Condition Examiners Handbook* related to the charges of these specific working groups.
   E. Adjust the *Financial Condition Examiners Handbook* based upon any recommendations as requested from the Life Actuarial (A) Task Force to incorporate principle-based reserving (PBR) changes.

6. The **IT Examination (E) Working Group** will:
   A. Continually review and revise, as needed, the “General Information Technology Review” and “Exhibit C—Evaluation of Controls in Information Systems” sections of the *Financial Condition Examiners Handbook*.
   B. Coordinate with the Market Conduct Examination Standards (D) Working Group to assist in the development of regulatory oversight policy with respect to cybersecurity examination issues, as requested by the Innovation and Technology (EX) Task Force.

NAIC Support Staff: Miguel Romero
LONG-TERM CARE INSURANCE (E/B) TASK FORCE

Ongoing Support of NAIC Programs, Products or Services

1. The Long-Term Care Insurance (E/B) Task Force of the Health Insurance and Managed Care (B) Committee and Financial Condition (E) Committee will:
   A. Coordinate all aspects of the NAIC’s work regarding the long-term care insurance (LTCI) market. In addition to coordinating all current Health Insurance and Managed Care (B) Committee and Financial Condition (E) Committee projects, the Task Force should pursue the following general objectives:
      1. Evaluate the sufficiency of actuarial valuation standards.
      2. Evaluate the sufficiency of current financial reporting.
      3. Assess state activities regarding the regulatory considerations on rate increase requests on blocks and to identify common elements for achieving greater transparency and predictability.
      4. Consider product innovations and the development of potential state and federal solutions for stabilizing the LTCI market.
      5. Provide periodic reports to the Health Insurance and Managed Care (B) Committee and the Financial Condition (E) Committee, as well as the Executive (EX) Committee, regarding key issues and progress toward the general objectives set forth above. Conduct meetings in regulator-to-regulator session, as appropriate.

NAIC Support Staff: Dan Daveline/Jolie Matthews
RECEIVERSHIP AND INSOLVENCY (E) TASK FORCE

The mission of the Receivership and Insolvency (E) Task Force shall be administrative and substantive as it relates to issues concerning insurer insolvencies and insolvency guarantees. Such duties include, without limitation, monitoring the effectiveness and performance of state administration of receiverships and the state guaranty fund system; coordinating cooperation and communication among regulators, receivers and guaranty funds; monitoring ongoing receiverships and reporting on such receiverships to NAIC members; developing and providing educational and training programs in the area of insurer insolvencies and insolvency guarantees to regulators, professionals and consumers; developing and monitoring relevant model laws, guidelines and products; and providing resources for regulators and professionals to promote efficient operations of receiverships and guaranty funds.

Ongoing Support of NAIC Programs, Products or Services

1. The Receivership and Insolvency (E) Task Force will:
   A. Monitor and promote efficient operations of insurance receiverships and guaranty associations.
   B. Monitor and promote state adoption of insurance receivership and guaranty association model acts and regulations and monitor other legislation related to insurance receiverships and guaranty associations.
   C. Provide input and comments to the International Association of Insurance Supervisors (IAIS), the Financial Stability Board (FSB) or other related groups on issues regarding international resolution authority.
   D. Monitor, review and provide input on federal rulemaking and studies related to insurance receiverships.
   F. Monitor the work of other NAIC committees, task forces and working groups to identify and address any issues that affect receivership law and/or regulatory guidance.
   G. Perform additional work as directed by the Financial Condition (E) Committee and/or received through referral by other groups.

2. The Receivership Financial Analysis (E) Working Group will:
   A. Monitor receiverships involving nationally significant insurers/groups to support, encourage, promote and coordinate multistate efforts in addressing problems.
   B. Interact with the Financial Analysis (E) Working Group, domiciliary regulators and lead states to assist and advise as to what might be the most appropriate regulatory strategies, methods and/or action(s) with regard to potential or pending receiverships.

3. The Receivership Large Deductible Workers' Compensation (E) Working Group will:
   A. Complete work based on recommendations for possible enhancements to the U.S. receivership regime, as approved and directed by the Receivership and Insolvency (E) Task Force, resulting from a study of the states' receivership laws and practices related to the receivership of insurers with significant books of large deductible workers' compensation business. Complete by the 2020 Summer National Meeting.

4. The Receivership Law (E) Working Group will:
   A. Review and provide recommendations on any issues identified that may affect the states’ receivership and guaranty association laws; for example, any issues that arise as a result of market conditions, insurer insolvencies, federal rulemaking and studies, international resolution initiatives or as a result of the work performed by other NAIC committees, task forces and/or working groups.
   B. Discuss significant cases that may affect the administration of receiverships.
   C. Complete work, as assigned from the Task Force, to address recommendations from the Financial Stability (EX) Task Force’s Macroprudential Initiative (MPI) referral as follows:
      2. Explore if bridge institutions could be implemented under regulatory oversight pre-receivership to address an early termination of qualified financial contracts (QFCs), and if appropriate, develop applicable guidance. Review the Receiver's Handbook guidance on QFCs and, if necessary, draft enhancements. Identify related pre-receivership considerations related to QFCs and, if necessary, make referrals to other relevant groups to enhance pre-receivership planning, examination and analysis guidance.
RECEIVERSHIP AND INSOLVENCY (E) TASK FORCE (continued)

3. Review and provide recommendations for remedies to ensure continuity of essential services and functions to an insurer in receivership by affiliated entities, including non-regulated entities. Consult with the Group Solvency Issues (E) Working Group as the topic relates to affiliated intercompany agreements. Complete by the 2020 Fall National Meeting.

NAIC Support Staff: Jane Koenigsman
The mission of the Reinsurance (E) Task Force is to monitor and coordinate activities and areas of interest, which overlap to some extent the charges of other NAIC groups—specifically, the International Insurance Relations (G) Committee.

**Ongoing Support of NAIC Programs, Products or Services**

1. The **Reinsurance (E) Task Force** will:
   A. Provide a forum for the consideration of reinsurance-related issues of public policy.
   C. Oversee the activities of the Qualified Jurisdiction (E) Working Group.
   D. Monitor the implementation of the 2011, 2016 and 2019 revisions to the Credit for Reinsurance Model Law (#785); and the 2011 and 2019 revisions to the Credit for Reinsurance Model Regulation (#786) and the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).
   E. Communicate and coordinate with the Federal Insurance Office (FIO) and other federal authorities on matters pertaining to reinsurance.
   F. Consider any other issues related to the revised Model #785, Model #786 and Model #787.
   G. Monitor the development of international principles, standards and guidance with respect to reinsurance. This includes, but is not limited to, monitoring the activities of various groups within the International Association of Insurance Supervisors (IAIS), including the Reinsurance and Other Forms of Risk Transfer Subcommittee, the Reinsurance Mutual Recognition Subgroup and the Reinsurance Transparency Group.
   H. Consider the impact of reinsurance-related federal legislation, including, but not limited to, the federal Nonadmitted and Reinsurance Reform Act (NRRA) and the Federal Insurance Office Act, and coordinate any appropriate NAIC action.
   I. Continue to monitor the impact of reinsurance-related international agreements, including the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (EU Covered Agreement) and the “Bilateral Agreement Between the United States of America and the United Kingdom on Prudential Measures Regarding Insurance and Reinsurance” (UK Covered Agreement).

2. The **Reinsurance Financial Analysis (E) Working Group** will:
   A. Operate in regulator-to-regulator session pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings and operate in open session when discussing certified reinsurance topics and policy issues, such as amendments to the Uniform Application for Certified Reinsurers.
   B. Provide advisory support and assistance to states in the review of reinsurance collateral reduction applications. Such a process with respect to the review of applications for reinsurance collateral reduction and qualified jurisdictions should strengthen state regulation and prevent regulatory arbitrage.
   C. Provide a forum for discussion among NAIC jurisdictions of reinsurance issues related to specific companies, entities or individuals.
   D. Support, encourage, promote and coordinate multistate efforts in addressing issues related to certified reinsurers, including, but not limited to, multistate recognition of certified reinsurers.
   E. Provide analytical expertise and support to the states with respect to certified reinsurers and applicants for certification.
   F. Provide advisory support with respect to issues related to the determination of qualified jurisdictions.
   G. Ensure the public passporting website remains current.
   H. For reinsurers domiciled in Reciprocal Jurisdictions, determine the best and most effective approaches for the financial solvency surveillance to assist the states in their work to protect the interests of policyholders.

3. The **Qualified Jurisdiction (E) Working Group** will:
   A. Maintain the NAIC List of Qualified Jurisdictions and the NAIC List of Reciprocal Jurisdictions in accordance with the Process for Evaluating Qualified and Reciprocal Jurisdictions.
REINSURANCE (E) TASK FORCE (continued)

B. Perform a yearly due diligence review of Qualified Jurisdictions to determine whether there have been any significant changes over the prior year that might affect their status as Qualified Jurisdictions.
C. Consider evaluations of any additional jurisdictions for inclusion on the NAIC List of Qualified Jurisdictions.

NAIC Support Staff: Jake Stultz/Dan Schelp
RISK RETENTION GROUP (E) TASK FORCE

The mission of the Risk Retention Group (E) Task Force is to stay apprised of the work of other NAIC groups as it relates to financial solvency regulation and the NAIC Financial Regulation Standards and Accreditation Program. The Task Force may make referrals to the Financial Regulation Standards and Accreditation (F) Committee and/or other NAIC groups, as deemed appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Risk Retention Group (E) Task Force will:
   A. Monitor and evaluate the work of other NAIC committees, task forces and working groups related to risk retention groups (RRGs). Specifically, if any of these actions affect the NAIC Financial Regulation and Accreditation Standards Program, assess whether and/or how the changes should apply to RRGs and their affiliates.
   B. Monitor and analyze federal actions, including any U.S. Government Accountability Office (GAO) reports. Consider any action necessary as a result of federal activity.
   C. Monitor the impacts of recent tools and resources made available to domiciliary and non-domiciliary state insurance regulators pertaining to RRGs. Consider whether additional action is necessary, including educational opportunities, updating resources and further clarifications.

NAIC Support Staff: Becky Meyer
The mission of the Valuation of Securities (E) Task Force is to provide regulatory leadership and expertise to establish and maintain all aspects of the NAIC’s credit assessment process for insurer-owned securities, as well as produce insightful and actionable research and analysis regarding insurer investments.

Ongoing Support of NAIC Programs, Products or Services

1. The Valuation of Securities (E) Task Force will:
   A. Review and monitor the operations of the NAIC Securities Valuation Office (SVO) and the NAIC Structured Securities Group (SSG) to ensure they continue to reflect regulatory objectives.
   B. Maintain and revise the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) to provide solutions to investment-related regulatory issues for existing or anticipated investments.
   C. Monitor changes in accounting and reporting requirements resulting from the continuing maintenance of the Accounting Practices and Procedures Manual, as well as financial statement blanks and instructions, to ensure that the P&P Manual continues to reflect regulatory needs and objectives.
   D. Consider whether improvements should be suggested to the measurement, reporting and evaluation of invested assets by the NAIC as the result of: 1) newly identified types of invested assets; 2) newly identified investment risks within existing invested asset types; or 3) elevated concerns regarding previously identified investment risks.
   E. Identify potential improvements to the credit filing process, including formats and electronic system enhancements.
   F. Provide effective direction to the NAIC’s mortgage-backed securities modeling firms and consultants.
   G. Coordinate with other NAIC working groups and task forces—including, but not limited to, the Capital Adequacy (E) Task Force, the Investment Risk-Based Capital (E) Working Group, the Statutory Accounting Principles (E) Working Group and the Blanks (E) Working Group—to formulate recommendations and to make referrals to such other NAIC regulator groups to ensure expertise relative to investments, or the purpose and objective of guidance in the P&P Manual, is reflective in the guidance of such other groups and that the expertise of such other NAIC regulatory groups and the objectives of their guidance is reflected in the P&P Manual.
   H. Identify potential improvements to the filing exempt process (the use of credit rating provider ratings to determine an NAIC designation) to ensure greater consistency, uniformity and appropriateness to achieve the NAIC’s financial solvency objectives.

NAIC Support Staff: Charles Therriault
FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE

The mission of the NAIC accreditation program is to establish and maintain standards to promote sound insurance company financial solvency regulation. The accreditation program provides a process whereby solvency regulation of multi-state insurance companies can be enhanced and adequately monitored with emphasis on the following:

1. Adequate solvency laws and regulations in each accredited state to protect consumers and guarantee funds.
2. Effective and efficient financial analysis and examination processes in each accredited state.
3. Appropriate organizational and personnel practices in each accredited state.
4. Effective and efficient processes regarding the review of organization, licensing and change of control of domestic insurers in each accredited state.

Ongoing Support of NAIC Programs, Products or Services

1. The Financial Regulation Standards and Accreditation (F) Committee will:
   A. Maintain and strengthen the NAIC Financial Regulation Standards and Accreditation Program.
   B. Assist the states, as requested and as appropriate, in implementing laws, practices and procedures, and obtaining personnel required for compliance with the standards.
   C. Conduct a yearly review of accredited jurisdictions.
   D. Consider new model laws; new practices and procedures; and amendments to existing model laws, practices and procedures required for accreditation. Determine the timing and appropriateness of the addition of new model laws, new practices and procedures, and amendments.
   E. Render advisory opinions and interpretations of model laws required for accreditation and on substantial similarity of state laws.
   F. Review existing standards for effectiveness and relevancy, and make recommendations for change, if appropriate.
   G. Produce, maintain and update the NAIC Accreditation Program Manual to provide guidance to state insurance regulators regarding the official standards, policies and procedures of the program.
   H. Maintain and update the “Financial Regulation Standards and Accreditation Program” pamphlet.
   I. Perform enhanced pre-accreditation review services, including, but not limited to, additional staff support, increased participation, enhanced report recommendations, and informal feedback.

NAIC Support Staff: Becky Meyer/Sara Franson
INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE

The mission of the International Insurance Relations (G) Committee is to coordinate NAIC participation in international discussions on and the development of insurance regulatory and supervisory standards and to promote international cooperation. The Committee also coordinates on international insurance matters with the U.S. federal government, including the U.S. Department of the Treasury (Treasury Department), the Federal Reserve Board, the Office of the U.S. Trade Representative (USTR), the U.S. Department of Commerce, and other federal agencies. In addition, the Committee provides an open forum for NAIC communication with U.S. interested parties and stakeholders on international insurance matters.

Ongoing Support of NAIC Programs, Products or Services

1. The International Insurance Relations (G) Committee will:
   A. Monitor and assess international activities at forums like the International Association of Insurance Supervisors (IAIS), the Financial Stability Board (FSB), and the Organisation for Economic Co-operation and Development (OECD), among others, that affect U.S. insurance regulation, U.S. insurance consumers, and the U.S. insurance industry.
   B. Support and facilitate the participation of state insurance regulators and the NAIC in relevant IAIS, FSB, OECD and similar workstreams.
   C. Develop NAIC policy on international activities, coordinating as necessary with other NAIC committees, task forces and working groups, and communicating key international developments to those NAIC groups.
   D. Coordinate and facilitate state efforts to participate in key bilateral and multilateral dialogues, projects, conferences and training opportunities with international regulators and international organizations, both directly and in coordination with the federal government, as appropriate.
   E. Strengthen international regulatory systems and relationships by interacting with international regulators and sharing U.S. supervisory best practices, including conducting an International Fellows Program and educational (technical assistance) seminars to provide an understanding of the U.S. state-based system of insurance regulation.
   F. Coordinate the NAIC’s participation in the International Monetary Fund (IMF)/World Bank Financial Sector Assessment Program (FSAP).
   G. Coordinate state efforts to assist in achieving U.S. international trade objectives through reviewing relevant materials, developing input, and providing assistance and expertise on insurance matters to the USTR and/or other federal entities.

NAIC Support Staff: Ethan Sonnichsen/Ryan Workman
NAIC/CONSUMER LIAISON COMMITTEE

The mission of the NAIC/Consumer Liaison Committee is to assist the NAIC in its mission to support state insurance regulation by providing consumer views on insurance regulatory issues. The Liaison Committee provides a forum for ongoing dialogue between NAIC members and NAIC consumer representatives. The Liaison Committee’s activities in 2020 will be closely aligned with the priorities of the NAIC Consumer Board of Trustees.

NAIC Support Staff: Lois E. Alexander

NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE

The mission of the NAIC/American Indian and Alaska Native Liaison Committee is to provide a forum for ongoing dialogue between NAIC Members and the American Indian and Alaska Native communities concerning insurance issues of common interest. Specifically, the Liaison Committee will provide a forum for an exchange of information and views on issues surrounding the availability of insurance for American Indian and Alaska Native consumers and tribal interests, an opportunity for American Indian and Alaska Native groups to bring insurance consumer protection issues to the attention of NAIC Members, and a dialogue on best practices for dealing with insurance issues unique to sovereign tribal nations.

NAIC Support Staff: Lois Alexander

NAIC/INDUSTRY LIAISON COMMITTEE

The mission of the NAIC/Industry Liaison Committee is to meet at least twice a year to discuss issues of common interest to state insurance regulators and insurance industry representatives.

NAIC Support Staff: Mark Sagat/Chara Bradstreet

NAIC/STATE GOVERNMENT LIAISON COMMITTEE

The mission of the NAIC/State Government Liaison Committee is to discuss issues of common interest to state insurance regulators and state officials.

NAIC Support Staff: Mark Sagat/Chara Bradstreet
APPENDIX

NAIC Audit Committee
Committee Charter

1. The Audit Committee will:
   A. Provide continuous audit oversight, including:
      1. Provide an open avenue of communication between the independent auditor and the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.
      2. Confirm and ensure the independence of the independent auditor.
      3. Inquire of management and the independent auditor about significant risks or exposures and assess the steps management has taken to minimize such risk.
      4. Consider and review with the independent auditor:
         a. Significant findings during the year, including the status of previous audit recommendations.
         b. Any difficulties encountered in the course of audit work, including any restrictions on the scope of activities or access to required information.
         c. The adequacy of internal controls, including computerized information system controls and security, as documented in the Statement on Auditing Standards (SAS) 115 letter from the independent auditor.
         d. Related findings and recommendations of the independent auditor with management’s responses, as documented in the SAS 114 letter from the independent auditor.
      5. Meet periodically with the independent auditor in separate executive sessions to discuss any matters the Committee believes should be discussed privately with the Committee.
      6. Report periodically to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee on significant results of the foregoing activities.
      7. Instruct the independent auditor that the Executive (EX) Committee and Internal Administration (EX1) Subcommittee are the auditor’s clients.
   B. Provide continuous oversight of reporting policies, including:
      1. Advise financial management and the independent auditor that they are expected to provide a timely analysis of significant current financial reporting issues and practices.
      2. Inquire as to the auditor’s independent qualitative judgments about the appropriateness, not just the acceptability, of the accounting principles and the clarity of the financial disclosure practices.
      3. Inquire as to the auditor’s views about whether management’s choices of accounting principles are conservative, moderate or aggressive from the perspective of income, asset and liability recognition, and whether those principles are common practices or are minority practices.
      4. Inquire as to the auditor’s views about how choices of accounting principles and disclosure practices may affect NAIC members, the insurance industry, and public views and attitudes.
   C. Provide continuous oversight of financial management, including:
      1. Review the monthly consolidated financial statements and receive regular reports from executive management on the financial operations of the association.
      2. Meet prior to, or at, each national meeting, or more frequently as circumstances require. The Committee may ask members of management or others to attend meetings and provide pertinent information, as necessary.
      3. Report on significant results of the foregoing activities to the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee on a regular basis.
   D. Conduct scheduled audit activities, including:
      1. Recommend the selection of the independent auditor for approval by the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, approve the compensation of the independent auditor, and review and approve the discharge of the independent auditor.
      2. Review annually the audit scope and plan of the independent auditor with management and the independent auditor, including:
         a. The independent auditor’s audit of the financial statements, accompanying footnotes and its report thereon.
         b. Any significant changes required in the independent auditor’s audit plans.
         c. Any difficulties or disputes with management encountered during the course of the year under audit.
         d. Other matters related to the conduct of the audit, which are to be communicated to the Committee under generally accepted auditing standards (GAAS).
      3. Review and approve needs-based funding allocations, as needed.
      4. Review and update the Committee charter, on at least an annual basis.
NAIC Audit Committee (continued)
Committee Charter

E. Conduct other activities when necessary, including:

1. Arrange for the independent auditor to be available to the full Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, as needed.

2. Review and approve requests for any management consulting engagement to be performed by the independent auditor and be advised of any other study undertaken at the request of management that is beyond the scope of the audit engagement letter.

3. Conduct and/or authorize investigations into any matters within the Committee’s scope of responsibilities. The Committee shall be empowered to retain independent counsel and other professionals to assist in the conduct of any investigation.

4. Ensure members of the Committee receive the appropriate orientation to the Committee and receive a copy of the policy manual.

Appendix A -- Distribution Channels
The following is a description of distribution channels used in the development of recommended 2020 GRET values:

1. **Independent** – Business written by a company that markets its insurance policies through an independent insurance agent or insurance broker not primarily affiliated with any one insurance company. These agencies or agents are not employed by the company and operate without an exclusive distribution contract with the company. These include most PPGA arrangements.

2. **Career** – Business written by a company that markets insurance and investment products through a sales force primarily affiliated with one insurance company. These companies recruit, finance, train, and often house financial professionals who are typically referred to as career agents or multi-line exclusive agents.

3. **Direct Marketing** – Business written by a company that markets its own insurance policies direct to the consumer through methods such as direct mail, print media, broadcast media, telemarketing, retail centers and kiosks, internet or other media. No direct field compensation is involved.

4. **Niche Marketers** – Business written by home service, pre-need, or final expense insurance companies as well as niche-market companies selling small face amount life products through a variety of distribution channels.

5. **Other** – Companies surveyed were only provided with the four options described above. Nonetheless since there were many companies for which we did not receive a response (or whose response in past years’ surveys confirmed an “other” categorization (see below), values for the “other” category are given in the tables in this memo. It was also included to indicate how many life insurance companies with no response (to this survey and prior surveys) and to indicate whether their exclusion has introduced a bias into the resulting values.
Appendix B – Unit Expense Seeds

The expense seeds used in the 2014 and prior GRETs were differentiated between branch office and all other categories, due to the results of a relatively old study that had indicated that branch office acquisition cost expressed on a per Face Amount basis was about double that of other distribution channels. Due to the elimination of the branch office category in the 2015 GRET, non-differentiated unit expense seeds have been used in the current and immediately prior studies.

The unit expense seeds used in the 2019 GRET and the 2020 GRET recommendation were based on the average of the 2006 through 2010 Annual SOA expense studies. These studies differentiated unit expenses by type of individual life insurance policy (term and permanent coverages). As neither the GRET nor the Annual Statement data provided differentiates between these two types of coverage, the unit expense seed was derived by judgment based on this information. The following shows the averages derived from the Annual SOA studies and the seeds used in this study. Beginning with the 2019 Annual Statement submission this information may become more readily available.

TO: Reggie Mazyck, NAIC
FROM: Dale Hall, Managing Director of Research, Society of Actuaries (SOA)
Leon Langlitz, Chair, SOA Committee on Life Insurance Company Expenses
DATE: July 16, 2019
RE: 2020 Generally Recognized Expense Table (GRET) – SOA Analysis

As in previous years, the Society of Actuaries expresses its thanks to NAIC staff for their assistance and responsiveness in providing Annual Statement expense and unit data for the 2020 GRET analysis for use with individual life insurance sales illustrations. The analysis is based on expense and expense related information reported on companies’ 2017 and 2018 Annual Statements. This project has been completed to assist the Life Actuarial Task Force (LATF) in its consideration of potential revisions to the GRET that could become effective for calendar year 2020. This memo describes the analysis and resultant findings.

NAIC staff provided Annual Statement data for life insurance companies for calendar years 2017 and 2018. This included data from 707 companies in 2017 and 722 companies in 2018. This increase breaks the trend of small decreases over the previous few years. Of the total companies, 326 were in both years and passed the outlier exclusion tests and were included as a base for the GRET factors (361 companies passed similar tests last year).

Approach Used

The methodology for calculating the recommended GRET factors based on this data is similar in broad outline to that followed in the last several years. The methodology was last altered in 2015. The changes which were made at that time can be found in the recommendation letter sent on July 30, 2015.¹

To calculate updated GRET factors, the average of the factors from the two most recent years (2017 and 2018 for those with data available for both years) of Annual Statement data was used. For each company an actual to expected ratio was calculated. Companies with ratios that fall outside predetermined parameters are excluded and this process is computed three times in order to stabilize the average rates. The boundaries of the exclusions are modified from time to time and there was a slight adjustment this year to increase the number of companies in the final study. Unit expense seed factors (the seeds for all distribution channel categories are the same), as given in Appendix B, were used to compute total expected expenses. Thus, these seed factors were used to implicitly allocate expenses between acquisition and maintenance expenses, as well as among the three acquisition expense factors (on a direct of ceded reinsurance basis).

Companies were categorized by their reported distribution channel (four categories were used as described in Appendix A of this memo). There remain a significant number of companies for which no distribution channel was available, as no responses to the annual surveys have been received from those companies. The characteristics of these companies vary significantly, including companies not currently writing new business or whose major line of business is not individual life insurance. Any advice or assistance from LATF in future

¹ https://www.soa.org/Files/Research/Projects/research-2016-gret-recommendation.pdf
years to increase the response rate to the surveys of companies that submit Annual Statements in order to reduce the number of companies in the “Other” category would be most welcomed.

Prior to 2014, when responding to the survey if a company indicated they used multiple channels to distribute their individual life sales, the percentage weights provided to us were applied to that company’s reported results in the tabulations of each of the distribution channel’s unit expense results. In 2015 this was changed so that all expenses for a company will go to the channel with the highest percentage weight. This approach was changed because: (1) as fewer channel types were used, it was expected that fewer companies would have multiple channels as currently defined and (2) an insufficient number of multiple distribution responses were provided in that year’s survey to result in a significantly different outcome. The intention is to continue surveying the companies in future years to enable enhancement of this multiple distribution channel information.

Companies were excluded from the analysis if (1) their actual to expected ratios were considered outliers, often due to low business volume, (2) the average first year and single premium per policy was more than $40,000, (3) they are known reinsurance companies or (4) companies were not in both years of the data supplied by the NAIC. To derive the overall GRET factors, the unweighted average of the remaining companies’ actual-to-expected ratios for each respective category was calculated. The resulting factors were rounded, as shown in Table 1.

The Recommendation

Employing the above methodology results in the proposed 2020 GRET values shown in Table 1. To facilitate comparisons, the current 2019 GRET factors are shown in Table 2.

Further characteristics of the type of companies represented in each category are included in the last two columns in Table 1, including the average premium per policy issued and the average face amount ($000s) per policy issued.

In previous recommendations, an effort was made to reduce volatility in the GRET factors from year-to-year by limiting the change in GRET factors between years to about ten percent of the prior value. The changes from the 2019 GRET were reviewed to ensure that a significant change was not made in this year’s GRET recommendation. Only the Niche Marketing distribution channel category experienced a change greater than ten percent so the factors for this line were capped at the ten percent level (the Acquisition per unit factor changed more than 10% because of rounding) from the corresponding 2019 GRET values. The change occurred due to the change in the composition of the companies in this category where there is a small number of companies included.

**Usage of the GRET**

Also asked in this year’s survey, responded to by companies’ Annual Statement correspondent, was a question regarding whether the 2018 GRET table was used by the company. Last year, 28% of the responders indicated their company used the GRET for sales illustration purposes, with similar percentage results by size of company; this contrasted with about 30% in the prior year. This year, 26% of responding companies indicated that they used the GRET in 2018 for sales illustration purposes, with similar results for each of the distribution channels with a significant number of responders. Based on the information received over the last several years, the variation in GRET usage appears to be in large part due to the relatively small sample size and different responders to the surveys.

We hope LATF finds this information helpful and sufficient for consideration of a potential update to the GRET. If you require further analysis or have questions, please contact Dale Hall at 847-273-8835.

Kindest personal regards,

Dale Hall, FSA, MAAA, CERA, CFA

Insurance Company Expenses
Appendix A -- Distribution Channels

The following is a description of distribution channels used in the development of recommended 2020 GRET values:

1. **Independent** – Business written by a company that markets its insurance policies through an independent insurance agent or insurance broker not primarily affiliated with any one insurance company. These agencies or agents are not employed by the company and operate without an exclusive distribution contract with the company. These include most PGA arrangements.

2. **Career** – Business written by a company that markets insurance and investment products through a sales force primarily affiliated with one insurance company. These companies recruit, finance, train, and often house financial professionals who are typically referred to as career agents or multi-line exclusive agents.

3. **Direct Marketing** – Business written by a company that markets its own insurance policies direct to the consumer through methods such as direct mail, print media, broadcast media, telemarketing, retail centers and kiosks, internet or other media. No direct field compensation is involved.

4. **Niche Marketers** – Business written by home service, pre-need, or final expense insurance companies as well as niche-market companies selling small face amount life products through a variety of distribution channels.

5. **Other** – Companies surveyed were only provided with the four options described above. Nonetheless since there were many companies for which we did not receive a response (or whose response in past years’ surveys confirmed an “other” categorization (see below), values for the “other” category are given in the tables in this memo. It was also included to indicate how many life insurance companies with no response (to this survey and prior surveys) and to indicate whether their exclusion has introduced a bias into the resulting values.

Appendix B – Unit Expense Seeds

The expense seeds used in the 2014 and prior GRETs were differentiated between branch office and all other categories, due to the results of a relatively old study that had indicated that branch office acquisition cost expressed on a per Face Amount basis was about double that of other distribution channels. Due to the elimination of the branch office category in the 2015 GRET, non-differentiated unit expense seeds have been used in the current and immediately prior studies.

The unit expense seeds used in the 2019 GRET and the 2020 GRET recommendation were based on the average of the 2006 through 2010 Annual SOA expense studies. These studies differentiated unit expenses by type of individual life insurance policy (term and permanent coverages). As neither the GRET nor the Annual Statement data provided differentiates between these two types of coverage, the unit expense seed was derived by judgment based this information. The following shows the averages derived from the Annual SOA studies and the seeds used in this study. Beginning with the 2019 Annual Statement submission this information may become more readily available.

W:/National Meetings/2019/Fall/plenary/03 GRET2020.pdf
Actuarial Guideline (VAED)

Background:

Beginning in 2015, the NAIC commissioned a study of the reserve and RBC framework for Variable Annuity products. The study concluded that the existing requirements resulted in non-economic volatility, providing incentive for companies to engage in the use of financial planning techniques that the NAIC deemed inappropriate. Considerable effort was spent to develop and test updates to the reserve and RBC framework to address these issues. That revised framework was adopted by the NAIC during 2018, and the changes to NAIC models, the NAIC Valuation Manual, and the NAIC Life RBC instructions have been developed and adopted by the NAIC on August [xx], 2019. By the provisions of the SVL (Model 820), the changes to the Valuation Manual will be effective on January 1, 2020 and impact subsequent financial statements.

During the discussion of the Framework by the Variable Annuities Issues Working Group, the question was raised whether companies would have the option to ‘early adopt’; that is, to apply the new framework for the reserve and RBC values used for the December 31, 2019 financial statements. Since the new framework has been determined to provide improved financial measurement of the company’s liability and risk, there was agreement that optional application of the new framework for the December 31, 2019 financial statements would be appropriate.

Guideline:

A company may elect to apply the VM-21 requirements from the 2020 NAIC Valuation Manual as the Valuation Manual requirements for the valuation on December 31, 2019. For such election, the phase-in provision of Valuation Manual VM-21 Section 2.B. may not be elected. Any company electing early adoption of VM-21 shall also:

1. apply the provisions of Actuarial Guideline XLIII as amended for 2020 to the December 31, 2019 valuation of contracts within the scope of that guideline;
2. apply the Life RBC instructions for 2020 in the calculation of C-3 RBC in LR027 for 2019;
3. follow the documentation and certification requirements of VM-31 from the 2020 Valuation Manual for the Variable Annuity Business. In the VA Summary, clearly indicate the use of the new requirements in the section on change in methods from prior year; and
4. notify the Commissioner of the state of domicile of such elections.
REGULATORY GUIDE
UNDERSTANDING THE MARKET FOR CANNABIS INSURANCE

NAIC White Paper

July 9, 2019

Drafted by the
Cannabis Insurance (C) Working Group
of the
Property and Casualty Insurance (C) Committee
TABLE OF CONTENTS

    OF THE CANNABIS INDUSTRY...........................................................................
IV. TYPE, SCOPE, AND AVAILABILITY OF COVERAGE AND INSURANCE GAPS...
V. BEST PRACTICES AND RECOMMENDATIONS.....................................................
VI. CONCLUSIONS.................................................................................................

ADDITIONAL CANNABIS INFORMATIONAL RESOURCES...........................................
I. INTRODUCTION

A. EXECUTIVE SUMMARY

The cannabis industry is evolving and expanding as more states legalize either or both medicinal and recreational cannabis use throughout the U.S. With new entrepreneurs, investors, large corporate businesses, companies going public and executives entering the market, there is a new level of sophistication to the cannabis industry. The state-legalized cannabis businesses, like any other businesses, face a variety of risks and would like to have access to insurance to mitigate these risks. It is important for state insurance regulators to understand the insurance needs of the cannabis industry and to consider steps to address insurance needs in their respective state markets. Several state insurance regulators have taken steps successfully to encourage insurers to provide insurance for state-legalized cannabis businesses. However, major cannabis insurance gaps exist in many states and even in those states that have encouraged successfully the entrance of insurers into the cannabis insurance market.

The National Association of Insurance Commissioners (NAIC) Cannabis Insurance (C) Working Group was formed in August 2018 to identify insurance issues, gaps and opportunities facing the cannabis industry and to identify best regulatory practices to address these issues—starting with developing a white paper. The purpose of this white paper is to provide information to state insurance regulators, insurers and the broader public about the architecture of the cannabis business supply chain, types of insurance needed by the cannabis industry, the availability of cannabis business insurance in state insurance markets and the extent of insurance gaps, and best practices that state insurance regulators can adopt to encourage insurers to write insurance for the cannabis industry.

B. CANNABIS

The cannabis market rapidly changed over the last few years and continues to change on a daily basis. In 2017, the cannabis industry took in nearly $9 billion in sales. Nationally, in 2018, the overall cannabis industry was worth $10.4 billion1 and is anticipated to bring in $21 billion in 2021.2 Other estimates project that by 2022, the cannabis industry will create an estimated $80 billion in sales annually.3

---

of medical and recreational cannabis in the U.S. were nearly nine times higher than Oreo cookies and almost on par with Americans’ collective spending on Netflix subscriptions. With the addition of California’s recreational market sales in 2018, cannabis sales could easily eclipse McDonald’s annual U.S. revenue."4

Additionally, a majority of the U.S. population supports cannabis legalization. About six in 10 Americans say the use of cannabis should be legalized.5 Since June 2019, cannabis is legal for medicinal use in 33 states and Washington, DC, and cannabis is legal for recreational use in 11 states and Washington, DC.

Not only is cannabis a growing industry, but also it is a significant employer. In 2017, the cannabis industry employed 121,000 people. With the current trajectory, the number of workers could reach 292,000 by 2021.6 These jobs can range from budtenders7 and extraction technicians to employees at ancillary companies that generate a large portion of revenue from the cannabis industry. The industry is projected to add as many as 340,000 full-time jobs by 2022. This type of increase in job availability is significant; but, despite the demand for employees in the cannabis sector, there remains an issue with inconsistent positions on the legality of cannabis.

One of the most complex issues facing the cannabis industry is the different treatment of cannabis under federal and state law in states that have legalized cannabis.8 Despite being legal in many states, at the federal level, cannabis is a Schedule 1 substance that is illegal to manufacture, distribute or sell in the U.S.9 Currently, federal law also prohibits the sale of cannabis for medical and adult recreational use. Because cannabis is illegal at the federal level, many individuals are not comfortable working in a field where their employment could be considered illegal. Moreover, financial institutions are hesitant or unwilling to work with cannabis companies. Most banks prohibit cannabis-based businesses from opening accounts, which has led to the cannabis industry being mostly cash-based. This proves problematic as cannabis businesses often find it difficult to engage in standard business practices such as paying employees and vendors. It also

makes many cannabis-based businesses targets for criminal activity because of the increased risk of robberies and other theft-related crimes.

In states that have legalized cannabis, some community banks and credit unions are providing banking services to the cannabis industry, but in other locales, state-chartered financial institutions are unavailable. For example, during a regulatory tour, Delaware regulators witnessed one vendor to the market (that was not growing or selling cannabis) receive notice from its state-chartered bank that it would no longer be doing business with the company because of its involvement in the cannabis industry. The magnitude of this concern should not be ignored. “An estimated 70 percent of cannabis businesses have no relationship with a financial institution and thus use cash for all transactions, including salaries for employees.”

The U.S. Department of the Treasury’s Financial Crimes Enforcement Network (FinCEN) has issued guidance for financial institutions to follow regarding reporting revenues from the cannabis industry in those states in which cannabis is legal, which reflects the Treasury Department’s recognition that some banks and credit unions are providing banking services to the cannabis industry. “Surplus lines insurers mainly focus on the development of new coverages and the structuring of policies and premiums appropriate for risks. New and innovative insurance products for which there is no loss history are difficult, if not impossible, to appropriately price using common actuarial methods. Often, after a new coverage has generated sufficient data, the coverage eventually becomes a standard product in the admitted market.”

Despite the risks, state insurance regulators should encourage insurers who choose to enter the cannabis market to do so on the admitted market to drive the costs of policies down and make cannabis insurance more accessible for the cannabis industry.

C. Insurance Gaps

The following list shows the different types of cannabis businesses that are in the supply chain: cannabis cultivation, processors/harvesters, manufacturing, retail, distribution, testing labs and microbusinesses.

---

Below is a list of the types of insurance most frequently needed by the cannabis industry:

- Automobile, including Distribution (auto and cargo)
- Commercial General Liability
- Crop (Indoor/Outdoor)
- Crime Insurance
- Disaster Coverage
- Director and Officer Liability
- Employment Practices Liability
- Equipment Breakdown
- Errors and Omissions
- Excess/Umbrella
- General Liability
- Product Liability
- Premises Liability
- Property
- Surety Bonds
- Workers’ Compensation

As the industry continues to expand, there are more cannabis businesses to insure. No longer is cannabis just the flower used for smoking; the market has expanded to oils, shatter, wax, edibles, topical products, the beauty industry, and other cannabis-infused products. However, even with the increased market activity, many insurers are not willing to write cannabis insurance products due to the cannabis industry’s inability to bank, the federal illegality, and the unknown risks associated with insuring cannabis businesses. Insurance is essential to the security and safety of cannabis businesses, their employees, and their customers. Lack of insurance for the industry adds layers of unnecessary risk and exposure for all market participants.

While cannabis laws vary from state to state, the types of risks facing the cannabis industry generally remain the same. Many of the risks the cannabis industry faces are no different from any other business in the same area of business activity. Outdoor cannabis cultivators face the same risks that other cultivators or agricultural industry businesses face. Outdoor cannabis cultivators, for example, would be most vulnerable to adverse weather conditions and theft, which is not too different from other types of outdoor crop cultivators. The distinguishing factor with outdoor cannabis crops versus other types of outdoor crops is the federal illegality. For example, a cannabis farmer in Carpinteria, CA, was able to use his insurance policy with a payout in excess of $1 million after ash from
the 2017 southern California Thomas Fire destroyed thousands of his cannabis plants.\textsuperscript{12} Ash from the Thomas Fire seeped into the cannabis farmer’s greenhouse and contaminated the cannabis plants with toxic chemicals, which triggered the “atmospheric change” language in the insurance policy.\textsuperscript{13} This is the same exposure and the same coverage that applies to any other farm, nursery or orchard. The farmer accordingly filed a claim and received an insurance payout of more than $1 million. This may be the largest insurance payout given to a legal cannabis business to date.

In contrast, Delaware has not yet identified an insurer willing to write crop insurance for any Delaware cannabis growers. A cannabis farmer cannot get crop insurance in Delaware because he or she is growing cannabis and, consequently, it is considered “untouchable” per se. This difference between states illustrates that some insurers are treating cannabis businesses as regular commercial enterprises and are deciding to make a business risk decision, including financial and legal implications, to insure the cannabis industry, despite federal law differences, while in other states, some insurers are not ready to write insurance for the cannabis industry.

The cannabis industry is diverse in the type of insurance it needs from seed to sale. Crop failure and destruction can occur at the nursery and growth stage. Growing cannabis plants and keeping them healthy during the maturation phases is a laborious process. The cannabis is grown from its seedling stage in nurseries. It must be tended to by experienced cannabis farmers and growers and then harvested and trimmed (either by hand or machine). Even within the cannabis industry, there is great disparity between the sizes of companies and their operating and insurance needs. Crops can range from small craft batch cultivation to large scale nurseries. At the cultivation site alone, the types of insurance needed are different from the needs of a manufacturing site. One of the newest types of manufacturing sites is vertical integration locations where cannabis is grown and trimmed, and low-quality flowers are processed into oil and refined into shatter, wax or another concentrate through expensive machinery. Manufacturers will most likely want to insure these products. Once the cannabis product is in a consumable form, it is tested for contaminants and pesticides.

States often require some form of testing to ensure consumer protection. One bad test or pesticide report can make a crop or product completely unsafe and, therefore, unsellable. Many states have a track and trace system that records the movement of cannabis and cannabis products through the commercial supply chain. The cannabis plants are often tagged, and the packaging of cannabis products is marked with serial numbers to identify

the chain of liability. This allows for the ease of pinpointing exactly where contamination occurred.

The ability to have insurance is critical, and these controls should make insurers confident that they can selectively underwrite this business. This ability to pinpoint exactly where the product contamination occurred helps to identify which cannabis producer should be accountable for a bad batch of cannabis products and, in turn, which insurer will be responsible for paying the claims.

As the cannabis industry continues to expand in states and U.S. territories, insurance availability lags behind the needs of the cannabis industry. Sectors of the cannabis industry that need to be insured include ancillary cannabis businesses, cannabis-infused product manufacturers, cannabis dispensaries, cannabis events, cannabis growers and harvesters, cannabis landlords, cannabis distributors and transporters, cannabis medical physicians, cannabis waste facilities, cyber liability, and more.

Insurance companies have hesitated to enter the admitted market due to little data, as well as the unknown risk factors. There is not only an increased need for insurance by the cannabis industry, but there is also a need for insurance with the roll-out of state and local licensing requirements. As regulations shift from being general to specific, many local and state licensing authorities require insurance. States such as California and Massachusetts require proof of insurance, such as a general liability policy, for cannabis business applicants seeking licensure from state and local jurisdictions.14,15

The risk tolerance differences between state regulatory systems can also be stark. For instance, to access a Delaware retail medical marijuana outlet, a patient must first enter a vestibule with locked doors on either end: one for ingress and the other egress. Patients are scanned in the vestibule when entering a facility. They must produce both a driver’s license (or other state ID) and their Medical Marijuana Program (MMP) card before gaining entrance to a second locked chamber. Once there, patients pass their same ID to the intake processor. Only after satisfying the intake specialist protocol, the patient gains admittance to the store itself. No electronics are permitted in a Delaware cannabis store. In states that have legalized cannabis, security concerns are a prime concern of retail operators. However, state insurance regulators’ security protocols differ for retail outlets.

14. State of Massachusetts, Code of Massachusetts Regulations, Title 935, Cannabis Control Commission, Code of Massachusetts Regulations §§ 500.101(c)(5) and (6) and § 500.105(10).
As the size of the cannabis industry continues to increase, the need and the demand for insurance in the cannabis industry correspondingly increases. State insurance regulators will be forced to deal with the intersection of cannabis and insurance. They should be ready by educating themselves about the cannabis industry and the various types of insurance risks associated with it.

This white paper will focus on the federal, state and local authority; seed-to-sale operations; the type, scope and availability of coverage and insurance gaps; and regulatory best practices and recommendations. State insurance regulators, should they choose to do so, can play an important role in encouraging insurers to write insurance for the cannabis industry.

II. OVERVIEW OF KEY AUTHORITIES

A. FEDERAL AUTHORITY

Legalization of cannabis for any purpose is a topic that has been discussed and debated for decades. While cannabis was once prohibited nationwide, in the 1970s, 12 states either removed or reduced the penalties for possession of small amounts of cannabis. By the late 1970s, the momentum had stalled and would remain that way until the beginning of the 21st century.

However, by 2018, 33 states; Washington, DC; and the territories of Guam and Puerto Rico had legalized the use of cannabis for medical reasons. Eleven states, and Washington, DC, now also permit the recreational use of cannabis. Certainly, the pendulum of public opinion has swung since the late 1970s, with fewer people seeing cannabis as harmful when compared to 20 years ago. While one reason for this change may be generational, public opinion has perhaps also been swayed by the rise in laws permitting the use of medical marijuana.

“Medical marijuana” refers to the use of cannabis, which may involve use of the entire plant or its extracts—most frequently, delta-9-tetrahydrocannabinol (THC) and/or cannabidiol (CBD)—as a physician-recommended form of medicine to treat symptoms of

16. Alaska, California, Colorado, Maine, Minnesota, Mississippi, Nebraska, New York, North Carolina, Ohio, Oregon and South Dakota. (South Dakota later reversed its decriminalization of the drug.)
illness and other conditions. By 2019, 12 states had enacted laws permitting the use of products rich in CBD, which does not have psychoactive effects. Currently, the U.S. Food and Drug Administration (FDA) has not recognized or approved the use of cannabis as medicine, due to its classification as a Schedule I substance under the federal Controlled Substances Act (CSA) of 1970. However, researchers continue to explore its possible uses for medical treatment. Now that hemp-derived CBD is legal, retailers continue to sell CBD products in all 50 states, claiming that they are derived from industrial hemp plants and, therefore, are legal. To date, this is a position that has received mixed treatment from the federal government.

While not addressing every law or regulation that may apply to cannabis-related businesses or consumption, the following section will illustrate the myriad of laws that may complement or contradict each other. As will be seen, the legal and regulatory framework governing cannabis is in a constant state of flux. This constant change has led to great uncertainty in the cannabis industry with regard to business operations throughout the industry.

Signed into law by President Richard Nixon on Oct. 27, 1970, the CSA is the federal U.S. drug policy under which the manufacture, importation, possession, use and distribution of certain narcotics, stimulants, depressants, hallucinogens, anabolic steroids and other chemicals are regulated. Any addition, deletion or change to schedule designation of a medicine or substance may be requested by the U.S. Drug Enforcement Agency (DEA), the U.S. Department of Health and Human Services (HHS), the FDA or from any other party via petition to the DEA.

The DEA implements the CSA and may prosecute violators of the laws set forth in the CSA at both the domestic and international level. Within the CSA, there are federal schedule designations (I–V) that are used to classify drugs based upon their:

- Abuse potential
- Accepted medical applications in the U.S.
- Safety and potential for addiction

---

Cannabis is regulated as a Schedule I substance. Schedule I substances are those that have a high potential for abuse and for which there are currently no accepted medical uses in treatment in the U.S.\(^{25}\)

At the federal level, the government’s authority to regulate and control cannabis can be broken into three distinct categories: 1) criminal; 2) administrative; and 3) civil. While these categories are not mutually exclusive and often overlap, conceptualizing the federal level of control in this way is helpful to understand how federal law regulates cannabis and interacts with state and local law. It is also important to bear in mind that the executive, legislative and judicial branches of the federal government all have a role to play in each of these categories, and often, each branch seems to take a different approach in the regulation and control of cannabis.

**B. Federal Criminal Laws**

As mentioned above, cannabis is a Schedule I drug for purposes of the CSA, which triggers certain other federal criminal statutes. Of primary concern for this section, cannabis’ prohibited status triggers three main federal criminal laws when individuals engage in transactions involving cannabis or proceeds from cannabis. The first, the federal Bank Secrecy Act (BSA),\(^{26}\) requires financial institutions to report to the Treasury Department any transactions over $5,000 that the institution knows, or has reason to know, involve assets derived from illegal sources.

“Financial institution” is defined broadly and includes banks, credit unions, broker-dealers, insurance companies, pawnbrokers, travel agencies and a host of other institutions that may come into contact with assets derived from illegal sources. Because cannabis is a prohibited substance, any institution that transacts business with a cannabis or cannabis-related entity is subject to these reporting requirements. The penalty for a violation of the BSA is severe: up to a $250,000 civil penalty and up to five years in prison. Any transaction associated with a cannabis business must be reported under the BSA, even if that activity is legal under state law, and a violation of the BSA may result in a financial institution’s loss of its charter.

The second federal statute implicated in transactions involving cannabis is the money laundering statute.\(^{27}\) This statute makes it a felony for any person to engage in a financial transaction that the individual knows involves the proceeds of an unlawful activity. Because cannabis is a prohibited substance, any transaction that derives proceeds,
directly or indirectly, from cannabis transactions could be considered money laundering for the purposes of the money laundering statute. The penalties for violating this statute are severe: up to a $500,000 civil penalty or twice the value of the property involved in the transaction, whichever is greater, and up to 20 years in prison.

The third federal statute implicated by cannabis transactions is the unlicensed money transmitter statute.\(^{28}\) Under this statute, it is a felony to engage in an unlicensed money transmitting business. The statute defines “unlicensed money transmitting business” to include a transaction that involves the transportation or transmission of funds that are known to have been derived from a criminal offense or are intended to be used to promote unlawful activity. Because of this definition, any transaction that involves the transmission or transportation of funds derived, directly or indirectly, from the cannabis industry is a violation of the unlicensed money transmitter statute and subjects the individual to up to five years’ imprisonment.

In enforcing these statutes, the executive branch has, on the one hand, been consistent and on the other hand inconsistent. Regarding clearly illegal cannabis activities, the executive branch has been consistent in its enforcement and prosecution of such activities. However, the executive branch has been less consistent in its treatment of cannabis in states where it has become legal. For example, in February 2014, then Deputy Attorney General James Cole issued a memorandum that announced guidance to U.S. Department of Justice (DOJ) attorneys on the Obama administration’s priorities in the prosecution of cannabis-related federal crimes.\(^{29}\) Intended to update federal guidance considering ongoing changes to state laws, it applied to all federal enforcement activity, both civil and criminal, in all states.

Noting that the DOJ had previously issued memoranda setting forth federal enforcement priorities in jurisdictions that authorized cannabis cultivation and distribution for medical use, Deputy Attorney General Cole concluded that, with some exceptions, the federal government would again exercise discretion in its enforcement determinations in jurisdictions that had implemented strong, effective regulatory and enforcement systems to control the cultivation, distribution, sale and possession of cannabis for industrial or recreational use.\(^{30}\) While noting that any cannabis transaction was prosecutable, the Cole

\(^{30}\) Continued priorities included preventing the distribution of marijuana to minors and preventing revenue from the sale of marijuana going to criminal enterprises.
Memorandum indicated that the DOJ would not actively seek to prosecute legalized cannabis transactions.

The exceptions to the Cole Memorandum were eight federal priorities for prosecution, including criminal enterprises, sale to minors, growing cannabis on public grounds, and preventing diversion of legal cannabis into states where cannabis was illegal. However, in January 2018, former Attorney General Jeff Sessions rescinded the Cole Memorandum by way of his own memorandum that emphasized the DOJ’s “well-established principles” with regard to the prosecution of cannabis crimes. While the memorandum did not specifically address legalized cannabis, it did indicate a return to a more active DOJ role in regulation and control of cannabis. The federal guidance previously issued by former Attorney General Sessions leaves financial institutions that now accept money from cannabis-related businesses potentially exposed to violations of federal law, including money laundering statutes. In 2019 Attorney General William Barr indicated he will not pursue cannabis businesses that are operating legally within their state jurisdiction. Insurers have no assurance that the Attorney General's comments extend to financial institutions engaging with cannabis businesses, nor, is there any guarantee that this policy extends beyond the tenure of the Attorney General who made the statement. Insurers must assess a business risk decision, including legal risks and financial implications, about whether they will provide services to the cannabis industry.

The federal judiciary has been more consistent in its interpretation of the CSA and related cannabis prohibitions. The U.S. Supreme Court, in its landmark 2005 Gonzales v. Raich opinion, reaffirmed the supremacy of the CSA over state legalization statutes. Since the Gonzales decision, the judiciary has upheld criminal prosecutions involving cannabis transactions, even where legalized at the state level. To date, the Supreme Court has not expressed a willingness to revisit the Gonzales decision. Similarly, lower federal courts have shown a reluctance to address the issue of state legalized cannabis.

In February 2018, a federal judge dismissed a lawsuit seeking to legalize cannabis under federal law. The plaintiffs in that suit argued that the CSA’s classification of cannabis as a Schedule I substance is unconstitutional and that the federal cannabis policies in the U.S. discriminate against minorities. In dismissing the suit, the judge found that the plaintiffs should first petition the DEA to ask that it be removed from the list of dangerous substances, as that agency, along with the FDA, oversees the classification and

33. Gonzales v. Raich, 545 U.S. 1 (2005).
scheduling of the drug. Given these judicial developments, state legalization of cannabis does not pose a bar to prosecution in the federal judiciary.³⁴

The legislative branch, however, has been ambivalent to state-legalized cannabis. In 2003, in the face of several states legalizing cannabis on some level, U.S. Rep. Maurice Hinchey (D-NY) brought an amendment to the House floor that would have prohibited the DOJ from expending funds to prosecute state-legalized medical cannabis operations.³⁵ While this amendment would ultimately fail by a 152-273 vote, by 2014 the amendment was revived by U.S. Rep. Dana Rohrabacher (R-CA) and had been included as an amendment to the 2014 omnibus spending bill.³⁶ Since the enactment of this amendment, Congress has reapproved it yearly in appropriations bills. Other legislative enactments, however, have seen less enthusiasm from Congress.

On June 7, 2018, U.S. Sen. Cory Gardner (R-CO) and U.S. Sen. Elizabeth Warren (D-MA) introduced the Strengthening the Tenth Amendment Through Entrusting States (STATES) Act (S. 3032 and H.R. 6043). The STATES Act was aimed at amending the CSA to exempt cannabis-related activities that were in accordance with state laws. It also sought to protect banks working with cannabis businesses and legalize at the federal level the cultivation of industrial hemp. As of June 2019, The STATES Act has been introduced this congressional session (S. 1028 and H.R. 2093).

In March 2019, the House Financial Services Committee voted in favor of advancing the SAFE Banking Act (H.R. 1595), which would allow cannabis businesses to work with banks and credit unions.³⁷ It would bar federal regulators from terminating a bank’s FDIC deposit insurance, a threat that prevents most banks from accepting cannabis businesses. One of the greatest obstacles of entry for admitted market insurers is the threat of felonious liability under federal law. The SAFE Banking Act would remove some of the direct conflict between state and federal law barriers for insurer and broker participation in the cannabis market. As of June 2019, H.R. 1595 has been discharged from the Judiciary Committee. The bill’s advancement is a significant step for the cannabis industry. With the bill’s passage, it is likely that more banks would open their doors to cannabis businesses. In turn, cannabis businesses would be able to operate as normal businesses. The regulatory landscape of the cannabis industry is evolving rapidly.

---

Thus, it’s critical to stay up-to-date on federal and state cannabis-related legislation. Doing so ensures the insurance industry’s underwriting risk assessment and client policy advisement reflects recently passed laws.

Recent developments on both the federal and state levels support the notion that as the commercial investment and scientific research intersect with changing public attitudes about cannabis usage, the risk management portfolio of firms on the supply side will expand to meet market needs. With passage of the new Farm Bill in 2018, Congress moved to fully legalize hemp,38 opening the way for broad distribution of CBD products and creating the first cannabis market insurers may find to be a much more palatable risk. The United States Department of Agriculture (USDA) also subsequently issued a memorandum on new hemp authorities.39

Driving demand is CBD, a non-psychoactive cannabinol that can be derived from hemp or cannabis. CBD is one of the substances in cannabis, but in hemp, it comes with no mind-altering effect from THC. Proponents say CBD helps relieve pain, anxiety, nausea and inflammation. Currently sold mostly online and in specialty shops, CBD can be found in oils, candies, capsules and even sparkling water. In June 2018, the FDA approved the first CBD-based medicine, Epidiolex, made by GW Pharmaceuticals to treat childhood epilepsy.

---

C. Federal Regulatory Level

At the federal regulatory level, state-legalized cannabis faces numerous challenges as individuals engaged in business in the cannabis industry attempt to navigate a host of complex federal regulatory regimes. While it is impossible to enumerate every point at which the cannabis industry interacts with federal regulatory regimes, some of these include banking, finance and insurance; securities; environmental protection; intellectual property; taxation; and agriculture, just to name a few.

D. Financial Services Sector

The first area of regulatory authority is in the financial services sector. As noted above, many of the criminal laws that are implicated by legalized cannabis are financially orientated, and lack of access to banking and financial services even in states where cannabis is legal is a significant issue. For example, in order to comply with the BSA, financial institutions must send Suspicious Activity Reports (SARs) to the Treasury Department when the institution is involved in a transaction involving funds over $5,000 that the institutions knows, or has reason to know, come from illegal sources, such as cannabis.40

Beyond mere compliance with federal criminal law, a host of other regulations complicate financial transactions involving legalized cannabis. For example, for financial institutions to be able to transmit funds electronically through the Federal Reserve’s electronic network, the institution must have a master account with the Federal Reserve. However, the Federal Reserve has been reluctant to provide master accounts to institutions that deal exclusively in legal cannabis due to the federal prohibition on cannabis, leaving such institutions without the ability to transmit money.41 There are exceptions such as Colorado, which has a limited scope and strict parameters, but it does have a Federal Reserve account. Even where cannabis businesses attempt to raise funds outside the ordinary banking system, federal regulations may pose a barrier. If a cannabis business seeks to raise capital through the issuance of securities, such securities must be registered by the U.S. Securities and Exchange Commission (SEC) unless the security falls within an exemption.42 It is unclear whether the SEC would approve such securities given the prohibited status of cannabis.

40. 31 CFR § 1020.320.
41. Fourth Corner Credit Union v. Federal Reserve Bank of Kansas City, 861 F.3d 1052 (10th Cir. 2017).
In response to these concerns, and in recognition of the Obama administration's
deprioritizing of criminal prosecution of cannabis-related businesses in cases where they
are otherwise compliant with the laws of the state in which they are operating, on
February 14, 2014, FinCEN issued its own guidance. This guidance was intended to
clarify how financial institutions can provide services to such businesses while remaining
compliant with their obligations under the BSA. It instructed financial institutions providing
such services—when they reasonably believed, based on their due diligence, that a given
business did not implicate the Cole Memorandum’s priorities or state law—to file a
“Marijuana Limited” SAR. Further, a financial institution that reasonably believed a
cannabis-related business was violating a Cole Memorandum priority or state law was
instead instructed to file a “Marijuana Priority” SAR, and FinCEN’s guidance set forth the
“red flags” that would suggest the business was engaged in such activity. Despite the
guidance issued by Attorney General Sessions in 2018, FinCEN has stated that the
structure set forth in its 2014 guidance remains in place. What FinCEN’s guidance did
not and could not do, however, was amend federal law or grant immunity to a financial
institution providing services to a cannabis-related business.

Despite FinCEN’s guidance, the number of financial institutions accepting this risk
dropped slightly in the months that immediately followed its issuance. It has, however,
grown steadily since then. According to FinCEN, by the end of March 2018, 411 banks
and credit unions were “actively” operating accounts for marijuana-related businesses.
States continue their attempts to navigate these murky waters between federal and state
law. By way of example, in 2014, Colorado passed a law that would allow the formation
of “cannabis credit co-ops.” These co-ops were to function similarly to a credit union and
had restrictions on the number of businesses they could serve. Despite the passage of
this bill, no co-ops have been formed under this law. Several other state initiatives have
been introduced since. On July 3, 2018, the New York State Department of Financial
Services published its own guidance to encourage banks and credit unions to offer
services to marijuana-related businesses licensed by the state and advised them to
continue to follow FinCEN’s 2014 guidance. Still, given the risk of not only losing their

43. Those subject to FinCEN’s regulations were still required to report currency transactions in connection with
marijuana-related business the same as they otherwise would.

Conference of State Legislators Legislative Summit, accessed at
charter but also the threat of facing criminal prosecution for a federal offense, many financial institutions have been hesitant to embrace the cannabis business.

E. Intellectual Property

The cannabis industry faces other complications related to federal regulation. One example of this is in the area of intellectual property. As the cannabis industry has become legitimized, many cannabis businesses such as growers, distributors, and retailers have sought to protect their intellectual property in brand names, business names and similar identifiers. However, the U.S. Patent and Trade Office (USPTO) has historically taken the position that trademarks cannot be granted to applications promoting or involving illegal conduct. To date, the USPTO has not approved any filings for trademarks or copyrights for products related to cannabis. Interestingly, however, the USPTO has approved trademarks for certain cannabis derivatives. Specifically, the USPTO has approved trademarks for specific types of CBD products. As noted above, these approvals stemmed from confusion as to whether CBD was illegal under the CSA. This confusion has since been resolved. However, the CBD trademarks are still valid and still exist. Thus, while the USPTO has seemed to take a straightforward approach to the registration of cannabis trademarks, there is still some inconsistency in how the USPTO previously handled such trademarks.

F. Environmental and Agricultural Regulations

One last area of interest worth noting is the cannabis industry’s interaction with environmental and agricultural regulations. Cannabis, after all, is an agricultural product, which gives rise to environmental concerns. There are two key areas of concern at the federal level in this regard: 1) the federal Clean Water Act (CWA); and 2) the provision of water rights from federally administered facilities. The CWA regulates, in part, the pollution generated by agriculture operations. However, the CWA relies, in large part, on federal-state cooperation. The CWA is largely implemented at the state level using federal funds and grant projects. Given the prohibited status of cannabis at the federal level, it is unclear whether such grants would be available to states for cannabis remediation projects. Indeed, state programs aimed at environmental cleanup and

partnership with the cannabis industry have been subject to federal raids and subpoenas.51

An additional agricultural concern arises regarding water rights and irrigation. In particular, regulatory complexities arise for cannabis growers in the western U.S., who must contend with the U.S. Bureau of Reclamation (USBR). The USBR is the largest wholesaler of water in the U.S. and provides one out of five western farmers with irrigation water.52 Because of the prohibited status of cannabis under the CSA, the USBR has issued guidance stating that it will not approve the use of its facilities for the cultivation of cannabis.53 As such, cannabis cultivators and growers may find it difficult to find the water sources necessary to support their growth operations.

G. Civil Level

At the civil level, the federal judiciary has created confusion as to civil obligations. This section will highlight two of significant importance: 1) the enforceability of contracts; and 2) the ability to declare bankruptcy. The enforceability of contracts brings questions on whether contracts involving cannabis transactions are void against public policy. Without guidance from the U.S. Supreme Court, lower courts have been left to address this issue as a matter of first impression.

In Tracy v. USAA Casualty Insurance Company, the District Court for the District of Hawaii was asked to determine whether a contract of insurance was enforceable against an insurer in order to provide coverage for legal cannabis plants that had been lost during a fire.54 The Court in that case determined that since cannabis is illegal under the CSA, the Court would decline enforcing the contract on the grounds that it was against public policy. As such, no coverage was available under the policy. The opposite conclusion was reached in the District Court for the District of Colorado. In Green Earth Wellness Center, LLC v. Atain Specialty Insurance Company, the Court was asked whether a policy of insurance could cover legal cannabis plants that were damaged due to a wildfire.55 In addressing the “void as against public policy” argument, the Court reasoned that over the years, the federal public policy had eroded; thus, there no longer existed a clear and consistent public policy against legalized cannabis. As such, the Court expressly declined to follow Tracy and found that the contract of insurance provided coverage for legal cannabis plants. While there appears to be a trend of courts following Green Earth as

opposed to Tracy, until there is a definitive ruling on this issue by the Supreme Court, the enforceability of contracts involving cannabis will still be a point of contention.

One last area of concern at the civil level is the ability of cannabis-related businesses to declare bankruptcy. The ability of a business to seek bankruptcy protection is essential to a business when operations prove unsuccessful. However, this tool may not be available to cannabis-related businesses. In the case In re: Arenas, the 10th Circuit Court of Appeals was asked to determine the availability of bankruptcy protections for cannabis growers.56 In that case, after litigation returned a negative verdict against the cannabis growers, the growers sought bankruptcy protection. The U.S. Trustee objected to the bankruptcy, and the bankruptcy court dismissed the petition due to the criminal nature of the business. The 10th Circuit affirmed the dismissal, reasoning that since the substantial assets of the estate were cannabis, and since cannabis was illegal under federal law, the U.S. Trustee could not administer the bankruptcy estate without violating federal law.57 As such, the Court ruled that dismissal of the bankruptcy was permissible. As with the enforceability of contracts, until guidance is provided by the Supreme Court, there will be uncertainty as to whether bankruptcy protections are available to cannabis-related businesses. In addition, different states have distinctive laws allowed in bankruptcies, such as a homestead exemption, so there are no general bankruptcy laws applicable to all states.

**H. McCarran-Ferguson Act**

One of the areas unique to insurance is how the federal laws affecting cannabis interact with the federal McCarran-Ferguson Act.58 The McCarran-Ferguson Act precludes federal law from preemption state law regarding the business of insurance unless the federal law specifically relates to the business of insurance. Arguments have been made that because the CSA does not specifically apply to the business of insurance, state laws governing cannabis insurance are not preempted; therefore, states are free to engage the cannabis insurance industry without concern of federal liability.59 However, the nuances of how federal cannabis laws interact with the federal McCarran-Ferguson Act have not been clearly explored, and uncertainty still exists in this regard.

While it is true that the CSA does not specifically relate to the business of insurance, this, in and of itself, does not save a state statute regulating cannabis insurance from

---

56. In re Arenas, 535 B.R. 845 (10th Cir. 2015).
57. See also, In re Rent-Rite Super Kegs West Ltd, 484 B.R. 799 (D. Colo. 2012) (Dismissing a Bankruptcy Petition Because Marijuana Remains Illegal Under the CSA).
preemption. While the fixing of rates, regulation of advertising of insurance policies, and the licensing of companies and their agents are clearly the business of insurance and, therefore, are not subject to preemption under the federal McCarran-Ferguson Act,\(^{60}\) other aspects of cannabis insurance regulation are not so clearly regulating the business of insurance as to prevent preemption. For example, the Supreme Court has held that priority provisions of state insolvency law, to the extent that they are attempting to provide for priority of payments beyond policyholders, are not saved from preemption under the federal McCarran-Ferguson Act.\(^{61}\) Thus, state insurance regulators may find that their authority to orderly liquidate an insurer may, to a greater or lesser extent, be preempted by the CSA.

Another example of where a state’s law may not be protected by the federal McCarran-Ferguson Act is in the field of corporate transactions. While the licensing of insurers is clearly protected by the federal McCarran-Ferguson Act, the Supreme Court has held that the SEC may unwind transactions that are in violation of federal securities law.\(^{62}\) Therefore, a state insurance regulator may approve a transaction involving a cannabis insurer only to see it unwound by the SEC on the grounds of illegality.

Putting aside the CSA, other federal laws directly affecting the cannabis insurance industry are clearly not protected by the federal McCarran-Ferguson Act. Specifically, the criminal statutes mentioned above (the BSA, the money laundering statutes and the unlicensed money transmitted statute) are all not subject to the anti-preemption provisions of the federal McCarran-Ferguson Act. This is because each of these laws specifically relates to the business of insurance. Each of these acts specifically defines financial institutions to include insurers\(^{63}\); therefore, on the statutes’ face, the anti-preemption provisions of the federal McCarran-Ferguson Act do not apply. As such, the federal government may enforce these criminal provisions against both the industry and potentially state insurance regulators. Indeed, courts that have been faced with the question of whether the federal McCarran-Ferguson Act bars prosecution under these statutes have found no such bar to exist.\(^{64}\)

Despite issues at the federal level, states recognize the additional revenue that could be generated by the sale of cannabis, and those that currently have this income stream are using it to fund projects they may not otherwise have been able to afford. For example, Colorado is using the first $40 million of tax revenue to fund school construction costs, and Nevada intends to earmark 40% of its wholesale tax to the state’s Distributive School

---

\(^{64}\) U.S. v. Blumeyer, 114 F.3d 758 (8th Cir. 1997); U.S. v. Cavin, 39 F.3d 1299 (5th Cir. 1994).
Account (DSA). Others intend to use the extra money to fund drug treatment and enforcement programs.  

The additional revenue, however, may not come without a cost. To balance public safety concerns with the rights of individual users, cities and towns are also beginning to regulate the use of medical and recreational cannabis. The myriad of local laws further complicates the landscape as evidenced by the attempt to summarize the specific policies for all 482 cities in the state of California. This summary serves to further illustrate the patchwork of laws and lack of uniformity with respect to this issue.

III. SEED-TO-SALE OPERATIONS—AN OVERVIEW AND ARCHITECTURE OF THE CANNABIS INDUSTRY

A. OVERVIEW

States have taken varying approaches to regulating the cannabis industry. While some states regulate medical and recreational cannabis separately, others have delegated authority to a single administrative agency. For example, Oregon has had a medical cannabis program since 1998 and a recreational program since 2016. The medical program is run by the Oregon Health Authority (OHA), which registers and regulates medical cannabis patients, medical cannabis growers, grow sites, processors, dispensaries and caregivers. OHA also promulgates cannabis testing rules. The recreational program is run by the Oregon Liquor Control Commission (OLCC), which licenses producers, wholesalers, processors, laboratories, retailers and researchers. The OLCC also issues permits for individual workers in the recreational cannabis industry.

In contrast, both medical and recreational cannabis in Colorado are regulated by the Colorado Department of Revenue (DOR). Medical cannabis was decriminalized through an amendment (Amendment 20) to the Colorado Constitution in 2000. Recreational cannabis was added in 2012 (Amendment 64).

Colorado and Oregon represent two versions—one separate and one unified—of the regulation of the cannabis industry. As cannabis remains illegal under federal law, individual states have, and increasingly are, legalizing parts of the cannabis industry and setting up regulatory structures unique to their respective states. It can be anticipated that

---

as these regulatory structures mature, there will be increased emphasis on unification and coordination to avoid regulatory pressure points caused by differing legal and regulatory schemes.

B. Cultivation

The cannabis cultivation component of the industry has developed along two paths: 1) a “cottage” industry of small-scale craft cultivation (i.e., cultivation for home and/or personal use); 2) and the development of large-scale producers engaged in cannabis as a commercial crop. There are further subdivisions between recreational and medicinal cannabis.

States typically allow residents to grow a limited number of home-grown cannabis plants for personal use, while registered medical and recreational cannabis caregivers can produce in greater quantities. Registered medical cannabis producers are often required by states to be vertically integrated in some way with the rest of the supply chain. For example, registered growers in Oregon must be designated by a patient to produce cannabis on their behalf. The patient may designate themselves or another person as their grower. There are 16,600 registered growers who are producing at 13,959 grow sites.

In Colorado, medical cannabis caregivers who cultivate more than 36 plants must register with the Colorado Department of Public Health and Environment and disclose: 1) the location of each cultivation; 2) the cannabis registration identification number for each patient they serve; and 3) any extended plant count numbers (patients with physician recommendations exceeding six plants and their patient registry numbers). As of December 2018, caregiver cultivation registrations numbered 1,963.

Medical marijuana cultivators (“optional premises cultivation” (OPC) or “grow” operations) in Colorado must be vertically integrated or associated with a licensed medical marijuana center (a business that sells medical cannabis to patients or primary caregivers, but is not, itself, a primary caregiver) or a licensed manufacturer who creates products infused

67. Oregon residents are allowed up to four homegrown plants per residence. (ORS 475B.301) Colorado home grow laws allow no more than 12 plants in any residence. Counties and municipalities may have stricter laws in place. The plants must be kept in an enclosed, locked space and inaccessible to anyone under 21 years of age living in or outside of the residence. (Colorado Marijuana Official State Web Portal: www.colorado.gov/pacific/marijuana/home-grow-laws.

With medical cannabis intended for use/consumption other than by smoking.\textsuperscript{70} There were 673 licensed medical cannabis cultivation entities in Colorado in January 2019.\textsuperscript{71}

In contrast to the medical cannabis grow operations, the recreational side shows significantly larger-scale operations. In Oregon, there are 1,108 licensed recreational producers who participate in some aspect of producing, cultivating, growing and drying cannabis. In Colorado, there were 735 recreational cultivation entities in January 2019. Although there was a similar number of medicinal cultivation entities, the monthly average ratio of cannabis plants cultivated as of June 30, 2018, was almost 3:1 recreational over medicinal.\textsuperscript{72}

There are often more stringent limits on the amount of medical cannabis that can be produced as compared to the limits for recreational cannabis. For example, in Oregon, the largest non-grandfathered medical-only producer is limited to 48 mature plants.\textsuperscript{73} On the other hand, the largest-tier outdoor recreational producer is not limited by the number of plants and can produce on as much as 40,000 square feet of land.\textsuperscript{74} In Colorado, recreational cannabis cultivators can grow up to 1,800 plants at a time (Tier 1), and after one harvest season of sales, may seek authorization to grow more plants at progressive increments up to the tier in excess of 13,800 plants (Tier 5).\textsuperscript{75}

\section*{C. Distribution, Manufacturing and Delivery/Transportation}

States have taken varying approaches to licensing the distribution, manufacturing and transportation of cannabis products. In Oregon, wholesalers purchase cannabis from licensed producers (cultivators). They may dry, trim, arrange for lab testing, package, store and deliver cannabis to retailers. There are 139 licensed wholesalers in Oregon.\textsuperscript{76} Processors extract oils from cannabis plants and package them into vaporizers or vaporizer cartridges. Processors may also produce cannabinoid extracts and bulk oil used for manufacturing edibles or topical products. Edible manufacturers are required to obtain

\end{itemize}
a processor license. There are 204 licensed processors in Oregon, with three registered processors in the medical cannabis program.77,78

Colorado’s regulatory system is different in that a cultivation facility is licensed to cultivate, prepare and package recreational cannabis and sell it to retail stores, product manufacturing facilities or other retail cultivation facilities. Consequently, Colorado does not have a wholesaler category. However, it does have separate categorizations for medicinal and recreational manufacturers who concentrate and make products for consumption other than by smoking, including edibles, ointments and tinctures.79 There are 239 medical infused product manufacturers and 282 recreational product manufacturing facilities in Colorado as of January 2, 2019.80

In Oregon, an entity must be a licensed producer, wholesaler, processor, laboratory or retailer in order to transport cannabis. Wholesalers may provide transportation services to other licensees throughout the supply chain. Colorado’s structure provides for licensure of a transporter. A medical cannabis transporter is a person or business that transports medical cannabis from one business to another and may include the provision of logistics, distribution and storage of medical cannabis and manufactured medical cannabis products. There are 10 medical cannabis transporters licensed in Colorado. On the recreational side, there are 13 transporters licensed in Colorado.81

D. Retail and Consumers

Retailers sell items directly to consumers. Medical cannabis dispensaries receive cannabis, immature cannabis plants or cannabis products and transfer them to a patient or a patient’s caregiver. There are approximately five registered dispensaries in Oregon. Retailers are responsible for verifying the age of every customer for every purchase. Retailers may sell usable cannabis, cannabinoid products, cannabinoid extract or concentrate, immature plants, and cannabis seeds. There are 598 licensed recreational

cannabis retailers in Oregon\textsuperscript{82} and approximately 620 licensed cannabis retailers in California\textsuperscript{83}

In Colorado, as of November 1, 2018, there are 477 distinct licensed medical cannabis centers; of those, there are 413 unique licensees. There are 547 distinct licenses held for recreational retail stores; of those, there are 457 unique licensees.\textsuperscript{84} There are several products available to the consumer, which fall under the flower and non-flower categories. In Oregon, cannabis flower represented 54.4\% of recreational sales in 2018, followed by concentrate/extract at 29.4\% and edible products at 10.3\%. All other products represent roughly 6\% of sales.

The flower also holds most of the market share in Colorado at 54.1\% of recreational and 61.2\% of medicinal use.\textsuperscript{85} In 2015, the non-flower products were about 25\% of total sales. In 2017, the non-flower products sales jumped to 37.7\% of the regulated market. The non-flower products include concentrate, edibles and non-edibles.

\begin{table}[h]

\hline
State & Flower & Extract/Concentrate & Edibles \\
\hline
OR (2018) & 54.4\% & 29.4\% & 10.3\% \\
\hline
CO (2017) & 54.1\% & 23.4\% & 13.4\% \\
\hline
\end{tabular}
\caption{Recreational Sales by Type of Product}
\end{table}

E. Testing

Testing is an important regulatory component in the cannabis supply chain. States that have legalized the use of cannabis generally require that product be tested by a lab before distribution to a dispensary and sale to the consumer. Labs use a variety of testing methods based on different products (oils, shatter, wax, edibles, topical products, etc.) in

\textsuperscript{82} Oregon Liquor Control Commission, November 2018. For current data, visit www.oregon.gov/olcc/marijuana/Documents/mj_app_stats_by_county.pdf.

order to determine potency—the amount of THC, CBD and pesticide concentrations in the product. However, the testing and methodologies have not developed standardized metrics or methods, which leave these aspects open for future research.

All cannabis products in Oregon are required to be tested by a licensed laboratory before being sold to consumers. Laboratories test for contaminants, pesticides, solvents and potency. There are 23 licensed laboratories in Oregon. In Colorado, under both the recreational and medical cannabis laws, regulated cannabis must be tested in five categories: 1) microbials (bacteria and fungi); 2) mycotoxins (toxins produced by fungi); 3) residual solvents; 4) pesticides; and 5) potency. Licensed retail entities must submit samples of recreational cannabis and recreational cannabis products to a licensed testing facility for testing in the five categories. All medical cannabis products must be labeled with a list of all chemical additives that were used in the cultivation and production of a medical cannabis product. Persons holding a retail testing license may not have an interest in any other cannabis license, either recreational or medical. Currently, there are 11 each of testing facilities for medical and recreational cannabis in Colorado.

**F. Tracking**

Oregon and Colorado have several risk management requirements for cannabis-related businesses. Participants in the recreational and medical cannabis industries must use state-administered systems to track inventories throughout the production, processing, transportation, sale and testing of cannabis. Every plant is assigned a unique code and tracked through the supply chain in order to allow for more effective audits, to satisfy federal guidelines and to allow for product recalls when consumer safety issues are present.

**G. Security**

Most states require individuals who work in the cannabis industry to obtain some sort of license. The scope of the licensing laws may vary. For example, all employees who perform work on behalf of an Oregon licensed producer, processor, wholesaler or retailer—including, but not limited to, individuals who participate in the possession, securing, or selling of cannabis items—are required to possess a valid cannabis worker permit. In Colorado, all individuals who own or work for a licensed cannabis business

---

must pass a fingerprint-based criminal history background check and demonstrate Colorado residency and financial responsibility. Cannabis businesses must also document their funding sources and ownership structure.

In Colorado and Oregon, all entities in the cannabis supply chain are required to implement certain security precautions, including:

- Video cameras that produce 24/7 high-quality, non-light dependent recordings of all areas where cannabis items are present.
- Armed alarm systems.
- Panic buttons or the equivalent to call for emergency services.
- The ability to lock and secure cannabis items at all times.

H. Existing Economic Impacts

The cannabis industry provides a significant source of jobs and tax revenue in states where it has been legalized. The market is characterized by steady growth. In jurisdictions where recreational cannabis was legalized after the legalization of medical cannabis, recreational production and sales have overtaken the medical side to be the dominant force in the market.

The legalization of cannabis provides employment opportunities directly within the cannabis industry, such as retail stores, dispensaries, cultivation, infused product manufacturing, transportation and laboratory testing. Additional ancillary jobs include security guards, construction and HVAC specialists, consulting, legal, and other business services. In Colorado, as of Nov. 1, 2018, there are 41,429 individuals licensed in the cannabis industry.99 There are 36,228 individuals licensed to work in Oregon.90 Considering worker turnover, economists estimate that about 12,500 individuals are employed at any one time.91

States realize a significant increase in tax revenues from the sale of cannabis. For example, Colorado’s revenues from excise and sales tax increased 91.1% from 2014 to

In Oregon, $82 million in cannabis tax dollars were collected in FY 2018. This represents a 17% increase from FY 2017. Recreational cannabis tax revenue is expected to increase by another 34% by the 2019–2021 biennium. Since recreational cannabis became legal in Oregon in 2016, sales have steadily increased. Consumer sales in July 2018 were approximately $57.5 million, approximately 20% higher than the consumer sales in July 2017. Sales of all types of products—including edibles, extracts and usable cannabis—have steadily increased.

---

96. Ibid.
In contrast, the number of medical cannabis growers, processors and dispensaries has declined sharply since 2016, when recreational cannabis was legalized in Oregon.\(^{97}\) There has been a significant amount of consolidation in the industry, which has led to frequent ownership changes and continuous business structure modifications.\(^{98}\)

Nationwide, the *NAMIC Issue Analysis* cites information from the *Marijuana Business Daily* in May 2017 that estimated demand for recreational cannabis approaches $45 billion to $50 billion compared to $106 billion for beer, $76.9 billion for cigarettes and $70.3 billion for nutraceuticals.\(^{99}\) Moreover, the *NAMIC Issue Analysis* summarizes:

> In 2017, the legal medical and adult-use market reached $8.5 billion, according to the “State of Legal Marijuana Markets” executive report. The same report projects that the U.S. Cannabis market will reach $23.4 billion by 2022. Another report even likened the industry’s 25 percent compound growth rate through 2021 to cable television at 19 percent in the 1990s and broadband internet at 29 percent in the 2000s. Other reports project the industry would reach as much as $50 billion by 2026 if marijuana were legalized at the federal level. In addition, medical and adult use retail cannabis tax revenues

---

97. From October 2015 to October 2018, the number of growers dropped from 48,699 to 16,600. From October 2016 to October 2018, the number of processing sites dropped from 117 to three, and the number of dispensaries dropped from 46 to five. Oregon Health Authority, October 2015, 2016 and 2018. *Oregon Medical Marijuana Program Statistical Snapshot*, accessed at [www.oregon.gov/oha/PH/DISEASESCONDITIONS/CHRONICDISEASE/MEDICALMARIJUANAPROGRAM/Pages/data.aspx](http://www.oregon.gov/oha/PH/DISEASESCONDITIONS/CHRONICDISEASE/MEDICALMARIJUANAPROGRAM/Pages/data.aspx).

tipped $645 million in 2017 and are expected to hit $2.3 billion in 2020.\textsuperscript{100}

IV. TYPE, SCOPE, AND AVAILABILITY OF COVERAGE AND INSURANCE GAPS

A. INTRODUCTION

The cannabis industry can be broken down into multiple segments. This includes cultivation, processors/harvesters, manufacturing, retail distribution, testing labs, and microbusinesses or affiliated businesses (e.g., construction, security, cargo/transportation companies). While each of these segments is unique and require insurance products specific to their type of business, there are coverages that apply to all the business segments. These coverages include, but are not limited to, general liability, workers’ compensation, product liability, and property insurance.

There are a few admitted insurers issuing policies in the cannabis industry, and they are treating cannabis businesses as “regular” businesses despite the federal illegality of the product. One exception to this statement is workers’ compensation. Some states—including Colorado, Oregon and California—include a workers’ compensation market of last resort through a state-admitted carrier for this coverage. However, most other available insurance products for the cannabis industry are currently insured through the non-admitted (surplus lines) market.

The primary challenge in engaging admitted insurers in many states to write any coverage type is the requirement of a “lawful purpose.” Under general law, any contract or agreement entered for an illegal purpose is not legally binding. Because cannabis continues to be illegal at the federal level, the argument is made that there can be no legal contract or insurance policy. There are legislative efforts underway at both the federal and state level to address this conundrum of legality in a state and illegality at the federal level.\textsuperscript{101}

Moving toward an admitted market for cannabis business insurance is a key objective for states that have legalized. This is a rapidly changing area with businesses seeking admitted coverage but only able to find coverage in the non-admitted market. As the

\textsuperscript{101} See discussion at p. 24.
cannabis industry develops, their insurance needs become more sophisticated and differentiated.

The chart below is intended to provide examples on the needs of the industry ranging from general coverages anticipated for all cannabis businesses to those more specialized for various business segments, such as testing labs.

B. How Insurers Determine Cannabis Rates

The cannabis insurance market is presently expanding with insurers emerging onto the admitted market. These insurers are submitting rate filings for regulated products, which allows state insurance regulators to gain insights into the types of coverages and design ratemaking approaches with respect to the coverage filings. Preliminary reviews of recent admitted-market filings suggest that policies and coverages offered to cannabis-oriented operations are similar to those provided to other non-cannabis businesses, including various limit and deductible options that are routinely offered in the commercial insurance marketplace. As the cannabis insurance market continues to grow the types of coverage and options do as well.

a. General Observations Regarding Cannabis Insurance Rates

Optional coverages such as earthquake, terrorism and sprinkler leakage are generally available at an additional premium to insureds who elect these coverages. Both rates and minimum premiums can vary on the basis of the nature of the risk (e.g., the classification of the insured as a store, dispensary, grower, warehouse, distributor, and whether the insured grows the product solely for its own use or for sale to other businesses) and the territory (as defined by the insurer in its rating plan). Possible segments include, but are not necessarily limited to, the following: 1) store/dispensary; 2) indoor cultivation; 3) outdoor cultivation; and 4) manufacturing/processing.

Exposure bases for loss costs can be either sales or payroll, as appropriate, based on the coverage and the business operations. For multiplicative increased-limits factors (ILFs), lower factors apply to lower limits of coverage; higher factors apply to higher limits. Claims-made policies are available, with options to choose retroactive dates and extended reporting periods. The further back the retroactive date is in the past, the larger the premium. Premiums for extended reporting periods are determined as percentages of the annual premium.
Schedule rating is often available to adjust the manual rates up to +/-25%, and in infrequent cases up to +/- 40% (also depending on allowable schedule-rating constraints pursuant to the laws of individual states). Some cannabis-specific characteristics that some insurers use in schedule rating include: 1) number and type of cannabis licenses; 2) depth of experience in cannabis operations; and 3) the use of blockchain, including Hyperledger, technology in processing, distribution and retail transactions.

Some rates may be premised on certain packages of coverages being mandatory. For instance, some insurers may require a package of general liability and property coverages to be purchased together, while other coverages—e.g., product liability, crime, earthquake, sprinkler leakage or terrorism—may be optional.

Package discounts for property and liability coverages together may be available, along with multi-policy credits. Rates may be affected by the owner's years of experience and financial position. New ventures may be significantly surcharged, as may inexperienced business owners or insureds with prior bankruptcies.

Rates may also depend on the following attributes: 1) presence of video surveillance; 2) use of locked display/storage cases; 3) use of flammable solvents, tinctures and/or hash oil; 4) local surroundings, including traffic volume and proximity to police services; and 5) the selection and training of employees. Rates may also be premised on the business complying with certain requirements, such as background checks on employees.

b. Businessowners’ Policy (BOP) Programs

Classification relativities for various businesses are often derived from existing proxy classifications. For instance, some insurers have noted the following similarities in their filed rating plans:

- Distributors have similarities to warehouses and wholesale businesses, such as baked goods, tobacco, and grocery.
- Testing labs have similarities to businesses specializing in scientific tools and instruments and dental labs.
- Dispensaries have similarities to other retail stores, such as drug stores and tobacco stores.
- Manufacturers have similarities to other small business operation/manufacturing exposures, such as bakeries (no restaurant) and beverage stores (no liquor).
c. Commercial General Liability (CGL) Insurance

Many CGL exposures can be rated with gross sales as the exposure base. However, certain classifications pertaining to transportation and/or distribution may be rated based on payroll, while classifications pertaining to subcontracted work may be rated based on the cost of that work. Within a schedule-rating plan, underwriters may consider such criteria of individual risks as: 1) the experience of the management; 2) internal controls; 3) structural features and condition of the building; 4) compliance with safety protocols; 5) types of equipment; and 6) the selection, training and experience of employees.

Loss costs for liability coverages and related endorsements are affected by:

- Applicable limitations on territories.
- Requirements for persons on premises to be escorted by employees.
- Hours of operation.
- Customer age restrictions.
- Type of exit packaging.
- Advertising injury liability, which is affected by restrictions on marketing to youthful persons.
- Requirements for security guards and protective devices. For instance, rates may be affected by: 1) employing state-certified security guards; 2) whether they are employees or subcontractors; and 3) whether they are armed or unarmed.

d. Premises/Operations Coverage

Premises or operations coverage can be rated by area of building. Possible hybrid exposure bases would be the square footage if the building area is smaller and gross sales if the building area is larger. Deductibles per occurrence are often available. The potential for inhalation/exposure liability is likely to be higher than for other typical properties and would be reflected in rates accordingly.

e. Products/Completed Operations Coverage

For products or completed operations coverage, gross sales are a possible exposure base. Rates vary by type of operation; e.g., medical dispensaries may be charged different rates from retail stores. Deductibles per occurrence are often available. There may be a default deductible, and further discounts could apply for the selection of higher deductibles.
f. Optional Coverages for Businessowners’ and/or Commercial General Liability Programs

In exchange for additional premiums, the following optional coverages may be available:

- Coverage for risks arising from employment of security guards (rated based on payroll/cost of security guards).
- Hired and non-owned automobile coverage (may be available for flat additional premiums).
- Assault and battery coverage (premium for various sublimits may be calculated as a percentage of the main commercial general liability coverage premium, with variation based on whether defense coverage is within or outside the policy limits).
- Terrorism (federal Terrorism Risk Insurance Act [TRIA]) coverage (premium may be calculated as a percentage of the main commercial general liability coverage premium).
- Waiver of subrogation (may be available for flat additional premium).
- Product withdrawal expense coverage (may be available for flat premium charges, based on the limit of coverage, with deductibles per occurrence set as dollar amounts and/or percentages of the limit of coverage).
- Special event coverage, which may be considered short-term coverage for which premium is fully earned. Premiums may vary depending on the type of event and may be proportional to the duration of the special event in days. Special events may include trade shows, fairs and music festivals. Rates vary based on the perceived level of hazard, which may be categorized as low, moderate or high. Event history, on-site security and limitations on consumer access are all factors taken into consideration.

g. Crime Insurance

Coverages for employee dishonesty, money and securities, and counterfeit money are highly affected by the current cash nature of the business. Rating is highly variable accordingly, with the potential for high premiums to be set. Several large brokerages have represented that the theft hazard is the most significant among the risks faced by cannabis-related businesses today.
h. Crop Insurance

Crop insurance availability is a significant issue because federal crop insurance is not offered for cannabis crops. Private crop insurance for cannabis-related operations is also virtually impossible to secure. Insurers do not wish to cover any product that crosses state lines, due to fear of federal involvement. Accordingly, information regarding rates for crop insurance for cannabis is extremely limited.

i. Earthquake/Volcanic Eruption/Sprinkler Leakage Insurance

Coverages pertaining to the perils of earthquake or volcanic eruption can be purchased via an endorsement to a commercial property policy. Rates are often developed per dollar amount of insured exposure.

j. Lessor’s Risk Insurance

Special rates for lessor’s risk insurance are often applicable if the cannabis occupancy is more than a certain threshold of the property (e.g., more than 25%). Otherwise, the exposure is just rated on the standard policy. Rating appears to follow the approach used in insurers’ standard lessors’ risk programs. Cannabis factors are higher than for regular mercantile operations, ranging from +80% to +200% over standard mercantile rates. Categories include dispensaries, retail, medicinal, labs, product manufacturer, infused products, oil extraction and cultivation/grower. Additional schedule rating may apply to manual rates, with +/-25% maximum schedule-rated credits or debits.

k. Medical Professional Liability (Medical Malpractice) Insurance

Many traditional medical professional liability policies may exclude liability for recommended prescription of controlled substances. Accordingly, practitioners who prescribe or recommend medical cannabis to patients may seek special coverage limited to liability losses arising from prescription, recommendation or failure to prescribe or recommend medical cannabis. Coverage limits for such policies resemble those of traditional medical professional liability policies; the base limit is often $1 million per occurrence/$3 million annual aggregate. Rates are derived based on traditional medical professional liability policies in a given jurisdiction. Base-rate adjustments reflect a focus

---

102. The DEA Practitioner’s manual indicates that all drugs listed in Schedule I have no currently accepted medical use in treatment in the United States and therefore may not be prescribed, administered, or dispensed for medical use,” some states are using the terms “prescribe” or “prescription” rather than “recommend” or “recommendation” in their statutes with respect to cannabis. Therefore, both terms “prescribe” or “prescription” and “recommend” or “recommendation” are used in this section. See https://www.deadiversion.usdoj.gov/pubs/manuals/pract/section2.htm
on claims arising from medical cannabis. Otherwise, classification plans may follow those filed for traditional medical professional liability insurance products.

An insurer’s actuaries may estimate, often with historical data as a reference where available (although such historical data may be sparse), the proportion of medical cannabis-related losses to total medical professional liability losses and adjust the loss costs implied in the traditional medical professional liability policy rates accordingly. Afterward, the loss costs could be adjusted by a typically multiplicative load to reflect the insurer’s expenses and targeted profit provision. It is possible that data related to frequency and severity of medication errors could be used as a proxy for data related to medical cannabis-related losses. This could result in a conservative estimate of loss costs because medication errors are a broader category.

I. Product Liability

The available programs for product liability insurance are often on a claims-made basis. Loss costs may vary between “producer” and “retail” classes. Producers include cultivators, growers and manufacturers, while the retail class includes distributors. Cultivator-only licensees receive a discount (sometimes substantial) from general producer rates.

Rating factors can relate to:

- Compliance with testing protocols.
- Operational maturity of the business.
- Management experience in the industry.
- Presence of a compliance officer.
- Compliance with packaging standards.
- Counterfeit products.
- Cleanliness of water supply.
- Location of suppliers.
- Use of petroleum gases during the extraction process.
- Existence of prior product recalls or regulatory infractions.
- Existence and quality of documentation of standard operating protocols.
- Whether the product needs to be applied topically or is vaporized.
m. Property Insurance

Premiums for property insurance may vary by type of covered property and the coverages purchased; e.g., building, business personal property, stock, business income/extra expense. Some insurers may require insureds who wish to purchase property coverage to also purchase general liability coverage. The insured may have an option to include or exclude coverage resulting from the peril of theft. Premium, including the minimum premium, may vary based on that selection.

Rates may be set proportionally to the insured value of the property. For plants before harvest, coverage limits may be set per plant and may vary based on the developmental stage of the plant; e.g., cloned/pre-vegetative, vegetative, pre-flowering, and flowering. For harvested plants, coverage limits may be set up to a fixed dollar amount per unit of weight (e.g., per pound). Coverage may also be available for the replacement cost of unplanted seeds. Additional property coverages may be purchased for: 1) money and securities; 2) accounts receivable; 3) personal effects; 4) valuable papers; 5) property of others; 6) signs; 7) tenant glass; 8) robbery and safe burglary; and 9) loss arising from employee dishonesty.

Loss costs for property coverages and related endorsements are often affected by the following considerations:

- Applicable limitations on territories where owned property is located; e.g., no out-of-state coverage.
- Ordinances/laws requiring cannabis businesses to make improvements to properties.
- Theft exclusions.
- Natural disasters, which could affect business interruption/loss of income coverages.
- Legal requirements applicable to tracking of inventory.
- Exposure to fungus.

n. Surety Bonds

The rating structure for surety bonds may use multiple tiers, determined based on such characteristics as commercial credit score, business experience, risk-management programs and prior regulatory actions. Rates may range between 2% to 10% of the bond amount, depending on tier. Additional schedule rating with variation up to +/-25% is available, with some insurers selecting a narrower range of variation in schedule-rated credits and debits.
C. Gaps in Coverage

Cannabis insurance is still relatively new to both the surplus and admitted market and the cannabis industry is constantly evolving and changing. With regulations and new laws being implemented at the federal, state, and local levels the way that the cannabis industry cultivates, manufactures, distributes, sells, and is consumed changes daily. The adequacy of coverage can change substantially in a short amount of time. For example, the price of cannabis can increase and decrease quickly and change for different regional areas. Therefore, a sufficient level of loss protection for the asset of cannabis will change. The quantitative measurement in the adequacy of coverage is in constant change especially with the cannabis industry evolving with innovation. For example, new strains of cannabis are being cultivated and new technology for vape pens for ease and increased consumption are emerging at a rapid pace. With new products emerging daily, it’s difficult for insurers to not only assess the risk; but, also provide policies that meet the cannabis industry’s needs. In addition, insurers are looking for data to determine the risk associated with cannabis to fill the gaps in coverage. But, with little to no data in areas such as drug-free workplace standard procedures or auto insurers impacted by the current inability to test for cannabis intoxication of drivers, insurers are finding it difficult to fulfill all insurance coverage needs in the cannabis industry. The lack of data creates an unknown which in turn creates gaps. It is difficult for insurance to keep up with the demands of such a bourgeoning industry.

V. BEST PRACTICES AND RECOMMENDATIONS

A. EDUCATION, OUTREACH AND PUBLIC COMMUNICATION

Understanding the various facets of the cannabis industry is critical to learning about its insurance needs. Educational site visits to the different types of cannabis business operations (such as cultivation sites, manufacturing companies, distribution companies, testing labs and retail operations) should help state insurance regulators understand how the cannabis products are regulated on a state and local level. They will also assist in identifying where the areas of risk are decreased/increased throughout the supply chain.

Another educational avenue available to most regulators is reaching out to the cannabis industry trade associations, such as the National Cannabis Industry Association (NCIA), or a state trade association, such as the California Cannabis Industry Association (CCIA) as well as insurance trade associations. Many of the cannabis trade associations have insurance subgroups that meet and discuss matters related to the topics of insurance availability, gaps and emerging trends in the cannabis insurance space. Insurance trade
associations are able to identify and work with their individual insurer members to encourage writing cannabis insurance products. Reaching out to both the cannabis and insurance trade associations is a helpful way to begin a dialogue about the importance of cannabis insurance and the presence of the state insurance regulator.

State insurance regulator participation in various outreach events is another option to learn more about the cannabis industry and teach the cannabis industry about insurance. Interacting with other state insurance regulators and stakeholders at conferences, workshops and meetings can also be beneficial. Doing so provides information on how the cannabis insurance intersects with other state insurance departments and entities, such as state cannabis licensing agencies. It also allows for more information on the various supply chain risks.

B. Dedicated Internal Infrastructure and Resources

State insurance departments should have a web page or outreach materials dedicated to providing information and answering commonly asked questions regarding cannabis insurance coverage. In addition to a web page, it is advisable to have an in-house subject-matter expert (SME) on the issue of cannabis insurance. This expert can help bridge the gaps between state insurance department staff, the cannabis industry and the insurance industry. At a minimum, each insurance department should have a point of contact to guide interested parties in reaching the appropriate department staff. Additionally, departments should identify an internal team across the department to ensure all critical players of the process are engaged and understand the various issues or goals. This also helps to streamline needed answers or resources to insurers interested in writing cannabis insurance.

C. Monitoring the Market and Gap Analysis

As the degree to which insurers are meeting the coverage needs of cannabis businesses continues to evolve, it would be useful for regulators and policy makers to have up to date information on the types of coverages available in each state and gaps in the market. State insurance departments could survey carriers and producers on the types of policies available in their state, and this information could be aggregated and posted on the NAIC website.

D. California’s Path to Approving Admitted Carriers

California was the first state to approve admitted insurance carriers for cannabis-based businesses in the cannabis industry. Through education and outreach the California
Department of Insurance (CDI) laid the groundwork for cannabis insurance on the admitted market. As of the publication of this white paper, the CDI had approved six carriers. It launched the Cannabis Insurance Initiative (Initiative) in 2017 in anticipation of the insurance industry's role in the legalization of cannabis for adult recreational use, which took effect on January 1, 2018 with the passage of Proposition 64. The first phase of the Initiative focused on education and outreach in order to develop the CDI and insurers' understanding of the cannabis industry. The goal was to ensure the availability of insurance products for the cannabis industry by identifying challenges, opportunities, and solutions.

The CDI encouraged insurers to write on the admitted market by bringing them together in a meeting with leaders in the cannabis industry. The meeting focused on educating insurers about the cannabis industry and its insurance needs. The cannabis industry discussed issues they faced with finding and obtaining insurance. Insurers were able to ask questions and have an open discussion.

Subsequently, the insurer meeting participants were invited to a tour of an indoor grow, dispensary and manufacturing facility in San Jose, California. This allowed insurers to witness first-hand the sophistication, risk management, regulatory oversight, professionalism and transparency of the cannabis industry and the opportunities for the insurance industry. This further allowed the insurance industry to gain a better understanding of the cannabis industry and its insurance needs, while addressing questions and concerns.

The CDI continued educational efforts to bridge the gap between the cannabis and insurance industries on a larger stage by hosting a public hearing in Los Angeles, California in October 2017. The hearing was co-hosted by the California Cannabis Industry Association (CCIA) and the LA Cannabis Task Force. Hundreds of participants attended to hear cannabis businesses and the insurance industry provide their respective perspectives on cannabis insurance gaps. The public hearing revealed that while there was some insurance availability from surplus lines insurers, insurance was limited in scope and the California market would benefit from the entrance of admitted commercial carriers.

In addition to education and outreach efforts, CDI implemented operational procedures within the department to facilitate approval of admitted insurers for the cannabis industry. An in-house cannabis insurance SME was designated to lead the Initiative and serve as the primary point of contact to stakeholders. An internal cross-departmental team, which included rate filing and legal staff, also served respective roles to reach the goal of product availability. A website with key resources and contacts for the Initiative was launched.
Through these resources, interested stakeholders and insurers can immediately identify an entry point to the CDI on cannabis insurance, as well as educational materials and upcoming events.

These efforts by the CDI led to the filing and approval of the first admitted commercial insurance company to offer coverage to cannabis business owners in November 2017. This was just months away from the January 1, 2018 legalization of adult cannabis use. Golden Bear Insurance Company was the first insurance company in California to write insurance on the admitted market.

Since the first filing and approval, five additional admitted market insurance companies have followed suit. Additionally, in 2018, the American Association of Insurance Services (AAIS) designed the new Cannabis Business Owners Policy (CannaBOP) for cannabis dispensaries, storage facilities, processors, manufacturers, distributors, and other cannabis-related businesses operating in the state. CannaBOP is the first-of-its-kind standardized cannabis policy form that was approved by CDI.

**E. Industry Trends and Policy Engagement**

Given federal laws, such as the CSA and Banking Secrecy Act/Anti-Money Laundering Law, various industries (including insurance) are hesitant to engage in the cannabis supply chain. They fear exposure to criminal or civil liability. Policy changes at the federal level could play a critical role in encouraging more admitted insurers to write cannabis insurance.

Despite existing laws that may deter regulators, there has been an increase in federal legislative efforts to provide states greater regulatory authority over cannabis businesses without federal interference. Currently, the Rohrabacher-Blumenauer amendment, which prevents the DOJ from spending funds on prosecuting cannabis businesses in states that have medical cannabis laws, was extended through a federal spending bill. As mentioned above, the STATES Act, if passed, would allow states to regulate cannabis without federal interference.

However, as the cannabis industry continues to expand, there is a degree of uncertainty under President Trump and his administration. Former Attorney General Sessions had a longstanding public opposition toward the cannabis industry and actively removed

---

protections. Recently appointed Attorney General Barr has indicated that he will not go after states that have legalized cannabis.¹⁰⁴

Many operators in the cannabis industry are willing to move forward despite these actions; but, such activities at the federal level also worried others outside of the cannabis space about the industry’s stability. President Trump repudiated former Attorney General Sessions’ rescission of the Cole Memorandum based on a request from U.S. Sen. Cory Gardner (R-CO), but the rescission nonetheless influenced business decisions such as offering insurance to the industry.¹⁰⁵ The change in the attorney general presents a new opportunity for the DOJ to clarify the administration’s position on state-legalized cannabis. However, it is too soon to tell what Attorney General Barr’s priorities will be with respect to the cannabis industry other than his public statements that he will not pursue state-legalized cannabis businesses.

With new regulations, rising consumer demands and the market landscape constantly changing, the cannabis business is booming and needs insurance protections in the cannabis industry. As such, state insurance regulators should follow the legislative landscape and impacts related to the cannabis industry. Policy changes at the federal level may influence the readiness of admitted insurers to write cannabis insurance. Thus, knowledge of the environment may guide insurance departments in their preparation for potential filings.

Collaboration with federal, state, and local entities may also serve to address barriers that prohibit access to insurance protection for cannabis business owners. With the deep knowledge of insurance issues, state insurance regulators can and should contribute their subject matter expertise and perspectives in these public policy discussions. Federal, state, and local entities may find it helpful to identify staff to address specific departmental and outreach needs. Additionally, state insurance regulators may sponsor legislation related to cannabis insurance. They may also further engage in policy-making by offering support for legislation addressing barriers.

VI. CONCLUSIONS

As more states continue to legalize cannabis, the need and demand for cannabis insurance will only continue to increase. There are substantial gaps in insurance coverage for the cannabis industry, which means that consumers, workers, vendors, owners and investors face risks that are not covered as they interact or engage with the cannabis industry. It is important for state insurance regulators to understand and address insurance availability and coverage gaps in their markets. State insurance regulators who have encouraged insurers to cover the cannabis industry have been successful in getting more insurers to enter this market. State insurance regulators can play a critically important role in working with the insurance industry to encourage more insurance availability for the cannabis industry.

1. Description of the Project, Issues Addressed, etc.

The Understanding the Market for Cannabis Insurance white paper outlines issues related to commercial cannabis insurance and includes recommendations for the development of regulatory guidance. As more states continue to legalize cannabis, the need and demand for cannabis insurance will only continue to increase. The white paper findings show there are substantial gaps in insurance coverage for the cannabis industry, exposing those who engage with the cannabis industry. The white paper also explores other regulatory issues related to insurance issues in the cannabis industry, including how insurance rates are set; legal and regulatory authority at the federal, state and local levels; cannabis operations; and best practices.

2. Name of Group Responsible for Drafting the White Paper and States Participating

The Cannabis Insurance (C) Working Group of the Property and Casualty Insurance (C) Committee was responsible for drafting the white paper.

States Participating:

3. Project Authorized by What Charge and Date First Given to the Group

The project was authorized when the Executive (EX) Committee appointed the Cannabis Insurance (C) Working Group during its Aug. 5, 2018, meeting at the 2018 Summer National Meeting to study insurance issues related to legal cannabis business. The Working Group was given the following charge:

The Working Group will consider the insurance regulatory issues surrounding the legalized cannabis business, including availability and scope of coverage, workers' compensation issues, and consumer information and protection. It will also develop a white paper outlining the issues and containing recommendations for the development of regulatory guidance as appropriate. The Working Group will complete its work by first quarter 2020.
4. A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated

The white paper was drafted by an informal drafting group consisting of the following members of the Cannabis Insurance (C) Working Group: California; Colorado; Delaware; Nevada; New Jersey; Oregon; Pennsylvania; and Vermont. There were eight drafting conference calls between Sept. 17, 2018, and adoption of the white paper by the Property and Casualty Insurance Committee during its Aug. 5, 2019, meeting at the 2019 Summer National Meeting. The National Cannabis Industry Association (NCIA) submitted background information, and the drafters also utilized independent research. The draft white paper went before the full Cannabis Insurance (C) Working Group during its May 23, 2019, conference call. During the call, the Working Group exposed the Understanding the Market for Cannabis Insurance white paper for a 30-day public comment period ending June 24, 2019.

After accounting for all submitted comments, the Working Group unanimously adopted the white paper during its July 9, 2019, conference call. Comments were received from New Jersey, Vermont and the APCIA. New Jersey suggested updating the status of referenced federal legislation. Vermont suggested updates reflecting that Illinois now permits the recreational use of cannabis, bringing the total number of such states to eleven (11). The APCIA suggested amending certain sentences to be more balanced in discussing insurers’ choice to enter the market and write cannabis insurance products in certain states or countrywide, the legal status of cannabis under current law and of hemp under the 2018 Farm Bill, and the amendment of the federal Secure and Fair Enforcement (SAFE) Banking Act of 2019 to provide a limited safe harbor for insurers. Further suggestions from the APCIA included adding discussion on concerns related to coverage and claims issues for policies not issued to cannabis businesses and the use of “prescribe” and “prescription” versus “recommend” and “recommendation” to describe access to medical cannabis. The informal drafting group adopted all of the suggested changes and the white paper was accordingly revised to incorporate the substantive edits discussed above.

5. A General Description of the Due Process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers and legislators was solicited)

The Cannabis Insurance (C) Working Group exposed the Understanding the Market for Cannabis Insurance white paper during its May 23, 2019, conference call for a 30-day public comment period ending June 24, 2019. The Working Group unanimously adopted the white paper during its July 9, 2019, conference call. The Property and Casualty Insurance (C) Committee unanimously adopted the white paper during its Aug. 5, 2019, meeting at the 2019 Summer National Meeting. The white paper will be submitted for potential adoption by the Executive (EX) Committee and Plenary during its Dec. 10, 2019, meeting at the 2019 Fall National Meeting.

6. A Discussion of the Significant Issues (items of some controversy raised during the due process and the group’s response)

All submitted comments were accounted for to the extent possible. Suggested revisions that were not incorporated apply to areas intentionally drafted at a high level because they only applied to certain states; varied considerably by state; or required more detailed state-by-state data not available to the informal drafting group, such as drug-free workplace standards. Additionally, the use of the word “marijuana” was kept only where it was used in a direct quote or legislation. Footnotes adding clarification were added where language could not be modified, satisfying all parties.

7. Any Other Important Information (e.g., amending an accreditation standard)

None.

THERE'S BEEN A DISASTER - **WHAT SHOULD I DO NOW?**

Learn more in the sections described below.

**SAFE AND SOUND**
After a disaster hits, make sure you and your family are safe. Then secure your belongings. Do what you can to secure your home and property to prevent more damage or theft. For example, if windows are broken, board them up. If the roof has a few holes, cover it with a tarp to prevent water damage.

**REPORT A CLAIM**
Once you've determined your home is damaged and needs to be repaired or rebuilt, report or file a claim as soon as possible. The easiest way to report a claim is to call your insurance company or agent. You may be able to report or file a claim online or from your cell phone. If you have trouble finding a phone number, try searching for your insurance company online.

**ESTIMATE DAMAGE**
An insurance adjuster will figure out how much damage was done to your home and property. The adjuster will ask you for a home inventory (a list of your personal property) if your personal belongings were damaged or destroyed. The adjuster will visit your home to inspect and estimate the damage done. In this section, you can learn about the different types of adjusters who may work on your claim and what you should do to prepare to meet the adjuster.

**DETERMINE COVERAGE**
Once the adjuster has figured out how much it will cost to rebuild, repair or replace your home or property, the adjuster will review your policy to calculate how much the insurance company will pay. If you've never filed a claim before, this process can seem overwhelming. But you can read this section to learn how claim payments are calculated and how your coverage will impact what your insurance company pays. You can learn the meaning of some of the words insurance companies use.

**REBUILD, REPAIR AND REPLACE**
Your recovery from a disaster is not complete until you're living back in your home. During the recovery phase, you'll be replacing personal items (if damaged), choosing building materials and working with contractors. Read this section to find tips about working with contractors and how to avoid becoming a victim of fraud.

**PREPARE**
It may sound strange, but the recovery process is the best time to start preparing for the next disaster or claim. Create a home inventory list as you're replacing your belongings. Also as you're rebuilding, consider using building materials that will resist damage – so if there's another disaster, your home may have less damage. For example, you could use impact-resistant shingles or impact-resistant siding.
PROPERTY INSURANCE CLAIMS GUIDE

Disasters happen everywhere and can happen at any time. Any of the following can cause a significant amount of damage to homes and personal property:

- TORNADOES
- WILDFIRES
- HURRICANES
- FLOODS
- EARTHQUAKE

This might be the first time you’ve had an insurance claim — or maybe a claim this big.

This Guide will help you understand what to do after a natural disaster damages your home. It also gives you helpful tools and tips to navigate the insurance claims process, whether this is your first insurance claim or not.

This Guide provides general information to help you in any type of disaster. But remember, most policies won’t cover damage from floods or earthquakes unless you bought that coverage separately.

Your state insurance department will help you and answer any questions – free of charge.

SAFE AND SOUND

A disaster has hit my area and my home has been damaged. I’ve made sure my family is safe. What should I do next?

Make sure there are no safety issues like downed electrical lines or broken gas lines. If there are safety issues, leave your home and wait for or listen to your local authorities to learn when you can return.

When inspecting your home, avoid broken glass and sharp objects or remove them. Watch out for things that could cause you to trip or fall.

Take photos or videos of the damaged areas and personal property. You also can jot down notes about any significant damage you see.

My family and I were evacuated from our home. When can we go home?

Wait to return to your home until your state or local authorities tell you it’s safe. The authorities won’t let you return to your home if there are hazards like downed power lines or broken gas lines. This is for your safety.

There’s a lot of damage to my home. What should I do about the damage?

Try to prevent further damage by making essential repairs, like covering roofs, or windows with plywood, tarp, canvas, or other waterproof materials.

IMPORTANT: KEEP ALL RECEIPTS FOR EMERGENCY REPAIRS TO GIVE TO YOUR INSURANCE COMPANY. Because you have to prevent more damage, you may want to hire a contractor to make any emergency repairs.

Don’t make permanent repairs before talking with your insurance agent or insurance company. Your company may not pay for repairs it didn’t authorize.

If you’re contacted by any contractors, review the section on Avoiding Insurance Fraud to avoid being taken advantage of.
ADDITIONAL LIVING EXPENSE (ALE)

Most homeowners policies also will pay the additional expenses you have if you can’t stay in your home because of damage from a covered disaster. For example, if you’ve to move into a hotel or apartment while your home is repaired or rebuilt, the insurance company will pay your costs for temporary housing.

Just don’t expect the insurance company to pay for your stay at a 5-star spa and resort or to eat out every night at the most expensive restaurant in town.

ALE is limited; see below for more information.

What types of living expenses does ALE pay for?

The insurance company will not pay ALL of your living expenses. ALE is to help pay those expenses that are beyond your normal expenses because you can’t live in your home. For example, ALE coverage will pay hotel lodging, but it won’t make your mortgage payment.

ALE typically covers hotel bills, reasonable restaurant meals (if you’re staying in a hotel room with no kitchen), and other living costs above and beyond your normal housing expenses while you can’t live in your home because of damage.

You need to be sure you keep ALL receipts for any additional costs you have. The insurance company will need the receipts to reimburse you.

Is there a limit to how long or how much I can use for my additional living expenses?

Keep in mind that ALE coverage is limited. Some policies have a dollar limit; some also may have a time limitation.

The good news – these limits are separate from any coverage you have to rebuild or repair your home. They’re also separate from any coverage you have to replace your belongings.

Ask your insurance company or adjuster what your policy covers and any time or dollar limits that apply.
REPORTING AN INSURANCE CLAIM

When should I report damage to my home or personal property?

Before reporting the property damage to your home, find out what your deductible is. If the damage is minor, for example, just a few shingles were damaged, you might decide you’re better off paying for the repairs out of pocket instead of filing an insurance claim. But, remember you might not be able to see all the damage. You may want to have a contractor inspect your home.

If you believe the damage will cost more than your deductible to repair, or there’s a lot of damage, you may want to file a claim. It’s important to notify your insurance company as soon as you know there’s damage and you decide to file a claim.

The easiest way to report damage is to call your insurance company or agent directly.

What should I do if I don’t have my company or agent’s phone number?

If you have cell service, use your cell phone to search for phone numbers or the insurance company’s website. There may be a phone number to report a claim.

If you can access social media, you can search for information from your insurance company or state department of insurance about how to file a claim.

If you have limited or no cell service, look for mobile claims centers in your area. Local news outlets and social media usually announce their locations.

What do I need to know when I call to make a claim?

It will help if you have your policy number. But if you don’t, your insurance company or agent can find your policy with your name, address, and phone number. You’ll need to briefly explain what happened and describe the type and extent of the property damage.

If you aren’t staying in your home, be prepared to give your insurance company and agent your new contact information—a phone number and an address.

Let your insurance company and agent know when you call if you’ve taken photos and videos of the damage and have cost estimates.

What is a contractor?

An individual you hire to manage the repair of your home. The contractor is responsible for supplying the necessary equipment, material, labor and services to complete repairs.
What do I need to ask when I file a claim?

You should ask:

- For the name and phone number for every person you talk to.
- For your claim or reference number.
- How long you have to file a claim.
- If you need estimates to make repairs or rebuild before you can file a claim.
- For a general idea of what your policy will cover.
- If your insurance policy covers hotel costs. For how much? For how long?
- For information about your deductible. Are there separate deductibles for hail, hurricane, or wind damage? What are those?
- If there are any special processes or procedures you need to know about.
- When you can expect an adjuster to call.
- What other information the company will need to process the claim.

What if I don’t have a completed home inventory list?

Don’t worry; the adjuster will give you some time to make a list. Ask the adjuster how much time you have to submit this inventory list.

Work from memory if your property was destroyed and you have no records.

Review photos, for example on your cell phone or from family or friends, taken inside your home. That may help you make the list.

Search online shopping websites or online retailers to help estimate costs.

The National Association of Insurance Commissioners (NAIC) has a printable inventory listing that may help you as you’re making your list.

https://www.insureuonline.org/home_inventory_checklist.pdf
What is a company adjuster?
A company adjuster works only for that insurance company.
- The insurance company hires and pays a company adjuster. This adjuster will settle the claim based on the insurance coverage you have and the amount of damage to your home and property.
- You do not pay a company adjuster.

What is an independent adjuster?
An independent adjuster works for several different insurance companies. An insurance company uses independent adjusters when it doesn’t have its own adjusters on staff or when it needs more adjusters than it has available; this often happens in a large disaster.
- An independent adjuster does the same work as a company adjuster (see above).
- You do not pay an independent adjuster.

What is a public adjuster?
A public adjuster is a professional you can hire to handle your insurance claim.
- Public adjusters have no ties to the insurance company.
- They estimate the damage to your home and property, review your insurance coverage, and negotiate a settlement of the insurance claim for you.
- Many states require public adjusters to be licensed. Some states prohibit public adjusters from negotiating insurance claims for you. In those states, only a licensed attorney can represent you.
- You have to pay a public adjuster.

Remember in larger weather events or disasters, not all adjusters will live or work in your state. Some adjusters may be sent from other states to help when there’s a large number of claims.
How long after I file a claim will an adjuster come to inspect my home?

It depends – every disaster can be different. Ask your insurance company when you file the claim.

If you don’t hear from an adjuster in a reasonable amount of time, contact your agent or the company. A reasonable amount of time could be 3 to 5 days for a minor claim. But, it may take longer for the adjuster to reach you following a large disaster in your area. Be sure they know how to contact you.

What should I do to prepare to meet with the adjuster?

• Make a list of all damaged or destroyed personal property. Make a list of damage to the home and other structures, like a garage, tool shed, or in-ground swimming pool. Work from memory or from photos if you have no records of your destroyed property.

• Gather any photos or videos of your home and property before they were damaged or destroyed.

• Include receipts from when you bought the damaged or destroyed items, if you have them. Search online shopping sites or online retailers to help estimate costs.

• If you have time before the adjuster inspects your home, try to get written bids from contractors. You aren’t required to have bids, but it can help. The bids should detail the materials to be used, prices of those materials, and labor on a line-by-line basis.

• Take notes when you meet with the adjuster. Get the adjuster’s name and contact information and ask when you can expect to hear back. You can write this information down in the Claims Communication Section in the back of this resource.

What will happen when the insurance adjuster comes to my home?

• You should be there when the adjuster comes to your home. You can show the adjuster where you believe there has been structural damage and give the lists you’ve prepared of property or structural damage, photos or videos you’ve taken, and bids from contractors.

• The adjuster will inspect your home and take photographs and measurements. While the adjuster is there, they may even do some calculations of the damage and cost to repair.

• Before the adjuster leaves, make sure you have their contact information. Ask the adjuster what the next steps will be and to estimate when you'll hear back from them.

• Ask the adjuster if there’s any other information you should provide. After the adjuster leaves, you may need to gather more information or start a personal property inventory list.

If I hire a public adjuster, will the insurance company still send its own adjuster?

The insurance company doesn’t have to accept your public adjuster’s estimates.

The insurance company will typically send either a company adjuster or an independent adjuster to assess and estimate damage to your home or property.
How is a public adjuster paid?

- If you hire a public adjuster, it’s your responsibility to pay their fee.
- Depending on the laws of your state, public adjusters can charge a flat fee or a fee that’s based on a percentage of the settlement you get from your insurer.
- In some states, the maximum a public adjuster can charge is set by law. The maximum also may vary depending on whether a widespread catastrophe caused your loss.
- A public adjuster should give you a contract. The contract should explain what services the adjuster will provide and how much you will pay.
- If you hire a public adjuster after your insurer has made an initial offer, ask about the fee. The contract should say if the fee you’ll pay will be based on the total the insurance company pays or on the amount the public adjuster negotiates for you.
- You should ask your public adjuster to routinely provide you updates on the status of your claim.

DETERMINING COVERAGE
(SETTLING A CLAIM)

How do I get a settlement offer? Who gives me that?
The company adjuster or independent adjuster will calculate the amount of damage to your home and property. They will review your policy and determine what deductibles may apply and if there are any limits on what will be paid. Once they’ve made those calculations, they’ll contact you and your public adjuster or lawyer (if you have one) and share their estimates and calculations with you. They also may contact your contractor about their estimates and calculations.

Will I get a lump sum payment and when will I receive money?
The settlement process is not a single transaction. You’ll get a number of payments for different parts of your claim to help you start the rebuilding and repairing process. You’ll likely receive a payment for your additional living expenses mentioned above. Then you’ll start to receive payments to replace your personal property, followed by payments for the repairs and construction on your home.

Why did the insurance company make the check payable to me AND my mortgage company?
If you have a mortgage on your home, your lender has an interest in making sure the home is rebuilt – or that your loan is paid in full. Your mortgage lender required you to add them as an additional insured on your homeowners policy. Because of this, the insurer is obligated to include them on the check it pays for major repairs. You’ll need to work with your mortgage lender to get the claim money released for repairs. If you have problems working with your mortgage lender, contact your state’s agency that regulates banks and mortgage lenders or your state’s Attorney General’s Office for assistance. The federal government also has a website where you can make a complaint against your bank or mortgage lender, if you aren’t getting the help you need. That website is: https://www.usa.gov/complaints-lender. Your state department of insurance also may have suggestions for you.
How long will it take for my insurance claim to be settled?

Everyone wants the process to be done as fast as possible so they can return to a normal life.

If there’s substantial damage involving your home and property, an insurance claim is not going to be closed with a single payment. There will be claims payments for various parts of your claim as the rebuilding process moves along. Most people find it takes at least 18 to 24 months to repair/rebuild their home and replace their possessions after a major disaster. Your insurance claim will stay open until the insurer has made all payments you’re entitled to under your policy.

You should feel free to contact your insurance company or adjuster for a status on your claim at any time during the claims process.

What if I’m not satisfied with the amount of my insurance settlement?

- Your settlement won’t necessarily be the same as your neighbor’s. Your coverages, deductible, and policy limits may be different even if the damage looks the same.
- If the insurance company denies any part of the claim, ask for the denial in writing. Keep all paperwork.
- If you don’t believe the offer is fair, call the insurance company. Be prepared to explain why you think the offer is unfair. If you’re not satisfied with the response, contact your state insurance department.

What if the insurance company doesn’t agree with the public adjuster’s or my contractor’s estimate of the damage?

Differences in construction estimates are common. Ideally, you and the insurance company should reach agreement on a “scope of loss”. This is a detailed list of the quantities of construction materials, labor, profit and overhead, building code compliance, and every single item required to repair or rebuild your home.

Once you’ve submitted all the information that your insurance company needs, including written estimates from contractors, the adjuster will calculate the total cost.

If you disagree with the claim amount the adjuster has calculated, there are different ways to settle that disagreement without going to court. Two ways are appraisal and arbitration.

**Appraisal:** If you can’t agree with your insurance company about how much it will cost to rebuild your home and/or repair or replace your property, you can use the appraisal process to resolve the differences. This isn’t the same as an appraisal you may have of your home’s value.

The appraisal process begins with two appraisers comparing their estimates. The appraisal process only determines costs, not if your policy covers these costs. It isn’t a court proceeding.

If you use the appraisal process, you’ll have to pay some of the costs. What you’ll have to pay will depend on your state’s law.

If your policy has an appraisal clause, you must go through the appraisal process before you can sue your insurance company.

**Arbitration:** Arbitration is a legal process, but you don’t have to go to court. In an arbitration hearing, a neutral third party (arbitrator) hears from both you and your insurance company. Both parties agree to accept the arbitrator’s decision. Usually the decision is binding so you can’t go to court to appeal the decision.

Some insurance policies require arbitration to settle differences. Other policies will say how arbitration will work if both you and your insurance company agree to use it. If you use arbitration, you’ll have to split the cost with the insurance company. But, some state laws may require you or your insurance company to pay the full cost if you aren’t successful.

What can I do if my claim was denied?

If you think the insurance company should have paid your claim, you can use arbitration or file a lawsuit to get the insurance company to reverse its decision. But, before you do any of those, contact your state insurance department for help.

Some states may have a mediation process that you can use. Contact your state department of insurance for more information.
HOW IS A CLAIM PAYMENT AMOUNT CALCULATED?

A number of important insurance terms will help you understand how your insurance claim will be paid. The following sections explain terms like deductible, depreciation, Actual Cash Value, and Replacement Cost.

What is a deductible?
A deductible is the part (or amount) of the claim you’re responsible for. Insurance companies will deduct this amount from any claim settlements they pay to you or on your behalf. So if your insurance policy has a $1,000 deductible, that means you’ve agreed to pay $1,000 out of your pocket for the damage to your home.

Are there different types of deductibles?
Yes. A deductible can be either a specific dollar amount or a percentage of the total amount of insurance. There are special deductibles that apply to certain types of claims; some deductibles are applied to specific parts of your home. Look at the declarations page or the front page of most homeowners insurance policies.

HOW ARE DEDUCTIBLES USED TO CALCULATE A CLAIM?

<table>
<thead>
<tr>
<th>FLAT DOLLAR DEDUCTIBLE</th>
<th>PERCENTAGE DEDUCTIBLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>$500 DEDUCTIBLE PER LOSS</td>
<td>2% DEDUCTIBLE PER LOSS</td>
</tr>
<tr>
<td>A disaster destroyed your home. Your home was insured for $250K (structure only) and it will cost $250K to rebuild it. You have a $500 deductible.</td>
<td>A disaster destroyed your home. Your home was insured for $250K (structure only) and it will cost $250K to rebuild it. You have a 2% deductible.</td>
</tr>
<tr>
<td>Insured Value: $250,000</td>
<td>Insured Value: $250,000</td>
</tr>
<tr>
<td>2% Deductible: $250,000 x 2% = $5,000</td>
<td>2% Deductible: $250,000 x 2% = $5,000</td>
</tr>
<tr>
<td>Damage and Cost to Rebuild: $250,000</td>
<td>Damage and Cost to Rebuild: $250,000</td>
</tr>
<tr>
<td>Minus the Deductible: - $500</td>
<td>Minus the Deductible: - $5,000</td>
</tr>
<tr>
<td>Claim Settlement Amount: $249,500</td>
<td>Claim Settlement Amount: $245,000</td>
</tr>
</tbody>
</table>

Some insurance policies have a special deductible for losses caused by wind, hurricanes, or other types of storms. The insurer applies this deductible when one of those types of disasters causes the damage. If something else damages your home, then the “all peril” deductible would apply.

Some policies also may have a special deductible that applies to a specific part of your home, like your roof. In these cases, the deductible could be either a flat dollar amount or a percentage.
REPLACEMENT COST VERSUS ACTUAL CASH VALUE

If you have Replacement Cost Value (RCV) coverage, your policy will pay the cost to repair or replace your damaged property without deducting for depreciation.

If you have Actual Cash Value (ACV) coverage, your policy will pay the depreciated cost to repair or replace your damaged property.

Check the declarations page of your homeowners policy to see whether the policy provides replacement cost coverage. If it doesn't specify replacement cost, then your policy likely only covers actual cash value. If it specifies replacement cost, then you have replacement cost coverage.

Under an RCV or ACV policy, your dwelling coverage pays for damage to the structure and will pay only up to the policy limit.

Even if you bought an RCV policy, there may be other limits on what the policy will pay for damage to certain surfaces, such as roofs. In some cases, the policy may pay ACV on your roof, but RCV on the rest of your home and property. If you have questions, call the adjuster or your insurer and ask what type of coverage you have.

Example:

The Smiths and the Johnsons are next door neighbors. Their homes are exactly the same size, built in the same year, and have the exact same floorplan. One night, a terrible storm tears through their town, destroying the Smith’s and the Johnson’s roofs. Both roofs have the same damage. The Smiths and the Johnsons have a $1,000 deductible, and both roofs will cost $15,000 to replace. The Smiths have a replacement cost policy, while the Johnsons have an actual cash value policy.

**SMITH’S REPLACEMENT COST VALUE**

- Insurance valuation method: RCV
- Cost of Smith’s roof ten years ago: $15,000
- Policy deductible: $1,000
- Cost to replace roof: $15,000
- Depreciation not applicable for RCV

**Insurance payment:**

- $15,000 cost of new roof
- $0 depreciation (no depreciation with RCV)
- $1,000 deductible

= $14,000 insurance payment

**JOHNSON’S ACTUAL CASH VALUE**

- Insurance valuation method: ACV
- Cost of Johnson’s roof ten years ago: $15,000
- Policy deductible: $1,000
- Cost to replace roof: $15,000
- Depreciation schedule: $1,000/year

**Insurance payment:**

- $15,000 cost of new roof
- $10,000 depreciation ($1000/yr x 10 years)
- $1,000 deductible

= $4,000 insurance payment
HOW DOES DEPRECIATION WORK?
IS ALL DEPRECIATION THE SAME?

No. Depreciation in an insurance claim is much different than depreciation on assets for taxes and is different from an accountant’s calculation of depreciation on property.

In an insurance claim, the deduction for depreciation may be significant, especially if the damaged property was at or near the end of its useful life. For example, if a covered cause of loss destroys your 20 year old roof and it must be replaced, a policy that pays RCV will cover the full cost to replace the roof. However, an ACV policy may pay as little as 20% of the cost to replace the roof, since the useful life of a roof is usually about 25 years.

WHAT IS “DEPRECIATION” AND HOW DOES THAT AFFECT MY CLAIM?

Everything covered under your homeowners policy is assigned a value. Your home, and most of its contents and components, are likely to decline in value over time because of age or wear and tear. This loss in value is known as depreciation.

Insurers usually calculate depreciation based on the condition of the property when it was lost or damaged, what a new one would cost, and how long the item would normally last.

For example, your two-year old laptop that was in good condition was destroyed in a disaster. A similar new laptop would cost $750. Your laptop normally lasts four years, so it had lost 50% of its value (25% a year). So, the value of your laptop at the time it was destroyed was half of $750, or $375. Your insurance settlement would include $375 to reimburse you for this laptop.

\[
\text{Cost of new laptop (Replacement cost value) } - \text{50% depreciation (2 years x 25% per year) = Value of your laptop (Actual cash value)}
\]

\[
$750 - $375 = $375
\]
I have a replacement cost policy, but my insurance company only paid for part of the claim. Can they do that?

When you have an RCV policy and turn in a claim for a covered loss, the insurer at first may pay only the ACV for the damage to your home or personal property.

But, when you present evidence that the damaged property has been repaired or replaced, the insurer will pay the difference (this is referred to as “recoverable depreciation”) up to the replacement cost.

Recoverable depreciation is calculated as the difference between an item’s replacement cost and ACV.

Is there a time limit on when I can get paid for the recoverable depreciation?

Yes, there’s usually a time limit. That time limit can range from 6 months to up to one year, depending on your state’s laws and your policy.

In certain circumstances, like a very large-scale disaster, insurance companies know it will take longer to rebuild homes and replace property. They’ll give you more time if you ask. Your state insurance department may require the insurance company to give you more time.

If you have questions about this time frame, ask your adjuster. You also can contact your state insurance department.

I was told I have to replace with “like kind and quality”. What does that mean?

Most insurance policies that are Replacement Cost cover repairs or replacements with property of “like kind and quality”.

Your insurance policy isn’t intended to pay for expensive improvements or upgrades. For example, if you had a 3-tab shingle roof before the loss, your insurance policy would cover the cost of another 3-tab shingle roof, but not a more expensive slate roof. If you had ceramic bathroom sinks in your home, your insurance policy won’t pay the extra cost to replace those with granite countertops.

What is “Functional Replacement”?

Another type of coverage becoming more common, particularly with older homes, is known as “Functional Replacement Coverage” (FRC). FRC replaces the damaged property with a functional replacement, which isn’t necessarily the same quality and craftsmanship as the original materials.

A simple example would be replacing plaster walls with drywall. Both provide solid walls and have the same function, yet the cost varies greatly between the two. Another example would be a damaged banister in a home. The repair could be made with wood carved in the same architectural style, but using a less expensive wood — for instance, replacing an oak banister with a pine banister. Another example would be replacing a tile roof with a shingle roof.
My adjuster mentioned that some of my property has a special limit. What is that?

A special limit caps how much money you'll be paid for certain types of property. Don’t confuse this with the contents or personal property limits. A special limit will apply to specific categories of property like jewelry, furs, guns, antiques, collector items, and coins.

My home and/or property were destroyed and can’t be repaired. Can I use the insurance settlement to build or buy another home somewhere else?

Check your insurance policy and talk with your agent or company. You also can call your state department of insurance.

You may not get the same settlement if you don’t rebuild on the same location.

WHAT IS ORDINANCE AND LAW COVERAGE?

- In many instances, your local government may require your home to be repaired or rebuilt to meet current local building codes. Unless you have Ordinance and Law coverage, a standard homeowners policy doesn’t cover that added expense.

- Ordinance and Law coverage in your homeowners insurance policy covers part or all of the cost to repair or rebuild your home to meet current local building codes. For example, electrical wiring, plumbing, windows, and roofing materials are some things that may need to be updated.

- Standard homeowners policies don’t cover the added expense to meet current building codes when you repair or replace your home. Look at the declarations page of your policy to see if you have Ordinance and Law coverage.
I’ve accepted the insurance company’s settlement and I’m ready to repair/rebuild. What do I need to know?

- Use reputable contractors. Reputable contractors usually don’t ask for a large payment upfront.
- Contractors may be licensed or registered. The difference is important. A licensed contractor has passed exams and met other requirements to show that he or she is competent. A registered contractor has provided contact information to a government authority. You can learn more about licensing and registration of contractors by calling your state Department of Insurance. They can help you contact the state agency that licenses and regulates contractors.
- Ask your contractor to show you the building permits. Contractors most likely will need to apply and pay for building permits before beginning work. And, don’t forget to check with your local officials about any requirements for permits or inspections.
- Get an estimate from more than one contractor. An estimate from a contractor that’s much lower than any of the others doesn’t mean it’s the best deal. Make sure all the quotes include the same things and check references.
- Contact your insurance company and adjuster any time you find damage that hasn’t already been reported or inspected or if you learn something new about damage to your home or property.

What should I know about a contractor before hiring one?

Get the following information:

- a copy of the contractor’s identification (the contractor’s name and the name of the business);
- a copy of the contractor’s business license (check the expiration date);
- a copy of the contractor’s proof of worker’s compensation insurance; and
- a copy of the contractor’s proof of liability insurance. A licensed insurance agent or company issues this certificate. The proof of insurance should show the company’s name, phone number, and the policy number. Call the insurance company to verify the coverage.
WHAT CAN I DO TO AVOID INSURANCE FRAUD?

After storms and other disasters, fraudsters and scam artists often arrive quickly. Watch for contractors who offer to do your repairs with upgraded or free building materials. Here are a few tips to help you avoid becoming a victim of a disaster fraudster or scam artist:

• If you’re working with contractors you don’t know, find out where they’re from. Many fraudsters will travel from state to state.
• Before you sign any contracts or pay any money, ask for references.
• Never pay the full amount before the work is complete.
• Ask your local Better Business Bureau and state Attorney General’s Office about complaints.
• Check online for information about the contractor.
• Most importantly, report any suspected fraud to your insurance agent and your state’s department of insurance as soon as possible.

ASSIGNMENT OF BENEFITS

Some states allow assignments of benefits (AOB) after a loss. This agreement transfers your rights under your insurance policy and your claim to a third party, most often your contractor.

Be cautious if you’re asked to sign an AOB. Typically, there’s a promise from the contractor to handle all matters with the insurance company for you, which may sound great. But you also may be giving up some, most, or even all of your rights, including having a lawsuit filed without your approval or knowledge.

Take your time to review any AOB carefully. Talk to your claims adjuster or you can ask an attorney to review and give you advice. You can also call your state department of insurance.
I’ve just gone through one disaster. What do I need to do to prepare for the next disaster? 
There are two different parts of preparation – preparing your home and preparing yourself financially.

Preparing your home
While you’re rebuilding, think about what you can do to minimize damage to your home during the next storm or disaster. This is called mitigation.

WAYS YOU CAN LIMIT FUTURE DAMAGE:

You can make changes to your home to limit damage during a future tornado, wildfire, hurricane, or high wind.

- **Secure entry doors.** Make sure entry doors have a two-inch deadbolt and three hinges with screws long enough to secure the door and frame to the wall. The frame should be well anchored.
- **Brace your garage door.** You can buy bracing products that will make your door stronger and more wind resistant. If you’re expecting bad weather and haven’t braced your garage door, you can put a vertical brace into the wall framing and floor, much as you would board up a window before a hurricane.
- **Install impact-resistant windows.** Local building codes in some areas require this.
- **Leave the windows closed in a storm.** Opening the window doesn’t equalize the pressure between the inside and outside of the house. Instead, it pressurizes the inside of the house, like blowing up a balloon until it pops. The air pushes off the roof or a wall and the house collapses.
- **Install wind-resistant roof structures.** Roofs are usually installed with roofing nails. But this type of roof can come off in high winds. Using hurricane clips to attach roofs creates a stronger connection between the roof and the house. Roofing clips come in a range of protection; the one you need depends on the weight of your roof. The building codes in hurricane-prone areas require roofing clips, but they’re a good idea in tornado-prone areas too.
- **Create a wildfire defense area,** Remove flammable materials from around your home. Trim over hanging branches. Remove dead trees and bushes. Clean gutters and clear them of leaves and pine needles.
- **Store firewood and other flammable materials away from home, garage, or deck.**
A number of great resources are available online can give you more ideas about ways you can reduce or avoid damage to your home.

- Ready.gov (US Department of Homeland Security)
- FEMA Mitigation Resources (US Department of Homeland Security)
- Ready, Set Go! (Wildfire resiliency)

PREPARING YOURSELF FINANCIALLY

Once you've rebuilt or repaired your home, and you're replacing damaged property, it's time to prepare for the future.

- You should make a list of all your stuff, called an inventory list. If you don't want to write everything down or type it into a spreadsheet, you can film a video to show your household items. As you film, you can describe important items, including when you bought the item, its condition, and how much you paid for it, if you know. There also are many mobile apps that will make it easier to create an inventory list. The National Association of Insurance Commissioners (NAIC) has a free app called the MyHOME Scr.APP:book that can be downloaded in the Apple App Store or on Google Play.

- Make a copy of your inventory list and keep it with your insurance policy. You could put the copy somewhere safe, such as a bank safety deposit box. You also could store a copy online.

- Put your insurance company name, policy number, and company contact information somewhere you could find it in a disaster.

- Review your policy with your insurance agent each year to see if your needs have changed.

PROJECT HISTORY

Transparency and Readability of Consumer Information (C) Working Group’s Post-Disaster Claims Guide

1. Description of the project, issues addressed, etc.

The Catastrophe Insurance (C) Working Group referred the completion of the work of the Consumer Outreach and Assistance Post-Disaster (C) Subgroup, which was disbanded in spring 2018, to finish the drafting of the “Post-Disaster Claims Guide” to the Transparency and Readability of Consumer Information (C) Working Group.

The claims guide is a document the state insurance departments can use to provide to consumers following a disaster. The guide provides consumers with information regarding: 1) steps to take following a disaster that damaged a consumer’s home; 2) discussion regarding additional living expenses; 3) information regarding how to report an insurance claim; 4) definition of "insurance adjuster," as well as the various types of insurance adjusters and what they do; 5) items a consumer will need to provide to the insurance adjuster; 6) information regarding the settlement process; 7) information regarding how a claims payment is calculated; 7) discussion of the differences between replacement cost and actual cash value; 8) explanation of how depreciation works; 9) discussion of ordinance and law coverage; 10) the “three Rs” of recovery; 11) things a consumer can do to mitigate future damage; 12) assignment of benefits; 13) ways to prevent insurance fraud; and 14) information to help a consumer prepare financially for a possible future disaster.

The claims guide also includes logs for consumers to use to record information regarding their claim and communications with various parties during the claims process.

The claims guide can be edited and formatted by the state insurance departments to meet their needs. The Working Group plans to put this document into electronic format.

2. Name of group responsible for drafting the model and states participating.

The Transparency and Readability of Consumer Information (C) Working Group of the Property and Casualty Insurance (C) Committee was responsible for drafting the claims guide. Participating states included: Alabama; California; Colorado; Connecticut; District of Columbia; Illinois; Kansas; Louisiana; Maryland; Minnesota; Missouri; North Carolina; North Dakota; Ohio; Oregon; Pennsylvania; Texas; and West Virginia.

3. Project authorized by what charge and date first given to the group.

The project was authorized by the charges of the Consumer Outreach and Assistance Post-Disaster (C) Subgroup of the Catastrophe Insurance (C) Working Group to: “Review findings from the fall 2012 public hearing on catastrophe issues and consider developing a model guideline, white paper and/or compilation of best practices to reduce post-disaster insurance recovery obstacles for insurance consumers.”

4. A general description of the drafting process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.

In 2017, the Consumer Outreach and Assistance Post-Disaster (C) Subgroup began discussing items to be included in a claims guide to be used to aid consumers through the process of a claim resulting from a disaster. The Subgroup was disbanded in spring 2018; therefore, the Catastrophe Insurance (C) Working Group referred the charge to the Transparency and Readability of Consumer Information (C) Working Group for completion. The Transparency and Readability of Consumer Information (C) Working Group met regularly via conference call to complete the drafting of the document.
5. A general description of the due process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers and legislators was solicited).

The Transparency and Readability of Consumer Information (C) Working Group met regularly via conference call, during which the Working Group heard comments and discussed suggested revisions from interested consumer and industry representatives. The claims guide was adopted by the Transparency and Readability of Consumer Information (C) Working Group via an e-vote that concluded July 26, 2019. The claims guide was then adopted by the Property and Casualty Insurance (C) Committee during its Aug. 5, 2019, meeting at the 2019 Summer National Meeting.

6. A discussion of the significant issues (items of some controversy raised during the due process and the group’s response).

There were no items of controversy raised during the due process.

7. Any other important information (e.g., amending an accreditation standard).

Not applicable.

W:\National Meetings\2019\Fall\Plenary\Att 6 Post-DisasterClaimsGuide.pdf
GUIDE LINE FOR STAY ON TERMINATION OF NETTING AGREEMENTS AND QUALIFIED FINANCIAL CONTRACTS

Drafting Note: State receivership and insolvency laws may permit a contractual right to cause the termination, liquidation, acceleration or close-out obligations with respect to any netting agreement or qualified financial contract (QFC) with an insurer because of the insolvency, financial condition or default of the insurer, or the commencement of a formal delinquency proceeding. These laws are based upon similar provisions contained in the federal bankruptcy code and the Federal Deposit Insurance Act (FDIA). The FDIA also provides for a twenty-four-hour stay to allow for the transfer of QFCs by the receiver to another entity rather than permitting the immediate termination and netting of the QFC. 12 U.S.C. § 1821(e)(9)-(12). States that permit the termination and netting of QFCs may want to consider adopting a similar stay provision following the appointment of a receiver.

States that consider the enactment of a stay should take into account the relevant federal rules. In 2017 the Board of Governors of the Federal Reserve System (the Federal Reserve), the Federal Deposit Insurance Corporation (the FDIC) and the Office of the Comptroller of the Currency (the OCC) each adopted final rules and accompanying interpretive guidance (Final Rules) setting forth limitations to be placed on parties to certain financial contracts exercising insolvency-related default rights against their counterparties that have been designated as a global systemically important banking organization (GSIB). The Final Rules include the definition of master netting agreement that allows netting even though termination of the transaction in the event of an insolvency may be subject to a “stay” under several defined resolution regimes including Title II of Dodd Frank, the FDIA, as well as comparable foreign resolution regimes. Notwithstanding NAIC’s request for inclusion, stays under the state insurance receivership regime (State Receivership Stays) were not included as an exemption within the definition. Therefore, unless the Final Rules are amended to recognize State Receivership Stays, if a state implements a stay as contemplated by the Guideline, insurers would find themselves disadvantaged, potentially resulting in additional costs and/or collateral requirements given the regulatory treatment for contracts that do not meet requirements for QFCs. Therefore, if a state is considering implementation of this Guideline, consideration should be given to whether the rules of the Federal Reserve, FDIC and OCC have been amended to recognize State Receivership Stays. For example, a state could adopt a stay that would be effective if and when the Final Rules recognize State Receivership Stays.

The following statutory language is not an amendment to the NAIC receivership models, but is intended as a Guideline for use by those states seeking to require a stay with respect to the termination of a netting agreement or QFC of an insurer in insolvency:

Stay on Termination of Netting Agreements and Qualified Financial Contracts

A person who is a party to a netting agreement or qualified financial contract under [cite to applicable state law addressing qualified financial agreements] with an insurer that is the subject of an insolvency proceeding may not exercise any right that the person has to terminate, liquidate, accelerate or close-out the obligations with respect to the contract by reason of the insolvency, financial condition or default of the insurer, or by the commencement of a formal delinquency proceeding,

(1) Until 5:00 p.m. (eastern time) on the business day following the date of appointment of a receiver; or

(2) After the person has received notice that the contract has been transferred pursuant to [cite applicable state law addressing transfer of qualified financial contracts].

Chronological Summary of Action (all references are to the Proceedings of the NAIC)

PROJECT HISTORY

GUIDELINE FOR STAY ONTERMINATION OF NETTING AGREEMENTS AND QUALIFIED FINANCIAL CONTRACTS

1. Description of the Project, Issues Addressed, etc.

In 2017 the Board of Governors of the Federal Reserve System (the Federal Reserve), the Federal Deposit Insurance Corporation (the FDIC) and the Office of the Comptroller of the Currency (the OCC) each adopted final rules and accompanying interpretive guidance (Final Rules) setting forth limitations to be placed on parties to certain financial contracts exercising insolvency-related default rights against their counterparties that have been designated as a global systemically important banking organization (GSIB). The Final Rules include the definition of master netting agreement that allows netting even though termination of the transaction in the event of an insolvency may be subject to a “stay” under several defined resolution regimes including Title II of Dodd Frank, the FDIA, as well as comparable foreign resolution regimes.

Notwithstanding NAIC’s request for inclusion through a formal comment letter and subsequent discussions, stays under the state insurance receivership regime (State Receivership Stays) were not included as an exemption within the definition. Therefore, unless the Final Rules are amended to recognize State Receivership Stays, if a state implements a stay as contemplated by the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (Guideline #1556), insurers would find themselves disadvantaged, potentially resulting in additional costs and/or collateral requirements given the regulatory treatment for contracts that do not meet requirements for qualified financial contracts (QFCs).

On Dec. 2, 2017, the Receivership and Insolvency (E) Task Force received a referral from the Financial Stability (EX) Task Force that included three tasks, one of which was to “evaluate whether there are any current misalignments between federal and state laws that could be an obstacle to achieving effective and orderly recovery and resolutions for U.S. insurance groups (e.g., federal rule recognizing importance of temporary stays on the termination of master netting agreements for QFCs that does not recognize the utility and import of state-based stays in state receivership proceedings).

The RITF assigned the task of evaluating these issues to a drafting group, who evaluated the impact of the federal rule recognizing temporary stays on terminating master netting agreements for QFCs. The regulators held discussions with federal banking authorities regarding the handling of QFCs in banking resolutions to assess the utility of a stay on terminations in insurance receiverships.

To address the conflict with the federal rule, the drafting group proposed amendments to the drafting note of Guideline #1556 explaining the above issue. Therefore, if a state is considering implementation of Guideline #1556, consideration should be given to whether the rules of the Federal Reserve, FDIC and OCC have been amended to recognize State Receivership Stays. For example, a state could adopt a stay that would be effective if and when the Final Rules recognize State Receivership Stays.

2. Name of Group Responsible for Drafting the Guideline and States Participating

The Receivership and Insolvency (E) Task Force is responsible for Guideline #1556. The 2019 members of the Task Force are: Texas (Chair); District of Columbia (Co-Vice Chair), Alaska, American Samoa, Arkansas, California, Colorado, Connecticut, Florida, Illinois, Iowa, Kansas, Kentucky, Louisiana, Massachusetts, Missouri, Montana, Nebraska, New Jersey, New Mexico, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Virginia, and Washington.

The amendments to Guideline #1556 were drafted by the Task Force’s drafting group. The drafting group was comprised of Texas (Lead), Colorado, Connecticut, District of Columbia, Illinois, Massachusetts, Michigan, New Jersey, New Mexico, Pennsylvania. Washington, and Wisconsin.

---

3. **Project Authorized by What Charge and Date First Given to the Group**

The Receivership and Insolvency (E) Task Force is charged with addressing any issues that affect receivership laws, including amendments to models and guidelines. The request to address misalignments with federal rules was first considered by the Task Force on March 25, 2018, at the NAIC 2018 Spring National Meeting, when a work plan to address the Financial Stability (EX) Task Force’s referral and formation of drafting groups were discussed.

4. **A General Description of the Drafting Process and Due Process**

The drafting group of the Receivership and Insolvency (E) Task Force discussed the proposed amendments on a conference call on March 14, 2019, which included twenty interested parties.

The Receivership and Insolvency (E) Task Force discussed the proposed amendments in open session on April 7, 2019, at the NAIC Spring National Meeting. The Task Force exposed the proposed amendments for a 30-day public comment period ending May 7, 2019. One comment was received supporting the need for Federal rule changes. No changes were made to the Guideline #1556.

The Receivership and Insolvency (E) Task Force adopted the amendments on Aug. 4, 2019, at the NAIC Summer National Meeting.

The Financial Condition (E) Committee adopted the amendments on October 31, 2019.

The Executive (EX) Committee and Plenary adopted the amendments on December 10, 2019.

5. **A Discussion of the Significant Issues**

None.

6. **Any Other Important Information**

None.

I. Preamble

Purpose

The revised *Credit for Reinsurance Model Law* (#785) and *Credit for Reinsurance Model Regulation* (#786) (collectively, the Credit for Reinsurance Models) require an assuming insurer to be licensed and domiciled in a “Qualified Jurisdiction” in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes. In 2012, the NAIC Reinsurance (E) Task Force was charged to develop an NAIC process to evaluate the reinsurance supervisory systems of non-U.S. jurisdictions, for the purposes of developing and maintaining a list of jurisdictions recommended for recognition by the states as Qualified Jurisdictions. This charge was extended in 2019 to encompass the recognition of Reciprocal Jurisdictions in accordance with the 2019 amendments to the Credit for Reinsurance Models, including the maintenance of a list of recommended Reciprocal Jurisdictions. The purpose of the *Process for Evaluating Qualified and Reciprocal Jurisdictions* is to provide a documented evaluation process for creating and maintaining these NAIC lists.

Background

On November 6, 2011, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions serve to reduce reinsurance collateral requirements for certified reinsurers that are licensed and domiciled in Qualified Jurisdictions. Under the previous version of the Credit for Reinsurance Models, in order for U.S. ceding insurers to receive reinsurance credit, the reinsurance was required to be ceded to U.S.-licensed reinsurers or secured by collateral representing 100% of U.S. liabilities for which the credit is recorded. When considering revisions to the Credit for Reinsurance Models, the Reinsurance (E) Task Force contemplated establishing an accreditation-like process, modeled on the current NAIC Financial Regulation Standards and Accreditation Program, to review the reinsurance supervisory systems of non-U.S. jurisdictions. Under the revised Credit for Reinsurance Models, the approval of Qualified Jurisdictions is left to the authority of the states; however, the models provide that a list of Qualified Jurisdictions will be created through the NAIC committee process, and that individual states must consider this list when approving jurisdictions.

The enactment in 2010 of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) created the Federal Insurance Office (FIO), which has the following authority: (1) coordinate federal efforts and develop federal policy on prudential aspects of international insurance matters; (2) assist the Secretary of the U.S. Department of the Treasury in negotiating covered agreements (as defined in the Dodd-Frank Act); (3) determine whether the states’ insurance measures are preempted by covered agreements; and (4) consult with the states (including state insurance regulators) regarding insurance matters of national importance and prudential insurance matters of international importance. Further, the Dodd-Frank Act authorizes the U.S. Treasury Secretary and the U.S. Trade Representative (USTR), jointly, to negotiate and enter into covered agreements on behalf of the United States. It is the NAIC’s intention to communicate and coordinate with the FIO and related federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.

On September 22, 2017, the United States and the European Union (EU) entered into the “*Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.*” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.
Reciprocal Jurisdictions

On June 25, 2019, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions were intended to conform the Models to the relevant provisions of the Covered Agreements. The Covered Agreements would eliminate reinsurance collateral requirements for EU and UK reinsurers that maintain a minimum amount of own funds equivalent to $250 million and a solvency capital requirement (SCR) of 100% under Solvency II, among other conditions. Conversely, U.S. reinsurers that maintain capital and surplus equivalent to 226 million euros with a risk-based capital (RBC) of 300% of authorized control level would not be required to maintain a local presence in order to do business in the EU or UK or post reinsurance collateral. Under the revised Credit for Reinsurance Models, jurisdictions that are subject to in-force Covered Agreements are considered to be Reciprocal Jurisdictions, and reinsurers that have their head office or are domiciled in a Reciprocal Jurisdiction are not required to post reinsurance collateral if they meet all of the requirements of the Credit for Reinsurance Models.

Under the revised Credit for Reinsurance Models, not only are jurisdictions that are subject to Covered Agreements treated as Reciprocal Jurisdictions for reinsurance collateral purposes, but any other Qualified Jurisdictions can also qualify for collateral elimination as Reciprocal Jurisdictions. States that meet the requirements of the NAIC Financial Standards and Accreditation Program are also considered to be Reciprocal Jurisdictions.

The NAIC has updated and revised this Process for Evaluating Qualified and Reciprocal Jurisdictions to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.
II. Principles for the Evaluation of Non-U.S. Jurisdictions

1. The NAIC model revisions applicable to certified reinsurers are intended to facilitate cross-border reinsurance transactions and enhance competition within the U.S. market, while ensuring that U.S. insurers and policyholders are adequately protected against the risk of insolvency. To be eligible for certification, a reinsurer must be domiciled and licensed in a Qualified Jurisdiction as determined by the domestic regulator of the ceding insurer. A Qualified Jurisdiction not subject to an in-force Covered Agreement under the Dodd-Frank Act may also be determined to be a Reciprocal Jurisdiction, and reinsurers that have their head office or are domiciled in any such Reciprocal Jurisdiction will not be required to post reinsurance collateral, provided they meet the minimum capital and financial strength requirements and comply with the other requirements of the Credit for Reinsurance Models.

2. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions and Reciprocal Jurisdictions will be conducted in accordance with the provisions of the Credit for Reinsurance Models and any other relevant guidance developed by the NAIC.

3. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Financial Regulation Standards and Accreditation Program (Accreditation Program), adherence to international supervisory standards, and relevant international guidance for recognition of reinsurance supervision. It is not intended as a prescriptive comparison to the NAIC Accreditation Program. In order for a Qualified Jurisdiction that is not subject to an in-force Covered Agreement to be evaluated as a Reciprocal Jurisdiction, that Qualified Jurisdiction must agree to recognize the states’ approach to group supervision, including group capital, and other such requirements as provided under the Credit for Reinsurance Models.

4. The states shall evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the Qualified Jurisdiction, both initially and on an ongoing basis, and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of Qualified Jurisdiction status is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

5. Each state may evaluate a non-U.S. jurisdiction to determine if it is a Qualified Jurisdiction. A list of Qualified Jurisdictions will be published through the NAIC committee process. A state must consider this list in its determination of Qualified Jurisdictions, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Qualified Jurisdictions contained in the Credit for Reinsurance Models. The creation of this list does not constitute a delegation of regulatory authority to the NAIC. The regulatory authority to recognize a Qualified Jurisdiction resides solely in each state and the NAIC List of Qualified Jurisdictions is not binding on the states.

6. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models.
7. In order to facilitate multi-state recognition of assuming insurers and to encourage uniformity among the states, the NAIC has initiated a process called “passporting” under which the commissioner has the discretion to defer to another state’s determination that a jurisdiction is a Qualified or Reciprocal Jurisdiction. Passporting is based upon individual state regulatory authority, and states are encouraged to act in a uniform manner in order to facilitate the passporting process. States are also encouraged to utilize the passporting process to reduce the amount of documentation filed with the states and reduce duplicate filings. The NAIC Lists of Qualified and Reciprocal Jurisdictions are intended to facilitate the passporting process.

8. Both Qualified Jurisdictions and Reciprocal Jurisdictions must agree to share information and cooperate with the state with respect to all applicable reinsurers domiciled within that jurisdiction. Critical factors in the evaluation process include but are not limited to the history of performance by assuming insurers in the applicant jurisdiction and any documented evidence of substantial problems with the enforcement of final U.S. judgments in the applicant jurisdiction. A jurisdiction will not be a Qualified Jurisdiction if the commissioner has determined that it does not adequately and promptly enforce final U.S. judgments or arbitration awards.

9. The determination of Qualified Jurisdiction status can only be made with respect to the reinsurance supervisory system in existence and applied by a non-U.S. jurisdiction at the time of the evaluation.

10. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.
III. Procedure for Evaluation of Non-U.S. Jurisdictions

   a. Priority will be given to requests from the states and from those jurisdictions specifically requesting an evaluation by the NAIC.
   b. Formal notification of the NAIC’s intent to initiate the evaluation process will be sent by the NAIC to the reinsurance supervisory authority in the jurisdiction selected, with copies to the FIO and other relevant federal authorities as appropriate. The NAIC will issue public notice on the NAIC website upon confirmation that the jurisdiction is willing to participate in the evaluation process. The NAIC will at this time request public comments with respect to consideration of the jurisdiction as a Qualified Jurisdiction. The process of evaluation and all related documentation are private and confidential matters between the NAIC and the applicant jurisdiction, unless otherwise provided in this document, subject to a preliminary confidentiality and information sharing agreement between the NAIC, relevant states and the applicant jurisdiction.
   c. Relevant U.S. state and federal authorities will be notified of the NAIC’s decision to evaluate a jurisdiction.

2. Evaluation of Jurisdiction
   a. Evaluation Materials. The Qualified Jurisdiction Working Group will initiate evaluation of a jurisdiction’s regulatory system by using the information identified in Section A through Section G of the Evaluation Methodology (Evaluation Materials). The Qualified Jurisdiction Working Group will begin by undertaking a review of the most recent Financial Sector Assessment Program (FSAP) Report prepared by the International Monetary Fund (IMF), including the Technical Note on Insurance Sector Supervision, and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Qualified Jurisdiction Working Group will also invite each jurisdiction or its designee to provide information relative to Section A through Section G of the Evaluation Methodology in order to update, complete or supplement publicly available information. The Qualified Jurisdiction Working Group may also request or accept relevant information from reinsurers domiciled in the jurisdiction under review.
   b. The Qualified Jurisdiction Working Group will notify the jurisdiction of any information upon which the Working Group is relying. In that communication, the NAIC will invite the supervisory authority to compare the materials identified by the NAIC to the materials described in Appendix A and Appendix B, and provide information required to update the identified public information or supplement the public information, as required, to address the topics identified in Section A through Section G of the Evaluation Methodology. The use of publicly available information (e.g., the FSAP Report and/or the Insurance Sector Technical Note) is intended to lessen the burden on applicant jurisdictions by requiring the production of information that is readily available, while still addressing substantive areas of inquiry detailed in the Evaluation Methodology. The Qualified Jurisdiction Working Group’s review at this stage will be focused on how the jurisdiction’s laws, regulations, administrative practices and procedures, and regulatory authorities regulate the financial solvency of its domestic reinsurers in comparison to key principles underlying the U.S. financial solvency framework\(^1\) and other factors set forth in the Evaluation Methodology.

---

\(^1\) The U.S. financial solvency framework is understood to refer to the key elements provided in the NAIC Financial Regulation Standards and Accreditation Program. Appendix A and Appendix B are derived from this framework.
c. After reviewing the Evaluation Materials, the Qualified Jurisdiction Working Group may request that the applicant jurisdiction submit supplemental information as necessary to determine whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. The Working Group will address specific questions directly with the jurisdiction related to items detailed in the Evaluation Methodology that are not otherwise addressed in the Evaluation Materials.

d. The NAIC will request that all responses from the jurisdiction being evaluated be provided in English. Any responses submitted with respect to a jurisdiction’s laws and regulations should be provided by a person qualified in that jurisdiction to provide such analyses and, in the case of statutory analysis, qualified to provide such legal interpretations, to ensure that the jurisdiction is providing an accurate description.

e. The NAIC does not intend to review confidential company-specific information in this process, and has focused the procedure on reviewing publicly available information. No confidential company-specific information shall be disclosed or disseminated during the course of the jurisdiction’s evaluation unless specifically requested, subject to appropriate confidentiality safeguards addressed in a preliminary confidentiality and information-sharing agreement. If no such agreement is executed or the jurisdiction is unable to enter into such an agreement under its regulatory authority, the NAIC will not accept any confidential company-specific information.

3. **NAIC Review of Evaluation Materials**

   a. NAIC staff and/or outside consultants with the appropriate knowledge, experience and expertise will review the jurisdiction’s Evaluation Materials.

   b. Expenses with respect to the evaluations will be absorbed within the NAIC budget. This will be periodically reviewed.

   c. Timeline for review. A project management approach will be developed with respect to the overall timeline applicable to each evaluation.

   d. Upon completing its review of the Evaluation Materials, the internal reviewer(s) will report initial findings to the Qualified Jurisdiction Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation. Copies of the initial findings may also be made available to FIO and other relevant federal authorities subject to appropriate confidentiality and information-sharing agreements being in place.
4. Discretionary On-site Review

a. The NAIC may ask the jurisdiction under consideration for the opportunity to perform an on-site review of the jurisdiction’s reinsurance supervisory system. Factors that the Qualified Jurisdiction Working Group will consider in determining whether an on-site review is appropriate include the completeness of the information provided by the jurisdiction under review, the general familiarity of the jurisdiction by the NAIC staff or other state regulators participating in the review based on prior conduct or dealings with the jurisdiction, and the results of other evaluations performed by other regulatory or supervisory organizations. If the review is performed, it will be coordinated through the NAIC, utilizing personnel with the appropriate knowledge, experience and expertise. Individual states may also request that representatives from their state be added to the review team.

b. The review team will communicate with the supervisory authority in advance of the on-site visit to clearly identify the objectives, expectations and procedures with respect to the review, as well as any significant issues or concerns identified within the review of the Evaluation Materials. Information to be considered during the on-site review includes, but is not limited to, the following:
   i. Interviews with supervisory authority personnel.
   ii. Review of organizational and personnel practices.
   iii. Any additional information beneficial to gaining an understanding of document and communication flows.

c. Upon completing the on-site review, the reviewer(s) will report initial findings to the Qualified Jurisdiction Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation.

5. Standard of Review

The evaluation is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction, that the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system, and that the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

6. Additional Information to be Considered as Part of Evaluation

The NAIC may also consider information from sources other than the jurisdiction under review. This information includes:

   a. Documents, reports and information from appropriate international, U.S. federal and U.S. state authorities.
   b. Public comments from interested parties.
   c. Rating agency information.
   d. Any other relevant information.
7. Preliminary Evaluation Report

a. NAIC staff and/or outside consultants will prepare a Preliminary Evaluation Report for review by the Qualified Jurisdiction Working Group. This preliminary report will be private and confidential (i.e., may only be reviewed by Working Group members, designated NAIC staff, consultants, the states, the FIO and other relevant federal authorities that specifically request to be kept apprised of this information, provided that such entities have entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction. Any outside consultants retained by the NAIC will be required to enter into a confidentiality and nondisclosure agreement.).

b. The report will be prepared in a consistent style and format to be developed by NAIC staff. It will contain detailed advisory information and recommendations with respect to the evaluation of the jurisdiction’s reinsurance supervisory system and the documented practices and procedures thereunder. The report will contain a recommendation as to whether the NAIC should recognize the jurisdiction as a Qualified Jurisdiction.

c. All workpapers and reports, including supporting documentation and data, produced as part of the evaluation process are the property of the NAIC and shall be maintained at the NAIC Central Office. In the event that the NAIC shall come into possession of any confidential information, the information shall be held subject to a confidentiality and information-sharing agreement, which will outline the appropriate actions necessary to protect the confidentiality of such information.

a. The Qualified Jurisdiction Working Group’s review of the Preliminary Evaluation Report will be held in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings.

b. The Qualified Jurisdiction Working Group will make a preliminary determination as to whether the jurisdiction under consideration satisfies the Standard of Review and is deemed acceptable to be included on the NAIC List of Qualified Jurisdictions. If the preliminary determination is that the jurisdiction should not be included on the NAIC List of Qualified Jurisdictions, the Qualified Jurisdiction Working Group will set forth its specific findings and identify those areas of concern with respect to this determination.

c. The results of the Preliminary Evaluation Report will be immediately communicated in written form to the supervisory authority of the jurisdiction under review.

a. Upon receipt of the Preliminary Evaluation Report, the supervisory authority will have an opportunity to respond to the initial findings and determination. This is not intended to be a formal appeals process that would initiate U.S. state administrative due process requirements.

b. The Qualified Jurisdiction Working Group will consider any response, and will proceed to prepare its Final Evaluation Report. The Qualified Jurisdiction Working Group will consider the Final Evaluation Report for approval in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings. This report will be approved upon an affirmative vote of a majority of the members in attendance at this meeting.
c. Upon approval of the Final Evaluation Report, the Qualified Jurisdiction Working Group will issue a public statement and a summary of its findings with respect to its determination. At this time, the Working Group will release the summary for public comment. The detailed report will be a confidential, regulator-only document. The report may be shared with any state indicating that it is considering relying on the NAIC List of Qualified Jurisdictions and has entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction.

10. NAIC Determination regarding List of Qualified Jurisdictions

a. Once the Qualified Jurisdiction Working Group has adopted its Final Evaluation Report, it will submit the summary of its findings and its recommendation to the Reinsurance (E) Task Force at an open meeting. Upon approval by the Reinsurance (E) Task Force, the summary and recommendation will be submitted to the Executive (EX) Committee and Plenary, as well as to the FIO, USTR and other relevant federal authorities for consultation purposes. Upon approval as a Qualified Jurisdiction by the Executive (EX) Committee and Plenary, the jurisdiction will be added to the NAIC List of Qualified Jurisdictions. The NAIC will maintain the List of Qualified Jurisdictions on its public website and in other appropriate NAIC publications.

b. In the event that a jurisdiction is not approved as a Qualified Jurisdiction, the supervisory authority will be eligible for reapplication at the discretion of the NAIC.

c. Upon final adoption of the Qualified Jurisdiction Working Group’s determination with respect to a jurisdiction, the Final Evaluation Report will be made available to individual U.S. state insurance regulators upon request and confirmation that the information contained therein will remain confidential.

11. Memorandum of Understanding (MOU)

a. A Qualified Jurisdiction must agree to share information and cooperate on a confidential basis with the U.S. state insurance regulatory authority with respect to all certified reinsurers domiciled within that jurisdiction.

b. The International Association of Insurance Supervisors (IAIS) Multilateral Memorandum of Understanding (MMoU) is the recommended method under which a Qualified Jurisdiction will agree to share information and cooperate with U.S. state insurance regulatory authorities. However, until such time as a state has been approved as a signatory to the MMoU by the IAIS, the state may rely on an MOU entered into by a “Lead State” designated by the NAIC. This Lead State will act as a conduit for information between the Qualified Jurisdiction and other states that have certified a reinsurer domiciled and licensed in that jurisdiction, and will share information with these states consistent with the terms governing the further sharing of information included in the applicable IAIS MMoU or bilateral MOU between the Lead State and the Qualified Jurisdiction and pursuant to the NAIC Master Information Sharing and Confidentiality Agreement. The jurisdiction must also confirm in writing that it is willing to permit this Lead State to act as the contact for purposes of obtaining information concerning its certified reinsurers, provided the Lead State share that information with the other states requesting the information consistent with the terms governing the further sharing of information included in the applicable IAIS MMoU or bilateral MOU between the Lead State and the Qualified Jurisdiction.

c. If a Qualified Jurisdiction has not been approved by the IAIS for use of the MMoU, it must enter into an MOU with a Lead State. The MOU will also provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions.
d. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.

12. Process for Evaluation after Initial Approval

a. The process for determining whether a non-U.S. jurisdiction is a Qualified Jurisdiction is ongoing and subject to periodic review. The Qualified Jurisdiction Working Group will perform a yearly review of Qualified Jurisdictions to determine whether there have been any significant changes over the prior year that might affect their status as Qualified Jurisdictions. This yearly review shall follow such abbreviated process as may be determined by the Qualified Jurisdiction Working Group to be appropriate.

b. Qualified Jurisdictions must provide the Qualified Jurisdiction Working Group with notice of any material change in the applicable reinsurance supervisory system that may affect the status of the Qualified Jurisdiction. A U.S. jurisdiction should also notify the Qualified Jurisdiction Working Group if it receives notice of any material change in the applicable reinsurance supervisory system, or any adverse developments with respect to enforcement of final U.S. judgments, that may affect the status of the Qualified Jurisdiction. Upon receipt of any such notice, the Qualified Jurisdiction Working Group will consider whether it is necessary to re-evaluate the status of the Qualified Jurisdiction.

c. If the Qualified Jurisdiction Working Group finds the jurisdiction to be out of compliance at any time with the requirements to be a Qualified Jurisdiction, the specific reasons will be documented in a report to the jurisdiction under review, and the status as a Qualified Jurisdiction may be placed on probation, suspended or revoked.

d. The Qualified Jurisdiction Working Group will monitor those jurisdictions that have been approved as Qualified Jurisdictions by individual states, but are not included on the NAIC List of Qualified Jurisdictions.

13. Review of Qualified Jurisdictions as Reciprocal Jurisdictions

a. In undertaking the evaluation of a Qualified Jurisdiction as a Reciprocal Jurisdiction, the Qualified Jurisdiction Working Group shall utilize such processes and procedures as outlined in the immediately-preceding paragraphs 1 – 12 of Section III. Procedure for Evaluation of Non-U.S. Jurisdictions such as the Qualified Jurisdiction Working Group deems is appropriate. Specifically, the Qualified Jurisdiction Working Group will use processes and procedures outlined in paragraph 1 (Initiation of Evaluation of the Reinsurance Supervisory System of an Individual Jurisdiction), paragraph 3 (NAIC Review of Evaluation Materials), paragraph 7 (Preliminary Evaluation Report), paragraph 8 (Review of Preliminary Evaluation Report), paragraph 9 (Opportunity to Respond to Preliminary Evaluation Report), paragraph 10 (NAIC Determination regarding List of Qualified Jurisdictions), paragraph 11 (Memorandum of Understanding) and paragraph 12 (Process for Evaluation after Initial Approval), as modified for use with Reciprocal Jurisdictions.

b. A Qualified Jurisdiction may not be reviewed for inclusion on the NAIC List of Reciprocal Jurisdictions, unless it has undergone the Evaluation Methodology outlined in Section IV, and remains in good standing with the NAIC as a Qualified Jurisdiction. The Qualified Jurisdiction Working Group may, if it determines an extended review period to be appropriate after its initial approval of a new Qualified Jurisdiction, defer consideration of that jurisdiction as a possible Reciprocal Jurisdiction until there has been sufficient United States experience with that jurisdiction and its Certified Reinsurers that the Working Group believes it is appropriate to progress from collateral reduction to collateral elimination. Nothing in this process requires a finding that a Qualified Jurisdiction meets the standards for recognition as a Reciprocal Jurisdiction, and
the Qualified Jurisdiction Working Group may base such recommendation on factors not specifically included in this process.

c. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the NAIC List of Reciprocal Jurisdictions. In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the NAIC List of Reciprocal Jurisdictions, the Qualified Jurisdiction Working Group shall undertake the following analysis in making its evaluation:

i. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in that jurisdiction is received by United States ceding insurers;

ii. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

iii. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the Qualified Jurisdiction;

iv. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC. This requirement may be satisfied by an MOU with a Lead State, which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

v. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in in Section 9C(2) and (3) of Model #786; i.e., must maintain minimum capital and surplus of no less than $250,000,000, and maintains on an ongoing basis the required minimum solvency or capital ratio, as applicable.
d. In order to satisfy the requirements of subsection (c) above, the chief insurance supervisor of the Qualified Jurisdiction being evaluated as a Reciprocal Jurisdiction may provide the NAIC with a written letter confirming, as follows:

[Jurisdiction] is a Qualified Jurisdiction under the NAIC Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786), and is currently in good standing on the NAIC List of Qualified Jurisdictions. As the lead insurance regulatory supervisor for [Jurisdiction], I hereby confirm to the National Association of Insurance Commissioners (NAIC) and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories the following:

- An insurer which has its head office or is domiciled in [Jurisdiction] shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in [Jurisdiction] is received by United States ceding insurers. [Jurisdiction] does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by [Jurisdiction] or as a condition to allow the ceding insurer to recognize credit for such reinsurance.

- [Jurisdiction] recognizes the U.S. state regulatory approach to group supervision and group capital, and confirms that insurance groups that are domiciled or maintain their worldwide headquarters in jurisdictions accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the [Jurisdiction].

- [Jurisdiction] confirms that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the [Jurisdiction].

- [Jurisdiction] will annually provide to the states confirmation that applicable assuming insurers domiciled in [Jurisdiction] maintain minimum capital and surplus of no less than $250,000,000, and maintain on an ongoing basis the required minimum solvency or capital ratio, as applicable.

- Finally, I confirm that [Jurisdiction] will immediately notify the NAIC upon any changes to the assurances provided in this letter.

e. The Qualified Jurisdiction Working Group will perform a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate, and will prepare for the review by the Reinsurance Task Force a Summary of Findings and Determination recommending that the Qualified Jurisdiction be recognized as a Reciprocal Jurisdiction. Upon approval by the Task Force, the Summary of Findings and Determination must be adopted by a vote of the NAIC Executive (EX) Committee and Plenary for inclusion on the List of Reciprocal Jurisdictions.
f. The Qualified Jurisdiction Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable equivalency assessment conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

g. Except for Reciprocal Jurisdictions entitled to automatic recognition, a jurisdiction’s status as a Reciprocal Jurisdiction may be placed on probation, suspended or revoked for good cause in the same manner as provided for Qualified Jurisdictions under paragraph 12. If cause is found to question the fitness of a Reciprocal Jurisdiction that is subject to an in-force covered agreement, or its compliance with applicable requirements of the covered agreement, the Qualified Jurisdiction Working Group would report any concerns to its parent Task Force for further discussion and communication with appropriate federal and/or international authorities.
IV. Evaluation Methodology

The Evaluation Methodology was developed to be consistent with the provisions of the NAIC Credit for Reinsurance Models. It is intended to provide an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. Although the methodology includes a comparison of the jurisdiction’s supervisory system to a number of key elements from the NAIC Accreditation Program, it is not intended as a prescriptive assessment under the NAIC Accreditation Program. Rather, the NAIC Accreditation Program simply provide the framework for the outcomes-based analysis. The NAIC will evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the jurisdiction and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of a Qualified Jurisdiction is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

The Evaluation Methodology consists of the following:

- Section A: Laws and Regulations
- Section B: Regulatory Practices and Procedures
- Section C: Jurisdiction’s Requirements Applicable to U.S.-Domiciled Reinsurers
- Section D: Regulatory Cooperation and Information Sharing
- Section E: History of Performance of Domestic Reinsurers
- Section F: Enforcement of Final U.S. Judgments
- Section G: Solvent Schemes of Arrangement

This information will be the basis for the Final Evaluation Report and the determination of whether the jurisdiction will be included on the NAIC List of Qualified Jurisdictions.
**Section A: Laws and Regulations**

The NAIC will review publicly available information, as well as information provided by an applicant jurisdiction with respect to its laws and regulations, in an effort to evaluate whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. This will include a review of elements believed to be basic building blocks for sound insurance/reinsurance regulation.\(^2\) A jurisdiction’s effectiveness under Section A may be demonstrated through law, regulation or established practice that implements the general authority granted to the jurisdiction, or any combination of laws, regulations or practices that meet the objective.

The Qualified Jurisdiction Working Group will initiate evaluation of a jurisdiction’s regulatory system by gathering and undertaking a review of the most recent FSAP Report, ROSC and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Qualified Jurisdiction Working Group will simultaneously invite each jurisdiction (or its designee) to provide information relative to Section A (and other sections, as relevant) to assist the NAIC in evaluating its laws and regulations. The NAIC will review this information in conjunction with Appendix A, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix A is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction is requested to address the following information, which the NAIC will consider, at a minimum, in determining whether the outcomes achieved by the jurisdiction’s laws and regulations meet an acceptable level of effectiveness for the jurisdiction to be included on the NAIC List of Qualified Jurisdictions:

1. Confirmation of the jurisdiction’s most recent FSAP Report, including relevant updates with respect to descriptions or elements of the FSAP Report in which changes have occurred since the assessment or where information might otherwise be outdated.

2. Confirmation of the jurisdiction’s ROSC, including relevant updates with respect to descriptions or elements of the ROSC in which changes have occurred since the report was completed or where information might otherwise be outdated.

3. If materials responsive to the topics under review have been provided in response to information exchanges between the jurisdiction under review and the NAIC, such prior responses may be cross-referenced provided updates are submitted, if required to address changes in laws or procedures.

4. Any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix A.

The NAIC will review the information provided by the applicant jurisdiction and determine whether it is adequate to reasonably conclude whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. After reviewing the initial submission, the NAIC may request that the applicant jurisdiction submit supplemental information as necessary in order to make this determination. An applicant jurisdiction is strongly encouraged to provide thorough, detailed and current information in its initial submission in order to 

---

\(^2\) The basic considerations under this section are derived from Model #786, Section 8C(2), which include: (a) the framework under which the assuming reinsurer is regulated; (b) the structure and authority of the jurisdiction’s reinsurance supervisory authority with regard to solvency regulation requirements and financial surveillance; (c) the substance of financial and operating standards for reinsurers domiciled in the jurisdiction; and (d) the form and substance of financial reports required to be filed or made publicly available by reinsurers domiciled in the jurisdiction and the accounting principles used.
minimize the number and extent of supplemental information requests from the NAIC with respect to Section A of this Evaluation Methodology. The NAIC will provide a complete description in the Final Evaluation Report of the information provided in the Evaluation Materials, and any updates or other information that have been provided by the applicant jurisdiction.

**Section B: Regulatory Practices and Procedures**

Section B is intended to facilitate an evaluation of whether the jurisdiction effectively employs baseline regulatory practices and procedures to supplement and support enforcement of the jurisdiction’s financial solvency laws and regulations described in Section A. This evaluation methodology recognizes that variation may exist in practices and procedures across jurisdictions due to the unique situations each jurisdiction faces. Jurisdictions differ with respect to staff and technology resources that are available, as well as the characteristics of the domestic industry regulated. A determination of effectiveness may be achieved using various financial solvency oversight practices and procedures. This evaluation is not intended to be prescriptive in nature.

The NAIC will utilize the information provided by the jurisdiction as outlined under Section A in completing this section of the evaluation. The NAIC will review this information in conjunction with Appendix B, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix B is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction should also provide any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix B.

**Section C: Jurisdiction’s Requirements Applicable to U.S. Domiciled Reinsurers**

The jurisdiction is requested to describe and explain the rights, benefits and the extent of reciprocal recognition afforded by the non-U.S. supervisory authority to reinsurers licensed and domiciled in the U.S.

**Section D: Regulatory Cooperation and Information-Sharing**

The Credit for Reinsurance Models require the supervisory authority to share information and cooperate with the U.S. state insurance regulators with respect to all certified reinsurers domiciled within their jurisdiction. The jurisdiction is requested to provide an explanation of the supervisory authority’s ability to cooperate, share information and enter into an MOU with U.S. state insurance regulators and confirm that they are willing to enter into an MOU. This should include information with respect to any existing MOU with U.S. state and/or federal authorities that pertain to reinsurance. Both the jurisdiction and the states may rely on the IAIS MMoU to satisfy this requirement, and any states that have not yet been approved by the IAIS as a signatory to the MMoU may rely on an MOU entered into by a Lead State with the jurisdiction until such time that the state has been approved as a signatory to the IAIS MMoU. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.

**Section E: History of Performance of Domestic Reinsurers**

The jurisdiction is requested to provide a general description with respect to the historical performance of reinsurers domiciled in the jurisdiction. The NAIC does not intend to review confidential company-specific information under this section. Rather, it is intended that any information provided would be publicly available, unless specifically addressed with the jurisdiction under review. This discussion should address, at a minimum, the following information:
a. Number of reinsurers domiciled in the jurisdiction, and a list of any reinsurers domiciled in the jurisdiction that have and maintain, on an ongoing basis, minimum capital and surplus, or its equivalent, of no less than $250,000,000.

b. Up to a 10-year history of any regulatory actions taken against specific reinsurers.

c. Up to a 10-year history listing any reinsurers that have gone through insolvency proceedings, including the size of each insolvency and a description of the related outcomes (e.g., reinsurer rehabilitated or liquidated, payout percentage of claims to priority classes, payout percentage of claims to domestic and foreign claimants).

d. Up to a 10-year history of any significant industry-wide fluctuations in capital or profitability with respect to domestic reinsurers.

Drafting Note: The NAIC will determine the appropriate time period for review on a case-by-case basis with respect to this information.

Section F: Enforcement of Final U.S. Judgments

The NAIC has previously collected information from a number of jurisdictions with respect to enforcement of final U.S. judgments. The jurisdiction is also requested to provide a current description or explanation of any restrictions with respect to the enforcement of final foreign judgments in the jurisdiction. Based on the foregoing information, the NAIC will make an assessment of the effectiveness of the ability to enforce final U.S. judgments in the jurisdiction. This will include a review of the status, interpretations, application and enforcement of various treaties, conventions and international agreements with respect to final judgments, arbitration and choice of law. The Qualified Jurisdiction Working Group will monitor the enforcement of final U.S. judgments and the Qualified Jurisdiction is requested to notify the NAIC of any developments in this area.

Section G: Solvent Schemes of Arrangement

The jurisdiction is requested to provide a description of any legal framework that allows reinsurers domiciled in the jurisdiction to propose or participate in any solvent scheme of arrangement or similar procedure. In addition, the jurisdiction is requested to provide a description of any solvent scheme of arrangement or similar procedure that a domestic reinsurer has proposed or participated in and the outcome of such procedure.
V. Appendices: Specific Guidance with Respect to Section A and Section B

It is important to note that Part IV, Section A: Laws and Regulations, and Part IV, Section B: Regulatory Practices and Procedures, are derived from the NAIC Financial Regulation Standards and Accreditation Program, which is intended to establish and maintain standards to promote sound insurance company financial solvency regulation among the U.S. states. As such, the NAIC Accreditation Program requires the states to employ laws, regulations and administrative policies and procedures substantially similar to the NAIC accreditation standards in order to be considered an accredited state.

However, it is not the intent of the Evaluation Methodology to require applicant jurisdictions to meet the standards required by the NAIC for accreditation. Instead, Section A and Section B (and their corresponding appendices) are intended to provide a framework to facilitate an outcomes-based evaluation by the NAIC and state insurance regulators of the effectiveness of the jurisdiction’s supervisory authority. This framework consists of a description of the jurisdiction’s laws, regulations, practices and procedures applicable to the supervision of its domestic reinsurers. The amount of detail provided within these appendices should not be interpreted as specific requirements that must be met by the applicant jurisdiction. Rather, the information is intended to provide direction to the applicant jurisdiction in an effort to facilitate a complete response and increase the efficiency and timeliness of the evaluation process.
Appendix A: Laws and Regulations

1. Examination Authority

Does the jurisdiction have the authority to examine its domestic reinsurers? This description should address the following:

a. Frequency and timing of examinations and reports.

b. Guidelines for examination.

c. Whether the jurisdiction has the authority to examine reinsurers whenever it is deemed necessary.

d. Whether the jurisdiction has the authority to have complete access to the reinsurer’s books and records and, if necessary, the records of any affiliated company.

e. Whether the jurisdiction has the authority to examine officers, employees and agents of the reinsurer when necessary with respect to transactions directly or indirectly related to the reinsurer under examination.

f. Whether the jurisdiction has the authority to share confidential information with U.S. state insurance regulatory authorities, provided that the recipients are required, under their law, to maintain its confidentiality.

2. Capital and Surplus Requirement

Does the jurisdiction have the authority to require domestic reinsurers to maintain a minimum level of capital and surplus to transact business? This description should address the following:

a. Whether the jurisdiction has the authority to require reinsurers to maintain minimum capital and surplus, including a description of such minimum amounts.

b. Whether the jurisdiction has the authority to require additional capital and surplus based on the type, volume and nature of reinsurance business transacted.

c. Capital requirements for reinsurers, including reports and a description of any specific levels of regulatory intervention.

3. Accounting Practices and Procedures

Does the jurisdiction have the authority to require domestic reinsurers to file appropriate financial statements and other financial information? This description should address the following:

a. Description of the accounting and reporting practices and procedures.

b. Description of any standard financial statement blank/reporting template, including description of content/disclosure requirements and corresponding instructions.

4. Corrective Action

Does the jurisdiction have the authority to order a reinsurer to take corrective action or cease and desist certain practices that, if not corrected or terminated, could place the reinsurer in a hazardous financial condition? This description should address the following:

a. Identification of specific standards which may be considered to determine whether the continued operation of the reinsurer might be hazardous to the general public.

b. Whether the jurisdiction has the authority to issue an order requiring the reinsurer to take corrective action when it has been determined to be in hazardous financial condition.
5. Regulation and Valuation of Investments

What authority does the jurisdiction have with respect to regulation and valuation of investments? This description should address the following:

a. Whether the jurisdiction has the authority to require a diversified investment portfolio for all domestic reinsurers as to type, issue and liquidity.

b. Whether the jurisdiction has the authority to establish acceptable practices and procedures under which investments owned by reinsurers must be valued, including standards under which reinsurers are required to value securities/investments.

6. Holding Company Systems

Does the jurisdiction have laws or regulations with respect to supervision of the group holding company systems of reinsurers? This description should address the following:

a. Whether the jurisdiction has access to information via the parent or other regulated group entities about activities or transactions within the group involving other regulated or non-regulated entities that could have a material impact on the operations of the reinsurer.

b. Whether the jurisdiction has access to consolidated financial information of a reinsurer’s ultimate controlling person.

c. Whether the jurisdiction has the authority to review integrity and competency of management.

d. Whether the jurisdiction has approval and intervention powers for material transactions and events involving reinsurers.

e. Whether the jurisdiction has authority to monitor, or has prior approval authority over:
   i. Change in control of domestic reinsurers.
   ii. Dividends and other distributions to shareholders of the reinsurer.
   iii. Material transactions with affiliates.

7. Risk Management

Does the jurisdiction have the authority to require its domestic reinsurers to maintain an effective risk-management function and practices? This description should address the following:

a. Whether the jurisdiction has Own Risk and Solvency Assessment (ORSA) requirements and reporting.

b. Any requirements regarding the maximum net amount of risk to be retained by a reinsurer for an individual risk based on the reinsurer’s capital and surplus.

c. Whether the jurisdiction has authority to monitor enterprise risk, including any activity, circumstance, event (or series of events) involving one or more affiliates of a reinsurer that, if not remedied promptly, is likely to have a material adverse effect on the financial condition or liquidity of the reinsurer or its insurance holding company system as a whole.

d. Whether the jurisdiction has corporate governance requirements for reinsurers.
8. **Liabilities and Reserves**

Does the jurisdiction have standards for the establishment of liabilities and reserves (technical provisions) resulting from reinsurance contracts? This description should address the following:

a. Liabilities incurred under reinsurance contracts for policy reserves, unearned premium, claims and losses unpaid, and incurred but not reported (IBNR) claims (including whether discounting is allowed for reserve calculation/reporting).

b. Liabilities related to catastrophic occurrences.

c. Whether the jurisdiction requires an opinion on reserves and loss and loss adjustment expense reserves by a qualified actuary or specialist for all domestic reinsurers, and the frequency of such reports.

9. **Reinsurance Ceded**

What are the jurisdiction’s requirements with respect to the financial statement credit allowed for reinsurance retroceded by its domestic reinsurers? This description should address the following:

a. Credit for reinsurance requirements applicable to reinsurance retroceded to domestic and non-domestic reinsurers.

b. Collateral requirements applicable to reinsurance contracts.

c. Whether the jurisdiction requires a reinsurance agreement to provide for insurance risk transfer (i.e., transfer of both underwriting and timing risk).

d. Requirements applicable to special purpose reinsurance vehicles and insurance securitizations.

e. Affiliated reinsurance transactions and concentration risk.

f. Disclosure requirements specific to reinsurance transactions, agreements and counterparties, if such information is not provided under another item.

10. **Independent Audits**

Does the jurisdiction require annual audits of domestic reinsurers by independent certified public accountants or similar accounting/auditing professional recognized in the applicant jurisdiction? This description should address the following:

a. Requirements for the filing of audited financial statements prepared in conformity with accounting practices prescribed or permitted by the supervisory authority.

b. Contents of annual audited financial reports.

c. Requirements for selection of auditor.

d. Allowance of audited consolidated or combined financial statements.

e. Notification of material misstatements of financial condition.

f. Supervisor’s access to auditor’s workpapers.

g. Audit committee requirements.

h. Requirements for reporting of internal control-related matters.

11. **Receivership**

Does the jurisdiction have a receivership scheme for the administration of reinsurers found to be insolvent? This should include a description of any liquidation priority afforded to policyholders and the liquidation priority of reinsurance obligations to domestic and non-domestic ceding insurers in the context of an insolvency proceeding of a reinsurer.
12. Filings with Supervisory Authority

Does the jurisdiction require the filing of annual and interim financial statements with the supervisory authority? This description should address the following:

   a. The use of standardized financial reporting in the financial statements, and the frequency of relevant updates.
   b. The use of supplemental data to address concerns with specific companies or issues.
   c. Filing format (e.g., electronic data capture).
   d. The extent to which financial reports and information are public records.

13. Reinsurance Intermediaries

Does the jurisdiction have a regulatory framework for the regulation of reinsurance intermediaries?

14. Other Regulatory Requirements with respect to Reinsurers

Any other information necessary to adequately describe the effectiveness of the jurisdiction’s laws and regulations with respect to its reinsurance supervisory system.
Appendix B: Regulatory Practices and Procedures

1. Financial Analysis

What are the jurisdiction’s practices and procedures with respect to the financial analysis of its domestic reinsurers? Such description should address the following:

a. Qualified Staff and Resources
   The resources employed to effectively review the financial condition of all domestic reinsurers, including a description of the educational and experience requirements for staff responsible for financial analysis.

b. Communication of Relevant Information to/from Financial Analysis Staff
   The process under which relevant information and data received by the supervisory authority are provided to the financial analysis staff and the process under which the findings of the financial analysis staff are communicated to the appropriate person(s).

c. Supervisory Review
   How the jurisdiction’s internal financial analysis process provides for supervisory review and comment.

d. Priority-Based Analysis
   How the jurisdiction’s financial analysis procedures are prioritized in order to ensure that potential problem reinsurers are reviewed promptly.

e. Depth of Review
   How the jurisdiction’s financial analysis procedures ensure that domestic reinsurers receive an appropriate level or depth of review commensurate with their financial strength and position.

f. Analysis Procedures
   How the jurisdiction has documented its financial analysis procedures and/or guidelines to provide for consistency and continuity in the process and to ensure that appropriate analysis procedures are being performed on each domestic reinsurer.

g. Reporting of Material Adverse Findings
   The process for reporting material adverse indications, including the determination and implementation of appropriate regulatory action.

h. Early Warning System/Stress Testing
   Whether the jurisdiction has an early warning system and/or stress testing methodology that is utilized with respect to its domestic reinsurers.
2. Financial Examinations

What are the jurisdiction’s practices and procedures with respect to the financial examinations of its domestic reinsurers? Such description should address the following:

a. Qualified Staff and Resources
   The resources employed to effectively examine all domestic reinsurers. This should include whether the jurisdiction prioritizes examination scheduling and resource allocation commensurate with the financial strength and position of each reinsurer, and a description of the educational and experience requirements for staff responsible for financial examinations.

b. Communication of Relevant Information to/from Examination Staff
   The process under which relevant information and data received by the supervisory authority are provided to the examination staff and the process under which the findings of the examination staff are communicated to the appropriate person(s).

c. Use of Specialists
   Whether the supervisory authority’s examination staff includes specialists with appropriate training and/or experience or whether the supervisory authority otherwise has available qualified specialists that will permit the supervisory authority to effectively examine any reinsurer.

d. Supervisory Review
   Whether the supervisory authority’s procedures for examinations provide for supervisory review.

e. Examination Guidelines and Procedures
   Description of the policies and procedures the supervisory authority employs for the conduct of examinations, including whether variations in methods and scope are commensurate with the financial strength and position of the reinsurer.

f. Risk-Focused Examinations
   Does the supervisory authority perform and document risk-focused examinations and, if so, what guidance is utilized in conducting the examinations? Are variations in method and scope commensurate with the financial strength and position of the reinsurer?

g. Scheduling of Examinations
   Whether the supervisory authority’s procedures provide for the periodic examination of all domestic reinsurers, including how the system prioritizes reinsurers that exhibit adverse financial trends or otherwise demonstrate a need for examination.

h. Examination Reports
   Description of the format in which the supervisory authority’s reports of examinations are prepared, and how the reports are shared with other jurisdictions under information-sharing agreements.

i. Action on Material Adverse Findings
   What are the jurisdiction’s procedures regarding supervisory action in response to the reporting of any material adverse findings.

3. Information Sharing

Does the jurisdiction have a process for the sharing of otherwise confidential documents, materials, information, administrative or judicial orders, or other actions with U.S. state regulatory officials, provided that the recipients are required, under their law, to maintain its confidentiality?
4. **Procedures for Troubled Reinsurers**

What procedures does the jurisdiction follow with respect to troubled reinsurers?

5. **Organization, Licensing and Change of Control of Reinsurers**

What processes does the supervisory authority use to identify unlicensed or fraudulent activities? The description should address the following:

a. **Licensing Procedure**
   Whether the supervisory authority has documented licensing procedures that include a review and/or analysis of key pieces of information included in a primary licensure application.

b. **Staff and Resources**
   The educational and experience requirements for staff responsible for evaluating company licensing.

c. **Change in Control of a Domestic Reinsurer**
   Procedures for the review of key pieces of information included in filings with respect to a change in control of a domestic reinsurer.

Summary of Findings and Determination

BERMUDA MONETARY AUTHORITY

Re-Evaluation of Qualified Jurisdiction

Approved By:

Qualified Jurisdiction (E) Working Group
Reinsurance (E) Task Force
Executive (EX) Committee and Plenary

October 7, 2019
December 8, 2019
December 10, 2019

© 2019 National Association of Insurance Commissioners
I. Re-Evaluation of Bermuda Monetary Authority

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to the Bermuda Monetary Authority (BMA), the lead insurance regulatory supervisor for Bermuda. It is the recommendation of the Working Group that the NAIC re-approve the BMA as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that the BMA’s status as a Qualified Jurisdiction only be applicable to (re)insurers of Class 3A, Class 3B and Class 4, and long-term insurers of Class C, Class D and Class E, which is consistent with the original approval of the BMA as a Qualified Jurisdiction. Finally, the Working Group recommends that Florida be the Lead State for purposes of regulatory cooperation and information sharing with the BMA. These recommendations are based on the following analysis:

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.\(^1\)

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved the BMA as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the BMA would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

> Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

---

\(^1\) The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under a separate evaluation by the Working Group.
The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on October 7, 2019, and received a presentation from NAIC staff on whether the BMA should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of the BMA:

2. BMA Power Point Presentation on Group and Commercial Insurer Supervision (Confidential).
3. BMA Power Point Presentation on Legal Entity/Group Supervision Framework (Confidential).
4. BMA NAIC Qualified Jurisdiction Assessment: Summary of Appendices A & B, September 30, 2019 (Confidential).
5. Bermuda Response to Section D—Regulatory Cooperation and Information Sharing (Confidential).
8. Bermuda Response to Section G—Solvent Schemes of Arrangement (Confidential).
9. International Association of Insurance Supervisors Thematic Self-Assessment and Peer Review on Reinsurance and Macroprudential Surveillance (ICPs 13 and 24), September 19, 2016 (Confidential).

III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other public documentation that the Working Group would consider to be relevant to this determination. It should be noted that the BMA’s last FSAP report was in 2008; therefore, the BMA supplied additional information (described above) to provide the Working
Group with an accurate understanding of its supervisory regulatory regime deemed equal to the level of an IMF FSAP report. The Working Group also reviewed a confidential self-assessment and peer review on the BMA prepared by the International Association of Insurance Supervisors. In addition, the Working Group considered its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that the BMA’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency regulation that is acceptable for purposes of reinsurance collateral reduction, that the BMA’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize the BMA as a Qualified Jurisdiction and place it on the NAIC List of Qualified Jurisdictions, with such re-evaluation to be effective as of January 1, 2020. Further, the Working Group recommends that the BMA’s status as a Qualified Jurisdiction continues to be only applicable to (re)insurers of Class 3A, Class 3B and Class 4, and long-term insurers of Class C, Class D and Class E.
Summary of Findings and Determination

France: Autorité de Contrôle Prudentiel et de Résolution (ACPR)

Re-Evaluation of Qualified Jurisdiction

Approved By:

Qualified Jurisdiction (E) Working Group August 22, 2019
Reinsurance (E) Task Force October 22, 2019
Executive (EX) Committee and Plenary December 10, 2019
I.  Re-Evaluation of France as a Qualified Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Autorité de Contrôle Prudentiel et de Résolution (ACPR), the lead insurance regulatory supervisor for France. It is the recommendation of the Working Group that the NAIC re-approve the ACPR as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that Delaware be the Lead State for purposes of regulatory cooperation and information sharing with the ACPR. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.1

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved the ACPR as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the ACPR would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

> Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on August 22, 2019, and heard a presentation by NAIC staff

---

1 The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. Because the ACPR’s status as a Reciprocal Jurisdiction arises under a covered agreement under the Dodd-Frank Wall Street Reform and Consumer Protection Act, it is not affected by this re-evaluation of the ACPR as a Qualified Jurisdiction.
on whether the ACPR should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of the ACPR:

3. *Summary of Findings and Determination France: Autorité de Contrôle Prudentiel et de Résolution (ACPR) approved by NAIC Executive (EX) Committee and Plenary on December 16, 2014.*

4. *NAIC Staff Workpapers on Initial Review and Findings dated August 7, 2014 (Confidential).*

### III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

### IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that the ACPR’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency regulation that is acceptable for purposes of reinsurance collateral reduction, that the ACPR’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize the ACPR as a Qualified Jurisdiction and place it on the *NAIC List of Qualified Jurisdictions*, with such re-evaluation to be effective as of January 1, 2020.
Summary of Findings and Determination

Germany: Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin)

Re-Evaluation of Qualified Jurisdiction

Approved By:

Qualified Jurisdiction (E) Working Group  August 22, 2019
Reinsurance (E) Task Force  October 22, 2019
Executive (EX) Committee and Plenary  December 10, 2019
I. Re-Evaluation of Germany as a Qualified Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin), the lead insurance regulatory supervisor for Germany. It is the recommendation of the Working Group that the NAIC re-approve BaFin as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that California be the Lead State for purposes of regulatory cooperation and information sharing with BaFin. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.1

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved BaFin as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which BaFin would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on August 22, 2019, and heard a presentation by NAIC staff

1 The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. Because BaFin’s status as a Reciprocal Jurisdiction arises under a covered agreement under the Dodd-Frank Wall Street Reform and Consumer Protection Act, it is not affected by this re-evaluation of BaFin as a Qualified Jurisdiction.
on whether BaFin should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of BaFin:

3. Summary of Findings and Determination Germany: Federal Financial Supervisory Authority (BaFin) approved by NAIC Executive (EX) Committee and Plenary on December 16, 2014.
5. BaFin Comment Letter (Sept. 30, 2019): “The planned amendment of § 67 (1) VAG with respect to the exemption from the license requirement in cases where the EU has concluded an agreement is now part of another legislative procedure (implementation of the Money Laundering Directive)...the leaflet describes the situation for US reinsurers with the sufficient legal clarity”: https://www.bafin.de/dok/13008940

III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that BaFin’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency regulation that is acceptable for purposes of reinsurance collateral reduction, that BaFin’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.
Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize BaFin as a Qualified Jurisdiction and place it on the *NAIC List of Qualified Jurisdictions*, with such re-evaluation to be effective as of January 1, 2020.
Summary of Findings and Determination

Ireland: Central Bank of Ireland

Re-Evaluation of Qualified Jurisdiction

Approved By:

Qualified Jurisdiction (E) Working Group  August 22, 2019
Reinsurance (E) Task Force  October 22, 2019
Executive (EX) Committee and Plenary  December 10, 2019
I. Re-Evaluation of Ireland as a Qualified Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Central Bank of Ireland (Central Bank), the lead insurance regulatory supervisor for Ireland. It is the recommendation of the Working Group that the NAIC re-approve the Central Bank as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that Delaware be the Lead State for purposes of regulatory cooperation and information sharing with the Central Bank. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.\(^1\)

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved the Central Bank as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the Central Bank would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

> Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on August 22, 2019, and heard a presentation by NAIC staff.

\(^1\) The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. Because the Central Bank’s status as a Reciprocal Jurisdiction arises under a covered agreement under the Dodd-Frank Wall Street Reform and Consumer Protection Act, it is not affected by this re-evaluation of the Central Bank as a Qualified Jurisdiction.
on whether the Central Bank should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of the Central Bank:

4. Summary of Findings and Determination Central Bank of Ireland approved by NAIC Executive (EX) Committee and Plenary on December 16, 2014.
5. NAIC Staff Workpapers on Initial Review and Findings dated July 25, 2014 (Confidential).

III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that the Central Bank’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency regulation that is acceptable for purposes of reinsurance collateral reduction, that the Central Bank’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.
Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize the Central Bank as a Qualified Jurisdiction and place it on the *NAIC List of Qualified Jurisdictions*, with such re-evaluation to be effective as of January 1, 2020.
Summary of Findings and Determination

Japan:
Financial Services Agency (FSA)

Re-Evaluation of Qualified Jurisdiction

Approved By:

Qualified Jurisdiction (E) Working Group          October 7, 2019
Reinsurance (E) Task Force                         December 8, 2019
Executive (EX) Committee and Plenary              December 10, 2019
I. Re-Evaluation of Financial Services Agency of Japan

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Financial Services Agency (FSA), the lead insurance regulatory supervisor for Japan. It is the recommendation of the Working Group that the NAIC re-approve the FSA as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that California continue to be the Lead State for purposes of regulatory cooperation and information sharing with the FSA. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.¹

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved the FSA as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the FSA would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on October 7, 2019, and heard a presentation by NAIC staff.

¹ The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under a separate evaluation by the Working Group.
on whether the FSA should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of the FSA:

6. *Summary of Findings and Determination Japan: Financial Services Agency (FSA) approved by NAIC Executive (EX) Committee and Plenary on December 16, 2014.*

7. *NAIC Staff Workpapers on Initial Review and Findings dated September 30, 2014 (Confidential).*

III. **Standard of Review**

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

IV. **Summary of Findings and Recommendation**

Upon review of the available information, the Working Group has reached the conclusion that the JSA’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency
regulation that is acceptable for purposes of reinsurance collateral reduction, that the JSA’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize the JSA as a Qualified Jurisdiction and place it on the **NAIC List of Qualified Jurisdictions**, with such re-evaluation to be effective as of January 1, 2020.
Summary of Findings and Determination

Switzerland:
Financial Market Supervisory Authority (FINMA)

Re-Evaluation of Qualified Jurisdiction

Approved By:
Qualified Jurisdiction (E) Working Group  October 7, 2019
Reinsurance (E) Task Force  December 8, 2019
Executive (EX) Committee and Plenary  December 10, 2019
I. Re-Evaluation of Switzerland: Financial Market Supervisory Authority

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Financial Market Supervisory Authority (FINMA), the lead insurance regulatory supervisor for Switzerland. It is the recommendation of the Working Group that the NAIC re-approve FINMA as a Qualified Jurisdiction and continue its designation on the *NAIC List of Qualified Jurisdictions*, to be effective as of January 1, 2020. Further, the Working Group recommends that Missouri be the Lead State for purposes of regulatory cooperation and information sharing with FINMA. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the *Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions* (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the *Credit for Reinsurance Model Law* (#785) and *Credit for Reinsurance Model Regulation* (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.¹

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved FINMA as a Qualified Jurisdiction and placed it on the *NAIC List of Qualified Jurisdictions*, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which FINMA would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

> Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the *NAIC List of Qualified Jurisdictions*. The Working Group met in regulator-to-regulator session on October 7, 2019, and heard a presentation by NAIC staff...

---

¹ The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under a separate evaluation by the Working Group.
on whether FINMA should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of FINMA:

7. *NAIC Staff Workpapers on Initial Review and Findings dated August 5, 2014 (Confidential).*

### III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

### IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that FINMA’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency
regulation that is acceptable for purposes of reinsurance collateral reduction, that FINMA’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize FINMA as a Qualified Jurisdiction and place it on the *NAIC List of Qualified Jurisdictions*, with such re-evaluation to be effective as of January 1, 2020.

I. Re-Evaluation of the United Kingdom as a Qualified Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to its re-evaluation of the Prudential Regulation Authority of the Bank of England (PRA), the lead insurance regulatory supervisor for the United Kingdom (UK). It is the recommendation of the Working Group that the NAIC re-approve the PRA as a Qualified Jurisdiction and continue its designation on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that New York be the Lead State for purposes of regulatory cooperation and information sharing with the PRA. These recommendations are based on the following analysis.

II. Procedural History

The NAIC adopted the Process for Developing and Maintaining the NAIC List of Qualified Jurisdictions (Qualified Jurisdiction Process) on August 27, 2013 (which was further amended on August 19, 2014). The 2011 revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) require an assuming insurer to be licensed and domiciled in a Qualified Jurisdiction in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes.¹

On December 16, 2014, the NAIC Executive (EX) Committee and Plenary approved the PRA as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the PRA would be re-evaluated under the provisions of the Qualified Jurisdiction Process. Specifically, paragraph III(12)(c) of the Qualified Jurisdiction Process currently provides, as follows:

> Once approved, a Qualified Jurisdiction is subject to a re-evaluation every five years. The Periodic Evaluation may follow a similar process as that set forth above, or such abbreviated process as the Qualified Jurisdiction Working Group may deem appropriate. [Emphasis added].

The Working Group has determined that it would follow such an abbreviated process in its re-evaluations of the jurisdictions currently on the NAIC List of Qualified Jurisdictions. The Working Group met in regulator-to-regulator session on August 22, 2019, and heard a presentation by NAIC staff.

¹ The Credit for Reinsurance Models were further revised on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. Because the PRA’s status as a Reciprocal Jurisdiction arises under a covered agreement under the Dodd-Frank Wall Street Reform and Consumer Protection Act, it is not affected by this re-evaluation of the PRA as a Qualified Jurisdiction.
on whether the PRA should be re-approved as a Qualified Jurisdiction. The Working Group considered the following information with respect to the re-evaluation of the PRA:

4. *NAIC Staff Workpapers on Initial Review and Findings dated July 22, 2014 (Confidential).*

### III. Standard of Review

The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction. In addition, the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system and the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

This same standard was deemed appropriate by the Working Group with respect to the re-evaluation of a Qualified Jurisdiction under the abbreviated process. Specifically, the Working Group determined that it would be appropriate to review a jurisdiction’s most recent IMF report prepared under its Financial Sector Assessment Program (FSAP), and any other documentation that the Working Group would consider to be relevant to this determination. In addition, the Working Group would consider its past experience in working with the Qualified Jurisdiction and any certified reinsurers domiciled in the Qualified Jurisdiction.

### IV. Summary of Findings and Recommendation

Upon review of the available information, the Working Group has reached the conclusion that the PRA’s reinsurance supervisory system continues to achieve a level of effectiveness in financial solvency regulation that is acceptable for purposes of reinsurance collateral reduction, that the PRA’s demonstrated practices and procedures with respect to reinsurance supervision continue to be consistent with its reinsurance supervisory system, and that its laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

Therefore, it is the recommendation of the Working Group that the NAIC continue to recognize the PRA as a Qualified Jurisdiction and place it on the *NAIC List of Qualified Jurisdictions*, with such re-evaluation to be effective as of January 1, 2020.
Summary of Findings and Determination

BERMUDA MONETARY AUTHORITY

Evaluation of Reciprocal Jurisdiction

Issued for Public Comment By:

Qualified Jurisdiction (E) Working Group

November 5, 2019
I. Evaluation of Bermuda Monetary Authority as Reciprocal Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this *Summary of Findings and Determination* with respect to the evaluation of the Bermuda Monetary Authority (BMA), the lead insurance regulatory supervisor for Bermuda, as a Reciprocal Jurisdiction. It is the recommendation of the Working Group that the NAIC approve the BMA as a Reciprocal Jurisdiction and place it on the *NAIC List of Reciprocal Jurisdictions*, to be effective as of January 1, 2020. Further, the Working Group recommends that the BMA’s status as a Reciprocal Jurisdiction only be applicable to (re)insurers of Class 3A, Class 3B and Class 4, and long-term (re)insurers of Class C, Class D and Class E, which is consistent with the approval of the BMA as a Qualified Jurisdiction. Finally, the Working Group recommends that Florida be the Lead State for purposes of regulatory cooperation and information sharing with the BMA. These recommendations are based on the following analysis:

II. Procedural History

On September 22, 2017, the United States and the European Union (EU) entered into the “*Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.*” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.

The NAIC adopted revisions to the *Credit for Reinsurance Model Law* (#785) and *Credit for Reinsurance Model Regulation* (#786) (collectively, the “Credit for Reinsurance Models”) on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under the revised Credit for Reinsurance Models.

A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models.

On October 22, 2019, the Reinsurance (E) Task Force updated and revised the *Process for Evaluating Qualified and Reciprocal Jurisdictions* to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other
requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.

III. BMA’s Status of a Qualified Jurisdiction

A Qualified Jurisdiction may not be reviewed for inclusion on the NAIC List of Reciprocal Jurisdictions unless it remains in good standing with the NAIC as a Qualified Jurisdiction. The NAIC originally designated the BMA as a Conditional Qualified Jurisdiction effective January 1, 2014, with the designation to continue for one year. On December 16, 2014, the NAIC approved the BMA as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the BMA would be re-evaluated.

The Working Group met in regulator-to-regulator session on October 7, 2019 and re-approved the BMA as a Qualified Jurisdiction. The Reinsurance (E) Task Force is expected to approve the re-evaluation of the BMA as a Qualified Jurisdiction, which is expected to be confirmed by the NAIC Executive (EX) Committee and Plenary at its 2019 Fall National Meeting. This Summary of Findings and Determination with respect to the BMA as a Reciprocal Jurisdiction is expressly made contingent upon the NAIC’s re-approval of the BMA as a Qualified Jurisdiction.

IV. Written Confirmation

In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the NAIC List of Reciprocal Jurisdictions, the Qualified Jurisdiction Working Group shall undertake the following analysis in making its evaluation:

1. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in that jurisdiction is received by United States ceding insurers;

2. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

3. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision, including worldwide group
governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the Qualified Jurisdiction;

4. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC. This requirement may be satisfied by an MOU with a Lead State, which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

5. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in in Section 9C(2) and (3) of Model #786; i.e., must maintain minimum capital and surplus of no less than $250,000,000, and maintains on an ongoing basis the required minimum solvency or capital ratio, as applicable.

The BMA provided the NAIC and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories with this written confirmation by letter dated October 30, 2019. The Qualified Jurisdiction Working Group performed a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate on November 5, 2019.

V. Minimum Solvency or Capital Ratio

The Qualified Jurisdiction Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable equivalency decision made by the European Commission (EC) based on assessments conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

In a Note dated September 27, 2019, the BMA advised the NAIC that Bermuda’s risk-based solvency regime for commercial (re)insurers (Bermuda Enhanced Regime) reached full Solvency II equivalence on 24th March 2016. The regulatory capital requirement for the Bermuda Enhanced Regime is designated Enhanced Capital Requirement (ECR). Full Solvency II equivalence means that the EC and
EIOPA recognize the Bermuda Enhanced Regime as producing equivalent outcomes to Solvency II, namely that a 100% Enhanced Capital Requirement (ECR) ratio is equivalent on an outcome basis to a 100% Solvency II SCR ratio. The BMA also advised the NAIC that it considers a 100% ECR ratio produces results equivalent to a 300% RBC ratio on an outcomes basis. Furthermore, the BMA advised that it had made some enhancements to certain aspects of its Bermuda Enhanced Regime in 2018, which became effective on January 1, 2019. The BMA further reported that in July 2018, the BMA engaged with EIOPA in a series of meetings as part of the monitoring of its Solvency II equivalence status. The overall assessment was “positive” which means that EIOPA confirmed that the Bermuda Enhanced Regime remains fully Solvency II equivalent and that a 100% ECR ratio as calculated under the revised rules remains equivalent on an outcome basis to a 100% Solvency II SCR ratio.

The Qualified Jurisdiction Working Group approved 100% ECR as the minimum solvency or capital ratio for reinsurers domiciled in Bermuda, and the Reinsurance Financial Analysis (E) Working Group approved 100% ECR as the minimum solvency or capital ratio on October 11, 2019.

VI. Summary of Findings and Recommendation

Therefore, it is the recommendation of the Qualified Jurisdiction Working Group that the NAIC recognize the BMA as a Reciprocal Jurisdiction and place it on the NAIC List of Reciprocal Jurisdictions, with such evaluation to be effective as of January 1, 2020. Further, the Working Group recommends that the BMA’s status as a Reciprocal Jurisdiction only apply to (re)insurers of Class 3A, Class 3B and Class 4, and long-term (re)insurers of Class C, Class D and Class E. Finally, the Working Group recommends that the minimum solvency or capital ratio for eligible reinsurers domiciled in Bermuda to be a 100% ECR ratio.
Summary of Findings and Determination

Japan:
Financial Services Agency (FSA)

Evaluation of Reciprocal Jurisdiction

Issued for Public Comment By:

Qualified Jurisdiction (E) Working Group

November 5, 2019
I. Evaluation of Japan as Reciprocal Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to the evaluation of the Financial Services Agency (FSA), the lead insurance regulatory supervisor for Japan, as a Reciprocal Jurisdiction. It is the recommendation of the Working Group that the NAIC approve the FSA as a Reciprocal Jurisdiction and place it on the NAIC List of Reciprocal Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that California be the Lead State for purposes of regulatory cooperation and information sharing with the FSA. These recommendations are based on the following analysis:

II. Procedural History

On September 22, 2017, the United States and the European Union (EU) entered into the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.

The NAIC adopted revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under the revised Credit for Reinsurance Models.

A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models.

On October 22, 2019, the Reinsurance (E) Task Force updated and revised the Process for Evaluating Qualified and Reciprocal Jurisdictions to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.
III. Japan’s Status of a Qualified Jurisdiction

A Qualified Jurisdiction may not be reviewed for inclusion on the *NAIC List of Reciprocal Jurisdictions* unless it remains in good standing with the NAIC as a Qualified Jurisdiction. On December 16, 2014, the NAIC approved the FSA as a Qualified Jurisdiction and placed it on the *NAIC List of Qualified Jurisdictions*, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which the FSA would be re-evaluated.

The Working Group met in regulator-to-regulator session on October 7, 2019 and re-approved the FSA as a Qualified Jurisdiction. The Reinsurance (E) Task Force is expected to approve the re-evaluation of the FSA as a Qualified Jurisdiction, which is expected to be confirmed by the NAIC Executive (EX) Committee and Plenary at its 2019 Fall National Meeting. This *Summary of Findings and Determination* with respect to the FSA as a Reciprocal Jurisdiction is expressly made contingent upon the NAIC’s re-approval of the FSA as a Qualified Jurisdiction.

IV. Written Confirmation

In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the *NAIC List of Reciprocal Jurisdictions*, the Qualified Jurisdiction Working Group shall undertake the following analysis in making its evaluation:

1. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in that jurisdiction is received by United States ceding insurers;

2. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

3. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision, including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the Qualified Jurisdiction;

4. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if
applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC. This requirement may be satisfied by an MOU with a Lead State, which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

5. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in in Section 9C(2) and (3) of Model #786; i.e., must maintain minimum capital and surplus of no less than $250,000,000, and maintains on an ongoing basis the required minimum solvency or capital ratio, as applicable.

The FSA provided the NAIC and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories with this written confirmation by letter dated October 31, 2019. The Qualified Jurisdiction Working Group performed a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate on November 5, 2019.

V. Minimum Solvency or Capital Ratio

The Qualified Jurisdiction Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable equivalency assessment conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

In the 2015 EIOPA Advice to the European Commission: Equivalence assessment of the Japanese supervisory system in relation to Article 172 of the Solvency II Directive (EIOPA-CP-14/043), EIOPA made the following observations on the FSA’s capital requirements:

JFSA regulation defines a capital requirement that is named the ‘total risk’ in Ministry of Finance Notice No. 50 “Calculation methods...”. This capital requirement broadly corresponds to the Solvency II Solvency Capital Requirement (SCR) (see below)...JFSA regulation defines a ‘Solvency Margin Ratio’ (hereunder SMR), which equates to double the own funds divided by the ‘total risk’.

JFSA regulation defines three levels of supervisory intervention:
• Even when the SMR is **above 200%**, the JFSA may require insurers to adopt ‘improvement measures’, notably on profitability, credit risk (including a reduction to their credit concentration risk), stability (reduction to their market and interest rate risks) and liquidity risk. The JFSA refers to this ‘early’ supervisory intervention as the “early warning system”.

• When the SMR is **between 100% and 200%**, the JFSA may order insurers to submit and implement an improvement plan for ensuring managerial soundness.

• When the SMR is **between 0% and 100%**, the JFSA may order a series of measures such as reduction of dividends to shareholders, reduction of dividends to policyholders, and contraction of business operations.

• When the SMR is below **0%**, JFSA may order the total or partial suspension of business.

…From the above description, it follows that in terms of supervisory action the JFSA system has at least one supplementary level of intervention, compared to the Solvency II system. It also follows that supervisory actions taken at 200% of the SMR would, broadly speaking, correspond to those taken at the Solvency II SCR level of intervention —even though JFSA may intervene in a legally binding manner even if the SMR is more than 200%—, while supervisory actions taken at 0% of the SMR along with actions taken at the level of 100% of the SMR would, broadly speaking, correspond to possible actions under the Solvency II MCR.

In its consultation e-mail to the NAIC dated October 3, 2019, the FSA advised as follows: “an SMR of 200 percent triggers early remedial action such as submission of a management plan to restore the SMR, as an SCR of 100 percent triggers supervisory action such as submission of a realistic recovery plan. In this regard, we understand supervisory actions taken at 200% of the SMR would correspond to those taken at the Solvency II SCR level of intervention, even though the FSA may take supervisory actions in a proactive manner even if the SMR is more than 200%.”

The Qualified Jurisdiction Working Group approved 200 percent of the SMR as the minimum solvency or capital ratio for reinsurers domiciled in Japan, and the Reinsurance Financial Analysis (E) Working Group approved 200 percent of the SMR as the minimum solvency or capital ratio on October 11, 2019.

VI. **Summary of Findings and Recommendation**

Therefore, it is the recommendation of the Qualified Jurisdiction Working Group that the NAIC recognize the FSA as a Reciprocal Jurisdiction and place it on the *NAIC List of Reciprocal Jurisdictions*, with such evaluation to be effective as of January 1, 2020. Further, the Working Group recommends that the minimum solvency or capital ratio for eligible reinsurers domiciled in Japan to be 200 percent of the SMR.
Summary of Findings and Determination

Switzerland:
Financial Market Supervisory Authority (FINMA)

Evaluation of Reciprocal Jurisdiction

Issued for Public Comment By:
Qualified Jurisdiction (E) Working Group
November 5, 2019
I. Evaluation of Switzerland as Reciprocal Jurisdiction

The Qualified Jurisdiction (E) Working Group of the National Association of Insurance Commissioners (NAIC) has completed this Summary of Findings and Determination with respect to the evaluation of the Swiss Financial Market Supervisory Authority FINMA, the lead insurance regulatory supervisor for Switzerland, as a Reciprocal Jurisdiction. It is the recommendation of the Working Group that the NAIC approve FINMA as a Reciprocal Jurisdiction and place it on the NAIC List of Reciprocal Jurisdictions, to be effective as of January 1, 2020. Further, the Working Group recommends that Missouri be the Lead State for purposes of regulatory cooperation and information sharing with FINMA. These recommendations are based on the following analysis:

II. Procedural History

On September 22, 2017, the United States and the European Union (EU) entered into the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.

The NAIC adopted revisions to the Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786) (collectively, the “Credit for Reinsurance Models”) on June 25, 2019, to recognize a new designation of “Reciprocal Jurisdiction” under which certain reinsurers licensed and domiciled in Reciprocal Jurisdictions are not required to post reinsurance collateral. A Qualified Jurisdiction which meets certain additional requirements described in the Credit for Reinsurance Models may be determined to be a Reciprocal Jurisdiction under the revised Credit for Reinsurance Models.

A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models.

On October 22, 2019, the Reinsurance (E) Task Force updated and revised the Process for Evaluating Qualified and Reciprocal Jurisdictions to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.
III. FINMA’s Status of a Qualified Jurisdiction

A Qualified Jurisdiction may not be reviewed for inclusion on the NAIC List of Reciprocal Jurisdictions unless it remains in good standing with the NAIC as a Qualified Jurisdiction. The NAIC originally designated FINMA as a Conditional Qualified Jurisdiction effective January 1, 2014, with the designation to continue for one year. On December 16, 2014, the NAIC approved FINMA as a Qualified Jurisdiction and placed it on the NAIC List of Qualified Jurisdictions, to be effective as of January 1, 2015. This designation as a Qualified Jurisdiction was to be valid for five years (absent a material change in circumstances) ending on December 31, 2019, after which FINMA would be re-evaluated.

The Working Group met in regulator-to-regulator session on October 7, 2019 and re-approved FINMA as a Qualified Jurisdiction. The Reinsurance (E) Task Force is expected to approve the re-evaluation of FINMA as a Qualified Jurisdiction, which is expected to be confirmed by the NAIC Executive (EX) Committee and Plenary at its 2019 Fall National Meeting. This Summary of Findings and Determination with respect to FINMA as a Reciprocal Jurisdiction is expressly made contingent upon the NAIC’s re-approval of FINMA as a Qualified Jurisdiction.

IV. Written Confirmation

In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the NAIC List of Reciprocal Jurisdictions, the Qualified Jurisdiction Working Group shall undertake the following analysis in making its evaluation:

1. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit for reinsurance assumed by insurers domiciled in that jurisdiction is received by United States ceding insurers;

2. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

3. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in this state or another jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision, including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the Qualified Jurisdiction;
4. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC. This requirement may be satisfied by an MOU with a Lead State, which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

5. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in in Section 9C(2) and (3) of Model #786; i.e., must maintain minimum capital and surplus of no less than $250,000,000, and maintains on an ongoing basis the required minimum solvency or capital ratio, as applicable.

FINMA provided the NAIC and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories with this written confirmation by letter dated October 29, 2019. The Qualified Jurisdiction Working Group performed a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate on November 5, 2019.

V. Minimum Solvency or Capital Ratio

The Qualified Jurisdiction Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable equivalency assessment conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

In the 2015 EIOPA Advice to the European Commission: Equivalence assessment of the Swiss supervisory system in relation to Articles 172, 227 and 260 of the Solvency II Directive (EIOPA-BoS-15/041), EIOPA made the following observations on Switzerland’s ladder of supervisory intervention:

Under the Swiss Solvency Test (SST), the capital requirement which is more commonly referred to as the Target Capital (TC) under the SST, is calculated to cover unexpected losses arising from existing business that correspond to the Tail Value-at Risk (Tail-VaR) of the Risk Bearing Capital (RBC) subject to a confidence level of 99% over a one-year period….
The SST ratio of an insurer determines its supervisory zone (green, yellow, amber or red) and the corresponding degree of supervisory intervention:

- If the SST ratio is 100% or more, there will be no supervisory intervention – i.e. the insurer will be subject to normal supervisory monitoring. [Emphasis added].

- If the SST ratio falls below 100%, the intensity of supervisory intervention and the intrusiveness of supervisory actions will increase as the SST ratio decreases.

- If the SST ratio falls below 33%, the insurer will be required to take immediate actions to restore the SST ratio, the failure of which will trigger FINMA to revoke its license.

In its consultation letter to the NAIC dated October 2, 2019, FINMA advised as follows:

FINMA would consider in principle 100% SST to be comparable to some extent to 100% SCR under Solvency II. In addition, we would like to make the following comments:

- There is a significant degree of commonalities between the two solvency regimes, but also some different approaches applied.
- The application for the tail value-at-risk with a confidence level of 99% under the SST as opposed to the value-at-at risk with a confidence level of 99.5% leads in the case of a reinsurer typically to more conservative results, i.e. to a higher insurance target capital.
- In this context, one can also refer to recent IMF FSAP Reports.

The Qualified Jurisdiction Working Group approved 100% SST as the minimum solvency or capital ratio for reinsurers domiciled in Switzerland, and the Reinsurance Financial Analysis (E) Working Group approved 100% SST as the minimum solvency or capital ratio on October 11, 2019.

**VI. Summary of Findings and Recommendation**

Therefore, it is the recommendation of the Qualified Jurisdiction Working Group that the NAIC recognize FINMA as a Reciprocal Jurisdiction and place it on the *NAIC List of Reciprocal Jurisdictions*, with such evaluation to be effective as of January 1, 2020. Further, the Working Group recommends that the minimum solvency or capital ratio for eligible reinsurers domiciled in Switzerland to be a 100% SST ratio.

To: Commissioner Todd E. Kiser (UT), Chair of Financial Regulation Standards and Accreditation (F) Committee

From: Jeff Hunt (TX) and Joel Sander (OK), Co-Chairs of National Treatment and Coordination (E) Working Group

Date: February 15, 2019

Re: Company Licensing Accreditation Standards

Executive Summary

The National Treatment and Coordination (E) Working Group (Working Group) is charged with monitoring usage of the Form A database and implementation of company licensing best practices. As a result of this monitoring, updates and enhancements are made that must also be considered for their impact on the accreditation program and, specifically, Part D: Organization, Licensing and Change of Control of Domestic Insurers (Part D).

On February 14, 2019 the Working Group adopted a recommendation regarding the Part D Accreditation Standards to a) update the guidelines to reflect current practices, b) expand the scope to include redomestications, and c) include Part D in the review team’s recommendation with the result that the outcome can affect a state’s accredited status.

A baseline set of standards for the completion of primary applications for the licensing of new companies and redomestications, and Form A filings promotes reliance on other states in these important functions. Each application requires consideration of financial solvency of the insurers to both strengthen financial regulation and prevent unlicensed or fraudulent activities. The significant reliance on other states combined with the potential solvency impact of non-compliance with the Part D standards result in the recommendation to the Financial Regulation Standards and Accreditation (F) Committee outlined in this referral.

The Working Group recommends that the revisions to the guidelines be adopted with an effective date of January 1, 2020. However, the Working Group also recommends that the effective date for subjecting Part D to Recommendation A or B and thus impacting a state’s accredited status, be effective January 1, 2022. This timeline allows states to adjust to the revised guidelines before elevating the status of the Part D standards. The recommendations are intended to be prospective and applicable to filings received on or after the effective date.
Summary of Changes

Updates to Reflect Current Practices

Following is a summary of the Working Group’s recommended revisions to the Part D accreditation guidelines:

1) update the scope to include primary applications for redomestications,
2) update timing guidelines to rely on department policies along with state statute or regulation or the Company Licensing Best Practices Handbook,
3) add a new standard for the scope and performance of procedures for redomestications which includes elements of a quality review in addition to communication expectations,
4) update the process-oriented guidelines for Form A filings to include documenting an assessment of business plans and the quality and expertise of key persons, and
5) require updates to the Form A database at a minimum every six months for open filings.
6) update the title of Part D to “Primary Licensing, Redomestications and Change of Control”

Expand Scope to Redomestications

Insurance companies redomicile for a variety of reasons. When a redomestication occurs, state regulators take on the responsibility to review the request. The Working Group believes it is key for regulators in both states to communicate, review the information provided, and understand the reasons for the redomestication. In addition, the Working Group received a referral from the Financial Analysis (E) Working Group (FAWG) supporting inclusion of redomestications in the Part D Standards based on their work monitoring troubled and potentially troubled companies. As an example, FAWG has identified situations where companies have sought to take advantage of the redomestication process to achieve regulatory arbitrage. The recommended accreditation guidelines include elements for a quality review of these transactions as well as communication requirements with other regulators.

Subject to Recommendation A or B

In 2016, The Working Group together with the Group Solvency Issues (E) Working Group redesigned the Form A Database to enhance regulatory reviews and provide a more dynamic regulatory tool. The database now captures more information regarding mergers, acquisitions, consolidated hearings and/or coordinated reviews of Form A filings. The Form A is reviewed and analyzed by the state in which the Form A is filed, and the appropriate action is taken by the state to either approve or disapprove the transaction within a specified time frame. Making this information available to regulators in each state via the Form A Database provides awareness of other similar transactions such as a large insurer initiating acquisitions in numerous states or denials/issues with filings from the same ultimate controlling party. The database can also lead to efficiencies in analyzing similar transactions using the Lead State concept incorporated into the database.

To fully realize the regulatory value the Form A Database can provide, all states must effectively use the database for each applicable transaction. The Working Group recommends subjecting the Part D accreditation guidelines to a Recommendation A or B as defined in the accreditation manual to ensure a complete database of information.

In the primary application process for new companies, other states may not immediately rely on the work done by the domiciliary state, but as soon as the insurer begins requesting licenses in other states, heavy reliance is placed on the initial application process done by the domiciliary state. In the primary application process for redomestications, other states rely on the new domestic regulator as discussed above.

Therefore, primary applications for new companies and redomestications, in addition to Form A filings, are equally important and should be encompassed in the Recommendation A or B for the entirety of Part D.
A statement and explanation of how the potential standard is directly related to solvency surveillance and why the proposal should be included in the standards:

The purpose of subjecting primary licensing, redomestications and mergers/acquisitions to Recommendation A or B is to ensure that states have effective processes in place that other states may rely on when these functions are performed. A quality review of each filing includes assessing the financial solvency of the company to ensure the interests of the policyholders are met. These filings promote interstate communication and coordination, which are key elements of effective solvency regulation and an area of increased focused as holding company assessments, supervisory colleges and other coordinated efforts increase the effectiveness of regulation.

In addition, the Form A Database provides a system to communicate whether any similar or related Form A has been approved, denied or withdrawn from another state. The purpose of this database is to: 1) facilitate the communication of actions taken by the states on all Form A filings; and 2) facilitate the coordination of Form A reviews in an attempt to avoid the duplication of regulatory processes via a Web-based application. This database will assist insurance regulators by producing a streamlined regulatory process that maintains the integrity of state holding company laws, while being responsive to a dynamic and evolving industry.

A statement as to why ultimate adoption by every jurisdiction may be desirable:

States place significant reliance on the work of another state’s review and approval/denial of a primary application for a new company or redomestication or a Form A filing. Elements within the standard such as review of items submitted by the company along with communication between states enhance the system of state-based regulation. Reliance is most effective when states have comfort that other states are in compliance with the minimum uniform standards.

In addition to increasing the uniformity of review, the updated guidelines are designed to enhance the value of the Form A Database. As of December 2018, a substantial number of Form A filings had not been updated in over a year, likely due to delays outside the state’s control. The revised guidelines will require a status update in the Form A Database at least once every six months. With more current information available, states have more tools to avoid fraudulent or questionable acquisitions that could lead to insolvency of an insurer.

A statement as to the number of jurisdictions that have adopted and implemented the proposal or a similar proposal and their experience to date:

Part D initially became effective for accreditation in 2012 as an “unscored” section of the accreditation program. This meant that a state could not fail accreditation based solely on the lack of compliance with these standards. If deficiencies were noted, the review team would provide management comments to the state insurance department, requesting the state to consider improvements as needed, but Part D would not factor into a state’s accredited status. Because state’s have been subject to this section since 2012, there is already a base level of compliance. Including the standards in the review team’s recommendation appropriately elevates the importance of the reliance placed on these processes.

Note: The accreditation program moved from a scoring system to a recommendation system effective January 1, 2017.

A statement as to the provisions needed to meet the minimum requirements of the standard:

Revised standards and guidelines for Part D are attached.
Preamble for Part D

The focus of the Part D standards is on strengthening financial regulation and the prevention of unlicensed or fraudulent activities. The scope of this section only includes primary applications for the licensing of new companies and redomestications, and Form A filings. The section applies to traditional life/health and property/casualty companies, and this scope is narrower than that of Part B in that it does not include entities such as health maintenance organizations, health service plans, and captive insurers (including captive risk retention groups). These standards only deal with the department’s analysis of domestic companies or those applying for redomestication, and do not include foreign or alien insurers. The initial company licensing process does not consider the “multi-state” concept since the company is in its initial licensing phase. The standards regarding primary applications for redomestications, and Form A filings deal with only those filings submitted that are related to multi-state insurers, as that term is defined in the Part B Preamble.

Part D: Organization, Licensing and Change of Control of Domestic Insurers

a. Sufficient Qualified Staff and Resources

Standard: The department should have the appropriate staff and resources to effectively and timely review applications for primary licensure of new companies and redomestications, and Form A filings for all domestic insurers.

Results-Oriented Guidelines:

1. The department should have qualified staff with appropriate skill sets, abilities, knowledge and experience levels to satisfactorily and effectively perform a thorough review of applications for primary licensure of new companies and redomestications, and Form A filings. When assessing whether a department has qualified staff and resources, consideration should be given to the quality of work performed by department staff as documented in the files.

2. The review of applications for primary licensure of new companies and redomestications, and Form A filings should be completed timely, as described by department procedures as discussed in the Compliance Guidelines process-oriented guidelines. If the review was not completed timely, the department should document the reasons for such, and the review team may take extenuating circumstances into consideration.

Process-Oriented Guidelines:

1. The department staff responsible for reviewing the applications for primary licensure of new companies and redomestications, and Form A filings should have an accounting, insurance, financial analysis and/or actuarial background. College degrees should focus on accounting,
insurance, finance or actuarial science. Professional designations and credentials may also
demonstrate expertise in insurance and/or financial analysis.

2. The department should have a policy that establishes timing requirements for the review of
applications for primary licensure of new companies and redomestications, and Form A filings.
The policy should include timing expectations for initial review from date of receipt,
notification to the insurer, and completion of the review. The policy should account for any
requirements mandated by the state’s statute or regulation. The use of the Company Licensing
Best Practices Handbook is considered acceptable.

The department should review applications for primary licensure of new companies and
redomestications, and Form A filings within 30 days of receipt. If additional or supplementary
information is needed from the insurer based on the initial review for completeness, the insurer
should be notified of such within 45 days of receipt of the application.

3. For primary applications of new companies and redomestications, the review should be
completed in accordance with timing requirements mandated by the state’s statute or
regulation, unless the state’s statutes or regulations do not specify timing requirements, in
which case, the review should be completed within 90 calendar days of receipt. A review of
an application is complete once the insurer is notified of approval or denial. If additional
information not originally requested in the application is needed to finalize the review of the
application, the review may take longer to complete. Once a request for information is made,
the timing requirement is suspended until the information is received from the applicant.

For Form A filings, the review of the primary application or Form A should be completed in
accordance with timing requirements mandated by the state’s statute or regulation.

b. Scope and Performance of Procedures for Primary Applications

Standard: The department should have documented licensing procedures to provide for
consistency in the review process and to ensure that appropriate procedures are performed on all
primary applications. The use of the Company Licensing Best Practices Handbook is considered
acceptable.

Results-Oriented Guidelines:
1. The review process should adequately assess primary applications and allow the department
to reach appropriate conclusions regarding whether the primary applications are approved or
denied.

Process-Oriented Guidelines:
1. The department should review and document its assessment of each of the following:
   - Business and strategic plans.
   - Pro forma financial projections.
   - Adequacy of proposed reinsurance program.
   - Adequacy of investment policy.
   - Adequacy of short-term and long-term financing arrangements:
- Initial financing of proposed operations or transactions.
- Maintenance of adequate capital and surplus levels.
- Biographical affidavits
- Assessment of the quality and expertise of the following:
  - Ultimate controlling person.
  - Proposed officers and directors.
  - Appointed actuary.
  - Appointed accountant.
- Related party agreements’ compliance with Statement of Statutory Accounting Principles (SSAP) No. 25—Affiliates and Other Related Parties.

2. The department should review the NAIC Form A and Special Activities Database (SAD) Market Action Tracking System (MATS) databases for related information about the primary applicant and other key persons.

c. Scope and Performance of Procedures for Redomestications

Standard: The department should have documented procedures for the review of redomestication applications to provide for consistency in the review process and to ensure that appropriate procedures are performed for all redomestications. The use of the Company Licensing Best Practices Handbook and/or Financial Analysis Handbook are considered acceptable.

Results-Oriented Guidelines:
1. The review process should adequately assess the redomestication application and accompanying information to effectively allow the department to reach appropriate conclusions regarding whether a redomestication application is approved or denied.

2. The department should effectively communicate with the domestic state to gain an understanding of the reasons for redomestication and any concerns of the domestic state. Any concerns raised should be assessed and documented with rationale to support the conclusion.

Process-Oriented Guidelines:
1. The department should review the application and accompanying information and document, at a minimum, its assessment of each of the following:
   - Business and strategic plans of the insurer.
   - Actuarial Opinion
   - Annual and Quarterly statements
   - Risk-based capital (RBC) report
   - Independent CPA audit report
   - Insurance Holding Company System Annual Registration Statement and Exhibits (Form B)
   - Assessment of senior management, board of directors and corporate governance
2. The department should meet with the domestic regulator to obtain, discuss, and conclude on, at a minimum, the items listed below. The meeting should be held via conference call; an email exchange alone is not considered sufficient.
   - Most recent Insurer Profile Summary (IPS) and supervisory plan, including supporting analysis detail for significant risks
   - Reason for redomestication
   - Concerns identified with the insurer/group
   - History of communication with the insurer/group
   - History of regulatory actions
   - Results of recent examinations (financial and market conduct), including findings and resolutions
   - Status of and responsibilities for annual financial analysis and group analysis, if applicable
   - Status of and responsibilities for the financial examinations

3. The department should notify the lead state of the insurance holding company group of receipt of a primary application for redomestication and obtain a copy of the most recent Group Profile Summary (GPS), if applicable.

de. Scope and Performance of Procedures for Form A Filings

Standard: The department should have documented procedures for the review of Form A filings to provide for consistency in the review process and to ensure that appropriate procedures are performed on all Form A filing reviews. The use of the Company Licensing Best Practices Handbook and/or Financial Analysis Handbook is considered acceptable.

Results-Oriented Guidelines:
1. The review process should be designed to adequately assess the Form A filings and accompanying information and to effectively allow the department to reach appropriate conclusions regarding whether the Form A filings are approved or denied.

Process-Oriented Guidelines:
1. The department should review and document its assessment of each of Form A filings should include the following:
   - Business and strategic plans of the insurer.
   - Identity and background of the applicant and individuals associated with the applicant including use of biographical affidavits to assess the quality and expertise of the following:
     - Ultimate controlling person
     - Proposed officers and directors (as listed on Jurat Page of most recent or upcoming financial statement)
     - Other owners of 10% or more of voting securities
   - The source, nature and amount of the consideration used or to be used in effecting the merger or other acquisition of control.
• Fully audited financial information regarding the earnings and financial condition of the acquiring parties for the preceding five years. If fully audited financial information is not available, substantially similar information such as compiled financial statements or tax returns, as deemed acceptable to the commissioner, may be reviewed in lieu of fully audited financial information.

• Unaudited financial information regarding the earnings and financial condition of the acquiring parties as of a date not earlier than 90 days prior to the filing of the Form A.

2. The department should utilize and update the Form A Database for prior filings made by the Form A applicant and the ultimate outcome of such filing(s).

3. Pertinent and relevant information from the Form A filing should be manually entered into the Form A Database within 10 business days of receipt of the Form A.

4. Any changes to the status of the filing or other data elements should be entered into the Form A Database within 10 business days.

4.5. If the progress of a filing stalls, the Form A database should be updated at a minimum every six months to confirm the status of the filing and document the reason the filing has stalled.
State Implementation Reporting of NAIC-Adopted Model Laws and Regulations

Executive (EX) Committee

- Adoption of the new Insurance Data Security Model Law (#668)—This model was adopted by the Executive (EX) Committee and Plenary at the 2017 Fall National Meeting. Eight states have enacted this model.

Life Insurance and Annuities (A) Committee

- Amendments to the Standard Nonforfeiture Law for Individual Deferred Annuities (#805)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2017 Summer National Meeting. One state has enacted these revisions to the model.

Health Insurance and Managed Care (B) Committee

- Amendments to the Health Insurance Reserves Model Regulation (#10) (Cancer Expense Table)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2017 Spring National Meeting. Two states have enacted these revisions to the model.

- Amendments to the Health Carrier Prescription Drug Benefit Management Model Act (#22)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2018 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the Accident and Sickness Insurance Minimum Standards Model Act (#170), now known as the Supplementary and Short-Term Health Insurance Minimum Standards Model Act—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2019 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Adoption of the Limited Long-Term Care Insurance Model Act (#642)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Adoption of the Limited Long-Term Care Insurance Model Regulation (#643)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. NAIC staff are not aware of any state activity regarding this model.

Property and Casualty Insurance (C) Committee

- Adoption of the Travel Insurance Model Act (#632)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. Six states have enacted this model.

Market Regulation and Consumer Affairs (D) Committee

- Amendments to the Privacy of Consumer Financial and Health Information Regulation (#672)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2017 Spring National Meeting. Eleven states have enacted these revisions to the model.

Financial Condition (E) Committee

- Amendments to the Credit for Reinsurance Model Law (#785)—These revisions were adopted by the Executive (EX) Committee and Plenary during the June 26, 2019 conference call. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the Credit for Reinsurance Model Regulation (#786)—These revisions were adopted by the Executive (EX) Committee and Plenary during its June 26, 2019 conference call. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the Term and Universal Life Insurance Reserve Financing Model Regulation (#787)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2016 Fall National Meeting. Four states have enacted this model.

Executive (EX) Committee
Austin, Texas
December 8, 2019

The Executive (EX) Committee met in Austin, TX, Dec. 8, 2019. The following Committee members participated: Eric A. Cioppa, Chair (ME); Raymond G. Farmer, Vice Chair (SC); David Altmaier, Vice President (FL); Dean L. Cameron, Secretary-Treasurer (ID); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Stephen C. Taylor (DC); Chlora Lindley-Myers (MO); Mike Chaney (MS); Jillian Froment (OH); Andrew R. Stolfi (OR); Jessica Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry Deiter (SD); and Scott A. White (VA).

1. **Adopted the Report of the Executive (EX) Committee and Internal Administration (EX1) Subcommittee Joint Meeting**

Superintendent Cioppa reported the Executive (EX) Committee met Dec. 7 in joint session with the Internal Administration (EX1) Subcommittee. The meeting was held in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings.

During this joint meeting, the Committee and Subcommittee adopted its Nov. 18, Oct. 7 and Summer National Meeting minutes.

The Committee and Subcommittee adopted the Internal Administration (EX1) Subcommittee’s Nov. 26 and Oct. 18 minutes, which included the following action: 1) received an update on the Defined Benefit Plan portfolio as of Sept. 30; 2) received an update on the NAIC long-term investment plan portfolio as of Sept. 30; 3) ratification of the vote to begin restructuring the Defined Benefit Plan portfolio to implement the liability driven investment (LDI) strategy; and 4) approved the 2020 proposed charges for the Internal Administration (EX1) Subcommittee and the Information Systems (EX1) Task Force.

The Committee and Subcommittee adopted the Dec. 3 Audit Committee report, which included the following action: 1) received an overview of the Oct. 31 financial statements; 2) received an update on the 2019/2020 Service Organization Control (SOC) 1 and SOC 2 reviews and reports; 3) received an update on database filing fee payments; and 4) received an update on zone financials.

The Committee and Subcommittee adopted the Dec. 6 Information Systems (EX1) Task Force report, which included the following action: 1) received an update on three draft 2020 fiscals with a technology component; 2) received an operational report for the NAIC’s information technology (IT) activities; 3) received an update on 20 active projects and a summary of three projects completed since the Summer National Meeting; and 4) reaffirmed the Audit Committee Charter.

The Committee and Subcommittee also: 1) approved a recommendation on a vendor and funding to conduct a System for Electronic Rate and Form Filing (SERFF) assessment; 2) approved the release of a fiscal to conduct a principal-based reserve (PBR) yearly renewable term (YRT) reinsurance study for public review and comment; 3) heard a presentation on the NAIC branding project, which includes updating the NAIC logo; 4) received the joint chief executive officer (CEO)/chief operating officer (COO) report; and 5) received a cybersecurity briefing.

Commissioner Altmaier made a motion, seconded by Director Froment, to adopt the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee. The motion passed.

2. **Adopted its Nov. 18, Oct. 8 and Oct. 7 Interim Meeting Report**

Commissioner Altmaier made a motion, seconded by Director Lindley-Myers, to adopt the Executive (EX) Committee’s Nov. 18, Oct. 8 and Oct.7 interim meeting report (Attachment One). The motion passed.

3. **Adopted the Reports of its Task Forces**

The Committee received reports from the: Financial Stability (EX) Task Force; the Government Relations (EX) Leadership Council; the Innovation and Technology (EX) Task Force and the Long-Term Care Insurance (EX) Task Force.
Commissioner Altmaier made a motion, seconded by Director Wing-Heier, to adopt the reports of the Financial Stability (EX) Task Force, the Government Relations (EX) Leadership Council, the Innovation and Technology (EX) Task Force and the Long-Term Care Insurance (EX) Task Force (Attachment Two). The motion passed.

3. **Adopted its 2020 Proposed Charges**

Director Farmer reported that the Committee’s 2020 proposed charges for consideration are largely the same from year to year. The Executive (EX) Committee Task Forces will be continuing important work on long-term care insurance (LTCI), financial stability, and innovation and technology.

Director Farmer made a motion, seconded by Commissioner Altmaier, to adopt the Committee’s 2020 proposed charges (Attachment Three). The motion passed.

4. **Adopted the Request to Develop Amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)**

Commissioner Altmaier reported that the Request for NAIC Model Law Development to develop amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) is from the Financial Condition (E) Committee and the Group Capital Calculation (E) Working Group. The Working Group has been developing the group capital calculation (GCC) for some time, and while the calculation is not yet complete, testing of the calculation has recently been completed by 32 volunteer insurers and 15 lead states. The goal is to finalize the calculation in 2020 and have the corresponding models ready to go with it.

Commissioner Altmaier made a motion, seconded by Director Farmer, to adopt the Request for NAIC Model Law Development to develop amendments for Model #440 and Model #450 (Attachment Four). The motion passed.

5. **Adopted the Request to Develop Amendments to the Unfair Trade Practices Act (#880)**

Commissioner Godfread reported that the Innovation and Technology (EX) Task Force adopted a Request for NAIC Model Law Development to develop amendments to the Unfair Trade Practices Act (#880) during its Oct. 18 meeting. Anti-rebating laws have existed in some states for a very long time, originally to ensure company solvency while also leveling the playing field for insurers and preventing unfair trade practices and discrimination. The intent was to prevent insurers and producers from providing an insured or a prospective insured with anything of value not specified or contained in the policy that may act as an inducement to purchase insurance.

The Innovation and Technology (EX) Task Force began discussing rebating issues in 2018 during the Summer National Meeting particularly because of the increased interest in offering value-added products and services such as risk mitigation devices and related services that are not necessarily addressed within the applicable insurance policy language.

After finding that state interpretation and application of anti-rebating laws varies and reviewing the history of Model #880 along with the history and the intent of the anti-rebating portion, it became clear to the Task Force that applying the anti-rebating laws to the innovation of new insurance products and services could be challenging.

During the Summer National Meeting, the Task Force voted to move forward with the Request for NAIC Model Law Development to open Model #880 to amend the language in Section 4(H)(1) - Unfair Trade Practices Defined-Rebates.

Commissioner Altmaier made a motion, seconded by Director Wing-Heier, to adopt the Request for NAIC Model Law Development to develop amendments to Model #880 (Attachment Five). The motion passed.

7. **Received a Status Report on the NAIC State Ahead Strategic Plan Implementation**

Superintendent Cioppa provided an update on the NAIC State Ahead implementation efforts (Attachment Six) highlighting the projects completed and underway in the themes of safe, solvent and stable markets; consumer protection and education; and superior member services and resources. Through State Ahead, the NAIC has made significant enhancements in regulator training and tools, consumer education, member engagement and support, technology, and NAIC talent development.
8. **Received a Report of Model Law Development Efforts**

Superintendent Cioppa presented a written report on the progress of ongoing model law development efforts (Attachment Seven).

9. **Heard a Report from the NIPR Board of Directors**

Director Deiter reported the National Insurance Producer Registry (NIPR) Board of Directors met Dec. 6 and heard a report from the NIPR Audit Committee regarding NIPR’s financials through October 2019. The Board also heard a report of the Investment Committee. The NIPR Long-Term Investment Portfolio climbed +0.4% for the third quarter.

The NIPR Board approved NIPR’s 2020 budget, with projected revenues of $46.1 million and projected expenses of $43.3 million. The NIPR Board also heard on update on the progress of implementing NIPR’s strategic plan, which will be completed in 2020. In addition to the general progress on the plan, two major strategic initiatives have been accomplished this year.

In September, NIPR added Florida for resident licensing for individual insurance producers, and it is anticipated that Florida’s resident and non-resident business entities will be available before the end of 2019. This leaves only five remaining states to add for NIPR’s major licensing services.

Another major accomplishment this year was a joint NAIC/NIPR security infrastructure initiative, Data De-identification. The joint project was part of the *State Ahead* initiative and involved extensive work to protect Personally Identifiable Information (PII) by masking or de-identifying the PII data in a consistent manner for all NAIC and NIPR non-production technical environments.

NIPR will launch a new and improved website in January, designed to provide easier navigation and improve the user experience.

In addition to the progress on the strategic plan, the Board also received a report on the NAIC and NIPR’s ongoing cybersecurity initiatives. Finally, the Board heard from KC Tech Council CEO, Ryan Weber, on current employment trends in the Kansas City technical industry.

NIPR anticipates that it will have processed more than $726 million in producer licensing-related fees on behalf of the states by yearend. This represents an 8% increase over fees collected on behalf of the states last year.

10. **Heard a Report from the Compact**

Director Froment reported the Interstate Insurance Product Regulation Commission (Compact) will meet Dec. 9. The Compact members have spent this past year engaged in a member-driven strategic planning process. The Compact has conducted member surveys and had four in-person discussions. This effort has culminated in a draft strategic plan, available on its website, that the Compact will discuss during its meeting and hopefully finalize. The Compact is planning to refer to it as the Insurance Compact Compass as it will guide the course of the Compact over the next three years.

The Compact will also consider the adoption of three group annuity standards; this is a new product line the Compact will have available for filing in 2020.

The Compact will consider the annual budget package for adoption, which includes a request for a new position dedicated to member services in support of the strategic plan initiatives.

The Compact will put in place the Management Committee for next year and hold its annual election of officers.

The Compact will also be releasing a report on Compact-Approved Individual Long-Term Care Rate Schedule Certifications. The purpose of the report is to share the aggregate information with respect to the review of the 2018 annual and triennial rate certifications for Compact-approved individual LTCI rate schedules.

The Compact is experiencing another record year of growth in terms of the number of companies using the Compact and in the volume of filing submissions. The Compact exceeded its budgeted revenue as of the end of September and expects to come in under budget in expenses. This is a unique set of circumstances for this year as every life company must prepare for the...
implementation of principle-based reserving (PBR) by updating their life products to the 2017 Commissioners’ Standard Ordinary (CSO) Mortality Tables.

Regarding the $3.4 million line of credit the NAIC made available to the Compact (2007 to 2012 that has been in a deferred status), the Compact will meet one of the repayment triggers this year as its net positive revenue will exceed $250,000 by yearend.

The Compact officers and NAIC officers are restructuring the terms of repayment, which currently require repayment of the entire amount within five years and expect the organizations to reach an agreement on a restructuring of the Compact debt by the time the first payment is due at the end of the first quarter in 2020.

Having no further business, the Executive (EX) Committee adjourned.
The Executive (EX) Committee met Nov. 18, Oct. 8 and Oct. 7, 2019. These meetings were held in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee:

1. Approved the NAIC 2020 proposed budget, and recommended the budget be adopted by the full NAIC membership at the Fall National Meeting.

2. Approved recommendations for the NAIC’s Defined Benefit Plan Fund Investments.

3. Adopted the investment policy statement (IPS) for the NAIC’s Long-Term Funds.

4. Adopted the IPS for the NAIC’s defined benefit plan and the defined contribution plan.

6. Adopted the Internal Administration (EX1) Subcommittee’s 2020 proposed charges.

7. Approved the NAIC 2020 proposed budget, including five fiscals, for a public comment period ending Nov. 7.
REPORT OF THE EXECUTIVE (EX) COMMITTEE TASK FORCES

Financial Stability (EX) Task Force—The Financial Stability (EX) Task Force plans to meet Dec. 9 to: 1) consider adoption of its Summer National Meeting minutes; 2) consider adoption of the minutes of the Liquidity Assessment (EX) Subgroup; 3) hear an update on Financial Stability Oversight Council (FSOC) developments; 4) consider a joint exposure of the 2019 proposed liquidity stress test with the Liquidity Assessment (EX) Subgroup; 5) receive an update from the Receivership and Insolvency (EX) Task Force on its work to address the Financial Stability (EX) Task Force’s referral letter to undertake analysis relevant to the NAIC Macroprudential Initiative (MPI); 6) hear an update on collateralized loan obligations (CLO) stress tests; and 7) hear an update on macroprudential surveillance.

Government Relations (EX) Leadership Council—The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting. The Leadership Council meets weekly via conference call in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss federal legislative and regulatory developments affecting insurance regulation.

Innovation and Technology (EX) Task Force—The Innovation and Technology (EX) Task Force plans to meet Dec. 9 to: 1) consider adoption of its Oct. 18 minutes; 2) consider adoption of its working group reports and hear a report on the activities of the Innovation and Technology State Contact Group; 3) discuss a draft bulletin from North Dakota addressing a specific interpretation of its statutory language considering anti-rebating issues and whether to pursue an NAIC model bulletin; 4) discuss the next steps for developing model law language to amend the Unfair Trade Practices Act (#880); 5) hear an update on cybersecurity activity, including a legislative update and briefing on data privacy activity from the Privacy Protections (D) Working Group chair, Director Chlora Lindley-Myers (MO); and 6) discuss working on an educational document on insurance products and regulation for InsurTech startups; and 7) hear a report from the National Conference of Insurance Legislators (NCOIL) on its insurance modernization activity.

The Artificial Intelligence (EX) Working Group met Sept. 5 and decided to take comments on if it would be appropriate to base artificial intelligence (AI) principles for the insurance industry on the Organisation for Economic Co-operation and Development (OECD) AI principles, and if so, how they might be revised to be more relevant for the insurance industry. The Working Group also met Dec. 7 and discussed those comments and next steps for continuing the development of principles for the insurance industry.

The Big Data (EX) Working Group met Oct. 7 and took the following action: 1) adopted its Summer National Meeting minutes; and 2) heard presentations from the Insurance Services Office (ISO) on the use of data to detect fraud and settle property/casualty (P/C) claims. The Working Group also met Dec. 7 and took the following action: 1) adopted its Oct. 7 minutes; 2) discussed the use of data in fraud detection and claim settlements; 3) received an update from the Casualty Actuarial and Statistical (C) Task Force regarding its draft white paper on best practices for the review of predictive models and analytics filed by insurers to justify rates, the development of state guidance (e.g., information and data) for rate filings that are based on complex predictive models, and the development of training for the sharing of expertise through predictive analytics webinars; 4) received an update on the work of the Accelerated Underwriting (A) Working Group; 5) received an update on NAIC technical and non-technical rate review trainings; and 6) received a presentation on entities not licensed as advisory organizations.

The Speed to Market (EX) Working Group did not meet at the Fall National Meeting. The Working Group met via conference call Dec. 3 and Sept. 12. During its Sept. 12 meeting, the Working Group: 1) heard and discussed a presentation by Joy E. Morrison (NAIC), Bridget Kieras (NAIC) and Brandy Woltkamp (NAIC) regarding prioritization of the System for Electronic Rate and Form Filing (SERFF) enhancements regarding submission validations, review tools, workload management, performance and reliability, search, document management, reporting and data export, streamlined correspondence, and user experience. After the meeting, a survey was sent to all the states seeking feedback on which SERFF enhancement capabilities were the most important to them. During its Dec. 3 meeting, the Working Group: 1) adopted its Sept. 12 minutes; and 2) received an update from Ms. Kieras regarding an upcoming business and technical assessment of SERFF, as well as the survey sent in September. Survey results have been received and continue to be reviewed. Some items from the survey are already being worked into the SERFF analysis and development process, and some are being moved through the development pipeline.
Long-Term Care Insurance (EX) Task Force—The Long-Term Care Insurance (EX) Task Force plans to meet Dec. 9 to:
1) consider adoption of its Oct. 31 and Summer National Meeting minutes; 2) receive a progress report on the activities of each of the Task Force’s six workstreams: a) the rate review practices workstream is refining a set of selection principles and criteria for guiding the development of a recommended rate review methodology; b) the restructuring techniques workstream is developing its strategic plan; c) the reduced benefit options and consumer notices workstream completed a survey of the states and is reviewing results with plans to develop best practices; d) the valuation of reserve issues workstream continues to monitor actuarial review work and solvency monitoring of long-term care insurance (LTCI) companies, and to develop additional state insurance regulator guidance related to reserve assumptions; e) the non-actuarial considerations workstream completed a limited scope survey of the states and is reviewing results with plans to develop best practices; and f) the data call design and oversight workstream has issued a request for proposal to develop a data call; and 3) hear from consumer and industry representatives on the progress of workstream activity.
2020 Proposed Charges for Executive (EX) Committee consideration

Draft: 10/16/19
Adopted by the Executive (EX) Committee and Plenary, TBD
Adopted by the Executive (EX) Committee, Dec. 8, 2019

2020 Proposed Charges

EXECUTIVE (EX) COMMITTEE

The mission of the Executive (EX) Committee is to manage the affairs of the NAIC in a manner consistent with its Articles of Incorporation and its Bylaws.

Ongoing Support of NAIC Programs, Products or Services

1. The Executive (EX) Committee will:
   A. Identify the goals and priorities of the organization and make recommendations to achieve such goals and priorities based on input of the membership. Make recommendations by the 2020 Commissioners Conference.
   B. Create/terminate task force(s) and/or Executive (EX) Committee-level working groups to address special issues and monitor the work of these groups. Create necessary task force(s) and/or Executive (EX) Committee-level working groups throughout 2020 as necessary.
   C. Submit reports and recommendations to NAIC members concerning the activities of its subcommittee and the standing committees. Submit a report at each national meeting.
   D. Consider requests from NAIC members for friend-of-the-court briefs.
   E. Establish and allocate functions and responsibilities to be performed by each NAIC zone.
   F. Pursuant to the Bylaws, oversee the NAIC offices to assist the organization and the individual members in achieving the goals of the organization.
   G. Conduct strategic planning on an ongoing basis.
   H. Plan, implement and coordinate communications and activities with the Federal Insurance Office (FIO).
   I. Plan, implement and coordinate communications and activities with other state, federal, local and international government organizations to advance the goals of the NAIC and promote understanding of state insurance regulation.
   J. Review and approve requests for the development of model laws and/or regulations. Coordinate the review of existing model laws and/or regulations.
   K. Select NAIC national meeting sites five and six years in advance of the meeting date to ensure efficient and economical locations and facilities.
   L. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.

Draft: 10/4/19
Adopted by the Executive (EX) Committee and Plenary, TBD
Adopted by the Executive (EX) Committee, Dec. 8, 2019
Adopted by the Financial Stability (EX) Task Force, Oct. 2, 2019

2020 Proposed Charges

FINANCIAL STABILITY (EX) TASK FORCE

The mission of the Financial Stability (EX) Task Force is to consider issues concerning domestic or global financial stability as they pertain to the role of state insurance regulators.

Ongoing Support of NAIC Program, Products or Services

1. The Financial Stability (EX) Task Force will:
   A. Consider issues concerning domestic and global financial stability as they pertain to the role of state insurance regulators and make recommendations to the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.
      1. Analyze existing post-financial crisis regulatory reforms for their application in identifying macroeconomic trends, including identifying possible areas of improvement or gaps, and propose to the Financial Condition (E) Committee or other relevant committee enhancements and/or additions to further improve the ability of state insurance regulators and the industry to address macroprudential impacts; consult with such committees on implementation, as needed.
   B. Consider state insurance regulators’ input to national and international discussions on macroeconomic vulnerabilities affecting the insurance sector.
      1. Monitor international macroprudential activities at forums like the International Association of Insurance Supervisors (IAIS).
      2. Implement the Macroprudential Initiative (MPI) domestically, which includes enhancements to the U.S. regulatory toolkit as part of the State Ahead initiative.
   C. Serve as a forum to coordinate state insurance regulators’ perspectives on a wide variety of issues arising from the designation of a U.S. insurance group as “systemically important” and “internationally active” both pre- and post-designation, including:
      1. Where appropriate, develop policy recommendations and/or guidance regarding the role, responsibilities and activities of state insurance regulators in the context of consolidated supervision resulting from designation.
      2. Analyze proposed rules by the federal agencies that relate to financial stability.
      3. Analyze proposed policy measures regarding supervisory standards for global systemically important insurers and internationally active insurance groups.
      4. Develop comment letters on such analysis for further consideration by the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.

2. The Liquidity Assessment (EX) Subgroup will:
   A. Review existing public and regulator-only data related to liquidity risk, identify any gaps based on regulatory needs and propose the universe of companies to which any recommendations may apply.
   B. Refine and implement a liquidity stress testing framework proposal for consideration by the Financial Condition (E) Committee, including the proposed universe of companies to which the framework will apply (e.g., large life insurers).

2020 Proposed Charges for Executive (EX) Committee consideration

Draft: 10/7/19
Adopted by the Executive (EX) Committee and Plenary, TBD
Adopted by the Executive (EX) Committee, Dec. 8, 2019
Adopted by the Government Relations (EX) Leadership Council, Oct. 11, 2019

2020 PROPOSED CHARGES
GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council coordinates the NAIC’s ongoing work with the federal government and state government officials on legislative and regulatory policy. The Leadership Council, in conjunction with the NAIC’s other standing committees, is responsible for quickly responding to federal legislative and regulatory developments that affect insurance regulation.

The mission of the Government Relations (EX) Leadership Council is to develop, coordinate and implement the NAIC’s legislative, regulatory and outreach initiatives. The Leadership Council will devise strategies for NAIC action and promote the participation of all NAIC members in the NAIC’s government relations initiatives.

Ongoing Support of NAIC Programs, Products or Services

1. The Government Relations (EX) Leadership Council will:
   A. Monitor, analyze and respond to federal legislative and regulatory actions and other issues of importance to the NAIC membership.
   B. Work with other standing committees, task forces and working groups to help develop and communicate the NAIC’s policy views to federal and state officials on pending legislation and regulatory issues by involvement of NAIC members through testimony, correspondence and other approaches.
   C. Develop a strategy and program for directly engaging NAIC members with the U.S. Congress and federal agencies to advocate for NAIC objectives and the benefits and efficiencies of state-based insurance regulation.
   D. Secure broader participation from NAIC membership on all government affairs advocacy initiatives.
   E. Report to the Executive (EX) Committee on all activities and matters relating to the annual charges of the Leadership Council.

NAIC Support Staff: Ethan Sonnichsen/Mark Sagat/Brian R. Webb
2020 Proposed Charges for Executive (EX) Committee consideration

Draft: 10/18/19
Adopted by the Executive (EX) Committee and Plenary, TBD
Adopted by the Executive (EX) Committee, Dec. 8, 2019
Adopted by the Innovation and Technology (EX) Task Force, Oct. 18, 2019

2020 PROPOSED CHARGES

INNOVATION AND TECHNOLOGY (EX) TASK FORCE

The mission of the Innovation and Technology (EX) Task Force is to provide a forum for regulator education and discussion of innovation and technology in the insurance sector, to monitor technology developments that affect the state insurance regulatory framework, and to develop regulatory guidance, as appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Innovation and Technology (EX) Task Force will:
   A. Provide forums, resources and materials for the discussion of innovation and technology developments in the insurance sector, including the collection and use of data by insurers and state insurance regulators—as well as new products, services and distribution platforms—in order to educate state insurance regulators on how these developments affect consumer protection, privacy, insurer and producer oversight, marketplace dynamics and the state-based insurance regulatory framework.
   B. Develop regulatory guidance, model laws or model law revisions, and white papers or make other recommendations to the Executive (EX) Committee, as appropriate.
   C. Monitor and discuss regulatory issues that arise with the development of autonomous vehicles. Study and, if necessary, develop recommendations for changes needed to the state-based insurance regulatory framework.
   D. Discuss emerging issues related to companies or licensees leveraging new technologies to develop products for on-demand insurance purposes—in addition to potential implications on the state-based insurance regulatory structure—including, but not limited to, reviewing new products and technologies affecting the insurance space and the associated regulatory implications.
   E. Monitor developments in the area of cybersecurity, including the implementation of the Insurance Data Security Model Law (#668) and representing the NAIC and communicating with other entities/groups, including sharing information as may be appropriate.
   F. Coordinate with other NAIC committees and task forces, as appropriate, on technology, innovation, cybersecurity issues and data privacy.

2. The Big Data (EX) Working Group will:
   A. Review current regulatory frameworks used to oversee insurers’ use of consumer and non-insurance data. If appropriate, recommend modifications to model laws and/or regulations regarding marketing, rating, underwriting and claims, regulation of data vendors and brokers, regulatory reporting requirements, and consumer disclosure requirements.
   B. Propose a mechanism to provide resources and allow the states to share resources to facilitate their ability to conduct technical analysis of, and data collection related to, the review of complex models used by insurers for underwriting, rating and claims. Such a mechanism shall respect and in no way limit the states’ regulatory authority.
   C. Assess data needs and required tools for state insurance regulators to appropriately monitor the marketplace and evaluate underwriting, rating, claims and marketing practices. This assessment shall include gaining a better understanding of currently available data and tools, as well as recommendations for additional data and tools, as appropriate. Based on this assessment, propose a means to collect, house and analyze needed data.
2020 Proposed Charges for Executive (EX) Committee consideration

INNOVATION AND TECHNOLOGY (EX) TASK FORCE (continued)

3. The **Speed to Market (EX) Working Group** will:
   A. Consider proposed System for Electronic Rate and Form Filing (SERFF) features or functionality presented to the Working Group by the SERFF Advisory Board, likely originating from the SERFF Product Steering Committee. Upon approval and acquisition of any needed funding, direct the SERFF Advisory Board to implement the project. Receive periodic reports from the SERFF Advisory Board, as needed.
   B. Discuss and oversee the implementation and ongoing maintenance/enhancement of speed to market operational efficiencies related to product filing needs, efficiencies and effective consumer protection. This includes the following activities:
      1. Provide a forum to gather information from the states and the industry regarding tools, policies and resolutions to assist with common filing issues. Provide oversight in evaluating product filing efficiency issues for state insurance regulators and the industry, particularly with regard to uniformity. In 2020, evaluate the state survey results compiled in 2019 regarding the usefulness of existing tools and potential new tools and propose a plan to make improvements.
      2. Use SERFF data to develop, refine, implement, collect and distribute common filing metrics that provide a tool to measure the success of the speed to market modernization efforts as measured by nationwide and individual state speed to market compliance, with an emphasis on monitoring state regulatory and insurer responsibilities for speed to market for insurance products.
      3. Facilitate proposed changes to the product coding matrices (PCMs) and the uniform transmittal document (UTD) on an annual basis, including the review, approval and notification of changes. Monitor, assist with and report on state implementation of any PCM changes.
      4. Facilitate the review and revision of the *Product Filing Review Handbook*, which contains an overview of all of the operational efficiency tools and describes best practices for industry filers and state reviewers with regard to the rate and form filing and review process. In 2020, develop and implement a communication plan to inform states about the *Product Filing Review Handbook*.
   C. Provide direction to NAIC staff regarding SERFF functionality, implementation, development and enhancements. Direct NAIC staff to provide individual state speed to market reports to each commissioner at each national meeting. Receive periodic reports from NAIC staff, as needed.
   D. Conduct the following activities as desired by the Interstate Insurance Product Regulation Commission:
      1. Provide support to the Compact as the speed to market vehicle for asset-based insurance products, encouraging the states’ participation in, and the industry’s usage of the Compact.
      2. Receive periodic reports from the Compact, as needed.

4. The **Artificial Intelligence (EX) Working Group** will:
   A. Study the development of artificial intelligence (AI), its use in the insurance sector, and its impact on consumer protection and privacy, marketplace dynamics, and the state-based insurance regulatory framework. The Working Group will develop regulatory guidance, beginning with guiding principles, and make other recommendations to the Innovation and Technology (EX) Task Force as appropriate by the 2020 Summer National Meeting.

Adopted by the Long-Term Care Insurance (EX) Task Force, Oct. 31, 2019

2020 Proposed Charges

LONG-TERM CARE INSURANCE (EX) TASK FORCE

The Long-Term Care Insurance (EX) Task Force will:

A. Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, this Task Force is charged to:
   1. Develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.
   2. Identify options to provide consumers with choices regarding modifications to LTCI contract benefits where policies are no longer affordable due to rate increases.
   3. Deliver such a proposal to the Executive (EX) Committee by the 2020 Fall National Meeting.

B. Provide periodic reporting to the Long-Term Care Insurance (E/B) Task Force to help ensure coordination between the two task forces on LTCI issues.

Unless otherwise affirmatively extended or modified by the Executive (EX) Committee, the Task Force and its charges will expire Jan. 31, 2021.

Adopted by the Executive (EX) Committee, Dec. 8, 2019
Adopted by the Internal Administration (EX1) Subcommittee, Oct. 8, 2019

2020 Proposed Charges

INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE

The mission of the Internal Administration (EX1) Subcommittee is to monitor the operations of the NAIC, including: 1) preparing a budget for Executive (EX) Committee review; 2) providing direction on personnel issues; 3) approving emergency expenditures; 4) evaluating the chief executive officer (CEO); and 5) assisting the CEO in resolving competing demands for NAIC staff resources.

Ongoing Support of NAIC Programs, Products or Services

1. The Internal Administration (EX1) Subcommittee will:
   A. Review and approve all expenditures of funds not included in the annual budget by considering any fiscal impact statements of unbudgeted resource requests and reporting its actions to the Executive (EX) Committee.
   B. Annually work with the CEO, chief operating officer/chief legal officer (COO/CLO), and chief financial officer (CFO) to review the business operations plan, which will incorporate the Executive (EX) Committee’s strategic management initiatives, and report its actions to the Executive (EX) Committee.
   C. Oversee a review of any management areas of the NAIC that should be designated for formal operational reviews by working with the CEO and COO/CLO.
   D. Oversee the development, revision and delivery of all NAIC education programs, or the addition of new programs, by coordinating with other committees, as appropriate, and providing direction to the CEO and COO/CLO.
   E. Receive a report at each national meeting from the NAIC Audit Committee, which will be chaired by the secretary-treasurer. The NAIC Audit Committee will meet with NAIC management at or before each national meeting, or more frequently as necessary, to review the NAIC financial statements and hear reports from NAIC management on emerging financial issues for the NAIC, and it will report such information to the Internal Administration (EX1) Subcommittee. The NAIC Audit Committee shall also carry out the following activities pursuant to its charter:
      1. Engage the NAIC’s independent accountants with respect to the annual audit. This will include the appointment of an independent audit firm, a review of the results of the annual audit, and discussions with the independent auditors and NAIC management to ensure that all audit comments or suggestions are addressed in a timely manner.
      2. Engage the NAIC’s service advisory firm. This will include the selection of an independent firm to provide Statement on Standards for Attestation Engagements (SSAE) services to the NAIC.
   F. Serve as the primary liaison between the NAIC membership and the NAIC investment advisor, or appoint a subcommittee to act in that capacity, including receiving reports on the performance of the NAIC’s investment portfolio and, from time to time, meeting directly with investment firm representatives to hear periodic reports and recommendations.
   G. Review and revise, as necessary and appropriate, the criteria and categories for registrants at NAIC national meetings.
   H. Appoint the Information Systems (EX1) Task Force to provide regulator-based technology expertise.
   I. Conduct evaluations of the CEO and COO/CLO, and make appropriate recommendations to the Executive (EX) Committee. Consult with the CEO and COO/CLO on compensation of senior management.

Adopted by the Information Systems (EX1) Task Force, Aug. 2, 2019

2020 PROPOSED CHARGES

INFORMATION SYSTEMS (EX1) TASK FORCE

The mission of the Information Systems (EX1) Task Force is to: 1) provide regulator-based technology expertise to the Internal Administration (EX1) Subcommittee; and 2) support committee activities and objectives by monitoring projects that provide technical services or systems for state-based insurance regulation, as prioritized by the Executive (EX) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Information Systems (EX1) Task Force will:
   A. Serve as the Internal Administration (EX1) Subcommittee’s project-independent technology monitor and consultant. This involves monitoring the development, deployment and operations of NAIC information technology (IT) systems and services for state insurance regulators and, based on this effort, providing reports and recommendations to the Subcommittee as appropriate. To achieve this, the Task Force will receive regular portfolio and technical operational reports.
   B. Provide consultation to the NAIC technology staff, as well as the interpretation of intent and specific technology direction where needed. For example, from time to time, NAIC technology staff may request approval of a specific technology approach, such as a proposal to drop support for a particular version of software. The Task Force will provide direction in such matters, either directly or through a working group. Task Force members will also communicate current and future state technology changes planned for their state to alert NAIC technology staff of potential impacts and requirements for NAIC systems and services used by state insurance regulators.
   C. Review, with technical recommendations for the Subcommittee: 1) Fiscal Impact Statements Appendix A for all State Ahead projects, as well as others involving a technology component exceeding $100,000 or 1,150 hours of technology staff development and which is not limited to the support of the internal operations; and 2) project requests that involve technology being submitted to the Subcommittee or directly to the Executive (EX) Committee.

Reaffirmed by the Executive (EX) Committee and Plenary, TBD
Reaffirmed by the Executive (EX) Committee, Dec. 8, 2019
Reaffirmed by the Internal Administration (EX1) Subcommittee, Nov. 26, 2019
Reaffirmed by the Audit Committee, Aug. 2, 2019

2020 PROPOSED NAIC AUDIT COMMITTEE

Committee Charter

1. The Audit Committee will:
   A. Provide continuous audit oversight, including:
      1. Provide an open avenue of communication between the independent auditor and the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.
      2. Confirm and ensure the independence of the independent auditor.
      3. Inquire of management and the independent auditor about significant risks or exposures and assess the steps management has taken to minimize such risk.
      4. Consider and review with the independent auditor:
         a. Significant findings during the year, including the status of previous audit recommendations.
         b. Any difficulties encountered in the course of audit work, including any restrictions on the scope of activities or access to required information.
         c. The adequacy of internal controls, including computerized information system controls and security, as documented in the Statement on Auditing Standards (SAS) 115 letter from the independent auditor.
         d. Related findings and recommendations of the independent auditor with management’s responses, as documented in the SAS 114 letter from the independent auditor.
      5. Meet periodically with the independent auditor in separate executive sessions to discuss any matters the Committee believes should be discussed privately with the Committee.
      6. Report periodically to the Executive (EX) Committee and Internal Administration (EX1) Subcommittee on significant results of the foregoing activities.
      7. Instruct the independent auditor that the Executive (EX) Committee and Internal Administration (EX1) Subcommittee are the auditor’s clients.
   B. Provide continuous oversight of reporting policies, including:
      1. Advise financial management and the independent auditor that they are expected to provide a timely analysis of significant current financial reporting issues and practices.
      2. Inquire as to the auditor’s independent qualitative judgments about the appropriateness, not just the acceptability, of the accounting principles and the clarity of the financial disclosure practices.
      3. Inquire as to the auditor’s views about whether management’s choices of accounting principles are conservative, moderate or aggressive from the perspective of income, asset and liability recognition, and whether those principles are common practices or are minority practices.
      4. Inquire as to the auditor’s views about how choices of accounting principles and disclosure practices may affect NAIC members, the insurance industry, and public views and attitudes.
   C. Provide continuous oversight of financial management, including:
      1. Review the monthly consolidated financial statements and receive regular reports from executive management on the financial operations of the association.
      2. Meet prior to, or at, each national meeting, or more frequently as circumstances require. The Committee may ask members of management or others to attend meetings and provide pertinent information, as necessary.
      3. Report on significant results of the foregoing activities to the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee on a regular basis.
2020 Proposed Charges for Executive (EX) Committee consideration

D. Conduct scheduled audit activities, including:
   1. Recommend the selection of the independent auditor for approval by the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, approve the compensation of the independent auditor, and review and approve the discharge of the independent auditor.
   2. Review annually the audit scope and plan of the independent auditor with management and the independent auditor, including:
      a. The independent auditor’s audit of the financial statements, accompanying footnotes and its report thereon.
      b. Any significant changes required in the independent auditor’s audit plans.
      c. Any difficulties or disputes with management encountered during the course of the year under audit.
      d. Other matters related to the conduct of the audit, which are to be communicated to the Committee under generally accepted auditing standards (GAAS).
   3. Review and approve needs-based funding allocations, as needed.
   4. Review and update the Committee charter, on at least an annual basis.

E. Conduct other activities when necessary, including:
   1. Arrange for the independent auditor to be available to the full Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, as needed.
   2. Review and approve requests for any management consulting engagement to be performed by the independent auditor, and be advised of any other study undertaken at the request of management that is beyond the scope of the audit engagement letter.
   3. Conduct and/or authorize investigations into any matters within the Committee’s scope of responsibilities. The Committee shall be empowered to retain independent counsel and other professionals to assist in the conduct of any investigation.
   4. Ensure members of the Committee receive the appropriate orientation to the Committee and receive a copy of the policy manual.

NAIC Support Staff: Jim Woody
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is: □ New Model Law or □ Amendment to Existing Model

1. Name of group to be responsible for drafting the model:

   Group Capital Calculation (E) Working Group

2. NAIC staff support contact information:

   Dan Daveline
ddaveline@naic.org
(816) 783-8134

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

   • Insurance Holding Company System Regulatory Act (#440)
   • Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)

   In 2015, the NAIC adopted the following charge to the Financial Condition (E) Committee who subsequently formed the Group Capital Calculation (E) Working Group to carry out such a change.

   “Construct a U.S. group capital calculation using an RBC aggregation methodology; liaise as necessary with the Comframe Development and Analysis (G ) Working Group on international capital developments and consider group capital developments by the Federal Reserve Board, both of which may help inform the construction of a U.S. group capital calculation.”

   The Group Capital Calculation (E) Working Group has been developing the group capital calculation (GCC) since receiving its charge and in May, with the assistance of 33 insurance groups and 15 lead states, began testing the current construction. The lead states are currently reviewing the completed templates and take aways from the testing are expected to be summarized and discussed at the Fall National Meeting in Austin. Upon completion of the field-testing, state regulators will use the results to further improve the construction of the calculation and at this junction, the Working Group is striving to adopt the calculation sometime in 2020. In order to allow states to be able to adopt the GCC, the Working Group is seeking approval to modify the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450). While the Working Group has not concluded the exact construct of such changes, the Working Group expects Section 4 of #440 will need to be revised to require a new filing and #450 will need to be revised to add the new filing and a related new section (Form G).
4. Does the model law meet the Model Law Criteria? ☑ Yes or ☐ No (Check one)

(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? ☑ Yes or ☐ No (Check one)

If yes, please explain why:

State insurance regulators currently perform group analysis on all U.S. insurance groups, including assessing the risks and financial position of the insurance holding company system based on currently available information. However, state regulators currently do not have the benefit of a consolidated statutory accounting system and financial statements to assist them in these efforts. The GCC is expected to fill this void since it requires an aggregation and display of the individual company’s available capital and operating figures. More specifically, the GCC and related reporting will provide more transparency to insurance regulators regarding the insurance group and make risks more identifiable and more easily quantified. In this regard, the tool will assist regulators in holistically understanding the financial condition of non-insurance entities, how capital is distributed across an entire group, and whether and to what degree insurance companies may be subsidizing the operations of non-insurance entities, potentially undermining the insurance company’s financial condition and/or placing upward pressure on premiums to the detriment of insurance policyholders. It is envisioned that this calculation will provide an additional early warning signal to regulators so they can begin working with a company to resolve any concerns in a manner that will ensure that policyholders will be protected. Importantly, the GCC will complement existing group supervisory tools already available to state insurance regulators, such as the Form F Enterprise Risk Report1, the Own Risk and Solvency Assessment Summary Report2 and the Form B Holding Company Filings3. As such, we would expect it to be a national standard

b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

☑ Yes or ☐ No (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary:

As previously noted, the Working Group is striving to adopt the calculation sometime in 2020 and it is expected that revisions to the model be adopted by the NAIC within that same time period so that states can begin to implement through changes to state law.

---

1 Insurance Holding Company System Regulatory Act (#440) and supporting Insurance Holding Company System Model Regulation (#450) require the annual filing of an Enterprise Risk Report (Form F) which requires the disclosure on material risks within the insurance holding company system that could pose enterprise risk to the insurer.

2 Risk Management and Own Risk and Solvency Assessment (ORSA) Model Act (#505) require the annual filing of an ORSA Summary report that includes 1) Description of the Insurer’s Risk Management Framework; 2) Insurer’s Assessment of Risk Exposure; and 3) Group Assessment of Risk Capital and Prospective Solvency Assessment.

3 Insurance Holding Company System Regulatory Act (#440) and supporting Insurance Holding Company System Model Regulation (#450) require the annual filing of a Registration Statement (Form B) which includes, among other items, the annual financial statements of the ultimate controlling person in the insurance holding company system and all of its affiliates and subsidiaries.
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary: See previous discussion.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary:

At this juncture, the changes to the NAIC models are expected to 1) require the filing of the GCC with the state; 2) provide important confidentiality protections; 3) provide exemptions for who is not expected to file the GCC. As such, variations by states related to these elements are not expected.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

The Group Capital Calculation (E) Working Group has not discussed whether the GCC should be an accreditation standard. However, because the GCC is expected to be required of the largest and most complex U.S. insurance group who operate in all states, a national standard is appropriate.

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

Yes. Under Title V of the Dodd-Frank Act, the U.S. Department of the Treasury and the Office of the U.S. Trade Representative are authorized to jointly negotiate covered agreements, defined under the Dodd-Frank Act as written bilateral or multilateral agreements between the United States and one or more foreign governments, authorities or regulators regarding prudential measures with respect to insurance or reinsurance, on the condition that the prudential measures subject to a covered agreement achieve a level of protection for insurance or reinsurance consumers that is “substantially equivalent” to the level of protection achieved under U.S. state insurance laws. On Sept. 22, 2017, the U.S. Department of the Treasury and the Office of the U.S. Trade Representative signed the “Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance” (Covered Agreement). On December 18, 2018, a separate Covered Agreement was signed between the U.S. and the United Kingdom, which is mirrors the language from the agreement with the EU, and has the same timing requirements for implementation.

The Covered Agreement includes requirements on reinsurance collateral, group supervision and group capital. Specifically, Article 4(h) provides that the host supervisor (i.e., a supervisory authority from the territory in which an insurance group has operations but which is not the territory where the worldwide parent is domiciled or headquartered) may not impose a group capital assessment or requirement at the level of the worldwide parent, but only if the insurance group is subject to a group capital assessment imposed by the home supervisor. The group capital assessment of the home supervisor must include a worldwide group capital calculation capturing risk at the level of the entire group, and the home supervisor must have the authority to impose preventive, corrective or otherwise responsive measures on the basis of the assessment, including the authority to impose capital measures where appropriate.

Under Article 10(e) of the Covered Agreement, supervisory authorities in the European Union shall not impose a group capital requirement at the level of the worldwide parent undertaking of the insurance or reinsurance group, with regard to
A U.S. insurance or reinsurance group with operations in the European Union, for 60 months after the date of provisional application of the Covered Agreement; i.e., Nov. 7, 2022. The NAIC is developing a group capital calculation intended to serve as an analytical tool for evaluating an insurer’s capital position at the group level, but which is not intended to be applied as a group-level capital requirement or standard. The *Statement of the United States on the Covered Agreement with the European Union* provides further clarification with respect to this group capital assessment:

The Agreement limits the worldwide application of EU prudential group insurance measures on U.S. insurers operating in the EU. The Agreement provides that U.S. insurers and reinsurers can operate in the EU without the U.S. parent being subject to the group level governance, solvency and capital, and reporting requirements of Solvency II, and reinforces that the EU system of prudential insurance supervision is not the system in the United States. The Agreement does not require development of a group capital standard or group capital requirement in the United States. Article 4(h) contemplates that the states will develop a group-wide capital assessment. Through the National Association of Insurance Commissioners (NAIC), the states are in the process of developing a group capital calculation which is intended to serve as an analytical tool for evaluating a firm’s capital position at the group level. The *United States expects that the NAIC’s group capital calculation will satisfy the “group capital assessment” condition of Article 4(h)*, provided that the work is completed and implemented within five years of the date on which the Agreement is signed. [Emphasis added].

Any state with U.S. groups operating in either the European Union or the United Kingdom will need to adopt these legislative changes by Nov. 7, 2022 in order to effectuate compliance with the Covered Agreement.
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is: ☐ New Model Law or ☑ Amendment to Existing Model

1. Name of group to be responsible for drafting the model:
   Innovation and Technology (EX) Task Force

2. NAIC staff support contact information:
   Denise Matthews
dmatthews@naic.org
   816-783-8007

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

   NAIC Unfair Trade Practices Act (Model #880)
   Section 4(H)(1)

   The Innovation and Technology (EX) Task Force will draft amendments to the NAIC Unfair Trade Practices Act (Model #880), focusing on Section 4H, to clarify what is considered a “rebate” or “inducement”.

4. Does the model law meet the Model Law Criteria? ☑ Yes or ☐ No (Check one)
   (If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).
   a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? ☑ Yes or ☐ No (Check one)
      If yes, please explain why: Inconsistency in the interpretation of the Model language necessitates revisions to clarify the intent and ensure necessary consumer protections remain in place in light of technologies being deployed to add value to existing insurance products and services.
   b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?
      ☑ Yes or ☐ No (Check one)
5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

   X 1  □ 2  □ 3  □ 4  □ 5  (Check one)

   High Likelihood  Low Likelihood

   Explanation, if necessary: A significant amount of time and discussion has already been devoted to this topic including presentations from all stakeholders and discussion around draft guideline language. That should help in accelerating the development process related to this model language.

6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

   □ 1  X 2  □ 3  □ 4  □ 5  (Check one)

   High Likelihood  Low Likelihood

   Explanation, if necessary:

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

   □ 1  X 2  □ 3  □ 4  □ 5  (Check one)

   High Likelihood  Low Likelihood

   Explanation, if necessary:

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

   No

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

   No.
Model Law Development Report

Amendments to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171)—Amendments to Model #171 are required for consistency with the federal Affordable Care Act (ACA) and, therefore, did not require approval of a Request for NAIC Model Law Development by the Executive (EX) Committee. At the 2015 Fall National Meeting, the Regulatory Framework (B) Task Force discussed the proposed revisions to this model. The Task Force requested additional comments by Jan. 22, 2016. The Task Force met Feb. 11, 2016 and appointed the Accident and Sickness Insurance Minimum Standards (B) Subgroup to work on revisions to this model. The Subgroup has been meeting on a regular basis since the 2016 Spring National Meeting and plans to continue meeting via conference call until it completes its work. During its meetings, the Subgroup has discussed a number of issues, including its approach for revising the model’s disability income insurance coverage provisions, and decided preliminarily to review the Interstate Insurance Product Regulation Commission’s (Compact) approach. After pausing its work due to the ACA’s potential repeal, replacement or modification—and the possible impact on the provisions of this model, as well as the Subgroup’s preliminary proposed revisions to the model—the Subgroup began meeting again via conference call in May 2018. Revisions to Model #170, now known as the Supplementary and Short-Term Health Insurance Minimum Standards Model Act, were adopted by the full NAIC membership at the Spring National Meeting. The Subgroup has begun meeting via conference call to consider revisions to Model #171 for consistency with the revised Model #170 since the Summer National Meeting discussing comments received on Sections 1-5 of Model #171. The Subgroup plans to meet via conference call following the Fall National Meeting to complete its review of the Section 1-5 comments and establish public comment period ending in mid-January 2020 for additional Model #171 sections. The Subgroup hopes to complete its work by the 2020 Summer National Meeting.

Amendments to the Annuity Disclosure Model Regulation (#245)—The Executive (EX) Committee met June 19, 2017 and approved a Request for NAIC Model Law Development to amend Model #245. The amendments will revise Section 6—Standards for Illustrations. The purpose of the revision is to address issues identified by the Life Insurance and Annuities (A) Committee’s Annuity Disclosure (A) Working Group related to innovations in annuity products that are not addressed, or not addressed adequately, in the current standards. Revisions addressing participating income annuities were adopted by the Life Insurance and Annuities (A) Committee during its July 19, 2018, conference call and held pending the resolution of the Working Group’s discussions regarding illustrating indexes in existence for less than 10 years. The Working Group continues to discuss additional revisions on the index issue. The Working Group made progress during discussions via conference call on Sept. 19 and Dec. 2, and it received an extension from the Life Insurance and Annuities (A) Committee at the Fall National Meeting to continue its work. The Working Group hopes to complete its work by the 2020 Spring National Meeting.

Amendments to the Suitability in Annuity Transactions Model Regulation (#275)—Amendments to Model #275 are being drafted for consistency with federal rules and, therefore, did not require approval of a Request for NAIC Model Law Development by the Executive (EX) Committee. The Life Insurance and Annuities (A) Committee’s Annuity Suitability (A) Working Group is drafting amendments to Model #275 that would raise the standard of conduct requirement for insurers and producers offering annuity products. The Working Group held an in-person meeting in June to consider the comments received on the draft proposed revisions exposed for a public comment period ending Feb. 15. The Working Group continued its discussion July 23 and July 29 via conference call, as well as during its meeting at the Summer National Meeting. Following the Summer National Meeting, the Working Group developed a new draft of proposed revisions incorporating a best interest standard of conduct and set a comment period ending Sept. 30 to receive comments on the draft. The Working Group discussed the comments received by the Sept. 30 comment deadline via conference calls Nov. 5, Oct. 29, Oct. 15 and Oct. 8. At the end of its Nov. 5 conference call, the Working Group agreed that it had completed its work as directed by the Life Insurance and Annuities (A) Committee at the Spring National Meeting and sent the revised draft to the Life Insurance and Annuities (A) Committee for its consideration. The Life Insurance and Annuities (A) Committee chair set a public comment period ending Nov. 26 to receive comments on the revised draft. The Life Insurance and Annuities (A) Committee plan to discuss the comments received by the public comment deadline during its meeting at the Fall National Meeting.

Amendments to the Health Maintenance Organization Model Act (#430)—The Executive (EX) Committee approved the Request for NAIC Model Law Development to amend Model #430 at the 2019 Summer National Meeting. The HMO Issues (B) Subgroup of the Regulatory Framework (B) Task Force is drafting the amendments to address conflicts and redundancies with provisions in the *Life and Health Insurance Guaranty Association Model Act* (#520). Following the Summer National Meeting, the Working Group met via conference call to consider recommendations from the Virginia Insurance Bureau on revising Model #430 consistent with its charge. During its Nov. 21 conference call, the Working Group decided to move forward with revising Model #430 based on recommendations from the Maine Bureau of Insurance (BOI). It is anticipated the
Subgroup will meet via conference call sometime after the Fall National Meeting to review an initial draft of revisions to Model #430 based on the Maine BOI’s recommendations.

Amendments to the Life Insurance Disclosure Model Regulation (#580)—The Executive (EX) Committee met June 19, 2017, and approved the Request for NAIC Model Law Development to incorporate a policy overview document requirement into Model #580 and the Life Insurance Illustrations Model Regulation (#582), in order to improve the understandability of the life insurance policy summary and narrative summary already required by Section 5A(2) of Model #580 and Section 7B of Model #582. While the Life Insurance and Annuities (A) Committee’s Life Insurance Illustration Issues (A) Working Group was originally planning to revise both Model #580 and Model #582, it will now revise only Model #580. The Working Group has been meeting via conference call to develop language to add a requirement for a one- to two-page consumer-oriented policy overview. The Working Group continued to make progress during its discussions Oct. 21, Sept. 17 and Sept. 3 via conference call and received an extension from the Life Insurance and Annuities (A) Committee at the Fall National Meeting to continue its work. The Working Group hopes to complete its work by the 2020 Spring National Meeting.

Amendments to the Mortgage Guaranty Insurance Model Act (#630)—The Executive (EX) Committee and Plenary approved the Request for NAIC Model Law Development to amend Model #630 on July 26, 2013. The Financial Condition (E) Committee’s Mortgage Guaranty Insurance (E) Working Group developed substantial changes to the model but continues to discuss those changes. The Working Group’s focus has shifted to working with a consultant to produce a capital model that will serve as the basis for levels of intervention included in Model #630, with significant progress made in this area since the Spring National Meeting. The Working Group received an extension from the Financial Condition (E) Committee until the 2020 Spring National Meeting.

New Model: Real Property Lender-Placed Insurance Model Act—The Executive (EX) Committee approved the Request for NAIC Model Law Development, submitted by the Property and Casualty Insurance (C) Committee, to draft the new Real Property Lender-Placed Insurance Model Act at the 2017 Summer National Meeting. The Property and Casualty Insurance (C) Committee’s Lender-Placed Insurance Model Act (C) Working Group exposed a draft of this proposed new model focusing on lender-placed insurance related to mortgage loans for a public comment period ending Oct. 31, 2018. At the 2019 Fall National Meeting, the Working Group received an extension of time to continue drafting the new model.

New Model: Pet Insurance Model Act—The Executive (EX) Committee approved the Request for NAIC Model Law Development at the 2019 Summer National Meeting. The Pet Insurance (C) Working Group is drafting the model law to define a regulatory structure for pet insurance and to address issues, such as: producer licensing; policy terms; coverages; claims handling; premium taxes; disclosures; arbitration and preexisting conditions.

New Model: Pharmacy Benefit Manager (PBM) Model Law—The Executive (EX) Committee approved the Request for NAIC Model Law Development at the 2019 Summer National Meeting to draft a new model law addressing licensure or registration of pharmacy benefit managers (PBMs). The Regulatory Framework (B) Task Force’s Pharmacy Benefit Manager Regulatory Issues (B) Subgroup is drafting the model as a result of discussions that began during the Health Insurance and Managed Care (B) Committee’s work to revise the Health Carrier Prescription Drug Benefit Management Model Act (#22). Following the Summer National Meeting, the Working Group held a number of information-gathering sessions to gather information to assist it in working on its charge. The Working Group is currently considering its next steps.

FINANCIAL STABILITY (EX) TASK FORCE

Financial Stability (EX) Task Force Dec. 9, 2019, Minutes ................................................................. 4-29
Liquidity Assessment (EX) Subgroup Nov. 26, 2019, Minutes (Attachment One) ........................................ 4-33
2019 NAIC Liquidity Stress Test Framework, Nov. 26, 2019, Draft (Attachment Two) ................................. 4-35
Valuation Analysis (E) Working Group Memorandum Regarding Response
   Related to Economic Scenario Generators, Nov. 27, 2019 (Attachment Three) .................................. 4-71
The Financial Stability (EX) Task Force met in Austin, TX, Dec. 9, 2019. The following Task Force members participated: Marlene Caride, Chair (NJ); Eric A. Cioppa, Vice Chair (ME); Andrew N. Mais and Kathy Belfi (CT); David Altmaier and Ray Spudeck (FL); Doug Ommen represented by Jim Armstrong (IA); Dean L. Cameron represented by Nathan Faragher (ID); Gary Anderson (MA); Chlora Lindley-Myers represented by John Rehagen (MO); Bruce R. Ramge represented by Justin Schrader (NE); Jessica Altman represented by Kim Rankin (PA); Raymond G. Farmer (SC); Hodgen Mainda and Trey Hancock (TN); Kent Sullivan represented by Mike Boerner and James Kennedy (TX); and Scott A. White represented by Doug Stolte (VA).

1. **Adopted its Summer National Meeting Minutes**

Commissioner Altmaier made a motion, seconded by Director Farmer, to adopt the Task Force’s Aug. 5 minutes (*see NAIC Proceedings – Summer 2019, Financial Stability (EX) Task Force*). The motion passed.

2. **Adopted the Nov. 26 Minutes of the Liquidity Assessment (EX) Subgroup**

Mr. Schrader made a motion, seconded by Commissioner Altmaier, to adopt the Subgroup’s Nov. 26 minutes (Attachment One). The motion passed.

3. **Heard an Update on FSOC Developments**

Superintendent Cioppa reported that since the Summer National Meeting, the Financial Stability Oversight Council (FSOC) has met three times. During last week’s meeting, the FSOC approved the final revisions to the Nonbank Designations guidance. He summarized that the final version, like the initial proposal, prioritizes an activities-based approach to the identification and mitigation of risks to financial stability. He added that the new guidance also makes changes to the designations process, including increasing transparency around the process. He also said that there is now a clearer off-ramp to designation, with both a pre-designation off-ramp and a robust post-designation off-ramp.

Superintendent Cioppa praised the new framework, which he said represents a sensible shift in approach and is consistent with approaches the NAIC has been advocating for the past several years. He added that the FSOC’s annual report is now available on the FSOC website.

4. **Exposed the Proposed 2019 NAIC Liquidity Stress Test Framework**

Mr. Schrader reported that state insurance regulators have been working diligently toward delivering an initial proposal of a 2019 liquidity stress test and is pleased that today they are in a position to do just that. He highlighted the key design element recommendations made since the last Task Force meeting at the Summer National Meeting.

Mr. Schrader said that for the 2019 liquidity stress test, a baseline normal operations scenario, two liquidity stress scenarios and an insurer-specific information request will be required. For each stress scenario, there will be a regulator-provided narrative for companies to use in their internal modeling. The assumptions underlying the modeled narrative will be a combination of regulator prescribed assumptions and company specific assumptions, the latter of which must be consistent with the prescribed narrative.

The first liquidity stress test is a Severely Adverse Scenario, where market conditions are similar to the 2008 financial crisis. The state insurance regulator prescribed narrative and assumptions are primarily extracted from the Federal Reserve Board’s Supervisory Scenarios for Annual Stress Tests Required under the Dodd-Frank Act Stress Testing Rules and the Capital Plan Rule. He said there is also a “what if” modification to the Severely Adverse Scenario that limits the insurer to curing any liquidity deficiency through expected asset sales amounts. He clarified that under that assumption, there are no internal and external funding sources to satisfy any liquidity deficiency under stress such as no new Federal Home Loan Bank (FHLB) draws or holding company contributions.
Mr. Schrader said the second liquidity stress test is a scenario that includes an interest rate spike, a market-wide decrease in equities and a credit spread stress. Additionally, the nationally recognized statistical rating organization (NRSRO) insurance industry outlook goes from stable to negative, with many insurers experiencing a downgrade. A “what if” modification changing the equities decrease to an increase and removing the credit spread stress to this stress scenario is also required. He noted that while some elements of this narrative would also be relevant for performing a Sovereign Debt stress scenario, state insurance regulators are not ready to implement it for the 2019 liquidity stress test.

Mr. Schrader noted that for the insurer-specific information request, state insurance regulators also require the insurers to report their severe worst-case stress scenario in a detailed narrative, including any assumptions needed for state insurance regulators to gain greater insight to the drivers of liquidity risk and to inform future prescribed stress scenarios.

Mr. Schrader explained that if the insurer reported a liquidity deficiency, where liquidity uses exceed sources, then the insurer would need to disclose in the reporting templates the expected asset sales involved with meeting that shortfall. He added that the insurer will be requested to provide:

- The expected asset sales amounts generated by the system prior to any review or modification by the portfolio manager.
- The final expected asset sales amounts after review or modification by portfolio manager.

Mr. Schrader mentioned that the holding company and life insurance legal entities in the group are required to perform the stress tests. Additionally, non-life insurance and non-insurance legal entities within the group with material liquidity risks should also be required to perform the stress tests. He mentioned that the definition of materiality should be flexible, based on the insurer’s Own Risk and Solvency Assessment (ORSA) and internal liquidity stress testing.

Mr. Schrader mentioned that subsequent to insurer reporting of liquidity stress testing results and aggregation of data, the Liquidity Assessment (EX) Subgroup will also focus on the mapping of industry aggregated sales to market data. The NAIC aims to compare the aggregated results against various benchmarks, potentially including normal and/or stressed trading volumes and asset values for various asset classes, to determine the impact such sales may have on the capital markets in times of stress.

Mr. Schrader requested that the Task Force, together with the Liquidity Assessment (EX) Subgroup, expose the proposed 2019 NAIC Liquidity Stress Test Framework for a 60-day public comment period ending Feb. 7, 2020.

Mr. Schrader made a motion, seconded by Ms. Belfi, to expose the proposed 2019 NAIC Liquidity Stress Test Framework jointly by the Task Force and the Subgroup for a 60-day public comment period (Attachment Two). The motion passed.

5. Received an Update from the Receivership and Insolvency (E) Task Force on its Work to Address the Financial Stability (EX) Task Force’s Referral Letter to Undertake Analysis Relevant to the MPI

Mr. Kennedy reported that the Receivership and Insolvency (E) Task Force continues to work to address the Financial Stability (EX) Task Force’s referral letter to undertake an analysis of resolution and recovery concerns important to financial stability as part of the Macroprudential Initiative (MPI). He said the current Insurer Receivership Model Act (#555) substantially conforms with the International Association of Insurance Supervisors’ (IAIS) Insurance Core Principles (ICPs) and its Common Framework for the Supervision on Internationally Active Insurance Groups (ComFrame), as well as the Financial Stability Board’s (FSB) Key Attributes of Effective Resolution Regimes for Financial Institutions.

Mr. Kennedy cautioned that most states have laws based on prior NAIC models, so the NAIC will encourage adoption, including a request to amend the Financial Regulation Standards and Accreditation Program. He also noted that a bridge institution might be useful in a receivership to address an early termination on qualified financial contracts (QFCs) but would require the use of a temporary stay on termination rights, which is prohibited in many states.

Mr. Kennedy added that the Receivership Model Law (E) Working Group will explore if a bridge could be implemented under regulatory oversight before receivership to address the early termination of QFCs. He also reported that the Financial Condition (E) Committee has adopted amendments to the Guideline for Stay on Termination of Netting Agreements and Qualified Financial Contracts (#1556), which will be considered for adoption by the Executive (EX) Committee and Plenary at this national meeting.
6. Heard an Update on CLO Stress Tests

Eric Kolchinsky (NAIC) reported that the stress thesis is based on the concern about U.S. insurer holdings of collateralized loan obligations (CLOs) that stem from lax underwriting on the underlying leveraged loans. He added that the loose underwriting falls into three areas: covenant-lite; lack of subordination; and weaker earnings before interest, tax, depreciation and amortization (EBITDA) multiples. He concluded that these developments will result in substantially lower recovery rates on leveraged loans during the next recession. He forecast that loan recoveries will deteriorate from the historical norms to levels comparable to unsecured debt. He added that recovery stresses were run in both historical and moderately stressful default environments.

Mr. Kolchinsky said that about 85% of CLOs outstanding were modeled in three scenarios, which is approximately $527 billion. He noted that insurance companies hold a total of $130 billion of CLOs based on year-end 2018 data, which was published in the NAIC’s Special Report, “U.S. Insurers’ Exposure to CLOs,” on June 19, 2019. He added that these exposures were classified into five categories:

- Mapped and modeled “normal” ($96 billion)
- Mapped and modeled “atypical” ($1 billion)
- Ready to map ($6 billion)
- Out of scope ($12 billion)
- Need information ($15 billion)

Mr. Kolchinsky concluded that, based on results, CLOs do not appear to be a significant risk to the insurance sector as a whole, but a few companies have concentrated investments in combo notes, which are securities that pay off quickly in good times but take significant losses in stressed environments. He reported that NAIC staff has requested that the Valuation of Securities (E) Task Force exclude combo notes from filing exemption treatment because their risk is not captured by ratings.

7. Heard an Update on Macroprudential Surveillance

Mr. Nauheimer reported that the IAIS has adopted a framework for a holistic approach to assessing and mitigating systemic in the insurance sector, with implementation beginning in 2020. He summarized that the holistic framework consists of the following elements:

- An enhanced set of supervisory policy measures for macroprudential purposes.
- The global monitoring exercise that is both individual and sector wide.
- Mechanisms to allow for a collective assessment of potential global systemic risk and a coordinated supervisory response.
- An assessment by the IAIS of the consistent implementation of the enhanced supervisory policy measures and powers of intervention.

He also reported that the IAIS Macro-prudential Surveillance Working Group (MPSWG) will be disbanded and two new groups will be formed in its place. They are the “Macroprudential Monitoring Working Group” or MMWG and the “Macroprudential Supervision Working Group” or MSWG. The work related to macroprudential supervision will move to the MSWG. In the immediate future the MSWG will be tasked with developing and finalizing two application papers: The Application Paper on Liquidity Risk Management; and the macroprudential supervision paper to support implementation of ICP 24 – Macroprudential Surveillance and Insurance Supervision.

Mr. Nauheimer reported that the IAIS issued the Application Paper on Liquidity Risk Management for public consultation with comments due by Jan. 18, 2020, and he encouraged interested parties to submit comments before the deadline. He also said the FSB has accepted the IAIS recommendation to suspend global systemically important insurer (G-SII) identification and, in 2022, the FSB will consider whether to discontinue or re-establish an annual identification of G-SIIs.

Mr. Nauheimer also reported that as the IAIS takes a deeper dive into the Holistic Framework’s domestic impact with its four key elements and numerous workstreams, the NAIC is reviewing any areas where state insurance regulators may want to ramp up work in progress and/or bring new proposals forward under the domestic Macroprudential initiatives. Many initiatives updated earlier in the meeting such as the Liquidity Stress Testing and Resolution initiatives address Holistic Framework workstreams. The creation of a U.S. risk assessment is another example of a relatively new initiative motivated by the Holistic Framework.
8. Received a Response from the Valuation Analysis (E) Working Group Regarding the Academy’s ESGs

Todd Sells (NAIC) reported that the Task Force received a status report regarding Commissioner Caride’s request to the Valuation Analysis (E) Working Group (VAWG) to assess a potential concern related to economic scenario generators (ESGs) developed by the American Academy of Actuaries (Academy). The VAWG’s status report is included in a memo dated Nov. 27 (Attachment Three). Mr. Boerner summarized the report and indicated the VAWG will continue addressing issues of concern. He added that though the process of implementing a new ESG is expected to take several years once a vendor has been selected, the Life Actuarial (A) Task Force (LATF) is pursuing an aggressive timeline. The details can be found on a report posted on the LATF’s NAIC webpage.

Having no further business, the Financial Stability (EX) Task Force adjourned.

Liquidity Assessment (EX) Subgroup
Conference Call
November 26, 2019

The Liquidity Assessment (EX) Subgroup of the Financial Stability (EX) Task Force met via conference call Nov. 26, 2019. The following Task Force members participated: Justin Schrader, Chair (NE); Kathy Belfi (CT); Philip Barlow (DC); Carrie Mears (IA); Bruce Sartain and Vincent Tsang (IL); Bill Carmello (NY); and Mike Boerner (TX). Also participating was: John Rehagen (MO).

1. Discussed its Progress on the Liquidity Stress Test Proposal

Mr. Schrader stated that a draft of the 2019 liquidity stress test proposal will be jointly exposed for a 60-day public comment period by the Financial Stability (EX) Task Force and the Subgroup during the Task Force’s Dec. 9 meeting at the Fall National Meeting.

Mr. Schrader noted that the draft 2019 liquidity stress test proposal does not address all aspects of liquidity risk concerns, but rather focuses on key risks from the 2019 stress test results to further refine the methodology. Mr. Schrader highlighted the key design element recommendations made since the last Task Force meeting at the Summer National Meeting.

Mr. Schrader said that for the 2019 liquidity stress test, a baseline normal operations scenario, two liquidity stress scenarios and an insurer-specific information request should be required. For each stress scenario, there will be a state insurance regulator-provided narrative and state insurance regulator-prescribed assumptions that must be used in the insurer’s internal modeling. For these stress scenarios, there will be company assumptions to be generated and used by the insurer based upon the state insurance regulator-provided narrative and state insurance regulator-prescribed assumptions that exist.

The first liquidity stress test is a Severely Adverse Scenario, where market conditions are similar to the 2008 financial crisis. The state insurance regulator prescribed narrative and assumptions are primarily extracted from the Federal Reserve Board’s Supervisory Scenarios for Annual Stress Tests Required under the Stress Testing Rule of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act. He said that additionally, there is a “what if” modification to the Severely Adverse Scenario that limits the insurer to curing any liquidity deficiency through expected asset sales amounts. He clarified that under that assumption, there are no internal and external funding sources to satisfy any liquidity deficiency under stress such as no new FHLB draws or holding company contributions. Mr. Schrader added that the values of assumptions such as market capacity, swaption volatility, structured spreads, swap spreads and credit default assumptions being suggested in the draft exposure document will be finalized in the first quarter of 2020 and to also reflect an update from the Federal Reserve Board.

Mr. Schrader said the second liquidity stress test is a scenario that contemplates whether an interest rate spike, equities decrease and credit spread stress exist. Additionally, the nationally recognized statistical rating organization (NRSRO) insurance industry outlook goes from stable to negative with many insurers experiencing a downgrade. A “what if” modification to this stress scenario is also required. State insurance regulators see value in performing a Sovereign Debt stress scenario but are not ready to implement it for the 2019 liquidity stress test. This stress scenario and “what if” modification will accomplish some of the dynamics that would be included in a Sovereign Debt stress, and state insurance regulators will utilize those results to build out a Sovereign Debt stress scenario in the future. The “what-if” modification to this stress scenario includes the state insurance regulator-provided narrative and all state insurance regulator-prescribed assumptions as per above except that instead of a decrease in equities, insurers should assume an increase in equities. Additionally, no credit spread stress should be assumed.

Mr. Schrader noted that for the insurer-specific information request, state insurance regulators also require the insurers to report their severe worst-case stress scenario in a detailed narrative, including any assumptions needed for state insurance regulators to gain greater insight to the drivers of liquidity risk for specific insurers and to inform future prescribed stress scenarios.

Mr. Schrader explained that if the insurer reported a liquidity deficiency, where liquidity uses exceed sources, then the insurer would need to disclose in the reporting templates the expected asset sales involved with meeting that short fall. He added that the insurer will be requested to provide:

- The expected asset sales amounts generated by the system prior to any review or modification by the portfolio manager.
The final expected asset sales amounts after review or modification by portfolio manager.

Mr. Schrader mentioned that the holding company and life insurance legal entities in the group are required to perform the stress tests. For the remaining non-life insurance and non-insurance legal entities within the group, those with material liquidity risks should be required to perform the stress tests. He mentioned that the definition of materiality should be flexible, based on the insurer’s Own Risk and Solvency Assessment (ORSA) and internal liquidity stress testing. He also mentioned that based on the results of the 2019 initial stress test exercise, the Subgroup will determine if additional materiality criteria should be developed to help ensure better comparability among insurers.

As to the next steps, Mr. Schrader noted that the study group still needs to address other types of disclosures to be captured in the 2019 liquidity stress test results—for example, some of the key company assumptions utilized by the insurers. These disclosures will be finalized in the first quarter of 2020.

Mr. Schrader mentioned that the timing of the 2019 liquidity stress test is proposed to be early third quarter of 2020.

Mr. Schrader mentioned that subsequent to insurer reporting of liquidity stress testing results and aggregation of data, the Subgroup will also focus on the mapping of industry aggregated sales to market data. The NAIC aims to compare the aggregated results against various benchmarks, potentially including normal and/or stressed trading volumes and asset values for various asset classes, to determine the impact such sales may have on the capital markets in times of stress. Findings from this analysis may also inform expected asset sale assumptions utilized in future runs of the liquidity stress test. As part of its macroprudential surveillance, state insurance regulators and/or the NAIC may reach out to other regulatory agencies to discuss aggregate results that may affect other regulated industries such as banks, securities brokers and asset managers. State insurance regulators may also coordinate with other agencies to identify appropriate and perhaps coordinated action they may take to prevent or minimize the effect large asset sales may have on the financial markets and overall economy.

Mr. Schrader said that for the 2019 liquidity stress test exercise, lead state insurance regulators will utilize their examination authority to collect the reporting results from insurers identified by the scope criteria to ensure confidentiality. He added that the Task Force will be developing a long-term solution to confidentiality, possibly in coordination with the needs from the group capital calculation (GCC) project.

Mr. Tsang (IL) asked if an executive summary to the draft exposure document would be good to have to better understand the purpose, to which Mr. Schrader responded that the background section of the document covers this aspect.

Mr. Rehagen (MO) asked for a confirmation of which firms are on the list based on the scope criteria. Mr. Schrader responded that 23 firms are in the scope, noting that he had checked with all lead state insurance regulators if those firms were informed.

Having no further business, the Liquidity Assessment (EX) Subgroup adjourned.

1. Introduction

1.1 Macroprudential Implications of a Liquidity Stress

Beginning mid-year 2017, the NAIC embarked on a project to develop a liquidity stress test (LST) framework. While the NAIC has existing tools and processes for assessing liquidity risk at a legal entity level (i.e., “inward” impacts to the insurer), there was recognition that the NAIC toolbox could be further enhanced with the addition of more granular data in the annual statement and a tool that would enable an assessment of macroprudential impacts on the broader financial markets (i.e., “outward” impacts) of a liquidity stress affecting a number of insurers simultaneously.

Post-financial crisis, there were several attempts to assess potential market impacts emanating from a liquidity stress in the insurance sector. Many of these analyses relied heavily on anecdotal assumptions and observations from behaviors of other financial sectors. In order to provide more evidence-based analyses, the NAIC decided to develop an LST for large life insurers that would aim to capture the impact on the broader financial markets (i.e., outward impacts) of aggregate asset sales under a liquidity stress.

The stress test will be run annually and the findings, on an aggregate basis, reported annually as part of the NAIC’s continuous macroprudential monitoring efforts. The NAIC’s pursuit of the LST should not suggest any pre-judgement of the outcomes. The NAIC believes there is value to the exercise whether it points to vulnerabilities of certain asset classes or markets or, alternatively, suggests that even a severe liquidity stress affecting the insurance sector is unlikely to have material impacts on financial markets. The NAIC LST is intended to supplement, not replace, a firm-specific liquidity risk management framework. The NAIC has not yet discussed steps that might be taken to address any identified vulnerabilities but acknowledges that any recommendations may require collaboration with other financial regulators.

This initial exposure document focuses on the LST itself which is one component of a broader LST framework. A more comprehensive framework, still to be developed, will additionally address model laws to establish regulatory authority, confidentiality and other policy considerations.
Once the LST framework is further developed by the Subgroup and Task Force, a proposal will be sent to the Financial Condition (E) Committee as per the adopted charges.

The NAIC’s proposed 2019 LST is contained in the pages that follow and is exposed for a public comment period ending Feb. 10, 2020. The NAIC recognizes that, at least in the early years, the stress testing process and analyses will be iterative. We expect refinements to the LST as the framework is developed, especially after the first year’s implementation.

2. Background

2.1 NAIC Macroprudential Initiative

The NAIC’s Macroprudential Initiative (MPI) commenced in 2017. It recognized the post-financial crisis reforms that became part of our Solvency Modernization Initiative (SMI) that continue to serve us well today. However, in the ensuing years since those reforms, insurers have had to contend with sustained low interest rates, changing demographics and rapid advancements in communication and technology. They have responded by offering new products, adjusting investment strategies, making structural changes and expanding into new global markets. There are new market players, new distribution channels, and a complex web of interconnections between financial market players.

What has not changed since the financial crisis is the scrutiny on the insurance sector in terms of understanding how insurers react to financial stress, and how that reaction can affect, via various transmission channels, policyholders, other insurers, financial market participants and the broader public.

The proposed work on macroprudential measures is reflective of state insurance regulators’ commitment to ensure that the companies they regulate remain financially strong for the protection of policyholders, while serving as a stabilizing force to contribute to financial stability, including in stressed financial markets. To that end, the NAIC’s three-year strategic plan (2018-2020), State Ahead, reflects the objective of evaluating gaps and regulatory opportunities arising from macroprudential surveillance, and develop appropriate regulatory responses.
The NAIC’s work on macroprudential surveillance is overseen by the Financial Stability (EX) Task Force of the Executive (EX) Committee. In April 2017, the Task Force was asked to consider new and improved tools to better monitor and respond to both the impact of external financial and economic risks on supervised firms, as well as the risks emanating from or amplified by these firms that might be transmitted externally. The Task Force, in turn, focused its efforts on potential enhancements to liquidity risk, among other areas. More specifically, the Task Force was requested to further develop the U.S. regulatory framework on liquidity risk with a focus on life insurers due to the long-term cash-buildup involved in many life insurance contracts and the potential for large-scale liquidation of assets.

2.2 Liquidity Assessment Subgroup

To carry out its work on liquidity, the Task Force established the Liquidity Assessment (EX) Subgroup mid-year 2017.

2.2.1 Mandate

The Subgroup’s charges and workplan reflect the following assignments:

- Review existing public and regulator-only data related to liquidity risk, identify any gaps based on regulatory needs and determine the scope of application, and propose recommendations to enhance disclosures.
- Develop an LST framework proposal for the Financial Condition (E) Committee’s consideration, including the proposed universe of companies to which the framework will apply (e.g., large life insurers).
- Once the stress testing framework is completed, consider potential further enhancements or additional disclosures.

In addition, a small informal study group comprised of state insurance regulators, industry participants and NAIC staff was formed to consider the specific data needs and technical aspects of the project. The study group is NOT an official NAIC working group. All recommendations from the study group must be vetted and considered by the Liquidity Assessment (EX) Subgroup and/or the Financial Stability (EX) Task Force according to NAIC procedures.
2.2.2 Data Gaps

Prior to undertaking work on the LST, the Subgroup constructed an inventory list of existing life insurer disclosures as of 2018 that contribute to an understanding of liquidity risk. When assessing the current state, the Subgroup recognized the availability of significant detailed investment-related disclosures but contrasted it to the relatively sparse liability-related disclosures. To remedy this imbalance, a blanks proposal was constructed to significantly increase the disclosures for life insurance products.

Specifically, the Analysis of Operations by Line of Business schedule was expanded from a single exhibit to five exhibits, one each for Individual Life, Group Life, Individual Annuity, Group Annuity, and Accident and Health (A&H). The Analysis of Increase in Reserves schedule was similarly expanded. Within each of the five new exhibits, columns were added for more detailed product reporting. For example, columns were added to the Individual and Group Life exhibits to capture universal life insurance and universal life insurance with secondary guarantees (ULSG), and columns were added to the Individual and Group Annuity exhibits to capture variable annuities and variable annuities with guaranteed benefits. In addition, two new lines were added to the now five exhibits of the Analysis of Increase in Reserves schedule: one capturing the cash surrender value of the products outstanding and another capturing the amount of policy loans available (less amounts already loaned).

A new addition was also proposed to the Life Notes to Financial Statement. The new Note 33 considered the type of liquidity concerns disclosed in Note 32 for annuities and deposit-type contracts and added disclosures for life insurance products not covered in Note 32.

These proposals were exposed and commented upon several times by the Liquidity Assessment (EX) Subgroup, the Financial Stability (EX) Task Force and the Blanks (E) Working Group. Ultimately, they were adopted by NAIC Plenary for inclusion in the 2019 life annual statement blank. As an interim step, The Financial Stability (EX) Task Force performed a data call requesting a few key lines of information from the newly adopted 2019 format of the Analysis of Operations
by Line of Business schedule and the Analysis of Increase in Reserves schedule, as well as the new Note 33, but populated with 2018 year-end data. This data call was completed in July 2019.

2.2.3 Discussions with Insurers

During the latter part of 2017 and the first quarter of 2018, the Subgroup conducted calls with several large life insurers who agreed to share their internal liquidity risk assessment processes. The dialogue provided extremely helpful input and informed the establishment of the initial direction of the LST framework.

Feedback from these discussions include:

- Scope criteria should be risk-focused, not solely based on size.
- The stress test should align with internal management reporting and leverage the Own Risk and Solvency Assessment (ORSA).
- The stress test should be principle-based and complement a company’s internal stress testing methodology.
- Regulatory guidance should be provided to help define liquidity sources and uses, products/activities with liquidity risk, time horizons, level of aggregation, reporting frequency, and establishing stress scenarios.
- Public disclosure of results should be carefully considered to avoid exacerbating a liquidity crisis.

Regarding the specifics of liquidity assessments/stress test approaches, significant diversity in practice existed. Key observations in this regard included:

- Liquidity tests are performed at the material entity level and at the holding company level. Definitions of material entities differ.
- Most firms determine some sort of coverage ratio (Liquidity Sources)/(Liquidity Uses) for base and stress scenarios and monitor results to ensure they align with the firm’s (internal) risk appetite. Categories of liquidity sources and uses differ across firms, and assumptions vary depending on time horizon. Some insurers determine coverage ratios using balance sheet values, applying different haircuts by asset class, time horizon and type of stress. Other
insurers determine liquidity coverage gaps (Liquidity Inflows – Liquidity Outflows) using a cash-flow approach.

• Stress scenarios vary by company, reflecting a combination of market-driven, as well as idiosyncratic and insurer-specific, scenarios.

• Time horizons tested also varied, typically ranging from seven days to one year.

3. Scope Criteria for Determining Groups Subject to Stress Test

In determining the scope of companies subject to the LST, consideration was given to activities assumed to be correlated with liquidity risk. Another consideration was the desirability of tying data used in the criteria back to the statutory financial statements. Ultimately, six activities were identified: 1) fixed and indexed annuities; 2) funding agreements; 3) derivatives; 4) securities lending; 5) repurchase agreements; and 6) borrowed money. Minimum thresholds were established for each of these six activities. A life insurance legal entity or life insurance group exceeding the threshold for any of the six activities is subject to the stress test. (See Annex 1 for more details.) For 2019, 23 insurance groups met the criteria.

While the scope criteria only uses statutory annual statement data, the stress test is not similarly limited. Thus, the stress test will consider many more liquidity risk elements than the scope criteria, and internal company data will be the source for many of those liquidity risk elements.

Just as the LST structure and methodology may change over time, the scope criteria may also be modified, for example, in response to new data points in the NAIC annual statement blank.

Using the agreed criteria, NAIC staff obtained the amounts for all life insurance legal entities from the 2018 annual statutory financial statements (filed by March 1, 2019). If two or more life insurers are part of an insurance group with an NAIC group code, then the numbers for each of those legal entity life insurers will be summed together to represent an insurance group result. Thus, a legal entity life insurer not in an insurance group can meet the threshold on its own, or the sum of legal entity life insurers in a group can meet the threshold.
In establishing whether an insurer or group met or exceeded the threshold criteria, the Subgroup members supported using the most current single year activity rather than a multi-year average. This resulted in coverage amounts ranging from 60% to 80% of the industry total for each activity based on 2018 data. In the future, regulatory judgment will be used to address an insurer’s exit from or entry to the scope of insurers subject to the LST.

4. Stress Testing Structure

4.1 Liquidity Stress Test Summary

The stress test employs a company cash-flow projection approach incorporating liquidity sources and uses over various time horizons under a baseline assumption and some number of stress scenarios (For 2019, there are two stress scenarios and also an insurer-specific request for information.) The available assets are then recorded by asset category. The LST then calls for identification of expected asset sales by category to cure any cash-flow deficits (liquidity uses exceed liquidity sources) under the stress scenarios.

The stress scenarios may vary from year-to-year and contain variations referred to as “what-if” scenarios. The following sections provide a further description of the LST’s key components.

4.2 Entities to Be Included in Stress Tests

The scope of entities included within an insurance group for the purposes of LST to assess the potential for large-scale liquidation of assets should include:

- Life insurance legal entities.
- Where applicable, their holding companies that could be a source of liquidity to the life insurance legal entities.
- Non-life insurance entities and non-insurance entities with material sources of liquidity, or that carry out material liquidity risk-bearing activities and could, directly or indirectly, pose similar risk of large-scale liquidation of assets.

For 2019, the legal entities identified in the bullets above, per a company’s ORSA, must be considered as material or identified as carrying out material liquidity risk-bearing activities and,
hence, subject to internal LST requirements. Although a legal entity in the group may not be required to perform the stress test due to materiality considerations, those entities’ cash impacts on entities performing the stress test must be captured in the sources and uses templates. Based on the results of the 2019 initial stress test exercise, the Subgroup will determine if additional materiality criteria should be developed to ensure better comparability amongst insurers.

4.3 Cash-Flow Approach

The LST is anchored by a cash-flow approach, using companies’ actual cash-flow projections of sources and uses of liquidity over various time horizons based upon experience and expectations. This contrasts with a balance sheet approach, which employs static balance sheet amounts and generic assumptions about asset liquidity. While a balance sheet approach is easier to apply and provides calculation consistency (and thus the perception of increased comparability), its “one-size-fits-all” approach could result in a misleading assessment of liquidity risk and fail to capture certain asset activities or product features under different stress scenarios and time horizons. The cash-flow approach is deemed more dynamic and may capture liquidity risk impacts more precisely.

4.4 Liquidity Sources and Uses

The insurer should produce cash-flow projections for sources of liquidity and uses of liquidity that cover: operating items, investment and derivatives, capital items, and funding arrangements. (See Annex 2: Sources and Uses template.) To clarify an issue regarding funding arrangements, the projected cash flows for liquidity sources and uses should include already existing funding arrangements, such as Federal Home Loan Bank (FHLB) draws outstanding in the current time period. Also, specific to the holding company, these projected cash flows for liquidity sources and uses should include non-U.S. impacts as well.

The insurer will produce these liquidity sources and uses cash-flow projections in a baseline, normal course of business scenario, for each time horizon. The insurer will also produce these cash flows based upon a specific number of required stress scenarios for each time horizon. (For 2019, there are two stress scenarios and also an insurer-specific request for information.)
Baseline Assumptions for Cash Flows

Baseline (pre-stress) cash flows are the insurer-specific cash flows from normal expected operations. Insurers should prepare cash-flow projections under normal operating conditions and report the net cash flows (projected liquidity sources less uses) for each time horizon. These cash-flow projections should be consistent with those used for internal financial planning and analysis (FP&A), risk management data sets, etc. A positive net cash-flow is presumed in the baseline cash flows since companies are not expected to be operating in a net cash-flow deficiency state.

4.5 Stress Scenarios and Their Assumptions

For year-end 2019, there are two liquidity stress scenarios: 1) a 2008 financial crisis-like scenario; and 2) an interest rate shock/downgrade scenario and the insurers most adverse scenario. There is also an insurer-specific information request. The 2008 financial crisis-like scenario and interest rate shock/downgrade scenario contains a state insurance regulator-provided narrative, state insurance regulator-prescribed assumptions and company-specific assumptions. The insurer-specific information request contains a company-provided narrative. The state insurance regulator-provided narrative will be a qualitative description of the economic scenario in place to highlight the particular risks and sensitivities associated with that stress scenario. The state insurance regulator-prescribed assumptions are specific parameters insurers should incorporate into their modeling for a particular scenario. Company-specific assumptions should be consistent with the information provided in the state insurance regulator-provided narrative and state insurance regulator-prescribed assumptions, and represent the detailed assumptions needed for a specific company’s internal model. Examples include debt issuance, lapse sensitivity, new business sensitivity and mortality sensitivity. All key business activities and product types’ impact to liquidity should be considered. If the insurer’s internal model does not utilize a specific economic and/or example of company-specific assumption included in this document, the internal model does not need to be modified to utilize it. However, if the insurer’s internal model does utilize a specific economic and/or example of company-specific assumption included in this document, the insurer must utilize the specific value for that assumption provided in this document. For example, if an insurer’s internal model uses Structured Spreads over Treasuries,
the company must use the value for that 3-month assumption as presented in the final regulator-prescribed assumptions in quarter 1 of 2020. If there is no specific value for a certain time horizon, the company should use the values for the other time horizon to interpolate a value. For example, if the state insurance regulator-provided assumptions in quarter 1 of 2020 include values for three-month, six-month, nine month and one year, the insurer should use those values to extrapolate the one-month value. The company is not to utilize its own values for any item provided in the regulator prescribed assumptions.

4.5.1 2008 Financial Crisis-like Severely Adverse Scenario

State Insurance Regulator-Provided Narrative

Insurers are required to apply a 2008 financial crisis-like scenario as one of the stress scenarios. The following is a summary of market conditions extracted from the Federal Reserve Board’s (FRB) 2018 Supervisory Scenarios for Annual Stress Tests Required under the Dodd-Frank Act Stress Testing Rules and the Capital Plan Rule.

This scenario is characterized by a severe global recession that is accompanied by a global aversion to long-term fixed-income assets. As a result, long-term rates do not fall, and yield curves steepen in the U.S. In turn, these developments lead to a broad-based and deep correction in asset prices, including in the corporate bond and real estate markets.

- Macroeconomic
  - The real gross domestic product (GDP) begins to decline in the first quarter of 2018 and reaches a trough in the third quarter of 2019 that is 7.5% below the pre-recession peak.
  - The unemployment rate approaches 10%
  - The headline Consumer Price Index (CPI) falls below 1% at an annual rate in the second quarter of 2018 and rises to about 1.5% at an annual rate by the end of the scenario

- Interest Rates and Credit Spreads
  - Short-term Treasury rates fall and remain near zero throughout the stress
  - 10-year Treasury yields remain unchanged through the scenario period.
Investment grade (IG) corporate credit spreads widen to 5.75%

- Asset Valuations
  - Equity prices decline by roughly 65%
  - The Volatility Index (VIX) moves above 60%
  - Housing prices and commercial real estate prices decline by 30% and 40% respectively, through eight quarters.

- Description of International Market Conditions
  - Severe recessions and slowdowns in growth are experienced in the Euro area, United Kingdom (UK), Japan, and developing Asia economies.
  - All foreign economies experience a decline in consumer prices.
  - The U.S. dollar appreciates against the Euro, British pound, and developing Asia currencies.
  - The U.S. dollar depreciates modestly against the Japanese yen, driven by flight-to-safety capital flow.

State Insurance Regulator-Prescribed Assumptions

Insurers should utilize the specific values for the economic indicators from the FRB’s annual Supervisory Scenarios for Annual Stress Tests Required under the Dodd-Frank Act Stress Testing Rules and the Capital Plan Rule, Table 1.A. Historical data and Table 4.A. Supervisory severely adverse scenario. For the first year of the stress test, insurers should use the version published in February 2020. (Refer to the tables in Annex 4i.) Specifically, insurers should run the 2008 stress scenario using the values for the Treasury curve, corporate spreads, GDP, unemployment, U.S. inflation (CPI), Housing Price Index (HPI), S&P 500 Index (SPX SPOT), Commercial Real Estate Index (CREI) and VIX index. Q4 2019 values should be used for the baseline and projected values should be used for the 30-day, 90-day and one-year horizons.

In addition, other market indicators are necessary for insurers to apply to stressed cash-flows and to assess the impact on expected asset sales. These are as follows (with details to be found in Annex 4):
Market capacity assumption.

Structured spreads over Treasuries.

SWAP spreads

Swaption volatility.

Credit assumptions: Moody’s Transition Matrix/Migration rates.

Credit assumptions: Moody’s Default table.

Credit assumptions: Moody’s Recovery Rate table.

**Market Capacity Assumption**

Insurers should use the table in Annex 4ii to assist in determining asset values and the quantity of assets to be sold in stressed markets. The table incorporates average daily trading volumes from the Securities Industry and Financial Markets Association (SIFMA) for certain assets classes. Insurers should assume 80% of current volumes for stressed scenarios to calculate the price at which they can sell as well as the quantity to sell. Insurers should make their own assumptions for asset categories where no trading volume data is available using other categories as a proxy.

**Structured Spreads over Treasuries**

Insurers should use the table in Annex 4iii to assist in determining asset values and the quantity of assets to be sold in stressed markets. For baseline values, the industry shall submit year-end spreads to the state insurance regulators shortly after year-end. The state insurance regulators will review and approve the values for use in the table for LST purposes. State insurance regulators shall use structured spread data from the 2007-2009 period provided by JP Morgan added to baseline values to calculate stressed amounts for the 30-day, 90-day and one-year horizons to complete the table.

**Swap Spreads**

Insurers should use the table in Annex 4iv to assist in determining asset values and the quantity of assets to be sold in stressed markets. Swap spread source data from the FRB’s H.15 FRED data should be incorporated into the swap spread table. Stressed spread levels may affect assets prices for expected sales calculations necessary for the stress scenarios.
Swaption Volatility

Insurers should use the table in Annex 4v to assist in determining asset values and the quantity of assets to be sold in stressed markets. Insurers should obtain the information to populate the table from Bloomberg on swaption volatility for various time horizons and expiry. For consistency, insurers should use the table found on Bloomberg at NSV [Go].

Moody’s Transition Matrix/Migration Rates

Insurers should use the table in Annex 4vi to assist in determining credit migrations, asset values and the quantity of assets to be sold in stressed markets. The table is imported from Moody’s Corporate-Global: Annual default study, Exhibit 36 – Average one-year alphanumeric rating migration rates, 1983–2018. Insurers should use the equivalent Moody’s tables for U.S. Public Finance for municipal bonds.

Moody’s Default Table

Insurers should use the table in Annex 4vii to assist in determining asset values and the quantity of assets to be sold in stressed markets. The table is imported from Moody’s Corporate-Global: Annual default study, Exhibit 43 – Average cumulative issuer-weighted global default rates by letter rating, 1983–2018. Insurers should use the equivalent Moody’s tables for U.S. Public Finance for municipal bonds.

Moody’s Recovery Rate Table

Insurers should use the table in Annex 4viii to assist in determining asset values and the quantity of assets to be sold in stressed markets. The table is imported from Moody’s Corporate-Global: Annual default study, Exhibit 9 – Average corporate debt recovery rates measured by ultimate recoveries, 1987–2018. Insurers should use the equivalent Moody’s tables for U.S. Public Finance for municipal bonds.

Additionally, the 2008 stress scenario should be run considering sources other than expected asset sales (e.g., FHLB credit line draws, bank lines of credit and holding company contributions). The insurer must identify the expected asset sales for remaining liquidity deficiencies.
“What-if” Variation

The “what-if” modification to the severely adverse scenario eliminates the ability of the insurer to use other internal and external funding sources to satisfy any liquidity deficiency under stress—for example, no new FHLB draws or other loans, no holding company contributions, and no inter-affiliate contributions. Thus, expected asset sales will be the primary source of meeting any liquidity deficiency for the “what-if” scenario.

Company-Specific Assumptions

Insurers must construct the assumptions needed for their internal models to run the above 2008 stress scenario. Company-specific assumptions should be consistent with the above scenario as narrative and state insurance regulator-prescribed assumptions. Examples include the inability to roll or issue new debt, potential increases in lapse rates, new business sensitivity and mortality experience.

4.5.2 Interest Rate Spike/Industry Outlook and Downgrade Scenario

State Insurance Regulator-Provided Narrative

This scenario contemplates an interest rate spike, equities decrease, and the existence of credit spread stress. Additionally, the nationally recognized statistical rating organization (NRSRO) insurance industry outlook goes from stable to negative with many insurers experiencing a downgrade. A “what-if” modification to this stress scenario is also required. State insurance regulators see value in performing a sovereign debt stress scenario but are not ready to implement it for the 2019 LST. This stress scenario and “what-if” modification will accomplish some of the dynamics that would be included in a sovereign debt stress, and state insurance regulators will utilize those results to build out a sovereign debt stress scenario in the future. In the meantime, insurers should only assume as shocks to their baseline, the interest rate change, equity shock, credit spread and downgrade notches provided in this document for the 2019 LST.

State Insurance Regulator-Prescribed Assumptions

Insurers should run a scenario that considers the immediate impact of the following interest rate spikes. For the initial exercise, these would be implemented as parallel shifts to the baseline curve:
In addition to the rate spike, the scenario should incorporate the following assumptions:

- A one notch down grade after one month of the insurer’s senior debt or financial strength rating.
- A 25% decrease in equities.
- A one in 10 credit spread stress (reflecting the 90th percentile of the biggest annual credit spread increase over one year observed historically).

“What-If Variation”

The “what-if” modification to the interest rate spike/industry outlook and downgrade scenario includes all state insurance regulator-prescribed assumptions as per above except:

- Instead of a 25% decrease in equities, insurers should assume a 25% increase in equities.
- No credit spread stress should be assumed.

Company-Specific Assumptions

Insurers must construct the assumptions needed for their internal models to run the above stress scenario. Company-specific assumptions should be consistent with the above narrative and state insurance regulator-prescribed assumptions.

4.5.3 Insurer-Specific Information Request

Narrative

This information request requires insurers to provide a detailed narrative of their most severe liquidity stress scenario to obtain greater insight to the drivers of liquidity risk for specific insurers. The most severe scenario should be one that results in the largest liquidity deficiency (sources less uses) from their existing internal LST process. State insurance regulators may use this information to inform future prescribed stress scenarios.
Insurers should provide a comprehensive narrative describing the stress scenario and the economic environment. This stress scenario could be a combination of multiple stressors.

4.6 Available and Expected Asset Sales: 2019 Methodology

Once the stressed sources and uses of liquidity have been established, and the net cash-flows calculated, insurers then project the assets available at the end of the time horizon by asset category. (Please refer to Annex 3: Expected Asset Sales Categories) The valuation of available assets for the baseline scenario utilizes current and projected asset values for a normal operating environment. The valuation of available assets for a stress scenario will be based upon fair value haircuts per the specific stress scenario narrative, its regulatory-prescribed assumptions, or the company assumptions based on the narrative and regulatory-prescribed assumptions (e.g., fair market value haircuts and capacity indicators).

To the extent that stressed cash inflows are insufficient to meet the required cash outflows, the insurer must provide for cash-flows to meet the deficiency. Unless a stress scenario (or “what-if” modification of a stress scenario) indicates otherwise, the insurer can utilize internal and external funding sources (e.g., FHLB new draws), as well as asset sales, to satisfy a liquidity deficiency. Any expected asset sales must be reported in the appropriate column(s) of the template. Insurers decide which categories of available assets to sell, as well as the quantity to sell.

The expected asset sales amounts calculated based on the insurer’s own models should also be subject to portfolio manager and/or chief investment officer (CIO) feedback. The intent is for these asset sales to most accurately represent what actions the insurer could reasonably take in the given scenario, in light of market conditions and the company’s anticipated investment policy and/or strategy. This feedback may take the form of “topside” adjustments to the expected asset sales. To accommodate this, there is an initial expected asset sales column and a final expected asset sales column to highlight how the internal model process generates expected assets sale vs. the final expected asset sales which incorporates the investment portfolio manager’s insights and input.
5. Reporting

Insurers should submit data in the reporting template for sources and uses, available assets and expected asset sales. These templates utilize categories for 30-day, 90-day and one-year time horizons. The template further illustrates available assets, expected asset sales and final expected asset sales by asset sub-category to cover any liquidity deficiency (negative amounts of net sources less uses over the prescribed time horizons). Final asset sales should take into consideration portfolio manager input and market conditions that may require an adjustment to the expected asset sales values. A report should be submitted for each legal entity within the group that was subjected to LST.

Additional reporting disclosures (e.g., some of the company assumptions based on the stress scenario narrative and regulatory metrics) will be finalized in early 2020.

The reporting templates and other to-be-determined disclosures are anticipated to be submitted in third quarter 2020 (to be finalized in the future).

6. Data Aggregation

Given the NAIC’s primary focus on macroprudential impacts of a liquidity stress affecting the life insurance sector, the NAIC will aggregate final expected asset sales data across the insurance groups subject to the LST. The aggregation will be done by asset category. The NAIC aims to compare the aggregated results against various benchmarks, potentially including normal and/or stressed trading volumes and asset values for various asset classes, to determine the impact such sales may have on the capital markets in times of stress. Findings from this analysis may also inform expected asset sale assumptions utilized in future runs of the LST.

As part of its macroprudential surveillance, the state insurance regulators and/or NAIC may reach out to other regulatory agencies to discuss aggregate results that may affect other regulated industries, such as banks, securities brokers and asset managers. State insurance regulators may also coordinate with other agencies to identify appropriate and perhaps coordinated action they
may take to prevent or minimize the effect large asset sales may have on the financial markets and overall economy.

7. Regulatory Authority and Confidentiality

7.1 Regulatory Authority

For the 2019 LST, lead state insurance regulators will utilize their examination authority to collect the reporting results from insurers and to keep the data confidential. A long-term solution will be developed at the Financial Stability (EX) Task Force, possibly in coordination with the needs from the group capital calculation (GCC) project.

7.2 Protocols for Protecting Individual Firm’s Results

For the 2019 LST, lead state insurance regulators will utilize their examination authority to collect the reporting results from insurers identified by the scope criteria. Existing protocols for collecting confidential/sensitive data for each state and insurer will be utilized. A long-term solution will be developed at the Financial Stability (EX) Task Force, possibly in coordination with the needs from the group capital calculation (GCC) project.
8. Timeline

LST: Milestone Chart: 2019

- July: Expected asset sales
- Aug.: Severely adverse scenario and "what-if"
- Sept.: LAS call
- Oct.: Framework proposal for LST
- Nov.: Assumptions grid
- Int spike/downgrade
- Dec.: Dec 9 FSTF: Framework for comment

LST: Draft Milestone Chart: 2020 (tentative)

- Jan.: March 21 FSTF
- Feb.: Early April finalize instructions and template
- Mar.: April
- April: May
- May: July
- June: Early July data collection
- July: Aug.
- Aug.: Aug 8 FSTF
- Sept.: Data analysis
- Oct.: Nov.
- Nov.: Nov 14 FSTF
- Dec.:
Annex 1: Scope Criteria with Annual Statement Reference

The Subgroup proposes to include in the scope of the LST any insurer/group that exceeds the following thresholds for any of the noted activities (or account balance as a proxy for that activity). The thresholds have been established taking into consideration both the account balance of the insurer/group to the total balance for the life insurance sector, as well as the aggregate account balance of insurers/groups within scope to the aggregate account balance for the life insurance sector.

| | | Page: Liabilities  
| | | Line: Borrowed Money (22)  
| | | Column: Current Year |
In performing the addition of the FHLB funding agreement amount to the GICs amount, NAIC staff discovered that the reporting of FHLB funding agreements is not consistent in Exhibit 7, Deposit-Type Contracts. The source of the FHLB amount is Note 11.B(4)(b):

Line: Funding agreements, current year, amount as of the reporting date, borrowing from FHLB, collateral pledged to FHLB Column: Funding Agreement Reserves Established

For some insurers, we were able to match amounts from the FHLB funding agreement footnote to the exact same amount in Exhibit 7, either Column 2 (GICs) or Column 6 (Premiums and Other Deposit Funds). For those insurers where the FHLB amount matched Exhibit 7, Column 2, we did not add the FHLB funding agreement amount to the GICs amount, because that would be double-counting the FHLB funding agreements. For other insurers, even though the amounts did not match exactly, we were able to assume the FHLB funding agreements were reported in either Column 2 or Column 6 (e.g., the amount in Exhibit 7, Column 2 was zero or much smaller than the FHLB note, while the Column 6 amount was larger). However, for several insurers, we were not able to make an informed assumption (e.g., both Column 2 and Column 6 amounts were larger than the FHLB funding agreement amount). To be conservative in these instances, we added the FHLB funding agreement amount to the GICs amount. Overall, for the $10 billion threshold, adding FHLB funding agreements to GICs does not result in a different list of insurance groups from the list with GICs of more than $10 billion.

To: Commissioner Marlene Caride, Chair of the Financial Stability (EX) Task Force  
From: Mike Boerner, Chair of the Valuation Analysis (E) Working Group  
Date: November 27, 2019  
Re: Response to Request from the Financial Stability (EX) Task Force

Executive Summary

On 6/17/19, you made a request to the Valuation Analysis (E) Working Group (VAWG) to assess a potential concern related to Economic Scenario Generators (ESGs) developed by the American Academy of Actuaries (Academy). These ESGs are currently prescribed (or encouraged) for the following calculations: (1) Risk-Based Capital for Variable Annuities (C-3 Phase II) and certain annuities or single premium life insurance products (C-3 Phase 1); (2) Statutory Reserves for Variable Annuities (Actuarial Guideline 43 and VM-21 of the Valuation Manual); and (3) Statutory Reserves for Life & Variable Life Insurance (VM-20 of the Valuation Manual). One insurer suggested that there is a deficiency in the current ESG in that it doesn’t adequately consider a very low or negative interest rate environment, and more specifically that this raises a material risk at the macro prudential level in the U.S., particularly for variable annuities.

The Life Actuarial (A) Task Force (LATF) has begun a process to replace the Academy ESGs. However, to allay any concerns during the interim period until a new ESG is in place, you requested that the VAWG assess this insurer’s concern and provide assurance that any issues either have been addressed, or will be able to be addressed.

To assess the concern during the interim period (which is expected to be several years), the VAWG sent an information request to companies representing over 90% of the U.S. variable annuity business inforce. The responses indicate that overall, companies are aware of the significance of variable annuity interest rate risk, and have taken various actions to measure and manage it. However, there were findings for individual companies that will require further review and follow-up. The VAWG also sees a need for continued monitoring via coordinated reviews of companies’ future variable annuity filings, similar to those currently performed for LTC AG51 reports and the VM-31 Life PBR Actuarial Reports.

The VAWG plans to take the following actions to provide assurance that any issues regarding companies’ variable annuity interest rate risk will be addressed: 1) Questions regarding findings of concern and informational questions for individual companies will be developed, for referral to domestic state regulators for review and follow-up; 2) A communication will be sent to state regulators to alert them to the concern raised regarding interest rate risk for variable annuities, and to encourage them to focus on this as they assess risks, conduct financial reviews, and review companies’ asset adequacy testing; 3) A recommendation will be made to review and consider enhancements to the Financial Condition Examiner’s Handbook to address review of proprietary ESGs used for hedging and other purposes; and 4) A coordinated review of the VM-31 Variable Annuity PBR Actuarial Reports and C3 Phase II reports will be performed for all early adopters of the new variable annuity framework for reserves and capital. The framework becomes mandatory for all inforce business in 2020. However, companies may elect to early adopt as of 12/31/19.

This report provides key findings from the information request, including materiality of variable annuity interest rate risk and the approaches companies have taken to measure and manage it. The report concludes with information on current usage of the Academy ESGs, the status of the RFP for a new ESG, and the potential length of the interim period before the new ESG will be implemented.
Industry VA Information Request

To assess the concern raised regarding variable annuity interest rate risk in the interim period before a new ESG is implemented, an information request was sent to 24 companies representing over 90% of the U.S. variable annuity business in force. Companies were asked to provide the following information:

2. A discussion on how the company is addressing the risks to variable annuities from an extended period of low interest rates, including commentary on actions taken and planned beyond the use of the Academy ESG, if applicable. As part of this discussion companies were asked to include: a) a description of the types of guarantees provided on their variable annuities; b) information on how the company measures and manages interest rate risk from variable annuities and associated guarantees; and c) an assessment of the materiality of this risk to the company.

Key Findings

Summarized below are some of the key findings from the VAWG’s review of industry responses.

Types of Guarantees Provided on Variable Annuities

Nearly all companies offered a Guaranteed Minimum Death Benefit (GMDB) on their products. Most companies also offered one or more of the following types of guaranteed living benefits:
- Guaranteed Minimum Income Benefit (GMIB)
- Guaranteed Minimum Withdrawal Benefit (GMWB)
- Guaranteed Minimum Accumulation Benefit (GMAB)
- A fixed account with or without a market value adjustment, with a guaranteed minimum interest rate

Materiality of Interest Rate Risk

The vast majority of companies acknowledged that interest rate risk from VA guarantees represents a material risk for their company. For the few remaining companies, this risk was not viewed as material either because the VA block represents a relatively small percentage of total in force business, or because the risk was completely or largely transferred to a reinsurer.

Measurement and Management of Interest Rate Risk

ESGs produce stochastic interest rate scenarios which are used to measure and manage risk. However, ESGs are not the only tools used for this purpose. Pre-defined deterministic scenarios, such as the NY7 scenarios commonly used in asset adequacy testing, can be effective as well. Many companies also monitor earnings volatility (e.g. economic, Statutory, GAAP).

The vast majority of companies have a hedging program in place to manage interest rate risk, and typically other risks as well, such as equity risk. Many of these companies have a Clearly Defined Hedging Strategy, meaning that specific criteria defined in the Valuation Manual have been met. Some companies noted that they have recently made changes to their hedging approach, such as increasing the amount of interest rate hedging.

Some companies disclosed the results of their hedging programs and reported high hedge effectiveness. This information was not specifically requested and was not provided by most companies.
Nearly all companies with a hedging program indicated that they do not rely on the Academy ESGs for hedging. Proprietary ESGs are commonly used for this, as well as other purposes (e.g. economic capital, and day-to-day risk management).

Management Actions

In addition to the activities mentioned above, many companies have taken actions to further address interest rate risk. Actions cited in the survey include but are not limited to those listed below.

- Discontinuing sales - About a third of the companies surveyed are no longer selling variable annuities. Of those currently issuing new business, some have discontinued sales of one or more of their guaranteed living benefits.
- Lowering the guaranteed minimum interest rates offered on fixed accounts for new sales, or discontinuing fixed accounts altogether
- De-risking guaranteed living benefits, e.g. by adjusting fees and/or benefits
- Offering a lump sum to certain contract holders in exchange for termination of a guaranteed living benefit
- Some companies hold additional reserves beyond the minimum requirements

Use of Academy ESGs for Statutory Reserves and Capital

Nearly all companies provided information on the type of ESG used in calculating 2018 statutory reserves and capital. Approximately 75% used an Academy ESG, with or without modifications. Of these companies, many used the Academy VM-20 ESG, which will be prescribed in 2020 under the new VA framework. Some used an older Academy C-3 Phase 1 ESG, which has a higher, less conservative long-term interest rate assumption. However, some companies adjusted this assumption to bring it closer to that used in the Academy VM-20 ESG. Other companies did not specifically state which Academy ESG they used. The remaining 25% of the companies used a proprietary ESG, and about half of these appear to be more conservative than the Academy VM-20 ESG. Companies may continue to use these ESGs under the new VA framework, since the Academy VM-20 ESG is prescribed as the minimum standard.

ESG RFP Status and Potential Length of Interim Period

The process of implementing a new ESG is expected to take several years. There is agreement that the Academy ESGs must be replaced and that various enhancements will be necessary, including adequate consideration of a prolonged low interest rate environment. However, many steps will be needed prior to implementation, since the intent is to consider prescribing the new ESG for all of the calculations noted in the first paragraph of this report.

Progress has been made on this initiative. At the time of your request to the VAWG, an informal subgroup of LATF was considering various alternatives to replace the Academy ESGs. On 7/16/19, an open meeting of the Life RBC Working Group (LRBC WG) and LATF was held to discuss the alternatives, and a request was made that NAIC staff move forward with the RFP process to select an ESG vendor to develop and maintain a new prescribed ESG.
A group consisting of regulators, NAIC staff, Academy representatives, and other industry subject matter experts has been formed and has met several times to work on a draft RFP. The target timeframe for completion is Q1, 2020, although it may take longer. The RFP will then need to be adopted by LATF and the Life Insurance and Annuities (A) Committee and presented to the NAIC Executive (EX) Committee for final approval, including a request for appropriate funding. The NAIC will then issue the RFP, and submissions will be reviewed based upon weighted criteria as specified within the issued RFP. A recommendation for award will then be submitted to the NAIC Executive (EX) Committee for final approval.

Once an ESG vendor has been selected, implementation of the ESG will require additional steps such as the following: 1) consideration and adoption of any potential ESG parameter modifications desired by regulators; 2) an impact study to assess the results; 3) drafting, exposure, and adoption of any Valuation Manual amendments and RBC instruction changes necessary to incorporate prescription of the new ESG; 4) documentation on the ESG methodology and parameters; and 5) training on the use of the ESG. This entire process is expected to be completed no sooner than 2022 (i.e. effective for the 2022 Valuation Manual).
GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council did not meet at the Fall National Meeting.
INNOVATION AND TECHNOLOGY (EX) TASK FORCE

Request for NAIC Model Law Development: Amendments to Unfair Trade Practices
    Act (#880) (Attachment Four-D) ......................................................................................................................4-107
The Innovation and Technology (EX) Task Force met in Austin, TX, Dec. 9, 2019. The following Task Force members participated: Jon Godfred, Chair, and Chris Aufenthie (ND); Keith Schraad, Vice Chair (AZ); Lori K. Wing-Heier (AK); Jim L. Ridling represented by Jerry Workman (AL); Allen W. Kerr represented by Letty Hardee (AR); Michael Conway represented by Peg Brown (CO); Andrew N. Mais (CT); Stephen C. Taylor (DC); Trinidad Navarro represented by Leslie Ledogar (DE); David Altmaier represented by Mike YaVorsky (FL); Colin M. Hayashida (HI); Doug Ommen and Travis Grassel (IA); Dean L. Cameron represented by Weston Trexler (ID); Robert H. Muriel represented by CJ Metcalf (IL); Vicki Schmidt represented by LeAnn Crow (KS); Nancy G. Atkins (KY); James J. Donelon represented by Rich Piazza and Warren Byrd (LA); Al Redmer Jr. and Robert Baron (MD); Gary Anderson represented by Rachel M. Davison (MA); Anita G. Fox represented by Chad Arnold (MI); Steve Kelley represented by Tammy Lohmann and Phil Vigliaturo (MN); Chlora Lindley-Myers represented by Angela Nelson and Cynthia Amann (MO); Mike Causey represented by Tracy Biehn and Kathy Shortt (NC); John Elias represented by Christian Citarella (NH); John G. Francini and Anna Krylova (NM); Jillian Froment (OH); Glen Mulready (OK); Andrew Stolfi (OR); Jessica Altman and Michael Humphreys (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer (SC); Larry Deiter (SD); Hodgen Mainda represented by Carter Lawrence (TN); Kent Sullivan represented by Michael Nored (TX); Scott A. White represented by Vicki Ayers and Eric Lowe (VA); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler represented by Molly Nollette and Lichiou Lee (WA); and Mark Afable represented by Nathan Houdek and Olivia Hwang (WI). Also participating was: Eric A. Cioppa (ME).

1. **Adopted its Oct. 18 Minutes**

   The Task Force met Oct. 18 and took the following action: 1) adopted the Artificial Intelligence (EX) Working Group’s Sept. 5 minutes; 2) adopted its 2020 proposed charges; and 3) adopted a Request for NAIC Model Law Development to develop model law language for the *Unfair Trade Practices Act* (#880).

   Mr. Taylor made a motion, seconded by Director Froment, to adopt the Task Force’s Oct. 18 minutes (Attachment Four). The motion passed unanimously.

2. **Adopted the Reports of its Working Groups**

   a. **Big Data (EX) Working Group**

   Commissioner Ommen said the Big Data (EX) Working Group met Dec. 7. He said after the Spring National Meeting and the referral to the Life Insurance and Annuities (A) Committee to study the use of external data and data analytics in accelerated life underwriting, the Working Group turned its attention to the use of data for fraud detection and claim settlements.

   Commissioner Ommen said the Working Group received presentations from the Insurance Services Office (ISO) and the National Insurance Crime Bureau (NICB) to help inform the Working Group about current market practices in the property/casualty (P/C) industry.

   Commissioner Ommen said the ISO provided an overview of three of its products the insurance industry uses for fraud detection and claim settlement: 1) ClaimSearch, which contains 1.4 billion records and is used by insurance companies to identify questionable relationships or networks within a claim record; 2) Verisk Weather, which provides historical weather data and loss exposure analysis for companies; and 3) ClaimXperience, a policyholder collaboration portal used for processing lower value property damage claims.

   Commissioner Ommen said the NICB presentation primarily focused on the NICB’s Geospatial Intelligence Center (GIC), which provides aerial imagery of pre- and post-catastrophe conditions of property to assess potential fraud and speed up the claim settlement process.

   Commissioner Ommen said the Working Group also received a brief update from the Casualty Actuarial and Statistical (C) Task Force regarding its white paper, *Regulatory Review of Predictive Models*. He said the Task Force will soon issue its third draft of the white paper, but it may need further input from the Big Data (EX) Working Group on the issues of causality versus statistical correlation and the confidentiality of predictive models.
Commissioner Ommen said the Working Group would like to delve deeper into the specific data elements used in fraud detection and claim settlement models beyond the traditional data collected during a claim investigation, and it will hold an interim conference call to explore these issues in more detail.

Commissioner Ommen made a motion, seconded by Commissioner Mais, to adopt the report of the Big Data (EX) Working Group (Attachment One). The motion passed unanimously.

b. Speed to Market (EX) Working Group

Superintendent Franchini said the Speed to Market (EX) Working Group met Dec. 3 and Sept. 12.

During its Sept. 12 meeting, the Working Group discussed and reviewed System for Electronic Rate and Form Filing (SERFF) enhancements and prioritization of several focus areas. He said NAIC staff members discussed suggested areas of improvement and goals for submission validations, review tools, workload management, performance and reliability, the search function, document management, reporting and data export, streamlined correspondence, and user experience. He said input was sought from Working Group members, interested state insurance regulators and interested parties as to which areas of improvement would provide the most benefit. He said a survey was distributed to seek feedback from all states.

During its Dec. 3 meeting, the Working Group took the following action: 1) adopted its Sept. 12 minutes; 2) heard an update on the SERFF capabilities survey; and 3) received a brief overview of the request for proposal (RFP) for a consultant to conduct a business and technical assessment of SERFF.

Superintendent Franchini said there was a great response to the SERFF survey sent in September, and all but 12 member jurisdictions provided feedback. He said some of the enhancement items reviewed are already being worked into the analysis and development process by NAIC staff, and others are going through the development pipeline. He said these matters will be reflected in an action plan for 2020 and beyond, so the SERFF application can provide more functionality for the states and insurance companies moving forward.

Superintendent Franchini made a motion, seconded by Director Farmer, to adopt the report of the Speed to Market (EX) Working Group (Attachment Two). The motion passed unanimously.

c. Artificial Intelligence (EX) Working Group

Commissioner Godfread said the Artificial Intelligence (EX) Working Group met Dec. 7 and discussed comments related to using the Organisation for Economic Co-operation and Development (OECD) Artificial Intelligence (AI) Principles as a basis for developing AI principles for the insurance industry.

Commissioner Godfread said the Working Group also reviewed a draft principles document from the North Dakota Insurance Department as a “strawman” for moving forward to complete the deliverable and decided to expose the draft for a public comment period ending Jan. 17, 2020. He said the Working Group agreed to meet at least once via conference call prior to the 2020 Spring National Meeting to discuss the comments and the draft.

Director Froment made a motion, seconded by Director Schraad, to adopt the report of the Artificial Intelligence (EX) Working Group (Attachment Three). The motion passed unanimously.

d. Innovation and Technology State Contacts

Denise Matthews (NAIC) said the Innovation and Technology State Contacts met Dec. 6. She said George Bradner (CT) chaired and reviewed the purpose of the meeting.

Ms. Matthews said the attendees discussed a proposed process to facilitate more frequent and regular webinars on various innovation and technology topics or presentations from innovators. She said the group agreed it would be appropriate and that it will proceed with that in 2020. She said the group also discussed defining “regulatory sandbox” because that term gets used frequently. She said there was a desire to ensure that when that term is used, there is a common understanding of what is means. She said NAIC Legal Division staff are also tracking sandbox and other types of state organized activity. She said Kentucky and Vermont are currently the only states to have implemented an insurance regulatory sandbox.
Ms. Matthews said the group also discussed innovation and technology education and information opportunities, including dates and locations taking place in 2020. She said updates on the Western Zone Silicon Valley Program, the InsureTech Connect event and the Insurtech on the Silicon Prairie event, all held in 2019, were provided by Ms. Nollette, Mr. Aufenthie and Matt Holman (NE), respectively.

Ms. Matthews said the group also received presentations on regulatory technology proof-of-concepts underway in a few states. She said the presentations focused on form filing review and analysis workflow tools that are using technology and some machine learning to make that process more efficient, including a discussion related to SERFF.

3. Discussed Anti-Rebating Draft Bulletin and Model Law Amendments

Commissioner Godfread said the Task Force adopted a motion to move forward with Request for NAIC Model Law Development to modify Model #880 during the Summer National Meeting. He said the Task Force reviewed and adopted the request during its Oct. 18 meeting, and the Executive (EX) Committee has since adopted it. Therefore, he said the Task Force may proceed with work on model law language.

Commissioner Godfread said, prior to deciding to work on the model law, the Task Force discussed a North Dakota draft bulletin on the rebating topic, and the Task Force has received comments related to that language. He said it was considered something that could be done in the nearer term or possibly as an alternative to the model law approach. He said that while the Task Force members agreed to accept comments and continue to work on the language for a bulletin, Task Force members did not make a decision as to if it wanted to pursue this work as an exercise to fine tune a North Dakota bulletin that other states may choose to use as a template for their state, or if it wanted to actually pursue using this to create an NAIC work product.

Commissioner Godfread asked if it is the will of the Task Force members to pursue an official NAIC anti-rebating bulletin, or to consider that work complete and move on with the work on the model law language.

Director Froment and Director Wing-Heier both said they thought it was time to move on to work on the model law language.

Ms. Nollette said the work on the North Dakota bulletin was valuable and will inform the model law work but agreed it was time to focus on the model law.

Commissioner Godfread said there was clear direction to proceed and discontinue work on the bulletin. He said there would be one more small tweak to the North Dakota bulletin before it is finalized, but he hopes to get it in place early next year and would be happy to work with any state interested in the bulletin.

Commissioner Godfread asked if anyone has any thoughts or suggestions regarding an approach to drafting the model law language discussed in the Request for NAIC Model Law Development. He said some draft language has been submitted by the American Property and Casualty Insurance Association (APCIA) during the Task Force meeting at the NAIC/NIPR Insurance Summit in June, and the Task Force has received a lot of thoughtful input via emails, comment letters and presentations.

Director Ramge recommended the Task Force assign this to another group to work via conference call with subject-matter experts (SMEs) and comments from interested parties, and Nebraska would volunteer to be on that group.

Commissioner Richardson agreed with Director Ramge that a smaller group would be good to begin this work.

Commissioner Ommen supported that, as well, to allow that drafting to take place but said there will obviously be a lot of opportunity for others to comment.

Commissioner Godfread suggested this be a drafting group as opposed to an NAIC working group.

Director Farmer agreed, as did other members of the Task Force.

Commissioner Godfread asked for volunteers to participate in the drafting group and to let NAIC staff know if interested. Hearing no other discussion, he said the drafting group will be formed and to move forward with the work on the model law.
4. Received an Update on Cybersecurity Initiatives, Including the Implementation of Model #668, and Data Privacy from the Privacy Protections (D) Working Group

   a. Update on Cybersecurity Initiatives

Commissioner Godfread said the Cybersecurity (EX) Working Group was disbanded in March 2018, and the Task Force now has the responsibility to monitor developments in this area. He said data, innovation and cyber continue to be a key regulatory priority including not only the ongoing work to implement the model law, but also monitoring data privacy activity and applicability to the insurance space. He said efforts in this area need to be well coordinated, and updates will continue to be provided to committees with a vested interest. He said he encourages everyone to look at the different committees overseeing these workstreams and pay attention to that activity.

Director Farmer provided an update on the Insurance Data Security Model Law (#668) and its implementation. He said adoption of the model law remains a high priority for the NAIC. He said state insurance regulators are dedicated to developing the necessary tools to ensure consumers are protected from data breaches and that Model #668 is the best way states can lead in this effort. He said eight states have adopted laws based on the NAIC model to date, and more are anticipated to follow next year. He said the U.S. Department of the Treasury (Treasury Department) endorsed the model law and recommended its prompt and uniform adoption by the states to avoid congressional action setting forth uniform requirements for insurer data security.

Director Farmer said a joint Kansas and Missouri ransomware cyber tabletop exercise was held Sept. 5 at the NAIC Central Office in Kansas City, MO. He said the event was well attended, with more than 40 participants comprised of staff from state insurance and information technology (IT) departments, 12 companies, financial examiners from several states, the Treasury Department and law enforcement. These events have prepared the NAIC with templated cyber scenarios, an event planning timeline and direction on facilitation of these events.

Director Farmer said Illinois will host a cyber tabletop exercise in Chicago in 2020, and the NAIC is currently working with Wisconsin to determine if this could be a joint event similar to the Kansas/Missouri tabletop and if it can be scheduled sometime between May and October 2020. He said a cyber tabletop exercise will also be held in Ohio on May 19, 2020, for Ohio domestic insurers only, as well as support entities like the FBI and local law enforcement. He said the NAIC is also talking with Connecticut about conducting a tabletop in October 2020. He said it will likely be a single-state event and would be the third cyber tabletop exercise in 2020, exceeding the NAIC’s original goal of two events for 2020.

   b. Update from Privacy Protections (D) Working Group

Ms. Amann provided an update on the work of the Privacy Protections (D) Working Group. She said it held its kick-off meeting Dec. 8. She said the Working Group was appointed Oct. 1, and it is in the process of finalizing its membership and distribution lists for interested state insurance regulators and parties.

Ms. Amann said the Working Group will work closely with the other working groups in this arena, including the Artificial Intelligence (EX) Working Group, the Accelerated Underwriting (A) Working Group and others, as each has its unique set of issues that will require coordination.

Ms. Amann said during the Dec. 8 meeting, the Working Group took the following action: 1) discussed its proposed workplan to meet monthly via conference call; 2) heard a presentation by Jennifer McAdam (NAIC) on the NAIC Insurance Information and Privacy Protection Model Act (#670), the Privacy of Consumer Financial and Health Information Regulation (#672), the General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA) and state data privacy legislation; 2) heard an update from Kendall Cotton (MT) on current legislative activities in Montana; and 3) discussed comments received from the Center for Economic Justice (CEJ), the National Association of Mutual Insurance Companies (NAMIC) and the APCIA.

Ms. Amann said the work will be to decide how effective amendments to these models may be versus drafting something new. She said there is a chart on the NAIC web page outlining state activity to date in this area. She said NAIC Legal Division staff are trying to keep it current, so contact NAIC staff if updates need to be made.
5. **Received an Update on Drafting a Document for Startups**

Commissioner Godfread said Birny Birnbaum (CEJ) submitted a request to the Task Force to draft a document targeted at educating startups regarding the difference between insurance products and other consumer products in the banking arena or otherwise. He said Mr. Birnbaum suggested that a document be developed for InsurTechs on why insurance is different from banking and other consumer products. Commissioner Godfread said most would likely agree Mr. Birnbaum’s points are well taken.

Commissioner Godfread said during events and opportunities that state insurance regulators have participated in over the past several years, it appears there has been fairly strong interest and awareness on the part of accelerators and others in terms of offering counsel and mentorship to startups in the InsurTech space, in regard to better understanding the insurance industry, its products and services, as well as how it is regulated. He said he is not sure that undertaking a charge to draft an official NAIC white paper on this topic would make sense or should be a priority for the Task Force, but maybe something could be drafted, informally, to address this area.

Commissioner Godfread also said the NAIC is working on opening up the Associate Professional in Insurance Regulation (APIR) designation program to tweak it for InsurTechs, and that could encapsulate a lot of the introduction to insurance regulation that InsurTechs may be missing. In addition, he said Shanique V. Hall (NAIC) is working on an InsurTech study and that she would be open to working with others to incorporate this work into the study, as well.

Commissioner Godfread said he would like to discuss the 10 points raised in Mr. Birnbaum’s letter. He said they were included in materials sent to the Task Force prior to this meeting. He said Task Force members were asked to read them over and give some thought as to if they think: 1) the 10 points represent a complete list of items that should be included in a document of this type; 2) if there is something important missing or something included that they think is inappropriate 3) if it is appropriate, is the language effective. He said the Task Force could work on the key points and then either publish just as that, as key points, or hand them off to be incorporated into something else—possibly the designation program materials.

Commissioner Ommen said Iowa has information available to startups and the responsibility to communicate to those coming into the insurance business. He said the suggestions made by the CEJ indicate some common themes that are mindful of concerns that many on the Task Force share, but he said risk discrimination is what we do in the business of insurance and is where companies compete to become faster and more efficient. He said this document might create an overemphasis on one particular aspect of the Task Force’s concerns, and it is difficult to boil all of this down to a short list. He said the Task Force should work on all of the issues contained in the list in Mr. Birnbaum’s letter, but it may be too heavily focused on one theme.

Commissioner Godfread said he likes the idea of working with the NAIC’s Center for Insurance Policy and Research (CIPR) and the NAIC Insurance Regulator Professional Designation Program, along with the consumer groups.

Director Froment agreed and said Ohio has a designated person who meets with the startups. She said they come in with different levels of knowledge, and it takes a person to navigate where they are and then work with them.

Mr. Slape said there is a list of state innovation and technology contacts on the NAIC website. He said it would be good to get that message out through social media and other methods, reminding startups of that list so they can contact the right person and get direct feedback.

Mr. Birnbaum said he would defer to the Task Force members’ best judgment on how to get this message out to InsurTechs. He said he would like to clarify that the intent of his letter was not to provide a list of things they need to do to comply with insurance regulation or a guide to becoming a producer or licensed company, but rather to explain the significant differences between insurance products and other consumer products. He said many InsurTechs come from other markets where there is no rate regulation or licensing and capital requirements. He said the goal was to help them navigate the regulatory system and to help them understand the key concepts and differences from other consumer product markets, using the unfair discrimination issue as an example.

Peter Kochenburger (University of Connecticut School of Law) said even skilled and knowledgeable individuals in other areas often do not know that these regulatory processes exist and that they should talk to a state insurance regulator.
Commissioner Godfread said he has seen a shift over the past few years and progress has been made, but that does not mean everybody is there yet. He said the CEJ letter includes a good list and points out those differences. He said state insurance regulators are committed to working with consumer groups to ensure this gets addressed. He said working through CIPR and the NAIC Designation Program, in his opinion, is the best approach.

6. Heard an Update on the NCOIL Insurance Modernization Activity

Indiana State Rep. Matt Lehman (R-Berne), who is also vice president of the National Conference of Insurance Legislators (NCOIL), provided an update on NCOIL’s insurance modernization activity.

Mr. Lehman said about a year ago, NCOIL began to receive comments about the market being ripe for clean-up legislation around technology and doing business the old way. He said a prime example is that some states do not have legislation to allow consumers to opt into electronic delivery of documents but mandate a requirement to do so via the U.S. mail, which is antiquated and needs to be updated. He said NCOIL made it a 2019 priority to develop insurance modernization legislation and at first was not sure if it would be some type of omnibus modernization deliverable or if it would get into more detailed issues. He said NCOIL looked at: 1) allowing consumers to opt into electronic delivery and posting of insurance notices; 2) modernizing the current paper process used to transfer ownership of a total loss vehicle; and 3) modernizing the anti-rebating laws.

Mr. Lehman said he heard the discussion on the anti-rebating topic earlier in the meeting and would be happy to work as partners with the NAIC on that effort and any topics the Task Force may wish to include. He expanded on the first topic, saying the industry took the federal e-signature law and customized it for the insurance industry. He said it requires an opt-in, so the consumer must consent, and it excludes cancellation and renewal notices. He said this type of insurance delivery method has been adopted in approximately 38 states, and approximately 25 states have enacted insurance posting legislation that is opt-out. This means that it only applies to the policy document itself and does not include any personally identifiable information (PII), and the consumer can request a paper copy, which most still do.

Mr. Lehman said in the case of an accident that results in a total loss where the insurance company takes ownership of the vehicle, the process is completely paper-based and requires paperwork that the consumer often does not have or cannot find. As a result, the consumer has to file for a duplicate from the state’s Department of Motor Vehicles (DMV), which takes time. He suggested if the process were digitized, the process could be sped up, money would be saved, and the consumer would get his or her money faster. He said the proposed NCOIL model would require the DMVs to develop and use electronic systems to process those transactions. He said Florida passed a law and that he hopes the NCOIL model can gain traction across the country.

Mr. Lehman said anti-rebating issues have been brought up a lot and are finally getting attention. He said the law covering this issue was drafted a long time ago when life insurance agents were paying rebates to clients to increase sales and then were demanding higher commissions, which led to solvency issues. He said he recognized the state insurance regulator’s charge is to not only protect consumers but also the solvency of companies, making this a big issue that also potentially has unfair discriminatory practice implications. He said he considers rebating to be an issue between brokers and carriers and not as much to the consumer as a loser. He said unfair trade practice issues are driven by the consumer. Therefore, rebating is tied more to the issue of an anti-trade violation as opposed to unfair trade practices, so they should be viewed as separate items.

Mr. Lehman said earlier conversations among the Task Force members regarding the desire to work on a model to avoid multiple bulletins and inconsistencies makes sense and that as a broker, he is aware of the challenges posed by state differences. Therefore, he said NCOIL is looking for a standard or benchmark for this area. He said the NCOIL model addresses those things and moves toward that direction. He said NCOIL is here to work with state insurance commissioners and to get those laws passed. He said he would be happy to work with the Task Force’s drafting group as a resource.

Commissioner Godfread said the Task Force would definitely keep NCOIL apprised on its work, as the two groups share a common goal to simplify this and make things easier and more understandable.

Mr. Lehman said he liked the three bullet points in the North Dakota draft bulletin on anti-rebating and, as the author of the NCOIL model, would be considering those as a filter to put the model through.
7. **Discussed Other Matters**

Commissioner Godfread said CIPR has posted a great summary of the *Journal of Insurance Regulators* (JIR) article titled, “Time to Dust the Anti-Rebating Laws,” and he encouraged those working on the anti-rebating model law language to read it.

Commissioner Godfread also said the Task Force has a charge to: “Monitor and discuss regulatory issues that arise with the development of autonomous vehicles. Study and, if necessary, develop recommendations for changes needed to the state-based insurance regulatory framework.” He said, in keeping with that, he wanted to let the Task Force members know about an upcoming webinar on the subject.

Ms. Hall provided a quick update on the webinar, noting it would build on the CIPR Autonomous Vehicle Symposium held in 2018 in Silicon Valley regarding this emerging technology.

Having no further business, the Innovation and Technology (EX) Task Force adjourned.
Big Data (EX) Working Group
Austin, Texas
December 7, 2019

The Big Data (EX) Working Group of the Innovation and Technology (EX) Task Force met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: Doug Ommen, Chair (IA); Elizabeth Kelleher Dwyer, Vice Chair, represented by Matt Gendron (RI); George Bradner and Wanchin Chou (CT); Stephen C. Taylor and Sharon Shipp (DC); Frank Pyle (DE); Sandra Starnes (FL); Robert Muriel and Judy Mottar (IL); Rich Piazza (LA); Robert Baron (MD); Timothy Schott (ME); Karen Dennis (MI); Phil Vigliaturo (MN); Angela Nelson (MO); Christian Citarella (NH); Seong-min Eom (NJ); Jillian Froment (OH); Andrew Stolfi and TK Keen (OR); Michael McKenney and Shannen Logue (PA); Kendall Buchanan (SC); Rachel Cloyd and J’ne Byckovski (TX); Tomasz Serbinowski (UT); and Christina Rouleau (VT).

1. Adopted its Oct. 7 Minutes

The Working Group met Oct. 7 and took the following action: 1) adopted its Summer National Meeting minutes; and 2) discussed the use of big data in fraud detection and claim settlement.

Mr. Bradner made a motion, seconded by Ms. Nelson, to adopt the Working Group’s Oct. 7 minutes (Attachment One-A). The motion passed unanimously.

2. Discussed the Use of Big Data in Fraud Detection and Claim Settlement

Commissioner Ommen said the Working Group heard a presentation at the Summer National Meeting from Kevin Rawlins (Insurance Services Office—ISO) about ISO’s ClaimSearch and a presentation from Alan Haskins (National Insurance Crime Bureau—NICB) about NICB’s fraud detection services. Commissioner Ommen said the Working Group also heard a presentation during its Oct. 7 conference call from Carlos Martins (ISO) about ISO’s claims solutions.

Commissioner Ommen reviewed the three charges of the Working Group. He said the fraud detection and claims settlement practices discussed by the Working Group are subject to his regulatory jurisdiction under both Iowa’s unfair trade law and Iowa’s unfair claim settlement practices provisions, which are based on the NAIC Unfair Claims Settlement Practices Act (#900). He asked if the Working Group members have any observations about the adequacy of the current state insurance regulatory framework used to oversee the use of big data in fraud detection and claim settlement.

Ms. Nelson said she has concerns about the use of non-insurance data in fraud detection models because consumers may not know data about them is being used and how to correct inaccurate data. She said this concern is heightened with the use of third-party vendors because state insurance regulators may have challenges with access to information of third-party vendors.

Mr. McKenney said the presentations from ISO suggested there is not a lot of oversight by insurers.

Mr. Baron said the Maryland Insurance Administration would hold the licensee accountable, similar to how insurers are held accountable for the action of independent adjusters who have been hired.

Birny Birnbaum (Center for Economic Justice—CEJ) said there is a need for additional oversight of third-party vendors, which he believes are operating as advisory organizations. He said state insurance regulators should review whether an insurer’s practices result in disparate impact and should require insurers to disclose to consumers what third-party data and algorithms are being used.

Peter Kochenburger (University of Connecticut School of Law) said even if the states have regulatory authority under unfair trade laws, consumers need to know what data is being used because the accuracy of data can only be determined by the consumer. He said similar protections found in the federal Fair Credit Reporting Act should be applied to the use of data for fraud detection and claim settlement.
Commissioner Ommen said he would hold the insurer responsible for validating the accuracy of the data and model outputs.

Mr. Gendron said state insurance regulators need more detail on how insurers ensure the accuracy of data being used.

Mr. Bradner agreed and said insurers’ use of data from third-party vendors and how insurers validate the accuracy of this data warrants additional discussion.

3. Received a Report from the Casualty Actuarial and Statistical (C) Task Force

Mr. Piazza said the Casualty Actuarial and Statistical (C) Task Force has the following three charges to coordinate with the Big Data (EX) Working Group: 1) facilitate training and sharing of expertise on predictive analytics; 2) draft guidance for the review of state rate filings based on complex predictive models; and 3) draft changes to the Product Filing Review Handbook to include best practices for review of predictive models and analytics filed by insurers to justify rates.

Regarding the first charge, Mr. Piazza said the Task Force conducts monthly public education webinars on rate filings and regulator-to-regulator conference calls on specific rate filings of concern. He said the Task Force’s public calls since the Summer National Meeting addressed neural network, natural language processing, analytics and actual data-mining, and the open source model “R” and predictive analytics.

Regarding the two other charges, Mr. Piazza said the Task Force exposed the most recent draft of the regulatory review of predictive modeling white paper on Oct. 15 for a public comment period ending Nov. 22. The Task Force received comments from 11 interested parties and is beginning its review of the comments.

4. Received a Report from the Accelerated Underwriting (A) Working Group

Director Muriel said the Accelerated Underwriting (A) Working Group met Oct. 2 to review a work plan for accomplishing its charge, which is to “consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, drafting guidance for the states.” He said the work plan contemplates three general phases: 1) gather information; identify issues and the best ways to address them (white paper, model bulletin, model law or something else); and 3) develop a work product by the 2020 Fall National Meeting.

5. Received an Update on NAIC Technical and Non-Technical Rate Review Trainings

Kris DeFrain (NAIC) said the NAIC has been sponsoring predictive analytics training since 2017 through what is called the “Book Club” of the Casualty Actuarial and Statistical (C) Task Force. She said the topics presented at the “Book Club” are mostly focused on the review of predictive analytics in property/casualty (P/C) rate filings. She said the NAIC is developing non-technical and technical training. The non-technical training will be provided to rate filing reviewers and market conduct examiners and focus on how to ensure vital information is contained in a rate filing, how to evaluate rate classes for unfair discrimination and understanding when additional actuarial assistance may be needed.

Ms. DeFrain said this training will be conducted after the Task Force completes its white paper toward the end of this year or early in 2020. She said the technical training will be conducted by the NAIC’s consultant, Dorothy Andrews (Actuarial & Analytics Consortium LLC), and will focus on training actuaries and statisticians. Ms. DeFrain said the technical training will be presented through on-demand modules and will focus on data inputs, mathematical distributions and statistical techniques.

In response to Commissioner Ommen’s question about training addressing the use of models in fraud detection, Ms. DeFrain said the training will focus on rate models but could be expanded in the future to include the assessment of models used for fraud detection and claim settlement.

Mr. Vigliaturo said the technical training is very good, and each session takes approximately 12 hours to complete. He said the courses will increase the knowledge of participants but will not necessarily lead to a quicker review of rate filings. He suggested the training be added to the list of courses for the NAIC’s Insurance Regulator Professional Designation Program.
6. **Heard a Presentation from the CEJ on the Role of Advisory Organizations**

Mr. Birnbaum provided a presentation on the history of advisory organizations, current regulatory requirements for advisory organizations and third-party vendors that he believes are operating as unlicensed advisory organizations. He said the federal McCarran-Ferguson Act provides insurers with a limited exemption from federal antitrust laws to the extent that insurance is regulated by the states. Without this exemption from antitrust laws, he said insurers would not be able to use advisory organizations to collect and compile historical information for ratemaking purposes. He said the states have oversight of these activities through the licensing of advisory organizations.

In the late 1980s, Mr. Birnbaum said a number of state attorneys general brought legal action against the ISO, alleging its involvement in anticompetitive activities. He said the ISO settled this litigation by changing its corporate structure and going to loss costs in states for lines of insurance where it had not already done so.

By the early 1990s, Mr. Birnbaum said more states had enacted legislation to require organizations to file prospective loss costs instead of fully developed rates. He said rating organizations became more widely referred to as advisory organizations, with state insurance regulators having oversight of data collected and algorithms used for loss costs. He said the states conduct advisory organization examinations to determine that an advisory organization is performing its permitted regulated functions in a manner consistent with state rating laws and in a manner that results in accurate and compliant products or services for its subscribing companies.

Mr. Birnbaum said new third-party vendors engaged in collecting decision marking are not licensed as advisory organizations. He said the following activities raise antitrust concerns that require state supervision of organizations exempt from federal antitrust laws: 1) collecting data from insurers; 2) adding additional data to insurer data; and 3) analyzing the data to producer pricing recommendations in the form of prospective loss costs or risk classification.

Mr. Birnbaum questioned what the functional difference is between ISO, which is licensed as an advisory organization and produces personal auto risk classification relativities and third-party vendors, such as TransUnion, which provide credit scores, criminal history scores or vehicle scores. He said there is a need to create the accountability and regulatory oversight of vendors of big data algorithms as envisioned in antitrust laws and advisory organization statutes. He said this may mean not only bringing regulatory oversight to third-party algorithm vendors, but also updating advisory organization requirements and procedures for the era of big data.

Commissioner Ommen said this is an important issue to which the Working Group should give further consideration.

Having no further business, the Big Data (EX) Working Group adjourned.

W:\National Meetings\2019\Fall\TF\Innovation\_Working_Groups\Big_Data\12-7BDWG.docx
The Big Data (EX) Working Group of the Innovation and Technology (EX) Task Force met via conference call Oct. 7, 2019. The following Working Group members participated: Doug Ommen, Chair (IA); Elizabeth Kelleher Dwyer, Vice Chair (RI); Lori K. Wing-Heier, Shauna Nickel and Alex Romero (AK); Jerry Workman (AL); George Bradner and Wanchin Chou (CT); Stephen C. Taylor (DC); Frank Pyle (DE); Carly Jamarowicz, Rebecca Smid and Mike Yaworsky (FL); Susan Lamb (IL); Rich Piazza, Nathan Strebeck and Jeff Zewe (LA); Robert Baron (MD); Karen Dennis (MI); Phil Vigliaturo (MN); Carrie Couch, Angela Nelson, Julie Lederer and Cynthia Amann (MO); Christian Citarella (NH); Mark McGill (NJ); Mitchell Moore (NV); Jennifer Demory, Jillian Froment, Angela Dingus and Rodney Beech (OH); David Dahl, TK Keen, Ying Liu and Andrew Stolfi (OR); Michael McKenny (PA); Kendall Buchanan (SC); J’ne Byckovski and Rachel Cloyd (TX); Armand Glick, Reed Stringham and Tracy Klausmeier (UT). Also participating were: Lindsay Bates and Travis Grassel (IA).

1. Adopted its Summer National Meeting Minutes

Mr. Piazza made a motion, seconded by Ms. Nelson, to adopt the Working Group’s Aug. 3 minutes (see NAIC Proceedings – Summer 2019, Innovation and Technology (EX) Task Force, Attachment One). The motion passed unanimously.

2. Discussed the Use of Big Data in Fraud Detection and Claim Settlement

Commissioner Ommen said Carlos Martins (ISO Claims Solutions) will provide an update to the Working Group’s discussion with ISO at the Summer National Meeting. Commissioner Ommen asked for more detail on how ISO uses data in the ClaimSearch database. Mr. Martins said the ISO ClaimSearch database has been in existence since 1971. It is a contributory claims database, and subscribers must use all reasonable measures to ensure the quality of data being submitted. Mr. Martins said ISO also has data quality checks to verify data is what they would expect. For example, a company could not submit a date of birth as all nines or zeros. Mr. Martin said ISO uses commercially available address scrubbing solutions to ensure addresses are correct and adhere to U.S. postal code standards. Mr. Martins said ISO sends Social Security numbers (SSNs) to the federal Death Master File (DMF) to ensure the SSN is not associated with a deceased individual. If an SSN is associated with a deceased individual, ISO provides an alert to the subscriber. Mr. Martin said ISO will alert a subscriber if an address is associated with a prison or mail drop location.

Mr. Martins said ISO has had a voluntary program in existence for 15 years through which a person can contest information in the ClaimSearch database. If a citizen contests information, ISO communicates with the insurer that submitted the information and works with the insurer to address any inaccuracy. ISO also adds a notation in the database that the consumer has contested data submitted. Mr. Martins said ISO does not charge a fee for this service and had had only three inquiries in the last year. Mr. Martins said only the insurer that submitted the data can correct their information. Commissioner Ommen asked if all aspects of a claim are submitted at the consent of the consumer. Mr. Martins said consumer consent is not needed since the database operates under a fraud exemption of the federal Gramm-Leach-Bliley Act (GLBA).

Ms. Nelson said ISO’s website references a product called ClaimDirector, which advertises that subscribers are given access to financial, civil and criminal records. Ms. Nelson asked if insurers accessing and using this information is disclosed to consumers. Mr. Martins said ClaimDirector is a database created in 1971 and is used to deter and identify fraud and a consumer’s claim history. Mr. Martins said the database allows insurers to identify potentially duplicative claims being made with multiple insurers. Mr. Martin said the database helps process meritorious claims as quickly as possible. Mr. Martins said the database helps industry understand claims with suspicious indicators, but ISO does not make a judgment on whether a claim is fraudulent. Mr. Martins said ClaimDirector applies a set of business rules created by seasoned insurance claims professionals and presents back a score and report on rules that fail. Mr. Martin said suspicious indicators would include an individual submitting similar claims with multiple insurers or an individual filing a claim after two weeks of purchasing insurance without any evidence of prior insurance. Mr. Martin said ClaimDirector also pulls in data from third-party sources, which might include information on whether a person filing a claim has been convicted on an insurance related crime. Mr. Martins said ISO provides tips and leads to insurers for an insurer to investigate. Mr. Martins said ClaimSearch DNA is provided to all ClaimSearch subscribers. Mr. Martins said ClaimSearch DNA identifies relationships between claims and insurers across the industry. For
example, Mr. Martins said the database will identify cell phone numbers and addresses associated with insurance claims being processed by multiple insurers.

Mr. Chou asked how these databases are different from the Comprehensive Loss Underwriting Exchange (CLUE) database. Mr. Martins said CLUE is an underwriting database, and ClaimSearch data cannot be commingled with an underwriting database, which is subject to the federal Fair Credit Reporting Act (FCRA).

Ms. Nelson asked what disclosures are made to consumers and how a consumer would know an ISO database has been used in the claims process and how to contest data in a database. Mr. Martins said ISO contracts require confidentiality and privacy of information contributed to database and, by contract, subscribers are not allowed to share database reports with consumers or other third parties without ISO’s consent. Commissioner Ommen said it appears ISO uses business rules to identify potential fraud and provides an insurance fraud score that could potentially place a claim in a holding pattern for settlement. Commissioner Ommen asked how a consumer would evaluate data that might be delaying a claim settlement. Mr. Martin said a company claims adjuster should let the claimant know the claim investigation has identified information that might delay the claim settlement. At this point, the claims adjuster and claimant would discuss this information, and the claims adjuster would know if the claimant questions the accuracy of the information. At the same time, Mr. Martins said the claims adjuster would not be trained to tell a consumer about the existence of an ISO report because of the confidentiality of the report. If the claimant questions the accuracy of the data, the claims adjuster would then work with ISO to obtain more information on which insurer submitted the prior claims data. Ms. Nelson said she is most concerned with ISO accessing and using financial, civil and criminal records and a consumer not knowing this information is being used or having any recourse if there is an error in this information.

Mr. Martins said if ISO uses third-party, publicly available data, ISO would notify a subscriber of where information was obtained if the consumer contested this information. Mr. Martins said ISO would work with the third-party vendor to address data errors and said he believes vendors would have a process to correct data. Ms. Nelson said she is concerned with a claims adjuster being provided a high-level score but not the detail of how the score was calculated. Ms. Nelson said this requires the claim adjuster to ask about the detail of how a score was calculated and then to share this information with a claimant. Mr. Martins said ISO provides reasons for a score, and a claim adjuster would need to determine relevance to the claim. Ms. Nelson said insurers have different thresholds on reasons they would identify a claim to be potentially fraudulent. Mr. Martins said this process is used to process claims quickly, and only a small percentage have claims that have a fraud score that prompts further investigation.

Commissioner Ommen asked if data may identify a consumer’s propensity for litigation and whether state insurance regulators have reviewed the business rules being used. Mr. Martins said he is not aware of any data or product used to predict a consumer’s propensity for litigation. Mr. Martins said ISO works with subscribers on market conduct exams and that the rules used to identify a claim as potentially fraudulent come from the National Insurance Crime Bureau (NICB) and seasoned claims professionals. Mr. Martins said ISO has tried to automate these rules for more efficient claims processing.

Mr. Martins said data is not used for rating and underwriting, and this is a contractual requirement for companies submitting data. Mr. Martins said ISO does not have any systems or scores that identify gender, ethnicity or other prohibited factors. Mr. Martins said ISO also does not use this information in their databases. Mr. Martins said ISO is committed to safeguarding industry data. ISO applies the latest encryption techniques and is audited to Service Organization Control (SOC) 2 and SOC 3 level to make sure sensitive information is not misused. Mr. Martins said ISO audits data use by subscribers to make sure subscribers use data in accordance with contractual obligations.

Birny Birnbaum (Center for Economic Justice—CEJ) asked if ClaimSearch is FCRA-complaint. Mr. Martin said FCRA standards do not apply to ClaimSearch. Mr. Birnbaum asked if ISO has assessed rules to determine if they result in a disparate impact to low-income and minority consumers. Mr. Birnbaum asked if ISO has assessed algorithms to identify how many false positives occur when identifying a claim as potentially fraudulent. Mr. Martin said ISO has not conducted these types of assessments. Mr. Martins said ISO provides tips and leads to insurers and does not make a final judgement on claims. Mr. Martins said ISO works with subscribers on data quality to ensure that tips and leads are appropriate. In response to Mr. Birnbaum’s question about disparate impact, Mr. Martins said ISO does not know impact because ISO does not conduct this type of analysis.
Peter Kochenburger (University of Connecticut School of Law) said there appears to be no communication between ISO and the consumer to confirm accuracy of information in database. Mr. Kochenburger asked if ISO provides any guidelines to insurers on how to address data quality with consumers. Mr. Martins said ISO requires subscribers to use reasonable efforts to ensure data quality, and any data quality issues are brought to the attention of subscribers. Mr. Martins said data quality issues are rare because ISO receives data directly from subscribers’ claims systems. Mr. Martins confirmed there is no contact between ISO and the consumer.

Having no further business, the Big Data (EX) Working Group adjourned.
The Speed to Market (EX) Working Group of the Innovation and Technology (EX) Task Force met via conference call Dec. 3, 2019. The following Working Group members participated:

Maureen Motter, Vice Chair and Christine Wright (OH); Joanne Bennett (AK); Gina Hunt and Jerry Workman (AL); William Lacy (AR); Shirley Taylor (CO); Janet Brunory and Jocelyn Villanueva (DE); Tammy Lohmann (MN); Angela Nelson (MO); Tim Johnson (NC); Chrystal Bartuska (ND); Cuc Nguyen (OK); Tammy Vance (OR); Sharalyn Taylor and Mark Worman (TX); Bob Grissom (VA); Lichiou Lee (WA); and Lisa Brandt, Diane Dambach, Sue Ezalarab, Barry Haney and MaryKay Rodriguez (WI).

1. **Adopted its Sept. 12 minutes**

The Working Group met Sept. 12 and discussed and reviewed a presentation made by NAIC staff members Joy Morrison, Bridget Kieras and Brandy Woltkamp on enhancements and prioritization of capabilities in the System for Electronic Rate and Form Filing (SERFF). The following themes were discussed: Submission Validations, Review Tools, Workload Management, Performance and Reliability, Search, Document Management, Reporting and Data Export, Streamlined Correspondence and User Experience.

Ms. Nelson made a motion, seconded by Ms. Lee, to adopt the Working Group’s Sept. 12 minutes (Attachment Two-A). The motion passed unanimously.

2. **Received an Update on the RFP Related to SERFF**

Ms. Kieras advised that in mid-October, the NAIC issued a request for proposal (RFP) to engage a firm for assistance in conducting a business and technical assessment of SERFF to assess current regulatory needs and future areas of focus. The proposals, which were due in early November, are being reviewed by three state insurance commissioners and several senior NAIC staff members.

Once a firm is selected and begins its work, it will perform a number of functions, including stakeholder interviews. The interviews will include users of SERFF from various insurance companies, representing all lines of business. There will also be interviews of six to 12 insurance commissioners, representatives from State Based Exchanges, NAIC Consumer Representatives, some industry partners, Interstate Insurance Product Regulation Commission and SERFF staff members. The purpose of these interviews is to obtain an overview of the services and features of SERFF, the technology that SERFF is built upon, and the governance model under which SERFF operates, to determine if SERFF is meeting current regulatory needs and to assess how the SERFF application may need to be enhanced in the future.

Engagement with the firm ultimately selected is expected to start by the end of 2019 and is scheduled to conclude by May 31, 2020. Participants will be selected for the stakeholder interviews; some of these will occur at the 2020 Spring National Meeting, particularly at the commissioner level. The final deliverable for the request for proposal will include a written report and presentation to be made to the Executive (EX) Committee or other designated group.

The NAIC SERFF assessment RFP press release is posted to the NAIC website, and as there were no comments or questions from the Working Group, Ms. Kieras advised there is an email address in the RFP should anyone wish to submit questions at a later time.

3. **Received an Update on the SERFF Capabilities Survey**

On the Sept. 12 call, a list of capabilities relevant to the future of SERFF were presented to this Working Group for discussion. After the call, a survey was sent to all states and a presentation was also made at the Association of Insurance Compliance Professionals (AICP) Annual Educational Conference on this subject matter.
The survey questions asked respondents if they would use each of the capabilities and the answer choices provided were “yes,” “no,” and “not sure.” The survey also asked respondents to rank the capabilities in order of importance and for each area there was also a free form text field where additional ideas and/or comments could be provided. All but 12 jurisdictions responded to the survey and there was a good mix in the responses across various lines of business, as well as types of staff who responded to the survey.

Results of the ranking demonstrated that the categories “review tools” and “performance and reliability” scored the highest among the available capabilities, indicating that these two capabilities were the most important to survey respondents. The capabilities “user experience” and “streamlined correspondence” scored the lowest among the capabilities ranked.

The top features that survey respondents were interested in centered around the issue of attachments, to include the capabilities of “document comparison,” “improved versioning,” and “document search.” Survey comments and results continue to be reviewed by NAIC staff for other subject matter and issues. The capabilities survey will be assessed alongside the survey that was performed in 2018 to look at how things will work moving forward.

Some items from the capabilities survey are already being worked into the SERFF analysis and development process, such as search improvements, improvements to the quick text feature, and some preliminary proof of concept work for document comparison and document search. Some of these capabilities are already being moved through the development pipeline. Significant enhancements will follow a review process that may this Working Group, the Product Steering Committee or SERFF Advisory Board, while others are more straightforward and NAIC staff is working to implement them.

Final survey results will be reflected in an action plan for 2020 and beyond so the SERFF application can provide more functionality for states and insurance companies moving forward. The Working Group had no questions or concerns about the capabilities survey.

Having no further business, the Speed to Market (EX) Working Group adjourned.
The Speed to Market (EX) Working Group of the Innovation and Technology (EX) Task Force met via conference call Sept. 12, 2019. The following Working Group members participated: John G. Franchini, represented by Bryan Brock, Chair (NM); Maureen Motter, Vice Chair (OH); Austin Childs (AK); William Lacy (AR); Shirley Taylor (CO); Ann Lyon and Jennifer Stinson (DE); Heather Drogue (KS); Tammy Lohmann (MN); LeAnn Cox (MO); Timothy Johnson (NC); Mike Andring and Chris Aufenthie (ND); Chris Wright (OH); Nancy Clark, J’ne Byckovski, Marianne Baker, Rachel Bowden and David Muckerheide (TX); Bob Grissom and Trish Todd (VA); Lichiou Lee (WA); and Barry Haney (WI).

1. Discussed and Reviewed a Presentation on SERFF Enhancements and Prioritization of Focus Areas

The following themes were discussed and reviewed with the Working Group by NAIC staff members Joy E. Morrison, Bridget Kieras and Brandy Woltkamp:

a) Submission Validations: The goal of this theme is to increase up-front checks to improve compliance of filings at submission, reduce filing objections and rejections, and reduce manual verifications. The enhancements discussed include the creation of validation rules for state-specific fields, validations for correct state fees, field validations based on state business rules, and validation of prescribed language.

b) Review Tools: The goal is to provide tools that will provide a more comprehensive and consistent filing review and reduce time from filing to approval. Potential enhancements include automatically assigning filings in order to get to state filing reviewers faster; creating built in checklists; building out public access and System for Electronic Rate and Form Filing (SERFF) Filing Access (SFA) capabilities to help the states meet their requirements to consumers; and creating a holistic product review, which is the ability for state insurance regulators to review changes made to a product over a period of several years.

c) Workload Management: The goal is to provide analysts and filers tools to identify and organize workflows in a manner that maximizes time spent on the most critical filing process tasks. Enhancement suggestions include workload dashboards, email notifications that occur when a user is not logged into SERFF, and customized views.

d) Performance and Reliability: The goal is for the SERFF system to behave in a consistent and expected manner with little to no unplanned downtime. The enhancements suggested under this theme are cloud migration, the implementation of new technologies, and advanced monitoring.

e) Search: The goal is to allow users to perform quick and efficient searches to locate single filings or sets filings with similar characteristics. The enhancements suggested under this theme are a key word search, a document search, and a redesigned search screen.

f) Document Management: The goal is to implement a document management system to expedite filing reviews with improved document comparison, collaboration and tracking capabilities.

g) Reporting and Data Export: The goal is to provide analytical capabilities to help state insurance regulators with decision making and market oversight. Considerations for this area include Tableau implementation for graphical reporting, improving data export capabilities, and expanding and enhancing canned reports.

h) Streamlined Correspondence: The goal is to reduce complexity and improve communication and response time in resolving compliance issues. Considerations discussed include moving schedule item data updates to Post Submission Updates, simplifying the response and objection process, and expanding the use of Quick Text.

i) User Experience: The goal is to improve the look and feel of SERFF by introducing standard user patterns and easier to navigate workflows. Considerations discussed for this theme are a simpler and more intuitive interface, and an improved workflow.

After going over each of the areas of suggested improvement, input was sought from the conference call participants. Several states provided feedback but there was not a lot of discussion from working group members regarding which of these areas would provide the most benefit to them. The PowerPoint presentation used for this call will be provided to the Working Group to seek feedback and prioritization for the items discussed; that feedback may then be used to provide information and seek further feedback from the states that are not on the Working Group. No timeline for completion of the suggested enhancements has been confirmed, as this project is currently in the development phase.

Having no further business, the Speed to Market (EX) Working Group adjourned.
The Artificial Intelligence (EX) Working Group of the Innovation and Technology (EX) Task Force met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: Jon Godfread, Chair (ND); Mark Afable, Vice Chair (WI); Anna Latham (AK); Keith Schraad (AZ); George Bradner and Josh Hershman (CT); Peg Brown (CO); Erin VanSickle (FL); Travis Grassel (IA); Robert H. Muriel and Judy Mottar (IL); Jerry Ehlers (IN); Rich Piazza (LA); Robert Baron (MD); Cynthia Amann (MO); Christian Citarella and Christie Rice (NH); Anna Krylova (NM); Jillian Froment (OH); Michael Humphreys and Michael McKenney (PA); Hodgen Mainda (TN); Eric Lowe (VA); and Christina Rouleau (VT). Also participating were: Phil Vigliaturo (MN); Brian Fordham (OR); Travis Jordan (SD); and James A. Dodrill (WV).

1. **Heard Introductory Remarks**

Commissioner Godfread provided a quick recap regarding the appointment of the Working Group and provided an overview of the its Sept. 5 conference call. He said this Working Group was appointed to: 1) study the development of artificial intelligence (AI), its use in the insurance sector, and its impact on consumer protection and privacy, marketplace dynamics and the state-based insurance regulatory framework; 2) develop regulatory guidance, beginning with guiding principles; and 3) make other recommendations to the Innovation and Technology (EX) Task Force, as appropriate, by the 2020 Summer National Meeting. He said the decision was made to focus first on the latter part of the charge, specifically to work on guiding principles.

Commissioner Godfread said he and Commissioner Afable decided a good approach would be to consider work already done in this area as a basis for this work. He said, on its Sept. 5 conference call, the Working Group heard an overview on AI from Scott Kosnoff (Faegre Baker Daniels LLP), who talked about: 1) AI principles generally; and 2) the Organisation for Economic Co-operation and Development’s (OECD) AI principles, which have been adopted by 42 countries, including the U.S. Commissioner Godfread said, ultimately, the decision was made to request comments regarding how the OECD principles might be “tweaked” or “tailored” for applicability to the insurance industry, with a comment deadline of Oct. 11.

Commissioner Afable said the goal is to get this work done by the 2020 Summer National Meeting, noting that it is important to hear from Working Group members and other stakeholders regarding the North Dakota draft of “NAIC Principles on Artificial Intelligence (AI).” He said he and Commissioner Godfread initially want to hear if there are concerns about using it as a working draft.

Commissioner Godfread said these principles are intended to be higher level, overarching principles, not a model law or model regulation. He said it is intended to be a guiding document, to be used by other NAIC committees, task forces and/or working groups as they look at issues related to AI in their respective areas.

2. **Discussed OECD Comment Letters and Development of AI Principles for Insurance**

Commissioner Godfread said he thought it would be helpful to have a “straw man” document to expedite progress, so he asked his staff to consider the submitted comments. He said this draft represents that work. He said the draft was then sent to the Working Group members for comment, noting they should feel free to offer alternative approaches to completing the deliverable. He asked the Working Group members for discussion regarding using the draft as a starting point and, if the answer is “yes,” then he would accept comments on the draft.

Mr. McKenney said he submitted substantial comments regarding the OECD AI principles, and this draft is entirely consistent with those comments. He said he would agree with moving forward with the North Dakota draft as the basis for completing the deliverable.

Mr. Grassel said his understanding is that the goal is to bring insurance-specific language and issues into the framework, and he believes the draft does a good job of that.
Mr. Citarella said the “Fair and Ethical” section of the draft in item (b) states that “AI systems must not be designed to harm or deceive people.” He said, ideally, AI systems would not harm people, but it would be difficult to regulate intentionality so that may need to be modified. He also said in the “Compliant” section, where it states that “data used by AI systems must be retained and able to be produced in accordance with each jurisdiction’s requirements,” is an excellent concept, but he is not sure how it would work in practice. He said it would likely generate quite a bit of pushback. He also said that because AI is an iterative process with data continuously being fed into the system, adjusting the results to be compliant with 50+ jurisdictions’ requirements could be difficult.

Commissioner Godfread said Mr. Citarella’s comments go a step or two beyond what the principles are designed to cover. He said there will be a whole host of things that will need to be figured out in terms of implementation. He said this is a new and evolving area and key principles requires consistent monitoring, and while he does not disagree with the point made, he said it is pretty detailed for this initial discussion.

Mr. Citarella also said transparency may mitigate the problems that arise from the amount of data involved in AI, but each actor will have a narrative about how they go about what they do and how they will address concerns and issues that develop. He said he does not have a recommendation on how the language might be revised to address that, but it should be given some thought.

Commissioner Godfread said the goal is not to explain the black box but be able to explain the purpose and—if the AI actor cannot articulate that—it might indicate transparency issues.

Mr. Fordham said compliance with state and federal laws is always required, so he questioned if the reference to it being required “whether intentional or unintentional” is necessary.

Birny Birnbaum (Center for Economic Justice—CEJ) thanked the Working Group for the draft and said it was well done and a good basis to start further work. He referenced the words under the “Fair and Equitable” section in item (b) regarding “beneficial outcomes,” stating there will be winners and losers in that and, while a majority may benefit, the cost to the minority may be unreasonable or unacceptable. He said he is not sure how to address that, but it is difficult to think about beneficial outcomes when most insurance involves segmenting the population one way or another. He said the “Accountable” section states that “AI actors should be accountable for the proper functioning of AI systems and compliance with all stated principles,” but he asked to whom the AI actors would be accountable. He said he has a similar question regarding transparency, noting that many might assume AI actors should be accountable and transparent to regulators, but he said they need to be accountable and transparent to the people impacted by the system.

Commissioner Godfread said he understood that point from the perspective of transparency, but the AI actors would be responsible to the regulators. He said the draft principles also refer to “relevant stakeholders” so that would, in his opinion, include consumers and discussion with consumers—including what the data is being used for—but said he is open to other clarifying language, as well.

Commissioner Afable agreed and said the explanatory piece would be there, as well.

3. **Discussed Next Steps**

 Commissioner Godfread said it appears the Working Group members are in favor of using the North Dakota draft as the basis for its work and, hearing no objection, said it will be posted for another exposure period. He encouraged everyone to contribute comments. He said, as a recap, the Working Group will:

1) Work off this draft.
4) Revise the draft and expose it again prior to the Spring National Meeting, March 21–24, 2020.

Ms. Amman said there are definitions and a glossary developed by the IT Examination (E) Working Group for the *Financial Condition Examiners Handbook* that may be helpful to this Working Group.

Having no further business, the Artificial Intelligence (EX) Working Group adjourned.

W:\National Meetings\2019\Fall\TF\Innovation\_Working_Groups\Artificial_Intelligence\12-7AIWG.docx

© 2019 National Association of Insurance Commissioners 2
The Innovation and Technology (EX) Task Force met via conference call Oct. 18, 2019. The following Task Force members participated: Jon Godfread, Chair (ND); Keith Schraad, Vice Chair (AZ); Lori K. Wing-Heier (AK); Jim L. Ridling represented by Jerry Workman (AL); Allen W. Kerr represented by Letty Hardee and Mel Anderson (AR); Ricardo Lara represented by Lucy Jaboluri (CA); Michael Conway represented by Peg Brown (CO); Andrew N. Mais and George Bradner (CT); Stephen C. Taylor (DC); Trinidad Navarro represented by Frank Pyle (DE); David Altmaier represented by Rebecca Smid (FL); Colin M. Hayashida represented by Kathleen Nakasone (HI); Doug Ommen represented by Travis Grassel (IA); Robert H. Muriel represented by Judy Mottor (IL); Vicki Schmidt represented by LeAnn Crow (KS); Nancy G. Atkins represented by LeAnn Crow (KS); James J. Donelon represented by Rich Piazza and Tom Travis (LA); Al Redmer Jr. represented by Robert Baron (MD); Steve Kelley represented by Tammy Lohmann, Phil Vigliaturo and Grace Arnold (MN); Chlora Lindley-Myers represented by Angela Nelson and Cynthia Amann (MO); Bruce R. Ramge (NE); Marlene Caride represented by Carl Sornson (NJ); John G. Franchini (NM); Barbara D. Richardson (NV); Jillian Froment (OH); Glen Mulready represented by Cuc Nguyen (OK); Andrew Stolfi represented by Antonio Vargas (OR); Jessica Altman represented by Michael Humphreys (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer represented by Daniel Morris (SC); Larry Deiter represented by Travis Jordan (SD); Hodgen Mainda represented by David Combs (TN); Kent Sullivan represented by Reagan Ellmar (TX); Todd E. Kiser represented by Tanji Northrup (UT); Scott A. White represented by Vicki Ayers (VA); Michael S. Pieciak represented by Emily Brown (VT); Mike Kreidler represented by Molly Nollette (WA); and Mark Afable represented by Nathan Houdek (WI). Also participating was: Chris Aufenthie (ND).

1. **Adopted its Summer National Meeting Minutes**

   Mr. Bradner made a motion, seconded by Director Froment, to adopt the Task Force’s Aug. 5 minutes (see NAIC Proceedings – Summer 2019, Innovation and Technology (EX) Task Force). The motion passed unanimously.

2. **Adopted the Minutes of the Artificial Intelligence (EX) Working Group**

   Commissioner Godfread said the Working Group met Sept. 5 to hear an overview on artificial intelligence (AI) from Scott Kosnoff (Faegre Baker Daniels LLP). Mr. Kosnoff talked about: 1) AI principles generally; and 2) the Organisation for Economic Co-operation and Development’s (OECD) AI principles, which have been adopted by 42 countries, including the U.S.

   Commissioner Godfread said that following Mr. Kosnoff’s presentation, there was discussion, reflected in the minutes, and the decision was made to request comments regarding how the OECD principles might be “tweaked” or “tailored” for applicability to the insurance industry. He said those comments were due Oct. 11, and the next steps for the Working Group will be to review the comments and meet again to discuss whether the OECD principles can be effectively “tweaked” and “tailored” to fit the insurance industry or if taking another approach would be better.

   Commissioner Godfread said the Working Group’s minutes were posted to its web page.

   Ms. Ayers made a motion, seconded by Mr. Bradner, to adopt the Working Group’s Sept. 5 minutes (Attachment Four-A). The motion passed unanimously.

3. **Adopted its 2020 Proposed Charges**

   Commissioner Godfread introduced the Task Force’s 2020 proposed charges. He said the charges include a few relatively minor changes from its 2019 charges: 1) working to amend the *Unfair Trade Practices Act* (#880) to clarify the anti-rebating issue; 2) adding clarification related to autonomous vehicles to reflect continuing to monitor this area closely, but removing language related to developing a white paper or model legislation; 3) adding an item to reflect closely monitoring the Market Regulation and Consumer Affairs (D) Committee’s work on data privacy, a charge referred by the Task Force; and 4) including the new Artificial Intelligence (EX) Working Group charge to the overall charges for 2020.
Mr. Bradner made a motion, seconded by Ms. Northrup, to adopt the Task Force’s 2020 proposed charges (Attachment Four-B). The motion passed unanimously.

4. Heard a Consumer Representative Request for an InsurTech Bulletin

Commissioner Godfread asked Mr. Aufenthie to present Birny Birnbaum’s (Center for Economic Justice—CEJ) request (Attachment Four-C) for the development of a bulletin directed to InsurTechs titled, “Why Insurance is Different from Other Consumer Products,” in Mr. Birnbaum’s absence.

Mr. Aufenthie said Mr. Birnbaum, after hearing a presentation from Plug and Play at the Task Force’s meeting during the Spring National Meeting, thought their survey was too generic to provide actionable insights and did not provide any way forward. He said Mr. Birnbaum’s letter indicated it would be more useful to spend resources educating startups on the business of insurance and suggested that the Task Force develop this bulletin. Mr. Aufenthie said Mr. Birnbaum’s letter suggested the bulletin include certain points such as: 1) insurance is regulated on a state-by-state basis; 2) insurance has a limited suggestion anti-trust exemption; and 3) there is a requirement for cost-based pricing to protect insurer financial condition and prevent intentional or unintentional unfair discrimination. He said the full list of items are in the request, which is posted on the NAIC’s website.

Commissioner Godfread said agrees that Mr. Birnbaum’s points are well taken. He said many have been discussed at length and presented during the many events and opportunities state insurance regulators have had over the past several years, and there is evidence that work has created fairly strong interest and awareness on the part of accelerators and others offering counsel and mentorship to startups in the InsurTech space. He said this has resulted in an understanding of the insurance industry, its products and services, and how it is regulated.

Commissioner Godfread said there are several documents geared toward this topic available on the internet, intended to better educate startups coming into insurance. He said his staff in North Dakota undertook a project to draft something along these lines and would be happy to share that with the consumer representative group for comment. He said his staff discovered during the development of the paper that there are clearly different opinions on how best to do this. He said it could probably be debated and wordsmithed for a long period of time, but the 10 basic items mentioned in Mr. Birnbaum’s letter represent an excellent start.

Commissioner Godfread said he is not sure undertaking a charge to draft an official NAIC bulletin is the best approach and opened it up for discussion. He suggested state insurance regulators could still work with consumer representatives to develop a paper on this topic, but he said he is reluctant to add it as a charge to the Task Force at this time.

Commissioner Godfread said he wants to make everyone aware of another undertaking related to development of an NAIC designation that will be discussed more during the Fall National Meeting. He said it involves working to find a way to open up the Associate Professional in Insurance Regulation (APIR) to tweak that for the InsurTech, basically opening up the designation that would encapsulate a lot of the introduction to insurance regulation that the InsurTech may be missing. He said this work is in progress and could be a good option as well for new entrants to this space, noting it could be a good introduction to what insurance regulation looks like. He then opened it up for discussion.

Mr. Grassel said the Global Insurance Accelerator (GIA) held its InsurTech event Oct. 14–18, and this topic was covered. Commissioner Godfread said those types of events are generally where this kind of education takes place. Mr. Bradner asked if Iowa could share that presentation with this group. Mr. Grassel said he would do that.

Peter Kochenburger (University of Connecticut School of Law) said this is a good idea and should not be a heavy lift, as there is already a lot of information on this topic available in the academic community. He said that it is written so it does not become dated and that he would be happy to provide some examples for the Task Force to review. He said having a consistent document would have a lot of value, and it could be shared online and elsewhere. He also said that if it is a charge, it is more likely to get done.

Commissioner Godfread said North Dakota is willing to offer what it has done so far. He said if the consumer representatives would be willing to offer up some of the work from the academic community, it may not take long to get something ready to share with the Task Force members.
Nikki Hall (NAIC) said she is working on an InsurTech study and would be open to working with others to incorporate this work into the study. She said she hopes to have a draft of the study ready to deliver to the Innovation and Technology State Contacts Roundtable at the Fall National Meeting.

Commissioner Godfread asked if what has been done to date could be shared with Ms. Hall, along with the presentation from the GIA, to get a full picture and then the study can be shared at the Roundtable. He said that a consistent document would be easier for those who work with InsurTechs and that coupled with the work on the designation side, it would be valuable. Mr. Bradner suggested it be put together as a video as opposed to a written document and could be made available online.

Superintendent Dwyer said the NAIC Communications Division staff have information on how to present materials for effectiveness and that might be good to consider.

Ms. Jabourian said she would like to see this material including information on the state insurance regulator’s obligation to enforce the law and that it is a legislative process to change those laws.

Angela Gleason (American Property Casualty Insurance Association—APCIA) said the APCIA would like to be involved in developing this guidance. She said it should be neutral and accurate in terms of what the state laws are and should not put forth any specific agenda.

Commissioner Godfread said that the Iowa presentation will be distributed and that Mr. Aufenthie will work with Mr. Kochenburger and Ms. Hall on the study, which will be revisited at the Task Force meeting during the Fall National Meeting. He asked if there was agreement with that approach. Hearing no disagreement or objection, he said that will be the approach.

5. **Adopted a Request for NAIC Model Law Development to Revise Model #880**

Commissioner Godfread said during the Summer National Meeting, the Task Force voted to move forward with work on an anti-rebating bulletin, as well as pursue development of language to revise Model #880 to further clarify what constitutes regulatory compliance in this area of anti-rebating. He said the first step to is to submit a Request for NAIC Model Law Development to the Executive (EX) Committee and the full membership asking for approval to work on Model #880. He said the Request for NAIC Model Law Development was posted on the Task Force’s web page.

David Kodama (APCIA) asked if the work would be limited to the section of Model #880 in the Request for NAIC Model Law Development, Section 4(H)(1). Commissioner Godfread said he thought the intention was to limit it to that. Mr. Kodama said the APCIA prefers it to be limited to that section.

John Fielding (The Council of Insurance Agenda and Brokers—CIAB) asked about item 4A in the Request for NAIC Model Law Development. He asked if the intent is to limit this to development of language specific to new technologies or if it is going to be generally applicable. He said the CIAB would urge that it not be limited just to technologies, but also other things that may not be specifically related to technology.

Commissioner Godfread said he does not read it that way. He said he reads it to say that is how this all came about; in other words, in light of new technologies, this needs to be addressed but does not restrict amendments to Model #880 to only be related to technology.

Mr. Baron made a motion, seconded by Ms. Brown, to adopt the Request for NAIC Model Law Development (Attachment Four-D). The motion passed unanimously.

6. **Discussed Comments Related to the North Dakota Anti-Rebating Bulletin**

Commissioner Godfread said the next agenda item is related to requested comments regarding the draft North Dakota anti-rebating bulletin. He said after discussions with NAIC Legal Division staff, the draft is more in line with a “bulletin” than a “guideline,” so it will be referred to as a “bulletin” going forward. He also said the Task Force members agreed to accept comments and continue to work on the language for a bulletin while it continues to pursue model law language development. He said the Task Force membership did not make a decision as to whether it would continue to work on “fine tuning” a North Dakota bulletin that other states may choose to use as a template for their state, or if the intent is to pursue developing...
an NAIC bulletin, meaning it would be developed and voted on, as a Task Force, and moved up through the NAIC committee process for a full vote of the membership.

Commissioner Godfread told the Task Force members that the comment letters have been posted to its web page. He said 13 letters/emails have been received, six from state insurance departments and the remainder from interested parties.

Commissioner Godfread asked the Task Force members if they want to pursue an official NAIC anti-rebating bulletin, to be voted on and sent up through the NAIC process as an NAIC work product, or if they want to discuss and consider the comment letters received and continue to work with the North Dakota draft bulletin to better understand the issues as it works toward the model language. He said based on the answer to that question, the Task Force will proceed with work to finish the discussion about the bulletin. He said once approval is received from the membership regarding the Request for NAIC Model Law Development, the Task Force will proceed with the work on the model law language. He said North Dakota is going to work on this bulletin anyway, so the thinking is to share that work with the Task Force to enable other states that want to move ahead with something in the short term.

Ms. Brown said Colorado appreciates having the North Dakota bulletin to identify some of the issues that Colorado would like to see addressed. She said all states have some rebating language, but the interpretation varies dramatically. She said that she is hoping this effort will lead to more uniformity in how states are looking at rebating and that this would apply to technology across the board.

Commissioner Godfread said the goal is to instill uniformity and reset some of the interpretation that exits across the country. He said the North Dakota bulletin is intended to address some of the issues identified and share that with other states, but the Task Force also voted to amend the Model #880, which is a good step, but both outcomes should help to make the states more consistent across the country. He said the bulletin is an option for a state to make that move sooner rather than later, and the model law process will hopefully also coincide somewhat with the bulletin language even though that is a different process.

Ms. Brown asked if the intention is to use the North Dakota bulletin as something of a launching pad for moving the model law discussion forward. Commissioner Godfread said that would be a fair assessment. Mr. Bradner said all states have the ability to be more consistent and deviate where they think they need to, but he said he would support continuing to work on the bulletin.

Superintendent Franchini agreed and said that in New Mexico, some companies that are using technology and AI to give credits or discounts want to include things to make the policyholder safer. He said he agrees with that premise, but he said state insurance regulators need to find a way to make sure technology does not get thrown in as a rebate. He said state insurance regulators need to find a way to separate the technology that mitigates risk from what used to be considered a rebate.

Commissioner Godfread agreed that the point is to look at technology that is being used for risk mitigation as something acceptable and by being able to be more efficient, the companies are able to save money and can pass that along to the consumer. He said he cannot see how that would be considered a rebate. He said if the focus is to offer something tied to risk mitigation, it is not a rebate. Superintendent Franchini said he agrees.

Commissioner Godfread said North Dakota has gone back and forth on whether it must be included in the policy. He said North Dakota has decided it does not necessarily need to be included, but he wants the ability to understand what is being offered in the marketplace so they can answer calls from consumers. He said he considers that to be information-sharing between the companies and the regulators.

Superintendent Franchini said not having it in the policy could lead to bad market behavior. He said if it is in the policy, it is harder to discriminate. Commissioner Godfread said that is why North Dakota initially wanted it specified in the policy. However, he said North Dakota also understands the counter argument to that, particularly in terms of having to revise the policy every time the value-added product may be upgraded. He said the level of specificity required is an issue if it is in the policy, and he and his staff have gotten more comfortable with information sharing as opposed to requiring it be in the policy. He said this will likely be debated as the Task Force works on the model law language.

Jeffrey Klein (McIntyre & Lemon PLLC), representing the Risk Insurance Management Society (RIMS), said he is pleased the Task Force is looking into this issue. He said from a procedural standpoint, the bulletin route may be important given the amount of time it might take to draft the model law language, but ultimately that will be necessary to ensure consistency and
uniformity across the states. He said the challenge will be to ensure the model law language is either consistent with or overrides the bulletin.

Commissioner Godfread said the bulletin was just the first crack at this and that the model law would trump the bulletin. He said if that happened, states could rescind the bulletin or pursue another option, as there is a host of ways to handle that.

Mr. Kodama said he suggests there be more discussion as to why these products and services can or should be specified in the policy. He said the APCIA is taking the position that this discussion is being taken up because the device is being offered outside of the policy. He said if it is something offered that is specified in the policy, it would be filed and approved, and those are already in the marketplace today. He said the monetary value is included in the insurance product and that what is being discussed is more along the lines of something separate that the insurance company or producer wants to offer to the consumer, like a supplement to the policy and provide information and risk awareness and mitigation. He said he wants to make sure that is clearly defined as this work moves forward.

Commissioner Godfread agreed and said there will be more discussion on this topic during the Task Force meeting at the Fall National Meeting. He asked Mr. Kodama to offer those comments there.

7. Discussed Other Matters

Commissioner Godfread said the annual report based on the Cybersecurity and Identity Theft Insurance Coverage Supplement filed by insurers with their annual statement was distributed to the Task Force members with the notice for this conference call. He said it has now been published on the Task Force’s web page and, hearing no objections to that, it is now available to the public. He said that it is the same format, basically presents the same data as the previous reports and is based on the 2018 data year.

Having no further business, the Innovation and Technology (EX) Task Force adjourned.

W:\National Meetings\2019\Fall\TF\Innovation\_10.18_Call\10.18ITTF_minutes_Final.docx
The Artificial Intelligence (EX) Working Group of the Innovation and Technology (EX) Task Force met via conference call Sept. 5, 2019. The following Working Group members participated: Jon Godfread, Chair (ND); Mark Afable, Vice Chair (WI); Lucy Jabourian (CA); Andrew N. Mais (CT); Peg Brown (CO); David Altmayer (FL); Travis Grassel and Andria Seip (IA); Robert H. Muriel (IL); Amy Beard (IN); Tom Travis and Rich Piazza (LA); Ron Coleman (MD); Cynthia Amann, Angela Nelson and Teresa Kroll (MO); Keith Briggs (NC); Christian Citarella (NH); John G. Franchini (NM); Barbara D. Richardson (NV); Mark Hamlin (OH); Shannen Logue and Michael KeKenney (PA); Rachel Jade-Rice (TN); Eric Lowe (VA); and Christina Rouleau (VT). Also participating were: Timothy Schott (ME); Karen Dennis (MI); and Grace Arnold and Phil Vigliaturo (MN).

1. Heard Introductory Remarks

Commissioner Godfread said that at the Spring National Meeting, the Innovation and Technology (EX) Task Force adopted a motion to establish this Working Group to study the development of artificial intelligence (AI), its use in the insurance sector, and its impact on consumer protection and privacy, marketplace dynamics, and the state-based insurance regulatory framework. He said the charge also stated that the Working Group will develop regulatory guidance, beginning with guiding principles, and make other recommendations to the Innovation and Technology (EX) Task Force as appropriate by the 2020 Summer National Meeting.

Commissioner Godfread said the plan is to focus on that latter part of the charge, specifically to work on guiding principles. He said that other groups outside of the NAIC are working on principles for AI, and some have even adopted them, such as the Organisation for Economic Cooperation and Development’s (OECD) principles, as well as those being considered by the Australian government’s Department of Industry, Innovation and Science. He said these principles were sent out as materials for this call.

Commissioner Godfread said he and Commissioner Afable discussed how to approach developing these principles for the insurance industry. He said they think it is important to discuss and establish the scope of the Working Group’s work and to keep it at a high level in order to get these principles drafted. He said both he and Commissioner Afable realize it is going to be hard to keep from getting into details in terms of definitions and exactly what is meant by some regarding these terms. However, he said they would like the Working Group to stay out of the weeds and get some high, overarching principles drafted that can be used across the NAIC workstreams. He said the timeline is tight and somewhat aggressive, so he would ask the Working Group members, other state insurance regulators and interested parties to keep the timeline in mind as they prioritize this work. Commissioner Afable reiterated the importance of staying focused on high-level guiding principles and that other committees and Task Forces will determine where the specific issues are best developed once the principles have been drafted. He said he and Commissioner Godfread realize there is work going on in the space without guiding principles in place, making it important to get this work done quickly.

Commissioner Godfread said there are other organizations putting out principles and that it is important for the NAIC to get out some insurance guidelines as well with principles that are tailored to the insurance industry.

2. Heard a Presentation on AI from Faegre Baker Daniels LLP

Scott Kosnoff (Faegre Baker Daniels LLP) provided an AI overview. He began with offering common definitions for AI and its genesis. He said its growth can be attributed to the explosive amounts of data now available for use and the availability of storage that allows this data to be stored and made available, widely, as well as the amazing strengthening of processing power. He talked about the difference between “general” AI, which can think like a human in all respects, and “narrow” AI, which is focused on very specific tasks. He said while “general” AI is still a long way off, “narrow” AI is here and alive and well. Mr. Kosnoff reviewed why AI is so important and some important applications for AI, including medical research, hiring decisions, lending, insurance and more. He said insurers are interested in AI to improve marketing and customer engagement, underwriting, rating, claims decisions and fraud detection, and he talked about what is in it for consumers. Mr. Kosnoff also reviewed the concerns related to AI. He said the most frequently cited concern deals with fairness, bias/discrimination and the lack of transparency/explainability. He said these are not unique to the insurance industry related to AI but are concerns that...
are agnostic to the use of AI. He also reviewed other AI challenges, including incomplete, inaccurate and outdated data, as well as having embedded bias in the data. He said there are also algorithm challenges, including unreliable accuracy and algorithms that are too complex or rely on unlawful factors such as race, gender or religion. He said this can have a widespread impact with AI. Mr. Kosnoff provided some examples where these issues became a problem. Mr. Kosnoff said there is strong consensus regarding AI’s ability to offer extraordinary benefits but that reasonable and measured guardrails are needed. He said there is an important role for state insurance regulators and that it is important to get engaged as the federal government already is, as well as international standard-setters such as the OECD and the International Association of Insurance Supervisors (IAIS). He said the principles should not be overly restrictive or prescriptive, but there should be a balance between the need for consumer protections and the desire to encourage innovation.

Commissioner Godfread reiterated that while data issues and algorithmic challenges exist, it is not the charge of this Working Group to solve those issues or develop details of what that means as that will likely be the purview of another group. However, he said setting up the guardrails needs to be done and that time is of the essence. He said with the availability of 5G networks, data issues will only continue to grow and will create more privacy issues. However, he said the details will be handled elsewhere and that this Working Group will address areas of focus for the broader industry.

Ms. Jabourian said there need to be guidelines that emphasize the importance of transparency and explainability of the algorithms versus being told it is the AI and that it cannot necessarily be explained. She said as state insurance regulators, we need to be able to understand how the AI came to its conclusions. Commissioner Godfread agreed. He said the principles need to lay out what is required, but not necessarily provide all the details of how that will be done just now.

3. Discussed the Adopted OECD AI Principles and Australia’s Ethics Framework Discussion Paper

Mr. Kosnoff provided an overview of the OECD principles. He said several workstreams to develop AI principles are in progress or have been completed, most limited to a specific country. He said the OECD AI principles, however, are the first and only set of inter-government policy guidelines adopted by multiple countries. He said 42 countries, including the U.S., have adopted the OECD AI principles. He said they are for general application and are not targeted at the insurance sector. Mr. Kosnoff pointed out portions of the principles that might have application for the insurance industry, including:

1. Inclusive growth, sustainable development and well-being
   - Advancing inclusion of underrepresented populations.
   - Reducing economic, social, gender and other inequalities.
2. Human-centered values and fairness
   - Respect of the rule of law, human rights and democratic values throughout the AI system lifecycle.
   - Privacy and data protection.
   - Non-discrimination and equality.
   - Fairness.
   - Mechanisms and safeguards, such as human determination.
3. Transparency and explainability
   - Provide meaningful information to stakeholders so that they know when they are interacting with AI.
   - Stakeholders affected by an AI system should be able to understand the outcome.
   - Stakeholders adversely affected by an AI system should be provided information so that they can challenge the outcome and the logic that served as the basis for the decision.
4. Robustness, security and safety
   - Should be robust, secure and safe throughout their entire lifecycle.
   - Should ensure traceability to enable analysis of outcomes.
   - Systematic risk management approach to each phase of the AI system lifecycle on a continuous basis.
5. Accountability
   - All organizations that deploy or operate an AI system should be accountable for the proper functioning of the system and for the respect of the above principles.

Mr. Kosnoff said the OECD principles appear to be a good place to start for the Working Group. He said the Australian draft principles are also very interesting and may be more reader-friendly than the OECD principles, but they are just a proposal out for comment and have not been adopted anywhere.
4. **Discussed the Process for Development of AI Principles for Insurance and Next Steps**

Commissioner Godfread asked the Working Group members how they would like to move forward in drafting AI principles for the insurance industry. He asked if the Working Group would like to use the OECD principles or some other entity’s principles as a starting point and accept comments on how to tailor it to the individual insurance industry as a whole. Commissioner Richardson said it would be good to start with something already based in reality. Commissioner Mais agreed and said there is no reason to reinvent the wheel. He said the OECD principles provide a good basis for creating a set of principles uniquely tailored to the insurance industry. Commissioner Afable said NAIC staff had been asked to look at other standards out there and that research came back to the ones being discussed. He asked Mr. Kosnoff if he sees any significant difference between the OECD AI principles and the Australian draft. Mr. Kosnoff said he does not think there is any meaningful difference and if an exhaustive study of all workstreams were done, it would likely reveal far more commonality among the different versions than differences. He said there may be differences in emphasis and the way they are expressed but still more commonality than differences. Mr. Logue said there should be a constant reminder to creators of AI systems that unfair trade practice laws must always be kept in mind.

Commissioner Godfread asked if interested parties had any comments. Hearing none, he said there is a clear direction to work with the OECD AI principles as a starting point. He said NAIC staff will publish a pared down version of the OECD AI principles and expose them for a public comment period.

Having no further business, the Artificial Intelligence (EX) Working Group adjourned.
2020 PROPOSED CHARGES

INNOVATION AND TECHNOLOGY (EX) TASK FORCE

The mission of the Innovation and Technology (EX) Task Force is to provide a forum for regulator education and discussion of innovation and technology in the insurance sector, to monitor technology developments that affect the state insurance regulatory framework, and to develop regulatory guidance, as appropriate.

Ongoing Support of NAIC Programs, Products or Services

1. The Innovation and Technology (EX) Task Force will:
   A. Provide forums, resources and materials for the discussion of innovation and technology developments in the insurance sector, including the collection and use of data by insurers and state insurance regulators—as well as new products, services and distribution platforms—in order to educate state insurance regulators on how these developments affect consumer protection, privacy, insurer and producer oversight, marketplace dynamics and the state-based insurance regulatory framework.
   B. Develop regulatory guidance, model laws or model law revisions, and white papers or make other recommendations to the Executive (EX) Committee, as appropriate.
   C. Monitor and discuss regulatory issues that arise with the development of autonomous vehicles. Study and, if necessary, develop recommendations for changes needed to the state-based insurance regulatory framework.
   D. Discuss emerging issues related to companies or licensees leveraging new technologies to develop products for on-demand insurance purposes—in addition to potential implications on the state-based insurance regulatory structure—including, but not limited to, reviewing new products and technologies affecting the insurance space and the associated regulatory implications.
   E. Monitor developments in the area of cybersecurity, including the implementation of the Insurance Data Security Model Law (§668) and representing the NAIC and communicating with other entities/groups, including sharing information as may be appropriate.
   F. Coordinate with other NAIC committees and task forces, as appropriate, on technology, innovation, cybersecurity issues and data privacy.

2. The Big Data (EX) Working Group will:
   A. Review current regulatory frameworks used to oversee insurers’ use of consumer and non-insurance data. If appropriate, recommend modifications to model laws and/or regulations regarding marketing, rating, underwriting and claims, regulation of data vendors and brokers, regulatory reporting requirements, and consumer disclosure requirements.
   B. Propose a mechanism to provide resources and allow the states to share resources to facilitate their ability to conduct technical analysis of, and data collection related to, the review of complex models used by insurers for underwriting, rating and claims. Such a mechanism shall respect and in no way limit the states’ regulatory authority.
   C. Assess data needs and required tools for state insurance regulators to appropriately monitor the marketplace and evaluate underwriting, rating, claims and marketing practices. This assessment shall include gaining a better understanding of currently available data and tools, as well as recommendations for additional data and tools, as appropriate. Based on this assessment, propose a means to collect, house and analyze needed data.
INNOVATION AND TECHNOLOGY (EX) TASK FORCE (continued)

3. The Speed to Market (EX) Working Group will:
   A. Consider proposed System for Electronic Rate and Form Filing (SERFF) features or functionality presented to the Working Group by the SERFF Advisory Board, likely originating from the SERFF Product Steering Committee. Upon approval and acquisition of any needed funding, direct the SERFF Advisory Board to implement the project. Receive periodic reports from the SERFF Advisory Board, as needed.
   B. Discuss and oversee the implementation and ongoing maintenance/enhancement of speed to market operational efficiencies related to product filing needs, efficiencies and effective consumer protection. This includes the following activities:
      1. Provide a forum to gather information from the states and the industry regarding tools, policies and resolutions to assist with common filing issues. Provide oversight in evaluating product filing efficiency issues for state insurance regulators and the industry, particularly with regard to uniformity. In 2020, evaluate the state survey results compiled in 2019 regarding the usefulness of existing tools and potential new tools and propose a plan to make improvements.
      2. Use SERFF data to develop, refine, implement, collect and distribute common filing metrics that provide a tool to measure the success of the speed to market modernization efforts as measured by nationwide and individual state speed to market compliance, with an emphasis on monitoring state regulatory and insurer responsibilities for speed to market for insurance products.
      3. Facilitate proposed changes to the product coding matrices (PCMs) and the uniform transmittal document (UTD) on an annual basis, including the review, approval and notification of changes. Monitor, assist with and report on state implementation of any PCM changes.
      4. Facilitate the review and revision of the Product Filing Review Handbook, which contains an overview of all of the operational efficiency tools and describes best practices for industry filers and state reviewers with regard to the rate and form filing and review process. In 2020, develop and implement a communication plan to inform states about the Product Filing Review Handbook.
   C. Provide direction to NAIC staff regarding SERFF functionality, implementation, development and enhancements. Direct NAIC staff to provide individual state speed to market reports to each commissioner at each national meeting. Receive periodic reports from NAIC staff, as needed.
   D. Conduct the following activities as desired by the Interstate Insurance Product Regulation Commission:
      1. Provide support to the Compact as the speed to market vehicle for asset-based insurance products, encouraging the states’ participation in, and the industry’s usage of the Compact.
      2. Receive periodic reports from the Compact, as needed.

4. The Artificial Intelligence (EX) Working Group will:
   A. Study the development of artificial intelligence (AI), its use in the insurance sector, and its impact on consumer protection and privacy, marketplace dynamics, and the state-based insurance regulatory framework. The Working Group will develop regulatory guidance, beginning with guiding principles, and make other recommendations to the Innovation and Technology (EX) Task Force as appropriate by the 2020 Summer National Meeting.

NAIC Support Staff: Scott Morris/Denise Matthews

W:\National Meetings\2019\Fall\TF\Innovation\2020_Charges\2020_ITTF_Charges_ITTF_approved10.18.19.docx
Comments of the Center for Economic Justice

To the NAIC Innovation and Technology Task Force

Suggested Bulletin Directed at Insurtechs:
Why Insurance is Different from Other Consumer Products

April 19, 2019

During the Innovation and Technology Task Force’s meeting earlier this year, we listened with interest to the presentation by Plug and Play and to the questions and discussion that followed the presentation. We felt that the survey results presented by Plug and Play were too generic to provide actionable insights. Rather, information on what type of regulation presented what type of barrier would have been far more useful.

Some of the perceived barriers may be a result of Insurtech’s thinking that insurance is like any other consumer product, in spite of the fact that regulation of insurance is predicated on the fact that insurance is not like other consumer products. To educate Insurtechs to basic issues of insurance regulation, we suggest the ITTF develop a bulletin for Insurtechs entitled “Why insurance is different from other consumer products—a primer for Insurtechs.” Such bulletin might include discussion of the following topics to provide a context for Insurtechs to understand the purposes of insurance regulation and to help guide their efforts in support of the goals of insurance regulation. In no particular order:

1. Insurance is generally regulated on a state-by-state basis

2. Insurance has a limited exemption from federal anti-trust laws. Activities that might otherwise violate anti-trust laws are permissible if regulated by the state.

3. The nature of insurance products have resulted in particular statutory requirements and regulatory practices

4. Cost-based pricing is required by actuarial standards of practice and financial solvency. The requirement for cost-based pricing is to protect insurer financial condition and prevent intentional or unintentional unfair discrimination
5. States generally prohibit discrimination on the basis of specific consumer characteristics – such as race, religion or national origin – as well as require discrimination on the basis of other consumer characteristics be justified by differences in expected losses or expenses. Pricing practices – such as dynamic pricing or price optimization – are not permitted in personal lines insurance.

6. Some insurance is required either by law or by lenders requiring protection of home or vehicle collateralizing the loan.

7. An insurance contract is a promise for future benefits if an undesirable event occurs. If the product “fails” – the consumer learns the insurance policy won’t cover the loss – she is stuck and can’t purchase another policy that would protect her against a known loss.

8. Consumers have little or no information about the insurers’ performance.

9. There is profound public interest in broad coverage – failure or inability of consumers and businesses to access insurance has implications not just for individual families and businesses, but for taxpayers, communities and the nation.

10. State insurance regulators have resources to assist you to understand, navigate and develop products in compliance with the consumer protection goals of the state-based insurance regulatory system

   We suggest that the proposed bulletin would provide a useful introduction to insurance regulation and provide a roadmap for innovation.
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is: □ New Model Law   or   X Amendment to Existing Model

1. Name of group to be responsible for drafting the model:
   Innovation and Technology (EX) Task Force

2. NAIC staff support contact information:
   Denise Matthews
dmatthews@naic.org
   816-783-8007

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.
   
   NAIC Unfair Trade Practices Act (Model #880)
   Section 4(H)(1)

   The Innovation and Technology (EX) Task Force will draft amendments to the NAIC Unfair Trade Practices Act (Model #880), focusing on Section 4H, to clarify what is considered a “rebate” or “inducement”.

4. Does the model law meet the Model Law Criteria? X Yes   or   □ No   (Check one)
   (If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).
   a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? X Yes   or   □ No   (Check one)
      If yes, please explain why: Inconsistency in the interpretation of the Model language necessitates revisions to clarify the intent and ensure necessary consumer protections remain in place in light of technologies being deployed to add value to existing insurance products and services.
   b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?
      X Yes   or   □ No   (Check one)
5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

☐ 1  ☑ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood    Low Likelihood

Explanation, if necessary: A significant amount of time and discussion has already been devoted to this topic including presentations from all stakeholders and discussion around draft guideline language. That should help in accelerating the development process related to this model language.

6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1  ☑ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood    Low Likelihood

Explanation, if necessary:

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1  ☑ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood    Low Likelihood

Explanation, if necessary:

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

No

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No.
LONG-TERM CARE INSURANCE (EX) TASK FORCE

Long-Term Care Insurance (EX) Task Force Dec. 9, 2019, Minutes.................................................................4-110
Long-Term Care Insurance (EX) Task Force Oct. 31, 2019, Minutes (Attachment One).................................4-113
Long-Term Care Insurance (EX) Task Force 2020 Proposed Charges (Attachment One-A) .........................4-114
The Long-Term Care Insurance (EX) Task Force met in Austin, TX, Dec. 9, 2019. The following Task Force members participated: Scott A. White, Chair, and Doug Stolte (VA); Michael Conway, Vice Chair, represented by Eric Unger (CO); Lori K. Wing-Heier (AK); Allen W. Kerr represented by William Lacy (AR); Stephen C. Taylor (DC); Trinidad Navarro (DE); David Altmaier (FL); Colin M. Hayashida (HI); Doug Ommen (IA); Dean L. Cameron (ID); Robert H. Muriel (IL); Stephen W. Robertson represented by Amy Beard and Karl Knable (IN); Nancy G. Atkins (KY); James J. Donelon represented by Rich Piazza (LA); Gary Anderson (MA); Eric A. Cioppa (ME); Anita G. Fox represented by Karen Dennis (MI); Steve Kelley, Grace Arnold and Fred Anderson (MN); Bruce R. Ramge and Rhonda Ahrens (NE); Marlene Caride (NJ); John G. Franchini represented by Anna Krylova (NM); Barbara D. Richardson represented by Stephanie McGee (NV); Glen Mulready represented by Ron Kreiter (OK); Andrew Stolfi (OR); Jessica Altman (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer (SC); Larry Deiter (SD); Hodgen Mainda (TN); Kent Sullivan and Doug Slape (TX); Todd E. Kiser represented by Tanji Northrop (UT); Michael S. Pieciak represented by Anna Van Fleet (VT); Mike Kreidler (WA); Mark Afable (WI); and James A. Dodrill (WV).

1. **Adopted its Oct. 31 and Summer National Meeting Minutes**

The Task Force conducted an e-vote that concluded Oct. 31 to adopt its 2020 proposed charges.

Commissioner Kreidler made a motion, seconded by Commissioner Altman, to adopt the Task Force’s Oct. 31 (Attachment One) and Aug. 4 (see NAIC Proceedings – Summer 2019, Long-Term Care Insurance (EX) Task Force) minutes. The motion passed unanimously.

Commissioner White said the Task Force also met Oct 16, in regulator-to-regulator session pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss workstream planning.

2. **Received a Progress Report on Activities of the Task Force**

Commissioner White said the goals of the Task Force were divided into six workstreams, each of which has work underway or planned. Commissioner White said a public summary report on each of the workstreams was posted to the Task Force’s web page and was distributed to all interested state insurance regulators and interested parties on Oct. 25.

   a. **Multistate Rate Review Practice**

Ms. Ahrens said the workstream met Nov. 13 to discuss base questions and criteria for selecting a recommended long-term care insurance (LTCI) rate increase review methodology to use in a multistate review. Next, several actuaries were asked to refine the base questions and criteria, which will be discussed during a conference call in December.

   b. **Restructuring Techniques**

Mr. Slape said the workstream was organized to consider if any restructuring techniques could be used to protect policyholders as opposed to receivership. The group has met to develop a set of guiding principles and a scope of work. He said a conference call is scheduled for next week to review the scope of work and consider next steps for analysis.

   c. **Reduced Benefit Options and Consumer Notices**

Commissioner Altman said the workstream has met several times and is focused on information gathering from state insurance regulators on states’ practices for the review of reduced benefit options and consumer notices sent by companies, sample of notices and decisions states have made related to reduced benefit options. The group plans to continue information gathering by hearing from states that have robust review processes, discuss specific types of reduced benefit options and then shift to consumer disclosures.

Bonnie Burns (California Health Advocates—CHA) asked how reduced benefit options are regulated by the states because they are not included in NAIC models and there is inconsistency between states.
Commissioner Altman said the workstream has found that states have different review processes. One of the goals of the workstream is to reach a high level of consistency, keeping in mind the concerns affecting policyholders.

Ms. Burns asked when the workstream meetings would be open to interested parties. Commissioner White said the Task Force wants to be transparent and get input from stakeholders. Therefore, at the appropriate time, more information will be made available and more feedback will be requested from interested stakeholders. Commissioner Altman said with respect to this workstream, the input from consumer representatives and industry is necessary; it is just a matter of reaching the right point in the process to involve interested parties.

d. Valuation of LTCI Reserves

Mr. Andersen said the workstream’s primary charge regarding coordination and communication of LTCI reserving issues is being accomplished under the Valuation Analysis (E) Working Group and its review of companies’ Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves (AG 51) filings and meeting with companies. In 2019, the Working Group’s focus was on morbidity improvement, rate increase and investment return assumptions. In 2020, the focus has been on morbidity, including cost of care projections, effect of underwriting and what happens with older age policies. The workstream is also looking at ways to assist states in understanding the commonality between drivers of rate increases and reserving. The workstream conducted a survey on states’ interdepartmental coordination and communication between rate review actuaries and valuation actuaries and found that with few exceptions, states’ actuaries do communicate with each other.

Ms. Burns asked what happens to policyholder reserves when benefits are reduced. Mr. Andersen said companies are required to project out all cash flows, including premium, claims and investment income. When there are rate increases, the premium cash-flow projection for premium is changed for the new premium rate. When there are benefit changes, the cash-flow projections for benefits would be changed. That is something the workstream will focus on but does not have any data yet.

Birny Birnbaum (Center for Economic Justice—CEJ) asked which workstream will be looking at if the reduced benefit options offered to consumers are fair and equitable. Commissioner Altman, Mr. Andersen and Ms. Ahrens confirmed that the prospective review of reduced benefit options is within the scope of the reduced benefit option and consumer notice workstream and the multistate rate review practice workstream, while the historical review falls within the scope of the valuation of LTCI reserves workstream.

e. Non-Actuarial Variations

Commissioner Kreidler said the workstream is focused on evaluating the variances between states’ use of non-actuarial factors and review considerations in reviewing rate increase requests and develop best practices.

The workstream began with a limited scope survey of 14 workstream members about their departments’ policies, practices and authority to modify rate increase determinations of LTC rate filings based on non-actuarial factors. Nearly all states responding indicated they have authority to consider non-actuarial factors in the rate approval process. The top three factors were phase-in periods, caps (or limits) on the amount of allowed rate increases, and waiting periods between rate increase approvals and subsequent requests. The workstream also found that the length of phase-in and waiting periods and the threshold for caps varied from state to state. The workstream noted other factors included such things as the size of the block of policyholders, prior rate increase approvals, the size of the rate increase and its impact on consumers.

The workstream thinks the results of the survey are a representative sample of states’ practices, and it intends to use the results to develop recommendations for possible best practices. Over the next few weeks, the workstream will first be working on gathering additional information to better understand how the states determined these factors and established thresholds. Following that, the workstream will begin to develop possible best practices for the use of non-actuarial practices in the rate determination process that the Task Force can consider at a future date.

f. Data Call Design and Oversight

Mr. Stolte said the workstream was organized to perform two functions: 1) define a scope of work data call for certain long-term care (LTC) insurers in order to accumulate and analyze the current level of potential LTCI rate inequity among states’ policyholders; and 2) review the work of a consultant performing such a data call for communication to the Task Force.
Mr. Stolte said the workstream held preliminary discussions in July to brainstorm the type of data that may be needed to achieve the objective, and then in August, the actuaries began designing the data call. In September, testing and proposed improvements were made mostly from an instructional perspective. Ultimately, the workstream drafted a proposed scope of work for a consultant to complete such work. On Nov. 11, the NAIC released a Request for Proposal (RFP), which is posted to the NAIC website. Some key dates in the RFP are as follows:

- On Nov. 19, notification of intent to bid and submission of questions from bidders was due. Ten firms responded with their intent to bid, and on Nov. 22, responses to questions were provided.
- Bids are due Dec. 11.
- Firm selection is expected to be made in mid-February 2020.

Commissioner Stolfi said one data point that he is interested in receiving is how carriers have distributed dividends, whether currently available in annual financial reporting or through the data call.

3. Received Comments from Consumer and Industry Representatives

Patrick Cantilo (Cantilo & Bennett LLP) said the problem with LTCI rates is that pricing was originally based on modeling like life and annuities. The assumptions for lapse rates, termination rates, morbidity and mortality were misjudged. Investment yield assumptions have changed due to economic changes. For policies sold in the 1970s and 1980s, the premium was found to be grossly underpriced. It is not uncommon today for a company to have policies for a single product with rates that vary as much as sevenfold to tenfold between states. State insurance regulators have had a variety of valid concerns regarding companies’ rate increase requests. He said he has two observations:

- Policyholders had little input in the setting of premium rates and were often led to believe the rates would not change over time.
- Policyholders were inadvertently receiving a bargain, which was not a sustainable model.

Mr. Cantilo said there are three options for legacy blocks of LTCI:

- Market solutions are like the work being evaluated by the restructuring workstream group. Some in industry are developing creative solutions that have not been tested. Criteria should be observed with those solutions, including that the solutions be nondiscriminatory and treat policyholders fairly, and that the solutions must be effective and workable.
- Rehabilitation gives the domiciliary regulator broad authority to restructure the company and an opportunity to provide a better outcome for policyholders than market solutions or liquidation.
- Liquidation adds the value of guaranty association safety net but comes with benefit limitations.

Charles Piacentini (American Council of Life Insurers—ACLI) said the first message to convey is that the ACLI is committed to providing resources to answer questions and provide information. He said that all the workstreams are important and that the multistate rate review workstream is the cornerstone of all the workstreams. Industry has coalesced around the prospective present value (PPV) methodology, also known as the “Texas Approach,” as it achieves the objectives identified by state insurance regulators and concerns expressed by consumers. Stabilization and addressing legacy blocks are important to having coverage in the future and providing solutions to protect the financial security for consumers. He said coming up with a standard methodology addresses the concerns across jurisdictions to treat similarly situated policyholders equitably.

Jan Graeber (ACLI) said she encourages the Task Force to leverage the work completed by the Long-Term Care Pricing (B) Subgroup. She said the ACLI is committed to devoting resources to demonstrate how the PPV address state insurance regulators’ concerns. The PPV requires carriers to share in the cost by absorbing the losses that have occurred in the past. The PPV addresses the inequity between states that have approved different rate increases. Internally, the ACLI is developing a high-level demonstration to show how the PPV addresses these concerns. Carriers need a level of predictability to price and manage their business.

Mr. Knable said that while Indiana is fine with a consistent approach to reviewing rates, he emphasized the need to maintain a state-based approach to applying rate increases to policyholders that considers actuarial factors and policyholder expectations.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.
The Long-Term Care Insurance (EX) Task Force conducted an e-vote that concluded Oct. 31, 2019. The following Task Force members participated: Scott A. White, Chair (VA); Michael Conway, Vice Chair (CO); Lori K. Wing-Heier (AK); Allen W. Kerr represented by William Lacy (AR); Ricardo Lara represented by Camilo Pizarro (CA); Trinidad Navarro represented by Frank Pyle (DE); David Altmaier (FL); Colin M. Hayashida represented by Martha Im (HI); Robert H. Muriel represented by Mike Chrysler (IL); Stephen W. Robertson represented by Karl Knable (IN); James J. Donelon represented by Rich Piazza (LA); Eric A. Cioppa represented by Marti Hooper (ME); Anita G. Fox represented by Karen Dennis (MI); Bruce R. Ramge (NE); John G. Franchini represented by Anna Krylova (NM); Andrew Stolfi (OR); Jessica Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry Deiter (SD); Kent Sullivan represented by Doug Slape (TX); Mike Kreidler represented by Michael Bryant (WA); Mark Afable (WI); and James A. Dodrill represented by Tonya Gillespie (WV).

1. **Adopted its 2020 Proposed Charges**

The Task Force conducted an e-vote to consider adoption of its 2020 proposed charges. A majority of the members voted in favor of adopting the 2020 proposed charges (Attachment One-A). The motion passed, with Indiana dissenting.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.
2020 Proposed Charges

LONG-TERM CARE INSURANCE (EX) TASK FORCE

The Long-Term Care Insurance (EX) Task Force will:

A. Recognizing the gravity of the threat posed by the current long-term care insurance (LTCI) environment both to consumers and our state-based system of insurance regulation, this Task Force is charged to:

1. Developing a consistent national approach for reviewing long-term care insurance (LTCI) rates that results in actuarially appropriate increases being granted by the states in a timely manner, and eliminates cross-state rate subsidization.

2. Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.

3. Deliver such a proposal to the Executive (EX) Committee by the 2020 Fall National Meeting.

A.B. Provide periodic reporting to the Long-Term Care Insurance (E/B) Task Force to help ensure coordination between the two task forces on LTCI issues.

Unless otherwise affirmatively extended or modified by the Executive (EX) Committee, the Task Force and its charges will expire Jan. 31, 2021.

NAIC Support Staff: Jeffrey C. Johnston
INFORMATION SYSTEMS (EX1) TASK FORCE

Information Systems (EX1) Task Force Dec. 6, 2019, Minutes

© 2019 National Association of Insurance Commissioners
The Information Systems (EX1) Task Force met in Austin, TX, Dec. 6, 2019. The following Task Force members participated: Al Redmer Jr., Chair, represented by Paula Keen (MD); Lori K. Wing-Heier (AK); Allen W. Kerr represented by Letty Hardee (AR); Keith Schraad represented by Tom Zuppan (AZ); Michael Conway represented by Damion Hughes (CO); Trinidad Navarro represented by Frank Pyle (DE); Robert H. Muriel represented by Judy Mottar (IL); Vicki Schmidt (KS); Nancy G. Atkins represented by John Melvin (KY); Chlora Lindley-Myers represented by Cynthia Amann (MO); Barbara D. Richardson (NV); Jillian Froment represented by Angela Dingus (OH); Glen Mulready represented by Cuc Nguyen (OK); Kent Sullivan represented by Kenisha Schuster, Regan Ellmer, Nancy Clark, Marianne Baker and David Muckerheide (TX); and Scott A. White represented by Vicki Ayers (VA). Also participating were: Robin David (DE); Elizabeth Nunes (GA); Jerry Ehlers (IN); Robert Baron (MD); Matt Vatter (MN); Jennifer Demory (OH); Kirsten Anderson and Brian Fordham (OR); Matt Gendron (RI); Jessica Sherpa (VT); and John Haworth (WA).

1. **Adopted its Summer National Meeting Minutes**

Ms. Dingus made a motion, seconded by Mr. Pyle, to adopt the Task Force’s Aug. 2 minutes (*see NAIC Proceedings – Summer 2019, Information Systems (EX1) Task Force*). The motion passed unanimously.

2. **Received an Update on Draft 2020 Fiscals with a Technology Component**

Ms. Keen reported that the Task Force met Sept. 26, in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings, to review and discuss the technical approach described by the three proposed 2020 fiscal impact statements: 1) Cloud Transition Phase IV: Cloud Migration; 2) Enhanced Regulatory Data Collection; and 3) Uniform Certificate of Authority Application (UCAA) Redesign and Biographical Affidavit Database.

3. **Received the IT Operational Report**

Scott Morris (NAIC) highlighted four sections included in the Information Technology (IT) Operational Report received by the Task Force members. The report outlines work that the NAIC Information Technology Group (ITG) performs, new offerings from the NAIC, and general updates on the activities of the NAIC technology team.

a. **Product Highlights**

Missouri and West Virginia transitioned from Legacy State Based Systems (SBS) to the new platform. Five states remain to transition to the new platform as follows: Alaska (December), New Hampshire (February), Iowa (April), North Carolina (June) and Tennessee (August). Connecticut is currently licensed and in queue for its new implementation planned for early 2021. An SBS collaboration space was recently implemented to provide state insurance regulators with opportunities to connect with other state insurance regulators using the system.

The Market Analysis Procedures (D) Working Group’s short-term limited duration (STLD) data call is a collaborative data call of 40 participating NAIC jurisdictions. This call used new features released in October for the Regulatory Data Collection (RDC) system. The enhancements allow business users to more easily set up a data call without assistance by the technology team. The administrative tool allows the user to define the data call format, data definitions, validations, and error tolerances. The tool and its database were moved to the cloud to take full advantage of the elasticity, resilience and flexibility of the cloud.

NAIC membership approved the System for Electronic Rate and Form Filing (SERFF) Data Hosting fiscal on Aug. 3 at the Summer National Meeting, allowing the NAIC to proceed with de-commissioning the current data hosting model and replacing it with NAIC hosting for industry customers. NAIC hosting services became available on Nov. 1, and replication of data to the current hosting vendors will cease on Dec. 31. NAIC hosting will eliminate the need for customers to log in to two different places to see submitted and hosted filings.
The NAIC created a functioning proof of concept (POC) collaboration tool for the Big Data (EX) Working Group. NAIC technical and actuarial staff worked closely together to identify the processes and procedures to develop the POC to meet member requirements. The tool provides the ability to collaborate on big data topics. We expect to receive feedback and adjust before releasing to a wider group early next year.

On Oct. 18, the NAIC released a Request for Proposal (RFP) for analysis of SERFF. The NAIC will hire an agency to do detailed analysis of the capabilities of SERFF in conjunction with the business needs of the association and its members. SERFF was built in 1997, with the first production filings submitted in early 1998, and it is widely used and has many stakeholders. Responses to the RFP were evaluated by a team of three state insurance regulators to select the firm. The assessment is expected to take four to six months, and it will include interviews with key stakeholders, including state insurance regulators who use the system, commissioners, and industry users.

b. Innovation and Technology

Three strategic decisions were made to help optimize the cost footprint in the cloud, increase operational capacity, and add to internal technical leadership: 1) the NAIC engaged with Cloudreach to help identify cost saving opportunities and provide expert feedback and industry best practices to minimize cloud costs; 2) the NAIC decided to partner with a cloud managed service provider (MSP) to help manage cloud infrastructure. The MSP will perform activities like installing patches, performing backups, and monitoring the performance of infrastructure; and 3) the Chief Architect position was filled, and this role’s top priority is the cloud technical strategy.

Work continues to implement capabilities for the Service Organization Control (SOC) 2 for the cloud. The team has submitted 23 of the 30 controls for review by outside auditors. The auditors provided feedback on additional items needed for the controls to be complete, and the team is working to complete these tasks, as well as the remaining controls.

Protecting data that the NAIC collects and stores continues to be a top priority. In October, the Data De-identification project completed the implementation of software and processes to protect Personally Identifiable Information (PII) data in NAIC and National Insurance Producer Registry (NIPR) test environments.

c. Service and Support

The NAIC’s service request volume remains steady around 11,500–13,000 inquiries per month. The NAIC anticipates overall volume remaining steady throughout the remainder of the year. Key call drivers included: SBS transitions for Missouri and West Virginia; as well as industry filing deadlines for Internet Filing, Online Premium Tax for Insurance (OPTins), SERFF, risk-based capital (RBC), and Market Conduct Annual Statement (MCAS).

d. Team

The ITG team completed an engagement survey for the fourth consecutive year that measures the level of connection, motivation and commitment that staff feel for their place of work. This year, the survey was expanded to all NAIC employees. Also, the ITG Culture Committee was formed a year ago, and it meets bi-weekly in an effort to fulfill its mission, which is to embody, reinforce and promote the core values to all employees. The committee has recently morphed into an all NAIC culture committee.

4. Received a Portfolio Update and Project Status Reports

Cheryl McGee (NAIC) reported on the project portfolio. As of November, the NAIC’s technical project portfolio includes 20 active technical projects, 17 of which are projects of the State Head strategic plan. Three projects have been completed since the last report.

5. Received an Update on the NAIC Catalog

Jennifer Boren (NAIC), the NAIC’s SBS and Service Management Assistant Director, provided an overview of the new NAIC Technology Products and Services Catalog.
6. **Discussed Other Matters**

Ms. Keen encouraged state insurance regulators—both current and new members—to reach out to their commissioner to serve on the Task Force next year if interested.

W:\National Meetings\2019\Fall\TF\InfoSys\Final Minutes\12.06InfoSysTFmin_Final.docx
The Life Insurance and Annuities (A) Committee met in Austin, TX, Dec. 8, 2019. The following Committee members participated: Doug Ommen, Chair, and Mike Yanacheak (IA); Stephen C. Taylor, Vice Chair (DC); Jim L. Ridling represented by Steve Ostlund and Reyn Norman (AL); Keith Schraad (AZ); Trinidad Navarro represented by Fleur McKendell and Frank Pyle (DE); Dean L. Cameron (ID); James J. Donelon represented by Frank Opelka (LA); Jon Godfread (ND); Bruce R. Ramge Matt Holman and Rhonda Alhrens (NE); Barbara D. Richardson (NV); Linda A. Lacewell represented by Victor Agbu (NY); Jillian Froment (OH); Hodgen Mainda (TN); and Mark Afable and Richard Wicka (WI). Also participating were: Nour Benchaaboun (MD); Michael Humphreys (PA); Elizabeth Kelleheer Dwyer, Matt Gendron and Sarah Neil (RI); Travis Jordan (SD); Mike Boerner (TX).

1. **Adopted its Nov. 4 Minutes**

Director Froment made a motion, seconded by Commissioner Taylor, to adopt the Committee’s Nov. 4 minutes (Attachment One). The motion passed unanimously.

2. **Adopted the Report of the Annuity Suitability (A) Working Group**

Director Froment said the Annuity Suitability (A) Working Group met Dec. 7 and took the following action: 1) adopted its 2020 proposed charges; 2) adopted the Life Actuarial (A) Task Force’s 2020 proposed charges; 3) adopted Actuarial Guideline LII—Variable Annuity Early Adoption (AG 52); 4) adopted the 2020 Generally Recognized Expense Table (GRET); and 5) adopted its Summer National Meeting minutes.

Commissioner Ommen explained the history of Model #275 that resulted in the Nov. 5 draft revisions to Model #275. He said Model #275 is a professional conduct standard that by most measures is an important part of each state’s and territory’s consumer protection toolkit. He said it was not, is not and never will be the silver bullet to cure all concerns in the annuity market. He said well-informed sellers and well-informed buyers who understand and can therefore balance the risks and potential rewards of any given annuity contract may be the most important ingredients to a healthy, functioning competitive market. He said the professional care and competence standards for insurers and producers is also very important.

During each of the conference calls, there was robust discussion among all stakeholders on those provisions in the draft related to the proposed best interest obligations and supervision system. The Working Group also discussed and made revisions to the model’s safe harbor provisions as part of its effort to harmonize as much as possible its revisions with the U.S. Security and Exchange Commission’s (SEC) final Regulation Best Interest for the benefit of consumers and the industry. At the end of its last conference call on Nov. 5, the Working Group agreed that it had completed its work as directed by the Life Insurance and Annuities (A) Committee and forwarded the Nov. 5 draft to the Committee for its consideration. Commissioner Ommen, Life Insurance and Annuities (A) Committee chair, exposed the draft for a public comment period ending Nov. 26.

3. **Discussed Comments Received on the Nov. 5 Revisions to Model #275**

Commissioner Ommen explained the history of Model #275 that resulted in the Nov. 5 draft revisions to Model #275. He said Model #275 is a professional conduct standard that by most measures is an important part of each state’s and territory’s consumer protection toolkit. He said it was not, is not and never will be the silver bullet to cure all concerns in the annuity market. He said well-informed sellers and well-informed buyers who understand and can therefore balance the risks and potential rewards of any given annuity contract may be the most important ingredients to a healthy, functioning competitive market. He said the professional care and competence standards for insurers and producers is also very important.

Commissioner Ommen said the federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) was a long, complicated and at times, not well-understood law that was signed into law in 2010. He said it contained two important
provisions that have shaped the work of the Annuity Suitability (A) Working Group over the last several years: Section 989J and Section 913(g)(2). He said Section 913(g)(2) authorized the SEC to promulgate a standard of conduct across both the securities brokerage business and the investment adviser business that required all securities professionals to “act in the best interest of the customer.” He said that while legal opinions vary as to what the U.S. Congress meant, it is clear that it did not intend to require a fiduciary relationship. He said Congress wrote in Section 913 that “material conflicts of interest shall be disclosed and may be consented to by the customer.” Congress also wrote in the text of Section 913 that “the receipt of compensation based upon commission or fee shall not, in and of itself, be considered a violation.” Commissioner Ommen said if Congress intended to impose a fiduciary standard, it would have used the word “fiduciary,” and it did not.

Commissioner Ommen explained that the states are not required by law to use exactly the same language that Congress chose to use in the Dodd-Frank Act, but there are consumer protection reasons to harmonize our standards. He said one reason is that most insurance producers already act in the best interest of their customers, so a best interest standard makes sense. He said, however, regulators must keep in mind that all regulations carry costs and other burdens on businesses establishing and maintaining procedures. He said compliance costs include preparation for and cooperation with regulatory examinations, and dual or redundant standards would burden many annuity issuers and dually licensed financial professionals requiring them to try to implement and maintain two parallel systems. He said it is obvious that these costs would raise costs for consumers, with no measurable benefit to consumers. He said that, as Director Froment explained, the Working Group has defined thorough its care, disclosure, conflict of interest and documentation obligations a best interest standard in Model #275 that is more than suitability and draws on the provisions in Section 913 of the Dodd-Frank Act and SEC Regulation Best Interest, but is not a fiduciary mandate.

Commissioner Ommen explained that Section 989J was also enacted in the Dodd-Frank Act. He said it confirmed the state insurance regulators’ role in establishing the appropriate standards of conduct for annuity sales and confirmed the state safe harbor for fixed indexed annuities from federal securities law and the SEC. He said he reads Section 989J as providing congressional direction to state insurance regulators to do what is best in light of the SEC’s recent change. He said that the Annuity Suitability (A) Working Group, under the leadership of Director Froment, has developed a draft that reflects that best balance of preserving for consumers the choice between commission-based and fee-based retirement advice. The Working Group’s Nov. 5 draft aligns the state standard of conduct with the SEC’s final Regulation Best Interest, which also struck that balance of more than suitability, but not a fiduciary mandate.

Commissioner Ommen said he would like to review the comments received on the Nov. 5 draft revisions to Model #275. He said he considers most of the comments received as recommendations for clarification.

a. Comments on Section 1. Purpose

Birny Birnbaum (Center for Economic Justice—CEJ) suggested inserting clarifying language in Section 1A. The Committee agreed to add the following clarifying language:

A. The purpose of this regulation is to require producers, as defined in this regulation, to act in the best interest of the consumer when making a recommendation of an annuity and to require insurers to establish and maintain a system to supervise recommendations so that the insurance needs and financial objectives of consumers at the time of the transaction are effectively addressed.

The Independent Insurance Agents and Brokers of America (IIABA) suggested adding language to Section 1B to clarify that the revisions are not intended to civil liability or a private right of action. Director Ramge said he supports the additional clarification. Director Froment said, and Mr. Ostlund agreed, that the suggested language is in line with the intent of the provision. The Committee agreed to make the following change:

B. Nothing herein shall be construed to create or imply a private cause of action for a violation of this regulation or to subject a producer to civil liability under the best interest standard of care outlined in Section 6 of this regulation or under standards governing the conduct of a fiduciary.

b. Comments on Section 5. Definitions

Mr. Birnbaum suggested revisions to Section 5I “material conflict of interest.” He suggested deleting 5I(2) “Material conflict of interest does not include cash compensation or noncash compensation.” Commissioner Taylor said he does not think this revision is necessary. The Committee agreed not to make this change.
Mr. Birnbaum suggested the following revisions to Section 5M “Recommendation”:

(2) “Recommendation” does not include general communication to the public, generalized consumer services assistance or administrative support, general educational information and tools, or prospectuses, or other product and sales material.

The Committee agreed not to make this change.

c. Comments on Section 6. Duties of Insurers and Producers

The Committee discussed comments on Section 6A:

A. Best Interest Obligations. A producer, when making a recommendation of an annuity, shall act in the best interest of the consumer under the circumstances known at the time the recommendation is made, without placing the producer’s or the insurer’s financial interest ahead of the consumer’s interest. A producer has acted in the best interest of the consumer if they have satisfied the following obligations regarding care, disclosure, conflict of interest and documentation:

The IIABA suggested deleting section 6A. Best Interest Obligations or, alternatively, deleting just the term “best interest.” The Committee did not agree with either suggested change. Mr. Birnbaum suggested that this section should be revised to make clear that the best interest of the consumer requires a producer to disregard his or her own interests completely. Mr. Birnbaum said the current language says a producer should not put his or her financial interests ahead of a consumer’s, which sets up an unenforceable situation where the producer is weighing his own financial interest against a consumer’s. Mr. Birnbaum also suggested that this language could be vulnerable to the creation of a ploy where a producer could sell several products, one of which is a very high commission but is never sold, just so that he can always point to that product as evidence of not putting his financial interests first.

Director Cameron said that he appreciates Mr. Birnbaum’s perspective but disagrees that the language in the Nov. 5 draft is unenforceable. He said it is not realistic to set a standard where someone is expected to disregard information once they have it. He said the Nov. 5 draft language takes the honest approach in a system where producers know how they are going to be compensated. He said that there are always competing factors and that a producer’s decision will always involve some measure of judgment. He said the concern about a scheme would be exposed in a market conduct review, and it is expensive to develop and market products that are never sold, so he doesn’t envision this scheme being very likely. Director Ramge said the language in the Nov. 5 draft is consistent with consumer’s expectations and the way producers operate. Commissioner Taylor said the standard in the Nov. 5 draft strikes the right balance. The producer has to put his or her needs behind the consumer’s, and there are also the obligations of care, disclosure, conflict of interest and documentation. Mr. Gendron said from an enforcement perspective, it is impossible to know what a producer is thinking, and he said he does not see any reason to change the language in the Nov. 5 draft. The Committee agreed not to make any changes to the language.

The IIABA suggested adding the following language to Section 6A(1)(d):

(d) The requirements under this subsection do not create a duty of loyalty or a fiduciary obligation or relationship and only create a regulatory obligation as established in this regulation.

Commissioner Taylor said that adding this language is not necessary and may create confusion. The Committee agreed not to make this change.

The Fixed Annuity Consumer Choice Campaign (FACCC) suggested the following revision to 6A(1)(c) and the creation of a new 6A(1)(k):

(c) The requirements under subparagraph (a) of this paragraph require a producer to consider the types of products the producer is authorized and licensed to recommend or sell that address the consumer’s financial situation, insurance needs and financial objectives. This does not require analysis or consideration of any products outside the authority and license of the producer or other possible alternative products or strategies available in the market at the time of the recommendation.

Producers shall be held to standards applicable to producers with similar authority and licensure.
(k) Nothing in this regulation should be construed to require a producer to obtain any license other than a producer license with the appropriate line of authority to sell, solicit or negotiate insurance in this state, including but not limited to any securities license, in order to fulfill the duties and obligations contained in this regulation; provided the producer does not give advice or provide services that are otherwise subject to securities laws or engage in any other activity requiring other professional licenses.

Director Range said the suggested language is reasonable and that it is important to acknowledge that this standard does not mean producers need to get a new license. Commissioner Ommen agreed that the proposed language is consistent with the intent of the revised Model #275. Commissioner Richardson agreed that the new language clarifies things. The Committee agreed to add the revision 6A(1)(c) and the new 6A(1)(k).

Mr. Birnbaum suggested revisions to Section 6A(2)(a) Disclosure Obligation. He suggested the following revisions:

(a) Prior to or at the time of the recommendation or sale of an annuity, the consumer providing to the producer the consumer’s consumer profile information, the producer shall prominently disclose to the consumer on a form substantially similar to the “Producer Relationship Disclosure Form” in Appendix A:

Mr. Birnbaum explained a consumer needs information to be able to decide whether to work with a particular producer, and at the time of the recommendation or sale is too late to be meaningful. Commissioner Taylor agreed with changing the timing to “prior to” and deleting “or at the time of” in order for the consumer to be able to get the information. The Committee agreed to the following language as suggested by Commissioner Taylor:

(a) Prior to or at the time of the recommendation or sale of an annuity, the producer shall prominently disclose to the consumer on a form substantially similar to the “Producer Relationship Disclosure Form” in Appendix A:

The IIABA suggested adding a new Section 6A(2)(a)(vi) and deleting the 6A(3) Conflict of interest obligation.

(vi) A description of any material ownership interests the producer has in the insurer that would issue the recommended annuity or any parent, subsidiary or affiliate of that insurer.

(3) Conflict of interest obligation. A producer shall identify and avoid or reasonably manage and disclose material conflicts of interest, including material conflicts of interest related to an ownership interest.

The Committee discussed whether “material conflicts of interest” need to be defined. The Committee concluded that materiality is a facts and circumstances question, and a list would be limiting in an enforcement context. The Committee agreed not to make either change suggested by the IIABA and to keep the language in Section 6A(3) unchanged.

The Committee discussed and agreed to make the following change suggested by the CEJ to Section 6A(5) Application of the best interest obligation.

(5) Application of the best interest obligation. Any requirement applicable to a producer under this subsection shall apply to every producer who has exercised material control or influence in the making of an individualized recommendation and has directly received compensation as a result of the recommendation or sale, regardless of whether the producer has had any direct contact with the consumer. Activities such as providing or delivering marketing or educational materials, product wholesaling or other back office product support, and general supervision of a producer do not, in and of themselves, constitute material control or influence.

The Committee discussed and agreed to make the following revision suggested by the CEJ to Section 6C(2)(g) Supervision system:

(g) The insurer shall establish and maintain reasonable procedures to identify and address potentially suspicious consumer refusals to provide consumer profile information.
The Committee discussed the CEJ suggestion to delete Section 6C(4)(b) from what an insurer is not required to include in its system of supervision:

(b) Include consideration of or comparison to options available to the producer or compensation relating to those options other than annuities or other products offered by the insurer.

Director Froment explained that this exception was included because producers cannot be expected to understand products that they are not authorized to sell. Mr. Ostlund and Mr. Gendron also agreed with keeping this exception. The Committee agreed not to make this change.

The Committee discussed and agreed to make the following revisions to Section 6C(2)(e) jointly suggested by the American Council of Life Insurers (ACLI), Committee of Annuity Insurers (CAI), Financial Services Institute (FSI), Indexed Annuity Leadership Council (IALC), Insured Retirement Institute (IRI), National Association for Fixed Annuities (NAFA), National Association of Insurance and Financial Advisors (NAIFA) and Association for Advanced Life Underwriting (AALU)

(e) The insurer shall establish and maintain reasonable procedures to detect recommendations that are not suitable in compliance with subsections A, B, D and E. This may include, but is not limited to, confirmation of the consumer’s suitability consumer profile information, systematic customer surveys, producer and consumer interviews, confirmation letters, producer statements or attestations and programs of internal monitoring. Nothing in this subparagraph prevents an insurer from complying with this subparagraph by applying sampling procedures, or by confirming the suitability consumer profile information or other required information under this section after issuance or delivery of the annuity;

The Committee discussed and agreed not to follow the suggestion by the IIABA to delete Section 6C(2)(h):

(h) The insurer shall establish and maintain reasonable procedures to identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific annuities within a limited period of time. The requirements of this subparagraph are not intended to prohibit the receipt of health insurance, office rent, office support, retirement benefits or other employee benefits by employees as long as those benefits are not based upon the volume of sales of a specific annuity within a limited period of time;

The Committee discussed and agreed to make the following revision to the title of Section 8 and to add a new 8C:

Section 8. Compliance Mitigation; Penalties; Enforcement

C. The authority to enforce compliance with the regulation is vested exclusively with the commissioner.

The Committee approved the Nov. 5 draft, as revised during this meeting, with the exception of the draft templates, which were referred back to the Annuity Suitability (A) Working Group for discussion during a conference call to be scheduled before the end of the year. The Committee planned to meet via conference call before the end of the year to consider adoption of the model with the revised template/appendices language and any other technical revisions.

4. Adopted the Reports of its Working Groups and Task Force

Director Cameron made a motion, seconded by Mr. Ostlund, to adopt the following reports: the Annuity Disclosure (A) Working Group, including its Sept. 19 minutes (Attachment Three) and an extension of the Request for NAIC Model Law Development; the Accelerated Underwriting (A) Working Group (Attachment Four), including its Oct. 2 minutes (Attachment Four-A); the Life Insurance Illustration Issues (A) Working Group, including its Oct. 21 (Attachment Five), Sept. 17 (Attachment Six), Sept. 3 (Attachment Seven) and July 30 (Attachment Eight) minutes and an extension of the Request for NAIC Model Law Development; the Life Actuarial (A) Task Force, including the creation of a new Guaranteed Issue Life Valuation (A) Subgroup; and the Retirement Security (A) Working Group, including its Nov. 13 (Attachment Nine) and Oct. 23 (Attachment Ten) minutes.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.
The Life Insurance and Annuities (A) Committee met via conference call Nov. 4, 2019. The following Committee members participated: Doug Ommen, Chair, Lindsay Bates, Russ Gibson and Mike Yanacheak (IA); Stephen C. Taylor, Vice Chair, represented by Philip Barlow (DC); Jim L. Ridling represented by Steve Ostlund (AL); Keith Schraad represented by Matt Holman (NE); Linda A. Lacey represented by James Regalbuto and Mark McLeod (NY); Jillian Froment and Peter Weber (OH); Hodgen Mainda represented by Brian Hoffmeister and Rachel Jade-Rice (TN); and Mark Afaile represented by Jerry DeArmond and Richard Wicka (WI). Also participating were: Perry Kupferman (CA); Jason Lapham (CO); Fleur McKendell (DE); David Altmaier represented by Chris Struk (FL); Teresa Winer (GA); Mike Chrysler (IL); Barbara Torkelson, Tate Flott and Julie Holmes (KS); Mary Mealer (MO); Regan Hess (MT); Denise Lamy (NH); Ron Kreiter (OK); Thomas Kilcoyne (PA); Sarah Neil (RI); Mike Boerner and Deanna Osmonson (TX); and Tanji Northrup and Tomasz Serbinowski (UT).

1. **Adopted its 2020 Proposed Charges**

   Commissioner Ommen explained that the Committee’s charges reflect the addition of two new working groups—the Accelerated Underwriting (A) Working Group and the Retirement Security (A) Working Group—adopted by the Committee at the Summer National Meeting. Birny Birnbaum (Center for Economic Justice—CEJ) submitted revisions to the Committee’s charges. He explained that these changes are necessary because the Working Groups are not coordinating with each other, and his proposed revisions will better reflect the current work being undertaken, as well as allow for much needed coordination on life and annuity disclosures being undertaken currently.

   Mr. Ostlund said Alabama is supportive of Mr Birnbaum’s suggestions and would like to discuss them at the upcoming Fall National Meeting.

   Mr. Ostlund made a motion, seconded by Mr. Wicka, to adopt the Committee’s 2020 proposed charges (see NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Two). The motion passed unanimously.

2. **Adopted the Life Actuarial (A) Task Force’s 2020 Proposed Charges**

   Mr. Boerner explained that most of the changes to the Task Force’s charges were updates necessitated by the completion of the variable annuity (VA) framework.

   Mr. Wicka made a motion, seconded by Commissioner Mainda, to adopt the Task Force’s 2020 proposed charges (see NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Two). The motion passed unanimously.

3. **Adopted AG 52**

   Mr. Boerner said *Actuarial Guideline LII—Variable Annuity Early Adoption* (AG 52) is informational only and explains the availability of early adoption of the VA framework at a company’s election. Brian Bayerle (American Council of Life Insurance—ACLI) said the ACLI is supportive of AG 52.

   Director Schraad made a motion, seconded by Mr. Wicka, to adopt AG 52 (see NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Four). The motion passed unanimously.

4. **Adopted the 2020 GRET**

   Mr. Boerner said the Generally Recognized Expense Table (GRET) is updated by the Society of Actuaries (SOA) every year, and it is adopted by the Committee and NAIC membership. He said the GRET is referenced in the *Life Insurance Illustrations Model Regulation* (#582) to be used as assumed experience in illustrations, and it is used by 25%–28% of companies.
Mr. Ostlund made a motion, seconded by Mr. Wicka, to adopt the 2020 GRET (see *NAIC Proceedings – Fall 2019, Executive (EX) Committee and Plenary, Attachment Three*). The motion passed unanimously.

5. **Adopted its Summer National Meeting Minutes**

Commissioner Donelon made a motion, seconded by Mr. Ostlund, to adopt the Committee’s Aug. 4 minutes (see *NAIC Proceedings – Summer 2019, Life Insurance and Annuities (A) Committee*). The motion passed unanimously.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.
The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met in Austin, TX, Dec. 7, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Steve Ostlund (AL); Fleur McKendell (DE); Dean L. Cameron (ID); Vicki Schmidt (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Victor Agbu (NY); Andrew Schallhorn (OK); Matt Gendron and Sarah Neil (RI); Rachel Jade-Rice (TN); and Mark Afable and Richard Wicka (WI). Also participating were: Stephen C. Taylor (DC); Karl Knable (IN); Tricia Goldsmith (OR); and Michael Humphreys (PA).

The Working Group met Nov. 5, Oct. 29, Oct. 15, Oct. 8, Sept. 17, Aug. 3, July 29 and July 23. During these meetings, the Working Group took the following action: 1) reviewed and discussed a draft of proposed revisions to the *Suitability in Annuity Transactions Model Regulation* (#275) developed by a technical drafting group. The technical drafting group’s draft reflected the framework developed by the Working Group during its discussions at the Summer National Meeting, its July 29 and July 23 conference calls, and its June 20 meeting in Columbus, OH to include a best interest standard of conduct in Model #275; 2) exposed a Working Group draft of proposed revisions to Model #275 for a public comment period ending Sept. 30; 3) discussed the comments received by the Sept. 30 public comment period deadline; and 4) adopted a motion to forward the revised draft of revisions to Model #275 to the Life Insurance and Annuities (A) Committee for its consideration. As part of that motion, it was noted that in sending the draft to the Committee, it does not mean that each Working Group member supports every provision in the draft, but that the Working Group has completed its work as directed by the Committee at the Spring National Meeting. The Committee chair exposed the revised draft for a public comment period ending Nov. 26.

Commissioner Schmidt acknowledged and applauded the hard work done by the Working Group chair and the Working Group to develop the Model #275 revisions.

Mr. Ostlund made a motion, seconded by Mr. Gendron, to adopt the Working Group’s Nov. 5 (Attachment Two-A), Oct. 29 (Attachment Two-B), Oct. 15 (Attachment Two-C), Oct. 8 (Attachment Two-D), Sept. 17 (Attachment Two-E), July 29 (Attachment Two-F), July 23 (Attachment Two-G) and Aug. 3 minutes (*see NAIC Proceedings – Summer 2019, Life Insurance and Annuities (A) Committee, Attachment Four*). The motion passed unanimously.

Having no further business, the Annuity Suitability (A) Working Group adjourned.

Annuity Suitability (A) Working Group
Conference Call
November 5, 2019

The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Nov. 5, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Jerry Workman and Steve Ostlund (AL); Jodi Lerner (CA); Fleur McKendell (DE); Weston Trexler (ID); Vicki Schmidt, Tate Flott and Shannon Lloyd (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Keith Nyhan (NH); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Rachel Jrade-Rice (TN); and Richard Wicka (WI).

1. Continued its Discussion of the Comments Received on Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goals for its June 20 meeting and its subsequent meetings, which is to develop a framework for revising the Suitability in Annuity Transactions Model Regulation (#275) to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard.

She said that based on the developed framework and as discussed at the Working Group’s meeting at the Summer National Meeting, the Working Group’s technical drafting group met in September and developed a draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-E1).

She said that during the Working Group’s Sept. 17 conference call, the Working Group developed a Working Group draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-D1) based on the technical drafting group’s draft and exposed it for a public comment period ending Sept. 30.

She said the purpose of this conference call is for the Working Group to continue its section-by-section discussion of the comments received by the public comment deadline. She explained that the Working Group would begin its discussion with Section C—Disclosure Obligation, deferring discussion of the additional suggested revisions in Section 5 because those definitions involved the safe harbor provision in Section 6E. The Working Group would discuss those definitions as part of its discussion of that provision.

Director Froment also explained that the Working Group received additional suggested revisions on specific issues in response to the Working Group’s request for additional comment. She said those suggested revisions would be discussed at the appropriate time and would include discussion of outstanding issues, such as the proposed drafting note in Section 1B concerning the successor draft issue.

Director Froment reminded the Working Group members and interested parties that only those suggested revisions having the support of a Working Group member and broad consensus from the Working Group would be considered for inclusion in the revised model.

a. Section 6C—Supervision System

Director Froment said the Joint Trades—in a joint comment submission from the American Council of Life Insurers (ACLI), the Committee of Annuity Insurers (CAI), the Financial Services Institute (FSI), the Indexed Annuity Leadership Council (IALC), the Insured Retirement Institute (IRI), the National Association for Fixed Annuities (NAFA), the National Association of Insurance and Financial Advisers (NAIFA) and the Association for Advanced Life Underwriting (AALU)—the Fixed Annuity Consumer Choice Campaign (FACC) and the Independent Insurance Agents & Brokers of America (IIABA) submitted comments on Section 6C—Supervision System.

Jason Berkowitz (IRI) said the Joint Trades suggest deleting Section 6C(1) because the substance of this paragraph is covered in other provisions in Section 6C.

Birny Birnbaum (Center for Economic Justice—CEJ) disagreed with the Joint Trades’ reasoning for deleting Section 6C(1). There was no Working Group support for deleting Section 6C(1).
Robbie Meyer (ACLI) said the Joint Trades suggest technical revisions to Section 6C(2)’s lead-in paragraph to make it clear that an insurer’s supervision system only applies to the insurer’s annuity products. She said that in addition, the Joint Trades suggest adding language to Section 6C(2)(e) to make it clear an insurer is not required to warrant the producer is acting in the consumer’s best interest. Specifically, the Joint Trades suggest revising Section 6C(2)(e) as follows: “The insurer shall establish and maintain reasonable procedures to detect recommendations that where there is not a reasonable basis to determine the recommendation would effectively address the particular consumer’s financial situation, insurance needs and financial objectives are not in compliance with subsections A, B, D and E. This may include, but is not limited to, confirmation of the consumer’s consumer profile information, systematic customer surveys, interviews, confirmation letters and programs of internal monitoring. Nothing in this subparagraph prevents an insurer from complying with this subparagraph by applying sampling procedures, or by confirming the consumer profile information after issuance or delivery of the annuity. An insurer is not required to warrant the producer is acting in the consumer’s best interest.”

Commissioner Ommen asked how this revised language would apply when no recommendation is made.

Ms. Meyer said the Joint Trades also suggest deleting Section 6C(2)(f) in its entirety because when a producer is engaged in activities relating to the sale of other insurers’ products, an insurer does not have the requisite knowledge or control over the producer to gauge compliance with the disclosure requirements of Section 6A(2). There was no support from the Working Group for the Joint Trades’ suggested revisions to Section 6C(2)’s lead-in paragraph or Section 6C(2)(e) or deleting Section 6C(2)(f).

Wes Bissett (IIABA) discussed the IIABA’s suggestion to delete Section 6C(2)(h). He said Section 6C(2)(h) is not needed given the provisions of Section 6A. He also questioned if states could implement Section 6C(2)(h) by regulation. There was no support for the IIABA’s suggestion to delete Section 6C(2)(h).

Ms. Meyer discussed the Joint Trades’ suggested revisions to Section 6C(2)(h). She said the purpose of the suggested revisions is to make the provisions of Section 6C(2)(h) applicable to sales contests and other types of non-cash compensation based on the sales of specific annuities of the insurer. She said the Joint Trades suggest deleting the reference to “specific types of annuities” because of concerns that the language may be overly broad as applied in the context of annuities. She said the Joint Trades also have clarified that Section 6C(2)(h) only applies to the insurer because the insurer does not have control over the business of third-party entities. She said the Joint Trades’ additional suggested revisions clarify, consistent with the U.S. Securities and Exchange Commission’s (SEC) best interest regulation (Reg BI), that the requirements of Section 6C(2)(h): 1) do not apply to compensation practices based on total annuity products sold; 2) would not prevent the offering of proprietary products, placing material limitations on the menu of products or incentivizing the sale of such products through its compensation practices, as long as the incentive is not based on the sale of a specific annuity product of the insurer within a limited period of time; and 3) are not intended to prohibit the receipt of employee benefits by employees.

The Working Group discussed the Joint Trades’ suggested revisions to Section 6C(2)(h). Some Working Group members expressed support for some of the suggested revisions. After discussion, the Working Group agreed on the following language for Section 6C(2)(h), which accepts some of the Joint Trades’ suggested revisions: “The insurer shall establish and maintain reasonable procedures to identify and eliminate any sales contests, sales quotas, bonuses and non-cash compensation that are based on the sales of specific annuities within a limited period of time. The requirements of this subparagraph are not intended to prohibit the receipt of health insurance, office rent, office support, retirement benefits or other employee benefits by employees as long as those benefits are not based upon the volume of sales of a specific annuity within a limited period of time.”

Kim O’Brien (FACC) discussed the FACC’s suggested revisions for Section 6C(4). She said the FACC suggests revising Section 6C(4) to clarify an insurer’s scope of supervision for its producers by adding the following language: “nor is it required to include consideration of or comparison to options available to the producer or compensation related to those options other than annuities offered by the insurer.”

The Working Group discussed the suggested language. After discussion, the Working Group agreed to add the suggested language with some modifications.

No comments were received on Section 6D—Prohibited Practices.
b. **Section 6E—Safe Harbor**

The Working Group next discussed Section 6E—Safe Harbor. Director Froment said the IRI, Nationwide and Jackson National Life Insurance Company (Jackson) submitted comments. She explained that the IRI had submitted revised comments on Section 6E expanding the provision’s safe harbor language to apply to all financial professionals, including broker-dealers, investment advisers and fiduciaries.

Mr. Berkowitz said the IRI supports its initial suggested revisions to Section 6E, but the IRI believes the Working Group should consider expanding the safe harbor provisions to apply to all financial professionals.

Drew Bowden (Jackson) expressed support for the IRI’s suggested revisions. He also said that if the Working Group accepts the revisions, it would address Jackson’s comments.

Mr. Birnbaum, Mr. Bissett and Ms. O’Brien expressed concern with the safe harbor provisions.

Ms. Campbell said she believes the Working Group should consider the IRI’s proposal. Commissioner Ommen agreed.

Mr. Gendron expressed caution with the proposal and whether it could require state insurance regulators to become experts on securities.

The Working Group discussed the proposal. After discussion, the Working Group decided to include the language in the revised draft and receive comments on it.

Director Froment said the Working Group does not need to discuss the additional suggested definitions in Section 5 related to the safe harbor provision because those additional suggested definitions are included in the IRI’s revised comments, which the Working Group agreed to include in the revised draft in order to receive comments on it.

c. **Section 7—Producer Training**

Director Froment said the Joint Trades submitted comments on Section 7B—Producer Training.

Mr. Berkowitz said the Joint Trades suggest adding a new paragraph to Section 7B to account for producers who have had required training before the effective date of the revised model.

Mr. Gendron asked if Mr. Berkowitz had had discussions with any continuing education (CE) providers on whether they could develop a course for producer training within the proposed six-month time frame provided in the Joint Trades’ proposed language.

Mr. Berkowitz said he spoke with one CE provider, which said it could meet the proposed six-month time frame.

Mr. Bissett said he believes CE providers would be challenged to develop a course and receive approval from state insurance departments within the proposed time frame. After discussion, the Working Group decided to add the language to the revised draft.

No comments were received on Section 9—Recordkeeping or Section 10—Effective Date.

d. **Appendix A—Producer Relationship Disclosure Form and Appendix B—Consumer Refusal to Disclose All or Partial Consumer Profile Information Form**

Director Froment said the Joint Trades had submitted comments on Appendix A—Producer Relationship Disclosure Form. The Working Group decided to defer discussion of the comments and have the Life Insurance and Annuities (A) Committee finalize the form language because the language in Section 6 related to the form has not been finalized. The Working Group agreed to take the same approach for Appendix B—Consumer Refusal to Disclose All or Partial Consumer Profile Information Form.
2. Discussed the Working Group Chair’s Requested Supplemental Comments

   a. Section 5C—Definition of “Consumer Profile Information”

Mr. Berkowitz said the Joint Trades submitted supplemental comments on Section 5C—Definition of “Consumer Profile Information” in response to the Working Group’s discussion of the Joint Trades’ initial comments during its Oct. 8 conference call. He said that during that call, the Joint Trades had expressed concern about the uncertainty inherent in the addition of “including debts and other obligations” in Section 5C(3). He said that to address this concern, in its supplemental comments, the Joint Trades suggest adding “to the extent relevant to the recommendation” to the lead-in paragraph, and deleting “including debts and other obligations” in Section 5C(3) and adding that language to Section 5C(7).

Some Working Group members questioned the value of adding the suggested language to the lead-in paragraph. After additional discussion, there was no Working Group support expressed for the Joint Trades’ suggested language.

   b. Section 6A—Best Interest Obligations

Mr. Berkowitz said the Joint Trades submitted supplemental comments related to its initial comments discussed during the Working Group’s Oct. 15 conference call on the Joint Trades’ suggested language for Section 6A—Best Interest Obligations to prevent a producer’s or insurer’s recommendation being evaluated in hindsight based on things that may happen that are out of the producer’s or insurer’s control.

Mr. Berkowitz said the Working Group expressed concern with the Joint Trades’ initial suggested language to address the situation. He said to address the Working Group’s concern, the Joint Trades suggest adding the following language as a new paragraph in Section 6A: “Compliance with the obligation to act in the best interest of the consumer in this Section 6A and the obligations regarding care, disclosure, conflicts of interest and documentation in paragraphs (1) through (4) above shall be determined on the basis of the conduct of the producer at the time of the recommendation, and not on the basis of the actual financial performance of the recommended annuity (whether positive or negative) so long as the relevant facts and factors, including the reasonable range of possible outcomes in the performance of non-guaranteed elements of the annuity, were appropriately considered in light of the consumer’s financial situation, insurance needs and financial objectives. Nothing contained herein will be deemed to impair or otherwise impact contractual guarantees included in a recommended annuity.”

There was no Working Group support for the Joint Trades’ suggested language.

   c. Section 6A(2)—Disclosure Obligation

Director Froment said that during the Working Group’s Oct. 29 conference call, the Working Group discussed suggested revisions to Section 6A(2)(a). This section describes what information a producer must disclose to a consumer about the producer’s relationship with the consumer on a form substantially similar to the Producer Relationship Disclosure Form in Appendix A. She said the Working Group asked Mr. Gendron to develop language for the Working Group’s review.

Mr. Gendron said his suggested revisions to Section 6A(2)(a) are derived in part from requirements for financial professionals selling securities.

Ms. Meyer expressed concern generally with including a list and with the list including non-insurance products. Ms. O’Brien agreed with Ms. Meyer.

After discussion, the Working Group agreed to add Mr. Gendron’s suggested language to Section 6A(2)(a) with some wordsmithing, nonsubstantive changes.

   d. Section 6A—Additional Paragraph

Director Froment said that during the Working Group’s Oct. 29 conference call, the Working Group discussed placeholder language based on New York language, which would apply the model’s provisions to any producer who “materially participated” in the transaction. She said the Working Group requested Mr. Gendron develop language on this issue for the Working Group’s review.
Mr. Gendron said the goal of his suggested language is to notify producers not directly involved in a recommendation of their potential liability if a producer has exercised material control or influence in the making of an individualized recommendation and has directly received compensation as a result regardless of whether the producer has had any direct contact with the consumer.

The Working Group discussed Mr. Gendron’s suggested language.

Mr. Birnbaum expressed opposition to the language. He said New York’s language is a lot clearer and more straightforward.

Gary Sanders (NAIFA) said Mr. Gendron’s suggested language is better than New York’s language, but he said he still is unclear on how the language provides additional protections to consumers. He said it could have a chilling effect.

There was no opposition from Working Group members to adding the language. However, some Working Group members suggested the language is unnecessary given other provisions in the revised model.

3. Agreed to Refer the Revised Model to the Life Insurance and Annuities (A) Committee and Exposed it for Public Comment

Director Froment said that during the Working Group’s Oct. 8 conference call, the Working Group discussed comments from the IIABA concerning the drafting note for Section 1—Purpose. The proposed drafting note states that for purposes of Section 989J of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act), the revised Model #275 is a successor to the 2010 revisions, which added a suitability standard of conduct.

Director Froment said the Working Group deferred discussion on the drafting note and asked the NAIC Legal Division to research whether the revised model would be considered a successor model to the 2010 revisions for purposes of Section 989J. She said the Legal Division most likely would consider the revised model to be a successor to the 2010 revisions. She said given this, she believes this is a policy issue for the Life Insurance and Annuities (A) Committee, the Executive (EX) Committee and Plenary to decide.

Mr. Gendron made a motion, seconded by Commissioner Ommen, to refer the draft to the Life Insurance and Annuities (A) Committee for its consideration. As part of the motion, it was noted that in sending the draft to the Life Insurance and Annuities (A) Committee, it does not mean that each Working Group member supports every provision in the draft, but that the Working Group has completed its work as directed by the Life Insurance and Annuities (A) Committee at the Spring National Meeting. The motion passed.

Commissioner Ommen said that as chair of the Life Insurance and Annuities (A) Committee, he is exposing the draft for a 21-day public comment period ending Nov. 26. He said the Life Insurance and Annuities (A) Committee will consider any comments received during its meeting at the Fall National Meeting.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
Annuity Suitability (A) Working Group
Conference Call
October 29, 2019

The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Oct. 29, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Steve Ostlund (AL); Jodi Lerner (CA); Fleur McKendell (DE); Tate Flott (KS); Nour Benchaboun (MD); Renee Campbell (MI); Matt Holman (NE); Keith Nyhan (NH); James Regalbuto (NY); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Rachel Trade-Rice (TN); and Richard Wicka (WI).

1. Continued its Discussion of the Comments Received on Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goal from its June 20 meeting and its subsequent meetings, which was to develop a framework for revising the *Suitability in Annuity Transactions Model Regulation (#275)* to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard.

She said that based on the developed framework and as discussed at the Working Group’s meeting at the Summer National Meeting, the Working Group’s technical drafting group met in September and developed a draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-E1).

She said that during the Working Group’s Sept. 17 conference call, the Working Group developed a Working Group draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-D1) based on the technical drafting group’s draft and exposed it for a public comment period ending Sept. 30.

Director Froment said the purpose of this conference call is for the Working Group to continue its section-by-section discussion of the comments received by the public comment deadline. She explained that the Working Group would begin its discussion with Section 6A(2)—Disclosure Obligation, deferring discussion of the additional suggested revisions in Section 5 because those definitions involved the safe harbor provision in Section 6E. She said the Working Group would discuss those definitions as part of its discussion of that provision.

a. Section 6A(2)—Disclosure Obligation

Director Froment said the Joint Trades—in a joint comment submission from the American Council of Life Insurers (ACLI), the Committee of Annuity Insurers (CAI), the Financial Services Institute (FSI), the Indexed Annuity Leadership Council (IALC), the Insured Retirement Institute (IRI), the National Association for Fixed Annuities (NAFA), the National Association of Insurance and Financial Advisers (NAIFA) and the Association for Advanced Life Underwriting (AALU)—and the Independent Insurance Agents & Brokers of America (IIABA) submitted comments on Section 6A(2)—Disclosure Obligation.

Before discussing the Joint Trades’ suggested revisions, Robbie Meyer (ACLI) pointed out that Section 6A(2)(a) references the defined term “non-cash compensation.” She reiterated the Joint Trades’ concern raised during the Working Group’s Oct. 8 conference call about the definition of “material conflict of interest” in Section 5I and the definition of “non-cash compensation” in Section 5J and its suggested revisions to exclude certain benefits from being considered non-cash compensation for purposes Section 6C(2)(h), which could prohibit producers from receiving these benefits if considered non-cash compensation.

The Working Group discussed the suggested revisions, with some Working Group members noting the importance of Section 6C(2)(h) to discourage any of the types of benefits listed in the definition of “non-cash compensation” being tied to the sale of a particular annuity within a specified period of time. The Working Group decided to defer discussion of the issue until it discusses Section 6C(2)(h).

Jason Berkowitz (IRI) discussed the Joint Trades’ suggested revisions to Section 6A(2)(a) and Section 6A(2)(b), explaining that except for the suggestion to add a new item (v) to Section 6A(2)(a), the suggested revisions were technical and clarifying.
Ms. Meyer said the Joint Trades suggest adding the new item (v) to Section 6A(2)(a) to require a producer or insurer to disclose any material of conflicts of interest to better align with the requirements under the U.S. Securities and Exchange Commission’s (SEC) best interest final regulation (Reg BI). She said the Joint Trades suggest a conforming change to Appendix A, Producer Disclosure Form.

Wes Bissett (IIABA) asked if the suggested revision to add a new (v) to Section 6A(2)(a) to require a producer to disclose material conflicts of interest would affect Section 6A(3)—Conflict of Interest Obligation.

Jim Szostek (ACLI) explained that this provision concerns disclosure and that the ACLI believes this suggested revision would not affect Section 6A(3)’s provisions.

The Working Group discussed the Joint Traders’ suggested revisions. There was no support for the Joint Traders’ suggested revisions to Section 6A(2)(a)(iii) to restructure the language. The Working Group deferred making a decision on whether to add the new item (v) until it discusses Section 6A(3)—Conflict of Interest Obligation.

Mr. Berkowitz explained that the Joint Traders’ suggested revisions to Section 6A(2)(b) are intended to be technical and clarifying, such as specifying that the consumer would make the request to the producer to disclose additional information about the producer’s cash compensation, not a member of the general public. He said the other revisions are meant to address salaried employees who are not directly compensated for the sale of a particular annuity. The revisions would require such employees only to provide a description of general compensation practices relevant to the producer.

Birny Birnbaum (Center for Economic Justice—CEJ) expressed concern with the revisions. He suggested that if the Working Group accepted the suggested revision concerning the consumer requesting the information that the language also include the consumer’s authorized representative.

The Working Group discussed the suggested revisions. After discussion, the Working Group decided to accept the Joint Traders’ suggested revisions concerning the consumer making the request, but there was no support to accept the Joint Traders’ suggested revisions concerning salaried employees.

Mr. Bissett discussed the IIABA’s suggestion to restructure item (ii) in Section 6A(2)(a) for clarity and remove the word “limitations.”

The Working Group discussed the suggested revisions. Some Working Group members expressed concern that the IIABA’s restructured language was too vague with respect to what the producer would need to disclose concerning the products the producer is authorized and licensed to recommend or sell.

Mr. Birnbaum expressed concern that the IIABA’s restructured language is too limiting because it references only annuity and securities products.

Some Working Group members expressed support for the IIABA’s efforts to provide more clarity, but they could not support the IIABA’s suggested revisions. After additional discussion, the Working Group asked Mr. Gendron to develop language to address the issue for the Working Group to discuss during its Nov. 5 conference call. The Working Group deferred discussion of the IIABA’s suggestion to add a new provision to Section 6A(2)(a) to require a producer to disclose a description of any material ownership interest the producer has in the insurer that would issue the recommended annuity until it discusses Section 6C(2)(h) and the definition of “material conflict of interest.”

b. Section 6A(3)—Conflict of Interest Obligation

Director Froment said the Joint Traders, the Fixed Annuity Consumer Choice Campaign (FACC) and the IIABA submitted comments on Section 6A(3)—Conflict of Interest Obligation.

Mr. Berkowitz said the Joint Traders’ suggested revisions are intended to be clarifying.

The Working Group discussed the suggested revisions. After discussion, no Working Group member expressed support for accepting the suggested revisions.
Kim O’Brien (FACC) said the FACC suggests striking “avoid or otherwise reasonably manage” and replacing it with a disclosure requirement because to “reasonably manage” is to disclose.

Mr. Bissett explained the IIABA’s suggestion to delete Section 6A(3). He said the language “material conflict” is ambiguous and asked what a producer is supposed to do if a “material conflict” exists. He said the FACC’s suggested revision addresses this issue. He expressed support for a disclosure-based approach.

Mr. Szostek expressed support for the FACC’s suggested revision.

The Working Group discussed Section 6A(3)’s language, the definition of “material conflict of interest” in Section 5I and whether material conflicts of interest should be “managed and disclosed” or “managed or disclosed.”

Commissioner Ommen suggested revising Section 6A(3) to require a producer to “identify and avoid or reasonably manage and disclose material conflicts of interest.” After discussion, the Working Group agreed to accept Commissioner Ommen’s suggested revision.

c. Section 6A(4)—Documentation Obligation

Director Froment said the Joint Trades and the FACC submitted comments on Section 6A(4)—Documentation Obligation.

Mr. Berkowitz said the Joint Trades’ suggested revisions are intended to be clarifying.

The Working Group discussed the suggested revisions. After discussion, no Working Group member expressed support for accepting the suggested revisions.

Ms. O’Brien said the FACC suggests adding language to Section 6A(4)(a) requiring a producer to make a written “reasonable summary” record of any recommendation and the basis for the recommendation. She said the FACC’s suggested revision is based on a provision in New York’s best interest regulation.

After discussion, no Working Group member expressed support for accepting the suggested revision.

The Working Group next discussed the comments received on a proposed provision in the revised model suggested by New York. The Working Group had requested specific comments on whether such a provision should be included in the revised model.

Mr. Berkowitz said the Joint Trades suggest not including this provision, which would apply the model’s provisions to any producer who “materially participated” in the transaction. He said such language is too vague and as such would create too much uncertainty in the marketplace as to when a producer is considered to have “materially participated” in a transaction and, therefore, subject to the model’s provisions. He said the model includes supervision requirements that would address any issues this proposed provision is intended to address, such as ensuring that more senior producers were not shielding themselves from responsibility by using junior producers to technically make a recommendation. He said the Joint Trades believe this provision is not needed and urged the Working Group not to include it in the revised model.

The Working Group discussed the Joint Trades’ comments and the proposed revisions.

Mr. Gendron said he views the proposed language as fair warning to producers as to how state insurance regulators will interpret the model’s provisions and its application.

Mr. Regalbuto said New York has a host of examples it could provide where this has been an issue, which is why its best interest regulation includes such a provision.

Mr. Berkowitz acknowledged Mr. Gendron’s comments. He said he believes these issues are already addressed in the model. He said his concern is that the language could be interpreted and applied to any person who had any involvement in the transaction.
Director Froment reminded the Working Group that this provision is not in the revised model. As such, a Working Group member would have to express support for adding it.

The Working Group discussed what “materially participated” means. After additional discussion, the Working Group requested that Mr. Gendron work on language for the Working Group to discuss during its Nov. 5 conference call.

d. Section 6B—Transactions Not Based on a Recommendation

Director Froment said the Joint Trades submitted comments on Section 6B—Transactions Not Based on a Recommendation.

Mr. Berkowitz said the revised draft defines “producer” to include an insurer where no producer is involved in Section 5K. He said the revised definition works throughout the model except for Section 6B. He said in Section 6B, the insurer is the supervising entity. He said the Joint Trades’ suggested revision addresses this issue.

Mr. Birnbaum said the Joint Trades are conflating two issues. He said Section 6B is intended to limit a producer’s obligation, not the insurer’s obligation as a supervising entity.

There was no Working Group support for accepting the Joint Trades’ suggested revision.

e. Section 8—Compliance Mitigation; Penalties

Director Froment said the Joint Trades submitted comments on Section 8—Compliance Mitigation; Penalties.

Mr. Berkowitz said the Joint Trades suggest revising Section 8 for consistency with the model’s insurer supervision responsibilities, which require an insurer to supervise transactions related to the insurer’s own annuity products.

There was no Working Group support for accepting the Joint Trades’ suggested revision.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
Annuity Suitability (A) Working Group
Conference Call
October 15, 2019

The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Oct. 15, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Steve Ostlund (AL); Jodi Lerner (CA); Fleur McKendell (DE); Karl Fromm (ID); Tate Flott and Shannon Lloyd (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Keith Nyhan (NH); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Rachel Jrade-Rice (TN); and Richard Wicka (WI).

1. Continued its Discussion of the Comments Received on Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goal for its June 20 meeting and its subsequent meetings, which was to develop a framework for revising the Suitability in Annuity Transactions Model Regulation (#275) to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard.

She said that based on the developed framework and as discussed during the Working Group’s meeting at the Summer National Meeting, the Working Group’s technical drafting group met in September and developed a draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-E1).

She said that during the Working Group’s Sept. 17 conference call, the Working Group developed a Working Group draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-D1) based on the technical drafting group’s draft and exposed it for a public comment period ending Sept. 30.

She said the purpose of this conference call is for the Working Group to continue its section-by-section discussion of the comments received by the public comment deadline. She explained that the Working Group would begin its discussion with Section 6—Duties of Insurers and Producers, deferring discussion of the additional suggested revisions in Section 5 because those definitions involved the safe harbor provision in Section 6. The Working Group would discuss those definitions as part of its discussion of that provision.

a. Section 6A—Best Interest Obligations

Director Froment said the Joint Trades—in a joint comment submission from the American Council of Life Insurers (ACLI), the Committee of Annuity Insurers (CAI), the Financial Services Institute (FSI), the Indexed Annuity Leadership Council (IALC), the Insured Retirement Institute (IRI), the National Association for Fixed Annuities (NAFA), the National Association of Insurance and Financial Advisers (NAIFA), and the Association for Advanced Life Underwriting (AALU)—the Fixed Annuity Consumer Choice Campaign (FACC) and the Independent Insurance Agents & Brokers of America (IIABA) submitted comments on the lead-in paragraph for Section 6A—Best Interest Obligations.

Robbie Meyer (ACLI) said the Joint Trades suggest adding the following language at the end of Section 6A’s lead-in paragraph: “independent of the performance of the recommended annuity.” She said the Joint Trades suggest this language to avoid a producer’s or insurer’s recommendation being evaluated in hindsight based on things that may happen that are out of the producer’s or insurer’s control.

The Working Group discussed the suggested language and after discussion decided that if this issue needs to be addresses, the Section 6A lead-in paragraph is not the appropriate place to address it. Director Froment suggested the Joint Trades submit revised language for the Working Group to consider at the appropriate time during its later discussions.

Kim O’Brien (FACC) said the FACC suggests deleting the references to the best interest standard of conduct because the FACC thinks the best interest standards is undefined, ambiguous and subjective and, as such, will lead to litigation. She said the FACC has suggested language for Section 6A(1)—Care Obligation it believes is a better approach.

Mr. Bissett noted that the IIABA has concerns with the best interest standard of conduct similar to the FACC’s concerns.
The Working Group discussed the FACC’s suggested revision. During the discussion, Working Group members reiterated their support for the best interest standard of conduct reflected in the revisions and noted provisions in the proposed revisions that address the FACC’s and the IIABA’s concerns, particularly the second sentence in Section 6A’s lead-in paragraph. The Working Group also discussed revising Section 6A to clarify what a producer or an insurer needs to do to satisfy the best interest standard of conduct.

Director Froment suggested revising the second sentence in Section 6A as follows: “A producer has acted in the best interest of the consumer if they have satisfied the following obligations regarding care, disclosure, conflict of interest and documentation.” After discussion, the Working Group agreed to include the suggested language in the revised draft.

b. Section 6A(1)—Care Obligation

Director Froment said the Joint Trades, the FACC and the IIABA submitted comments on Section 6A(1). Ms. Meyer said the Joint Trades suggest several revisions to Section 6A(1) to clarify its language. She said the Joint Trades suggest deleting “over the life of the contract” in Section 6A(1)(a)(iii) to address a concern that the language could be interpreted as requiring an ongoing duty to the consumer.

The Joint Trades also suggest adding “provided to the producer” to Section 6A(1)(a)(iii) to make it clear that producers can only evaluate the information they actually receive from a consumer. She said the Joint Trades suggest deleting the word “substantially” for consistency with other provisions in the revised model and changing “60” months to “36” months to bring the time frame closer in line to the current replacement requirements in most states.

The Working Group discussed the Joint Trades’ suggested revisions. Some Working Group members expressed concern with adding “provided by the consumer” because producers have an obligation to be aware of a consumer’s actual circumstances, not just what is included in the consumer profile information form, particularly in situations that could involve a vulnerable adult. With respect to the “over the life the contract” suggested revision, some Working Group members noted that the language was meant to address those consumers with long-term concerns and seeking to purchase an annuity for retirement purposes.

Ms. Meyer said she believes the language requiring a producer or insurer to recommend a product that “effectively addresses the consumer’s financial situation, insurance needs and financial objectives” applies to both a consumer’s short-term and long-term concerns.

Ms. O’Brien said the FACC has the same concerns with the language “over the life of the product.”

Birny Birnbaum (Center for Economic Justice—CEJ) expressed concerns with the Joint Trades’ comments.

Gary Sanders (NAIFA) suggested the Working Group consider adding the language “available to the producer” to Section 6A(1)(a)(iii) if the Working Group is uncomfortable with the Joint Trades’ suggested language.

Jason Berkowitz (IRI) expressed support for Mr. Sanders’ suggested language.

There was no Working Group support for the Joint Trades’ suggested revisions or Mr. Sanders’ suggested alternative language.

Ms. O’Brien discussed the FACC’s suggested revision to add a new provision to Section 6A(1) to require that a producer’s recommendation can be compared only to other producers as opposed to being compared to investment advisers or possibly higher-level fiduciaries, such as trust officers or plan sponsors under the federal Employee Retirement Income Security Act of 1974 (ERISA) for compliance and enforcement purposes. She said that if this language is not included in the revised model, it makes the proposed best interest standard of conduct even more subjective and approaches a kind of strict liability depending on how state insurance regulators or the courts decide to enforce a best interest standard of conduct with ill-defined requirements. She also suggested revising Section 6A(1)(a)(iv) to require a producer to communicate “a reasonable summary of” the basis or bases of the recommendation.

The Working Group discussed the FACC’s comments. There was no support for making the suggested revisions.
Mr. Bissett discussed the IIIABA’s suggested revisions to Section 6A(1)(c) and (d). He said the IIABA suggests adding the word “annuity” to Section 6A(1)(c) to limit its scope to annuity products. The IIABA suggests adding the language “or relationship and only” to Section 6A(1)(d) for clarity.

The Working Group discussed the IIABA’s suggested revision to Section 6A(1)(c). Some Working Group members expressed concern with adding the limiting language, particularly as to how it could affect replacement products. There was no support for making the suggested revision.

The Working Group discussed the IIABA’s suggested revision to Section 6A(1)(d). After discussion, the Working Group agreed to accept the suggested revision. The Working Group also discussed whether Section 6A(1)(d) is the appropriate place to add language to address an issue raised in the Joint Trades’ comments, which it previously discussed, concerning the possibility of consumers tying a recommendation to a particular outcome or performance. After discussion, the Working Group again deferred making a decision until the Joint Trades presented revised language.

Director Froment said the Working Group would begin its next conference call on Oct. 29 with discussing the comments received on Section 6A(2)—Disclosure Obligation.

Having no further business, the Annuity Suitability (A) Working Group adjourned.

W:\National Meetings\2019\Fall\Cmte\A\ASWG\ASWG 10-15 ConfCallmin.docx
The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Oct. 8, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Jodi Lerner (CA); Susan Jennette (DE); Dean L. Cameron (ID); Tate Flott (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Rachel Jrade-Rice (TN); and Richard Wicka (WI).

1. Discussed Comments Received on Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goals for its June 20 meeting and its subsequent meetings, which was to develop a framework for revising the Suitability in Annuity Transactions Model Regulation (#275) to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard.

She said that based on the developed framework and as discussed at the Working Group’s meeting at the Summer National Meeting, the Working Group’s technical drafting group met in September and developed a draft of proposed revisions to Model #275 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Two-E1).

She said that during the Working Group’s Sept. 17 conference call, the Working Group developed a Working Group draft of proposed revisions to Model #275 (Attachment Two-D1) based on the technical drafting group’s draft and exposed it for a public comment period ending Sept. 30.

She said the purpose of this conference call is to begin a section-by-section discussion of the comments received by the public comment deadline.

a. Title

Director Froment said the Independent Insurance Agents & Brokers of America (IIABA) submitted comments on the title of Model #275, suggesting revising it from “Suitability in Annuity Transactions Model Regulation” to “Suitability in Annuity Transactions Model Law.”

Wes Bissett (IIABA) said the IIABA believes Model #275 should be a model law because the proposed revisions will require statutory authority for a state to adopt.

Mr. Holman said it is a state-by-state decision whether to adopt the proposed revisions by regulation or by statute.

After discussion, the Working Group decided not to accept the IIABA’s suggested revision.

b. Section 1—Purpose

Director Froment said the Joint Trades—in a joint comment submission from the American Council of Life Insurers (ACLI), the Committee of Annuity Insurers (CAI), the Financial Services Institute (FSI), the Indexed Annuity Leadership Council (IALC), the Insured Retirement Institute (IRI), the National Association for Fixed Annuities (NAFA), the National Association of Insurance and Financial Advisers (NAIFA) and the Association for Advanced Life Underwriting (AALU)—the Fixed Annuity Consumer Choice Campaign (FACC) and the IIABA submitted comments on Section 1A—Purpose.

Pat Reeder (ACLI) said the Joint Trades suggest revising Section 1A to clarify that the required standard of conduct does not guarantee an outcome. He said similar language is included in New York’s Regulation 187, which establishes a best interest standard of conduct.

After discussion of the suggested revisions, the Working Group decided not to accept it because of concerns about its appropriateness for this section.
Kim O’Brien (FACC) said the FACC suggests revising Section 1A to delete the reference to “best interest” because of its concerns with using an undefined and ambiguous term.

Mr. Bissett asked the Working Group to defer the IIABA’s suggested revisions to Section 1A until the Working Group discusses Section 6—Duties of Insurers and Producers.

Director Cameron said any discussions related to whether to include a best interest standard of conduct in the Model #275 revisions should be deferred until the Working Group discusses Section 6—Duties of Insurers and Producers.

Director Froment noted that all of the draft provisions are open until the Working Group completes its work and forwards the draft revisions to the Life Insurance and Annuities (A) Committee for its consideration. She reminded the Working Group that as it moves through the discussion of the comments, the Working Group’s goal is to see if it can reach general support and consensus to make any requested changes to the draft based on the comments received.

The Working Group discussed the IIABA’s suggestion to delete the proposed drafting note for Section 1B. The proposed drafting note states that for purposes of Section 989J of the federal Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act), the revised Model #275 is a successor to the 2010 revisions, which added a suitability standard of conduct.

Mr. Bissett explained that the purpose of Section 989J was to permit states to continue to regulate equity-indexed annuities if they adopted the NAIC’s 2010 amendments to Model #275. He said the current draft of proposed revisions to Model #275 will replace the suitability standard of conduct with a best interest standard of conduct. He said that for those states that do not want to adopt such a standard, there would be a question about their ability to continue to regulate equity-indexed annuities.

The Working Group discussed the IIABA’s suggested revision. After additional discussion, the Working Group decided to defer making any decision on the suggested revision and asked NAIC staff to contact the NAIC Legal Division to research this issue.

c. Section 2—Scope and Section 3—Authority

Director Froment said the IIABA submitted comments on Section 2—Scope and Section 3—Authority consistent with its suggested revision to the title and Section 1 to change Model #275 to a model law. She said that based on the Working Group’s discussion of those suggested revisions, the Working Group will not accept the IIABA’s suggested revisions for those sections. The Working Group agreed. No other comments were received on Section 2 or Section 3.

d. Section 4—Exemptions

Director Froment said the Joint Trades submitted comments on Section 4A—Exemptions.

Gary Sanders (NAIFA) said the Joint Trades suggest deleting language providing a specific exemption for certain direct response solicitations. He said that based on the on the proposed revisions to Model #275, the Joint Trades believe the revised model is intended to apply only to solicitations where there is a recommendation.

Commissioner Ommen said Section 4A is an existing model provision. He said the proposed revision broadens the existing exemption.

After discussion, the Working Group decided not to accept the suggested revision. The Working Group next discussed the FACC’s suggested revisions to Section 4B.

Ms. O’Brien said the FACC suggests adding the following language to the lead-in to Section 4B: “Contracts that are not individually solicited and are used to fund.” She said this proposed revision is intended to address a situation in the marketplace where consumers are being individually solicited to purchase an annuity for a plan described in Section 4B.

Jason Berkowitz (IRI) said the Section 4 exemption language has been in Model #275 since its inception. He said federal law preempts the states from regulating the types of plans described in Section 4B. He also said another reason for the exemption is that federal law imposes a fiduciary duty on plan sponsors with respect to these types of plans.
Ms. O’Brien said the FACC’s proposed revision was included in a previous draft of proposed revisions to Model #275.

Mr. Berkowitz said the California Department of Insurance offered that suggested revision to address specific concerns in their marketplace. He suggested that California’s concerns could be addressed in another way.

After discussion, the Working Group decided not to accept the FACC’s suggested revision.

e. Section 5—Definitions

The Working Group discussed Section 5—Definitions. No comments were received on the definition of “annuity” in Section 5A or the definition of “cash compensation” in Section 5B.

Pam Heinrich (NAFA) said the Joint Trades suggest deleting Section 5C(3) and Section 5C(5) in the definition of “consumer profile information” because these provisions are duplicative of other language used in the definition. She said the Joint Trades also suggest deleting the language “including variability in premium, death benefit or fees” in paragraph (11) and substituting the proposed newly defined term “non-guaranteed elements.” She said the proposed definition of “non-guaranteed elements” encompasses the language the Joint Trades suggests deleting. She said the definition for “non-guaranteed elements” is taken from the Annuity Disclosure Model Regulation (#245).

Commissioner Ommen asked if Section 5C(3) and Section 5C(5) are deleted, then what would require a producer or an insurer to specifically review the consumer’s financial situation and needs or financial objectives.

Ms. Heinrich said the requirement to review these specific elements is part of the producer’s or insurer’s general requirement under the proposed revisions to make recommendations that effectively address the consumer’s financial situation, insurance needs and financial objectives.

The Working Group discussed the suggested revisions. Director Cameron expressed support for retaining Section 5C(3) and Section 5C(5) because it is critical that the producer have this information as part of the consumer’s profile information when making a recommendation. After additional discussion, the Working Group decided to retain Section 5C(3) and Section 5C(5).

Mr. Berkowitz requested the Working Group consider language that would clarify what is meant by the language “debts and obligations” in Section 5C(3). The Working Group agreed and asked Mr. Berkowitz to submit language for its review during its next conference call.

Birny Birnbaum (Center for Economic Justice—CEJ) asked the Working Group to consider adding “insurance needs” to the list of information required to be considered as part of the consumer’s consumer profile information.

Superintendent Dwyer said she assumed “insurance needs” was incorporated in the list of information already in the definition of “consumer profile information,” but said she has no objection to specifically adding it to the list.

After discussion, the Working Group agreed to add “insurance needs.”

The Working Group discussed whether to delete the language “including variability in premium, death benefit or fees” in Section 5C(11) and substitute the proposed new definition for the term “non-guaranteed elements.”

Mr. Birnbaum suggested that the definition could be added without deleting the suggested language.

After discussion, the Working Group agreed to accept the suggested revisions and to add the language “including, but not limited to,” as Commissioner Ommen suggested.

No comments were received on the following definitions: 1) “continuing education credit” in Section 5D; 2) “continuing education provider” in Section 5E; 3) “FINRA” in Section 5F; 4) “insurer” in Section 5G; or 5) “intermediary” in Section 5H.

The Working Group discussed the Joint Trades’ suggested revisions to the definitions of “material conflict of interest” in Section 5I and “non-cash compensation” in Section 5J.
Robbie Meyer (ACLI) said the Joint Trades are suggesting these revisions for clarity and to expressly exclude benefits from being considered “non-cash compensation.” She said the concern is that if these benefits are not expressly excluded, they would be considered non-cash compensation and producers would be prohibited from receiving these benefits in accordance with Section 6C(2)(h).

The Working Group discussed the suggested revisions and decided to defer making a decision on the suggested revisions until it discusses Section 6—Duties of Insurers and Producers.

No comments were received on the definition of “producer” in Section 5K.

The Working Group discussed the Joint Trades’ suggested revision to the definition of “recommendation” in Section 5L. Mr. Berkowitz said the Joint Trades’ suggested revision is intended to make clear that a recommendation is advice given to the consumer regardless of whether the transaction is completed.

The Working Group discussed the suggested revision and decided not to accept it because of concerns that the suggested revision narrowed the language.

The Working Group discussed the Joint Trades’ suggested revision to the definition of “replacement” in Section 5M. Mr. Berkowitz said the Joint Trades suggests these revisions for consistency with the definition of “annuity” in Section 5A.

After discussion, the Working Group agreed to accept the suggested revisions.

No comments were received on the definition of “SEC” in Section 5N.

Director Froment said the Working Group would defer discussion of the remaining additional suggested definitions because those definitions involved the safe harbor provision in Section 6. She said the Working Group would discuss them as part of its discussion of that provision.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
SUITABILITY IN ANNUITY TRANSACTIONS
MODEL REGULATION

Table of Contents

Section 1. Purpose
Section 2. Scope
Section 3. Authority
Section 4. Exemptions
Section 5. Definitions
Section 6. Duties of Insurers and Insurance Producers
Section 7. Insurance-Producer Training
Section 8. Compliance Mitigation; Penalties
Section 9. [Optional] Recordkeeping
Section 10. Effective Date
Appendix A. Producer Relationship Disclosure Form
Appendix B. Consumer Refusal to Disclose All or Partial Consumer Profile Information

Section 1. Purpose

A. The purpose of this regulation is to require producers to act in the best interest of the consumer when making a recommendation of an annuity and to require insurers to establish and maintain a system to supervise recommendations and to set forth standards and procedures for recommendations to consumers that result in transactions involving annuity products so that the insurance needs and financial objectives of consumers at the time of the transaction are appropriately effectively addressed.

B. Nothing herein shall be construed to create or imply a private cause of action for a violation of this regulation.

Drafting Note: The language of subsection B comes from the NAIC Unfair Trade Practices Act. If a State has adopted different language, it should be substituted for subsection B.

Drafting Note: Section 989J of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act") specifically refers to this model regulation as the "Suitability in Annuity Transactions Model Regulation." Section 989J of the Dodd-Frank Act confirmed this exemption of certain annuities from the Securities Act of 1933 and confirmed state regulatory authority. This regulation is a successor regulation that exceeds the requirements of the 2010 model regulation.

Section 2. Scope

This regulation shall apply to any sale or recommendation to purchase, exchange or replace of an annuity made to a consumer by an insurance producer, or an insurer where no producer is involved, that results in the purchase, exchange or replacement recommended.

Section 3. Authority

This regulation is issued under the authority of [insert reference to enabling legislation].

Drafting Note: States may wish to use the Unfair Trade Practices Act as enabling legislation or may pass a law with specific authority to adopt this regulation.

Section 4. Exemptions

Drafting Note: States may wish to use the Unfair Trade Practices Act as enabling legislation or may pass a law with specific authority to adopt this regulation.
Unless otherwise specifically included, this regulation shall not apply to transactions involving:

A. Direct response solicitations where there is no recommendation based on information collected from the consumer pursuant to this regulation;

B. Contracts used to fund:
   (1) An employee pension or welfare benefit plan that is covered by the Employee Retirement and Income Security Act (ERISA);
   (2) A plan described by sections 401(a), 401(k), 403(b), 408(k) or 408(p) of the Internal Revenue Code (IRC), as amended, if established or maintained by an employer;
   (3) A government or church plan defined in section 414 of the IRC, a government or church welfare benefit plan, or a deferred compensation plan of a state or local government or tax-exempt organization under section 457 of the IRC; or
   (4) A nonqualified deferred compensation arrangement established or maintained by an employer or plan sponsor;

C. Settlements of or assumptions of liabilities associated with personal injury litigation or any dispute or claim resolution process; or

D. Formal prepaid funeral contracts.

Section 5. Definitions

A. “Annuity” means an annuity that is an insurance product under State law that is individually solicited, whether the product is classified as an individual or group annuity.

B. “Cash compensation” means any discount, concession, fee, service fee, commission, sales charge, loan, override, or cash benefit received by a producer in connection with the recommendation or sale of an annuity from an insurer, intermediary, or directly from the consumer.

C. “Consumer profile information” means information that is reasonably appropriate to determine whether a recommendation addresses the consumer’s financial situation, insurance needs and financial objectives, including, at a minimum, the following:
   (1) Age;
   (2) Annual income;
   (3) Financial situation and needs, including debts and other obligations;
   (4) Financial experience;
   (5) Financial objectives;
   (6) Intended use of the annuity;
   (7) Financial time horizon;
   (8) Existing assets or financial products, including investment, annuity and insurance holdings;
   (9) Liquidity needs;
(10) Liquid net worth;

(11) Risk tolerance, including willingness to accept non-guaranteed elements in the annuity, including variability in premium, death benefit or fees;

(12) Financial resources used to fund the annuity; and

(13) Tax status.

BD. “Continuing education credit” or “CE credit” means one continuing education credit as defined in [insert reference in State law or regulations governing producer continuing education course approval].

CE. “Continuing education provider” or “CE provider” means an individual or entity that is approved to offer continuing education courses pursuant to [insert reference in State law or regulations governing producer continuing education course approval].

DF. “FINRA” means the Financial Industry Regulatory Authority or a succeeding agency.

EG. “Insurer” means a company required to be licensed under the laws of this state to provide insurance products, including annuities.

F. “Insurance producer” means a person required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities.

H. “Intermediary” means an entity contracted directly with an insurer or with another entity contracted with an insurer to facilitate the sale of the insurer’s annuities by producers.

I. (1) “Material conflict of interest” means a financial interest of the producer in the sale of an annuity that a reasonable person would expect to influence the impartiality of a recommendation.

(2) “Material conflict of interest” does not include cash compensation or non-cash compensation.

J. “Non-cash compensation” means any form of compensation that is not cash compensation, including, but not limited to, health insurance, office rent, office support and retirement benefits.

K. “Producer” means a person or entity required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities. For purposes of this regulation, “producer” includes an insurer where no producer is involved.

GL. (1) “Recommendation” means advice provided by an insurance producer, or an insurer where no producer is involved, to an individual consumer that was intended to result or does result in a purchase, an exchange or a replacement of an annuity in accordance with that advice.

(2) Recommendation does not include general communication to the public, generalized customer services assistance or administrative support, general educational information and tools, prospectuses, or other product and sales material.

NOTE: THE WORKING GROUP IS REQUESTING COMMENTS ON REVISING THE DEFINITION OF “RECOMMENDATION” TO ADDRESS IN-FORCE SALES BY ADDING LANGUAGE EXPANDING THE DEFINITION TO INCLUDE WHEN A MODIFICATION IS MADE OR THE CONSUMER ELECTS A CONTRACTUAL OPTION, WHICH GENERATES CASH OR NON-CASH COMPENSATION FOR THE PRODUCER PROVIDING THE ADVICE. THE WORKING GROUP ALSO REQUESTS COMMENTS ON WHETHER TO INCLUDE A TIME FRAME FOR A PRODUCER TO REVIEW A CONSUMER’S CONSUMER PROFILE INFORMATION. CURRENTLY FINRA REQUIRES A REVIEW OF SUCH INFORMATION AT LEAST EVERY 3 YEARS. THE WORKING GROUP IS ALSO REQUESTING COMMENTS ON WHETHER THE DRAFT SHOULD ADDRESS IN-FORCE SALES.
“Replacement” means a transaction in which a new policy or contract annuity is to be purchased, and it is known or should be known to the proposing producer, or to the proposing insurer if there is no whether or not a producer is involved, that by reason of the transaction, an existing insurance policy or contract has been or is to be any of the following:

1. Lapsed, forfeited, surrendered or partially surrendered, assigned to the replacing insurer or otherwise terminated;
2. Converted to reduced paid-up insurance, continued as extended term insurance, or otherwise reduced in value by the use of nonforfeiture benefits or other policy values;
3. Amended so as to effect either a reduction in benefits or in the term for which coverage would otherwise remain in force or for which benefits would be paid;
4. Reissued with any reduction in cash value; or
5. Used in a financed purchase.

Drafting Note: The definition of “replacement” above is derived from the NAIC Life Insurance and Annuities Replacement Model Regulation. If a State has a different definition for “replacement,” the State should either insert the text of that definition in place of the definition above or modify the definition above to provide a cross-reference to the definition of “replacement” that is in State law or regulation.

I. “Suitability information” means information that is reasonably appropriate to determine the suitability of a recommendation, including the following:

1. Age;
2. Annual income;
3. Financial situation and needs, including the financial resources used for the funding of the annuity;
4. Financial experience;
5. Financial objectives;
6. Intended use of the annuity;
7. Financial time horizon;
8. Existing assets, including investment and life insurance holdings;
9. Liquidity needs;
10. Liquid net worth;
11. Risk tolerance; and
12. Tax status.

N. “SEC” means the United States Securities and Exchange Commission.

Section 6. Duties of Insurers and Insurance Producers

A. Best Interest Obligations. A producer, when making a recommendation of an annuity, shall act in the best
interest of the consumer under the circumstances known at the time the recommendation is made, without placing the producer’s or the insurer’s financial interest ahead of the consumer’s interest. A producer is deemed to comply with this subsection by satisfying the following obligations regarding care, disclosure, conflict of interest and documentation:

A. In recommending to a consumer the purchase of an annuity or the exchange of an annuity that results in another insurance transaction or series of insurance transactions, the insurance producer, or the insurer where no producer is involved, shall have reasonable grounds for believing that the recommendation is suitable for the consumer on the basis of the facts disclosed by the consumer as to his or her investments and other insurance products and as to his or her financial situation and needs, including the consumer’s suitability information, and that there is a reasonable basis to believe all of the following:

1. (a) Care Obligation. The producer, in making a recommendation shall exercise reasonable diligence, care and skill to:

   i. Know the consumer’s financial situation, insurance needs and financial objectives;

   ii. Understand the available recommendation options after making a reasonable inquiry into options available to the producer;

   iii. Have a reasonable basis to believe the recommended option effectively addresses the consumer’s financial situation, insurance needs and financial objectives over the life of the product, as evaluated in light of the consumer profile information; and

   iv. Communicate the basis or bases of the recommendation.

   b. The requirements under subparagraph (a) of this paragraph include making reasonable efforts to obtain consumer profile information from the consumer prior to the recommendation of an annuity.

   c. The requirements under subparagraph (a) of this paragraph require a producer to consider the types of products the producer is authorized and licensed to recommend or sell that address the consumer’s financial situation, insurance needs and financial objectives. This does not require analysis or consideration of any products outside the authority and license of the producer or other possible alternative products or strategies available in the market at the time of the recommendation.

   d. The requirements under this subsection do not create a fiduciary obligation but create a regulatory obligation as established in this regulation.

   e. The consumer profile information, characteristics of the insurer, and product costs, rates, benefits and features are those factors generally relevant in making a determination whether an annuity effectively addresses the consumer’s financial situation, insurance needs and financial objectives, but the level of importance of each factor under the care obligation of this paragraph may vary depending on the facts and circumstances of a particular case. However, each factor may not be considered in isolation.

   f. The requirements under subparagraph (a) of this paragraph include having a reasonable basis to believe the consumer would benefit from certain features of the annuity, such as annuitization, death or living benefit or other insurance-related features.

   g. The requirements under subparagraph (a) of this paragraph apply to the particular annuity as a whole and the underlying subaccounts to which funds are allocated at the time of purchase or exchange of an annuity, and riders and similar producer enhancements, if any.
(h) The requirements under subparagraph (a) of this paragraph do not mean the annuity with the lowest one-time or multiple occurrence compensation structure shall necessarily be recommended.

(i) The requirements under subparagraph (a) of this paragraph do not mean the producer has ongoing monitoring obligations under the care obligation under this paragraph, although such an obligation may be separately owed under the terms of a fiduciary, consulting, investment advising or financial planning agreement between the consumer and the producer.

(j) In the case of an exchange or replacement of an annuity, the producer shall consider the whole transaction, which includes taking into consideration whether:

   (i) The consumer will incur a surrender charge, be subject to the commencement of a new surrender period, lose existing benefits, such as death, living or other contractual benefits, or be subject to increased fees, investment advisory fees or charges for riders and similar product enhancements;

   (ii) The replacing product would substantially benefit the consumer in comparison to the replaced product over the life of the product; and

   (iii) The consumer has had another annuity exchange or replacement and, in particular, an exchange or replacement within the preceding 60 months.

(2) Disclosure obligation.

(a) Prior to or at the time of the recommendation or sale of an annuity, the producer shall prominently disclose to the consumer on a form substantially similar to the “Producer Relationship Disclosure Form” in Appendix A:

   (i) A description of the scope and terms of the relationship with the consumer and the role of the producer in the transaction;

   (ii) Any limitations the producer or the insurer has concerning the following:

      (I) The type of products that the producer is authorized and licensed to recommend or sell; and

      (II) Whether only products issued by a specific insurer or an otherwise limited range of annuity products may be offered;

   (iii) A description of the sources and types of cash compensation and non-cash compensation to be received by the producer, including whether the producer is to be compensated for the sale of a recommended annuity by commission as part of premium or other remuneration received from the insurer, intermediary or other producer or by fee as a result of a contract for advice or consulting services; and

   (iv) A notice of the consumer’s right to request additional information regarding cash compensation described in subparagraph (b) of this paragraph;

Drafting Note: If a state approves forms, a state should add language to subparagraph (a) reflecting such approvals.

(b) Upon request, the producer shall disclose:
(i) A reasonable estimate of the amount of cash compensation, which may be stated as a range of amounts or percentages; and

(ii) Whether the cash compensation is a one-time or multiple occurrence amount, and if a multiple occurrence amount, the frequency and amount of the occurrence, which may be stated as a range of amounts or percentages; and

Drafting Note: If a State has adopted the NAIC Annuity Disclosure Model Regulation, the State should insert an additional phrase in paragraph (1) subparagraph (c) above to explain that the requirements of this section are intended to supplement and not replace the disclosure requirements of the NAIC Annuity Disclosure Model Regulation.

(2) The consumer would benefit from certain features of the annuity, such as tax-deferred growth, annuitization or death or living benefit;

(3) The particular annuity as a whole, the underlying subaccounts to which funds are allocated at the time of purchase or exchange of the annuity, and riders and similar product enhancements, if any, are suitable (and in the case of an exchange or replacement, the transaction as a whole is suitable) for the particular consumer based on his or her suitability information; and

(4) In the case of an exchange or replacement of an annuity, the exchange or replacement is suitable including taking into consideration whether:

(a) The consumer will incur a surrender charge, be subject to the commencement of a new surrender period, lose existing benefits (such as death, living or other contractual benefits), or be subject to increased fees, investment advisory fees or charges for riders and similar product enhancements;

(b) The consumer would benefit from product enhancements and improvements; and

(c) The consumer has had another annuity exchange or replacement and, in particular, an exchange or replacement within the preceding 36 months.

(3) Conflict of interest obligation. A producer shall identify and avoid or otherwise reasonably manage material conflicts of interest, including material conflicts of interest related to an ownership interest.

(4) Documentation obligation. A producer shall at the time of recommendation or sale:
(a) Make a written record of any recommendation and the basis for the recommendation subject to this regulation;

(b) Obtain a customer signed statement on a form substantially similar to the “Consumer Refusal to Disclose All or Partial Consumer Profile Information” form in Appendix B documenting:

(i) A customer’s refusal to provide the consumer profile information, if any; and

(ii) A customer’s understanding of the ramifications of not providing his or her consumer profile information or providing insufficient consumer profile information; and

(c) Obtain a customer signed statement acknowledging the annuity transaction is not recommended if a customer decides to enter into an annuity transaction that is not based on the producer’s recommendation.

Drafting Note: If a state approves forms, a state should add language to subparagraph (b) of this paragraph reflecting such approvals.

B. Prior to the execution of a purchase, exchange or replacement of an annuity resulting from a recommendation, an insurance producer, or an insurer where no producer is involved, shall make reasonable efforts to obtain the consumer’s suitability information.

C. Except as permitted under subsection D, an insurer shall not issue an annuity recommended to a consumer unless there is a reasonable basis to believe the annuity is suitable based on the consumer’s suitability information.

NOTE: THE PROVISION BELOW IS STILL UNDER CONSIDERATION. THE WORKING GROUP IS REQUESTING COMMENT ON IT.

[7. Any requirement applicable to a producer under this section shall apply to every producer who has materially participated in the making of a recommendation and received compensation as a result of the sales transaction, regardless of whether the producer has had any direct contact with the consumer, provided that product wholesaling or product support based on generic client information, or the provision of education or marketing material, does not constitute participating in the making of a recommendation.]

DB. Transactions not based on a recommendation.

(1) Except as provided under paragraph (2) of this subsection, neither an insurance producer, nor an insurer, shall have any obligation to a consumer under subsection A(1) or C related to any annuity transaction if:

(a) No recommendation is made;

(b) A recommendation was made and was later found to have been prepared based on materially inaccurate information provided by the consumer;

(c) A consumer refuses to provide relevant suitability consumer profile information and the annuity transaction is not recommended; or

(d) A consumer decides to enter into an annuity transaction that is not based on a recommendation of the insurer or the insurance producer.
(2) An insurer’s issuance of an annuity subject to paragraph (1) shall be reasonable under all the circumstances actually known to the insurer at the time the annuity is issued.

C. Supervision system.

(1) Except as permitted under subsection B, an insurer may not issue an annuity recommended to a consumer unless there is a reasonable basis to believe the annuity would effectively address the particular consumer’s financial situation, insurance needs and financial objectives based on the consumer’s consumer profile information.

E. An insurance producer or, where no insurance producer is involved, the responsible insurer representative, shall at the time of sale:

(1) Make a record of any recommendation subject to section 6A of this regulation;

(2) Obtain a customer signed statement documenting a customer’s refusal to provide suitability information, if any; and

(3) Obtain a customer signed statement acknowledging that an annuity transaction is not recommended if a customer decides to enter into an annuity transaction that is not based on the insurance producer’s or insurer’s recommendation.

F. An insurer shall establish and maintain a supervision system that is reasonably designed to achieve the insurer’s and its insurance producers’ compliance with this regulation, including, but not limited to, the following:

(a) The insurer shall establish and maintain reasonable procedures to inform its insurance producers of the requirements of this regulation and shall incorporate the requirements of this regulation into relevant insurance producer training manuals;

(b) The insurer shall establish and maintain standards for insurance producer product training and shall establish and maintain reasonable procedures to require its insurance producers to comply with the requirements of section 7 of this regulation;

(c) The insurer shall provide product-specific training and training materials which explain all material features of its annuity products to its insurance producers;

(d) The insurer shall establish and maintain procedures for review of each recommendation prior to issuance of an annuity that are designed to ensure that there is a reasonable basis to determine that a recommendation is suitable, the recommended annuity would effectively address the particular consumer’s financial situation, insurance needs and financial objectives. Such review procedures may apply a screening system for the purpose of identifying selected transactions for additional review and may be accomplished electronically or through other means including, but not limited to, physical review. Such an electronic or other system may be designed to require additional review only of those transactions identified for additional review by the selection criteria;

(e) The insurer shall establish and maintain reasonable procedures to detect recommendations that are not in compliance with subsections A, B, D and E. This may include, but is not limited to, confirmation of the consumer’s consumer profile information, systematic customer surveys, interviews, confirmation letters and programs of internal monitoring. Nothing in this subparagraph prevents an insurer from complying with this subparagraph by applying sampling procedures, or by confirming the consumer profile information after issuance or delivery of the annuity; and
(f) The insurer shall establish and maintain reasonable procedures to assess, prior to or upon issuance or delivery of an annuity, whether a producer has provided to the consumer the information required to be provided under this section;

(g) The insurer shall establish and maintain reasonable procedures to identify and address potentially suspicious consumer refusals to provide consumer profile information;

(h) The insurer shall establish and maintain reasonable procedures to identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific annuities or specific types of annuities within a limited period of time; and

(i) The insurer shall annually provide a written report to senior management, including to the senior manager responsible for audit functions, which details a review, with appropriate testing, reasonably designed to determine the effectiveness of the supervision system, the exceptions found, and corrective action taken or recommended, if any.

(2) An insurer is responsible for taking appropriate corrective action and may be subject to sanctions and penalties pursuant to section 8 of this regulation regardless of whether the insurer contracts for performance of a function and regardless of the insurer’s compliance with subparagraph (b) of this paragraph.

(a) Nothing in this subsection restricts an insurer from contracting for performance of a function (including maintenance of procedures) required under paragraph (1) this subsection. An insurer is responsible for taking appropriate corrective action and may be subject to sanctions and penalties pursuant to section 8 of this regulation regardless of whether the insurer contracts for performance of a function and regardless of the insurer’s compliance with subparagraph (b) of this paragraph.

(b) An insurer’s supervision system under paragraph (1) this subsection shall include supervision of contractual performance under this subsection. This includes, but is not limited to, the following:

(i) Monitoring and, as appropriate, conducting audits to assure that the contracted function is properly performed; and

(ii) Annually obtaining a certification from a senior manager who has responsibility for the contracted function that the manager has a reasonable basis to represent, and does represent, that the function is properly performed.

(4) An insurer is not required to include in its system of supervision an insurance producer’s recommendations to consumers of products other than the annuities offered by the insurer.

GD. Prohibited Practices. Neither a producer nor an insurer shall dissuade, or attempt to dissuade, a consumer from:

(1) Truthfully responding to an insurer’s request for confirmation of the suitability consumer profile information;

(2) Filing a complaint; or

(3) Cooperating with the investigation of a complaint.

HE. Safe harbor.

(1) Sales made in compliance with SEC regulations and applicable FINRA requirements pertaining to suitability best interest obligations and supervision of annuity transactions shall satisfy the requirements under this regulation. This subsection applies to FINRA broker-dealer sales of annuities if, in connection with the sale of an annuity, the broker-dealer and the producer, who also is appropriately registered as a representative with FINRA, have complied with the business rules, controls and procedures for securities transactions, the suitability and supervision is similar to those applied to variable annuity sales. However, nothing in this subsection shall limit the insurance
commissioner’s ability to investigate and enforce (including investigate) the provisions of this regulation.

**Drafting Note:** Non-compliance with SEC and FINRA requirements means that the broker-dealer transaction is subject to compliance with the suitability requirements of this regulation.

(2) For paragraph (1) to apply, an insurer shall:

(a) Monitor the FINRA member broker-dealer using information collected in the normal course of an insurer’s business; and

(b) Provide to the FINRA member broker-dealer information and reports that are reasonably appropriate to assist the FINRA member broker-dealer to maintain its supervision system.

### Section 7. Insurance Producer Training

**A.** An insurance producer shall not solicit the sale of an annuity product unless the insurance producer has adequate knowledge of the product to recommend the annuity and the insurance producer is in compliance with the insurer’s standards for product training. An insurance producer may rely on insurer-provided product-specific training standards and materials to comply with this subsection.

**B.**

(1) An insurance producer who engages in the sale of annuity products shall complete a one-time four (4) credit training course approved by the department of insurance and provided by the department of insurance-approved education provider.

(2) The minimum length of the training required under this subsection shall be sufficient to qualify for at least four (4) CE credits, but may be longer.

(3) The training required under this subsection shall include information on the following topics:

(a) The types of annuities and various classifications of annuities;

(b) Identification of the parties to an annuity;

(c) How product specific annuity contract features affect consumers;

(d) The application of income taxation of qualified and non-qualified annuities;

(e) The primary uses of annuities; and

(f) Appropriate standard of conduct, sales practices, replacement and disclosure requirements.

(4) Providers of courses intended to comply with this subsection shall cover all topics listed in the prescribed outline and shall not present any marketing information or provide training on sales techniques or provide specific information about a particular insurer’s products. Additional topics may be offered in conjunction with and in addition to the required outline.

(5) A provider of an annuity training course intended to comply with this subsection shall register as a CE provider in this State and comply with the rules and guidelines applicable to insurance producer
continuing education courses as set forth in [insert reference to State law or regulations governing producer continuing education course approval].

(6) Annuity training courses may be conducted and completed by classroom or self-study methods in accordance with [insert reference to State law or regulations governing producer continuing education course approval].

(7) Providers of annuity training shall comply with the reporting requirements and shall issue certificates of completion in accordance with [insert reference to State law or regulations governing to producer continuing education course approval].

(8) The satisfaction of the training requirements of another State that are substantially similar to the provisions of this subsection shall be deemed to satisfy the training requirements of this subsection in this State.

(9) The satisfaction of the components of the training requirements of any course or courses with components substantially similar to the provisions of this subsection shall be deemed to satisfy the training requirements of this subsection in this state.

(9)(10) An insurer shall verify that an insurance producer has completed the annuity training course required under this subsection before allowing the producer to sell an annuity product for that insurer. An insurer may satisfy its responsibility under this subsection by obtaining certificates of completion of the training course or obtaining reports provided by commissioner-sponsored database systems or vendors or from a reasonably reliable commercial database vendor that has a reporting arrangement with approved insurance education providers.

Section 8. Compliance Mitigation; Penalties

A. An insurer is responsible for compliance with this regulation. If a violation occurs, either because of the action or inaction of the insurer or its insurance-producer, the commissioner may order:

(1) An insurer to take reasonably appropriate corrective action for any consumer harmed by a failure to comply with this regulation by the insurer’s supervisory duties or by its insurance-producer’s violation of this regulation.

(2) A general agency, independent agency or the insurance-producer to take reasonably appropriate corrective action for any consumer harmed by the insurance-producer’s violation of this regulation; and

(3) Appropriate penalties and sanctions.

B. Any applicable penalty under [insert statutory citation] for a violation of this regulation may be reduced or eliminated [ according to a schedule adopted by the commissioner.] if corrective action for the consumer was taken promptly after a violation was discovered or the violation was not part of a pattern or practice.

Drafting Note: Subsection B above is intended to be consistent with the commissioner’s discretionary authority to determine the appropriate penalty for a violation of this regulation. The language of subsection B is not intended to require that a commissioner impose a penalty on an insurer for a single violation of this regulation if the commissioner has determined that such a penalty is not appropriate.

Drafting Note: A State that has authority to adopt a schedule of penalties may wish to include the words in brackets. In that case, “shall” should be substituted for “may” in the same sentence. States should consider inserting a reference to the NAIC Unfair Trade Practices Act or the State’s statute that authorizes the commissioner to impose penalties and fines.

Section 9. [Optional]. Recordkeeping
A. Insurers, general agents, independent agencies and insurance producers shall maintain or be able to make available to the commissioner records of the information collected from the consumer, disclosures made to the consumer, including summaries of oral disclosures, and other information used in making the recommendations that were the basis for insurance transactions for [insert number] years after the insurance transaction is completed by the insurer. An insurer is permitted, but shall not be required, to maintain documentation on behalf of an insurance producer.

**Drafting Note:** States should review their current record retention laws and specify a time period that is consistent with those laws. For some States this time period may be five (5) years.

B. Records required to be maintained by this regulation may be maintained in paper, photographic, micro-process, magnetic, mechanical or electronic media or by any process that accurately reproduces the actual document.

**Drafting Note:** This section may be unnecessary in States that have a comprehensive recordkeeping law or regulation.

**Section 10. Effective Date**

The amendments to this regulation shall take effect [six (6)X] months after the date the regulation is adopted or on [insert date], whichever is later.
APPENDIX A

PRODUCER RELATIONSHIP DISCLOSURE FORM

Date: ________________________

INSURANCE AGENT/PRODUCER INFORMATION (“Me”, “I”, “My”)

First Name: ______________________________ Last Name: __________________________

Firm Name: ______________________________ Website: _____________________________

Business Mailing Address: __________________________________________________________

Business Telephone Number: ______________________________________________________

Email Address: __________________________________________________________________

Insurance License # ______________________________

CLIENT INFORMATION (“You”, “Your”)

First Name: ________________________________ Last Name: __________________________

INSURANCE AUTHORIZATION

I am licensed and authorized to sell insurance products, including annuities in [State] in accordance with state laws. I offer the following products:

- Fixed or Fixed Index Annuities
- Variable Annuities
- Options
- Other Investments
- Mutual Funds
- Stocks/Bonds
- Certificates of Deposits

I am authorized and contracted or appointed or have access to offer:

- Products from ONLY ONE INSURER or Insurance Holding Company Group
- Products from Multiple Insurers
- Products from Multiple Insurers although I am primarily contracted with one insurer

NOTE: THE WORKING GROUP REQUESTS COMMENTS ON WHAT ADDITIONAL INFORMATION (OR BOXES), IF ANY, SHOULD BE ADDED BELOW TO REFLECT THE PROVISIONS OF SECTION 6A(2), THE DISCLOSURE OBLIGATION, TO DESCRIBE THE SCOPE AND TERMS OF THE RELATIONSHIP BETWEEN THE PRODUCER AND THE CONSUMER.

My Relationship with You:

- One-Time Transaction
On-Going Relationship

My Compensation Structure:

- Commissioned Transaction
- An asset under management fee
- Other, please describe: ________________________________

I am likely to be compensated by the following sources for this relationship:

- Insurance Company
- The Consumer
- Third parties such as an Independent Marketing Organization (IMO) related to the Insurer

Other Sources ____________________________

ADDITIONAL INFORMATION

You may obtain further information regarding the cash compensation paid to me.

NOTE: THE WORKING GROUP REQUESTS COMMENTS ON WHETHER THE CONSUMER SHOULD SIGN AND ACKNOWLEDGE THIS FORM AND/OR SHOULD THIS FORM BE RETAINED BY THE PRODUCER OR GIVEN TO THE CONSUMER, OR BOTH.

W:\Drafts\04-Model Laws, Regulations & Guidelines\# 275 - Suitability in Annuity Transactions Model Regulation\Model #275-4 Draft.docx
The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Sept. 17, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Steve Ostlund (AL); Jodi Lerner (CA); Fleur McKendell (DE); Dean L. Cameron (ID); Tate Flott (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Denise Lamy (NH); James Regalbuto (NY); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Lorrie Brouse and Rachel Jade-Rice (TN); and Richard Wicka (WI).

1. Discussed and Exposed the Technical Group Draft of Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goals for its June 20 meeting and its subsequent meetings, which was to develop a framework for revising the *Suitability in Annuity Transactions Model Regulation (#275)* to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard. She said that based on the developed framework and as discussed at the Working Group’s meeting at the Summer National Meeting, the Working Group’s technical drafting group met in September and developed a draft of proposed revisions to Model #275 (Attachment Two-E1). She said the purpose of this call is to allow the Working Group to review, comment and offer suggested revisions to the draft in order to develop a Working Group draft for exposure for public comment. She explained that although it is an open call, only Working Group members will be allowed to comment. She noted that all stakeholders would have sufficient time to comment on the draft during the public comment period and subsequent Working Group calls to review and discuss the comments received.

   a. Section 1—Purpose

Director Froment reviewed the proposed revisions to Section 1—Purpose. She said the revisions make it clear that Model #275’s purpose is to require producers to act in the consumer’s best interest when making a recommendation of an annuity and require insurers to establish and maintain systems to supervise these recommendations. She requested comments from the Working Group. There were no comments.

   b. Section 2—Scope

Director Froment reviewed the proposed revisions to Section 2—Scope. Mr. Regalbuto asked if it is appropriate to discuss whether Model #275 should apply to in-force recommendations. After discussion, the Working Group decided to defer that discussion until the Working Group discusses the definition of “recommendation” in Section 5L. There were no additional Working Group comments on this section.

   c. Section 3—Authority

Director Froment said no revisions were made to Section 3—Authority. There were no comments from Working Group members on this section.

   d. Section 4—Exemptions

Director Froment said no revisions were made to Section 4—Exemptions. There were no comments from Working Group members on this section.

   e. Section 5—Definitions

Director Froment reviewed the proposed revisions to Section 5—Definitions. Mr. Wicka asked about the proposed revisions to the definition of “recommendation” in Section 5L. He said the proposed revisions adding the language “is intended to result” creates an element of intent, which must be proven in a hearing. He suggested striking the language and substituting “does result” in order to avoid having to prove intent. After additional discussion, the Working Group decided to revise the definition as follows: “was intended to result and does result.”
Mr. Regalbuto asked the Working Group to consider adding language to the definition of “recommendation” to have Model #275 apply to “in-force” sales when a modification is made to the in-force annuity contract or the consumer elects a contractual option, which generates cash or non-cash compensation for the producer providing the advice. The Working Group discussed Mr. Regalbuto’s suggestion. Some Working Group members expressed caution for including such language, and others expressed some hesitation to include such language in the draft until additional information and specific language is provided for the Working Group’s review. After additional discussion, the Working Group decided to defer making a decision until it could receive additional comments from stakeholders.

f. Section 6—Duties of Insurers and Producers

Director Froment reviewed the provisions of Section 6A—Duties of Insurers and Producers, Best Interest Obligations. She explained that Section 6A requires a producer to act in the consumer’s best interest in making a recommendation without placing the producer’s or the insurer’s financial interest ahead of the consumer’s interest and outlines how a producer or insurer would comply with this requirement by satisfying the care, disclosure, conflict of interest and documentation obligations. She asked the Working Group for comments. There were no comments.

Director Froment pointed out a potential provision for inclusion in Section 6A from New York, which would extend the model’s requirements to every producer who has materially participated in the making of a recommendation and received compensation as a result of the sales transaction regardless of whether the producer has had any direct contact with the consumer. Mr. Regalbuto explained his reasoning for suggesting the inclusion of this language. He said inclusion of this provision is particularly important with respect to new producers or recommendations involving complex products where another producer with more knowledge may be brought in to assist. Director Froment said the technical draft group discussed New York’s concerns and its reasoning for suggesting the language but struggled with whether this language was the way to address it or if there was another approach it should consider. Ms. Brouse suggested another approach could be to revise Model #275’s supervision provisions to address it. Commissioner Ommen suggested the Working Group receive additional comments on New York’s suggested language. The Working Group agreed.

Director Froment reviewed Section 6B, Transactions Not Based on a Recommendation. She asked the Working Group for comments. There were no comments.

Director Froment reviewed Section 6C, Supervision System. She asked the Working Group for comments. Ms. Lerner asked why Section 6C(2)(h) requires an insurer to establish and maintain “minimum” procedures. After discussion, the Working Group agreed to delete the word “minimum” for consistency with similar language in Section 6C.

g. Appendix A—Producer Relationship Disclosure Form

Director Froment reviewed Appendix A—Producer Relationship Disclosure Form. She asked for comments from the Working Group. With respect to the heading “Insurance Authorization,” Ms. Brouse discussed the issue of a producer being authorized to “sell” versus “offer” certain annuities. After discussion, the Working Group decided to add the language “or have access to offer.” The Working Group discussed the purpose of the form and whether it included all of the information that should be disclosed in accordance with Section 6A(2) with respect to the producer and consumer relationship. After additional discussion, the Working Group decided to request specific comments on the issue.

Mr. Benchaboun asked if consumers should be required to sign the form and acknowledge receipt. After discussion, the Working Group decided to ask for specific comments on this issue.

h. Appendix B—Consumer Refusal to Disclose All or Partial Consumer Profile Information Form

Director Froment reviewed Appendix B—Consumer Refusal to Disclose All or Partial Consumer Profile Information Form. She asked the Working Group for comments. There were no comments.

Director Froment exposed the draft of proposed revisions to Model #275, as discussed during the conference call, for a 13-day public comment period ending Sept. 30.
2. **Discussed the Working Group’s Next Steps**

Director Froment discussed the Working Group’s next steps. She said the Working Group will discuss any comments received on the draft of proposed revisions to Model #275 via conference call beginning in early October through November. The Working Group’s goal is to present a draft to the Life Insurance and Annuities (A) Committee for its consideration prior to or at the Fall National Meeting.

Having no further business, the Annuity Suitability (A) Working Group adjourned.

SUITABILITY IN ANNUITY TRANSACTIONS
MODEL REGULATION

Table of Contents
Section 1. Purpose
Section 2. Scope
Section 3. Authority
Section 4. Exemptions
Section 5. Definitions
Section 6. Duties of Insurers and Insurance Producers
Section 7. InsuranceProducer Training
Section 8. Compliance Mitigation; Penalties
Section 9. [Optional] Recordkeeping
Section 10. Effective Date
Appendix A. Producer Relationship Disclosure Form
Appendix B. Consumer Refusal to Disclose All or Partial Consumer Profile Information

Section 1. Purpose

A. The purpose of this regulation is to require producers to act in the best interest of the consumer when making a recommendation of an annuity and to require insurers to establish and maintain a system to supervise recommendations and to set forth standards and procedures for recommendations to consumers that result in transactions involving annuity products so that the insurance needs and financial objectives of consumers at the time of the transaction are appropriately effectively addressed.

B. Nothing herein shall be construed to create or imply a private cause of action for a violation of this regulation.

Drafting Note: The language of subsection B comes from the NAIC Unfair Trade Practices Act. If a State has adopted different language, it should be substituted for subsection B.

Drafting Note: Section 989J of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 ("Dodd-Frank Act") specifically refers to this model regulation as the “Suitability in Annuity Transactions Model Regulation.” Section 989J of the Dodd-Frank Act confirmed this exemption of certain annuities from the Securities Act of 1933 and confirmed state regulatory authority. This regulation is a successor regulation that exceeds the requirements of the 2010 model regulation.

Section 2. Scope

This regulation shall apply to any sale or recommendation to purchase, exchange or replace of an annuity made to a consumer by an insurance producer, or an insurer where no producer is involved, that results in the purchase, exchange or replacement recommended.

Section 3. Authority

This regulation is issued under the authority of [insert reference to enabling legislation].

Drafting Note: States may wish to use the Unfair Trade Practices Act as enabling legislation or may pass a law with specific authority to adopt this regulation.

Section 4. Exemptions
Unless otherwise specifically included, this regulation shall not apply to transactions involving:

A. Direct response solicitations where there is no recommendation based on information collected from the consumer pursuant to this regulation;

B. Contracts used to fund:
   (1) An employee pension or welfare benefit plan that is covered by the Employee Retirement and Income Security Act (ERISA);
   (2) A plan described by sections 401(a), 401(k), 403(b), 408(k) or 408(p) of the Internal Revenue Code (IRC), as amended, if established or maintained by an employer;
   (3) A government or church plan defined in section 414 of the IRC, a government or church welfare benefit plan, or a deferred compensation plan of a state or local government or tax-exempt organization under section 457 of the IRC; or
   (4) A nonqualified deferred compensation arrangement established or maintained by an employer or plan sponsor;

C. Settlements of or assumptions of liabilities associated with personal injury litigation or any dispute or claim resolution process; or

D. Formal prepaid funeral contracts.

Section 5. Definitions

A. “Annuity” means an annuity that is an insurance product under State law that is individually solicited, whether the product is classified as an individual or group annuity.

B. “Cash compensation” means any discount, concession, fee, service fee, commission, sales charge, loan, override, or cash benefit received by a producer in connection with the recommendation or sale of an annuity from an insurer, intermediary, or directly from the consumer.

C. “Consumer profile information” means information that is reasonably appropriate to determine whether a recommendation addresses the consumer’s financial situation, insurance needs and financial objectives, including, at a minimum, the following:
   (1) Age;
   (2) Annual income;
   (3) Financial situation and needs, including debts and other obligations;
   (4) Financial experience;
   (5) Financial objectives;
   (6) Intended use of the annuity;
   (7) Financial time horizon;
   (8) Existing assets or financial products, including investment, annuity and insurance holdings;
TECHNICAL DRAFTING GROUP DRAFT

(9) Liquidity needs;

(10) Liquid net worth;

(11) Risk tolerance, including willingness to accept non-guaranteed elements in the annuity, including variability in premium, death benefit or fees;

(12) Financial resources used to fund the annuity; and

(13) Tax status.

BD. “Continuing education credit” or “CE credit” means one continuing education credit as defined in [insert reference in State law or regulations governing producer continuing education course approval].

CE. “Continuing education provider” or “CE provider” means an individual or entity that is approved to offer continuing education courses pursuant to [insert reference in State law or regulations governing producer continuing education course approval].

DF. “FINRA” means the Financial Industry Regulatory Authority or a succeeding agency.

EG. “Insurer” means a company required to be licensed under the laws of this state to provide insurance products, including annuities.

F. “Insurance producer” means a person required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities.

H. “Intermediary” means an entity contracted directly with an insurer or with another entity contracted with an insurer to facilitate the sale of the insurer’s annuities by producers.

I. (1) “Material conflict of interest” means a financial interest of the producer in the sale of an annuity that a reasonable person would expect to influence the impartiality of a recommendation.

(2) “Material conflict of interest” does not include cash compensation or non-cash compensation.

J. “Non-cash compensation” means any form of compensation that is not cash compensation, including, but not limited to, health insurance, office rent, office support and retirement benefits.

K. “Producer” means a person or entity required to be licensed under the laws of this state to sell, solicit or negotiate insurance, including annuities. For purposes of this regulation, “producer” includes an insurer where no producer is involved.

GL. (1) “Recommendation” means advice provided by an insurance producer, or an insurer where no producer is involved, to an individual consumer that is intended to result in a purchase, an exchange or a replacement of an annuity in accordance with that advice.

(2) Recommendation does not include general communication to the public, generalized customer services assistance or administrative support, general educational information and tools, prospectuses, or other product and sales material.

HM. “Replacement” means a transaction in which a new policy or contract annuity is to be purchased, and it is known or should be known to the proposing producer, or to the proposing insurer if there is whether or not a producer is involved, that by reason of the transaction, an existing insurance policy or contract has been or is to be any of the following:
(1) Lapsed, forfeited, surrendered or partially surrendered, assigned to the replacing insurer or otherwise terminated;

(2) Converted to reduced paid-up insurance, continued as extended term insurance, or otherwise reduced in value by the use of nonforfeiture benefits or other policy values;

(3) Amended so as to effect either a reduction in benefits or in the term for which coverage would otherwise remain in force or for which benefits would be paid;

(4) Reissued with any reduction in cash value; or

(5) Used in a financed purchase.

Drafting Note: The definition of “replacement” above is derived from the NAIC Life Insurance and Annuities Replacement Model Regulation. If a State has a different definition for “replacement,” the State should either insert the text of that definition in place of the definition above or modify the definition above to provide a cross-reference to the definition of “replacement” that is in State law or regulation.

I. “Suitability information” means information that is reasonably appropriate to determine the suitability of a recommendation, including the following:

(1) Age;

(2) Annual income;

(3) Financial situation and needs, including the financial resources used for the funding of the annuity;

(4) Financial experience;

(5) Financial objectives;

(6) Intended use of the annuity;

(7) Financial time horizon;

(8) Existing assets, including investment and life insurance holdings;

(9) Liquidity needs;

(10) Liquid net worth;

(11) Risk tolerance; and

(12) Tax status.

N. “SEC” means the United States Securities and Exchange Commission.

Section 6. Duties of Insurers and of Insurance Producers

A. Best Interest Obligations. A producer, when making a recommendation of an annuity, shall act in the best interest of the consumer under the circumstances known at the time the recommendation is made, without placing the producer’s or the insurer’s financial interest ahead of the consumer’s interest. A producer is deemed to comply with this subsection by satisfying the following obligations regarding care, disclosure, conflict of interest and documentation:
A. In recommending to a consumer the purchase of an annuity or the exchange of an annuity that results in another insurance transaction or series of insurance transactions, the insurance producer, or the insurer where no producer is involved, shall have reasonable grounds for believing that the recommendation is suitable for the consumer on the basis of the facts disclosed by the consumer as to his or her investments and other insurance products and as to his or her financial situation and needs, including the consumer’s suitability information, and that there is a reasonable basis to believe all of the following:

   (1) (a) Care Obligation. The producer, in making a recommendation shall exercise reasonable diligence, care and skill to:

      (i) Know the consumer’s financial situation, insurance needs and financial objectives;

      (ii) Understand the available recommendation options after making a reasonable inquiry into options available to the producer;

      (iii) Have a reasonable basis to believe the recommended option effectively addresses the consumer’s financial situation, insurance needs and financial objectives over the life of the product, as evaluated in light of the consumer profile information; and

      (iv) Communicate the basis or bases of the recommendation.

(b) The requirements under subparagraph (a) of this paragraph include making reasonable efforts to obtain consumer profile information from the consumer prior to the recommendation of an annuity.

(c) The requirements under subparagraph (a) of this paragraph require a producer to consider the types of products the producer is authorized and licensed to recommend or sell that address the consumer’s financial situation, insurance needs and financial objectives. This does not require analysis or consideration of any products outside the authority and license of the producer or other possible alternative products or strategies available in the market at the time of the recommendation.

(d) The requirements under this subsection do not create a fiduciary obligation but create a regulatory obligation as established in this regulation.

(e) The consumer profile information, characteristics of the insurer, and product costs, rates, benefits and features are those factors generally relevant in making a determination whether an annuity effectively addresses the consumer’s financial situation, insurance needs and financial objectives, but the level of importance of each factor under the care obligation of this paragraph may vary depending on the facts and circumstances of a particular case. However, each factor may not be considered in isolation.

(f) The requirements under subparagraph (a) of this paragraph include having a reasonable basis to believe the consumer would benefit from certain features of the annuity, such as annuitization, death or living benefit or other insurance-related features.

(g) The requirements under subparagraph (a) of this paragraph apply to the particular annuity as a whole and the underlying subaccounts to which funds are allocated at the time of purchase or exchange of an annuity, and riders and similar producer enhancements, if any.
TECHNICAL DRAFTING GROUP DRAFT

(h) The requirements under subparagraph (a) of this paragraph do not mean the annuity with the lowest one-time or multiple occurrence compensation structure shall necessarily be recommended.

(i) The requirements under subparagraph (a) of this paragraph do not mean the producer has ongoing monitoring obligations under the care obligation under this paragraph, although such an obligation may be separately owed under the terms of a fiduciary, consulting, investment advising or financial planning agreement between the consumer and the producer.

(j) In the case of an exchange or replacement of an annuity, the producer shall consider the whole transaction, which includes taking into consideration whether:

(i) The consumer will incur a surrender charge, be subject to the commencement of a new surrender period, lose existing benefits, such as death, living or other contractual benefits, or be subject to increased fees, investment advisory fees or charges for riders and similar product enhancements;

(ii) The replacing product would substantially benefit the consumer in comparison to the replaced product over the life of the product; and

(iii) The consumer has had another annuity exchange or replacement and, in particular, an exchange or replacement within the preceding 60 months.

2 Disclosure obligation.

(a) Prior to or at the time of the recommendation or sale of an annuity, the producer shall prominently disclose to the consumer on a form substantially similar to the “Producer Relationship Disclosure Form” in Appendix A:

(i) A description of the scope and terms of the relationship with the consumer and the role of the producer in the transaction;

(ii) Any limitations the producer or the insurer has concerning the following:

(I) The type of products that the producer is authorized and licensed to recommend or sell; and

(II) Whether only products issued by a specific insurer or an otherwise limited range of annuity products may be offered;

(iii) A description of the sources and types of cash compensation and non-cash compensation to be received by the producer, including whether the producer is to be compensated for the sale of a recommended annuity by commission as part of premium or other remuneration received from the insurer, intermediary or other producer or by fee as a result of a contract for advice or consulting services; and

(iv) A notice of the consumer’s right to request additional information regarding cash compensation described in subparagraph (b) of this paragraph:

Drafting Note: If a state approves forms, a state should add language to subparagraph (a) reflecting such approvals.

(b) Upon request, the producer shall disclose:

Drafting Note: If a state approves forms, a state should add language to subparagraph (a) reflecting such approvals.
(i) A reasonable estimate of the amount of cash compensation, which may be stated as a range of amounts or percentages; and

(ii) Whether the cash compensation is a one-time or multiple occurrence amount, and if a multiple occurrence amount, the frequency and amount of the occurrence, which may be stated as a range of amounts or percentages; and

(c1) Prior to or at the time of the recommendation or sale of an annuity, the producer shall have a reasonable basis to believe that the consumer has been reasonably informed of various features of the annuity, such as the potential surrender period and surrender charge, potential tax penalty if the consumer sells, exchanges, surrenders or annuitizes the annuity, mortality and expense fees, investment advisory fees, any annual fees, potential charges for and features of riders or other options of the annuity, limitations on interest returns, potential changes in non-guaranteed elements of the annuity, insurance and investment components and market risk.

Drafting Note: If a State has adopted the NAIC Annuity Disclosure Model Regulation, the State should insert an additional phrase in paragraph (1) subparagraph (c) above to explain that the requirements of this section are intended to supplement and not replace the disclosure requirements of the NAIC Annuity Disclosure Model Regulation.

(2) The consumer would benefit from certain features of the annuity, such as tax deferred growth, annuitization or death or living benefit;

(3) The particular annuity as a whole, the underlying subaccounts to which funds are allocated at the time of purchase or exchange of the annuity, and riders and similar product enhancements, if any, are suitable (and in the case of an exchange or replacement, the transaction as a whole is suitable) for the particular consumer based on his or her suitability information, and

(4) In the case of an exchange or replacement of an annuity, the exchange or replacement is suitable including taking into consideration whether:

(a) The consumer will incur a surrender charge, be subject to the commencement of a new surrender period, lose existing benefits (such as death, living or other contractual benefits), or be subject to increased fees, investment advisory fees or charges for riders and similar product enhancements;

(b) The consumer would benefit from product enhancements and improvements; and

(c) The consumer has had another annuity exchange or replacement and, in particular, an exchange or replacement within the preceding 36 months.

(3) Conflict of interest obligation. A producer shall identify and avoid or otherwise reasonably manage material conflicts of interest, including material conflicts of interest related to an ownership interest.

(4) Documentation obligation. A producer shall at the time of recommendation or sale:
TECHNICAL DRAFTING GROUP DRAFT

(a) Make a written record of any recommendation and the basis for the recommendation subject to this regulation;

(b) Obtain a customer signed statement on a form substantially similar to the “Consumer Refusal to Disclose All or Partial Consumer Profile Information” form in Appendix B documenting:
   (i) A customer’s refusal to provide the consumer profile information, if any; and
   (ii) A customer’s understanding of the ramifications of not providing his or her consumer profile information or providing insufficient consumer profile information; and

(c) Obtain a customer signed statement acknowledging the annuity transaction is not recommended if a customer decides to enter into an annuity transaction that is not based on the producer’s recommendation.

Drafting Note: If a state approves forms, a state should add language to subparagraph (b) of this paragraph reflecting such approvals.

B. Prior to the execution of a purchase, exchange or replacement of an annuity resulting from a recommendation, an insurance producer, or an insurer where no producer is involved, shall make reasonable efforts to obtain the consumer’s suitability information.

C. Except as permitted under subsection D, an insurer shall not issue an annuity recommended to a consumer unless there is a reasonable basis to believe the annuity is suitable based on the consumer’s suitability information.

NOTE: THE PROVISION BELOW IS STILL UNDER CONSIDERATION. THE WORKING GROUP IS REQUESTING COMMENT ON IT.

[? Any requirement applicable to a producer under this section shall apply to every producer who has materially participated in the making of a recommendation and received compensation as a result of the sales transaction, regardless of whether the producer has had any direct contact with the consumer, provided that product wholesaling or product support based on generic client information, or the provision of education or marketing material, does not constitute participating in the making of a recommendation.]

DB. Transactions not based on a recommendation.

(1) Except as provided under paragraph (2) of this subsection, neither an insurance producer, nor an insurer, shall have any obligation to a consumer under subsection A(1) or C related to any annuity transaction if:

(a) No recommendation is made;

(b) A recommendation was made and was later found to have been prepared based on materially inaccurate information provided by the consumer;

(c) A consumer refuses to provide relevant suitability consumer profile information and the annuity transaction is not recommended; or

(d) A consumer decides to enter into an annuity transaction that is not based on a recommendation of the insurer or the insurance producer.
(2) An insurer’s issuance of an annuity subject to paragraph (1) shall be reasonable under all the circumstances actually known to the insurer at the time the annuity is issued.

C. Supervision system.

(1) Except as permitted under subsection B, an insurer may not issue an annuity recommended to a consumer unless there is a reasonable basis to believe the annuity would effectively address the particular consumer’s financial situation, insurance needs and financial objectives based on the consumer’s consumer profile information.

E. An insurance producer or, where no insurance producer is involved, the responsible insurer representative, shall at the time of sale:

(1) Make a record of any recommendation subject to section 6A of this regulation;

(2) Obtain a customer signed statement documenting a customer’s refusal to provide suitability information, if any; and

(3) Obtain a customer signed statement acknowledging that an annuity transaction is not recommended if a customer decides to enter into an annuity transaction that is not based on the insurance producer’s or insurer’s recommendation.

F. (1) An insurer shall establish and maintain a supervision system that is reasonably designed to achieve the insurer’s and its insurance producers’ compliance with this regulation, including, but not limited to, the following:

(a) The insurer shall maintain reasonable procedures to inform its insurance producers of the requirements of this regulation and shall incorporate the requirements of this regulation into relevant insurance producer training manuals;

(b) The insurer shall establish standards for insurance producer product training and shall maintain reasonable procedures to require its insurance producers to comply with the requirements of section 7 of this regulation;

(c) The insurer shall provide product-specific training and training materials which explain all material features of its annuity products to its insurance producers;

(d) The insurer shall maintain procedures for review of each recommendation prior to issuance of an annuity that are designed to ensure that there is a reasonable basis to determine that a recommendation is suitable. The recommended annuity would effectively address the particular consumer’s financial situation, insurance needs and financial objectives. Such review procedures may apply a screening system for the purpose of identifying selected transactions for additional review and may be accomplished electronically or through other means including, but not limited to, physical review. Such an electronic or other system may be designed to require additional review only of those transactions identified for additional review by the selection criteria;

(e) The insurer shall establish and maintain reasonable procedures to detect recommendations that are not suitable in compliance with subsections A, B, D and E. This may include, but is not limited to, confirmation of the consumer’s suitability consumer profile information, systematic customer surveys, interviews, confirmation letters and programs of internal monitoring. Nothing in this subparagraph prevents an insurer from complying with this
subparagraph by applying sampling procedures, or by confirming the suitability consumer profile information after issuance or delivery of the annuity; and

(f) The insurer shall establish and maintain reasonable procedures to assess, prior to or upon issuance or delivery of an annuity, whether a producer has provided to the consumer the information required to be provided under this section;

(g) The insurer shall establish and maintain reasonable procedures to identify and address potentially suspicious consumer refusals to provide consumer profile information;

(h) The insurer shall establish and maintain minimum procedures to identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific annuities or specific types of annuities within a limited period of time; and

(i) The insurer shall annually provide a written report to senior management, including to the senior manager responsible for audit functions, which details a review, with appropriate testing, reasonably designed to determine the effectiveness of the supervision system, the exceptions found, and corrective action taken or recommended, if any.

(2)(3) (a) Nothing in this subsection restricts an insurer from contracting for performance of a function (including maintenance of procedures) required under paragraph (1) of this subsection. An insurer is responsible for taking appropriate corrective action and may be subject to sanctions and penalties pursuant to section 8 of this regulation regardless of whether the insurer contracts for performance of a function and regardless of the insurer’s compliance with subparagraph (b) of this paragraph.

(b) An insurer’s supervision system under paragraph (1) of this subsection shall include supervision of contractual performance under this subsection. This includes, but is not limited to, the following:

(i) Monitoring and, as appropriate, conducting audits to assure that the contracted function is properly performed; and

(ii) Annually obtaining a certification from a senior manager who has responsibility for the contracted function that the manager has a reasonable basis to represent, and does represent, that the function is properly performed.

(2)(4) An insurer is not required to include in its system of supervision an insurance producer’s recommendations to consumers of products other than the annuities offered by the insurer.

GD. Prohibited Practices. Neither a producer nor an insurer shall An insurance producer shall not dissuade, or attempt to dissuade, a consumer from:

(1) Truthfully responding to an insurer’s request for confirmation of the suitability consumer profile information;

(2) Filing a complaint; or

(3) Cooperating with the investigation of a complaint.

HE. Safe harbor.

(1) Sales made in compliance with SEC regulations and applicable FINRA requirements, rules pertaining to suitability best interest obligations and supervision of annuity transactions shall satisfy the
requirements under this regulation. This subsection applies to FINRA broker-dealer sales of annuities if, in connection with the sale of an annuity, the broker-dealer and the producer, who also is appropriately registered as a representative with FINRA, have complied with the business rules, controls and procedures for securities transactions; the suitability and supervision is similar to those applied to variable annuity sales. However, nothing in this subsection shall limit the insurance commissioner’s ability to investigate and enforce (including investigate) the provisions of this regulation.

**Drafting Note:** Non-compliance with SEC and FINRA requirements means that the broker-dealer transaction is subject to compliance with the suitability requirements of this regulation.

(2) For paragraph (1) to apply, an insurer shall:

(a) Monitor the FINRA member broker-dealer using information collected in the normal course of an insurer’s business; and

(b) Provide to the FINRA member broker-dealer information and reports that are reasonably appropriate to assist the FINRA member broker-dealer to maintain its supervision system.

**Section 7. Insurance Producer Training**

A. An insurance producer shall not solicit the sale of an annuity product unless the insurance producer has adequate knowledge of the product to recommend the annuity and the insurance producer is in compliance with the insurer’s standards for product training. An insurance producer may rely on insurer-provided product-specific training standards and materials to comply with this subsection.

B. (1) (a) An insurance producer who engages in the sale of annuity products shall complete a one-time four (4) credit training course approved by the department of insurance and provided by the department of insurance-approved education provider.

(b) Insurance producers who hold a life insurance line of authority on the effective date of this regulation and who desire to sell annuities shall complete the requirements of this subsection within six (6) months after the effective date of this regulation. Individuals who obtain a life insurance line of authority on or after the effective date of this regulation may not engage in the sale of annuities until the annuity training course required under this subsection has been completed.

(2) The minimum length of the training required under this subsection shall be sufficient to qualify for at least four (4) CE credits, but may be longer.

(3) The training required under this subsection shall include information on the following topics:

(a) The types of annuities and various classifications of annuities;

(b) Identification of the parties to an annuity;

(c) How product specific annuity contract features affect consumers;

(d) The application of income taxation of qualified and non-qualified annuities;

(e) The primary uses of annuities; and

(f) Appropriate standard of conduct, sales practices, replacement and disclosure requirements.
TECHNICAL DRAFTING GROUP DRAFT

(4) Providers of courses intended to comply with this subsection shall cover all topics listed in the prescribed outline and shall not present any marketing information or provide training on sales techniques or provide specific information about a particular insurer’s products. Additional topics may be offered in conjunction with and in addition to the required outline.

(5) A provider of an annuity training course intended to comply with this subsection shall register as a CE provider in this State and comply with the rules and guidelines applicable to insurance producer continuing education courses as set forth in [insert reference to State law or regulations governing producer continuing education course approval].

(6) Annuity training courses may be conducted and completed by classroom or self-study methods in accordance with [insert reference to State law or regulations governing producer continuing education course approval].

(7) Providers of annuity training shall comply with the reporting requirements and shall issue certificates of completion in accordance with [insert reference to State law or regulations governing producer continuing education course approval].

(8) The satisfaction of the training requirements of another State that are substantially similar to the provisions of this subsection shall be deemed to satisfy the training requirements of this subsection in this State.

(9) The satisfaction of the components of the training requirements of any course or courses with components substantially similar to the provisions of this subsection shall be deemed to satisfy the training requirements of this subsection in this State.

(10) An insurer shall verify that an insurance producer has completed the annuity training course required under this subsection before allowing the producer to sell an annuity product for that insurer. An insurer may satisfy its responsibility under this subsection by obtaining certificates of completion of the training course or obtaining reports provided by commissioner-sponsored database systems or vendors or from a reasonably reliable commercial database vendor that has a reporting arrangement with approved insurance education providers.

Section 8. Compliance Mitigation; Penalties

A. An insurer is responsible for compliance with this regulation. If a violation occurs, either because of the action or inaction of the insurer or its insurance producer, the commissioner may order:

(1) An insurer to take reasonably appropriate corrective action for any consumer harmed by a failure to comply with this regulation by the insurer’s, an entity contracted to perform the insurer’s supervisory duties or by its insurance producer’s, violation of this regulation by the producer;

(2) A general agency, independent agency or the insurance producer to take reasonably appropriate corrective action for any consumer harmed by the insurance producer’s violation of this regulation; and

(3) Appropriate penalties and sanctions.

B. Any applicable penalty under [insert statutory citation] for a violation of this regulation may be reduced or eliminated [, according to a schedule adopted by the commissioner,] if corrective action for the consumer was taken promptly after a violation was discovered or the violation was not part of a pattern or practice.

Drafting Note: Subsection B above is intended to be consistent with the commissioner’s discretionary authority to determine the appropriate penalty for a violation of this regulation. The language of subsection B is not intended to require that a
commissioner impose a penalty on an insurer for a single violation of this regulation if the commissioner has determined that such a penalty is not appropriate.

Drafting Note: A State that has authority to adopt a schedule of penalties may wish to include the words in brackets. In that case, “shall” should be substituted for “may” in the same sentence. States should consider inserting a reference to the NAIC Unfair Trade Practices Act or the State’s statute that authorizes the commissioner to impose penalties and fines.

Section 9. [Optional] Recordkeeping

A. Insurers, general agents, independent agencies and insurance producers shall maintain or be able to make available to the commissioner records of the information collected from the consumer, disclosures made to the consumer, including summaries of oral disclosures, and other information used in making the recommendations that were the basis for insurance transactions for [insert number] years after the insurance transaction is completed by the insurer. An insurer is permitted, but shall not be required, to maintain documentation on behalf of an insurance producer.

Drafting Note: States should review their current record retention laws and specify a time period that is consistent with those laws. For some States this time period may be five (5) years.

B. Records required to be maintained by this regulation may be maintained in paper, photographic, micro-process, magnetic, mechanical or electronic media or by any process that accurately reproduces the actual document.

Drafting Note: This section may be unnecessary in States that have a comprehensive recordkeeping law or regulation.

Section 10. Effective Date

The amendments to this regulation shall take effect [six (6)X] months after the date the regulation is adopted or on [insert date], whichever is later.
APPENDIX A

PRODUCER RELATIONSHIP DISCLOSURE FORM

Date: ________________________

INSURANCE AGENT/PRODUCER INFORMATION (“Me”, “I”, “My”)

First Name: ______________________________ Last Name: __________________________
Firm Name: ______________________________ Website: _____________________________
Insurance License # _________________________

CLIENT INFORMATION (“You”, “Your”)

First Name: ________________________________Last Name: __________________________

INSURANCE AUTHORIZATION

I am licensed and authorized to sell insurance products, including annuities in [State] in accordance with state laws. I offer the following products:

- [ ] Fixed or Fixed Index Annuities
- [ ] Variable Annuities
- [ ] Options
- [ ] Other Investments

- [ ] Mutual Funds
- [ ] Stocks/Bonds
- [ ] Certificates of Deposits

I am authorized and contracted or appointed to sell:

- [ ] Products from ONLY ONE INSURER or Insurance Holding Company Group
- [ ] Products from Multiple Insurers

My Relationship with You:

- [ ] One-Time Commissioned Transaction
- [ ] On-Going Relationship with an asset under management fee
- [ ] Other Investments: ________________________________

I am likely to be compensated by the following sources for this relationship:

- [ ] Insurance Company
- [ ] The Consumer
- [ ] Third parties such as an Independent Marketing Organization (IMO) related to the Insurer

Other Sources ____________________________

ADDITIONAL INFORMATION
You may obtain further information regarding the cash compensation paid to me.
APPENDIX B

CONSUMER REFUSAL TO DISCLOSE ALL OR PARTIAL CONSUMER PROFILE INFORMATION FORM

I understand that should I decline to provide the requested information or should I provide inaccurate information, I am limiting the protection afforded me by the Insurance Code of this state laws regarding this purchase.

____ I REFUSE to provide this information at this time.

____ I have chosen to provide LIMITED information at this time.

____ My annuity purchase IS NOT BASED on the recommendation of this producer or the insurer.

Annuity Suitability (A) Working Group
Conference Call
July 29, 2019

The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call July 29, 2019. The following Working Group members participated: Jillian Froment, Chair (OH); Doug Ommen, Vice Chair (IA); Steve Ostlund (AL); Jodi Lerner (CA); Dean L. Cameron (ID); Tate Flott and Shannon Lloyd (KS); Nour Benchaaboun (MD); Renee Campbell (MI); Matt Holman (NE); Keith Nyhan (NH); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Lorrie Brouse (TN); and Richard Wicka (WI).

1. Discussed “Parking Lot” Issues Related to Proposed Revisions to Model #275

Director Froment reminded the Working Group of its goal from its July 23 conference call, which is to continue to discuss at a high level a framework for revising the Suitability in Annuity Transactions Model Regulation (#275) to include a best interest standard of conduct that is more than the model’s current suitability standard, but not a fiduciary standard. She reminded the Working Group that a series of questions involving some of the highlighted issues discussed during its June 20 meeting was distributed for comment during its July 23 call. She said the Working Group finished discussion of the questions related to the conflict of interest topic during its July 23 call. During this call, the Working Group would discuss the questions related to the care obligation.

The Working Group discussed whether the care obligation should include a requirement for the producer to exercise “prudence” in developing a recommendation. Ms. Lerner said she had submitted comments on this issue suggesting retaining the “prudence” requirement. Director Froment asked Ms. Lerner if her comment would change given that the Working Group is not looking to include a fiduciary standard in the Model #275 revisions. Ms. Lerner said she would still recommend retaining the requirement because the producer or insurer is dealing with a consumer’s retirement savings.

Commissioner Ommen discussed the Iowa Department of Insurance’s (DOI) reasoning for including “prudence” in its suggested revisions to Model #275 and why it recommends removing the requirement. He explained that the Iowa DOI included “prudence” in its suggested revisions because the U.S. Securities and Exchange Commission (SEC) included it in its proposed best interest regulation. However, the final best interest regulation removed it. Commissioner Ommen also explained that in Iowa, and most likely other states, “prudence” is tied to the “prudent investor rule,” which encourages the conservation of assets. He said its use creates a legal standard such that a producer or insurer could not recommend a variable annuity because a fixed annuity would be the prudent recommendation under the conservation of assets concept. The Working Group discussed the issue.

Birny Birnbaum (Center for Economic Justice—CEJ) encouraged the Working Group to include “prudence.” He said its use would elevate the model to a best interest standard. He suggested that the comments against including it concerned securities law and as such, this concern can be addressed by defining “prudence.” Mr. Gendron asked Mr. Birnbaum to provide an example that state insurance regulators could not prosecute if the word “prudence” is not included. Mr. Birnbaum said at this point, there is nothing in the proposed Model #275 revisions requiring a producer or insurer to make a recommendation in the consumer’s best interest without using the word “prudence.” Ms. Lerner asked Mr. Birnbaum for a definition of “prudence.” Mr. Birnbaum said he would provide this information in written comments later. Gary A. Sanders (National Association of Insurance and Financial Advisors—NAIFA) said NAIFA does not believe “prudence” should be included in Model #275.

The Working Group discussed the issue further, including a few scenarios and other potential revisions to Model #275, such as the use of the words “best suited,” as a potential language to address Mr. Birnbaum’s concern. Commissioner Ommen said as the proposed revisions to Model #275 reflect, there is more to the best interest obligation than the care obligation.

The Working Group discussed whether it is an appropriate standard to require a producer when making a recommendation, the recommendation be considered reasonable for an “ordinary” producer to make in a similar circumstance. Commissioner Ommen explained why the Iowa DOI included this language in its suggested revisions. Ms. Lerner said she believes an “ordinary” producer standard is too low. After additional discussion, the Working Group agreed not to include this suggested language in the next Model #275 draft revisions.
The Working Group discussed whether a producer should provide an **oral or written** description of the basis of the recommendation to the consumer or whether a producer should provide an **oral and written** description of the basis of the recommendation to the consumer. Ms. Lerner said the consumer should receive both an oral and written description of the producer’s basis of the recommendation. She said the written description should be understandable and expressed support for developing a form or template for producers to use to satisfy this requirement. Director Froment discussed the concerns some Working Group members expressed during the Working Group’s June 20 meeting with requiring a written description because a producer’s recommendation could be based on oral conversations with the consumer during initial client meetings. Commissioner Ommen also voiced potential difficulties with a written requirement. He expressed support for giving producers the option of oral or written. He also pointed out that there is a requirement for producers to provide a written documentation related to the recommendation under the documentation obligation. Director Cameron expressed support for giving producers the option.

The Working Group discussed the issue further, debating the challenges of requiring a producer to provide a written description of the basis of the recommendation as part of the producer’s communications with the consumer during initial client meetings, particularly in light of the requirement for the producer to document the basis of the recommendation under the documentation obligation. The Working Group also discussed the value of written documentation as compared to effective communication and the importance of effective communication, whether oral or written.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
Annuity Suitability (A) Working Group
Conference Call
July 23, 2019

The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call July 23, 2019. The following Working Group members participated: Jillian Froment, Chair, and Michelle Brugh Rafeld (OH); Doug Ommen, Vice Chair, Johanna Nagel and Lindsay Bates (IA); Steve Ostlund (AL); Jodi Lerner (CA); Dean L. Cameron and Geoff Baker (ID); Nour Benchaaboun, Tate Flott and Shannon Lloyd (KS); Nour Benchaaboun (MD); Randall Gregg (MI); Bob Harkins (NE); James Regalbuto (NY); Denise Lamy (NH); Andrew Schellhorn (OK); Elizabeth Kelleher Dwyer, Matt Gendron and Sarah Neil (RI); Michael Humphreys and Lorrie Brouse (TN); and Richard Wicka (WI). Also participating were: Vincent Gosz (AZ); Chris Struk (FL); Mike Chrysler (IL); Robert Wake and Lindsay Laxon (ME); Daniel Morris (SC); Travis Jordan (SD); Melissa Gerachis (VA); and Scott Bird (WA).

1. Discussed “Parking Lot” Topics from July 10 Comments

Director Froment provided an overview of the discussion from the Working Group meeting held June 20 in Columbus, OH. She explained that, following the meeting, the Working Group received eight comment letters by the July 10 deadline on the two “parking lot” topics from that meeting, including “conflict of interest” and “care obligation,” and the questions posted under each topic.

Director Froment stated that the goal of the Working Group is to define “best interest.” She explained that “best interest” is something more than suitability and something less than fiduciary. She said that because there are parties that must comply with the U.S. Security and Exchange Commission’s (SEC) best interest regulation in addition to insurance law, the Working Group will need to harmonize the Suitability in Annuity Transactions Model Regulation (#275) with the SEC regulation.

Director Froment said that as the Working Group drafts further revisions, she wants to use, as a starting point, Iowa’s proposed draft revisions to Model #275, dated May 30, 2019, because they were drafted in an attempt to harmonize with the SEC best interest regulation.

2. Discussed the Conflict of Interest Topic

a. Question 1: What constitutes a material conflict of interest when recommending annuities?

Director Froment explained that, based on the comment letters, there are two situations in which there is a potential material conflict of interest: 1) a financial conflict, based on the producer’s fees, payment or commissions; and 2) a producer with ownership interest in a parent, subsidiary or affiliate of the insurer offering the annuity.

Commissioner Ommen suggested separating extraordinary compensation (including sales contests, quotas and bonuses) from typical compensation such as common commissions or fee structures.

Ms. Lerner said even typical compensation practices could be concerning. She said the higher the commission, the greater potential conflict.

Mr. Gregg agreed with Commissioner Ommen that compensation creates a per se conflict of interest.

Ms. Neil stated that Rhode Island is also concerned about the manner in which agents are paid. She asked, once the commission is paid, what incentivizes an agent to advise that a consumer hold an investment, rather than replace it in order to obtain another commission.

Director Froment explained that there might be conflicts the producer can control and some that only the insurer can the control.

Commissioner Ommen said insurers should be responsible for managing a producer’s conflicts and incentivizing them appropriately.
Ms. Brouse said the mere fact that an agent is being compensated does not necessarily create a conflict. But insurers need to have processes in place to determine whether producers are manipulating the program to the disadvantage of the consumers.

Director Cameron said producers rarely know what compensation is for a particular product. Therefore, the regulation should not penalize agents from being compensated for selling products that help consumers achieve retirement. He stated that everyone expects agents to be paid. He recommended including a section of the model prohibiting an agent from considering non-cash compensation when recommending a product.

Director Froment summarized the discussion by explaining that there are three levels of what could create a conflict of interest, but not all of them rise to the level of a material conflict of interest: 1) a producer’s basic fees and commissions; 2) sales, quotas, bonuses and non-cash compensation that incentivizes sales of a specific product within a certain time frame; and 3) a producer’s ownership interest.

Director Froment continued by explaining that, as part of the disclosure obligation, producers should disclose that they earn a commission. Further, the ownership interest rises to the material level and probably needs its own disclosure, although that conflict would not apply to many producers. Finally, carriers should be responsible for supervising and monitoring any potential conflicts related to non-cash compensation to ensure that the incentives are not causing conflicts.

Ms. Lerner expressed her belief that disclosure of compensation should be dealt with in the supervisory section. It should be up to the insurers to notify the agents and intermediaries as to what their duties and obligations are.

Commissioner Ommen said he does not want insurers to be obligated to sit down with other insurers to determine what the compensation structure should look like, but insurers should manage the incentives.

Mr. Gendron said he would like to narrow the issue of when sales quotas create a conflict and leave this to the carriers. Director Froment agreed that the Working Group should refine that issue, because it could include a number of things.

Director Cameron explained that carriers can have an increased role in supervising, but there needs to be a better understanding of how that would work. A carrier might have overlapping incentives occurring at once, for varying lengths of time. He said if a carrier is required to disclose the incentives, the agent would need to figure out a way to explain that to the consumer. The real issue, he said, is that consumers do not want to be directed to a product because the agent would make more money. He said it would be counterproductive to force an independent agent to find out what incentives each carrier is providing.

Commissioner Ommen clarified his position on sales quotas, explaining that if sales quotas are generalized, and not tied to a specific product, it would not hinder an agent’s ability to find the best product on their shelves, based on the consumer’s profile. The insurance company is in the best position to address this.

Director Froment summarized the discussion, explaining that a producer has only so much control over certain items and the insurer is the only party that can control specific commissions, quotas and sales. She noted the Working Group’s agreement that: 1) producers should disclose that they are receiving a commission; 2) the potential for conflict in the context of incentives, which she said is about insurer supervision; and 3) producers should disclose if they have an ownership interest in a company.

Director Froment then asked for comments from interested regulators.

Mr. Wake explained that the Working Group is working to craft a standard that is more than suitability but less than fiduciary. He said producers are salespeople who work for insurance companies and insurers are in the business of giving incentives to producers to sell their product. He said it would be unrealistic to demand that insurers and producers be disinterested, but there is a need for consumers to understand clearly why insurers and producers are not fiduciaries. He said some material conflicts of interest are abusive and some are “baked” into the system. He said just because something is permissible does not mean it is not in the category of a conflict that needs to be disclosed. Separately, insurers are going to incentivize producers to sell their products, so there needs to be standards for determining when this is inappropriate. The issues that need to be addressed are when to disclose and when to mitigate. Simple commissions are currently being called a conflict and prevent agents from being totally disinterested.

Director Froment then asked to hear from interested parties.
Jason Berkowitz (Insured Retirement Institute—IRI) said that with respect to the middle “bucket” (i.e., providing guidance on how insurers should supervise) is helpful and asked that as Working Group members think about how to provide that guidance, the Working Group should keep in mind that there are producers selling products for multiple carriers. He stated his concern that the Working Group is sure not to impose supervisory responsibilities on one carrier that would extend to them supervising other carriers.

Gary Sanders (National Association of Insurance and Financial Advisors—NAIFA) agreed that regular commissions should be part of disclosure obligation. He explained that the way NAIFA members conduct business, there is a strong disincentive to go after the highest commission all the time. He said most agents are not transaction-based but relationship-based, so it is in their own best interest to look after their client’s best interest or they would lose that client relationship.

Birny Birnbaum (Center for Economic Justice—CEJ) said it is important to keep in mind that people are turning over their lifetime savings. Therefore, he said, any comparisons to auto insurance and other types of insurance are not applicable. He stated his disagreement with what he called an artificial demarcation between different types of compensation. He said the idea of focusing on bonuses or sales contests, rather than the fundamental commission structure, is misplaced. It is insurers and insurance marketing organizations (IMOs) that should have the responsibility for developing and deploying compensation structures that do not conflict with a best interest standard of care. He explained that if a producer must disclose this, it would have to be with information provided by the insurer or the IMO.

Commissioner Ommen stated that, regarding independent agents, one of the challenges is how a single carrier can manage different levels of compensation in that distribution structure.

Mr. Birnbaum answered that a carrier is responsible for developing its compensation arrangement with a particular producer. And if a producer uses several companies, that producer should get the same information from each company. It should not be the agent’s responsibility to disclose more than what the insurance company provides regarding the compensation they are receiving.

Director Froment asked Mr. Birnbaum to clarify his position on disclosure, as there is some confusion over whether the CEJ believes disclosure is helpful or a hinderance.

Mr. Birnbaum explained that there are situations where disclosure would empower a consumer and situations where it would not. He said annuities are extremely complex products that include illustrations. He said the CEJ’s concern is that adding another set of disclosures would not be effective. The disclosure should be simple and comparative between different products the producer offers. Mr. Birnbaum said there should be a requirement in the regulation that insurance companies or IMOs should employ a compensation scheme that does not undermine a best interest standard of care. Further, he stated that compensation schemes should be designed to avoid churning or unsuitable sales. And that compensation schemes should be designed to compensate or reward a producer for selling a product that stays in force to reflect the long-term investment nature of annuities.

Kim O’Brien (Fixed Annuity Consumer Choice—FACC) expressed her view that the Working Group should work on creating an objective standard and that the conversation has focused on subjective components. She said carriers and producers need to know what the standards are and what they are required to disclose, stating that a template would be helpful.

Director Froment agreed that there needs to be objective standards that both producers and insurers can comply with and regulators can enforce. She explained that the Working Group needs to coalesce around the broader ideas first and then it will drill down to the specifics.

Director Froment turned back to the Working Group, explaining that the Working Group has set forth the idea of three “buckets” that constitute the potential conflicts of interest. She explained that the first one, commissions, has been addressed in the disclosure obligation, noting that the Working Group still needs to determine if there is anything further to do under that area. Then, she explained that there is a second category, incentive compensation, which the Working Group has agreed is the insurer’s role under supervision. Finally, she explained that there is the ownership interest, which would require disclosure of the conflict so a consumer could decide whether to proceed with that producer.

Director Froment then asked whether any other regulators had thoughts on what else might constitute a material conflict of interest.
Ms. Lerner sought clarification as to whether it is the producer’s job or the insurer’s job to reveal fees, commissions and incentives. Director Froment said the disclosure obligation includes the scope and terms of the relationship; i.e., that the producer is paid when he or she sells a product. But that the producer has no ability to influence incentive compensation, so that obligation falls to insurer. Finally, she said the producer would need to disclose to the consumer if there is any ownership interest. Ms. Lerner then stated that she did not see it as the insurer’s obligation to disclose but the insurer should tell the agent what to reveal.

Commissioner Ommen agreed with Ms. Lerner that the suggestion that the middle “bucket” is a management, supervisory and structural responsibility of the insurer takes the producer off the hook for disclosure. He said the Working Group needs to look at what the producer’s disclosure should look like. He said the problem is incentives are tied to specific products. Director Froment said these would go under supervision. Commissioner Ommen agreed.

Director Froment asked whether there were any additional material conflicts of interest that do not fit into one of the three “buckets.”

Director Cameron said that some might perceive the ability for a carrier to provide office space as a potential conflict. He said he did not think office space fits in the compensation or bonus “bucket,” but it might be a subcomponent of incentives. He further explained that there are some property/casualty (P/C) carriers that incentivize their agents to sell life insurance and retirement products.

Ms. Lerner asked whether P/C carriers incentivize them with higher commissions. Director Cameron said it is part of their overall package. It might be a requirement that in order to qualify for a trip, a producer would have to sell a percentage of life and annuities.

Mr. Ostlund said it sounds like a quota system, as opposed to an incentive, and asked for clarification. Director Cameron said it depends on the company; some are quotas and some are incentives and some classifications have different commission structures. Mr. Ostlund said these would fit into the second category and he would prefer not having a fourth category. Director Cameron agreed.

Director Froment said that in following up from this call, she would like to take the broad category of conflicts and start identifying what is in the second “bucket.”

b. **Question 2:** When a material conflict of interest exists, how should an insurer and/or a producer avoid or otherwise reasonably manage the conflict?

Director Froment said that some of the discussion on the call included answering the second question under “Conflicts: When a material conflict of interest exists, how should an insurer and/or a producer avoid or otherwise reasonably manage the conflict?” But because she did not specifically ask the second question, she asked whether anyone in the Working Group had final comments on this question.

No one responded, so Director Froment concluded by saying she would circulate a chart and outline to members of the Working Group. She said the Working Group would look at questions under “Care Obligation” on the next call, which is scheduled for July 29.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
Mr. Yanacheak reminded the Working Group that it had last met July 29 via conference call, shortly before the Summer National Meeting. During that conference call, the Working Group considered outstanding issues remaining with revisions to the Annuity Disclosure Model Regulation (#245). Mr. Yanacheak summarized where the Working Group ended up on these issues. First, the Working Group settled on allowing the illustration of an index that has not been in existence for at least 15 years if certain criteria are met. Second, the Working Group agreed to require any algorithm or other method of combining the indices to be fixed from the creation of the index, without an exception for changes made pursuant to the index provider’s corporate governance rules and procedures. Third, the Working Group agreed that there should be visual differentiation between indexed returns that are based on historical performance prior to the existence of the index and indexed returns that are based on historical performance thereafter.

Mr. Yanacheak said there are two remaining issues that he would like the Working Group to discuss and resolve. The first issue is whether to allow the illustration of indices made up of only other indices, or to allow the illustration of indices made up of indices or “other financial instruments.” He explained that this issue was discussed during the Working Group’s July conference call, but because there was no working understanding of what was meant by “other financial instruments,” efforts to reach a real resolution were unsuccessful. Mr. Yanacheak explained that he had received feedback from state insurance regulators at the Summer National Meeting indicating that there needs to be a clear understanding of what is meant to be included in the index if it is more than an index made up of other indices. The second issue is whether the algorithm should be made available to the consumer for inspection, or is making it available to the insurance commissioner sufficient.

2. Discussed Availability of the Algorithm to Consumers

Mr. Yanacheak explained that over the past several years, there has been a discussion of the need for indices to be auditable. Many indices have straightforward rules that can be seen and understood and can be challenged if there is a disagreement as to what the closing value of an index is. He explained that some of the newer indices that this Working Group is charged with reviewing in the context of Model #245 are not widely used, and in some cases are only used in insurance products. He said this raises the question as to who has the ability to audit such an index and verify that the index is calculated correctly and the amount being credited to consumers is the correct amount. Mr. Yanacheak said there was a concern among state insurance regulators that if an insurance company is seeing a match between its hedging and the increase in it is having to fund, the insurance company would be satisfied as long as that was within its tolerances and may not feel the need to do a routine audit. Therefore, someone else needs to have that ability. He said the initial suggestion was to make the algorithm available to the insurance commissioner for review to audit the index that is being published to make sure it is accurate. He said there was also the suggestion that the algorithm should be made available to the consumer upon request.

Mr. Struk said he supports making the algorithm available to the insurance commissioner. Mr. Benchaaboun said Maryland also supports making the algorithm available to the insurance commissioner. He said Maryland has statutes and regulations that allow for the collection of documents in the context of market conduct exams, but he believes that in this context, it is important for the insurance commissioner to explicitly have access to this information for audit purposes. Robbie Meyer (American Council of Life Insurers—ACLI) said the ACLI supports making this information available to the insurance commissioner because, as Mr. Benchaaboun stated, there are multiple avenues under existing authority whereby the insurance commissioner could obtain this information. She said the ACLI has concerns about making this information broadly available to consumers upon request. Ms. Meyer said that while some rule books for some indices are in the public domain, the vast majority of rule books for custom indices are not in the public domain, and insurers have entered into licensing agreements that prohibit or limit the distribution of rule books because often the rule books contain intellectual property of the index provider.
She said the ACLI fully supports consumers understanding what they are purchasing through meaningful disclosure of the features and benefits. She said consumers can obtain information that is more meaningful than the algorithm from disclosures already required under other sections of Model #245. She said the ACLI would like to eliminate the reference to making the algorithm available to the consumer upon request.

Birny Birnbaum (Center for Economic Justice—CEJ) noted the contradiction in the ACLI argument that consumers should have disclosures so that they understand the product, but not have the right to see how actual changes to the index that determine the value of their product are made. He said it is necessary and reasonable to have access to methodology by which the value of an index changes so they can verify that the account value is an accurate calculation of the changes in the index. He said the CEJ thinks it is unrealistic to expect state insurance regulators to monitor and audit algorithms for a variety of insurers and products on a routine and timely basis. He said that is pretend consumer protection, not real consumer protection. He said there is no reason for the use of complex proprietary algorithms in fixed indexed annuities. Mr. Birnbaum said there is plenty of reasons why companies may want to use hedging programs that involve a variety of complex algorithms, but there is no reason for their use in indexes for fixed indexed annuities. He said the concept of using volatility-controlled indexes in a product that is structurally designed by itself to be a volatility-controlled device does not make sense. He said the idea that a licensing agreement somehow prevents disclosure to consumers is completely false. He said licensing agreements prevent use of the information for commercial purposes; they do not prevent the disclosure to a consumer to understand how the value of their product is determined. One example of the broader problem is allowing these data mined indexes to be used based on obscure and complex algorithms. This is destined to be a huge scandal for the industry and problem for state insurance regulators.

Ms. Neil said she shares some of Mr. Birnbaum’s concerns. She said a history that only exists within a particular illustration is different from something public like the S&P 500, which can be researched. She said she is not convinced that consumers can understand an algorithm, and she does not want to disclose trade secrets, but the only choice for consumers should not be to take a company’s word for it. She said it is important that consumers are able to independently verify information.

Ms. Meyer said the ACLI struggles with the breadth of this particular provision, which requires that “any algorithm or other method that is supporting such an index and is included in the illustration shall be made available ….” She said it is important for consumers to understand, but we need to be sure that disclosure is legal and that the information disclosed is meaningful. She said she supports retaining Section 6G(4)(b)(ii)(IV), which states that “[t]he consumer may request further explanation of the algorithm used to determine the weights.” She said there are other existing requirements in Model #245 that also allow the consumer to get more detailed information about the product, including the disclosure document and the Buyer’s Guide.

Mr. Birnbaum said a fundamental selling point for these products is their ability to accumulate assets over time. He said it is illogical not to share the method by which the accumulated value is calculated. He said it is inadequate disclosure to tell a consumer that a proprietary methodology is used and that it will periodically change. He said it is a false argument to assert that a licensing agreement prohibits insurers from providing basic information about a product to a consumer. Mr. Robinson proposed making the algorithm available to consumers if it is readily available. He explained that the reason is because if consumers ask to see the algorithm, and it is unavailable, that will factor into their purchasing decision. Consumers may decide if it cannot be explained to them, then they will not buy it. Mr. Struk said he likens purchasing this product to buying a mutual fund. He said a mutual fund may use an algorithm, but he would not share it with consumers because it is a proprietary investment method. Mr. Birnbaum said there is a difference between buying a security or a managed product where there is no guarantee, floor, cap or limit. He said buying an insurance product is different because there are guarantees made based on references to a specific index or indexes. Mr. Struk said he sees a similarity between the algorithm and the fund manager, which both react to changes in the market and take it outside the passive investment arena.

Mr. Yanacheak said his concern is that if the hedging is working out for the insurance company, but the consumer has a question because his or her account value is not increasing as expected, is there a way to challenge the calculation. He said, in his mind the insurance commissioner has to be able to, at a minimum, intervene to explain. He said this is not an issue with a public index that is used more than just in an insurance product. Mr. Yanacheak said where there is no use case for the index, it becomes problematic. Mr. Birnbaum said changes to the disclosure requirements will change insurer behavior. He said if the algorithms must be disclosed to consumers, insurers will respond with products that are more transparent and that will better meet consumer needs. He said this is the result of manipulating historical experience to create a fabulous illustration. He said this creates an unusually large disconnect between past experience and future performance because the past is a product of data mining, and there is no way that will work on a going forward basis. Ms. Meyer pointed out that Model #245 already requires a disclosure that states that past performance is not an indication of future performance.
Mr. Struk suggested including a drafting note suggesting that states may want to consider making the algorithm available to consumers upon request. Mr. Benchaaboun noted that algorithms are not required to be filed during the product approval process. Mr. Yanacheak asked Working Group members how they want to handle this issue. Florida, Kansas, Maryland and Minnesota said they would like the algorithm to be made available to the insurance commissioner only, with a drafting note stating that states may want to consider making the algorithm available to consumers upon request. Rhode Island and Texas indicated they would like the algorithm to be made available to the insurance commissioner and to consumers upon request. Mr. Yanacheak said the next draft would have the algorithm available to the insurance commissioner, with a drafting note to the states.

3. Discussed How to Describe What Is Meant by “a Combination of Indices or Other Financial Instruments”

Mr. Yanacheak said he would like to discuss what the Working Group thinks should and should not be allowed to be illustrated, whether that is called “indices” or “other financial instruments.” Ms. Meyer suggested allowing the illustration of indices or other financial instruments, each of which has its own verifiable and published performance history and has been in existence for 15 years. Mr. Birnbaum suggested a minimum requirement that a daily value is published. Mr. Yanacheak gave some examples of financial reference points used in certain products to see whether the Working Group thought it should be allowed to illustrate. He said there are products that have used the closing price on gold or other commodities, like oil. He said other products use currency or a blend of currency exchange rates. He said exchange-traded fund (ETF) closing prices are also used and wondered whether they should be allowed. He said he is not sure any of these could be considered indices. Pat Reeder (ACLI) said he could take this issue back to the ACLI membership.

Mr. Robinson said there are lots of financial instruments that can be used as a referent to come up with a credited rate. He said the question is whether anything should be disallowed from an illustration perspective. Mr. Robinson pointed out that the indices or financial instruments used are not totally random; they are limited by what hedges are available. Mr. Yanacheak said a revised draft based on the Working Group’s recent discussions would be distributed to Working Group members, interested state insurance regulators and interested parties and posted on the Working Group’s web page. He requested comments and suggestions on the issue of how to bring clarity to what indices or other financial instruments should be allowed to be illustrated.

Having no further business, the Annuity Disclosure (A) Working Group adjourned.
Accelerated Underwriting (A) Working Group
Austin, Texas
December 8, 2019

The Accelerated Underwriting (A) Working Group of the Life Insurance and Annuities (A) Committee met in Austin, TX, Dec. 8, 2019. The following Working Group members participated: Robert H. Muriel, Chair, Mike Chrysler, Patrick Hyde and Bruce Sartain (IL); Grace Arnold, Vice Chair, and Fred Andersen (MN); Doug Ommen and Mike Yanacheak (IA); Rich Piazza (LA); Cynthia Amann (MO); Chris Aufenthie (ND); Matt Holman and Rhonda Ahrens (NE); Mark Hamlin (OH); Sarah Neil (RI); and Mark Afable, Rickard Wicka and Lauren Van Buren (WI). Also participating were: Steve Ostlund (AL); Cuc Nguyen (OK); Michael Humphreys (PA); and Rachel Hemphill (TX).

1. Adopted its Oct. 2 Minutes

Director Muriel said the Working Group met Oct. 2. During this meeting, the Working Group developed a work plan for completing its charge by the 2020 Fall National Meeting.

Ms. Amann made a motion, seconded by Commissioner Ommen, to adopt the Working Group’s Oct. 2 minutes (Attachment Four-A). The motion passed unanimously.

2. Heard a Presentation on Accelerated Underwriting in Life Insurance

Patrick Brockett (The University of Texas at Austin) gave a presentation on accelerated underwriting in life insurance. He explained that life insurance is based on three concepts: 1) pooling many similar risk exposures into a relatively homogeneous group; 2) accumulating a fund through contributions (premiums) from the members of the group; and 3) paying from this fund for the losses of those who die each year. He said that life insurance underwriting is the process of deciding which life insurance applicants to accept, how to group them, and how to charge them appropriate premiums for their risk class. He explained that this traditionally involves assessing a person’s physical health, usually by blood work, urine analysis, doctor’s notes, physical exams, etc.

Mr. Brockett explained that the premium that an insurance company charges reflects more than just the risk class of the insured. He said the premium actually charged by the insurer takes into account multiple factors, including the probability that a person will die during the year, the face value of the policy, projected losses, commissions and administrative expenses, risk charge, taxes, and any investment income on premiums.

Mr. Brockett explained that accelerated underwriting is a fully underwritten life insurance program that allows some applicants to forgo having a medical or paramedical exam and providing fluids if they meet certain requirements and/or meet a certain pre-determined threshold, as is stated in the Klein & Rudolph, June 2019 SOA Report. He said that accelerated underwriting generally makes use of new data together with algorithmic tools and modeling techniques to risk group applicants quickly without the necessity of bodily fluids, physician’s notes, etc. For those who qualify, the use of available digital data can reduce the underwriting decision time from two to 12 weeks down to no more than 48 hours.

Mr. Brockett explained that accelerated underwriting is used by many companies, and it is most commonly used to issue term life insurance policies. He said policyholders usually pay the same rate as standard underwritten policies, but the underwriting decision is made much more quickly. He said if an applicant is in very good shape and could qualify for preferred rate pricing, standard underwriting might result in a lower priced product. He said accelerated underwritten insurance is not a guaranteed issue, and it differs from simplified issue insurance, which is insurance with no requirement for a physical exam. He explained that with accelerated underwriting, there is an assessment of physical fitness obtained from digital data. He said simplified issue premiums are expected to be more expensive than if the applicant had undergone a full underwriting process. He said accelerated underwriting premiums are equivalent to standard rates through regular underwriting.

Mr. Brockett said accelerated underwriting replaces the use of bodily fluids and doctor’s notes with the use of algorithms and data sources, such as prescription histories, motor vehicle records (MVRs), Medical Information Bureau (MIB) information, applications, interviews, consumer data, and credit scores. He said certain non-health factors, such as certain non-health factors

© 2019 National Association of Insurance Commissioners 1
are considered, they and vary by insurer. He said some insurers require no history of bankruptcy in the last five to 10 years, no history of driving recklessly or driving while intoxicated (DWI) within five years, no more than two moving violations in the past three years, and no felony charges or convictions. He said the minimum benefit amount is usually around $100,000, and the maximum benefit amount is usually around $1,000,000. He said that applicants may still need to go through regular underwriting if certain risk factors show up in accelerated underwriting.

Mr. Brockett listed some of the advantages of accelerated underwriting as opposed to regular underwriting: 1) it allows for faster decisions; 2) it is less costly to insurer, less invasive, easier way of doing business, standard or better underwriting, easier to file data, possibly more accurate underwriting, attracts younger clients, and eliminates personal bias. Conversely, he said there are limitations to be considered, like the differing state laws governing insurance and procurement data make it difficult to streamline underwriting practices. He said increased digitalization opens insurers up to new data for underwriting use, but also possibly more fraud. He said careful attention will have to be given to data privacy and security concerns. He said care must be taken when using machine learning and artificial intelligence (AI) techniques to avoid “learned” statistical biases. He said models will have to be continuously updated to maintain accuracy.

Professor Brockett also pointed out some potential areas of controversy. He said the use of complicated underwriting algorithms raises the possibility of unknown or unrecognized proxy discrimination and makes underwriting decisions more difficult to explain to clients and regulators. He said social data is more susceptible to high variances and heteroskedasticity in estimated model weights. He said another concern may be adverse selection against applicants that forego certain fluid testing.

Professor Brockett spoke about the use of credit history and other financial data in life insurance. He said credit scores are widely accepted in the P&C industry, and certain aspects of financial history have long been used in life insurance (e.g., the applicant will have to justify if the amount of insurance desired is very much more than their income level). Nevertheless, he said, because better credit scores correlate with a longer life, it may be a useful predictor. He said other uses of credit history variables in life insurance may require further study to show independent predictive value. He said a credit-mortality score can be created just like a credit insurance claim score was created for auto insurance.

Mr. Brockett said the Society of Actuaries (SOA) hired Milliman to conduct a survey of the accelerated underwriting practices of direct insurers and reinsurers. The Klein & Rudolph, June 2019 SOA Report presenting preliminary results of the survey is available on the SOA website. 27 life companies and five reinsurers responded to the survey on their accelerated underwriting programs related to data between Jan. 1, 2017, to Sept. 30, 2018.

Commissioner Ommen asked Mr. Brockett what kind of information is included in “consumer data” and what the data sources are used for. Mr. Brockett said consumer data includes credit data and data from social media platforms. He said social media data is currently used in claims verification. He said he did not think scanner data from grocery stores was being used, but it may be in the future. As far as the extent to which this kind of data is being used, he said he got his information from the preliminary data in the Klein & Rudolph, June 2019 SOA Report. He said more information will be available in the final report.

Ms. Hemphill asked Mr. Brockett how accelerated underwriting reduced bias. Mr. Brockett said that people have cognitive biases and may focus on one thing and reach different decisions with identical facts, while modeling and algorithms will always reach the same decision with the same data. He said that there may be some bias because machines are trained to emulate humans, but people can also train machines to remove human biases. Ms. Hemphill said there are some states that do not allow the use of credit scores in underwriting. Mr. Brockett agreed that there are states that prohibit the use of credit scoring in underwriting; there was a 2005 study in Texas that looked at credit score and race and concluded that credit scoring could not be used to accurately predict race.

Birny Birnbaum (Center for Economic Justice—CEJ) questioned whether someone rejected under the accelerated underwriting process could credibly expect to be accepted through the regular underwriting process. He also disagreed with Mr. Brockett with respect to the use of credit scores as a proxy for race, and he said there is a disparate impact on people of color when credit scoring is used in underwriting. He said he is also concerned about the use of facial analytics in underwriting, which has been shown to have disproportionately high error rates for women and people of color. Mr. Brockett said facial analytics can be useful in estimating life expectancy. Brendan Bridgeland (Center for Insurance Research—CIR) said using facial analytics to track aging makes sense, but the technology is not ready yet. He also asked why bankruptcy would be an automatic denial. He said he suspected that it was because there may be medical bills or risky behavior in financial aspects of one’s life, suggesting risky behavior in other aspects of life. In that case, it is duplicative of credit scoring.
Mr. Sartain asked whether reinsurers used their own underwriting algorithms and which company’s algorithms apply if there is a conflict with a ceding insurer. Donna Megregian (SOA) said that reinsurers do not re-underwrite; they accept the ceding insurers conclusions.

3. Discussed Next Steps

Director Muriel reminded the Working Group that the work plan contemplates three phases to its work. He said that Mr. Brockett’s presentation initiated the first phase—information gathering. He asked Working Group members, interested state insurance regulators, and interested parties to email any articles or presentation suggestions to Jennifer Cook (NAIC) at jcook@naic.org. He said the Working Group plans to meet via conference call during the third week of January 2020.

Having no further business, the Accelerated Underwriting (A) Working Group adjourned.
Accelerated Underwriting (A) Working Group
Conference Call
October 2, 2019

1. Discussed its Draft Work Plan

The Working Group members introduced themselves. There were a variety of divisions within the departments represented, as well as varying areas of expertise, years of service and levels of familiarity with the topics of accelerated underwriting and big data. Director Muriel explained that the Working Group received its charge “to consider the use of external data and data analytics in accelerated life underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, drafting guidance for the states” from the Life Insurance and Annuities (A) Committee at the Summer National Meeting in response to a referral from the Big Data (EX) Working Group. He explained that the Big Data (EX) Working Group looked at how the use of data models for life insurance underwriting has become more common and identified a couple of issues initially, such as: 1) whether state insurance regulators should be examining vendors that are supplying data to insurers; and 2) whether vendors are supplying similar data and models to multiple insurers. He said that the Life Actuarial (A) Task Force is also focusing on the actuarial soundness of the new data being used and potential long-term solvency issues.

Director Muriel said the draft work plan sets an ambitious schedule for the Accelerated Underwriting (A) Working Group to complete its charge by the 2020 Fall National Meeting. He explained that the work plan starts with the Working Group spending the time between the 2019 Fall National Meeting and the 2020 Spring National Meeting gathering information. He said this phase is critical to ensuring that everyone participating in the process has a certain level of understanding, especially given the make-up of this Working Group. He said the Working Group will start with hearing a presentation at the Fall National Meeting from Patrick L. Brockett (The University of Texas at Austin), an accomplished academic in this area. Following this initial meeting in Texas, Director Muriel said he anticipated hearing additional presentations offering different perspectives, such as actuarial, industry, consumer and also other states. He suggested reaching out to Jennifer Cook (NAIC) with any suggestions for presenters. Director Muriel said the second phase of the work plan, between the 2020 Spring National Meeting and 2020 Summer National Meeting, has the Working Group identifying issues and discussing whether or what issues need to be addressed and the best ways to address them, whether that is a white paper, model bulletin, model law or something else. He said the last phase of the work plan envisions the Working Group developing a work product to bring to the Life Insurance and Annuities (A) Committee by the 2020 Fall National Meeting.

Director Muriel referenced the comment letter on the work plan submitted by Birny Birnbaum (Center for Economic Justice—CEJ), which raised the concern that the work plan contemplates spending too much time gathering information and revisiting issues that have been the subject of presentations and discussions at other NAIC groups over the past several years. Director Muriel said he appreciates Mr. Birnbaum’s comments and said the timing contemplated in the work plan is flexible and can be adjusted if, for example, the information gathering phase progresses more quickly. Additionally, Director Muriel offered to have Ms. Cook post on the Working Group’s web page materials from other groups that have spent time working on this issue, such as the Big Data (EX) Working Group and the Life Actuarial (A) Task Force.

Mr. Crofton said this Working Group should coordinate with the Artificial Intelligence (EX) Working Group in case there are areas of overlap. Ms. Amann said she participated in an InsurTech conference where there were presentations from a number of start-up companies and suggested working with Denise Matthews (NAIC) to obtain some of the presentations that were particularly informative. Leonard Mangini (American Academy of Actuaries—Academy) said the Working Group should be
aware of activities going on in other NAIC groups that touch on accelerated underwriting, such as APF 2018-17, which was
added to the *Valuation Manual* and says when aggregating mortality experience, that experience must be based on the same or
similar underwriting processes. Mr. Robinson asked whether the Working Group anticipates developing a work product in
conjunction with the Life Actuarial (A) Task Force since the Working Group’s charge talks about coordination with the ongoing
work of the Life Actuarial (A) Task Force.

Mr. Birnbaum explained his background and said that he has been involved in the myriad efforts at the NAIC in this area over
the past several years. He asked the Working Group to consider moving more quickly than the time frames set out in the work
plan. He said the Working Group should be able to gather sufficient information to get up to speed on these issues in a short
amount of time because the practice of accelerated underwriting and the consumer issues implicated by the practice are well-
known. He encouraged state insurance regulators to review the materials from the other NAIC groups that have been looking
at these issues and move towards taking regulatory action as soon as possible.

Commissioner Ommen explained that this Working Group’s charge is explicitly mindful of the fact that there are other NAIC
groups working on this issue. He said this Working Group’s charge has less to do with solvency, which is the purview of the
Life Actuarial (A) Task Force, and more to do with equity and focusing beyond the responsibilities of the actuaries to evaluate
whether consumers are being treated fairly. Commissioner Ommen said this Working Group has an important task, but he
cautioned the group to do things correctly rather than just focus on moving quickly.

Having no further business, the Accelerated Underwriting (A) Working Group adjourned.
Life Insurance Illustration Issues (A) Working Group
Conference Call
October 21, 2019

The Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Oct. 21, 2019. The following Working Group members participated: Richard Wicka, Chair, and Barbara Belling (WI); Perry Kupferman (CA); Chris Struk (FL); Teresa Winer (GA); Mike Yanacheak and Russ Gibson (IA); Mary Mealer (MO); Bob Harkins (NE); Brian Hoffmeister (TN); and Deanna Osmanson and John Carter (TX). Also participating were: Tate Flott (KS); Gary Jones (PA); and David Hippen (WA).

1. Reviewed its Charge and Work Plan

Mr. Wicka reminded the Working Group of its charge to “explore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (#582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (#580) can be enhanced to promote consumer readability and understandability of these life insurance policy summaries, including how they are designed, formatted and accessed by consumers.”

Mr. Wicka reminded the Working Group that it had initially decided to add a requirement for a policy overview document in both Model #580 and Model #582 to fulfill the Working Group’s charge. However, in September 2018, the Working Group agreed to simplify the approach it had been working on by revising just Model #580 to include the requirement of a policy overview document to accompany all life insurance policies for delivery with the Life Insurance Buyer’s Guide (Buyer’s Guide). This new approach eliminates the need for revisions to Model #582.

Mr. Wicka explained that the purpose of this conference call is to continue the discussions regarding the May 20 draft revisions to Model #580 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Eight-A) from its Sept. 3 conference call.

2. Discussed the May 20 Draft of Model #580

a. Subparagraph 5A(2)(e)(iv) and Subparagraph (v)

The Working Group continued to discuss Section 5A(2)(e) “Policy Information” which shall include the following information, as applicable.” The Working Group discussed the suggestion that Birny Birnbaum (Center for Economic Justice—CEJ) submitted to combine 5A(2)(e)(iv) and (v), which both provide information about the death benefit. The Working Group agreed to the following revision:

(iv) A yes or no indication of whether the death benefit can change, and if yes, a description of the reasons and timing for a change in the death benefit;

b. Section 5A(2)(e)(vi)

The Working Group agreed to delete Section 5A(2)(e)(vi) “policy effective date” because the information is not available pre-underwriting, and the information is readily available elsewhere post-underwriting.

c. Section 5A(2)(f)

The Working Group discussed revising the “additional policy benefits” listed under Section 5A(2)(f)(i) – (ix) into “yes or no” questions. The Working Group also discussed relocating (vii) “option to lower benefits to reduce premiums” to Section 5A(2)(d), which is the section on costs. The Working Group agreed to move (viii) and to revise Section 5A(2)(f) as follows:

(f) “Additional Policy Benefits” which shall include the following information, as applicable:

(i) A yes or no indication whether a waiver of premium or deductions option is available;
(ii) A yes or no indication of whether policy conversion options exist and, if yes, a brief description of conversion options available;

(iii) A yes or no indication of options to extend the term of the coverage;

(iii) A yes or no indication of any available optional riders as requested by the insured, and if yes, an indication if there is an additional cost;

(vi) A yes or no indication of any living benefit option(s);

(vii) A yes or no indication as to whether the policy can accumulate cash value;

(viii) A yes or no indication of whether there are guaranteed interest rates on fixed accounts and any indexed account options as requested by the insured.

3. Discussed its Next Steps

Mr. Wicka said that a revised draft would be posted and that he would take additional comments on the structure and wording. He said he thinks it would be easier to consider those comments once the agreed upon revisions are incorporated into a revised draft.

Mr. Wicka said he plans to ask the Life Insurance and Annuities (A) Committee to provide guidance to the Working Group on the issue of timing for the delivery of the policy overview. He asked for comments to be sent via email to Jennifer Cook (NAIC) by Nov. 15 to give sufficient time to review them prior to the Fall National Meeting.

Mr. Wicka asked for comments to express a preference for one of the following timing options: 1) keep the timing in the current draft – delivery of the policy overview at the same time as the Buyer’s Guide, which is before the purchase of a policy, or if there is a “free look period,” at the same time or prior to delivery of the policy; 2) change the timing for the delivery of the policy overview and the Buyer’s Guide – both delivered before the purchase of a policy; or 3) separate timing requirements for the policy overview and the Buyer’s Guide – keep the same timing for the Buyer’s Guide and require delivery of the policy overview prior to purchase of a policy. He said comments on whether the policy overview should be a stand-alone document or a cover page could be included. Mr. Wicka said the comments will inform the Working Group report to the Life Insurance and Annuities (A) Committee.

Michael Lovendusky (American Council of Life Insurers—ACLI) said the ACLI will plan to submit a comprehensive comment letter. He said the ACLI has reviewed the entire work effort of the Life Insurance Illustration Issues (A) Working Group and concluded that it has fulfilled it charge to “explore” how the narrative and policy summary can be enhanced. He said any further work with respect to the larger issue of timing is beyond the scope of the current charge.

Ms. Winer said that it may be possible to untether the policy overview from the Buyer’s Guide, but it needs to remain connected to the illustration.

Mr. Birnbaum said the Working Group charge refers to the narrative summary required by Section 7B of Model #582 and the policy summary required by Section 5A(2) of Model #580. He said the narrative summary is tied to the illustration, but the policy overview serves a different purpose; it is a review of the basic features of the policy. He said the narrative summary explains the illustration, and illustrations are provided before purchase, so it should not be a stretch to provide a policy overview before purchase, especially because one of its purposes is to help consumers shop for insurance.

Having no further business, the Life Insurance Illustration Issues (A) Working Group adjourned.
The Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Sept. 17, 2019. The following Working Group members participated: Richard Wicka, Chair (WI); Jodi Lerner (CA); Chris Struk (FL); Teresa Winer (GA); Mike Yanacheak (IA); Mary Mealer (MO); Bob Harkins (NE); Brian Hoffmeister (TN); and Doug Danzeiser (TX). Also participating were: Tate Flott (KS); Denise Lamy (NH); Tom Kilcoyne (PA); Tanji Northrup (UT); James Young (VA); and David Hippen (WA).

1. **Reviewed its Charge and Work Plan**

Mr. Wicka reminded the Working Group of its charge to “explore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (#582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (#580) can be enhanced to promote consumer readability and understandability of these life insurance policy summaries, including how they are designed, formatted and accessed by consumers.”

Mr. Wicka reminded the Working Group that it had initially decided to add a requirement for a policy overview document in both Model #580 and Model #582 to fulfill the Working Group’s charge. However, in September 2018, the Working Group agreed to simplify the approach it had been working on by revising just Model #580 to include the requirement of a policy overview document to accompany all life insurance policies for delivery with the Life Insurance Buyer’s Guide (Buyer’s Guide). This new approach eliminates the need for revisions to Model #582.

Mr. Wicka explained that the purpose of this conference call is to continue the discussions about the May 20 draft revisions to Model #580 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Eight-A) from its Sept. 3 conference call.

2. **Discussed May 20 Draft of Model #580**

   a. **Revising the “Cost Information” Definition**

Mr. Wicka said that following the Working Group’s Sept. 3 conference call, he suggests the following revisions to Section 5A(2)(d):

   (d) “Cost Information” which shall include the following information, as applicable:

   (i) Initial premium or estimated premium at the time of application and premium mode selected;

   (ii) A short statement describing yes or no indication if the premium varies can vary after the first year, and, if so, a statement as to where the insured can find information a brief explanation as to how the premium will be determined after the first year;

   (iii) Available options for premium funding such as policy payment periods, any dividend options or lump sum payments options;

He explained that the revision to (i) allows for flexibility in the information included in the Policy Summary in case it were to be delivered prior to underwriting.

Birny Birnbaum (Center for Economic Justice—CEJ) agreed with this revision and suggested adding language saying the premium is based on initial information and is subject to change.

Mr. Wicka said the suggested revision to (ii) is to simplify the requirement, and the suggestion to delete (iii) was made in several comments. The Working Group agreed to make these revisions.
b. **Moving the Reference to “Waiver of Premium or Deductions Option” from “Cost Information” to “Additional Policy Benefits”**

The Working Group discussed whether the information required in Section 5A(2)(d)(iv)—“A yes or no indication whether a waiver of premium or deductions option is available”—would better fit in the information required under Section 5A(2)(f) “Additional Policy Benefits, which shall include the following information, as applicable.” The Working Group agreed that it made sense to relocate (iv) to Section 5A(2)(f).

c. **Rewording Section 5A(2)(d)(v)**

The Working Group discussed streamlining (v) to a yes or no indication of whether there are surrender charges, which is consistent with the formatting elsewhere. The Working Group discussed whether in this instance, yes or no provides enough information.

Mr. Birnbaum said the goal is to provide key information for comparison purposes and suggested providing a schedule of charges.

Ms. Winer said that disclosure is helpful, but only if it is meaningful. She said that providing too much information is confusing and not helpful.

Brian Lessing (AXA Equitable) said surrender charges are complicated and are based on a formula that can differ based on premiums paid.

Mr. Wicka said he would like consumers to be aware that there are surrender charges, but he said is not convinced that there needs to be a high level of detail included.

Ms. Lerner said it is important for consumers to know what the surrender charges are before they purchase a product and suggested a basic summary of the surrender charge, how long it lasts and when it is highest, like in the first five years.

Ms. Mealer suggested perhaps the yes or no question and how long are there surrender charges, and then direct them to the policy for details. Mr. Birnbaum said he is concerned that consumers need this information before purchasing the policy.

Ms. Lerner agreed to provide the Working Group with an example of a disclosure of this information.

The Working Group agreed to make the following change to Section 5A(2)(d)(v):

\[(v) \text{ A description of yes or no indication of whether there are surrender charges and, if so, the period of time that surrender charges apply;} \]

d. **Revising the “Cost of Insurance” Information**

The Working Group discussed Section 5A(2)(d)(vi): “A narrative description of the cost of insurance and other fees needed to keep the policy in force and how those fees may change over time.”

Ms. Winer expressed concern that the information included would be overwhelming to consumers and would defeat the purpose of having a summary. She said the purpose of the summary is to alert consumers to information so they can know to look deeper, not to provide exhaustive detail.

Mr. Wicka agreed that the intent is for consumers to understand how they are going to be charged, short of putting everything in the summary.

Mr. Birnbaum said he wants more explicit disclosure of the charges and fees. He said he would like to see an itemization like one included in the discussion about *Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest* (AG 49). He said it would be easy to include this information here: What is the cost of insurance? How much is it? Can it change? How much can it change?

Ms. Mealer agreed with Mr. Birnbaum on this point.
Michael Lovendusky (American Council of Life Insurers—ACLI) said the Life Actuarial (A) Task Force’s work on indexed universal life and AG 49 is at the other end of the spectrum from this discussion about a Policy Summary. He said this is a simple “front porch” document and that cost of insurance fees in policies are hotly litigated. He said the idea that the Policy Summary could tease out the elemental pieces of the cost of insurance will lead to useless information at best or so much information it would not be helpful. He suggested including a statement that the cost of insurance exists and that there is a cap beyond which it cannot exceed and leave it at that.

Ms. Winer said cost of insurance depends on cash value and multipliers and is complicated.

Mr. Birnbaum said there is no need to get too caught up in the details; he said just include enough information that a consumer could compare one policy to another and say, for example: The cost of insurance is between 1% of cash value up to 3% of cash value.

Mr. Lovendusky suggested including what the cost of insurance is and how high it can go up, but get no more granular.

Mr. Wicka suggested including three elements: 1) cost of insurance charge; 2) net amount at risk; and 3) maximum allowable charge.

The Working Group agreed to the following revision to Section 5A(2)(d)(vi):

- (vi) If applicable, a narrative explanation of the cost of insurance fee, a narrative explanation of the net amount of risk to which the fee will apply, and other fees needed to keep the policy in force and how those fees may change over time the maximum allowable cost of insurance fee allowed under the policy.

- Deleting “Product Type (Including Single or Joint Policy)”

Mr. Wicka said the CEJ suggested removing the requirement for indicating “product type (including single or joint policy)” in Section 5A(2)(e)(i).

Ms. Lerner said the information should be included, although she said she does not have a preference about location.

The Working Group observed that this information was included at the top of the sample policy overview and agreed to look at it again when reviewing the sample.

- Deleting “Form Number”

Mr. Wicka said the ACLI suggested, and the Working Group agreed, to the following revision to Section 5A(2)(e)(ii) because the form number is not necessary information for a consumer:

- (ii) Product name and form number

- Clarifying “Coverage Period Description”

The Working Group discussed what information is intended to be included.

Mr. Yanacheak said this is intended to capture how long a policy’s term is; i.e., a term of years or for life. Mr. Birnbaum said it is intended to answer the question: If I pay my premium, this policy will cover x amount of time.

Mr. Yanacheak asked whether this encompasses a term policy that is annually renewable for a much higher cost after the initial term. He said this could be how the policy is worded or available through a rider. He said the final language just needs to be clear.

Mr. Wicka suggested, and the Working Group agreed, to the following revised language to Section 5A(2)(e)(iii):

- (iii) Indicate whether it is a term or permanent policy. If it is a term policy, indicate the length of the initial term.
3. **Discussed its Next Steps**

Mr. Wicka said the Working Group will review a revised draft and consider the suggestions of Mr. Birnbaum to put the data elements in a different order during its next conference call.

Having no further business, the Life Insurance Illustration Issues (A) Working Group adjourned.

W:\National Meetings\2019\Fall\Cmte\A\LIIWG\LIIWG confcall 9-17-19 final.docx
The Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Sept. 3, 2019. The following Working Group members participated: Richard Wicka, Chair, and Justine Bellamy (WI); Jodi Lerner (CA); Chris Struk (FL); Teresa Winer (GA); Mike Yanacheak and Russ Gibson (IA); Mary Mealer (MO); Robert E. Harkins (NE); Jana Jarrett (OH); Rachel Jade-Rice (TN); and John Carter and Doug Danzeiser (TX). Also participating were: Steve Oslund (AL); Mike Chrysler (IL); Tate Flott (KS); Denise Lamy (NH); James Young (VA); and David Hippen (WA).

1. Reviewed its Charge and Work Plan

Mr. Wicka reminded the Working Group of its charge to “explore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (#582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (#580) can be enhanced to promote consumer readability and understandability of these life insurance policy summaries, including how they are designed, formatted and accessed by consumers.”

Mr. Wicka reminded the Working Group that it had initially decided to add a requirement for a policy overview document in both Model #580 and Model #582 to fulfill the Working Group’s charge. However, in September 2018, the Working Group agreed to simplify the approach it had been working on by revising just Model #580 to include the requirement of a policy overview document to accompany all life insurance policies for delivery with the Life Insurance Buyer’s Guide (Buyer’s Guide). This new approach eliminates the need for revisions to Model #582.

Mr. Wicka explained that the purpose of this conference call is to continue the discussions about the May 20 draft revisions to Model #580 (see NAIC Proceedings – Fall 2019, Life Insurance and Annuities (A) Committee, Attachment Eight-A) started during its July 30 conference call.

Michael Lovendusky (American Council of Life Insurers—ACLI) said the ACLI had submitted comments on the general direction of the Working Group. He said the ACLI was happy to continue with developing the policy overview for the three types of life insurance policies, but he observed that it would be challenging to finish by the Fall National Meeting. He said moving the time frame for delivery of the policy overview to before the time when personal information has been gathered and underwriting has occurred defeats the purpose of the document. He said the ACLI suggests that, if the time frame for delivery is going to be changed, rather than continue developing a policy overview, the Working Group should align this effort with the Life Insurance Online Guide (A) Working Group that is currently working on an online buyer’s guide for consumers.

2. Discussed May 20 Draft of Model #580 and May 16 Sample Overview Form

a. Discussed “Illustration” Definition

The May 20 draft includes the following definition:

“Illustration” means a presentation or depiction that includes non-guaranteed elements of a policy of life insurance over a period of years that is subject to [insert state equivalent to Model #582].

Mr. Lovendusky said the ACLI made two alternative recommendations for revising the definition of “Illustration” in Model #580. The first suggestion was to simplify the definition so that it points to the state law equivalent to Model #582: “‘Illustration’ means a presentation or depiction of a policy of life insurance that is subject to [insert state equivalent to Model #582].” He said an alternative suggestion is for the definition to exactly duplicate the definition in Model #582.

Birny Birnbaum (Center for Economic Justice—CEJ) said referencing the state law equivalent to Model #582 would only work if a state has adopted something exactly like the model. He suggested adding a reference to guaranteed elements in addition to non-guaranteed elements because Model #582 provides that illustrations include guaranteed and non-guaranteed elements.
Mr. Wicka said the definition in the May 20 draft is the exact language from Model #582, without the description of the three types of illustrations. The Working Group agreed to keep the language from the May 20 draft.

b. **Discussed “Policy Overview” Definition**

The May 20 draft includes the following definition:

> “Policy Overview” means a brief summary of the policy prepared in accordance with this regulation, and an example may be found in Appendix A.

Mr. Birnbaum suggested revising this definition to include language mirroring the purpose of the model and requiring that a policy overview is substantially similar to the sample documents being developed, as follows:

> “Policy Overview” means a document describing the basic features of the policy presented in a manner to facilitate the purposes of this model, containing the elements required in section 5.A., and substantially similar to the model forms found in Appendix A.

Mr. Birnbaum said the narrative and policy summaries created by the insurance companies to comply with the requirements in Model #580 and Model #582 were wildly different from each other, and the substantially similar language is need in order to not end up with the same problem that led to the charge of the Working Group.

Mr. Wicka reminded the Working Group that the intention from the beginning was to develop sample templates for policy overviews that would not be required. He asked the Working Group if there was a desire to revisit this issue.

Ms. Mealer said she preferred having the templates serve as examples, not be a required form.

Ms. Lerner said she would like for the samples to be mandatory because there should be a way for consumers to compare policies easily.

Mr. Lovendusky said assisting consumers to compare products is outside the scope of the Working Group’s charge, and it would limit innovation and harm consumers.

Mr. Birnbaum said the Working Group’s charge specifically includes how the summaries are “designed, formatted and accessed” by consumers, and the stated purpose of Model #580 is to “require insurers to deliver to purchasers of life insurance information that will improve the buyer’s ability to select the most appropriate plan of life insurance for the buyer’s needs.”

The Working group agreed to keep the language from the May 20 draft.

c. **Discussed Allowing Insurers to Combine the Guaranteed Premium and Benefit Patterns Summary with the Policy Overview When There is No Illustration**

Mr. Wicka said the ACLI comment letter and the Pacific Life comment letter both suggested allowing an insurer to combine the “Policy Overview” with the “Guaranteed Premium and Benefit Patterns Summary” when a policy will not be marketed with an illustration. The comment letters suggested the following definition:

> “Guaranteed Premium and Benefit Patterns Summary” is a separate document that accompanies the Policy Overview where the insurer has identified the policy as one that will not be marketed with an illustration. The insurer may combine the Guaranteed Premium and Benefit Patterns Summary and Policy Overview into a single document.

Mr. Wicka explained the evolution of the Policy Overview document from a cover page to the policy and narrative summaries to a stand-alone document to be delivered at the same time as the Buyer’s Guide.

Ms. Mealer said she is not opposed unless there is an identifiable harm to combining the documents.

Ms. Lerner said she was hesitant to do anything that would make documents longer, and therefore, less consumer friendly.
Mr. Danzeiser said he does not object to combining the documents.

Mr. Birnbaum said this proposal would recreate the problems that gave rise to the need for the charge. He said the initial proposal of a one-to-two-page cover document that explains the key features of the policy is not the same as the proposal to allow insurers to combine these two documents. He said allowing insurers to combine the documents is counter-productive to the goals of the Working Group to improve consumers’ ability to compare products.

Mr. Lovendusky said it was never the goal of the Working Group to have a template to help consumers compare policies.

Mr. Birnbaum said the format will change if the two documents are combined, and there is no evidence that combining the documents will make them any shorter or easier to understand. He said it is more likely that they will be less consumer friendly.

Ms. Lerner said the Working Group’s charges are to promote consumer readability and understandability through consideration of how they are designed, formatted and accessed by consumers. She said the way it is set out in the May 20 draft promotes consumer understandability through a consistent format.

Ms. Mealer made motion, seconded by Mr. Harkins, to replace the definition of “Guaranteed Premium and Benefit Patterns Summary” in the May 20 draft with the language proposed by the ACLI. Missouri and Texas voted in favor of the motion. California, Iowa, Nebraska and Tennessee voted against the motion. The motion failed. The definition of “Guaranteed Premium and Benefit Patterns Summary” will not change from the May 20 draft.

d. Discussed Timing for Delivery of Policy Overview

Mr. Wicka explained that Section 5A(1) requires insurers to provide a Buyer’s Guide to all prospective purchasers, prior to accepting the applicant’s initial premium or premium deposit, except when there is a “free look” period of at least 10 days, in which case, the Buyer’s Guide may be delivered with the policy or prior to delivery of the policy. Section 5A(2) requires that the Policy Overview is delivered at the same time as the Buyer’s Guide. Ms. Lerner said she would like to see the Buyer’s Guide and the Policy Overview delivered at the time of application. She said if the Buyer’s Guide and Policy Overview are intended to help people understand the type of insurance they would like to purchase, getting it at the time of policy delivery is too late. She said if either of these documents are to be meaningful, consumers need them earlier.

Mr. Struck said it would be preferable for people to get information to help them understand what they are purchasing, rather than what they have already purchased.

Mr. Lovendusky said a change in the timing for providing the Buyer’s Guide would create a substantial change in operations for insurers, and it is beyond the scope of what the Working Group should be trying to achieve. He said if the delivery requirements are changed, the Policy Overview cannot include some of the detailed consumer-specific information contemplated.

Mr. Wicka reiterated that the Working Group’s charge specifically contemplates how summaries are “designed, formatted and accessed” by consumers, which encompasses the delivery requirement.

Ms. Winer said information is largely, if not exclusively, online, so it may be time to revisit the delivery timing requirements.

Mr. Wicka said another option is to separate the Buyer’s Guide delivery requirements from the Policy Overview. Mr. Birnbaum said they could be separated, but it makes sense to deliver them at the same time. He said with respect to the Buyer’s Guide, it is a static document that can be easily delivered electronically. He said the Policy Overview should also be delivered before consumers have paid their premium. He said industry’s position ensures that consumers cannot shop before they apply.

Randy Foster (American International Group—AIG) said it would be extremely burdensome to have to provide the Policy Overview at the time of application. He said there is no policy at the time of application and consumers may end up with something completely different after underwriting. He said while much is unknown at the time of application, at the time of policy delivery, things are set, and consumers have the free look period to assess the details. He said if something is provided earlier in the process, it will be more difficult to prove up compliance.
Mr. Wicka said the Working Group needs to have additional discussion before changing the timing requirements for delivery of the Policy Overview. The Working Group agreed.

Having no further business, the Life Insurance Illustration Issues (A) Working Group adjourned.
Life Insurance Illustration Issues (A) Working Group
Conference Call
July 30, 2019

The Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call July 30, 2019. The following Working Group members participated: Richard Wicka, Chair (WI); Jodi Lerner (CA); Chris Struk (FL); Teresa Winer (GA); Mike Yanacheak (IA); Mary Mealer (MO); Robert E. Harkins (NE); Brian Hoffmeister (TN); and Doug Danzeiser (TX). Also participating were: Tate Flott (KS); Denise Lamy (NH); Tom Kilcoyne (PA); Tanji Northrup (UT); James Young (VA); and David Hippen (WA).

1. Reviewed its Charge and Work Plan

Mr. Wicka reminded the Working Group of its charge to “explore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (Model #582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (Model #580) can be enhanced to promote consumer readability and understandability of these life insurance policy summaries, including how they are designed, formatted and accessed by consumers.”

Mr. Wicka reminded the Working Group that it had initially decided to add a requirement for a policy overview document in both Model #580 and Model #582 to fulfill the Working Group’s charge. However, in September 2018, the Working Group agreed to simplify the approach it had been working on by revising just Model #580 to include the requirement of a policy overview document to accompany all life insurance policies for delivery with the Life Insurance Buyer’s Guide (Buyer’s Guide). This new approach eliminates the need for revisions to Model #582.

Mr. Wicka explained that the purpose of this conference call is to discuss the May 20 draft revisions to Model #580 (Attachment Eight-A) that was exposed for a public comment period ending June 21. He said comments were posted on the Annuity Disclosure (A) Working Group web page.

2. Discussed the May 20 Draft of Model #580 and May 16 Sample Overview Form

   a. Discussed the “Illustration” Definition

The May 20 draft includes the following definition: “Illustration” means a presentation or depiction that includes nonguaranteed elements of a policy of life insurance over a period of years that is subject to [insert state equivalent to Life Insurance Illustrations Model Regulation].

Michael Lovendusky (American Council of Life Insurers—ACLI) said the ACLI made two alternative recommendations for revising the definition of “illustration” in Model #580. The first suggestion was to simplify the definition so it points to the state law equivalent to Model #582: “Illustration means a presentation or depiction of a policy of life insurance that is subject to [insert state equivalent to Life Insurance Illustration Model Regulation].” He said an alternative suggestion is for the definition to exactly duplicate the definition in Model #582.

Birny Birnbaum (Center for Economic Justice—CEJ) said referencing the state law equivalent to Model #582 would only work if a state has adopted something exactly like the model. He suggested adding a reference to guaranteed elements in addition to nonguaranteed elements because Model #582 provides that illustrations include guaranteed and nonguaranteed elements.

Mr. Wicka said that the definition in the May 20 draft is the exact language from Model #582, without the description of the three types of illustrations. The Working Group agreed to keep the language from the May 20 draft.

   b. Discussed “Policy Overview” Definition

The May 20 draft includes the following definition: “‘Policy Overview’ means a brief summary of the policy prepared in accordance with this regulation, and an example may be found in Appendix A.”
Mr. Birnbaum suggested revising this definition to include language mirroring the purpose of the model and to require that a policy overview is substantially similar to the sample documents being developed, as follows: “‘Policy overview’ means a document describing the basic features of the policy presented in a manner to facilitate the purposes of this model, containing the elements required in section 5.A. and substantially similar to the model forms found in Appendix A.”

Mr. Birnbaum said the narrative and policy summaries created by the insurance companies to comply with the requirements in Model #580 and Model #582 were wildly different from each other and that substantially similar language is needed in order to not end up with the same problem that led to the charge of the Working Group.

Mr. Wicka reminded the Working Group that the intention from the beginning was to develop sample templates for policy overviews that would not be required. He asked the Working Group if there was a desire to revisit this issue. Ms. Mealer said she prefers having the templates serve as examples and not be a required form.

Ms. Lerner said she would like for the samples to be mandatory because there should be a way for consumers to compare policies easily.

Mr. Lovendusky said assisting consumers to compare products is outside the scope of the Working Group’s charge and would limit innovation and harm consumers.

Mr. Birnbaum said the Working Group’s charge specifically includes how the summaries are “designed, formatted and accessed” by consumers, and the stated purpose of Model #580 is to “require insurers to deliver to purchasers of life insurance information that will improve the buyer’s ability to select the most appropriate plan of life insurance for the buyer’s needs.”

The Working group agreed to keep the language from the May 20 draft.

c. Discussed Allowing Insurers to Combine the Guaranteed Premium and Benefit Patterns Summary with the Policy Overview When There Is No Illustration

Mr. Wicka said the ACLI comment letter and the Pacific Life comment letter both suggested allowing an insurer to combine the “Policy Overview” with the “Guaranteed Premium and Benefit Patterns Summary” when a policy will not be marketed with an illustration. They suggested the following definition: “‘Guaranteed Premium and Benefit Patterns Summary’ is a separate document that accompanies the Policy Overview where the insurer has identified the policy as one that will not be marketed with an illustration. The insurer may combine the Guaranteed Premium and Benefit Patterns Summary and Policy Overview into a single document.”

Mr. Wicka explained the evolution of the Policy Overview document from a cover page to the policy and narrative summaries to a stand-alone document to be delivered at the same time as the Buyer’s Guide.

Ms. Mealer said she is not opposed unless there is an identifiable harm to combining the documents.

Ms. Lerner said she is hesitant to do anything that would make documents longer and, therefore, less consumer-friendly.

Mr. Danzeiser said he does not object to combining the documents.

Mr. Birnbaum said this proposal would recreate the problems that gave rise to the need for the charge. He said the initial proposal of a one- to two-page cover document that explains the key features of the policy is not the same as the proposal to allow insurers to combine these two documents. He said allowing insurers to combine the documents is counter-productive to the goals of the Working Group to improve consumers’ ability to compare products.

Mr. Lovendusky said it was never the goal of the Working Group to have a template to help consumers compare policies.

Mr. Birnbaum said the format will change if the two documents are combined, and there is no evidence that combining the document will make them any shorter or easier to understand. He said it is more likely they will be less consumer-friendly.

Ms. Lerner said the Working Group’s charges are to promote consumer readability and understandability through consideration of how they are designed, formatted and accessed by consumers. She said the way it is set out in the May 20 draft promotes consumer understandability through a consistent format.
Ms. Mealer made motion, seconded by Mr. Harkins, to replace the definition of “Guaranteed Premium and Benefit Pattern Summary” in the May 20 draft with the language proposed by the ACLI. Missouri and Texas voted in favor of the motion. California, Iowa, Nebraska and Tennessee voted against the motion. The motion failed. The definition of “Guaranteed Premium and Benefit Pattern Summary” does not change from the May 20 draft.

d. Discussed Timing for Delivery of the Policy Overview

Mr. Wicka explained that Section 5A(1) requires insurers to provide a Buyer’s Guide to all prospective purchasers, prior to accepting the applicant’s initial premium or premium deposit, except when there is a “free look” period of at least 10 days. In that case, the Buyer’s Guide may be delivered with the policy or prior to delivery of the policy. Section 5A(2) requires that the Policy Overview is delivered at the same time as the Buyer’s Guide.

Ms. Lerner said that she would like to see the Buyer’s Guide and the Policy Overview delivered at the time of application. She said if the Buyer’s Guide and Policy Overview are intended to help people understand the type of insurance they would like to purchase, getting it at the time of policy delivery is too late. She said if either of these documents are to be meaningful, consumers need them earlier.

Mr. Struck said it would be preferable for people to get information to help them to understand what they are purchasing, rather than what they have already purchased.

Mr. Lovendusky said a change in the timing would create a substantial change in operations for insurers and is beyond the scope of what the Working Group should be trying to achieve. He said changes to the timing for the Buyer’s Guide are beyond the scope of the Working Group’s charge. He said if the delivery requirements are changed, the Policy Overview cannot include some of the detailed consumer-specific information contemplated.

Mr. Wicka reiterated that the Working Group’s charge specifically contemplates how summaries are “designed, formatted and accessed” by consumers, which encompasses the delivery requirement. Ms. Winer said information is largely, if not exclusively, online, so it may be time to revisit the delivery timing requirements.

Mr. Wicka said another option is to separate the Buyer’s Guide delivery requirements from the Policy Overview.

Mr. Birnbaum said they could be separated but that it makes sense to deliver them at the same time. He also said, with respect to the Buyer’s Guide, it is a static document that can be easily delivered electronically. He said the Policy Overview should also be delivered before consumers have paid their premium. He said industry’s position ensures that consumers cannot shop before they apply.

Randy Foster (AIG) said it would be extremely burdensome to have to provide the Policy Overview at the time of application. He said there is no policy at the time of application, and consumers may end up with something completely different after underwriting. He said while much is unknown at the time of application, at the time of policy delivery, things are set and consumers have the free-look period to assess the details. He said if something is provided earlier in the process, it will be more difficult to prove up compliance.

Mr. Wicka said the Working Group needs to have additional discussion before changing the timing requirements for delivery of the Policy Overview. The Working Group agreed.

Having no further business, the Life Insurance Illustration Issues (A) Working Group adjourned.
Revision marks show changes to existing model. Comments are requested by close of business June 21, 2019

DRAFT 5-20-19

LIFE INSURANCE DISCLOSURE MODEL REGULATION

Table of Contents
Section 1. Authority
Section 2. Purpose
Section 3. Scope
Section 4. Definitions
Section 5. Duties of Insurers
Section 6. Preneed Funeral Contracts or Prearrangements
Section 7. General Rules
Section 8. Failure to Comply
Section 9. Separability
Section 10. Effective Date

Section 1. Authority

This rule is adopted and promulgated by the commissioner of insurance pursuant to [insert state equivalent to Section 4A(1) of the Unfair Trade Practices Act] of the Insurance Code.

Drafting Note: Insert title of chief insurance regulatory official wherever the term “commissioner” appears.

Section 2. Purpose

A. The purpose of this regulation is to require insurers to deliver to purchasers of life insurance information that will improve the buyer’s ability to select the most appropriate plan of life insurance for the buyer’s needs and improve the buyer’s understanding of the basic features of the policy that has been purchased or is under consideration.

B. This regulation does not prohibit the use of additional material that is not a violation of this regulation or any other [state] statute or regulation.

Section 3. Scope

A. Except for the exemptions specified in Section 3B, this regulation shall apply to any solicitation, negotiation or procurement of life insurance occurring within this state. Section 5B shall apply only to an existing nonexempt policy held by a policyowner residing in this state. This regulation shall apply to any issuer of life insurance contracts including fraternal benefit societies.

B. This regulation shall not apply to:

(1) Individual and group annuity contracts;

(2) Credit life insurance;

(3) Group life insurance (except for disclosures relating to preneed funeral contracts or prearrangements; these disclosure requirements shall extend to the issuance or delivery of certificates as well as to the master policy);

(4) Life insurance policies issued in connection with pension and welfare plans as defined by and which are subject to the federal Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. Section 1001 et seq. as amended; or
(5) Variable life insurance under which the amount or duration of the life insurance varies according to the investment experience of a separate account.

Section 4. Definitions

For the purposes of this regulation, the following definitions shall apply:

A. “Buyer’s Guide” means the current Life Insurance Buyer’s Guide adopted by the National Association of Insurance Commissioners (NAIC) or language approved by the commissioner.

B. “Current scale of nonguaranteed elements” means a formula or other mechanism that produces values for an illustration as if there is no change in the basis of those values after the time of illustration.

C. “Generic name” means a short title that is descriptive of the premium and benefit patterns of a policy or a rider.

C. “Illustration” means a presentation or depiction that includes non-guaranteed elements of a policy of life insurance over a period of years that is subject to [insert state equivalent to Life Insurance Illustrations Model Regulation].

D. “Nonguaranteed elements” means the premiums, credited interest rates (including any bonus), benefits, values, non-interest based credits, charges or elements of formulas used to determine any of these, that are subject to company discretion and are not guaranteed at issue. An element is considered non-guaranteed if any of the underlying non-guaranteed elements are used in its calculation.

E. “Policy data” means a display or schedule of numerical values, both guaranteed and nonguaranteed for each policy year or a series of designated policy years of the following information: illustrated annual, other periodic, and terminal dividends; premiums; death benefits; cash surrender values and endowment benefits.

F. “Policy summary Overview” means a written statement describing the elements of the policy, including, but not limited to brief summary of the policy prepared in accordance with this regulation and an example may be found in Appendix A.

G. “Guaranteed Premium and Benefit Patterns Summary” is a separate document that accompanies the Policy Overview where the insurer has identified the policy as one that will not be marketed with an illustration.

G. “Preneed funeral contract or prearrangement” means an agreement by or for an individual before that individual’s death relating to the purchase or provision of specific funeral or cemetery merchandise or services.

Section 5. Duties of Insurers

A. Requirements Applicable Generally

(1) The insurer shall provide a Buyer’s Guide to all prospective purchasers, prior to accepting the applicant’s initial premium or premium deposit. However, if the policy for which application is made contains an unconditional refund provision of at least ten (10) days, the Buyer’s Guide may be delivered with the policy or prior to delivery of the policy.

(2) The insurer shall provide a Policy Overview to all prospective purchasers. Delivery of the Policy Overview shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). Insurers should endeavor to limit the length of the Policy Overview to the minimum length necessary to reasonably inform consumers of the information required to be included in the Policy Overview. The Policy Overview is not required to be in a specific format beyond the requirements of the Section. The Policy Overview must be prepared in language and in a format that would be understood by a typical person within the segment of the public to which the policy is
directed. A sample Policy Overview that meets the requirements of this Section is provided in Appendix A. A Policy Overview shall include the following sections labeled with the following headings:

(a) An introductory section containing the following language: “This document lists this product’s key features, benefits and costs. You can get a similar summary of key product features from other insurance companies to help you compare similar products. If you have questions about this particular life insurance product, ask the agent, broker, advisor, or a company representative offering this product for clarification. If you have questions about life insurance products generally or about company or agent licensing, contact [insert reference to state department of insurance].”

(b) The name and address of the insurance agent or, if no agent is involved, a statement of the procedure to be followed in order to receive responses to inquiries regarding the Policy Overview. The full name and home office or administrative office address of the company in which the life insurance policy is to be or has been written;

(c) “Information about the Insured” which shall include the following information, as applicable:

(i) Gender of insured or insureds;

(ii) Issue age of insured or insureds;

(iii) Risk class with a statement as to where the insured can find additional information regarding risk classes;

(iv) The following statement: “In the course of considering an insured’s application, an insurer may request or collect health information about the insured in variety of ways.” The statement shall indicate whether a physical examination or questionnaire will be required.

(d) “Cost Information” which shall include the following information, as applicable:

(i) Initial premium and premium mode;

(ii) A short statement describing if the premium varies after the first year, and, if so, a statement as to where the insured can find information as to how the premium will be determined after the first year;

(iii) Available options for premium funding such as policy payment periods, any dividend options or lump sum payments options;

(iv) A yes or no indication whether a waiver of premium or deductions option is available;

(v) A description of surrender charges and the period of time that surrender charges apply;

(vi) A narrative description of the cost of insurance and other fees needed to keep the policy in force and how those fees may change over time.

(e) “Policy Information” which shall include the following information, as applicable:

(i) Product type (Including single or joint policy);
(ii) Product name and form number;

(iii) Coverage period description;

(iv) Initial death benefit and a yes or no indication as to whether the death benefit can change;

(v) Death benefit option;

(vi) Policy effective date;

(vii) State of issue;

(viii) Policy loan option and applicable charges;

(f) “Additional Policy Benefits” which shall include the following information, as applicable:

(i) Eligibility for a dividend;

(ii) Conversion options that may be exercised;

(iii) Options to extend the term of the coverage;

(iv) Any available optional riders as requested by the insured, and an indication if there is an additional cost;

(vi) Living benefit option(s);

(vii) Option to lower benefits to reduce premium;

(viii) A yes or no indication as to whether the policy can accumulate cash value;

(ix) Guaranteed interest rates on fixed accounts and any indexed account options as requested by the insured.

(2)(3) The insurer shall provide a policy summary Guaranteed Premium and Benefits Patterns Summary to prospective purchasers where the insurer identified the policy form as one that will not be marketed with an illustration. Delivery of the Guaranteed Premium and Benefits Patterns Summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The policy summary Guaranteed Premium and Benefits Pattern Summary shall show guarantees only. It shall consist of a separate document with and include all required information set out in a manner that does not minimize or render any portion of the summary obscure. Any amounts that remain level for two (2) or more years of the policy may be represented by a single number if it is clearly indicated what amounts are applicable for each policy year. Amounts in Section 4F(5) shall be listed in total, not on a per thousand or per unit basis. If more than one insured is covered under one policy or rider, death benefits shall be displayed separately for each insured or for each class of insureds if death benefits do not differ within the class. Zero amounts shall be displayed as a blank space. Delivery of the policy summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The following amounts, where applicable, for the first five (5) policy years and representative policy years thereafter sufficient to clearly illustrate the premium and benefit patterns; including at least one age from sixty (60) through sixty-five (65) and policy maturity:

(a) The annual premium for the basic policy:
(b) The annual premium for each optional rider;

(c) The amount payable upon death at the beginning of the policy year regardless of the cause of death, other than suicide or other specifically enumerated exclusions, that is provided by the basic policy and each optional rider; with benefits provided under the basic policy and each rider shown separately;

(d) The total guaranteed cash surrender values at the end of the year with values shown separately for the basic policy and each rider;

(e) Any endowment amounts payable under the policy that are not included under cash surrender values above;

(f) The effective policy loan annual percentage interest rate, if the policy contains this provision, specifying whether this rate is applied in advance or in arrears. If the policy loan interest rate is adjustable, the Guaranteed Premium and Benefits Patterns Summary shall also indicate that the annual percentage rate will be determined by the company in accordance with the provisions of the policy and the applicable law.

B. Requirements Applicable to Existing Policies.

(1) Upon request by the policyowner, the insurer shall furnish either policy data or an in force illustration as follows:

(a) For policies issued prior to the effective date of [insert state equivalent to Life Insurance Illustrations Model Regulation], the insurer shall furnish policy data, or, at its option, an in force illustration meeting the requirements of [insert state equivalent to Life Insurance Illustrations Model Regulation].

(b) For policies issued after the effective date of the illustration regulation that were declared not to be used with an illustration, the insurer shall furnish policy data, limited to guaranteed values, if it has chosen not to furnish an in force illustration meeting the requirements of the regulation.

(c) If the policy was issued after the effective date of the illustration regulation and declared to be used with an illustration, an in force illustration shall be provided.

(d) Unless otherwise requested, the policy data shall be provided for twenty (20) consecutive years beginning with the previous policy anniversary. The statement of policy data shall include nonguaranteed elements according to the current scale, the amount of outstanding policy loans, and the current policy loan interest rate. Policy values shown shall be based on the current application of nonguaranteed elements in effect at the time of the request. The insurer may charge a reasonable fee, not to exceed $[insert amount], for the preparation of the statement.

(2) If a life insurance company changes its method of determining scales of nonguaranteed elements on existing policies; it shall, no later than when the first payment is made on the new basis, advise each affected policy owner residing in this state of this change and of its implication on affected policies. This requirement shall not apply to policies for which the amount payable upon death under the basic policy as of the date when advice would otherwise be required does not exceed $5,000.

(3) If the insurer makes a material revision in the terms and conditions under which it will limit its right to change any nonguaranteed factor; it shall, no later than the first policy anniversary following the revision, advise each affected policy owner residing in this state.
Section 6. Preneed Funeral Contracts or Prearrangements

The following information shall be adequately disclosed at the time an application is made, prior to accepting the applicant’s initial premium or deposit; for a preneed funeral contract or prearrangement that is funded or to be funded by a life insurance policy:

A. The fact that a life insurance policy is involved or being used to fund a prearrangement;

B. The nature of the relationship among the soliciting agent or agents, the provider of the funeral or cemetery merchandise or services, the administrator and any other person;

C. The relationship of the life insurance policy to the funding of the prearrangement and the nature and existence of any guarantees relating to the prearrangement;

D. The impact on the prearrangement:

   (1) Of any changes in the life insurance policy including but not limited to, changes in the assignment, beneficiary designation or use of the proceeds;

   (2) Of any penalties to be incurred by the policyholder as a result of failure to make premium payments;

   (3) Of any penalties to be incurred or monies to be received as a result of cancellation or surrender of the life insurance policy;

E. A list of the merchandise and services which are applied or contracted for in the prearrangement and all relevant information concerning the price of the funeral services, including an indication that the purchase price is either guaranteed at the time of purchase or to be determined at the time of need;

F. All relevant information concerning what occurs and whether any entitlements or obligations arise if there is a difference between the proceeds of the life insurance policy and the amount actually needed to fund the prearrangement;

G. Any penalties or restrictions, including but not limited to geographic restrictions or the inability of the provider to perform, on the delivery of merchandise, services or the prearrangement guarantee; and

Drafting Note: States should consider whether the insurance regulator has the authority to enforce the provisions of Subsections E, F and G.

H. If so, the fact that a sales commission or other form of compensation is being paid and the identity of the individuals or entities to whom it is paid.

Section 7. General Rules

A. Each insurer shall maintain, at its home office or principal office, a complete file containing one copy of each document authorized and used by the insurer pursuant to this regulation. The file shall contain one copy of each authorized form for a period of three (3) years following the date of its last authorized use unless otherwise provided by this regulation.

B. An agent shall inform the prospective purchaser, prior to commencing a life insurance sales presentation, that he or she is acting as a life insurance agent and inform the prospective purchaser of the full name of the insurance company which the agent is representing to the buyer. In sales situations in which an agent is not involved, the insurer shall identify its full name.

C. An insurance producer shall not use terms such as “financial planner,” “investment advisor,” “financial consultant,” or “financial counseling” in such a way as to imply that he or she is primarily engaged in an advisory business in which compensation is unrelated to sales unless that is actually the case. This provision
is not intended to preclude persons who hold some form of formal recognized financial planning or consultant designation from using this designation even when they are only selling insurance. This provision also is not intended to preclude persons who are members of a recognized trade or professional association having such terms as part of its name from citing membership, providing that a person citing membership, if authorized only to sell insurance products, shall disclose that fact. This provision does not permit persons to charge an additional fee for services that are customarily associated with the solicitation, negotiation or servicing of policies.

D. Any reference to nonguaranteed elements shall include a statement that the item is not guaranteed and is based on the company’s current scale of nonguaranteed elements (use appropriate special term such as “current dividend” or “current rate” scale.) If a nonguaranteed element would be reduced by the existence of a policy loan, a statement to that effect shall be included in any reference to nonguaranteed elements. A presentation or depiction of a policy issued after the effective date of the [insert citation to state equivalent to Life Insurance Illustrations Model Regulation] that includes nonguaranteed elements over a period of years shall be governed by that regulation.

Section 8. Failure to Comply

Failure of an insurer to provide or deliver a Buyer’s Guide, an in force illustration, a policy summary or policy data as provided in Section 5 shall constitute an omission that misrepresents the benefits, advantages, conditions or terms of an insurance policy.

Section 9. Separability

If any provisions of this rule be held invalid, the remainder shall not be affected.

Section 10. Effective Date

This rule shall become effective [insert a date at least 6 months following adoption by the regulatory authority].

The Retirement Security (A) Working Group met via conference call Nov. 13, 2019. The following Working Group members participated: Stephen C. Taylor, Chair (DC); Doug Ommen represented by Sonya Sellmeyer (IA); Al Redmer Jr. represented by Joy Hatchette (MD); Steve Kelley represented by Fred Andersen (MN); Linda A. Lacewell represented by Peter Thaisz (NY); and Elizabeth Kelleher Dwyer represented by Sarah Neil (RI). Also participating were: Bruce Sartain (IL); Tate Flott (KS); Denise Lamy (NH); Cuc Nguyen (OK); Deanna Osmonson (TX); and Janelle Dvorak (WI). Also participating were: Bruce Sartain (IL); Tate Flott (KS); Denise Lamy (NH); Cuc Nguyen (OK); Deanna Osmonson (TX); and Janelle Dvorak (WI).

1. Heard Presentations on Retirement Security Education

   a. NFEC

   Commissioner Taylor explained the purpose and goals of the Working Group. He said the Working Group’s goal is to examine ways to promote retirement security consistent with the NAIC’s continuing “Retirement Security Initiative.” He said the Working Group would be discussing education issues, consumer protection and product innovation.

   Commissioner Taylor recapped the last conference call of the Working Group and then introduced Vince Shorb (National Financial Educators Council—NFEC) to open the discussion. Mr. Shorb discussed how the financial problems in the country are at an epidemic level. He said retirement security affects more than the pocketbook; it also affects the personal life. He discussed employee wellness programs with the focus on preparation for the future.

   Mr. Shorb said it is important to understand the past in order to understand the future. He said children pick up the habits of parents. He said if children see how their parents act and react to money and finances, they are more than likely to adopt those practices. He also said the old adage of “keeping up with the Joneses” has morphed into today’s social media infusion and celebrity endorsements and influences. He said there is no counteracting to that type of assault.

   Mr. Shorb said some states are tackling early education, such as Utah, but most kids are leaving home, such as to college, behind the proverbial “8-ball.” He said too many parents and educators are looking at the short-term and not the long-term. He said all the time, one hears the basic calls for saving more and if you borrow you need to repay. He said the focus should be on financial behavior, sentiments and systems.

   Mr. Shorb said that financial behavior means more than just telling people to save more. People need to understand what that means for the long-term and how to adapt behavior to the understanding. He said that sentiments mean understanding and knowing the hope and confidence for the future. He said the less hope and confidence people have about the future; the less likely people will work toward an end goal of financial security. He also said the fear of understanding money and how to use money properly prevents working toward that end goal. He said systems are meant to help with the earlier points of behavior and sentiments. He said an example would be auto-save programs.

   Mr. Shorb offered five tips to aid in financial literacy and retirement security: 1) quality educators; 2) segmentation of the audience; 3) time; 4) multiple methods of instruction; and 5) objectives. He said too many educators lack the educational methodology, utilizing mostly lectures and power point presentations. He said more sophisticated methodologies and practices are needed to address behavior and sentiment.

   Mr. Shorb explained that segmentation of the audience means that a financial literacy program or class needs to be tailored to the audience. For example, he said the socio-economic status is a factor to consider. He said that the warehouse worker who works at a lower hourly salary is different than the higher salary office worker. He said how financial literacy or retirement security is explained needs to be focused on retaining the interest of the employee and if a course is talking about options that are beyond the employee, the interest, if any, is lost.

   Mr. Shorb explained the trans-theoretical model where one gauges the interest level of each employee and then tailor classes or information to that interest level. He gave an example of a simple survey, and depending on the answer, one can help
determine the level of interest of that employee in retirement security. He said if an employee wants to learn, they will; if they do not, then develop the material to raise the level of interest.

Mr. Shorb said more time is needed than the typical courses currently offered. He said standard courses can help, especially if they can offer the tools to aid the employee to help themselves. He said multiple methods of instruction is key to educating employees and utilizing the best methods to those employees. He said other methods than the usual live lecture or an online course would be useful. He said employers or educators need to understand what the objectives are with a retirement security or financial literacy program. For example, he asked what the objectives are to help employees reduce their debt or encourage employees to learn and utilize the company’s retirement programs.

Mr. Shorb said educators should also pay attention to their audience. He said sometimes you see that aha moment in someone’s eyes, and they get the importance of planning for their future. He said it is also important to motivate those that do not have that aha moment and import the need for long-term thinking when it comes to one’s financial retirement security. He said the earlier one starts educating, the better for the future of the person, and they can see results down the line.

Commissioner Taylor asked Mr. Shorb how early such education should start. Mr. Shorb said that a Brown University study showed that habits are formed as early as at the age of nine, and kids will pick up the habits of their parents. He said if parents are frivolous or spend-thrifty, it will be picked up by children. He said the earlier one starts educating about financial security and literacy, the better. He said this is especially important with the massive influence of social media in conjunction with mass consumption. He said reaching kids before high school is probably best. Commissioner Taylor asked if schools can play a role. Mr. Shorb said schooling, historically, was meant to educate on self-sufficiency and being prepared for the future. He said schools can play an important role.

Ms. Neil asked if educating the parents will help the kids down the line. Mr. Shorb said the more a parent can improve their own socio-economic position, the better for the children, and the children can and will learn from their parents’ work to improve themselves. He said, statistically, kids will remain in the same socio-economic status as their parents.

Commissioner Taylor asked for an elaboration on segmentation. Mr. Shorb said simple, direct questions are best. He suggested asking a general question if the employee has interest in financial security and a more direct question if the employee has any interest in personal finances. Survey questions of that nature can help segment employees into levels of interest and then lead to the development of the right program. Commissioner Taylor asked what to do about those showing no interest. Mr. Shorb suggested helping those reluctant to focus on the topic as it could apply to them. For example, he said not to provide assignments, but provide case studies and ask what advice they would give to the subject in the case study. He said people are more inclined to give advice if it does not personally involve them. He said for many of those reluctant employees, case studies get them thinking about their own situation without feeling that they are being lectured.

Commissioner Taylor asked what size businesses the NFEC works with. Mr. Shorb said all sizes. He said the NFEC develops programs to scale and meet the needs of that specific business. Karrol Kitt (The University of Texas at Austin) said she wanted to thank Mr. Shorb and the chair for this resonation. She said, as an educator, she was very pleased to hear about teachable moments and the importance of education.

Commissioner Taylor asked the Working Group if anyone had any comments on the work plan he developed and had sent out prior to the conference call. Birny Birnbaum (Center for Economic Justice—CEJ) asked what role state insurance regulators and the NAIC have in the first three points under the education section of the work plan. He said there are other entities and groups that have more expertise and are working in this area. He asked what value is added in the NAIC and state insurance regulators examining this area. Commissioner Taylor replied that insurance has a large role to play and is part of an overall retirement security plan, and he believes the NAIC has and can play a role in helping Americans in their financial literacy and retirement security. He asked Mr. Birnbaum to submit any edits or suggestions to the work plan.

Commissioner Taylor asked the Working Group to submit any comments or edits to the work plan to David Torian (NAIC) by close of business (COB) Dec. 4.

Having no further business, the Retirement Security (A) Working Group adjourned.
The Retirement Security (A) Working Group of the Life Insurance and Annuities (A) Committee met via conference call Oct. 23, 2019. The following Working Group members participated: Stephen C. Taylor, Chair (DC); Doug Ommen represented by Sonya Sellmeyer (IA); Al Redmer Jr. represented by Joy Hatchette (MD); Steve Kelley represented by Fred Andersen (MN); Linda A. Lacewell represented by Peter Thaisz (NY); Elizabeth Kelleher Dwyer represented by Sarah Neil (RI); and Todd E. Kiser represented by Tanji Northrup (UT). Also participating were: Bruce Sartain (IL); Tate Flott (KS); Annette James (NV); Cuc Nguyen (OK); and Doug Danzeiser (TX).

1. **Heard Presentations on Retirement Security Education**

Commissioner Taylor explained the purpose and goals of this Working Group. He said the Working Group’s goal is to examine ways to promote retirement security consistent with the NAIC’s continuing “Retirement Security Initiative.” He said the Working Group would be discussing education issues, consumer protection and product innovation.

   a. **AARP**

Commissioner Taylor asked Joe Valenti (AARP) and Sarah Mysiewicz Gill (AARP) to open the discussion. Mr. Valenti discussed two programs that AARP promotes: 1) the Saving for Retirement campaign; and 2) the Work and Save campaign. He said one of the keys to effective retirement security education is to reach people before key moments in their lives. He pointed out that just providing people with calculations tends to scare them off but providing guidance and comprehensive information is more helpful.

Mr. Valenti said that four out of 10 heads of households, age 55 to 64, have no savings. He said the median savings is $120,000. Most believe they will simply work longer, but they do not take into account events that may prevent them to work longer. He said the Saving for Retirement campaign focuses on getting people into the conversation. He said the campaign offers a quick and easy retirement planning resource that enables users to chat with a friendly digital retirement coach to get their personalized action plan.

Ms. Gill said she works with the states and their legislatures. She said nearly 55 million workers do not have a way to save through their work. She said small business retirement plans cost much more than those available to larger employers. She said AARP has been working on a public/private partnership, similar to a 529 college savings plan. She said it is a contract with the private sector but administered by the state.

Ms. Gill said this design allow small businesses to offer simple, low-cost retirement savings plans to their employees, enabling more workers to provide for themselves rather than rely on taxpayer-paid services. Workers in businesses with fewer than 100 workers were much less likely to have access to a plan than workers in firms with more workers. She said some 30 states are considering retirement savings plans for small business employees, and seven states are already implementing them. She said the data shows that nearly 30 million workers are new savers.

Mr. Valenti said it is important to get people to think about lifetime income. He mentioned three bucket of funds and said people should look at money for now, such as for emergencies, periodic managed payouts and look at their longevity.

Commissioner Taylor asked if this partnership is voluntary to states and businesses. Ms. Gill said it is and said the programs are tailored to individual states. She said some states have businesses go through the private sector rather than a state plan.

Ms. Hatchette asked if there are target audiences or age groups. Ms. Gill said there is no specific targeting of any particular age group but said that millennials are a focus.

Commissioner Taylor asked about the costs of the partnership. Ms. Gill said there are costs upfront, but eventually it becomes self-sustaining and there is no cost to the business.
Mr. Thaisz noted that AARP discussed three buckets of funds for the decumulations stage, with the first one being emergency funds. He asked if AARP promotes saving for emergency funds during the accumulation phase of saving for retirement.

Mr. Valenti responded that AARP does support and promote saving up an emergency fund as part of financial wellness. He referenced recent studies that indicate a significant percentage of U.S. households would be unable to handle an unexpected $400 expense out of savings. He said that AARP believes everyone should save for an emergency fund.

b. IRI

Commissioner Taylor asked Chelsea Crucitti (Insured Retirement Institute—IRI) and Frank O’Connor (IRI) to give their presentations. Ms. Crucitti said there are two parts of the retirement crisis: 1) a funding crisis; and 2) an income crisis. She said longevity is one of the reasons for the crisis. She said workers tend to overestimate how long they will work, and many retire sooner than they expected.

Ms. Crucitti said a retiree needs 85% of their income for 20 years for retirement. People do not take into account the cost of living in retirement, such as health care and long-term care (LTC). She said most Americans do not have a grasp on the costs of health care and LTC. She said most workers with 401(k) accounts do not have the knowledge on how to use their money. She said six in 10 baby boomers do not take any action or even review their 401(k) accounts. She said that many respond to the amounts in their 401(k) similar to big lottery winners and that without education and guidance, they tend to spend it all.

Ms. Crucitti said more information does not necessarily mean there will be a better outcome. She said education is needed in every stage of life. She said industry tries to be innovative on the type of products that can help the consumer toward planning for and living through retirement. She pointed out a regulatory barrier where nearly 45% do not have access to a traditional 401(k) account. She said consumers need the right educational tools.

Ms. Crucitti also said there should be agent education and said IRI is partnering with the National Council on Aging (NCOA) to help educate agents on retirement and how to discuss retirement with consumers. She said the Setting Every Community Up for Retirement Enhancement (SECURE) Act of 2019 (H.R. 1994) is an important legislative tool to help Americans. The act would allow, among many provisions, more part-time workers to have the opportunity to participate in a 401(k) plan and would allow for multi-employer 401(k) plans. It would also require benefit statements provided to defined contribution plan participants to include a lifetime income disclosure at least once during any 12-month period.

Mr. O’Connor said people cannot overstate the need for education. He said IRI’s research shows that collectively all people know they have to save for the future, but they do not know what to do to get there nor what to do when they get there.

Mr. O’Connor cited research on millennials. He said 72% of millennials believe they will be set for retirement, whereas only 18% are concerned about retirement. However, 50% of those who are confident about the future are not saving and say they plan to do it later. Sixty-five percent are confident that they can save enough of their own income, and 55% said Social Security will provide enough along with savings.

Commissioner Taylor asked when retirement education should start. Mr. O’Connor said basic financial literacy should begin in high school or entry into college. He said additional education is needed, such as at a first job. He said first-time employees need more than just being handed a 401(k) without some education about how it works and how to use it best for their needs.

Mr. O’Connor gave an example of a person who is moving from a large employer to a small employer and what to do with the 401(k) with the large employer. He said without proper education, that person may not know that it may be better to keep the 401(k) with the large employer.

Commissioner Taylor asked about producer education. Mr. O’Connor said not all agents or producers work in annuities, and conversely annuities are not right for everyone. He said producers need to be well-versed in all products for the right client. Ms. Sellmeyer asked when the IRI research will be available. Mr. O’Connor said it should be published next month.

Mr. Thaisz asked about the research on the hesitation by Americans of converting lump sums into annual income. Mr. O’Connor said their research shows there is some psychological barrier with retirees about taking their lump sum amount of money that they have saved and converting it into long-term annual income. He said there is no quick fix and that it is unclear how to change this barrier.
Jason Berkowitz (IRI) pointed out that the SECURE Act could help with that hesitation. He said this legislation would expand and preserve opportunities to save for retirement and help savers make more informed decisions about their retirement finances.

Brenda J. Cude (University of Georgia) said it is important for the Working Group to look at what is happening now in the area of education. She said that in order to move forward, it is important to know and understand what is being done currently.

Karrol Kitt (The University of Texas at Austin) said she would like to participate in that discussion.

Having no further business, the Retirement Security (A) Working Group adjourned.
LIFE ACTUARIAL (A) TASK FORCE

Life Actuarial (A) Task Force Dec. 5–6, 2019, Meeting Minutes .......................................................... 6-102
Life Actuarial (A) Task Force Oct. 17, 2019, Minutes (Attachment One) .................................................. 6-111
Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest (AG 49), Proposed Edits Reflecting “Possibility 2” (Attachment One-A) ........................................................................................................ 6-112
AG 49, Proposed Edits from Ohio and Nebraska (Attachment One-B) .......................................................... 6-117
Allianz Letter Regarding Illustration of Index Multipliers Under AG 49, Oct. 16, 2019 (Attachment One-C) .................................................................................................................................. 6-121
Life Actuarial (A) Task Force Oct. 3, 2019, Minutes (Attachment Two) ...................................................... 6-124
Life Actuarial (A) Task Force Sept. 26, 2019, Minutes (Attachment Three) .................................................. 6-128
American Academy of Actuaries (Academy) and Society of Actuaries (SOA) Recommendation for Individual Life Insurance Mortality Improvement Scale – for Use with Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation (AG 38) and VM-20, Requirements for Principle-Based Reserves for Life Products (VM-20) (Attachment Three-A) ........................................................................................................ 6-129
Life Actuarial (A) Task Force Sept. 19, 2019, Minutes (Attachment Four) .................................................... 6-135
Life Actuarial (A) Task Force 2020 Proposed Charges (Attachment Four-A) .................................................. 6-136
General Modeling Instructions for Non-Reinsurer Participants in the Principle-Based Reserving (PBR) Yearly Renewable Term (YRT) Reinsurance Field Test (Attachment Four-B) .................................................. 6-137
Output Template for Modeling Results Documentation (Attachment Four-C) .................................................. 6-141
Life Actuarial (A) Task Force Sept. 12, 2019, Minutes (Attachment Five) .................................................... 6-142
SOA Memorandum Regarding 2020 Generally Recognized Expense Table (GRET) – SOA Analysis, July 16, 2019 (Attachment Five-A) ........................................................................................................ 6-144
Academy Presentation Regarding the YRT Field Test, Sept. 12, 2019 (Attachment Five-B) ......................... 6-149
Draft Principles for YRT Treaty/Cash Flow Modeling (Attachment Five-C) .................................................. 6-151
Amendment Proposal Form (APF) 2019-40 (Attachment Five-D) ............................................................... 6-156
APF 2019-JR (Attachment Five-E) .................................................................................................................. 6-166
APF 2019-41 (Attachment Five-F) .................................................................................................................. 6-168
APF 2019-42 (Attachment Five-G) .................................................................................................................. 6-172
Academy Presentation Regarding the YRT Field Test, Nov. 20, 2019 (Attachment Six) ......................... 6-178
Oliver Wyman Presentation Regarding the YRT Field Test, Dec. 5, 2019 (Attachment Seven) ................. 6-179
Academy Presentation Regarding Preliminary Framework Elements for Non-Variable Annuity PBR, Dec. 5, 2019 (Attachment Eight) ........................................................................................................ 6-192
Academy Presentation Regarding Standard Valuation Law Interest Rate Modernization Update, Dec. 5, 2019 (Attachment Nine) ........................................................................................................ 6-197
Academy Presentation Regarding Mortality Improvement Scale Methodology: AG 38 and VM-20 Dec. 5, 2019 (Attachment Ten) .................................................................................................................. 6-199
Academy Presentation Regarding PBR Treatment for Individually Underwritten Group Insurance, Dec. 5, 2019 (Attachment Eleven) ........................................................................................................ 6-202
APF 2019-33 (Attachment Twelve) .................................................................................................................. 6-206
APF 2019-62 (Attachment Thirteen) .................................................................................................................. 6-221
APF 2019-60 (Attachment Fourteen) .................................................................................................................. 6-224
APF 2019-61 (Attachment Fifteen) .................................................................................................................. 6-228

Recommendation Regarding Proposed Guaranteed Issue Life Valuation (A) Subgroup (Attachment Seventeen) .................................................................................................................. 6-232
Recommendation Referred to the Life Insurance and Annuities (A) Committee Regarding Proposed Guaranteed Issue Life Valuation (A) Subgroup (Attachment Eighteen) .......................................................................................... 6-233
Academy Presentation Regarding PBR Resources from the Life Practice Council, Dec. 5, 2019 (Attachment Nineteen) .................................................................................................................. 6-234
NAIC Staff Presentation Regarding Update on the Request for Proposal for the Economic Scenario Generator (ESG), Dec. 5, 2019 (Attachment Twenty) .......................................................................................... 6-237
NAIC Staff Presentation Regarding Cessation of the London Interbank Offered Rate (LIBOR), Dec. 5, 2019 (Attachment Twenty-One) .......................................................................................... 6-238
The Life Actuarial (A) Task Force met in Austin, TX, Dec. 5–6, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Jacob Lauten (AK); Jim L. Ridling represented by Steve Ostlund (AL); Andrew N. Mais represented by Wanchin Chou (CT); Steve Kelley represented by Fred Andersen (MN); Chlora Lindley-Myers represented by William Leung (MO); Bruce R. Ramge represented by Rhonda Ahrens (NE); Marlene Caride represented by Seong-min Eom (NJ); John G. Franchini represented by Anna Krylova (NM); Linda A. Lacewell represented by Bill Carmello (NY); Glen Mulready represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA). Also participating was: Rachel Hemphill (TX).

The Task Force met Oct. 17, Oct. 3, Sept. 26, Sept. 19 and Sept. 12 and took the following action: 1) adopted its Summer National Meeting minutes; 2) adopted its 2020 proposed charges; 3) adopted the 2020 Generally Recognized Expense Table (GRET); 4) provided direction to the IUL Illustration (A) Subgroup on revising Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest (AG 49); 5) adopted the American Academy of Actuaries (Academy) Life Experience Committee and the Society of Actuaries (SOA) Preferred Mortality Oversight Group Valuation Basic Table Team (Joint Committee) Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with (AG 38) and VM-20; 6) heard updates on the Yearly Renewable Term (YRT) Field Test from the Academy YRT Field Test Project Oversight Work Group.

Mr. Yanacheak made a motion, seconded by Mr. Ostlund, to adopt the Task Force’s Oct. 17 (Attachment One), Oct. 3 (Attachment Two), Sept. 26 (Attachment Three), Sept. 19 (Attachment Four), and Sept 12 (Attachment Five) minutes. The motion passed unanimously.

2. **Heard an Update on the YRT Field Test**

Jason Kehrberg (Academy YRT Field Test Project Oversight Work Group) presented an update on the YRT Field Test (Attachment Six), which included a revised timeline and a graphical presentation of the workstreams. He said Oliver Wyman has been engaged to assist in the analysis of field test results. He said calls with field test participants will begin once legal agreements have been executed.

Chris Whitney (Oliver Wyman) presented the details of the design of the analysis models for the field test and some initial insights (Attachment Seven). He said that, in addition to the field test, the Academy is working on a “Range of Interpretations” survey to be distributed to all companies, regardless of whether they are field test participants. The survey seeks further understanding of the range of interpretations from a company participation base that is larger than the field test, which might be used to model the various YRT reinsurance proposals in the field test. Mr. Whitney said the analysis model and its associated tools will be delivered to the NAIC when it is completed. He noted that a secondary benefit of the project is that the NAIC will be able to use the model to analyze the long-term impact of other principle-based reserving (PBR) issues, as needed. He said the model provides a robust projection of PBR over time while unlocking assumptions to observe the impact of the various reserve components.

Ms. Hemphill asked if the model considers any interaction with the post-level term profits restriction. Mr. Whitney said the issue is being considered. Mr. Chupp asked if mortality improvement is built into the current YRT scale. Mr. Whitney said the current scale is equal to best estimate mortality with mortality improvement in future years. Dylan Strother (Oliver Wyman) discussed the mortality and PBR prescribed margins and their impacts on the PBR. He noted that the lack of including a future mortality improvement beyond the valuation date results in an implicit margin. Mr. Andersen asked whether it is important to differentiate the explicit margins from the implicit margins. Mr. Strother said the implicit margin was indicated because some of the amendment proposals that will be considered in the field test allow for the use of mortality improvement in the rates charged by reinsurers. Mr. Whitney said identifying the implicit margin provides a better understanding of what is affecting the overall margin at the various durations. Mr. Strother noted that scenarios reflecting reinsurer reactions can produce reserve
credits in excess of \( \frac{1}{2} c_x \). He also noted the importance of looking at long-term reserve projections when evaluating the impact of reinsurance modeling approaches because of the unlocking of mortality improvements and the impact of the margin changes over time.

Katie van Ryn (Oliver Wyman) discussed the scope of the field test, the amendment proposals being considered under various assumptions, and the results of the initial Oliver Wyman analysis. Mr. Whitney noted that modeled reinsurer reactions lag the ceding mortality experience by one year. He broadly discussed possible reinsurer reactions to a number of possible scenarios posed by Task Force members. He noted that, while there are no reinsurers participating in the field test, reinsurers are expected to respond to the “Range of Interpretations” survey. He said the reinsurer responses to the survey are expected to inform assumptions on reinsurer reaction to some of the scenarios of concern to Task Force members.

Mr. Whitney discussed the next steps for the analysis and field test. He said that assuming field test results are received by year-end: 1) point-in-time reserve results from the field test will be confirmed and shared with the Task Force in February 2020; 2) results for each of the specified amendment proposals will be ready for Task Force discussion in March 2020; and 3) company projected reserves will be developed and shared with the Task Force in April 2020.

Mr. Boerner said that given the dates of milestones and next steps, there is a chance that the Task Force could have an amendment proposal in May 2020 to consider for exposure, but the timeframe for an adoption that could be included in the 2021 Valuation Manual would be very tight.

3. **Adopted the Minutes of the VM-22 (A) Subgroup**

Mr. Sartain said the VM-22 (A) Subgroup did not meet subsequent to the Summer National Meeting, but several members have been participating on conference calls of the Academy Annuity Reserves Work Group (ARWG) and the SVL Interest Rate Modernization Work Group (SVLIRMWG). He said Subgroup discussions in the past year were focused on reinvestment risk issues. He said that because of developments in Academy discussions, the conversation on that issue has changed. The Subgroup will be revisiting the reinvestment risk discussions in the first quarter of 2020.

Mr. Sartain said the ARWG is working on PBR for non-variable annuities, including payout annuities. He said the SVLIRMWG is updating the rates and methodologies for the Commissioners’ Annuity Reserve Valuation Method (CARVM), including consideration of an exclusion test.

Mr. Sartain made a motion, seconded by Mr. Weber, to adopt the VM-22 (A) Subgroup’s report. The motion passed unanimously.

4. **Heard an Update from the Academy Annuity Reserves Work Group**

Ben Slutsker (ARWG) discussed some elements of the ARWG proposal for a revised non-variable annuity reserve framework (Attachment Eight). He said the elements are only representative, and a more comprehensive proposal will be developed in the coming months. He said the ARWG plan is to propose a PBR approach for non-variable annuities that utilizes a Conditional Tail Expectation (CTE) 70 reserve calculation. He said the baseline of the methodology is the recent revisions to VM-21, Requirements for Principle-Based Reserves for Variable Annuities, with deviations and enhancements, as needed, to handle product complexities. The complexities include guaranteed living benefits (GLBs), fixed deferred or fixed index annuities, and reinvestment risks. Mr. Slutsker said the target date for Task Force adoption of the proposed framework is Spring 2022. He said the ARWG is looking for Task Force feedback on: 1) asset assumptions related to spreads, default costs and reinvestment methodology; 2) exclusion test methodology; and 3) any concerns on the scope of the proposed framework, including possible retrospective application of the methodology to existing contracts, regardless of issue date.

Mr. Slutsker said the ARWG recommends hedging requirements consistent with VM-21, without the clearly defined hedging strategy (CDHS) distinction. Ms. Hemphill said that it would be helpful if the ARWG noted when its recommendation is not consistent with VM-21. She said the notes should be accompanied by a brief explanation of the reasons for deviating from the VM-21 framework.

Mr. Slutsker said the ARWG recommends applying the VM-21 methodology to fixed annuity PBR. The ARWG also recommends using a modified version of the VM-20, Requirements for Principle-Based Reserves for Life Products, exclusion testing methodology for fixed annuity PBR. Mr. Tsang asked if the exclusion test would be applied before or after reinsurance. Mr. Slutsker responded that the ARWG has not explored that question. He suggested that the VM-20 methodology, which applies the exclusion test both pre- and post-reinsurance ceded, would most likely prevail.
Mr. Slutsker asked for Task Force feedback on the ARWG recommendation to use the VM-21 discount rate and starting asset methodology for fixed annuity PBR. He said the ARWG position is that company specific spreads and defaults are more appropriate because fixed annuity investments tend to be heavily dependent on general account returns. Ms. Hemphill asked what kind of guardrail would be applied for these assumptions given how dependent the reserves are on these returns, and asked how the framework would assess the credibility of company-specific spread and default assumptions. Mr. Slutsker said that this would be considered further as the framework was developed.

Mr. Boerner said retroactive application of the revised framework to contracts issued prior to the effective date of the Valuation Manual would require actuarial guideline changes and could have tax implications. Paul S. Graham (American Council of Life Insurers—ACLI) said the tax code no longer considers the date of issue, but it is instead tied to the valuation methodology. He said that should alleviate any concern about retroactivity. He said whether there might be issues that may arise by making the changes optional will require more study.

Mr. Tsang asked if there will be a floor reserve, similar to the VM-20 net premium reserve (NPR). Mr. Slutsker said there is a cash surrender value (CSV) floor and potentially a separate floor for guaranteed living income benefits (GLIBs). Ms. Hemphill said she would like to hear how the proposal handles the VM-21 standard scenario. Mr. Slutsker said the focus has been on the modeled reserve, and the floor has not yet been discussed; but it will be considered. Mr. Slutsker stated that the Academy is generally in favor of the CTEPA approach for the standard scenario, as a disclosure item.

5. Heard an Update from the Academy SVL Interest Rate Modernization Work Group

Chris Conrad (SVLIRMWG) gave an update on the work of the SVLIRMWG (Attachment Nine). He said the SVLIRMWG is working closely with the ARWG to develop valuation rates to be used by products that pass the exclusion test that the ARWG is developing. He said valuation rates will be determined by finding the single discount rate that produces the same present value of benefits and expenses at time zero as discounting the cashflows at the quarterly portfolio yields, including realized gains and losses. He said the plan is to determine the discount rate under assumptions of rising rates, falling rates and level rates. He noted that the group has yet to determine how to weight the three scenarios and whether the final rate will be locked at issue. Once calculated, the rates will be used to develop a formula which relates the initial portfolio yield and the ultimate single valuation rate. The formula will be used to update the valuation rates quarterly. Mr. Conrad noted that the proposed framework will use U.S. treasuries plus VM-20 spreads as a reference index.

6. Discussed Considerations for Changes to the Life Mortality Improvement Factor Process

Marianne Purushotham (Joint Committee) said a presentation was made to the Task Force last year to make it aware of the methodology used to annually update the mortality improvement scale used for VM-20 and AG 38. She said the purpose of the presentation was to give the Task Force an opportunity to understand and ask questions about the Joint Committee process. She said the process entails annually looking at recent historical and current projected mortality improvements and applying a set methodology to update the scale. She said the improvements are used to move the Valuation Basic Table (VBT) from the date of the table to the current valuation date (e.g., the 2019 mortality improvement scale will be used to update the 2015 VBT from mid-2015 to the end of 2019). She noted that the methodology has not changed since 2013. She provided several slides (Attachment Ten) describing the current methodology, including some of its limitations and other considerations. She said the methodology uses U.S. Social Security Administration (SSA) data as a consistent source of population mortality data. She said that population mortality data tends to be more stable than insured mortality data. She said the population data is forecasted over a 20-year period to create an unsmoothed mortality improvement scale. She said actuarial judgment is used in the process of peer reviewing the unsmoothed scale to determine whether the scale should be changed that year. She said that after the peer review, the final step is to apply smoothing to the scale. She said the process is limited in that it looks at age and gender as basis risk due to the use of population data, and it is not intended for long-term projections. She noted that mortality improvement scales for insured mortality tables generally use population data.

Ms. Purushotham said that over the next two to three years, the mortality methodology will be changing as a common tool is being developed, which will allow practitioners from life, annuity and pension to share a consistent framework for producing mortality improvement scales. She said that in the short term, the Joint Committee will be looking to revise the methodology to remove more actuarial judgment by defining clear thresholds that would trigger a change in the scale. She said another consideration is whether the updates should require the formal approval of the Task Force. She said the Valuation Manual does not require Task Force approval. She suggested that once the actuarial judgment is removed from the methodology, the improvement scale methodology could be added to the Valuation Manual. That would allow the annual update to be automatically adopted if no changes are made to the prescribed methodology.
Mr. Sartain asked if there could be a process that would allow the Task Force to formally adopt the mortality improvement factors annually. Mr. Boerner said that if the factor adoption is to be considered a Valuation Manual update, the mortality improvement factors may not be available until the subsequent year’s Valuation Manual. However, if the mortality improvement follows a process adopted in the Valuation Manual then annual improvements could be applied for the current valuation year. He also said there are other issues related to the timing of the availability of the population data and the availability of the scale for industry use that will need to be considered. Ms. Purushotham said companies have indicated that they would like the scale to be published earlier in the year. She said the scale can be published earlier, but that would require sacrificing an additional year of data. She said the Joint Committee is working with a three year time lag, such that the SSA data through 2016 is used for the 2019 mortality improvement scale. She said the SOA accesses Medicare data in July, provides an updated scale at the end of August, and publishes the mortality improvement scale by the end of September. She said that if the Joint Committee uses a four year time lag, the mortality improvement scale could be published earlier in the year, but it would lose the benefit of the recent mortality trends.

Ms. Purushotham summarized three possible options: 1) continue with the present process of using actuarial judgment to determine whether to change the scale; 2) have the scale change every year regardless of how immaterial the change might be; and 3) apply the current methodology, but make the changes subject to set thresholds. Mr. Boerner said Task Force members should consider the three options, as well as whether increasing the time lag might be acceptable.

7. Exposed Amendment Proposal 2019-33

Mary Bahna-Nolan (Academy Life Reserves Work Group—LRWG) discussed the presentation (Attachment Eleven) recommending revised PBR treatment for individually underwritten group insurance. She said amendment proposal 2019-33 proposes subjecting certain group life certificates that are marketed, underwritten and solicited in a manner similar to individual life policies to the same Valuation Manual requirements as individual life policies. She said the Statement of Statutory Accounting Principles (SSAP) No. 50—Classifications of Insurance or Managed Care Contracts (SSAP No. 50) provides a definition of group life that is not fully applicable to the group certificates under consideration, as individually underwritten group certificates do not preclude individual selection and are for the benefit of policyholder. She said VM-51, Experience Reporting Formats, scopes out individually solicited group life policies from the mandatory data collection. She reviewed each of the eight recommended changes proposed by amendment proposal 2019-33.

Mr. Chou made a motion, seconded by Mr. Leung, to expose amendment proposal 2019-33 (Attachment Twelve) for a public comment period ending Feb. 7, 2020. The motion passed unanimously.

Linda Lankowski (LRWG) said amendment proposal 2019-62 recommends requirements for disclosure and the reporting of conversion reserves.

9. Exposed Amendment Proposal 2019-60

Ms. Hemphill said VM-20 requires a single credibility method for all business subject to PBR. She said that because Buhlmann credibility factors are not currently available for simplified issue (SI) business, companies are forced to use the Limited Fluctuation credibility method for their SI business; therefore, they are required to use the Limited Fluctuation method for fully underwritten business subject to VM-20 as well, even if the Buhlmann credibility method is more appropriate. She said amendment proposal 2019-60 proposes to: 1) remove the single credibility method restriction from Section 9.C.5.a of VM-20 for all business, regardless of the type of underwriting; and 2) add a Guidance Note to Section 9.C.7.b.ii of VM-20.

Ms. Ahrens made a motion, seconded by Mr. Chou, to expose amendment proposal 2019-60 (Attachment Fourteen) for a public comment period ending Jan. 31, 2020. The motion passed unanimously.

10. Exposed Amendment Proposal 2019-61

Ms. Hemphill said amendment proposal 2019-61 clarifies that the life PBR exemption cannot be applied to a policy with a material secondary guarantee, regardless of whether the secondary guarantee is a rider or part of the base policy.
Ms. Eom made a motion, seconded by Mr. Leung, to expose amendment proposal 2019-61 (Attachment Fifteen) for a public comment period ending Jan. 31, 2020. The motion passed unanimously.

11. Heard an Update on SOA Research and Education

Dale Hall (SOA) provided a presentation (Attachment Sixteen) identifying recent and upcoming topics that he thought would be of interest to life insurance regulators. Referencing the earlier discussion on mortality improvement, he noted that the SOA is conducting a mortality improvement survey to gather information on how companies make assumptions for life and annuity financial projections and what factors they consider in that process. He said the report will be available in early 2020. He said another report that will be available in January 2020 is the Centers for Disease Control and Prevention (CDC) population mortality observations report, updated for 2018 experience. He said the 2018 experience shows considerable improvement over the prior three to four years.

Mr. Hall said the SOA is hosting an accelerated underwriting expert panel forum on Dec. 11 to discuss best practices for validating algorithms used for underwriting life insurance products. He said the SOA expects to issue a report of best practices and other insights gathered from the forum.

Mr. Hall said the SOA launched its Mortality & Longevity Strategic Research Program in October. He said one of the research items released is a study on the economic impact of opioid abuse. He said that while the main insurance impact is associated with healthcare, there is an economic impact on other insurance lines from premature mortality and increases in group disability and workers’ compensation claims.

Ms. Ahrens asked for more information on the report on Public Perception of Longevity and Its Drivers. Mr. Hall said the report resulted from surveys asking participants to evaluate their longevity. He said most people either underestimated or overestimated their life expectancy by four to five years. He said the report provides insights on the impact of individuals misestimating their longevity.

Ms. Ahrens said the Subgroup met on Nov. 25, Nov. 4, Oct. 7, Sept. 30 and Sept. 18. The minutes of these conference calls are included in the minutes of the Life Risk-Based Capital (E) Working Group. Ms. Ahrens said the Subgroup will recommend the Academy Longevity Risk Task Force (LRTF) proposed C-2 factors for longevity risk to the Working Group. She noted that the Subgroup is not comfortable with the application of the proposed factors to longevity risk transfer. They will ask that longevity risk transfers be scoped out of the application of the C-2 factors and that they receive a charge to continue studying longevity risk transfers.

Ms. Ahrens said the LRTF submitted recommendations to the Working Group in August for a correlation component for C-2 mortality and C-2 longevity in the final calculation. She said the Subgroup is not comfortable making the decision, and it will forward the issue to the Working Group.

Ms. Ahrens made a motion, seconded by Mr. Yanacheak, to adopt the Longevity Risk (A/E) Subgroup’s report. The motion passed unanimously.

13. Recommended to the Life Insurance and Annuities (A) Committee the Formation of a GI Valuation Subgroup

Ms. Ahrens said a new guaranteed issue (GI) table is needed to replace the 2001 Commissioners’ Standard Ordinary (CSO) table as the mortality standard for GI business. She said the 2001 CSO was used as an interim solution after the rescission of the 2017 Commissioners’ Standard Guaranteed Issue (CSGI) table upon discovering that it produced excessive deficiency reserves for some companies. She asked the Task Force to recommend that the Life Insurance and Annuities (A) Committee form a subgroup of the Task Force to address the issue. She said the recommendation to form the subgroup (Attachment Seventeen) provides a proposed charge that is aligned with an existing Task Force charge and provides justification for the subgroup formation. She said Nebraska has been asked to chair the Subgroup. Alabama, Connecticut, Illinois, New York, Ohio and Texas will be the initial members of the Subgroup, with other state insurance regulators welcome to join. Mr. Boerner proposed a more concise version of the recommendation (Attachment Eighteen).

Mr. Ahrens made a motion, seconded by Mr. Ostlund, to forward the concise version of the recommendation to form a GI subgroup of the Task Force to the Life Insurance and Annuities (A) Committee. The motion passed unanimously.
14. Heard an Update from the Academy PBR Governance Work Group

Donna Claire (Academy PBR Governance Work Group) gave a presentation (Attachment Nineteen) on PBR resources available from the Academy. She said the Academy PBR practice page on the Academy website provides the PBR toolkit, Academy comments on PBR, links to NAIC PBR resources, and Academy publications on PBR. She noted that Actuarial Standard of Practice (ASOP) No. 52, Principle-Based Reserves for Life Products under the NAIC Valuation Manual and other ASOPs apply to actuaries responsible for doing or reviewing PBR work. She said the Boot Camp following the Fall National Meeting will include a variable annuities track. She said there will also be a series of Academy webinars on variable annuity reserves. She noted that a practice note on PBR projections is soon to be released, and a “PBR Checklist” that lists important characteristics to consider for PBR valuations was released in October. Other publications referenced by Ms. Claire are the PBR analysis template and an updated VM-20 practice note reflecting changes effective in the 2020 Valuation Manual.

15. Heard an Update on the RFP for the ESG

Pat Allison (NAIC) presented an update (Attachment Twenty) on the request for proposal (RFP) for a new economic scenario generator (ESG) requested by the Task Force and the Life Risk-Based Capital (E) Working Group earlier this year. The RFP is being developed and will result in the selection of a vendor to provide a new ESG to be prescribed for life and annuity reserves and capital. More specifically, the ESG will be used for VM-20, VM-21, C-3 Phase I and C-3 Phase II. She said the target date for completion of the RFP is the first quarter of 2020. She noted that implementation of the ESG will be no earlier than 2022.

16. Heard an Update on the Cessation of LIBOR

Ms. Allison provided an update (Attachment Twenty-One) on the cessation of the London Interbank Offered Rate (LIBOR). She said LIBOR will no longer be available after 2021. She said the replacement of LIBOR is due to: 1) LIBOR becoming less suitable as a benchmark; 2) the reduction of LIBOR-based borrowing; 3) the unsecured nature of LIBOR; and 4) the reluctance of banks to submit LIBOR rates based on judgment rather than actual transactions.

Ms. Allison said the Alternative Reference Rates Committee (ARRC) was formed in 2014 by the Board of Governors of the Federal Reserve and the Federal Reserve Bank of New York in response to risks related to LIBOR. She said the ARRC has identified the Secured Overnight Financing Rate (SOFR) as the rate representing best practice for use in derivatives and other financial contracts. The presentation lists a number of reasons for the selection of the SOFR and the risks associated with moving to the SOFR. The Federal Reserve Bank of New York began daily publication of the SOFR in April 2018. Ms. Allison encouraged companies to consider actions that they may need to take to accommodate the replacement of LIBOR. She also noted that changes to the Valuation Manual and the Accounting Practices and Procedures Manual (AP&P Manual) will be necessary.

17. Heard an Update on Life Insurance Mortality Experience Reporting

Ms. Allison provided an update (Attachment Twenty-Two) on life insurance experience reporting for 2020. She said that beginning the fourth quarter of 2019, companies can begin to submit data using the Regulatory Data Collection (RDC) tool. Companies are also able to request exemptions or communicate exclusions from the data collection requirements. Ms. Allison said the initial data call begins in the second quarter of 2020, with a Sept. 30, 2020, deadline for submission. She noted that companies must correct any identified data errors by Dec. 31. She said the deadline for NAIC submission of aggregate experience data to the SOA is May 31, 2021.

Ms. Allison said the company selection process was limited because the lack of granularity of annual statement data made it difficult to exclude the lines of business outside the scope identified in the Valuation Manual. She said the selection process focused on groups of affiliated companies and individual companies large enough to be subject to PBR in 2020. She said the process resulted in the selection of 176 companies from 31 different domiciliary states. She noted that 107 of the selected companies have participated in the Kansas or New York data calls.

Ms. Allison said no state insurance regulator decision is necessary to determine that a company is able to meet available exclusions. She said exemptions require the NAIC to consult with a company’s domestic regulator before being granted or disallowed. She said after potential exclusions and exemptions, 148 companies are currently selected to participate in the data call. She said the NAIC is providing a number of resources to support companies in the data submission process. She also
discussed data checks currently in place to provide controls for the submission process, and she reviewed some frequently asked questions (FAQs).

18. **Discussed PBR Mortality Aggregation**

Ms. Hemphill said the mortality aggregation presentation (Attachment Twenty-Three) from the Summer National Meeting is provided for reference. She said there were no formal comments submitted when the materials were previously exposed. She cautioned that, even when there are no written prohibitions against the aggregation of particular segments, actuarial judgment as to the relevance and appropriateness of data is still applicable and should prevail. She noted that one informal comment suggested adding a guidance note to the *Valuation Manual* that would direct readers to the aggregation examples provided on the Industry tab of the NAIC webpage.

David Neve (Academy LRWG) said one of the principles of PBR is that the same assumptions should be used across all company applications. He said that developing new mortality assumptions for PBR based on VM-20’s aggregation requirements seem to be inconsistent with that principle. Ms. Hemphill said the intent of the examples was to provide general principles or dos and don’ts for aggregating, not to specifically dictate how the aggregation should be executed.

19. **Heard an Update from the Compact**

Jeanne Daharsh (Interstate Insurance Product Regulation Commission—Compact) provided an update (Attachment Twenty-Four) on the activities of the Compact. She said the Commission Officers and Management Committee will meet on Dec. 9 to consider approval of uniform standards for: 1) group policyholder application; 2) group annuity certificate for employer groups; and 3) group guaranteed interest contracts (GICs) for non-variable annuities for employer groups.

She said the single premium group fixed annuity contract standards adopted by the Compact will be effective for filing Jan. 14, 2020. She noted that the Product Standards Committee continues to address the gaps in uniform standards for individual life and annuity. She said a referral was sent to the Actuarial Working Group to consider developing standards for index-linked variable annuity products.

Ms. Daharsh said the Compact has received 1,367 filings through October, of which 1,305 have been approved. She said the average wait time for review of a filing is 33 days. The median number of states on a Compact filing is 43. The number of mix-and-match filings has continued to decrease and now comprises 28% of filings. She said 69% of the filings are for life products, 18% of the filings are for annuity products, and the remaining filings are for long-term care (LTC) and disability income. She noted that there has been a 50% increase in life filings due to the 2017 CSO filings.

19. **Adopted the Report of the IUL Illustration (A) Subgroup**

Mr. Andersen made a motion, seconded by Mr. Chou, to adopt the Nov. 14 (Attachment Twenty-Five), Nov. 1 (Attachment Twenty-Six) and Sept. 16 (Attachment Twenty-Seven) minutes of the IUL Illustration (A) Subgroup. The motion passed unanimously.

Mr. Andersen said the Task Force voted that illustrations for indexed universal life (IUL) policies with multipliers and product enhancements should illustrate no better than IUL policies without multipliers. He said one of the product enhancements of concern to the Task Force is the cap buy-up, which allows a policyholder to receive returns in excess of the investment return cap specified in the policy. He noted that there are charges associated with multipliers and product enhancements, but the net return on policies are in excess of the returns for IUL products without those features.

Mr. Andersen said the Task Force decision produced a number of comments from industry members. He said some of the letters offered opinions on what to do with the cap buy-up feature. Before considering the comment letters, he asked Task Force members to confirm that their intent was to have IUL policies with cap buy-ups illustrate no better than IUL policies without cap buy-up features. Mr. Serbinowski said his intent was to quote in that manner. He followed by saying that unless there is a restriction placed on the underlying investments returns, companies will continue to design products to circumvent the limitation. Mr. Chupp said that he no longer supports the position taken in his comment letter (Attachment Twenty-Eight). He said his preference is for the recommendation submitted by Nationwide Insurance (Attachment Twenty-Nine). Mr. Andersen discussed the table of numerical examples provided in the Nationwide recommendation. He said the recommendation differentiates between an index bonus charge, which covers the cost related to the multiplier, and an index parameter charge, which are applicable to the benchmark index account. Ms. Ahrens said the charges should be treated in a similar manner to avoid the company circumvention efforts spoken of by Mr. Serbinowski. Birny Birnbaum (Center for Economic Justice—CEJ) said cap buy-ups should be treated in the same manner as multipliers because the same principles hold for both features. He
said the multipliers, bonuses and buy-ups all show up as increased returns without demonstrating increased risks. Mr. Boerner asked if Mr. Birnbaum believes that AG 49 could be revised to show downside risk. Mr. Birnbaum said he does not believe that the current illustration model, and by extension AG 49, is able to reflect the downside risk. He also suggested that the issue with illustrations should be addressed by the Life Insurance and Annuities (A) Committee instead of the Task Force. Ms. Ahrens said that some of the actions of the Task Force seem to be aimed at stomping out product innovation. She said actions to limit product design should be the purview of the Life Insurance and Annuities (A) Committee. Mr. Birnbaum said he is in favor of the Task Force addressing this issue with illustrations, but he also thinks that the Life Insurance and Annuities (A) Committee should take a broader look at illustrations.

Tom Doruska (Global Atlantic) said the Global Atlantic comments (Attachment Thirty) recommend that cap buy-ups and multipliers should be treated the same. He also said the necessary changes should be accomplished in Section 5 of AG 49. Mr. Boerner agreed and said the inclusion of downside risk in illustrations can be considered as Phase 2. The Task Force voted to direct the IUL Illustration (A) Subgroup to revise AG 49 to subject cap buy-ups and index return enhancements to constraints reasonably similar to the constraints to be applied to multipliers, with Mr. Chupp dissenting.

Mr. Serbinowski made a motion, seconded by Ms. Ahrens, to adopt the IUL Illustration (A) Subgroup’s report. The motion passed unanimously.

20. Discussed the VBT and Expiring Experience

Ms. Bahna-Nolan introduced the VBT analysis process (Attachment Thirty-One). She plans to have the analysis completed for discussion with the Task Force at the 2020 Summer National Meeting. She said the 2015 VBT and the relative risk (RR) tables were based on 2002–2009 industry data projected forward with mortality improvement to 2015. She said the 2015 VBT, projected to the valuation date with the mortality improvement scale that Ms. Purushotham previously discussed with the Task Force, is used as the best estimate mortality. She said starting in 2020, the number of companies contributing to the mandatory data collection will grow significantly. She said the Joint Committee would like to develop analytics to determine when there is sufficient differentiation to warrant development of a new table. She said an approach has been developed that is based on a normal distribution and uses confidence intervals to determine whether to develop a new table.

Ms. Bahna-Nolan said the Joint Committee will work with MIB, Inc. and the NAIC to add calculation fields and credibility calculations to the individual mortality data. She said Task Force and industry feedback is welcome.

21. Discussed Comments Received on Amendment Proposal 2019-56

Ms. Bahna-Nolan said comments from Allstate (Attachment Thirty-Two), the ACLI (Attachment Thirty-Three) and the CEJ (Attachment Thirty-Four) were submitted on amendment proposal 2019-56 (Attachment Thirty-Five), which recommended the addition of data elements to the mandatory data call that would assist in segmenting and differentiating experience by underwriting programs. She said the comments shared concerns related to data privacy and security, data complexity, the costs of compliance, and timing. She said they are working with the NAIC Legal staff to address the data privacy issue, which is a primary concern. Dan Schelp (NAIC) said the new data elements being requested do not add to the data privacy issue. He said work was done last year to ensure that personally identifiable information was not being collected. He agreed to look at any of the new data fields about which there is concern.

22. Adopted the Report of the Experience Reporting (A) Subgroup

Mr. Andersen said it is time to begin collection of variable annuities (VA) policyholder behavior data. He said that due to the market rising since 2008, the need for the policyholder behavior data has not been as critical. He said it is important that the structure for data collection be put in place to prepare for the future.

Mr. Andersen made a motion, seconded by Mr. Yanacheak, to adopt the Experience Reporting (A) Subgroup’s report. The motion passed unanimously.

23. Heard an Update from the Academy Council on Professionalism

Kathy Riley (Academy) said the Actuarial Standards Board (ASB) has completed its review of ASOP No. 11, Financial Statement Treatment of Reinsurance Transactions Involving Life Insurance or Health Insurance. ASOP No. 11 will be posted on the ASB webpage soon, with comments due by Feb. 28, 2020. Ms. Riley said the ASB expects to complete its revisions to ASOP No. 22, Statements of Opinion Based on Asset Adequacy Analysis by Actuaries for Life or Health Insurers in February
2020. She said the guidance in ASOP No. 22 has been expanded with changes to the language on discount rates and assumptions, and additional guidance on reinsurance and separate account assets. She said comments from the exposure draft of ASOP No. 2, *Nonguaranteed Charges or Benefits for Life Insurance Policies and Annuity Contracts* are being reviewed. ASOP No. 56, *Modeling* has been finalized after four exposure drafts.

David Ogden (Academy) said the Actuarial Board for Counseling and Discipline (ABCD) provided general descriptions of the life requests for guidance. He encouraged actuaries to utilize the process if they have questions.

Having no further business, the Life Actuarial (A) Task Force adjourned.
The Life Actuarial (A) Task Force met via conference call Oct. 17, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Jacob Lauten (AK); Jim L. Ridling represented by Steve Ostlund (AL); Ricardo Lara represented by Perry Kupferman (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Robert H. Muriel represented by Bruce Sartain (IL); Stephen W. Robertson represented by Karl Knable (IN); Vicki Schmidt represented by Nicole Boyd (KS); Steve Kelley represented by Fred Andersen and John Robinson (MN); Chlora Lindley-Myers represented by William Leung (MO); Bruce. R. Ramge represented by Rhonda Ahrens (NE); Marlene Caride represented by Seong-min Eom (NJ); John G. Franchini represented by Mark Hendrick (NM); Linda A. Lacewell represented by Bill Carmello and Amanda Fenwick (NY); Glen Mulready represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA). Also participating was: Rachel Hemphill (TX).

1. Provided Direction on AG 49 Revisions to the IUL Illustration (A) Subgroup

Mr. Andersen said that during the Sept. 16 IUL Illustration (A) Subgroup conference call, the Subgroup discussed five possible ways to address concerns related to the crediting rate applied to indexed universal life (IUL) illustrations. The possibilities were narrowed down to possibility 2, eliminating any difference between the illustrated rate for products with index multipliers and products without index multipliers, and possibility 3, allowing a heavily constrained difference between products with multipliers and products without multipliers. Mr. Andersen noted that separate drafts of edits to Actuarial Guideline XLIX, The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest (AG 49) to reflect possibility 2 (Attachment One-A) and possibility 3 (Attachment One-B) have been prepared. He said the language addressing the illustrated rate applicable to policy loans is the same in both drafts. He said disclosure issues will be addressed in phase 2 of this project.

Austin Bichler (Allianz Life) said Allianz Life’s comment letter (Attachment One-C) supports limits on the illustrated rates for multiplier policies, as proposed in the AG 49 edits for possibility 3. He proposed a mandatory ledger that would show all policy charges and credits on an annual basis. He also proposed a numerical disclosure displaying the impact of the non-level sequence of credits. Mr. Andersen said the Subgroup can determine whether the non-level sequence of credits disclosure is easy to employ or if it should be deferred to phase 2.

Ernest Armijos (Pacific Life) said Pacific Life favors possibility 3 with the addition of a secondary guardrail designed to protect consumers. A feature of the secondary guardrail would be a guaranteed alternative cash value, which would limit the downside risk while allowing for potential growth. Possibility 3 proposes an allowance for a 45% annual return on charges up to 2.5%. Mr. Weber and Ms. Ahrens said 2.5% was chosen as a reasonable middle ground to use as a guardrail.

Mary Bahna-Nolan (Pacific Life) said Pacific Life opposes possibility 2 because it does not seem to comply with the requirements of the Life Insurance Illustrations Model Regulation (#582) or Actuarial Standard of Practice (ASOP) 24, Compliance with the NAIC Life Insurance Illustrations Model Regulation. She said the implementation of possibility 2 would require the illustration of the multiplier charges without allowing the illustration of the upside benefits. She also noted that possibility 2 may conflict with the Advertisements of Life Insurance and Annuities Model Regulation (#570), which requires life insurance advertising to be complete and clear. She said that since multiplier features were not modeled under possibility 2, companies would be prohibited from discussing these features, leading to incomplete information. Ms. Hemphill said possibility 2 models both the multiplier charges and an offsetting amount of associated credits; therefore, there would not be a prohibition on discussing the multiplier features. Mr. Leung questioned how possibility 2 would not comply with Model #582 and ASOP 24 if the current version of AG 49 is in compliance. Ms. Bahna-Nolan said that is a different issue related to the incorporation of features and benefits into the disciplined current scale.

Birny Birnbaum (Center for Economic Justice—CEJ) said possibility 2 is the best way to immediately address the current issues. He said the questions related to sequence of charges and disclosure can be addressed later.

Mr. Andersen asked the Task Force members to express their preference for revising AG 49 to reflect either possibility 2 or possibility 3. Alabama, Alaska, California, Connecticut, Illinois, Iowa, Kansas, Missouri, New Mexico, New York, Oklahoma,
Texas and Utah voted for possibility 2. Indiana, Minnesota, Nebraska, New Jersey, Ohio and Virginia voted for possibility 3. Mr. Boerner asked if anyone disagreed with directing the Subgroup to proceed with addressing the crediting rate for loans using the approach provided in the AG 49 edits that reflect possibility 2. No Task Force members objected. On behalf of the Subgroup, Mr. Andersen accepted the direction to revise AG 49 to reflect possibility 2 and submit the revised document to the Task Force for its consideration.

Having no further business, the Life Actuarial (A) Task Force adjourned.
Actuarial Guideline XLIX

THE APPLICATION OF THE LIFE ILLUSTRATIONS MODEL REGULATION TO POLICIES WITH INDEX-BASED INTEREST

Background

The Life Insurance Illustrations Model Regulation (#582) was adopted by the NAIC in 1995. Since that time there has been continued evolution in product design, including the introduction of benefits that are tied to an external index or indices. Although these policies are subject to Model #582, not all of their features are explicitly referenced in the model, resulting in a lack of uniform practice in its implementation. In the absence of uniform guidance, two illustrations that use the same index and crediting method often illustrated different credited rates. The lack of uniformity can be confusing to potential buyers and can cause uncertainty among illustration actuaries when certifying compliance with Model #582.

This guideline provides uniform guidance for policies with index-based interest. In particular, this guideline:

1. Provides guidance in determining the maximum crediting rate for the illustrated scale and the earned interest rate for the disciplined current scale.
2. Limits the policy loan leverage shown in an illustration.
3. Requires additional consumer information (side-by-side illustration and additional disclosures) that will aid in consumer understanding.

Text

1. Effective Date

This Actuarial Guideline shall be effective as follows:

i. Sections 4 and 5 shall be effective for all new business and in force life insurance illustrations on policies sold on or after September 1, 2015.

ii. Effective March 1, 2017, Section 4 and Section 5 shall be effective for all in-force life insurance illustrations on policies within the scope of this actuarial guideline, regardless of the date the policy was sold.

iii. Sections 6 and 7 shall be effective for all new business and in force life insurance illustrations on policies sold on or after March 1, 2016.

2. Scope

This Actuarial Guideline shall apply to any life insurance illustration that meets both (i) and (ii), below:

i. The policy is subject to Model #582.

ii. The policy offers interest credits, multipliers, factors, bonuses, or other enhancements to policy values that are linked to an external index or indices.

3. Definitions

A. Alternate Scale: A scale of non-guaranteed elements currently being illustrated such that:

i. The credited rate for each Index Account does not exceed the lesser of the maximum credited rate for the illustrated scale less 100 basis points and the credited rate for the Fixed Account. If the insurer does
not offer a Fixed Account with the illustrated policy, the credited rate for each Index Account shall not exceed the average of the maximum credited rate for the illustrated scale and the guaranteed credited rate for that account. However, the credited rate for each Index Account shall never be less than the guaranteed credited rate for that account.

ii. If the illustration includes a loan, the illustrated rate credited to the loan balance, including Index Credits and all other illustrated benefits and bonuses that impact the policy’s account value, shall not exceed the illustrated loan charge rate does not exceed the illustrated loan charge.

iii. All other non-guaranteed elements are equal to the non-guaranteed elements for the illustrated scale.

B. Annual Net Investment Earnings Rate: Gross portfolio annual earnings rate, less provisions for investment expenses and default cost, of the general account assets (excluding hedges for Indexed Credits) allocated to support the policy.

B.C. Benchmark Index Account: An Index Account with the following features:

i. The interest calculation is based on the percent change in S&P 500® Index value only, over a one-year period using only the beginning and ending index values. (S&P 500® Index ticker: SPX)

ii. An annual cap is used in the interest calculation.

iii. The annual floor used in the interest calculation shall be 0%.

iv. The participation rate used in the interest calculation shall be 100%.

v. Interest is credited once per year.

vi. Account charges do not exceed the account charges for any corresponding Index Accounts within the policy in any policy year. If Index Accounts with different levels of account charges are offered with the illustrated policy, more than one Benchmark Index Account may be used in determining the maximum illustrated crediting rates for the policy’s Index Accounts, subject to the requirements of 5.D.. However, for each Index Account within the policy, only one Benchmark Index Account shall apply. Any rate calculated in 4 (B) shall not apply for an Index Account if the account charges for the applicable Benchmark Index Account exceed the account charges for that Index Account in any policy year. Account charges include all charges applicable to an Index Account, whether deducted from policy values or from premiums or other amounts transferred into such Index Account.

vii. Additional amounts credited are not less than the additional amounts credited for any corresponding Index Accounts within the policy in any policy year. Any rate calculated in 4 (B) shall not apply for an Index Account if the additional amounts credited for the applicable Benchmark Index Account are less than the additional amounts credited for that Index Account in any policy year. Additional amounts include all credits that increase policy values, including but not limited to experience refunds or bonuses.

viii. There are no limitations on the portion of account value allocated to the account.

C.D. Fixed Account: An account where the credited rate is not tied to an external index or indices.

E. Index Account: An account where the credited rate is tied to an external index or indices.

F. Indexed Credits: Any interest credit, multiplier, factor, bonus, or other enhancement to policy values that is linked to an external index or indices.

G. Supplemental Option Budget: The total amount spent to generate the Indexed Credits of the policy minus the Annual Net Investment Earnings Rate. This amount is expressed as a percent of the policy’s indexed account value.
4. Illustrated Scale

The credited rate for the illustrated scale for each Index Account shall be limited as follows:

A. Calculate the geometric average annual credited rate for each applicable Benchmark Index Account for the 25-year period starting on 12/31 of the calendar year that is 66 years prior to the current calendar year (e.g., 12/31/1949 for 2015 illustrations) and for each 25-year period starting on each subsequent trading day thereafter, ending with the 25-year period that ends on 12/31 of the prior calendar year.

i. If the insurer offers an applicable Benchmark Index Account with the illustrated policy, the illustration actuary shall use the current annual cap for the applicable Benchmark Index Account in 4 (A).

ii. If the insurer does not offer an applicable Benchmark Index Account with the illustrated policy, the illustration actuary shall use actuarial judgment to determine a hypothetical, supportable current annual cap for a hypothetical, supportable Index Account that meets the definition of a Benchmark Index Account, and shall use that cap in 4 (A).

B. For each applicable Benchmark Index Account, the arithmetic mean of the geometric average annual credited rates calculated in 4 (A) shall be the maximum credited rate(s) for the illustrated scale.

C. For other Index Accounts using other equity, bond, and/or commodity indexes, and/or using other crediting methods, the illustration actuary shall use actuarial judgment to determine the maximum credited rate for the illustrated scale. The determination shall reflect the fundamental characteristics of the Index Account and the parameters shall have the appropriate relationship to the expected risk and return of the applicable Benchmark Index Account. In no event shall the credited rate for the illustrated scale exceed the applicable rate calculated in 4 (B).

D. At the beginning of each calendar year, the insurer shall be allowed up to three (3) months to update the credited rate for each Index Account in accordance with 4 (B) and 4 (C).

5. Disciplined Current Scale

The annual earned interest rate for underlying the disciplined current scale shall be limited as follows:

A. If an insurer engages in a hedging program for index-based interest Indexed Credits, the assumed annual earned interest rate underlying the disciplined current scale for the policy, inclusive of all hedge/derivative assets and cash flows that support Indexed Credits and all other investments that support the policy, shall not exceed i. + ii. + iii., where:

i. equals the Annual Net Investment Earnings Rate,

ii. equals 45% times the Annual Net Investment Earnings Rate, and

iii. equals the Supplemental Option Budget.

145% of the annual net investment earnings rate (gross portfolio earnings less provisions for investment expenses and default costs) of the general account assets (excluding hedges for index-based credits) allocated to support the policy.

Drafting note: i. is a proxy for the amount funding the 0% interest guarantee; ii. Allows a 45% return on the portion of the Option Budget up to the Annual Net Investment Earnings Rate; iii. Allows a return of the Supplemental Option Budget to offset the charges.
A-B. If an insurer does not engage in a hedging program for index-based interest Indexed Credits, the assumed annual earned interest rate underlying the disciplined current scale for the policy shall not exceed the annual net investment earnings rate of the general account assets allocated to support the policy.

B-C. These experience limitations shall be included when testing for self-support and lapse-support under Model #582, accounting for all Indexed Credits and all other illustrated benefits and including illustrated bonuses.

D. If more than one Benchmark Index Account is used for an illustrated policy, each set of Index Accounts that correspond to each Benchmark Index Account, and all Indexed Credits that apply to an Indexed Account, must independently pass the self-support and lapse-support tests under Model #582, subject to the limitations in 5 (A), (B), and (C). All experience assumptions that do not directly relate to the Index Accounts and Indexed Credits as to expenses, mortality, investment earnings rate of the general account assets, lapses, and election of any Fixed Account shall equal the assumptions used in the testing for the entire policy.

E. The table below illustrates four examples of the calculation of the assumed annual earned interest rate underlying the disciplined current scale. Example 1 assumes the insurer engages in a hedging program and the Supplemental Option Budget is zero. Examples 2-4 assume the insurer’s Supplemental Option Budget is positive in increasing amounts.

6. Policy Loans

If the illustration includes a loan, the illustrated rate credited to the loan balance, including Indexed Credits and all other illustrated benefits and bonuses that impact the policy’s account value, shall not exceed the sum of explicit illustrated loan charges and asset-based charges by more than 100 basis points.

6.7. Additional Standards

The basic illustration shall also include the following:

A. A ledger using the Alternate Scale shall be shown alongside the ledger using the illustrated scale with equal prominence.

B. A table showing the minimum and maximum of the geometric average annual credited rates calculated in 4 (A).

C. For each Index Account illustrated, a table showing actual historical index changes and corresponding hypothetical interest rates using current index parameters for the most recent 20-year period.
Actuarial Guideline XLIX

THE APPLICATION OF THE LIFE ILLUSTRATIONS MODEL REGULATION TO POLICIES WITH INDEX-BASED INTEREST

Background

The Life Insurance Illustrations Model Regulation (#582) was adopted by the NAIC in 1995. Since that time there has been continued evolution in product design, including the introduction of benefits that are tied to an external index or indices. Although these policies are subject to Model #582, not all of their features are explicitly referenced in the model, resulting in a lack of uniform practice in its implementation. In the absence of uniform guidance, two illustrations that use the same index and crediting method often illustrated different credited rates. The lack of uniformity can be confusing to potential buyers and can cause uncertainty among illustration actuaries when certifying compliance with Model #582.

This guideline provides uniform guidance for policies with index-based interest. In particular, this guideline:

(1) Provides guidance in determining the maximum crediting rate for the illustrated scale and the earned interest rate for the disciplined current scale.

(2) Limits the policy loan leverage shown in an illustration.

(3) Requires additional consumer information (side-by-side illustration and additional disclosures) that will aid in consumer understanding.

Text

1. Effective Date

This Actuarial Guideline shall be effective as follows:

i. Sections 4 and 5 shall be effective for all new business and in force life insurance illustrations on policies sold on or after September 1, 2015.

ii. Effective March 1, 2017, Section 4 and Section 5 shall be effective for all in-force life insurance illustrations on policies within the scope of this actuarial guideline, regardless of the date the policy was sold.

iii. Sections 6 and 7 shall be effective for all new business and in force life insurance illustrations on policies sold on or after March 1, 2016.

2. Scope

This Actuarial Guideline shall apply to any life insurance illustration that meets both (i) and (ii), below:

i. The policy is subject to Model #582.

ii. The policy offers interest credits, multipliers, factors, bonuses, or other enhancements to policy values that are linked to an external index or indices.

3. Definitions

A. Alternate Scale: A scale of non-guaranteed elements currently being illustrated such that:

i. The credited rate for each Index Account does not exceed the lesser of the maximum credited rate for the illustrated scale less 100 basis points and the credited rate for the Fixed Account. If the insurer does
not offer a Fixed Account with the illustrated policy, the credited rate for each Index Account shall not exceed the average of the maximum credited rate for the illustrated scale and the guaranteed credited rate for that account. However, the credited rate for each Index Account shall never be less than the guaranteed credited rate for that account.

ii. If the illustration includes a loan, the illustrated rate credited to the loan balance, including Index Credits and all other illustrated benefits and bonuses that impact the policy’s account value, shall not exceed the illustrated loan charge rate does not exceed the illustrated loan charge.

iii. All other non-guaranteed elements are equal to the non-guaranteed elements for the illustrated scale.

B. Annual Net Investment Earnings Rate: Gross portfolio annual earnings rate, less provisions for investment expenses and default cost, of the general account assets (excluding hedges for Indexed Credits) allocated to support the policy.

B.C. Benchmark Index Account: An Index Account with the following features:

i. The interest calculation is based on the percent change in S&P 500® Index value only, over a one-year period using only the beginning and ending index values. (S&P 500® Index ticker: SPX)

ii. An annual cap is used in the interest calculation.

iii. The annual floor used in the interest calculation shall be 0%.

iv. The participation rate used in the interest calculation shall be 100%.

v. Interest is credited once per year.

vi. Account charges do not exceed the account charges for any corresponding Index Accounts within the policy in any policy year. If Index Accounts with different levels of account charges are offered with the illustrated policy, more than one Benchmark Index Account may be used in determining the maximum illustrated crediting rates for the policy’s Index Accounts, subject to the requirements of 5.D. However, for each Index Account within the policy, only one Benchmark Index Account shall apply. Any rate calculated in 4 (B) shall not apply for an Index Account if the account charges for the applicable Benchmark Index Account exceed the account charges for that Index Account in any policy year. Account charges include all charges applicable to an Index Account, whether deducted from policy values or from premiums or other amounts transferred into such Index Account.

vii. Additional amounts credited are not less than the additional amounts credited for any corresponding Index Accounts within the policy in any policy year. Any rate calculated in 4 (B) shall not apply for an Index Account if the additional amounts credited for the applicable Benchmark Index Account are less than the additional amounts credited for that Index Account in any policy year. Additional amounts include all credits that increase policy values, including but not limited to experience refunds or bonuses.

viii. There are no limitations on the portion of account value allocated to the account.

C.D. Fixed Account: An account where the credited rate is not tied to an external index or indices.

E. Index Account: An account where the credited rate is tied to an external index or indices.

F. Indexed Credits: Any interest credit, multiplier, factor, bonus, or other enhancement to policy values that is linked to an external index or indices.

G. Supplemental Option Budget: The total amount spent to generate the Indexed Credits of the policy minus the Annual Net Investment Earnings Rate. This amount is expressed as a percent of the policy’s indexed account value.
4. Illustrated Scale

The credited rate for the illustrated scale for each Index Account shall be limited as follows:

A. Calculate the geometric average annual credited rate for each applicable Benchmark Index Account for the 25-year period starting on 12/31 of the calendar year that is 66 years prior to the current calendar year (e.g., 12/31/1949 for 2015 illustrations) and for each 25-year period starting on each subsequent trading day thereafter, ending with the 25-year period that ends on 12/31 of the prior calendar year.

   i. If the insurer offers an applicable Benchmark Index Account with the illustrated policy, the illustration actuary shall use the current annual cap for the applicable Benchmark Index Account in 4 (A).

   ii. If the insurer does not offer an applicable Benchmark Index Account with the illustrated policy, the illustration actuary shall use actuarial judgment to determine a hypothetical, supportable current annual cap for a hypothetical, supportable Index Account that meets the definition of a Benchmark Index Account, and shall use that cap in 4 (A).

B. For each applicable Benchmark Index Account, the arithmetic mean of the geometric average annual credited rates calculated in 4 (A) shall be the maximum credited rate(s) for the illustrated scale.

C. For other Index Accounts using other equity, bond, and/or commodity indexes, and/or using other crediting methods, the illustration actuary shall use actuarial judgment to determine the maximum credited rate for the illustrated scale. The determination shall reflect the fundamental characteristics of the Index Account and the parameters shall have the appropriate relationship to the expected risk and return of the applicable Benchmark Index Account. In no event shall the credited rate for the illustrated scale exceed the applicable rate calculated in 4 (B).

D. At the beginning of each calendar year, the insurer shall be allowed up to three (3) months to update the credited rate for each Index Account in accordance with 4 (B) and 4 (C).

5. Disciplined Current Scale

The earned interest rate for the disciplined current scale shall be limited as follows:

A. If an insurer engages in a hedging program for index-based interest Indexed Credits, the assumed annual earned interest rate underlying the disciplined current scale for the policy, inclusive of all hedge/derivative assets and cash flows that support Indexed Credits and all other investments that support the policy, shall not exceed i. + ii. + iii., where:

   i. equals the Annual Net Investment Earnings Rate,

   ii. equals 45% times the Annual Net Investment Earnings Rate, and

   iii. equals 145% times the minimum of the Supplemental Option Budget and 2.5%.

145% of the annual net investment earnings rate (gross portfolio earnings less provisions for investment expenses and default costs) of the general account assets (excluding hedges for index-based credits) allocated to support the policy.

Drafting note: i. is a proxy for the amount funding the 0% interest guarantee; ii. Allows a 45% return on the portion of the Option Budget up to the Annual Net Investment Earnings Rate; iii. Allows for a 45% annual return on charges up to 2.5%.
If an insurer does not engage in a hedging program for index-based interest Indexed Credits, the assumed annual earned interest rate underlying the disciplined current scale for the policy shall not exceed the annual net investment earnings rate of the general account assets allocated to support the policy.

These experience limitations shall be included when testing for self-support and lapse-support under Model #582, accounting for all Indexed Credits and all other illustrated benefits and including illustrated bonuses.

If more than one Benchmark Index Account is used for an illustrated policy, each set of Index Accounts that correspond to each Benchmark Index Account, and all Indexed Credits that apply to an Indexed Account, must independently pass the self-support and lapse-support tests under Model #582, subject to the limitations in 5 (A), (B), and (C). All experience assumptions that do not directly relate to the Index Accounts and Indexed Credits as to expenses, mortality, investment earnings rate of the general account assets, lapses, and election of any Fixed Account shall equal the assumptions used in the testing for the entire policy.

The table below illustrates four examples of the calculation of the assumed annual earned interest rate underlying the disciplined current scale. Example 1 assumes the insurer engages in a hedging program and the Supplemental Option Budget is zero. Examples 2-4 assume the insurer’s Supplemental Option Budget is positive in increasing amounts.

Policy Loans

If the illustration includes a loan, the illustrated rate credited to the loan balance, including Index Credits and all other illustrated benefits and bonuses that impact the policy’s account value, shall not exceed the charge rates, including those from illustrated loan charges and other charges that impact the policy’s account value, by more than 100 basis points.

Additional Standards

The basic illustration shall also include the following:

A. A ledger using the Alternate Scale shall be shown alongside the ledger using the illustrated scale with equal prominence.

B. A table showing the minimum and maximum of the geometric average annual credited rates calculated in 4 (A).

C. For each Index Account illustrated, a table showing actual historical index changes and corresponding hypothetical interest rates using current index parameters for the most recent 20-year period.
October 16, 2019

Mr. Mike Boerner, Chairperson, Life Actuarial (A) Task Force  
Mr. Fred Andersen, Chairperson, IUL Illustration (A) Subgroup  
National Association of Insurance Commissioners

Re: Illustration of Index Multipliers under AG 49

Mr. Boerner and Mr. Andersen,

In advance of the October 17 Life Actuarial Task Force call to discuss the illustration of index multipliers, Allianz would like to submit the following comments in support of a compromise approach and enhanced disclosures. Thank you for the opportunity to provide these comments.

**Innovative products provide value to consumers**

In this historically low interest rate environment, insurers are limited in the value they can provide through traditional insurance products, so insurers are developing innovative products that have the opportunity to provide more value to consumers. One example of a product innovation that provides value to consumers is the index multiplier.

Index multipliers offer policyholders more upside potential. In a traditional IUL product, the insurer has an option budget that is used to buy hedges that support index credits. When a multiplier is added, the option budget is increased by policy charges, which enable the insurer to purchase more units of the same hedges.

<table>
<thead>
<tr>
<th>Original option budget</th>
<th>4.0%</th>
<th>1.00 units of hedges</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multiplier charge</td>
<td>1.0%</td>
<td>0.25 units of hedges</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td>5.0%</td>
<td><strong>1.25 units of hedges</strong></td>
</tr>
</tbody>
</table>

Since the charges are used to purchase the same hedges that are used to support the base index credits, the options have the same level of risk premium. However, the additional policy charges result in a different risk profile for the policy as a whole.

**We support limits in the illustration of index multipliers**

Although index multipliers can provide value to consumers who want more upside potential, the additional policy charges increase the risk profile in the policy. Therefore, we support a limit to the amount that is shown in illustrations. We believe the proposed 2.5% limit to the illustrated option budget in excess of the annual net investment earned rate (NIER) reflects a reasonable balance between consumer value and consumer protection.

**Example of the 2.5% limit**

<table>
<thead>
<tr>
<th>NIER</th>
<th>Multiplier charge</th>
<th>Actual option budget</th>
<th>Maximum illustrated option budget</th>
<th>Maximum DCS illustrated rate</th>
<th>Net DCS illustrated rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0%</td>
<td>3.0%</td>
<td>7.0%</td>
<td>min (7.0, 4.0 + 2.5) = 6.5%</td>
<td>6.5 * 1.45 = 9.4%</td>
<td>9.4 – 3.0 = 6.4%</td>
</tr>
</tbody>
</table>

<tbody>
<tr>
<td>5.0%</td>
<td>3.0%</td>
<td>5.0 + 3.0 + 1.0 = 9.0%</td>
<td>9.0 – 5.0 – 3.0 = 1.0%</td>
</tr>
</tbody>
</table>

**Allianz supports enhanced disclosure requirements within AG 49**

Allianz recognizes that value-adding product features such as index multipliers can increase product complexity, so we believe it is critical that illustrations are designed to educate consumers and empower them to make informed decisions. Therefore, we recommend two enhancements to the AG 49 disclosure requirements that would illuminate the risks associated with these index multiplier features as well as the risks associated with IUL products in general.

First, Allianz recommends adding a requirement in AG 49 that all credits and charges must be disclosed in the illustration using a year-by-year ledger. A year-by-year ledger showing all credits and charges would ensure that the consumer can clearly see the costs and benefits of the policy. Most carriers provide this type of ledger as an option to include in the illustration; we believe the ledgers should be mandatory because of the valuable information they provide.

Second, Allianz recommends adding a requirement in AG 49 for the illustration of a sequence of credits (i.e., non-level credited rates). Since 2015, we have included a demonstration of the impact of sequencing in our illustrations using a four year repeating pattern – 0%, x%, x%, x% – where the average of the four credits is equal to the illustrated rate.

As a result of the sequencing, the demonstration shows that either the maximum loan must decrease or the policy will lapse earlier than what was shown in the illustrated scale. As the risk of an option increases, the impact also increases.

**Example Demonstration**

<table>
<thead>
<tr>
<th>Illustrated scale</th>
<th>Option A: no index multiplier</th>
<th>Option B: index multiplier</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum annual loan</td>
<td>$14,654</td>
<td>$19,998</td>
</tr>
<tr>
<td>Sequenced scale</td>
<td>$14,261 (-2.7%)</td>
<td>$18,726 (-6.6%)</td>
</tr>
<tr>
<td>Lapse year with $14,654 annual loan</td>
<td>NA</td>
<td>NA</td>
</tr>
<tr>
<td>Lapse year with $19,998 annual loan</td>
<td>50</td>
<td>42</td>
</tr>
</tbody>
</table>

This sequencing demonstration has strongly resonated with our distribution force because it highlights risks using the same average credit as the illustrated scale. Although these risks are also shown to some degree in the guaranteed scale and the alternate scale, these illustrations are less effective because they are perceived to be “unrealistic” or “too conservative.” One of the most frequent requests we receive from our distribution force is the ability to illustrate the impact of volatile credits on policy values.

It is important to note that a sequencing demonstration can be added to AG 49 without opening the model because a pattern can be constructed such that the values shown in the sequenced demonstration never exceed the values shown in the illustrated scale.

1 Because the pattern starts with 0%, the values shown in the sequenced demonstration never exceed the values shown in the illustrated scale; thus, the pattern complies with Model 582. We chose a four-year pattern because the S&P 500 has historically been negative approximately one out of every four years. We are open to other patterns where the average equals the illustrated rate.

2 Assumes a 45-year-old at issue with a $250,000 death benefit. Option B assumes a hypothetical 2.5% multiplier charge.
Conclusion

Product innovations such as index multipliers provide consumers the opportunity for value in today’s historically low interest rate environment. It is important to find a way to illustrate these benefits in a way that balances consumer value and consumer protection; without illustration of these benefits, consumer education will decrease. Thus, we support the compromise proposal of a 2.5% limit and the clarification of loan rules.

We also support enhanced disclosure requirements to highlight the risks associated with these index multiplier features as well as the risks associated with IUL products in general. The illustration of all charges and credits along with a demonstration of the impact of sequence of credits will provide consumers meaningful product education and enable them to make informed decisions.

Thank you for the opportunity to provide these comments.

Regards,

Austin Bichler, FSA, MAAA
Senior Director Actuary & Illustration Actuary
Allianz Life Insurance Company of North America
The Life Actuarial (A) Task Force met via conference call Oct. 3, 2019. The following Task Force members participated:

Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Jacob Lauten (AK); Jim L. Ridling represented by Steve Ostlund (AL); Ricardo Lara represented by Ted Chang (CA); Andrew N. Mais represented by Wanchin Chou (CT); Robert H. Muriel represented by Bruce Sartain (IL); Stephen W. Robertson represented by Karl Knable (IN); Steve Kelley represented by Fred Andersen and John Robinson (MN); Marlene Caride represented by Seong-min Eom (NJ); Linda A. Lacewell represented by Bill Carmello (NY); Glen Muhleady represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA).

1. **Adopted the Joint Committee Recommendation for AG 38/VM-20 Mortality Improvement**

Mr. Boerner said the Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with AG 38 and VM-20 is referenced in Section 9.C.3.g of VM-20, Requirements for Principle-Based Reserves for Life Products. He said VM-20 states that the mortality improvement factors are to be determined by the Society of Actuaries (SOA). He added that the *Valuation Manual* does not require nor provide for Task Force adoption of the mortality improvement factors.

Reggie Mazyck (NAIC) agreed and said the mortality improvement factors have not been subject to Task Force adoption in the past. Mr. Ostlund argued that the mortality improvement factors should be subject to Task Force adoption. Mr. Sartain said discussion of whether the mortality improvement factors should be approved by the Task Force is worthwhile, but requiring Task Force adoption of the proposed factors breaks the precedent. Mr. Chang noted that Task Force disapproval would not prevent the SOA from publishing the mortality improvement factors.

Brian Bayerle (American Council of Life Insurers—ACLI) discussed the ACLI comments (Attachment Two-A) on the proposed mortality improvement factors. He agreed that a future discussion of whether Task Force approval of the mortality improvement factors should be required is worthwhile. He suggested that an earlier release of the mortality improvement factors should also be considered. He said releasing the mortality improvement factors in October makes it challenging for companies to apply the factors to their year-end analysis.

Marianne Purushotham (American Academy of Actuaries [Academy] Life Experience Committee and the SOA Preferred Mortality Oversight Group Valuation Basic Table Team—Joint Committee) said the Joint Committee considered publishing the recommendation at the beginning of the year, but doing so would not allow for inclusion of the data from the most recent year. She said the SOA peer review process determines whether the calculation methodology, which was last changed in 2013, was applied correctly and looks at the history of changes and the materiality of proposed changes to determine if the proposed change should be applied.

Mr. Ostlund made a motion, seconded by Mr. Serbinowski, to adopt the Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with AG 38 and VM-20 (see *NAIC Proceedings – Fall 2019, Life Actuarial (A) Task Force, Attachment Three-A*). Dan Schelp (NAIC) pointed out that the *Valuation Manual* does not require Task Force approval or adoption of the recommendation. The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.
October 2, 2019

Mr. Mike Boerner
Chair, NAIC Life Actuarial Task Force

Re: Individual Life Insurance Mortality Improvement Scale Recommendation

Dear Mike:

The American Council of Life Insurers (ACLI) appreciates the opportunity to comment on the exposed Individual Life Insurance Mortality Improvement Scale Recommendation for Use with AG 38 and VM-20 on behalf of our member companies.

ACLI appreciates the diligent work of the SOA in the development of the updated mortality improvement scale. ACLI recognizes there has been mortality deterioration in certain segments of the general population; however, it is not clear that such deterioration has occurred in the insured population. Member companies are not reporting the level of deterioration in their blocks of business that have been recognized in the general population. However, a 7-day exposure period for this scale does not allow enough time for companies to reconcile the differences between their results and the SOA study. Furthermore, we don’t believe that the automatic table updates allowed by the Valuation Manual extend to the mortality improvement scale, as the tables that are automatically updated follow a documented methodology in the Valuation Manual and are not subject to discretionary judgement. That is clearly not the case for the mortality improvement factors.

In addition to the process concerns, ACLI is greatly concerned about the limited time for companies to implement and assess the impact to their reserve levels. While the impact is likely small for PBR, the impact on AG 38 could be quite significant. The current process of adopting changes to the mortality improvement scale during the Fall, with only three months to understand and implement the change, has been problematic for some time. This concern is magnified when the scale reflects a deterioration.

Our other concerns regarding the scalars are as follows:

Additional analysis is necessary

More work needs to be done to understand differences between the insured and population mortality data. To date, the mortality improvement scale has been developed using purely population mortality due to limitations in available insured data. However, Kansas and New York data calls have existed for several years expressly for the purpose of updating mortality tables. In fact, this data was contemplated in a recent SOA report on individual life mortality experience:

---

1 ACLI is a Washington, D.C.-based trade association with approximately 290 member companies operating in the United States and abroad. ACLI advocates in state, federal, and international forums for public policy that supports the industry marketplace and the 75 million American families that rely on life insurers' products for financial and retirement security. ACLI members offer life insurance, annuities, retirement plans, long-term care and disability income insurance, and reinsurance, representing 95 percent of industry assets, 93 percent of life insurance premiums, and 98 percent of annuity considerations in the United States. Learn more at www.acli.com.
The mortality improvement scale is an interim mortality change, and this available data should be considered in determining if the impact of the deterioration is consistent with the insured population. ACLI understands that availability of Causes of death (CODs) within the Kansas and New York data calls are limited as they are not a required field. ACLI would suggest that LATF investigate the possibility to increase the availability of CODs in future submissions.

The most recent SOA research on population mortality provides some indication of the drivers of the deterioration. COD analysis indicates the primary drivers for the mortality deterioration are a slowdown in improvements in outcomes related to heart diseases and increases in death associated with opioids and suicide. Among these CODs, the magnitude of the impact associated with opioids and suicide on the insured population is not clear due to known demographic factors associated with these CODs. It would be extremely beneficial for analysis to be performed as more insured data emerges to broadly assess the impacts of the CODs to determine if these trends are as pronounced in the insured population.

Industry, the SOA, and regulators should take the time to further study and develop methods to reflect these differences, as appropriate.

**Methodology introduces volatility into the reserve framework**

We believe the methodology for updating the mortality improvement scale can introduce volatility into reserves, especially as a change to reflect insured mortality within the improvement factors is implemented. Even under the current methodology, we may see some volatility due to the need for judgment in the updating of the scale. The prior scale report recognized the trend of deterioration in the prior year, but it was not significant enough to justify changing the scale. Now that the trend has continued, the update results in a more significant impact, given the cumulative effect of the changes. While some volatility is inevitable, ACLI believes that there be a process to mitigate volatility with changing factors, such as a grade-in or smoothing of results. This would dampen some of the peaks and valleys of the volatility.

**Impact of the worsened scalars hurts smaller companies**

Both the AG 38 and VM-20 mortality methodologies recognize a company’s own experience in setting of the mortality assumption. Because the mortality improvement factors only impact the industry mortality tables, we are concerned that the update to the scalars penalizes companies with lower credibility. This creates some potential playing field concerns, particularly if the general population mortality continues to deteriorate, but the insured population does not.

**Potential harm to consumers**

ACLI is concerned about how the current methodology ultimately impacts consumers. If erroneous conclusions are drawn from population data, this may lead to harm to consumers vis a vis affordability of insurance.

ACLI would also like to comment on the work to develop product-neutral mortality improvement scales. It’s not clear this would be appropriate, given that life underwritten products have significant information on the insured populations, as opposed to annuity products. While there is inherently some overlap between these two populations, the disparity in availability data regarding underwriting suggests some valid reasons for separate scales.
In summary, ACLI believes it is appropriate to reflect deterioration if it is indicative of the mortality trends of the underwritten population. To avoid such late changes in the future, we encourage regulators to update the Valuation Manual to introduce a lag in implementation of the mortality improvement scale if it is exposed so late in the year, such as explicitly stating in the Valuation Manual that the mortality scale to be used is the named yearly report on the SOA website, as adopted by LATF.

We are optimistic we can work with LATF to develop a reasonable solution that appropriately reflects mortality trends while limiting potential hardship to companies.

We look forward to a discussion of these issues.

Sincerely,

[Signature]

cc Reggie Mazyck, NAIC
The Life Actuarial (A) Task Force met via conference call Sept. 26, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Jacob Lauten (AK); Ricardo Lara represented by Perry Kupferman (CA); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Robert H. Muriel represented by Bruce R. Ramge (NE); Marlene Caride represented by Seong-min Eom (NJ); Linda A. Lacewell represented by Bill Carmello (NY); Glen Mulready represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA).

1. **Heard an Update on the YRT Reserve Credit Field Test**

Jason Kehrberg (American Academy of Actuaries—Academy) said the pre-survey for the Yearly Renewable Term (YRT) Reserve Credit field test was distributed to 187 companies. Thus far, 47 companies have responded, with five companies agreeing to participate, 13 companies saying they cannot participate due to resource limitations, and the remaining 29 companies declining to participate. The survey response period closes on Oct. 1. Mr. Kehrberg said the required level of effort for participants has been lessened. He said one-on-one discussions with the companies expressing resource limitations may be warranted to make them aware of the lightened requirements. He briefly reviewed the scaled back requirements for model information that participants will be asked to provide. He said the requirements are limited to information related to model preparation.

In response to questions submitted prior to the conference call, Mr. Kehrberg provided the following information:

- With input from industry, the consultant will consider whether YRT treaties with fully guaranteed premiums will need to be modeled.
- Amendment proposal form (APF) 2019-JR will not be field tested; APF 2019-39 will be the baseline for the field.
- The 2020 *Valuation Manual* will be the source of the modeling requirements.
- Future mortality improvement (FMI) sensitivities will not be included until focused modeling instructions are distributed in November.

2. **Exposed the Joint Committee Recommendation for AG 38/VM-20 Mortality Improvement**

Marianne Purushotham (Academy Life Experience Committee and the Society of Actuaries’ [SOA] Preferred Mortality Oversight Group Valuation Basic Table Team—Joint Committee) said the Individual Life Insurance Mortality Improvement Scale Recommendation—for use with AG 38 and VM-20 (Attachment Three-A) is reviewed annually for any recommended revisions for use with Actuarial Guideline XXXVIII—The Application of the Valuation of Life Insurance Policies Model Regulation (AG 38) and VM-20, Requirements for Principle-Based Reserves for Life Products, of the *Valuation Manual*. She said the methodology for developing the recommendation includes a historical mortality component and a future mortality component, which are averaged to produce the recommended table. The methodology is consistent with the methodology used to develop the mortality improvement for the 2016 Valuation Basic Table (VBT) and the 2017 Commissioners’ Standard Ordinary (CSO) Table. To reduce volatility, the historical mortality component uses 10-year average annual historical mortality improvement levels implied from general population mortality data published by the U.S. Social Security Administration (SSA). The future mortality component uses the 20-year average annual mortality improvement levels based on the most recent SSA Trustees’ report intermediate assumption data. Ms. Purushotham said a decrease in the mortality improvement scale is recommended. She said the decrease is reflective of the mortality trends observed over the last few years. Given the decrease in mortality improvement, the Joint Committee wanted to inform and discuss with the Life Actuarial (A) Task Force. Prior to this year, the usual process was to have the recommended scale approval process limited to peer review.

Mr. Boerner agreed to expose the Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with AG 38 and VM-20 for a seven-day public comment period ending Oct. 2.

Having no further business, the Life Actuarial (A) Task Force adjourned.
Individual Life Insurance Mortality Improvement Scale Recommendation—for Use with AG 38 and VM-20
September 2019

This report outlines the 2019 individual life insurance mortality improvement recommendation.

**Background**

As part of the work done by the American Academy of Actuaries'1 Life Experience Committee and the Society of Actuaries'2 Preferred Mortality Oversight Group Valuation Basic Table Team ("Joint Committee") that developed the 2015 Valuation Basic Table (VBT), the Mortality Improvement subgroup was tasked with reviewing recent mortality improvement levels based on available data for the individual life insurance policyholder population.

As a result of this work, the subgroup presented a recommendation for the development of a set of improvement factors that differ by gender and attained age to be used in conjunction with the 2015 VBT. This recommended methodology was accepted and has been used for year-end 2013–2018 in conjunction with Actuarial Guideline (AG) 38 and Valuation Manual section 20 (VM-20). See Appendix A of this report for additional background on the development of the current methodology.

Since year-end 2014, a Mortality Improvements Life Working Group (MILWG) has been tasked with studying and annually recommending updates to the mortality improvement scales for use with AG 38 and VM-20 work (specific to the individual life insurance product lines).

---

1 The American Academy of Actuaries is a 19,500-member professional association whose mission is to serve the public and the U.S. actuarial profession. For more than 50 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

2 The Society of Actuaries (SOA) is an educational, research and professional organization dedicated to serving the public, its members and its candidates. The SOA's mission is to advance actuarial knowledge and to enhance the ability of actuaries to provide expert advice and relevant solutions for financial, business and societal problems. The SOA's vision is for actuaries to be the leading professionals in the measurement and management of risk.
The Society of Actuaries (SOA) Mortality and Longevity Steering Committee is simultaneously working on a general framework for developing product-neutral mortality improvement scales, which will subsequently be used as a guide by the MILWG to revisit the current approach for creating these scales each year.

The recommended scales are intended to be applied to update (“improve”) valuation basic table mortality rates to the end of the current valuation year. As an example, for year-end 2019, the 2015 VBT table mortality would be improved from July 1, 2015, through Dec. 31, 2019 (4.5 years) using the current recommended scale outlined in this document.

**2019 Mortality Improvement Scale Methodology**

The raw, unsmoothed mortality improvement factors are equal to the average of a historical component and a future-looking component as described below:

- **Historical component:**
  
The historical component is represented by the 10-year average annual historical mortality improvement levels implied from general population mortality data published by the Social Security Administration (SSA). For each calendar year of data, the SSA results are published more than a year after the Centers for Disease Control and Prevention (CDC) results are available (so for example, for 2019 the published SSA historical data is only available through 2016 even though CDC data is available through 2017). In order to provide the subgroup with as much information as possible for this yearly update process, the SOA applies the SSA methodology to produce a preliminary set of SSA-consistent mortality rates for use in this calculation for attained ages 20 to 100. For the 2019 recommendation, the 2017 historical rates were estimated by the
SOA for ages 20 to 100. For ages under 20 and over 100, the SSA Alternative (Alt) 2 projected rates for 2017 were used as a proxy for actual historical rates.

Although a 5-year period more closely aligns with the period over which mortality rates are improved for the current purpose, a 10-year historical period was selected for use as it results in less volatility from year to year. The most recent 5-year averages (see Appendix B) were examined as part of the update process and have been considered in developing the final recommendation. Although these results indicate negative improvement for certain age groups (specifically 20-45) over the 5-year period, preliminary data for 2018 from the Vital Statistics Rapid Release Reports indicates potential improvements returning in 2018.

Future-looking component:
The future component is represented by the 20-year average annual mortality improvement levels (for 2019, this covers the period from 2017 to 2037), based on the most recent Social Security Administration Trustees’ report intermediate assumption (Alt 2). The SSA mortality projection is based on historical data and assumes ultimate average annual percentage reductions in future mortality rates by age and cause of death. These assumptions are used to estimate future central death rates by age, sex, and cause of death. From these estimated central death rates, probabilities of death by single year of age and sex are determined.

For AG 38/VM-20 purposes, the “future projected” component is relatively short (for 2019, historical data exists through 2017, so the “unknown” future component is 2 years). However, applying the 20-year period for averaging (rather than a shorter period) generally results in smoother patterns by age and calendar year. It also provides greater stability in year-over-year results as the longer period lessens the tendency to over-react to short-term fluctuations in historical experience. The determination of the future component will also be reviewed as part of the full methodology update to apply the recommended consistent framework from the SOA Mortality and Longevity Steering Committee work.

The average annual rates calculated as above are then smoothed using simple linear interpolation to produce a final scale by gender and age.

Historical data from the Human Mortality Database (HMD) was also considered in determining the 10-year historical averages, which provided a perspective from multiple sources in examining recent population mortality trends.

Recommendation

Based on a review of the improvement factors resulting from application of the methodology to include the 2019 data updates, it is recommended that the mortality improvement scale be revised for 2019 to reflect mortality deterioration trends that have emerged over the past several years in population mortality. The current methodology does not include an adjustment to reflect differences between the target insured population and the general population on which mortality data is based. From limited data from reinsurers and other sources, there is some indication that insured mortality is generally lower than general population mortality (possibly due to the generally higher socioeconomic status of those buying life insurance). However, there is not yet sufficient consistent, long-range insured data on which to
measure mortality improvement specific to the insured population. Several potential options to reflect adjustments in a future review of the current methodology are under consideration.

This revision will result in a reduction in mortality improvement levels from the 2018 scale of approximately 0.25 percentage points for males and 0.15 percentage points for females.

This decision is supported by an examination of the most recent 5-year historical averages, which show a smaller improvement in mortality than the earlier 5-year period. See Appendix B for historical averages by age and gender for these two historical 5-year periods.

The 2019 recommended improvement rates can be found in the accompanying spreadsheet.

**Applicability of Improvement Scale**

The above recommendation represents a view of reasonable mortality improvement factors for short- and medium-term projections and is intended to be applied solely for the purposes of updating the mortality assumption from the time of the valuation table publication to the beginning of the current valuation period.
APPENDIX A:

Considerations in developing mortality improvement factors for application with AG 38 and VM-20.

- Period of Experience Used—The desire for a methodology that weights the impact of recent historical rates of improvement with a longer-term assumption (i.e., SSA intermediate mortality projections) in determining projected improvement rates. This approach is (at a very high level) consistent with the current U.K. Continuous Mortality Investigation (“CMI”) projection models, as well as methods commonly used to develop other insured mortality projection scales. These methods basically project rates based on past experience, but trend toward a long-term assumed average annual improvement level.

- Insured Data—Aggregate insurance company data for the period 2002–2009 from the Society of Actuaries’ regular studies of individual life insurance mortality was initially examined. It was eventually decided that, given (1) the relatively short period over which historical insured experience is available and (2) the year-over-year volatility of results (likely in part the result of both industry-specific factors and changes in underlying mortality rates), general population data is a preferable source for determining both an improvement scale for use in VBT table development efforts and as annual AG 38/VM-20 scale recommendations, at least for the near term.

- General Population Data Source—The subgroup examined several sources of general population data, including data from the U.S. Vital Statistics, the Human Mortality Database (HMD), and the SSA. The SSA data was selected as the source for general population analysis for several reasons:
  - The data and reports are strongly vetted.
  - The SSA uses mortality statistics from the Centers for Medicare and Medicaid Services rather than the National Center for Health Statistics for ages 65 and older. A number of studies have questioned the validity of age reporting in the CDC National Statistics data.
  - Using the SSA data allows for consistency in applying the current methodology’s historical and future components (Trustees Report historical data is used as well as the projections of future estimated mortality).

- Additional Factors Considered (Gender, Attained Age, Smoker Status, Socioeconomic Status, Differences in Cause of Death for Insured vs. General Population)—In addition to data sources discussed above, the subgroup also researched and considered additional factors that could impact mortality improvement experience. The decision was made to regularly review the use of alternative or further adjustments to population mortality to eliminate potential basis risk at the same time any changes for consistent framework recommendations are incorporated.

Life Actuarial (A) Task Force
Conference Call
September 19, 2019

The Life Actuarial (A) Task Force met via conference call Sept. 19, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Mayumi Gabor (AK); Jim L. Ridling represented by Steve Ostlund (AL); Ricardo Lara represented by Rachel Hemphill and Perry Kupferman (CA); Andrew N. Mais represented by Wanchin Chou (CT); Robert H. Muriel represented by Bruce Sartain (IL); Stephen W. Robertson represented by Karl Knable (IN); Vicki Schmidt represented by Nicole Boyd (KS); Steve Kelley represented by Fred Andersen and John Robinson (MN); Chlora Lindley-Myers represented by William Leung (MO); Bruce R. Ramege represented by Derek Wallman (NE); Marlene Caride represented by Seong-min Eom (NJ); John G. Franchini represented by Mark Hendrick (NM); Linda A. Lacewell represented by Bill Carmello and Amanda Fenwick (NY); Glen Mulready represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA).

1. Adopted its 2020 Proposed Charges

The Task Force’s 2020 proposed charges remain consistent with its 2019 charges, except for the removal of the charge related to the implementation of the Variable Annuity Framework to recognize its completion.

Mr. Ostlund made a motion, seconded by Mr. Andersen, to adopt the Task Force’s 2020 proposed charges (Attachment Four-A). The motion passed unanimously.

2. Heard an Update on the YRT Reserve Credit Field Test

Jason Kehrberg (American Academy of Actuaries—Academy) discussed the draft of the General Modeling Instructions for Yearly Renewable Term (YRT) (Attachment Four-B). He said the draft is targeted toward non-reinsurer participants in the Academy’s YRT Reserve Credit field test. The instructions will be modified for participants that are reinsurers. Amendment proposals 2019-40, 2019-41 and 2019-42—as well as the interim solution, amendment 2019-39—will be appended to the draft for participant consideration. Mr. Kehrberg said the background information from the pre-survey will be included in Section A of the draft. He said Section C identifies the reinsurance treaty types and noted that only YRT reinsurance treaties are to be modeled. He said the design group is requesting results split by the five treaty types listed in the draft. He said to minimize the amount of work involved, the design group will attempt to collect only the treaty splits that are necessary to provide the Task Force with the data and analysis needed to make a good decision. Leonard Mangini (Academy) said the reserves are calculated at an aggregate level. Therefore, companies would combine multiple treaty types within the same VM-20 reserving category. Mr. Kehrberg said asking for splits will not allow the stochastic reserve offsets to be calculated correctly. He said the group is still considering whether the splits are necessary and would welcome feedback on the issue. He indicated that companies elected to participate in the study will receive a survey requesting information on product mix and treaty types. The information collected will be used to determine whether the splits are necessary. Mr. Kehrberg said the design group is considering whether to separate the information by product type within VM-20 reserving categories. He said the design group is recommending to separate business by term and universal life with secondary guarantees (ULSG) only. Field test participants will be asked to follow the requirements of the 2020 Valuation Manual and use year-end 2018 as the valuation date. Section K provides guidance on how to project cash flows and reserves.

Mr. Mangini discussed the output template (Attachment Four-C) to be used for documentation of the modeling results. He said the template represents a single treaty for one year of issues on a specific valuation date. He noted that this particular template is designed specifically for amendment proposal 2019-41.

Having no further business, the Life Actuarial (A) Task Force adjourned.
2020 PROPOSED CHARGES
LIFE ACTUARIAL (A) TASK FORCE

The mission of the Life Actuarial (A) Task Force is to identify, investigate and develop solutions to actuarial problems in the life insurance industry.

Ongoing Support of NAIC Programs, Products and Services

1. The Life Actuarial (A) Task Force will:
   A. Work to keep reserve, reporting, and other actuarial-related requirements current. This includes principle-based reserving (PBR) and other requirements in the Valuation Manual, actuarial guidelines, and recommendations for appropriate actuarial reporting in blanks. Respond to charges from the Life Insurance and Annuities (A) Committee and to referrals from other groups or committees as appropriate.
   B. Report progress on all work to the Life Insurance and Annuities (A) Committee and provide updates to the Financial Condition (E) Committee on matters related to life insurance company solvency. This work includes the following:
      1. Work with the American Academy of Actuaries (Academy) and the Society of Actuaries (SOA) to develop new mortality tables for valuation and minimum nonforfeiture requirements as appropriate for life insurance and annuities.
      2. Provide recommendations for guidance and requirements for accelerated underwriting, as needed.
      3. Evaluate and provide recommendations regarding the VM-21/AG 43 Standard Projection Amount, which may include continuing as a required floor or providing as disclosure. This evaluation is to be completed prior to yearend 2023.
      4. Monitor the work of the Variable Annuity Issues (E) Working Group, and work with any recommendations from the Variable Annuities Capital and Reserve (E/A) Subgroup.
      5. Work with the SOA on the annual development of the Generally Recognized Expense Table (GRET) factors.
      6. Provide recommendations and changes, as appropriate, to other reserve and nonforfeiture requirements to address issues, and provide actuarial assistance and commentary to other NAIC committees relative to their work on actuarial matters.
      7. Monitor international developments regarding life and health insurance reserving, capital and related topics. Compare and benchmark with PBR requirements.

2. The Variable Annuities Capital and Reserve (E/A) Subgroup, a joint subgroup of the Life Risk-Based Capital (E) Working Group and the Life Actuarial (A) Task Force, will:
   A. Monitor the impact of the changes to the variable annuities reserve framework and RBC calculation and determine if additional revisions need to be made.
   B. Develop and recommend appropriate changes including those to improve accuracy and clarity of variable annuity (VA) capital and reserve requirements.

3. The Experience Reporting (A) Subgroup will:
   A. Continue development of the experience reporting requirements within the Valuation Manual. Provide input, as appropriate, for the process regarding the experience reporting agent, data collection, and subsequent analysis and use of experience submitted.

4. The IUL Illustration (A) Subgroup will:
   A. Consider enhancements to Actuarial Guideline XLIX—The Application of the Life Illustrations Model Regulation to Policies with Indexed-Based Interest (AG 49). Provide recommendations for modifications to AG 49 to the Life Actuarial (A) Task Force.

5. The Longevity Risk (A/E) Subgroup, a joint subgroup of the Life Actuarial (A) Task Force and the Life Risk-Based Capital (E) Working Group, will:
   A. Provide recommendations for recognizing longevity risk in statutory reserves and/or risk-based capital (RBC), as appropriate. Complete by the 2020 Spring National Meeting.

6. The VM-22 (A) Subgroup will:
   A. Recommend requirements as appropriate for non-variable (fixed) annuities in the accumulation and payout phases for consideration by the Life Actuarial (A) Task Force. A PBR methodology will be considered as appropriate.

NAIC Support Staff: Reggie Mazyck/Eric King

© 2019 National Association of Insurance Commissioners
General Modeling Instructions for **Non-Reinsurer** Participants in the PBR Yearly Renewable Term (YRT) Reinsurance Field Test

*(draft framework)*

**A. Background**

*(insert background from pre-survey)*

**B. Goals for the Field Test**

1. Compare Yearly Renewable Term (YRT) reinsurance reserve/credit differences by company, cedant/reinsurer perspective, product type, and treaty type for each Amendment Proposal Form (APF) and the one half of the one year mean reserve using the valuation mortality table (½ Cx) baseline.
2. Confidence in the reasonability of assumptions used and YRT premiums/claims projected.
3. Insight into the sources of deviation between ½ Cx and the reinsurance reserve/credit for each APF.
4. Better understand modeling complexities, intended/unintended outcomes, and differences due to company size/credibility/inforce and interpretation/implementation for each of the proposed APFs.
5. Insight into the impact of treaty types on cedant mortality margins, including the explicit credibility-linked margin, and the implicit margin from prohibiting future mortality improvement (FMI).

**C. YRT Reinsurance Treaty Types**

1. Model each of the company’s YRT reinsurance treaties.
2. Do not model non-YRT reinsurance treaties, e.g. coinsurance.
3. Classify each of the company’s YRT reinsurance treaties and produce results split by the five following treaty types:

<table>
<thead>
<tr>
<th>Type</th>
<th>Name</th>
<th>Initial guarantee period (GP) when rates can’t change</th>
<th>Restricted reinsurer ability to change rates after GP</th>
<th>Reinsurer pays experience refund</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y1</td>
<td>1-Year Guarantee with Unrestricted Language</td>
<td>1 policy year or less</td>
<td>No</td>
<td>No</td>
</tr>
<tr>
<td>Y2</td>
<td>1-Year Guarantee with Restricted Language</td>
<td>1 policy year or less</td>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td>Y3</td>
<td>[N]-Year Guarantee with Unrestricted Language</td>
<td>[N] policy years</td>
<td>No</td>
<td>No</td>
</tr>
<tr>
<td>Y4</td>
<td>[N]-Year Guarantee with Restricted Language</td>
<td>[N] policy years</td>
<td>Yes</td>
<td>No</td>
</tr>
<tr>
<td>Y5</td>
<td>1-Year Guarantee with Unrestricted Language and Experience Refund</td>
<td>1 policy year or less</td>
<td>No</td>
<td>Yes, [X%] * (YRT premium - YRT claims - Risk charge)</td>
</tr>
</tbody>
</table>

*Reinsurer shall provide prior written notice not less than [n] days prior to the effective date of any change in premium rates.*
• In no event shall the reinsurance premium rates exceed the guaranteed rates.

*Design Subgroup to consider adding additional categories described by responses in the pre-survey, including whether there should be an "Other" category.

D. Product Splits

<table>
<thead>
<tr>
<th>At a minimum, split by VM-20 reserving category</th>
<th>Ideally, further split by product type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Term</td>
<td>[N]-year level term, ART, etc.</td>

</tbody>
</table>

1. See appendices for specific APF language and detail on instructions and sensitivities.

F. Valuation Manual

1. Follow the 2020 Valuation Manual unless directed otherwise in the APF-specific instructions.
2. Note any areas where the company’s field testing methodology is not in compliance.

G. Time Zero Valuation Date

12/31/18

H. Time Zero Inforce Population

1. Include policies issued during the last 12 months subject to the YRT treaty(ies) being tested.
2. Include plan codes that have been valued under PBR or are contemplated to be valued under PBR.
3. Use a mix of PBR pricing cells based on 12 months of issues if such an actual inforce population is not available.

I. Time Zero Yield Curve

<table>
<thead>
<tr>
<th>Maturity (years)</th>
<th>0.25</th>
<th>0.5</th>

<td>2.69%</td>
<td>2.87%</td>
<td>3.02%</td>
</tr>
</tbody>
</table>

(above is for 12/31/18)
J. Model Type
1. Use a model that can project reserves at future periods over the contract life for the modeled block.
2. If such a model is not available, consider basing on pricing model, business forecasting projection model, or cash flow testing model.

K. Inner Loop Projections
1. An inner loop projection projects cashflows forward from a valuation date, and those cashflows are only used to determine the deterministic reserve (DR) and stochastic reserve (SR) on that valuation date.
2. If possible, for each inner loop projection project cashflows until no liabilities remain.
3. Use VM-20 prescribed and prudent estimate assumptions.
4. A separate inner loop projection is required for each valuation date in the outer loop \((t = 0, 1, 2, ...)\).
   a. For each valuation date, use assumptions that comply with VM-20 and are consistent with the “state of the world” on that valuation date as defined by the outer loop at that point in time.
   b. Prudent estimate assumptions for each inner loop projection reflect increases in the credibility of company experience from one valuation date to the next.
   c. VM-20 scenarios for each inner loop projection are consistent with the outer loop yield curve on the valuation date.
   d. Current spreads for each inner loop projection are equal to spreads in the outer loop on the valuation date.
5. Optional sensitivity – FMI allowed for in the direct mortality experience
   a. While this sensitivity will not impact the YRT reinsurance premium modeling issue, there is interest in collecting some data on relaxing the prohibition of FMI in direct mortality experience. Time permitting, please calculate two sensitivities for the pre-reinsurance DR with FMI set to 0.5% and 1.0%, respectively.

L. Outer Loop Projections
1. Three outer loop projections
   a. Baseline of 0.5% FMI
   b. Sensitivities of 0% and 1% FMI
2. Outer loop experience assumptions
   a. Set equal to unmargined (i.e. anticipated) experience assumptions from the time zero inner loop projection.
   b. Assume 2% expense inflation in the outer loop.
3. Outer loop economic and reinvestment assumptions
   a. Assume the initial yield curve remains constant throughout the outer loop projection. This means the inner loop Stochastic Exclusion Ratio Test (SERT) 16 scenarios and stochastic reserve scenarios will be the same for time zero and every future valuation date.
   b. Use VM-20 prescribed current spreads and baseline defaults from the time zero inner loop projection. For the outer loop, keep spreads constant, i.e. do not grade to ultimate spreads as you do for the inner loop. For outer loop defaults, ignore the spread related factor and max net spread adjustment.
   c. Use the inforce portfolio mix from the time zero inner loop projection.
   d. Use the anticipated company experience reinvestment strategy from time zero.
4. Use separate inner loop projections to calculate reserves at time zero and each year-end in the outer loop projection.
   a. Can interpolate for month-end reserves in the outer loop projection as needed.

M. Numerical output template
1. Instructions – Instructions for the numerical output template are included in the template itself.
2. Comments – Please use the provided output template to capture all numerical input. Space is provided in the output template for comments. Comments in a Microsoft Word document will also be accepted, but please make comments on numerical output in the output template if possible.
3. (Note – A survey is being developed to capture additional non-numerical output. There are already some requests for non-numerical output in the APF-specific instructions.)

N. If cuts must be made due to resource constraints and/or modeling limitations
1. **Try these approximations and simplifications first:**
   a. **Outer Loop Projections** Project reserves at years 1-5 and every five years afterward (instead of annually)
   b. **Starting Assets** Scale starting assets within +/-10% (instead of 2% collar)
   c. **Product Types** Only provide field test results for the Term and ULSG reserving categories, with Term split by level term period and USLG split by UL/IUL/VUL
   d. **Stochastic Scenarios** Reduce the number of stochastic scenarios to 100 (or even 50)
   e. **Asset Portfolio** Use a simplified asset mix (e.g., ignore externally projected assets and reduce types of assets in portfolio)
   f. **Inner Loop Projection Period** For Term, limit each inner loop to a 40-year projection period (or less as deemed appropriate)
   g. **Expense Inflation** Use company-specific assumption expense inflation rate instead of 2% if needed (as long as both pre & post reinsurance are consistent)

2. **Try these if still experiencing resource constraints and/or modeling limitations:**
   a. **Outer Loop Projections** Project reserves at years 1, 5, 10, 20, 30
   b. **ULSG Product Types** Only provide field test results 20-year Term and ULSG (no IUL/VUL)
   c. **Pre-Reinsurance DR with FMI** Do not provide results
   d. **Stochastic Reserves** Only produce NPR and DR, but not SR
   e. **Outer Loop Improvement Scenarios** Only provide results for the baseline FMI scenario of 0.5%

3. **Only perform these if unable to complete field testing without them:**
   a. **Net Premium Reserve** Only produce DR and ½ Cx, not NPR
   b. **Outer Loop Projections** Only provide projected reserves at timing of expected reserve peak
   c. **Restrict Treaties** Only select key treaties that are more predominate on Term and USLG business
   d. **Forgo Nested Modeling** Forgo nested modeling by just projecting the inner loop and changing the valuation date (only recommended as a last resort)

* In the comments your company provides on field test modeling, please list and describe the shortcuts, approximations and/or simplifications used in your company’s modeling.

Life Actuarial (A) Task Force Conference Call
September 12, 2019

The Life Actuarial (A) Task Force met via conference call Sept. 12, 2019. The following Task Force members participated: Kent Sullivan, Chair, represented by Mike Boerner (TX); Jillian Froment, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Mayumi Gabor (AK); Jim L. Ridling represented by Steve Ostlund (AL); Ricardo Lara represented by Rachel Hemphill and Perry Kupferman (CA); Andrew N. Mais represented by Wanchin Chou (CT); Robert H. Muriel represented by Bruce Sartain (IL); Stephen W. Robertson represented by Karl Knable (IN); Vicki Schmidt represented by Bruce Sartain (IL); Steve Kelley represented by Fred Andersen and John Robinson (MN); Chlora Lindley-Myers represented by William Leung (MO); Marlene Caride represented by Seong-min Eom (NJ); John G. Franchini represented by Mark Hendrick (NM); Linda A. Lacewell represented by Bill Carmello and Amanda Fenwick (NY); Glen Mulready represented by Andrew Schallhorn (OK); Todd E. Kiser represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA).

1. Adopted its Summer National Meeting Minutes

Mr. Ostlund made a motion, seconded by Mr. Weber, to adopt the Task Force’s Aug. 1–2 minutes (see NAIC Proceedings – Summer 2019, Life Actuarial (A) Task Force). The motion passed unanimously.

2. Adopted the 2020 GRET

Mr. Weber made a motion, seconded by Mr. Chou, to adopt the 2020 Generally Recognized Expense Tables (GRET) (Attachment Five-A). The motion passed unanimously.

2. Heard an Update on the YRT Reserve Credit Field Test

Jason Kehrberg (American Academy of Actuaries—Academy) said the Academy’s YRT Field Test Project Group is comprised of an oversight group and a design group. He presented PowerPoint slides (Attachment Five-B) showing the timeline, the field test pre-survey, yearly renewable term (YRT) treaty classification, risk transfer rules and proposed Task Force field test goals. He noted that amendment proposals 2019-40, 2019-41 and 2019-42 are to be assessed during the field test, with amendment proposal 2019-39 serving as a baseline. He emphasized that company information will be kept confidential. The timeline assumes the field test will be facilitated by a consultant. Mr. Kehrberg noted that the target date may not be met if the consultant is not hired prior to Sept. 30.

The results of the field test will inform the Task Force selection of a long-term solution for the methodology for the determination of the YRT reinsurance reserve credit. Mr. Kehrberg said the solution the Task Force chooses may require the Statutory Accounting Principles (E) Working Group to modify risk transfer rules. Mr. Boerner said the Working Group has been alerted that coordination with the Task Force to address risk transfer rules may be necessary.

Alice Fontaine (Fontaine Consulting) discussed the draft principles for YRT treaty/cash flow modeling (Attachment Five-C) to be used as a tool for comparing the amendment proposals assessed during the field test. She said the principles cover the environment surrounding the modeling of the reinsurance cash flows, provisions within the reinsurance treaty and consideration of the reinsurer’s potential reactions. Ms. Fontaine also discussed revisions to amendment proposal 2019-40 (Attachment Five-D). The document includes: 1) four counterparty scenarios under which the revised amendment proposal will be tested; and 2) tables for disclosing possible outcomes.

Mr. Robinson discussed amendment proposal 2019-JR (Attachment Five-E). He said the three basic hypotheses in the amendment proposal are: 1) the ceding company and the assuming company can have different perspectives on the future; 2) the reserve credit must bear a reasonable relation to the reserve set up by the reinsurer; and 3) the statement of statutory accounting principles (SSAP) should defer to the Valuation Manual as the single source of guidance on reserve credits.

Dave Neve (Global Atlantic) discussed amendment proposal 2019-41 (Attachment Five-F). He said the proposal calls for calculation of the reserve for 15 years under three mortality improvement scenarios to determine projected reinsurance claim settlements.

© 2019 National Association of Insurance Commissioners
Ms. Hemphill said amendment proposal 2019-42 (Attachment Five-G) requires the company to set its reinsurance premium margins at the same percentage as the margins for mortality. Both the explicit and the implicit margins are to be included in the assessment. Testing is to be completed using 5-year, 10-year, 15-year and 20-year scenarios of mortality improvement to approximate the implicit margin.

Having no further business, the Life Actuarial (A) Task Force adjourned.
As in previous years, the Society of Actuaries expresses its thanks to NAIC staff for their assistance and responsiveness in providing Annual Statement expense and unit data for the 2020 GRET analysis for use with individual life insurance sales illustrations. The analysis is based on expense and expense related information reported on companies' 2017 and 2018 Annual Statements. This project has been completed to assist the Life Actuarial Task Force (LATF) in its consideration of potential revisions to the GRET that could become effective for calendar year 2020. This memo describes the analysis and resultant findings.

NAIC staff provided Annual Statement data for life insurance companies for calendar years 2017 and 2018. This included data from 707 companies in 2017 and 722 companies in 2018. This increase breaks the trend of small decreases over the previous few years. Of the total companies, 326 were in both years and passed the outlier exclusion tests and were included as a base for the GRET factors (361 companies passed similar tests last year).

Approach Used

The methodology for calculating the recommended GRET factors based on this data is similar in broad outline to that followed the last several years. The methodology was last altered in 2015. The changes which were made at that time can be found in the recommendation letter sent on July 30, 2015. To calculate updated GRET factors, the average of the factors from the two most recent years (2017 and 2018 for those with data available for both years) of Annual Statement data was used. For each company an actual to expected ratio was calculated. Companies with ratios that fall outside predetermined parameters are excluded and this process is competed three times in order to stabilize the average rates. The boundaries of the exclusions are modified from time to time and there was a slight adjustment this year to increase the number of companies in the final study. Unit expense seed factors (the seeds for all distribution channel categories are the same), as given in Appendix B, were used to compute total expected expenses. Thus, these seed factors were used to implicitly allocate expenses between acquisition and maintenance expenses, as well as among the three acquisition expense factors (on a direct of ceded reinsurance basis).

Companies were categorized by their reported distribution channel (four categories were used as described in Appendix A of this memo). There remain a significant number of companies for which no distribution channel was available, as no responses to the annual surveys have been received from those companies. The characteristics of these companies vary significantly, including companies not currently writing new business or whose major line of business is not individual life insurance. Any advice or assistance from LATF in future

1 https://www.soa.org/Files/Research/Projects/research-2016-gret-recommendation.pdf
years to increase the response rate to the surveys of companies that submit Annual Statements in order to reduce the number of companies in the “Other” category would be most welcomed.

Prior to 2014, when responding to the survey if a company indicated they used multiple channels to distribute their individual life sales, the percentage weights provided to us were applied to that company’s reported results in the tabulations of each of the distribution channel’s unit expense results. In 2015 this was changed so that all expenses for a company will go to the channel with the highest percentage weight. This approach was changed because: (1) as fewer channel types were used, it was expected that fewer companies would have multiple channels as currently defined and (2) an insufficient number of multiple distribution responses were provided in that year’s survey to result in a significantly different outcome. The intention is to continue surveying the companies in future years to enable enhancement of this multiple distribution channel information.

Companies were excluded from the analysis if (1) their actual to expected ratios were considered outliers, often due to low business volume, (2) the average first year and single premium per policy was more than $40,000, (3) they are known reinsurance companies or (4) companies were not in both years of the data supplied by the NAIC. To derive the overall GRET factors, the unweighted average of the remaining companies’ actual-to-expected ratios for each respective category was calculated. The resulting factors were rounded, as shown in Table 1.

The Recommendation

Employing the above methodology results in the proposed 2020 GRET values shown in Table 1. To facilitate comparisons, the current 2019 GRET factors are shown in Table 2.

Further characteristics of the type of companies represented in each category are included in the last two columns in Table 1, including the average premium per policy issued and the average face amount ($000s) per policy issued.

In previous recommendations, an effort was made to reduce volatility in the GRET factors from year-to-year by limiting the change in GRET factors between years to about ten percent of the prior value. The changes from the 2019 GRET were reviewed to ensure that a significant change was not made in this year’s GRET recommendation. Only the Niche Marketing distribution channel category experienced a change greater than ten percent so the factors for this line were capped at the ten percent level (the Acquisition per unit factor changed more than 10% because of rounding) from the corresponding 2019 GRET values. The change occurred due to the change in the composition of the companies in this category where there is a small number of companies included.

Usage of the GRET

Also asked in this year’s survey, responded to by companies’ Annual Statement correspondent, was a question regarding whether the 2018 GRET table was used by the company. Last year, 28% of the responders indicated their company used the GRET for sales illustration purposes, with similar percentage results by size of company; this contrasted with about 30% in the prior year. This year, 26% of responding companies indicated that they used the GRET in 2018 for sales illustration purposes, with similar results for each of the distribution channels with a significant number of responders. Based on the information received over the last several years, the variation in GRET usage appears to be in large part due to the relatively small sample size and different responders to the surveys.

We hope LATF finds this information helpful and sufficient for consideration of a potential update to the GRET. If you require further analysis or have questions, please contact Dale Hall at 847-273-8835.

Kindest personal regards,

Dale Hall, FSA, MAAA, CERA, CFA
Managing Director of Research
Society of Actuaries

Leon Langlitz, FSA, MAAA

Appendix A -- Distribution Channels

The following is a description of distribution channels used in the development of recommended 2020 GRET values:

1. Independent – Business written by a company that markets its insurance policies through an independent insurance agent or insurance broker not primarily affiliated with any one insurance company. These agencies or agents are not employed by the company and operate without an exclusive distribution contract with the company. These include most PPGA arrangements.

2. Career – Business written by a company that markets insurance and investment products through a sales force primarily affiliated with one insurance company. These companies recruit, finance, train, and often house financial professionals who are typically referred to as career agents or multi-line exclusive agents.

3. Direct Marketing – Business written by a company that markets its own insurance policies direct to the consumer through methods such as direct mail, print media, broadcast media, telemarketing, retail centers and kiosks, internet or other media. No direct field compensation is involved.

4. Niche Marketers – Business written by home service, pre-need, or final expense insurance companies as well as niche-market companies selling small face amount life products through a variety of distribution channels.

5. Other – Companies surveyed were only provided with the four options described above. Nonetheless since there were many companies for which we did not receive a response (or whose response in past years’ surveys confirmed an “other” categorization (see below), values for the “other” category are given in the tables in this memo. It was also included to indicate how many life insurance companies with no response (to this survey and prior surveys) and to indicate whether their exclusion has introduced a bias into the resulting values.

Appendix B – Unit Expense Seeds

The expense seeds used in the 2014 and prior GRETs were differentiated between branch office and all other categories, due to the results of a relatively old study that had indicated that branch office acquisition cost expressed on a per Face Amount basis was about double that of other distribution channels. Due to the elimination of the branch office category in the 2015 GRET, non-differentiated unit expense seeds have been used in the current and immediately prior studies.

The unit expense seeds used in the 2019 GRET and the 2020 GRET recommendation were based on the average of the 2006 through 2010 Annual SOA expense studies. These studies differentiated unit expenses by type of individual life insurance policy (term and permanent coverages). As neither the GRET nor the Annual Statement data provided differentiates between these two types of coverage, the unit expense seed was derived by judgment based this information. The following shows the averages derived from the Annual SOA studies and the seeds used in this study. Beginning with the 2019 Annual Statement submission this information may become more readily available.

Pre-Survey

- Summary of questions asked
  - Willing to participate? If "No", due to resources, please describe.
  - If "Yes", okay to disclose company name?
  - Indicate types of YRT reinsurance treaties in use: Excess, Quota share, Quota share with attachment point, Other hybrid, Experience refund.
- Methodology for list of target companies (187 in total)
  - All companies that have implemented PBR as of 12/31/18
  - Additional companies expected to be subject to PBR in 2020 (based on premium volume), if they have YRT reinsurance ceded or assumed.
- Distribution targeted for Monday, September 9
  - Responses due by Monday, September 23
  - Confidential regulator/consultant follow up with selected "No/s"

YRT Treaty Classification

- Participants will clarify each modeled treaty as one of these 5 types.
  - Consultants will model one or more specimen treaties for each of these 5 types (from perspective of both ceding company and assuming reinsurer).
Risk Transfer Rules

- The long-term solution ultimately chosen by LATF could have implications requiring SAPWG to modify risk transfer rules.
  - APPM Appendix A-791 specifies the risk transfer rules a treaty must satisfy in order to qualify for reinsurance accounting, but exempts YRT treaties that do not provide surplus relief in the first year greater than the first year’s statutory COI.
  - SSAP 61R paragraph 19 states that YRT treaties (even if they meet the exemption criteria in A-791) must still comply with some of the risk transfer rules in A-791, including 2.b.
  - In order to qualify for reinsurance accounting, A-791 2.b states that the ceding insurer cannot be deprived of surplus at the reinsurer’s option, such as could occur by raising reinsurance premiums.

Proposed LATF Goals for Field Test

- Field test results that allow for:
  - Comparisons across companies given differences in interpretation, implementation, enforce and company size/credibility
  - Splits by product type, treaty type and APF tested
  - Confidence in the reasonableness of assumptions and YRT premiums/claims
  - Analysis of reserve amounts/geography on both sides of a treaty, w/ & w/o NPR
  - Analysis of impact of treaty types on ceding insurer mortality margin
    - Implicit margin due to prohibition of future mortality improvement
    - Explicitly prescribed, credibility-linked margin

© 2019 National Association of Insurance Commissioners
### Draft list of specific Principles for YRT treaty/cash flow modeling that have been proposed:

*Check boxes added to the right indicate which APF incorporates these draft Principles*

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
<th>APF Options</th>
<th>Comments:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>There is already prescription with respect to recognizing or not recognizing future mortality improvement in the direct/gross model cash flows. To the extent pricing assumes some level of improvement will materialize, but is not allowed to be fully incorporated due to guidance in VM-20, PBR creates reserve strain that must be priced for. That reserve strain is created with respect to all life products and its existence should not vary between direct writers on fully retained risk and reinsurers on assumed risk.</td>
<td>☐ ½ Cx  ☑ APF 40  ☑ APF 41  ☑ APF 42  ☐ APF JR</td>
<td>Applies to APF 41 if future mortality improvement is included</td>
</tr>
<tr>
<td>2</td>
<td>The assumed actions are based on the prescribed industry moderately adverse mortality environment as if they are occurring industry wide for the applicable product.</td>
<td>☐ ½ Cx  ☑ APF 40  ☐ APF 41  ☑ APF 42  ☐ APF JR</td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>In general, there is limited or no relevant company or industry experience currently available on which to base the anticipated experience assumption (as to company/reinsurer action) resulting from this adverse mortality environment.</td>
<td>☐ ½ Cx  ☑ APF 40  ☐ APF 41  ☑ APF 42  ☐ APF JR</td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>Ex ante, the company/reinsurer would not know if adverse experience is a random fluctuation or a trend. Counterparty actions should reflect expected assessment and implementation timeframes vs. immediate reactions to adverse mortality.</td>
<td>☐ ½ Cx  ☑ APF 40  ☐ APF 41  ☑ APF 42  ☐ APF JR</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>There is potential economic value to a guarantee or lack of guarantee, and the principle based reserve (PBR) valuation should reflect the value of such contract terms.</td>
<td>☐ ½ Cx  ☑ APF 40  ☑ APF 41  ☑ APF 42  ☐ APF JR</td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>Treaty provisions should support any assumed changes to current treaty rates, expenses and benefits. Similarly, any limits placed upon either party’s ability to exercise contractual options in the reinsurance treaty should be assessed.</td>
<td>☐ ½ Cx  ☑ APF 40  ☑ APF 41  ☑ APF 42  ☐ APF JR</td>
<td></td>
</tr>
</tbody>
</table>
7 Although YRT treaties permanently transfer mortality risk to the assuming company, the assuming company shall not be assumed to incur indefinite losses if treaty terms allow adjustment of the underlying economics.

Comment: Applies to 41 & 42 with regards to counterparty risk

8 Projected treaty profitability to the reinsurer (as part of both ceding company and reinsurer PBR calculations) with the profitability being assessed in terms of how the reinsurer would view it & react to it should be part of the model. Subject to provisions of the treaty(ies), it is reasonable to assume some increase in rates if the industry experiences adverse mortality. The combination of both the time frame of losses and the renewal level of rates should be considered in tandem, and without reflecting the recoupment of the prior losses. Modeled results should reflect an assessment of the a) likelihood of reinsurer changing rates; b) magnitude of any assumed rate change; and c) timing of any assumed rate change.

Comment: Applies to 42 with regards to Section 8.18.c, and reflection of best estimate actions in APF41

9 Counterparty risk: The longer the period that losses are projected for the reinsurer, the greater the counterparty risk and/or probability of recapture. The model should reflect margin (either implicit or explicit) such that the longer the projection period, and greater uncertainty, the margin has a larger impact on the positive reinsurer cash flows. (per VM-20, Section 9B.2 on margins)

10 There should be a “reasonable” relationship between the reported reserve credit vs. the reported assumed reserve

Comment: ½ Cx prescribes the same credit; APF JR establishes a comparison; APF 40, 41 and 42 may be viewed as providing this through use of consistent methodology for both ceding and assuming companies, but testing may demonstrate otherwise.

11 YRT rates between affiliated assuming and ceding companies must be the same;

Section 12 of SVL: Requirements of a Principle-Based Valuation

A. A Company must establish reserves using a principle-based valuation that meets the following conditions for policies or contracts as specified in the valuation manual:

1. Quantify the benefits and guarantees, and the funding, associated with the contracts and their risks at a level of conservatism that reflects conditions that include unfavorable events that have a reasonable probability of occurring during the lifetime of the contracts. For policies or contracts with significant tail risk, reflects conditions appropriately adverse to quantify the tail risk.

2. Incorporate assumptions, risk analysis methods and financial models and management techniques that are consistent with, but not necessarily identical to, those utilized within the company’s overall risk assessment process, while recognizing potential differences in financial reporting structures and any prescribed assumptions or methods.

3. Incorporate assumptions that are derived in one of the following manners:
   (a) The assumption is prescribed in the valuation manual.
   (b) For assumptions that are not prescribed, the assumptions shall:
      (i) Be established utilizing the company’s available experience, to the extent it is relevant and statistically credible; or
      (ii) To the extent that company data is not available, relevant, or statistically credible, be established utilizing other relevant, statistically credible experience.

4. Provide margins for uncertainty including adverse deviation and estimation error, such that the greater the uncertainty the larger the margin and resulting reserve.

B. A company using a principle-based valuation for one or more policies or contracts subject to this section as specified in the valuation manual shall:

   (1) Establish procedures for corporate governance and oversight of the actuarial valuation function consistent with those described in the valuation manual.
   (2) Provide to the commissioner and the board of directors an annual certification of the effectiveness of the internal controls with respect to the principle-based valuation. Such controls shall be designed to assure that all material risks inherent in the liabilities and associated assets subject to such valuation are included in the valuation, and that valuations are made in accordance with the valuation manual. The certification shall be based on the controls in place as of the end of the preceding calendar year.
   (3) Develop, and file with the commissioner upon request, a principle-based valuation report that complies with standards prescribed in the valuation manual.

C. A principle-based valuation may include a prescribed formulaic reserve component.
Principles in APPM:

- Conservatism: Conservative valuation procedures provide protection to policyholders against adverse fluctuations in financial condition or operating results. Statutory accounting should be reasonably conservative over the span of economic cycles and in recognition of the primary responsibility to regulate for financial solvency.

- Recognition: The ability to meet policyholder obligations is predicated on the existence of readily marketable assets available when both current and future obligations are due. Assets having economic value other than those which can be used to fulfill policyholder obligations, or those assets which are unavailable due to encumbrances or other third party interests should not be recognized on the balance sheet by rather should be charged against surplus when acquired or when availability otherwise becomes questionable.

- Consistency: The regulators’ need for meaningful, comparable financial information to determine an insurer’s financial condition requires consistency in the development and application of statutory accounting principles.

Other Principles in VM:

“Overview of Reserve Concepts” in the Introduction Section of the VM”: (with emphasis added – may need refinement to reflect decisions on reinsurance modeling)

Reserve requirements prescribed in the Valuation Manual are intended to support a statutory objective of conservative valuation to provide protection to policyholders and promote solvency of companies against adverse fluctuations in financial condition or operating results pursuant to requirements of Model #820.

A principle-based valuation must only reflect risks that are:
1. Associated with the policies or contracts being valued, or their supporting assets.
2. Determined to be capable of materially affecting the reserve.

Risks not to be included in reserves are those of a general business nature, those that are not associated with the policies or contracts being valued, or those that are best viewed from the company perspective as opposed to the policy or contract perspective. These risks may involve the need for a liability separate from the reserve or may be provided for in capital and surplus.
APF 2019-40 Field Testing Instructions

Unique components to this APF are highlighted in Yellow

Testing of this APF Includes:

1. The company should perform a VM-20 reserve calculation, and if possible projection of future reserve results, using the 2020 Valuation Manual, except modified by APF 2019-40 under four counterparty action scenarios.

   a. Model current YRT rates for all projection years; Apply the APF only with regards to other counterparty actions such as default, recapture or other terminations.
   b. Model a prudent estimate of all counterparty actions; Apply the APF with no additional restrictions or guidance.
   c. Model prudent estimate of rate changes only after reaching the Loss ratio trigger. The Loss ratio is calculated by reviewing cumulative projected reinsurance cash flows from the assuming company perspective. When the Loss ratio exceeds 115% a rate change should be modeled;
   d. Model prudent estimate of rate changes only after reaching Consecutive Years of Loss trigger. The Losses are calculated by reviewing annual projected reinsurance cash flows from the assuming company perspective. When Losses are observed in 5 consecutive years, a rate change should be modeled;

   APF 40 Sections 8.C.8 through 12 require a review of the reinsurance treaty cashflows, and subsequent assumptions regarding counterparty actions.

2. The only difference between the pre-YRT-reinsurance and post-YRT-reinsurance results should be YRT reinsurance. This can be handled in either of two options: model no reinsurance or retrocessions for the pre-YRT-reinsurance results and only model YRT reinsurance or retrocessions for the post-YRT-reinsurance results or 2) model other types of reinsurance or retrocessions for both the pre-YRT-reinsurance and the post-YRT-reinsurance results.

3. When reviewing output for this APF, ensure to look at how results vary for the pre-reinsurance reserve for assuming companies with no modeled rate increases.

Testing of this APF should Produce Disclosures:

1. Provide reserve results per $1000 of NAAR. If possible, projected reserves should be provided on an annual basis for the company’s full projection horizon. These results should be provided separately for Term, ULSG, and Other, as applicable. That is, for each projection year, provide the following reserve results:
### Term (results per $1000)

2. For each scenario result (a, b, c, d), disclose for the DR the individual annual reinsurance cash flows (e.g., reinsurance premiums paid, ceded benefits) for the time zero valuation projection.

3. For each scenario result (b, c and d), disclose whether YRT rates were modeled to change, by how much and/or how often as well as (in the case of scenario b) the trigger for such action. Disclose sensitivity test results and rationale for selecting modeled rate change assumptions.

4. For each scenario result (a, b, c, d), disclose whether, and if so in what time period, the company assumed recapture/contract termination would occur. Disclose sensitivity test results and rationale for selecting modeled assumption.

5. If any actions are modeled with respect to Sections 8.C.8, 14, 15 or 16 please disclose.

6. If there are features of the YRT reinsurance treaty or rates that you believe make the trigger outlined in scenario c or d unreasonable, please describe.

7. Disclose any material modeling simplifications and/or approximations applied.

See Modified APF 2019-40 Below:
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
YRT Field Test Design Group

Title of the Issue:
VM-20 Treatment for YRT Cash Flows in Modeled Reserves

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2019 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The current language of Section 8 has resulted in a wider variety of approaches in modeling YRT reinsurance cashflows than expected by regulators. More specific definition of principles is expected to narrow the range of practice but still allow companies to model the specific circumstances of their reinsurance agreements.

This proposal accomplishes this by expanding the general considerations section; removing the comparison to modeling of policy form NGE; and clarifying the need for establishing prudent estimate assumptions for company and counterparty actions that are at the conservative end of the plausible range of behavior.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

VM-20 Section 8: Reinsurance

A. General Considerations

1. In this section, reinsurance includes retrocession, and assuming company includes retrocessionaire.

Guidance Note: In determining reserves, one party to a reinsurance transaction may make use of reserve calculations of the other party. In this situation, if the company chooses assumptions that differ from those used by the other party, the company must either rerun the reserve calculation or be prepared to demonstrate that appropriate adjustments to the other party’s calculations have been made.

2. The company shall assume that the laws and regulations in place as of the valuation date regarding credit for reinsurance remain in effect throughout the projection period.

3. A company shall include a reinsurance agreement or amendment in calculating the minimum reserve if, under the terms of the AP&P Manual, the agreement or amendment qualifies for credit for reinsurance.

4. If a reinsurance agreement or amendment does not qualify for credit for reinsurance but treating the reinsurance agreement or amendment as if it did so qualify would result in a reduction to the company’s surplus, then the company shall increase the minimum reserve by the absolute value of such reductions in surplus.

Guidance Note: Section 8.A.3 provides that, in general, if a treaty does not meet the requirements for credit for reinsurance, it should not be allowed to reduce the reserve. Thus, it should not be allowed a reinsurance credit to the NPR, and its cash flows should not be included in the cash-flow models used to calculate the deterministic or stochastic reserve. Section 8.A.4 introduces the exception that if allowing a net premium credit and including the treaty cash flows in the cash-flow models would produce a more conservative result, then that more conservative result should prevail.

5. The company shall base its company and counterparty action assumptions relating to YRT reinsurance consistent with the moderately adverse environment as applicable to the valuation of all life policyholders.

Guidance Note: This consideration is intended to preclude assuming that other reinsured blocks have positive experience that would offset the statutory conservatism prescribed in the mortality assumption.

6. The company shall base its company and counterparty action assumptions relating to YRT reinsurance treaty changes reflecting that, in general, there is no relevant company or industry experience currently available upon which to base the anticipated experience assumption.

Guidance Note: Although some companies may have experience with adverse mortality on particular reinsured blocks, this would not be directly relevant to the scenario where industry mortality is adverse, as per the prescribed scenario. Assumptions and margins related to treaty provisions are therefore subject to Sections 9.A.6.c and 9.B.2 and the
7. Although YRT treaties permanently transfer mortality risk to the assuming company, the assuming company shall not be assumed to incur indefinite losses if treaty terms allow adjustment of the underlying economics.

8. The relationship between assuming companies and the company is between knowledgeable counterparties, and should be expected to result in negotiated contractual changes, subject to provisions of the treaty(ies), and after reflecting the output of modeled policyholder cashflows.

9. In addition, it should not be assumed that assuming reinsurers would take rate increase actions that are not a realistic reflection of the likely timing and magnitude of the rate actions that would unfold under the prescribed mortality scenario, based solely on the reinsurer’s foreknowledge that the prescribed mortality assumption does not allow mortality improvement beyond the valuation date.

B. Determination of a Credit to the NPR to Reflect Reinsurance Ceded

1. Determination of the credit to the NPR to reflect reinsurance shall be done in accordance with SSAP No. 61R—Life, Deposit-Type and Accident and Health Reinsurance in the AP&P Manual.

Guidance Note: The credit taken under a coinsurance arrangement shall be calculated using the same methodology and assumptions used in determining its NPR, but only for the percentage of the risk that was reinsured. If the reinsurance is on a YRT basis, the credit shall be calculated using the assumptions used in determining the NPR, but for the net amount at risk.

2. If a company cedes a portion of a policy under more than one reinsurance agreement, then the company shall calculate a credit separately for each such agreement. The credit for reinsurance ceded for the policy shall be the sum of the credits for all such agreements.

3. The credit for reinsurance ceded applied to a group of policies shall be the sum of the credit for reinsurance ceded for each of the policies of the group.

C. Reflection of Reinsurance Cash Flows in the Deterministic Reserve or Stochastic Reserve

In calculations of the deterministic reserve or stochastic reserve pursuant to Section 4 and Section 5:

1. The company shall use anticipated experience assumptions and margins that are appropriate for each company pursuant to a reinsurance agreement. In such instance, the ceding and assuming companies are not required to use the same assumptions and margins for the reinsured policies unless they are affiliated.
2. To the extent that a single deterministic valuation assumption for risk factors associated with certain provisions of reinsurance agreements will not adequately capture the risk, the company shall do one of the following:

   a. Stochastically model the risk factors directly in the cash-flow model when calculating the stochastic reserve.

   b. Perform a separate stochastic analysis outside the cash-flow model to quantify the impact on reinsurance cash flows to and from the company. The company shall use the results of this analysis to adjust prudent estimate assumptions or to determine an amount to adjust the stochastic reserve to adequately make provision for the risks of the reinsurance features.

   **Guidance Note:** An example of reinsurance provisions where a single deterministic valuation assumption will not adequately capture the risk is stop-loss reinsurance.

3. The company shall determine cash flows for reinsurance ceded subject to the following:

   a. The company shall include the effect of projected cash flows received from or paid to assuming companies under the terms of ceded reinsurance agreements in the cash flows used in calculating the deterministic reserve in Section 4 and stochastic reserves in Section 5.

   b. If cash flows received from or paid to assuming companies under the terms of any reinsurance agreement are dependent upon cash flows received from or paid to assuming companies under other reinsurance agreements, the company shall first determine reinsurance cash flows for reinsurance agreements with no such dependency and then use the reinsurance cash flows from these independent agreements to determine reinsurance cash flows for the remaining dependent agreements.

   c. The company shall use *prudent estimate* assumptions to project cash flows to and from assuming companies that are consistent with other assumptions used by the company in calculating the deterministic or stochastic reserve for the reinsured policies and that reflect the terms of the reinsurance agreements.

4. The company shall determine cash flows for reinsurance assumed subject to the following:

   a. The company shall include the effect of cash flows projected to be received from and paid to ceding companies under the terms of assumed reinsurance agreements in the cash flows used in calculating the deterministic reserve in Section 4 and the stochastic reserve in Section 5.

   b. If cash flows received from or paid to ceding companies under the terms of any reinsurance agreement are dependent upon cash flows received from or paid to ceding companies under other reinsurance agreements, the company shall first determine reinsurance cash flows for reinsurance agreements with no such dependency and then use the reinsurance cash flows from these independent agreements to determine reinsurance cash flows for the remaining dependent agreements.
5. If a company assumes a policy under more than one reinsurance agreement, then the company may treat each agreement separately for the purposes of calculating the reserve.

6. An assuming company shall use assumptions to project cash flows to and from ceding companies that reflect the assuming company’s experience for the business segment to which the reinsured policies belong and reflect the terms of the reinsurance agreement.

7. The company shall assume that the counterparties to a reinsurance agreement are knowledgeable about the contingencies involved in the agreement and likely to exercise the terms of the agreement to their respective advantage, taking into account the context of the agreement in the entire economic relationship between the parties. In setting assumptions for the reinsurance cash flows, the company shall include, but not be limited to, the following:

   a. The usual and customary practices associated with such agreements.
   b. Past practices by the parties concerning the changing of terms, in an economic environment similar to that projected.
   c. Any limits placed upon either party’s ability to exercise contractual options in the reinsurance agreement.
   d. The ability of the direct-writing company to modify the terms of its policies in response to changes in reinsurance terms.
   e. Actions that might be taken by a party if the counterparty is in financial difficulty.

**Guidance note:** It should be assumed that if any treaty produces a pattern of projected losses to the counter party, that the risk of financial difficulty will increase commensurate with the magnitude of projected losses. The risk of default by the assuming company is addressed in item 15 below. The risk of default by the ceding company is addressed in item 16 below.

8. The company shall account for any actions that the ceding company and, if different, the direct-writing company have taken or are likely to take that could affect the expected cash flows of the reinsured business in determining **prudent estimate** assumptions for the modeled reserve. Note that these assumptions are in addition to, rather than in lieu of, assumptions as to the behavior of the underlying policyholders.

**Guidance Note:** Examples of NGE actions the direct-writing company could take include:
1) instituting internal replacement programs or special underwriting programs, both of which could change expected mortality rates; or 2) changing NGE in the reinsured policies, which could affect mortality, policyholder behavior, and possibly expense and investment assumptions. Examples of actions the ceding company could take include:
1) the exercise of contractual options in a reinsurance agreement to influence the setting of NGEs in the reinsured policies; or 2) the ability to participate in claim decisions.

9. The company shall account for any actions that the assuming company has taken or is likely to take that could affect the expected cash flows of the reinsured business **in determining**
prudent estimate assumptions. Appropriate assumptions for these elements may depend on the scenario being tested. The company shall take into account all likely consequences of the assuming company changing an element of the reinsurance agreement, including any potential impact on the probability of recapture by the ceding company.

**Guidance Note:** Examples of such actions include, but are not limited to, changes to the current scale of reinsurance premiums and changes to expense allowances.

10. In addition to exercising the terms of the agreement and implementing changes to an agreement, it is appropriate for the actuary to assume that knowledgeable counterparties may renegotiate terms of the agreement to the mutual benefit of both parties or to reflect risk sharing of adverse experience. To the extent that experience is limited in deriving the terms of a renegotiated agreement, or the timing of such renegotiation, the sensitivity tests required in Section 9.A.6.d are required to inform the selection of the assumption set at the conservative end of the plausible range.

11. The company shall take into account any ceding company option to recapture reinsured business. Appropriate assumptions may depend on the scenario being tested (analogous to interest-sensitive lapses).

**Guidance Note:** Cash flows associated with recapture include recapture fees or other termination settlements.

**Guidance Note:** To the extent that experience is limited in determining the timing of recapture, the sensitivity tests required in Section 9.A.6.d are required to inform the selection of the assumption set at the conservative end of the plausible range.

**Guidance Note:** The actions assumed by counterparties with respect to exercising treaty provisions need not all be modeled as some will be mutually exclusive. Exercise of treaty provisions shall be considered and discussed in the PBR actuarial Report.

12. The company shall take into account an assuming company’s right to terminate in-force reinsurance business. In the case in which the assuming company’s right to terminate is limited to cases of non-payment of amounts due by the ceding company or other specific, limited circumstances, the company may assume that the termination option would be expected to have insignificant value to either party and, therefore, may exclude recognition of this right to terminate in the cash-flow projections. However, if a reinsurance agreement contains other termination provisions with material impact, the company shall set appropriate assumptions for these provisions consistent with the particular scenario being tested.

**Guidance Note:** To the extent that experience is limited in determining the timing of contract termination, the sensitivity tests required in Section 9.A.6.d are required to inform the selection of the assumption set at the conservative end of the plausible range.
13. If, under the terms of the reinsurance agreement, some of the assets supporting the reserve are held by the counterparty or by another party, the company shall:
