2021 Proceedings of the
National Association of Insurance Commissioners

2021 Summer National Meeting
August 14 – 17, 2021

Held at the
Hyatt Regency Columbus & Hilton Columbus Downtown
Columbus, Ohio
The NAIC is the authoritative source for insurance industry information. Our expert solutions support the efforts of regulators, insurers and researchers by providing detailed and comprehensive insurance information. The NAIC offers a wide range of publications in the following categories:

**Accounting & Reporting**
Information about statutory accounting principles and the procedures necessary for filing financial annual statements and conducting risk-based capital calculations.

**Consumer Information**
Important answers to common questions about auto, home, health and life insurance — as well as buyer’s guides on annuities, long-term care insurance and Medicare supplement plans.

**Financial Regulation**
Useful handbooks, compliance guides and reports on financial analysis, company licensing, state audit requirements and receiverships.

**Legal**
Comprehensive collection of NAIC model laws, regulations and guidelines; state laws on insurance topics; and other regulatory guidance on antifraud and consumer privacy.

**Market Regulation**
Regulatory and industry guidance on market-related issues, including antifraud, product filing requirements, producer licensing and market analysis.

**Special Studies**
Studies, reports, handbooks and regulatory research conducted by NAIC members on a variety of insurance related topics.

**Statistical Reports**
Valuable and in-demand insurance industry-wide statistical data for various lines of business, including auto, home, health and life insurance.

**Supplementary Products**
Guidance manuals, handbooks, surveys and research on a wide variety of issues.

**Capital Markets & Investment Analysis**
Information regarding portfolio values and procedures for complying with NAIC reporting requirements.

**White Papers**
Relevant studies, guidance and NAIC policy positions on a variety of insurance topics.

CERTIFICATE OF INCORPORATION OF
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS
a Nonstock Corporation

I. Name

The name of the Corporation is: National Association of Insurance Commissioners (NAIC).

II. Duration

The period of duration of the NAIC is perpetual.

III. Registered Office and Agent

The NAIC’s Registered Office in the State of Delaware is to be located at: 1209 Orange St., in the City of Wilmington, Zip Code 19801. The registered agent in charge thereof is The Corporation Trust Company.

IV. Authority to Issue Stock

The NAIC shall have no authority to issue capital stock.

V. Incorporators

The name and address of the incorporator are as follows:
Catherine J. Weatherford
National Association of Insurance Commissioners
120 W. 12th St., Suite 1100
Kansas City, MO 64106

VI. Purpose

The NAIC is organized exclusively for charitable and educational purposes within the meaning of Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), including without limitation, to assist state insurance regulators, individually and collectively, in serving the public interest and achieving the following fundamental insurance regulatory goals in a responsive, efficient and cost-effective manner, consistent with the wishes of its members:

(a) Protect the public interest, promote competitive markets and facilitate the fair and equitable treatment of insurance consumers;
(b) Promote, in the public interest, the reliability, solvency and financial solidity of insurance institutions; and
(c) Support and improve state regulation of insurance.

VII. Restrictions

A. No substantial part of the activities of the Corporation shall be the carrying of propaganda, or otherwise attempting to influence legislation except as otherwise permitted by Section 501(h) of the Code and in any corresponding laws of the State of Delaware, and the Corporation shall not participate in or intervene in including the publishing or distribution of statements concerning any political campaign on behalf of or in opposition to any candidate for public office.

B. For any period for which the Corporation may be considered a private foundation, as defined in Section 509(a), the Corporation shall be subject to the following restrictions and prohibitions:

1. The Corporation shall not engage in any act of self-dealing as defined in section 4941(d) of the Code.
2. The Corporations shall make distributions for each taxable year at such time and in such manner so as not to become subject to the tax on undistributed income imposed by section 4942 of the Code.
3. The Corporation shall not retain any excess business holdings as defined in section 4943(c) of the Code.
4. The Corporation shall not make any investments in such manner as to subject it to tax under section 4944 of the Code.
5. The Corporation shall not make any taxable expenditures as defined in section 4945(d) of the Code.
VIII. Membership

The NAIC shall have one class of members consisting of the Commissioners, Directors, Superintendents, or other officials who by law are charged with the principal responsibility of supervising the business of insurance within each State, territory, or insular possession of the United States. Members only shall be eligible to hold office in and serve on the Executive Committee, Committees and Subcommittees of the NAIC. However, a member may be represented on a Committee or Subcommittee by the member’s duly authorized representative as defined in the Bylaws. Only one official from each State, territory or insular possession shall be a member and each member shall be limited to one vote. Any insurance supervisory official of a foreign government or any subdivision thereof, which has been diplomatically recognized by the United States government, may attend and participate in all meetings of this Congress but shall not be a member and shall not have the power to vote.

IX. Activities

The NAIC is a nonprofit charitable and educational organization and no part of the net earnings or property for the corporation will inure to the benefit of, or be distributable to its members, directors, officers or other private individuals, except that the NAIC shall be authorized and empowered to pay reasonable compensation for services rendered by employees and contractors, and to make payments and distributions in furtherance of the purposes set forth in Article VI hereof.

X. Powers

The NAIC shall have all of the powers conferred by the Delaware General Corporation Law for non-profit corporations, except that, any other provision of the Certificate to the contrary notwithstanding, the NAIC shall neither have nor exercise any power, nor carry on any other activities not permitted: (a) by a corporation exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); or (b) by a corporation contributions to which are deductible under Section 170(c)(2) of the Internal Revenue Code of 1986, as amended, (or the corresponding provision of any future United States Internal Revenue law).

XI. Immunity

All officers and members of the Executive Committee shall be immune from personal liability for any civil damages arising from acts performed in their official capacity, and shall not be compensated for their services as an officer or member of the Executive Committee on a salary or a prorated equivalent basis. The immunity shall extend to such actions for which the member of the Executive Committee or officer would not otherwise be liable, but for the Executive Committee member’s or officer’s affiliation with the NAIC. This immunity shall not apply to intentional conduct, wanton or willful conduct or gross negligence. Nothing herein shall be construed to create or abolish an immunity in favor of the NAIC itself. Nothing herein shall be construed to abolish any immunities held by the state officials pursuant to their individual state’s law.

XII. Exculpation and Indemnification

A member of the Executive Committee shall not be liable to the NAIC or its members for monetary damages for breach of fiduciary duty as a member of the Executive Committee, provided that this provision shall not eliminate or limit the liability of a member of the Executive Committee for any breach of the duty of loyalty to the NAIC or its members, for acts or omissions not in good faith, or which involve intentional misconduct or a knowing violation of law, or for any transaction from which the member of the Executive Committee involved derived an improper personal benefit. Any amendment, modification or repeal of the foregoing sentence shall not adversely affect any right or protection of a member of the Executive Committee of the Corporation hereunder in respect of any act or omission occurring prior to the time of such amendment, modification, or repeal. If the Delaware General Corporation Law hereafter is amended to authorize the further elimination or limitation of the liability of the members of the Executive Committee, then the liability of a member of the Executive Committee, in addition to the limitation provided herein, shall be limited to the fullest extent permitted by the amended Delaware General Corporation Law.

The NAIC shall indemnify to the full extent authorized or permitted by the laws of the State of Delaware, as now in effect or as hereafter amended, any person made or threatened to be made a party to any threatened, pending or completed action, suit or proceeding (whether civil, criminal, administrative or investigative, including an action by or in the right of the NAIC) by reason of the fact that the person is or was a member of the Executive Committee, officer, member, committee member, employee or agent of the NAIC or serves any other enterprise as such at the request of the NAIC.
The foregoing right of indemnification shall not be deemed exclusive of any other rights to which such person may be entitled apart from this Article XII. The foregoing right of indemnification shall continue as to a person who has ceased to be a member of the Executive Committee, officer, member, committee member, employee or agent and shall inure to the benefit of the heirs, the executors and administrators of such a person.

XIII. Dissolution

In the event of the dissolution of the NAIC, the Executive Committee shall, after paying or making provision for the payment of all of the liabilities of the NAIC, dispose of all the assets of the NAIC equitably to any state government which is represented as a member of the NAIC at the time of dissolution, provided that the assets are distributed upon the condition that they be used primarily and effectively to implement the public purpose of the NAIC, or to one or more such organizations organized and operated exclusively for religious, charitable, education, scientific, or literary purposes or similar purposes as shall at the time qualify: (a) as an exempt organization under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law); and (b) as an organization contributions to which are deductible under Section 170(c) of the Internal Revenue Code of 1986, as amended (or the corresponding provision of any future United States Internal Revenue law), as the Executive Committee shall determine.

XIV. Bylaws

The Bylaws of the NAIC may prescribe the powers and duties of the several officers, members of the Executive Committee and members and such rules as may be necessary for the work of the NAIC provided they are in conformity with the Certificate of Incorporation.

XV. Amendments

This Certificate of Incorporation may be altered or amended at any meeting of the full membership (Plenary Session) of the NAIC by an affirmative vote of two-thirds of the members qualified to vote, or their authorized representatives, provided that previous notice of the proposed amendment has been mailed to all members by direction of the Executive Committee at least thirty (30) days prior to the meeting.

IN WITNESS WHEREOF, this Certificate of Incorporation has been signed this 4th day of October 1999.

/signature/
Catherine J. Weatherford, Incorporator

ADOPTED 1999, Proc. Third Quarter
BYLAWS OF THE
NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS

ARTICLE I Name, Organization and Location

The name of this corporation is NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS (NAIC). The NAIC is organized under the General Corporation Law of the State of Delaware. The NAIC may have one (1) or more office locations within or without the State of Delaware as the Executive Committee may from time to time determine.

ARTICLE II Membership

The Membership of the NAIC shall be comprised of those persons designated as members in the Certificate of Incorporation. Each member of the NAIC shall have the power to vote and otherwise participate in the affairs of the NAIC as set forth herein or as required by applicable law. This power may be exercised through a duly authorized representative who shall be a person officially affiliated with the member’s department and who is wholly or principally employed by said department.

The organization may charge members an annual assessment, the amount of which shall be determined by the Executive Committee. Members failing to pay all NAIC assessments on a timely basis shall be placed in an inactive status. Members in an inactive status shall not have any voting rights and shall be denied membership on NAIC committees and task forces, access to mailings and services of the NAIC Offices, as well as access to zone examination processes and other benefits of membership in the NAIC.

The NAIC’s receipt of full payment from the inactive member of all current and past due assessments shall serve to immediately remove them from inactive status.

The Membership of the NAIC shall be subject to a conflict of interest policy and disclosure form as adopted by the members.

The Executive Committee is empowered to reinstate, in part or in whole, an inactive member’s participation on the committees and task forces, access to mailings and services of the NAIC Offices and satellite offices, as well as access to zone examination processes, and other benefits of membership in the NAIC upon good cause shown as determined by the Executive Committee.

ARTICLE III Officers

The officers of the NAIC shall be a President, a President-Elect, a Vice President, and a Secretary-Treasurer. Annual officer elections shall be held at the last regular National Meeting of each calendar year or at such other plenary session as agreed to by the members. The voting membership, by secret ballot, shall elect officers as provided in these Bylaws. Officers’ terms shall be for one year, beginning on January 1 following their election. The officers shall hold office until their death, resignation, removal or the election and qualification of their successors, whichever occurs first. Any Officer may resign at any time by giving notice thereof in writing to the President of the NAIC. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

If an interim vacancy occurs in the office of President, the President-Elect shall cease to hold his or her office effective immediately and shall assume the office of President. If an interim vacancy occurs in any one or more of the other officer positions, an interim election shall be held to fill the vacancy. No member may hold any office for more than two consecutive years. Notwithstanding the foregoing, at no time shall more than two officer positions be filled by members of the same Zone during the same term. Any officer may be removed from office by the affirmative vote of two-thirds (2/3) of the members, but only after a resolution for removal is adopted by two-thirds (2/3) of the Executive Committee whenever, in their judgment, the best interests of the NAIC would be served thereby.

The President shall serve as Chairman of the Executive Committee and shall preside at all special and regular meetings of the members. The President shall serve as the leader of the organization and its principal spokesperson. The President shall work closely with the Executive Committee to establish and achieve the strategic, business and operational goals of the organization; ensure appropriate policies and procedures for the organization are implemented and followed; and protect the integrity as well as the resources of the organization. After a member completes his or her term or terms as President, he or she shall not be able to hold another officer position for a period of twelve (12) months from the date such member completes his or her term or terms as President, which shall be referred to as a “waiting period”; provided however, the Executive Committee may waive the twelve month waiting period if warranted by exigent circumstances.
The President-Elect shall serve as Vice-Chairman of the Executive Committee. In the absence of the President at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, the President-Elect shall preside over such meeting to the extent of the President’s absence. The President-Elect shall perform such other duties and tasks as may be assigned by the President. Where the President does not run for re-election, the President-Elect shall become President at the conclusion of the President’s term of office.

The Vice President, in the absence of the President and President-Elect at a duly convened meeting of the Executive Committee or at a regular or special meeting of the members, shall preside over such meeting to the extent of the President’s and the President-Elect’s absence; and shall perform such other duties as may be assigned by the President or President-Elect, or in the absence thereof, by the Executive Committee.

The Secretary-Treasurer shall assist the President and, as applicable, the President-Elect or the Vice President in the conduct of meetings of the Executive Committee and members. For member meetings, the Secretary-Treasurer shall call the roll of the membership and certify the presence of a quorum and shall receive, validate and maintain all proxies for elections held at member meetings. The Secretary-Treasurer shall also recommend to the Executive Committee such policies and procedures to maintain the history and continuity of the NAIC. The Secretary-Treasurer shall also assist the President and President-Elect in all matters relating to the budget, accounting, expenditure and revenue practices of the NAIC; including, but not limited to reviewing the financial information of the organization and consulting with NAIC management, independent auditors, and other necessary parties regarding the financial operations and condition of the organization.

ARTICLE IV Executive Committee

The business and affairs of the NAIC shall be managed by and under the direction of the Executive Committee. The Executive Committee shall be made up entirely of members of the NAIC. The Executive Committee shall consist of the following members: the officers of the NAIC; the most recent past president; the twelve (12) members of the zones as provided for in Article V of these Bylaws. The members of the Executive Committee shall be subject to a conflict of interest policy as adopted by the members. Any Executive Committee member may resign at any time by giving notice thereof in writing to the members of the NAIC. Resignation as an Executive Committee member also operates as resignation as a Zone officer. Any such resignation will take effect upon delivery if no date is specified, or as of its date, unless some other date is specified therein, in which event it will be effective as of that date. The acceptance of that resignation will not be necessary to make it effective.

1. The Executive Committee shall have the authority and responsibility to:

   (a) manage the affairs of the NAIC in a manner consistent with the Certificate of Incorporation and Bylaws;

   (b) make recommendations to achieve the goals of the NAIC based upon either its own initiative or the recommendations of the Standing Committees or Subcommittees reporting to it, for consideration and action by the members at any NAIC Plenary Session;

   (c) create and terminate one or more Task Forces reporting to it to the extent needed and appropriate;

   (d) establish and allocate, from time to time, functions and responsibilities to be performed by each Zone;

   (e) to the extent needed and appropriate, oversee NAIC Offices to assist the NAIC and the individual members in achieving the goals of the NAIC;

   (f) submit to the NAIC at each National Meeting, during which a Plenary Session is held, its report and recommendations concerning the reports of the Standing Committees. All Standing Committee reports shall be included as part of the Executive Committee report;

   (g) plan, implement and coordinate communications and activities with other state, federal and local government organizations in order to advance the goals of the NAIC and promote understanding of state insurance regulation.
2. Duties and Operations of the Executive Committee.

(a) The Executive Committee shall hold at least two (2) regular meetings annually at a designated time and place. Special meetings may be held when called by the President, or by at least three (3) members of the Executive Committee in writing. In any case, the Executive Committee shall meet at least once per calendar month. At least five (5) days notice shall be given of all regular and special meetings. Meetings may be held in person or by means of conference telephone or other communication equipment by means of which all persons participating in the meeting can hear each other, and such participation in a meeting shall constitute presence in person at such meeting in accordance with applicable laws. The presiding member of the Executive Committee shall only cast his or her vote in order to break a tie vote. In addition, the Executive Committee may act by written consent as provided by law.

(b) The Executive Committee may, with the concurrence of two-thirds of the members of the Executive Committee, establish rules for its conduct that shall not conflict with the Certificate of Incorporation and Bylaws. Such rules may be changed only by a concurrence of two-thirds of the members of the Executive Committee after twenty-four (24) hours notice to all members of the Executive Committee.

(c) Any action required or permitted to be taken at any meeting of the Executive Committee or any committee thereof may be taken without a meeting if all members of the Executive Committee or such committee, as the case may be, consent thereto in writing in accordance with applicable law.

(d) The Executive Committee shall cause to be kept minutes of its meeting and have information of any action of a general character taken by it published to members qualified to vote.

(e) NAIC OFFICES

(i) The Executive Committee shall oversee an Executive Office and a Central Office with management and staff personnel and appropriate resources for performance of duties and assigned responsibilities. Additional satellite offices may be established as needed. The Executive Committee shall have the authority to select, employ and terminate a Chief Executive Officer who shall not be a member of the NAIC and who shall have the primary responsibility for the internal management and functioning of the NAIC Offices within the direction of the Executive Committee, as well as other duties assigned by the Executive Committee through execution of an Employment Agreement or other authorization. The Chief Executive Officer appointed by the Executive Committee pursuant to this section shall not be considered an officer for purposes of Article III hereof and shall not be a member of the Executive Committee. The Executive Committee, through the Internal Administration (EX1) Subcommittee, shall provide oversight and direction to the Chief Executive Officer regarding Office operations.

(ii) Consistent with the purposes of the NAIC, the role of the NAIC Offices is to: (1) provide services to the NAIC through support to the NAIC Committees, Subcommittees, Task Forces or otherwise; (2) provide services to individual State insurance departments; and (3) develop recommendations for consideration as to NAIC policy and administrative decisions of the NAIC.

(iii) In performing its role, subject to the oversight and direction specified in (paragraph i) the NAIC Offices may engage in a variety of functions including but not limited to the following: research; analysis; information gathering and dissemination; library services; data collection; data base building and maintenance; report generation and dissemination; government liaison; non-regulatory liaison; securities valuation; administration; litigation; legislative and regulatory drafting; and educational development.

(iv) The Chief Executive Officer shall prepare an annual budget, related to the priorities of the NAIC, for the NAIC Offices to be submitted through the EX1 Subcommittee to the Executive Committee, which shall make its recommendations to the members of the NAIC for action at the next Plenary Session of the NAIC.
3. Internal Administration (EX1) Subcommittee

The Internal Administration (EX1) Subcommittee shall be a Subcommittee reporting to the Executive Committee. Appointments of the Chair and Vice Chair of the Executive Subcommittee and members other than those specifically designated herein shall be made by the President and President-Elect.

This Subcommittee shall be comprised of the President, President-Elect, Vice President, the Secretary-Treasurer, the most recent past President, and three (3) other members of the Executive Committee. The presiding member of the Subcommittee shall only cast his or her vote in order to break a tie vote.

The Internal Administration (EX1) Subcommittee shall:

(a) Exercise such powers and authority as may be delegated to it by the Executive Committee.

(b) Generally oversee the NAIC Offices including, without limitation: (i) periodically monitor operations of the NAIC Offices, (ii) review and revise the budget of the NAIC, hold an annual hearing to receive public comments on the budget of the NAIC, and submit the revised budget to the Executive Committee, (iii) approve emergency expenditures which vary from the adopted budget and promptly certify its action in writing to the Executive Committee, (iv) evaluate the Chief Executive Officer and make appropriate recommendations to the Executive Committee, (v) assist the Chief Executive Officer in resolving competing demands for NAIC resources, (vi) review compensation of all senior management and (vii) quarterly prepare a report containing the current budget and expenditures which the Secretary-Treasurer shall present to the Executive Committee.

4. Audit Committee

The Executive Committee shall appoint an Audit Committee made up of at least four (4) members of the NAIC, including at least one member from each zone, in addition to the NAIC Secretary-Treasurer. The NAIC Secretary-Treasurer shall chair the Audit Committee. The Audit Committee shall report to the Executive Committee without any NAIC employees being present. The Audit Committee shall be directly responsible for the appointment, compensation, and oversight of the independent certified public accountant employed to conduct the audit. The Audit Committee shall also have the power, to the extent permitted by law, to: (i) initiate or review the results of an audit or investigation into the business affairs of the NAIC; (ii) review the NAIC’s financial accounts and reports; (iii) conduct pre-audit and post-audit reviews with NAIC staff, members and independent auditors; and (iv) exercise such other powers and authority as delegated to it by the Executive Committee.

ARTICLE V Zones

To accomplish the purposes of the NAIC in a timely and efficient manner, the United States, its territories and insular possessions shall be divided into four Zones. Each Zone shall consist of a group of at least eight States, located in the same geographical area, with each State being contiguous to at least one other State in the group so far as practicable, plus any territory or insular possession that may be deemed expedient, all as determined by majority of the Executive Committee. Members of each Zone shall annually elect a Chairman, a Vice Chairman and a Secretary from among themselves prior to or during the last regular National Meeting of each calendar year or at such time as agreed to by the Zone members. The Chairman, Vice Chairman and Secretary of each Zone shall be members of the Executive Committee with terms of office corresponding to that of the officers. Each Zone shall perform such functions as are designated by the Executive Committee of the NAIC or by the members of the NAIC as a whole or by the members of the Zone. Each Zone may hold Zone Meetings for such purposes as may be deemed appropriate by members of the Zone.

ARTICLE VI Standing Committees and Task Forces

1. General

The Standing Committees shall not be subcommittees of the Executive Committee and shall have no power or authority for the management of the business and affairs of the NAIC. Each Standing Committee shall be composed of not more than 15 members, including a Chair and one or more Vice Chairs, appointed by the President and President-Elect, and such appointments shall remain effective until the succeeding President and President-Elect appoint members for the following year. Standing Committees shall meet at least twice a year at National Meetings and may meet more often at the call of the Chair as required to complete its assignments from the Executive Committee in a timely manner.
The Executive Committee shall make all assignments of subject matter to the Standing Committees and shall require coordination between Committees and Task Forces of the subject matter if more than one Committee or Task Force is affected. The format of the Committee reports shall be prescribed by the Executive Committee. All appointments or elections of members of the NAIC to any office or Committee of the NAIC shall be deemed the appointment or election of a particular member and shall not automatically pass to a successor in office.

2. Specific Duties

The Standing Committees of the NAIC, their duties and responsibilities shall be as follows:

(a) Life Insurance and Annuities (A) Committee: This Standing Committee shall consider issues relating to life insurance and annuities.

(b) Health Insurance and Managed Care (B) Committee: This Standing Committee shall consider issues relating to health and accident insurance and managed care.

(c) Property and Casualty Insurance (C) Committee: This Standing Committee shall consider issues relating to personal and commercial lines of property and casualty insurance, worker’s compensation insurance, statistical information, surplus lines, and casualty actuarial matters.

(d) Market Regulation and Consumer Affairs (D) Committee: This Standing Committee shall consider issues involving market conduct in the insurance industry; competition in insurance markets; the qualifications and conduct of agents and brokers; market conduct examination practices; the control and management of insurance institutions; consumer services of State insurance departments; and consumer participation in NAIC activities.

(e) Financial Condition (E) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to accounting practices and procedures; blanks; valuation of securities; the Insurance Regulatory Information System (IRIS), as it relates to solvency and profitability; the call, monitoring and concluding report of Zone Examinations; and financial examinations and examiner training.

(f) Financial Regulation Standards and Accreditation (F) Committee: This Standing Committee shall consider both administrative and substantive issues as they relate to administration and enforcement of the NAIC Accreditation Program, including without limitation, consideration of standards and revisions of standards for accreditation, interpretation of standards, evaluation and interpretation of states’ laws and regulations, and departments’ practices, procedures and organizations as they relate to compliance with standards, examination of members for compliance with standards, development and oversight of procedures for examination of members for compliance with standards, qualification and selection of individuals to perform the examination of members for compliance with standards, and decisions regarding whether to accredit members.

(g) International Insurance Relations (G) Committee. This Standing Committee shall have the responsibility for issues relating to international insurance.

3. Task Forces

The Executive Committee, its Subcommittee and the Standing Committees may establish one or more Task Forces, subject to approval of the Executive Committee. The parent Committee or Subcommittee, subject to approval of the Executive Committee, may vote to discontinue a Task Force once its charge has been completed.

Vacancies in the positions of Chair or Vice Chair of any Task Force shall be filled by the parent Committee or Subcommittee from within or outside the present Task Force membership; provided, however, that the chief insurance regulatory official of the state of the former Chair or Vice Chair shall become a member of the Task Force. A vacancy in the position of member shall be filled by the chief insurance regulatory official of the vacant member’s state.

If an existing Task Force is dealing with insurance issues that require continuing study, the Executive Committee may adopt the recommendation of the parent Committee or Subcommittee that the Task Force be designated a Standing Task Force. A Standing Task Force shall continue in effect until terminated by the Executive Committee.
ARTICLE VII Meetings of the Membership

1. Regular Meetings.

The NAIC shall hold at least two (2) regular meetings of the members (“National Meetings”) each calendar year. Notice, stating the place, day and hour and any special purposes of the National Meeting, shall be delivered by the Executive Committee not less than ten (10) calendar days nor more than sixty (60) calendar days before the date on which the National Meeting is to be held, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

2. Special Meetings.

Special meetings of the members may be called by any five (5) members of the Executive Committee by giving all members notice of such meeting at least ten (10) but not more than sixty (60) days prior thereto, or by any twenty (20) members of the NAIC by giving all members notice of such meeting at least thirty (30) but not more than sixty (60) days prior thereto. Notice of the special meeting shall state the place, day and hour of the special meeting and the purpose or purposes for which the special meeting is called, and shall be delivered by the persons calling the meeting within the applicable time period set forth herein, either personally, by mail or by other lawful means, to each member entitled to be present and vote at such meeting.

3. Waiver of Notice; Postponement.

Member meetings may be held without notice if all members entitled to notice are present (except when members entitled to notice attend the meeting for the express purpose of objecting, at the beginning of the meeting, because the meeting is allegedly not lawfully called or convened), or if notice is waived by those not present. Any previously scheduled meeting of the members may be postponed by the Executive Committee (or members calling a special meeting, as the case may be) upon notice to members, in person or writing, given at least two (2) days prior to the date previously scheduled for such meeting.

4. Quorum.

Except as otherwise provided by law or by the Certificate of Incorporation, the presence, by person or proxy, of a majority of the members shall constitute a quorum at a member meeting, a meeting of a Standing Committee, Task Force or a working group. The chairman of the meeting may adjourn the meeting from time to time, whether or not there is such a quorum. The members present at a duly called member meeting at which a quorum is present may continue to transact business until adjournment, notwithstanding the withdrawal of enough members to leave less than a quorum.

5. Any meeting of the NAIC may be held in executive session as defined in the NAIC policy on open meetings. Any member may attend and participate in any meeting of the NAIC or any meeting of a Standing Committee or Task Force whether or not such member has the right to vote. All National Meetings shall provide for a Plenary Session of the NAIC as a whole in order to consider and take action upon the matters submitted to the NAIC.

ARTICLE VIII Elections

1. The election of officers of the NAIC shall be scheduled for the plenary session of the last National Meeting of the calendar year or at such other plenary session as agreed to by the members.

2. At the beginning of such Plenary Session, the Secretary-Treasurer shall ascertain and announce the presence of a quorum.

3. Upon the determination of a quorum, the chair shall briefly review the provisions of the Certificate of Incorporation and Bylaws in regard to voting.

4. The President shall ask for and announce all proxies. Proxies shall be held by the Secretary-Treasurer or a designee throughout the election session. Proxies shall be valid, subject to their term, until superseded by the member and shall be governed by ARTICLE IX of the Bylaws.

5. Every individual voting by proxy must meet the requirements of Article II of the Bylaws of the NAIC which requires that such a person be “…officially affiliated with the member’s (the member delegating authority to vote) department, and is wholly or principally employed by said department.”
6. Prior to opening the nominations for office, the Chair shall appoint three (3) members of the NAIC to act as voting
inspectors. The voting inspectors shall distribute, collect, count and/or verify ballots, and report their findings to the
Secretary-Treasurer. If a voting inspector is nominated for an office and does not withdraw as a candidate, he or she shall
not be a voting inspector for the election of the office to which he or she is nominated and the chair shall appoint another
voting inspector in his or her place.

7. The Chair shall announce the opening of nominations for offices in the following order:
   (a) President. Provided, however, where the President does not run for re-election, the President-Elect shall become
       President at the conclusion of the President’s term of office. In those cases where the President runs for re-election
       or where a vacancy exists because the President–Elect fails or is otherwise unable to assume the Presidency, this
       office will be subject to an election.
   (b) President-Elect.
   (c) Vice President.
   (d) Secretary-Treasurer.

8. Only members or duly authorized proxyholders may make nominations.

9. One nominating speech, not to exceed three (3) minutes in duration, shall be allowed for each nominee.

10. After nominations are closed for each office, each nominee must indicate whether he or she accepts the nomination and,
if he or she accepts, shall be permitted to address the membership for a period of up to seven (7) minutes. Such addresses
shall be given in the order by which the nominations were made.

11. The votes of members, in person or by proxy, constituting a majority of the quorum present at the meeting shall be
necessary for election to such office. If no candidate receives a majority, the two candidates with the most votes will
participate in a run-off election. The candidate with the most votes in the run-off election shall win such election.

12. Voting need not be by written ballot, unless otherwise required by these Bylaws, the Certificate of Incorporation, or
applicable law.

**ARTICLE IX Proxies; Waiver of Notice**

Where the delegation of power to vote or participate in the membership of the NAIC is required by ARTICLE II of these
Bylaws to be in writing, such delegation must be effected by proxy. All proxies must be dated, give specific authority to a
named individual who meets the requirements of ARTICLE II for duly authorized representatives, and meet any other
applicable legal requirement. Documents such as electronic transmission, telegrams, mailgrams, etc. are acceptable as proxies
if they otherwise meet the requirements contained herein and applicable law. Proxies should be maintained by NAIC Central
Office staff. Notwithstanding the foregoing, a member may not vote by proxy in a meeting of the Executive Committee,
Financial Regulation Standards and Accreditation (F) Committee in a vote concerning a state-specific item, Government
Relations Leadership Council, or International Insurance Relations Leadership Group, or any respective subcommittees.

Whenever any notice is required to be given to any member (for a meeting of members or the Executive Committee) under
the provisions of the Certificate of Incorporation, these Bylaws or applicable law, a written waiver, signed by the person
entitled to notice, or a waiver by electronic transmission by person entitled to notice, whether before or after the time stated
therein, shall be deemed equivalent to the giving of such notice. Neither the business to be transacted at, nor the purpose of,
any annual or special meeting of the members or any committee, subcommittee or task force need be specified in any waiver
of notice of such meeting.

Unless otherwise restricted by the Certificate of Incorporation or these Bylaws, Members may participate in a meeting by
means of conference telephone or by any means by which all persons participating in the meeting are able to communicate
with one another, and such participation shall constitute presence in person at the meeting.

Any notice required under these Bylaws may be provided by mail, facsimile, or electronic transmission.
ARTICLE X Procedures; Books and Records

The Executive Committee shall adopt policies and procedures for the conduct of meetings. In the event such policies and procedures conflict with the NAIC’s Certificate of Incorporation or Bylaws, the Certificate of Incorporation and Bylaws shall govern.

The books and records of the NAIC may be kept outside the State of Delaware at such place or places as may from time to time be designated by the Internal Administration Subcommittee (EX1) of the Executive Committee.

ARTICLE XI Amendments

These Bylaws may be altered or repealed and new Bylaws may be adopted at any regular or special meeting of the members by an affirmative vote, in person or by proxy, of a majority of the members entitled to vote at such meeting; provided, however, that any proposed alteration (except to correct typographical or grammatical errors or article, section or paragraph cross-references caused by other alterations, repeals, or adoptions) or repeal of, or the adoption of any Bylaw inconsistent with, Article II [Membership], Article VII, Paragraph 2 [Special Meetings of Members] and Paragraph 4 [Quorum], Article VIII [Elections], or this Article XI [Amendments] of these Bylaws (the “Supermajority Bylaws”) by the members shall require the affirmative vote, in person or by proxy, of at least two-thirds (2/3) of the members entitled to vote at such meeting and provided, further, that in the case of any such member action at a special meeting of members, notice of the proposed alteration, repeal or adoption of the new Bylaw or Bylaws must be contained in the notice of such special meeting. Corrections for typographical or grammatical errors or to article, section or paragraph cross-references caused by other alterations, repeals or adoption, shall only be made if approved by the affirmative vote of at least two-thirds (2/3) of the Executive Committee.

NAIC Policy Statement on Open Meetings
Revised: April 1, 2014

The NAIC is the U.S. standard-setting and regulatory support organization created and governed by the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories. NAIC members are the elected and appointed state government officials who, along with their departments and staff, regulate the conduct of insurance companies and agents in their respective state or territory. The NAIC is committed to conducting its business openly. This policy statement applies to meetings of NAIC committees, subcommittees, task forces and working groups. It does not apply to Roundtable discussions, zone meetings, commissioners’ conferences, and other like meetings of the members. Applicable meetings will be open unless the discussion or action contemplated will include:

1. Potential or pending litigation or administrative proceedings which may involve the NAIC, any NAIC member, or their staffs, in any capacity involving their official or prescribed duties, requests for briefs of amicus curiae, or legal advice;

2. Pending investigations which may involve either the NAIC or any member in any capacity;

3. Specific companies, entities or individuals, including, but not limited to, collaborative financial and market conduct examinations and analysis;

4. Internal or administrative matters of the NAIC or any NAIC member, including budget, personnel and contractual matters, and including consideration of internal administration of the NAIC, including, but not limited to, by the Internal Administration (EX1) Subcommittee or any subgroup appointed thereunder;

5. Voting on the election of officers of the NAIC;

6. Consultations with NAIC staff members related to NAIC technical guidance, including, but not limited to, Annual and Quarterly Statement Blanks and Instructions, the Accounting Practices and Procedures Manual, and similar materials;

7. Consideration of individual state insurance department’s compliance with NAIC financial regulation standards by the Financial Regulation Standards and Accreditation (F) Committee or any subgroup appointed thereunder;

8. Consideration of strategic planning issues relating to federal legislative and regulatory matters or international regulatory matters; or

9. Any other subject required to be kept confidential under any Memorandum of Understanding or other agreement, state or federal law or under any judicial or administrative order.

Because not all situations requiring a regulator to regulator discussion can be anticipated at the time a meeting is scheduled, a meeting convened in open session can move into regulator to regulator session on motion by the chair or other member approved by a majority of the members present. Public notice will be provided of all applicable meetings. The reason for holding a meeting in regulator only session will be announced when the meeting notice is published, at the beginning of any regulator only session, and when an open meeting goes into regulator only session.

This revised policy statement shall take effect upon adoption by the membership.

[NOTE: (Effective Jan. 1, 1996, conference call meetings are included in the application of the policy statement, by action of the NAIC on June 4, 1995). This policy statement was originally adopted by the NAIC membership during the 1994 Fall National Meeting in Minneapolis, Minnesota, Sept. 18–20, 1994.]

</table>

1. Sept. 23, 1886: John K. Tarbox (MA) was elected President for the 1887 Convention; Samuel H. Cross (RI) was elected Vice-President; and Robert B. Brinkerhoff (Ohio chief clerk) was elected Secretary. Commissioner Tarbox died May 28, 1887. Auditor Cross was out of office effective June 1, 1887. Mr. Brinkerhoff was out of office effective June 3, 1887. Oliver Pillsbury (NH) was chosen to preside over the 1887 Convention. It is unknown who act as Vice-President. Jacob A. McEwen (Ohio chief clerk) was chosen to act as Secretary.

2. Aug. 21, 1890: Charles B. Allan (Nebraska deputy auditor) was elected Secretary for the 1891 Convention; however, he resigned before the Convention assembled. Sept. 30, 1891: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1891 Convention.
3. Sept. 18, 1895: William M. Hahn (OH) was elected President for the 1896 Convention and James R. Waddill (MO) was elected Vice-President; however, Superintendent Hahn was out of office effective June 3, 1886. Sept. 22, 1896: Superintendent Waddill was elected President for the 1896 Convention and Stephen W. Carr (ME) was chosen to act as Vice-President.

4. Sept. 23, 1896: James R. Waddill (MO) was elected President for the 1897 Convention and Stephen W. Carr (ME) was elected Vice-President; however, Mr. Waddill was out of office effective March 1, 1897. Sept. 7, 1897: Commissioner Carr was elected President for the 1897 Convention. It is unknown who acted as Vice-President.

5. Sept. 23, 1896: Frederick L. ‘Fred’ Cutting (MA) was elected Secretary for the 1897 Convention; however, he was out of office at the date of the Convention. Sept. 7, 1897: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1897 Convention.

6. Sept. 7, 1897: Frederick L. ‘Fred’ Cutting (MA) was elected Secretary for the 1898 Convention; however, he declined the offer. Sept. 13, 1898: John J. Brinkerhoff (Illinois actuary) was elected Secretary for the 1898 Convention.

7. Sept. 15, 1898: Elmer H. Dearth (MN) was elected President for the 1899 Convention; however, he was out of office at the date of the Convention. Sept. 5, 1899: Edward T. Orear (MO) was elected President for the 1899 Convention.

8. Sept. 20, 1900: John A. O’Shaughnessy (MN) was elected President for the 1901 Convention; however, he was out of office at the date of the Convention. September 1901: William H. Hart (IN) was elected President for the 1901 Convention.

9. Sept. 29, 1910: Theodore H. Macdonald (CT) was elected President for the 1911 Convention; however, he was out of office at the date of the Convention. It is unknown who acted as Vice-President.

10. Aug. 25, 1911: Harry R. Cunningham (MT) was elected Secretary for the 1912 Convention; however, he resigned before the Convention assembled. March 1912: Fitz Hugh McMaster (SC) was elected Secretary for the 1912 Convention.

11. Aug. 1, 1913: Willard Done (UT) was elected First Vice-President for the 1914 Convention; however, he resigned before the Convention assembled. It is unknown who acted as First Vice-President.

12. Aug. 31, 1917: Emory H. English (IA) was elected President for the 1918 Convention; Robert J. Merrill (NH) was elected First Vice-President; and Michael J. Cleary (WI) was elected Second Vice-President. November 1917: Mr. Merrill resigned as First Vice-President. Dec. 6, 1917: Mr. Cleary was elected First Vice-President for the 1918 Convention and Walter K. Chorn (MO) was elected Second Vice-President. Jan. 1, 1918: Mr. English resigned as President and Mr. Cleary was elected President for the 1918 Convention by the Executive (EX) Committee. It is unknown who acted as First Vice-President.

13. Aug. 31, 1917: Fitz Hugh McMaster (SC) was elected Secretary for the 1918 Convention; however, he resigned before the Convention assembled. Dec. 6, 1917: Joseph L. Bunting (VA) was elected Secretary for the 1918 Convention.

14. Sept. 12, 1919: John B. Sanborn (MN) was elected Second Vice-President for the 1920 Convention; however, he resigned before the Convention assembled. June 1920: Alfred L. Harty (MO) was chosen to act as Second Vice-President for the 1920 Convention.

15. Sept. 3, 1920: Frank H. Ellsworth (MI) was elected President for the 1921 Convention; Alfred L. Harty (MO) was elected First Vice-President; and Thomas B. Donaldson (PA) was elected Second Vice-President. Commissioner Ellsworth resigned effective April 30, 1921, as NAIC President and Michigan Insurance Commissioner. June 27, 1921: Superintendent Harty was elected President for the 1921 Convention by the Executive (EX) Committee; Commissioner Donaldson was elected First Vice-President; and Platt Whitman (WI) was elected Second Vice-President.

16. Sept. 8, 1922: Platt Whitman (WI) was elected President for the 1923 Convention; Herbert O. Fishback (WA) was elected First Vice-President; and John C. Luning (FL) was elected Second Vice-President. July 1, 1923: Commissioner Whitman resigned as President; Commissioner Fishback was elected President for the 1923 Convention by the Executive (EX) Committee; and Mr. Luning was elected First Vice-President by the Executive (EX) Committee. It is unknown who acted as Second Vice-President.
17. Sept. 18, 1925: William R. C. Kendrick (IA) was elected President for the 1926 Convention. January 1926: Commissioner Kendrick resigned as NAIC President and Harry L. Conn (OH) was elected President for the 1926 Convention. Commissioner Kendrick remained as Iowa Insurance Commissioner until March 1, 1926.

18. Nov. 19, 1926: Harry L. Conn (OH) was elected President for the 1927 Convention and Albert S. Caldwell (TN) was elected First Vice-President. April 15, 1927: Superintendent Conn resigned as NAIC President and Ohio Insurance Superintendent. May 3, 1927: Commissioner Caldwell was elected President for the 1927 Convention and James A. Beha (NY) was elected First Vice-President.

19. Sept. 26, 1928: Charles R. Detrick (CA) was elected President for the 1929 Convention; James A. Beha (NY) was elected First Vice-President; and Howard P. Dunham (CT) was elected Second Vice-President. Jan. 1, 1929: Superintendent Beha resigned as NAIC First Vice-President and New York Insurance Superintendent. Commissioner Dunham was elected First Vice-President for the 1929 Convention. April 24, 1929: Commissioner Detrick resigned as NAIC President and California Insurance Commissioner. Commissioner Dunham was elected President for the 1929 Convention; Clarence C. Wysong (IN) was elected First Vice-President; and Jess G. Read (OK) was elected Second Vice-President.

20. Sept. 19, 1929: Joseph L. Button (VA) was elected Secretary for the 1930 Convention; however, he resigned effective Oct. 15, 1929, as NAIC Secretary and Virginia Commissioner of Insurance and Banking. Dec. 10, 1929: Albert S. Caldwell (TN) was elected Secretary for the 1930 Convention.

21. Sept. 9, 1930: Clarence C. Wysong (IN) was elected President for the 1931 Convention; Jess G. Read (OK) was elected First Vice-President; and Clare A. Lee (OR) was elected Second Vice-President. January 1931: Commissioner Wysong resigned effective Jan. 1, 1931, as NAIC President and Indiana Insurance Commissioner; Commissioner Lee was no longer serving as Second Vice-President; and Commissioner Read was elected President by the Executive (EX) Committee for the 1931 Convention. June 17, 1931: Charles D. Livingston (MI) was elected First Vice-President by the Executive (EX) Committee for the 1931 Convention and William A. Tarver (TX) was elected Second Vice-President by the Executive (EX) Committee.

22. Oct. 20, 1932: William A. Tarver (TX) was elected President for the 1933 Convention; Garfield W. Brown (MN) was elected First Vice-President; and Daniel C. ‘Dan’ Boney (NC) was elected Second Vice-President. Commissioner Tarver resigned effective Feb. 10, 1933, as NAIC President and Texas Life Insurance Commissioner. Commissioner Brown was elected President for the 1933 Convention; Commissioner Boney was chosen to act as First Vice-President and George S. Van Schaick (NY) was chosen to act as Second Vice-President.

23. July 1935: It is unclear why no one acted as First Vice-President or Second Vice-President for the 1935 Convention.

24. June 23, 1939: J. Balch Moor (DC) was elected Vice-President; however, he died July 22, 1939, before the 1940 Convention assembled. John C. Blackall (CT) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

25. June 6, 1945: Edward L. Scheufler (MO) was elected Vice-President for the 1946 Convention; however, he resigned effective Oct. 15, 1945, as NAIC Vice-President and Missouri Insurance Superintendent. Dec. 3, 1945: Robert E. Dineen (NY) was elected Vice-President by the Executive (EX) Committee for the 1946 Convention.

26. June 11, 1946: Jess G. Read (OK) was elected Secretary for the 1947 Convention; however, he died July 20, 1946. Sept. 4, 1946: Nellis P. Parkinson (IL) was elected Secretary by the Executive (EX) Committee to fill the unexpired term.

27. June 1953: George B. Butler (TX) was elected Vice-President; however, he died Sept. 28, 1953. It is unknown who acted as Vice-President for the November 1953 Convention. Nov. 30, 1953: Donald Knowlton (NH) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

28. May 1956: George A. Bowles (VA) was elected Secretary; however, he died June 1, 1956. Paul A. Hammel (NV) was elected Secretary to fill the unexpired term.

29. June 1958: Arch E. Northington (TN) was elected President; however, he resigned effective Dec. 23, 1958, as NAIC President and Tennessee Insurance Commissioner. January 1959: Paul A. Hammel (NV) was elected President and Sam N. Beery (CO) was elected Vice-President by the Executive (EX) Committee to fill the unexpired term.

30. June 1962: Joseph S. Gerber (IL) was elected Vice-President; however, he resigned effective Jan. 29, 1963, as NAIC Vice-President and Illinois Insurance Director. The office of Vice-President was vacant for the June 1963 Convention.
31. June 1968: Charles R. Howell (NJ) was elected President; however, he resigned effective Feb. 28, 1969, as NAIC President and New Jersey Commissioner of Banking and Insurance. Ned Price (TX) was elected by the Executive (EX) Committee to fill the unexpired term.

33. A constitutional amendment moved NAIC officer elections from June to December (commencing December 1974), President Johnnie L. Caldwell (GA) served a six-month term.

34. Kenneth E. ‘Ken’ DeShetler (OH) was elected President; however, he resigned effective Jan. 13, 1975, as NAIC President and Ohio Insurance Director. William H. Huff, III (IA) was elected by the Executive (EX) Committee to fill the unexpired term.

35. H. Peter ‘Pete’ Hudson (IN) was elected President; however, he resigned as NAIC President and Indiana Insurance Commissioner effective Nov. 15, 1979. It is unknown who presided over the December 1979 Convention.

36. John W. Lindsay resigned effective Sept. 3, 1981, as NAIC Vice-President and South Carolina Insurance Commissioner. Johnnie L. Caldwell (GA) was elected by the Executive (EX) Committee to fill the unexpired term.

37. David J. Lyons resigned effective June 17, 1994, as NAIC Vice President but remained as Iowa Insurance Commissioner until July 31, 1994. A special interim Plenary election was held June 12, 1994: Arkansas Insurance Commissioner Lee Douglass was elected Vice President to serve June 17, 1994, to Dec. 31, 1994.

38. September 2001: NAIC members unanimously agreed that the 2001 Fall National Meeting should be canceled in the wake of the tragic events that occurred Sept. 11, 2001. The meeting had been scheduled for Sept. 22–25, 2001, at the Marriott and Westin Copley Place hotels in Boston, Massachusetts.

39. Ernst N. ‘Ernie’ Csiszar resigned effective Aug. 18, 2004, as NAIC President and South Carolina Director of Insurance. Approximately two weeks later, James A. ‘Jim’ Poolman resigned as NAIC Vice President but remained as North Dakota Insurance Commissioner. A special interim Plenary election was held Sept. 13, 2004, during the Fall National Meeting in Anchorage, Alaska: Pennsylvania Insurance Commissioner M. Diane Koken was elected President; Oregon Insurance Administrator Joel S. Ario was elected Vice President; and Maine Insurance Superintendent Alessandro A. ‘Al’ Iuppa was elected Secretary-Treasurer to serve from Sept. 13, 2004, to Dec. 31, 2004.

40. December 2004: NAIC members voted at its 2004 Winter National Meeting to adopt amendments to the NAIC Bylaws, which included the creation of a President-Elect position as an NAIC officer.

41. September 2005: NAIC members agreed to cancel the 2005 Fall National Meeting due to the devastation caused by Hurricane Katrina on Aug. 29, 2005. The meeting had been scheduled for Sept. 10–13, 2005, at the Sheraton hotel in New Orleans, Louisiana.

42. Eric P. Serna resigned effective June 14, 2006, as NAIC Secretary-Treasurer and New Mexico Superintendent of Insurance. A special Plenary interim election was held during the 2006 Summer National Meeting: New Hampshire Insurance Commissioner Roger A. Sevigny was elected Secretary-Treasurer to serve from June 14, 2006, to Dec. 31, 2006.

43. Michael T. McRaith resigned effective May 31, 2011, as NAIC Secretary-Treasurer and Illinois Director of Insurance. A special Plenary interim election was held via conference call May 16, 2011: North Dakota Insurance Commissioner Adam Hamm was elected Secretary-Treasurer to serve from May 31, 2011, to Dec. 31, 2011.

45. Michael F. ‘Mike’ Consedine resigned effective Jan. 20, 2015, as NAIC President-Elect and Pennsylvania Insurance Commissioner. A special Plenary interim election was held via conference call Feb. 8, 2015: Missouri Insurance Director John M. Huff was elected President-Elect to serve from Feb. 8, 2015, to Dec. 31, 2015.
46. Sharon P. Clark resigned effective Jan. 11, 2016, as NAIC President-Elect and Kentucky Insurance Commissioner. A special Plenary interim election was held in Bonita Springs, Florida, on Feb. 7, 2016: Wisconsin Insurance Commissioner Theodore K. ‘Ted’ Nickel was elected President-Elect; Tennessee Insurance Commissioner Julie Mix McPeak was elected Vice President; and Maine Insurance Superintendent Eric A. Cioppa was elected Secretary-Treasurer to serve from Feb. 7, 2016, to Dec. 31, 2017.

47. David C. Mattax, NAIC Secretary-Treasurer and Texas Insurance Commissioner, died in office April 13, 2017. A special Plenary interim election was held via conference call on May 12, 2017: South Carolina Insurance Director Raymond G. Farmer was elected Secretary-Treasurer to serve from May 12, 2017, to Dec. 31, 2017.

48. Gordon I. Ito resigned effective Dec. 31, 2018, as NAIC Vice President and Hawaii Insurance Commissioner. A special Plenary interim election was held in La Quinta, California, on Feb. 4, 2019: Florida Insurance Commissioner David Altmaier was elected Vice President to serve from Feb. 4, 2019, to Dec. 31, 2019.

49. March 11, 2020: Due to concerns about the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Spring National Meeting in a virtual format. However, on March 23, 2020, the NAIC officers decided to suspend holding any further sessions of the virtual Spring National Meeting to allow NAIC members and staff more time to focus on the health emergency. The meeting had been scheduled for March 21–24, 2020, at the Phoenix Convention Center and the Sheraton Grand and Hyatt Regency hotels in Phoenix, Arizona.

50. June 10, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Summer National Meeting in a virtual format. The meeting had been scheduled for Aug. 8–11, 2020, at the Minneapolis Convention Center and the Hilton and Hyatt Regency hotels in Minneapolis, Minnesota.

51. Sept. 21, 2020: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2020 Fall National Meeting in a virtual format. The meeting had been scheduled for Nov. 14–17, 2020, at the JW Marriott hotel in Indianapolis, Indiana.

52. Feb. 24, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Spring National Meeting in a virtual format. The meeting had been scheduled for April 10–13, 2021, at the Gaylord Texan Hotel and Convention Center in Grapevine, Texas.

53. June 1, 2021: Given the ongoing health challenges associated with holding large in-person meetings in the midst of the COVID-19 pandemic, the NAIC officers—in consultation with the NAIC membership—decided to hold the 2021 Summer National Meeting in a hybrid format. In-person meetings took place for NAIC members and interested parties as capacity allowed. Meetings were live-streamed for participants who attended virtually.

Updated: 8/13/2021
NAIC MODEL LAWS, REGULATIONS AND GUIDELINES

The following is a listing of NAIC model laws, regulations, and guidelines referenced in the Proceedings of the 2021 Summer National Meeting.

Annual Financial Reporting Model Regulation (#205)
10-390, 10-558

CALL TO ORDER

The 232nd session of the National Association of Insurance Commissioners (NAIC) will now come to order. Good morning, my name is David Altmaier, I’m Florida’s Commissioner and President of the NAIC. I am honored to open the NAIC Summer National Meeting.

INTRODUCTION OF HEAD TABLE

To start us off, I’d like to introduce the members of our head table.

Honorable Judith L. French, Meeting Host and Ohio Insurance Director
Honorable James J. Donelon, NAIC Past President and Louisiana Insurance Commissioner
Honorable Eric A. Cioppa, NAIC Past President and Maine Insurance Superintendent
Honorable Raymond G. Farmer, NAIC Most Recent Past President and South Carolina Insurance Director
Honorable Dean L. Cameron, NAIC President-Elect and Idaho Insurance Director
Honorable Chlora Lindley-Myers, NAIC Vice President and Missouri Insurance Commissioner
Honorable Andrew N. Mais, NAIC Secretary-Treasurer and Connecticut Insurance Commissioner
Andrew J. Beal, NAIC Chief Operating Officer (COO) and Chief Legal Officer (CLO)
Michael F. Consedine, NAIC Chief Executive Officer (CEO)

Please welcome the members of our NAIC Summer National Meeting head table.

New Member Video

Now, I would also like to recognize our newest members in this short video. [New Member Video Plays.]

Introduction of Ohio Commissioner

It is my pleasure to introduce the Director of the Ohio Department of Insurance (DOI), Judith L. French.

Director French was appointed by Governor Mike DeWine in February of this year. Prior to becoming the Director of Insurance, she served as a justice of the Ohio Supreme Court, the tenth woman to serve in that role in Ohio’s history. Director French, welcome and thank you for serving as our host.

Ohio Director of Insurance Speech

Thank you, President Altmaier, for the introduction and your leadership during these challenging times.

Good afternoon and welcome to the 2021 NAIC Summer National Meeting. For those who were in Austin, TX in December 2019, who could have imagined that the journey back together would be so long and tumultuous, but here we are, back together again! The NAIC last held a national meeting in Ohio in 1992. Twenty-nine years ago! It’s long overdue, and it’s great to have all of you here. I appreciate every effort you made to join us.

As one of the newer commissioners in the NAIC ranks, I would be remiss if I didn’t thank my predecessor at the Ohio DOI for making this possible. During the meeting in Denver in 2017, then-Commissioner Jillian Froment (OH), who I know many of you worked with over the last decade, successfully made the pitch to bring a national meeting to Columbus, OH, and a lot of work has gone into getting us here. Thank you to everyone who worked tirelessly to make this meeting possible.

I know your time here will be brief, but I hope you get a chance to enjoy a little of what Columbus and Ohio have to offer. Growing up in Ohio, I often heard the term “rust belt,” and it still makes me cringe. As you move around the city, you will see signs of recovery in downtown Columbus, but you’re not going to see much rust. Ohio, and Columbus in particular, is on the
rise, and our insurance industry is a significant part of our growth and strength. More than 100,000 Ohioans work in the insurance industry, and just like those in your home states, we are grateful for them.

I have traveled across the Buckeye state many times, and I often marvel at the common threads that hold all Ohioans together. Oh, we have our differences—the accents, the traditions, and the team colors we wear. Cincinnati, Cleveland, and Columbus (not to mention Toledo, Youngstown, and Athens) are all very different places, but the pride and determination of their people is an unwavering constant.

We are a collaborative state, one with generations of problem solvers, innovators, and leaders. We are proud of what we do and work hard doing it. We take great pride in our aviation history, being home to the Wright brothers, John Glenn, and Neil Armstrong. But we are also home to Thomas Edison, eight U.S. Presidents, Jack Nicklaus, Jesse Owens, Steven Spielberg, Annie Oakley, Halle Berry, and too many more Ohioans to name.

These American icons rose to legendary heights because they chose to work together to solve problems, think outside the box, and face challenges head-on, and that is precisely what we do at the NAIC.

In my brief time serving as commissioner, it’s clear how hard this group works to tackle important issues facing consumers and the market, and that’s what I want to emphasize today. Sure, we have our differences, and our states are not all the same. We have different political views and often different approaches to solving the same problem. But it’s our collective focus on the consumers we serve and the industry that protects those consumers that leads to the best outcomes.

None of us could have imagined the events that unfolded during the past 17 months, but together we worked to provide stability in the market as the world shut down; and we did it without sacrificing essential consumer protections—the protections that are there for families in moments of tremendous loss and need.

I don’t know if many young children consider their future and think, I want to be an insurance executive, but what a surprise when they realize they can touch every human life in ways that are supportive, meaningful, and uplifting, just by working in the insurance industry.

Neil Armstrong once observed, “we all like to be recognized not for one piece of fireworks, but for the ledger of our daily work.” For you, that ledger may include a decision about how to provide long-term care (LTC) at a reasonable cost for thousands of individuals in your state, the launch of a new product that will change the face of insurance for decades to come, or the implementation of a new and innovative work plan that keeps your employees safe and the public served. Whatever it is, I can assure you that you are making a difference by working in this important industry, and your work matters.

It’s my honor to be one of you and my honor to serve as your host. I look forward to our collaborative conversations over the next few days. Bonus points if you can work in a reference to Archie Griffin. Thanks, everyone. Enjoy Columbus.

PRESIDENTIAL ADDRESS

David Altmaier, NAIC President

Thank you for your comments, Director French, and thank you again for being such a gracious host. We are looking forward to our time here in Ohio.

Welcome to the NAIC’s 232nd national meeting in our 150-year history. I have missed the live exchange at our national meetings, and I am happy to be together once more. Our strong working relationships have without a doubt helped us navigate the last 19 months, and I am excited to have the opportunity to meet face-to-face with those of you who were able to join us here in Columbus, OH, and I look forward to hearing the comments of those who are attending virtually.

The hybrid approach to this national meeting is a testament to the innovation and adaptability of our states, territories, and the NAIC. It feels good to have this opportunity to meet face-to-face and be back to this new version of normal, and we are indebted to the efforts of so many to get to this point.

Throughout our history, the commissioners and the NAIC have come together to find solutions to the many challenges facing the insurance industry and the world. The organization has weathered two world wars, financial crises, countless natural disasters, pandemics, and ever-changing laws over the past 150 years. Each of these challenges has provided us with valuable lessons and caused us to rethink our old ways of doing things, which in turn has made the NAIC stronger and more resilient.
COVID-19

The COVID-19 pandemic is only the most recent example of state insurance regulators coming together to tackle big, unanticipated issues.

The pandemic has created a host of new challenges for our regulatory system. As a result, the NAIC continues to test and implement new processes and technologies to better focus our efforts on supporting our members in their mission to protect consumers and maintain strong insurance markets.

To ensure the insurance sector could provide the critical services consumers needed throughout the pandemic, many states expanded the use of virtual platforms to provide health care, offered flexible work arrangements, and enabled agents to be licensed online.

The pandemic challenged insurer’s business models, processes, and practices. Insurance companies automated processes to speed up the delivery of services. Auto insurers reviewed the impact of decreased driving on rating models and how COVID-19 could affect underwriting and rate considerations going forward.

These are just some of the highlights of the COVID-19-related issues NAIC members are examining. We are looking at the lessons we have learned so far, the benefits to consumers, and the potential unintended consequences to determine what modifications to existing laws and practices should be considered. NAIC members are committed to ensuring that consumers remain protected as we transition to whatever comes next.

The COVID-19 vaccine has been a gamechanger; however, we are also aware that the pandemic and its impact on the insurance sector continues to evolve. We remain vigilant and steadfast in our work with federal agencies to ensure access to testing, treatment, and vaccinations, along with our commitment to combat misinformation surrounding insurance coverage.

The U.S. industry demonstrated its strong solvency position and overall resilience through its positive operating performance for 2020, and they are poised to continue building even stronger solvency positions in 2021. The sector’s strength is due, in part, to the strong solvency and governance requirements that we instituted following the last financial crisis.

Your state insurance regulators and the NAIC remain committed to ensuring that insurance companies can meet consumer demands and cover their obligations, and insurance agents have the knowledge and integrity to adequately advise consumers about coverages and policies.

The pandemic highlighted both business insurance coverage gaps and the improper marketing of health insurance. The NAIC continues to work with the U.S. Congress (Congress) to provide information and insights around business interruption insurance, promote resilience and mitigation, foster stable and competitive insurance markets, and ensure fair treatment of policyholders.

The Antifraud (D) Task Force and the Improper Marketing of Health Insurance (D) Working Group combined forces to coordinate with state insurance regulators on a state and federal level to provide guidance and monitoring of the inappropriate marketing of health plans.

Cybersecurity

Cybersecurity is one of the most important topics for the insurance sector and businesses today. It is paramount that insurers and insurance producers find ways to protect the highly sensitive consumer financial and health information collected as part of the underwriting and claims processes. For the last four years, state insurance regulators have been committed to finding ways to tackle this growing risk.

Director Farmer serves on the U.S. Department of the Treasury's (Treasury Department’s) Financial Banking and Information Infrastructure Committee (FBIIC), where he represents state commissioners in working with federal regulators to address cyber threats in the U.S.

NAIC membership adopted several Cybersecurity Working Group recommendations and the Insurance Data Security Model Law (#668), which requires insurers and other entities licensed by state insurance departments to develop, implement, and maintain an information security program; investigate any cybersecurity events; and notify the state insurance commissioner of such events. Model #668 has been adopted by 18 states, with several other states adopting similar laws.
The NAIC membership also adopted a Cybersecurity Insurance and Identity Theft Coverage Supplement for the property/casualty (P/C) annual financial statement to collect information about cybersecurity insurance markets.

I would strongly encourage states that have not passed the models to consider doing so. It is not hard to envision scenarios where, for example, several large P/C carriers are subject to a ransomware attack following a large natural disaster, disabling their ability to pay claims. This type of scenario poses not just an existential threat to the solvency of those companies and our state-based insurance system, but to the industry as a whole. This is a threat that we cannot ignore.

**Consumer Data Privacy**

Beyond cyber breaches, regulatory concerns about the use of consumer data by a variety of commercial, financial, and technology companies remain a priority for the NAIC. State insurance regulators encourage innovation but continue to scrutinize the underwriting, pricing and claims algorithms, and risk models associated with smart tools to ensure policyholders are being treated fairly and information is sufficiently protected.

The NAIC developed and adopted artificial intelligence (AI) principles last year. We utilize those principles to evaluate the use of consumer data in innovative technologies feeding into algorithms and models involving AI and machine learning (ML).

The NAIC’s Innovation and Technology (EX) Task Force continues to provide forums and resource materials around new developments within the insurance sector. The Task Force and the AI principles offer guardrails around how these advances could affect consumer protection, privacy, insurer oversight, marketplace dynamics, and the state-based insurance regulatory framework.

Given the critical importance of these technology-related issues and their impact on insurance markets and consumers, we are taking the significant step of creating a new standing committee focused on innovation, AI, and cybersecurity by the end of this year. This will be the first new letter committee—the “H” Committee—formed by NAIC members in a couple of decades. The new committee will help us better address a wide range of evolving and challenging issues in these important areas.

The new committee will be charged with monitoring developments and coordinating the NAIC’s work in the areas of innovation, AI, and cybersecurity that are affecting the insurance sector. The new committee will also develop regulatory models and guidance, as appropriate, to ensure our state-based system continues to keep pace with the rapidly evolving insurance sector.

There will be additional discussion about the formation of this new committee during the Task Force meeting, and we look forward to engaging stakeholders as the process moves forward.

**Diversity, Equity, & Inclusion/Race and Insurance**

As part of our ongoing commitment to ensure historically under-represented groups are not adversely affected within the insurance industry, we more clearly articulated the charges of the Special (EX) Committee on Race and Insurance and added new charges to existing committees.

The charges outline our commitment to take meaningful action in the months and years to come to ensure all consumers are treated fairly and equitably when it comes to both accessibility and affordability of insurance products. This is not a new mission for us. Since the 1960s, the NAIC and state insurance regulators have worked to fight overt and proxy discrimination, be it discriminatory underwriting and rating criteria or redlining. As insurers increase their use of data, modeling, and other tools we must ensure unfair discrimination is not imbedded in these new business approaches. Similarly, we are committed to working with our state and federal legislative partners to advocate for greater accessibility to the insurance marketplace for people of color and other underrepresented groups.

Last year, when we launched the Special Committee, we committed to a diverse, inclusive, and member-led discussion on how to enhance consumer protections on race and insurance; looking inward and outward; and focused on outcomes. Our charges and the work we have done thus far provides us a course to follow. As we have said many times before, we will not fix these problems in a year, but we are committed to the journey no matter how long it takes.

Our long history has shown us that one of the greatest strengths of our state-based system is to adapt when confronted with fundamental challenges. We know additional progress is needed and we invite all stakeholders, industry, consumers, state legislators, federal government, and others to work with us to deliver on this commitment to consumers.
Long-Term Care Insurance

State insurance regulators continue to grapple with long-term care insurance (LTCI). This includes issues surrounding a shrinking market, the threat of insolvencies, and the impact of large rate increases on our most vulnerable residents.

Significant work has been completed to design a Long-Term Care Insurance Multi-State Actuarial Rate Review Framework (MSA Framework) to address rate increase requests from insurers, but much more work is in store. This approach is designed to result in more actuarially appropriate increases being granted by affected states in a timely manner and improve future rate parity across the states for all policyholders.

A detailed framework, documenting the operating features and actuarial considerations of the MSA process is currently available for public review and feedback. Our Long-Term Care Insurance (EX) Task Force, led by Commissioner Scott A. White (VA) and Commissioner Mike Conway (CO), is monitoring the progress on this work and has the challenging task of balancing the financial aspects of the coverages and promises made to policyholders. This work will likely spill over into next year as the committee works through technical and operational aspects of the process, but I am pleased with its progress to date.

In addition to our efforts to help stabilize rate increases, we are also focused on the appropriateness of reduced benefit options (RBOs) provided by insurers, further examination of the adequacy of policy and claim reserves of LTC writers, facilitating innovative ideas in LTC, and engaging with the Treasury Department Federal Interagency Task Force on Long-Term Care Insurance matters.

Climate Risk and Resiliency

We continue to face increasingly severe weather patterns across much of the U.S., with catastrophic losses in many markets. The NAIC and state insurance regulators continue to work with counterparts both domestically and internationally on the critical work of addressing climate and resiliency issues facing insurance consumers and insurance markets.

The Climate Disclosure Workstream of the Climate and Resiliency (EX) Task Force allowed states to report on the Task Force on Climate-Related Financial Disclosures (TCFD) or the Climate Risk Exposure Survey, more than doubling the number of jurisdictions participating in its survey. This year, Delaware; Maine; Maryland; Massachusetts; Oregon; Pennsylvania; Rhode Island; Vermont; and Washington, DC were added to the list of those participating in the survey, increasing the percentage of the market represented from 70% to 78%.

The NAIC and its Center for Insurance Policy and Research (CIPR) maintains a central web-based repository for agencies, academics, and other interested parties studying risks, resiliency building codes, and the impact on insurance on naic.org. The CIPR also has coordinated risk and resiliency assessments, disclosures, and workshops with the Federal Emergency Management Agency (FEMA) and the Insurance Institute for Business & Home Safety (IBHS) to help ensure the states have the information necessary to foster stable insurance markets for its citizens.

On a related note, I would also like to highlight the CIPR special session on Tuesday morning from 8:30 – 10:30 a.m., entitled “Casualty Catastrophe Risk in the Time of Social Inflation: Landscape, Modeling, and Action.” This session will explore the casualty catastrophe emerging risk landscape, tools available to understand it, and actions industry and state insurance regulators can take to address these risks.

The NAIC’s Communications department developed tools, educational material, and social media messaging to educate consumers about their risks, coverage options, and mitigation techniques associated with severe weather.

At the national level, we remain committed to engaging with FEMA and other federal partners on climate risk issues, advocating for state mitigation grant tax parity, advocating for the reauthorization of the National Flood Insurance Program (NFIP), and increasing the private flood market.

International

While my remarks so far have focused mainly on domestic priorities and activities, these same issues are increasingly the focus of international work. Supervisors from around the globe came together to share experiences and help one another in the face of COVID-19. This renewed spirit of collaboration carries forward as we look at challenges, risks, and opportunities from issues like climate; diversity, equity, & inclusion (DE&I); innovation and data; and cybersecurity. As organizations like the
International Association of Insurance Supervisors (IAIS), the Sustainable Insurance Forum (SIF), the Organisation for Economic Co-Operation and Development (OECD), and the Financial Stability Board (FSB) address these issues, we will continue to and learn from international efforts.

As we welcome this pivot to address emerging issues, we also remain committed to the implementation of reforms, such as the IAIS’s holistic framework for systemic risk and the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame). We appreciate the ongoing contributions to these workstreams from both of our relevant group-wide supervisors and insurance groups, which is important as work progresses on the process to assess the comparability of the Aggregation Method to the insurance capital standard (ICS).

While our passports may have gone unused during the pandemic, we have found virtual ways to foster the relationships and exchanges with our international counterparts. We continue to hold virtual bilateral meetings with key jurisdictions.

After having to cancel our 2020 International Forum, we were pleased to hold this year’s forum virtually, which focused on a variety of important topics in October. We look forward to hosting the event in person in Washington, DC in 2022.

We have also been pleased with the level of participation in our virtual International Fellows program. In fact, starting in 2022, the Spring session will be virtual to continue broader availability, and the Fall session will be the traditional six-week in-person session to continue an in-depth experience and exchange of ideas.

**State Ahead**

In addition to focusing on the big issue facing the insurance industry, the NAIC continues its efforts to enhance the products and services we offer to state insurance regulators and the industry.

Implementation of State Ahead, the NAIC’s strategic blueprint for the future, continues on pace. Some highlights of this initiative include enhanced tools for state insurance departments, improved modeling resources, and cloud migration. In the fall, the membership will work together to forecast what the insurance sector may look like several years into the future and start to build our State Ahead 2.0 plan.

The State Ahead plan brings together the tools, talent, and technology needed to help state insurance regulators ensure the U.S.’s preeminence as the largest single insurance market, not just for today, but for the generations of state insurance regulators to follow.

Today’s top priorities may be COVID-19, natural catastrophe and climate risks, DE&I, the impact of AI and big data, ensuring consumer data privacy, and addressing issues in the LTC market; but rest assured, our 100 or so committees, task forces, and subgroups are actively engaged in ensuring the many insurance issues facing consumers and the industry are being reviewed and properly addressed.

If our 150-year history has taught us anything, it is that we must keep our eyes on both today’s risks and the emerging risks of tomorrow. Although we do not know exactly what the future will hold, our experience has shown us we are well-suited to successfully handle anything that comes our way.

While none of us knows what the future holds, we are committed to asking the necessary and tough questions. It’s our responsibility to future generations to ensure we take a long view on issues. I’m proud of the resilience we have all displayed during the past several months. Our thoughts, decisions, and actions will provide valuable insight for those we represent now and for those who will follow in our footsteps.

Over the next several days, we will have an opportunity to hear from you. We look forward to the unique perspective each one of you bring, as we know the best decisions come when we look at issues from as many different angles as possible.

We appreciate your participation and insights. I encourage you to engage as much as possible in the coming days. And I look forward to working and connecting with each of you.

**ADJOURNMENT**

I officially conclude this opening session of the 232nd meeting of the NAIC.

David Altmaier, NAIC President

Synopsis of the NAIC Committee, Subcommittee and Task Force Meetings
2021 Summer National Meeting
August 14–17, 2021

TO: Members of the NAIC and Interested Parties
FROM: The Staff of the NAIC

Committee Action
NAIC staff have reviewed the committee, subcommittee and task force reports and highlighted the actions taken by the committee groups during the 2021 Summer National Meeting. The purpose of this report is to provide NAIC members, state insurance regulators and interested parties with a summary of these meeting reports.

EXECUTIVE (EX) COMMITTEE AND PLENARY (Joint Session)
August 17, 2021
1. Adopted the report of the Executive (EX) Committee. See the Committee listing for details.
2. Adopted by consent the committee, subcommittee and task force minutes of the 2021 Spring National Meeting.
3. Adopted amendments to the 2021 charges.
4. Received the report of the Life Insurance and Annuities (A) Committee. See the Committee listing for details.
5. Received the report of the Health Insurance and Managed Care (B) Committee. See the Committee listing for details.
6. Received the report of the Property and Casualty Insurance (C) Committee. See the Committee listing for details.
7. Received the report of the Market Regulation and Consumer Affairs (D) Committee. See the Committee listing for details.
8. Received the report of the Financial Condition (E) Committee. See the Committee listing for details.
9. Received the report of the Financial Regulation Standards and Accreditation (F) Committee. See the Committee listing for details.
12. Failed to adopt the [State] Pharmacy Benefit Manager Licensure and Regulation Model Act.
15. Adopted amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450).
17. Received a status report on state implementation of NAIC-adopted model laws and regulations.

EXECUTIVE (EX) COMMITTEE
August 15, 2021
1. Adopted the report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee, which met Aug. 13 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings. During this meeting, the Committee and Subcommittee took the following action:
   A. Adopted its July 13, June 29, May 20, and Spring National Meeting minutes, which included the following action:
      i. Received a mid-year financial update and overview of the preliminary 2022 budget.
      ii. Approved the State Based Systems (SBS) Kansas Implementation 2021 Fiscal.
      iii. Approved a commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (RMBS) financial modeling vendor.
      iv. Approved a contribution to the NAIC Defined Benefit Pension Plan portfolio.
v. Approved the Solvency Workpaper Software Modernization Project – Implementation Preparation Phase Fiscal.
vi. Approved the System for Electronic Rate and Form Filing (SERFF) Modernization – Mobilization and Pilot Phase Fiscal.
vii. Approved the SBS State Implementation 2021 Fiscal.
viii. Approved the Property/ Casualty (P/C) Rate Model Review Staffing Resources Fiscal.

B. Adopted the report of the Audit Committee, which met Aug. 10 and took the following action:
i. Received an overview of the June 30 financial statements.
ii. Reconfirmed RSM for the 2021 financial audit.
iii. Received an update on the 2021 Service Organization Control (SOC) 2 for transaction processing in the cloud review.
iv. Received an update on Zone financials and the 2022 budget calendar.
v. Reaffirmed its 2022 proposed charter.

C. Adopted the report of the Internal Administration (EX1) Subcommittee, which met Aug. 13, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During this meeting, the Subcommittee took the following action:
i. Received the June 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports.
iii. Adopted its 2022 proposed charges.

E. Approved the request for an amicus brief in Gunn v. Continental Casualty Co.

2. Adopted the report of the Executive (EX) Committee, which met July 13, June 29, and May 20 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee took the following action:
A. Discussed appointing a new standing “H” committee to focus on innovation, technology, and cybersecurity.
B. Received a mid-year financial update and an overview of the preliminary 2022 budget.
C. Adopted the Audit Committee report, including the 2020/2021 SOC reports.
D. Adopted the Internal Administration (EX1) Subcommittee’s May 13 minutes.
E. Approved a Fiscal for the Solvency Workpaper Software Modernization Project – Implementation Preparation Phase.

3. Adopted the report of the Climate and Resiliency (EX) Task Force. See the Task Force listing for details.
5. Adopted the report of the Innovation and Technology (EX) Task Force. See the Task Force listing for details.
6. Adopted the report of the Long-Term Care Insurance (EX) Task Force. See the Task Force listing for details.
7. Adopted the report of the Special (EX) Committee on Race and Insurance. See the Special Committee listing for details.
8. Received a status report on the NAIC State Ahead strategic plan implementation.
9. Received a status report on model law development efforts for amendments to: the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); the Annuity Disclosure Model Regulation (#245); the Insurance Holding Company System Regulatory Act (#440); the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450); the Life Insurance Disclosure Model Regulation (#580); the Nonadmitted Insurance Model Act (#870); and new models, including the Pet Insurance Model Law and the [State] Pharmacy Benefit Manager Licensure and Regulation Model Act.

10. Heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).

Climate and Resiliency (EX) Task Force
August 15, 2021
1. Adopted its Spring National Meeting minutes.
2. Received updates from its five Workstreams: Pre-Disaster Mitigation; Climate Risk Disclosure; Solvency; Innovation; and Technology.
3. Heard a presentation from the California Department of Insurance (CDI) regarding its Climate Insurance Working Group report, “Protecting Communities, Preserving Nature and Building Resiliency.”
4. Heard a presentation from the Reinsurance Association of America (RAA) regarding its mapping and analysis tool using Federal Emergency Management Agency (FEMA) Natural Risk Index data.
Government Relations (EX) Leadership Council
The Government Relations (EX) Leadership Council did not meet at the Summer National Meeting.

Innovation and Technology (EX) Task Force
August 14, 2021
1. Adopted its Spring National Meeting minutes.
2. Adopted the report of the Big Data and Artificial Intelligence (EX) Working Group, including its July 9 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its March 29 minutes.
   B. Discussed a draft survey to conduct analysis on private passenger automobile (PPA) insurers’ use and governance of big data as used in an artificial intelligence (AI) and machine learning (ML) system. The survey is being conducted under the examination authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin.
3. Adopted the report of the Speed to Market (EX) Working Group, including its June 30 and June 29 minutes. During these meetings, the Working Group took the following action:
   A. Adopted its March 10 minutes.
   B. Received an update from the Interstate Insurance Product Regulation Commission (Compact).
   C. Discussed the results of the Product Requirements Locator (PRL) survey.
   D. Received an update on the System for Electronic Rate and Form Filing (SERFF).
   E. Discussed the annual review of the product coding matrix (PCM) and uniform transmittal document (UTD).
   F. Discussed and considered the suggestions received for updates to the PCM and UTD. Three suggestions were received and discussed. None of the three suggested changes were adopted.
4. Adopted the report of the E-Commerce (EX) Working Group, including its June 30 minutes. During this meeting, the Working Group took the following action:
   A. Discussed the establishment of this newly appointed Working Group.
   B. Discussed its 2021 charges and work plan.
5. Heard an update on NAIC cybersecurity workstreams and priorities.
6. Discussed consumer data ownership issues and potential guidance. The Task Force agreed it would be appropriate to refer this to the Market Regulation and Consumer Affairs (D) Committee to consider giving the Privacy Protections (D) Working Group the charge to address this issue.
7. Heard updates from other NAIC committees and working groups on related activities, including the Special (EX) Committee on Race and Insurance, the Accelerated Underwriting (A) Working Group, the Property and Casualty Insurance (C) Committee, and the Privacy Protections (D) Working Group.
8. Received reports on the NAIC model review process and international initiatives relative to AI and big data.
9. Discussed the appointment of a new standing “H” committee that would take on the current Task Force’s charges and expand to include some cybersecurity issues.

Long-Term Care Insurance (EX) Task Force
August 13, 2021
1. Adopted its July 6 minutes, which included the following action:
   A. Adopted it Spring National Meeting minutes.
   B. Received the report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, which met June 22 and took the following action:
      i. Heard comments from state insurance regulators and interested parties on the operational section of the long-term care insurance (LTCI) multistate actuarial (MSA) rate review framework draft.
   C. Received the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, which met May 4 and took the following action:
      i. Heard presentations on current innovative long-term care (LTC) wellness pilot programs.
      ii. Exposed a draft “Reduced Benefit Options (RBO) Consumer Notices Checklist” for a 30-day public comment period ending July 21.
2. Received the report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup, which met Aug. 13 and took the following action:
   A. Discussed the status of revisions to the operational section of the LTCI MSA rate review framework. The drafting group continues to work through issues identified in the comments received. A second draft is expected to be released for comment in September.
   B. Heard comments on the actuarial section of the LTCI MSA rate review framework. Comments were received from: Vermont; Washington; the American Academy of Actuaries (Academy); joint comments from the American Council of Life Insurers (ACLI) and America’s Health Insurance Plans (AHIP); and Financial Medics LLC. The drafting group will begin work addressing the issues identified in the comments received. A second draft is expected to be exposed for public comment in September.

3. Received the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, which met July 28 and July 22. During these meetings, the Subgroup took the following action:
   A. Began making revisions to the draft “RBO Consumer Notices Checklist” based on comments received during the exposure period.
   B. Exposed a document titled, “Issues Related to LTC Wellness Benefits” for a 45-day public comment period ending Sept. 5.

4. Heard a report on industry trends that could have an impact on the solvency of LTCI companies and factors affecting reserves.

5. Released a public report on the LTCI special data call, which was prepared by the consultant LTCG Actuarial Consulting Group, for informational purposes only.

6. Discussed the LTCI MSA rate review framework timeline and next steps.

**Special (EX) Committee on Race and Insurance**

*August 15, 2021*

1. Adopted its July 21, July 1 and Spring National Meeting minutes, which included the following action:
   A. Adopted its 2021/2022 proposed charges.
   B. Heard comments from interested parties.

2. Received a status report for the following workstreams:
   A. Workstream One: Research/analyze the level of diversity and inclusion within the insurance industry.
   B. Workstream Two: Research/analyze the level of diversity and inclusion within the NAIC and state insurance regulator community.
   C. Workstream Three: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the property/casualty (P/C) line of business.
   D. Workstream Four: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the life insurance and annuities line of business.
   E. Workstream Five: Examine and determine which practices or barriers exist in the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups in the health insurance line of business.

4. Heard a presentation from the Center for Economic Justice (CEJ) on testing for racial bias in insurance.

5. Heard a presentation from the American Council of Life Insurers (ACLI) on its racial equity initiative.

6. Heard a presentation from Root on fairness in auto insurance.

7. Heard a presentation from the American Property Casualty Insurance Association (APCIA) on its efforts related to diversity and inclusion in insurance.

**INTERNAL ADMINISTRATION (EX1) SUBCOMMITTEE**

See the Executive (EX) Committee listing for details.
Information Systems (EX1) Task Force

July 27, 2021 (in lieu of the Summer National Meeting)

1. Adopted its Spring National Meeting minutes.
2. Adopted its 2022 proposed charges, which remain unchanged from 2021.
3. Received an information technology (IT) operational report on the NAIC’s IT activities, including: product highlights; innovation and technology; service and support; data collection metrics; team; project portfolio summary; and technology adoption and system usage. The report provides updates for upcoming improvements, impacts to new state technology offerings from the NAIC, and general updates on the activities of the NAIC technology team.
4. Received a project portfolio update, including project status reports for 23 active technical projects and a summary of a recently completed project.
5. Adjourned into regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE

August 16, 2021

1. Adopted its July 19 minutes, which included the following action:
   A. Adopted its June 30 minutes, which included the following action:
      i. Appointed the Index-Linked Variable Annuity (A) Subgroup.
   B. Adopted its Spring National Meeting Minutes.
   C. Adopted a frequently asked questions (FAQ) guidance document to assist the states as they move forward with adopting the revisions to the Suitability in Annuity Transactions Model Regulation (#275).
2. Adopted the report of the Accelerated Underwriting (A) Working Group, including its July 29 minutes. During this meeting, the Working Group took the following action:
   A. Exposed the July 8 draft of the accelerated underwriting educational report for a 21-day public comment period ending July 30.
3. Adopted the report of the Life Actuarial (A) Task Force. See the Task Force listing for details.
4. Discussed the next steps for the Life Insurance Illustration Issues (A) Working Group. The Committee asked Richard Wicka (WI) to develop a chair report for its review at the Fall National Meeting. The chair report will detail the work of the Working Group and include a summary of comments that have been received and incorporated into the work product over the years. The Committee will review the report and provide guidance to the Working Group on next steps at the Fall National Meeting.
5. Heard an update from Workstream Four of the Special (EX) Committee on Race and Insurance. The Workstream intends to convene regular meetings starting in September to achieve its goals.

Life Actuarial (A) Task Force

August 12, 2021

1. Adopted its July 1, June 24, June 17, June 10, May 27, May 20, May 13, May 6, April 29, and April 22 minutes, which included the following action:
   A. Adopted its Spring National Meeting minutes.
   B. Adopted amendment proposal 2019-33, which clarifies the definition of individually underwritten life insurance and the applicability of principle-based reserving (PBR) requirements for group contracts with individual risk selection issued under insurance certificates.
   C. Adopted amendment proposal 2020-10, which allows the use of a prudent level of mortality improvement beyond the valuation date.
   D. Adopted amendment proposal 2021-03, which updates the reference to required minimum distribution age.
   E. Adopted amendment proposal 2021-05, which changes the term in VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation, from “model investment strategy” to “modeled company investment strategy” and clarifies the comparison to the alternative investment strategy.
   F. Adopted amendment proposal 2021-06, which allows for third-party submission of experience data.
   G. Adopted amendment proposal 2021-07, which clarifies the universal life with secondary guarantees (ULSG) net premium reserve (NPR) calculation requirements.
H. Adopted amendment proposal 2021-09, which updates the materiality language in Section 3.E.1 of VM-31 to be consistent with VM-21, Requirements for Principle-Based Reserves for Variable Annuities.

2. Adopted the report of the Index-Linked Variable Annuity (A) Subgroup, including its July 15 minutes. During this meeting, the Subgroup took the following action:
   A. Discussed preparing a document listing potential options for index-linked variable annuity (ILVA) interim value guidance, along with the pros and cons of each. The goal is then to identify the optimal approach and develop into a recommendation to the Life Actuarial (A) Task Force.

3. Adopted the report of the Longevity Risk (E/A) Subgroup, which has not met since the Spring National Meeting. A drafting group has been formed to contemplate reserve requirements related to pension risk transfer (PRT) and longevity reinsurance (LR) transactions that are more specific to the PRT reserves and are not solely related to the longevity component.

4. Adopted the report of the Guaranteed Issue (GI) Life Valuation (A) Subgroup, which has not met since the Spring National Meeting. The Subgroup may meet prior to the Fall National Meeting depending on availability of its members or their concerns. Otherwise, this Subgroup is in a dormant/monitoring mode given that there have been no new known studies of GI life mortality that could prove useful in formulating a new prescriptive requirement for the reserves for GI Life products.

5. Adopted the report of the Experience Reporting (A) Subgroup, which has not met since the Spring National Meeting. Upcoming projects include monitoring the plans for collecting life insurance mortality and policyholder behavior data using the NAIC as the statistical agent, starting to develop mandatory reporting of variable annuity data, and continuing to work on evaluating actuarial aspects of accelerated underwriting.

6. Adopted the report of the Indexed Universal Life (IUL) Illustration (A) Subgroup, which has not met since the Spring National Meeting. Research is being conducted on market developments following the adoption of Actuarial Guideline XLIX-A, The Application of the Life Illustrations Model Regulation to Policies with Index-Based Interest Sold On or After November 25, 2020 (AG 49-A). It is expected that a Subgroup call will be scheduled to present findings related to the research prior to the Fall National Meeting.

7. Adopted the report of the Valuation Manual (VM)-22 (A) Subgroup, including its July 21, July 7, June 30, June 16, May 26, May 12, May 5, April 28, and April 21 minutes. During these meetings, the Subgroup took the following action:
   A. Exposed VM-22 exposure priorities for a 90-day public comment period ending Oct. 19.
   B. Exposed alternative definitions for reserve categories.
   C. Discussed the American Academy of Actuaries’ (Academy) Annuity Reserves and Capital Working Group (ARCWG) fixed annuity reserving framework proposal.
   D. Discussed the VM-22 field test.
   E. Heard an update from the Pension Risk Transfer (PRT) Drafting Group, which was formed to review the appropriateness of the mortality tables currently used for PRT mortality.
   F. Discussed the language in Section 5.A of VM-20, Requirements for Principle-Based Reserves for Life Products.
   G. Discussed options for addressing aggregation in VM-22, Statutory Maximum Valuation Interest Rate for Income Annuities.
   H. Discussed materiality standards for VM-22 and VM-21, Requirements for Principle-Based Reserves for Variable Annuities.
   I. Discussed the fixed annuity principle-based reserving (PBR) deviations from the VM-21 document.
   J. Tabled a motion to retain the VM-20 integrated risk management language.

8. Heard an update from the joint committee of the American Academy of Actuaries (Academy) and Society of Actuaries (SOA) on the use of future mortality improvement beyond the valuation date.

9. Heard an update on the development of the economic scenario generator (ESG).

10. Exposed the SOA 2022 Generally Recognized Expense Table (GRET).

11. Heard an update on the transition from the London Interbank Offered Rate (LIBOR)

12. Heard an update on experience reporting data collection.

13. Heard an update from the SOA on research and education.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE

August 16, 2021

1. Adopted its June 22 and Spring National Meeting minutes, which included the following action:
   A. Adopted the [State] Pharmacy Benefit Manager Licensure and Regulation Model Act.

2. Adopted the report of the Consumer Information (B) Subgroup, including its July 1 minutes. During this meeting, the Subgroup took the following action:
   A. Adopted its May 25 and April 1 minutes, which included the following action:
      i. Discussed a plan to complete several short consumer guides on the claims process.
   B. Discussed draft claims process-related guides; specifically, appeals process; medical necessity; explanation of benefits (EOBs); claims filing; and billing codes and claims. The Subgroup agreed to consider and make edits to the guides over the next few weeks. Following completion of the edits, the Subgroup anticipates conducting an e-vote to consider adoption of the guides.

3. Adopted the report of the Health Innovations (B) Working Group, including its July 27 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its March 26 minutes.
   B. Discussed its approach to fulfilling charges received from the Special (EX) Committee on Race and Insurance.
   C. Heard presentations on hospital price transparency requirements from the federal Centers for Medicare and Medicaid Services (CMS) Center on Medicare and on insurer price transparency requirements from the CMS Center for Consumer Information and Insurance Oversight (CCIIO).
   D. Heard a presentation from FAIR Health on its research and resources related to health care price transparency.
   E. Heard a presentation from Consumers’ Checkbook on ways to make health care price information relevant and understandable for consumers.

4. Adopted the report of the Health Actuarial (B) Task Force. See the Task Force listing for details.

5. Adopted the report of the Regulatory Framework (B) Task Force. See the Task Force listing for details.

6. Adopted the report of the Senior Issues (B) Task Force. See the Task Force listing for details.

7. Heard a presentation from the federal Center for Consumer Information and Insurance Oversight (CCIIO) regarding the Biden administration’s federal legislative and administrative initiatives and priorities. The presentation included a discussion of the administration’s plans on working with the states with respect to the implementation and enforcement of the provider provisions of the federal No Surprises Act (NSA).

8. Heard from a representative of the American Hospital Association (AHA), a representative of the American Medical Association (AMA), and a representative of the Federation of State Medical Boards (FSMBs) regarding the implementation and enforcement of the NSA’s provider requirements.

9. Heard an update from Workstream Five of the Special (EX) Committee on Race and Insurance. The Workstream met July 8 and June 10. During these meetings, the Workstream discussed data-collection issues and provider networks, provider directories, and cultural competency. Based on its discussions on data collection, the Workstream exposed a draft best practices document for a public comment period ending Aug. 19. The Workstream plans to discuss any comments received on the draft document during its Aug. 26 meeting. The Workstream anticipates developing a similar best practices document on provider networks, provider directories, and cultural competency.

Health Actuarial (B) Task Force

The Health Actuarial (B) Task Force did not meet at the Summer National Meeting.

Regulatory Framework (B) Task Force

July 28, 2021 (in lieu of the Summer National Meeting)

1. Adopted its June 15 and March 25 minutes, which included the following action:
   A. Adopted a new 2021 charge for the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup to develop a white paper on issues related to the state regulation of certain pharmacy benefit manager (PBM) business practices and the effect, if any, of the recent U.S. Supreme Court decision in Rutledge v. the Pharmaceutical Care Management Association on these current and emerging state laws and regulations regulating such business practices. The white paper will also examine the role PBMs, pharmacy services administrative organizations (PSAOs), and other prescription drug supply chain entities play in the provision of prescription drug benefits.
2. Adopted the report of the Accident and Sickness Insurance Minimum Standards (B) Subgroup, including its July 12 and June 7 minutes. During these meetings, the Subgroup took the following action:
   A. Established a new public comment period ending July 2 to receive comments on Section 1 through Section 7 of the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171).
   B. Began discussion of the comments received on Section 1 through Section 7 of Model #171 received by the July 2 public comment deadline. The Subgroup anticipates meeting approximately every two weeks to continue its discussions of the comments received.
3. Adopted the report of the Employee Retirement Income Security Act (ERISA) (B) Working Group, which met July 30 and took the following action:
   A. Discussed Rutledge v. Pharmaceutical Care Management Association and agreed to:
      ii. Ask for state insurance regulator volunteers to develop a draft “preemption road map” to assist state insurance regulators in assessing the potential impact of the Rutledge case on state laws for use by the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup in its white paper.
   B. Received an introduction to Ali Khawar, the acting assistant secretary for the Employee Benefits Security Administration (EBSA) at the U.S. Department of Labor (DOL).
   C. Adjourned into regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
4. Adopted the report of the Mental Health Parity and Addiction Equity Act (MH/PAEA) (B) Working Group, which met July 20 in regulator-to-regulator session, pursuant to paragraph 2 (pending investigations which may involve either the NAIC or any member in any capacity), paragraph 3 (specific companies, entities or individuals), and paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings. The Working Group also met April 21 and took the following action:
   A. Received an update from the DOL and the federal Centers for Medicare & Medicaid Services (CMS) on their work related to the recently enacted federal Consolidated Appropriations Act of 2021 (CAA), which amended the MH/PAEA to provide important new protections. In anticipation of new 2021 charges from the Special (EX) Committee on Race and Insurance, the Working Group also discussed equity and diversity in the mental health/substance use disorder (MH/SUD) treatment context. The Working Group plans to meet Aug. 5 to hear a provider perspective on mental health parity.
5. Adopted the report of the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup, which has not met since October 2020 because it completed its work. The Subgroup plans to resume meeting after the Summer National Meeting to work on a new 2021 charge to develop a white paper on issues related to the state regulation of certain PBM business practices. The white paper will also examine the role PBMs, PSAOs, and other prescription drug supply chain entities play in the provision of prescription drug benefits.
6. Heard an update from the Center on Health Insurance Reforms (CHIR) regarding its work related to federal Affordable Care Act (ACA) implementation; recently enacted federal laws, such as the federal No Surprises Act (NSA) and the federal American Rescue Plan Act (ARPA); and other issues of interest to state insurance regulators. The update included a discussion of the CHIR’s recent publications, including a 50-state survey of state employee benefit plans and efforts to restrain health care costs and state actions to expand telemedicine access during COVID-19 and future policy considerations. The CHIR is researching and expects to release issue briefs or blogs on standardized plans, limited plan sales, state “Easy Enrollment” programs, efforts by select state-based marketplaces (SBMs) to improve health equity, and small group health insurance market trends. The CHIR presentation also highlighted some of the CHIR’s future work related to NSA implementation and technical assistance available to the states and its ongoing work related to network adequacy. The CHIR will also be looking more closely at health care cost containment through initiatives such as federal and state public option programs and the role of ERISA and its impact on state efforts to address cost containment with respect to employer plans.
7. Heard a presentation on the NSA’s interim final rules and implications for the states. The presentation provided an overview of the NSA’s scope, including what types of plans it covers and where its protections apply. The NSA’s interim final rules were issued July 1 with an effective date of Sept. 13. The interim final rules include provisions focused on both patients and regulated entities. The patient-focused provisions outline how patients can calculate cost-sharing, include notice-and-consent waivers provisions, and establish a consolidated complaints process. The regulated entities-focused provisions outline how to calculate the qualifying payment amount and include disclosure requirements and provisions related to communications between insurers and providers. The interim final rules confirm that state departments of insurance (DOIs) are the primary enforcers of provisions that apply to insurers and fully insured health products. The U.S.
Department of Health and Human Services (HHS) will enforce the NSA’s requirements in states that fail to substantially
enforce the law. The DOL will enforce the NSA’s provisions for self-funded group health plans. The same enforcement
framework is established with respect to providers, including air ambulances. As noted in the presentation, the NSA is
silent on which state agency is to enforce the NSA’s provider provisions. The presentation also highlighted key
considerations for the states, particularly that state laws can be more protective of consumers if the state law does not
“prevent the application of federal law.” It is anticipated that the federal government will issue additional NSA rules in
2021, including federal rules on the independent dispute resolution process (interim final rule) and enforcement and air
ambulance data reporting (proposed rule). The presentation noted that additional federal rulemaking will occur over
time on other NSA requirements, such as accurate provider directories, gag clauses, and PBM reporting requirements.
However, these rules will not be promulgated prior to the NSA’s 2022 effective date.

Senior Issues (B) Task Force
July 29, 2021 (in lieu of the Summer National Meeting)
1. Adopted its June 8 minutes, which included the following action:
   A. Adopted its Feb. 23, 2021, and Oct. 20, 2020, minutes, which included the following action:
      i. Discussed its 2021 agenda.
   B. Heard a presentation on bundling Medicare supplement and short-term care insurance.
2. Adopted the report of the Long-Term Care Insurance Model Update (B) Subgroup, including its July 15 minutes. During
   this meeting, the Subgroup took the following action:
   A. Adopted its May 27 minutes, which included the following action:
      i. Adopted its May 6 minutes, which included the following action:
         a. Adopted its April 22 minutes, which included the following action:
            1) Discussed its charge. The Subgroup was appointed to determine whether the Long-Term Care Insurance
               Model Act (#640) and the Long-Term Care Insurance Model Regulation (#641) need to be updated to
               remain flexible and compatible with the LTCI marketplace.
            b. Discussed comments received on Section 1 through Section 7 of Model #640.
            ii. Discussed comments received on Section 8 through Section 14 of Model #640.
      B. Heard presentations on the current long-term care insurance (LTCI) marketplace, including what products are being
         seen, filed, and produced.

PROPERTY AND CASUALTY INSURANCE (C) COMMITTEE
August 16, 2021
1. Adopted its Spring National Meeting minutes.
2. Adopted the report of the Casualty Actuarial and Statistical (C) Task Force. See the Task Force listing for details.
3. Adopted the report of the Surplus Lines (C) Task Force. See the Task Force listing for details.
4. Adopted the report of the Title Insurance (C) Task Force. See the Task Force listing for details.
5. Adopted the report of the Workers’ Compensation (C) Task Force. See the Task Force listing for details.
6. Adopted the report of the Cannabis Insurance (C) Working Group, including its July 27 and July 19 minutes. During these
   meetings, the Working Group took the following action:
   A. Held a two-day fact-finding hearing on insurance for cannabis-related business.
      i. During Session 1: Setting the Stage, the Working Group:
         a. Heard a presentation from Wilson Elser on the impact of the geographical expansion of states legalizing
            cannabis on discussions at the federal level.
         b. Heard a presentation from the Cannabis Regulators Association (CANNRA) on the cannabis regulatory and
            licensing landscape.
         c. Heard a presentation from Golden Bear Insurance and Cannasure on the insurance needs of the
            cannabis market.
      ii. During Session 2: Insurance Product Availability, the Working Group:
         a. Heard a presentation from the Insurance Services Office (ISO) and the American Association of Insurance
            Services (AAIS) on commercial cannabis product options.
         b. Heard from a panel of experts that included James River, Golden Bear Insurance, Cannasure, and Amwins
            about admitted and nonadmitted coverage availability across the cannabis business sectors.
iii. During Session 3: Barriers to Coverage Availability and Affordability, the Working Group:
   a. Heard a presentation from East Carolina University on balancing actual and perceived risks in the cannabis space.
   b. Heard from a panel of experts that included Wilson Elser, GJ Sullivan Co. Reinsurance, Golden Bear Insurance, and the ISO on uncovering obstacles to insurers offering coverage in the cannabis-related business space.
   c. Heard from a panel of experts that included Cannasure, Amwins, James River, Golden Bear Insurance, and Wilson Elser on insurance coverage challenges for cannabis-related businesses.

iv. During Session 4: Moving Forward, the Working Group:
   a. Heard from a panel of experts that included Cannasure, Golden Bear Insurance, Amwins, James River, and East Carolina University on emerging trends and how state insurance regulators can support growth of the cannabis insurance market.

7. Adopted the report of the Catastrophe Insurance (C) Working Group, including its July 22 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 21 and Spring National Meeting minutes, which included the following action:
      i. Discussed the Catastrophe Computer Modeling Handbook.
   B. Heard an update regarding federal legislation and the National Flood Insurance Program (NFIP) reauthorization.
   C. Discussed the status of the Handbook and drafting group formation. The drafting group will begin meeting in August.
   D. Heard a presentation from Mississippi regarding roofing repair and the Mississippi Windstorm Underwriting Association (MWUA) roof upgrade program.
   E. Discussed items to help insurers with expedited claims process. The American Property Casualty Insurance Association (APCIA) discussed its Catastrophe Actions Toolkit. The Working Group will continue this discussion.

8. Adopted the report of the Pet Insurance (C) Working Group, including its Aug. 13 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its Aug. 4 minutes, which included the following action:
      i. Adopted its July 29 minutes, which included the following action:
         a. Discussed Section 3, Section 4 and Section 7 of the draft Pet Insurance Model Act.
         b. Discussed issues with classifying pet insurance as a property/casualty (P/C) product.
      ii. Discussed comments received on Section 7 of the draft Pet Insurance Model Act.
      iii. Discussed the use of wellness products in pet insurance.
   B) Discussed language on waiting periods and free-look periods in the draft Pet Insurance Model Act.
   2) Discussed language on waiting periods, free-look periods, and wellness plans in the draft Pet Insurance Model Act.
   b. Discussed language related to wellness plans in the draft Pet Insurance Model Act.
   ii. Adopted a definition of “wellness program” to include in Section 3 of the draft Pet Insurance Model Act.
   iii. Adopted the entire Pet Insurance Model Act as drafted.

9. Adopted the report of the Terrorism Insurance Implementation (C) Working Group, which has not met since the Spring National Meeting. State insurance regulators decided to pause the State Supplement portion of the state regulator terrorism risk insurance data call for fall. The Working Group plans to meet soon to discuss workers’ compensation and other data received in the data call earlier this year.
10. Adopted the report of the Transparency and Readability of Consumer Information (C) Working Group, including its July 20 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its May 13 and Spring National Meeting minutes, which included the following action:
      i. Heard reports from the three drafting groups formed to draft the various sections of a consumer disclosure regarding significant premium increases on property/casualty (P/C) insurance products.
      ii. Heard a presentation from VisibleThread regarding its language analysis platform.
   B. Received an update from the Thresholds and Communications Standards Drafting Group. This drafting group is nearing the completion of this project. The Working Group members offered suggestions to update the document.
   C. Received an update from the Rate Checklist Drafting Group. This drafting group is nearing the completion of this project.
   D. Received an update from the Consumer Education Drafting Group. This drafting group continues to meet regularly to complete the consumer education documents and has divided the topics into three smaller groups that meet regularly.
12. Adopted updates to the Title Insurance Consumer Shopping Tool Template.
13. Heard a presentation from the Association of Bermuda Insurers and Reinsurers (ABIR) and the Insurance Development Forum on ways to close the insurance protection gap.
14. Heard a report on the cyberinsurance market, including results from the Cybersecurity and Identity Theft Insurance Coverage Supplement.
15. Heard a report on the private flood insurance market, including results from the Private Flood Insurance Supplement.
16. Heard an update on the Special (EX) Committee on Race and Insurance, including the fact that Workstream Three, focused on property/casualty (P/C) insurance issues, will take the new charges and formulate a work plan.
17. Heard that the Committee would hold a future meeting to hear from interested parties to discuss auto insurance refunds related to reduced driving from the COVID-19 pandemic.

Casualty Actuarial and Statistical (C) Task Force
August 10, 2021 (in lieu of the Summer National Meeting)

1. Adopted its July 13, June 8, May 11, and March 9 minutes, which included the following action:
   A. Adopted responses to referrals from the Blanks (E) Working Group.
   B. Adopted a request for NAIC staff to gather information about statistical reports.
   C. Exposed referrals from the from the Blanks (E) Working Group for a 30-day public comment period ending July 7.
   D. Discussed the Casualty Actuarial Society (CAS) decision to reinstate the “Statement of Principles Regarding Property and Casualty Insurance Ratemaking” as it relates to U.S. regulated ratemaking.
2. Adopted the report of the Actuarial Opinion (C) Working Group, including its July 22 and July 1 minutes. During this meeting, the Working Group took the following action:
   A. Discussed proposed revisions to the Statement of Actuarial Opinion.
   B. Discussed adding language regarding Schedule P reconciliation.
   C. Discussed proposed language regarding review of actuarial qualification documentation.
   D. Discussed reviews of the 2020 Statement of Actuarial Opinion.
   E. Discussed issues with Schedule P reconciliation.
3. Adopted the report of the Statistical Data (C) Working Group, which has not met recently.
4. Appointed Sandra Darby (ME) as chair of the Statistical Data (C) Working Group.
5. Discussed the second exposure draft of the American Academy of Actuaries’ (Academy’s) U.S Qualification Standards. The Task Force will meet in regulator-to-regulator session to consider adoption of a comment letter via e-vote before the Academy’s Aug. 20 comment deadline.
6. Received a report on Project #2019-49 Retroactive Reinsurance Exception. A proposal will be presented for consideration at the Fall National Meeting.
7. Discussed referral 2021-11BWG from the Blanks (E) Working Group. The Task Force charged the Statistical Data (C) Working Group to gather information about whether the timeline can be sped up on receipt of premium and exposure information from outside partners. The Working Group should report back to the Task Force before Oct. 12.
8. Received a report on NAIC rate model reviews.
9. Heard reports from professional actuarial associations.
Surplus Lines (C) Task Force
August 5, 2021 (in lieu of the Summer National Meeting)

1. Adopted its Nov. 18, 2020, minutes.
2. Adopted the 2022 proposed charges of the Task Force and the Surplus Lines (C) Working Group, which remained unchanged from 2021.
3. Adopted the report of the Surplus Lines (C) Working Group, including its July 7 minutes. During this meeting, the Working Group took the following action:
   A. Reported that it met June 21 and March 2 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
   B. Exposed proposed modifications to the Trust Agreement for Alien Excess or Surplus Lines Insurers for a 30-day public comment period ending Aug. 6.
   C. Exposed proposed modifications to the Quarterly Listing of Alien Insurers for a 30-day public comment period ending Aug. 6
4. Discussed and formed a drafting group to amend the Nonadmitted Insurance Model Act (#870).
5. Heard a presentation regarding the potential of surety bonds as a funding device for surplus lines.

Title Insurance (C) Task Force
July 13, 2021 (in lieu of the Summer National Meeting)

1. Adopted its June 7 minutes, which included the following action:
   A. Exposed revisions to the Title Insurance Consumer Shopping Tool Template for a public comment period ending July 5.
2. Adopted revisions to the Title Insurance Consumer Shopping Tool template. Revisions included adding questions and answers about title insurance-related fraud topics, including closing protection letters (CPLs) and wire fraud.
3. Heard a presentation from the Federal Bureau of Investigation (FBI) on business email compromise schemes and other cybercrimes.
4. Heard from state insurance regulators about title insurance fraud trends in their respective states. Trends included fraudulent settlement transactions, wire fraud complaints, cybercrime and defalcations.

Workers’ Compensation (C) Task Force
July 21, 2021 (in lieu of the Summer National Meeting)

1. Adopted its March 15 minutes.
2. Heard a presentation from the National Council on Compensation Insurance (NCCI) on the classification of telecommuters and the potential implications of an increase in telecommuting on workers’ compensation. Current information indicates remote work will not have a big impact

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE
August 16, 2021

1. Adopted its July 27 minutes, which included the following action:
   A. Adopted its Spring National Meeting minutes.
   B. Adopted revised charges for the Antifraud (D) Task Force.
   C. Adopted the short-term, limited-duration (STLD) Market Conduct Annual Statement (MCAS) data call and definitions.
   D. Adopted the travel insurance MCAS data call and definitions.
   E. Adopted digital claims data in the private passenger auto and homeowners data call and definitions.
   F. Heard presentations from a state insurance regulator, an NAIC funded consumer representative, and an industry trade representative on the benefits and challenges of collecting market conduct data annually on a transactional level.
2. Heard a presentation from an NAIC funded consumer representative on claim optimization and the potential of using artificial intelligence (AI) to evaluate the willingness of insureds or claimants to accept values less than the fair and equitable amount. The presenter encouraged state insurance regulators to determine the extent of use of predictive analytics in claim settlements and require insurers to report on the algorithmic models used in claim handling.
3. Adopted the Regulatory Information Retrieval System (RIRS) proposed coding structure changes.

4. Adopted the report of the Antifraud (D) Task Force. See the Task Force listing for details.

5. Adopted the report of the Market Information Systems (D) Task Force. See the Task Force listing for details.

6. Adopted the report of the Producer Licensing (D) Task Force. See the Task Force listing for details.

7. Adopted the report of the Market Conduct Annual Statement Blanks (D) Working Group, including its July 28 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 30 minutes, which included the following action:
      i. Adopted its May 26 and May 25 minutes, which included the following action:
         a. Adopted its April 28 minutes, which included the following action:
            1) Adopted its March 23 minutes.
            2) Agreed to collect non-claims lawsuit data in the private passenger auto (PPA) and homeowners (HO) Market Conduct Annual Statement (MCAS) blanks.
         b. Adopted the travel MCAS data call and definitions.
         c. Adopted the short-term limited-duration (STLD) MCAS data call and definitions.
         d. Discussed the addition of digital claims data elements to the HO and PPA MCAS data call and definitions.
         e. Discussed the draft edits to the life MCAS data call and definitions to include reporting for accelerated underwriting.
      f. Adopted revisions to the definition of “lawsuit.”
      ii. Agreed to wait for the Accelerated Underwriting (A) Working Group to adopt its definition of “accelerated underwriting” before proceeding with the MCAS definition of “accelerated underwriting.”
      iii. Adopted the digital claims data elements and definitions for the PPA and HO MCAS data call and definitions.
      iv. Agreed to postpone the collection of non-claims lawsuit data until the 2023 data year reported in 2024.
   B. Heard an update on the addition of accelerated underwriting data elements in the Life and Annuity MCAS data call and definitions. The subject-matter expert (SME) drafting group continues to wait for the Accelerated Underwriting (A) Working Group to adopt a definition of “accelerated underwriting.”
   C. Heard an update on the “other health” MCAS data call and definitions. The drafting group plans to resume meeting to begin drafting the remainder of the other health products.
   D. Agreed to form an SME group to draft a proposal for incorporating non-claims-related lawsuits in the PPA and HO MCAS blanks and revise the definition of “lawsuit,” as necessary. The group will also consider the best way to collect digital claims vendor information in the interrogatories for the PPA and HO MCAS blanks.

8. Adopted the report of the Market Conduct Examination Guidelines (D) Working Group, including its June 10 minutes. During this meeting, the Working Group took the following action:
   A. Reviewed its 2021 charges.
   B. Discussed and prioritized its potential tasks for 2021.
   C. Identified models adopted in 2020 and asked for state insurance regulator volunteers to begin a review of the models and report at the next Working Group meeting, if applicable revisions to corresponding sections of the Market Regulation Handbook are warranted.
   D. Discussed new title insurance standardized data requests (SDRs) to address in force policies and claims for inclusion in the reference documents of the Market Regulation Handbook.

9. Adopted the report of the Market Analysis Procedures (D) Working Group, including its July 1 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its March 19 minutes, which included the following action:
      i. Adopted revisions to the Market Conduct Annual Statement (MCAS) Best Practices Guide.
      ii. Adopted a requirement that companies identify their MCAS attesters by line of business and jurisdiction.
      iii. Adopted revisions to the Market Regulation Handbook training opportunities for market regulation analysts.
   B. Discussed market analysis training needs for state insurance regulators.
   C. Opened discussions on the next line of business to be included in the MCAS.
   D. Discussed initial aggregate analysis of MCAS data with an April 30 due date. This discussion will continue once the validation of the data is completed.
   E. Discussed MCAS reporting by jurisdiction of residency or jurisdiction of issuance. The Working Group will make no recommendations to change the current instructions in the data calls and definitions for the various MCAS blanks. It was agreed that additional training on reporting requirements will be helpful for market analysts.
10. Adopted the report of the Privacy Protections (D) Working Group, including its July 12 minutes. During this meeting, the Working Group took the following action:
   A. During the July 12 meeting, the Working Group:
      i. Adopted its June 14 minutes, which included the following action:
         a. Adopted its May 10 minutes, which included the following action:
            1) Adopted its March 29 minutes.
            2) Discussed the draft of the initial privacy policy statement.
            3) Requested comments in the form of parameters and examples on the initial privacy policy statement by June 7.
         b. Discussed comments received from health insurers received on the six consumer privacy rights identified by the 2021 NAIC member-adopted strategy for consumer data privacy protections to be discussed by the Working Group as part of its gap analysis in its 2019 work plan.
   B. Received comments from the American Council of Life Insurers (ACLI) about the six consumer privacy rights.
   C. Heard a presentation from NAIC consumer representatives on the consumer perspective of data privacy and consumer privacy rights.
   D. Requested comments in the form of parameters and examples on the revised draft of the privacy policy statement by July 29.

Antifraud (D) Task Force
July 26, 2021 (in lieu of the Summer National Meeting)
1. Adopted its May 25 minutes, which included the following action:
   A. Adopted its March 24 minutes.
2. Received an update from the Antifraud Education Enhancement (D) Working Group. The Working Group held a webinar on Feb. 11 from CARCO regarding the mobile capabilities it can provide state insurance departments to assist with fighting insurance fraud. The Working Group also conducted investigator safety training on June 2. The Working Group advised Task Force members to send any suggested training/webinar topics they would like to have provided.
3. Received an update from the Antifraud Technology (D) Working Group. The Working Group noted that the revision of the Antifraud Plan Guideline (#1690) was the first step in its charge to “review and provide recommendations for the development of an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions.” The Working Group formed a subject-matter expert (SME) group to create a template for industry to use when creating their Antifraud Plan. The SME Group will meet every week through October in order to finalize this project.
4. Received an update on the NAIC Online Fraud Reporting System (OFRS) redesign project. The NAIC is continuing its work on the redesign of the OFRS. The Task Force was informed that beta testing is currently taking place, and the NAIC will be opening up the testing to industry in an effort to finalize this testing period.
5. Heard reports on antifraud activity from NAIC staff and the following organizations: the National Insurance Crime Bureau (NICB) and the Coalition Against Insurance Fraud (CAIF).

Market Information Systems (D) Task Force
July 28, 2021 (in lieu of the Summer National Meeting)
1. Adopted its March 22 minutes.
2. Adopted the report of the Market Information Systems Research and Development (D) Working Group, which met July 21, July 15, and June 16 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) and paragraph 6 (consultations with NAIC staff members related to NAIC technical guidance) of the NAIC Policy Statement on Open Meetings. During these meetings, the Working Group took the following action:
   A. Heard presentations from NAIC staff regarding the testing of the use of artificial intelligence (AI) to construct predictive models of insolvency risk and the Center for Economic Justice (CEJ) regarding how AI can be used in market analysis. The Working Group agreed to form a subject-matter expert (SME) group to develop recommendations for incorporating AI into the NAIC MIS.
   B. Reviewed outstanding USER forms.
   C. Reviewed comments received on the RIRS Coding Changes Proposal.
   D. Reviewed the progress of the implementation of the MIS data analysis recommendations.
3. Adopted the RIRS Coding Changes Proposal.
4. Heard a report on the outstanding USER forms.

**Producer Licensing (D) Task Force**

*August 4, 2021 (in lieu of the Summer National Meeting)*

1. Adopted its March 26 minutes.
2. Heard an update on the state implementation of online examinations.
3. Discussed a referral from the Special (EX) Committee on Race and Insurance.
5. Discussed procedures for amending uniform applications.
6. Received reports from the Producer Licensing Uniformity (D) Working Group and the Uniform Education (D) Working Group. Both groups are currently without a chair and have not met since the Spring National Meeting.

**FINANCIAL CONDITION (E) COMMITTEE**

*August 14, 2021*

1. Adopted its July 8 and Spring National Meeting minutes, which included the following action:
   A. Adopted changes to the *Insurance Holding Company System Regulatory Act (#440)* and the *Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)* that are intended to make explicit, rather than implicit, the regulatory authority that a commissioner should have relative to the continuation of essential services of an insurance company from an affiliate during a receivership.
   B. Updated life risk-based capital (RBC) bond factors effective for the 2021 reporting period.
3. Adopted the report of the Capital Adequacy (E) Task Force. See the Task Force listing for details.
4. Adopted the report of the Examination Oversight (E) Task Force. See the Task Force listing for details.
5. Adopted the report of the Financial Stability (E) Task Force. See the Task Force listing for details.
6. Adopted the report of the Receivership and Insolvency (E) Task Force. See the Task Force listing for details.
7. Adopted the report of the Reinsurance (E) Task Force. See the Task Force listing for details.
9. Adopted the report of the Valuation of Securities (E) Task Force. See the Task Force listing for details.
10. Adopted the report of the Financial Analysis (E) Working Group, which met July 14, June 16, May 18–19, and April 19 in regulator-to-regulator sessions, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss letter responses and financial results.
11. Adopted the report of the Group Capital Calculation (E) Working Group, including its July 26 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its May 27, May 17, April 27, and March 10 minutes, which included the following action:
      i. Adopted a revised template for use in the 2021 group capital calculation (GCC) trial implementation, including changes to gather data on a stress scenario.
      ii. Adopted clarifying edits to the GCC instructions that will be used for the 2021 GCC trial implementation.
      iii. Exposed proposed GCC-related changes to the *Financial Analysis Handbook*.
   B. Exposed draft maintenance documents for a 60-day public comment period ending Sept. 24.
   C. Exposed a draft referral to the Capital Adequacy (E) Task Force for a 90-day public comment period ending Oct. 25.
12. Adopted the report of the Group Solvency Issues (E) Working Group, including its Aug. 4 minutes. During this meeting, the Working Group took the following action:
    A. Discussed comments received on the exposure of proposed revisions to the *Financial Analysis Handbook* to incorporate elements of the International Association of Insurance Supervisors’ (IAIS) Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame) deemed appropriate for the U.S. system of insurance regulation. The Working Group discussed comments received from each of the following organizations: Iowa Insurance Division (IID); American Council of Life Insurers (ACLI); America’s Health Insurance Plans (AHIP); American Property Casualty Insurance Association (APCIA); and Blue Cross and Blue Shield Association (BCBSA). As a result of the discussions, the drafting group members who developed the initial revisions were asked to consider the comments received and state insurance regulator opinions expressed during the meeting in developing an updated draft for the Working Group to consider later this year.
B. Received an update on the status of drafting efforts to proposed revisions to the Financial Condition Examiners Handbook and the NAIC Own Risk and Solvency Assessment (ORSA) Guidance Manual to incorporate elements of ComFrame deemed appropriate for the U.S. system of insurance regulation. The update stated that drafting efforts are underway and the documents will be presented to the Working Group for consideration later this year.

C. Discussed the IAIS’ public consultation on a revised Application Paper on Supervisory Colleges that ends Aug. 24. Working Group members were encouraged to provide comments on the paper to the International Insurance Relations (G) Committee, which will accumulate state insurance regulator comments for submission in an NAIC comment letter.

13. Adopted the report of the Mortgage Guaranty Insurance (E) Working Group, including its May 18 and April 9 minutes. During these minutes, the Working Group took the following action:

B. Adopted the Mortgage Guaranty Insurance Exhibit and instructions.

14. Adopted the report of the Mutual Recognition of Jurisdictions (E) Working Group, including its July 20 minutes. During this meeting, the Working Group took the following action:

A. Discussed the draft Process for Evaluating Jurisdictions that Recognize and Accept the Group Capital Calculation.
B. Exposed the document for a 30-day public comment period ending Aug. 20.

15. Adopted the report of the NAIC/American Institute of Certified Public Accountants (AICPA) (E) Working Group, including its May 17 minutes. During this meeting, the Working Group:

16. Adopted the report of the National Treatment and Coordination (E) Working Group, including its July 17 minutes. During this meeting, the Working Group took the following action:

A. Adopted its May 13 minutes, which included the following action:
   i. Discussed Proposal 2021-01 (Primary Application and Instructions).
   ii. Discussed Proposal 2021-02 (Redomestication Application and Instructions).
   iii. Adopted Proposal 2021-03 (Cybersecurity Contact).
   iv. Adopted Proposal 2021-04 (Biographical Affidavit Cover Letter).
   v. Discussed Form A – Private Equity Company.
B. Adopted proposal 2021-01 (Primary Application and Instructions).
C. Adopted proposal 2021-02 (Redomestication Application and Instructions).
D. Adopted proposal 2021-05 (Form A Review Guidance).
E. Exposed proposal 2021-06 (Disclaimer Form).

17. Adopted the report of the Valuation Analysis (E) Working Group, which met July 26 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss valuation items related to specific companies.

18. Adopted a referral to the Statutory Accounting Principles (E) Working Group that requests consideration of changes to the Working Group’s maintenance policy related to certain terms used in the current document.

19. Adopted revisions to the process for evaluating qualified and reciprocal jurisdictions.

20. Adopted revised charges for the Macroprudential (E) Working Group, which was formerly known as the Liquidity Assessment (E) Subgroup.

Accounting Practices and Procedures (E) Task Force
July 27, 2021 (in lieu of the Summer National Meeting)

1. Adopted its March 23 minutes.

2. Adopted the report of the Statutory Accounting Principles (E) Working Group, which conducted e-votes that concluded July 20, July 12, and April 20, and met May 20. The report included the following action:

A. During its July 20 e-vote, the Working Group exposed agenda item 2021-10: SSAP No. 32R—Clarification of Effective Call Price for a public comment period ending Aug. 6.
B. During its July 12 e-vote, the Working Group adopted its May 20, April 20, and March 15 minutes.
C. During its May 20 meeting, the Working Group adopted the following nonsubstantive revisions to statutory accounting guidance:

i. Revisions reject the following for statutory accounting:
   a. Accounting Standards Update (ASU) 2020-08, Codification Improvements to Subtopic 310-20, Receivables – Nonrefundable Fees and Other Costs. (Ref #2021-02)
   b. ASU 2021-02, Franchisors – Revenue from Contracts with Customers for statutory accounting. (Ref #2021-08)
   c. ASU 2020-11, Financial Services – Insurance: Effective Date and Early Application. (Ref #2021-07)

ii. Revisions incorporate disclosure elements in Statement of Statutory Accounting Principles (SSAP) No. 103R—Transfers and Servicing of Financial Assets and Extinguishments of Liabilities and a data-capture template for where an entity has transferred assets but retains economic interest within the reporting entity, its related parties, or another member within the holding company group. (Ref #2021-03)

iii. Adopted agenda items supporting disaggregated product identifiers to be used for each separate account product reported in the general interrogatories. This adoption does not result in statutory revisions, but it is reflected in the Working Group recommendation to support blanks proposal 2021-03BWG. (Ref #2020-37 and Ref #2020-38)

iv. Adopted Interpretation (INT) 20-01: ASU 2020-04 – Reference Rate Reform, which provides optional guidance, allowing for the continuation of certain existing hedge relationships and thus does not require hedge redesignation for derivative instruments affected by changes to interest/reference rates due to reference rate reform. (Ref #2021-01)

v. Adopted INT 21-01: Accounting for Cryptocurrencies, which clarifies that directly held cryptocurrencies neither meet the definition of cash in SSAP No. 2R—Cash, Cash Equivalents, Drafts and Short-Term Investments, nor do they meet the definition of an admitted asset per SSAP No. 4—Assets and Nonadmitted Assets when directly held. (Ref #2021-05)

vi. Adopted editorial revisions to retitle SSAP No. 53—Property Casualty Contracts – Premiums to SSAP No. 53—Property and Casualty Contracts – Premiums; correct grammatical errors in SSAP No. 97—Investments in Subsidiary, Controlled and Affiliated Entities, paragraph 54; and remove the footnote in the Glossary title and replace it as an opening paragraph with updated verbiage. (Ref #2021-06EP)

vii. Exposed the substantive proposed bond definition to be used for all securities in determining whether they qualify for reporting on Schedule D, Part 1 – Long-Term Bonds. The definition intends to reflect principal concepts to ensure appropriate consideration on whether a structure qualifies as an issuer credit obligation or an asset-backed security (ABS) prior to reporting as a bond. The public comment period ends July 15. (Ref #2019-21)

viii. Exposed nonsubstantive revisions to SSAP No. 48—Joint Ventures, Partnerships and Limited Liability Companies and SSAP No. 97 to indicate that the equity method valuation reference in SSAP No. 97 can result in a negative equity valuation and to limit the statutory adjustments match in SSAP No. 97, paragraph 9. The exposed revisions are that foreign insurance subsidiary, controlled and affiliated entities (SCAs) shall stop at zero (and thus not be subject to negative equity valuations) when applying paragraph 9 adjustments in cases where the foreign insurance subsidiary is not engaged in providing services to, or holding assets on behalf of, U.S. insurers. The public comment period ends July 15. (Ref #2021-04)

ix. Adopted a response to the Life Risk-Based Capital (E) Working Group on its referral request to consider accounting and reporting aspects of an American Council of Life Insurers (ACLI) proposal regarding real estate in the life risk-based capital (RBC) formula. The adopted response identifies concerns on the reliability and consistency of fair value data to be considered before allowing reporting entities to reduce RBC using the fair value of real estate.

x. Received an update on the following projects and referrals:
   a. Directed a referral to be sent to the Life Actuarial (A) Task Force seeking input regarding whether the Task Force would consider changes to the reserve framework of fixed indexed annuity products, as its response will influence the accounting options for derivatives hedging these products. (Ref #2020-36)
   b. Directed NAIC staff to develop additional revisions to address the diversity in state Affordable Care Act (ACA) reinsurance programs. (Ref #2021-09)
   c. INT 20-10: Reporting Nonconforming Credit Tenant Loans: Contingently exposed nonsubstantive revisions in anticipation of a Valuation of Securities (E) Task Force proposal to revise filing exempt (FE) requirements for credit tenant loans (CTLs). After the Statutory Accounting Principles (E) Working Group’s May 24 meeting, the Valuation of Securities (E) Task Force did not expose the anticipated revisions. Instead, the Task Force exposed edits to clarify that the reference to mortgage loans in the CTL definition pertains to
items in scope of SSAP No. 37—Mortgage Loans, and the Accounting Practices and Procedures Manual (AP&P Manual) determines investment accounting and reporting. With this Task Force action, the revisions to INT 20-10 were not exposed. The Working Group will review INT 20-10 after the Task Force concludes actions after its exposure.

d. Received a response from the Valuation of Securities (E) Task Force regarding CTLs and information regarding Securities Valuation Office (SVO) filings received.

e. During its April 20 e-vote, the Working Group voted to update exposed agenda item 2021-03: SSAP No. 103R – Disclosures to reflect interested parties’ preliminary comments. While minor revisions were proposed to SSAP No. 103R disclosures, the primary changes from the original agenda item were reflected in the data-capture template, which includes instructions, updated capture fields, and column descriptions.

3. Adopted the report of the Blanks (E) Working Group, which met July 22 and took the following action:
   A. Adopted its May 26 minutes, which included the following action:
      i. Adopted an editorial listing and the following eight blanks proposals:
         a. 2021-01 – Add reference to health care receivables line in the Asset page.
         b. 2021-02BWG – Add questions to the General Interrogatories, Part 1 regarding depository institution holding companies as it pertains to the group capital calculation (GCC).
         c. 2021-03BWG – Add category lines to the Separate Accounts General Interrogatories for additional granularity.
         d. 2021-04BWG – Add a General Interrogatory to identify insurers that utilize third parties to pay agent commissions in which the amounts advanced by the third parties are not settled in full within 90 days.
         e. 2021-05BWG – Modify Note 17B(4) to reflect changes made by the Statutory Accounting Principles (E) Working Group reference number 2021-03 regarding transferred assets.
         f. 2021-06BWG – Add crosschecks to the long-term care (LTC) reporting forms to gain consistency.
         g. 2021-07BWG – Add additional line categories to capture collateral type data for all residential mortgage-backed securities (RMBS), commercial mortgage-backed securities (CMBS), and loan-backed and structured securities (LBSS) regardless of reporting category.
         h. 2021-08BWG – Add a new supplement Mortgage Guaranty Insurance Exhibit to capture more information from mortgage guaranty insurers.
      ii. Exposed five proposals for public comment.
   B. Adopted 2021-10BWG – Remove language in quarterly General Interrogatories Part 1, line 4.1 that requires filing of a quarterly merger/history form. The annual form shall still be required.
   C. Adopted its editorial listing.
   E. Deferred four proposals for additional discussion for a 90-day public comment period ending Oct. 22.

4. Adopted its 2022 proposed charges.

5. Adopted revisions to the Model Audit Rule Implementation Guide developed by the NAIC/American Institute of Certified Public Accountants (AICPA) Working Group to collect additional information on the lead engagement partner.

Capital Adequacy (E) Task Force

July 28, 2021 (in lieu of the Summer National Meeting)

1. Adopted its June 30, April 29, and March 23 minutes, which included the following action:
   A. Adopted proposal 2021-04-CA (Investment Income Health Underwriting Factors).
   B. Adopted proposal 2021-07-CA (Receivables for Securities Factors).
   C. Adopted proposal 2021-09-H (Health Bond Factors).
   D. Adopted proposal 2021-06-L (Real Estate Factors – Modified).
   E. Adopted proposal 2021-11-L (Life Bond Factors).
   F. Adopted proposal 2021-13-L (Longevity Risk Factors and Instructions).
   G. Adopted proposal 2021-03-P (Credit Risk Instructions Modification).
   I. Adopted proposal 2021-08-P (P/C Bond Factors).
   J. Adopted proposal 2021-01-L (Real Estate Structure).
   K. Adopted proposal 2021-02-CA (Managed Care Credit Incentives).
   L. Adopted its working agenda.
2. Adopted the report of the Health Risk-Based Capital (E) Working Group, including its July 12 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 8, May 25, and April 23 minutes, which included the following action:
      i. Adopted its March 17 minutes.
      ii. Discussed the 20 bond designation factors.
      iii. Received comments and referred proposal 2021-04-CA (Investment Income Health Underwriting Factors) to the Capital Adequacy (E) Task Force.
      iv. Discussed, exposed, and requested the assistance of the American Academy of Actuaries (Academy) in a comprehensive review of the H2 – Underwriting Risk component.
      v. Adopted revisions to the 2021 health risk-based capital (RBC) working agenda.
      vi. Adopted proposal 2021-09-H (Bond Factors).
      vii. Discussed developing a process and the other lines of business to be considered for investment income in the underwriting risk factors.
      viii. Received an update on the Health Test and Health RBC Excessive Growth Charge Ad Hoc Groups.
   B. Adopted the 2021 health RBC newsletter.
   C. Approved the 2020 health RBC statistics.
   D. Received a response from the Academy to review the H2 – Underwriting Risk component in the health RBC formula.
   E. Discussed reviewing the bond factors because of the adoption of the Moody’s bond factors in the life RBC formula.
   F. Discussed developing a process and the lines of business to be considered in the adjustment of the investment income in the underwriting risk factors for comprehensive medical, Medicare supplement, and dental and vision.

3. Adopted the report of the Life Risk-Based Capital (E) Working Group, including its July 21 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 11, June 3 and June 4, May 27, May 20, April 29, April 22, April 15, April 6, March 30, and Spring National Meeting minutes, which included the following action:
      i. Adopted proposal 2021-06-L (Real Estate Factors).
      ii. Adopted proposal 2021-11-L (Bond Factors).
      iv. Adopted proposal 2021-12-L (Reinsurance).
   B. Adopted the 2021 life and fraternal RBC newsletter.
   C. Approved the 2020 life and fraternal RBC statistics.
   D. Adopted its updated working agenda.

4. Adopted the report of the Property and Casualty Risk-Based Capital (E) Working Group, including its July 22 minutes. During this meeting, the Working Group took the following action:
   A. Adopted its June 9 and April 27 minutes, which included the following action:
      i. Adopted proposal 2021-05-P (Underwriting Risk Line 1 Factors).
      ii. Adopted proposal 2021-08-P (P/C Bond Factors and Instructions).
      iii. Adopted proposal 2021-03-P (Credit Risk Instruction Modification)
      iv. Forwarded the response to the Restructuring Mechanisms (E) Subgroup.
      v. Heard a presentation on property/casualty (P/C) RBC underwriting risk factors from the Academy.
   B. Adopted the report of the Catastrophe Risk (E) Subgroup, including its July 15 minutes. During this meeting, the Subgroup took the following action:
      i. Adopted its June 1 and April 26 minutes, which included the following action:
         a. Forwarded the response to a request for proposed changes to the P/C RBC catastrophe component.
         c. Discussed the possibility of allowing additional third-party models or adjustments to the vendor models.
      ii. Adopted its working agenda items.
      iv. Heard a presentation from AIR Worldwide regarding its wildfire model.
   C. Adopted the 2021 P/C RBC newsletter.
   D. Adopted the 2020 P/C RBC statistics.
   E. Adopted its 2021 working agenda.
   F. Heard updates from the Academy regarding different projects related to calibrating various components of the underwriting risk and reserve risk.

5. Adopted proposal 2021-04-CA (Modified for Rounding).
6. Adopted its 2021 working agenda.
Examination Oversight (E) Task Force

August 5, 2021 (in lieu of the Summer National Meeting)

1. Adopted its March 25 minutes.
2. Adopted the report of the Electronic Workpaper (E) Working Group, which met July 13 and April 28 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings.
3. Adopted the report of the Financial Analysis Solvency Tools (E) Working Group, which met June 21 in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings.
4. Adopted the report of the Financial Examiners Coordination (E) Working Group, which met Aug. 3 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities or individuals) of the NAIC Policy Statement on Open Meetings.
5. Adopted the report of the Financial Examiners Handbook (E) Technical Group, including its July 28 minutes. During this meeting, the Technical Group took the following action:
   A. Discussed and prioritized its 2021 project list.
   B. Received an update on related NAIC working group activities that will affect examination guidance.
6. Adopted the report of the Information Technology (IT) Examination (E) Working Group, including its April 19 minutes. During this meeting, the Working Group took the following action:
   A. Received a referral from the Chief Financial Regulator Forum requesting the development of a mechanism for state departments of insurance (DOIs) to respond to emerging cyber vulnerabilities or exposures during the period in between full scope exams.
   B. Received a referral from the Receivership Financial Analysis (E) Working Group requesting additional guidance for evaluating the quality and portability of policyholder data to ensure the ability to transfer such data in the event of receivership or liquidation.

Financial Stability (E) Task Force

July 27, 2021 (in lieu of the Summer National Meeting)

1. Adopted its May 12 and Feb. 22 minutes, which included the following action:
   A. Heard an update on Financial Stability Oversight Council (FSOC) developments.
   B. Adopted its revised mission and charges.
   C. Adopted the 2020 Liquidity Stress Test (LST) Framework.
   D. Heard an international update.
   E. Heard a macroprudential risk assessment update.
3. Renamed the Liquidity Assessment (E) Subgroup to the Macroprudential (E) Working Group and adopted revised charges for the new group.
4. Heard an international update.
5. Heard a macroprudential risk assessment update.

Receivership and Insolvency (E) Task Force

July 27, 2021 (in lieu of the Summer National Meeting)

1. Adopted its May 20 minutes, which included the following action:
   A. Adopted its March 12 minutes.
   B. Adopted amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450).
2. Adopted the report of the Receivership Financial Analysis (E) Working Group, which met March 22 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss companies in receivership.
3. Adopted the report of the Receivership Law (E) Working Group, including its May 4 minutes. During this meeting, the Working Group took the following action:
   A. Adopted amendments to Model #440 and Model #450. The amendments aimed to address the topic of the continuation of essential services by affiliates of an insurer in receivership, as well as access to data and records held
by affiliates belonging to the insurer in receivership. Guidance related to the amendments will be drafted by the Receiver’s Handbook (E) Subgroup.

4. Adopted the report of the Receiver’s Handbook (E) Subgroup, including its June 14 minutes. During this meeting, the Subgroup took the following action:
   A. Adopted its May 26 minutes, which included the following action:
      i. Discussed its charge.
   B. Formed drafting groups to draft proposed edits to each chapter of the Receiver’s Handbook. The drafting group has started work on the first chapter.

5. Adopted 2022 proposed charges for the Task Force and its working groups and subgroup.

6. Heard an update on international activities. The International Association of Insurance Supervisors (IAIS) Resolution Working Group completed the Application Paper on Resolution Powers and Planning. It will begin work on an application paper on policyholder protection schemes in September.

7. Heard an update on Macroprudential Initiative (MPI) recommendations:
   A. The Task Force will pursue training and outreach to better inform the states of receivership matters. Possible activities include outreach to the states’ legislative liaisons and encouraging Task Force members to discuss receivership matters at zone meetings.
   B. The Task Force will continue to monitor and provide feedback to the Group Solvency Issues (E) Working Group, which has drafted updates to financial analysis guidance for crisis management groups, recovery planning, and resolution planning.

Reinsurance (E) Task Force
July 27, 2021 (in lieu of the Summer National Meeting)

1. Adopted its March 23 minutes.

5. Discussed the draft ReFAWG Review Process for Passorting Certified and Reciprocal Jurisdiction Reinsurers.

6. Discussed the Republic of Korea application to become a qualified jurisdiction.

7. Received a status report on the states’ implementation of the 2019 revisions to the Credit for Reinsurance Model Law (#785), the Credit for Reinsurance Model Regulation (#786), and the implementation of the Term and Universal Life Insurance Reserve Financing Model Regulation (#787).

Risk Retention Group (E) Task Force
July 26, 2021 (in lieu of the Summer National Meeting)

1. Adopted its May 25 minutes, which included the following action:
   A. Discussed the results of the 2021 risk retention group (RRG) survey, which was conducted to identify what is working well and what areas the Task Force can improve related to the non-domiciliary and domiciliary regulation of RRGs.
   B. Discussed the applicability of revisions to the Insurance Holding Company System Model Act (#440) and the Insurance Holding Company System Regulation with Reporting Forms and Instructions (#450) as an accreditation standard for RRGs.
   C. Referred an update to the quarterly non-troubled company procedures for RRGs to the Financial Analysis Solvency Tools (E) Working Group.

2. Adopted its 2022 proposed charges, which remain unchanged from the 2021 charges.

3. Discussed the RRG task list and determined to start work on two items. One item is to draft instructions and guidance for the NAIC Uniform Risk Retention Group Registration Form. The second item is to start work on an information-sharing template that can be prepared and shared by a domiciliary state prior to the development of an insurer profile summary.
Valuation of Securities (E) Task Force

July 15, 2021 (in lieu of the Summer National Meeting)

1. Adopted its May 24 and March 22 minutes, which included the following action:
   A. Adopted an amendment to the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) to require the filing of private rating letter rationale reports with the NAIC Securities Valuation Office (SVO) beginning Jan. 1, 2022. The amendment includes provisions for deferring and waiving the submission for private letter rating securities in certain situations.
   B. Discussed a proposed amendment to the P&P Manual to permit filing exemption (FE) for credit tenant loan (CTL) and ground lease financing (GLF) transactions. The Task Force directed SVO staff to prepare a new amendment to the P&P Manual following the suggestions proposed by the Statutory Accounting Principles (E) Working Group chairs permitting CTL and GLF transactions that are securities to be FE and expose it for a 30-day public comment period ending June 28.
   C. Discussed the SVO’s response to the Statutory Accounting Principles (E) Working Group referral to the SVO on CTLs.

2. Adopted its 2022 proposed charges.

3. Adopted an amendment to the P&P Manual to add additional instructions for the review of funds to clarify guidance for fund leverage and the use of derivatives.

4. Adopted an amendment to the P&P Manual to permit securities that are CTL-like and GLF-like transactions to use NAIC credit rating provider (CRP) ratings through FE if they are structured as securities.

6. Exposed a proposed amendment to the P&P Manual to permit the SVO to rely on the parent entity’s rating for an unrated and unguaranteed subsidiary in a working capital finance investment (WCFI) program for a 30-day public comment period ending Aug. 16. The proposed amendment was also referred to the Statutory Accounting Principles (E) Working Group for comment.

7. Received NAIC staff reports on:
   B. The status of the NAIC Structured Securities Group’s financial modeling request for proposal (RFP) and implementation of the adopted changes for legacy/non-legacy residential mortgage-backed securities (RMBS) and commercial mortgage-backed securities (CMBS).

FINANCIAL REGULATION STANDARDS AND ACCREDITATION (F) COMMITTEE

August 14, 2021

1. Reported that it met Aug. 13 in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; and 2) vote to award continued accreditation to the insurance departments of Arkansas; District of Columbia; Indiana; Michigan; and New Jersey.

2. Adopted its Spring National Meeting minutes.

3. Adopted its 2022 proposed charges, which remain unchanged from its 2021 charges.

5. Recommended exposure of the 2020 revisions to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) effective for all states Jan. 1, 2026, for a one-year public comment period beginning Jan. 1, 2022. The revisions implement a group capital calculation (GCC) for the purpose of group solvency supervision and a liquidity stress test (LST) for macroprudential surveillance. The exposure was revised from the initial referral to allow GCC filing exemptions to qualifying groups meeting the standards set forth in Model #450, Section 21A and Section 21B, without the requirement to file at least once. The recommended exposure was referred to the Executive (EX) Committee and Plenary for consideration at the Fall National Meeting.
INTERNATIONAL INSURANCE RELATIONS (G) COMMITTEE
August 16, 2021
1. Adopted its May 5 and Spring National Meeting minutes, which included the following action:
   A. Approved submission of NAIC comments on the International Association of Insurance Supervisors (IAIS) draft Application Paper on Macroprudential Supervision.
2. Discussed and approved submission of NAIC comments on the IAIS draft Issues Paper on Insurer Culture and draft revised Application Paper on Supervisory Colleges.
3. Heard an update on key 2021 projects and priorities of the IAIS, including: a) implementation assessment activities related to the holistic framework for systemic risk; b) the ongoing insurance capital standard (ICS) monitoring period; and c) the peer review process of Insurance Core Principle (ICP) 9 (Supervisory Review and Reporting) and ICP 10 (Preventive and Corrective Measures); and d) 2022–2023 strategic planning priorities.
4. Heard an update on international activities, including recent virtual meetings and events with international colleagues; plans for the virtual fall 2021 NAIC International Fellows Program; recent meetings of the Organisation for Economic Cooperation and Development (OECD) Insurance and Private Pensions Committee; recent meetings of the Sustainable Insurance Forum (SIF); and an upcoming virtual webinar of the European Union (EU)-U.S. Dialogue Project.

NAIC/CONSUMER LIAISON COMMITTEE
August 14, 2021
1. Announced its Spring National Meeting minutes would be considered for adoption via e-vote.
2. Heard a presentation from the Coalition Against Insurance Fraud and United Policyholders titled, “Helping Consumers Avoid Getting Burned or Blown-Away by Post-Disaster Fraud.” The presenters discussed: a) the cost and impact of natural disasters on consumers; b) estimates of the costs of natural disaster fraud; c) how natural disaster fraud occurs (contractor and repair scams, insurer actions, and consumer fraud); and d) the disparate impact of natural disaster fraud and steps departments of insurance (DOIs) can take to better protect consumers.
3. Heard a presentation from the Center for Economic Justice (CEJ) on the impact of the COVID-19 pandemic on consumer credit scores and insurance underwriting. This is important to state insurance regulators and consumers as it highlighted the use of average credit scoring by industry for historical purposes, which experienced a shift due to the pandemic. A moratorium was requested to pause this practice until the credit score environment has a chance to catch up and normalize following the pandemic. Another request is that state insurance regulators encourage the use of individual credit scores rather than imposing average credit scores that may not be indicative of the individual insurance consumer’s credit experience.
4. Heard a presentation from Health Equity Solutions and The AIDS Institute on regulatory possibilities for promoting equity through telehealth. The COVID-19 pandemic led the states to rapidly increase the scope of telehealth services through public and private payers. Initial reports suggest telehealth services during COVID-19 did more to preserve access for existing patients than to alleviate access disparities and may even have exacerbated these disparities. The rapid scaling up of telehealth capabilities among providers across the country offers lessons about what more needs to be done to ensure that telehealth realizes its promise as a tool for advancing equity. Presenters discussed evaluating utilization data, assessing barriers to telehealth, preserving consumer choice, and safeguarding against unnecessary requirements or cost barriers for in-person care. They said telehealth services have the potential to reduce avoidable emergency department utilization (EDU) and to create access for people who lack transportation or dependent care, or who face stigma in their communities. The presenters said, however, that these benefits will be limited if telehealth services only reach populations who already had access to in-person care.
5. Heard a presentation from Families USA on the implementation of the federal No Surprises Act (NSA) and implications for consumer protections. The presenter provided an overview of the long-standing abusive practice of surprise medical billing and the protections passed into law through the NSA in December 2020. As the release of the first of three interim final rules (IFRs) came out in July, consumer representatives wanted to present ways in which insurance commissioners could be sure consumers have the tools they need to ensure comprehensive protections when this law takes effect in January 2022.
6. Heard the results of the survey by the University of Georgia and Georgians for a Healthy Future. In Spring 2021, consumer representatives commissioned a survey of grassroots consumer organizations to broaden their perspective on insurance issues represented at the NAIC. This presentation described the survey’s goal, methodology, and preliminary results with the aim to bring the expertise, perspectives, and stories from these organizations to state insurance regulators and other NAIC stakeholders.
NAIC/AMERICAN INDIAN AND ALASKA NATIVE LIAISON COMMITTEE

The NAIC/American Indian and Alaska Native Liaison Committee did not meet at the Summer National Meeting.

EXECUTIVE (EX) COMMITTEE AND PLENARY

Executive (EX) Committee and Plenary, Aug. 17, 2021, Minutes ................................................................. 3-2
Adopted the Amendments to 2021 Proposed Charges (Attachment One) .............................................................. 3-11
Adopted the Amendments to the Valuation Manual (Attachment Two) ................................................................. 3-17
Adopted the Amendments to the Annuity Disclosure Model Regulation (#245) (Attachment Three) .................. 3-116
Failed to Adopt the Model Law Addressing Licensure or Registration of Pharmacy Benefit Managers (PBMs) (Attachment Four) ........................................................................................................... 3-125
Adopted the Guideline for Definition of Reciprocal State in Receivership Laws (#1985) (Attachment Five) .... 3-135
Adopted the Revised Statement of Statutory Accounting Principles (SSAP) No. 71—Policy Acquisition Costs and Commissions (Attachment Six) .............................................................................................. 3-138
Adopted the Amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) (Attachment Seven) .................................................................................................................. 3-145
Adopted the Amendments to the Process for Evaluating Qualified and Reciprocal Jurisdictions (Attachment Eight) .................................................................................................................................... 3-166
Report on States’ Implementation of NAIC-Adopted Model Laws and Regulations (Attachment Nine) ............. 3-195
Executive (EX) Committee and Plenary  
Columbus, Ohio  
August 17, 2021

The Executive (EX) Committee met in Columbus, OH, Aug. 17, 2021. The following members participated: David Altmaier, Chair (FL); Dean L. Cameron, Vice Chair (ID); Chlora Lindley-Myers, Vice President (MO); Andrew N. Mais, Secretary-Treasurer (CT); Raymond G. Farmer, Most Recent Past President (SC); Lori K. Wing-Heier (AK); Jim L. Ridling represented by Reyn Norman (AL); Alan McClain (AR); Peni Itula Sapiini Teo (AS); Evan G. Daniels represented by Jon Savary (AZ); Ricardo Lara represented by Bryant Henley (CA); Michael Conway represented by Peg Brown (CO); Karima M. Woods (DC); Trinidad Navarro (DE); John F. King represented by Martin Sullivan (GA); Colin M. Hayashida (HI); Doug Ommen (IA); Dana Popish Severinghaus represented by Kevin Fry (IL); Amy L. Beard (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Eric A. Cioppa (ME); Anita G. Fox (MI); Grace Arnold (MN); Mike Chaney (MS); Troy Downing represented by Bob Biskupiak (MT); Mike Causey represented by Michelle Osborne (NC); Jon Godfread (ND); Eric Dunning (NE); Marlene Caride (NJ); Russell Toal (NM); Linda A. Lacewell represented by My Chi To (NY); Judith L. French represented by Carrie Haughawout (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry D. Deiter (SD); Carter Lawrence (TN); Doug Slape (TX); Jonathan T. Pike (UT); Scott A. White (VA); Tregenza A. Roach (VI); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler represented by Molly Nollette (WA); Mark Afable (WI); James A. Dodrill (WV); and Jeff Rude (WY).

1. **Adopted the Report of the Executive (EX) Committee**

Commissioner Altmaier reported that the Executive (EX) Committee met Aug. 15 and adopted the Aug. 13 report from the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee.

The Executive (EX) Committee adopted the report of the Executive (EX) Committee, which met July 13, June 29, and May 20 and took the following action: 1) discussed creating a new standing Committee on Innovation, Technology, and Cybersecurity; 2) received a mid-year financial update and an overview of the preliminary 2022 budget; 3) adopted the Audit Committee report, including the 2020/2021 Service Organization Control (SOC) reports; 4) adopted the Internal Administration (EX1) Subcommittee’s May 13 minutes; and 5) approved a Fiscal for the Solvency Workpaper Software Modernization Project – Implementation Preparation Phase.

The Executive (EX) Committee adopted the reports of its task forces: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance.

The Executive (EX) Committee discussed the potential formation of a standing “H” committee to address issues concerning innovation, technology, and cybersecurity.

The Executive (EX) Committee heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).

The Executive (EX) Committee received a status report on the NAIC State Ahead strategic plan implementation.

The Executive (EX) Committee received a status report on model law development efforts for amendments to: 1) the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171); 2) the Annuity Disclosure Model Regulation (#245); 3) the Insurance Holding Company System Regulatory Act (#440); 4) the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450); 5) the Life Insurance Disclosure Model Regulation (#580); 6) the Nonadmitted Insurance Model Act (#870); and 7) new models, including the Pet Insurance Model Law and the [State] Pharmacy Benefit Manager Licensure and Regulation Model Act (PBM Model).

The Executive (EX) Committee heard reports from the National Insurance Producer Registry (NIPR) and the Interstate Insurance Product Regulation Commission (Compact).

Director Cameron made a motion, seconded by Director Farmer, to adopt the Aug. 15 report of the Executive (EX) Committee. The motion passed unanimously.
2. **Adopted by Consent the Committee, Subcommittee, and Task Force Minutes of the Spring National Meeting**

Director Cameron made a motion, seconded by Director Farmer, to adopt by consent the committee, subcommittee, and task force minutes of the Spring National Meeting. The motion passed unanimously.

3. **Adopted Amendments to 2021 Proposed Charges**

Commissioner Mais made a motion, seconded by Director Lindley-Myers, to adopt the amendments to the Special (EX) Committee on Race and Insurance, the Regulatory Framework (B) Task Force, the Antifraud (D) Task Force, and the Financial Stability (E) Task Force charges (Attachment One). The motion passed unanimously.

4. **Received the Report of the Life Insurance and Annuities (A) Committee**

Commissioner Caride reported that the Life Insurance and Annuities (A) Committee met Aug. 16. During this meeting, the Committee adopted its July 19 minutes, which included the following action: 1) adopted its June 30 minutes, which included appointing the Index-Linked Variable Annuity (A) Subgroup; 2) adopted its Spring National Meeting minutes; 3) adopted a frequently asked questions (FAQ) guidance document to assist the states as they move forward with adopting the revisions to the *Suitability in Annuity Transactions Model Regulation* (#275); and 4) adopted a package of 15 *Valuation Manual* amendments.

The Committee adopted the report of the Accelerated Underwriting (A) Working Group, including its July 29 minutes. During this meeting, the Working Group discussed the latest draft of the accelerated underwriting educational report.

The Committee adopted the report of the Life Actuarial (A) Task Force. During this meeting, the Task Force exposed the Society of Actuaries (SOA) 2022 Generally Recognized Expense Table (GRET).

The Committee discussed the next steps for the Life Insurance Illustration Issues (A) Working Group. The Committee asked Richard Wicka (WI) to develop a chair report for its review at the Fall National Meeting. The chair report will detail the work of the group and include a summary of comments that have been received and incorporated into its work product over the years. The Committee will review the report and provide guidance to the Working Group on next steps at the Fall National Meeting.

The Committee heard an update from Workstream Four of the Special (EX) Committee on Race and Insurance. The Workstream intends to convene regular meetings starting in September to achieve its charges/goals.

5. **Adopted Amendments to the *Valuation Manual***

Commissioner Caride reported that a package of 15 *Valuation Manual* amendments was adopted by the Life Insurance and Annuities (A) Committee during its July 19 meeting. Most of these amendments provide technical clarifications and guidance to existing requirements in the *Valuation Manual*.

There are two amendments that are more substantive in nature: 1) Amendment Proposal Form (APF) 2020-09, which modifies the Life Principle-Based Reserving (PBR) Exemption to allow a company that received commissioner approval for the exemption in the prior year to retain its exemption if it meets certain requirements, and not require VM-20, Requirements for Principle-Based Reserves for Life Products, when all new issues arise due to policyholder conversions; and 2) APF 2020-10 (Attachment Two), which allows the use of future mortality improvement beyond the valuation date.

Commissioner Caride made a motion, seconded by Commissioner Donelon, to adopt the package of *Valuation Manual* amendments, excluding APF 2020-10. The motion was adopted by 51 jurisdictions, representing 97.81% of the applicable premiums written.

Commissioner Caride made a motion, seconded by Commissioner Mulready, to adopt APF 2020-10 as an amendment to the *Valuation Manual*. The motion was adopted by 48 jurisdictions, representing 88.75% of the applicable premiums written, with Louisiana, New Mexico, and New York opposed. Commissioner Altmaier confirmed that both votes satisfied the requirements to amend the *Valuation Manual*. 
6. **Adopted Amendments to the Annuity Disclosure Model Regulation (#245)**

Commissioner Caride reported that the amendments to Model #245 were adopted unanimously by the Life Insurance and Annuities (A) Committee at the 2018 Summer National Meeting. Under the current model, the illustration of “non-guaranteed elements” are prohibited. This prohibition could be construed to include participating income annuities because of the formula used to calculate the dividend scale. These amendments allow for the illustration of participating income annuities. At the time these amendments were adopted, the Committee was working on additional revisions to Model #245 to allow, under certain circumstances, the illustration of indices in existence for fewer than 10 years, which is prohibited under Model #245. At that time, the Committee decided to hold the participating income annuity amendments at the Committee level, pending resolution of the indices issue with the intent to move all amendments to Model #245 at one time.

During the Spring National Meeting, the Committee voted to disband the Annuity Disclosure (A) Working Group working on these additional indices amendments, as it was still unable, after many years, to reach consensus.

Commissioner Caride made a motion, seconded by Commissioner Ommen, to adopt the participating income annuity revisions to Model #245 (Attachment Three). The motion passed with California abstaining, noting that California laws are stronger than Model #245, and New York opposing.

Executive Deputy Superintendent To noted that New York would be voting no because “this particular amendment allows insurers to show in their illustrations of expected dividends an assumption of an increase in interest rates over time to a long-term average, which would always be the case even if interest rates were below that average. Illustrations should be a means of showing consumers how a given product works and should not be a means of competition between companies, assuming an increase in interest rates in these illustrations is misleading to consumers.”

7. **Received the Report of the Health Insurance and Managed Care (B) Committee**

Commissioner Godfread reported that the Health Insurance and Managed Care (B) Committee met Aug. 16. During this meeting, the Committee adopted its June 22 and Spring National Meeting minutes, which included the following action: 1) adopted the PBM Model; and 2) forwarded the PBM Model to the Executive (EX) Committee and Plenary to consider adoption.

The Health Insurance and Managed Care (B) Committee adopted the report of the Consumer Information (B) Subgroup, which met July 1 and May 25. During these meetings, the Subgroup took the following action: 1) discussed a plan to complete several short consumer guides on the claims process; and 2) discussed draft claims process-related guides; i.e., appeals process, medical necessity, explanation of benefits (EOBs), claims filing, and billing codes. The Subgroup agreed to consider and make proposed edits to the guides over the next few weeks.

The Committee adopted the report of the Health Innovations (B) Working Group, which met July 27. During this meeting, the Working Group took the following action: 1) adopted its Spring National Meeting minutes; 2) discussed its approach to fulfilling charges received from the Special (EX) Committee on Race and Insurance; 3) heard presentations on hospital price transparency requirements from the federal Centers for Medicare & Medicaid Services (CMS) and insurer price transparency requirements from the CMS Center for Consumer Information and Insurance Oversight (CCIIO); 4) heard a presentation from FAIR Health on its research and resources related to health care price transparency; and 5) heard a presentation from Consumers’ Checkbook on ways to make health care price information relevant and understandable for consumers.

The Health Insurance and Managed Care (B) Committee adopted the report of the Regulatory Framework (B) Task Force and the Senior Issues (B) Task Force.

The Committee heard a presentation from Jeff Wu (CCIIO) on the Biden administration’s federal legislative and administrative initiatives and priorities. The presentation included a discussion of the administration’s plans on working with the states with respect to the implementation and enforcement of the provider provisions of the federal No Surprises Act (NSA).

The Committee heard a panel discussion from Molly Smith (American Hospital Association—AHA), Emily Carroll (American Medical Association—AMA), and Melanie de Leon (Federation of State Medical Boards—FSMB) regarding the implementation and enforcement of the NSA’s provider requirements.

The Committee received an update on the work of the Special (EX) Committee on Race and Insurance Workstream Five. The Workstream met July 8 and June 10. During these meetings, the Workstream discussed data collection issues, provider network,
provider directories, and cultural competency. Based on its discussions on data collection, the Workstream released a draft “best practices” document for a public comment period ending Aug. 19. The Workstream plans to discuss any comments received on the draft document during its Aug. 26 meeting. The Workstream anticipates developing a similar “best practices” document on provider network, provider directories, and cultural competency.

8. **Considered for Adoption the Model Law Addressing Licensure or Registration of Pharmacy Benefit Managers (PBMs)**

Commissioner Godfread reported that work to develop the Model Law Addressing Licensure or Registration of Pharmacy Benefit Managers (PBMs) began in 2019 to develop an NAIC model providing state departments of insurance (DOIs) direct authority to regulate PBMs rather than to regulate indirectly through the insurer. This regulatory approach stems from the expanding role of PBMs in the prescription drug supply chain, the resulting impact on consumer access to prescription drugs, and their affordability.

After many meetings and extensive and robust discussions with stakeholders about the proposed model, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup completed work on the model and adopted it in October 2020.

After exposing the proposed model for an additional public comment period, the Regulatory Framework (B) Task Force adopted it in March. The Health Insurance and Managed Care (B) Committee deferred action on the model during the Spring National Meeting because of questions about a proposed drafting note, which provided statutory citations to state laws regulating various PBM business practices.

The Subgroup included this note as a compromise, as some states wanted the model to focus only on PBM licensing and registration provisions, and other states wanted to include substantive provisions addressing certain PBM business practices. The Subgroup also believed there was a lack of national consensus regarding the regulation of these PBM business practices to include in the model’s substantive provisions.

In June, the Committee reconvened to consider adoption of the model. During this meeting, concerns were raised about the potential of a lack of uniformity in adoption by the states—a key component of the NAIC model law development procedures—if states selected different provisions from this proposed drafting note to include in their state law.

Given this concern, some stakeholders suggested that the drafting note was not the appropriate approach to take and instead suggested that a charge be given to the Subgroup to develop a white paper that would examine current and emerging state laws related to the PBM business practices outlined in the drafting note.

Based on these discussions, during its June 22 meeting, the Committee deleted the proposed drafting note and adopted the model.

The Committee took this action as well because the Task Force adopted a charge for the Subgroup to develop a white paper just prior to the Committee’s June 22 meeting. The white paper will explore existing and emerging state laws on PBM business practices, such as price transparency and reporting requirements, rebating, and spread pricing and discuss the implications of the *Rutledge vs. Pharmaceutical Care Management Association (PCMA)* court decision on such business practices.

At its core, this model is a licensure model that state DOIs can use to directly regulate PBMs. Sections 1 through 4 set out the model’s purpose, scope, and definitions. Section 5 provides the PBM licensing provisions, including provisions related to approving initial PBM licenses and renewals. Section 6—Gag Clauses and Other Pharmacy Benefit Managers Prohibited Practices includes language related to gag clauses and information-sharing for the purposes of enforcement. Section 7 of the proposed PBM model provides enforcement language and penalties for any violations of the model. Section 8—Regulations provides that the commissioner may promulgate regulations relating to PBMs that are not inconsistent with the model.

Commissioner Altmaier stated that a model shall only be presented to the Executive (EX) Committee and Plenary for consideration if a minimum two-thirds majority of the responsible parent committee has voted to adopt the model. A member’s vote based on whether he or she will make efforts to have the model introduced in his or her respective state legislature or the law in his or her state already meets or exceeds the minimum national standard set by the model.

Commissioner Schmidt noted that Kansas will be voting “no” on adoption of this PBM model because “as seen in the minutes and materials that came out of the drafting group, including the notes and summary of the issues that the drafting group addressed but did not come to consensus on and the action of the Committee to remove the contentious drafting note, the model law we are voting on does not address the issues that many states are interested in regulating. The drafting group worked hard
on its charge, and its work should be commended. However, the final product before us today is, simply, an ineffective piece of legislation that I doubt will be adopted by a majority of my sister states. I believe the wiser course of action would have been to continue the hard work of drafting model legislation that addresses the substantive issues affecting health care in our states. States will remain free to adopt the model, no PBM legislation, a completely different legislation, or a modified version of the PBM model that includes more substantive topics. As the opposition to including the drafting note was concern about uniformity, we see here another example of bureaucracy interfering with flexible, good government. We will not have uniform adoption, so there is no need to adopt this model.”

Commissioner Dodrill reported that over the past couple of years, West Virginia’s legislature adopted a much more robust statute on licensure and regulations of PBMs. Mr. Henley noted that California will abstain as California law already includes licensure and regulation of PBMs.

Commissioner Navarro reported that Delaware will abstain, as Delaware already passed stronger legislation. Commissioner Godfread will vote “no,” as this is a license and registration model that North Dakota already has. He expressed concerns that he is not sure DOIs are the right place for this function.

Commissioner Donelon asked the sponsor to what extent this model purports to regulate PBMs. Louisiana licenses them as third-party administrators (TPAs), and so does New Jersey.

Jolie H. Matthews (NAIC) noted that the draft model has a direct way for state DOIs to regulate as PBMs versus as a TPA as Louisiana does.

Director Lindley-Myers noted that Missouri will abstain. The Board of Pharmacy is under the DOI already, and there are some provisions Missouri could not enact.

Commissioner Chaney stated that he has no statutory authority to regulate PBMs at this time. Director Fox noted that she would abstain, as it is unlikely Michigan would adopt what has been proposed. Superintendent Toal said New Mexico already has stronger laws and regulations. Commissioner Ommen said Iowa already has licensing and regulatory authority, and this model is significantly different than Iowa’s.

Chief Deputy Commissioner Slape indicated that Texas would support the model, as it has similar laws.

Commissioner Altman and Commissioner Mais expressed their gratitude to NAIC staff and the states involved in the drafting.

Commissioner Lawrence reported that Tennessee has a new PBM law subject to a court challenge, and this model could possibly assist with that challenge.

Commissioner Godfread noted that work will continue on a PBM white paper to address the various remaining issues. He also thanked the drafters.

Director Dunning said he will vote “yes,” as regulation of PBMs and this model has been long awaited as a starting point by the Nebraska legislature.

9. Received the Report of the Property and Casualty Insurance (C) Committee

Commissioner Schmidt reported that the Property and Casualty Insurance (C) Committee met Aug. 16 and adopted its Spring National Meeting minutes.
The Committee adopted the reports of its task forces and working groups: the Casualty Actuarial and Statistical (C) Task Force; the Surplus Lines (C) Task Force; the Title Insurance (C) Task Force; the Workers’ Compensation (C) Task Force; the Cannabis Insurance (C) Working Group; the Catastrophe Insurance (C) Working Group; the Pet Insurance (C) Working Group; the Terrorism Insurance Implementation (C) Working Group; and the Transparency and Readability of Consumer Information (C) Working Group.

The Committee adopted an extension for revisions to the proposed Pet Insurance Model Law and adopted updates to the Title Insurance Consumer Shopping Tool Template.

The Committee took the following action: 1) heard a presentation from the Association of Bermuda Insurers and Reinsurers (ABIR) and the Insurance Development Forum on ways to close the insurance protection gap; 2) heard a report on the cyberinsurance market, including results from the Cybersecurity and Identity Theft Insurance Coverage Supplement; 3) heard a report on the private flood insurance market, including results from the Private Flood Insurance Supplement; 4) heard an update on the Special (EX) Committee on Race and Insurance, including the fact that Workstream Three, focused on property/casualty (P/C) insurance issues, will take the new charges and formulate a work plan; and 5) planned a future meeting to hear from interested parties to discuss auto insurance refunds related to reduced driving from the COVID-19 pandemic.

10. Received the Report of the Market Regulation and Consumer Affairs (D) Committee

Commissioner Clark reported that the Market Regulation and Consumer Affairs (D) Committee met Aug. 16. During this meeting, the Committee adopted its July 27 minutes, which included the following action: 1) adopted its Spring National Meeting minutes; 2) adopted revised charges for the Antifraud (D) Task Force; 3) adopted the short-term, limited-duration (STLD) Market Conduct Annual Statement (MCAS) data call and definitions; 4) adopted the travel insurance MCAS data call and definitions; 5) adopted digital claims data in the private passenger auto (PPA) and homeowners data call and definitions; and 6) heard presentations from a state insurance regulator, an NAIC funded consumer representative, and an industry trade representative on the benefits and challenges of collecting market conduct data annually on a transactional level.

The Committee heard a presentation from Peter Kochenburger (University of Connecticut School of Law) and an NAIC funded consumer representative on claim optimization and the potential of using artificial intelligence (AI) to evaluate the willingness of insureds or claimants to accept values less than the fair and equitable amount. The presenter encouraged state insurance regulators to determine the extent of use of predictive analytics in claim settlements and require insurers to report on the algorithmic models used in claim handling.

The Committee adopted the Regulatory Information Retrieval System (RIRS) proposed coding structure changes.

The Committee adopted the reports of its task forces and working groups: the Antifraud (D) Task Force; the Market Information Systems (D) Task Force; the Producer Licensing (D) Task Force; the Market Conduct Annual Statement Blanks (D) Working Group; the Market Conduct Examination Guidelines (D) Working Group; the Market Analysis Procedures (D) Working Group; and the Privacy Protections (D) Working Group.

11. Received the Report of the Financial Condition (E) Committee

Commissioner White reported that the Financial Condition (E) Committee met Aug. 14. During this meeting, the Committee adopted its July 8 and Spring National Meeting minutes, which included the following action: 1) adopted changes to Model #440 and Model #450 that are intended to make explicit, rather than implicit, the regulatory authority that a commissioner should have relative to the continuation of essential services of an insurance company from an affiliate during a receivership; and 2) updated the life risk-based capital (RBC) bond factors effective for the 2021 reporting period.

The Committee adopted the reports of the following task forces and working groups: the Accounting Practices and Procedures (E) Task Force; the Capital Adequacy (E) Task Force; the Examination Oversight (E) Task Force; the Financial Stability (E) Task Force; the Receivables and Insolvency (E) Task Force; the Reinsurance (E) Task Force; the Risk Retention Group (E) Task Force; the Valuation of Securities (E) Task Force; the Group Capital Calculation (E) Working Group; the Group Solvency Issues (E) Working Group; the Mortgage Guaranty Insurance (E) Working Group; the Mutual Recognition of Jurisdictions (E) Working Group; the NAIC/American Institute of Certified Public Accountants (AICPA) (E) Working Group; and the National Treatment and Coordination (E) Working Group. The report of the Financial Stability (E) Task Force included revised charges.

The Committee adopted a referral to the Statutory Accounting Principles (E) Working Group that requests consideration of changes to the Working Group’s maintenance policy.
The Committee took the following action: 1) adopted revisions to the *Process for Evaluating Qualified and Reciprocal Jurisdictions*; and 2) adopted revised charges for the renamed Macroprudential (E) Working Group.

**Note:** Items adopted within the Financial Condition (E) Committee’s task force and working group reports that are technical, noncontroversial, and not significant by NAIC standards—i.e., they do not include model laws, model regulations, model guidelines, or items considered to be controversial—will be considered for adoption by the Executive (EX) Committee and Plenary through the Financial Condition (E) Committee’s technical changes report process. Pursuant to this process, which was adopted by the NAIC in 2009, a listing of the various technical changes will be sent to the NAIC members shortly after completion of the Summer National Meeting, and the members will have 10 days to comment with respect to those items. If no objections are received with respect to a particular item, the technical changes will be considered adopted by the NAIC membership and effective immediately.

12. **Adopted the Guideline for Definition of Reciprocal State in Receivership Laws**

Commissioner White reported that the Receivership and Insolvency (E) Task Force drafted the *Guideline for Definition of Reciprocal State in Receivership Laws* as an alternative to address how states define “reciprocal state.” The Guideline provides an optional statutory definition that may be used by states with a reciprocity requirement to effectuate the purposes of provisions regarding the coordination of receiverships involving multiple states.

The Guideline gives states a possible option to resolve the issue of reciprocity and full faith and credit for stays and injunctions. While some states have updated the reciprocity language in their receivership laws, most states’ receivership laws are based on older versions of the NAIC receivership model.

The Guideline does not require a state or jurisdiction to be accredited to be reciprocal, but it uses the same criteria; i.e., essentially that a state have a receivership scheme.

Commissioner White made a motion, seconded by Chief Deputy Commissioner Slape, to adopt the *Guideline for Definition of Reciprocal State in Receivership Laws* (Attachment Five). The motion passed unanimously.

13. **Adopted the Revised SSAP No. 71**

Commissioner White summarized the proposed changes to *Statement of Statutory Accounting Principles (SSAP) No. 71—Policy Acquisition Costs and Commissions* and provided an overview of the key points of the levelized commission agenda item 2019-24, which were adopted by the Financial Condition (E) Committee into the proposed changes to SSAP No. 71.

The proposed revisions “clarify that an insurance entity cannot use third-party structures to recharacterize and delay recognition of liabilities for initial sales commission owed, regardless of how a third-party arrangement is structured with regards to the timing of the payment from the insurers. This guidance clarifies that it is the writing of the insurance contract that obligates the insurer and recognition of expense shall occur consistently among insurers. SSAP No. 71 does not require advanced recognition for expected renewals or normal persistency metrics. When an insurance policy is issued, renewed, or metrics are met that require additional commission, then SSAP No. 71 consistently requires expense recognition for all insurers.”

The Statutory Accounting Principles (E) Working Group began discussion in August 2019 and on March 15 and adopted revisions that are effective Dec. 31. The Working Group vote was 13 states in favor and one state opposed. On March 23, the Accounting Practices and Procedures (E) Task Force adopted these revisions with a vote of 41 members in favor and two opposed (Louisiana and Oklahoma). On April 13, the Committee adopted these same revisions to SSAP No. 71 with a vote of 11-3 (Mississippi, New Mexico, and South Carolina dissenting).

Commissioner White noted that the proposed clarification to SSAP No. 71 is necessary because a handful of companies are using an accounting practice that allows them to expense commissions over several years, while the rest of the industry abides by the current requirements of SSAP No. 71, which requires these commissions to be expensed as they are incurred.

Commissioner White also noted that a permitted accounting practice would be available to the companies in question as well.

Commissioner White made a motion, seconded by Superintendent Cioppa, to adopt the changes to SSAP No. 71 (Attachment Six).
Superintendent Toal made a subsidiary motion, seconded by Commissioner King, to amend the motion to delay the implementation of these proposed changes to SSAP No. 71 to Dec. 31, 2022. The motion failed.

Chief Deputy Commissioner Slape noted, “the issue before us today is one of the foundations of statutory accounting; i.e., that commissions are expensed from day one. These rules have been followed for decades by all companies except those few who have been using off-balance sheets. They have already had three years notice to follow the rules. It defies logic that they need five years to come into compliance. They can seek a permitted practice from the domiciliary regulator instead of coming to this body for an exception.”

Commissioner Navarro noted that, as a domestic regulator of one of the companies in question, he is inclined to grant one more year to comply.

On consideration of the main motion, the motion passed with American Samoa, Arkansas, Delaware, Georgia, Idaho, Louisiana, Mississippi, Montana, New Mexico, and Oklahoma dissenting.

14. Adopted the Amendments to the Insurance Holding Company System Regulatory Act (#440) and Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)

Commissioner White reported that the purpose of these revisions is to ensure the continuity of essential services and functions to an insurer in receivership by affiliated entities, including non-regulated entities, specifically for agreements with affiliated entities whose sole business purpose is to provide services to the insurance company.

The changes were unanimously adopted by both the Receivership and Insolvency (E) Task Force and the Financial Condition (E) Committee.

Commissioner White made a motion, seconded by Chief Deputy Commissioner Slape, to adopt the amendments to Model #440 and Model #450 (Attachment Seven). The motion passed unanimously.

15. Adopted Amendments to the Process for Evaluating Qualified and Reciprocal Jurisdictions

Commissioner White reported that the Process for Evaluating Qualified and Reciprocal Jurisdictions was first adopted by the NAIC in 2013 to provide a documented evaluation process for creating and maintaining the NAIC List of Qualified Jurisdictions. The document has now been updated to incorporate the 2019 revisions to the Credit for Reinsurance Model Law (#785) and the Credit for Reinsurance Model Regulation (#786) addressing “reciprocal.”

The revised document was exposed by the Reinsurance (E) Task Force in the Spring, modified to address comments from interested parties as well as informal suggestions from the Federal Insurance Office (FIO), and adopted by the Task Force on July 27. On Aug. 14, the Financial Condition (E) Committee unanimously adopted the revised document.

Commissioner White made a motion, seconded by Superintendent Toal, to adopt the amendments to the Process for Evaluating Qualified and Reciprocal Jurisdictions (Attachment Eight). The motion passed unanimously.

16. Received the Report of the Financial Regulation Standards and Accreditation (F) Committee

Director Dunning reported that the Financial Regulation Standards and Accreditation (F) Committee met Aug. 13 in regulator-to-regulator session, pursuant to paragraph 7 (consideration of individual state insurance department’s compliance with NAIC financial regulation standards) of the NAIC Policy Statement on Open Meetings, to: 1) discuss state-specific accreditation issues; and 2) vote to award continued accreditation to the insurance departments of Arkansas; Indiana; Michigan; New Jersey; and Washington, DC.

The Committee also met Aug. 14 in open session and adopted: 1) its Spring National Meeting minutes; and 2) its 2022 proposed charges, which remain unchanged from its 2021 charges.

The Committee adopted the revisions to the Part A: Laws and Regulations Preamble to account for inclusion of the Term and Universal Life Insurance Reserve Financing Model Regulation (#787), which will be a new accreditation standard effective Sept. 1, 2022, with enforcement beginning Jan. 1, 2023.
The Committee recommended exposure of the 2020 revisions to Model #440 and Model #450 effective for all states Jan. 1, 2026, for a one-year public comment period beginning Jan. 1, 2022. The revisions implement a GCC for the purpose of group solvency supervision and an LST for macroprudential surveillance. The exposure was revised from the initial referral to allow GCC filing exemptions to qualifying groups meeting the standards set forth in Model #450, Section 21A and Section 21B, without the requirement to file at least once.

17. Received the Report of the International Insurance Relations (G) Committee

Commissioner Anderson reported that the International Insurance Relations (G) Committee met Aug. 16. During this meeting, the Committee adopted its May 5 and Spring National Meeting minutes, which included the following action: 1) heard an update on upcoming International Association of Insurance Supervisors (IAIS) committee meetings and activities; 2) heard an update on the Organisation for Economic Co-operation and Development (OECD) and other supervisory cooperation activities; 3) approved submission of NAIC comments on the IAIS draft Application Paper on Macroprudential Supervision; 4) heard a presentation on Scalar Methodologies from the American Academy of Actuaries (Academy); 5) heard an update on key 2020–2021 projects of the IAIS; 6) heard an update on international activities; and 7) received an update on NAIC events.

The Committee approved submission of NAIC comments on the IAIS Draft Issues Paper on Insurer Culture and the Draft Revised Application Paper on Supervisory Colleges.

The Committee heard an update on key 2021 projects and priorities of the IAIS, including: 1) implementation assessment activities related to the holistic framework for systemic risk; 2) the ongoing Insurance Capital Standard (ICS) monitoring period; and 3) the peer review process of certain Insurance Core Principles (ICPs) 9 and 10; and 4) 2022–2023 strategic planning priorities.

The Committee heard updates on: 1) international activities, including recent virtual meetings and events with international colleagues; 2) plans for the virtual 2021 NAIC Fall International Fellows Program; 3) recent meetings of the OECD Insurance and Private Pensions Committee; 4) recent meetings of the Sustainable Insurance Forum (SIF); and 5) an upcoming virtual webinar of the European Union (EU)-U.S. Dialogue Project.

18. Received a Report on the States’ Implementation of NAIC-Adopted Model Laws and Regulations

Commissioner Altmaier referred to the written report for updates on the states’ implementation of NAIC-adopted model laws and regulations (Attachment Nine).

Having no further business, the Executive (EX) Committee and Plenary adjourned.

W:\National Meetings\2021\Summer\Plenary\8-Plenary.docx
The mission of the Special (EX) Committee on Race and Insurance is to serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.

Ongoing Support of NAIC Programs, Products or Services

1. The Special (EX) Committee on Race and Insurance will:
   A. Serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.
   B. Coordinate with existing groups such as the Big Data and Artificial Intelligence (EX) Working Group and the Casualty Actuarial and Statistical (C) Task Force and encourage those groups to continue their work on issues affecting people of color and/or historically underrepresented groups, particularly in predictive modeling, price algorithms, and artificial intelligence (AI).
   C. (Workstream One) Continue research and analysis to identify issues and develop specific recommendations on action steps state insurance regulators and companies can take to improve the level of diversity and inclusion in the industry, including:
      1. Seek additional engagement from stakeholders to understand the efficacy of diversity-related programs, how companies measure their progress, and what state insurance regulators can do to support these efforts.
      2. Collect input on any existing gaps in available industry diversity-related data.
   D. (Workstream Two) In coordination with the Executive (EX) Committee, receive reports on NAIC diversity, equity, and inclusion (DE&I) efforts. Serve as the coordinating body for state requests for assistance from the NAIC related to DE&I efforts.
   E. (Workstream Two) Research best practices among state insurance departments on DE&I efforts and develop forums for sharing relevant information among states and with stakeholders, as appropriate.
   F. Continue research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. Make recommendations for statutory or regulatory changes and additional steps, including:
      1. (Workstream Four) The impact of traditional life insurance underwriting on traditionally underserved populations, considering the relationship between mortality risk and disparate impact.
      2. (Workstream Three) Developing analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance, including issues related to:
         a. Rating and underwriting variables, such as socioeconomic variables and criminal history, including:
            1. Identifying proxy variables for race.
            2. Correlation versus causation, including discussion of spurious correlation and rational explanation.
            3. Potential bias in underlying data.
            4. Proper use of third-party data.
         b. Disparate impact considerations.
   G. (Workstreams Three, Four, and Five) Consider enhanced data reporting and record-keeping requirements across product lines to identify race and other sociodemographic factors of insureds, including consideration of legal and privacy concerns. Consider a data call to identify insurance producer resources available and products sold in specific ZIP codes to identify barriers to access.
   H. Continue research and analysis related to insurance access and affordability issues, including:
      1. (Workstream Four) The marketing, distribution, and access to life insurance products in minority communities, including the role that financial literacy plays.
      2. (Workstream Four) Disparities in the number of cancellations/rescissions among minority policyholders.
3. (Workstream Five) Measures to advance equity through lowering the cost of health care and promoting access to care and coverage, with a specific focus on measures to remedy impacts on people of color, low income and rural populations, and historically marginalized groups, such as the LGBTQ+ community, individuals with disabilities, and Alaska Native and other Native and Indigenous people.

4. (Workstream Five) Examination of the use of network adequacy and provider directory measures (e.g., provider diversity, language, and cultural competence) to promote equitable access to culturally competent care.

5. (Workstream Five) Conduct additional outreach to educate consumers and collect information on health and health care complaints related to discrimination and inequities in accessing care.

6. (Workstream Three) Whether steps need to be taken to mitigate the impact of residual markets, premium financing, and nonstandard markets on historically underrepresented groups.

7. Make referrals for the development of consumer education and outreach materials, as appropriate.

I. Direct NAIC and Center for Insurance Policy & Research (CIPR) staff to conduct necessary research and analysis, including:

1. (Workstream Three) The status of studies concerning the affordability of auto and homeowners insurance, including a gap analysis of what has not been studied.

2. (Workstream Three) The availability of producer licensing exams in foreign languages, steps exam vendors have taken to mitigate cultural bias, and the number and locations of producers by company compared to demographics in the same area.

3. (Workstream Five) Aggregation of existing research on health care disparities and the collection of insurance responses to the COVID-19 pandemic and its impact across demographic populations.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE – NEW CHARGES

The Accelerated Underwriting (A) Working Group, as part of its ongoing work to consider the use of external data and data analytics in accelerated life underwriting, will include an assessment of and recommendations, as necessary, regarding the impact of accelerated underwriting on minority populations.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE – NEW CHARGES

1. The Health Insurance and Managed Care (B) Committee will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House, and federal agencies; analyze policy implications and the effect on the states of proposed and enacted federal legislation and regulations, including, where appropriate, an emphasis on equity considerations and the differential impact on underserved populations; and communicate the NAIC’s position through letters and testimony, when requested.

The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group of the Regulatory Framework (B) Task Force will develop model educational material for state departments of insurance (DOIs) and research disparities in and interplay between mental health parity and access to culturally competent care for people of color and/or historically underrepresented groups.

The Health Innovations (B) Working Group will evaluate mechanisms to resolve disparities through improving access to care, including the efficacy of telehealth as a mechanism for addressing access issues; the use of alternative payment models and value-based payments and their impact on exacerbating or ameliorating disparities and social determinants of health; and programs to improve access to historically underserved communities.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE – NEW CHARGES

The Producer Licensing (D) Task Force will receive a report on the availability of producer licensing exams in foreign languages, the steps exam vendors have taken to mitigate cultural bias, and the number and location of producers by company compared to demographics in the area.

NAIC Support Staff: Andrew J. Beal/Michael F. Consedine
The mission of the Regulatory Framework (B) Task Force is to: 1) develop NAIC model acts and regulations for state health care initiatives; and 2) consider policy issues affecting state health insurance regulation.

Ongoing Support of NAIC Programs, Products and Services

1. The Regulatory Framework (B) Task Force will:
   A. Coordinate and develop the provision of technical assistance to the states regarding state-level implementation issues raised by federal health legislation and regulations.
   B. Review managed health care reforms, their delivery systems occurring in the marketplace and other forms of health care delivery. Recommend appropriate revisions to regulatory jurisdiction, authority and structures.
   C. Consider the development of new NAIC model laws and regulations and the revision of existing NAIC model laws and regulations, including those affected by federal legislation and final federal regulations promulgated pursuant to such legislation.
   D. Continue to review NAIC models recommended for revision by the former Affordable Care Act (ACA) Model Review (B) Working Group and, as appropriate, appoint a working group or subgroup to revise the NAIC model(s) prioritized for revision in 2021.
   E. At the direction of the Health Insurance and Managed Care (B) Committee, through the work of the Employee Retirement Income Security Act (ERISA) (B) Working Group, monitor, analyze and report developments related to association health plans (AHPs).
   F. Monitor, analyze and report, as necessary, developments related to short-term, limited-duration (STLD) coverage.

2. The Accident and Sickness Insurance Minimum Standards (B) Subgroup will:
   A. Review and consider revisions to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171).

3. The ERISA (B) Working Group will:
   A. Monitor, report and analyze developments related to the federal ERISA, and make recommendations regarding NAIC strategy and policy with respect to those developments.
   B. Monitor, facilitate and coordinate with the states and the U.S. Department of Labor (DOL) related to sham health plans.
   C. Monitor, facilitate and coordinate with the states and the DOL regarding compliance and enforcement efforts regarding the ACA that relate to ERISA.

4. The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group will:
   A. Monitor, report and analyze developments related to the federal Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 (MHPAEA), and make recommendations regarding NAIC strategy and policy with respect to those developments.
   B. Monitor, facilitate and coordinate best practices with the states, the DOL and the U.S. Department of Health and Human Services (HHS) related to the MHPAEA.
   C. Monitor, facilitate and coordinate with the states and the DOL regarding compliance and enforcement efforts regarding the ACA that relate to the MHPAEA.
   D. Provide supplemental resources to support documentation and reporting in the MHPAEA chapter of the NAIC Market Regulation Handbook.
   E. Coordinate with and provide input to Market Regulation and Consumer Affairs (D) Committee groups, as necessary, regarding mental health parity market conduct examinations.
5. The **Pharmacy Benefit Manager Regulatory Issues (B) Subgroup** will:

   A. Consider developing a new NAIC model to establish a licensing or registration process for pharmacy benefit managers (PBMs). The Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.

   B. **Develop a white paper to:**
      1) analyze and assess the role PBMs, Pharmacy Services Administrative Organizations (PSAOs) and other supply chain entities, play in the provision of prescription drug benefits;
      2) identify, examine and describe current and emerging state regulatory approaches to PBM business practices, such as price transparency and reporting requirements, rebating and spread pricing, including the implications of the *Rutledge vs. Pharmaceutical Care Management Association (PCMA)* decision on such business practices; and
      3) discuss any challenges, if any, the states have encountered in implementing such laws and/or regulations.

NAIC Support Staff: Jolie H. Matthews/Jennifer R. Cook
The mission of the Antifraud (D) Task Force is to serve the public interest by assisting the state insurance supervisory officials, individually and collectively, through the detection, monitoring and appropriate referral for the investigation of insurance crime, both by and against consumers. The Task Force will assist the insurance regulatory community by conducting the following activities: 1) maintain and improve electronic databases regarding fraudulent insurance activities; 2) disseminate the results of research and analysis of insurance fraud trends, as well as case-specific analysis, to the insurance regulatory community; and 3) provide a liaison function between state insurance regulators, law enforcement (federal, state, local and international), and other specific antifraud organizations. The Task Force will also serve as a liaison with the NAIC Information Technology Group (ITG) and other NAIC committees, task forces and/or working groups to develop technological solutions for data collection and information sharing. The Task Force will monitor all aspects of antifraud activities by its working groups on the following charges.

Ongoing Support of NAIC Programs, Products or Services

1. The Antifraud (D) Task Force will:
   A. Work with NAIC committees, task forces and working groups (e.g., Title Insurance (C) Task Force, etc.) to review issues and concerns related to fraud activities and schemes related to insurance fraud.
   B. Coordinate efforts to address national concerns related to agent fraud and activities of unauthorized agents related to insurance sales.
   C. Coordinate the enforcement and investigation efforts of state and federal securities regulators with state insurance fraud bureaus.
   D. Coordinate with state, federal and international law enforcement agencies in addressing antifraud issues relating to the insurance industry.
   E. Review and provide comments to the International Association of Insurance Supervisors (IAIS) on its Insurance Core Principles (ICPs) related to insurance fraud.
   F. Coordinate activities and information from national antifraud organizations and provide information to state insurance fraud bureaus.
   G. Coordinate activities and information with state and federal fraud divisions to determine guidelines that will assist with reciprocal involvement concerning antifraud issues resulting from natural disasters and catastrophes.
   H. Coordinate efforts with the insurance industry to address antifraud issues and concerns.
   I. Evaluate and recommend methods to track national fraud trends.

2. The Antifraud Education Enhancement (D) Working Group will:
   A. Develop seminars, trainings and webinars regarding insurance fraud. Provide three webinars by the 2021 Fall National Meeting.

3. The Antifraud Technology (D) Working Group will:
   A. Review and provide recommendations for the development of an Antifraud Plan Repository to be used by insurers to create and store an electronic fraud plan for distribution among the states/jurisdictions.
   B. Evaluate sources of antifraud data and propose methods for enhancing the utilization and exchange of information among state insurance regulators, fraud investigative divisions, law enforcement officials, insurers, and antifraud organizations. Complete by the 2021 Fall National Meeting.

4. The Improper Marketing of Health Insurance (D) Working Group will:
   A. Coordinate with regulators, both on a state and federal level, to provide assistance and guidance monitoring the improper marketing of health plans, and coordinate appropriate enforcement actions, as needed, with other NAIC Committees, task forces, and working groups.
   B. Review existing NAIC Models and Guidelines that address the use of lead generators for sales of health insurance products, and identify models and guidelines that need to be updated or developed to address current marketplace activities.
2021 Revised Charges

FINANCIAL STABILITY (E) TASK FORCE

The mission of the Financial Stability (E) Task Force is to consider issues concerning domestic or global financial stability as they pertain to the role of state insurance regulators.

Ongoing Support of NAIC Program, Products or Services

1. The Financial Stability (E) Task Force will:
   A. Consider issues concerning domestic and global financial stability as they pertain to the role of state insurance regulators and make recommendations to the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council and/or the Executive (EX) Committee, as appropriate.
      1. Analyze existing post-financial crisis regulatory reforms for their application in identifying macroeconomic trends, including identifying possible areas of improvement or gaps, and propose to the Financial Condition (E) Committee or other relevant committee enhancements and/or additions to further improve the ability of state insurance regulators and the industry to address macroprudential impacts; consult with such committees on implementation, as needed.
   B. Consider state insurance regulators’ input to national and international discussions on macroeconomic vulnerabilities affecting the insurance sector.
      1. Monitor international macroprudential activities at forums like the International Association of Insurance Supervisors (IAIS).
      2. Implement the Macroprudential Initiative (MPI) domestically, which includes enhancements to the U.S. regulatory toolkit as part of the State Ahead initiative.
   C. Serve as a forum to coordinate state insurance regulators’ perspectives on a wide variety of issues arising from the designation of a U.S. insurance group as “systemically important” and “internationally active” both pre- and post-designation, including:
      1. Where appropriate, develop policy recommendations and/or guidance regarding the role, responsibilities and activities of state insurance regulators in the context of consolidated supervision resulting from designation.
      2. Analyze proposed rules by the federal agencies that relate to financial stability.
      3. Analyze proposed policy measures regarding supervisory standards for global systemically important insurers (G-SIIs) and internationally active insurance groups (IAIGs).
      4. Develop comment letters on such analysis for further consideration by the International Insurance Relations (G) Committee, the Government Relations (EX) Leadership Council, and/or the Executive (EX) Committee, as appropriate.

2. The Macroprudential (E) Working Group will:
   A. Oversee the implementation and maintenance of the liquidity stress testing framework for 2020 data as well as future iterations;
   B. Assist with the remaining MPI projects related to counterparty disclosures and capital stress testing as needed;
   C. Continue to develop and administer data collection tools as needed, leveraging existing data where feasible, to provide the Financial Stability (E) Task Force with meaningful macroprudential information regarding how the insurance sector is navigating the prevailing market conditions;
   D. Oversee the development, implementation, and maintenance process for a new Macroprudential Risk Assessment system (i.e., policies, procedures, and tools) to enhance regulators’ ability to monitor industry trends from a macroprudential perspective;
   E. Oversee the documentation of the NAIC’s macroprudential policies, procedures, and tools; and
   F. Provide the Task Force with proposed responses to IAIS and other international initiatives as needed.

The Liquidity Assessment (EX) Subgroup will:
   A. Continue to consider regulatory needs for data related to liquidity risk, and develop recommendations as needed.
   B. Refine and implement a liquidity stress testing framework proposal for consideration by the Financial Condition (E) Committee.
   C. Continue to develop and administer data collection tools, leveraging existing data where feasible, to provide the Financial Stability (EX) Task Force with meaningful macroprudential information regarding how the insurance sector is navigating market conditions affected by the COVID-19 pandemic.

Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.
   American Academy of Actuaries, Life Reserves Work Group

   Addition of language to clarify the definition of individually underwritten life insurance and the
   applicability of Principle-Based Reserve (PBR) requirements for group insurance contracts with individual
   risk selection issued under insurance certificates.

2. Identify the document, including the date if the document is “released for comment,” and the location in
   the document where the amendment is proposed:

   January 1, 2021, version of the Valuation Manual, with the revisions to APF 2020-11 (adopted by LATF
   on 2/11/21) shown in blue text.

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and
   identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in
   Word®) version of the verbiage. (You may do this through an attachment.)

   See Appendix

   All proposed changes specific to this amendment proposal are shown in red text.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

   Individual insurance certificates issued under a group contract which utilize an individual risk selection
   process, pricing, premium rate structures and product features are similar to individual life insurance
   policies. They are currently excluded from VM-20 because they are filed under a group contract, but they
   should be subject to VM-20 due to this similarity. See Appendix.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those
  types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC
  staff support person for the NAIC group where the document originated.

Notes: APF 2019-33
Appendix

Issue

Certain contracts issued under a master group contract require individual risk selection in order to qualify for issuance of the group insurance certificate; the certificates have similar acquisition approaches, provisions, certificate-holder rights, pricing, and risk classification; and they are managed in a similar manner as individual ordinary life insurance contracts. These individual certificates should follow the same reserve requirements as other individual life contracts of the same product type. Therefore, a change is needed within the Valuation Manual to bring these individual certificates into scope of VM-20.

Six changes are recommended:

1) Within the Reserve Requirements section (Section II), change the minimum reserve requirements to also apply to group life contracts which, other than the difference between issuing a policy and issuing a group certificate, have the same or mostly similar contract provisions, risk selection process, and underwriting as individual ordinary life contracts (Section II, subsection 1.D);

2) Within the Reserve Requirements section (Section II), add a transition period for individual group certificates issued on or before 1/1/2024 (Section II, subsections 1.F.1 and 1.F.2);

3) Within the Reserve Requirements section (Section II), add language and guidance note to subsection 1.G and the corresponding footnote to include premiums from group life contracts which have individual certificates that were issued using individual risk selection processes (Section II, subsection 1.G.1, footnote, and guidance note) and to clarify the Calculation for Exemption (Section II, subsection 1.G.2). Comment notes need to refer to NAIC Blanks (E) Working Group to update the PBR Supplement;

4) Add new paragraph, VM-20 Section 1.B (and reformat to make current paragraph Section 1.A) to clarify group life certificates issued using individual risk selection processes, including a definition and requirements to be met, are subject to the requirements of VM-20;

5) Add guidance note after first sentence in VM-20 Section 2.A.1 that group life certificates that meet the definition for individual risk selection process use the same VM-20 Reserving Categories as defined in Section 2;

6) Draft referral to the NAIC Blanks (E) Working Group to revise the VM-20 Reserves Supplement, Part 2 to report premiums for total Group Life and Group Life with certificates subjected to an individual risk selection process and which meet all of the conditions as defined in VM-20 Section 1.B separately.
II. Reserve Requirements

This section provides the minimum reserve requirements by type of product, as set forth in the seven subsections below, as follows:

1. Life Insurance Products
2. Annuity Products
3. Deposit-Type Contracts
4. Health Insurance Products
5. Credit Life and Disability Products
6. Riders and Supplemental Benefits
7. Claim Reserves

All reserve requirements provided by this section relate to business issued on or after the operative date of the Valuation Manual. All reserves must be developed in a manner consistent with the requirements and concepts stated in the Overview of Reserve Concepts in Section I of the Valuation Manual.

Guidance Note: The terms “policies” and “contracts” are used interchangeably.

Subsection 1: Life Insurance Products

A. This subsection establishes reserve requirements for all contracts issued on and after the operative date of the Valuation Manual that are classified as life contracts as defined in SSAP No. 50 in the AP&P Manual, with the exception of annuity contracts and credit life contracts. Minimum reserve requirements for annuity contracts and credit life contracts are provided below in subsection 2 and subsection 5, respectively.

B. Minimum reserve requirements for variable and nonvariable individual life contracts—excluding guaranteed issue life contracts, preneed life contracts, industrial life contracts, and policies of companies exempt pursuant to the life PBR exemption in paragraph D below subsection 1.G are provided by VM-20, Requirements for Principle-Based Reserves for Life Products, except for election of the transition period in paragraph C below subsection 1.F.1 below. For this purpose, joint life policies are considered individual life.

C. Minimum reserve requirements of VM-20 are considered principle-based valuation requirements for purposes of the Valuation Manual.

D. Minimum reserve requirements for individual certificates under group life contracts (regardless of the issue date of the master group life contract) which meet all the requirements in VM-20 Section 1.B are provided by VM-20, except for election of the transition period in subsection 1.F.1 below.

E. Minimum reserve requirements for life contracts not subject to VM-20 are those pursuant to applicable requirements in VM-A and VM-C. For guaranteed issue life contracts issued after Dec. 31, 2018, mortality tables are defined in VM Appendix M, Mortality Tables (VM-M), and the same table shall be used for reserve requirements as is used for minimum nonforfeiture requirements as defined in VM-02, Minimum Nonforfeiture Mortality and Interest.
F. A company may elect to establish minimum reserves pursuant to applicable requirements in VM-A and VM-C for:

1. Business described in subsection 1.D above and issued on or after the operative date of the Valuation Manual and prior to 1/1/2024.

2. Business not described subsection 1.D, otherwise subject to VM-20 requirements and issued during the first three years following the operative date of the Valuation Manual.

A company electing to establish reserves using the requirements of VM-A and VM-C may elect to use the 2017 Commissioners' Standard Ordinary (CSO) Tables as the mortality standard following the conditions outlined in VM-20 Section 3. If a company during the three years elects to apply VM-20 to a block of such business, then a company must continue to apply the requirements of VM-20 for future issues of this business.

G. Life PBR Exemption

1. A company meeting the at least one of the conditions in subsection 1.G.2 below may file a statement of exemption for individual ordinary life insurance policies or certificates, except for policies or certificates in subsection 1.G.3 below, issued directly or assumed during the current calendar year, that would otherwise be subject to VM-20. If a company has no business issued directly or assumed during the current calendar year that would otherwise be subject to VM-20, a statement of exemption is not required. For a filed statement of exemption, the statement must be filed with the domiciliary commissioner prior to July 1 of that year certifying that at least one of the two conditions in subsection 1.G.2 was met, and the statement of exemption must also be included with the NAIC filing for the second quarter of that year.

The domiciliary commissioner may reject such statement prior to September 1 and require the company to follow the requirements of VM-20 for the ordinary life policies or certificates covered by the statement.

If a filed statement of exemption is not rejected by the domiciliary commissioner, the filing of subsequent statements of exemption is not required as long as the company continues to qualify for the exemption; rather, ongoing statements of exemption for each new calendar year will be deemed to not be rejected, unless: 1) the company does not meet either condition in subsection 1.G.2 below, 2) the policies or certificates contain those in subsection 1.G.3 below, or 3) the domiciliary commissioner contacts the company prior to Sept. 1 and notifies them that the statement of exemption is rejected. If any of these conditions occur, then the statement of exemption for the current calendar year is rejected and a new statement of exemption must be filed and not rejected in order for the company to exempt additional policies or certificates. If the company elects to provide an ongoing statement of exemption, rather than include a statement of exemption with the NAIC filing for the second quarter of that year, the company should enter “SEE EXPLANATION” in response to the Life PBR Exemption supplemental interrogatory and provide as an explanation that the company is utilizing an ongoing statement of exemption.

2. Condition for Exemption:

- The company has less than $300 million of ordinary life exemption premiums, and if the company is a member of an NAIC group of life insurers which includes other life insurance companies, the group has combined ordinary life exemption premiums of less than $600 million. The only new policies or certificates that would otherwise be subject to VM-20 being issued or assumed by the company are due to election of policy benefits or features from existing policies or certificates valued under VM-A and VM-C, and the company was exempted from, or otherwise not subject to, the requirements of VM-20 in the prior year.

Exemption premium is determined as follows:
a. The amount reported in the prior calendar year life/health annual statement, Exhibit 1, Part 1, Column 3 (“Ordinary Life Insurance”), line 20.1; plus 
b. The portion of the amount in the prior calendar year life/health annual statement, Exhibit 1, Part 1, Column 3 (“Ordinary Life Insurance”), line 20.2 assumed from unaffiliated companies; minus 
c. Amounts included in either (a) or (b) that are associated with guaranteed issue insurance policies and/or preneed life insurance policies; minus 
d. Amounts included in either (a) or (b) that represent transfers of reserves in force as of the effective date of a reinsurance assumed transaction; plus 
e. Amounts of premium for individual life certificates issued under a group life certificate which meet the conditions defined in VM-20, Section 1.B, and that are not included in either (a) or (b).

Guidance Note: 
(i) Definitions of preneed and guaranteed issue insurance policy are in VM-01.
(ii) For statements of exemption filed for calendar year 2022 and beyond, the amount in subsection 2.e was reported in the prior calendar year life/health annual statement, VM-20 Reserve Supplement, Part 2, if applicable.

3. Policies and Certificates Excluded from the Life PBR Exemption:

   a. Universal life with secondary guarantee (ULSG) policies or certificates, or policies or certificates – other than ULSG – that contain a rider with a secondary guarantee, in which the secondary guarantee does not meet the VM-01 definition of a "non-material secondary guarantee.”

4. Each exemption, or lack of an exemption, outlined in subsection 1.G.1 – subsection 1.G.3 above applies only to policies or certificates issued or assumed in the current year, and it applies to all future valuation dates for those policies or certificates. However, if policies or certificates did not qualify for the Life PBR Exemption during the year of issue but would have qualified for the Life PBR Exemption if the current Valuation Manual requirements had been in effect during the year of issue, then the domiciliary commissioner may allow an exemption for such policies or certificates. The minimum reserve requirements for the ordinary life policies, including individual certificates under group life contracts which meet all the requirements in VM-20 Section 1.B, subject to the exemption are those pursuant to applicable methods required in VM-A and VM-C using the mortality as defined in VM-20 Section 3.C.1 and VM-M Section 1.H.

VM Change 4 – VM-20: Requirements for Principle-Based Reserves for Life Products

VM-20: Requirements for Principles-Based Reserves for Life Products

Section 1: Purpose

A. These requirements establish the minimum reserve valuation standard for individual life insurance policies issued on or after the operative date of the Valuation Manual and subject to a principle-based valuation with an NPR floor under Model #20. These requirements constitute the Commissioners Reserve Valuation Method (CRVM) for policies of individual life insurance.
B. Individual life certificates under a group life contract shall be subject to the requirements of VM-20 if all of the following are met. These requirements constitute the Commissioners Reserve Valuation Method (CRVM) for such certificates.

1. An individual risk selection process, defined as follows, is used to obtain group life insurance coverage;

An individual risk selection process is one that is based on characteristics of the insured(s) beyond sex, gender, age, tobacco usage, and membership in a particular group. This may include, but is not limited to, completion of an application (beyond acknowledgement of membership to the group, sex, gender and age), questionnaire(s), online health history or tele-interview to obtain non-medical and medical or health history information, prescription history information, avocations, usage of tobacco, family history, or submission of fluids such as blood, Home Office Specimens (HOS), or oral fluid. The resulting risk classification is determined based on the characteristics of the individual insured(s) rather than the group, if any, of which it is a member (e.g., employer, affinity, etc.). The individual certificate holder is charged a premium rate based solely on the individual risk selection process and not on membership in a specific group.

Guidance Note: The use of evidence of insurability does not by itself constitute an individual risk selection process. Use of information obtained from a census or question(s) regarding gender, occupation, age, income and/or tobacco usage solely for purposes of determining a rate classification does not by itself qualify a group as having used an individual risk selection process. Group insurance where the underwriting based on the characteristics of the group and census data but where some individuals are subjected to individual risk selection as a result of compensation level, age, an existing medical condition or impairment, late entry into the group, failure of the group to meet minimum participation requirements or voluntary buy-up of increased coverage does not meet the definition of an individual risk selection process.

2. The individual certificates utilize premiums or cost of insurance schedules and charges based on the individual applicant’s issue age, duration from underwriting, coverage amount and risk classification and there is a stated or implied schedule of maximum gross premiums or net cash surrender value required in order to continue coverage in force for a period in excess of one year;

Guidance Note: Coverage amount does not imply a requirement for banding of premiums or charges but rather rates or charges that are multiplied by number of units of coverage of face amount (or net amount at risk) per $1,000 to obtain the actual premium or charge.

3. The group master contract is designed, priced, solicited, and managed similar to individual ordinary life insurance policies rather than specific to the group as a whole;

4. The individual certificates have similar acquisition approaches, provisions, certificate-holder rights, pricing, and risk classification to individual ordinary life insurance contracts.

5. The individual certificates are issued on or after the operative date of the Valuation Manual except election of the transition period in Section 2, subsection 1.F.1.
VM Change 5 - VM-20: Requirements for Principle-Based Reserves for Life Products

Section 2: Minimum Reserve

A. All policies subject to these requirements shall be included in one of the VM-20 Reserving Categories, as specified in Section 2.A.1, Section 2.A.2 and Section 2.A.3 below.

Guidance Note: Since group insurance subject to an individual risk selection process and meeting all the requirements in Section 1.B is subject to VM-20 requirements, Section 2.A shall apply—meaning that any such contracts will be included in one of the VM-20 Reserving Categories defined by Section 2.A.1, Section 2.A.2, and 2.A.3. All requirements in VM-31 which apply to a VM-20 Reserving Category shall apply to any group insurance subject to individual risk selection that has been included in that VM-20 Reserving Category.

The company may elect to exclude one or more groups of policies from the stochastic reserve calculation and/or the deterministic reserve calculation. When excluding a group of policies from a reserve calculation, the company must document that the applicable exclusion test defined in Section 6 is passed for that group of policies. The minimum reserve for each VM-20 Reserving Category is defined by Section 2.A.1, Section 2.A.2 and Section 2.A.3, and the total minimum reserve equals the sum of the Section 2.A.1, Section 2.A.2 and Section 2.A.3 results below, defined as:
Refer to NAIC Blanks (E) Working Group, request for modification to the supplemental report for the Life PBR Exemption, to show the premiums for group life that utilized an individual risk selection process and meets all of the requirements in VM-20 Section 1.B. as these premiums are currently grouped together with other group insurance in Exhibit 1. As there are other instances where the ordinary life premiums are not included in the determination of the Life PBR Exemption (e.g., for guaranteed issue policies), it may be useful to request addition of the breakdown of premiums used to determine the exemption.

Possible insertion between questions 1 and 2 for disclosure of premiums used in the determination of eligibility for the Life PBR exemption, split by ordinary life and group subject to an individual risk selection process and meeting all of the requirements in VM-20 Section 1.B.

ISSUE:

Skipping steps in VM-20 is not allowed on grounds of immateriality. Some companies are skipping some VM-20 requirements altogether, without providing a simplification, approximation, or modeling technique that satisfies the VM-20 Section 2.G requirement that such simplifications neither materially understate nor downwardly bias the reserves. Simply skipping portions of the requirements, such as not computing an NPR, or not computing the DR and/or SR when exclusion tests have not been performed, inherently bias the reserve downward since their omission can only be neutral or decrease the resulting reserve. Without computing even a simplified model for Section 2.G analysis that shows there is not a decrease in the final reserve, this makes the skipping of the step violate Section 2.G. This APF clarifies that these types of omissions are not allowed. This has always been the case, but perhaps needs more emphasis in the Valuation Manual.

SECTION:

VM-20 Section 2.H and new Section 2.I, and VM-20 Section 7.E.1.g

REDLINE:

VM-20 Section 2.H

H. The company shall establish, for the DR and SR, a standard containing the criteria for determining whether an assumption, risk factor or other element of the principle-based valuation has a material impact on the size of the reserve. This standard shall be applied when identifying material risks under VM-20 Section 9.B.1. Such a standard shall also apply to the NPR with respect to VM-20 Section 2.G.

Guidance Note:

For example, the standard may be expressed as an impact of more than X dollars or Y% of the reserve, whichever is greater, where X and Y are chosen in a manner that is meant to stand the test of time and not need periodic revision.

The standard is based on the impact relative to the size of the NPR, DR and SR as opposed to the impact relative to the overall financial statement (e.g., total company reserves or surplus). Reviewing items that may lead to a material misstatement of the financial statement in the current year is appropriate in its own context, but it is not appropriate for identifying material risks for PBR, which itself is an emerging risk.

Note that the criteria apply to the NPR, DR and SR, and not just the final reported reserve. For example, if the DR is less than the NPR, the criteria still apply to the DR.

The standard also applies to exclusion tests, as they are an element of the principle-based valuation.
(new) VM-20 Section 2.I

I. Section 2.G and Section 2.H provide companies some flexibility in assumption setting and modeling methodologies, but they do not allow for skipping mandated steps without providing a valid approximation, simplification, or modeling technique under Section 2.G that neither materially understates nor downwardly biases the reserve.

Examples of omissions that would not satisfy VM-20 Section 2.G: not computing even a simplified NPR, not computing even a simplified DR or SR without having passed the relevant exclusion test(s), omitting prescribed mortality margins, not establishing any lapse margins, not building even a simplified asset model for the DR, using the alternative investment strategy without first determining that it produces a higher reserve than the company investment strategy, and ignoring post-level term losses.

Guidance Note: The issue here is not the use of approximations; it is about skipping mandated VM-20 requirements. Thus, for example, this does not rule out the use of a relatively simple asset model that is acceptable pursuant to VM-20 Section 7.E.1.a, nor the judicious use of the previous year’s assumption development work to save time and effort.

VM-20 Section 7.E.1.g Guidance Note

Guidance Note: VM-31 requires a demonstration of compliance with VM-20 Section 7.E.1.g. In many cases, particularly if the model investment strategy does not involve callable assets, it is expected that the demonstration of compliance will not require running the reserve calculation twice. For example, an analysis of the weighted average net reinvestment spread on new purchases by projection year (gross spread minus prescribed default costs minus investment expenses) of the model investment strategy compared to the weighted average net reinvestment spreads by projection year of the alternative strategy may suffice. The assumed mix of asset types, asset credit quality or the levels of non-prescribed spreads for other fixed income investments may need to be adjusted to achieve compliance. Or, the company may be able to rely on a previous year’s determination as to which strategy produces a higher reserve, if the assets and strategy have not changed very substantially since then.
REASONING:

Some companies have mistakenly believed that it was permissible to skip certain significant steps outlined in VM-20, without using a valid approximation or simplification that they have shown does not materially understate or bias reserves in a downward direction.

Note: Comment letters were received on an earlier draft of this APF, in response to which this newer version has eliminated any mention of PIMR and has made it clearer that a simplified asset model may in some circumstances be acceptable and that a full-blown run of both the actual investment strategy and the alternative investment strategy is not necessarily something that has to be done every year.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
Rachel Hemphill, Texas Department of Insurance

Title of the Issue:
Clarify NPR calculation requirements.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-20 Section 3.B.1 – 3.B.3, and VM-20 Section 3.B.6.d.i

January 1, 2020 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Clarify any confusion on whether more direct calculations of the NPR to reflect non-annual premium modes, etc., are allowed. The current guidance note in Section 3.B.3 states that these may be reflected either “directly or through adjusting accounting entries”. However, due to some confusion on this point, I suggest emphasizing that more direct calculation methods are not prohibited. This is consistent with SSAP 51R, Paragraph 24:

24. Since terminal reserves are computed as of the end of a policy year and not the reporting date, the terminal reserve as of policy anniversaries immediately prior and subsequent to the reporting date are adjusted to reflect that portion of the net premium that is unearned at the reporting date.
This is generally accomplished using either the mean reserve method or the mid-terminal method as discussed in paragraphs 25-28. Other appropriate methods, including an exact reserve valuation, may also be used.

For re-exposure, to address both the question posed in the initial exposure of clearly reflecting both mean and mid-terminal adjustments, as well as to address comments received, I recommend language consistent with SSAP 51R, paragraph 24. SSAP 51R paragraphs 25–28 are referenced by paragraph 24. They are provided below for completeness, and specific references for policies subject to the Valuation Manual are highlighted.

**Mean Reserve Method**

25. Under the mean reserve method, the policy reserve equals the average of the terminal reserve at the end of the policy year and the initial reserve (the initial reserve is equal to the previous year’s terminal reserve plus the net annual valuation premium for the current policy year). When reserves are calculated on the mean reserve basis, it is assumed that the net premium for a policy is collected annually at the beginning of the policy year and that policies are issued ratably over the calendar year.

26. However, as premiums are often received in installments more frequently than annually and since the calculation of mean reserves assumes payment of the current policy year’s entire net annual premium, the policy reserve is overstated by the amount of net modal premiums not yet received for the current policy year as of the valuation date. As a result, it is necessary to compute and report a special asset to offset the overstatement of the policy reserve.

27. This special asset is termed “deferred premiums.” Deferred premiums are computed by taking the gross premium (or premiums) extending from (and including) the modal (monthly, quarterly, semiannual) premium due date or dates following the valuation date to the next policy anniversary date and subtracting any such deferred premiums that have actually been collected. Deferred premium assets shall also be reduced by loading. Since the calculation of mean reserves assumes payment of the current policy year’s entire net annual premium, deferred premium assets are considered admitted assets to compensate for the overstatement of the policy reserve. For policies subject to the Valuation Manual requirements, the deferred premium asset will continue to be calculated for the net premium reserve component of the total principle-based reserve.

**Mid-Terminal Method**

28. Under the mid-terminal method, the policy reserves are calculated as the average of the terminal reserves on the previous and the next policy anniversaries. These reserves shall be accompanied by an unearned premium reserve consisting of the portion of valuation premiums paid or due covering the period from the valuation date to the next policy anniversary date. For policies subject to the Valuation Manual requirements, the adjustment to the unearned premium reserve will continue to be calculated for the net premium reserve component of the total principle-based reserve.

Since the guidance note at the end of Section 3.B.3 contains requirements and not just guidance, it should be taken out of a guidance note. This requires moving the four terms to Section 3.B.1 and updating two cross references in VM-20 Section 3.B.6.d.i.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. These types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

NAIC Staff Comments
VM-20 Section 3.B.1 – 3.B.3

B. NPR Calculation

1. For the purposes of Section 3, the following terms apply:
   a. A policy with “multiple secondary guarantees” is one that: a) simultaneously has more than
      one shadow account; b) simultaneously has more than one cumulative premium type of
      guarantee; or c) simultaneously has at least one of each. A single shadow account with a variety
      of possible end dates to the secondary guarantee, depending on the policyholder’s choice of
      funding level, constitutes a single—not multiple—secondary guarantee.

Guidance Note:
Policy designs that are created simply to disguise guarantees or exploit a perceived loophole must
be treated in a manner similar to more typical product designs with similar guarantees. If a policy
contains multiple secondary guarantees, such that a subset of those secondary guarantees in
combination represent an implicit guarantee that would produce a higher NPR if that implicit
guarantee were treated as an explicit secondary guarantee of the policy, then the policy should be
treated as if that implicit guarantee were an explicit guarantee. For example, if there were a policy
with a “sequential secondary guarantee” where only one secondary guarantee applied at any given
point in time but with a series of secondary guarantees strung together with one period ending when
the next one began, the combined terms of the secondary guarantees would be regarded as a single
secondary guarantee.

b. The “fully funded secondary guarantee” at any time is:
   1. For a shadow account secondary guarantee, the minimum shadow account fund value
      necessary to fully fund the secondary guarantee for the policy at that time. For any policy
      for which the secondary guarantee contractually cannot be fully funded in advance, this
      shall be the present value of the contractually permitted premium stream that would fully
      fund the guarantee at the earliest possible date (using the valuation interest rate and
      mortality standard specified in Section 3.C).
   2. For a cumulative premium secondary guarantee, the amount of cumulative premiums
      required to have been paid to that time that would result in no future premium requirements
      to fully fund the guarantee, accumulated with any interest or accumulation factors per the
      contract provisions for the secondary guarantee. For any policy for which the secondary
      guarantee contractually cannot be fully funded in advance, this shall be the present value
      of the contractually permitted premium stream that would fully fund the guarantee at the
      earliest possible date (using the valuation interest rate and mortality standard specified in
      Section 3.C).

c. The “actual secondary guarantee” at any time is:
   1. For a shadow account secondary guarantee, the actual shadow account fund value at that
      time.
   2. For a cumulative premium secondary guarantee, the actual premiums paid to that point
      in time, accumulated with any interest or accumulation factors per the contract provisions
      for the secondary guarantee.

d. The “level secondary guarantee” at any time is:
   1. For a shadow account secondary guarantee, the shadow account fund value that would
      have existed at that time assuming payment of the level gross premium determined
      according to Section 3.B.6.c.i.
ii. For a cumulative premium secondary guarantee, the amount of cumulative level gross premiums determined according to Section 3.B.6.c.i, accumulated with any interest or accumulation factors per the contract provisions for the secondary guarantee.

2. Section 3.B.4, Section 3.B.5 and Section 3.B.6 provide the calculation of a terminal NPR under the assumption of an annual mode gross premium. In Section 3.B.4, Section 3.B.5 and Section 3.B.6, the gross premium referenced is the gross premium for the policy assuming an annual premium mode.

3. Since terminal NPRs are computed as of the end of a policy year and not the reporting date, the terminal NPR as of policy anniversaries immediately prior and subsequent to the reporting date are adjusted to reflect that portion of the net premium that is unearned at the reporting date. This is generally accomplished using either the mean reserve method or the mid-terminal method as discussed in SSAP 51R. Other appropriate methods, including an exact reserve valuation, may also be used.

VM-20 Section 3.B.6.d.i

As of the valuation date for the policy being valued, determine the actual secondary guarantee, denoted ASGx+t, as outlined in Section 3.B.4.c and the fully funded secondary guarantee, denoted FFSGx+t, as outlined in Section 3.B.1.b.

Amendment Proposal Form

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Tim Cardinal, FSA, MAAA, CERA. Cardinalis 1 Consulting.
Clarity and introduce a third permissible technique for the calculation of company experience rates.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached Appendix.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

See attached Appendix and Excel file.
Appendix

SECTION:

REDLINE:
9.C.2.d.vi. If the company uses the aggregate comp any experience for a group of mortality segments when determining the company experience mortality rates for each of the individual mortality segments in the group, the company shall use one of the following methods:

a. Use techniques to further subdivide the aggregate experience into the various mortality segments (e.g., start with aggregate non-smoker and then use the conservation of total deaths principle, normalization or other approach to divide the aggregate mortality into super preferred, preferred and residual standard non-smoker class assumptions).

b. Use techniques to adjust the experience of each mortality segment in the group to reflect the aggregate company experience for the group (e.g., by credibility weighting the individual mortality segment experience with the aggregate company experience for the group).

c. Use a two-step sequential method, which
   1) forms subgroups which are groups of mortality segments and are subsets of the aggregate class of mortality segments being aggregated,
   2) uses techniques as in (b) to adjust the experience of each subgroup from (1) to reflect the aggregate company experience for the group and conserve deaths, and
   3) finally, uses techniques as in (a) to further subdivide the subgroups' adjusted experience from (2) into the various mortality segments while conserving each subgroup's deaths determined in step (2)'s conservation of deaths.

For example, if mortality segments vary by sex, risk class, and face bands, then
   1) segments that differ by face band are aggregated to form subgroups that vary just by sex and risk class,
   2) the subgroups' mortality experience is credibility weighted with the aggregate company experience for the group and normalized, and
   3) the subgroups' adjusted mortality experience are then subdivided into the various mortality segments based on credible, external face band relativities and conservation of deaths is applied to each subgroup's normalized deaths determined in (2).

REASONING:
A minor point is clarity. “Either” can mean one or both. The intent is one of a) or b) but not both. The major issue is both a) and b) have weaknesses in contexts with high levels of granularity resulting in a large number of mortality segments such as 120 or 360 segments. For example consider a block with 360 mortality segments determined by 2 sexes x 6 risk classes x 5 face bands x 3 product types x 2 underwriting types (such as full and accelerated). A company may have very high credibility for each of the 12 segments as determined by 2 sexes x 6 risk classes but have very low credibility for each of the 360 segments. Both a) and b) could produce company experience rates that negate the very reasons a company uses a high level of granularity. Using b) for example, all segment rates would be equal to the aggregate A/E rates, which is equivalent to no granularity. By applying b) to subgroups and applying a) to divide the subgroups, the proposed technique c) is more robust drawing upon a) and b)'s strengths.
while mitigating their weakness. If there is one subgroup which is the aggregate then a) is a special case of c). If each subgroup is a segment then b) is a special case of c). See the attached excel file that adds two examples to the NAIC examples for a) and b). Example 8 is an example of a correct way to apply c) and Example 9 is an incorrect way.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
Rachel Hemphill, Texas Department of Insurance

Title of the Issue:
1. Modify Life PBR Exemption to not require annual exemption requests if the company continues to
meet the premium thresholds and does not have any ULSG with material SG.
2. Not require VM-20 when all new issues arise due to policyholders exercising guarantees or options
(e.g. for conversion) in existing policies valued under VM-A/VM-C.

2. Identify the document, including the date if the document is “released for comment,” and the location in
the document where the amendment is proposed:
Valuation Manual Section II, Subsection 1.D
January 1, 2020 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and
identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in
Word®) version of the verbiage. (You may do this through an attachment.)
See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)
Reduce filing burden for companies and state regulators by making the Life PBR Exemption a one-time
filing until conditions for the exemption change. Allow exemption for companies that do not meet the
premium thresholds, but are only issuing new policies that would be subject to VM-20 due to policyholders
exercising guarantees or options (e.g. for conversion) from existing policies being valued under the pre-
PBR framework.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by
the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

NAIC Staff Comments:
Valuation Manual Section II, Subsection 1.D

D. Life PBR Exemption

1. A company meeting at least one of the conditions in D.2 below may file a statement of exemption for ordinary life insurance policies, except for policies in D.3 below, issued directly or assumed during the current calendar year, that would otherwise be subject to VM-20. If a company has no business issued directly or assumed during the current calendar year that would otherwise be subject to VM-20, a statement of exemption is not required. For a filed statement of exemption, the statement must be filed with the domiciliary commissioner prior to July 1 of that year certifying that at least one of the two conditions in D.2 was met and the statement of exemption must also be included with the NAIC filing for the second quarter of that year.

The domiciliary commissioner may reject such statement prior to Sept. 1 and require the company to follow the requirements of VM-20 for the ordinary life policies covered by the statement.

If a filed statement of exemption is not rejected by the domiciliary commissioner, the filing of subsequent statements of exemption is not required as long as the company continues to qualify for the exemption; rather, ongoing statements of exemption for each new calendar year will be deemed not to be rejected, unless: 1) the company fails to meet either condition in D.2 below, 2) the policies contain those in D.3 below, or 3) the domiciliary commissioner contacts the company prior to Sept. 1 and notifies them that the statement of exemption is rejected. If any of these three events occur, then the statement of exemption for the current calendar year is rejected and a new statement of exemption must be filed and not rejected in order for the company to exempt additional policies. In the case of an ongoing statement of exemption, rather than include a statement of exemption with the NAIC filing for the second quarter of that year, the company should enter “SEE EXPLANATION” in response to the Life PBR Exemption supplemental interrogatory and provide as an explanation that the company is utilizing an ongoing statement of exemption.

2. Conditions for Exemption:
   a. The company has less than $300 million of ordinary life premiums, and if the company is a member of an NAIC group of life insurers, the group has combined ordinary life premiums of less than $600 million.
   b. The only new policies subject to VM-20 being issued or assumed by the company are due to election of policy benefits or features from existing policies that are being valued under VM-A and VM-C and the company was exempted from, or otherwise not subject to, the requirements of VM-20 in the prior year.

3. Policies Excluded from the Life PBR Exemption:
   a. Universal life with secondary guarantee (ULSG) policies with a secondary guarantee that does not meet the VM-01, Definitions for Terms in Requirements, definition of a “non-material secondary guarantee.”

4. Each exemption, or lack of an exemption, applies only to policies issued or assumed in the current year, and it applies to all future valuation dates for those policies. The minimum reserve requirements for the ordinary life policies subject to the exemption are those pursuant to applicable methods required in VM-A and VM-C using the mortality as defined in VM-20 Section 3.C.1 and VM-M Section 1.H.
Valuation Manual Section II, Subsection 1.D - Footnote

1 Premiums are measured as total (first year, single, and renewal) direct plus total (first year, single, and renewal) reinsurance assumed from an unaffiliated company from the ordinary life line of business reported in the prior calendar year life/health annual financial statement, Exhibit 1, Part 1, Column 3, “Ordinary Life Insurance” excluding premiums for guaranteed issue policies and preneed life contracts and excluding amounts that represent the transfer of reserves in force as of the effective date of a reinsurance assumed transaction and are reported in Exhibit 1 Part 1, Column 3 as ordinary life insurance premium. Preneed is as defined in VM-01.

Amendment Proposal Form 2020-10
Exposed for a 12-day public comment period ending June 7, 2021

Request for Comment: During the exposure, commenters are specifically asked to address the four versions exposed for the handling of YRT for the 2017-2019 issue years.

Please submit comments to Reggie Mazyck (RMazyck@naic.org) by COB 5/25/21.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Reflect a prudent level of mortality improvement beyond the valuation date.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached Appendix.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

We propose to reflect a prudent level of mortality improvement beyond the valuation date, using SOA analysis for best estimate future mortality improvement and margin. The requirements also need to be clarified for the handling of historical or anticipated future mortality deterioration (i.e., negative improvement).

With the reflection of a prudent level of future mortality improvement in the mortality assumption, the interim 1/2cx approach to YRT is a reasonable consideration for a long-term approach.

For LATF consideration for re-exposure, there are four versions of the handling of the 2017-2019 issue year carveout from the interim YRT solution: 1) the original exposure, removing the carveout with the 1/2cx being made a longer term approach, 2) a modified version that removes the carveout, but makes that removal contingent on the first set of SOA future mortality rates being adopted, in case of delay, 3) a modified version that removes the carveout, but allows for a phase-in of the effect of this change, and 4) a version making the carveout long-term. These versions are presented starting on Page 6 of this document, after the other edits which do not vary based on this options.
Appendix

VM-20 Section 6.A.2.b.v:

v. Anticipated mortality improvement beyond the projection start date shall be reflected in the mortality assumption for the purpose of calculating the stochastic exclusion ratio. The future mortality improvement factors shall be no greater than the unloaded factors determined by the SOA, adopted by LATF, and published on the SOA website, at [link/reference to SOA site TBD].

Guidance Note: Mortality improvement may be positive or negative (i.e., deterioration). The anticipated mortality improvement may be lower than the rates published by the SOA, for example, if the company’s best estimate for mortality improvement for a particular block, such as simplified issue, is lower. Prior to adoption by LATF of the first set of future mortality improvement factors, the future mortality improvement rates shall be 0%.

To allow time for companies to reflect the updated mortality improvement rates, the rates that are to be used in the year-end YYYY valuation should be adopted by LATF and published on the SOA website by September of YYYY. If this timeline is not met, then at the company’s option they may use the mortality improvement rates for the prior year (year YYYY-1).

VM-20 Section 9.C.2.h:

h. Mortality improvement shall not be incorporated beyond the valuation date in the company experience mortality rates. However, historical mortality improvement from the central point of the underlying company experience data to the valuation date may be incorporated.

Guidance Note: Future mortality improvement is not applied to the company experience mortality rates, since it would be duplicative of the future mortality improvement that is applied to the prudent estimate assumptions for mortality in Section 9.C.7.f.

VM-20 Section 9.C.3.g:

g. Mortality improvement shall not be incorporated beyond the valuation date in the industry basic table. However, historical mortality improvement from the date of the industry basic table (e.g., Jan. 1, 2008, for the 2008 VBT and July 1, 2015, for the 2015 VBT) to the valuation date shall be incorporated using the improvement factors for the applicable industry basic table as determined by the SOA, adopted by LATF, and published on the SOA website, https://www.soa.org/research/topics/indiv-val-exp-study-list/ (Mortality Improvement Rates for AG-38 for Year-End YYYY).

Guidance Note: Future mortality improvement is not applied to the industry basic table, since it would be duplicative of the future mortality improvement that is applied to the prudent estimate assumptions for mortality in Section 9.C.7.f.
To allow time for companies to reflect the updated mortality improvement rates, the rates that are to be used in the year-end YYYY valuation should be adopted by LATF and published on the SOA website by September of YYYY. If this timeline is not met, then at the company’s option they may use the most recent set of prior mortality improvement rates adopted by LATF and published on the SOA website.

VM-20 Section 9.C.7.a:
If applicable industry basic tables are used in lieu of company experience as the anticipated experience assumptions, or if the level of credibility of the data as provided in Section 9.C.5 is less than 20%, the prudent estimate assumptions for each mortality segment shall equal the respective mortality rates in the applicable industry basic tables as provided in Section 9.C.3, adjusted as necessary pursuant to Section 9.C.7.e and for any applicable improvement pursuant to Section 9.C.3.g, plus the prescribed margin as provided in Section 9.C.6.c, plus any applicable additional margin pursuant to Section 9.C.6.d.v and/or Section 9.C.6.d.vi. Future mortality improvement, pursuant to Section 9.C.7.f, shall be applied to the prudent estimate assumption for mortality.

Section 9.C.7.b.vi:
Beginning in the first policy duration after policy duration E, the prudent estimate mortality assumptions for each policy in a given mortality segment are determined as a weighted average of the company experience mortality rates with margins and the applicable industry basic table with margins, in which the weights on the company rates grade linearly from 100% down to 0%. This grading must be completed—i.e., must reach 100% of industry table—no later than the beginning of the first policy duration after policy duration Z (the determination of the applicable industry basic table is described in Section 9.C.3). Thus, the prudent estimate mortality rate, prior to any adjustments pursuant to Sections 9.C.7.c, 9.C.7.d, 9.C.7.e and 9.C.7.f below, is:

VM-20 Section 9.C.7.f (new section):
Twenty years of future mortality improvement that the company anticipates beyond the valuation date shall be applied to the prudent estimate assumptions for mortality, using prudent future mortality improvement factors no greater than the loaded factors determined by the SOA, adopted by LATF, and published on the SOA website, at [link/reference to SOA site TBD].

Guidance Note: Mortality improvement may be positive or negative (i.e., deterioration). The anticipated mortality improvement may be lower than the rates published by the SOA, even zero, for example, if the company’s best estimate for mortality improvement for a particular block, such as simplified issue, is lower. Prior to adoption by LATF of the first set of future mortality improvement factors, the future mortality improvement rates shall be 0%.

To allow time for companies to reflect the updated mortality improvement rates, the rates that are to be used in the year-end YYYY valuation should be adopted by LATF and published on the SOA website by September of YYYY. If this timeline is not met, then at the company’s option they may use the mortality improvement rates for the prior year (year YYYY-1).
VM-31 Section 3.D.3.i:

i. **Mortality Improvement** – Description of and rationale for the mortality improvement assumptions applied up to the valuation date and the mortality improvement assumptions applied beyond the valuation date. Such a description shall include the assumed start and end dates of the improvements and a table of the annual improvement percentage(s) used, both without and with margin, separately for company experience and the industry basic table(s), along with a sample calculation of the adjustment (e.g., for a male preferred nonsmoker age 45).

VM-31 Section 3.D.11.c.i:

i. If the company believes the method used to determine anticipated experience mortality assumptions includes an implicit margin, the company can adjust the anticipated experience assumptions to remove this implicit margin for this reporting purpose only. If any such adjustment is made, the company shall document the rationale and method used to determine the anticipated experience assumption.

*Deleted*: Adjustments for any adjustments to mortality assumptions for...
C. Reflection of Reinsurance Cash Flows in the Deterministic Reserve or Stochastic Reserve

For non-guaranteed YRT reinsurance ceded or assumed, the cash-flow modeling requirements in Sections 8.C.1 through 8.C.14 below do not apply since non-guaranteed YRT reinsurance ceded or assumed does not need to be modeled; see Section 8.C.18 below. YRT shall include other reinsurance arrangements that are similar in effect to YRT.

VM-20 Section 8.C.18 and Guidance Note:

18.

When the reinsurance ceded or assumed is on a non-guaranteed YRT or similar basis, the corresponding reinsurance cash flows do not need to be modeled. Rather, for a ceding company, the post-reinsurance-ceded DR or SR shall be the pre-reinsurance-ceded DR or SR pursuant to Section 8.D.2, plus any applicable provision pursuant to Section 8.C.15 and Section 8.C.17, minus the NPR reinsurance credit from Section 8.B. For an assuming company, the DR or SR for the business assumed on a non-guaranteed YRT or similar basis shall be set equal to the NPR from Section 3.B.8, plus any applicable provision pursuant to Section 8.C.16 and Section 8.C.17. In the case where there are also other reinsurance arrangements that are not on a non-guaranteed YRT or similar basis, the reinsurance credit shall include the modeled reinsurance credit reflecting those other reinsurance arrangements. In particular, where there are also other reinsurance arrangements that are dependent on the non-guaranteed YRT or similar actuarial judgment shall be used to project cash flows consistent with the above outlined treatment for non-guaranteed YRT or similar arrangements.

Deleted: For policies issued on or after Jan. 1, 2020, and optionally for policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020:

The above method is an interim approach. A longer-term solution to YRT is intended to be adopted by state insurance regulators, after state insurance regulators and industry have had additional time to consider and evaluate the variety of approaches that have been put forward as a potential long-term solution.
2017-2019 for Long-Term YRT – Version 2:

VM-20 Section 8.C, introductory paragraph:

C. Reflection of Reinsurance Cash Flows in the Deterministic Reserve or Stochastic Reserve

For policies issued on or after Jan. 1, 2020, and optionally for policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020 up until adoption by LATF of the first set of unloaded future mortality improvement factors, at which point this shall apply for all policies issued on or after Jan. 1, 2017:

For non-guaranteed YRT reinsurance ceded or assumed, the cash-flow modeling requirements in Sections 8.C.1 through 8.C.14 below do not apply since non-guaranteed YRT reinsurance ceded or assumed does not need to be modeled; see Section 8.C.18 below. YRT shall include other reinsurance arrangements that are similar in effect to YRT.

VM-20 Section 8.C.18 and Guidance Note:

18. For policies issued on or after Jan. 1, 2020, and optionally for policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020 up until adoption by LATF of the first set of unloaded future mortality improvement factors, at which point this shall apply for all policies issued on or after Jan. 1, 2017:

When the reinsurance ceded or assumed is on a non-guaranteed YRT or similar basis, the corresponding reinsurance cash flows do not need to be modeled. Rather, for a ceding company, the post-reinsurance-ceded DR or SR shall be the pre-reinsurance-ceded DR or SR pursuant to Section 8.D.2, plus any applicable provision pursuant to Section 8.C.15 and Section 8.C.17, minus the NPR reinsurance credit from Section 8.B. For an assuming company, the DR or SR for the business assumed on a non-guaranteed YRT or similar basis shall be set equal to the NPR from Section 3.B.8, plus any applicable provision pursuant to Section 8.C.16 and Section 8.C.17. In the case where there are also other reinsurance arrangements that are not on a non-guaranteed YRT or similar basis, the reinsurance credit shall include the modeled reinsurance credit reflecting those other reinsurance arrangements. In particular, where there are also other reinsurance arrangements that are dependent on the non-guaranteed YRT or similar actuarial judgment shall be used to project cash flows consistent with the above outlined treatment for non-guaranteed YRT or similar arrangements.

Deleted: ¶

Deleted: ¶

Guidance Note: The above method is an interim approach. A longer-term solution to YRT is intended to be adopted by state insurance regulators, after state insurance regulators and industry have had additional time to consider and evaluate the variety of approaches that have been put forward as a potential longer-term solution.
2017-2019 for Long-Term YRT – Version 3:

C. Reflection of Reinsurance Cash Flows in the Deterministic Reserve or Stochastic Reserve

For non-guaranteed YRT reinsurance ceded or assumed, the cash-flow modeling requirements in Sections 8.C.1 through 8.C.14 below do not apply since non-guaranteed YRT reinsurance ceded or assumed does not need to be modeled; see Section 8.C.18 below. YRT shall include other reinsurance arrangements that are similar in effect to YRT.

For policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020, the company may elect, with domiciliary commissioner approval, a phase-in of the current methodology for non-guaranteed YRT reinsurance with allowance for future mortality improvement from the methodology in the 2021 Valuation Manual for non-guaranteed YRT reinsurance without allowance for future mortality improvement, provided that the company uses a weighted average of the results from the two methodologies, with the weight for the prior methodology being no more than (20XX-YYYY)/(20XX-2021), where YYYY is the current valuation year and 20XX is the final year of the phase-in. A company may elect to phase in these requirements over a 3-year period beginning Jan. 1, 2022 and ending Dec. 31, 2024. A company may elect a longer phase-in period of up to seven years beginning Jan. 1, 2022 and ending Dec. 31, 2028, with approval of the domiciliary commissioner.

VM-20 Section 8.C.18 and Guidance Note:

18.

When the reinsurance ceded or assumed is on a non-guaranteed YRT or similar basis, the corresponding reinsurance cash flows do not need to be modeled. Rather, for a ceding company, the post-reinsurance-ceded DR or SR shall be the pre-reinsurance-ceded DR or SR pursuant to Section 8.D.2, plus any applicable provision pursuant to Section 8.C.15 and Section 8.C.17, minus the NPR reinsurance credit from Section 8.B. For an assuming company, the DR or SR for the business assumed on a non-guaranteed YRT or similar basis shall be set equal to the NPR from Section 3.B.8, plus any applicable provision pursuant to Section 8.C.16 and Section 8.C.17. In the case where there are also other reinsurance arrangements that are not on a non-guaranteed YRT or similar basis, the reinsurance credit shall include the modeled reinsurance credit reflecting those other reinsurance arrangements. In particular, where there are also other reinsurance arrangements that are dependent on the non-guaranteed YRT or similar actuarial judgment shall be used to project cash flows consistent with the above outlined treatment for non-guaranteed YRT or similar arrangements.

For policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020, the company may elect, with domiciliary commissioner approval, a phase-in of the current methodology for non-guaranteed YRT reinsurance with allowance for future mortality improvement from the methodology in the 2021 Valuation Manual for non-guaranteed YRT reinsurance without allowance for future mortality improvement, provided that the company uses a weighted average of the results from the two methodologies, with the weight for the prior methodology being no more than (20XX-YYYY)/(20XX-2021), where YYYY is the
current valuation year and 20XX is the final year of the phase-in. A company may elect to phase in these requirements over a 3-year period beginning Jan. 1, 2022 and ending Dec. 31, 2024. A company may elect a longer phase-in period of up to seven years beginning Jan. 1, 2022 and ending Dec. 31, 2028, with approval of the domiciliary commissioner.

VM-31 Section 3.D.8.g (new):

g. Phase-In: If electing a phase-in period as described in VM-20 Section 8.C, documentation of the length of the phase-in approved by the company’s domiciliary commissioner, the result of the current and prior methodologies, the weights applied to each result, and confirmation that reinsurance assumptions for the calculation of the prior methodology are discussed in Section 3.D.8.h above.
2017-2019 for Long-Term YRT – Version 4:

C. Reflection of Reinsurance Cash Flows in the Deterministic Reserve or Stochastic Reserve

For policies issued on or after Jan. 1, 2020, and optionally for policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020:

For non-guaranteed YRT reinsurance ceded or assumed, the cash-flow modeling requirements in Sections 8.C.1 through 8.C.14 below do not apply since non-guaranteed YRT reinsurance ceded or assumed does not need to be modeled; see Section 8.C.18 below. YRT shall include other reinsurance arrangements that are similar in effect to YRT.

VM-20 Section 8.C.18 and Guidance Note:

18. For policies issued on or after Jan. 1, 2020, and optionally for policies issued on or after Jan. 1, 2017, and before Jan. 1, 2020:

When the reinsurance ceded or assumed is on a non-guaranteed YRT or similar basis, the corresponding reinsurance cash flows do not need to be modeled. Rather, for a ceding company, the post-reinsurance-ceded DR or SR shall be the pre-reinsurance-ceded DR or SR pursuant to Section 8.D.2, plus any applicable provision pursuant to Section 8.C.15 and Section 8.C.17, minus the NPR reinsurance credit from Section 8.B. For an assuming company, the DR or SR for the business assumed on a non-guaranteed YRT or similar basis shall be set equal to the NPR from Section 3.B.8, plus any applicable provision pursuant to Section 8.C.16 and Section 8.C.17. In the case where there are also other reinsurance arrangements that are not on a non-guaranteed YRT or similar basis, the reinsurance credit shall include the modeled reinsurance credit reflecting those other reinsurance arrangements. In particular, where there are also other reinsurance arrangements that are dependent on the non-guaranteed YRT or similar actuarial judgment shall be used to project cash flows consistent with the above outlined treatment for non-guaranteed YRT or similar arrangements.

Deleted: Guidance Note: The above method is an interim approach. A longer-term solution to YRT is intended to be adopted by state insurance regulators, after state insurance regulators and industry have had additional time to consider and evaluate the variety of approaches that have been put forward as a potential longer-term solution.

Amendment Proposal Form

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Rachel Hemphill, TDI – Allows exemption of policies from prior issue years when there is a change in the Life PBR Exemption requirements.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

Valuation Manual Section II, Subsection 1.D

D. Life PBR Exemption

1. A company meeting the at least one of the conditions in D.2 below may file a statement of exemption for ordinary life insurance policies, except for policies in D.3 below, issued directly or assumed during the current calendar year, that would otherwise be subject to VM-20. If a company has no business issued directly or assumed during the current calendar year that would otherwise be subject to VM-20, a statement of exemption is not required. For a filed statement of exemption, the statement must be filed with the domiciliary commissioner prior to July 1 of that year certifying that at least one of the two conditions in D.2 was met based on premiums from the prior calendar year annual statement and the statement of exemption must also be included with the NAIC filing for the second quarter of that year.

The domiciliary commissioner may reject such statement prior to Sept. 1 and require the company to follow the requirements of VM-20 for the ordinary life policies covered by the statement.

If a filed statement of exemption is not rejected by the domiciliary commissioner, the filing of subsequent statements of exemption is not required as long as the company continues to qualify for the exemption; rather, ongoing statements of exemption for each new calendar year will be deemed not to be rejected, unless: 1) the company does not meet either condition in D.2 below, 2) the policies contain those in D.3 below, or 3) the domiciliary commissioner contacts the company prior to Sept. 1 and notifies them that the statement of exemption is rejected. If any of these three events occur, then the statement of exemption for the current calendar year is rejected and a new statement of exemption must be filed and not rejected in order for the company to exempt additional policies. In the case of an ongoing statement of exemption, rather than include a statement of exemption with the NAIC filing for the second quarter of that year, the company should enter “SEE

Deleted: fails to
EXPLANATION™ in response to the Life PBR Exemption supplemental interrogatory and provide as an explanation that the company is utilizing an ongoing statement of exemption.

2. Conditions for Exemption:
   a. The company has less than $300 million of ordinary life premiums1, and if the company is a member of an NAIC group of life insurers, the group has combined ordinary life premiums1 of less than $600 million; or
   b. The only new policies that would otherwise be subject to VM-20 being issued or assumed by the company are due to election of policy benefits or features from existing policies valued under VM-A and VM-C and the company was exempted from, or otherwise not subject to, the requirements of VM-20 in the prior year.

3. Policies Excluded from the Life PBR Exemption:
   a. Universal life with secondary guarantee (ULSG) policies with a secondary guarantee that does not meet the VM-01, Definitions for Terms in Requirements, definition of a “non-material secondary guarantee.”

4. Each exemption, or lack of an exemption, outlined in D.1 – D.3 above applies only to policies issued or assumed in the current year, and it applies to all future valuation dates for those policies. However, if policies did not qualify for the Life PBR Exemption during the year of issue but would have qualified for the Life PBR Exemption if the current Valuation Manual requirements had been in effect during the year of issue, then the domiciliary commissioner may allow an exemption for such policies. The minimum reserve requirements for the ordinary life policies subject to the exemption are those pursuant to applicable methods required in VM-A and VM-C using the mortality as defined in VM-20 Section 3.C.1 and VM-M Section 1.H.

Valuation Manual Section II, Subsection 1.D - Footnote

1 Premiums are measured as total (first year, single, and renewal) direct plus total (first year, single, and renewal) reinsurance assumed from an unaffiliated company from the ordinary life line of business reported in the prior calendar year life/health annual financial statement, Exhibit 1, Part 1, Column 3, “Ordinary Life Insurance” excluding premiums for guaranteed issue policies and preneed life contracts and excluding amounts that represent the transfer of reserves in force as of the effective date of a reinsurance assumed transaction and are reported in Exhibit 1 Part 1, Column 3 as ordinary life insurance premium. Preneed is as defined in VM-01.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Addresses the exemption of policies issued in 2020 and 2021 (such as conversions) that may be exempted under the 2022 Valuation Manual requirements but did not qualify under the 2020 or 2021 Valuation Manual requirements.
### Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

   **Identification:**
   Dany Provencher, Appointed Actuary, Industrial Alliance group of companies

   **Title of the issue:**
   Asset collar when modeled reserve is negative

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

   **Valuation Manual, Jan. 1 2020 Edition**
   VM-20 Section 7.D.3

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

   If for all model segments combined, the aggregate annual statement value of the final starting assets, less the corresponding PIMR balance, is
   (a) less than 98% of the modeled reserve; or
   (i) 98% of the modeled reserve if modeled reserve is positive;  
   (ii) 102% of the modeled reserve if modeled reserve is negative; or
   (b) greater than the largest of:
   (i) 102% of the modeled reserve;  
   (ii) the NPR for the same set of policies, net of due and deferred premiums thereon; and
   (iii) zero,
   then the company shall provide documentation in the PBR Actuarial Report that provides reasonable assurance that the modeled reserve is not materially understated as a result of the estimate of the amount of starting assets.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

   If modeled reserve is negative, using assets corresponding to 100% of modeled reserve, would not fall within the asset collar.

Life Actuarial (A) Task Force
Amendment Proposal Form 2021-03
Exposed for a 21-day public comment period ending May 3, 2021

The proposed guidance note presumes that Section 6.C.5.n refers to how cohorts and weights are unaffected by changes in interest rates at each reporting date because the discount rate for the calculations is fixed, but it indicates that periodic updates to underlying prescribed assumptions may require recalculation. LATF is requesting comments on this interpretation and its applicability to this RMD change vs. Standard Projection assumption updates more broadly.

Please submit comments to Reggie Mazyck (RMazyck@naic.org) by COB 5/3/21.

In VM-21, Section 6.C.5:

i. For tax-qualified contracts, add the following to the revised GAPV^2 corresponding to an initial withdrawal age of the federal required minimum distribution (RMD) age.

\[
0.50 \times \left\{ \begin{array}{ll}
0.95 - \sum_{i=\text{base age}} \text{GAPV}^2_{\text{adjusted, scaled}}, & \text{if contract is a tax-qualified GMWB} \\
0.85 - \sum_{i=\text{issue age}} \text{GAPV}^2_{\text{adjusted, scaled}}, & \text{if contract is a tax-qualified hybrid GMIB}
\end{array} \right.
\]

j. Scale the revised GAPV^2 values at all future initial withdrawal ages—i.e., all ages greater than the federal required minimum distribution (RMD) age, as identified in the preceding step—such that the sum of the revised GAPV^2 values equals 0.95 for tax-qualified GMWB contracts and 0.85 for tax-qualified hybrid GMIB contracts again.

n. The cohorts and their associated weights as determined in Section 6.C.5.a through Section 6.C.5.k are for a contract with attained age equal to its issue age. Because the discount rate used in this determination is fixed, generally these calculations only need to be performed once for a given set of contracts with a certain issue age, guaranteed benefit product, and tax status.

Guidance Note: Cohorts and their associated weights may need to be revised if prescribed assumptions are updated.
4. State the reason for the proposed amendment? (You may do this through an attachment.)

The Standard Projection’s withdrawal delay cohort method includes an adjustment at the required minimum distribution (RMD) age. The SECURE Act changed the RMD age from 70.5 to 72. This proposed amendment implements the change by directly referencing the RMD age. The direct reference will reduce Valuation Manual maintenance for any future changes.

The proposed guidance note presumes that Section 6.C.5.n refers to how cohorts and weights are unaffected by changes in interest rates at each reporting date because the discount rate for the calculations is fixed, but it indicates that periodic updates to underlying prescribed assumptions may require recalculations. LATF is requesting comments on this interpretation and its applicability to this RMD change vs. Standard Projection assumption updates more broadly.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Brian Bayerle, ACLI – edits adopted changes to VM-02 for improved clarity and to remove potential circularity.

2. Identify the document, including the date if the document is "released for comment," and the location in the document where the amendment is proposed:

Valuation Manual (January 1, 2021 edition), VM-02 Section 3.A

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Subsequent the adopted changes to the federal tax code (IRC S. 7702), this proposed change would clarify the language in the previously adopted edits to VM-02 to avoid any potential circularity.
Valuation Manual VM-02

Section 3: Interest

A. The nonforfeiture interest rate for any life insurance policy issued in a particular calendar year beginning on and after the operative date of the Valuation Manual shall be equal to 125% of the calendar year statutory valuation interest rate defined for the NPR in the Valuation Manual for a life insurance policy with nonforfeiture values, whether or not such sections apply to such policy for valuation purposes, rounded to the nearer one-quarter of 1%, provided, however, that the nonforfeiture interest rate shall not be less than the Applicable Accumulation Test Minimum Rate in the Cash Value Accumulation Test under Section 7702 (Life Insurance Contract Defined) of the U.S. Internal Revenue Code.

Guidance Note: For flexible premium universal life insurance policies as defined in Section 3.D of the Universal Life Insurance Model Regulation (9585), this is not intended to prevent an interest rate guarantee less than the nonforfeiture interest rate.

Deleted: applicable interest rate prescribed to meet the definition of life insurance
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force

Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification: David Neve, VP and Consulting Actuary, Actuarial Resources Corporation

Title of the Issue: Clarify the definition of modeled company investment strategy and the comparison to the alternative investment strategy.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2020 NAIC Valuation Manual
- VM-01 VM-21 Section 4.D

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

There is an inconsistency in VM-20/VM-21 and VM-31 regarding the term “model investment strategy”. The term “model investment strategy” is used throughout VM-20 and VM-21 to describe the investment strategy used in the model as a proxy for the company’s actual investment strategy. However, VM-31 uses the term “modeled company investment strategy” in several places rather than “model investment strategy”. “Modeled company investment strategy” is the preferred term, so VM-20 and VM-21 have been modified to use “modeled company investment strategy” so that the terminology in VM-20, VM-21 and VM-31 are consistent.

Also, to address the ambiguity of whether the final investment strategy in the model is the initial investment strategy based on the company’s investment strategy or the alternative investment strategy when the alternative strategy is constraining, the term “modeled company investment strategy” has been added to the definitions in VM-01 (and a parenthetical has been added to VM-31) to clarify that the term refers to the investment strategy in the model prior to comparison to the alternative investment strategy. In addition, VM-21 has been modified to be consistent with the wording in VM-20 to clarify that the assets in the alternative investment strategy should use the same weighted average life (WAL) as the assets in the modeled company investment strategy.
VM-01 Changes:

VM-01 provides definitions for terms used in the Valuation Manual. The definitions in VM-01 do not apply to documents outside the Valuation Manual even if referenced or used by the Valuation Manual, such as the AP&P Manual. Some terms in the Valuation Manual may be defined in specific sections of the Valuation Manual instead of being defined in VM-01.

- The term “margin” means an amount included in the assumptions used to determine the modeled reserve that incorporates conservatism in the calculated value consistent with the requirements of the various sections of the Valuation Manual. It is intended to provide for estimation error and adverse deviation.
- The term “modeled company investment strategy” means the investment strategy used in the model that is intended to be a representation of the actual investment strategy of the company. It is before the comparison is made to the alternative investment strategy. It does not refer to the alternative investment strategy when the alternative investment strategy is constraining.
- The term “modeled reserve” means the deterministic reserve on the policies determined under VM-20 Section 2.A.1.a, 2.A.2.a and 2.A.3.b, plus the greater of the deterministic reserve and the stochastic reserve on the policies determined under Section 2.A.1.b, 2.A.2.b and 2.A.3.c.

VM-20 Changes:

Section 7: Cash-Flow Models
E. Reinvestment Assets and Disinvestment

1. At the valuation date and each projection interval as appropriate, model the purchase of general account reinvestment assets with available cash and net asset and liability cash flows in a manner that is representative of and consistent with the company’s investment policy for each model segment, subject to the following requirements:
   a. The modeled company investment strategy may incorporate a representation of the actual investment policy that ranges from relatively complex to relatively simple. In any case, the PBR Actuarial Report shall include documentation supporting the appropriateness of the representation relative to actual investment policy.
   b. The final maturities and cash-flow structures of assets purchased in the model, such as the patterns of gross investment income and principal repayments or a fixed or floating rate interest basis, shall be determined by the company as part of the model representation.
   c. The combination of price and structure for fixed income investments and derivative instruments associated with fixed income investments shall appropriately reflect the then-current U.S. Department of the Treasury (Treasury Department) curve along the relevant scenario and the requirements for gross asset spread assumptions stated below.
   d. For purchases of public non-callable corporate bonds, use the gross asset spreads over Treasuries prescribed in Section 9.F.8.a through Section 9.F.8.c. (For purposes of this
subsection, “public” incorporates both registered and 144a securities.) The prescribed spreads reflect current market conditions as of the model start date and grade to long-term conditions based on historical data at the start of projection year four.

e. For transactions of derivative instruments associated with fixed income investments, reflect the prescribed assumptions in Section 9.F.8.d for interest rate swap spreads.

f. For purchases of other fixed income investments, if included in the *modeled company investment strategy*, set assumed gross asset spreads over Treasuries in a manner that is consistent with, and results in reasonable relationships to, the prescribed spreads for public non-callable corporate bonds and interest rate swaps as defined in Section 9.F.8.

g. Notwithstanding the above requirements, the modeled reserve shall be the higher of that produced by the *modeled company investment strategy* and that produced by substituting an alternative investment strategy in which the fixed income reinvestment assets have the same weighted average life (WAL) as the reinvestment assets in the *modeled company investment strategy* and are all public non-callable corporate bonds with gross asset spreads, asset default costs and investment expenses by projection year that are consistent with a credit quality blend of 50% PBR credit rating 6 (A2/A) and 50% PBR credit rating 3 (Aa2/AA).

Policy loans, equities and derivative instruments associated with the execution of a clearly defined hedging strategy (in compliance with Section 7.L) are not affected by this requirement.

### Guidance Note: VM-31 requires a demonstration of compliance with VM-20 Section 7.E.1.g. In many cases, particularly if the modeled company investment strategy does not involve callable assets, it is expected that the demonstration of compliance will not require running the reserve calculation twice. For example, an analysis of the weighted average net reinvestment spread on new purchases by projection year (gross spread minus prescribed default costs minus investment expenses) of the *modeled company investment strategy* compared to the weighted average net reinvestment spreads by projection year of the alternative strategy may suffice. The assumed mix of asset types, asset credit quality or the levels of non-prescribed spreads for other fixed income investments may need to be adjusted to achieve compliance.

### VM-21 Changes:

**Section 4: Determination of the Stochastic Reserve**

**D. Projection of Assets**

**4. General Account Assets**

**a. General account assets shall be projected, net of projected defaults, using assumed investment returns consistent with their book value and expected to be realized in future periods as of the date of valuation. Initial assets that mature during the projection and positive cash flows projected for future periods shall be invested in a manner that is representative of and consistent with the company’s investment policy, subject to the following requirements:**

**i. The final maturities and cash flow structures of assets purchased in the model, such as the patterns of gross investment income and principal repayments or a
fixed or floating rate interest basis, shall be determined by the company as part
of the model representation;

ii. The combination of price and structure for fixed income investments and
derivative instruments associated with fixed income investments shall
appropriately reflect the projected Treasury Department curve along the
relevant scenario and the requirements for gross asset spread assumptions stated
below;

iii. For purchases of public non-callable corporate bonds, follow the requirements
defined in VM-20 Sections 7.E, 7.F and 9.F. The prescribed spreads reflect
current market conditions as of the model start date and grade to long-term
conditions based on historical data at the start of projection year four;

iv. For transactions of derivative instruments associated with fixed income
investments, reflect the prescribed assumptions in VM-20 Section 9.F for
interest rate swap spreads;

v. For purchases of other fixed income investments, if included in the modeled
corporate fixed income investments, set assumed gross asset spreads over U.S.
Treasuries in a manner that is consistent with, and results in reasonable
relationships to, the prescribed spreads for public non-callable corporate bonds
and interest rate swaps.

b. Notwithstanding the above requirements, the stochastic reserve shall be the higher of
those produced by the modeled company investment strategy and that produced by
substituting an alternative investment strategy in which the fixed income reinvestment
assets have the same weighted average life (WAL) as the reinvestment assets in the
modeled company investment strategy and are all public non-callable corporate bonds
with gross asset spreads, asset default costs, and investment expenses by projection year
that are consistent with a credit quality blend of 50% PBR credit rating 6 (A2/A) and
50% PBR credit rating 3 (Aa2/AA).

Policy loans, equities and derivative instruments associated with the execution of a
clearly defined hedging strategy are not affected by this requirement.

Drafting Note: This limitation is being referred to Life Actuarial (A) Task Force for review.

VM-31 Changes:
Section 3: PBR Actuarial Report Requirements

D. Life Report – This subsection establishes the Life Report requirements for individual life insurance
policies valued under VM-20:

6. Assets – The following information regarding the asset assumptions used by the company in
performing a principle-based valuation under VM-20:

r. Modeled Company Investment Strategy and Reinvestment Assumptions - Description
of the modeled company investment strategy (before comparison to the alternative
investment strategy), including asset reinvestment and disinvestment assumptions, and
documentation supporting the appropriateness of the modeled company investment strategy compared to the actual investment policy of the company.

s. **Alternative Investment Strategy** – Documentation demonstrating compliance with VM-20 Section 7.E.1.g, showing that the modeled reserve is the higher of that produced using the modeled company investment strategy and the alternative investment strategy.

F. **VA Report** – This subsection establishes the VA Report requirements for variable annuity contracts valued under VM-21.

6. **General Account Assets** – The following information regarding the general account asset assumptions used by the company in performing a principle-based valuation under VM-21:

a. **Modeled Company Investment Strategy and Reinvestment Assumptions** – Description of the modeled company investment strategy (before the comparison to the alternative investment strategy), including asset reinvestment and disinvestment assumptions, and documentation supporting the appropriateness of the modeled company investment strategy compared to the actual investment policy of the company.

b. **Alternative Investment Strategy** – Documentation demonstrating compliance with VM-21 Section 4.D.4.b showing that the stochastic reserve is the higher of that produced using the modeled company investment strategy and the alternative investment strategy.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force

Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Angela McNabb & Pat Allison – NAIC staff support

Revisions to VM-50 and VM-51 to allow for data experience reporting to be performed by a reinsurer or third-party administrator and a correction to VM-51 Appendix 4.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached redline document.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

This APF is needed for the following reasons:

1. VM-51 Appendix 4 includes a column indicating the position within the data file for each field. This is not valid as the NAIC’s RDC system was designed to accept comma delimited files. This APF will remove that column.

2. The VM-51 Section 2.B states that companies must submit data for all their direct written business prior to reinsurance ceded. The only exception is in the case of assumption reinsurance where policies have been legally novated. The NAIC has received feedback from a number of companies indicating that they have business that is reinsured and fully administered by the reinsurer. Since the ceding companies do not have the data, it represents a hardship for them to submit this business.

3. Currently, VM-51 Appendix 4 only allows one company code. In order to allow a reinsurer or third-party administrator to submit data on behalf of the direct writer, the NAIC must be able to identify both the submitting company and the direct writer of the block of business. This APF adds an additional field to accomplish this. By having the submitting company’s code, any questions the NAIC has regarding the data can be directed to the submitting company without fear of breaching confidentiality.

4. Having separate identifiers for the submitting company and direct writer will allow the NAIC to validate the reconciliations required by VM-50 Section 4.B.3.

Below are examples showing how the reconciliations would work according to the amended language in VM-50 Section 4.B.3.

Example 1: This example illustrates the scenario described in redlined language in VM-50 Section 4.B.3.c. Company A is a direct writer selected for VM-51 reporting.

- The company has retained and administers 35,000 policies (out of a total of 100,000).
- Company B (a reinsurer not selected to submit their own business) administers 50,000 policies for Company A.
Company C (a reinsurer selected to submit their own direct business) administers 15,000 policies for Company A.

### RECONCILIATION FOR COMPANY A (Direct Writer)

<table>
<thead>
<tr>
<th>Policy Count</th>
<th>Insurance Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>100,000</td>
<td>2,500,000,000</td>
</tr>
<tr>
<td>(50,000)</td>
<td>(1,250,000,000)</td>
</tr>
<tr>
<td>(15,000)</td>
<td>(50,000,000)</td>
</tr>
<tr>
<td><strong>Totals included in Company A’s data submissions</strong></td>
<td><strong>1,200,000,000</strong></td>
</tr>
</tbody>
</table>

**Example 2:** This example illustrates the scenario described in the redlined language in VM-50 Section 4.B.3.a. Company D is another direct writing company selected for VM-51 reporting. Company B has been asked by Companies A and D to submit data Company B has assumed and administers.

- Company B administers 50,000 policies for Company A.
- Company B administers 100,000 policies for Company D.
- Company B is not required to reconcile to their Annual Statement since they were not selected to submit their direct business.
- In this example, Company B is a reinsurer. However, Company B could also be a third-party administrator that is not an insurance company.

### RECONCILIATION FOR COMPANY B

<table>
<thead>
<tr>
<th>Policy Count</th>
<th>Insurance Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>50,000</td>
<td>1,250,000,000</td>
</tr>
<tr>
<td>100,000</td>
<td>1,500,000,000</td>
</tr>
<tr>
<td><strong>Totals included in Company B’s data submission</strong></td>
<td><strong>2,750,000,000</strong></td>
</tr>
</tbody>
</table>

**Example 3:** This example illustrates the scenario described in redlined language in VM-50 Section 4.B.3.b. Company C has also been asked by company A to submit data Company C has assumed and administers.

- Company C has 1,500,000 policies reported in their Annual Statement.
- Company C has 250,000 of reinsurance assumed policies which should not be included in their submission. Reinsurance assumed should only be included when the ceding company requests that the reinsurer report it on their behalf.
- Company C has 1,250,000 policies of direct written business that they must report.
- In addition to Company C’s direct written business, they will also be reporting 15,000 policies that they administer on behalf of Company A (per Company A’s request).

Section 1: Overview

A. Purpose of the Experience Reporting Requirements

The purpose of this section is to define the requirements pursuant to Section 13 of Model #820 for the submission and analysis of company data. It includes consideration of the experience reporting process, the roles of the relevant parties, and the intended use of and access to the data, and the process to protect the confidentiality of the data as outlined in Model #820.

B. PBR and the Need for Experience Data

The need for experience data includes but is not limited to:

1. PBR may require development of assumptions and margins based on company experience, industry experience or a blend of the two. The collection of experience data provides a database to establish industry experience tables or factors, such as valuation tables or factors as needed.

2. The development of industry experience tables provides a basis for assumptions when company data is not available or appropriate and provides a comparison basis that allows the state insurance regulator to perform reasonableness checks on the appropriateness of assumptions as documented in the actuarial reports.

3. The collection of experience data may assist state insurance regulators, reviewing actuaries, auditors and other parties with authorized access to the PBR actuarial reports to perform reasonableness checks on the appropriateness of principle-based methods and assumptions, including margins, documented in those reports.

4. The collection of experience data provides an independent check on the accuracy and completeness of company experience studies, thereby encouraging companies to establish a disciplined internal process for producing experience studies. Industry aggregate or sub-industry aggregate experience studies may assist an individual company for use in setting experience-based assumptions. As long as the confidentiality of each company's submitted results is maintained, a company may obtain results of a study on companies' submitted experience for use in formulating experience assumptions.

5. The collection of experience data will provide a basis for establishing and updating the assumptions and margins prescribed by regulators in the Valuation Manual.

6. The reliability of assumptions based on company experience is founded on reliable historical data from comparable characteristics of insurance policies including, but not limited to, underwriting standards and insurance policy benefits and provisions. As with
all forms of experience data analysis, larger and more consistent statistical samples have a greater probability of producing reliable analyses of historic experience than smaller or inconsistent samples. To improve statistical credibility, it is necessary that experience data from multiple companies be combined and aggregated.

7. The collection of experience data allows state insurance regulators to identify outliers and monitor changes in company experience factors versus a common benchmark to provide a basis for exploring issues related to those differences.

8. PBR is an emerging practice and will evolve over time. Research studies other than those contemplated at inception may be useful to improvement of the PBR process, including increasing the accuracy or efficiency of models. Because the collection of experience data will facilitate these improvements, research studies of various types should be encouraged.

9. The collection of experience data is not intended as a substitute for a robust review of companies’ methodologies or assumptions, including dialogue with companies’ actuaries.

Section 2: Statutory Authority and Experience Reporting Agent

A. Statutory Authority

1. Model #820 provides the legal authority for the *Valuation Manual* to prescribe experience reporting requirements with respect to companies and lines of business within the scope of the model.

2. The statutes and regulations requiring data submissions generally apply to all companies licensed to sell life insurance, A&H insurance and deposit-type contracts. These companies must submit experience data as prescribed by the *Valuation Manual*.

3. Section 4A(5) of Model #820 defines the data to be collected to be confidential.

B. Experience Reporting Agent

1. For the purposes of implementing the experience reporting required by state laws based on Section 13 of Model #820, an Experience Reporting Agent will be used for the purpose of collecting, pooling and aggregating data submitted by companies as prescribed by lines of business included in VM-51.

2. The NAIC is designated as Experience Reporting Agent for the Statistical Plan for Mortality beginning Jan. 1, 2020, and NAIC expertise in collecting and sorting data from multiple sources into a cohesive database in a secure and efficient manner, but the designation of the NAIC as Experience Reporting Agent does not preclude state insurance regulators from independently engaging other entities for similar data required under this *Valuation Manual* or other data purposes.

Section 3: Experience Reporting Requirements

A. Statistical Plans

1. Consistent with state laws based on Section 13 of Model #820, the Experience Reporting Agent shall collect experience data based on statistical plans defined in the *Valuation Manual*.

2. Statistical plans are detailed instructions that define the type of experience data being collected (e.g., mortality; elective policyholder behavior, such as surrenders, lapses,
premium payment patterns, etc.; and company expense data, such as commissions, policy expenses, overhead expenses etc.). The state insurance regulators serving on the Life Actuarial (A) Task Force and Health Actuarial (B) Task Force, or any successor body, will be responsible for prescribing the requirements for any statistical plan by applicable line of business. For each type of experience data being collected, the statistical plan will define the data elements and format of each data element, as well as the frequency of the collection of experience data. The statistical plan will define the process and the due dates for submitting the experience data. The statistical plan will define criteria that will determine which companies must submit the experience data. The statistical plan will also define the scope of business that is to be included in the experience data collection, such as lines of business, product types, types of underwriting, etc. Statistical plans are defined in VM-51 of the Valuation Manual. Statistical plans will be added to VM-51 of the Valuation Manual when they are ready to be implemented. Additional data elements and formats to be collected will be added as necessary, in subsequent revisions to the Valuation Manual.

3. Data must conform to common data definitions. Standard definitions provide for stable and reliable databases and are the basis of meaningful aggregated insurance data. This will be accomplished through a uniform set of suggested minimum experience reporting requirements for all companies.

B. Role and Responsibilities of the Experience Reporting Agent

1. Based on requirements of VM-51, the Experience Reporting Agent may design its data collection procedures to ensure it is able to meet these regulatory requirements. The Experience Reporting Agent will provide sufficient notice to reporting companies of changes, procedures and error tolerances to enable the companies to adequately prepare for the data submission.

2. The Experience Reporting Agent will aggregate the experience of companies using a common set of classifications and definitions to develop industry experience tables.

3. The Experience Reporting Agent will seek to enter into agreements with a group of state insurance departments for the collection of information under statistical plans included in VM-51. The number of states that contract with the Experience Reporting Agent will be based on achieving a target level of industry experience prescribed by VM-51 for each line of business in preparing an industry experience table.

   a. The agreement between the state insurance department(s) and the Experience Reporting Agent will be consistent with any data collection and confidentiality requirements included within Model #820 and the Valuation Manual. Those state insurance departments seeking to contract with the Experience Reporting Agent will inform the Experience Reporting Agent of any other state law requirements, including laws related to the procurement of services that will need to be considered as part of the contracting process.

   b. Use of the Experience Reporting Agent by the contracting state insurance departments does not preclude those state insurance departments or any other state insurance departments from contracting independently with another Experience Reporting Agent for similar data required under this Valuation Manual or other data purposes.

4. The Life Actuarial (A) Task Force or Health Actuarial (B) Task Force will be responsible for the content and maintenance of the experience reporting requirements. The Life
Actuarial (A) Task Force or Health Actuarial (B) Task Force or a working group will monitor the data definitions, quality standards, appendices and reports described in the experience reporting requirements to assure that they take advantage of changes in technology and provide for new regulatory and company needs.

5. To ensure that the experience reporting requirements will continue to be useful, the Life Actuarial (A) Task Force or Health Actuarial (B) Task Force will seek to review each statistical plan on a periodic basis at least once every five years. The Life Actuarial (A) Task Force or Health Actuarial (B) Task Force should have regular dialogue, feedback and discussion of this topic. In seeking feedback and engaging in discussions, the Life Actuarial (A) Task Force or Health Actuarial (B) Task Force shall include a broad range of data users, including state insurance regulators, consumer representatives, members of professional actuarial organizations, large and small companies, and insurance trade organizations.

6. The Experience Reporting Agent will obtain and undergo at least annual external audits to validate that controls with respect to data security and related topics are consistent with industry standards and best practices. The Experience Reporting Agent will provide a copy of any report prepared in connection with such an audit, upon a company’s request. In the event of a material deficiency identified in the external audit or in the event of an identified security breach affecting the Experience Reporting Data, the Experience Reporting Agent shall notify the NAIC, and the states that have directed the Experience Reporting Agent to collect this information, of the nature and extent of such an issue. In the event of an identified security breach affecting Experience Reporting Data, the Experience Reporting Agent shall also notify any insurer whose data was affected. Upon good cause shown, the Experience Reporting Agent will take reasonable actions to protect the data under its control, including that the data submission process may be suspended until the security issue has been remediated. If data submission is suspended under this section, the Experience Reporting Agent will work with the states that have directed collection to issue appropriate guidance modifying the requirements of VM 51, Section 2.D. The term “good cause” shall mean that there is the chance of irreparable harm upon continuing the transmission of the data to the Experience Reporting Agent. Once the security issue has been remediated, the Experience Reporting Agent shall notify the NAIC and the states that have directed the Experience Reporting Agent to collect this information. The Experience Reporting Agent shall also notify any insurer whose data was affected. The revised schedule shall provide for reasonable timing for companies to provide such data.

C. Role of Other Organizations

The Experience Reporting Agent may ask for other organizations to play a role for one or more of the following items, including the execution of agreements and incorporation of confidentiality requirements where appropriate:

1. Consult with the NAIC (as appropriate) in the design and implementation of the experience retrieval process;

2. Assist with the data validation process for data intended to be forwarded to the SOA or other actuarial professional organizations to develop industry experience tables;

3. Analyze data, including any summarized or aggregated data, produced by the Experience Reporting Agent;
4. Create initial experience tables and any revised tables;
5. Provide feedback in the development and evaluation of requests for proposal for services related to the reporting of experience requirement;
6. Create statutory valuation tables as appropriate and necessary;
7. Determine and produce additional industry experience tables or reports that might be suggested by the data collected;
8. Work with the Life Actuarial (A) Task Force or Health Actuarial (B) Task Force, in accordance with the Valuation Manual governance process, in developing new reporting formats and modifying current experience reporting formats;
9. Support a close working relationship among all parties having an interest in the success of the experience reporting requirement.

Section 4: Data Quality and Ownership

A. General Requirements

1. The quality, accuracy and consistency of submitted data is key to developing industry experience tables that are statistically credible and represent the underlying emerging experience. Statistical procedures cannot easily detect certain types of errors in reporting of data. For example, if an underwriter fails to evaluate the proper risk classification for an insured, then the “statistical system” has little chance of detecting such an error unless the risk classification is somehow implausible.

2. To ensure data quality, coding a policy, loss, transaction or other body of data as anything other than what it is known as is prohibited. This does not preclude a company from coding a transaction with incomplete detail and reporting such transactions to the Experience Reporting Agent, but there can be nothing that is known to be inaccurate or deceptive in the reporting. An audit of a company’s data submitted to the Experience Reporting Agent under a statistical plan in VM-51 can include comparison of submitted data to other company files.

3. When the Experience Reporting Agent determines that the cause of an edit exception could produce systematic errors, the company must correct the error and respond in a timely fashion, with priority given to errors that have the largest likelihood to affect a significant amount of data. When an error is found that has affected data reported to the Experience Reporting Agent, the company shall report the nature of the error and the nature of its likely impact to the Experience Reporting Agent. Retrospective correction of data subject to systematic errors shall be done when the error affects a significant amount of data that is still being used for regulatory purposes and it is reasonably practical to make the correction through the application of a computer program or a procedure applied to the entire data set without the need to manually examine more than a small number of individual records.

B. Specific Requirements

1. Once the data file is submitted by the company, the Experience Reporting Agent will perform a validity check of the data elements within each data record in the data file for proper syntax and verify that required data elements are populated. The Experience Reporting Agent will notify the company of all syntax errors and any missing data elements
that are required. Companies are required to respond to the Experience Reporting Agent by submitting a corrected data file. The Experience Reporting Agent will provide sufficient notice to reporting companies of changes, procedures and error tolerances to enable the companies to adequately prepare for the data submission.

2. Each submission of data filed by an insurance company with the Experience Reporting Agent shall be balanced against a set of control totals provided by the company with the data submission. At a minimum, these control totals shall include applicable record counts, claim counts, amounts insured and claim amounts. Any submission that does not balance to the control totals shall be referred to the company for review and resolution.

3. Each company submitting experience data and each company on whose behalf data is being submitted as required in VM-51 will perform a reconciliation between its submitted experience data with its statistical and financial data, and provide an explanation of differences, to the Experience Reporting Agent. The reconciliation must include policy count and insurance amount.
   a. If a third-party administrator that is not an insurance company or an insurance company not required to submit their direct data is submitting data on behalf of an insurance company, the reconciliation will consist of separate lines identifying each insurance company for whom this entity is submitting data.
   b. If the third-party administrator is an insurance company that is required to submit their direct data, the reconciliation must include separate lines identifying each additional company whose data is being submitted.
   c. The reconciliation to company statistical and financial data for both the direct writer and the reinsurer or third-party administrator must include lines indicating the amount of business that is being reported by the reinsurer or third-party administrator. The NAIC will use this information to confirm that all in-scope business is reported and there is no double counting of policies.

4. Validity checks are designed to identify:
   a. Improper syntax or incomplete coding (e.g., a numeric field that is not numeric, missing elements of a date field);
   b. Data elements containing codes that are not contained within the set of possible valid codes;
   c. Data elements containing codes that are contained within the set of possible valid codes but are not valid in conjunction with another data element code;
   d. Required data elements that are not populated.

5. Where quality would not appear to be significantly compromised, the Experience Reporting Agent may use records with missing or invalid data if such invalid or missing data do not involve a field that is relevant or would affect the credibility of the report. For companies with a body of data for a state, line of business, product type or observation period that fails to meet these standards, the Experience Reporting Agent will use its discretion, with regulatory disclosure of key decisions made, regarding the omission of the entire body of data or only including records with valid data. Completeness of reports is desirable, but not at the risk of including a body of data that appears to have an unreasonably high chance of significant errors.
6. Errors of a consistent nature are referred to as “systematic.” Incorrect coding instructions can introduce errors of a consistent nature. Programming errors within the data processing system of insurer company can also produce systematic miscoding as the system converts data to the required formats for experience reporting. Most systematic errors will produce data that, when reviewed using tests designed to reveal various types of systematic errors, will appear unreasonable and likely to be in error. In addition, some individual coding errors may produce erroneous results that show up when exposures and losses are compared in a systematic fashion. Such checking often cannot, however, provide a conclusive indication that data with unusual patterns is incorrect. The Experience Reporting Agent will perform tests and look at trends using previously reported data to determine if systematic errors or unusual patterns are occurring.

7. The Experience Reporting Agent will undertake reasonability checks that include the comparison of aggregate and company experience for underwriting class and type of coverage data elements for the current reporting period to company and aggregate experience from prior periods for the purpose of identifying potential coding or reporting errors. When reporting instructions are changed, newly reported data elements shall be examined to see that they correlate reasonably with data elements reported under the old instructions.

8. At a minimum, reasonability checks by the Experience Reporting Agent will include:
   a. An unusually large percentage of company data reported under a single or very limited number of categories;
   b. Unusual or unlikely reporting patterns in a company’s data;
   c. Claim amounts that appear unusually high or low for the corresponding exposures;
   d. Reported claims without corresponding policy values and exposures;
   e. Unreasonable loss frequencies or amounts in comparison to ranges of expectation that recognize statistical fluctuation;
   f. Unusual shifts in the distribution of business from one reporting period to the next.

9. If a company’s unusual pattern under Section 4.B.8.a, Section 4.B.8.b or Section 4.B.8.c is verified as accurate (that is, the reason for the apparent anomaly is an unusual mix of business), then it is not necessary that a similar pattern for the same company be reconfirmed year after year.

10. The Experience Reporting Agent will keep track of the results of the validity and reasonability checks and may adjust thresholds in successive reporting years to maintain a reasonable balance between the magnitude of errors being found and the cost to companies.

11. Results that may indicate a likelihood of critical indications, as defined below, will be reported to the company with an explanation of the unusual findings and their possible significance. When the possible or probable errors appear to be of a significant nature, the Experience Reporting Agent will indicate to the company that this is a “critical indication.” “Critical indications” are those that, if not corrected or confirmed, would leave a significant degree of doubt whether the affected data should be used in reports to the state insurance regulator and included in industry databases. It is intended that Experience Reporting Agents will have reasonable flexibility to implement this under the direction of the state insurance regulators. Also, under the direction of the state insurance regulators, the Experience Reporting Agent may grade the severity of indications, or it may simply
identify certain indications as critical. While companies are expected to undertake a reasonable examination of all indications provided to them, they are not required to respond to every indication except for those labeled by the Experience Reporting Agent as "critical."

12. The Experience Reporting Agent will use its discretion regarding the omission of data from reports owing to the failure of an insurer company to respond adequately to unusual reasonability indications. Completeness of reports is desirable, but not at the risk of including data that appears to have an unreasonably high chance of containing significant errors.

13. Companies shall acknowledge and respond to reasonability queries from the Experience Reporting Agent. This shall include specific responses to all critical indications provided by the Experience Reporting Agent. Other indications shall be studied for apparent errors, as well as for indications of systematic errors. Corrections for critical indications shall be provided to the Experience Reporting Agent or, when a correction is not feasible, the extent and nature of the error shall be reported to the Experience Reporting Agent.

C. Ownership of Data

1. Experience data submitted by companies to the Experience Reporting Agent will be considered the property of the companies submitting such data, but the recognition of such ownership will not affect the ability of state insurance regulators or the NAIC to use such information as authorized by state laws based on Model #820 or the Valuation Manual, or, in case of state insurance regulators, for solvency oversight, financial examinations and financial analysis.

2. The Experience Reporting Agent will be responsible for maintaining data, error reports, logs and other intermediate work products, and reports for use in processing, documentation, production and reproduction of reports provided to state insurance regulators in accordance with the Valuation Manual. The Experience Reporting Agent will be responsible for demonstrating such reproducibility at the request of state insurance regulators or an auditor designated by state insurance regulators.

Section 5: Experience Data

A. Introduction

1. Using the data collected under statistical plans, as defined in the Valuation Manual, the Experience Reporting Agent produces aggregate databases as defined by this Valuation Manual. The Experience Reporting Agent, and/or other persons assisting the Experience Reporting Agent, will utilize those databases to produce industry experience tables and reports as defined in the Valuation Manual. In order to ensure continued relevance of reports, each defined data collection and resulting report structure shall be reviewed for usefulness at least once every five years since initial adoption or prior review.

2. Data compilations are evaluated according to four distinct, and often competing, standards: quality, completeness, timeliness and cost. In general, quality is a primary goal in developing any statistical data report. The priorities of the other three standards vary according to the purpose of the report.

3. The Experience Reporting Agent may modify or enlarge the requirements of the Valuation Manual, through recommendation to the Life Actuarial (A) Task Force or Health Actuarial (B) Task Force and in accordance with the Valuation Manual governance process for information to accommodate changing needs and environments. However, in most cases,
changes to existing data reporting systems will be feasible only to provide information on future transactions. Requirements to submit new information may require that companies change their systems. Also, the Experience Reporting Agent may need several years before it can generate meaningful data meeting the new requirements with matching claims and insured amounts. The exact time frames for implementing new data requirements and producing reports will vary depending on the type of reports.

B. Design of Reports Linked to Purpose

Fundamental to the design of each report is an evaluation of its purpose and use. The Life Actuarial (A) Task Force and Health Actuarial (B) Task Force shall specify model reports responding to general regulatory needs. These model reports will serve the basic informational needs of state insurance regulators. To address a particular issue or problem, a state insurance regulator may have to request to the Life Actuarial (A) Task Force or Health Actuarial (B) Task Force that additional reports be developed.

C. Basic Report Designs

1. The Life Actuarial (A) Task Force or Health Actuarial (A) Task Force will designate basic types of reports to meet differing needs and time frames. Each statistical plan defined in VM-51 of the Valuation Manual will provide a detailed description of the reports, the frequency and time frame for the reports. Statistical compilations are anticipated to be the primary reports.

2. Statistical compilations are aggregate reports that generally match appropriate exposure amounts and transaction event amounts to evaluate the recent experience for a line of business. For example, a statistical compilation of mortality experience would match insurance face amounts exposed to death with actual death claims paid. Here the exposure amount is the total insurance face amount exposed to death, and the transaction event amounts would be the death claims paid. As another example, a statistical compilation of surrender experience would match total cash surrender amounts exposed to surrender with actual surrender amounts paid. Here the exposure amount is the total cash surrender amounts that could be surrendered, and the transaction event amounts would be the total surrender amounts actually paid. Statistical compilations can be performed for the industry or for the state of domicile.

3. In addition to statistical compilations, state insurance regulators can specify additional reports based on elements in the statistical plans in VM-51. State insurance regulators can also use statistical compilations and additional reports to evaluate non-formulaic assumptions.

4. The Life Actuarial (A) Task Force or Health Actuarial (B) Task Force will specify the reports to be provided to the professional actuarial associations to fulfill their roles as specified in Section 3.C of this VM-50. In general, the reports are expected to include statistical compilation at the industry level.

5. State insurance regulators can use the reports to review long-term trends.Aggregate experience results may indicate areas warranting additional investigation.

D. Supplemental Reports

1. For specific lines of business and types of experience data, state insurance regulators may request additional reports from the Experience Reporting Agent. State insurance regulators also may request custom reports, which may contain specific data or experience not regularly produced in other reports.
2. The regulator and the Experience Reporting Agent must negotiate time schedules for producing supplemental reports. The information in these reports is limited by the amount of data actually available and the manner in which it has been reported.

E. Reports to State Insurance Departments
   The Experience Reporting Agent will periodically provide the following reports to state insurance departments:
   1. A list of companies whose data is included in the compilation.
   2. A list of companies whose data was excluded from the compilation because it fell outside of the tolerances set for missing or invalid data, or for any other reason.

Section 6: Confidentiality of Data

A. Confidentiality of Experience Data
   1. The confidentiality of the experience data, experience materials and related information collected pursuant to the Valuation Manual is governed by state laws based on Section 14.A.(5) of Model #820. The following information is considered “confidential information” by state laws based on Section 14A(5) of the Model #820:
      Any documents, materials, data and other information submitted by a company under Section 13 of [the Standard Valuation Law] (collectively, “experience data”) and any other documents, materials, data and other information, including, but not limited to, all working papers, and copies thereof, created or produced in connection with such experience data, in each case that include any potentially company-identifying or personally identifiable information, that is provided to or obtained by the commissioner (together with any “experience data,” the “experience materials”) and any other documents, materials, data and other information, including, but not limited to, all working papers, and copies thereof, created, produced or obtained by or disclosed to the commissioner or any other person in connection with such experience materials.

   2. Nothing in the experience reporting requirements or elsewhere within the Valuation Manual is intended to, or should be construed to, amend or supersede any applicable statutory requirements, or otherwise require any disclosure of confidential data or materials that may violate any applicable federal or state laws, rules, regulations, privileges or court orders applicable to such data or materials.

B. Treatment of Confidential Information
   1. Confidential information may be shared only with those individuals and entities specified in state laws based on Section 14B(3) of Model #820. Any agreement between a state insurance department and the Experience Reporting Agent will address the extent to which the Experience Reporting Agent is authorized to share confidential information consistent with state law.

   2. The Experience Reporting Agent may be required to use confidential information in order to prepare compilations of aggregated experience data that do not permit identification of individual company experience or personally identifiable information. These reports of aggregated information, including those reports referenced in Section 5 of VM-50, are not considered confidential information, and the Experience Reporting Agent may make publicly available such reports. Reports using aggregate experience data will have
sufficient diversification of data contributors to avoid identification of individual companies.

3. Consistent with state laws based on Section 14B(3) of the Model #820 and any agreements between a state insurance department and the Experience Reporting Agent, access to the confidential information will be limited to:

a. State, federal or international regulatory agencies;

b. The company with respect to confidential information it has submitted, and any reports prepared by the Experience Reporting Agent based on such confidential information;

c. The NAIC, and its affiliates and subsidiaries;

d. Auditor(s) of the Experience Reporting Agent for purposes of the experience reporting function outlined in this VM-50; and

e. Other individuals or entities, including contractors or subcontractors of the Experience Reporting Agent, otherwise assisting the Experience Reporting Agent or state insurance regulators in fulfilling the purposes of VM-50. These other individuals or entities may provide services related to a variety of areas of expertise, such as assisting with performing industry experience studies, developing valuation mortality tables, data editing and data quality review. These other individuals and entities shall be subject to the same standards as the Experience Reporting Agent with respect to the maintenance of confidential information.
VM-51: Experience Reporting Formats

Table of Contents

Section 1: Introduction ................................................................................................................... 51-1
Section 2: Statistical Plan for Mortality ......................................................................................... 51-1
Appendix 1: Preferred Class Structure Questionnaire ....................................................................... 51-5
Appendix 2: Mortality Claims Questionnaire .................................................................................... 51-8
Appendix 3: Additional Plan Code Form ......................................................................................... 51-10
Appendix 4: Mortality Data Elements and Format .......................................................................... 51-12

Section 1: Introduction

A. The experience reporting requirements are defined in Section 3 of VM-50. The experience reporting requirements state that the Experience Reporting Agent will collect experience data based on statistical plans that are defined in VM-51 of the Valuation Manual. Statistical plans are to be added to VM-51 of the Valuation Manual when they are ready to be implemented.

B. Each statistical plan shall contain the following information:

1. The type of experience to be collected (e.g., mortality experience; policy behavior experience, such as surrenders, lapses, conversions, premium payment patterns, etc.; and company expense experience, such as commission expense, policy issue and maintenance expense, company overhead expenses etc.);

2. The scope of business to be included in the experience data to be collected (e.g., line(s) of business, such as individual or group, life, annuity or health; product type(s), such as term, whole life, universal life, indexed life, variable life, fixed annuity, indexed annuity, variable annuity, LTC or disability income; and type of underwriting, such as medically underwritten, simplified issue (SI), GI, accelerated, etc.);

3. The criteria for determining which companies or legal entities must submit the experience data to be collected;

4. The process for submitting the experience data to be collected, which will include the frequency of the data collection, the due dates for data collection and how the data is to be submitted to the Experience Reporting Agent;

5. The individual data elements and format for each data element that will be contained in each experience data record, along with detailed instructions defining each data element or how to code each data element. Additional information may be required, such as questionnaires and plan code forms that will assist in defining the individual data elements that may be unique to each company or legal entity submitting such experience data elements;

6. The experience data reports to be produced.

Section 2: Statistical Plan for Mortality

A. Type of Experience Collected Under This Statistical Plan

The type of experience to be collected under this statistical plan is mortality experience.
B. Scope of Business Collected Under This Statistical Plan

1. The data for this statistical plan is the individual ordinary life line of business. Such business is to include direct written business issued in the U.S. and All values should be prior to any reinsurance ceded except for the situation defined in VM-51 Section 2.B.2. Therefore, reinsurance assumed from a ceding company shall be excluded from data collection to avoid double-counting of experience submitted by an issuer and by its reinsurers; however, Assumption reinsurance of an individual ordinary life line of business, where the assuming company is legally responsible for all benefits and claims paid, shall be included within the scope of this statistical plan. The ordinary life line of business does not include separate lines of business, such as SI/GI, worksite, individually solicited group life, direct response, final expense, preneed, home service, credit life, and corporate-owned life insurance (COLI)/bank-owned life insurance (BOLI)/charity-owned life insurance (CHOLI).

2. In the event a reinsurer or third-party administrator is responsible for administering a block of business, the reinsurer or third-party administrator may submit that block of business on behalf of the direct writer. In this case the reinsurer or third-party administrator must be identified in Appendix 4 Item 1 - Submitting Company ID, and the direct writer must be identified in Appendix 4 Item 2 - NAIC Company Code of Direct Writer.

   a. As defined in VM-50 Section 4.B.3, the reconciliation to company statistical and financial data for both the direct writing company and all reinsurers and/or third-party administrators must include lines indicating the amount of business that is being reported by the reinsurers and/or third-party administrators. The Experience Reporting Agent will compare the reconciliations for all business submitted by the direct writer and any reinsurers and/or third-party administrators to ensure that all business is included and there is no double counting of policies.

   b. If an insurance company is required to submit their direct written business and they also have reinsurance assumed business, they should only submit the assumed business if asked to do so by the ceding company since some ceding companies may not have been selected for data submission.

3. The direct writing company is ultimately responsible for all the data submitted for their company.

C. Criteria to Determine Companies That Are Required to Submit Experience Data

Companies with less than $50 million of direct individual life premium shall be exempted from reporting experience data required under this statistical plan. This threshold for exemption shall be measured based on aggregate premium volume of all affiliated companies and shall be reviewed annually and be subject to change by the Experience Reporting Agent. At its option, a group of nonexempt affiliated companies may exclude from these requirements affiliated companies with less than $10 million direct individual life premium provided that the affiliated group remains nonexempt.

Additional exemptions may be granted by the Experience Reporting Agent where appropriate, following consultation with the domestic insurance regulator, based on achieving a target level of approximately 85% of industry experience for the type of experience data being collected under this statistical plan.
D. Process for Submitting Experience Data Under This Statistical Plan

Data for this statistical plan for mortality shall be submitted on an annual basis. Each company required to submit this data shall submit the data using the Regulatory Data Collection (RDC) online software submission application developed by the Experience Reporting Agent. For each data file submitted by a company, the Experience Reporting Agent will perform reasonability and completeness checks, as defined in Section 4 of VM-50, on the data. The Experience Reporting Agent will notify the company within 30 days following the data submission of any possible errors that need to be corrected. The Experience Reporting Agent will compile and send a report listing potential errors that need correction to the company.

Data for this statistical plan for mortality will be compiled using a calendar year method. The reporting calendar year is the calendar year that the company submits the experience data. The observation calendar year is the calendar year of the experience data that is reported. The observation calendar year will be two years prior to the reporting calendar year. For example, if the current calendar year is 2018 and that is the reporting calendar year, the company is to report the experience data that was in-force or issued in calendar year 2016, which is the observation calendar year.

Given an observation calendar year of 20XX, the calendar year method requires reporting of experience data as follows:

i. Report policies in force during or issued during calendar year 20XX.

ii. Report terminations that were incurred in calendar year 20XX and reported before July 1, 20XX+1. However, exclude rescinded policies (e.g., 10-day free look exercises) from the data submission.

For any reporting calendar year, the data call will occur during the second quarter, and data is to be submitted according to the requirements of the Valuation Manual in effect during that calendar year. Data submissions must be made by Sept. 30 of the reporting calendar year. Corrections of data submissions must be completed by Dec. 31 of the reporting calendar year.

E. Experience Data Elements and Formats Required by This Statistical Plan

Companies subject to reporting pursuant to the criteria stated in Section 2.C are required to complete the data forms in Appendix 1, Appendix 2 and Appendix 3 as appropriate, and also complete the Experience Data Elements and Formats as defined in Appendix 4.

The data should include policies issued as standard, substandard (optional) or sold within a preferred class structure. Preferred class structure means that, depending on the underwriting results, a policy could be issued in classes ranging from a best preferred class to a residual standard class. Policies issued as part of a preferred class structure are not to be classified as substandard.

Policies issued as conversions from term or group contracts should be included. For these converted policies, the issue date should be the issue date of the converted policy, and the underwriting field will identify them as issues resulting from conversion.

Generally, each policy number represents a policy issued as a result of ordinary underwriting. If a single life policy, the base policy on a single life has the policy number and a segment number of 1. On a joint life policy, each life has separate records with the same policy number. The base policy on the first life has a segment number of 1, and the base policy on the second life has a segment number of 2. Policies that cover more than two lives are not to be submitted.
Term/paid up riders or additional amounts of insurance purchased through dividend options on a policy issued as a result of ordinary underwriting are to be submitted. Each rider is on a separate record with the same policy number as the base policy and has a unique segment number. The details on the rider record may differ from the corresponding details on the base policy record. If underwriting in addition to the base policy underwriting is done, the coverage is given its own policy number.

Terminations (both death and non-death) are to be submitted. Terminations are to include those that occurred in the observation year and were reported by June 30 of the year after the observation year.

Plans of insurance should be carefully matched with the three-digit codes in item 19, Plan. These plans of insurance are important because they will be used not only for mortality experience data collection, but also for policyholder behavior experience data collection. It is expected that most policies will be matched to three-digit codes that specify a particular policy type rather than select a code that indicates a general plan type.

Each company is to submit data for in-force and terminated life insurance policies that are within the scope defined in Section 2.B except:

i. For policies issued before Jan. 1, 1990, companies may certify that submitting data presents a hardship due to fields not readily available in their systems/databases or legacy computer systems that continue to be used for older issued policies and differ from computer systems for newer issued policies.

ii. For policies issued on or after Jan. 1, 1990, companies must:
   a) Document the percentage that the face amount of policies excluded are relative to the face amount of submitted policies issued on or after Jan. 1, 1990; and
   b) Certify that this requirement presents a hardship due to fields not readily available in their systems/databases or legacy computer systems that continue to be used for older issued policies and differ from computer systems for newer issued policies.

F. Experience Data Reports Required by This Statistical Plan

1. Using the data collected under this statistical plan, the Experience Reporting Agent will produce an experience data report that aggregates the experience data of all companies whose data have passed all of the validity and reasonableness checks outlined in Section 4 of VM-50 and has been determined by the Experience Reporting Agent to be acceptable to be used in the development of industry mortality experience.

2. The Experience Reporting Agent will provide to the SOA or other actuarial professional organizations an experience data report of aggregated experience that does not disclose a company’s identity, which will be used to develop industry mortality experience and valuation mortality tables.
3. As long as a company is licensed in a state, that state insurance regulator will be given access to a company’s experience data that is stored on a confidential database at the Experience Reporting Agent. Access by the state insurance regulator will be controlled by security credentials issued to the state insurance regulator by the Experience Reporting Agent.
Appendix 1: Preferred Class Structure Questionnaire

PREFERRED CLASS STRUCTURE QUESTIONNAIRE

Fill out this preferred class structure questionnaire based on companywide summaries, such as underwriting guideline manuals, compilations of issue instructions or other documentation.

The purpose of this preferred class structure questionnaire is to gather information on different preferred class structures. This questionnaire varies between nonsmoker/non-tobacco and smoker/tobacco users and provides for variations by issue year, face amount and plan. If the company has the standard Relative Risk Score (RR Score) information available, the company should map its set of preferred class structure to sets of RR Scores. Except for new preferred class structures or new sets of RR Scores applied to existing preferred class structure(s), the response to the questionnaire should remain the same from year to year.

If a company has determined sets of RR Scores for its preferred class structures, it should provide separate preferred class structure responses for each set of RR Scores applied to a preferred class structure. If a company has not determined sets of RR Scores for its preferred class structures, it should fill out this questionnaire with its preferred class structures and update the preferred class structure questionnaire at such future time that sets of RR Scores for the preferred class structures are determined. When sets of RR Scores are used, there is to be a one-to-one correspondence between a preferred class structure and a set of RR Scores.

The information given in this questionnaire will be used both to map a set of RR Scores to policy level data and as a check on the policy-level data submission. Submit this questionnaire along with the initial data submission to the Experience Reporting Agent.

Each preferred class structure must include at least two classes (e.g., one preferred class and one standard class). Make as many copies of this preferred class structure questionnaire as necessary for your individual life business and submit in addition to policy-level detail information.

MORTALITY CLAIMS

1. If the data is provided using a reporting run-out that is other than six months, what run-out period was used? mm/dd/yyyy

2. The death claim amounts are to be for the total face amount and on a gross basis (before reinsurance). The data is based on:
   a. Total face amount (for policies that include the cash value in addition to the face amount as a death benefit, use only the face amount) as specified OR
      Other (describe):
      If not as specified, indicate time period for which this occurred: ___________ - ___________
   b. Gross basis (before reinsurance) as specified OR Other (describe):
      If not as specified, indicate time period for which this occurred: ___________ - ___________
      Is this the same basis used for face amounts included in the study data? ☐ Yes ☐ No

3. The date that the termination is reported is to be used for the termination reported date. The date that the termination actually occurred is to be used for the actual termination date. What dates are used for death claims in the study data with respect to?
   a) Termination reported date
      If not reported, indicate basis for dates provided ☐ Reported date ☐ Other (describe):
   b) Actual termination date for death claims:
      If not date of death, indicate basis for dates provided ☐ Date of death ☐ Other (describe):

4. Death claims pending at the end of the observation period but paid during the subsequent six months following the observation year are to be included in the data submission. Claims that are still pending at the end of the six month run out are -to be included.
Are such pending claims included in the study data? □ Yes □ No

If no indicate time period for which this occurred: ________________

5. The face amounts and death claim amounts are to be included without capping by amount. Are the face amounts and death claims/exposures included without capping by amount?

□ Yes □ No

If No, describe how face amounts and death claims are capped and at what amount the capping is being done.

6. For death claims on policies issued before 1990:

Are death claims matched up to a corresponding in-force policy? □ Yes □ No

If no, indicate approach used:

7. Please briefly describe any other unique aspects of the death claims data that are not covered above.
Appendix 3: Additional Plan Code Form

If you need an additional plan code(s) for a product(s) in addition to those plan codes in Item 19, Plan, of the statistical plan for life insurance mortality, fill in this form using plan codes in the range 300 to 999. Your data submission should reflect the plan codes in this form. Make as many copies as necessary for your individual life business and submit in addition to policy-level information. When this form is used, it must be sent to the Experience Reporting Agent at the time that data is submitted.

Completed by: ______________________ Title: _______________________________
Company: ________________________ NAIC Company Code: _________________ Date: ______
Phone Number: _____________________ Email: ____________________________

Add comments or attachments where necessary.

Enter unique three-digit plan codes for each product.

Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force

Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification: David Neve, VP and Consulting Actuary, Actuarial Resources Corporation of GA
Title of the Issue: Clarify ULSG NPR calculation requirements

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2021 NAIC Valuation Manual, but incorporating APF 2020-03
Section 2.A.3 Section 3.B.1, 2, 5 and 6 Section 6.B.5.b
Section 3.A Section 3.C.2 and 3

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

As a general overview, Section 3.B.5 stayed in 3.B.5 but was renumbered, but Section 3.B.6 was moved to 3.B.5.b and c.

Below is a detailed summary of the items that were moved to a new section (and/or renumbered) but were not redlined. In some cases, the wording was redlined after it was moved (if the wording changed).

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The NPR calculation requirements for ULSG products are currently contained in Section 3.B.5 and 3.B.6 of the Valuation Manual. The current wording takes the reader back and forth between Section 3.B.5 and 3.B.6 when trying to follow the reserve calculation for ULSG products, which can be confusing. And the current wording also has led some people to incorrectly interpret Section 3.B.5 to be applicable to UL products without a SG.

The APF combines the current 3.B.5 and 3.B.6 sections into a single section labeled 3.B.5 and clarifies how to determine the NPR when the policy duration at the valuation date is either prior to, or after the SG has expired. Importantly, no change has been made to the current requirements, only the formatting of the requirements to make them easier to follow. Note that the new wording has flipped the order of the old 3.B.5 and 3.B.6 when combining them in the new 3.B.5, but this movement is not shown as a tracked change (since no changes were made to the existing reserve calculation requirements in the two sections).

Section 3.A has also been revised to eliminate the confusion that can arise on whether the NPR for products in the All Other VM-20 Reserving Category is still a VM-20 reserve. The NPR requirement for products in the All Other VM-20 Reserving Category has been moved to Section 3.B.6.

Impacted references have been updated.
ATTACHMENT

Section 2: Minimum Reserve

A. All policies subject to these requirements shall be included in one of the VM-20 Reserving Categories, as specified in Section 2.A.1, Section 2.A.2 and Section 2.A.3 below.

1. Term Reserving Category —

2. ULSG Reserving Category —

   c. The due and deferred premium asset, if any, shall be based on the valuation net premiums computed in accordance with Section 3.B.5.d, for the base policy, determined without regard to any NPR floor amount from Section 3.D.2.

3. All Other VM-20 Reserving Category— All policies and riders belonging to the All Other VM-20 Reserving Category are to be included in Section 2.A.3.c unless the company has elected to exclude a group of them from the stochastic reserve calculation or both the deterministic and stochastic reserve calculations and has applied the applicable exclusion test defined in Section 6, passed the test and documented the results.

Section 3: Net Premium Reserve

A. Applicability

1. The NPR for each policy must be determined on a seriatim basis pursuant to Section 3.

2. When valuing term riders pursuant to Paragraph E in “Riders and Supplemental Benefits Requirements” in Section II, the reserve requirements for term policies are applicable.

B. NPR Calculation

1. For the purposes of Section 3, the following terms apply:

   b. The “level secondary guarantee” at any time is:

      i. For a shadow account secondary guarantee, the shadow account fund value that would have existed at that time assuming payment of the level gross premium determined according to Section 3.B.5.c.i.1

      ii. For a cumulative premium secondary guarantee, the amount of cumulative level gross premiums determined according to Section 3.B.5.c.i.1, accumulated with any interest or accumulation factors per the contract provisions for the secondary guarantee.

2. Section 3.B.4 and Section 3.B.5 provide the calculation of a terminal NPR under the assumption of an annual mode gross premium. In Section 3.B.4 and Section 3.B.5, the gross premium referenced is the gross premium for the policy assuming an annual premium mode.

3. All Other VM-20 Reserving Category— All policies and riders belonging to the All Other VM-20 Reserving Category are to be included in Section 2.A.3.c unless the company has elected to exclude a group of them from the stochastic reserve calculation or both the deterministic and stochastic reserve calculations and has applied the applicable exclusion test defined in Section 6, passed the test and documented the results.
benefits less the actuarial present value of future annual valuation net premiums as follows:

5. For all policies and riders within the ULSG Reserving Category, the NPR shall be determined as follows:
   a. If the policy duration on the valuation date is prior to the point when all secondary guarantee periods have expired, the NPR shall be the greater of the reserve amount determined in Section 3.B.5.c and the reserve amount determined in Section 3.B.5.d, subject to the floors specified in Section 3.D.2.
   b. If the policy duration on the valuation date is after the expiration of all secondary guarantee periods, the NPR shall be the reserve amount determined according to Section 3.B.5.d only, subject to the floors specified in 3.D.2.
   c. A reserve amount for the policy shall be calculated assuming the secondary guarantee is in effect as described below. If the policy has multiple secondary guarantees, the NPR shall be calculated as below for the secondary guarantee that provides the greatest NPR as of the valuation date. For the purposes of this subsection, let n be the longest number of years the policy can remain in force under the provisions of the secondary guarantee. However, if a shorter period produces a materially greater NPR, then n shall be that shorter number of years.
      i. As of the policy issue date:
         1. Determine the level gross premium at issue, assuming payments are made each year for which premiums are permitted to be paid, such period defined as v years in this subsection, that would keep the policy in force to the end of year n, based on policy provisions, including the secondary guarantee provisions, such as mortality, interest and expenses. In no event shall v be greater than n for purposes of the NPR calculated in this subsection.
         2. Determine the annual valuation net premiums at issue as that uniform percentage (the valuation net premium ratio) of the respective gross premiums such that at issue the actuarial present value of future valuation net premiums over the n-year period shall equal the actuarial present value of future benefits over the n-year period. The valuation net premium ratio determined shall not change for the policy.
         3. Using the level gross premium from Section 3.B.5.c.i.1 above, determine the value of the expense allowance components for the policy at issue as x₁, y₁-₅ and z₁ defined below.
            x₁ = a first-year expense equal to the level gross premium at issue
            y₁-₅ = an expense equal to 10% of the level gross premium and applied in each year from the second through fifth policy year
            z₁ = a first-year expense of $2.50 per $1,000 of insurance issued
            The expense allowance shall be amortized over the span of years in the secondary guarantee period during which premiums are permitted to be paid. Eₜ,v, the expense allowance balance as of the end of the policy year t, shall be computed as follows:
            \[ Eₜ,v = VNPR \times \left( x₁ \times \frac{1}{v} + y₁ \times \frac{1}{v} \times 5 + \sum_{j=1}^{5} z₁ \times j \right) \]
            for \( t < v \)
            \[ Eₜ,v = 0 \]
            for \( t ≥ v \)
            Where:
            \( j = 1, 2, ... \) (number of completed years since issue)
After the policy issue date, on each future valuation date, the NPR shall be determined as follows:

1. As of the valuation date for the policy being valued, determine the actual secondary guarantee, denoted ASG_{x+t}, as outlined in Section 3.B.1.c and the fully funded secondary guarantee, denoted FFSG_{x+t}, as outlined in Section 3.B.1.b.

2. Divide ASG_{x+t} by FFSG_{x+t}, with the resulting ratio capped at 1. The ratio is intended to measure the level of prefunding for a secondary guarantee, which is used to establish reserves. Assumptions within the numerator and denominator of the ratio, therefore, must be consistent in order to appropriately reflect the level of prefunding. As used here, “assumptions” include any factor or value, whether assumed or known, which is used to calculate the numerator or denominator of the ratio.

3. Compute the net single premium (NSP_{x+t}) on the valuation date for the coverage provided by the secondary guarantee for the period of time ending at attained age x+n, using the interest, lapse and mortality assumptions prescribed in Section 3.C below. The net single premium (NSP) shall include consideration for death benefits only.

4. The NPR for an insured age x at issue at time t shall be according to the formula below:

\[ \text{VNPR} = \frac{\text{C}_{x+t}}{\sigma} \]

where C_{x+t} = 0 when t = 1

\[ \sum_{n=1}^{t-5} \left( 1 - \frac{t}{T} \right) \]

when 2 \leq t \leq 5

\[ = C_{x+5} \]

when t > 5

Guidance Note: For a non-integer value of t, E_{x+t} is obtained by taking the present value at duration t of E_{x+t} where T is the next higher integer; i.e., entails discounting by valuation interest, mortality, and lapse for the fractional year between the valuation date and next anniversary (T - t).

A reserve amount for the policy shall be calculated assuming the secondary guarantee is not in effect. The reserve amount shall be determined by the policy features and guarantees of the policy without considering any secondary guarantee provisions, as follows:

i. Determine the level gross premium at issue, assuming payments are made each year for which premiums are permitted to be paid, such period defined as “s” in this subsection, that would keep the policy in force for the entire period coverage is to be provided based on the policy guarantees of mortality, interest, and mortality.

ii. Determine the annual valuation net premiums as that uniform percentage (the valuation net premium ratio) of the respective gross premiums, such that at issue the actuarial present value of future valuation net premiums over the n-year period shall equal the actuarial present value of future benefits over the n-year period. The valuation net premium ratio determined shall not change for the policy.

A reserve amount for the policy shall be calculated assuming the secondary guarantee is not in effect. The reserve amount shall be determined by the policy features and guarantees of the policy without considering any secondary guarantee provisions, as follows:

i. Determine the level gross premium at issue, assuming payments are made each year for which premiums are permitted to be paid, such period defined as “s” in this subsection, that would keep the policy in force for the entire period coverage is to be provided based on the policy guarantees of mortality, interest, and mortality.

ii. Determine the annual valuation net premiums as that uniform percentage (the valuation net premium ratio) of the respective gross premiums, such that at issue the actuarial present value of future valuation net premiums over the n-year period shall equal the actuarial present value of future benefits over the n-year period. The valuation net premium ratio determined shall not change for the policy.
value of future valuation net premiums shall equal the actuarial present value of future benefits.

iii. Using the level gross premium from Section 3.B.5.d.i, determine the value of the expense allowance components for the policy at issue as \( x_1 \), \( y_{2-5} \), and \( z_1 \) defined below.

- \( x_1 \): a first-year expense equal to the level gross premium at issue
- \( y_{2-5} \): an expense equal to 10% of the level gross premium and applied in each year from the second through fifth policy year
- \( z_1 \): a first-year expense of $2.50 per $1,000 of insurance issued

The expense allowance shall be amortized over the period during which premiums are permitted to be paid. \( z_{1+t} \), the expense allowance balance, as of the end of policy year \( t \), shall be calculated as follows:

\[
E_{x+t} = VNPR \cdot a_{x+t-1} \left( (x_1 + x_1) / a_{x+1} + y_{2-5} \cdot C_{x+t} \right) \quad \text{for } t < s
\]

\[
E_{x+t} = 0 \quad \text{for } t \geq s
\]

Where:

\[
t = 1, 2, \ldots \quad \text{(number of completed years since issue)}
\]

\[
VNPR = \text{Valuation Net Premium Ratio from 3.B.5.d.i above}
\]

\[
C_{x+t} = \begin{cases} 0 & \text{when } t = 1 \\ \sum_{s=1}^{t} (1 / a_{s+1}) & \text{when } 2 \leq t \leq 5 \\ C_{x+5} & \text{when } t > 5 \\ \end{cases}
\]

iv. For a policy issued at age \( x \), at any duration \( t \), the net premium reserve shall equal:

\[
m_{x+t} \cdot r_{x+t}
\]

Where:

1. \( m_{x+t} \): the actuarial present value of future benefits less the actuarial present value of future valuation net premiums and less the unamortized expense allowance for the policy, \( E_{x+t} \).

Guidance Note: For a non-integer value of \( t \), \( E_{x+t} \) is obtained by taking the present value at duration \( t \) of \( E_{x+T} \), where \( T \) is the next higher integer; i.e., entails discounting by valuation interest and survivorship for the fractional year between the valuation date and the next anniversary (\( T - t \)).

2. Let:

\[
e_{x+t} = \max(\text{the actual policy fund value on the valuation date}, 0)
\]

\[
f_{x+t} = \text{the policy fund value on the valuation date is that amount which, together with the payment of the future level gross premiums determined in Section 3.B.5.d.i above, keeps the policy in force for the entire period coverage is to be provided, based on the policy guarantees of mortality, interest and expenses.}
\]

Then set \( v_{x+t} \) equal to:

\[
1, \text{ if } f_{x+t} \leq 0
\]
\[
\min\left[\frac{e_{x+t}}{f_{x+t}}, 1\right], \text{ otherwise}
\]

v. The future benefits used in determining the value of \(m_{x+t}\) shall be based on the greater of \(e_{x+t}\) and \(f_{x+t}\) together with the future payment of the level gross premiums determined in Section 3.B.5.d above, and assuming the policy guarantees of mortality, interest and expenses.

vi. The values of \(\bar{d}\) are determined using the NPR interest, mortality and lapse assumptions applicable on the valuation date.

vii. Actuarial present values referenced in this Section 3.B.5.d are calculated using the interest, mortality and lapse assumptions prescribed in Section 3.C.

6. For all policies and riders within the All Other VM-20 Reserving Category, the NPR shall be determined pursuant to applicable methods in VM-A and VM-C for the basic reserve. The mortality tables to be used are those defined in Section 3.C.1 and in VM-M Section 1.H.

7. The actuarial present value of future benefits equals the present value of future benefits including, but not limited to, death, endowment (including endowments intermediate to the term of coverage) and cash surrender benefits. Future benefits are before reinsurance and before netting the repayment of any policy loans.

8. For life insurance coverage that the company has assumed on a YRT basis, the reinsurer’s net premium reserve shall be one half year’s cost of insurance for the reinsured net amount at risk.

C. Net Premium Reserve Assumptions

2. Interest Rates

a. For NPR amounts calculated according to Section 3.B.5.d:

b. For NPR amounts calculated according to Section 3.B.4 or Section 3.B.5.e.

3. Lapse Rates

a. For NPR amounts calculated according to Section 3.B.5.d, the lapse rates used shall be 0% per year during the premium paying period and 0% per year thereafter.

b. For NPR amounts calculated according to Section 3.B.5.e, the lapse rate, \(L_{x+t}\), for an insured age \(x\) at issue for all durations subsequent to the valuation date shall be determined as follows:

i. Determine the ratio \(R_{x+t}\) where:

\[
R_{x+t} = \frac{FFSG_{x+t} - ASG_{x+t}}{FFSG_{x+t} - LSG_{x+t}} \text{ but not } > 1 \text{ and not } < 0
\]

Where:

- \(FFSG_{x+t}\) = the fully funded secondary guarantee on the valuation date for the insured age \(x\) at issue
- \(ASG_{x+t}\) = the actual secondary guarantee on the valuation date for the insured age \(x\) at issue

Deleted: a

Deleted: ULSG

Deleted: as follows. Prior to the point when all secondary guarantee periods have expired, the NPR shall, subject to the floors specified in Section 3.D.2, be the greater of the reserve amount determined according to Section 3.B.5, assuming the policy has no secondary guarantees, and the reserve amount for the policy determined according to the methodology and requirements in Section 3.B.6.a through Section 3.B.6.e below.

Deleted:

Commented [MR18]: CA Suggestion #2

Commented [MR19]: CA Suggestion #3

Commented [MR20]: CA suggestion #3

Deleted: 6

Deleted: 6

Deleted: 6
\[ LSG_{x+t} \] - the level secondary guarantee on the valuation date for the insured age \( x \) at issue

**Guidance Note:** The FFSG\(_{x+t} \), ASG\(_{x+t} \), and LSG\(_{x+t} \) are based on the secondary guarantee values as of the valuation date and will remain constant throughout the cash flow projection. This will result in a constant lapse assumption, calculated as of the valuation date, that does not vary by duration throughout the cash flow projection for the NPR calculation.

ii. As of the valuation date, which is \( t \) years after issue, the annual lapse rate for the policy shall be assumed to be level for all future years and denoted as \( L_{x+t} \), which shall be set equal to:

\[ L_{x+t} = R_{x+t} \cdot 0.01 + (1 - R_{x+t}) \cdot 0.005 \cdot r_{x+t} \]

Where \( r_{x+t} \) is the ratio determined in Section 3.B.5.d.iv.2.

**Guidance Note:** By similar logic, it follows (from ASG\(_{x+t} \) being 0 when \( t=0 \)) that the level annual lapse rate to be used in the calculations in Section 3.B.5.c.i.2 and 3.B.5.c.i.3 is 1%. On the other hand, when performing the calculations in Section 3.B.5.c.ii.3, \( L_{x+t} \), though level, is not generally equal to what it was for the same policy on the previous valuation date.

### Section 6: Stochastic and Deterministic Exclusion Tests

#### B. Deterministic Exclusion Test (DET)

5. For purposes of determining the valuation net premiums used in the demonstration in Section 6.B.2:

a. If pursuant to Section 2, the NPR for the group of policies is the minimum reserve required under VM-A and VM-C, then the valuation net premiums are determined according to those minimum reserve requirements.

b. If the NPR is determined according to Section 3.B.4 or Section 3.B.5, then the lapse rates assumed for all durations shall for the purposes of the DET be set to 0%.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
PBR Staff of Texas Department of Insurance

Title of the Issue:
1. Address determination of materiality. VM-21 often refers to materiality but is missing a discussion on how materiality is determined.
2. Address use of approximations and simplifications in VM-21.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-21 Section 1.E (new), VM-21 Section 3.H (new), VM-31 Section 3.E.1, VM-31 Section 3.F.2.e

January 1, 2021 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. VM-21 often refers to materiality but is missing a discussion on how materiality is determined (a materiality standard), as VM-20 has in VM-20 Section 2.H. Moreover, the current language of Materiality in the VA Summary in VM-31 Section 3.E.1 (2021 edition) is based on the Life PBR Summary in VM-31 (2019 edition). The language of Materiality in the VA Summary in Section 3.E.1 of VM-31 should be updated, consistent with adding a new section to VM-21 to address materiality.

For reference, here are the relevant VM-20 passages:

**VM-20 Section 2.H**
The company shall establish, for the DR and SR, a standard containing the criteria for determining whether an assumption, risk factor or other element of the principle-based valuation has a material impact on the size of the reserve. This standard shall be applied when identifying material risks. Such a standard shall also apply to the NPR with respect to VM-20 Section 2.G.

**VM-31 Section 3.C.1**
Life Summary –The PBR Actuarial Report shall contain a Life Summary of the critical elements of all sub-reports of the Life Report as detailed in Section 3.D. In particular, this Life Summary shall include:

1. VM-20 Materiality – The standard established by the company pursuant to VM-20 Section 2.H.

2. While it is common for companies to use a significant number of approximations, simplifications, and modeling efficiency techniques for their VM-21 valuation, VM-21 is missing an explicit allowance of approximations, simplifications, or modeling efficiency techniques. To understand the impact of the large number of approximations, simplifications, and modeling efficiency techniques, they should be covered in one location in the PBR reporting for VA, in contrast to the current reporting where they are scattered throughout the PBR Report. VM-20 Section 2.G does not allow simplifications to bias the reserve downward. This addresses the concern that a large number of immaterial simplifications could add up to a material understatement. VM-21 needs an assurance that simplifications do not compound one another to become material even more than VM-20, due to the very larger number of simplifications commonly used.

VM-21 Section 1.E (new)

Materiality

The company shall establish a standard containing the criteria for determining whether an assumption, risk factor or other element of the principle-based valuation has a material impact on the size of the reserve or TAR. This standard shall be applied when identifying material risks.

VM-21 Section 3.H (new)

H. A company may use simplifications, approximations and modeling efficiency techniques to calculate the stochastic reserve and/or the additional standard projection amount required by this section if the company can demonstrate that the use of such techniques does not understate TAR by a material amount, and the expected value of TAR calculated using simplifications, approximations and modeling efficiency techniques is not less than the expected value of TAR calculated that does not use them.

Guidance Note:

Examples of modeling efficiency techniques include, but are not limited to:

1. Choosing a reduced set of scenarios from a larger set consistent with prescribed models and parameters.
2. Generating a smaller liability or asset model to represent the full seriatim model using grouping compression techniques or other similar simplifications.

There are multiple ways of providing the demonstration required by Section 3.H. The complexity of the demonstration depends upon the simplifications, approximations or modeling efficiency techniques used. Examples include, but are not limited to:

1. Rounding at a transactional level in a direction that is clearly and consistently conservative or is clearly and consistently unbiased with an obviously immaterial impact on the result (e.g., rounding to the nearest dollar) would satisfy 3.H without needing a demonstration. However,
rounding to too few significant digits relative to the quantity being rounded, even in an unbiased way, may be material and in that event, the company may need to provide a demonstration that the rounding would not produce a material understatement of TAR.

2. A brute force demonstration involves calculating the minimum reserve both with and without the simplification, approximation or modeling efficiency technique, and making a direct comparison between the resulting TAR. Regardless of the specific simplification, approximation or modeling efficiency technique used, brute force demonstrations always satisfy the requirements of Section 3.H.

3. Choosing a reduced set of scenarios from a larger set consistent with prescribed models and parameters and providing a detailed demonstration of why it did not understat TAR by a material amount and the expected value of TAR would not be less than the expected value of TAR that would otherwise be calculated. This demonstration may be a theoretical, statistical or mathematical argument establishing, to the satisfaction of the insurance commissioner, general bounds on the potential deviation in the TAR estimate rather than a brute force demonstration.

4. Justify the use of randomly sampling withdrawal ages for each contract instead of following the exact prescribed WDCM method by demonstrating that the random sampling method is materially equivalent to the exact prescribed approach, and the simplification does not materially reduce the Additional Standard Projection Amount and the final reported TAR. In particular, the company should demonstrate that the statistical variability of the results based on the random sampling approach is immaterial by testing different random sets, e.g., if randomly selecting a withdrawal age for each contract, the probability distribution of the withdrawal age should be stable and not vary significantly when using different random number sets.

VM-31 Section 3.E.1

VA Summary - The PBR Actuarial Report shall contain a VA Summary of the critical elements of all sub-reports of the VA Report as detailed in Section 3.F. In particular, this VA Summary shall include:

1. Materiality - The Standard established by the company pursuant to VM-21 Section 1.E.

VM-31 Section 3.F.2.e

c. Approximations, Simplifications, and Modeling Efficiency Techniques - A description of each approximation, simplification or modeling efficiency technique used in reserve or TAR calculations, and a statement that the required VM-21 Section 3.H demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understat TAR by a material amount; and 2) the expected value of TAR is not less than the expected value of TAR calculated without using the approximation, simplification, or modeling efficiency technique.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.
   Angela McNabb & Pat Allison – NAIC staff support

2. Identify the document, including the date if the document is “released for comment,” and the location in the
document where the amendment is proposed:
   January 1, 2021, version of the Valuation Manual – VM-51 Appendix 4

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify
the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version
of the verbiage. (You may do this through an attachment.)

<table>
<thead>
<tr>
<th>ITEM</th>
<th>L</th>
<th>DATA ELEMENT</th>
<th>DESCRIPTION</th>
</tr>
</thead>
</table>
| 11   | 1 | Smoker Status (at issue) | Smoker status should be submitted where reliable.  
0 = Unknown  
1 = No tobacco usage  
2 = Nonsmoker  
3 = Cigarette smoker  
4 = Tobacco user |

4. State the reason for the proposed amendment? (You may do this through an attachment.)

   In the event that additional underwriting is done after issue, it is possible that the preferred class would be
   inconsistent with the smoker status at issue. By removing the “at issue” specification, the smoker status would then
   be the current smoker status.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by
the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

Notes: APF 2021-10
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is:  
☐ New Model Law  
or  
X Amendment to Existing Model

1. Name of group to be responsible for drafting the model:
   
   Annuity Disclosure (A) Working Group of the Life Insurance and Annuities (A) Committee

2. NAIC staff support contact information:
   
   Jennifer Cook  
   jcook@naic.org  
   202-471-3986

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

   The Working Group would like to revise Section 6—Standards for Illustrations in the Annuity Disclosure Model Regulation (#245) to address issues identified by the Working Group related to innovations of annuity products currently in the marketplace that are not addressed or not adequately addressed in the current standards.

4. Does the model law meet the Model Law Criteria?  
   X Yes  
   or  
   ☐ No  
   (Check one)

   (If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

   a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states?  
      X Yes  
      or  
      ☐ No  
      (Check one)

      If yes, please explain why: Consumers should receive accurate disclosures of the annuities they are purchasing.

   b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?  
      X Yes  
      or  
      ☐ No  
      (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?  
   ☐ 1  
   ☐ 2  
   ☐ 3  
   ☐ 4  
   ☐ 5  
   (Check one)

   High Likelihood  
   Low Likelihood

   Explanation, if necessary:
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1  X 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood  Low Likelihood

Explanation, if necessary:

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1  X 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood  Low Likelihood

Explanation, if necessary:

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

Not an accreditation standard

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No.

* * * * *

Section 6. Standards for Annuity Illustrations

* * * * *

F. An illustration shall conform to the following requirements:

(1) The illustration shall be labeled with the date on which it was prepared;

(2) Each page, including any explanatory notes or pages, shall be numbered and show its relationship to the total number of pages in the disclosure document (e.g., the fourth page of a seven-page disclosure document shall be labeled “page 4 of 7 pages”);

(3) The assumed dates of premium receipt and benefit payout within a contract year shall be clearly identified;

(4) If the age of the proposed insured is shown as a component of the tabular detail, it shall be issue age plus the numbers of years the contract is assumed to have been in force;

(5) The assumed premium on which the illustrated benefits and values are based shall be clearly identified, including rider premium for any benefits being illustrated;

(6) Any charges for riders or other contract features assessed against the account value or the crediting rate shall be recognized in the illustrated values and shall be accompanied by a statement indicating the nature of the rider benefits or the contract features, and whether or not they are included in the illustration;

(7) Guaranteed death benefits and values available upon surrender, if any, for the illustrated contract premium shall be shown and clearly labeled guaranteed;

(8) Except as provided in Paragraph (22), the non-guaranteed elements underlying the non-guaranteed illustrated values shall be no more favorable than current non-guaranteed elements and shall not include any assumed future improvement of such elements. Additionally, non-guaranteed elements used in calculating non-guaranteed illustrated values at any future duration shall reflect any planned changes, including any planned changes that may occur after expiration of an initial guaranteed or bonus period;
In determining the non-guaranteed illustrated values for a fixed indexed annuity, the index-based interest rate and account value shall be calculated for three different scenarios: one to reflect historical performance of the index for the most recent ten (10) calendar years; one to reflect the historical performance of the index for the continuous period of ten (10) calendar years out of the last twenty (20) calendar years that would result in the least index value growth (the “low scenario”); one to reflect the historical performance of the index for the continuous period of ten (10) calendar years out of the last twenty (20) calendar years that would result in the most index value growth (the “high scenario”). The following requirements apply:

(a) The most recent ten (10) calendar years and the last twenty (20) calendar years are defined to end on the prior December 31, except for illustrations prepared during the first three (3) months of the year, for which the end date of the calendar year period may be the December 31 prior to the last full calendar year;

(b) If any index utilized in determination of an account value has not been in existence for at least ten (10) calendar years, indexed returns for that index shall not be illustrated. If the fixed indexed annuity provides an option to allocate account value to more than one indexed or fixed declared rate account, and one or more of those indexes has not been in existence for at least ten (10) calendar years, the allocation to such indexed account(s) shall be assumed to be zero;

(c) If any index utilized in determination of an account value has been in existence for at least ten (10) calendar years but less than twenty (20) calendar years, the ten (10) calendar year periods that define the low and high scenarios shall be chosen from the exact number of years the index has been in existence;

(d) The non-guaranteed element(s), such as caps, spreads, participation rates or other interest crediting adjustments, used in calculating the non-guaranteed index-based interest rate shall be no more favorable than the corresponding current element(s);

(e) If a fixed indexed annuity provides an option to allocate the account value to more than one indexed or fixed declared rate account:
   (i) The allocation used in the illustration shall be the same for all three scenarios; and
   (ii) The ten (10) calendar year periods resulting in the least and greatest index growth periods shall be determined independently for each indexed account option.

(f) The geometric mean annual effective rate of the account value growth over the ten (10) calendar year period shall be shown for each scenario;

(g) If the most recent ten (10) calendar year historical period experience of the index is shorter than the number of years needed to fulfill the requirement of subsection H, the most recent ten (10) calendar year historical period experience of the index shall be used for each subsequent ten (10) calendar year period beyond the initial period for the purpose of calculating the account value for the remaining years of the illustration;

(h) The low and high scenarios: (i) need not show surrender values (if different than account values); (ii) shall not extend beyond ten (10) calendar years (and therefore are not subject to the requirements of subsection H beyond subsection H(1)(a)); and (iii) may be shown on a separate page. A graphical presentation shall also be included comparing the movement of the account value over the ten (10) calendar year period for the low scenario, the high scenario and the most recent ten (10) calendar year scenario; and
The low and high scenarios should reflect the irregular nature of the index performance and should trigger every type of adjustment to the index-based interest rate under the contract. The effect of the adjustments should be clear; for example, additional columns showing how the adjustment applied may be included. If an adjustment to the index-based interest rate is not triggered in the illustration (because no historical values of the index in the required illustration range would have triggered it), the illustration shall so state;

10. The guaranteed elements, if any, shall be shown before corresponding non-guaranteed elements and shall be specifically referred to on any page of an illustration that shows or describes only the non-guaranteed elements (e.g., “see page 1 for guaranteed elements”);

11. The account or accumulation value of a contract, if shown, shall be identified by the name this value is given in the contract being illustrated and shown in close proximity to the corresponding value available upon surrender;

12. The value available upon surrender shall be identified by the name this value is given in the contract being illustrated and shall be the amount available to the contract owner in a lump sum after deduction of surrender charges, bonus forfeitures, contract loans, contract loan interest and application of any market value adjustment, as applicable;

13. Illustrations may show contract benefits and values in graphic or chart form in addition to the tabular form;

14. Any illustration of non-guaranteed elements shall be accompanied by a statement indicating that:
   (a) The benefits and values are not guaranteed;
   (b) The assumptions on which they are based are subject to change by the insurer; and
   (c) Actual results may be higher or lower;

15. Illustrations based on non-guaranteed credited interest and non-guaranteed annuity income rates shall contain equally prominent comparisons to guaranteed credited interest and guaranteed annuity income rates, including any guaranteed and non-guaranteed participation rates, caps or spreads for fixed indexed annuities;

16. The annuity income rate illustrated shall not be greater than the current annuity income rate unless the contract guarantees are in fact more favorable;

17. Illustrations shall be concise and easy to read;

18. Key terms shall be defined and then used consistently throughout the illustration;

19. Illustrations shall not depict values beyond the maximum annuitization age or date;

20. Annuity benefits shall be based on contract values that reflect surrender charges or any other adjustments, if applicable; and

21. Illustrations shall show both annuity income rates per $1000.00 and the dollar amounts of the periodic income payable.

22. For participating immediate and deferred income annuities:
   (a) Illustrations may not assume any future improvement in the applicable dividend scale (or scales, if more than one dividend scale applies, such as for a flexible premium annuity);
   (b) Illustrations must reflect the equitable apportionment of dividends, whether performance meets, exceeds or falls short of expectations;
(c) If the dividend scale is based on a portfolio rate method, the portfolio rate underlying the illustrated dividend scale shall not be assumed to increase;

(d) If the dividend scale is based on an investment cohort method, the illustrated dividend scale should assume that reinvestment rates grade to long-term interest rates, subject to the following conditions:

(i) Any assumptions as to future investment performance in the dividend formula must be consistent with assumptions that are reflected in the marketplace within the normal range of analyst forecasts and investor behavior; these assumptions may not be changed arbitrarily, notwithstanding changes in markets or economic conditions, and must be consistent with assumptions that the issuer uses with respect to other lines of business; and

(ii) The illustrated dividend scale should assume that reinvestment rates grade to long-term interest rates, based on U.S Treasury bonds. For the purposes of this grading, the assumed long-term rates should not exceed the rates calculated using the formula in subparagraph iii, below, based on the time to maturity or reinvestment (the “Tenor”) of the investments supporting the cohort of policies.

(iii) Maximum long-term interest rates should be calculated for tenors of 3 months (or less), 5 years, 10 years and 20 years (or more), using U.S Treasury rates. For each tenor, the maximum long-term interest rate will vary over time, based on historical interest rates as they emerge. The formula for the maximum long-term interest rate is the average of the median bond rate over the last 600 months and the average bond rate over the last 120 months, rounded to the nearest quarter of one percent (0.25%).

(iv) The maximum long-term interest rate for a tenor should be recalculated once per year, in January, using historical rates as of December 31 of the calendar year two years prior to the calendar year of the calculation date. The historical rate for each month is the rate reported for the last business day of the month.

(v) Grading to the maximum long-term interest rates should take place over:

(I) No less than 20 years from issue if U.S. Treasury rates as of the illustration date are below the long-term rates; or

(II) No more than 20 years from the issue if the U.S. Treasury rates as of the illustration date are above the long-term rates.

(vi) When the 10-year U.S. Treasury rate is less than the 10-year maximum long-term interest rate, an additional illustrated dividend scale should be presented. This additional illustrated dividend scale shall satisfy the following conditions:

(I) Assume that reinvestment U.S. Treasury rates do not exceed the initial investment U.S. Treasury rates, and

(II) Illustrate dividends no less than half of the dividends illustrated under the current dividend scales.

(III) If (a) and (b) above are in conflict—i.e., if half of the current dividends are greater than would be permitted by Condition (a)—then the reinvestment U.S. Treasury rates should equal the initial investment U.S. Treasury rates.
(vii) The illustration should include a disclosure that is substantially similar to the following:

The illustrated current dividend scale is based on interest rates that are assumed to gradually [increase/decrease] from current interest rates to long-term interest rates, over a period of [twenty] years. By regulation, the long-term assumed interest rates cannot and do not exceed the rates listed in column (c) of the table below.

(vii) If the illustration contains an additional dividend scale pursuant to subparagraph (vi) above, then the illustration should also include a disclosure that is substantially similar to the following:

The additional illustrated dividend scale is based on interest rates that are assumed no to increase and do not exceed the interest rates in column (b) of the table below.

ANNUITY DISCLOSURE MODEL REGULATION (#245)

1. Description of the Project, Issues Addressed, etc.

The Annuity Disclosure Model Regulation (#245) was revised to address its application to participating income annuities.

2. Name of Group Responsible for Drafting the Model and States Participating

The Annuity Disclosure (A) Working Group of the Life Insurance and Annuities (A) Committee was responsible for drafting the revisions.

States Participating:

- Mike Yanacheak, Chair, Iowa
- Chris Struk, Florida
- Julie Holmes and Craig VanAalst, Kansas
- Adewole Odumade, Maryland
- John Robinson, Minnesota
- Frank Stone, Oklahoma
- Sarah Neil/Matt Gendron, Rhode Island
- Doug Danzeiser/Phil Reyna, Texas

3. Project Authorized by What Charge and Date First Given to the Group

In 2016, the Life Insurance and Annuities (A) Committee adopted a charge for the Annuity Disclosure (A) Working Group to: “Review and revise, as necessary, Section 6—Standards for Annuity Illustrations in the Annuity Disclosure Model Regulation (#245) to take into account the disclosures necessary to inform consumers in light of the product innovations currently in the marketplace.”

At the 2017 Summer National Meeting, the Executive (EX) Committee and Plenary adopted a Request for NAIC Model Law Development “to revise Section 6—Standards for Illustrations in the Annuity Disclosure Model Regulation (#245) to address issues identified by the Working Group related to innovations of annuity products currently in the marketplace that are not addressed or addressed adequately in the current standards.”

4. A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc). Include any parties outside the members that participated.

The Annuity Disclosure (A) Working Group met six times to discuss an issue identified under its charge: that the model prohibits the illustration of “non-guaranteed elements,” which could be construed to include participating income annuities because of the formula used to calculate the dividend scale.

New York Life had been working with state insurance regulators since 2015 to develop language for inclusion in Model #245 to allow for the illustration of participating income annuities. The Working Group heard presentations explaining the issue and discussed a proposal forwarded by New York Life. The Working Group reviewed, discussed and revised the proposal. All drafts and comments were posted on the NAIC website. On March 2, 2018, the Working Group adopted draft revisions addressing participating income annuities.

5. A General Description of the Due Process (e.g., exposure periods, public hearings or any other means by which widespread input from industry, consumers and legislators was solicited)

The Annuity Disclosure (A) Working Group met Nov. 22, 2016; Dec. 14, 2017; March 9, 2017; April 13, 2017; Feb. 15 2018; March 2, 2018; and June 4, 2018. All drafts and comments were posted to the NAIC website. The Working Group adopted the revisions addressing participating income annuities on March 2, 2018, and the Life Insurance and Annuities (A) Committee adopted the revisions during the 2018 Summer National Meeting. These revisions were adopted and held by the Committee pending resolution of an additional issue that the Working Group identified. The Working Group did not end up
making any additional revision to the model. During the 2021 Spring National Meeting, the Committee agreed to disband the Working Group once these revisions to Model #245 were considered by the Membership.

6. **A Discussion of the Significant Issues (e.g., items of some controversy raised during the due process and the group’s response)**

During its Feb. 15 meeting, the Working Group discussed concerns that the American Academy of Actuaries (Academy) raised with the participating income annuity proposal. The Academy was concerned that the proposal deviated from the current standard in its use of projected improvements and that it did not apply the change consistently across product types. New York Life explained that the proposal was purposefully narrow in scope to address a particular issue with a particular product; only participating income annuities include the potential for additional income in the form of dividends based on the divisible surplus of the company. New York Life also worked with Missouri to revise the proposal to include additional disclosures about future rate assumptions, and it included a requirement that consumers are shown an additional, more conservative illustrated scale when current interest rates are less than the long-term interest rates.

7. **Any Other Important Information (e.g., amending an accreditation standard)**

None.
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is: ☒ New Model Law or ☐ Amendment to Existing Model

1. Name of group to be responsible for drafting the model:

Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force

2. NAIC staff support contact information:

Jolie Matthews jm.matthews@naic.org

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

The Subgroup has a charge to consider developing a new NAIC model to establish a licensing or registration process for pharmacy benefit managers (PBMs).

4. Does the model law meet the Model Law Criteria? ☒ Yes or ☐ No (Check one)

(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? ☒ Yes or ☐ No (Check one)

If yes, please explain why

The proposed new model would provide a consistent approach among the states for providing a regulatory scheme for these entities to address, for some states, a potential regulatory gap.

b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

☒ Yes or ☐ No (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

☒ 1 ☐ 2 ☐ 3 ☒ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary: The current subgroup would target completion of a model within one year.
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1  ☒ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood               Low Likelihood

Explanation, if necessary: Some states have already implemented laws and/or regulations establishing a regulatory scheme for these entities, which may or may not be consistent with the provisions in the proposed new model. For those states with laws or regulations not consistent with the new model’s provisions, the issue will be whether these states will want to re-open those laws or regulations after adoption of the new model.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1  ☒ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood               Low Likelihood

Explanation, if necessary: Some states have already implemented laws and/or regulations establishing a regulatory scheme for these entities, which may or may not be consistent with the provisions in the proposed new model. For those states with laws or regulations not consistent with the new model’s provisions, the issue will be whether these states will want to re-open those laws or regulations after adoption of the new model.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

No

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No. However, the U.S. Department of Health and Human Services (HHS) has proposed rules on rebating safe harbors. In addition, the HHS and/or other federal government agencies currently are considering proposing further federal policy guidance in the areas concerning PBMs and prescription drug pricing transparency and disclosure. In developing the new NAIC model, the Subgroup most likely will be discussing the same or similar issues.
[STATE] PHARMACY BENEFIT MANAGER LICENSURE AND REGULATION MODEL ACT

Table of Contents

Section 1. Short Title
Section 2. Purpose
Section 3. Definitions
Section 4. Applicability
Section 5. Licensing Requirement
Section 6. Gag Clauses and Other Pharmacy Benefit Manager Prohibited Practices
Section 7. Enforcement
Section 8. Regulations
Section 9. Severability
Section 10. Effective Date

Section 1. Short Title

This Act shall be known and may be cited as the Pharmacy Benefit Manager Licensure and Regulation Act.

Section 2. Purpose

A. This Act establishes the standards and criteria for the licensure and regulation of pharmacy benefit managers providing claims processing services or other prescription drug or device services for health benefit plans.

B. The purpose of this Act is to:

(1) Promote, preserve, and protect the public health, safety and welfare through effective regulation and licensure of pharmacy benefit managers;

(2) Promote the solvency of the commercial health insurance industry, the regulation of which is reserved to the states by the McCarran-Ferguson Act (15 U.S.C. §§ 1011 – 1015), as well as provide for consumer savings, and fairness in prescription drug benefits;

(3) Provide for powers and duties of the commissioner; and

(4) Prescribe penalties and fines for violations of this Act.

Section 3. Definitions

For purposes of this Act:

A. “Claims processing services” means the administrative services performed in connection with the processing and adjudicating of claims relating to pharmacist services that include:

(1) Receiving payments for pharmacist services;

(2) Making payments to pharmacists or pharmacies for pharmacist services; or

(3) Both paragraphs (1) and (2).

B. “Commissioner” means the insurance commissioner of this state.
C. “Covered person” means a member, policyholder, subscriber, enrollee, beneficiary, dependent or other individual participating in a health benefit plan.

D. “Health benefit plan” means a policy, contract, certificate or agreement entered into, offered or issued by a health carrier to provide, deliver, arrange for, pay for or reimburse any of the costs of [physical, mental or behavioral] health care services.

E. “Health carrier” means an entity subject to the insurance laws and regulations of this state, or subject to the jurisdiction of the commissioner, that contracts or offers to contract or enters into an agreement to provide, deliver, arrange for, pay for or reimburse any of the costs of health care services, including a sickness and accident insurance company, a health insurance company, a health maintenance organization, a hospital and health service corporation, or any other entity providing a plan of health insurance, health benefits, or health care services.

F. “Other prescription drug or device services” means services other than claims processing services, provided directly or indirectly, whether in connection with or separate from claims processing services, including, but not limited to:

1. Negotiating rebates, discounts or other financial incentives and arrangements with drug companies;
2. Disbursing or distributing rebates;
3. Managing or participating in incentive programs or arrangements for pharmacist services;
4. Negotiating or entering into contractual arrangements with pharmacists or pharmacies, or both;
5. Developing and maintaining formularies;
6. Designing prescription benefit programs; or
7. Advertising or promoting services.

G. “Pharmacist” means an individual licensed as a pharmacist by the [state] Board of Pharmacy.

H. “Pharmacist services” means products, goods, and services or any combination of products, goods and services, provided as a part of the practice of pharmacy.

I. “Pharmacy” means the place licensed by the [state] Board of Pharmacy in which drugs, chemicals, medicines, prescriptions and poisons are compounded, dispensed or sold at retail.

J. (1) “Pharmacy benefit manager” means a person, business or entity, including a wholly or partially owned or controlled subsidiary of a pharmacy benefit manager, that provides claims processing services or other prescription drug or device services, or both, to covered persons who are residents of this state, for health benefit plans.

2. “Pharmacy benefit manager” does not include:
   (a) A health care facility licensed in this state;
   (b) A health care professional licensed in this state;
   (c) A consultant who only provides advice as to the selection or performance of a pharmacy benefit manager; or
A health carrier to the extent that it performs any claims processing and other prescription drug or device services exclusively for its enrollees.

**Section 4. Applicability**

A. This Act shall apply to a contract or health benefit plan issued, renewed, recredentialled, amended or extended on or after the effective date of this Act, including any health carrier that performs claims processing or other prescription drug or device services through a third party.

**Drafting Note:** States may want to consider adding language to Subsection A above or Section 10 of this Act providing additional time for pharmacy benefit managers to come into compliance with the requirements of this Act.

B. As a condition of licensure, any contract in existence on the date the pharmacy benefit manager receives its license to do business in this state shall comply with the requirements of this Act.

C. Nothing in this Act is intended or shall be construed to conflict with existing relevant federal law.

**Section 5. Licensing Requirement**

A. A person may not establish or operate as a pharmacy benefit manager in this state for health benefit plans without first obtaining a license from the commissioner under this Act.

B. The commissioner may adopt regulations establishing the licensing application, financial and reporting requirements for pharmacy benefit managers under this Act.

**Drafting Note:** States that are restricted in their rulemaking to only what is prescribed in statute may want to consider including in this section specific financial standards required for a person or organization to obtain a license to operate as a pharmacy benefit manager in this state.

C. A person applying for a pharmacy benefit manager license shall submit an application for licensure in the form and manner prescribed by the commissioner.

**Drafting Note:** States may want to consider reviewing their third-party administrator statute if a state wishes to specify what documents must be provided to the commissioner to obtain a pharmacy benefit manager license in the state.

D. A person submitting an application for a pharmacy benefit manager license shall include with the application a non-refundable application fee of $[X].

E. The commissioner may refuse to issue or renew a license if the commissioner determines that the applicant or any individual responsible for the conduct of affairs of the applicant is not competent, trustworthy, financially responsible or of good personal and business reputation or has been found to have violated the insurance laws of this state or any other jurisdiction, or has had an insurance or other certificate of authority or license denied or revoked for cause by any jurisdiction.

F. (1) Unless surrendered, suspended or revoked by the commissioner, a license issued under this section shall remain valid as long as the pharmacy benefit manager continues to do business in this state and remains in compliance with the provisions of this act and any applicable rules and regulations, including the payment of an annual license renewal fee of $[X] and completion of a renewal application on a form prescribed by the commissioner.

(2) Such renewal fee and application shall be received by the commissioner on or before [x] days prior to the anniversary of the effective date of the pharmacy benefit manager’s initial or most recent license.
Section 6. Gag Clauses and Other Pharmacy Benefit Manager Prohibited Practices

A. In any participation contracts between a pharmacy benefit manager and pharmacists or pharmacies providing prescription drug coverage for health benefit plans, no pharmacy or pharmacist may be prohibited, restricted or penalized in any way from disclosing to any covered person any healthcare information that the pharmacy or pharmacist deems appropriate regarding:

(1) The nature of treatment, risks or alternative thereto;
(2) The availability of alternate therapies, consultations, or tests;
(3) The decision of utilization reviewers or similar persons to authorize or deny services;
(4) The process that is used to authorize or deny healthcare services or benefits; or
(5) Information on financial incentives and structures used by the insurer.

B. A pharmacy benefit manager may not prohibit a pharmacy or pharmacist from discussing information regarding the total cost for pharmacist services for a prescription drug or from selling a more affordable alternative to the covered person if a more affordable alternative is available.

C. A pharmacy benefit manager contract with a participating pharmacist or pharmacy may not prohibit, restrict, or limit disclosure of information to the commissioner, law enforcement or state and federal governmental officials, provided that:

(1) The recipient of the information represents it has the authority, to the extent provided by state or federal law, to maintain proprietary information as confidential; and
(2) Prior to disclosure of information designated as confidential the pharmacist or pharmacy:
   (a) Marks as confidential any document in which the information appears; or
   (b) Requests confidential treatment for any oral communication of the information.

D. A pharmacy benefit manager may not terminate the contract of or penalize a pharmacist or pharmacy due to pharmacist or pharmacy:

(1) Disclosing information about pharmacy benefit manager practices, except for information determined to be a trade secret, as determined by state law or the commissioner; or
(2) Sharing any portion of the pharmacy benefit manager contract with the commissioner pursuant to a complaint or a query regarding whether the contract is in compliance with this Act.

E. (1) A pharmacy benefit manager may not require a covered person purchasing a covered prescription drug to pay an amount greater than the lesser of the covered person’s cost-sharing amount under the terms of the health benefit plan or the amount the covered person would pay for the drug if the covered person were paying the cash price.

(2) Any amount paid by a covered person under paragraph (1) of this subsection shall be attributable toward any deductible or, to the extent consistent with section 2707 of the Public Health Service Act, the annual out-of-pocket maximums under the covered person’s health benefit plan.

Section 7. Enforcement

A. The commissioner shall enforce compliance with the requirements of this Act.

B. (1) The commissioner may examine or audit the books and records of a pharmacy benefit manager providing claims processing services or other prescription drug or device services for a health benefit plan to determine compliance with this Act.
Drafting Note: States may want to consider including a reference to the cost of examinations in the Model Law on Examinations (#390).

Drafting Note: States may want to consider incorporating their existing market conduct examination statutes into this Act rather than relying on the examination authority provided under this section.

(2) The information or data acquired during an examination under paragraph (1) is:

(a) Considered proprietary and confidential;
(b) Not subject to the [Freedom of Information Act] of this state;
(c) Not subject to subpoena; and
(d) Not subject to discovery or admissible in evidence in any private civil action.

C. The commissioner may use any document or information provided pursuant to Section 6C of this Act or Section 6D of this Act in the performance of the commissioner’s duties to determine compliance with this Act.

D. The commissioner may impose a penalty on a pharmacy benefit manager or the health carrier with which it is contracted, or both, for a violation of this Act. The penalty may not exceed [insert appropriate state penalty] per entity for each violation of this Act.

Drafting Note: If an appeals process is not otherwise provided, a state should consider adding such a provision to this section.

Section 8. Regulations

The commissioner may promulgate regulations relating to pharmacy benefit managers that are not inconsistent with this Act.

Section 9. Severability

If any provision of this Act, or the application of the provision to any person or circumstance shall be held invalid, the remainder of this Act, and the application of the provision to persons or circumstances other than those to which it is held invalid, shall not be affected.

Section 10. Effective Date

This Act shall be effective [insert date]. A person doing business in this state as a pharmacy benefit manager on or before the effective date of this Act shall have six (6) months following [insert date that the Act is effective] to come into compliance with the requirements of this Act.
PROJECT HISTORY-2021

[STATE] PHARMACY BENEFIT MANAGER LICENSURE AND REGULATION MODEL ACT

1. Description of the Project, Issues Addressed, etc.

In 2018, after the full NAIC membership adopted the revisions to the Health Carrier Prescription Drug Benefit Management Model Act §22, there was consensus for the NAIC to explore whether to develop a new model regulating pharmacy benefit managers (PBMs). The Regulatory Framework (B) Task Force established the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup to discuss the issue. In 2019, the Subgroup decided to move forward with a 2019 charge to “[t]he Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.”

In March 2019, the Subgroup adopted a Request for NAIC Model Law Development to work on the proposed new PBM model. The Task Force and the Health Insurance and Managed Care (B) Committee both adopted the Request for NAIC Model Law Development at the 2019 Spring National Meeting. The Executive (EX) Committee adopted the request at the 2019 Summer National Meeting. Based on its work plan, the Subgroup met 12 times throughout the summer and early fall of 2019 to hear from various stakeholders on the issues the Subgroup wanted to hear more about, such as rebating, discounts, prescription drug pricing, and how PBMs are currently regulated. The Subgroup’s goal was to have its members all equally educated on these issues before it started drafting a model.

Following these informational meetings, the Subgroup determined that it had received sufficient information to move forward with drafting the proposed model. In November 2019, the Subgroup established an ad hoc technical drafting group to develop an initial draft for the full Subgroup’s review. The ad hoc technical drafting group met in December 2019 and January 2020. Due to the COVID-19 pandemic, the Subgroup was unable to meet to discuss the ad hoc technical drafting group’s draft until July 2020. During that meeting, the Subgroup discussed the initial draft and formally exposed the draft for public comment until Sept. 1, 2020. Following the end of the public comment deadline, the Subgroup met Oct. 22, 2020; Oct. 8, 2020; Oct. 1, 2020; Sept. 24, 2020; and Sept. 14, 2020, to discuss the Sept. 1, 2020, comments received on the proposed new model. During its Oct. 29, 2020, meeting, the Subgroup adopted the new model and forwarded it to the Task Force for its consideration.

As adopted by the Subgroup, at its core, the PBM model is a PBM licensing model. Sections 1–4 of the proposed PBM model set out the model’s purpose, scope, and definitions. Section 5 provides the PBM licensing provisions, including provisions related to approving initial PBM licenses and renewals. Section 6—Gag Clauses and Other Pharmacy Benefit Manager Prohibited Practices includes language related to gag clauses and information-sharing for the purposes of enforcement. Section 7 of the proposed PBM model provides enforcement language and penalties for any violations of the model act. Section 8—Regulations provides that the commissioner may promulgate regulations relating to PBMs that are not inconsistent with the model act. Section 8 also includes a drafting note to Section 8 to providing state statutory citations for 15 topic areas that some states might want to consider when developing their state legislation regulating PBMs. Section 9 and Section 10 provide, respectively, for the severability of the model act’s provisions and an effective date.

The Task Force met during the 2020 Fall National Meeting to consider the new PBM model. Given some issues with the proposed PBM model, particularly issues concerning a proposed drafting note for Section 8, the Task Force deferred acting on the PBM model and exposed it for an additional 30-day public comment period. Following the end of the public comment period, the Task Force met March 1 to discuss the comments received. During this meeting, the Task Force extensively discussed the comments received on the Section 8 drafting note and the potential impact of the U.S. Supreme Court’s decision in Rutledge vs. Pharmaceutical Care Management Association (PCMA) on the draft PBM model. The Task Force adopted the PBM model March 18 and forwarded it to the Health Insurance and Managed Care (B) Committee for its consideration. The Committee deferred acting on the proposed PBM model during its meeting at the Spring National Meeting. The Committee extensively discussed the proposed Section 8 drafting note during a meeting June 22. Following that discussion, the Committee adopted the PBM model without the Section 8 drafting note to address concerns about the precedent of including optional sections the states could consider in adopting an NAIC model. In addition, in making this decision, the Committee considered that the Task Force had adopted a new charge for the Subgroup to develop a white paper that would explore the PBM business practices highlighted in the drafting note, including current and emerging state laws on these practices.
2. **Name of Group Responsible for Drafting the Model and States Participating**

The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force drafted the proposed new model. The members of the Subgroup were: Alabama, Alaska, Arkansas, California, District of Columbia, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Missouri, Montana, Nebraska, New Jersey, New Mexico, North Carolina, Oregon, Pennsylvania, Tennessee, Virginia, Washington, West Virginia, Wisconsin, and Wyoming. Oregon chaired the Subgroup. Nebraska was vice chair of the Subgroup.

3. **Project Authorized by What Charge and Date First Given to the Group**

The Regulatory Framework (B) Task Force established the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup in 2018. In 2019, the Task Force adopted a charge for the Subgroup to, “[c]onsider developing a new NAIC model to establish a licensing or registration process for pharmacy benefit managers (PBMs). The Subgroup may consider including in the new NAIC model provisions on PBM prescription drug pricing and cost transparency.”

4. **A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc.; include any parties outside the members that participated)**

Beginning in March 2019 and ending in October 2020, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup reviewed and discussed all the comments received. Numerous interested parties participated in the drafting process. The interested parties represented all stakeholder groups, including consumers, insurers, providers, and PBM representatives. Each draft of proposed revisions was posted to the Subgroup’s web page on the NAIC website. All comment letters received were also posted. The Subgroup met in open meetings throughout the drafting process. In addition to the Subgroup’s drafting process, during its discussions of the PBM model, the Regulatory Framework (B) Task Force also held open meetings and posted all comment letters on its website.

5. **A General Description of the Due Process (e.g., exposure periods; public hearings; or any other means by which widespread input from industry, consumers, and legislators was solicited)**

Beginning in March 2019 and ending in October 2020, the Pharmacy Benefit Manager Regulatory Issues (B) Subgroup reviewed and discussed all the comments received. Numerous interested parties participated in the drafting process. The interested parties represented all stakeholder groups, including consumers, insurers, providers, and PBM representatives. Each draft of proposed revisions was posted to the Subgroup’s web page on the NAIC website. All comment letters received were also posted. The Subgroup met in open meetings throughout the drafting process. In addition to the Subgroup’s drafting process, during its discussions of the PBM model, the Regulatory Framework (B) Task Force also held open meetings and posted all comment letters on its website.

6. **A Discussion of the Significant Issues (items of some controversy raised during the drafting process and the group’s response)**

There was one significant item of controversy raised and ultimately resolved during the drafting process. The item of controversy concerned the proposed drafting note to Section 8. The proposed drafting note provided state statutory citations for 15 topic areas reflecting current PBM business practices that some states might want to consider when developing their state legislation regulating PBMs. The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup took this approach as a compromise between some states that wanted the PBM model to focus only on the licensing and registration by state departments of insurance (DOIs) and other states that wanted to go further to include substantive provisions related to these PBM business practices. The 15 topic areas are those areas where the Subgroup found, at this time, a lack of national consensus to include in the proposed PBM model. During the Regulatory Framework (B) Task Force and the Health Insurance and Managed Care (B) Committee discussion of the PBM model, concerns were raised about the potential of a lack of uniformity in adoption by the states, which is a key component of the NAIC model law development procedures, if states selected different provisions to include in their state law in implementing the PBM model. Given this concern, some stakeholders suggested that the options approach in the Section 8 drafting note was not the appropriate approach to take and instead suggested that the Task Force consider a charge to the Subgroup to develop a white paper that would examine current and emerging state laws related to the PBM business practices outlined in the drafting note. Following its adoption of the PBM model, during its June 15 meeting, the Task Force adopted such a charge for the Subgroup. During its June 22 meeting, the Committee decided to delete the Section 8 drafting note, given the adoption of the Subgroup charge to develop a white paper and the issues related to the drafting note.
Another issue that arose was whether to defer adoption of the PBM model because of the Rutledge decision, which upheld an Arkansas law regulating certain PBM business practices. Those suggesting deferring the PBM model adoption asserted that the Rutledge decision supported state efforts to enact laws regulating PBM business practices, and the PBM model should be revised to include substantive provisions related to these PBM business practices. The Task Force decided to move forward with the PBM model, as drafted by the Subgroup, because of the different interpretations of the Rutledge decision as it relates to Employee Retirement Income Security Act of 1974 (ERISA) preemption of state laws regulating PBM business practices. To address this issue, the Task Force included in its charge to the Subgroup to develop a white paper language requiring the Subgroup to also examine the impact of the Rutledge decision on states seeking to enact laws regulating certain PBM business practices. In its discussions related to this issue, the Committee supported addressing this issue through the white paper.

The Subgroup also received comments concerning Section 6. Some commenters suggested that the gag clause provision in this section should mirror the federal gag clause language. The Subgroup did not accept that suggestion.

7. Any Other Important Information (e.g., amending an accreditation standard).

None.

W:\National Meetings\2021\Summer\Plenary\Att 4 PBMs_combined_final.pdf
GUIDELINE FOR DEFINITION OF RECIPROCAL STATE IN RECEIVERSHIP LAWS

Drafting Note: The receivership laws of most states address the coordination of receiverships involving multiple states. Typically, these laws provide that a domiciliary receiver appointed in another state has certain rights and protections, such as the following:

- The domiciliary receiver is vested with the title to the insurer’s assets in the state.
- Attachments, garnishments or levies against the insurer or its assets are prohibited.
- Actions against the insurer and its insureds are stayed for a specified period of time.

In many states’ laws, these provisions may apply only if the domiciliary state is a “reciprocal state.” Frequently, the definition of a reciprocal state is based on NAIC model laws adopted more than 20 years ago. These definitions may be inconsistent with laws in other states, and they may be more prescriptive than the Part A standards of the NAIC Financial Regulation Standards and Accreditation Program for state receivership laws. As a result, the assets of a receivership estate might not be protected outside of the domiciliary state, and the receiver may be forced to defend litigation in multiple forums.

The provisions described above are intended to promote judicial economy, which benefits all participants in the receivership process. This guideline provides a statutory definition that may be used by states with a reciprocity requirement to effectuate the purposes of these provisions. Under this definition, any state meeting the applicable NAIC Part A Accreditation standards for receivership laws will be treated as a reciprocal state. The definition recognizes the diversity of existing state receivership laws and should prevent unnecessary litigation regarding the recognition of a state as a reciprocal state.

Definition of Reciprocal State for Receivership

“Reciprocal state” means a state that has enacted a law that sets forth a scheme for the administration of an insurer in receivership by the state’s insurance commissioner or comparable insurance regulatory official.
PROJECT HISTORY-2021

GUIDELINE FOR DEFINITION OF RECIPROCAL STATE IN RECEIVERSHIP LAWS

1. Description of the Project, Issues Addressed, etc.

The Receivership and Insolvency (E) Task Force has an active and ongoing charge, which was adopted in each year of this project by the Executive (EX) Committee and Plenary, that reads as follows:

Perform additional work as directed by the Financial Condition (E) Committee and/or received through referral by other groups.

In 2020, the Task Force finalized its Macroprudential Initiative (MPI) study, which began in 2019, and addressed the referral from the Financial Stability (EX) Task Force to evaluate receivership and guaranty fund laws and practices in the context of the MPI. The Task Force surveyed state insurance regulators and interested parties on each of the key provisions of receivership and guaranty fund laws that states should consider adopting into their laws, particularly with respect to receivership of insurers operating in multiple states. While a receivership of a multi-jurisdictional insurer would not likely have a material impact on financial stability or the broader financial markets, this project highlighted areas of the receivership process that may need attention, including laws related to full faith and credit of stays and injunctions.

The Task Force discussed the effect of whether a stay or injunction entered into a receivership court is honored in another state. This has been the subject of a lot of litigation, and receivers have expressed concern about this issue. The receivership laws of most states address the coordination of receiverships involving multiple states. However, in many states’ laws, these provisions may apply only if the domiciliary state is a “reciprocal state.” Frequently, the definition of a reciprocal state is based on NAIC model laws adopted more than 20 years ago.

The Task Force drafted this Guideline as an alternative to address how states define “reciprocal state.” This Guideline provides an optional statutory definition that may be used by states with a reciprocity requirement to effectuate the purposes of provisions regarding the coordination of receiverships involving multiple states.

2. Name of Group Responsible for Drafting the Model and States Participating.

The Receivership and Insolvency (E) Task Force was responsible for drafting the Guideline. The 2020 and 2021 members of the Task Force were:

2020: Texas (Chair); District of Columbia (Vice Chair); Alaska; American Samoa; Arkansas; California; Colorado; Connecticut; Florida; Illinois; Iowa; Kansas; Kentucky; Maine; Massachusetts; Michigan; Missouri; Montana; Nebraska; New Jersey; North Carolina; Oklahoma; Pennsylvania; Rhode Island; South Carolina; Tennessee; and Utah.

2021: Texas (Chair); Louisiana (Vice Chair); American Samoa; Arizona; Colorado; Connecticut; Florida; Hawaii; Illinois; Iowa; Kansas; Kentucky; Maine; Massachusetts; Michigan; Missouri; Montana; Nebraska; New Jersey; New Mexico; North Carolina; Northern Mariana Islands; Oklahoma; Pennsylvania; Rhode Island; South Carolina; and Utah.

3. Project Authorized by What Charge and Date First Given to the Group.

As described in paragraph 1, on its Oct. 7, 2020, meeting, the Task Force agreed to draft a guideline to address this issue, which was identified through the results of the MPI study and the subsequent survey regarding key provisions of receivership and guaranty fund laws that states should consider adopting into their laws.

4. A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.

The Guideline was drafted by Task Force members: Florida; Maine; Texas; and Patrick Cantilo (Cantilo and Bennett LLP), an interested party. This drafting group met Oct. 19, 2020, and considered language contained in both the Florida and Maine laws. Rather than identifying a list of specific key provisions in law that would be required for a state to be defined as “reciprocal,” the drafting group agreed to use the same criteria used by the NAIC Financial Regulation Standards and Accreditation Program.
Under this definition, any state meeting the applicable NAIC Part A Accreditation standards for receivership laws, which requires a state to have a “receivership scheme,” will be treated as a reciprocal state. The definition recognizes the diversity of existing state receivership laws, and it should avoid unnecessary litigation regarding the recognition of a state as a reciprocal state.

5. **A General Description of the Due Process** (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers and legislators was solicited).

On Nov. 19, 2020, the Task Force met to release the draft Guideline for a 42-day public comment period ending Dec. 31, 2020. The exposure was distributed by email to members, interested state insurance regulators, and interested parties of the Task Force; and it was posted to the NAIC website.

The Task Force did not receive any comments.

The Task Force adopted the Guideline on March 12, 2021.

The Financial Condition (E) Committee adopted the Guideline on April 13, 2021.

6. **A Discussion of the Significant Issues** (items of some controversy raised during the due process and the group’s response).

There were no issues of significance raised during the exposure periods or during meetings.

7. **List the key provisions of the model** (sections considered most essential to state adoption).

The Guideline provides the following definition, as well as an explanatory drafting note:

“Reciprocal state” means a state that has enacted a law that sets forth a scheme for the administration of an insurer in receivership by the state’s insurance commissioner or comparable insurance regulatory official.

8. **Any Other Important Information** (e.g., amending an accreditation standard).

The Guideline will not be considered for any accreditation standard.
MEMORANDUM

TO: NAIC Plenary

FROM: Scott White, Financial Condition (E) Committee

DATE: June 29

RE: Agenda item 2019-24: Levelized and Persistency Commission

This memorandum summarizes both 1) the adopted changes to SSAP No. 71—Policy Acquisition Costs and Commissions, and 2) an overview of the key points of the levelized commission agenda item 2019-24 which were adopted into the changes to SSAP No. 71.

The Statutory Accounting Principles (E) Working Group began discussion in August 2019 and on March 15, 2021, adopted revisions (see illustrated revisions page 5) which are effective Dec. 31, 2021. The Working Group vote was 13 states in favor and one state opposed. On March 23, 2021, the Accounting Practices and Procedures (E) Task Force adopted the revisions as adopted by the Working Group with a vote of 41 members in favor and two opposed (LA and OK). On April 13, 2021, the Financial Condition (E) Committee adopted theses same revisions to SSAP No. 71 with a vote of 11-3 (Mississippi, New Mexico and South Carolina dissenting).

Overview

• Acquisition Costs: Acquisition costs are expenses incurred in the acquisition of new and renewal insurance contracts. These are costs that vary with and are primarily related to the acquisition of insurance contracts (e.g., agent and broker commissions, certain underwriting and policy issue costs, and medical and inspection fees). It is a foundational concept for statutory accounting principles (SAP) that acquisition costs including commissions are expensed as incurred. This is because incurred costs are not available to pay policyholder claims. Both U.S. generally accepted accounting principles (GAAP) and SAP would calculate acquisition costs in a similar manner. GAAP treatment capitalizes acquisition costs and expenses them over time to match revenue and expenses. This is one of the major financial reporting differences between SAP and GAAP. These differences are intentional because SAP is measuring the ability to pay policyholder claims using the foundational principles of conservatism, consistency and recognition. GAAP, on the other hand, is focused on matching revenue to expenses.
• **Funding Agreement:** A funding agreement is using a third-party to pay commission costs on the insurer’s behalf, with the insurer repaying the third-party over time plus interest. To ensure consistent and conservative treatment, and appropriate recognition, SSAP No. 71 requires that the full amount of the funding agreement liability be recognized upfront by the insurer plus interest and fees owed to date. This is because the substance of the agreement is a LOAN. That is, the third-party is paying an insurer’s acquisition commission obligation and accepting repayment over time (e.g., over 3-8 years).

• **Persistency Commission Versus Loan with a Contingency Element:** A normal persistency commission is one in which additional commission is earned over time, when a policy is renewed or remains in force. A distinct difference is that persistency commission occurs subsequent to an initial sales commission. The triggering event is the continuation (or renewal) of a policy. An additional amount is owed if the policy persists overtime. A persistency commission is typically a much smaller payment than initial sales commission. For example, a small percentage if the policy is in force in years 2-10.

  Note: Although traditional persistency commission is not required to be recognized before the triggering event (e.g., renewal), earlier comments from industry noted that they could be inadvertently scoped in with the initially exposed revisions. The adopted edits addressed this concern and are clear that the recognition of commission is based on the triggering event, which is the policy action, such as initial issuance or renewal.

The practice under dispute represents initial sales commission that is not being recognized by a limited number of insurers. With these designs, the insurer has an agreement to reimburse a third-party in the future (who has paid the commission cost to the agent on the insurer’s behalf) plus interest and fees. The third-party agreement notes that the insurer does not have to pay the future installments if the policy lapses. *(The impacted insurers have noted that this practice inserts a “persistency” element into the initial sales commission already incurred. This is actually a LOAN with a contingency element.)* Note: Insurers are required to recognize the full initial commission cost when a policy is issued. If a policy is cancelled, at that time, an insurer can derecognize the liability to repay the third party.

**Disputed practice:** Those few insurers that are not recognizing the full liability under the funding agreement (to repay the parties who are paying acquisition costs on their behalf) are not following the long-standing guidance in SSAP No. 71. These limited companies are only recognizing a fraction of the acquisition commission expense, which results in misleading financial statements, and presents a better financial position than actually exists (as the company has unrecorded liabilities for commissions already paid on their behalf). SSAP No. 71 requires recognition of the full liability amount of such an
agreement, even if repayment is not guaranteed. The small number of insurers have asserted that their reporting is a decades-long practice. However the SSAP No. 71 guidance that requires full accrual of the liability was adopted in 1998 and is based on even earlier statutory accounting guidance which notes that, “The accounting treatment for certain transactions, characterized as levelized commissions, which results in enhancement of surplus, has been determined to be inappropriate for statutory reporting.” The Working Group discussions identified that not recognizing the full liability appears to have been practiced by only a small minority of companies, which supports that the majority of industry is reporting correctly.

- **Lapse** - Lapse risk is a risk identified in Model 791 Life and Health Reinsurance, as a significant insurance risk therefore it cannot be transferred to a non-insurance entity. However, some employing the disputed practice have tried to assert that it has been transferred to the funding agent.

- **Overview of Edits**: Revisions clarify that an insurance entity cannot use third-party structures to recharacterize and delay recognition of liabilities for initial sales commission owed, regardless of how a third-party arrangement is structured with regards to the timing of the payment from the insurers. This guidance clarifies that it is the writing of the insurance contract that obligates the insurer and recognition of expense shall occur consistently among insurers. SSAP No. 71 does not require advanced recognition for expected renewals or normal persistency metrics. When an insurance policy is issued, renewed or when metrics are met that require additional commission, then SSAP No. 71 consistently requires expense recognition for all insurers.

- **Substantive / Nonsubstantive** - The determination of a change as substantive or nonsubstantive is based on whether the edits reflect original intent (nonsubstantive) or incorporates new accounting concepts (substantive). Throughout the discussion process, it has been reiterated that the edits simply clarify the original intent of SSAP No. 71. As such, the change was classified as nonsubstantive. The impact to companies or the number of companies that have incorrectly applied accounting guidance is not a factor in determining whether a clarifying edit is substantive or nonsubstantive. However, the incorrect application only seems to involve a limited number of linked-companies, with other entities following the original intent of SSAP No. 71, which supports that the changes are nonsubstantive and consistent with original intent. The March 15 Working Group discussion affirmed the nonsubstantive classification of the revisions was consistent with the policy statement.

- **Correction of Error / Change in Accounting Principle**: An earlier comment from an impacted company identified that there is a process concern as the edits to SSAP No. 71 are classified as a change in accounting principle and not a correction of error. *(Under
SSAP No. 3—Accounting Changes and Correction of Errors, a mistake in the application of accounting principles is a correction of an error.) The edits proposed in July 2020 were to classify changes required from misapplication of SSAP No. 71 as a correction of error. However, in response to comments, the Working Group agreed to designate the impact as a change in accounting principle. This provision was provided to assist companies in reflecting the change. Both processes require the impact to be recognized to unassigned funds (surplus). If reported as a correction of an error, then an entity may be subject to filing amended financial statements for periods in which the error was reflected. As a change in accounting principle, then the entity calculates the change as a cumulative effect to the Jan. 1 balance in the current year financials.

- **Use of Funding Agreements:** SSAP No. 71 does not prohibit the use of funding agreements or the use of third parties to pay commission expense to selling agents. SSAP No. 71 simply requires consistent recognition of commission expense based on policy issuance or renewal. The involvement of third parties and funding agreements to front commission owed to selling agents is not a free service. These third-parties require fees and interest from these financing arrangements; which presumably exceeds the costs of commission only. The long-standing guidance in SSAP No. 71 requires recognition of the full amount of unpaid principal and interest accrued to date in these arrangements. One comment raised during the discussion was that the clarified guidance would hurt policyholders. This comment was never fully substantiated, but it was noted that failing to report expenses in line with SSAP No. 71 would result with inappropriate financial positions – which could hurt policyholders. Additionally, it was noted that if the process to defer expense recognition was sanctioned, then all insurers would have to engage in these arrangements to prevent competitive disadvantages with reporting.

- **Payments to the Direct Agent:** Some of the comments received from the impacted companies (or their representatives) have tried to indicate that the timing (and how) the initial sales commission is paid to the direct selling agent by the third-party should not impact the recognition of commission expense by the insurer. These comments were made because it has been highlighted that in the known situations, the third-party agents have already paid the direct selling agent the owed commission. Although the third-party payment to the direct selling agent substantiates that a commission was owed from policy issuance, the payment to the direct agent is not the triggering event. (Meaning, even if a third-party was to revise their agreements with direct agents to delay payment, this will not change that the insurer owes commission expense from policy issuance. The initial sales commission is triggered by policy issuance.)

- **Consistent Application Across Companies:** SSAP No. 71 is a “common area” SSAP and applies to all entities regardless of their line of business or product offerings. Some comments made to regulators have implied that certain large companies are permitted processes that are not in line with SSAP No. 71. It is speculated that these comments are
trying to compare commission expenses from renewals (which are not required until policy renewal occurs) to the process engaged by these companies in which they have not recognized commission expense from the initial issuance of policies. This goes back to these impacted companies mischaracterizing these financing arrangements as “persistency” commission. These timing arrangements do not alter the requirement to recognize commission expense with the issuance of a policy. Because many of these funding agreements were mischaracterized, it was noted that the disputed practice is difficult to identify on financial examinations and audits. One Working Group member shared that they had dealt with an issue like this previously when $16 million of off-balance sheet commission liabilities was identified after a third party funding agent applied to the liquidator for reimbursement.

- **Impacted Companies:** Throughout the discussion, key industry representatives continued to highlight that the impacted companies were less “than 10” and likely “5 or less.” The impacted companies were requested to reach out to domiciliary states to provide information. However the impact for these few companies is expected to be material. A consumer representative also voiced concerns about the illusory surplus and unlevel playing field such arrangements create. Because of the unfair competitive advantages that are perceived, the Working Group was not in favor of grandfathering the practices. However the Working Group did discuss that companies could have discussions with their domiciliary states regarding obtaining a permitted practice for phasing in the financial impact. A permitted practice approach was favored because the impact to the affected companies may vary.

**Effective Date:** Although nonsubstantive revisions are generally effective upon adoption, the Working Group ultimately determined to have a Dec. 31, 2021 effective date. Two of the industry commenters (Guggenheim and interested parties (Delaware Life)) stated support for an effective date no sooner than Dec. 31, 2021 at the March meeting. Annual 2020 effective dates were previously deferred. While some members of the Working Group supported an effective date earlier in 2021, it was discussed that a year end 2021 effective date would allow insurers, to assess the impact and review contracts, and additionally allow the issue to be fully through the NAIC committee process. During the March meeting, the National Council of Insurance Legislators (NCOIL) comments were supportive of a later effective date or an extended phase-in period. The Working Group determined that a year-end 2021 effective date was preferred because of the competitive issues and because the revisions were viewed as a clarification of long-standing guidance. The Working Group also reiterated its prior comments that the limited number of companies seeking phase in application could seek a permitted practice and that the permitted practices disclosures would provide regulatory transparency.
Adopted Revisions to SSAP No. 71 (new text from the prior exposure is shown as shaded):

2. Acquisition costs are those costs that are incurred in the acquisition of new and renewal insurance contracts and include those costs that vary with and are primarily related to the acquisition of insurance contracts (e.g., agent and broker commissions, certain underwriting and policy issue costs, and medical and inspection fees). Acquisition costs and commissions shall be expensed as incurred. Determination of when acquisition costs and commissions have been incurred shall be made in accordance with SSAP No. 5R—Liabilities, Contingencies and Impairments of Assets.

3. Contingent commission liabilities shall be determined in accordance with the terms of each individual commission agreement. Commission liabilities determined on the basis of a formula that relates to loss experience shall be established for the earned portion. Assumptions used to calculate the contingent commission liability shall be consistent with the terms of the policy contract and with the assumptions made in recording other assets and liabilities necessary to reflect underwriting results of the reporting entity such as retrospective premium adjustments and loss reserves, including incurred but not reported.

4. Levelized commissions occur in situations where agents receive normal (non-level) commissions with payments made by a third party. It is intended, but not necessarily guaranteed, that the amounts paid to the agents by the third party would ultimately be repaid (with interest explicit or implied) to the third party by levelized payments (which are less than the normal first year commissions but exceed the normal renewal commissions) from the reporting entity. (Note: levelized repayments made by the reporting entity extend the repayment period but might not be a straight-line repayment.) These transactions are, in fact, funding agreements between a reporting entity and a third party, regardless of how the payment to the third party is characterized. The continuance of the stream of payments specified in the levelized commission contract is a mechanism which attempts to bypass recognition of those expenses which are ordinarily charged to expense in the first year of the contract. Consequently, the normal link between the persistency of the policy, the continuance of the premium payment or the maintenance of the agent’s license with the reporting entity is not maintained with respect to the payment stream.

5. The use of an arrangement such as a levelized commission arrangement where commission payments are not linked to traditional elements such as premium payments and policy persistency, but rather are linked to the repayment of an advance amount paid by a third party to the direct selling agents requires the establishment of a liability by the reporting entity for the full amount of the unpaid principal and accrued interest which is
payable to a third party related to levelized commissions. *Arrangements that use a third party to pay agents who write policies for the reporting entity and the insured can be an attempt to de-link the relationship between the insurer and those agents and defer or levelize the acquisition commissions.* The insurance reporting entity is required to recognize the full amount of earned commission costs to the direct policy writing agents even if those costs are paid indirectly to the agents by a third party through the use of levelized commission, or similar arrangement, which is in substance a funding arrangement. Having a third party pay commission costs to the selling agent is strong evidence of a potential funding arrangement which shall be recognized as a liability because the substance of the arrangement indicates that repayment is reasonable and probable, even if a contingency has been incorporated into the funding arrangement, until the underlying policy has been cancelled. A third-party structure cannot recharacterize (e.g. by referencing policy persistency) and delay recognition of liabilities for initial sales commission owed from the writing of policies regardless of how a third-party arrangement is structured with regards to the timing of payment from the insurer. The amount owed for full initial sales commission shall be recognized immediately as the writing of an insurance contract is the event that obligates the insurer, and such action shall occur consistently among insurers. As such, this recognition is required regardless of if the insurer owes a selling agent directly or if a third-party has been contracted to provide payment to the selling agent.

**Effective Date and Transition**

7. This statement is effective for years beginning January 1, 2001. A change resulting from the adoption of this statement shall be accounted for as a change in accounting principle in accordance with SSAP No. 3—Accounting Changes and Corrections of Errors. The nonsubstantive revisions adopted March 15, 2021 regarding levelized commission are to clarify the original intent of this statement and apply to existing contracts in effect as of December 31, 2021 and new contracts thereafter.
REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is:  
☐ New Model Law  
☒ Amendment to Existing Model

1. Name of group to be responsible for drafting the model:

Receivership Law (E) Working Group

2. NAIC staff support contact information:

Jane Koenigsman
jkoenigsman@naic.org
816-783-8145

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

- **Insurance Holding Company System Regulatory Act (#440)**
- **Insurance Holding Company System Regulation with Reporting Forms and Instructions (#450)**

In 2018 the Financial Stability (EX) Task Force made a referral to the Receivership and Insolvency (E) Task Force as part of the Macro Prudential Initiative (MPI). At the 2019 Summer National Meeting, the Receivership and Insolvency (E) Task Force adopted a report including recommendations to address receivership powers that are implicit in state laws, rather than explicit. One such area is the power to ensure the continuity of essential services and functions within a holding company group once an insurer is placed into receivership.

The Financial Stability Board’s (FSB) Key Attributes (KAs) of Effective Resolution Regimes for Financial Institutions KA 3.2 states that a resolution authority should have the power to ensure the continuity of essential services and functions by requiring companies in the group to continue providing services. Under Common Framework for the supervision of Internationally Active Insurance Groups (ComFrame) (CF 12.7a), a resolution authority may take steps to provide continuity of essential services by requiring other entities within the IAIG (including non-regulated entities) to continue services. The Task Force identified the following authority and remedies available within the US regime related to these international standards:

- The **Insurance Holding Company System Model Act (#440)** requires approval of affiliated transactions, allowing a regulator to identify agreements that could create obstacles in a receivership. The **Insurance Holding Company System Model Regulation (#450)**, Section 19, provides that cost sharing and management agreements specify if the insurer is placed in receivership that an affiliate has no automatic right to terminate the agreement.
- The Receiver can take action against a provider that refuses to continue services under a contract, or seek an order requiring it to turn over records. If an affiliate providing services is inextricably intertwined with the insurer, the Receiver could also seek to place the affiliate into receivership.

However, it was noted that some of these authorities and remedies may not address the immediate need to continue services in some receiverships. Despite these available remedies, receivers continue to be challenged by this issue in receivership, often resulting in significant additional legal and administrative expenses to the receivership estate.

One potential solution is to revise the definition of “insurer” under state insurance holding company laws to encompass affiliated entities whose sole purpose is to provide services to the insurer.
The NAIC adopted 2020 charges for the Receivership Law (E) Working Group to: “Review and provide recommendations for remedies to ensure continuity of essential services and functions to an insurer in receivership by affiliated entities, including non-regulated entities. Consult with the Group Solvency Issues (E) Working Group as the topic relates to affiliated intercompany agreements.”

Scope of the Proposed Revisions to Models 440 and 450

The scope of the request is limited to addressing the issue of continuation of essential services through affiliated intercompany agreements that arise during the receivership of an insurance company. The Receivership Law (E) Working Group under the Receivership and Insolvency (E) Task Force would complete the review and recommend proposed revisions. Revisions may be necessary to the following sections of Models 440 and 450 including, but not limited to:

- Model 440 Section 1, Definitions
- Model 440 Section 5, Standards and Management of an Insurer Within an Insurance Holding Company System
- Model 440 Section 12, Receivership
- Model 450 Consistency with any revisions to Model 440

4. Does the model law meet the Model Law Criteria? ☒ Yes or ☐ No (Check one)

(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

   a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states? ☒ Yes or ☐ No (Check one)

If yes, please explain why:

   While this change is being made in connection with the NAICs Macro Prudential Initiative, most important is that such changes are needed to address the challenges receivers continue to encounter in the area of continuation services which often result in significant additional legal and administrative expenses to the receivership estate and all members of the Task Force supported this request.

   b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

   ☒ Yes or ☐ No (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

   ☒ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary:
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1  ☐ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood  Low Likelihood

Explanation, if necessary: See previous discussion.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1  ☐ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood  Low Likelihood

Explanation, if necessary:

At this juncture, the changes in concepts being considered are simple and because they have the potential to reduce expenses incurred by receivership estates, we believe such changes will be widely supported by all parties.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

The Insurance Holding Company System Model Act (#440) is an Accreditation Standard but the task force has not yet considered whether this should become part of the required elements of that specific standard. However, given the potential the changes have in reducing the cost of regulation under receiverships, a national standard is likely appropriate.

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No.

Section 5. Standards and Management of an Insurer Within an Insurance Holding Company System

A. Transactions Within an Insurance Holding Company System

(1) Transactions within an insurance holding company system to which an insurer subject to registration is a party shall be subject to the following standards:

(a) The terms shall be fair and reasonable;

(b) Agreements for cost sharing services and management shall include such provisions as required by rule and regulation issued by the commissioner;

(c) Charges or fees for services performed shall be reasonable;

(d) Expenses incurred and payment received shall be allocated to the insurer in conformity with customary insurance accounting practices consistently applied;

(e) The books, accounts and records of each party to all such transactions shall be so maintained as to clearly and accurately disclose the nature and details of the transactions including such accounting information as is necessary to support the reasonableness of the charges or fees to the respective parties;

(f) The insurer’s surplus as regards policyholders following any dividends or distributions to shareholder affiliates shall be reasonable in relation to the insurer’s outstanding liabilities and adequate to meet its financial needs.
(g) If an insurer subject to this Act is deemed by the commissioner to be in a hazardous financial condition as defined by [insert citation for Model Regulation to Define Standards and Commissioner’s Authority for Companies Deemed to be in Hazardous Financial Condition] or a condition that would be grounds for supervision, conservation or a delinquency proceeding, then the commissioner may require the insurer to secure and maintain either a deposit, held by the commissioner, or a bond, as determined by the insurer at the insurer’s discretion, for the protection of the insurer for the duration of the contract(s) or agreement(s), or the existence of the condition for which the commissioner required the deposit or the bond.

In determining whether a deposit or a bond is required, the commissioner should consider whether concerns exist with respect to the affiliated person’s ability to fulfill the contract(s) or agreement(s) if the insurer were to be put into liquidation. Once the insurer is deemed to be in a hazardous financial condition or a condition that would be grounds for supervision, conservation or a delinquency proceeding, and a deposit or bond is necessary, the commissioner has discretion to determine the amount of the deposit or bond, not to exceed the value of the contract(s) or agreement(s) in any one year, and whether such deposit or bond should be required for a single contract, multiple contracts or a contract only with a specific person(s).

Drafting Note: This section is intended to apply to a broad range of affiliate managerial and support service contracts including, for example, general managerial services, financial accounting and actuarial services, data management, investment portfolio management and support and policy and policyholder services. (Performance collateralization for reinsurance and other risk transfer or financial contracts with affiliates is typically addressed in the underlying contractual agreements and is beyond the scope of these deposit/bond requirements). The intent of the deposit or bond is to ensure the affiliated services provided under the contract(s) are fulfilled. In determining appropriate circumstances when a commissioner may require a deposit or bond, (deposit vs. bond to be determined by the insurer) and in specifying an amount, the commissioner should evaluate and consider whether an insurer subject to this act is in a hazardous financial condition or a condition that would be grounds for substantial regulatory action, including supervision, conservation or a delinquency proceeding. If it is, the deposit or bond requirement would be available as an additional regulatory remedy at the discretion of the commissioner. Note, the commissioner should consider whether the affiliated person is already required to post a deposit or bond under applicable laws regulating third-party administrators.

(h) All records and data of the insurer held by an affiliate are and remain the property of the insurer, are subject to control of the insurer, are identifiable, and are segregated or readily capable of segregation, at no additional cost to the insurer, from all other persons’ records and data. This includes all records and data that are otherwise the property of the insurer, in whatever form maintained, including, but not limited to, claims and claim files, policyholder lists, application files, litigation files, premium records, rate books, underwriting manuals, personnel records, financial records or similar records within the possession, custody or control of the affiliate. At the request of the insurer, the affiliate shall provide that the receiver can obtain a complete set of all records of any type that pertain to the insurer’s business; obtain access to the operating systems on which the data is maintained; obtain the software that runs those systems either through assumption of licensing agreements or otherwise; and restrict the use of the data by the affiliate if it is not operating the insurer’s business. The affiliate shall provide a waiver of any landlord lien or other encumbrance to give the insurer access to all records and data in the event of the affiliate’s default under a lease or other agreement; and,

Drafting Note: The “at no additional cost to the insurer” language is not intended to prohibit recovery of the fair and reasonable cost associated with transferring records and data to the insurer. Since records and data of the insurer are the property of the insurer, the insurer should not pay a cost to segregate commingled records and data from other data of the affiliate.

(i) Premiums or other funds belonging to the insurer that are collected by or held by an affiliate are the exclusive property of the insurer and are subject to the control of the insurer. Any right of offset in the event an insurer is placed into receivership shall be subject to [the receivership act of the state].
The following transactions involving a domestic insurer and any person in its insurance holding company system, including amendments or modifications of affiliate agreements previously filed pursuant to this section, which are subject to any materiality standards contained in subparagraphs (a) through (g), may not be entered into unless the insurer has notified the commissioner in writing of its intention to enter into the transaction at least thirty (30) days prior thereto, or such shorter period as the commissioner may permit, and the commissioner has not disapproved it within that period. The notice for amendments or modifications shall include the reasons for the change and the financial impact on the domestic insurer. Informal notice shall be reported, within thirty (30) days after a termination of a previously filed agreement, to the commissioner for determination of the type of filing required, if any.

(a) Sales, purchases, exchanges, loans, extensions of credit, or investments, provided the transactions are equal to or exceed:

(i) With respect to nonlife insurers, the lesser of three percent (3%) of the insurer’s admitted assets or twenty-five percent (25%) of surplus as regards policyholders as of the 31st day of December next preceding;

(ii) With respect to life insurers, three percent (3%) of the insurer’s admitted assets as of the 31st day of December next preceding;

(b) Loans or extensions of credit to any person who is not an affiliate, where the insurer makes loans or extensions of credit with the agreement or understanding that the proceeds of the transactions, in whole or in substantial part, are to be used to make loans or extensions of credit to, to purchase assets of, or to make investments in, any affiliate of the insurer making the loans or extensions of credit provided the transactions are equal to or exceed:

(i) With respect to nonlife insurers, the lesser of three percent (3%) of the insurer’s admitted assets or twenty-five percent (25%) of surplus as regards policyholders as of the 31st day of December next preceding;

(ii) With respect to life insurers, three percent (3%) of the insurer’s admitted assets as of the 31st day of December next preceding;

(c) Reinsurance agreements or modifications thereto, including:

(i) All reinsurance pooling agreements;

(ii) Agreements in which the reinsurance premium or a change in the insurer’s liabilities, or the projected reinsurance premium or a change in the insurer’s liabilities in any of the next three years, equals or exceeds five percent (5%) of the insurer’s surplus as regards policyholders, as of the 31st day of December next preceding, including those agreements which may require as consideration the transfer of assets from an insurer to a non-affiliate, if an agreement or understanding exists between the insurer and non-affiliate that any portion of the assets will be transferred to one or more affiliates of the insurer;

(d) All management agreements, service contracts, tax allocation agreements, guarantees and all cost-sharing arrangements;

(e) Guarantees when made by a domestic insurer; provided, however, that a guarantee which is quantifiable as to amount is not subject to the notice requirements of this paragraph unless it exceeds the lesser of one-half of one percent (.5%) of the insurer’s admitted assets or ten percent (10%) of surplus as regards policyholders as of the 31st day of December next preceding. Further, all guarantees which are not quantifiable as to amount are subject to the notice requirements of this paragraph;
(f) Direct or indirect acquisitions or investments in a person that controls the insurer or in an affiliate of the insurer in an amount which, together with its present holdings in such investments, exceeds two and one-half percent (2.5%) of the insurer’s surplus to policyholders. Direct or indirect acquisitions or investments in subsidiaries acquired pursuant to Section 2 of this Act (or authorized under any other section of this Chapter), or in non-subsidiary insurance affiliates that are subject to the provisions of this Act, are exempt from this requirement; and

Drafting Note: When reviewing the notification required to be submitted pursuant to Section 5A(2)(f), the commissioner should examine prior and existing investments of this type to establish that these investments separately or together with other transactions, are not being made to contravene the dividend limitations set forth in Section 5B. However, an investment in a controlling person or in an affiliate shall not be considered a dividend or distribution to shareholders when applying Section 5B of this Act.

(g) Any material transactions, specified by regulation, which the commissioner determines may adversely affect the interests of the insurer’s policyholders.

Nothing in this paragraph shall be deemed to authorize or permit any transactions which, in the case of an insurer not a member of the same insurance holding company system, would be otherwise contrary to law.

(3) A domestic insurer may not enter into transactions which are part of a plan or series of like transactions with persons within the insurance holding company system if the purpose of those separate transactions is to avoid the statutory threshold amount and thus avoid the review that would occur otherwise. If the commissioner determines that separate transactions were entered into over any twelve-month period for that purpose, the commissioner may exercise his or her authority under Section 11.

(4) The commissioner, in reviewing transactions pursuant to Subsection A(2), shall consider whether the transactions comply with the standards set forth in Subsection A(1) and whether they may adversely affect the interests of policyholders.

(5) The commissioner shall be notified within thirty (30) days of any investment of the domestic insurer in any one corporation if the total investment in the corporation by the insurance holding company system exceeds ten percent (10%) of the corporation’s voting securities.

(6) Supervision, seizure, conservatorship or receivership proceedings.

(a) Any affiliate that is party to an agreement or contract with a domestic insurer that is subject to Subsection 5A(2)(d) shall be subject to the jurisdiction of any supervision, seizure, conservatorship or receivership proceedings against the insurer and to the authority of any supervisor, conservator, rehabilitator or liquidator for the insurer appointed pursuant to [supervision and receivership acts] for the purpose of interpreting, enforcing and overseeing the affiliate’s obligations under the agreement or contract to perform services for the insurer that:

(i) Are an integral part of the insurer’s operations, including, but not limited to management, administrative, accounting, data processing, marketing, underwriting, claims handling, investment or any other similar functions; or

(ii) Are essential to the insurer’s ability to fulfill its obligations under insurance policies.

(b) The commissioner may require that an agreement or contract pursuant to Subsection 5A(2)(d) for the provision of services described in (i) and (ii) above specify that the affiliate consents to the jurisdiction as set forth in this Subsection 5A(6).

Drafting Note: Subsection 5A(6) is not intended to subject affiliates, in particular those that may be subject to regulation in other jurisdictions, to the general jurisdiction of pending supervision, seizure, conservation or receivership court proceedings in this state or the general authority of a supervisor, conservator or receiver for a domestic insurer. Rather, the jurisdiction and authority conferred by this provision is limited to ensuring that a domestic insurer continues to receive essential services from
an affiliate that it has contracted with to provide such services, in accordance with the terms of the contract and applicable law, during the aforementioned proceedings. Subsection 5A(6)(b) gives the commissioner discretion to require documentation of an affiliate’s consent to this jurisdiction in the agreement or contract. In determining appropriate circumstances when a commissioner may require such provision, the commissioner should consider the scope and materiality to the domestic insurer of the contract, the nature of the holding company system, and whether examination or investigation of the domestic insurer warrants requirement of such a provision.

B. Dividends and other Distributions

No domestic insurer shall pay any extraordinary dividend or make any other extraordinary distribution to its shareholders until thirty (30) days after the commissioner has received notice of the declaration thereof and has not within that period disapproved the payment, or until the commissioner has approved the payment within the thirty-day period.

For purposes of this section, an extraordinary dividend or distribution includes any dividend or distribution of cash or other property, whose fair market value together with that of other dividends or distributions made within the preceding twelve (12) months exceeds the lesser of:

1. Ten percent (10%) of the insurer’s surplus as regards policyholders as of the 31st day of December next preceding; or
2. The net gain from operations of the insurer, if the insurer is a life insurer, or the net income, if the insurer is not a life insurer, not including realized capital gains, for the twelve-month period ending the 31st day of December next preceding, but shall not include pro rata distributions of any class of the insurer’s own securities.

In determining whether a dividend or distribution is extraordinary, an insurer other than a life insurer may carry forward net income from the previous two (2) calendar years that has not already been paid out as dividends. This carry-forward shall be computed by taking the net income from the second and third preceding calendar years, not including realized capital gains, less dividends paid in the second and immediate preceding calendar years.

Notwithstanding any other provision of law, an insurer may declare an extraordinary dividend or distribution which is conditional upon the commissioner’s approval, and the declaration shall confer no rights upon shareholders until (1) the commissioner has approved the payment of the dividend or distribution or (2) the commissioner has not disapproved payment within the thirty-day period referred to above.

Drafting Note: The following Subsection C entitled “Management of Domestic Insurers Subject to Registration” is optional and is to be adopted according to the needs of the individual jurisdiction.

C. Management of Domestic Insurers Subject To Registration.

1. Notwithstanding the control of a domestic insurer by any person, the officers and directors of the insurer shall not thereby be relieved of any obligation or liability to which they would otherwise be subject by law, and the insurer shall be managed so as to assure its separate operating identity consistent with this Act.

2. Nothing in this section shall preclude a domestic insurer from having or sharing a common management or cooperative or joint use of personnel, property or services with one or more other persons under arrangements meeting the standards of Section 5A(1).

3. Not less than one-third of the directors of a domestic insurer, and not less than one-third of the members of each committee of the board of directors of any domestic insurer shall be persons who are not officers or employees of the insurer or of any entity controlling, controlled by, or under common control with the insurer and who are not beneficial owners of a controlling interest in the voting stock of the insurer or entity. At least one such person must be included in any quorum for the transaction of business at any meeting of the board of directors or any committee thereof.
(4) The board of directors of a domestic insurer shall establish one or more committees comprised solely of directors who are not officers or employees of the insurer or of any entity controlling, controlled by, or under common control with the insurer and who are not beneficial owners of a controlling interest in the voting stock of the insurer or any such entity. The committee or committees shall have responsibility for nominating candidates for director for election by shareholders or policyholders, evaluating the performance of officers deemed to be principal officers of the insurer and recommending to the board of directors the selection and compensation of the principal officers.

(5) The provisions of Paragraphs (3) and (4) shall not apply to a domestic insurer if the person controlling the insurer, such as an insurer, a mutual insurance holding company, or a publicly held corporation, has a board of directors and committees thereof that meet the requirements of Paragraphs (3) and (4) with respect to such controlling entity.

(6) An insurer may make application to the commissioner for a waiver from the requirements of this subsection, if the insurer’s annual direct written and assumed premium, excluding premiums reinsured with the Federal Crop Insurance Corporation and Federal Flood Program, is less than $300,000,000. An insurer may also make application to the commissioner for a waiver from the requirements of this subsection based upon unique circumstances. The commissioner may consider various factors including, but not limited to, the type of business entity, volume of business written, availability of qualified board members, or the ownership or organizational structure of the entity.

D. Adequacy of Surplus. For purposes of this Act, in determining whether an insurer’s surplus as regards policyholders is reasonable in relation to the insurer’s outstanding liabilities and adequate to meet its financial needs, the following factors, among others, shall be considered:

(1) The size of the insurer as measured by its assets, capital and surplus, reserves, premium writings, insurance in force and other appropriate criteria;

(2) The extent to which the insurer’s business is diversified among several lines of insurance;

(3) The number and size of risks insured in each line of business;

(4) The extent of the geographical dispersion of the insurer’s insured risks;

(5) The nature and extent of the insurer’s reinsurance program;

(6) The quality, diversification and liquidity of the insurer’s investment portfolio;

(7) The recent past and projected future trend in the size of the insurer’s investment portfolio;

(8) The surplus as regards policyholders maintained by other comparable insurers;

(9) The adequacy of the insurer’s reserves; and

(10) The quality and liquidity of investments in affiliates. The commissioner may treat any such investment as a disallowed asset for purposes of determining the adequacy of surplus as regards policyholders whenever in the judgment of the commissioner the investment so warrants.

© 2021 National Association of Insurance Commissioners
1. Description of the Project, Issues Addressed, etc.

In 2020, the NAIC Plenary adopted a new charge for the Receivership Law (E) Working Group. The charge is still active and reads as follows:

"Review and provide recommendations for remedies to ensure the continuity of essential services and functions to an insurer in receivership by affiliated entities, including nonregulated entities. Among other solutions, this will encompass a review of the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) to provide proposed revisions to address the continuation of essential services through affiliated intercompany agreements in a receivership."

Prior to, and prompting the need for, the adoption of this charge, the Receivership and Insolvency (E) Task Force performed a macroprudential analysis of the U.S. system of insurance regulation with respect to receivership laws compared to international standards under the Financial Stability Board (FSB) and under the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame). At the 2019 Summer National Meeting, the Receivership and Insolvency (E) Task Force adopted a report including recommendations to address receivership powers that are implicit in state laws, rather than explicit. One such area is the power to ensure the continuity of essential services and functions within a holding company group once an insurer is placed into receivership.

The Task Force identified the following authority and remedies available within the U.S. regime related to these international standards:

- Model #440 requires approval of affiliated transactions, allowing a state insurance regulator to identify agreements that could create obstacles in a receivership. Model #450, Section 19, provides that cost sharing and management agreements specify if the insurer is placed in receivership that an affiliate has no automatic right to terminate the agreement.
- The receiver can take action against a provider that refuses to continue services under a contract or seek an order requiring it to turn over records. If an affiliate providing services is inextricably intertwined with the insurer, the receiver could also seek to place the affiliate into receivership.

However, it was noted that some of these authorities and remedies may not address the immediate need to continue services in some receiverships. Despite these available remedies, receivers continue to be challenged by this issue in receivership, often resulting in significant additional legal and administrative expenses to the receivership estate.

In 2020, the Receivership Law (E) Working Group was given the charge to provide recommendations for remedies to ensure the continuity of essential services and functions to an insurer in receivership by affiliated entities, including nonregulated entities and specifically for agreements with affiliated entities whose sole business purpose is to provide services to the insurance company.

2. Name of Group Responsible for Drafting the Model and States Participating.

The Receivership Law (E) Working Group of the Receivership and Insolvency (E) Task Force drafted the initial revisions to Model #440 and Model #450. The 2020 and 2021 members of the Subgroup were: Illinois (Co-Chair); Pennsylvania (Co-Chair); Arkansas; California; Colorado; Connecticut; Florida; Iowa; Louisiana (2021); Maine; Massachusetts; Michigan; Missouri; Nebraska; Texas; and Washington.

A drafting group was formed to draft the revisions. Members included: Florida; Illinois; Maine; Michigan; Oklahoma; Pennsylvania; and Texas.
3. Project Authorized by What Charge and Date First Given to the Group.

As described in paragraph 1 above, the initial charge prompting a review of Model #440 and Model #450 was given to the Receivership Law (E) Working Group for 2020. The Request for NAIC Model Law Development to open Model #440 and Model #450 for revision was adopted by the Executive (EX) Committee at the 2020 Summer National Meeting.

4. A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.

In August 2020, the Receivership Law (E) Working Group began its work to address its charge by conducting a survey of state insurance regulators and interested parties to gather feedback on possible provisions to be addressed and goals of those revisions to Model #440 and Model #450. Survey responses were received from state insurance regulators and interested parties identifying specific sections of the models and topics to be considered.

5. A General Description of the Due Process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers and legislators was solicited).

On Dec. 17, 2020, the Receivership Law (E) Working Group met in open session to expose proposed amendments to Section 5A and Section 11 of Model #440 and Section 19 of #450 for a 42-day public comment period ending Jan. 29, 2021. Comments were received from Florida; the American Council of Life Insurers (ACLI); America’s Health Insurance Plans (AHIP) and the Blue Cross and Blue Shield Association (BCBSA); Arbor Strategies LLC; Morgan, Lewis & Bockius LLP and the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA); and the National Conference of Insurance Guaranty Funds (NCIGF).

On Feb. 4, 2021, the Receivership Law (E) Working Group met in open session to discuss comments received. Subsequent edits were drafted by the drafting group as discussed during the meeting. The Working Group exposed proposed revised amendments to Section 5A and Section 11 of Model #440 and Section 19 of #450 for a 14-day public comment period ending Feb. 4, 2021. Comments were received from AHIP and the BCBSA; the American Property Casualty Insurance Association (APCIA); Arbor Strategies LLC; and NOLHGA and the NCIGF.

On March 4, 2021, the Receivership Law (E) Working Group met in open session to discuss comments received. Subsequent edits were drafted as discussed during the meeting by the drafting group in coordination with the interested parties that had provided comments. The Working Group co-chairs released proposed revised amendments to Section 5A(1)(g) of Model #440 for a 30-day public comment period ending April 9, 2021. One comment letter was received from the ACLI. The ACLI’s proposed edit was accepted.

All exposures were distributed by email to members, interested state insurance regulators and interested parties of both the Receivership Law (E) Working Group and the Receivership and Insolvency (E) Task Force and posted to the NAIC website.

All issues raised by members, interested state insurance regulators and interested parties were explained or addressed in the revisions to the original amendments.

The amendments were adopted by the Receivership Law (E) Working Group on May 4, 2021.

The amendments were adopted by the Receivership and Insolvency (E) Task Force on May 20, 2021.

The amendments were adopted by the Financial Condition (E) Committee on July 8, 2021.

6. A Discussion of the Significant Issues (items of some controversy raised during the due process and the group’s response).

There were no unresolved issues of real significance raised during the exposure periods. However, the following issue was considered and addressed by the Receivership Law (E) Working Group. Interested parties requested and provided draft revisions to the amendments in Section 5.A.(1)(g) regarding the requirement for a bond or deposit that limits the provision to insurers found to be in a condition of hazardous financial condition or a condition that would be grounds for supervision, conservation or a delinquency proceeding. Interested parties also provided revisions to the subsection and the accompanying drafting note that would further define and clarify the circumstances and the agreements to which the subsection could be applied. The Working Group was agreeable to these changes and accepted interested parties’ revisions.
7. **List the key provisions of the model (sections considered most essential to state adoption).**

The amendments to Model #440 are within Section 5, Standards and Management of an Insurer Within an Insurance Holding Company System, and within Model #450 Section 19, Transactions Subject to Prior Notice.

- **Section 5A(1) of Model #440**
  - Books and records of the insurer are updated to specifically include data of the insurer, being the property of the insurer. The data and records should be identifiable and capable of segregation. Essentially the data and records should be available to the receiver in the event of insolvency, including the systems necessary to access them.
  - If the commissioner deems the insurer to be in a statutorily defined hazardous financial condition, the commissioner may require a bond or deposit, limited in amount, after consideration of whether there are concerns about the affiliated party’s ability to fulfill the contract in the event of a liquidation.
  - Premiums are the property of the insurer, with any right of offset subject to receivership law.

- **Section 5A(6) of Model #440**
  - The affiliated entity is subject to jurisdiction of receivership court, and in certain circumstances the commissioner may require the affiliate to agree to this in writing.

- **Section 19 of Model #450**
  - Books and records of the insurer are updated to specifically include data of the insurer, being the property of the insurer. The data and records should be identifiable and capable of segregation. Essentially the data and records should be available to the receiver in the event of insolvency, including the systems necessary to access them. The data is specifically defined in Model #450.
  - Model #450 includes a provision relating to indemnification of the insurer in the event of gross negligence or willful misconduct by the affiliate.
  - In the event of receivership (now including supervision and conservatorship):
    - The rights of the insurer extend to the receiver or guaranty fund.
    - The affiliate will make available essential personnel.
    - The affiliate will continue the services for a minimum period of time as specified in the agreement with timely payment for post-receivership work.
    - The affiliate will maintain necessary systems, programs or infrastructure and make them available to the receiver or commissioner for as long as the affiliate receives timely post-receivership payment unless released by the receiver, commissioner or receivership court.

8. **Any Other Important Information (e.g., amending an accreditation standard).**

The Receivership and Insolvency (E) Task Force has not had formal discussions with respect to whether the current Insurance Holding Company Systems accreditation standard under the NAIC Financial Regulation Standards and Accreditation Program should be amended to include the current revisions to Model #440 and Model #450. The Task Force will consider this and make appropriate referrals prior to the 2022 Spring National Meeting.

REQUEST FOR NAIC MODEL LAW DEVELOPMENT

This form is intended to gather information to support the development of a new model law or amendment to an existing model law. Prior to development of a new or amended model law, approval of the respective Parent Committee and the NAIC’s Executive Committee is required. The NAIC’s Executive Committee will consider whether the request fits the criteria for model law development. Please complete all questions and provide as much detail as necessary to help in this determination.

Please check whether this is:  [ ] New Model Law  or  [x] Amendment to Existing Model

1. Name of group to be responsible for drafting the model:

Receivership Law (E) Working Group

2. NAIC staff support contact information:

Jane Koenigsman
jkoenigsman@naic.org
816-783-8145

3. Please provide a brief description of the proposed new model or the amendment(s) to the existing model. If you are proposing a new model, please also provide a proposed title. If an existing model law, please provide the title, attach a current version to this form and reference the section(s) proposed to be amended.

- Insurance Holding Company System Regulatory Act (#440)
- Insurance Holding Company System Regulation with Reporting Forms and Instructions (#450)

In 2018 the Financial Stability (EX) Task Force made a referral to the Receivership and Insolvency (E) Task Force as part of the Macro Prudential Initiative (MPI). At the 2019 Summer National Meeting, the Receivership and Insolvency (E) Task Force adopted a report including recommendations to address receivership powers that are implicit in state laws, rather than explicit. One such area is the power to ensure the continuity of essential services and functions within a holding company group once an insurer is placed into receivership.

The Financial Stability Board’s (FSB) Key Attributes (KAs) of Effective Resolution Regimes for Financial Institutions KA 3.2 states that a resolution authority should have the power to ensure the continuity of essential services and functions by requiring companies in the group to continue providing services. Under Common Framework for the supervision of Internationally Active Insurance Groups (ComFrame) (CF 12.7a), a resolution authority may take steps to provide continuity of essential services by requiring other entities within the IAIG (including non-regulated entities) to continue services. The Task Force identified the following authority and remedies available within the US regime related to these international standards:

- The Insurance Holding Company System Model Act (#440) requires approval of affiliated transactions, allowing a regulator to identify agreements that could create obstacles in a receivership. The Insurance Holding Company System Model Regulation (#450), Section 19, provides that cost sharing and management agreements specify if the insurer is placed in receivership that an affiliate has no automatic right to terminate the agreement.
- The Receiver can take action against a provider that refuses to continue services under a contract, or seek an order requiring it to turn over records. If an affiliate providing services is inextricably intertwined with the insurer, the Receiver could also seek to place the affiliate into receivership.

However, it was noted that some of these authorities and remedies may not address the immediate need to continue services in some receiverships. Despite these available remedies, receivers continue to be challenged by this issue in receivership, often resulting in significant additional legal and administrative expenses to the receivership estate.

One potential solution is to revise the definition of “insurer” under state insurance holding company laws to encompass affiliated entities whose sole purpose is to provide services to the insurer.
The NAIC adopted 2020 charges for the Receivership Law (E) Working Group to: “Review and provide recommendations for remedies to ensure continuity of essential services and functions to an insurer in receivership by affiliated entities, including non-regulated entities. Consult with the Group Solvency Issues (E) Working Group as the topic relates to affiliated intercompany agreements.”

Scope of the Proposed Revisions to Models 440 and 450
The scope of the request is limited to addressing the issue of continuation of essential services through affiliated intercompany agreements that arise during the receivership of an insurance company. The Receivership Law (E) Working Group under the Receivership and Insolvency (E) Task Force would complete the review and recommend proposed revisions. Revisions may be necessary to the following sections of Models 440 and 450 including, but not limited to:

- Model 440 Section 1. Definitions
- Model 440 Section 5. Standards and Management of an Insurer Within an Insurance Holding Company System
- Model 440 Section 12. Receivership
- Model 450 Consistency with any revisions to Model 440

4. Does the model law meet the Model Law Criteria?  ☒ Yes  or  ☐ No  (Check one)

(If answering no to any of these questions, please reevaluate charge and proceed accordingly to address issues).

a. Does the subject of the model law necessitate a national standard and require uniformity amongst all states?  ☒ Yes  or  ☐ No  (Check one)

If yes, please explain why:

While this change is being made in connection with the NAICs Macro Prudential Initiative, most important is that such changes are needed to address the challenges receivers continue to encounter in the area of continuation services which often result in significant additional legal and administrative expenses to the receivership estate and all members of the Task Force supported this request.

b. Does Committee believe NAIC members should devote significant regulator and Association resources to educate, communicate and support this model law?

☒ Yes  or  ☐ No  (Check one)

5. What is the likelihood that your Committee will be able to draft and adopt the model law within one year from the date of Executive Committee approval?

☒ 1  ☐ 2  ☐ 3  ☐ 4  ☐ 5  (Check one)

High Likelihood  Low Likelihood

Explanation, if necessary:
6. What is the likelihood that a minimum two-thirds majority of NAIC members would ultimately vote to adopt the proposed model law?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary: See previous discussion.

7. What is the likelihood that state legislatures will adopt the model law in a uniform manner within three years of adoption by the NAIC?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 (Check one)

High Likelihood Low Likelihood

Explanation, if necessary:

At this juncture, the changes in concepts being considered are simple and because they have the potential to reduce expenses incurred by receivership estates, we believe such changes will be widely supported by all parties.

8. Is this model law referenced in the NAIC Accreditation Standards? If so, does the standard require the model law to be adopted in a substantially similar manner?

The Insurance Holding Company System Model Act (#440) is an Accreditation Standard but the task force has not yet considered whether this should become part of the required elements of that specific standard. However, given the potential the changes have in reducing the cost of regulation under receiverships, a national standard is likely appropriate.

9. Is this model law in response to or impacted by federal laws or regulations? If yes, please explain.

No.

**Form E** Pre-Acquisition Notification Form

**Form F** Enterprise Risk Report

### Section 19. Transactions Subject to Prior Notice - Notice Filing

- **A.** An insurer required to give notice of a proposed transaction pursuant to Section 5 of the Act shall furnish the required information on Form D, hereby made a part of these regulations.

- **B.** Agreements for cost sharing services and management services shall at a minimum and as applicable:
  
  1. Identify the person providing services and the nature of such services;
  2. Set forth the methods to allocate costs;
  3. Require timely settlement, not less frequently than on a quarterly basis, and compliance with the requirements in the Accounting Practices and Procedures Manual;
(4) Prohibit advancement of funds by the insurer to the affiliate except to pay for services defined in the agreement;

(5) State that the insurer will maintain oversight for functions provided to the insurer by the affiliate and that the insurer will monitor services annually for quality assurance;

(6) Define books and records and data of the insurer to include all books and records and data developed or maintained under or related to the agreement that are otherwise the property of the insurer, in whatever form maintained, including, but not limited to, claims and claim files, policyholder lists, application files, litigation files, premium records, rate books, underwriting manuals, personnel records, financial records or similar records within the possession, custody or control of the affiliate;

(7) Specify that all books and records and data of the insurer are and remain the property of the insurer, and:
   
   (a) Are subject to control of the insurer;
   
   (b) Are identifiable; and
   
   (c) Are segregated from all other persons’ records and data or are readily capable of segregation at no additional cost to the insurer;

Drafting Note: The “at no additional cost to the insurer” language is not intended to prohibit recovery of the fair and reasonable cost associated with transferring records and data to the insurer. Since records and data of the insurer are the property of the insurer, the insurer should not pay a cost to segregate commingled records and data from other data of the affiliate.

(8) State that all funds and invested assets of the insurer are the exclusive property of the insurer, held for the benefit of the insurer and are subject to the control of the insurer;

(9) Include standards for termination of the agreement with and without cause;

(10) Include provisions for indemnification of the insurer in the event of gross negligence or willful misconduct on the part of the affiliate providing the services and for any actions by the affiliate that violate provisions of the agreement required in Subsections 19B(11), 19B(12), 19B(13), 19B(14) and 19B(15) of this regulation;

(11) Specify that, if the insurer is placed in supervision, seizure, conservatorship or receivership pursuant to [supervision and receivership acts] receivership or seized by the commissioner under the State Receivership Act:

   (a) All of the rights of the insurer under the agreement extend to the receiver or commissioner to the extent permitted by [law of the state]; and,

   (b) All records and data of the insurer shall be identifiable and segregated from all other persons’ records and data or readily capable of segregation at no additional cost to the receiver or the commissioner;

Drafting Note: The “at no additional cost to the receiver or the commissioner” language is not intended to prohibit recovery of the fair and reasonable cost associated with transferring records and data to the receiver or the commissioner. Since records and data of the insurer are the property of the insurer, the receiver or commissioner should not pay a cost to segregate commingled records and data from other data of the affiliate.

   (c) A complete set of all books and records and data of the insurer will immediately be made available to the receiver or the commissioner, shall be made available in a usable format, and shall be turned over to the receiver or commissioner immediately upon the receiver or the commissioner’s request, and the cost to transfer data to the receiver or the commissioner shall be fair and reasonable; and,
Drafting Note: The fair and reasonable cost to transfer data to the receiver or commissioner refers to the cost associated with physically or electronically transferring records and data files to the receiver or commissioner. This cost does not include costs to separate comingled data and records that should have been segregated or readily capable of segregation.

(d) The affiliated person(s) will make available all employees essential to the operations of the insurer and the services associated therewith for the immediate continued performance of the essential services ordered or directed by the receiver or commissioner;

(12) Specify that the affiliate has no automatic right to terminate the agreement if the insurer is placed into supervision, seizure, conservatorship or receivership pursuant to the State Receivership Act; and

(13) Specify that the affiliate will provide the essential services for a minimum period of time [specified in the agreement] if the insurer is placed into supervision, seizure, conservatorship or receivership pursuant to [supervision and receivership acts], as ordered or directed by the receiver or commissioner. Performance of the essential services will continue to be provided without regard to pre-receivership unpaid fees, so long as the affiliate continues to receive timely payment for post-receivership services rendered, and unless released by the receiver, commissioner or supervising court;

(14) Specify that the affiliate will continue to maintain any systems, programs, or other infrastructure, notwithstanding supervision, seizure, conservatorship or receivership pursuant to [supervision and receivership acts], for so long as the affiliate continues to receive timely payment for post-receivership services rendered, and unless released by the receiver, commissioner or supervising court; and

(15) Specify that, in furtherance of the cooperation between the receiver and the affected guaranty association(s) and subject to the receiver’s authority over the insurer, if the insurer is placed into supervision, seizure, conservatorship or receivership pursuant to [supervision and receivership acts], and portions of the insurer’s policies or contracts are eligible for coverage by one or more guaranty associations, the affiliate's commitments under Subsections 19B(11), 19B(12), 19B(13) and 19B(14) of this regulation will extend to such guaranty association(s).
PROJECT HISTORY-2021

REVISIONS TO
INSURANCE HOLDING COMPANY SYSTEM MODEL ACT (#440)
AND INSURANCE HOLDING COMPANY SYSTEM MODEL REGULATION WITH REPORTING FORMS AND INSTRUCTIONS (#450)

RECEIVERSHIP

1. Description of the Project, Issues Addressed, etc.

In 2020, the NAIC Plenary adopted a new charge for the Receivership Law (E) Working Group. The charge is still active and reads as follows:

"Review and provide recommendations for remedies to ensure the continuity of essential services and functions to an insurer in receivership by affiliated entities, including nonregulated entities. Among other solutions, this will encompass a review of the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450) to provide proposed revisions to address the continuation of essential services through affiliated intercompany agreements in a receivership."

Prior to, and prompting the need for, the adoption of this charge, the Receivership and Insolvency (E) Task Force performed a macroprudential analysis of the U.S. system of insurance regulation with respect to receivership laws compared to international standards under the Financial Stability Board (FSB) and under the Common Framework for the Supervision of Internationally Active Insurance Groups (ComFrame). At the 2019 Summer National Meeting, the Receivership and Insolvency (E) Task Force adopted a report including recommendations to address receivership powers that are implicit in state laws, rather than explicit. One such area is the power to ensure the continuity of essential services and functions within a holding company group once an insurer is placed into receivership.

The Task Force identified the following authority and remedies available within the U.S. regime related to these international standards:

- Model #440 requires approval of affiliated transactions, allowing a state insurance regulator to identify agreements that could create obstacles in a receivership. Model #450, Section 19, provides that cost sharing and management agreements specify if the insurer is placed in receivership that an affiliate has no automatic right to terminate the agreement.
- The receiver can take action against a provider that refuses to continue services under a contract or seek an order requiring it to turn over records. If an affiliate providing services is inextricably intertwined with the insurer, the receiver could also seek to place the affiliate into receivership.

However, it was noted that some of these authorities and remedies may not address the immediate need to continue services in some receiverships. Despite these available remedies, receivers continue to be challenged by this issue in receivership, often resulting in significant additional legal and administrative expenses to the receivership estate.

In 2020, the Receivership Law (E) Working Group was given the charge to provide recommendations for remedies to ensure the continuity of essential services and functions to an insurer in receivership by affiliated entities, including nonregulated entities and specifically for agreements with affiliated entities whose sole business purpose is to provide services to the insurance company.

2. Name of Group Responsible for Drafting the Model and States Participating.

The Receivership Law (E) Working Group of the Receivership and Insolvency (E) Task Force drafted the initial revisions to Model #440 and Model #450. The 2020 and 2021 members of the Subgroup were: Illinois (Co-Chair); Pennsylvania (Co-Chair); Arkansas; California; Colorado; Connecticut; Florida; Iowa; Louisiana (2021); Maine; Massachusetts; Michigan; Missouri; Nebraska; Texas; and Washington.

A drafting group was formed to draft the revisions. Members included: Florida; Illinois; Maine; Michigan; Oklahoma; Pennsylvania; and Texas.
3. **Project Authorized by What Charge and Date First Given to the Group.**

As described in paragraph 1 above, the initial charge prompting a review of Model #440 and Model #450 was given to the Receivership Law (E) Working Group for 2020. The Request for NAIC Model Law Development to open Model #440 and Model #450 for revision was adopted by the Executive (EX) Committee at the 2020 Summer National Meeting.

4. **A General Description of the Drafting Process (e.g., drafted by a subgroup, interested parties, the full group, etc.). Include any parties outside the members that participated.**

In August 2020, the Receivership Law (E) Working Group began its work to address its charge by conducting a survey of state insurance regulators and interested parties to gather feedback on possible provisions to be addressed and goals of those revisions to Model #440 and Model #450. Survey responses were received from state insurance regulators and interested parties identifying specific sections of the models and topics to be considered.

5. **A General Description of the Due Process (e.g., exposure periods, public hearings, or any other means by which widespread input from industry, consumers and legislators was solicited).**

On Dec. 17, 2020, the Receivership Law (E) Working Group met in open session to expose proposed amendments to Section 5A and Section 11 of Model #440 and Section 19 of #450 for a 42-day public comment period ending Jan. 29, 2021. Comments were received from Florida; the American Council of Life Insurers (ACLI); America’s Health Insurance Plans (AHIP) and the Blue Cross and Blue Shield Association (BCBSA); Arbor Strategies LLC; Morgan, Lewis & Bockius LLP and the National Organization of Life and Health Insurance Guaranty Associations (NOLHGA); and the National Conference of Insurance Guaranty Funds (NCIGF).

On Feb. 4, 2021, the Receivership Law (E) Working Group met in open session to discuss comments received. Subsequent edits were drafted by the drafting group as discussed during the meeting. The Working Group exposed proposed revised amendments to Section 5A and Section 11 of Model #440 and Section 19 of #450 for a 14-day public comment period ending Feb. 4, 2021. Comments were received from AHIP and the BCBSA; the American Property Casualty Insurance Association (APCIA); Arbor Strategies LLC; and NOLHGA and the NCIGF.

On March 4, 2021, the Receivership Law (E) Working Group met in open session to discuss comments received. Subsequent edits were drafted as discussed during the meeting by the drafting group in coordination with the interested parties that had provided comments. The Working Group co-chairs released proposed revised amendments to Section 5A(1)(g) of Model #440 for a 30-day public comment period ending April 9, 2021. One comment letter was received from the ACLI. The ACLI’s proposed edit was accepted.

All exposures were distributed by email to members, interested state insurance regulators and interested parties of both the Receivership Law (E) Working Group and the Receivership and Insolvency (E) Task Force and posted to the NAIC website.

All issues raised by members, interested state insurance regulators and interested parties were explained or addressed in the revisions to the original amendments.

The amendments were adopted by the Receivership Law (E) Working Group on May 4, 2021.

The amendments were adopted by the Receivership and Insolvency (E) Task Force on May 20, 2021.

The amendments were adopted by the Financial Condition (E) Committee on July 8, 2021.

6. **A Discussion of the Significant Issues (items of some controversy raised during the due process and the group’s response).**

There were no unresolved issues of real significance raised during the exposure periods. However, the following issue was considered and addressed by the Receivership Law (E) Working Group. Interested parties requested and provided draft revisions to the amendments in Section 5A.1(1)(g) regarding the requirement for a bond or deposit that limits the provision to insurers found to be in a condition of hazardous financial condition or a condition that would be grounds for supervision, conservation or a delinquency proceeding. Interested parties also provided revisions to the subsection and the accompanying drafting note that would further define and clarify the circumstances and the agreements to which the subsection could be applied. The Working Group was agreeable to these changes and accepted interested parties’ revisions.
7. **List the key provisions of the model (sections considered most essential to state adoption).**

The amendments to Model #440 are within Section 5, Standards and Management of an Insurer Within an Insurance Holding Company System, and within Model #450 Section 19, Transactions Subject to Prior Notice.

- **Section 5A(1) of Model #440**
  - Books and records of the insurer are updated to specifically include data of the insurer, being the property of the insurer. The data and records should be identifiable and capable of segregation. Essentially the data and records should be available to the receiver in the event of insolvency, including the systems necessary to access them.
  - If the commissioner deems the insurer to be in a statutorily defined hazardous financial condition, the commissioner may require a bond or deposit, limited in amount, after consideration of whether there are concerns about the affiliated party’s ability to fulfill the contract in the event of a liquidation.
  - Premiums are the property of the insurer, with any right of offset subject to receivership law.

- **Section 5A(6) of Model #440**
  - The affiliated entity is subject to jurisdiction of receivership court, and in certain circumstances the commissioner may require the affiliate to agree to this in writing.

- **Section 19 of Model #450**
  - Books and records of the insurer are updated to specifically include data of the insurer, being the property of the insurer. The data and records should be identifiable and capable of segregation. Essentially the data and records should be available to the receiver in the event of insolvency, including the systems necessary to access them. The data is specifically defined in Model #450.
  - Model #450 includes a provision relating to indemnification of the insurer in the event of gross negligence or willful misconduct by the affiliate.
  - In the event of receivership (now including supervision and conservatorship):
    - The rights of the insurer extend to the receiver or guaranty fund.
    - The affiliate will make available essential personnel.
    - The affiliate will continue the services for a minimum period of time as specified in the agreement with timely payment for post-receivership work.
    - The affiliate will maintain necessary systems, programs or infrastructure and make them available to the receiver or commissioner for as long as the affiliate receives timely post-receivership payment unless released by the receiver, commissioner or receivership court.

8. **Any Other Important Information (e.g., amending an accreditation standard).**

The Receivership and Insolvency (E) Task Force has not had formal discussions with respect to whether the current Insurance Holding Company Systems accreditation standard under the NAIC Financial Regulation Standards and Accreditation Program should be amended to include the current revisions to Model #440 and Model #450. The Task Force will consider this and make appropriate referrals prior to the 2022 Spring National Meeting.

   13. Review of Qualified Jurisdictions as Potential Reciprocal Jurisdictions
   14. Termination of Status as Qualified and/or Reciprocal Jurisdiction
   15. Passporting Process for Reciprocal Jurisdictions

IV. Evaluation Methodology
   Section A: Laws and Regulations
   Section B: Regulatory Practices and Procedures
   Section C: Jurisdiction’s Requirements Applicable to U.S.-Domiciled Reinsurers
   Section D: Regulatory Cooperation and Information Sharing
   Section E: History of Performance of Domestic Reinsurers
   Section F: Enforcement of Final U.S. Judgments
   Section G: Solvent Schemes of Arrangement

V. Appendices: Specific Guidance with Respect to Section A and Section B
   Appendix A: Laws and Regulations
   Appendix B: Regulatory Practices and Procedures
I. Preamble

Purpose

The revised *Credit for Reinsurance Model Law (#785)* and *Credit for Reinsurance Model Regulation (#786)* (collectively, the Credit for Reinsurance Models) require an assuming insurer to be licensed and domiciled in a “Qualified Jurisdiction” in order to be eligible for certification by a state as a certified reinsurer for reinsurance collateral reduction purposes. In 2012, the NAIC Reinsurance (E) Task Force was charged to develop an NAIC process to evaluate the reinsurance supervisory systems of non-U.S. jurisdictions, for the purposes of developing and maintaining a list of jurisdictions recommended for recognition by the states as Qualified Jurisdictions. This charge was extended in 2019 to encompass the recognition of Reciprocal Jurisdictions in accordance with the 2019 amendments to the Credit for Reinsurance Models, including the maintenance of a list of recommended Reciprocal Jurisdictions. The purpose of the *Process for Evaluating Qualified and Reciprocal Jurisdictions* is to provide a documented evaluation process for creating and maintaining these NAIC lists.

Background

On November 6, 2011, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions serve to reduce reinsurance collateral requirements for certified reinsurers that are licensed and domiciled in Qualified Jurisdictions. Under the previous version of the Credit for Reinsurance Models, in order for U.S. ceding insurers to receive reinsurance credit, the reinsurance was required to be ceded to U.S.-licensed reinsurers or secured by collateral representing 100% of U.S. liabilities for which the credit is recorded. When considering revisions to the Credit for Reinsurance Models, the Reinsurance (E) Task Force contemplated establishing an accreditation-like process, modeled on the current NAIC Financial Regulation Standards and Accreditation Program, to review the reinsurance supervisory systems of non-U.S. jurisdictions. Under the revised Credit for Reinsurance Models, the approval of Qualified Jurisdictions is left to the authority of the states; however, the models provide that a list of Qualified Jurisdictions will be created through the NAIC committee process, and that individual states must consider this list when approving jurisdictions.

The federal Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), enacted in 2010, authorizes the U.S. Treasury Secretary and the U.S. Trade Representative (USTR), jointly, to negotiate and enter into “covered agreements” on behalf of the United States. These are bilateral or multilateral agreements with foreign governments, authorities or regulators relating to insurance prudential measures, which can preempt contrary state insurance laws or regulatory measures. The Dodd-Frank Act also created the Federal Insurance Office (FIO), which has the following authority: (1) coordinate federal efforts and develop federal policy on prudential aspects of international insurance matters; (2) assist the Secretary of the U.S. Department of the Treasury in negotiating covered agreements; (3) determine whether the states’ insurance measures are preempted by covered agreements; and (4) consult with the states (including state insurance regulators) regarding insurance matters of national importance and prudential insurance matters of international importance. It is the NAIC’s intention to communicate and coordinate with the FIO and related federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.

On September 22, 2017, the United States and the European Union (EU) entered into the “*Bilateral Agreement Between the United States of America and the European Union on Prudential Measures Regarding Insurance and Reinsurance.*” A similar agreement with the United Kingdom (UK) was signed on December 18, 2018. Both agreements (collectively referred to as the “Covered Agreements”) will require the states to eliminate reinsurance collateral requirements for reinsurers licensed and domiciled in these jurisdictions within 60 months (five years) after signing or face potential federal preemption by the Federal Insurance Office (FIO) under the Dodd-Frank Act.
Reciprocal Jurisdictions

On June 25, 2019, the NAIC Executive (EX) Committee and Plenary adopted revisions to the Credit for Reinsurance Models. These revisions were intended to conform the Models to the relevant provisions of the Covered Agreements. The Covered Agreements would eliminate reinsurance collateral requirements for EU and UK reinsurers that maintain a minimum amount of own funds equivalent to $250 million and a solvency capital requirement (SCR) of 100% under Solvency II, among other conditions. Conversely, U.S. reinsurers that maintain capital and surplus equivalent to 226 million euros with a risk-based capital (RBC) of 300% of authorized control level would not be required to maintain a local presence in order to do business in the EU or UK or post reinsurance collateral. Under the revised Credit for Reinsurance Models, jurisdictions that are subject to in-force covered agreements are considered to be Reciprocal Jurisdictions, and reinsurers that have their head office or are domiciled in a Reciprocal Jurisdiction are not required to post reinsurance collateral if they meet all of the requirements of the Credit for Reinsurance Models.

Under the revised Credit for Reinsurance Models, not only are jurisdictions that are subject to Covered Agreements treated as Reciprocal Jurisdictions for reinsurance collateral purposes, but any other Qualified Jurisdiction also has a pathway to qualify for collateral elimination as a Reciprocal Jurisdiction States that meet the requirements of the NAIC Financial Standards and Accreditation Program are also considered to be Reciprocal Jurisdictions.

The NAIC has updated and revised this Process for Evaluating Qualified and Reciprocal Jurisdictions to specify how Qualified Jurisdictions that recognize key NAIC solvency initiatives, including group supervision and group capital standards, and also meet the other requirements under the revised Credit for Reinsurance Models, will be recognized as Reciprocal Jurisdictions and receive similar treatment as that provided under the EU and UK Covered Agreements, including the elimination of reinsurance collateral and local presence requirements by the states.

1 The hypothetical possibility that a future covered agreement might not relate to reinsurance is addressed in Section 2F(1)(a)(i) of Model #785, which limits automatic Reciprocal Jurisdiction status to a covered agreement that “addresses the elimination, under specified conditions, of collateral requirements as a condition for entering into any reinsurance agreement with a ceding insurer domiciled in this state or for allowing the ceding insurer to recognize credit for reinsurance.”
II. Principles for the Evaluation of Non-U.S. Jurisdictions

1. The NAIC model revisions applicable to certified reinsurers are intended to facilitate cross-border reinsurance transactions and enhance competition within the U.S. market, while ensuring that U.S. insurers and policyholders are adequately protected against the risk of insolvency. To be eligible for certification, a reinsurer must be domiciled and licensed in a Qualified Jurisdiction as determined by the domestic regulator of the ceding insurer. A Qualified Jurisdiction not subject to an in-force Covered Agreement under the Dodd-Frank Act may also be determined to be a Reciprocal Jurisdiction, and reinsurers that have their head office or are domiciled in any such Reciprocal Jurisdiction will not be required to post reinsurance collateral, provided they meet the minimum capital and financial strength requirements and comply with the other requirements of the Credit for Reinsurance Models.

2. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions and Reciprocal Jurisdictions will be conducted in accordance with the provisions of the Credit for Reinsurance Models and any other relevant guidance developed by the NAIC.

3. The evaluation of non-U.S. jurisdictions as Qualified Jurisdictions is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Financial Regulation Standards and Accreditation Program (Accreditation Program), adherence to international supervisory standards, and relevant international guidance for recognition of reinsurance supervision. It is not intended as a prescriptive comparison to the NAIC Accreditation Program. In order for a Qualified Jurisdiction that is not subject to an in-force Covered Agreement to be evaluated as a Reciprocal Jurisdiction, that Qualified Jurisdiction must agree to recognize the states’ approach to group supervision, including group capital, and other such requirements as provided under the Credit for Reinsurance Models.

4. The states shall evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the Qualified Jurisdiction, both initially and on an ongoing basis, and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of Qualified Jurisdiction status is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

5. Each state may evaluate a non-U.S. jurisdiction to determine if it is a Qualified Jurisdiction. A list of Qualified Jurisdictions will be published through the NAIC committee process. A state must consider this list in its determination of Qualified Jurisdictions, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Qualified Jurisdictions contained in the Credit for Reinsurance Models. The creation of this list does not constitute a delegation of regulatory authority to the NAIC. The regulatory authority to recognize a Qualified Jurisdiction resides solely in each state and the NAIC List of Qualified Jurisdictions is not binding on the states.

6. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force Covered Agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the List of Reciprocal Jurisdictions. A state must consider this list in its determination of Reciprocal Jurisdiction status, and if the state approves a jurisdiction not on this list, the state must thoroughly document the justification for approving this jurisdiction in accordance with the standards for approving Reciprocal Jurisdictions contained in the Credit for Reinsurance Models. Under the Credit for Reinsurance Model Law (as adopted by a state) the state must recognize the Reciprocal Jurisdiction status of jurisdictions subject to an in-force Covered Agreement.
7. In order to facilitate multi-state recognition of assuming insurers and to encourage uniformity among the states, the NAIC has initiated a process called “passporting,” as discussed more fully below in paragraph 15 of Section III.

8. Both Qualified Jurisdictions and Reciprocal Jurisdictions have agreed to share information and cooperate with the state with respect to all applicable reinsurers domiciled within that jurisdiction, in accordance with the Credit for Reinsurance Models, as adopted by the state. Critical factors in the evaluation process include but are not limited to the history of performance by assuming insurers in the applicant jurisdiction and any documented evidence of substantial problems with the enforcement of final U.S. judgments in the applicant jurisdiction. A jurisdiction will not be a Qualified Jurisdiction if the commissioner has determined that it does not adequately and promptly enforce final U.S. judgments or arbitration awards.

9. The determination of Qualified Jurisdiction status can only be made with respect to the reinsurance supervisory system in existence and applied by a non-U.S. jurisdiction at the time of the evaluation.

10. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to the evaluation of the reinsurance supervisory systems of non-U.S. jurisdictions.
III. Procedure for Evaluation of Non-U.S. Jurisdictions

   a. Priority will be given to requests from the states and from those jurisdictions specifically requesting an evaluation by the NAIC.
   b. Formal notification of the NAIC’s intent to initiate the evaluation process will be sent by the NAIC to the reinsurance supervisory authority in the jurisdiction selected, with copies to the FIO and other relevant federal authorities as appropriate. The NAIC will issue public notice on the NAIC website upon confirmation that the jurisdiction is willing to participate in the evaluation process. The NAIC will at this time request public comments with respect to consideration of the jurisdiction as a Qualified Jurisdiction. The process of evaluation and all related documentation are private and confidential matters between the NAIC and the applicant jurisdiction, unless otherwise provided in this document, subject to a preliminary confidentiality and information sharing agreement between the NAIC, relevant states and the applicant jurisdiction.
   c. Relevant U.S. state and federal authorities will be notified of the NAIC’s decision to evaluate a jurisdiction.

2. Evaluation of Jurisdiction
   a. Evaluation Materials. The Mutual Recognition of Jurisdictions (E) Working Group will initiate evaluation of a jurisdiction’s regulatory system by using the information identified in Section A through Section G of the Evaluation Methodology (Evaluation Materials). The Mutual Recognition of Jurisdictions (E) Working Group will begin by undertaking a review of the most recent Financial Sector Assessment Program (FSAP) Report prepared by the International Monetary Fund (IMF), including the Technical Note on Insurance Sector Supervision, and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Mutual Recognition of Jurisdictions (E) Working Group will also invite each jurisdiction or its designee to provide information relative to Section A through Section G of the Evaluation Methodology in order to update, complete or supplement publicly available information. The Mutual Recognition of Jurisdictions (E) Working Group may also request or accept relevant information from reinsurers domiciled in the jurisdiction under review.
   b. The Mutual Recognition of Jurisdictions (E) Working Group will notify the jurisdiction of any information upon which the Working Group is relying. In that communication, the NAIC will invite the supervisory authority to compare the materials identified by the NAIC to the materials described in Appendix A and Appendix B, and provide information required to update the identified public information or supplement the public information, as required, to address the topics identified in Section A through Section G of the Evaluation Methodology. The use of publicly available information (e.g., the FSAP Report and/or the Insurance Sector Technical Note) is intended to lessen the burden on applicant jurisdictions by requiring the production of information that is readily available, while still addressing substantive areas of inquiry detailed in the Evaluation Methodology. The Mutual Recognition of Jurisdictions (E) Working Group’s review at this stage will be focused on how the jurisdiction’s laws, regulations, administrative practices and procedures, and regulatory authorities regulate the financial solvency of its domestic reinsurers in comparison to key principles underlying the U.S. financial solvency framework and other factors set forth in the Evaluation Methodology.

2 The U.S. financial solvency framework is understood to refer to the key elements provided in the NAIC Financial Regulation Standards and Accreditation Program. Appendix A and Appendix B are derived from this framework.
c. After reviewing the Evaluation Materials, the Mutual Recognition of Jurisdictions (E) Working Group may request that the applicant jurisdiction submit supplemental information as necessary to determine whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. The Working Group will address specific questions directly with the jurisdiction related to items detailed in the Evaluation Methodology that are not otherwise addressed in the Evaluation Materials.

d. The NAIC will request that all responses from the jurisdiction being evaluated be provided in English. Any responses submitted with respect to a jurisdiction’s laws and regulations should be provided by a person qualified in that jurisdiction to provide such analyses and, in the case of statutory analysis, qualified to provide such legal interpretations, to ensure that the jurisdiction is providing an accurate description.

e. The NAIC does not intend to review confidential company-specific information in this process, and has focused the procedure on reviewing publicly available information. No confidential company-specific information shall be disclosed or disseminated during the course of the jurisdiction’s evaluation unless specifically requested, subject to appropriate confidentiality safeguards addressed in a preliminary confidentiality and information-sharing agreement. If no such agreement is executed or the jurisdiction is unable to enter into such an agreement under its regulatory authority, the NAIC will not accept any confidential company-specific information.

3. NAIC Review of Evaluation Materials

a. NAIC staff and/or outside consultants with the appropriate knowledge, experience and expertise will review the jurisdiction’s Evaluation Materials.

b. Expenses with respect to the evaluations will be absorbed within the NAIC budget. This will be periodically reviewed.

c. Timeline for review. A project management approach will be developed with respect to the overall timeline applicable to each evaluation.

d. Upon completing its review of the Evaluation Materials, the internal reviewer(s) will report initial findings to the Mutual Recognition of Jurisdictions (E) Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation. Copies of the initial findings may also be made available to FIO and other relevant federal authorities subject to appropriate confidentiality and information-sharing agreements being in place.

4. Discretionary On-site Review

a. The NAIC may ask the jurisdiction under consideration for the opportunity to perform an on-site review of the jurisdiction’s reinsurance supervisory system. Factors that the Mutual Recognition of Jurisdictions (E) Working Group will consider in determining whether an on-site review is appropriate include the completeness of the information provided by the jurisdiction under review, the general familiarity of the jurisdiction by the NAIC staff or other state regulators participating in the review based on prior conduct or dealings with the jurisdiction, and the results of other evaluations performed by other regulatory or supervisory organizations. If the review is performed, it will be coordinated through the NAIC, utilizing personnel with the appropriate knowledge, experience and expertise. Individual states may also request that representatives from their state be added to the review team.

b. The review team will communicate with the supervisory authority in advance of the on-site visit to clearly identify the objectives, expectations and procedures with respect to the review, as well as any significant
issues or concerns identified within the review of the Evaluation Materials. Information to be considered during the on-site review includes, but is not limited to, the following:

i. Interviews with supervisory authority personnel.

ii. Review of organizational and personnel practices.

iii. Any additional information beneficial to gaining an understanding of document and communication flows.

c. Upon completing the on-site review, the reviewer(s) will report initial findings to the Mutual Recognition of Jurisdictions (E) Working Group, including any significant issues or concerns identified. This report will be included as part of the official documentation of the evaluation.

5. **Standard of Review**

The evaluation is intended as an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. The standard for qualification of a jurisdiction is that the NAIC must reasonably conclude that the jurisdiction’s reinsurance supervisory system achieves a level of effectiveness in financial solvency regulation that is deemed acceptable for purposes of reinsurance collateral reduction, that the jurisdiction’s demonstrated practices and procedures with respect to reinsurance supervision are consistent with its reinsurance supervisory system, and that the jurisdiction’s laws and practices satisfy the criteria required of Qualified Jurisdictions as set forth in the Credit for Reinsurance Models.

6. **Additional Information to be Considered as Part of Evaluation**

The NAIC may also consider information from sources other than the jurisdiction under review. This information includes:

a. Documents, reports and information from appropriate international, U.S. federal and U.S. state authorities.

b. Public comments from interested parties.

c. Rating agency information.

d. Any other relevant information.

7. **Preliminary Evaluation Report**

a. NAIC staff and/or outside consultants will prepare a Preliminary Evaluation Report for review by the Mutual Recognition of Jurisdictions (E) Working Group. This preliminary report will be private and confidential (i.e., may only be reviewed by Working Group members, designated NAIC staff, consultants, the states, the FIO and other relevant federal authorities that specifically request to be kept apprised of this information, provided that such entities have entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction. Any outside consultants retained by the NAIC will be required to enter into a confidentiality and nondisclosure agreement.).

b. The report will be prepared in a consistent style and format to be developed by NAIC staff. It will contain detailed advisory information and recommendations with respect to the evaluation of the jurisdiction’s reinsurance supervisory system and the documented practices and procedures thereunder. The report will contain a recommendation as to whether the NAIC should recognize the jurisdiction as a Qualified Jurisdiction.

a. The Mutual Recognition of Jurisdictions (E) Working Group’s review of the Preliminary Evaluation Report will be held in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings.

b. The Mutual Recognition of Jurisdictions (E) Working Group will make a preliminary determination as to whether the jurisdiction under consideration satisfies the Standard of Review and is deemed acceptable to be included on the NAIC List of Qualified Jurisdictions. If the preliminary determination is that the jurisdiction should not be included on the NAIC List of Qualified Jurisdictions, the Mutual Recognition of Jurisdictions (E) Working Group will set forth its specific findings and identify those areas of concern with respect to this determination.

c. The results of the Preliminary Evaluation Report will be immediately communicated in written form to the supervisory authority of the jurisdiction under review.

a. Upon receipt of the Preliminary Evaluation Report, the supervisory authority will have an opportunity to respond to the initial findings and determination. This is not intended to be a formal appeals process that would initiate U.S. state administrative due process requirements.

b. The Mutual Recognition of Jurisdictions (E) Working Group will consider any response, and will proceed to prepare its Final Evaluation Report. The Mutual Recognition of Jurisdictions (E) Working Group will consider the Final Evaluation Report for approval in regulator-to-regulator session in accordance with the NAIC Policy Statement on Open Meetings. This report will be approved upon an affirmative vote of a majority of the members in attendance at this meeting.

c. Upon approval of the Final Evaluation Report, the Mutual Recognition of Jurisdictions (E) Working Group will issue a public statement and a summary of its findings with respect to its determination. At this time, the Working Group will release the summary for public comment. The detailed report will be a confidential, regulator-only document. The report may be shared with any state indicating that it is considering relying on the NAIC List of Qualified Jurisdictions and has entered into a preliminary confidentiality and information-sharing agreement with the foreign jurisdiction.

10. NAIC Determination Regarding List of Qualified Jurisdictions

a. Once the Mutual Recognition of Jurisdictions (E) Working Group has adopted its Final Evaluation Report, it will submit the summary of its findings and its recommendation to the Reinsurance (E) Task Force at an open meeting. Upon approval by the Reinsurance (E) Task Force, the summary and recommendation will be submitted to the Executive (EX) Committee and Plenary, as well as to the FIO, USTR and other relevant federal authorities for consultation purposes. Upon approval as a Qualified Jurisdiction by the Executive (EX) Committee and Plenary, the jurisdiction will be added to the NAIC List of Qualified Jurisdictions. The NAIC will maintain the List of Qualified Jurisdictions on its public website and in other appropriate NAIC publications.
b. In the event that a jurisdiction is not approved as a Qualified Jurisdiction, the supervisory authority will be eligible for reapplication at the discretion of the NAIC.

c. Upon final adoption of the Mutual Recognition of Jurisdictions (E) Working Group’s determination with respect to a jurisdiction, the Final Evaluation Report will be made available to individual U.S. state insurance regulators upon request and confirmation that the information contained therein will remain confidential.

11. Memorandum of Understanding (MOU)

a. A Qualified Jurisdiction must agree to share information and cooperate on a confidential basis with the U.S. state insurance regulatory authority with respect to all certified reinsurers domiciled within that jurisdiction.

b. The International Association of Insurance Supervisors (IAIS) Multilateral Memorandum of Understanding (MMoU) is the recommended method under which a Qualified Jurisdiction will agree to share information and cooperate with U.S. state insurance regulatory authorities. However, until such time as a state has been approved as a signatory to the MMoU by the IAIS, the state may rely on an MOU entered into by a “Lead State” designated by the NAIC. This Lead State will act as a conduit for information between the Qualified Jurisdiction and other states that have certified a reinsurer domiciled and licensed in that jurisdiction, and will share information with these states consistent with the terms governing the further sharing of information included in the NAIC Master Information Sharing and Confidentiality Agreement, and, as applicable, in the IAIS MMoU, or in a bilateral MOU between the Lead State and the Qualified Jurisdiction. The jurisdiction must also confirm in writing that it is willing to permit this Lead State to act as the contact for purposes of obtaining information concerning its certified reinsurers, provided the that Lead State share that information with the other states requesting the information only in a manner consistent with the terms governing the further sharing of information included, as applicable, in the IAIS MMoU or bilateral MOU between the Lead State and the Qualified Jurisdiction.

c. If a Qualified Jurisdiction has not been approved by the IAIS as a party to the MMoU, it must enter into an MOU with a Lead State. The MOU must provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions.

d. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.

12. Process for Evaluation after Initial Approval

a. The process for determining whether a non-U.S. jurisdiction is a Qualified Jurisdiction is ongoing and subject to periodic review. The Mutual Recognition of Jurisdictions (E) Working Group will perform a yearly review of Qualified Jurisdictions to determine whether there have been any significant changes over the prior year that might affect their status as Qualified Jurisdictions. This yearly review shall follow such abbreviated process as may be determined by the Mutual Recognition of Jurisdictions (E) Working Group to be appropriate. It shall include a review of the jurisdiction’s status as a Reciprocal Jurisdiction if the jurisdiction has been recognized by the NAIC as a Reciprocal Jurisdiction through the process established in paragraph 13.

b. Qualified Jurisdictions must provide the Mutual Recognition of Jurisdictions (E) Working Group with notice of any material change in the applicable reinsurance supervisory system that may affect the status of
the Qualified Jurisdiction. A U.S. jurisdiction should also notify the Mutual Recognition of Jurisdictions (E) Working Group if it receives notice of any material change in the applicable reinsurance supervisory system, or any adverse developments with respect to enforcement of final U.S. judgments, that may affect the status of the Qualified Jurisdiction. U.S. ceding insurers may also initiate notice to the Mutual Recognition of Jurisdictions (E) Working Group if they receive notice of any material change in the applicable reinsurance supervisory system or any adverse developments with respect to enforcement of final U.S. judgments. Upon receipt of any such notice, the Mutual Recognition of Jurisdictions (E) Working Group will consider whether it is necessary to re-evaluate the status of the Qualified Jurisdiction. Any review will be conducted in accordance with the procedure set forth in paragraph 14.

c. The Mutual Recognition of Jurisdictions (E) Working Group will monitor those jurisdictions that have been approved as Qualified or Reciprocal Jurisdictions by individual states, but are not included on the applicable NAIC List.

13. Review of Qualified Jurisdictions as Potential Reciprocal Jurisdictions

a. In evaluating whether to designate a Qualified Jurisdiction as a Reciprocal Jurisdiction, the Mutual Recognition of Jurisdictions (E) Working Group shall utilize such processes and procedures as outlined in the immediately-preceding paragraphs 1 – 12 of Section III. Procedure for Evaluation of Non-U.S. Jurisdictions such as the Mutual Recognition of Jurisdictions (E) Working Group deems is appropriate. Specifically, the Mutual Recognition of Jurisdictions (E) Working Group will use processes and procedures outlined in paragraph 1 (Initiation of Evaluation of the Reinsurance Supervisory System of an Individual Jurisdiction), paragraph 3 (NAIC Review of Evaluation Materials), paragraph 7 (Preliminary Evaluation Report), paragraph 8 (Review of Preliminary Evaluation Report), paragraph 9 (Opportunity to Respond to Preliminary Evaluation Report), paragraph 10 (NAIC Determination regarding List of Qualified Jurisdictions), paragraph 11 (Memorandum of Understanding) and paragraph 12 (Process for Evaluation after Initial Approval), as modified for use with applicants for Reciprocal Jurisdiction status.

b. A Qualified Jurisdiction may not be reviewed for inclusion on the NAIC List of Reciprocal Jurisdictions unless it has undergone the Evaluation Methodology outlined in Section IV, and remains in good standing with the NAIC as a Qualified Jurisdiction. The Mutual Recognition of Jurisdictions (E) Working Group may, if it determines an extended review period to be appropriate after its initial approval of a new Qualified Jurisdiction, defer consideration of that jurisdiction as a possible Reciprocal Jurisdiction until there has been sufficient United States experience with that jurisdiction and its Certified Reinsurers that the Working Group believes it is appropriate to progress from collateral reduction to collateral elimination. Nothing in this process requires a finding that a Qualified Jurisdiction meets the standards for recognition as a Reciprocal Jurisdiction, and the Mutual Recognition of Jurisdictions (E) Working Group may base its determination on all relevant information, which may include factors not specifically included in this Process for Evaluating Qualified and Reciprocal Jurisdictions.

c. A list of Reciprocal Jurisdictions will be published through the NAIC committee process. Jurisdictions subject to an in-force covered agreement and states that meet the requirements of the NAIC Financial Standards and Accreditation Program are automatically included on the NAIC List of Reciprocal Jurisdictions. In making its recommendation with respect to whether a Qualified Jurisdiction that is not automatically designated as a Reciprocal Jurisdiction should be added to the NAIC List of Reciprocal
 Jurisdictions, the Mutual Recognition of Jurisdictions (E) Working Group shall undertake the following analysis in making its evaluation:

i. The Qualified Jurisdiction must confirm that an insurer which has its head office or is domiciled in that jurisdiction shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as the same insurer would receive credit for reinsurance assumed by an assuming insurer domiciled in that jurisdiction;

ii. The Qualified Jurisdiction must confirm that it does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by that jurisdiction or as a condition to allow the ceding insurer to recognize credit for such reinsurance;

iii. The Qualified Jurisdiction must recognize the U.S. state regulatory approach to group supervision and group capital, by providing written confirmation by its competent regulatory authority that insurance groups that are domiciled or maintain their worldwide headquarters in a jurisdiction accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision, including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision by the Qualified Jurisdiction at the level of the worldwide parent undertaking of the insurance or reinsurance group;

iv. The Qualified Jurisdiction must provide written confirmation by its competent regulatory authority that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the Qualified Jurisdiction, including but not limited to the IAIS MMoU or other multilateral memoranda of understanding coordinated by the NAIC This requirement may be satisfied by an MOU with a Lead State, which shall provide for appropriate confidentiality safeguards with respect to the information shared between the jurisdictions, similar to the MOU requirement outlined in paragraph 11 of this section III; and

v. The Qualified Jurisdiction must confirm that it will provide to the states on an annual basis confirmation that each eligible assuming insurer that is domiciled in the Qualified Jurisdiction continues to comply with the requirements set forth in in Section 9C(2) and (3) of Model #786; i.e., must maintain, on an ongoing basis, minimum capital and surplus of no less than $250,000,000, and the required minimum solvency or capital ratio, as applicable.

d. In order to satisfy the requirements of subsection (c) above, the chief insurance supervisor of the Qualified Jurisdiction being evaluated as a Reciprocal Jurisdiction may provide the NAIC with a written letter confirming, as follows:

[Jurisdiction] is a Qualified Jurisdiction under the NAIC Credit for Reinsurance Model Law (#785) and Credit for Reinsurance Model Regulation (#786), and is currently in good standing on the NAIC List of Qualified Jurisdictions. As the lead insurance regulatory supervisor for [Jurisdiction], I hereby confirm to the National Association of Insurance Commissioners (NAIC) and the chief insurance regulators of the 50 states, the District of Columbia and five U.S. territories the following:
An insurer which has its head office or is domiciled in [Jurisdiction] shall receive credit for reinsurance ceded to a U.S.-domiciled assuming insurer in the same manner as credit would be granted for reinsurance assumed by insurers domiciled in [Jurisdiction]. [Jurisdiction] does not require a U.S.-domiciled assuming insurer to establish or maintain a local presence as a condition for entering into a reinsurance agreement with any ceding insurer subject to regulation by [Jurisdiction] or as a condition to allow the ceding insurer to recognize credit for such reinsurance.

[Jurisdiction] recognizes the U.S. state regulatory approach to group supervision and group capital, and confirms that insurance groups that are domiciled or maintain their worldwide headquarters in jurisdictions accredited by the NAIC shall be subject only to their U.S. home jurisdiction’s worldwide prudential insurance group supervision including worldwide group governance, solvency and capital, and reporting, as applicable, and will not be subject to group supervision at the level of the worldwide parent undertaking of the insurance or reinsurance group by the [Jurisdiction].

[Jurisdiction] confirms that information regarding insurers and their parent, subsidiary, or affiliated entities, if applicable, shall be provided to the states in accordance with a memorandum of understanding or similar document between a state and the [Jurisdiction].

[Jurisdiction] will annually provide to the states confirmation that applicable assuming insurers domiciled in [Jurisdiction] maintain minimum capital and surplus of no less than $250,000,000, and maintain on an ongoing basis the required minimum solvency or capital ratio, as applicable.

Finally, I confirm that [Jurisdiction] will immediately notify the NAIC upon any changes to the assurances provided in this letter.

e. The Mutual Recognition of Jurisdictions (E) Working Group will perform a due diligence review of available public and confidential documents to confirm that to the best of its determination, the representations in the letter are true and accurate, and will prepare for the review by the Reinsurance Task Force a Summary of Findings and Determination recommending that the Qualified Jurisdiction be recognized as a Reciprocal Jurisdiction. Upon approval by the Task Force, the Summary of Findings and Determination will be submitted for a vote of the NAIC Executive (EX) Committee and Plenary for inclusion on the List of Reciprocal Jurisdictions.

f. The Mutual Recognition of Jurisdictions (E) Working Group, working in coordination with the Qualified Jurisdiction and the Reinsurance Financial Analysis (E) Working Group, must make a determination on a minimum solvency or capital ratio under which reinsurers licensed and domiciled in the Qualified Jurisdiction may assume insurance from U.S. ceding companies without posting reinsurance collateral. The applicable minimum solvency or capital ratio must be an effective measure of solvency, comparable to either an NAIC risk-based capital (RBC) ratio of three hundred percent (300%) of the authorized control level, or one hundred percent (100%) of the solvency capital requirement (SCR) as calculated under the Solvency II Directive issued by the European Union, giving due consideration to any applicable
equivalency assessment conducted by the European Insurance and Occupational Pensions Authority (EIOPA) on the Qualified Jurisdiction with respect to Solvency II.

14. Termination of Status as Qualified and/or Reciprocal Jurisdiction

a. If the Mutual Recognition of Jurisdictions (E) Working Group finds a Qualified Jurisdiction to be out of compliance at any time with the requirements to be a Qualified Jurisdiction, the specific reasons will be documented in a report to the jurisdiction under review. The Mutual Recognition of Jurisdictions (E) Working Group would then report any concerns to the Reinsurance (E) Task Force for further discussion and communication with appropriate federal and/or international authorities. The status as a Qualified Jurisdiction may be placed on probation, suspended or revoked by the NAIC. If a Qualified Jurisdiction is also a Reciprocal Jurisdiction subject to a Covered Agreement, the Mutual Recognition of Jurisdictions (E) Working Group and the NAIC will initiate communications and consult with FIO, USTR and any other relevant federal and/or international authorities before any action is taken with respect to that Qualified Jurisdiction’s status.

b. Except for Reciprocal Jurisdictions entitled to automatic recognition, a jurisdiction’s status as a Reciprocal Jurisdiction may be placed on probation, suspended or revoked for good cause in the same manner as provided for Qualified Jurisdictions. If cause is found to question the fitness of a Reciprocal Jurisdiction that is subject to an in-force Covered Agreement, or its compliance with applicable requirements of the covered agreement, the Mutual Recognition of Jurisdictions (E) Working Group would report any concerns to the Reinsurance (E) Task Force for further discussion and communication with appropriate federal and/or international authorities. It is intended that compliance with the covered agreement will be addressed through the Joint Committee process established under the covered agreement, or through termination of the covered agreement by the parties to the covered agreement. The NAIC, individual state regulators and interested parties may raise these issues directly with FIO, USTR or other relevant federal authorities.

c. Both Qualified Jurisdictions and Reciprocal Jurisdictions that are not subject to a covered agreement are obligated to provide notice to the Mutual Recognition of Jurisdictions (E) Working Group of any applicable changes to their reinsurance supervisory system or changes to the assurances provided in the letter set forth in paragraph 13. States and U.S. ceding insurers may also provide notice of such changes to the Working Group. Upon notice of any such material changes, the Working Group will meet in regulator-only session to determine if these changes are in fact material to continuing recognition by the NAIC as either a Qualified or Reciprocal Jurisdiction. The Working Group will work directly with the jurisdiction to address any issues that have been identified. If these issues cannot be resolved through this regulator-only dialogue, then the Working Group will report its recommendation to the Reinsurance Task Force, which will consider a suspension of the jurisdiction’s status as a Qualified or Reciprocal Jurisdiction in open session. The Task Force will then make a recommendation to the NAIC Plenary on the action, if any, to be taken, which may include placing the Qualified or Reciprocal Jurisdiction’s status on probation, or suspending or revoking its status.

d. If a Qualified or Reciprocal Jurisdiction’s status is placed on probation by the NAIC, the material change will be noted in an update to its Summary of Finding and Determination in order to provide notice to the states and U.S. ceding insurers of this material change. If the NAIC decides to suspend or revoke its status, the jurisdiction may be given a reasonable time period, no more than 18 months, to rectify its noncompliance with the standards and return it to good standing. Once the NAIC’s suspension or revocation...
takes effect, it is expected that the same action will be taken by the respective states that have recognized
the jurisdiction as a Qualified or Reciprocal Jurisdiction.

e. There is no administrative right to appeal the decision of the NAIC with respect to the revocation of status
as a Qualified or Reciprocal Jurisdiction, but the jurisdiction can apply for reinstatement after a one-year
period.

f. During the period in which a Qualified or Reciprocal Jurisdiction’s status has been suspended by a state, any
new reinsurance assumed by a reinsurer domiciled in that jurisdiction from a ceding insurer domiciled in
that state will not be eligible for credit unless the transaction qualifies for credit on the basis of security
posted by the ceding insurer or some other basis that does not depend on recognition of the jurisdiction as
a Qualified or Reciprocal Jurisdiction. However, suspension does not affect credit for reinsurance that was
already in force.

g. If a Qualified or Reciprocal Jurisdiction’s status is revoked by a state, then those Certified Reinsurers and/or
Reciprocal Jurisdiction Reinsurers domiciled in that jurisdiction no longer qualify for that status, which
generally obligates them to post one hundred percent (100%) collateral on all their liabilities assumed from
ceding insurers domiciled in that state. The state has the option to suspend a reinsurer’s certification
indefinitely, in lieu of revocation, in which case the obligation to post collateral applies prospectively to all
new, renewed and amended reinsurance agreements. If the reinsurer’s eligibility is revoked, it must be
granted at least three months after the effective date of the revocation to cure any deficiency in collateral,
unless exceptional circumstances make a shorter period is necessary for policyholder and other consumer
protection.

h. The factors used in the evaluation of Reciprocal Jurisdictions are not the same as are utilized in the
evaluation of Qualified Jurisdictions. A Qualified Jurisdiction that has been approved by the NAIC as a
Reciprocal Jurisdiction may have its status as a Reciprocal Jurisdiction either suspended or revoked but still
meet the requirements to be a Qualified Jurisdiction. However, if a Reciprocal Jurisdiction that is not subject
to a covered agreement has its status as a Qualified Jurisdiction revoked, it cannot maintain its status as a
Reciprocal Jurisdiction, because it must be a Qualified Jurisdiction to meet the requirements of a Reciprocal
Jurisdiction.

15. Passporting Process for Certified and Reciprocal Jurisdiction Reinsurers

a. In order to facilitate multi-state recognition of assuming insurers and to encourage uniformity among the
states, the NAIC has initiated a process called “passporting” under which the commissioner has the
discretion to defer to another state’s determination with respect to the requirements for both Certified
Reinsurers and Reciprocal Jurisdiction Reinsurers. Passporting is based upon individual state regulatory
authority, and states are encouraged to act in a uniform manner in order to facilitate the passporting process.
States are also encouraged to utilize the passporting process to reduce the amount of documentation filed
with the states and reduce duplicate filings.

b. The passporting process is facilitated through the Reinsurance Financial Analysis (E) Working Group
(ReFAWG). It is intended that ReFAWG will help facilitate multi-state recognition of Certified Reinsurers
and Reciprocal Jurisdiction Reinsurers and address issues of uniformity among the states, both with respect
to initial application and subsequent changes in rating or status. The ReFAWG Review Process is set forth
in the ReFAWG Procedures Manual.
c. Section 9C(7) of the *Credit for Reinsurance Model Regulation* (#786) provides that the “assuming insurer’s supervisory authority must confirm to the commissioner on an annual basis that the assuming insurer complies with the requirements set forth in Paragraphs (2) [i.e., minimum capital and surplus of no less than $250 million] and (3) [i.e., minimum solvency or capital ratio] of this subsection.” Section 9E(1) of Model #786 then provides that “The commissioner may accept financial documentation filed with another NAIC accredited jurisdiction or with the NAIC in satisfaction of the requirements of Subsection C.” A Reciprocal Jurisdiction may satisfy the requirements of Section 9C(7) of Model #786 either by providing the information required by Section 9C(7) itself, or by providing an assuming insurer domiciled in that Reciprocal Jurisdiction with a document confirming the required information, which the assuming insurer would file annually. With either filing method, in lieu of filing the required information directly with the domiciliary states of each of the reinsurer’s U.S. ceding companies, the information may be filed with either the Lead State or the NAIC, which will share this documentation with the other states through the ReFAWG Review Process in satisfaction of their respective filing requirements.
IV. Evaluation Methodology

The Evaluation Methodology was developed to be consistent with the provisions of the NAIC Credit for Reinsurance Models. It is intended to provide an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program, adherence to international supervisory standards and relevant international guidance for recognition of reinsurance supervision. Although the methodology includes a comparison of the jurisdiction’s supervisory system to a number of key elements from the NAIC Accreditation Program, it is not intended as a prescriptive assessment under the NAIC Accreditation Program. Rather, the NAIC Accreditation Program simply provide the framework for the outcomes-based analysis. The NAIC will evaluate the appropriateness and effectiveness of the reinsurance supervisory system within the jurisdiction and consider the rights, benefits and the extent of reciprocal recognition afforded by the jurisdiction to reinsurers licensed and domiciled in the U.S. The determination of a Qualified Jurisdiction is based on the effectiveness of the entire reinsurance supervisory system within the jurisdiction.

The Evaluation Methodology consists of the following:

- Section A: Laws and Regulations
- Section B: Regulatory Practices and Procedures
- Section C: Jurisdiction’s Requirements Applicable to U.S.-Domiciled Reinsurers
- Section D: Regulatory Cooperation and Information Sharing
- Section E: History of Performance of Domestic Reinsurers
- Section F: Enforcement of Final U.S. Judgments
- Section G: Solvent Schemes of Arrangement

This information will be the basis for the Final Evaluation Report and the determination of whether the jurisdiction will be included on the NAIC List of Qualified Jurisdictions.
Section A: Laws and Regulations

The NAIC will review publicly available information, as well as information provided by an applicant jurisdiction with respect to its laws and regulations, in an effort to evaluate whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. This will include a review of elements believed to be basic building blocks for sound insurance/reinsurance regulation. A jurisdiction’s effectiveness under Section A may be demonstrated through law, regulation or established practice that implements the general authority granted to the jurisdiction, or any combination of laws, regulations or practices that meet the objective.

The Mutual Recognition of Jurisdictions (E) Working Group will initiate evaluation of a jurisdiction’s regulatory system by gathering and undertaking a review of the most recent FSAP Report, ROSC and any other publicly available information regarding the laws, regulations, practices and procedures applicable to the reinsurance supervisory system. The Mutual Recognition of Jurisdictions (E) Working Group will simultaneously invite each jurisdiction (or its designee) to provide information relative to Section A (and other sections, as relevant) to assist the NAIC in evaluating its laws and regulations. The NAIC will review this information in conjunction with Appendix A, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix A is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction is requested to address the following information, which the NAIC will consider, at a minimum, in determining whether the outcomes achieved by the jurisdiction’s laws and regulations meet an acceptable level of effectiveness for the jurisdiction to be included on the NAIC List of Qualified Jurisdictions:

1. Confirmation of the jurisdiction’s most recent FSAP Report, including relevant updates with respect to descriptions or elements of the FSAP Report in which changes have occurred since the assessment or where information might otherwise be outdated.
2. Confirmation of the jurisdiction’s ROSC, including relevant updates with respect to descriptions or elements of the ROSC in which changes have occurred since the report was completed or where information might otherwise be outdated.
3. If materials responsive to the topics under review have been provided in response to information exchanges between the jurisdiction under review and the NAIC, such prior responses may be cross-referenced provided updates are submitted, if required to address changes in laws or procedures.
4. Any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix A.

The NAIC will review the information provided by the applicant jurisdiction and determine whether it is adequate to reasonably conclude whether the jurisdiction has sufficient authority to regulate the solvency of its reinsurers in an effective manner. After reviewing the initial submission, the NAIC may request that the applicant jurisdiction submit supplemental information as necessary in order to make this determination. An applicant jurisdiction is strongly encouraged to provide thorough, detailed and current information in its initial submission in order to

3 The basic considerations under this section are derived from Model #786, Section 8C(2), which include: (a) the framework under which the assuming reinsurer is regulated; (b) the structure and authority of the jurisdiction’s reinsurance supervisory authority with regard to solvency regulation requirements and financial surveillance; (c) the substance of financial and operating standards for reinsurers domiciled in the jurisdiction; and (d) the form and substance of financial reports required to be filed or made publicly available by reinsurers domiciled in the jurisdiction and the accounting principles used.
minimize the number and extent of supplemental information requests from the NAIC with respect to Section A of this Evaluation Methodology. The NAIC will provide a complete description in the Final Evaluation Report of the information provided in the Evaluation Materials, and any updates or other information that have been provided by the applicant jurisdiction.

**Section B: Regulatory Practices and Procedures**

Section B is intended to facilitate an evaluation of whether the jurisdiction effectively employs baseline regulatory practices and procedures to supplement and support enforcement of the jurisdiction’s financial solvency laws and regulations described in Section A. This evaluation methodology recognizes that variation may exist in practices and procedures across jurisdictions due to the unique situations each jurisdiction faces. Jurisdictions differ with respect to staff and technology resources that are available, as well as the characteristics of the domestic industry regulated. A determination of effectiveness may be achieved using various financial solvency oversight practices and procedures. This evaluation is not intended to be prescriptive in nature.

The NAIC will utilize the information provided by the jurisdiction as outlined under Section A in completing this section of the evaluation. The NAIC will review this information in conjunction with Appendix B, which provides more detailed guidance with respect to elements the NAIC intends to consider on an outcomes basis in the evaluation under this section. Appendix B is not intended as a prescriptive checklist of requirements a jurisdiction must meet in order to be a Qualified Jurisdiction. Rather, it is provided in an effort to facilitate an outcomes-based comparison to financial solvency regulation under the NAIC Accreditation Program. An applicant jurisdiction should also provide any other information, descriptions or responses the jurisdiction believes would be beneficial to the NAIC’s evaluation process in order to address, on an outcomes basis, the key elements described within Appendix B.

**Section C: Jurisdiction’s Requirements Applicable to U.S. Domiciled Reinsurers**

The jurisdiction is requested to describe and explain the rights, benefits and the extent of reciprocal recognition afforded by the non-U.S. supervisory authority to reinsurers licensed and domiciled in the U.S.

**Section D: Regulatory Cooperation and Information-Sharing**

The Credit for Reinsurance Models require the supervisory authority to share information and cooperate with the U.S. state insurance regulators with respect to all certified reinsurers domiciled within their jurisdiction. The jurisdiction is requested to provide an explanation of the supervisory authority’s ability to cooperate, share information and enter into an MOU with U.S. state insurance regulators and confirm that they are willing to enter into an MOU. This should include information with respect to any existing MOU with U.S. state and/or federal authorities that pertain to reinsurance. Both the jurisdiction and the states may rely on the IAIS MMoU to satisfy this requirement, and any states that have not yet been approved by the IAIS as a signatory to the MMoU may rely on an MOU entered into by a Lead State with the jurisdiction until such time that the state has been approved as a signatory to the IAIS MMoU. The NAIC and the states will communicate and coordinate with the FIO, USTR and other relevant federal authorities as appropriate with respect to this process.

**Section E: History of Performance of Domestic Reinsurers**

The jurisdiction is requested to provide a general description with respect to the historical performance of reinsurers domiciled in the jurisdiction. The NAIC does not intend to review confidential company-specific information under this section. Rather, it is intended that any information provided would be publicly available, unless specifically addressed with the jurisdiction under review. This discussion should address, at a minimum, the following information:
a. Number of reinsurers domiciled in the jurisdiction, and a list of any reinsurers domiciled in the jurisdiction that have and maintain, on an ongoing basis, minimum capital and surplus, or its equivalent, of no less than $250,000,000.

b. Up to a 10-year history of any regulatory actions taken against specific reinsurers.

c. Up to a 10-year history listing any reinsurers that have gone through insolvency proceedings, including the size of each insolvency and a description of the related outcomes (e.g., reinsurer rehabilitated or liquidated, payout percentage of claims to priority classes, payout percentage of claims to domestic and foreign claimants).

d. Up to a 10-year history of any significant industry-wide fluctuations in capital or profitability with respect to domestic reinsurers.

**Drafting Note:** The NAIC will determine the appropriate time period for review on a case-by-case basis with respect to this information.

**Section F: Enforcement of Final U.S. Judgments**

The NAIC has previously collected information from a number of jurisdictions with respect to enforcement of final U.S. judgments. The jurisdiction is also requested to provide a current description or explanation of any restrictions with respect to the enforcement of final foreign judgments in the jurisdiction. Based on the foregoing information, the NAIC will make an assessment of the effectiveness of the ability to enforce final U.S. judgments in the jurisdiction. This will include a review of the status, interpretations, application and enforcement of various treaties, conventions and international agreements with respect to final judgments, arbitration and choice of law. The Mutual Recognition of Jurisdictions (E) Working Group will monitor the enforcement of final U.S. judgments and the Qualified Jurisdiction is requested to notify the NAIC of any developments in this area.

**Section G: Solvent Schemes of Arrangement**

The jurisdiction is requested to provide a description of any legal framework that allows reinsurers domiciled in the jurisdiction to propose or participate in any solvent scheme of arrangement or similar procedure. In addition, the jurisdiction is requested to provide a description of any solvent scheme of arrangement or similar procedure that a domestic reinsurer has proposed or participated in and the outcome of such procedure.
V. Appendices: Specific Guidance with Respect to Section A and Section B

It is important to note that Part IV, Section A: Laws and Regulations, and Part IV, Section B: Regulatory Practices and Procedures, are derived from the NAIC Financial Regulation Standards and Accreditation Program, which is intended to establish and maintain standards to promote sound insurance company financial solvency regulation among the U.S. states. As such, the NAIC Accreditation Program requires the states to employ laws, regulations and administrative policies and procedures substantially similar to the NAIC accreditation standards in order to be considered an accredited state.

However, it is not the intent of the Evaluation Methodology to require applicant jurisdictions to meet the standards required by the NAIC for accreditation. Instead, Section A and Section B (and their corresponding appendices) are intended to provide a framework to facilitate an outcomes-based evaluation by the NAIC and state insurance regulators of the effectiveness of the jurisdiction’s supervisory authority. This framework consists of a description of the jurisdiction’s laws, regulations, practices and procedures applicable to the supervision of its domestic reinsurers. The amount of detail provided within these appendices should not be interpreted as specific requirements that must be met by the applicant jurisdiction. Rather, the information is intended to provide direction to the applicant jurisdiction in an effort to facilitate a complete response and increase the efficiency and timeliness of the evaluation process.
Appendix A: Laws and Regulations

1. Examination Authority
Does the jurisdiction have the authority to examine its domestic reinsurers? This description should address the following:
   a. Frequency and timing of examinations and reports.
   b. Guidelines for examination.
   c. Whether the jurisdiction has the authority to examine reinsurers whenever it is deemed necessary.
   d. Whether the jurisdiction has the authority to have complete access to the reinsurer’s books and records and, if necessary, the records of any affiliated company.
   e. Whether the jurisdiction has the authority to examine officers, employees and agents of the reinsurer when necessary with respect to transactions directly or indirectly related to the reinsurer under examination.
   f. Whether the jurisdiction has the authority to share confidential information with U.S. state insurance regulatory authorities, provided that the recipients are required, under their law, to maintain its confidentiality.

2. Capital and Surplus Requirement
Does the jurisdiction have the authority to require domestic reinsurers to maintain a minimum level of capital and surplus to transact business? This description should address the following:
   a. Whether the jurisdiction has the authority to require reinsurers to maintain minimum capital and surplus, including a description of such minimum amounts.
   b. Whether the jurisdiction has the authority to require additional capital and surplus based on the type, volume and nature of reinsurance business transacted.
   c. Capital requirements for reinsurers, including reports and a description of any specific levels of regulatory intervention.

3. Accounting Practices and Procedures
Does the jurisdiction have the authority to require domestic reinsurers to file appropriate financial statements and other financial information? This description should address the following:
   a. Description of the accounting and reporting practices and procedures.
   b. Description of any standard financial statement blank/reporting template, including description of content/disclosure requirements and corresponding instructions.

4. Corrective Action
Does the jurisdiction have the authority to order a reinsurer to take corrective action or cease and desist certain practices that, if not corrected or terminated, could place the reinsurer in a hazardous financial condition? This description should address the following:
   a. Identification of specific standards which may be considered to determine whether the continued operation of the reinsurer might be hazardous to the general public.
   b. Whether the jurisdiction has the authority to issue an order requiring the reinsurer to take corrective action when it has been determined to be in hazardous financial condition.
5. Regulation and Valuation of Investments

What authority does the jurisdiction have with respect to regulation and valuation of investments? This description should address the following:

a. Whether the jurisdiction has the authority to require a diversified investment portfolio for all domestic reinsurers as to type, issue and liquidity.

b. Whether the jurisdiction has the authority to establish acceptable practices and procedures under which investments owned by reinsurers must be valued, including standards under which reinsurers are required to value securities/investments.

6. Holding Company Systems

Does the jurisdiction have laws or regulations with respect to supervision of the group holding company systems of reinsurers? This description should address the following:

a. Whether the jurisdiction has access to information via the parent or other regulated group entities about activities or transactions within the group involving other regulated or non-regulated entities that could have a material impact on the operations of the reinsurer.

b. Whether the jurisdiction has access to consolidated financial information of a reinsurer’s ultimate controlling person.

c. Whether the jurisdiction has the authority to review integrity and competency of management.

d. Whether the jurisdiction has approval and intervention powers for material transactions and events involving reinsurers.

e. Whether the jurisdiction has authority to monitor, or has prior approval authority over:
   i. Change in control of domestic reinsurers.
   ii. Dividends and other distributions to shareholders of the reinsurer.
   iii. Material transactions with affiliates.

7. Risk Management

Does the jurisdiction have the authority to require its domestic reinsurers to maintain an effective risk-management function and practices? This description should address the following:

a. Whether the jurisdiction has Own Risk and Solvency Assessment (ORSA) requirements and reporting.

b. Any requirements regarding the maximum net amount of risk to be retained by a reinsurer for an individual risk based on the reinsurer’s capital and surplus.

c. Whether the jurisdiction has authority to monitor enterprise risk, including any activity, circumstance, event (or series of events) involving one or more affiliates of a reinsurer that, if not remedied promptly, is likely to have a material adverse effect on the financial condition or liquidity of the reinsurer or its insurance holding company system as a whole.

d. Whether the jurisdiction has corporate governance requirements for reinsurers.
8. Liabilities and Reserves

Does the jurisdiction have standards for the establishment of liabilities and reserves (technical provisions) resulting from reinsurance contracts? This description should address the following:

a. Liabilities incurred under reinsurance contracts for policy reserves, unearned premium, claims and losses unpaid, and incurred but not reported (IBNR) claims (including whether discounting is allowed for reserve calculation/reporting).

b. Liabilities related to catastrophic occurrences.

c. Whether the jurisdiction requires an opinion on reserves and loss and loss adjustment expense reserves by a qualified actuary or specialist for all domestic reinsurers, and the frequency of such reports.

9. Reinsurance Ceded

What are the jurisdiction’s requirements with respect to the financial statement credit allowed for reinsurance retroceded by its domestic reinsurers? This description should address the following:

a. Credit for reinsurance requirements applicable to reinsurance retroceded to domestic and non-domestic reinsurers.

b. Collateral requirements applicable to reinsurance contracts.

c. Whether the jurisdiction requires a reinsurance agreement to provide for insurance risk transfer (i.e., transfer of both underwriting and timing risk).

d. Requirements applicable to special purpose reinsurance vehicles and insurance securitizations.

e. Affiliated reinsurance transactions and concentration risk.

f. Disclosure requirements specific to reinsurance transactions, agreements and counterparties, if such information is not provided under another item.

10. Independent Audits

Does the jurisdiction require annual audits of domestic reinsurers by independent certified public accountants or similar accounting/auditing professional recognized in the applicant jurisdiction? This description should address the following:

a. Requirements for the filing of audited financial statements prepared in conformity with accounting practices prescribed or permitted by the supervisory authority.

b. Contents of annual audited financial reports.

c. Requirements for selection of auditor.

d. Allowance of audited consolidated or combined financial statements.

e. Notification of material misstatements of financial condition.

f. Supervisor’s access to auditor’s workpapers.

g. Audit committee requirements.

h. Requirements for reporting of internal control-related matters.

11. Receivership

Does the jurisdiction have a receivership scheme for the administration of reinsurers found to be insolvent? This should include a description of any liquidation priority afforded to policyholders and the liquidation priority of reinsurance obligations to domestic and non-domestic ceding insurers in the context of an insolvency proceeding of a reinsurer.
12. Filings with Supervisory Authority

Does the jurisdiction require the filing of annual and interim financial statements with the supervisory authority? This description should address the following:

a. The use of standardized financial reporting in the financial statements, and the frequency of relevant updates.

b. The use of supplemental data to address concerns with specific companies or issues.

c. Filing format (e.g., electronic data capture).

d. The extent to which financial reports and information are public records.

13. Reinsurance Intermediaries

Does the jurisdiction have a regulatory framework for the regulation of reinsurance intermediaries?

14. Other Regulatory Requirements with respect to Reinsurers

Any other information necessary to adequately describe the effectiveness of the jurisdiction’s laws and regulations with respect to its reinsurance supervisory system.
Appendix B: Regulatory Practices and Procedures

1. **Financial Analysis**

What are the jurisdiction’s practices and procedures with respect to the financial analysis of its domestic reinsurers? Such description should address the following:

   a. **Qualified Staff and Resources**
      The resources employed to effectively review the financial condition of all domestic reinsurers, including a description of the educational and experience requirements for staff responsible for financial analysis.

   b. **Communication of Relevant Information to/from Financial Analysis Staff**
      The process under which relevant information and data received by the supervisory authority are provided to the financial analysis staff and the process under which the findings of the financial analysis staff are communicated to the appropriate person(s).

   c. **Supervisory Review**
      How the jurisdiction’s internal financial analysis process provides for supervisory review and comment.

   d. **Priority-Based Analysis**
      How the jurisdiction’s financial analysis procedures are prioritized in order to ensure that potential problem reinsurers are reviewed promptly.

   e. **Depth of Review**
      How the jurisdiction’s financial analysis procedures ensure that domestic reinsurers receive an appropriate level or depth of review commensurate with their financial strength and position.

   f. **Analysis Procedures**
      How the jurisdiction has documented its financial analysis procedures and/or guidelines to provide for consistency and continuity in the process and to ensure that appropriate analysis procedures are being performed on each domestic reinsurer.

   g. **Reporting of Material Adverse Findings**
      The process for reporting material adverse indications, including the determination and implementation of appropriate regulatory action.

   h. **Early Warning System/Stress Testing**
      Whether the jurisdiction has an early warning system and/or stress testing methodology that is utilized with respect to its domestic reinsurers.
2. Financial Examinations

What are the jurisdiction’s practices and procedures with respect to the financial examinations of its domestic reinsurers? Such description should address the following:

a. **Qualified Staff and Resources**
   The resources employed to effectively examine all domestic reinsurers. This should include whether the jurisdiction prioritizes examination scheduling and resource allocation commensurate with the financial strength and position of each reinsurer, and a description of the educational and experience requirements for staff responsible for financial examinations.

b. **Communication of Relevant Information to/from Examination Staff**
   The process under which relevant information and data received by the supervisory authority are provided to the examination staff and the process under which the findings of the examination staff are communicated to the appropriate person(s).

c. **Use of Specialists**
   Whether the supervisory authority’s examination staff includes specialists with appropriate training and/or experience or whether the supervisory authority otherwise has available qualified specialists that will permit the supervisory authority to effectively examine any reinsurer.

d. **Supervisory Review**
   Whether the supervisory authority’s procedures for examinations provide for supervisory review.

e. **Examination Guidelines and Procedures**
   Description of the policies and procedures the supervisory authority employs for the conduct of examinations, including whether variations in methods and scope are commensurate with the financial strength and position of the reinsurer.

f. **Risk-Focused Examinations**
   Does the supervisory authority perform and document risk-focused examinations and, if so, what guidance is utilized in conducting the examinations? Are variations in method and scope commensurate with the financial strength and position of the reinsurer?

g. **Scheduling of Examinations**
   Whether the supervisory authority’s procedures provide for the periodic examination of all domestic reinsurers, including how the system prioritizes reinsurers that exhibit adverse financial trends or otherwise demonstrate a need for examination.

h. **Examination Reports**
   Description of the format in which the supervisory authority’s reports of examinations are prepared, and how the reports are shared with other jurisdictions under information-sharing agreements.

i. **Action on Material Adverse Findings**
   What are the jurisdiction’s procedures regarding supervisory action in response to the reporting of any material adverse findings.

3. Information Sharing

Does the jurisdiction have a process for the sharing of otherwise confidential documents, materials, information, administrative or judicial orders, or other actions with U.S. state regulatory officials, provided that the recipients are required, under their law, to maintain its confidentiality?
4. **Procedures for Troubled Reinsurers**

What procedures does the jurisdiction follow with respect to troubled reinsurers?

5. **Organization, Licensing and Change of Control of Reinsurers**

What processes does the supervisory authority use to identify unlicensed or fraudulent activities? The description should address the following:

   a. **Licensing Procedure**
      Whether the supervisory authority has documented licensing procedures that include a review and/or analysis of key pieces of information included in a primary licensure application.

   b. **Staff and Resources**
      The educational and experience requirements for staff responsible for evaluating company licensing.

   c. **Change in Control of a Domestic Reinsurer**
      Procedures for the review of key pieces of information included in filings with respect to a change in control of a domestic reinsurer.

W:\National Meetings\2021\Summer\Plenary\Att 8 QF Jurisdiction Process_AdoptedAug14.pdf
State Implementation Reporting of NAIC-Adopted Model Laws and Regulations

Executive (EX) Committee

- Amendments to the Unfair Trade Practices Act (#880)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. One state has enacted this model.

Life Insurance and Annuities (A) Committee

- Amendments to the Suitability in Annuity Transactions Model Regulation (#275)—These revisions were adopted by the Executive (EX) Committee and Plenary during the February 13, 2020 conference call. Seven states have enacted these revisions to the model.

- Amendments to the Standard Nonforfeiture Law for Individual Deferred Annuities (#805)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. NAIC staff are not aware of any state activity regarding this model.

Health Insurance and Managed Care (B) Committee

- Amendments to the Accident and Sickness Insurance Minimum Standards Model Act (#170)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2019 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the Health Maintenance Organization Model Act (#430)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. One state has enacted this model.

- Amendments to the Insurance Holding Company System Regulatory Act (#440)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Amendments to the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)—These revisions were adopted by the Executive (EX) Committee and Plenary at the 2020 Fall National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Adoption of the Limited Long-Term Care Insurance Model Act (#642)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. One state has enacted this model.

- Adoption of the Limited Long-Term Care Insurance Model Regulation (#643)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. One state has enacted this model.

Property and Casualty Insurance (C) Committee

- Adoption of the Real Property Lender-Placed Insurance Model Act (#631)—This model was adopted by the Executive (EX) Committee and Plenary at the 2021 Spring National Meeting. NAIC staff are not aware of any state activity regarding this model.

- Adoption of the Travel Insurance Model Act (#632)—This model was adopted by the Executive (EX) Committee and Plenary at the 2018 Fall National Meeting. Six states have enacted this model.
Financial Condition (E) Committee

- Amendments to the *Credit for Reinsurance Model Law (#785)*—These revisions were adopted by the Executive (EX) Committee and Plenary during the June 26, 2019 conference call. 38 states have enacted this model.

- Amendments to the *Credit for Reinsurance Model Regulation (#786)*—These revisions were adopted by the Executive (EX) Committee and Plenary during its June 26, 2019 conference call. Three states have enacted this model.

Executive (EX) Committee
Columbus, Ohio
August 15, 2021

The Executive (EX) Committee met in Columbus, OH, Aug. 15, 2021. The following Committee members participated: David Altmaier, Chair (FL); Dean L. Cameron, Vice Chair (ID); Chlora Lindley-Myers, Vice President (MO); Andrew N. Mais, Secretary-Treasurer (CT); Raymond G. Farmer, Most Recent Past President (SC); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Michael Conway (CO); Doug Ommen (IA); James J. Donelone (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Mike Chaney (MS); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); and Larry D. Deiter (SD). Also participating were: Jon Godfread (ND); and Elizabeth Kelleher Dwyer (RI).

1. **Adopted the Aug. 13 Report of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee**

Commissioner Altmaier reported that the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee met Aug. 13 in joint session. The meeting was held in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC) and paragraph 6 (consultations with NAIC staff members) of the NAIC Policy Statement on Open Meetings.

During this meeting, the Committee and Subcommittee adopted its July 13, June 29, May 20, and Spring National Meeting minutes, which included the following action: 1) discussed elevating the Innovation and Technology (EX) Task Force to a standing committee; 2) received a mid-year financial update and overview of the preliminary 2022 budget; 3) approved the State Based Systems (SBS) Kansas Implementation 2021 Fiscal; 4) approved BlackRock as the commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (RMBS) financial modeling vendor; 5) approved the contribution of $670,000 to the NAIC Defined Benefit Pension Plan portfolio; 6) approved the Solvency Workpaper Software Modernization Project – Implementation Preparation Phase Fiscal; 7) approved the System for Electronic Rate and Form Filing (SERFF) Modernization – Mobilization and Pilot Phase Fiscal; 8) approved the SBS State Implementation 2021 Fiscal; and 9) approved the Property/Casualty (P/C) Rate Model Review Staffing Resources Fiscal.

The Committee and Subcommittee also adopted the report of the Audit Committee, which met Aug. 10 and took the following action: 1) received an overview of the June 30 financial statements; 2) reconfirmed RSM for the 2021 financial audit; 3) received an update on the 2021 Service Organization Control (SOC) 2 review for transaction processing in the Cloud; 4) received an update on Zone financials and the 2022 budget calendar; and 5) reaffirmed its 2022 proposed charter.

The Committee and Subcommittee also took the following action: 1) received the June 30 Long-Term Investment Portfolio and Defined Benefit Pension Plan Portfolio reports; 2) approved the Information Systems (EX1) Task Force’s 2022 proposed charges; and 3) approved its 2022 proposed charges.

The Committee and Subcommittee also: 1) approved the Enterprise Resource Planning (ERP) Solution Evaluation Fiscal; 2) heard the joint chief executive officer/chief operating officer (CEO/COO) report; 3) approved the request for an amicus brief in Gunn v. Continental Casualty Co.; and 4) heard a cybersecurity report.

Director Lindley-Myers made a motion, seconded by Commissioner Altmaier, to adopt the Aug. 13 report of the joint meeting of the Executive (EX) Committee and the Internal Administration (EX1) Subcommittee. The motion passed unanimously.

2. **Adopted its July 13, June 29, and May 20 Minutes**

Director Lindley-Myers, made a motion, seconded by Director Cameron, to adopt the Committee’s July 13, June 29, and May 20 interim meeting report (Attachment One). The motion passed unanimously.

3. **Adopted the Reports of its Task Forces**

The Committee received written reports from: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance.
Commissioner Godfread added that the Innovation and Technology (EX) Task Force discussed the formation of a standing “H” committee on Innovation, Technology, and Cybersecurity. If approved, the purpose of the new standing committee will be to enhance coordination and provide a central forum for discussion on the many issues in the areas of innovation, technology, and cybersecurity. The Task Force will appoint an ad hoc group to take the lead on developing a draft mission statement and proposed charges. The goal is to have the decision on the standing committee and the accompanying bylaw amendment considered for adoption by Executive (EX) Committee and Plenary during the Fall National Meeting.

Director Cameron made a motion, seconded by Commissioner Donelon, to adopt the reports of: 1) the Climate and Resiliency (EX) Task Force; 2) the Government Relations (EX) Leadership Council; 3) the Innovation and Technology (EX) Task Force; 4) the Long-Term Care Insurance (EX) Task Force; and 5) the Special (EX) Committee on Race and Insurance (Attachment Two). The motion passed unanimously.

4. Received a Status Report on the NAIC State Ahead Strategic Plan Implementation

Commissioner Altmaier provided an update on NAIC State Ahead implementation efforts. State Ahead is a three-year strategic plan for the organization to further advance the products, services, and support the NAIC provides to state insurance regulators to better meet the changing regulatory landscape. NAIC staff continue to make good progress on the many State Ahead projects. (Attachment Three). In 2020, the NAIC paused on the development of State Ahead 2.0 to focus on COVID-19. The membership has now started the conversation on development of the next iteration of State Ahead. The NAIC will appoint a member steering committee to lead the effort along with the CEO, COO, and NAIC management.

5. Received a Report of Model Law Development Efforts

Commissioner Altmaier presented a written report on the progress of ongoing model law development efforts (Attachment Four).

6. Heard a Report from the NIPR Board of Directors

Director Deiter reported that the National Insurance Producer Registry (NIPR) Board of Directors had a busy and productive 2021. Through the end of June, NIPR’s revenues are 28% over budget with a total product revenue of $28.6 million through June 30. NIPR has experienced higher overall volume this year, with volumes and revenues outpacing 2019, which was NIPR’s highest revenue year before the pandemic.

Appointment transactions have been strong this year, as have other licensing and credentialling products. Non-resident licensing is particularly strong and continues to be NIPR’s largest revenue driver. NIPR is seeing a trend of individual producers obtaining more non-resident licenses and carrier appointments.

Due to the increased volume of transactions, the NIPR Board of Directors recently approved adding additional staff members to NIPR’s customer service center. These NIPR staff provide a valuable service to state insurance regulators by answering producer licensing-related questions for all states and territories, helping to reduce the administrative burden on individual state insurance departments.

After the completion of implementations scheduled for 2021 and 2022, there will only be two states—New York and Washington—that do not fully leverage the services of NIPR to provide cost-effective, streamlined, and uniform producer licensing services for state insurance regulators and industry.

7. Heard a Report from the Compact

Superintendent Dwyer reported that the Interstate Insurance Product Regulation Commission (Compact) met Aug. 12.

The Compact welcomed Delaware as its newest member. Gov. John Carney (D-DE) signed the Compact bill after bipartisan support in its General Assembly. Delaware is the 45th state to enact the Compact, bringing it to 47 Compact members, including Washington, DC and Puerto Rico.

The Compact considered changing the current 15% threshold for its approval authority of in-force rate increases on Compact-approved individual long-term care insurance (LTCD) products. The Compact held a public hearing and will be refining the options for what is hopefully final action at its next meeting.
The Compact heard an update from its Governance Committee, which is working on a proposed course of action in response to the recommendations from the Squire Patton Boggs governance review, which was received earlier this year, with respect to the next steps in addressing the Colorado Supreme Court opinion of April 2020.

The Compact put in place another emergency rule to apply the changes made to its individual deferred annuity standards to have the applicable minimum nonforfeiture law follow state law as states adopt Standard Nonforfeiture Law for Individual Deferred Annuities (#805) changes made by the NAIC at the end of 2020. The Compact adopted these changes on a permanent basis, and they will be effective in mid-October.

The Compact adopted amendments to two existing uniform standards for life benefit features: 1) waiver of premium and waiver of monthly deductions; and 2) a new standard for waiver of surrender charges for life policies.

The Compact also appointed Iowa to fill the opening of vice chair of the Product Standards Committee. Rhode Island stepped down as the vice chair this year, and the Compact’s designated representative, Sarah Neil (RI), is now a full-time employee of the Compact as its Communications and Outreach Coordinator.

The Compact continues to operate over-budgeted revenues this year, as it is seeing higher than anticipated life filings as companies update their interest rates in response to changes in federal law and the Valuation Manual.

Having no further business, the Executive (EX) Committee adjourned.
The Executive (EX) Committee met July 13, June 29, and May 20, 2021, in regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings. During these meetings, the Committee:

1. Discussed creating a new standing Committee on Innovation, Technology, and Cybersecurity.
2. Received a mid-year financial update and an overview of the preliminary 2022 budget.
3. Approved the State Based Systems (SBS) Kansas Implementation 2021 Fiscal.
4. Approved BlackRock Solutions as the commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (RMBS) modeling vendor.
5. Approved a contribution to the NAIC Defined Benefit Pension Plan Portfolio.
6. Adopted the Audit Committee report, including the 2020/2021 Service Organization Control (SOC) reports.
7. Adopted the Internal Administration (EX1) Subcommittee’s May 13 minutes.
REPORT OF THE EXECUTIVE (EX) COMMITTEE TASK FORCES

Climate and Resilience (EX) Task Force—The Climate and Resilience (EX) Task Force met on Aug. 15 and took the following action: 1) heard reports from its workstreams; 2) heard a presentation regarding the California Department of Insurance (DOI) Working Group recommendations report, Protecting Communities, Preserving Nature, and Building Resiliency: How First-of-its-Kind Climate Insurance Will Help Combat the Costs of Wildfires, Extreme Heat and Floods; and 3) heard a presentation from the Reinsurance Association of America (RAA) regarding its mapping and analysis tool for resiliency planning utilizing the Federal Emergency Management Agency’s (FEMA’s) Natural Risk Index for natural hazard data.

Government Relations (EX) Leadership Council—The Government Relations (EX) Leadership Council did not meet at the Summer National Meeting. The Leadership Council meets weekly in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy Statement on Open Meetings, to discuss federal legislative and regulatory developments affecting insurance regulation.

Innovation and Technology (EX) Task Force—The Innovation and Technology (EX) Task Force met on Aug. 14 and took the following action: 1) adopted minutes from the Spring National Meeting and reports of the Big Data and Artificial Intelligence (EX) Working Group, the Speed to Market (EX) Working Group, and the E-Commerce (EX) Working Group. The Task Force will also hear a report on cybersecurity workstreams and international activity. The Task Force will discuss issues related to consumer data ownership and hear reports from various NAIC committees working on related or potentially overlapping workstreams, such as the Special (EX) Committee on Race and Insurance, the Accelerated Underwriting (A) Working Group, the Property and Casualty Insurance (C) Committee, and the Privacy Protections (D) Working Group. The Task Force will also hear an update on the predictive model review process and discussed the coordination of the various NAIC cybersecurity workstreams.

The Big Data and Artificial Intelligence (EX) Working Group met July 9 and took the following action: 1) adopted its March 29 minutes; 2) discussed a draft survey to conduct analysis on private passenger automobile insurers’ use and governance of big data, as used in an artificial intelligence (AI) and machine learning system. The survey is being conducted under the examination authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin. This analysis will help inform the Working Group in completing its long-term goals of developing guidance and recommendations to update the existing regulatory framework for the use of big data and AI, including how to monitor and oversee the industry’s compliance with the NAIC’s AI principles. The survey work will be expanded to other lines of insurance as needed, such as life insurance and homeowners insurance.

The E-Commerce (EX) Working Group met June 30 and took the following action: 1) heard an introductory report, as well as additional background and other information explaining what led to its establishment; 2) discussed its 2021 charges, which include examining the states’ e-commerce laws and regulations, surveying the states regarding their various exceptions to the federal Uniform Electronic Transactions Act (UETA) while also examining whether a model bulletin may be appropriate; and 3) discussed its overall work plan and what sorts of efforts it can undertake moving forward in order to satisfy its charges, including: identifying key legislation; surveying the states; and working with state insurance regulators, industry, and consumer representatives to further evaluate what type of deliverable the Working Group will ultimately provide.

The Speed to Market (EX) Working Group met June 30 and June 29 and took the following action: 1) adopted its March 10 minutes; 2) heard an update from the Information Technology Group (ITG) regarding the implementation of last year’s changes to the product coding matrix (PCM); and 3) discussed and considered new suggested changes to the PCM and the uniform transmittal document (UTD). No new revisions were adopted.

Long-Term Care Insurance (EX) Task Force—The Long-Term Care Insurance (EX) Task Force met on Aug. 13 in joint session with the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup to: 1) adopted its July 6 minutes, which included adoption of its Spring National Meeting minutes; and 2) received the reports of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup and the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup.

During the Aug. 13 meeting, the Task Force received the reports of its subgroups: 1) the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup which met June 22 to hear comments from state insurance regulators and interested parties on
the operational section of the long-term care insurance (LTCI) multistate actuarial (MSA) rate review framework exposure draft; 2) the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup, which met July 28, July 22, and May 4 where it heard presentations on current innovative long-term care (LTC) wellness pilot programs, exposed a document titled “Issues Related to LTC Wellness Benefits” for a public comment period ending Sept. 5, and began making revisions to the draft “RBO Consumer Notices Checklist” based on comments received; and 3) the Long-Term Care Insurance Financial Solvency (EX) Subgroup, which reported on industry trends and factors affecting reserve levels.

During the Aug. 13 meeting, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup discussed the status of revisions to the operational section of the LTCI MSA rate review framework. The drafting group continues to work through issues identified in the comments received. A second draft is expected to be released for comment in the fall. The Subgroup heard comments on the actuarial section of the LTCI MSA rate review framework from state insurance regulators and interested parties. The drafting group will begin work addressing the issues identified in the comments received.

Special (EX) Committee on Race and Insurance—The Special (EX) Committee on Race and Insurance met Aug. 15 and took the following action: 1) adopted its July 21, July 1, and Spring National Meeting Minutes; 2) heard reports from its five workstreams; and 3) heard presentations from interested parties. The Special Committee met on July 21 and July 1 to hear comments on its proposed charges and adopt those charges for 2021–2022.

- Workstream One of the Special Committee is focused on researching and analyzing the level of diversity and inclusion within the insurance sector. The Workstream submitted an initial report to the Special Committee in February outlining its findings, as well as its recommendations to the Executive (EX) Committee and membership on next steps.

- Workstream Two of the Special Committee has not met since the Spring National Meeting. The Workstream recently emailed to commissioners a survey intended to examine, at the zone level, best practices and initiatives state insurance departments can consider to promote diversity, equity, and inclusion (DE&I) in their offices. Once responses have been gathered, the Workstream will meet to discuss and develop a method and forum to share diversity and inclusion information among state insurance regulators.

- Workstream Three of the Special Committee is focused on property/casualty (P/C) insurance issues. The Workstream has met four times to develop a list of issues that it wishes to focus on. The Workstream leveraged the issues list to create a final report in January that it submitted to the Special Committee for its consideration. The report included potential charges related to affordability; availability and access; producer issues; education and outreach; and unfair discrimination. The Workstream expects to take the adopted charges and begin to draft a work plan to complete its tasks.

- Workstream Four of the Special Committee drafted and adopted an initial report and recommendations via e-vote ending Feb. 5 and forwarded it to the Special Committee for its consideration. The Workstream expects to meet in September to discuss the charges adopted by the Special Committee and draft a work plan to complete its tasks.

- Workstream Five of the Special Committee met July 8 and June 10 to discuss issues related to data collection and provider networks, provider directories, and cultural competency. During these meetings, the Workstream heard responses and testimony from stakeholders on a specified set of questions related to these issues. The Workstream recently exposed a draft Principles for Data Collection document for a public comment period ending Aug. 19. The Workstream plans to discuss the comments received by the Aug. 19 public comment deadline during a meeting on Aug. 26. The Workstream anticipates developing a similar document for issues related to provider networks, provider directories, and cultural competency. After its Aug. 26 meeting, the Workstream plans to finalize a work plan to complete its work on both documents by the end of 2021.
Amendments to the Model Regulation to Implement the Accident and Sickness Insurance Minimum Standards Model Act (#171)—Amendments to Model #171 are required for consistency with the federal Affordable Care Act (ACA). Therefore, they did not require approval of a Request for NAIC Model Law Development by the Executive (EX) Committee. At the 2015 Fall National Meeting, the Regulatory Framework (B) Task Force discussed the proposed revisions to this model. The Task Force met Feb. 11, 2016, and appointed the Accident and Sickness Insurance Minimum Standards (B) Subcommittee to work on revisions to this model. The Subcommittee has been meeting on a regular basis since the 2016 Spring National Meeting, and it plans to continue meeting until it completes its work. During its meetings, the Subcommittee has discussed several issues, including its approach for revising the model’s disability income insurance coverage provisions, and it decided preliminarily to review the Interstate Insurance Product Regulation Commission’s (Compact’s) approach. After pausing its work due to the ACA’s potential repeal, replacement, or modification—and the possible impact on the provisions of this model, as well as the Subcommittee’s preliminary proposed revisions to the model—the Subcommittee began meeting again in May 2018. Revisions to the Supplementary and Short-Term Health Insurance Minimum Standards Model Act (#170) were adopted by the full NAIC membership at the 2019 Spring National Meeting. The Subcommittee has been meeting to consider revisions to Model #171 for consistency with the revised Model #170 since the 2019 Summer National Meeting discussion on comments received on Sections 1–5 of Model #171. In December 2019, the Subcommittee set a public comment period ending Feb. 7, 2020, to receive comments on Section 6 and Section 7 of Model #171. Due to the COVID-19 health emergency, the Subcommittee has not scheduled any meetings. Any future meetings will depend on when a new co-chair is appointed and the duration of the COVID-19 health emergency. As requested, the Subcommittee received comments from stakeholders on Section 6 and Section 7 of Model #171. A new Subcommittee co-chair has been appointed. The Subcommittee met June 7, 2021, to discuss the status of the proposed revisions to Model #171 and its next steps. The Subcommittee decided to establish a new public comment period ending July 2, 2021, to receive comments on Section 1 through Section 7 of Model #171. The Subcommittee met July 26 and July 12, 2021, to discuss revisions to Model #171 based on the comments received by the July 2, 2021, public comment deadline. The Subcommittee does not plan to meet at the Summer National Meeting. It plans to meet Aug. 9, 2021, to continue its discussion of possible revisions to Model #171.

Amendments to the Annuity Disclosure Model Regulation (#245)—The Executive (EX) Committee met June 19, 2017, and approved a Request for NAIC Model Law Development to amend Model #245. The amendments will revise Section 6—Standards for Illustrations. The purpose of the revision is to address issues identified by the Annuity Disclosure (A) Working Group of the Life Insurance and Annuities (A) Committee related to innovations in annuity products that are not addressed, or not addressed adequately, in the current standards. Revisions addressing participating income annuities were adopted by the Life Insurance and Annuities (A) Committee during its July 19, 2018, meeting and held pending the resolution of the Working Group’s discussions regarding illustrating indexes in existence for less than 10 years. The Working Group is no longer considering the index issue, and the 2018 revisions are being considered for adoption by the Executive (EX) Committee and Plenary at the Summer National Meeting.

Amendments to the Insurance Holding Company System Regulatory Act (#440) and the Insurance Holding Company System Model Regulation with Reporting Forms and Instructions (#450)—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #440 and Model #450 at the 2020 Summer National Meeting. The Receivership Law (E) Working Group met six times in 2020 and 2021 to develop revisions to Section 5 of Model #440 and Section 19 of Model #450 that address the issue of continuation of essential services by affiliates in receivership. The Working Group adopted the amendments following the exposure period ending April 9, 2021. The Receivership and Insolvency (E) Task Force adopted the amendments on May 20, 2021. The Financial Condition (E) Committee adopted the amendments on July 8, 2021.

Amendments to the Life Insurance Disclosure Model Regulation (#580)—The Executive (EX) Committee met June 19, 2017, and approved a Request for NAIC Model Law Development to incorporate a policy overview document requirement into Model #580 and the Life Insurance Illustrations Model Regulation (#582) in order to improve the understandability of the life insurance policy summary and narrative summary already required by Section 5A(2) of Model #580 and Section 7B of Model #582. While the Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee was originally planning to revise both Model #580 and Model #582, it will now revise only Model #580. The Working Group has been meeting to develop language to add a requirement for a one- to two-page consumer-oriented policy overview. The Working Group continued to make progress during meetings in late 2019 and early 2020, and it received an extension from the Life Insurance and Annuities (A) Committee at the 2021 Spring National Meeting to continue its work. The
Working Group completed alternative draft versions of model law revisions and a sample policy overview document for term life policies. One version shows the model and sample pre-underwriting, and the other shows the model and sample under existing model law timing requirements. The Working Group developed these alternative versions to aid the Committee in providing guidance to the Working Group with respect to the timing of the delivery of the policy overview document. Discussion of this issue is on the Committee’s agenda at the 2021 Summer National Meeting.

**Amendments to the Nonadmitted Insurance Model Act (#870)**—The Executive (EX) Committee approved a Request for NAIC Model Law Development for amendments to Model #870 at the 2021 Spring National Meeting. The amendments will modernize the model and bring it into alignment with the federal Nonadmitted and Reinsurance Reform Act. The Surplus Lines (C) Task Force met on Aug. 5, 2021, and appointed a drafting group to work on the revisions to Model #870.

**New Model: Pet Insurance Model Law**—The Executive (EX) Committee approved a Request for NAIC Model Law Development at the 2019 Summer National Meeting. The Pet Insurance (C) Working Group held numerous meetings to draft the model law to define a regulatory structure for pet insurance and address issues such as: producer licensing; policy terms; coverages; claims handling; premium taxes; disclosures; arbitration; and preexisting conditions. The Working Group adopted the Model Law on Aug. 4, 2021.

**New Model: Pharmacy Benefit Manager (PBM) Model Law**—The Executive (EX) Committee approved a Request for NAIC Model Law Development at the 2019 Summer National Meeting to draft a new model law addressing the licensure or registration of PBMs. The Pharmacy Benefit Manager Regulatory Issues (B) Subgroup of the Regulatory Framework (B) Task Force is drafting the model as a result of discussions that began during the Health Insurance and Managed Care (B) Committee’s work to revise the *Health Carrier Prescription Drug Benefit Management Model Act* (#22). Following the 2019 Summer National Meeting, the Working Group held several information-gathering sessions to assist it in working on its charge. The Working Group met in regulator-to-regulator session to discuss its next steps. The Working Group formed an ad hoc drafting group to develop an initial draft regulating PBMs. The Subgroup met July 16, 2020, to discuss a draft of establishing a PBM licensing requirement and other PBM provisions, including a gag clause provision. The Subgroup exposed the draft for a public comment period ending Sept. 1, 2020. The Subgroup discussed the comments received on the proposed new model during a series of meetings in September and October. The Subgroup adopted the proposed new model on Oct. 29, 2020, and forwarded it to the Regulatory Framework (B) Task Force for consideration of adoption. The Regulatory Framework (B) Task Force discussed the proposed new model during its Nov. 19, 2020, meeting. The Task Force deferred adopting the proposed new model and exposed it for an additional 30-day public comment period. The Task Force discussed the comments received on the proposed new model on March 1, 2021, and adopted it on March 18, 2021. The Health Insurance and Managed Care (B) Committee adopted the model law during its meeting on June 22, 2021. The Executive (EX) Committee and Plenary will consider adoption of the model law during the Summer National Meeting.
CLIMATE AND RESILIENCY (EX) TASK FORCE

Climate and Resiliency (EX) Task Force Aug. 15, 2021, Minutes

4-12
The Climate and Resiliency (EX) Task Force met in Columbus, OH, August 15, 2021. The following Task Force members participated: Ricardo Lara, Co-Chair, represented by Mike Peterson (CA); Raymond G. Farmer, Co-Chair, Michael Wise and Michelle Proctor (SC); Colin M. Hayashida, Co-Vice Chair (HI); James J. Donelon, Co-Vice Chair, and Warren Byrd (LA); Kathleen A. Birrane, Co-Vice Chair, and Kory Boone (MD); Mark Afable, Co-Vice Chair, (WI); Andrew R. Stolfi, Co-Vice Chair (OR); Lori K. Wing-Heier represented by Sarah Bailey (AK); Jim L. Ridling and Jimmy Gunn (AL); Michael Conway and Peg Brown (CO); Andrew N. Mais and George Bradner (CT); Karima M. Woods (DC); Trinidad Navarro (DE); David Altmaier and Susanne Murphy (FL); Gary D. Anderson (MA); Eric A. Cioppa and Robert Wake (ME); Anita G. Fox represented by Chad Arnold (MI); Grace Arnold (MN); Jon Godfread, John Arnold, and Chris Aufenthie (ND); Eric Dunning represented by Justin Schrader (NE); Russel Toal represented by Jennifer Catechis (NM); Barbara D. Richardson (NV); Linda A. Lacewell represented by My Chi To (NY); Judith L. French (OH); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer, Matthew Gendron, and Jack Broccoli (RI); Scott A. White, Rebecca Nichols and Don Beatty (VA); Michael S. Pieciak represented by Rosemary Raszka (VT); Mike Kreidler and Jay Bruns (WA); James A. Dodrill (WV); and Jeff Rude (WY). Also participating were: Kathy Schmidt and Barb Rankin (KS); Doug Ommen and Travis Grassel (IA); Glen Mulready (OK); Jim L. Ridling and Jimmy Gunn (AL); Michael Conway and Peg Brown (CO); Kathleen A. Birrane, Co-Vice Chair, and Kory Boone (MD); Mark Afable, Co-Vice Chair, (WI); Andrew R. Stolfi, Co-Vice Chair (OR); Lori K. Wing-Heier represented by Sarah Bailey (AK); Jim L. Ridling and Jimmy Gunn (AL); Michael Conway and Peg Brown (CO); Andrew N. Mais and George Bradner (CT); Karima M. Woods (DC); Trinidad Navarro (DE); David Altmaier and Susanne Murphy (FL); Gary D. Anderson (MA); Eric A. Cioppa and Robert Wake (ME); Anita G. Fox represented by Chad Arnold (MI); Grace Arnold (MN); Jon Godfread, John Arnold, and Chris Aufenthie (ND); Eric Dunning represented by Justin Schrader (NE); Russel Toal represented by Jennifer Catechis (NM); Barbara D. Richardson (NV); Linda A. Lacewell represented by My Chi To (NY); Judith L. French (OH); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer, Matthew Gendron, and Jack Broccoli (RI); Scott A. White, Rebecca Nichols and Don Beatty (VA); Michael S. Pieciak represented by Rosemary Raszka (VT); Mike Kreidler and Jay Bruns (WA); James A. Dodrill (WV); and Jeff Rude (WY). Also participating were: Kathy Schmidt and Barb Rankin (KS); Doug Ommen and Travis Grassel (IA); Mike Chaney (MS); Lisa Cota-Robles and David Bettencourt (NH); Glen Mulready (OK); Mark Worman and J'ne Byckovski (TX) and Tracy Klausmeier (UT).

1. Adopted its 2021 Spring National Meeting Minutes

Commissioner Altmaier made a motion, seconded by Commissioner Dodrill, to adopt the Task Force’s April 9, 2021, minutes (see NAIC Proceedings – Spring 2021, Climate and Resiliency (EX) Task Force). The motion passed unanimously.

2. Received Reports from its Workstreams

   a. Pre-Disaster Mitigation Workstream

Commissioner Afable said the Pre-Disaster Mitigation Workstream met May 12 to discuss its goals and deliverables. He said the first goal was to compile a list of mitigation actions. The list has been compiled using reputable sources, such as the Insurance Institute for Building & Home Safety (IBHS), the Federal Emergency Management Agency (FEMA), the National Institute of Building Sciences (NIBS), and state departments. The list of mitigation actions has been exposed for a public comment period, and the Workstream is gathering comments on the mitigation actions as well as input on risk-based factors for insurance coverage. The initial focus is on wind mitigation, and the list of actions will help with production of consumer education and outreach, working with community stakeholders.

Commissioner Afable said the NAIC’s Center for Insurance Policy and Research (CIPR) hosted a meeting for state departments in late July to facilitate discussion with Hagerty Consulting to explore the use of federal funding options for state resiliency projects. He said the Biden administration has increased funding levels for resiliency projects, raising the Building Resilient Infrastructure and Communities (BRIC) fund from $500 million to $1 billion for fiscal year 2021. President Joe Biden also announced that $3.46 billion in mitigation funding would be made available through the Hazard Mitigation Grant Program (HMGP). HMGP is available in 59 states, territories, and tribes following disaster declarations due to the COVID-19 pandemic. Additionally, the U.S. Senate recently approved a $1.2 trillion infrastructure package, which includes substantial funding for pre-disaster mitigation and flood mitigation assistance.

   b. Solvency Workstream

Commissioner Birrane said the Solvency Workstream is focused on the regulatory oversight of climate-related financial risks faced by U.S. insurers. Specifically, the Workstream will identify and recommend enhancements to existing financial surveillance and reporting tools, such as the Own Risk and Solvency Assessment (ORSA) and the Financial Condition Examiners Handbook (Handbook), to ensure that climate-related risks are appropriately addressed. She said the Workstream expects to deliver its recommendations to the Climate and Resiliency (EX) Task Force in the fourth quarter of this year. The recommendations will include proposed referrals to the substantive committees that oversee the content of the applicable tools. The Workstream held public meetings in May, June, and August. Each meeting consisted of presentations regarding critical foundational knowledge and context to guide its recommendations to the Task Force.
During its May 5 meeting, the Workstream provided a baseline of the state of climate-related financial surveillance by state insurance regulators and insurer responses. Deloitte provided a presentation on the evolution of regulator reaction to climate-related financial risks that insurers face. DLA Piper Global Law Firm provided an in-depth analysis of the history and current state of regulatory directives internationally. The Workstream also heard a presentation from FTI Consulting regarding insurer development of strategic and institutional responses to climate-related financial risks, as well as existing and anticipated governmental actions related to those risks. Furthermore, the Workstream held discussions with international organizations affecting the insurance sector, including the United Nations Environmental Programme’s (UNEP’s) finance initiatives, the UN Principles of Responsible Investment (PRI), and the Sustainable Insurance Forum (SIF).

During its June 1 meeting, the Workstream identified and defined the kinds of financial risk experienced by insurers and identified frameworks for evaluating and managing the risk. The Insurance Information Institute (III) described current industry practices for identifying risks, particularly related to physical risks in underwriting. AM Best and Moody’s described how they account for climate-related risks in their assessment of credit worthiness and the impact on corporate credit. They described frameworks developed to determine the economic impact of climate risks on insurers.

During its Aug. 6 meeting, the Workstream explored risks on both sides of the balance sheet, asset, and liability risks. It considered transition risk to investments, as well as underwriting and liability. The Workstream heard presentations from the UN-Convened Net Zero Asset Owner Alliance, Transamerica, Allstate, and the UNEP Principles for Sustainable Insurance (PSI). Each presenter had an opportunity to describe their recommendation for revisions to U.S. financial solvency tools concerning climate-related risks. The Asset Owner Alliance shared its member-driven approach to shifting investments to both mitigate transition risk and prove good corporate citizenship and environmental stewardship. Transamerica shared tools for measuring and quantifying climate-exposure risk for investment portfolios and addressed the systemic nature of climate-risks. Transamerica shared viewpoints on financial surveillance tools, such as the ORSA’s adaptability to address climate-related risk. PSI described its assessment frameworks for addressing physical, transition, and liability risks to insurers and its approach to portfolio assessment of such risks. Allstate described its coordinated top-down approach to integrating climate-related risk into its overall risk management strategy and demonstrated tracking of weather-related losses and the impact to underwriting.

Commissioner Birrane said the Workstream plans to meet on Sept. 20 to summarize the key takeaways from its earlier meetings, hear a presentation from the New York Department of Financial Services regarding its recently released guidelines and expectations for insurers related to climate risk, and hear a federal update. The Workstream will also invite comments regarding the need for enhancements to U.S. regulatory financial surveillance tools to better address climate-related risks and then shift its focus from information gathering to drafting its recommendations.

c. Climate Risk Disclosure Workstream

Commissioner Stolfi said the Climate Risk Disclosure Workstream met June 9 to hear a presentation from Morgan Stanley Capital International (MSCI) regarding environmental, social, and corporate governance (ESG) investment policies and climate solutions. The Workstream also reviewed comments received on its guiding questions to determine objectives of the NAIC Climate Risk Disclosure Survey. The Workstream then met in regulator-to-regulator session, pursuant to paragraph 8 (consideration of strategic planning issues) of the NAIC Policy on Open Meetings, to discuss comments received and prioritize the recommendations to be made by the Workstream. The Workstream determined that the purpose of the tool is to be a regulator resource to assess the risk management processes of insurers. It also determined that the results should continue to be publicly available, and the questions will be redesigned to align with the framework developed by the Financial Stability Board’s (FSB) Task Force on Climate-Related Financial Disclosures (TCFD). Commissioner Stolfi said a drafting group was formed including California, New York, Oregon, and Washington. A draft of the new survey will be exposed for a public comment period before a recommendation is made to the Climate and Resiliency (EX) Task Force.

Commissioner Stolfi said Gary Gensler (U.S. Securities and Exchange Commission—SEC) remarked in an online seminar that while it is good to learn from external standard-setters like the TCFD, he believes in moving forward with writing rules and establishing the appropriate climate-risk disclosure regime for U.S. markets. Commissioner Stolfi said Mr. Gensler also indicated that he asked the SEC to develop a mandatory climate risk disclosure proposal for the SEC’s consideration by the end of the year and consider metrics for specific industries, such as banking and insurance.

Commissioner Stolfi said the FSB is considering new metrics to capture quantitative information on climate risks. The FSB’s TCFD is on a timeline to submit recommended updates to the FSB by Sept. 15 and publish guidance and implementation guidelines with the new metrics in October 2021. He said 15 states are participating in the NAIC Climate Risk Disclosure Survey in 2021. Six states have been participating for several years: California, Connecticut, Minnesota, New Mexico, New
York, and Washington. Nine states were added in 2021: Delaware, District of Columbia, Maine, Massachusetts, Maryland, Oregon, Pennsylvania, Rhode Island, and Vermont.

d. **Innovation Workstream**

Commissioner Hayashida said the Innovation Workstream met May 10 to hear a presentation from the First Insurance Company of Hawaii regarding its parametric product FirstTrack. FirstTrack offers coverage for pre- and post-hurricane expenses like emergency supplies, groceries, debris removal, and minor repairs. The Workstream also met June 3 to hear a presentation from Jerry Skees (Global Parametrics). Mr. Skees described parametric products created for developing countries, including a risk pooling arrangement for 16 governmental organizations through the Caribbean Catastrophe Risk Insurance Facility Segregated Portfolio Company (CCRIF SPC) and the African Risk Capacity (ARC), a specialized agency of the African Union established to help African governments improve their capacity to plan, prepare and respond to extreme weather events. The Workstream also met July 21 to hear presentations from the Bermuda Monetary Authority (BMA), Nephila Capital, and Renaissance Re. The BMA described its supervisory approach, working with capital solution providers to tailor products for alternative capital climate risk solutions. Nephila Capital described products for agriculture, utilities, governments, and school districts. Renaissance Re described how basis risk (the risk of losses incurred being higher or lower than the actual payout) is reduced when parametric products are used for communities or businesses instead of individual insureds. It also shared the history of the market for parametric products in alternative capital markets. The MetroCat Catastrophe Bond for the New York City subway is triggered by coastal surge. The Penn Union Catastrophe Bond for Amtrak is triggered by tidal and wind measurements using U.S. Geological Survey (USGS) data. The Workstream will continue hearing from parametric solutions for climate-related risk and summarize the design features integrated to close coverage gaps from extreme weather events.

e. **Technology Workstream**

Commissioner Donelon said the Technology Workstream met May 7 to discuss the need for a referral to the Catastrophe Insurance (C) Working Group to consider revisions to the Catastrophe Computer Modeling Handbook (Catastrophe Handbook). The Catastrophe Handbook was developed in 2010 to explore the use of catastrophe models and discuss issues arising from their use. The Workstream discussed the need for updates to include more perils and future looking climate models. The referral was delivered to the Catastrophe Insurance (C) Working Group and discussed during its public meeting on July 22. The Technology Workstream also met June 7 and Aug. 6 in regulator-to-regulator session, pursuant paragraph 6 (technical guidance from NAIC staff) of the NAIC Policy Statement on Open Meetings, to hear about the Center for Insurance Policy and Research (CIPR) study of wildfire risk in California, Colorado, and Washington in conjunction with the Risk Management Agency (RMA), as well as to discuss the wildfire model review taking place under the Catastrophe Risk (E) Subgroup.

3. **Heard a Presentation on the California Department of Insurance Climate Working Group Recommendations Report**

Mr. Peterson said Senate Bill 30, passed by the legislature and signed by the California Governor in September 2018, required the California Insurance Commissioner to convene a working group to identify, assess, and recommend risk transfer market mechanisms that, among other things, promote investment in natural infrastructure to reduce the risks of climate change related to catastrophic events, create incentives for investment in natural infrastructure to reduce risks to communities, and provide mitigation incentives for private investment in natural lands to lessen exposure and reduce climate. The California Climate Insurance Working Group is comprised of 18 members, including the Natural Resource Defense Council (NRDC), The Greenlining Institute, the Environmental Defense Fund (EDF), The Nature Conservancy, the Audobon Society, Los Angeles County, Swiss Re, and Munich Re. The Working Group developed a report, Protecting Communities, Preserving Nature and Building Resiliency, which shows that the best long-term strategy is to drastically reduce greenhouse gas emissions. Mr. Peterson said the report includes impacts from extreme heat, wildfire, and flood—the most pressing perils affecting California right now. The report stresses community resilience, especially for the most vulnerable communities. Mr. Peterson said without greater investment in risk reduction and improved tools for financial resilience, communities are likely to enter a damaging feedback loop where escalating risks lead to increased losses, financial consequences, fewer insurance options, and a diminishing capacity for future resilience. The report recommends improved hazard mapping and disclosures, land and building codes, closing the protection gap, nature-based solutions, and innovation with mitigation.

Alice Hill (Council on Foreign Relations—CFR), chair of the Working Group, said insurance gaps are not only seen in developing economies, coverage gaps exist in California and states across the U.S. Construction standards through building codes and retrofitting properties improve resilience.

Raghavreer Vinukollu (Munich Re) said the report explores combining risk reduction with risk transfer, promoting policy development that recognizes nature-based solutions, and making insurance more affordable and recovery faster.
Katelyn Roedner Sutter (Environmental Defense Fund—EDF) said California is experiencing extreme drought and heat. People with lower incomes, older adults, and people with chronic health conditions are more vulnerable to suffering the effects. Nature-based solutions such as investments in wetlands, urban forests, and ecological forest strategies can reduce damages to health and infrastructure. The EDF has been working to design environmental impact bonds and other market-based financing concepts for investing in wetlands along the coast of the Gulf of Mexico. The Restoration Insurance Services Company (RISCO), with funding by Climate Finance Lab, uses insurance and blue carbon as revenue streams to protect and restore mangroves that reduce flood risk. The Working Group report includes the following nature-based solutions: prioritizing nature-based solutions in city planning, initiating pilot projects on nature-based insurance solutions, linking business investments to nature-based solutions to support resilience, and coordinating with state and federal agencies to develop strategies promoting urban greening, prescribed burning, and sand dune restoration. Engaging local communities and educating residents is critical to the success of these projects. Ms. Sutter said it is important for insurers to get involved and find ways to incentivize risk reduction and resilience.

Serena Sowers (Swiss Re) said the Working Group made recommendations to rank and name heat waves to better communicate the deadly risks to consumers, help communities prepare, and create pilot projects for extreme heat. Ms. Sowers said many of the recommendations are general and adaptable and could apply to all states and multiple climate perils.

4. Heard a Presentation from the RAA on its Resiliency Mapping Tool and Analysis

Dennis Burke (Reinsurance Association of America—RAA) said the RAA is an advocate for using data to identify and communicate risk and plan for mitigation. FEMA published the National Risk Index (NRI) data in late 2020 to help identify communities most at risk to natural hazards. FEMA evaluated natural hazards of 18 perils and combined risk assessment data with social vulnerability and community resilience metrics. Mr. Burke said Scott Williamson (RAA) combined FEMA’s NRI data with U.S. Census Bureau data to analyze the economic impact of perils in each state and identify disaster-prone communities that lack the resources to recover from disasters without state or federal assistance. Many disaster-prone communities lack the ability to use federal funding due to the cost-share provisions and FEMA disaster co-payments required. The RAA’s tool helps identify resource-constrained communities that would benefit from additional legislative provisions to improve their resiliency. Mr. Burke said President Biden’s proposed infrastructure bill includes funding that could be combined with public and private funding to address the needs of these communities which the RAA has termed Community Disaster Resilience Zones (CDRZ). While not formally defined, CDRZ are the most socially and economically at-risk populations of the U.S. The tool could be used by state departments to conduct benefit-cost analysis necessary for federal grant applications because the underlying data was provided by FEMA.

The RAA is promoting the CDRZ Act to improve America’s infrastructure, focusing on public and private infrastructure funding to protect America’s communities from the increasing threat of natural disasters. The RAA is advocating for direct pay bonds such as Build America Bonds (BABs), private activity bonds, transferrable tax credits for community-level projects and individual homeowner retrofits, and corporate and individual charitable contribution tax credits. Finally, the RAA is advocating to waive the required matching funds for FEMA’s BRIC fund due to resource constraints for many communities most in need of the support. The RAA welcomes the support of the NAIC and state insurance regulators in advocating for legislation to improve the resilience of America’s communities.

Having no further business, the Climate and Resiliency (EX) Task Force adjourned.
GOVERNMENT RELATIONS (EX) LEADERSHIP COUNCIL

The Government Relations (EX) Leadership Council did not meet at the Summer National Meeting.
INNOVATION AND TECHNOLOGY (EX) TASK FORCE

Innovation and Technology (EX) Task Force Aug. 14, 2021, Minutes........................................................................................................4-18
   Big Data and Artificial Intelligence (EX) Working Group July 9, 2021, Minutes (Attachment One) .................................4-26
   Speed to Market (EX) Working Group June 30 and June 29, 2021, Minutes (Attachment Two) ...............................4-29
   E-Commerce (EX) Working Group June 30, 2021, Minutes (Attachment Three).........................................................4-34
The Innovation and Technology (EX) Task Force met in Columbus, OH, Aug. 14, 2021. The following Task Force members participated: Jon Godfread, Chair, and Chris Aufenthie (ND); Elizabeth Kelleher Dwyer, Vice Chair, and Matt Gendron (RI); Lori K. Wing-Heier represented by Sarah Bailey (AK); Jim L. Ridling (AL); Alan McClain (AR); Evan G. Daniels (AZ); Ricardo Lara represented by Lucy Jabourian (CA); Michael Conway and Peg Brown (CO); Andrew N. Mais and George Bradner (CT); Karima M. Woods (DC); Trinidad Navarro (DE); David Altmairer represented by John Reilly (FL); Colin M. Hayashida (HI); Doug Ommen and Johanna Nagel (IA); Dean L. Cameron (ID); Dana Popish Severinghaus represented by C.J. Metcalf (IL); Vicki Schmidt (KS); Sharon P. Clark represented by Rob Roberts (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Eric A. Cioppa (ME); Anita G. Fox represented by Chlora Lindley-Myers represented by Cynthia Amann (MO); Mike Chaney (MS); Troy Downing (MT); Mike Causey represented by Tracy Beihn (NC); Eric Dunning (NE); Chris Nicolopoulos represented by David Bettencourt (NH); Russell Toal (NM); Barbara D. Richardson (NV); Judith L. French (OH); Glen Mulready (OK); Andrew R. Stolfi and TK Keen (OR); Jessica K. Altman and Michael McKenney (PA); Raymond G Farmer (SC); Larry D. Deiter (SD); Carter Lawrence (TN); Doug Slape (TX); Jonathan T. Pike and Tanji J. Northrup (UT); Scott A. White represented by Eric Lowe and Rebecca Nichols (VA); Michael S. Pieciak represented by Chris Rouleau (VT); Mike Kreidler and Molly Nollette (WA); Mark Aafable and Nathan Houdek (WI); and James A. Dodrill represented by Joylynn Fix (WV).

1. **Adopted its Spring National Meeting Minutes**

Superintendent Toal made a motion, seconded by Ms. Biehn, to adopt the Task Force’s April 9 minutes (see NAIC Proceedings – Spring 2021, Innovation and Technology (EX) Task Force) with one revision to add Connecticut to the list of states on page 1 participating in the artificial intelligence (AI)/machine learning (ML) survey drafting group. The motion passed unanimously.

2. **Adopted its Working Group Reports**

   a. **Big Data and Artificial Intelligence (EX) Working Group**

   Commissioner Ommen gave the report of the Big Data and Artificial Intelligence (EX) Working Group. He said the Working Group met July 9 and discussed a draft survey to conduct analysis on private passenger automobile (PPA) insurers’ use and governance of big data, as used in an AI and ML system. He said as part of that discussion, the Working Group received comments from Working Group members and interested parties. He reviewed the components of the survey and noted that it is being conducted under the examination authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin and is being sent to insurers writing PPA insurance in at least one of these nine states. He reviewed the timeline, including completing the work by the NAIC Fall National Meeting and what content is and will be available on the associated web page, and he reminded the Task Force members that the Working Group will likely expand the survey work to other lines of insurance in the future.

   b. **Speed to Market (EX) Working Group**

   Ms. Nichols gave the report of the Speed to Market (EX) Working Group. She said the Working Group met June 30 and June 29 and took the following action: 1) adopted its March 10 minutes; and 2) heard an update from the Information Technology Group (ITG). She said part of that update included discussion regarding the low adoption rate for changes to the Product Coding Matrix (PCM) over the last couple of years and the reason why. She said the requests for changes are more specific to a particular state, so solutions for those states are usually provided using filing labels when needed, rather than creating new categories that would not apply to most states. Ms. Nichols said the ITG update also explained that when the System for Electronic Rate and Form Filing (SERFF) redesign begins, the intent is to have one set of types of insurance (TOIs), sub-TOIs, and filing types; but submission requirements that vary for states would be reflected. She said states are encouraged to be sure to respond to any correspondence received regarding the PCM, so that a clear understanding of their needs can be documented and accounted for in the redesign. She reviewed other suggestions that the Working Group members chose not to adopt and the reasons why. The details are documented in the minutes from the meeting.
c. E-Commerce (EX) Working Group

Commissioner Birrane gave the report of the E-Commerce (EX) Working Group. She said the Working Group met June 30 and took the following action: 1) discussed the establishment of the Working Group and the background that led to its formation; 2) reviewed the Working Group’s 2021 charges; and 3) began outlining and discussing the work to be accomplished. She said the Working Group discussed and agreed that understanding the current legal landscape and identifying any key legislation should come first, and the first step in that process is to examine the states’ adoption of the Uniform Electronic Transactions Act (UETA) and review any gaps there may be or exceptions they may have in place. She said to do so, the Working Group discussed surveying the states in this regard and asking what laws, rules, regulations, and bulletins were put in place during the pandemic that temporarily suspended or waived state law by allowing for the electronic exchange of information. She said the Working Group also anticipates asking the states of those provisions that were put in place which ones remain, which ones have expired or been rescinded, and for an explanation as to why the state took the action it did.

Commissioner Birrane said the Working Group learned through this discussion that some states have already started this process on their own, and they would be willing to share their results, which will serve as a good starting point for the Working Group. She said the Working Group also discussed what type of deliverable its work will result in, and the options of both a model bulletin and a white paper were explored; however, before the Working Group can decide on how best to move forward in this regard, the Working Group is now focused on gathering this information from the states then determining how best to move forward, as well as what the timeframe for a deliverable may be. She said the Working Group intends to meet in September 2021 to continue its work.

Commissioner Godfread asked if there were any questions regarding any of the working group reports. Hearing none, Superintendent Dwyer made a motion, seconded by Commissioner Mulready, to adopt the following reports: 1) the Big Data and Artificial Intelligence (EX) Working Group, including its July 9 minutes (Attachment One); 2) the Speed to Market (EX) Working Group, including its June 30 and June 29 minutes (Attachment Two); and 3) the E-Commerce (EX) Working Group, including its June 30 minutes (Attachment Three). The motion passed unanimously.

3. Received an Update on NAIC Cybersecurity Workstreams and Priority

Commissioner Godfread said one of the charges to the Task Force is to serve as a coordinating body for workstreams related to cybersecurity. He said the workstreams currently being tracked total 12 and include work being done related to tracking the Insurance Data Security Model Law (#668), updating NAIC handbooks, working with industry on tabletop exercises and incident response, international work, and domestic work related to data privacy and the cybersecurity insurance market. He said Model #668 has been adopted by 18 states who have either already implemented it or are in the process of doing so, and two more states have action under consideration.

Commissioner Godfread said tools associated with the Financial Condition Examiners Handbook continue to be updated, and in 2021, the Information Technology (IT) Examination (E) Working Group is developing new guidance and procedures for state insurance regulators to use in evaluating an insurer’s response to vulnerabilities. The Market Regulation Handbook, providing guidance and checklists, was updated in 2019.

Commissioner Godfread said while cybersecurity tabletop exercises experienced a bit of a slowdown because of COVID-19, they are getting rolling again, and Connecticut will be hosting one in November 2021. He said the Center for Insurance Policy and Research (CIPR) developed a survey related to insurer cybersecurity preparedness, and it was implemented in Connecticut and will help inform the tabletop. He said due to the rise in ransomware events, that tabletop will focus on that issue. He said through tabletops and work with the Financial and Banking Information Infrastructure Committee (FBII) and others, incident best practices guidelines are being developed, and NAIC staff have already collected best practices from the U.S. Securities and Exchange Commission (SEC), the Commodity Futures Trading Commission (CFTC), the FBIIC, and state insurance departments to see where updates to the Market Regulation Handbook and the Financial Condition Examiners Handbook might be helpful.

Director Farmer noted the importance of getting Model #668 passed in each of the states. He said getting back to the tabletop exercises, he would encourage each state to consider doing a tabletop exercise, and he said the NAIC has participated with the U.S. Department of the Treasury (Treasury Department) on two tabletop exercises, including one in South Carolina in 2019 that was extremely helpful to its local industry. He said that template is now available to other states to use to host their own.
Commissioner Godfread asked Commissioner Mais if other states could join the Connecticut tabletop to observe. Commissioner Mais said yes, and all state insurance regulators are welcome to participate. He said that should be relatively easy to do since it will be virtual.

Commissioner Godfread said regarding the cybersecurity insurance market, the NAIC began capturing data from insurers via the Cybersecurity Annual Statement Supplement back in 2018, and each year produces a report based on that data and includes data collected from the surplus lines market. He said that work is under the purview of the Property and Casualty Insurance (C) Committee and will be discussed during a cybersecurity “mini-series” session at the NAIC’s September Hybrid Insurance Summit: Part 2, and there will be two other cybersecurity sessions that will be part of that series.

Commissioner Godfread said the Task Force members would hear an update later in the agenda related to the Privacy Protections (D) Working Group, and he said state insurance regulators, through the NAIC, are also tracking closely with international colleagues on cyber issues, including work with the European Union (EU), European Insurance and Occupational Pensions Authority (EIOPA), and the International Association of Insurance Supervisors (IAIS) Operational Resilience Task Force (ORTF). He said the ORTF is working on gathering existing materials that will inform a paper on how standard setters and jurisdictional supervisors are approaching risks associated with operational resilience for IT third-party outsourcing, cyber risk, and related lessons learned from the COVID-19 pandemic on business continuity planning over the long term, and that paper is scheduled for public consultation in the second quarter of 2022.

Commissioner Godfread said the NAIC continues to stay diligent in terms of internal cybersecurity and data security, privacy and field work on the first cloud System and Organization Controls (SOC) 2 review has been completed, and follow-up work is underway. He said the NAIC maintains a security posture communication using the Shared Information Gathering (SIG) questionnaire.

4. Discussed Consumer Data Ownership Issues and Potential Guidance

Superintendent Dwyer reviewed the presentations received by the Task Force during the Spring National Meeting from Daniel Demetri, the founder and chief executive officer (CEO) of Trellis Connect, and Ali Safavi, the co-founder and CEO of Vero. She said Trellis Connect helps consumers navigate insurance as they move online using apps to allow their information to be shared with the advisor app they have selected and provides consumers the ability to rely on and share data, allowing them to share their insurance information for many different purposes. She said Mr. Demetri suggested that state insurance regulators should determine what the parameters around this should be and what rights consumers should have to their insurance data in terms of who owns it and how they can access it. She said he also noted that many insurers elect to block consumer access for security or competitive purposes, and he urged state insurance regulators to consider what the data access rights are in each of our states and how they translate to the online environment.

Superintendent Dwyer noted these as examples of begging the question of how to address the questions of who owns consumer data and who owns access to consumer data. She said the Privacy Protections (D) Working Group is investigating consumer rights, so that may be where this matter should be addressed, possibly in its Privacy Policy Statement.

In addition, Superintendent Dwyer said there is the question of what rights independent agents have compared to what they consider to be data that belongs to them regarding their customer’s data and access to that data, particularly if they are to assist their customer/policyholder in determining the best and appropriate coverages or products to consider. She said these are not the only scenarios under the heading of “consumer data ownership and access,” and she asked if there truly are significant security issues with allowing a consumer to give their credentials to a third party to offer services to them and analyze information on their behalf. She asked what the other scenarios are regarding ownership and access to this data.

Superintendent Dwyer noted this seems like an area to dig into. She said questions should be asked like whether consumers should be able to allow access to that information to a third party, who “owns” the data, and what the associated risks might be.
Superintendent Dwyer said the question to the members of the Task Force is whether it should take this on and if so, what the best approach is. She asked if the best approach is to study it more at the Task Force level or refer it to another committee. She said it makes sense to coordinate with the Working Group, but she would like to hear what the will of the Task Force members is.

Commissioner Godfread said when North Dakota picked up this issue, he was interested to learn that it was not so much about who owned the data as much as it was about how and what format a consumer could get it if requested. He said the consumer may ask for it digitally, but the insurer gets to decide how the data gets transmitted. He said that was a bit troubling to him. He said their work in this area was met with heavy resistance, and understandably so, as it is a new issue; and everyone is still working through it and associated security issues, but it is a solvable problem, as the banking industry seems to have done so, as there are a number of different applications that can analyze multiple accounts that include consumers giving credentials to a third party in order to see the full picture. He said some antiquated laws potentially need to be reviewed in this area, and that is the kind of thing the Task Force looks at.

Ms. Amann said this is becoming an underlying issue that the Working Group is identifying in consumer rights that it is trying to address. She said if given the direction from the Market Regulation and Consumer Affairs (D) Committee, this could be an issue that the Working Group could take on. She said the Working Group is starting to see more issues around health apps where a consumer may want to share information from multiple online sources, allowing it to analyze the data in aggregate, but there is no accountability regarding the advice given based on that data. She said the app could tell someone to do something that may not be appropriate. She said there seems to be no regulatory authority to oversee this area, but the Working Group is starting to work on recommendations regarding where states might improve their laws and regulations.

Commissioner Lawrence noted that data ownership issues are a large macro issue when considering a look across all parts of our society, and this topic is worthy of taking up for review.

Director Daniels asked for clarification regarding what the deliverable might be in addition to continuing the work that is already underway in the Working Group, asking if it would be a model law, guidance, or something else. He said it would be helpful to understand the scope of that work.

Commissioner Godfread said he really does not know just yet, and it is a matter of looking to see where the gaps are and then seeing what the best way would be to address it. He said he does not prefer the model law approach generally, because that can be difficult to get adopted everywhere. He said with some of these issues, bringing it to light helps to sometimes start the process of getting the issue solved. He said every state should look where their laws are and where they might be causing an impediment, but at this point, everything is on the table. He said in North Dakota, antiquated laws likely need to be updated. Superintendent Dw yer said she does not think it would be good to start with a specific direction, and she suggested that the first step is to determine the status and get an overall understanding of laws that currently exist. She said they likely exist regarding the agents versus the companies, but no one has moved forward on these in a long time, so step one is to do the research, see where they stand, and then decide the best approach.

Ms. Amann said the Working Group has reviewed the NAIC Insurance Information and Privacy Protection Model Act (#670) and the Privacy of Consumer Financial and Health Information Regulation (#672), and she redlined edits to make it more technologically correct, made some other recommended changes, and did a gap analysis to the other data privacy laws in place today, such as the General Data Protection Regulation (GDPR), the Gramm-Leach-Bliley Act (GLBA), the California Consumer Privacy Act (CCPA), the Fair Credit Reporting Act (FCRA), Virginia and Colorado’s laws, and others. She said after all of that they have concluded they need to either draft a new model law or go back to Model #672 and make updates to it, which would likely be a complete rewrite.

Commissioner Godfread asked that work be distributed to the Task Force members. Commissioner Birrane noted support for this as well and pointed out that data ownership, use, and access is often one of the most complicated contract negotiations with third parties regarding consumer facing apps. She said it is important to determine what pieces of this, within what context, are being taken up at what point in time. Mr. McKenney said he would encourage whatever group that looks at this to also consider the tying of eligibility to use of a third-party app because that is a part of this conversation as well. Superintendent Toal echoed Commissioner Godfread’s comment about preferring not to take the approach of drafting a model law, and he said he believes this would be better done through regulation.

Angela Gleason (American Property Casualty Insurance Association—APCIA) said the proprietary nature of the information and the associated data security and privacy issues are critical. She said the Working Group has already started this conversation and is looking at gaps, but there are definitely issues in the privacy and cyber world, and choosing the format for transmitting
data to a consumer can pose significant challenges for data security in terms of how to ensure systems can accommodate that and protect the data at the same time. She said these are important and complex issues.

Birny Birnbaum (Center for Economic Justice—CEJ) said before selecting tools, it is important to examine the values they will need to represent. He said along those lines, he would suggest characterizing this slightly different from data ownership and characterize it as defining what consumer-generated data an insurance or producer collects, for what purpose, how it is used, what access a consumer has to their data, and how a consumer can take their data from one vendor to another. He said he concurred with focusing on data ownership and several of the issues raised about existing laws, but stating what data is being collected from consumers, what it can be sued for, and how it must be made available to a consumer is a more straightforward approach as opposed to just addressing it as issues of ownership. He said that is really a proxy for all the other issues that might be better addressed more directly.

Chris Petersen (Arbor Strategies LLC), speaking on behalf of a collation of health insurers, said the group should consider state laws that have data retention requirements during which the data are not portable, as it must be kept by the insurer, as required by state law, and consider the Health Information Portability and Accountability Act of 1996 (HIPAA) that has severe restrictions on what health insurers can and cannot do. He said that law preempts state laws that have less favorable privacy protections. He said because of these other laws being in place, including the GLBA, the portability issue is different in health insurance than the tech company arena.

Following discussion of the topic, Commissioner Godfread asked the Task Force members if it would make sense to refer this item to the Committee to consider and possibly add it to the charges of the Working Group. Hearing no objection from the Task Force members, he said it would be referred to the Committee.

5. Heard Updates from Other Committees and Working Groups on Related Activities

Commissioner Godfread asked representatives from other committees whose charges involve related workstreams to those the Task Force is addressing to provide updates.

a. Special (EX) Committee on Race and Insurance

Commissioner Mais said there are several charges under the Special (EX) Committee on Race and Insurance that relate closely to what the Task Force is working on, and it will be paramount to communicate and engage with one another as these workstreams develop. He said the charges for the Special Committee specifically note that it should coordinate with groups such as the Big Data and Artificial Intelligence (EX) Working Group and encourage groups to continue their work on issues that affect people of color and historically underrepresented groups, particularly in predictive modeling, price algorithms, and AI. He said Charge F spreads across the lines of business and calls for continuing research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. He said a subset of Charge F, F2 is specific to Workstream Three and calls for the development of analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance.

Commissioner Mais said the Special Committee and its workstreams will look to define those terms, but as it turns to developing analytical and regulatory tools, ensuring that the line of business workstreams are communicating and working closely with the Task Force and groups like the Accelerated Underwriting (A) Working Group who have researched these sorts of tools already will be imperative.

Commissioner Mais said with the adoption of charges, the workstreams will look to create workplans to develop priorities and timelines and ensure continued communication with the Task Force.

b. Accelerated Underwriting (A) Working Group

Commissioner Arnold said she is the vice chair of the Accelerated Underwriting (A) Working Group and the chair of an informal state insurance regulator drafting group that is drafting the educational report that is the Working Group’s work product. She said the drafting group is made up of state insurance regulators from approximately six states and has been meeting on a weekly basis.

Commissioner Arnold said to date, two parts of what is intended to be a five-part paper have been exposed for comment. She said the Working Group have employed an iterative process and been drafting and releasing sections of the draft for comment...
as the drafting group finishes them, and comments on the entire draft are welcome with each release of a new part. She said the drafting group intends to collect and review comments throughout the process, and it anticipates revisions to earlier sections as new sections are developed.

Commissioner Arnold highlighted some of the issues and feedback encountered so far, including:

- Receiving quite a few comments on the definition of accelerated underwriting after the release of the first part of the paper.
- Spending a lot of time on the definition and considering definitions from a number of sources, in addition to the comments.
- Concluding that the definition proposed for use in the educational paper was largely in the middle of all the options offered and deciding not to make any changes at this point.

Commissioner Arnold said the drafting group acknowledges that once the rest of the paper is drafted, there may be a need to reconsider the definition, and consideration of the issue of tone needs to be discussed. She said the drafting group tried to keep the tone of the paper neutral, but during presentations, the Working Group heard a lot about the advantages and disadvantages of accelerated underwriting. She said the drafting group tried to stay away from that in the report and stay focused on what accelerated underwriting is, what accelerated underwriting does, and what the regulatory structure is or should be in the context of current laws.

Commissioner Arnold said the matter of a glossary was also discussed, and the Working Group received several suggestions to create one but decided not to at this point for a few reasons, but largely because some terms are defined differently in different contexts and in different states.

Commissioner Arnold said another issue is ensuring the educational report builds on existing NAIC work products and the drafting group has tried to use terminology that builds on and is consistent with other NAIC documents, like the AI Principles and the Casualty Actuarial and Statistical (C) Task Force white paper. She said the drafting group specifically requests comments on the parts of the paper addressing, from a legal and practical perspective, the data used in accelerated underwriting programs and feedback on how the paper might achieve clarity describing the kinds of data being used, whether data sources or the scores that come from the sources, what those terms mean, what kinds of obligations flow from them, and what a consumer sees or should see.

Lastly, Commissioner Arnold said another area where the drafting group is requesting feedback are the sections discussing the distinctions between the types of data, including data covered under the FCRA, and what that means for state insurance regulators, companies, and consumers.

c. Property and Casualty Insurance (C) Committee

Commissioner Schmidt said one of the main issues relevant to the Task Force that the Property and Casualty Insurance (C) Committee is working on is cybersecurity. She said the charge to study the cyberinsurance market and report on cyberinsurance data collected in the Annual Statement moved from the Task Force to the Committee this year, and the Committee will be hearing a report on the cyberinsurance data and a later update once the alien surplus lines data has been reviewed.

Commissioner Schmidt said there will be several sessions dealing with various aspects of cyber risk, security, and insurance in September at the NAIC Insurance Summit. She said another topic the Committee and the Task Force should be sure to communicate on relates to parametric insurance. She said the Climate and Resiliency (EX) Task Force has received several presentations related to parametric products and has more scheduled in the future. She said the Committee’s interest in this topic goes beyond the focus of either the Climate and Resiliency (EX) Task Force, which would focus on covering specific coverage gaps, and the Innovation and Technology (EX) Task Force, which would probably be focused more on data and technology. She said it might make sense for the Committee to take a broad look at parametric insurance and produce some type of work product related to that type of innovative product.

d. Privacy Protections (D) Working Group

Ms. Amann said the Privacy Protections (D) Working Group reviewed the 2021 NAIC member-adopted strategy for consumer data privacy protections and discussed the 2020 Fall National Meeting verbal gap analysis of consumer issues. She said it also discussed the draft of the initial privacy policy statement. She reviewed the six areas covered by the policy statement and said the Working Group requested comments in the form of parameters and examples on the initial privacy policy statement for
discussion during the Working Group meeting. She said this issue of consumer data ownership may possibly be a seventh, but it also underlies the others. She said during the June meeting of the Working Group, it discussed the initial draft of the privacy policy statement and requested comments in the form of parameters and examples on the initial privacy policy statement. She said the Working Group is also talking about how far the reach of this will be regarding whether it will pertain to a vendor, supply chain or third parties such as third-party administrators (TPAs), adjusters, and others.

Ms. Amann said the Privacy Policy Statement template is on the Working Group’s website and is being combined with comment received into a draft for exposure and accelerated review by the Working Group.

Harry Ting (Consumer Advocate Volunteer) said another privacy issue, somewhat peripheral but relevant for consumers, is research that indicates in some cases, sales of health insurance plans online involve using outside entities to collect data to market health plans and collecting private information the entity is later selling to other entities; in most cases, they are not insurance entities. He said this involves quite a bit of personal contact and health status information. He said that seems to be a privacy issue that should be addressed somewhere within the NAIC.

6. Received NAIC Reports on the Model Review Process and International Initiatives Relative to AI and Big Data

a. Received the NAIC Report on the Model Review Process

Kris DeFrain (NAIC) said the NAIC model review project officially began in April 2018 when the Executive (EX) Committee adopted the recommendation of the Big Data (EX) Working Group to “conduct research on the appropriate skills and potential number of resources for the organization to help NAIC members in coordinating their reviews of predictive models.” She said NAIC senior management conducted the research and recommended gradual build-up of expertise at the NAIC to aid state insurance regulators’ review of P/C rate models. She said in 2019, with existing actuarial, legal, and IT staff, the NAIC did three things:

- Drafted a contractual agreement called the Rate Review Support Services Agreement to be used so a state can gain access to the shared model database and request a rate model technical review from the NAIC.
- Developed the initial NAIC rate model technical review process with a consulting actuary.
- Created a shared model database for confidential regulatory communication.

Ms. DeFrain said as of today, there are 31 states who have a Rate Review Support Services Agreement with the NAIC, and the NAIC has worked with 10 of the 31 states to produce 60 NAIC reports. She said most of the rate models reviewed have been the most common type of model, a generalized linear model (GLM). She said the GLM reviews are aligned with the Casualty Actuarial and Statistical (C) Task Force’s white paper on the Regulatory Review of Predictive Models. She said other types of models have also been reviewed, adapting the white paper recommendations to fit the different models. She said the Task Force was asked to consider reviewing the approaches on these other types of models and offer guidance regarding the technical review reports to ensure that they help state insurance regulators.

Ms. DeFrain said as the database of model reviews at the NAIC grows, it is expected that there will be an expanding number of second state requests, or requests for review of a company’s model the NAIC has already reviewed for another state. She said there is a substantive amount of analysis required to compare the models between the states and track the NAIC-identified issues to objections to state approval or disapproval and sometimes to company withdrawal. She said the NAIC will assist the second and subsequent states to use the first state’s NAIC technical review and determine its next steps to take with its filing, and that may mean that sometimes the second state is satisfied with the objections and answers from the first state filing, yet other times that might mean the second state wants to pursue a different course of action. She said that may increase speed to market in the second and subsequent states.

Ms. DeFrain pointed out that the group continues to abide by the principles created by the Working Group, and the NAIC does not:

- Assume any regulatory authority.
- Create objections to be sent to the company.
- Recommend acceptance or rejection of the model or any specific rating variable.
- Do separate modeling to determine any correlation with unlawful characteristics or assess disparate impact.

Ms. DeFrain said the NAIC approved the addition of two new actuaries to join the rate review team, while simultaneously eliminating the assistance of the part-time consultant.
b. Received an Update on International Initiatives Relative to AI and Big Data

Ryan Workman (NAIC) provided a briefing on international initiatives relative to AI and Big Data. He said these initiatives are relevant for the Task Force to track and monitor. He said the IAIS FinTech Forum is currently focusing on AI, ML, and data analytics, application programming interfaces (APIs), open data, and distributed ledger technologies (DLTs). He said at the end of 2020, the FinTech Forum set up individual subgroups to consider each of these applications, respectively, and Commissioner Godfread represents the NAIC as a member of the FinTech Forum and the subgroup on AI and ML.

Mr. Workman also discussed the work on big data/AI of the U.S. EU Insurance Dialogue Project. He said the U.S. EU Insurance Dialogue Project started in 2012, when the NAIC, the Federal Insurance Office (FIO), the European Commission (EC), and the EIOPA agreed to participate in a deeper dialogue project with the objective of enhancing the mutual understanding and cooperation between the EU and the U.S. for the benefit of insurance consumers, business opportunity, and effective supervision. He said as part of this project and for the last few years, there has been a working group on big data and AI, which included NAIC staff and state insurance regulators from the U.S., along with federal and European counterparts. He said the Working Group has:

- Focused on aspects of the relationship between innovation, technology, and insurance, specifically: 1) the increased use of big data by insurers; and 2) the use of advanced data analytics in the insurance sector.
- Published a paper in 2018 providing the reader with a better understanding of what data is collected, how data is collected, data portability, data quality, and how data is made available and used by both insurers and third parties.
- Focused, in 2019, on regulatory oversight of insurers’ use of third-party vendors, the ability of insurance supervisors to monitor new vendors operating in the insurance marketplace, disclosures to applicants and policyholders about how rating factors and third-party vendor data are being used, and insurers’ use of AI models that increasingly rely on the use of big data.
- Provided a summary of this work in a February 2020 paper that is available on the NAIC website under EU-U.S. Insurance Dialogue Project.
- Worked on another published report providing a summary of the Big Data and Artificial Intelligence (EX) Working Group exchanges of supervisory experiences and regulatory environments since publication of the February 2020 paper in October 2021. He said this report will include: 1) further development of AI principles in the U.S. and EU, respectively, including ethical aspects; 2) regulatory review of predictive models, including but not limited to, assessing transparency and explainability issues arising from the use of AI, including ML algorithms; 3) industry use of big data for fraud detection and claims settlement; and 4) new developments on third-party vendors and consumer disclosure issues since the discussions in 2019.

Mr. Workman said the U.S. EU Insurance Dialogue Project will host a public virtual webinar Oct. 19 on its continued progress and future priorities, and representatives of the NAIC, including Commissioner Birrane and Commissioner Ommen; the FIO; and the EIOPA, will lead the webinar.

7. Discussed Other Matters

Commissioner Godfread discussed the conversation that NAIC members have had concerning the creation of a new letter committee dedicated to Innovation, Technology, and Cybersecurity. He said based on today’s meeting and the ongoing work of the Task Force and its working groups, as well as many other NAIC workstreams, the NAIC has and will continue to be involved in several workstreams regarding innovation, technology, and cybersecurity. He said coordination among these workstreams is critical and, in addition to the ongoing activities, there are any number of open questions as technology continues to advance, as cyber breaches continue to occur, and as state and federal entities continue to develop legislative and regulatory guidance to address these issues. He said the mission of the new committee will be to: 1) provide a forum for state insurance regulators to learn and have discussions regarding innovation, technology, and cybersecurity issues; 2) monitor developments in these areas that affect the state insurance regulatory framework; and 3) develop regulatory guidance, as appropriate. He said in terms of process, the Task Force will play an important role in finalizing a draft mission statement and set of charges for this new committee. He said he planned to appoint an ad hoc group to begin that work and seek input from interested parties. He said the charges will require Executive (EX) Committee and Plenary approval and an amendment to the NAIC bylaws to officially add the new committee. He said the goal is to take those actions at the Fall National Meeting in San Diego, CA, and more information about the next steps will be available via the Task Force in the coming weeks.

Having no further business, the Innovation and Technology (EX) Task Force adjourned.
Big Data and Artificial Intelligence (EX) Working Group
Virtual Meeting
July 9, 2021

The Big Data and Artificial Intelligence (EX) Working Group of the Innovation and Technology (EX) Task Force met July 9, 2021. The following Working Group members participated: Doug Ommen, Chair (IA); Elizabeth Keller Dwyer, Co-Vice Chair (RI); Mark Afable, Co-Vice Chair (WI); Daniel Davis (AL); Ken Allen (CA); Mitchell Bronson (CO); Wanchin Chou and Andrew N. Mais (CT); Rebecca Smid (FL); Judy Mottar (IL); Amy L. Beard (IN); Ron Kreiter (KY); Tom Travis (LA); Ron Coleman (MD); Karen Dennis (MI); Phil Vigliaturo (MN); Cynthia Amann (MO); Chris Aufenthie (ND); Christian Citarella (NH); Randall Currier (NJ); Gennady Stolyarov (NV); Lori Barron (OH); Shannen Logue (PA); Michael Wise (SC); Rachel Cloyd (TX); Eric Lowe (VA); Christina Rouleau (VT); John Haworth (WA); and James A. Dodrill (WV).

1. **Adopted its March 29 Minutes**

Superintendent Dwyer made a motion, seconded by Commissioner Richardson, to adopt the Working Group’s March 29 minutes (see NAIC Proceedings – Spring 2021, Innovation and Technology (EX) Task Force, Attachment One). The motion passed unanimously.

2. **Discussed a Draft Survey and Definitions on Industry’s Use of Big Data, AI, and ML**

Commissioner Ommen said the Working Group is developing a survey to obtain a more accurate and objective measure of how insurers are using data variables, artificial intelligence (AI), and machine learning (ML) while also protecting the trade secrets and intellectual property of insurers. Commissioner Ommen said the work is being completed to fulfill the Working Group’s charge to “research the use of big data and artificial intelligence (AI) in the business of insurance and evaluate existing regulatory frameworks for overseeing and monitoring their use. Present findings and recommend next steps, if any, to the Innovation and Technology (EX) Task Force, which may include model governance for the use of big data and AI for the insurance industry.” He said the Working Group is focusing on private passenger auto (PPA) insurance. He said the Working Group is not trying to scrutinize any individual company’s practices, but rather it is trying to understand broader market practices. Because of this, the survey is not designed to collect information on a state-specific basis.

Superintendent Dwyer said a small number of subject matter experts (SMEs) were asked to work with NAIC staff to create the draft survey. Iowa, Rhode Island, and Wisconsin led these discussions, and representatives from Connecticut, Illinois, Louisiana, Nevada, North Dakota, and Pennsylvania served as SMEs. Superintendent Dwyer said the SMEs met throughout April and spent a considerable amount of time to ensure the survey instrument makes sense for the stated purpose and, more specifically, the questions, terms, flow, and general content is understandable, intuitive, and will produce the information needed to get a more objective understanding of the current status of AI/ML for PPA insurance.

Superintendent Dwyer said the drafting group circulated the draft survey to five pilot companies in early May. During May, NAIC staff held independent calls with those companies to receive feedback and improve the survey. The SMEs then picked up their work again in early June with the work culminating in the draft survey being circulated to the Working Group, interested state insurance regulators, and interested parties on June 24. Superintendent Dwyer said the SMEs who are attorneys drafted an examination call letter during May and June, and they began working with NAIC staff on how to collect the survey responses, with assistance from the NAIC. She said the lead states collecting the survey information clearly understand the need to have a centralized method of collecting survey responses, while maintaining individual company confidentiality. She said the SMEs believe the concerns related to confidentiality protections are being addressed.

Superintendent Dwyer said the survey begins with the threshold question of whether an insurer is using AI/ML. The SMEs spent a significant amount of time refining and clarifying the scope of the survey and ultimately defined AI/ML for the purposes of the survey as, “an automated process in which a system begins recognizing patterns without being specifically programmed to achieve a pre-determined result.” Superintendent Dwyer said this is different from a standard algorithm that consists of a process or set of rules executed to solve an equation or problem in a pre-determined fashion, and evolving algorithms are considered a subset of AI/ML. She said the SMEs understand there are many different interpretations regarding the meaning of AI and ML. She said she wants to be very clear the Working Group is not trying to develop a unilaterally agreed upon or standard definition beyond this survey.
Superintendent Dwyer said the survey then asks how AI/ML is being used in the following areas of rating, underwriting, claims, fraud detection, marketing, and loss prevention. For each of these operational areas, the survey seeks information on the level of deployment, the use of third-party vendors, and whether model governance is in place. In addition, Superintendent Dwyer said the survey includes questions about whether insurers have contracts with third-party vendors that might limit transparency to state insurance regulators and how insurers voluntarily provide transparency to consumers regarding data being used. She said the third aspect of the survey relates to data elements being used in AI/ML. This includes seeking information on the use of consumer “scores” that may be used. Superintendent Dwyer said the survey intentionally excludes questions about traditional and well understood uses of data, and the Working Group wants to learn more about what it does not already know.

Mr. Stolyarov said the data definitions include examples of AI/ML to clarify what insurer practices are in and out of the scope of the survey. He said the survey is not intended to collect information for general linear models, static algorithms, or table algorithms, no matter how complex. He said the survey is not intended to collect information on company practices that were used prior to 2000, and most of the practices the Working Group is trying to address began in the last decade.

Mr. Vigliaturo asked how the listing of data variables, such as education and occupation, would be viewed if the data is used, but not in AI/ML. Mr. Stolyarov said the purpose of this survey exhibit is to obtain information on data input into AI/ML, and it is not designed to obtain information on the use of data outside AI/ML.

Frank O’Brien (American Property Casualty Insurance Association—APCIA) said he appreciates the comments regarding the confidentiality concerns, and he looks forward to receiving more information on how these concerns are being addressed. He said the survey will require a significant amount of work for companies, and he urged the Working Group to provide companies sufficient time to respond to the survey.

Chris Petersen (Arbor Strategies LLC) said he understands the survey is limited to PPA insurance, but he also understands the template may be used for additional lines of insurance. He said it will be difficult for insurers to list all vendors because health insurers may have hundreds of vendors. He suggested that the survey focus on collecting the categories of vendors used. He said there is a difference between AI and ML, and there are various types of ML. He said the survey should reflect these nuances.

Birny Birnbaum (Center for Economic Justice—CEJ) said the survey asks companies to identify the areas in which AI/ML is used but does not ask what different types of data insurers use. He suggested that the survey asked whether data being used is compliant with the Fair Credit Reporting Act (FCRA), which is a broader focus than whether consumers can correct data being used. He said some of the survey questions require interpretation by insurers. Regarding the questions on model governance, he said one company may respond that it wants its model governance to be fair and ethical, while another company may be testing to verify that its model governance is fair and ethical. He said a better approach to determine insurers’ compliance with the NAIC AI Principles would be to have the insurers submit their model governance policies. Finally, he asked if the survey report would be made public.

Commissioner Ommen said the survey is informed by individual state work and will not be able to identify everything regarding how companies are adhering to the NAIC AI Principles. Superintendent Dwyer said the Working Group will issue a public report, but it will not disclose individual company information.

Superintendent Dwyer said the SMEs will consider the comments received today, and she asked interested parties to send the exact language they would propose for the survey. She said the Working Group understands the importance of having clarity in the survey questions to obtain consistent responses from insurers. She requested that all comments be submitted by July 16.

Superintendent Dwyer said the SMEs will finalize the survey and definitions and distribute a final version of the survey to the Working Group. In addition, she said an informational version of the survey will be distributed by the end of July to the insurers who will be asked to respond to the survey. She said NAIC staff will develop the survey tool, instructions, frequently asked questions (FAQ), and the web page, and they will follow the same process used for other coordinated data requests, such as those used for the COVID-19 Property/Casualty (P/C) data request.

Superintendent Dwyer said NAIC staff need three weeks to set up the survey, but they urged insurers to begin collecting their responses upon receiving the informational version of the survey at the end of July. She said the online portal for submitting the survey will be available in mid-August, and this will be communicated to insurers.
Superintendent Dwyer said the survey responses will be collected under the exam authority of Connecticut, Illinois, Iowa, Louisiana, Nevada, North Dakota, Pennsylvania, Rhode Island, and Wisconsin, and they will be collected through the NAIC’s Regulatory Data Collection (RDC) system. She said the following schedule is anticipated for the remainder of 2021:

- August: Issuance of the survey to PPA insurers. The number of insurers to receive the survey is still to be determined.
- September: Companies respond to the survey via the NAIC portal.
- October: Lead states for the survey issue a draft report of its findings to the Working Group.
- December: The Working Group issues a final report on industry practices, while maintaining the confidentiality of individual company responses. Will take comments on the draft report October–December.

Superintendent Dwyer said the Working Group will focus on its long-term goals of developing guidance and recommendations to update the existing regulatory framework for the use of big data and AI, including how to monitor and oversee the industry’s compliance with the NAIC’s AI principles, after the Working Group has a better understanding of how insurers use big data and AI in PPA insurance. She said the results will also inform the development of governance and risk management controls over these activities. She said the survey work will also be expanded to other lines of insurance as needed, such as life insurance and homeowners insurance.

Having no further business, the Big Data and Artificial Intelligence (EX) Working Group adjourned.

W:\National Meetings\2021\Summer\TF\Innovation\Working_Groups\Big_Data and AI\July 9 Call\7-9Big Data Minutes_Final.docx
The Speed to Market (EX) Working Group met June 30, 2021. The following Working Group members participated: Maureen Motter, Vice Chair (OH); Katie Hegland (AK); Jimmy Gunn (AL); Jimmy Harris (AR); Susan Buth (CO); Michele Mackenzie (ID); Marcia Kramer (KS); Tammy Lohmann (MN); LeAnn Cox (MO); Ted Hamby and Timothy Johnson (NC); Chrystal Bartuska (ND); Leatrice Geckler (NM); Cuc Nguyen (OK); Heidi Clausen, Tanji J. Northrup, and Tracy Klausmeier (UT); Elsie Andy (VA); Lichiou Lee (WA); and Barry Haney (WI).

1. Discussed and Considered Suggestions Received on the Uniform Life, Accident & Health, Annuity, and Credit PCM

Ms. Motter stated that discussions began during the June 29 call regarding the suggestion received to add two additional sub-types of insurance (TOIs) for the Medicare Supplement plans on the Life and Health side in the Uniform Life, Accident & Health, Annuity, and Credit Product Coding Matrix (PCM). She stated that what was noted in the suggestion is that there are instances where an insurer wants to report some rate information, and occasionally some form information, on Medicare Supplement plans that are not only applicable to 2010 products, but also to 2020 products. She stated that this requires the need for the company to file two separate submissions with almost identical information since there is not currently an option to select multiple sub-TOIs, which also creates additional work for the state insurance regulator reviewing the information submitted.

Ms. Motter stated that written communication was provided by Camille Anderson-Weddle (MO), as she was unable to attend the call, which stated the following: “Missouri does not have a preference with regard to the creation of MS10 and MS11 TOIs but would appreciate the ability to elect whether or not to turn these TOIs on. While Missouri currently accepts some combined rate filings where combined experience is used, it is not always appropriate, and we may request rates to be separated into two filings. Historically, carriers have used the existing TOIs including MS09-Other for such filings. In those instances where a combined filing is not appropriate, the company has not been asked to withdraw the filing in question, but to remove and revise documents where necessary and submit a second filing, as opposed to the alternative (where MS10 or 11 is used) of withdrawing an existing MS10 or 11 filing and having to submit two new filings. It should also be noted that we encourage filing rates under the same TOI as the forms, where possible. We would not expect to see forms combined and I do not believe we have.” Ms. Cox confirmed there was nothing additional to add for Missouri, and she reiterated the desire to be able to turn the new TOIs on or off if they are added.

Ms. Motter reminded the Working Group that another possible solution is changing the description to indicate or direct companies to use the “Other” categories to file combined data. She stated that the description could also be updated in such a way to direct companies away from using certain sub-TOIs.

Ms. Lee stated that the way Washington addresses this issue is that under MS06 Medicare Supplement – Other, it traditionally uses it for something where the action is not approved, and not for rate filings. She stated that Washington uses MS06 for the Medicare Supplement Experience Rating Refund Report, Medicare Supplement Advertisement, and those other actions filed and not approved because Medicare Supplement Forms and Rates are considered prior approvals. She stated that MS06 is used for everything above it, other than MS04 and MS05, and MS09 Medicare Supplement – Other is used for MS07 and MS08. She stated that Washington was the state that proposed the new MS10 and MS11 Medicare Supplement TOIs, because of their identical/duplicate two rate filings. She stated that Washington has never used MS06 as part of the rate filing because it wanted to separate out the prior approvals.

Ms. Nguyen stated that it would be helpful if additional explanation was provided for MS06 so that when companies file, they have a better understanding of what to choose. Ms. Motter asked if Ms. Nguyen would want to receive filings the same way Ms. Lee explained, and if they would not want companies using the “Other” category to do some of those combined rate filings. Ms. Nguyen said yes, that would be her preference. Ms. Motter asked if Ms. Nguyen would still want two filings, but just using the existing TOIs, and Ms. Nguyen confirmed that was correct.

Ms. Mackenzie made a motion, seconded by Ms. Lohmann, not to adopt the suggestion to add MS10 Individual Medicare Supplement-Standard and 2010 Standard Plans, as well as MS11 Group Medicare Supplement-Standard and 2010 Standard Plans TOIs. The motion passed unanimously.
Ms. Motter stated that there was a suggestion made on the June 29 call to edit the H13 – Short-Term Care TOI description. Currently, the description states, “[c]overage that provides medical and other services to insured’s who need constant care in their own home or in a nursing facility for periods less than one year.” The suggestion is to add the following sentence to that description, “also considered limited long-term care.”

Ms. Lee stated that Washington has never turned on the H13 TOIs because the product is illegal there. She stated that the reason it is illegal in Washington is because a plan providing health care services like that is either a health plan that is part of the H15 or H16 TOIs, or it is a long-term care (LTC) product.

Ms. Andy stated that Virginia uses the H13 TOI. She stated that LTC cannot be written if it provides coverage for less than 12 months; and in certain circumstances, policies are allowed that provide home health care unrelated to LTC, such as loss related to accident and sickness rather than mimicking LTC, and the coverage provides less than 12 months of coverage.

Ms. Clausen stated that she made this suggestion to edit the H13 description because a couple of states indicated that they are receiving filings under H13 for limited long-term products. Ms. Motter asked if it would be appropriate to add a sub-TOI instead of editing the overall H13 description. Ms. Bartuska stated that North Dakota has a law that allows for short-term care policies, in that they are basically LTC policies less than a year old, or less than a year worth of care, and North Dakota uses the H13 TOI for individual health; i.e., short-term care, utilizing the sub-TOI for Nursing Home. Ms. Lohmann stated that Minnesota is also utilizing the H13 TOI and sub-TOIs.

Ms. Motter asked if changing the suggested wording would be helpful, such as adding “where permissible” or “where applicable.” Mr. Hamby said maybe the wording could state, “[m]ay include Limited Long-Term care.” Ms. Bartuska stated that when North Dakota adopted its short-term care law, it took the language from its LTC law and just changed some of the provisions around the time frame of the contract. She stated that these types of policies are referred to as short-term care in North Dakota, and since they are technically health policies, she would be apprehensive of putting any indication of LTC in the description since it is not LTC, and not a traditional LTC policy, rather it is a short-term care nursing home product.

Ms. Lohmann made a motion, seconded by Ms. Bartuska, not to implement the suggestion to edit the H13 TOI description. The motion passed unanimously.

Having no further business, the Speed to Market (EX) Working Group adjourned.
The Speed to Market (EX) Working Group of the Innovation and Technology (EX) Task Force met June 29, 2021. The following Working Group members participated: Rebecca Nichols, Chair (VA); Maureen Motter, Vice Chair (OH); Katie Hegland (AK); Jimmy Gunn (AL); Jimmy Harris (AR); Susan Buth (CO); Frank Pyle (DE); Michele Mackenzie (ID); Heather Droge (KS); Tammy Lohmann (MN); Camille Anderson-Weddle (MO); Timothy Johnson (NC); Chrystal Bartuska (ND); Leatrice Geckler (NM); Cuc Nugyen (OK); Mark Worman (TX); Heidi Clausen, Tanji J. Northrup, and Tracy Klausmeier (UT); Gail Jones and Lichiou Lee (WA); and Barry Haney (WI). Also participating were: Alan Gore (NY) and Bob Grissom (VA).

1. **Adopted its March 10, 2021, Minutes**

The Working Group met March 10, 2021, and took the following action: 1) adopted its Nov. 10, 2020, minutes; 2) received an update from the Interstate Insurance Product Regulation Commission (Compact); 3) discussed the results of the Product Requirements Locator (PRL) tool survey and next steps; 3) received an update on the System for Electronic Rate and Form Filing (SERFF); and 4) discussed the annual review of the product coding matrix (PCM) and uniform transmittal document (UTD).

Ms. Geckler made a motion, seconded by Mr. Gunn, to adopt the Working Group’s March 10, 2021, minutes (Attachment). The motion passed unanimously.

2. **Received an Update from the ITG on the 2021 PCM**

Alex Rogers (Information Technology Group—ITG) stated his team works to implement newly adopted changes to the PCM. He said that each year, they begin their annual outreach efforts in October into November, and then they follow up biweekly through the end of the year to get needed changes implemented by January. He stated his team continues regular follow-up throughout the first quarter of the year. Mr. Rogers advised that there has been a low adoption rate for changes to the PCM over the past two years. He stated that in 2020, one sub-type of insurance (TOI) was introduced to the PCM; there were 12 states that adopted that sub-TOI and 21 states that declined it. He stated that in 2021, 11 states implemented the new H15G and H15I TOIs, 11 states declined, and 30 states did not respond.

Joy E. Morrison (ITG) stated the reason mentioning the low adoption rate is important, is that statistics for adoption have declined in the last two years and that variations from a uniform PCM make it more difficult for industry users to create a multistate filing in the SERFF application. She asked for feedback from the Working Group in determining the best way to implement proposed changes in a consistent manner.

Ms. Motter stated she has noticed that in the last couple of years, the PCM covers nearly every product and that nearly every TOI is there, but occasionally there is something new. She stated a couple years back, for example, there was a need to address stand-alone cyber insurance policies for property/casualty (P/C). Ms. Motter advised some of the requests and suggestions received are more specific to a particular state and a state’s need for granularity for reporting purposes, so there is hesitation to add products to the PCM that most states will not adopt. She explained that part of these discussions is suggesting other ways states can capture specific information they need, such as through the use of filing labels, in those instances where most states do not share the same needs.

Ms Morrison stated that insight was helpful to understanding these discussions. She stated that when the SERFF redesign begins, the intent is to have one set of TOIs, sub-TOIs, and filing types, but that submission requirements that vary for states would be reflected. She stated it would be helpful for all states to be sure they are responding to the correspondence received regarding the PCM so that a good understanding of their needs is documented.

3. **Discussed and Considered Suggestions Received on the PCM and UTD**

Ms. Motter stated the first suggestion to discuss was regarding the uniform P/C transmittal documents that continue to be used on paper filings. She stated they are kept updated to stay consistent between what is currently available as fields in SERFF and
also keep what is available for life and health submissions to be comparable to P/C submissions when appropriate. Ms. Motter stated that NAIC staff have noted that the document for P/C is missing some rating information, so a recommendation has been made by NAIC staff to update the rate/rule schedule to show the rate action information with all of the applicable information as shown in life and health information. She stated this would also line up with what is currently shared in SERFF when submitting a filing that way as well.

Ms. Lee stated she consulted with her P/C peers, and they do not feel this suggestion is needed for Washington because they already have a previous rate filing for each schedule item. The other reason she provided is that they already have the company rate information that shows the proposed change as whole. Ms. Motter stated this suggested change would not change SERFF but would bring it in line with SERFF to bring consistency to the paper filing document that already exists. Ms. Lee stated it looks good for life and health, but on the P/C side, this suggested change would change the rate schedule item because it would add in an item for each plan’s separate rate change, which may not be consistent with the way the carrier rates. She explained they usually see the average rate change as a whole, and it does not go down to each claim’s rate change.

Brandy Woltkamp (NAIC) clarified that the intent of this suggestion was to update both SERFF and the uniform transmittal paper document, but she stated it could be changed to diverge between the two if preferred. Ms. Motter asked which fields would be new. Ms. Woltkamp stated that in SERFF, currently for P/C, it is that very first item which is the rate action and then the field for “previous state filing number.” The suggestion is to change the field for “previous state filing number” to “rate action information” and move the previous state filing number or the tracking number down into it, in a second column. Ms. Motter asked if these fields could be updated via post submission update. Ms. Woltkamp stated these items would be under change schedule items, so they would come in via amendment or response letters. Ms. Motter stated she could see how adding more fields could cause confusion to the user as to what information is wanted in those fields, such as understanding the difference between a previous filing number and the previous filing that had a rate action and what a rate action is. Ms. Lee stated she believes adding more fields would make things more confusing and that companies and state insurance regulators would be spending more time trying to make sure the right fields were filled in with the right information.

Ms. Lee made a motion, seconded by Mr. Johnson, not to adopt the suggestion to update the rate/rule schedule in the uniform P/C transmittal document to show rate action information with all applicable information as shown on life and health information.

Ms. Motter stated the next suggestion to discuss is related to the uniform life, accident and health (A&H), annuity, and credit PCM. The suggestion is to create two additional sub-TOIs under Medicare Supplement plans of MS10I and MS10G—one for individual plans and one for group plans—with a description for a package filing containing Medicare standard plans issued before June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. The reason provided for this suggestion stated: “Plans issued before June 1, 2020 (1990 plans) have similar benefits to those plans with the same letter issued after June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. The reason provided for this suggestion stated: “Plans issued before June 1, 2020 (1990 plans) have similar benefits to those plans with the same letter issued after June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. The reason provided for this suggestion stated: “Plans issued before June 1, 2020 (1990 plans) have similar benefits to those plans with the same letter issued after June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. The reason provided for this suggestion stated: “Plans issued before June 1, 2020 (1990 plans) have similar benefits to those plans with the same letter issued after June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. The reason provided for this suggestion stated: “Plans issued before June 1, 2020 (1990 plans) have similar benefits to those plans with the same letter issued after June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later. Therefore, the suggestion is to create two additional sub-TOIs under Medicare Supplement plans of MS10I and MS10G—one for individual plans and one for group plans—with a description for a package filing containing Medicare standard plans issued before June 1, 2010, and 2010 Medicare standard plans issued June 1, 2010, and later.

Ms. Motter asked if these fields could be updated via post submission update. Ms. Woltkamp stated these items would be under change schedule items, so they would come in via amendment or response letters. Ms. Motter stated she could see how adding more fields could cause confusion to the user as to what information is wanted in those fields, such as understanding the difference between a previous filing number and the previous filing that had a rate action and what a rate action is. Ms. Lee stated she believes adding more fields would make things more confusing and that companies and state insurance regulators would be spending more time trying to make sure the right fields were filled in with the right information.

Ms. Lee stated that currently, Medicare Supplement plans end at MS09 in the PCM. She stated occasionally, there are filings received that may combine the experience of older and newer plans, and that right now it seems to be very bifurcated that you use certain TOIs for the older plans and other sub-TOIs for the newer plans. She stated the suggestion is that additional TOIs are needed for when there is information coming in about both plans together. Ms. Motter asked if filing submissions are being received, or should be being received, that combine older plans in the newer plans. Ms. Lee stated that Washington considers the 1990 and 2010 plans similar from a rating standpoint, but that because of the current TOI requirement, they have the carriers submit two identical filings. She explained if a carrier filed for an individual 1990 and 2010 plan, for example, they would need to submit one rate filing under MS051 and one under MS081, which creates a lot of work as two filings must then be reviewed. Ms. Motter stated one thought to consider is that there is a TOI for MS06 labeled as “Medicare Supplement – Other,” so it is possible that states could do combined filings under MS06. Currently, the description states, “Not specifically described above,” so this may need to be changed to: “Not specifically described,” as it was created before additional TOIs existed.

Mr. Grissom stated Virginia does use the “Other” TOI because they require companies to combine the experience of the 2010 and 1990 plans when filing Medicare Supplement rates, so in a sense they cannot use multiple TOIs. He stated this suggestion would be helpful for Virginiafilers.

Ms. Jones asked if MS06 is used with the understanding that it is related to Medicare Supplement – Standard Plans and if MS09 is used with the understanding that it is related to Medicare Select 2020. Ms. Woltkamp stated that MS09 is basically the same
thing as MS06 and is for Medicare Supplement—Other, but it is for those 2010 plans that went into place Jan. 1, 2010, so it would be the offsetting “other” TOI/sub-TOI for MS07 through MS08.

Ms. Motter asked if Working Group members would like to reach out to their staff and discuss this further during tomorrow’s scheduled Working Group meeting. Ms. Mackenzie and Ms. Nguyen stated they would like the option to resume this discussion tomorrow after getting additional input. Ms. Motter asked that everyone look at: 1) how they are currently accepting these types of filings; 2) if the way the filings are currently received is working well; and 3) if they think the suggestion would be helpful or if maybe changing the current descriptions to be clearer would be a good option.

Ms. Clausen stated she would like to suggest an edit to the H13 TOI. Ms. Motter stated she could provide that suggestion to be discussed during the June 30 Working Group meeting.

Having no further business, the Speed to Market (EX) Working Group adjourned.
The E-Commerce (EX) Working Group of the Innovation and Technology (EX) Task Force met June 30, 2021. The following Working Group members participated: Kathleen A. Birrane and Robert Baron, Chairs (MD); Jully Pae (CA); Heather Droge (KS); Tom Travis (LA); Cynthia Amann (MO); Martin Swanson (NE); Chris Aufenthie (ND); Lori Barron (OH); John Lacek (PA); Elizabeth Kelleher Dwyer (RI); and Bryce Carlen (WA).

1. Heard an Introduction to the Working Group, Establishment, and Background

Commissioner Birrane stated that the first item on the agenda is to provide an introduction to the Working Group, explain what led up to the establishment of the Working Group, and explain some additional background information. She then called on Denise Matthews (NAIC) to provide background information.

Ms. Matthews recalled that the Innovation and Technology (EX) Task Force in 2020 set a request for information to interested parties asking for information related to specific regulatory relief or accommodations offered by the states because of the COVID-19 pandemic that interested parties would recommend being made permanent as they relate to innovation and technology. She stated that this request is consistent with the Task Force’s charge of monitoring technology developments to develop regulatory guidance, as appropriate, to ensure that regulation does not impede or create obstacles to necessary and beneficial consumer innovations. The request also asked if there is some type of regulatory relief or accommodation offered, or if there continue to be laws, regulatory guidance, or established practices in place that prohibit or limit insurers or producers from implementing or using newer technologies. The request further asked if there are also data methods or processes that are now necessary to continue to serve customers and maintain operations, especially in this remote work environment and social distancing situation.

Ms. Matthews explained that those responses were compiled into a summary document, which was presented to the Task Force at the 2020 Fall National Meeting and was included in the materials for this meeting. Nine responses were received, and the comments were grouped into four categories, including: 1) electronic commerce; 2) regulatory capabilities; 3) claims facilitation; and 4) surplus lines. Included among these responses was a recommendation and draft bulletin provided by the American Council on Life Insurers (ACLI). After reviewing these responses and finalizing the Working Group’s 2021 charges, it was decided that more information was needed for the Working Group to take specific action.

Ms. Matthews said a second request for information was sent to those who responded to the initial request, and a summary of those responses was prepared as well. A consumer representative also provided a comment, and more specific information was requested regarding whether the issues identified are more interpretive or signal a lack of uniform interpretation versus an actual legislative issue where the legislative language needs to be reviewed. The request also went on to request suggestions regarding the prioritization of these issues, and the summary of these responses were also included as materials for this meeting.

Ms. Matthews explained that the second request responses indicated a preference to prioritize e-commerce and digitalization in general, including allowing for e-signatures, e-delivery of documentation, and information regarding e-notarization. The responses also included discussions of changing the paradigm from what is mostly an opt-in scenario for consumers to an opt-out where exchanging information digitally or electronically would become the default, with consumers having the ability to opt-out of that option.

Regarding specific action items, Ms. Matthews said the ACLI and the American Property Casualty Insurance Association (ACPIA) suggested forming a working group to survey states about Uniform Electronic Transactions Act (UETA) exceptions, and to begin work on laws and regulations that might need to be changed to accommodate e-commerce or digitalization, as well as interpretive guidance where legislative changes are not needed.

Ms. Matthews said the second category of survey responses represents regulatory capabilities and covers the list of items related to allowing online education and training for continuing education (CE) for producers, allowing electronic filings for regulatory filings, and eliminating wet signature requirements. There were no specific action suggestions for this category, and the Task Force agreed to defer the education and training item to the Producer Licensing (D) Task Force.
Claims facilitation was a category of responses from the first request for information, and Ms. Matthews explained that Commissioner Godfread had noted that this was not included in the responses to the second request for information. He also noted that it was not clear if this was just an oversight since not all of those who responded to the first request for information responded to the second, or if it means this category does not seem to command prioritization at this time. Ms. Matthews said there may not be obstacles related to this area at this time, but it might still be something for the Working Group to consider.

Ms. Matthews said the last category of responses was specific to surplus lines, and some of the respondents noted that the Surplus Lines (C) Task Force is currently working to amend the Nonadmitted Insurance Model Act (#870), so it may be appropriate to defer this item to the Task Force, which has in fact occurred. She noted that the Task Force requested a modification to any Request for NAIC Model Law Development that previously focused solely on Model #870, and that request was approved to address broader amendments to the model that would include additional references to the other modernization amendments. She said these particular issues summarized in the request for information documents will be handled in that workstream under the Task Force.

Ms. Matthews said other comment letters provided examples of specific states, where either the interpretation or the law prohibits doing business digitally, and three respondents, including the ACLI, the ACPIA, and the National Association of Professional Insurance Agents (PIA) indicated support for drafting a model bulletin to cover some of the non-legislative issues.

Following the review and summary of the request for information responses, Ms. Matthews said the Innovation and Technology (EX) Task Force discussed them during the Spring National Meeting, agreed to the referrals previously discussed, and stated that it would turn its focus to the other identified issues. The Task Force also decided to form this new Working Group to develop a workplan and determine appropriate deliverables to address these issues. Ms. Matthews then asked Superintendent Dwyer for her comments.

Superintendent Dwyer said there is low hanging fruit here that drives industry crazy, costs money that does not need to be spent and is not there for consumer protection. She said if the Working Group can identify those issues and assist in getting the states on the same page, it can reduce the costs for everybody and pave the way for innovation, so that is what the Working Group is looking at doing. She noted that when getting down to a statute, it gets very difficult, as Working Group members all must individually go to their legislators, which does not mean those issues are off the table, it is just that the issues that are not statutory are easier. She said the Working Group needs continuous input from the people who are doing this and trying to comply with the states in order to understand where it should go, so she asked for that input from people who are in the know by letting the Working Group know where it should focus.

Commissioner Birrane agreed with Superintendent Dwyer’s comments, and she said the focus of this work is infinite practicality. She also said what we are really dealing with here are the things that drive companies and others who are trying to work in this space crazy because they do not make any sense and they serve no valuable regulatory or consumer protection purpose, but instead slow things down, impede business for everybody, and are often harmful to consumers. She also discussed antiquated paper processes and delivery processes and stated that while individuals were at home, they were often unable to get to their office to get their mail because it had to be sent via mail. Then, when people were able to get things electronically, mail was sent both ways because that is what must be done statutorily, so we must find ways to innovate.

2. Discussed its Charges

Commissioner Birrane then introduced the Working Group’s charges and asked for input from members of the Working Group and other interested state insurance regulators. No comments were received.

Commissioner Birrane then asked for comments from interested parties. Birny Birnbaum from the Center for Economic Justice (CEJ) said digitalization is not simply converting paper to digital bytes, and visualization can facilitate transactions, consumer understanding, and consumer empowerment while also potentially accomplishing the opposite. Mr. Birnbaum said while the Working Group considers facilitating e-commerce transactions, it should keep in mind a specific consumer protection issue called “dark patterns.” He explained that Colorado law defines “dark patterns” as a user interface designed or manipulated with the substantial effect, severity or impairing user autonomy, decision making, or choice. He stated that “dark patterns” tend to discourage deliberate decision making for users. He said while there are things that can be done with digital disclosures in terms of manipulation that simply cannot be done with paper disclosure, the CEJ is not saying that digital transformation should not occur, but the issue of “dark patterns” be kept in mind as the Working Group approaches a task.
3. Discussed its Workplan and Efforts Moving Forward

Commissioner Birrane said the Working Group’s first step is to understand the legal landscape and identify key legislation, so the Working Group is focused primarily on the UETA. She said Maryland is a good example of a state that has additional legislation in its code specific to property/casualty (P/C) insurance that addresses electronic communications with regard to certain matters. She said some states have adopted the UETA while others have not, and there are various other laws out there as well. Therefore, she said the Working Group believes the most appropriate thing to do is to understand the framework and have a really solid understand. Commissioner Birrane said while the NAIC has done some amount of survey work, it has not done anything to that extent, and she asked what the most efficient way to move this forward is. She also stated that the Working Group has to think about time frames, what it would be able to survey from its individual states, what the states would be able to tell the Working Group, and what the time frames are. She asked if the NAIC should draft a survey for each of the states asking them to identify the relevant laws as a starting point while also keeping in mind interpretation and application. She then asked for comments from members of the Working Group.

Mr. Swanson stated that Nebraska is actually going through this exercise right now internally. He stated that Director Eric Dunning (NE) decided to look back at what Nebraska did during the emergency order when it was declared by its governor, including suspending certain requirements, certain signatures, wet signatures, and things like that. Mr. Swanson said Nebraska has gone through its statutory scheme, noting that it can waive certain things. He noted that some states have passed electronic notary laws, which is less of a burden for some filers. He suggested that one step the Working Group may consider is to ask the states through a survey what they learned through the emergency declarations and what they can apply now in addition to whatever laws they may have.

Ms. Amann said Missouri did something similar government wide and within its department of insurance (DOI), and she said Missouri would be glad to share its results.

Mr. Aufenthie said the NAIC had a list of bulletins that were issued because of the pandemic, and he suggested going back to the states and asking whether they still have those bulletins in effect. He said when the Working Group asks a state if they did or did not keep a bulletin to explain why, as that would give the Working Group good insight into what it is trying to accomplish.

Commissioner Birrane then asked for comments from other interested state insurance regulators. No comments were received.

Commissioner Birrane then asked for comments from interested parties. Patrick C. Reeder (ACLI) stated that ACLI members have spent a lot of time thinking about the UETA, and not just the state implications, as there are also federal implications with the e-sign legislation and how those two pieces of legislation interact. He said one thing the ACLI could do is to put together a briefing explaining what the UETA is, what states have adopted it, what e-sign is, and how it all intersects. He suggested that this may assist the NAIC in framing up some potential survey questions. He also said some ACLI members may be able to share some information and its experiences in this touchless society, noting that the regulatory community made some amazing and very fast accommodations that were critical for its members to stay in this touchless society. He stated that ACLI members want them to be a resource for the Working Group.

Jason Berkowitz (Insured Retirement Institute—IRI) said this is a very important effort for its members. He explained that the IRI operates primarily in the annuity space, and the IRI membership includes all of the major insurance companies that manufacture those products, as well as the distribution arms, including broker dealers and other distributors and asset managers that work behind the scenes on some of these products. He also said the IRI has a very robust internal operations and technology group, and the IRI would be happy to be available to share some of the operations and technology challenges it has been encountering.

Angela Gleason (APCIA) offered that this is very important to its members, and they are willing to assist the Working Group.

Mr. Birnbaum said the CEJ is often part of a coalition with other organizations whose work focuses on consumer’s digital rights and privacy and electronic issues. He suggested that the NAIC contact the Electronic Frontier Foundation and the Center for Digital Democracy (CDD), both of which have worked on these issues and can provide insight that the Working Group may not get from industry.

Following the comments, Commissioner Birrane said this gives the Working Group enough to begin putting together a draft of its initial approach in terms of data, and she should circulate to the Working Group the takeaways from the meeting, as well as a timeframe.
Commissioner Birrane then said the Working Group should begin thinking about what its deliverable will look like. She said in this context, the deliverable may not need to be a model, but the Working Group could discuss something along the lines of a bulletin or a white paper.

Superintendent Dwyer suggested a white paper might possibly be a good deliverable, but a bulletin might be even better. She said in her experience, the states do not really realize they are doing it. As an example, she said hard copy jurat pages come into her office, and she sees the hard copies and wonders why they are getting all of them. She said short of seeing these documents, one might even know it is happening. Therefore, a bulletin might be something that informs the entire department or a part of the department that knows they are getting paper documents or requiring something. She also said as the Working Group goes along, there may be other deliverables as well.

Mr. Swanson said one of his immediate thoughts when thinking about these issues is to draft a white paper, but when the Working Group digs into this issue more and get results back from all of the information it gathers, whether it drafts a bulletin or white paper, there should be recommendations to the letter committees saying the Working Group found some places where it can do better through electronic methods.

Commissioner Birrane said it is too early to ask members to subscribe to a drafting group because the Working Group needs to get further along in terms of where it is going to end up. She said the most important thing for the Working Group to focus on is what the query process is, how the Working Group is going to gather the categories of information that have been discussed, and what form and format the Working Group wants it in.

4. **Discussed Other Matters**

Commissioner Birrane asked whether the Working Group would like to meet virtually in conjunction with the Summer National Meeting. She said holding a meeting might be helpful because by that time, her hope is that the Working Group would have had the opportunity to put some of the query frameworks together, circulate them, and have a brief discussion. There were no objections to holding another meeting, so she said she would work to get that scheduled.

Having no further business, the E-Commerce (EX) Working Group adjourned.

The Long-Term Care Insurance (EX) Task Force met Aug. 13, 2021, immediately followed by a meeting of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup.

The following Task Force members participated: Scott A. White, Chair (VA); Michael Conway, Vice Chair (CO); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Alan McClain (AR); Evan G. Daniels (AZ); Ricardo Lara represented by Perry Kupferman (CA); Andrew N. Mais (CT); Karima M. Woods represented by Philip Barlow (DC); Trinidad Navarro represented by Fleur McKendell (DE); David Altmair (FL); Colin M. Hayashida represented by Martha Im (HI); Doug Ommen (IA); Dean L. Cameron (ID); Dana Popish Severingham represented by Shannon Whalen (IL); Amy L. Beard and Scott Shover (IN); Vicki Schmidt (KS); James J. Donelon (LA); Gary D. Anderson (MA); Eric A. Cioppa (ME); Anita G. Fox represented by Karen Dennis (MI); Grace Arnold represented by Fred Andersen (MN); Chlora Lindley-Myers (MO); Mike Chaney (MS); Troy Downing (MT); Mike Causey (NC); Jon Godfrey (ND); Eric Dunning and Rhonda Ahrens (NE); Marlene Caride (NJ); Russell Toal (NM); Barbara D. Richardson (NV); Judith L. French (OH); Glen Mulready (OK); Andrew Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer (SC); Larry D. Deiter (SD); Carter Lawrence (TN); Doug Slape (TX); Jonathan T. Pike and Tomasz Serbinowski (UT); Michael S. Pieciak represented by Anna Van Fleet (VT); Mike Kreidler and Lichiou Lee (WA); Mark Aftable (WI); James A. Dodrill (WV); and Jeff Rude (WY).

The following Subgroup members participated: Michael Conway, Chair (CO); Alan McClain (AR); Andrew N. Mais (CT); Philip Barlow (DC); David Altmair (FL); Doug Ommen (IA); Dean L. Cameron (ID); Amy L. Beard (IN); James J. Donelon (LA); Anita G. Fox represented by Karen Dennis (MI); Grace Arnold represented by Fred Andersen (MN); Eric Dunning and Rhonda Ahrens (NE); Marlene Caride (NJ); Russell Toal (NM); Barbara D. Richardson (NV); Judith L. French (OH); Glen Mulready (OK); Andrew Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer (SC); Doug Slape (TX); Tomasz Serbinowski (UT); Scott A. White (VA); Michael S. Pieciak represented by Anna Van Fleet (VT); Mike Kreidler and Lichiou Lee (WA); and James A. Dodrill (WV).

1. **Long-Term Care Insurance (EX) Task Force**
   a. **Adopted its July 6 Minutes**

The Task Force met July 6 and took the following action: 1) adopted its Spring National Meeting minutes; and 2) received the reports of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup and the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup.

Commissioner Altman made a motion, seconded by Commissioner Caride, to adopt the Task Force’s July 6 minutes (Attachment One). The motion passed unanimously.

b. **Heard an Update on Industry Trends**

Mr. Andersen said the Valuation Analysis (E) Working Group oversees reserve valuation and related solvency of companies with large long-term care insurance (LTCI) blocks of business. It has reviewed *Actuarial Guideline LI—The Application of Asset Adequacy Testing to Long-Term Care Insurance Reserves* (AG 51) filings this past year. The Working Group interacts with companies and domestic state insurance departments on such matters. In past years, the areas of focus included evaluation of investment return and morbidity incidence improvement assumptions. Mr. Andersen said the key area of focus this year has been on studying the variation of cost-of-care and trends due to the impact of COVID-19 and the aging baby boomer generation. Cost-of-care trends affect companies with policies that include 5% compound inflation protection where often the actual daily cost-of-care assumption is less than the inflation-protected daily maximum benefit stated in the policy. The Working Group plans to monitor trends for that issue over the next several months and years. The Working Group is working with the California Department of Insurance (DOI), which has a team of LTCI actuaries that assist in the AG 51 reviews.

Commissioner Ridling asked if the Task Force should be monitoring for possible future solvency concerns and what should be looked at during insolvency. Commissioner White said that solvency analysis is ongoing. It is being conducted by the actuarial group through its annual review of insurers’ AG 51 filings, and through having discussions with the company and its domestic...
state insurance regulator if reserves need to be strengthened. Mr. Andersen said the Valuation Analysis (E) Working Group has been performing targeted and broad-based reviews for three to four years and has been engaged with the companies and the NAIC on their work. He invited any of the state insurance regulators who would like to discuss these activities or any ideas for enhancements to this work to contact him or Commissioner White.

c. Received the Report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup

Commissioner Conway said the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup met June 22 to hear verbal comments on the exposure draft of the operational sections of the LTCI Multi-State Rate Review Framework (MSA Framework). The drafting group has met several times discuss those comments and has identified some key issues yet to be decided. The Subgroup also exposed the actuarial sections of the MSA Framework for a public comment period. Five comment letters were received. The drafting group will continue working on edits to both the operational and actuarial sections in response to the comments to finalize the MSA Framework. Commissioner Conway said the Subgroup anticipates a second exposure draft of both the operational and actuarial aspects of the MSA Framework by the middle of September and will be conducting several meetings this fall.

Director Cameron made a motion, seconded by Commissioner Conway, to receive the report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup (Attachment Two). The motion passed unanimously.

d. Received the Report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup

Commissioner Altman said the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup met July 28, July 22 and May 4. During its May 4 meeting, the Subgroup heard four industry presentations on LTCI innovation and wellness programs. The presenters were invited to assist the Subgroup with identifying potential issues with offering wellness programs to policyholders with in-force LTCI policies. The presentations touched on things insurers need to consider before implementing a wellness program; experiences with and lessons learned from a pilot program offered by an insurer; a hypothetical view of what the future state of in-home long-term care (LTC) services might look like; and issues related to unfair discrimination concerns, rebating concerns, and wellness programs as they relate to tax qualified LTCI policies.

Commissioner Altman said after its July 22 meeting, the Subgroup exposed a document titled *Issues Related to LTC Wellness Benefits* for a public comment period ending Sept. 5. She encouraged state insurance regulators and interested parties to review the document and provide feedback to the Subgroup. The document outlines issues, observations, and next steps for various topics, including:

- Effectiveness of LTC wellness programs.
- Preventions of unfair discrimination related to extra-contractual benefits and costs.
- Consumer confusion over wellness programs.
- Rebating and whether some LTC wellness benefits run afoul of anti-rebating laws.
- Tax considerations for policyholders.
- The regulatory role in approving or evaluating LTC wellness approaches.
- Actuarial considerations of the impact of LTC wellness benefits.
- Data privacy.

Commissioner Altman said the Subgroup received comments on the draft “RBO Consumer Notices Checklist” in July. This checklist is intended to establish a consistent approach to drafting and reviewing LTCI reduced benefit options (RBO) policyholder communications, and to provide an optional tool to use. The checklist can be used by states for guidance and is not required to be used for the review of insurer communications with policyholders. The Subgroup met July 28 to work through the comments received and to make edits to the checklist. The Subgroup plans to meet Aug. 23 to finalize the checklist.

Commissioner Altmaier made a motion, seconded by Commissioner Caride, to receive the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup (Attachment Three). The motion passed unanimously.

e. Released the LTCG Actuarial Consulting Group Report

Commissioner White said the NAIC engaged LTCG Actuarial Consulting Group to conduct a data call of certain insurers to assist the Task Force in evaluating the extent to which state rate review policies and practices have led to cross-state rate subsidization. The public LTCG report (Attachment Four) includes key points in the executive summary and data in different frames. The data call and analysis does show such cross-state rate subsidization does exist. The report took time to deliver as
the original work product of LTCG was considered confidential because the information was gathered under Virginia confidentiality statutes. Steps had to be taken to allow it to be shared publicly and to work through some contractual issues with LTCG regarding its scope of work and deliverables. This report is being released to the public for informational purposes only, and the Task Force does not expect further discussion on the matter.

f. Discussed the MSA Framework Timeline and Next Steps

Commissioner White said a timeline for completing the MSA Framework has been developed, which includes processes to receive feedback from both state insurance regulators and interested parties. He said the following timeline is anticipated for the operational aspects of the MSA Framework:

- Discuss pending revisions during today’s meeting.
- Aim to complete the next version of the operational aspects of the MSA Framework by Aug. 30.
- Assuming the next draft is completed by Aug. 30, then hold a Long-Term Care Insurance Multistate Rate Review (EX) Subgroup regulator-to-regulator meeting the week of Sept. 6, which will be scheduled soon.
- Pending further edits from the Subgroup, the operational aspects would be re-exposed for a 30-day public comment period the week of Sept. 22, with comments due prior to a Subgroup meeting the week of Oct. 25.
- Hold a Subgroup open meeting the week of Oct. 25 to discuss comments received.
- The drafting group will consider near final comments and produce a third draft version by Nov. 8.

Commissioner White said the following timeline is anticipated for the actuarial aspects of the MSA Framework:

- The Subgroup will hear oral summary comments during today’s meeting.
- The drafting group plans to analyze and produce a second draft version and expose it for a 30-day public comment period by the week of Sept. 13, with comments due prior to a Subgroup meeting the week of Oct. 25.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned into the Subgroup meeting.

2. Long-Term Care Insurance Multistate Rate Review (EX) Subgroup

a. Discussed Revisions to the Operational Section of the Draft Multistate Rate Review Framework

Commissioner Conway said the drafting group has met several times over the past two months to work through the comment letters and has made progress. There are a couple key points that the drafting group thinks the Subgroup still needs to evaluate and discuss further, specifically what information in the MSA process and MSA filing should be confidential vs. public. The answer may depend partly on how states’ insurance laws and protections apply in general, or specifically to rate filings. Another key issue yet to be finalized is the type and level of detail of information that should be included in a report that is shared with the insurer. Commissioner Conway said he recognizes the value in good communication with the insurer during the review process but still need to address the level of detail that is needed. He said this will be an iterative process with insurers to strike the right balance between transparency and the protection of sensitive information.

Commissioner Conway said the current draft will change, as there needs to be more discussion on these issues. Based on that discussion, further decisions can be made on administrative and logistical questions that were raised in the comments, specifically, the use of the Interstate Insurance Product Regulation Compact (Compact) staff and the System for Electronic Rate and Form Filings (SERFF) to assist in the administration of rate proposals and the process of finalizing the review and approval of the reports. The Subgroup is aiming to produce the next version of the draft by Aug. 30 and meet in regulator-to-regulator session during the week of Sept. 6.

Ms. Ahrens said there were several comments received on the operational aspects of the MSA Framework regarding the need for both insurers and state insurance regulators to participate in the MSA process for it to achieve its goal of more consistency in approving actuarially justified rate requests in a timely fashion. The MSA process is novel concept and through the pilot project, she said the Subgroup is learning with each review how to improve the process for the next review. It is anticipated that this process will evolve rapidly over time. The hope is that both industry and the state insurance departments will also find the benefits of the process and that relying on this process and its reports will become more compelling as experience is gained. She said that evolution is something the Task Force and this Subgroup will be closely monitoring and reevaluating to help ensure they are moving towards their goal.
Ms. Ahrens said an important change is the addition of what will be referred to as an “MSA Associate Program,” which is aimed at addressing the concerns of state insurance regulators that more states need to be actively involved in participating in the actual MSA review rather than being limited or that the MSA team may be too small of a group of regulatory actuaries. While there would still be a core team, the proposed mentorship program recognizes that some state insurance departments may lack LTCI actuarial expertise and need involvement in a process like this to help staff to gain LTCI experience. It also recognizes limitations on state insurance departments’ resources but allows for meaningful participation with less time dedication, such as serving as a peer reviewer.

Ms. Ahrens said another key change is the addition of a sample MSA Advisory Report that reflects in more detail the type of information that will be included, understanding that each report will be customized to the filing and that the report may be refined over time.

b. **Heard Comments on the Exposure Draft of the Actuarial Section of the Draft MSA Framework**

Commissioner Conway said the actuarial section of the MSA Framework was exposed for a public comment period ending July 26. Five comment letters were received. Each commentor was asked to summarize key points from their letter.

Andrew Dalton (American Academy of Actuaries—Academy) summarized the Academy’s comment letter (Attachment Five) by outlining key areas of comments:

- Regarding “actuarial judgement,” the Academy recommends the use of the term “professional judgement.”
- Regarding the decision-making process of the MSA team, the Academy recommends additional information on: 1) how the three actuarial approaches are aggregated; 2) what happens if the Minnesota and Texas approaches conflict; 3) what mechanisms exist for dealing with “catch-up” and “transition” provisions in the Texas approach; 4) how differences in historical rate increases are handled; and 5) how long the MSA recommendation lasts.
- Regarding industry standards and benchmarking, the Academy recommends: 1) consultation with the filing actuary before determinations of “unreasonable or unsupported” assumptions are made; 2) consideration that some insurers use the same assumptions for rate increase and asset adequacy testing, as this may have implications for asset adequacy testing; 3) clarification on “industry average assumptions at the time of original pricing”; and 4) future explanation of the 58/85 test.
- Regarding non-actuarial considerations, these issues can have actuarial implications.
- The Academy’s comment letter includes several editorial points for consideration.

Mr. Dalton said the Academy appreciates the effort in developing the MSA Framework but has concerns that there may be little value if state insurance departments do not follow the MSA recommendations. The Academy recommends ongoing monitoring of state insurance departments’ use of the MSA recommendations.

Mr. Andersen said the letter was helpful and that many of the items for which the Academy is seeking clarification will be addressed in the MSA Framework. Regarding the need for state insurance department participation, he said he hopes that upon implementation of the MSA Framework, that over time, insurers and state insurance regulators will have a greater comfort level with the MSA process and that there will be more interaction with those insurers and state insurance regulators.

Ms. Ahrens said regarding the Academy’s comment that the lowest result would always be the recommendation, in Nebraska, they use elements of both the Texas and Minnesota approach. The intent to having two methods is not to choose the lowest or highest number or to have a prevailing method, but rather to choose the one that makes the most sense for the unique aspects of each rate filing.

Jan Graeber (American Council of Life Insurers—ACLI) summarized the joint comment letter from the ACLI and America’s Health Insurance Plans (AHIP) (Attachment Six). She said the ACLI and AHIP strongly support the work to achieve the Task Force’s charge. She said they view the actuarial section to be at the core of achieving the Task Force charge and that it deserves robust discussion though several rounds of exposure. Ms. Graeber said the ACLI and AHIP comments are high-level, and they look forward to providing more detailed comments in the future.

Ms. Graeber said the comments include a list of questions and issues. She said the MSA Framework should include transparency and consistency. The MSA Framework should include the rationale or criteria that determines the method the MSA team will apply. She said carriers need to understand the methodology to be used by the MSA team before the carriers prepare and make rate filings. She highlighted comments in the letter that note that certain provisions of the Texas method were not clearly included.
Ms. Graeber said the 2018 NAIC Long-Term Care (B) Pricing Subgroup’s paper, *Long-Term Care Insurance Approaches to Reviewing Premium Rate Increases* was result of deliberate and collaborative effort, where each method was fully vetted. She said any clarifications or modifications to the methodologies in that paper should only be made after the same type of robust discussion and vetting occurs as 2018. She encouraged the Task Force to charge the Long-Term Care Pricing (B) Subgroup or other actuarial group with re-vetting these methods before they are included in the MSA Framework.

Ms. Graeber said within the Minnesota approach, the term “anti-bait and switch adjustment” draws a legal conclusion and recommends the term “original assumption adjustment.”

Commissioner Conway said there are issues that remain to be addressed. He said there will be further opportunities for state insurance regulators and interested parties to comment on the MSA Framework and engage in solutions to issues. He said the MSA process will be evolving and the MSA team expects to learn and make improvements over time. He said it is important that the Subgroup keep moving this project forward as Commissioner White described in his discussion of the timeline.

Superintendent Toal said he supports the MSA effort. He said however, that there needs to be a reasonableness test beyond the actuarial assessment. He said a request for rate increases of 157%, 189% and 226% are not reasonable or sustainable to him or for policyholders. He said state insurance regulators need to have discussions with insurers to understand the rate increase and, if necessary, perform multistate examinations.

Commissioner Conway said the reasonableness aspect is in direct response to the fact that the focus cannot only be on the actuarial aspects. He said that some state laws require a reasonableness approach and that other states have caps that need to be considered.

Commissioner White said he believes many members of the Task Force are focused on making sure consumers are not absorbing high rate increases. The Task Force is working on ways to balance that priority with ensuring that insurers are able to pay claims in the future by receiving actuarially appropriate rate increases. He said one of the benefits of the MSA Framework are the methodologies that consider the types of concerns that Superintendent Toal raised. He said, however, that how we address these rate increases for consumers must be consistent from state-to-state. The Texas and Minnesota methods are designed so that insurers cannot recoup past losses. The methods are focused on ensuring the increases are prospective in nature. The Minnesota method also has a cost-sharing element that starts when a rate increase exceeds a certain amount. He said state insurance regulators need to scrutinize the insurers. The Valuation Analysis (E) Working Group is monitoring these insurers and ensuring they hold proper reserves. The data state insurance regulators have available is better than five years ago. Results may reflect that some insurers must adjust reserves for rising costs. When that happens, it is a reasonable consideration for the insurer to request to recoup part of that through rate increases.

Commissioner Richardson asked Ms. Graeber if “transparency” refers to the method specific to a company’s review. Ms. Graeber said she is referring to transparency of when the Texas or Minnesota methods are used in the MSA review. In 2018, examples under the two methods had similar results. She said that may not be true now. She said the insurer needs to know which method and criteria will be used to review their filing before they make their rate filing. She said Mr. Ahrens said Nebraska uses aspects of both methods based on the characteristics of the filing. She said insurers are looking for transparency on those criteria. Commissioner Richardson said that if the results of the methods ultimately are different, upfront transparency may not give insurers the results they are looking for. Commissioner Conway said the MSA team is going to apply aspects and consideration of both the Texas and Minnesota approaches, as each will have different characteristics. He said the MSA team will not be able to inform an insurer which approach is applied to an insurer before the filing is made. He said the MSA process is transparent in that it outlines the two approaches that will be used, as opposed to 56 jurisdictions using 56 different approaches. He said both state insurance regulators and insurers will continue to learn and improve this process over time.

Mr. Slape said significant rate increases are difficult, but state insurance regulators need to look at what led up to that rate increase request. If the reason is that insurers delayed making the request, the Texas and Minnesota methodologies require the company to subsidize that. If the reason for the rate increase is because prior rate increases were not approved, state insurance regulators need to reconcile that also. Perpetuating the problem will make it worse. He said this needs to be reconciled in a way that consumers still get the value they purchased and that they are in the best position to make their own decision. Cancellation rates are still low, which indicates consumers still value the product. Both industry and state insurance regulators own some of the problem, and hopefully state insurance regulators can find a solution so that regulators are not exacerbating the problem. Commissioner Conway said there is also good work being accomplished around RBOs, which is an additional component to finding a solution.
Superintendent Toal asked Ms. Graeber why an insurer would need to know which methodology the state insurance department would use. The insurer would include in their rate filing what the insurer has determined independently what is a sound and reasonable request. He asked why it would make a difference if the Texas or Minnesota methodology was used on a rate increase review. Ms. Graeber said it adds clarity to the process. Knowing the criteria and considerations will make for a more timely and efficient process if the insurer knows how the MSA team is going to review their filing. Superintendent Toal said he does not agree.

Commissioner Donelon asked if funded consumer representatives have provided comments. Commissioner Conway said no comment letters were received from funded consumer representatives.

Bonnie Burns (California Health Advocates—CHA) said she had comment on the RBO topics, but she does not have the skills to comment on the actuarial topics. She said if anything, she is counselling consumers who are receiving the rate increase who are upset over the high rate increase they are asked to pay. The consumers must make the decision to either pay the rate increase or to reduce benefits because they have no other choice. She said the state insurance regulators should keep this in mind when considering the actuarial issues. She said there is no reason an insurer should raise rates on the cost of care because they do not pay claims based on the cost of care; rather, it is a fixed amount. If they have 5% inflation protection, the insurer should have already calculated the cost of that protection. She said another actuarial group indicated cost of care is not driving the increase in premiums. Commissioner Conway said state insurance regulators are concerned about the consumer and have had similar difficult conversations with consumers who are facing rate increases.

Samuel Cuscovitch (FinancialMedic LLC) summarized his comment letter (Attachment Seven). He said his consumer group is a grassroots group looking at LTCI as part of financial independence and retirement issues. He said FinancialMedic reviewed an actuarial paper on “phantom premium” and approximately 250 filings in Connecticut. Based on this, his group determined that what takes place is essentially a “charge back.” FinancialMedic ran models to determine the extent of the charge backs, approximately 40%. He said his group’s comment letter includes an example of such. He said a problem is that the source of the real premium and the rate adjudication method is not disclosed by the insurers. He said his group considers these rate increases to be elder abuse. Without nailing down the rate adjudication method, he is unsure how the NAIC can embark on RBO initiatives or determine that there is cross-state subsidization. He said he thinks the rate adjudication method needs to be solidified and vetted before assuming RBOs or cross-state subsidization are high priorities.

Mr. Andersen said the issue of past losses was a key topic of the public actuarial meetings that spanned four to five years, so he thinks there is a good understanding of that issue, which is reflected in the Texas and Minnesota methodologies. He said when these policies were originally sold, the estimate of benefits was much lower than the actual benefits and the question has been how much of the gap is the responsibility of the insurer vs. passing it on to the consumer. He said even though premiums are higher, the value proposition still works in favor of the consumer. There is still value to the consumer, but now it is more expensive.

Ms. VanFleet summarized the Vermont comment letter (Attachment Eight). She said the comments address the wellness section of Appendix D of the MSA Framework. She said any offer associated with a rate action that involves the collection of data using artificial intelligence (AI) should clearly explain how information will be collected and used to avoid profiting and potential discriminatory actions on behalf of the insurer. Any offer to an insured tied to a rate increase should be supported with data showing why and how the rate impact is directly correlated to the offer. Rate increases add thousands of dollars to the consumer and are often a hardship for elderly consumers on fixed incomes and may not be able to consider their own best interest. The comment letter recommends keeping the wellness program offers separate from implementation of large rate increases (e.g., 10%–15%). Then, there would be no question that the consumer was coerced, rather than persuaded, to the part in the wellness program.

Ms. Lee said summarized the Washington comment letter (Attachment Nine). She said a few key criteria need to be addressed to achieve the maximum value of the MSA process. If the MSA process is not binding, it may affect the goal of nationwide uniformity and defeat the purposes of the MSA process. To minimize the differences across states, more states need to participate in the MSA rate review, and the use of the results should be mandatory. She asked if the rate changes recommended by the MSA team can be implemented by all states and meet existing state laws and rules. If not, she asked if this invalidates the actuarial work of the MSA team. Some states have capped an LTCI rate increase regardless of actuarial justification. If the MSA team recommends a higher rate increase than a particular state’s capped rate increase, the actuarial assumptions may no longer be valid. Also, those states without a rate cap will be continuing to subsidize the states with a rate cap. She said a key issue to address is if the MSA review can meet the proprietary or confidentiality requirements of the participating states. MSA rate reviews will be done by drawing on staff support from various state insurance departments. She asked if the MSA team can effectively maintain confidentiality and meet individual state’s proprietary information law. She highlighted other
comments in the letter regarding the actuarial considerations, specifically that the MSA report should not conflict with various states’ laws, rules, and procedures, and that the NAIC should conduct a study to determine whether the Minnesota and Texas approaches are consistent with states’ laws and rules. She said the methods in the MSA Framework are somewhat different from the review performed in Washington.

Having no further business, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup adjourned.

W:\National Meetings\2021\Summer\TF\LTC (EX) TF\_Final Minutes\LTCI(EX)TaskForce_081321_Minutes.doc
Draft: 7/12/21

Long-Term Care Insurance (EX) Task Force
Virtual Meeting
July 6, 2021

The Long-Term Care Insurance (EX) Task Force met July 6, 2021. The following Task Force members participated: Scott A. White, Chair (VA); Michael Conway, Vice Chair, represented by Sydney Sloan (CO); Jim L. Ridling (AL); Alan McClain (AR); Ricardo Lara represented by Perry Kupferman (CA); Andrew N. Mais (CT); Karima M. Woods represented by Philip Barlow (DC); Trinidad Navarro represented by Susan Jennette (DE); David Altmaier represented by John Reilly (FL); Colin M. Hayashida (HI); Doug Ommen represented by Andria Seip (IA); Dean L. Cameron (ID); Dana Popish Severinghaus (IL); Amy L. Beard represented by Scott Shofer (IN); Vicki Schmidt (KS); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Eric A. Cioppa (ME); Anita G. Fox represented by Karen Dennis (MI); Grace Arnold represented by Fred Andersen (MN); Mike Causey represented by Tracy Biehn (NC); Jon Godfread represented by John Arnold (ND); Eric Dunning represented by Rhonda Ahrens (NE); Russell Toal (NM); Barbara D. Richardson (NV); Judith L. French (OH); Glen Mulready (OK); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Raymond G. Farmer (SC); Larry D. Deiter represented by Jill Kruger (SD); Carter Lawrence (TN); Doug Slape (TX); Jonathan T. Pike represented by Tomasz Serbinowski (UT); Michael S. Pieciak represented by Anna Van Fleet (VT); Mike Kreidler (WA); Mark Afable (WI); James A. Dodrill (WV); and Jeff Rude (WY).

1. **Adopted its Spring National Meeting Minutes**

Commissioner Altman made a motion, seconded by Superintendent Toal, to adopt the Task Force’s April 9 minutes (see NAIC Proceedings – Spring 2021, Long-Term Care Insurance (EX) Task Force). The motion passed unanimously.

2. **Received the Report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup**

Mr. Andersen said the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup met June 22 to discuss comments received on the exposure draft of the operational sections of the Long-Term Care Insurance (LTCI) Multi-State Rate Review Framework (LTCI MSA Framework).

Mr. Andersen said during the call, Michigan provided comments that included, among other issues:

- Further clarification is needed regarding the role of the Interstate Insurance Product Regulation Commission (Compact).
- The benefits of the Multi-State Actuarial LTCI Rate Review (MSA) process to states will only be realized if most states use the process and rely on the MSA review results.
- Michigan agrees that the governing body for the MSA team should be the Long-Term Care Insurance (EX) Task Force, but it believes there needs to be a regulator-to-regulator technical group like the Financial Analysis (E) Working Group or the Valuation Analysis (E) Working Group that oversees the analytical process and formally approves the MSA Advisory Reports.
- Many states, including Michigan, may be unable to keep the MSA Advisory Report confidential if it is relied upon in the rate determination, as state confidentiality provisions often do not extend to rate review authority.

Mr. Andersen said a joint comment letter was received from the American Council of Life Insurers (ACLI) and America’s Health Insurance Plans (AHIP). He said their comment letter included, among other issues:

- Transparency of the MSA process is critical to its success. Insurers should receive the MSA Advisory Report to have meaningful conversations with state insurance regulators before the MSA Advisory Report is finalized. Insurers need to know which states relied on the MSA Advisory Report, and to what extent, in making their rate increase determinations.
- A majority of both insurers and states need to participate in the MSA process to ensure its success.
- There needs to be a balance between adequate insurer confidentiality and providing enough information to stakeholders in MSA rate reviews.
Mr. Andersen said a comment letter was received from the American Academy of Actuaries (Academy). He said the Academy’s comment letter included, among other issues:

- The MSA team should be supervised by actuaries qualified in LTCI, and they should be members of the Academy to help ensure compliance with Actuarial Standards of Practice (ASOPs).
- Participation of an adequate number of states is needed for the MSA process to be successful.
- The MSA process should be streamlined to collect all necessary rate review information without duplicate requests to insurers from states.

Mr. Andersen said the Subgroup found all the comments to be helpful, and it instructed the drafting group to address the comments. The drafting group will continue working on edits to the operational draft in response to the comments, and the Subgroup will re-release it for a short comment period when it is ready. The next version is expected by the Summer National Meeting.

Mr. Andersen said the first draft of the actuarial aspects of the LTCI MSA Framework was released for a 45-day public comment period ending July 26. The draft provides complete details on how the MSA team will evaluate a submitted rate proposal under the Texas and Minnesota actuarial methodologies.

Commissioner Richardson made a motion, seconded by Superintendent Toal, to receive the report of the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup. The motion passed unanimously.

3. Received the Report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup

Commissioner Altman said the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup met May 4. During this meeting, the Subgroup began work on its charge of, “potential development of a process to evaluate innovative options that allow for insurers to offer benefits that lessen the likelihood of an insured needing long-term care services, including evaluation of the suitability of and regulatory barriers to proposed options.”

Commissioner Altman said the Subgroup heard four industry presentations on LTCI innovation and wellness programs. The presenters were invited to assist the Subgroup with identifying potential issues with offering wellness programs to policyholders with in-force LTCI policies. The presentations touched on issues that insurers need to consider before implementing a wellness program; experiences with and lessons learned from a pilot program offered by an insurer; a hypothetical view of what the future state of in-home long-term care (LTC) services might look like; and issues related to unfair discrimination concerns, rebating concerns, and wellness programs as they relate to tax qualified LTCI policies.

Commissioner Altman said the Subgroup exposed a draft Reduced Benefit Options (RBO) Consumer Notices Checklist for a 30-day public comment period ending July 21. The checklist is intended to establish a consistent approach to drafting and reviewing LTCI RBO policyholder communications. The checklist can be used by states for guidance, and it is not required to be used for the review of insurer communications with policyholders. The next meeting of the Subgroup is July 22.

Commissioner Kreidler made a motion, seconded by Director Cameron, to receive the report of the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup. The motion passed unanimously.

Having no further business, the Long-Term Care Insurance (EX) Task Force adjourned.
The Long-Term Care Insurance Multistate Rate Review (EX) Subgroup met June 22, 2021. The following Subgroup members participated: Michael Conway, Chair (CO); Paul Lombardo (CT); Philip Barlow (DC); Benjamin Ben (FL); Stephen Chamblee (IN); Andria Seip (IA); Rich Piazza (LA); Karen Dennis (MI); Fred Andersen (MN); Rhonda Ahrens (NE); Russel Toal (NM); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Andrew Dvorine (SC); Tomasz Serbinowski (UT); Bob Grissom (VA); Anna Van Fleet (VT); and Mike Kreidler (WA). Also participating was: Perry Kupferman (CA).

1. Discussed Comments on a Framework Draft

Mr. Conway said the Subgroup received comments on an exposure of the operational sections of a draft Long-Term Care Insurance (LTCI) Multi-State Rate Review Framework (Framework) from the Michigan Department of Insurance and Financial Services (DIFS), the American Academy of Actuaries (Academy), the American Council of Life Insurers (ACLI), and America’s Health Insurance Plans (AHIP). He said the Subgroup also exposed the actuarial sections of the Framework with comments due July 26, and another meeting will be held to discuss comments received on the actuarial sections.

Mr. Conway said the Subgroup has been discussing how the Advisory Reports (Reports) produced by the Multi-State Actuarial LTCI Rate Review Team (MSA Team) will be kept confidential, whether they will be kept confidential, and whether they should be kept confidential. He said as states rely on the Reports in making rate increase decisions, it will be necessary to make public the aspects of the Reports state insurance regulators relied upon to inform interested parties of the reasoning behind rate increase decisions.

Ms. Dennis gave a summary of comments submitted by the Michigan DIFS (Attachment Two-A). She said Michigan seeks further clarification regarding the authority of the Interstate Insurance Product Regulation Commission (Compact) to accept and maintain filings under the MSA review. She said if the Compact infrastructure is being used simply to facilitate sharing and monitoring among states, Michigan recommends that a separate System for Electronic Rate and Form Filing (SERFF) area be created outside of the Compact that permits the submission of MSA filings without accidentally falling under the authority of the Compact.

Ms. Dennis said Michigan has concerns that the MSA review process may duplicate rate review efforts made by states if the work of the MSA Team is not coordinated with individual states. She said many states, including Michigan, may be unable to keep the Reports confidential if they are relied upon in the rate determination, as state confidentiality statutes often do not extend to rate review authority. She said the benefits of the MSA process to states will be realized only if the majority of states use the process and rely on the MSA review results.

Ms. Dennis said Michigan agrees that the governing body for the MSA Team and process should be the existing Long-Term Care Insurance (EX) Task Force, but it suggested that there needs to be an active regulator-to-regulator technical group, similar to the Financial Analysis (E) Working Group or the Valuation Analysis (E) Working Group, to oversee the analytical process and formally approve the Reports.

Mr. Conway said the Subgroup agrees that the success of the MSA process depends on having enough states participate, and the Subgroup will continue to research and address issues related to the confidentiality of the Reports. He said the Subgroup will continue work on developing a structure for governance of the MSA process.

Jan Graeber (ACLI) gave a summary of comments (Attachment Two-B) submitted by the ACLI and AHIP. Mr. Conway asked if the ACLI and AHIP are requesting that the Reports’ confidentiality be based on each state’s respective confidentiality laws. Ms. Graeber said that depends on the granularity of the contents of the Reports. She said any information that is normally treated as confidential in a rate filing should not be in a public version of the Reports.

Andrew Dalton (Milliman) gave a summary of comments (Attachment Two-C) submitted by the Academy. Ms. Ahrens said she agrees that at least one key member of the MSA Team should be a member of the Academy, but she also envisions the MSA process as a vehicle for developing actuarial resources through mentoring people that are not yet Academy members. Mr.
Kupferman said rate increases on group LTCI blocks should be reviewed under the MSA process. Mr. Conway said the Subgroup will discuss the inclusion of group blocks in the review process, and he does not think their review was intended to be excluded.

Mr. Conway said the Subgroup will continue working on edits to the operational sections of the draft in response to the comments, and it will then re-expose it for additional comment.

Having no further business, the Long-Term Care Insurance Multistate Rate Review (EX) Subgroup adjourned.
5/24/2021
Good morning,

Please see Michigan’s comments below:

(1) **General comment:** We seek further clarification regarding the Compact’s authority to accept and maintain filings under the MSA review. We also seek additional detail regarding how the process for requesting an MSA review is done, e.g. how insurers are advised about the process, how states are notified. If the Compact infrastructure is being used simply to facilitate sharing and monitoring among states, we would recommend that a separate SERFF area-instance be made outside of the Compact that permits the submission of MSA filings without accidentally falling under the authority of the Compact.

(2) **Section I-D (page 4):** The benefit to states will only be realized if the majority of states use the process and rely on the MSA Review results. If only the states that have historically approved rate requests utilize this “program”, there may be little or no change to the current situation. The benefit for insurers may be impacted by delays in ability to implement needed increases. It appears the MSA review will take approximately 35 days after which the insurer submits their rate increase filing to each state. Since each state has varying statutory review periods, some states may take action more quickly than other states. Any delay in approving a rate increase, could result in the need for additional rate increases in a shorter amount of time.

(3) **Section I-E(4) (page 6):** Many states, including Michigan, may be unable to keep the MSA report confidential if it is relied upon in the rate determination as state confidentiality provisions often do not extend to rate review authority. The task force will want to consider the implications of the report not being able to be held confidential.

(4) **Section I-F (page 6):** We agree the governing body for the MSA Team should be the LTC Insurance (EX) task force, but believe strongly there needs to be a regulator-to-regulator subgroup like FAWG or VAWG that oversees the process and formally approves the MSA Advisory Reports. This subgroup could include testimony from the company and permit appeals as necessary. It would also permit affected states to participate and better understand the MSA report’s conclusions. The FAWG and VAWG models have gained broad approval from both regulators and industry and would seem to be the most appropriate structure for the MSA Team. This structure would also protect the NAIC and the MSA Team from any liability arising from issuing the report, especially in the event of company insolvency.

(5) **Section III-A (page 8):** We assume the second bullet point requires 5,000 policyholders nationwide. We would suggest adding “nationwide” at the end of the bullet for clarity.

(6) **Section III-B (page 9):** We seek more detail on the fee schedule proposed for the MSA Review, in particular whether the payment is made by the insurer or the state and whether the NAIC or the respective MSA Team receive the payment. Whether it is a reimbursement for fees incurred during the course of an examination or fees paid by the insurer for receipt and use of the report has contractual implications. If the authority to issue the report is derived from the task force or subgroup, the fees appear to be more like fee reimbursement for an examination.

(7) **Section III-B (page 9):** We seek to clarify that the rate filing include the SERFF tracking number for the associated/impacted form filing(s).

(8) **Section III-C (page 9):** The certification limits misuse of the report by the company and limits an insurer’s authority to challenge the report unless it is used by the states in their review and determination. Please advise if states who consent to the use of the MSA report are required to accept the report as-is. If so we would further recommend the regulator to regulator subgroup structure to allow interested/affected states to participate in the final review and to maintain
the report within the standard examination process, thereby avoiding the need to have states consent to the use of the MSA Review or Advisory Report.

(9) **Section VII (pages 12-13):** The MSA Report appears to be an actuarial communication. We would encourage the MSA Team to review the applicable actuarial standards of practice to ensure appropriate disclosures are made within the reports, including references to how the report complies with the standards. We would also encourage the purpose and use to be separated from the Disclaimers section for clarity.

(10)**Section VIII-Appendix B (page 13):** We seek clarification regarding if the checklist is confidential or can individual states incorporate it into their respective filing requirements. This would ensure additional consistency across LTC rate filings, whether or not submitted to the MSA Team.

Thank you,

*Karen Dennis, Director*

May 24, 2021

Commissioner Michael Conway
Chairman, NAIC LTC Multi-State Rate Review (EX) Subgroup
Colorado Insurance Department

Dear Commissioner Conway and Subgroup Members,

The American Council of Life Insurers (ACLI) and the American Association of Health Insurance Plans (AHIP) strongly support the work of the NAIC Long-Term Care (EX) Task Force in achieving its charge of developing a consistent national approach for reviewing long-term care (LTC) rates and identifying options for consumers to modify benefits when faced with a premium increase on their LTC policy. We applaud the commitment of state insurance commissioners and LTC subject matter experts from state insurance departments for their time and effort spent on addressing this important issue. As an industry, we understand that the work has presented challenges and we remain committed to working with you to address these challenges.

Thank you for the opportunity to comment on the draft Operational Section of the Long-Term Care Insurance Multi-State Rate Review Framework (Framework), exposed by the NAIC LTC (EX) Task Force on April 9, 2021. While we appreciate this opportunity to comment, it is difficult to provide complete comments without the ability to review the document in its entirety, specifically, the Actuarial Section, which we believe will be the core of the Framework document. As a result, our comments at this time are more conceptual in nature. We look forward to an opportunity to provide more detailed comments when the entire Framework document is complete.

**Executive Summary**

We strongly support the Multi-State Rate Review (MSRR) concept as a strategy to address the challenges facing industry, consumers, regulators and the overall LTC market. Our comments are grouped into the following areas, which are key to the stability of the LTC market and paramount to the success of the Task Force in achieving its charge.

1. **Transparency and Consistency of:**
   - the Multi-state Actuarial (MSA) Review Process, and

---

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
May 24, 2021

- the methodology for determining actuarially appropriate rate increases that achieve and preserve equity among policyholders in all states;

2. State and Insurer Participation in the MSA Review Process

3. Confidentiality of the Insurer’s Rate Increase Proposal

We believe it is important to view each of the above areas in light of, and assessed against the Task Force’s charge to:

*Develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.*

**Transparency and Consistency**

Insurers best protect their policyholders when they can fulfill the obligations they made to these policyholders. This is accomplished when insurers have some level of predictability in their ability to effectively manage their LTC business over time. At its core, this level of predictability can only be achieved through transparency and consistency within the MSA Review Process. We encourage the MSRR subgroup to include elements for achieving greater transparency and predictability within the Framework document. We have identified the following elements that will enhance transparency and predictability within the MSA Review Process:

*Insurer Receipt of the MSA Advisory Report and Recommendation.*

The MSA Review Process will present significant challenges if the insurer does not receive the MSA Advisory Report. Without receipt of the recommendation and report, there will be an inequality in the parties’ knowledge about the actuarial analysis used and, therefore, potentially, confidence in the recommended rate table. Without understanding the actuarial analysis underlying the MSA Team recommendation, insurers will be unable to engage in a meaningful, productive dialogue with the MSA Team and participating states about the application of that analysis to the insurer’s particular block of business.

*Insurer and MSA Team Engagement*

Insurers are in the best position to provide insights and information about their blocks of business. We encourage the MSRR subgroup to include an opportunity for insurers to review the recommendation and interact with the MSA Team recommendation before it is final. Without this step, if an insurer disagrees with the MSA Team recommendation, it will be necessary for the insurer to appeal to each individual state. This will add a significant amount of time to the entire process and reduce efficiency.

In addition, including industry in the webinars with other participating states will enable questions to be addressed in a consistent and efficient manner.

We suggest language consistent with the language below, be added to Section IV, Subsection B – Completion of the MSA Review Process

*Information Sharing Between the MSA Team and the Insurer*

Throughout the MSA Team review, the MSA Team will communicate with the insurer and address any questions from the insurer about the MSA Team’s analysis and review. Prior
May 24, 2021

To finalizing the MSA Advisory Report and Recommendation, the insurer will be given an opportunity to review the report and recommendation. If the MSA Team recommendation differs from the rate proposal submitted by the insurer, the insurer will be given the opportunity to provide additional feedback and support of its proposal.

State Reliance on the MSA Team Recommendation

We recognize that the MSA recommendation is that – a recommendation – and that each state retains its ability to review or approve an insurer’s rate increase filing. Yet, the process should enable insurers to understand which states are relying on the MSA recommendation and to what extent. If a state deviates from the MSA recommendation, the reason should be clearly explained to the insurer. At a minimum, this level of disclosure will provide insight into the consistencies (or inconsistencies) across states compared to the MSA recommendation, resulting in a higher level of transparency and consistency within the process.

We suggest that language consistent with the following be added to Section I. Subsection F. - Governing Body and Role of the NAIC Long-Term Care Insurance (EX) Task Force:

At least semi-annually, the Task Force will disclose a list of the rate increase filings reviewed to all stakeholders, along with the following information for each:

- Identification of the states that participated in the MSA Review Process for each filing, and
- A description of the general manner in which each participating state utilized the MSA Team’s review and recommendation to make decisions on an insurer’s rate increase filing, e.g., Adoption (adoption of the MSA Team’s review and recommendation); Consideration (active consideration of the MSA Team’s review and recommendation as a supplement to the state’s separate review process); Receipt Only (no reliance on MSA Team’s review and recommendation in the state’s review process).

At least annually, and with input from state regulators, industry, and other stakeholders, the Task Force will review the Framework document and amend it, as necessary, to refine the MSA Review Process.

We believe that this level of transparency could serve as a first step in encouraging the participation of both states and insurers.

Methodology Used in the MSA Team Recommendation

The Framework states that the MSA Team’s review of rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. In addition, the MSA Team will apply the Minnesota (Blended If-Knew/Make-Up) and Texas (Prospective Present Value) approaches, as described in the 2018 NAIC LTC Pricing Subgroup’s paper – “Long-term Care Insurance Approaches to Reviewing Premium Rate Increases”, to calculate recommended, approvable rate increases. We suggest that the Actuarial Section of the final Framework document outline specific reasons for use of one method over another.

A primary component leading to the success of the MSA Review Process is achieving an adequate rate level for policyholders in all states. As proposed, the process also gives states the discretion to continue to apply state-specific non-actuarial restrictions and caps on rate
May 24, 2021

increase amounts. Again, we recognize the independence of each state’s authority, but allowing states to impose artificial rate caps on what the MSA Team has determined to be an actuarially justified rate could perpetuate the historical discrepancies between states, which will not address cross-state inequities. It will also undermine the Task Force’s charge to develop “a consistent national approach” to achieve “actuarially appropriate increases.”

To ensure the success of the MSA Review Process and ensure that the Task Force achieve its charge, the MSA Team should set forth its expectation that a state will follow the MSA recommendation and not impose artificial, state-specific rate restrictions or caps unless the state justifies those requirements as being actuarially justified and necessary, or specifically mandated by state law.

It should be recognized that state restrictions or caps to actuarially justified rate increases will require future increases to be filed and will result in higher actuarially justified ultimate premium rates for insureds in that state in order to maintain equity over the life of the policy.

In addition, the methodology used by the MSA Team in determining its recommendation must be actuarially sound and acknowledge an insurer’s ability to achieve and preserve equity among policyholders in all states over the lifetime of the policy. Transparency in this piece of the process will result in greater consistency and confidence in outcomes, which is key to the Task Force achieving its charge.

State and Insurer Participation

An adequate level of participation from both insurers and states is central to the success of the MSA Review Process and to the Task Force achieving its charge to ensure a more consistent national approach to reviewing and approving actuarially justified rate increases on LTC blocks of business. Without sufficient state commitment and participation in the MSA Review Process, along with state reliance on the information provided to and reviewed by the MSA Team, there is no incentive for insurers to use the MSA Review Process. Increased insurer participation will result if there is a commitment by states to participate in the MSA Review Process and rely on the MSA Team recommendation.

Lack of state and insurer participation could result in failure of the MSA Review Process and the Task Force charge. Failure of the Task Force charge will result in continued significant inconsistencies in state level actions on rate increases and an increased potential for future insolvencies and market disruption. We hope that there are not future insolvencies, but the need to act broadly and strategically to reduce that risk should not be ignored. Any future insolvency could have significant ramifications to state based regulation.

Confidentiality

All materials submitted by the insurer to the MSA Team, along with communications between the insurer and the MSA Team, the MSA Team’s analysis, recommendation and Advisory Report should be maintained as confidential. Once finalized, the MSA Advisory Report and Recommendation should be submitted directly by the MSA Team to each participating state where the insurer files its rate increase request. Once submitted to each participating state, the MSA Advisory Report and Recommendation should be maintained by each state as confidential. Any materials submitted directly to the participating state by the insurer in support of its rate increase request, should be afforded the same level of confidentiality as LTC increase requests submitted to that state outside of the MSA Review Process.
May 24, 2021

CONCLUSION

We share your fundamental concern of ensuring that policyholders receive the benefit of their insurance policies when they need it. Maintaining a guaranteed renewable product with limited or no rate adjustment flexibility is not sustainable. Insurers want to be part of a stable and vibrant market, one where insurers are willing to stay in the market, and hopefully one where others want to return to or join the market.

We recognize that the MSA Review Process is new and lessons learned over time will serve to improve and refine the overall process. We appreciate the MSRR subgroup’s hard work and analysis to identify and develop key parameters for an MSA Review Process to review and approve actuarially justified rate increases. Success of the MSA Review Process will help to ensure market stability.

Thank you for the opportunity to provide these comments. We will submit more detailed comments once the Framework document is exposed in its entirety. ACLI/AHIP welcomes the opportunity to discuss our comments with you, and we welcome the opportunity to contribute to additional discussion regarding the comments raised in our letter.

Sincerely,

Jan M. Graeber
Senior Actuary, ACLI

Ray Nelson

Attn: Jane Koenigsman, Senior Manager, Life and Health Financial Analysis

Re: Exposure Draft: Long-Term Care Insurance (LTCI) Multistate Rate Review Framework

Dear Commissioners White and Conway:

The American Academy of Actuaries (Academy)\(^1\) Long-Term Care Reform Subcommittee appreciates the opportunity to offer comments on the exposure draft Long-Term Care Insurance Multi-State Rate Review Framework (“Framework”) released April 9, 2021.

We would first like to emphasize the importance of actuarial input from the beginning of any process involving the consideration, design, and evaluation of a potential long-term care (LTC) policy approach. Actuaries are uniquely qualified according to their professional standards and play a crucial role in the financing and design of LTC financing systems—from private long-term care insurance (LTCI) to public programs that provide LTC benefits. Actuaries have specialized expertise in managing the risk of adverse selection in insurance coverages, the ability to recognize and incorporate uncertainty into cost projections and premiums, and experience in evaluating the long-term solvency and sustainability of public and private insurance programs.

An actuarial perspective can provide a basis for exploration of new and innovative review frameworks. We would refer the task force to two specific publications for examples of such perspective. One is an October 2018 Academy issue brief on considerations for treatment of past losses in rate increase requests for long-term care insurance.\(^2\) The second is a June 2016 Academy issue brief to enhance understanding of what is leading to significant rate increases, examine how the need for a rate increase is determined, discuss the effects of increases on various stakeholders, and explore alternatives to premium rate increases.\(^3\)

---

\(^{1}\) The American Academy of Actuaries is a 19,500-member professional association whose mission is to serve the public and the U.S. actuarial profession. For more than 50 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

\(^{2}\) American Academy of Actuaries, *Long-Term Care Insurance: Considerations for Treatment of Past Losses in Rate Increase Requests*, October 2018.

\(^{3}\) American Academy of Actuaries, *Understanding Premium Rate Increases on Private Long-Term Care Insurance Policyholders*, June 2016.
The remainder of this letter provides our comments on the Framework, grouped into four categories.

**Objectives of Multi-State Actuarial (MSA) Review**

The Long-Term Care Reform Subcommittee appreciates the NAIC’s objective of “developing a consistent national approach for reviewing current LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner.”

The multi-state actuarial LTCI rate review (“MSA Review”) proposed in the Framework has the potential to create a robust actuarial review, independent of state-specific considerations, to advance the stated objective. However, it will be critical to consider detailed proposals for Actuarial Review, Reduced Benefit Options, and Non-Actuarial Considerations, which appear only as “placeholders” in the draft Framework. The subcommittee is reserving comment on Appendix B of the draft until its information requirements can be considered in context with exposure drafts of the placeholder sections.

We suggest that the Framework include a description of the Minnesota and Texas approaches applied by the MSA Review team, or a citation to specific documents.

It would be helpful for future evaluation if the NAIC could release an analysis or summary of the pilot program referenced in the draft Framework. In particular, what criteria have been or will be used to evaluate the success of the MSA Review process? If an MSA Review process is adopted, will there be future provision for feedback from industry participants, consumers, and other stakeholders, in addition to regulators?

**Actuarial Qualifications**

The subcommittee recognizes the potential benefit to state insurance regulators of the MSA Review process in developing and expanding specific LTCI actuarial expertise among the regulatory community. Having one or more suitably experienced and qualified actuaries participate in and supervise the work of the MSA Team will be important to the current and future viability of the process, providing opportunities for additional actuaries to meet the requirements of the U.S. Qualification Standards applicable to members of the American Academy of Actuaries and other U.S. actuarial organizations as they relate to LTCI. We recommend that at least one of the qualified actuaries signing off on an MSA Review be a member of the American Academy of Actuaries, in addition to the requirements currently proposed in the Framework for membership on the MSA Team.

Qualified actuaries will be able to assure that the work of the MSA Team complies with appropriate actuarial standards of practice (ASOPs). We believe it will be important for the MSA Team’s report to discuss the reasonableness of actuarial projections and to disclose the impacts of any non-actuarial factors that were considered.
State Participation and Block Eligibility

The Framework defines states as either “impacted” or “participating.” The Framework allows states to choose to be a Participating State in the MSA Review. Further, states that choose to participate can choose whether to follow the recommendation of the MSA Review. This maintains the states’ authority over rate filings. However, it means that the MSA Review does not create finality in the filing process. The Framework may not encourage insurers to use the MSA Review process if it is believed to add an additional layer of filing review without shortening the approval process on a state-by-state basis.

Several criteria are provided for a rate proposal to be eligible for an MSA Review. It is unclear whether insurers would be allowed to pool the experience of similar policy forms within or across legal entities when submitting a filing for an LTCI product. The subcommittee suggests that pooling be allowed where there is adequate homogeneity across the pooled policies. This approach would be consistent with current approaches taken by most state regulators and would allow for blocks with prior rate increases to be pooled in a similar manner as the prior filings.

It is unclear whether rate increases on group LTCI blocks would be reviewed under the MSA Review. The subcommittee believes that this should be clarified. Adjustments to the definitions of Impacted State and Participating State may be needed because group certificates can be issued in a state where the state does not have jurisdiction over the rates.

MSA Review Process

One of the stated goals of the MSA Review is to provide timely rate decisions. To the extent that there are any duplicative or redundant steps in the process, we recommend that they be removed or combined. For example, if several Participating States require a certain piece of information that the MSA Review team believes is valuable, that information should be added to the list of information required for an MSA Review. Additionally, if Participating States agree that the listing of information for an MSA Review (as outlined in Appendix B) is exhaustive and no further requests for information are needed as part of the state review, the filing process could be streamlined.

The Framework implies that insurers will have access to the final results of the MSA Review, which will be outlined in an MSA Advisory Report. It does not appear that insurers will have access to the draft report. Prior to the final report being provided to the insurer, the draft report will be shared with Participating States. We believe it is important that insurers have an opportunity to review the draft results of the MSA Review in order to provide clarifications, correct any misunderstandings, or dispute the recommendation of the MSA Review. The subcommittee believes it would be beneficial for the process for the Framework to include discussion of an appeal process that would be available to insurers to dispute the findings of the MSA Review. Insurers would retain the right to withdraw a filing from the MSA Review process, without prejudice to a rate filing in any individual state.

Section III.C of the Framework describes a required certification by an officer of the insurer requesting an MSA Review to abide by certain conditions. The subcommittee suggests that the second sentence of the first paragraph be deleted.
The Framework describes MSA Review team members maintaining confidentiality of MSA Advisory Reports and other information. However, if the MSA Advisory Report is to be included in the filing record, or filed by the insurer with Participating States, we believe the report would become public based on limited confidentiality allowed by some states.

Conclusion

Thank you for the opportunity to provide input on the development of the MSA Review process. The Academy’s LTC Reform Subcommittee looks forward to providing comments on the complete Framework document when it becomes available. The Subcommittee thanks members who participated in the drafting of this comment letter, including J. Patrick Kinney, MAAA, FSA; Mike Bergerson, MAAA, FSA; Steve Schoonveld, MAAA, FSA; Mark Billingsley, MAAA, FSA; Jim Glickman, MAAA, FSA, FCA; Zenaida Samaniego, MAAA, FSA; and Perry Kupferman, MAAA, FSA.

*****

We would welcome the opportunity to speak with you in more detail and answer any questions you have regarding these comments or on other topics. If you have any questions or would like to discuss further, please contact Matthew Williams, the Academy’s senior health policy analyst, at williams@actuary.org.

Sincerely,

Andrew H. Dalton, MAAA, FSA
Vice Chairperson, LTC Reform Subcommittee
American Academy of Actuaries

CC: Eric King, Health Actuary, NAIC
Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup
Virtual Meeting
July 28, 2021

The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met July 28, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Sarah Bailey (AK); Perry Kupferman (CA); Susan Jennette (DE); Andria Seip (IA); Dana Popish Severinghaus (IL); Rich Piazza (LA); Larry D. Deiter (SD); Brian Hoffmeister (TN); Tomasz Serbinowski (UT); Scott A. White (VA); Anna Van Fleet (VT); Melanie Anderson (WA); and Joylynn Fix (WV).

1. **Discussed Comments Received on a Draft RBO Consumer Notices Checklist.**

Ms. Van Fleet presented comment letters received (Attachment Three-A, Attachment Three-B, Attachment Three-C, Attachment Three-D) in response to an exposure of a draft Reduced Benefit Options (RBO) Consumer Notices Checklist (Checklist). She presented a version of the draft (Attachment Three-E) that incorporates the comments, with notes on the proposed treatment of each comment.

Discussion of the comments ended with question 39 of the Checklist. Commissioner Altman said the Subgroup will schedule another meeting to finish discussion of the comments.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.
The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met July 22, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Lori K. Wing-Heir (AK); Perry Kupferman (CA); Trinidad Navarro (DE); Andria Seip (IA); Rich Piazza (LA); Karen Dennis (MI); Fred Andersen (MN); Rhonda Ahrens (NE); Larry D. Deiter (SD); Carter Lawrence (TN); Tomasz Serbinowski (UT); Scott A. White and Thomas J. Sanford (VA); and Anna Van Fleet (VT).

1. Exposed an LTCI Innovation and Wellness Program Issues Draft

Mr. Andersen presented a draft document (Attachment Three-F) that discusses issues related to long-term care insurance (LTCI) wellness programs. He said the Subgroup wants to receive public feedback on the document, have collaborative discussions about key issues, and revise the document accordingly. He said the Subgroup intends to provide clarity on the key issues by the end of the year.

Mr. Andersen gave an overview of the draft’s background section, Section 1, Section 3, and Section 7. He said industry tax experts and the federal government will be consulted to add to Section 5. He said Section 6, Section 7, and Section 9 are still being developed. Mr. Sanford gave an overview of Section 2 and Section 4. Ms. Logue gave an overview of Section 8.

The Subgroup agreed to expose the document for a 45-day public comment period ending Sept. 5.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.
The Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup of the Long-Term Care Insurance (EX) Task Force met May 4, 2021. The following Subgroup members participated: Jessica K. Altman, Chair, and Shannen Logue (PA); Lori K. Wing-Heir (AK); Perry Kupferman (CA); Trinidad Navarro (DE); Andria Seip (IA); Rich Piazza (LA); Karen Dennis (MI); Fred Andersen (MN); Larry D. Deiter (SD); Carter Lawrence (TN); Tomasz Serbinowski (UT); Bob Grissom (VA); Anna Van Fleet (VT); and Joylynn Fix (WV).

1. Heard Presentations on LTCI Innovation and Wellness Programs

Mr. Andersen said the purpose of the meeting is to help identify potential issues with offering wellness programs to policyholders with in-force long-term care insurance (LTCI) policies. He said the Subgroup plans to identify all such issues and begin addressing the issues over the following few weeks with the assistance of state insurance regulators and interested parties. He said the primary goal of implementing wellness programs is to improve policyholder health and lower claim costs for insurers, leading to fewer and lower rate increases and less insurer financial distress.

Vince Bodnar (Bain Capital Insurance) said he has been working with several carriers on thinking through various wellness program offerings and will give an overview of where industry stands with implementing these programs. He said wellness programs are common with health insurance (HI) and that LTCI wellness programs are not the same as those for HI. He said LTCI is generally purchased by younger people and kept for decades before it is used. He said there is much known through initial underwriting about an LTCI policyholder’s health at issue, but much less is known decades later at the time when claims are likely. He said LTCI carriers do not have much information about what sorts of interventions are helpful for LTCI policyholders, so they must look to other programs, such as Medicaid Managed Long Term Services and Supports (MMLTSS) and continuing care retirement communities (CCRC) for ideas that may be transferrable to LTCI. He said another handicap for carriers is that there are no long-term care (LTC) provider networks similar to those for HI. He said there are roughly 200,000 to 300,000 people on claim nationwide out of approximately 6,000,000 policyholders, so the volume needed to support provider networks is not available.

Mr. Bodnar said interest in wellness programs has increased greatly over the past two years. He said most carriers now have staff assigned to investigate wellness program issues and are beginning to offer pilot wellness programs to policyholders. He said a recent Intercompany Long Term Care Insurance (ILTCI) conference featured an LTCI wellness track, which included nine different sessions.

Mr. Bodnar said industry has been careful about what these programs are called so there is not a perception that these are efforts to avoid paying claims. He said the programs are being portrayed as ways to enhance policyholder health and to help them age in place if so desired.

Mr. Bodnar said there is an emerging provider service landscape that has made itself known over the past year or so. He said it is composed of providers that already serve MMLTSS and CCRC customers. He said there are also emerging financial technology, InsurTech and health technology providers that are showcasing technology and data analytic services for wellness programs. He said carriers are becoming aware of these providers and what services are offered.

Mr. Bodnar said some carriers are just beginning to become aware of what services can be provided, while others are farther along and are conducting pilots for working wellness programs. He said currently active pilots can be divided into two categories. He said the first focuses on the pre-claim population. He said carriers of this type tend to be holistic in their approach and do not center on any particular service, but rather they reach out to policyholders to assess their needs with home modifications or durable medical equipment. He said these programs usually divide their policyholder populations into a control group that is not offered the program and a test group that is offered the program. He said the second category is for the on-claim population, and they are designed to provide coordination of care for the claimant. He said these pilots are most concerned with those receiving care at home and minimizing transfers from home care to more expensive facility care. He said several of the carriers offering these pilot programs have received positive feedback from policyholders.
Charlie Philbrook (John Hancock) said one of his responsibilities at John Hancock is the company’s LTC wellness offering, the Living Independently and Falls-free Together (LIFT) program. He said it is a pilot program that has been in operation for a few years and is nearing its end. He said offers for the program are mailed to policyholders, followed with phone calls to them to increase participation. He said mailings were limited to policyholders ages 85 and older, as they are more likely to experience falls than younger policyholders. He said once the offer is accepted, a health coach visits the policyholder for a face-to-face assessment, with the primary goal of improving the insured’s physical environment. He said this includes looking for loose rugs and other slip and fall hazards, grab bars in the bathroom, and shower seats. He said the program has evolved to where questions are asked about nutritional and sleep habits, but the focus is still mainly on the insured’s physical environment. He said an action plan is then provided to the insured that lists ways to improve the physical environment, and then follow-up calls are made every three months to check on progress towards completing the plan. He said the program ends after one year. He said the assessment and action plan are free to the insured, but any modifications to their home are the insured’s responsibility.

Mr. Philbrook said the LIFT program began in 2008 when John Hancock and another carrier partnered with a vendor and participated in a pilot program that was funded by the U.S. Department of Health and Human Services (DHHS). He said roughly 1,000 policyholders participated in the pilot, and the program ended and was not reinstated until three years ago when it was resumed by John Hancock.

Mr. Philbrook said the success of the pilot is measured in terms of if a positive impact is made on customers’ lives and if a positive impact is made on John Hancock by delaying claims by making home environments safer. He said nothing but positive feedback about the program has been received from customers. He said the health coaches gain the insureds’ trust, and there are stories of insureds wanting to speak with a health coach more frequently than every three months. He said despite all the positive feedback, only about 10% of eligible insureds enroll in the program. He said this acceptance rate is common with other insurers offering similar programs.

Mr. Philbrook said it takes at least five years for experience to emerge that will enable an insurer to measure the impact on claims that a wellness program may have. He said an insurer should examine reductions in claim incidence over the first year or two, and then examine impacts to claim continuance over the next four or five years. He said John Hancock is only just beginning to scratch the surface of its pilot claims experience, as the program has only been operational for about three years.

Mr. Philbrook said there is the possibility of downside risk from a wellness program to an insurer in the form of decreased mortality due to better insured health and fewer policyholder lapses due to the enhanced insured engagement created by the program.

Mr. Philbrook said John Hancock is examining whether there are increases in claim duration that may be caused by delaying claim incidence.

Mr. Philbrook said three things have been learned from the pilot program. He said the program was likely too narrowly focused on the insureds’ physical environments. He said more effort should be made by John Hancock to assist in implementing the action plan, such as installing grab bars in the insured’s home, or setting up home meal deliveries. He said there was a selection bias in that healthier insureds tended to enroll in the program more often the less-healthy ones, and it is unhealthy people that will benefit most from a wellness program.

Mike Gugig (Transamerica) said he will give an overview of what the future state of home care might look like in the next few years, particularly given rapid technological advances. He said he wants to give a sense of how care coordinated between providers and insurers may work but be clear that insurers cannot accomplish this on their own. He said enabling policyholders to continue to live in their homes instead of transferring to an assisted living facility is beneficial to both the insurer and the policyholder. He said the majority of policyholders prefer to remain in their homes. He said a 2018 AARP study found that 77% of adults aged 50 and over in the U.S. want to remain in their homes as long as possible as they age, but only 50% of those surveyed realized that in-home LTC options are available.

Mr. Gugig said if Transamerica is able to establish a safe home setting for provision of LTC services, he thinks policyholders will react positively and will have a better quality of life. He said using home care results in lower benefit payments, which leaves more in the pool of money available to the insured if they do ultimately need to receive institutional care. He said lower claims costs also benefit the insurer and remaining policyholders in that lower claims costs result in less need for rate increases.
Mr. Gugig said in situations where family members are providing informal LTC, there is a risk of the burden being so great that they decide that the insured will have to be placed in a facility. He said offering the option of home care can prevent the insured’s transition to institutional care.

Mr. Gugig said many studies show that caregivers, both professional and unpaid, are negatively affected by the current state of home care. He said when caregivers experience burnout, the likelihood of the patient transferring to facility care greatly increases. He said providing support for caregivers is critical, and his hypothetical future state of home care includes technology that will allow caregivers to take a break. He gave an example of an 85-year-old woman who is cognitively impaired but not so severely that she is unable to do anything for herself. He described this individual as being right at the point of being eligible to go on claim. He asked what can be done to ensure she remains in her home as long as possible and what can be done to ease her caregiver’s burden. He proposed developing a systemic approach to care that will ease burdens on patients and caregivers using a set of technologies that will monitor patients and alert caregivers when necessary. He said some examples are the use of simple technologies to determine if the patient is using water in the bathroom as an indication of whether they are getting out of bed, electrical monitors to determine if the refrigerator is being opened or an oven has been used, and door and window sensors to determine if doors or windows have been opened at an unusual time. He said geofencing can be used as a virtual fence to alert caregivers if the patient has left their home. He said bed monitors can determine when the patient left the bed. He said a single application can be used to integrate all of these monitoring technologies into one place. He said ridesharing or state disabled transportation services can also be incorporated into the application and that using these services can ease the burden on the caregiver of transporting the patient to medical and other appointments.

Mr. Gugig said increasing the prestige of paid caregivers’ positions, pay for this work and creating opportunities for career growth can help create a better future state of home care. He said one way to expand the role of paid caregivers is to train them in the use of patient monitoring technologies and make them the point of contact for patient alerts.

Mr. Gugig said the coordination of care between policyholders, insurers and care providers is essential to the success of the future state of home care services.

Nolan Tully (Faegre Drinker Biddle & Reath LLP) said unfair discrimination concerns, rebating concerns and tax qualification issues as they relate to LTCI wellness program offerings are items state insurance regulators and lawmakers need to address. He said it is important to remember that underwriting of an insured depends on some level of discrimination, but the key element is that this discrimination is not unfair. He said all wellness interventions are not appropriate for all policyholders. He gave the example of a fall prevention program being appropriate for an 85-year-old but not a 60-year-old. He said programs aimed at preventing or delaying the development of cognitive impairment should generally be targeted towards younger policyholders. He said carriers he has worked with are sensitive about how they introduce wellness programs, how they develop pilot programs and how they identify which policyholders are the best fit for program participation. He said that the carrier community has rolled out programs using broad consent, with policyholders having to opt into a program, and that he has not seen any carrier contemplate or move forward with a program that did not require a policyholder to affirmatively opt-in. He said programs have also been implemented that do not target any one group of policyholders, but rather they wait for any policyholder to enroll without prompting.

Mr. Tully said an important element of these programs is their reliance on technologies such as artificial intelligence (AI), predictive modeling and logarithmic computing. He said the carrier community is careful that the technological components of these programs are devised and implemented in a nondiscriminatory way, and these elements continue to be monitored for non-permitted discrimination throughout the program pilots. He said input from the regulatory community on discrimination issues will make it easier to structure pilots and their implementation.

Mr. Tully said the proposed amended Section 4 H of the NAIC Fair Trade Practices Act (#880) as it relates to rebating has had a significant positive impact on wellness program development. He said there are a number of specifically excepted rebating practices that are helpful to wellness program implementation, and he encourages state legislatures and state insurance regulators to adopt the proposed changes.

Mr. Tully said Section 7702 B of the federal Internal Revenue Code sets forth the triggers that are required to be present in a tax-qualified LTCI policy. He said a tax-qualified policy must count severe cognitive impairment or requiring substantial assistance with two or more activities of daily living (ADLS) as triggers for LTCI benefit eligibility. He said by the time this threshold has been reached, it is too late to intervene in a way that will materially prevent further deterioration. He said there are many wellness programs that can be beneficial to the policyholder, but they will need to be in effect before the eligibility
triggers have been reached, possibly decades prior. He said he thinks resolving these issues will require engagement with the federal government and the U.S. Department of the Treasury (Treasury Department).

Mr. Andersen said in addition to the issues discussed today, difficulty for insurers in evaluating the effectiveness of wellness programs on claim cost reduction, data privacy issues, and general fairness and reasonableness of the offerings all need to be considered. He said another issue for state insurance regulators is their role in preapproving and reviewing proposed programs, and what the review process will look like. He said there is a large number of ideas for wellness programs, and state insurance regulators will need to be cautious of focusing on only a few of these ideas at the risk of excluding others.

Ms. Altman said there are many startup companies currently leveraging data analysis, and data integrity and how data is used are important considerations. She asked how the presenters are considering these issues as they form new partnerships with these companies. Mr. Bodnar said conversations he has had with carriers indicate that data privacy is a large concern to them, and this concern has created something of a barrier to carriers partnering with vendors. He said the vendors are used to having access to more data for other health insurance applications than is generally available from LTCI policies. He said carriers have no hard knowledge of what interventions are effective, and they need more information on what causes an insured to go on claim. He said often the reason for going on claim is a social issue rather than a medical one, and data related to social issues is needed to make intervention models effective. He said building the predictive analytic structure needed for this is important, but he said he has not seen much progress toward this. Mr. Tully said he has seen the same thing and that carriers are focused on these issues when developing pilot programs. He said what is seen in the pilots will govern how data privacy issues are addressed with vendors for future programs. He also said carriers should ensure that the results of data collection and analysis do not produce unintended results. Mr. Gugig said he understands that carriers have been performing data security due diligence before partnering with vendors.

2. **Asked for Volunteers for an RBO Consumer Notices Checklist Drafting Group**

Ms. Altman said the Subgroup plans to resume work on the Reduced Benefit Options (RBO) Consumer Notices Checklist (Checklist) it had begun working on last year. She asked for volunteers to join a drafting group to revise the Checklist before it is exposed for public comment.

Having no further business, the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup adjourned.
Commissioner Jessica Altman  
Chairman, NAIC LTCI Reduced Benefit Options (EX) Subgroup  
Pennsylvania Insurance Department  

July 21, 2021  

Dear Commissioner Altman,

The American Council of Life Insurers (ACLI)\(^1\) and the American Association of Health Insurance Plans (AHIP)\(^2\) appreciate the opportunity to comment on the draft Checklist for Premium Increase Communications (Checklist), exposed by the NAIC LTC (EX) Task Force on June 21, 2021. We believe the cooperative working relationship we share with the Task Force, and other stakeholders, in addition to our combined efforts, will result in a Checklist that helps to make RBO consumer communications consistent and clear.

ACLI/AHIP support the work of the NAIC Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup in its charge to help consumers manage the impact of long-term care rate increases. By improving uniformity and clarity in consumer notices for reduced benefit options (RBO), consumers will better understand and objectively compare RBOs, and thereby choose the best options for their personal circumstances.

**EXECUTIVE SUMMARY**

Long-term care insurance mitigates the risk of catastrophic long-term care costs. How long-term care insurance accomplishes this important public good differs depending on the insurer, the policy terms, and the individual circumstances of the policyholder. When a long-term care rate increase becomes necessary, insurers need flexibility to determine what options make the most sense for their blocks of business and their policyholders. A Checklist that accommodates these varying factors will promote a robust and innovative RBO offering in the event of a premium increase.

As the Checklist’s introduction states, the Checklist is meant as guidance and does not carry the weight of law or impose any legal liability. The RBO principles adopted by the Long-Term Care Insurance Reduced Benefit Options (EX) Subgroup on November 30, 2020 should steer the Checklist queries. The Checklist should not create new requirements, but rather, standardize, clarify, and compile existing requirements and guidelines. Further, as the Checklist is only meant as guidance for insurers in drafting, and regulators in reviewing, RBO communications, the Checklist should explicitly state, that unless otherwise mandated by a particular state, an insurer is not required to include a completed Checklist with the filings.

In addition to this comment letter, we include specific, proposed edits to the Checklist. ACLI/AHIP request that this letter be considered in combination with our suggested amendments.
SERFF FILING

Question 1 lists specific materials to include with the rate increase filing. Because some of those materials would not be applicable to all rate increase filings, readily available at the time of filing, and/or required by the state, we suggest a more general question, “Does the filing contain all materials required to be filed in connection with the rate increase request?”

Rephrasing question 3 to be more general would account for the different notification timing requirements amongst states, as well as the possibility notifications might be sent electronically.

On question 4 we recommend adding “new” before “innovation options” for additional clarification.

We recommend question 5 be amended to reference state-required samples of policyholder communications, so as not to imply a new requirement where one does not currently exist.

We find question 6 to be ambiguous and suggest removal, or clarification, without implying a new requirement regarding customer service operations.

Finally, we believe question 7 should reference required state-specific pre-rate increase filing notification procedures and that the example be removed because it could confuse insurers and regulators in instances where the scenarios given in the example do not apply.

READABILITY AND ACCESSIBILITY

We suggest the questions in this section be amended to remove specific requirements of readability and accessibility to give insurers maximum flexibility in creating communications that best serve their policyholders.

For instance, in question 8, instead of assigning the order of information in a communication, the question should indicate the end goal, “Does the communication clearly present the essential information and/or primary action?” The order of information is irrelevant so long as the communication is easy to follow, logical, and important information is clearly presented.

In question 11, removing the reference to 11-point type, but keeping the guidance that the communication be in “easily readable font” accounts for the additional impact formatting, layout, font, illustrations, bullet points, logos, etc. have on readability. Type size is just one element of many that make a communication easy to read and understand.

The Flesch reading ease score in question 15 implies a specific, new requirement. For this reason, and because the question is redundant with questions 8 through 14, which establish readability, we recommend question 15 be removed entirely.
Amending question 16 to simply ask, “Are the RBOs clear and not misleading?” without implying a specific side-by-side format gives insurers greater flexibility in presenting information, unique to their business, as plainly as possible.

We believe questions 18 and 19 imply new, specific requirements for insurers in accommodating policyholders with disabilities or who do not speak English as a first language. All insurers must already meet the requirements of the Americans with Disabilities Act and other laws governing accessibility in all their policyholder communications. To avoid implying or creating new requirements, we suggest removing questions 18 and 19.

IDENTIFICATION
To both simplify and clarify questions 25 and 26, as well as the actual RBO communication, we recommend these questions read:

“25. Does the communication clearly explain how the consumer may elect an option? Does the election documentation allow the consumer to clearly indicate his or her choice?
26. Does the communication clearly explain that the consumer is not being singled out for the increase?”

As written, question 26 suggests the communication attempt to explain class basis, a technical concept. The goal is to let policyholders know they are not being singled out for an increase and our edits would help to emphasize this.

COMMUNICATION TOUCH AND TONE
Question 27, which asks whether the communication reminds consumers to reflect on why they may have purchased the policy, is both subjective and prescriptive. Question 28, which asks whether the communication expresses empathy, is the same. Because all other items in the Checklist will help to ensure policyholders think through their decision by accounting for multiple factors—a statement directing a policyholder to reflect is unwarranted. Moreover, since the communication’s very purpose is to help policyholders manage a rate increase, we believe the question about empathy is both needless and overly subjective. Whether or not a communication expresses empathy is open to interpretation. The goal is to help. The more helpful a communication is—the more empathetic is it likely to be perceived.

Since it is impossible to list all RBOs in one communication, we suggest question 30 simply read, “Are examples of the reduced benefit options represented fairly?” To avoid overwhelming or confusing policyholders, some options will likely not be in the communication, but accessible by contacting the insurer directly, or elsewhere, as the insurer directs. Insurers can discuss specific options available to a policyholder, while accounting for a policyholder’s personal situation and current benefit levels. We want to ensure that regulators do not then conclude that the RBOs included in a communication are unfairly presented, while those RBOs that policyholders access outside the communication are unfairly de-emphasized.
CONSULTATION AND CONTACT INFORMATION

We recommend question 35 be reworded to refer generally to any required government resources. Resources differ, depending on the state. Departments of insurance have varying policies about information or guidance they are willing to provide in the event of a rate increase.

UNDERSTANDING OPTIONS — PRESENTATION

Depending on the insurer, type of policy, and many other factors, it is possible policyholders could have dozens of RBOs. Including explanations for even 5 to 7 RBOs, as the Checklist suggests in question 39, is likely to be overwhelming and confusing to policyholders trying to decide amongst them. Consequently, we believe it is preferable to remove the reference to a specific number of RBOs and use “reasonable” as the guideline.

Question 40, referring to the right to reduce coverage at any time, ought to be removed entirely. Not all options are available at any time, some have time limits, and sometimes policyholders have the lowest level of benefits possible, based on a state’s minimum benefit standards, with no option to reduce further. Also, RBOs might not be offered to policyholders currently on claim. Additionally, question 40 is redundant with questions 45 and 46, which already address deadlines.

UNDERSTANDING OPTIONS — PAST RATE ACTIONS

Question 43 pertains to including a 10-year nationwide rate increase history in the RBO communication. This information could be pertinent to the decision to purchase coverage and is provided in the outline of coverage upon purchase of a policy. In contrast, the RBO communication focuses on the current change in premium, the policyholder’s options, and the potential for a future rate increase. Past rate increases vary widely due to prior state action and are not necessarily predictive of future increases. To avoid confusing policyholders, or inadvertently influencing them to decide against their best interests, we strongly recommend question 43 be removed entirely.

UNDERSTANDING OPTIONS — WINDOW OF TIME TO ACT

We tweaked the wording in question 45 to make it clearer.

We also amended question 47 to improve accuracy and account for differences in policies and state laws. We recommend the question read, “Does the communication indicate what happens if no payment is received? For example, if the policy lapses within 120 days, does it advise Contingent Benefit Upon Lapse will apply, if applicable?” Contingent benefit upon lapse (CBUL) is more accurate in this instance than “contingent non-forfeiture.” Additionally, it’s important to note that CBUL is not applicable for all forms in all states. In some states, CBUL is only effective for policies issued after a certain date or is not an option at all.
UNDERSTANDING OPTIONS – CURRENT BENEFITS
We believe question 48 should be edited to allow insurers to either include, or direct the policyholder to, helpful information. An RBO communication that includes all benefit-related information could easily become unwieldy, lengthy, and confusing. Directing a policyholder to a website or some other resource would likely be the more manageable and effective option.

We think question 49, which references inflation option illustrations, should be removed from the Checklist for a few reasons. First, not all policies have a lifetime maximum benefit in dollars. Second, any future projection included in an RBO communication could be construed as a promise of future benefits. Third, including inflation option projections could confuse and overwhelm a policyholder already comparing multiple RBOs. And finally, a general illustration does not account for critical elements such as whether some benefits had previously been received, the policyholder’s location at the time of receiving benefits, cost of care when benefits are received, additional policy terms, etc.

UNDERSTANDING OPTIONS – PERSONAL DECISION
We would like clarification on question 50. Will an insurer be able to refer to options that may be applicable to an individual policyholder?

Question 51, pertaining to descriptions of the policyholder’s RBOs, is duplicative of questions 30 and 39 and should be removed.

We suggest a change of wording in question 52.

Finally, question 53, which refers to providing an unbiased resource to research cost of care, should be removed. An insurer cannot ensure an unbiased resource exists, nor can cost of care be predicted since it is heavily dependent on location and timing of benefits, both uncertain.

UNDERSTANDING OPTIONS – VALUE OF OPTIONS
We recommend question 54 be amended to remove the reference to value and to read, “Are the resulting benefits from each presented option clearly explained?” The question could be interpreted to mean general value or monetary value. The concept of value is too subjective to be a guideline. Perception of value differs depending on the personal circumstances of each individual policyholder, including their current age, health conditions, financial position, availability of caregivers, spouse/partner considerations, etc. Further, assessing value on behalf of policyholders could constitute steering. The communication should be objective, thereby aiding policyholders to make decisions in their best interest.

UNDERSTANDING OPTIONS – IMPACT OF DECISION
We recommend clarifying question 59 to read, “For phased-in increases: Is there a table with all phase-in dates and premium amounts if no reduced benefit option is elected?” It would be
impossible to create a table with this information without knowing what the policyholder elected.

We also recommend question 60 be amended to accommodate a wider range of deadlines to send communications prior to a rate increase because states’ time frames can differ quite a bit.

Lastly, the language in question 61, “Does the communication disclose that not all reduction options are equal in value?” is problematic. The same reasons we give for changing question 54 apply here. The concept of value is too subjective to be a guideline. Further, the entire communication, in addition to any supplemental information the insurer may direct the policyholder to consider, will demonstrate the differences between, and consequences of choosing, each RBO. For these reasons we advise deleting question 61.

CONCLUSION

Thank you for the opportunity to provide these comments. ACLI/AHIP welcome the opportunity to discuss our comments with you in the near future.

Sincerely,

Jan M. Graeber
Ray Nelson
Senior Actuary, ACLI  
AHIP Consulting Actuary

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
Checklist for Premium Increase Communications

AUTHORITY
The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup is composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

*Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.*

The Long-Term Care Insurance (EX) Task Force adopted the Long-Term Care Insurance RBO Communication Principles. The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a complementary checklist that can be leveraged by state regulators and Long-Term Care Insurance insurers.

INTRODUCTION
This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, complaints, improve the quality of the communication, and ensure the information presented:

- Reads in a clear, logical, not overly complex manner.
- Identifies if the options are presented fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

RECOMMENDS that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and adopt when reviewing filed Long-Term Care Insurance RBO Communications.

CALLS ON all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase. The insurance company is not expected to include the Checklist with the filings.

Checklist for Premium Increase Communications

AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup is composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.

The Long-Term Care Insurance (EX) Task Force adopted the Long-Term Care Insurance RBO Communication Principles. The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a complementary checklist that can be leveraged by state regulators and Long-Term Care Insurance insurers.

INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion and complaints, improve the quality of the communication, and ensure the information presented:

- Reads in a clear, logical, not overly complex manner.
- Identifies the options are fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

[The LTC Task Force? The RBO Subgroup?] RECOMMENDS that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and adopt when reviewing filed Long-Term Care Insurance RBO Communications.

CALLS ON all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

Checklist for Premium Increase Communications

AUTHORITY

The Long-Term Care Insurance Reduced Benefit Options (RBO) (EX) Subgroup is composed of regulators from 17 state insurance departments. It has been tasked with assisting the Long-Term Care Insurance (EX) Task Force in completing the following charge:

Identify options to provide consumers with choices regarding modifications to long-term care insurance (LTCI) contract benefits where policies are no longer affordable due to rate increases.

The Long-Term Care Insurance (EX) Task Force adopted the Long-Term Care Insurance RBO Communication Principles. The Long-Term Care Insurance RBO EX Subgroup has been charged with developing a complementary checklist that can be leveraged by state regulators and Long-Term Care Insurance insurers.

INTRODUCTION

This checklist is intended to establish a consistent approach to drafting and reviewing Long-Term Care Insurance RBO policyholder communications. The checklist can be used as guidance and does not carry the weight of law or impose any legal liability.

State regulators may consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in a particular state. State regulators are encouraged to modify the checklist to suit the needs of the Department.

Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion, and complaints, improve the quality of the communication, and ensure the information presented:

- Reads in a clear, logical, not overly complex manner.
- Identifies the options are fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

Suggested Edits from BB & BC:

State regulators who consider the checklist excessive, deficient, or not focused on issues specific to consumer experience in their state are encouraged to modify the checklist to suit the needs of the Department.
Leveraging the checklist could enable insurers and state regulators to mitigate consumer confusion and complaints, improve the quality of consumer communications, and to ensure the information presented. The checklist seeks to ensure that consumer communications:

- Reads in a clear, logical, not overly complex manner.
- Identifies if the options are presented fairly and without subtle coercion.
- Includes appropriate referrals to external resources, definitions, disclosures, and visualization tools.

[The LTC Task Force? The RBO Subgroup?] RECOMMENDS that state regulators adapt the checklist to reflect their state regulations, laws, or statutes and use the checklist when reviewing filed Long-Term Care Insurance RBO Communications.

CALLS ON all insurance companies to consider the checklist when developing reduced benefit option policyholder communications in the event of a rate increase.

**Notes:**

- Deleted: to
depicted screenshots may be requested

**Commented [A6]:** ACLI: Question 1 lists specific materials to include with the rate increase filing. Because some of those materials would not be applicable to all rate increase filings, readily available at the time of filing, and/or required by the state, we suggest a more general question, “Does the filing contain all materials required to be filed in connection with the rate increase request?”

**Commented [A7]:** BB & BC

**Commented [A8]:** BB & BC

**Commented [A9]:** ACLI: Rephrasing question 3 to be more general would account for the different notification timing requirements amongst states, as well as the possibility notifications might be sent electronically.

**Commented [A10]:** BB: Should this be RBOs?

**Commented [A11]:** CA

**Commented [A12]:** ACLI: On question 4 we recommend adding “new” before “innovation options” for additional clarification.

**Commented [A13]:** ACLI: We recommend question 5 be amended to reference state-required samples of policyholder communications, so as not to imply a new requirement where one does not currently exist.

**Commented [A14]:** CA: Could we add an example?

**Commented [A15]:** BB & BC

**Commented [A16]:** BB: I’ve had experience with

**Commented [A17]:** MH: What is this looking for?

**Commented [A18]:** ACLI: We find question 6 to be...
### READABILITY AND ACCESSIBILITY

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
<th>Page Reference and Filing Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>☐</td>
<td>☐</td>
<td>☐</td>
<td></td>
</tr>
</tbody>
</table>

7. Were state-specific pre-rate increase filing notification procedures followed? For example: VT has insurers notify consumers of rate increases when filed in addition to notification 45-60 days before effective date. PA posts filed rate increase details on their website.  

8. Is the communication easy to follow? Does it flow logically? Does it display the essential information and/or the primary action first (followed by the nonessential information)? Is the primary message of the communication presented first and clearly worded?  

9. Are all technical insurance terms clearly explained in the communication?  

10. Are all technical terms used consistently throughout the communication?  

11. Is the communication in an easily readable font in at least [11-point] type?  

12. Does the communication use headings to help the reader find information easily?  

13. Is white space (margins, lines spacing, and spacing between paragraphs) sufficient and consistent?  

14. Are tables, charts, and other graphics, easy to read and understand?  

15. Are the grade level and reading ease scores appropriate ([8th grade] or lower; Flesch reading ease score [60] or higher)?  

16. Are there side-by-side illustrations of options compared with current benefits? Are they clear and not misleading?  

ACLI: Finally, we believe question 7 should reference required state-specific pre-rate increase filing notification procedures and that the example be removed because it could confuse insurers and regulators in instances where the scenarios given in the example do not apply.  

ACLI: We suggest the questions in this section be amended to remove specific requirements of readability and accessibility to give insurers maximum flexibility in creating communications that best serve their policyholders.  

ACLI: In question 8, instead of assigning the order of information in a communication, the question should indicate the end goal, "Does the communication clearly present the essential information and/or primary action?" The order of information is irrelevant so long as the communication is easy to follow, logical, and important information is clearly presented.  

In question 11, removing the reference to 11-point type, but keeping the guidance that the communication be in "easily readable font" accounts for the additional impact formatting, layout, and accessibility.  

Perhaps there should be some reference here to people with visual problems, size of text, and contrast to ensure accessibility.  

ACLI: If these are the standards you are expecting, then perhaps the checklist should be revised.  

ACLI: Amending question 16 to simply ask, "Are the RBOs clear and not misleading?"
<table>
<thead>
<tr>
<th>Question</th>
<th>Yes</th>
<th>No</th>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td>17. If FAQs are included, are they succinct and easy to understand?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>18. Does the insurer provide appropriate accommodations for policyholders with disabilities or for policyholders for whom English is not a first language? For example, accessibility of its online and written material to all interested parties, including those with disabilities such as blindness, low vision, deafness and hearing loss, learning disabilities, cognitive limitations, limited movement, speech disabilities, photosensitivity and combinations of these.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>19. Does the insurer provide access to translation services as needed for policyholders for whom English is not a first language?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>20. Does the communication answer what is happening?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>21. Does the communication answer why the consumer is receiving a rate increase?</td>
<td></td>

<td></td>
</tr>
<tr>
<td>25. Does the communication clearly indicate how to elect an option? Does the election documentation clearly indicate the consumer's choice?</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Commented [A30]:** ACII: We believe questions 18 and 19 imply new, specific requirements for insurers in accommodating policyholders with disabilities or who do not speak English as a first language. All insurers must already meet the requirements of the Americans with Disabilities Act and other laws governing accessibility in all their policyholder communications. To avoid implying or creating new requirements, we suggest removing questions 18 and 19.

**Commented [A31]:** BB: Macular degeneration and other visual conditions can make text and tables hard to read. Some people use various magnifying devices and can only see portions of a page or table at a time.

**Commented [A32]:** MH: This ends up being redundant of the prior question. I'd either pull language out of the prior question or delete this as a stand-alone question.

**Commented [A33]:** BC: Are examples needed to illustrate how the department might view a communication to reflect negatively on the department?

**Commented [A34]:** BB: Maybe this can be re-worded: Does the communication include information about how to contact the Department of Insurance?

**Commented [A35]:** BB & BC

**Commented [A37]:** BB: When check boxes are used to indicate a choice, there should be some way to verify that choice on the form returned to the insurer to avoid mistakes.

**Commented [A38]:** ACII: To both simplify and clarify questions 25 and 26, as well as the actual RBO communication, we recommend these questions...

Commented [A39]: BC: Consumers don’t think of their policies as contracts.
Commented [A40]: ACLI: Question 27, which asks whether the communication reminds consumers to reflect on why they may have purchased the policy, is both subjective and prescriptive. Question 28, which asks whether the communication expresses empathy, is the same. Because all other items in the Checklist will help to ensure policyholders think through their decision by accounting for multiple factors—a statement directing a policyholder to reflect is unwarranted. Moreover, since the communication’s very purpose is to help policyholders manage a rate increase, we believe the question about empathy is ...

---

Commented [A69]: BB & BC
Commented [A70]: MH: Are insurers supposed to include the 10-year nationwide rate increase history? I'm not sure that is relevant for the consumer and may be more of a distraction.
Commented [A71]: ACLI: Question 43 pertains to including a 10-year nationwide rate increase history in the RBO communication. This information could be pertinent to the decision to purchase coverage and is provided in the outline of coverage upon purchase of a policy. In contrast, the RBO communication focuses on the current change in premium, the policyholder’s options, and the potential for a future rate increase. Past rate increases vary widely due to prior state action and are not necessarily predictive of future increases. To avoid confusing policyholders or inadvertently influencing them to decide against their best interests... [27]

Commented [A79]: BB & BC
49. If current benefits have an inflation option, does the communication include the lifetime maximum benefit in dollars illustrated both five and fifteen years into the future?

Yes □ No □ N/A

50. Are the options presented available to the policyholder?

Yes □ No □ N/A

51. Does the communication contain descriptions of the consumer’s options (including changes in the daily benefit, elimination period, current lifetime maximum benefit in dollars, inflation option, partnership status)?

Yes □ No □ N/A

52. Does the communication prompt the policyholder to consider their personal situation, such as: current age, health conditions, financial position, availability of caregivers, spouse or partner impacts, and potential need for institutionalized care?

Yes □ No □ N/A

53. Does the communication provide an unbiased resource(s) for policyholders to research the cost of care?

Yes □ No □ N/A

54. Do options clearly indicate value for consumers? Contingent Nonforfeiture (CNF) and other limited options clearly describe the reduction in value (benefit period)?

Yes □ No □ N/A

Commented [A80]: ACLI: We think question 49, which references inflation option illustrations, should be removed from the Checklist for a few reasons. First, not all policies have a lifetime maximum benefit in dollars. Second, any future projection included in the RBO communication could be construed as a promise of future benefits. Third, including inflation option projections could confuse and overwhelm a policyholder already comparing multiple RBOs.

CA: Could we add an example of a rule that a regulator should be looking for?

BB: I’ve had experience with customer service reps in foreign countries with strong accents and little knowledge of options.

MH: What is this looking for? Is the suggestion that DOIs should be getting the customer service script for RBO conversations? Possible deletion.

ACLI: We find question 6 to be ambiguous and suggest removal, or clarification, without implying a new requirement regarding customer service operations.

ACLI: In question 11, removing the reference to 11-point type, but keeping the guidance that the communication be in “easily readable font” accounts for the additional impact formatting, layout, font, illustrations, bullet points, logos, etc. have on readability. Type size is just one element of many that make a communication easy to read and understand.

BB: Perhaps there should be some reference here to people with visual problems, size of text, color, formatting?

BC: Do the brackets indicate that a state that has different standards may change to match their standards? If so, a drafting note if needed.

BC: If these are the standards you are expecting, then perhaps the checklist should be edited. The statistics for it currently are 12th grade and a Flesch Reading Ease Score of 32.

ACLI: The Flesch reading ease score in question 15 implies a specific, new requirement. For this reason, and because the question is redundant with questions 8 through 14, which establish readability, we recommend question 15 be removed entirely.

ACLI: Amending question 16 to simply ask, “Are the RBOs clear and not misleading?” without implying a specific side-by-side format gives insurers greater flexibility in presenting information, unique to their business, as plainly as possible.

ACLI: To both simplify and clarify questions 25 and 26, as well as the actual RBO communication, we recommend these questions read:
“25. Does the communication clearly explain how the consumer may elect an option? Does the election documentation allow the consumer to clearly indicate his or her choice? 26. Does the communication clearly explain that the consumer is not being singled out for the increase?”

As written, question 26 suggests the communication attempt to explain class basis, a technical concept. The goal is to let policyholders know they are not being singled out for an increase and our edits would help to emphasize this.

ACLI: Question 27, which asks whether the communication reminds consumers to reflect on why they may have purchased the policy, is both subjective and prescriptive. Question 28, which asks whether the communication expresses empathy, is the same. Because all other items in the Checklist will help to ensure policyholders think through their decision by accounting for multiple factors—a statement directing a policyholder to reflect is unwarranted. Moreover, since the communication’s very purpose is to help policyholders manage a rate increase, we believe the question about empathy is both needless and overly subjective. Whether or not a communication expresses empathy is open to interpretation. The goal is to help. The more helpful a communication is—the more empathetic is it likely to be perceived.

ACLI: Since it is impossible to list all RBOs in one communication, we suggest question 30 simply read, “Are examples of the reduced benefit options represented fairly?” To avoid overwhelming or confusing policyholders, some options will likely not be in the communication, but accessible by contacting the insurer directly, or elsewhere, as the insurer directs. Insurers can discuss specific options available to a policyholder, while accounting for a policyholder’s personal situation and current benefit levels. We want to ensure that regulators do not then conclude that the RBOs included in a communication are unfairly presented, while those RBOs that policyholders access outside the communication are unfairly de-emphasized.

CA: If the answer to the first is “yes,” the answer to the second is likely to be “no,” so this doesn’t work well with the yes/no checklist.

BC: I don’t understand how “now” is an alternative to “must.”

BB: A term many consumers would not understand.

BB: Is the number direct to consumer service and individuals who can answer specific questions? The phone number should not consist of a lengthy phone tree that is difficult for consumers to navigate.

BB: Are customer service representatives located in other countries screened for their ability to clearly communicate with elderly policyholders who may have hearing difficulties, difficulty with heavy accents, unable to process fast speech?
MH: Might be worth consolidating with question 29.

MH: I’d hope so...is this to suggest that the filing team should test the website addresses and phone numbers? Is that what we typically do with other filings?

Page 7: [21] Commented [A58]   Author
ACLI: We recommend question 35 be reworded to refer generally to any required government resources. Resources differ, depending on the state. Departments of insurance have varying policies about information or guidance they are willing to provide in the event of a rate increase.

Page 7: [22] Commented [A60]   Author
MH: Might be worth consolidating with question 34.

Page 7: [23] Commented [A61]   Author
MH: s 7 options "reasonable?" I think 5 or fewer is more appropriate.

ACLI: Depending on the insurer, type of policy, and many other factors, it is possible policyholders could have dozens of RBOs. Including explanations for even 5 to 7 RBOs, as the Checklist suggests in question 39, is likely to be overwhelming and confusing to policyholders trying to decide amongst them. Consequently, we believe it is preferable to remove the reference to a specific number of RBOs and use "reasonable" as the guideline.

BB: Some insurers may offer 2 or 3 options. Is 5 a required number of RBO’s to be offered? Seven seems an excessive number of options and would be hard to compare the value of each one. The highest number of RBO’s I’ve seen offered is 5 through a court ordered settlement.

Page 7: [26] Commented [A65]   Author
ACLI: Question 40, referring to the right to reduce coverage at any time, ought to be removed entirely. Not all options are available at any time, some have time limits, and sometimes policyholders have the lowest level of benefits possible, based on a state’s minimum benefit standards, with no option to reduce further. Also, RBOs might not be offered to policyholders currently on claim. Additionally, question 40 is redundant with questions 45 and 46, which already address deadlines.

Page 8: [27] Commented [A71]   Author
ACLI: Question 43 pertains to including a 10-year nationwide rate increase history in the RBO communication. This information could be pertinent to the decision to purchase coverage and is provided in the outline of coverage upon purchase of a policy. In contrast, the RBO communication focuses on the current change in premium, the policyholder’s options, and the potential for a future rate increase. Past rate increases vary widely due to prior state action and are not necessarily predictive of future increases. To avoid confusing policyholders, or inadvertently influencing them to decide against their best interests, we strongly recommend question 43 be removed entirely.

Page 8: [28] Commented [A74]   Author
ACLI: We tweaked the wording in question 45 to make it clearer.
ACLI: We also amended question 47 to improve accuracy and account for differences in policies and state laws. We recommend the question read, “Does the communication indicate what happens if no payment is received? For example, if the policy lapses within 120 days, does it advise Contingent Benefit Upon Lapse will apply, if applicable?” Contingent benefit upon lapse (CBUL) is more accurate in this instance than “contingent non-forfeiture.” Additionally, it’s important to note that CBUL is not applicable for all forms in all states. In some states, CBUL is only effective for policies issued after a certain date or is not an option at all.

ACLI: We believe question 48 should be edited to allow insurers to either include, or direct the policyholder to, helpful information. An RBO communication that includes all benefit-related information could easily become unwieldy, lengthy, and confusing. Directing a policyholder to a website or some other resource would likely be the more manageable and effective option.

ACLI: We think question 49, which references inflation option illustrations, should be removed from the Checklist for a few reasons. First, not all policies have a lifetime maximum benefit in dollars. Second, any future projection included in an RBO communication could be construed as a promise of future benefits. Third, including inflation option projections could confuse and overwhelm a policyholder already comparing multiple RBOs. And finally, a general illustration does not account for critical elements such as whether some benefits had previously been received, the policyholder’s location at the time of receiving benefits, cost of care when benefits are received, additional policy terms, etc.

ACLI: We would like clarification on question 50. Will an insurer be able to refer to options that may be applicable to an individual policyholder?

BB: I don’t understand this question. Why would some options not be available to a policyholder? In some cases an insurer may offer various options connected to a policy form depending on the benefits of each insured, i.e., lifetime benefits or limited durations, various forms of inflation protection. Is the instruction trying to say that an insurer can’t use one form with all the options connected to a policy form, some of which are not available to certain policyholders?

ACLI: Question 51, pertaining to descriptions of the policyholder’s RBOs, is duplicative of questions 30 and 39 and should be removed.

MH: Questions 50 and 51 seem like they have been already addressed above in terms of the presentation and readability of options. Worth considering some consolidation.
ACLI: Finally, question 53, which refers to providing an unbiased resource to research cost of care, should be removed. An insurer cannot ensure an unbiased resource exists, nor can cost of care be predicted since it is heavily dependent on location and timing of benefits, both uncertain.

ACLI: We recommend question 54 be amended to remove the reference to value and to read, “Are the resulting benefits from each presented option clearly explained?” The question could be interpreted to mean general value or monetary value. The concept of value is too subjective to be a guideline. Perception of value differs depending on the personal circumstances of each individual policyholder, including their current age, health conditions, financial position, availability of caregivers, spouse/partner considerations, etc. Further, assessing value on behalf of policyholders could constitute steering. The communication should be objective, thereby aiding policyholders to make decisions in their best interest.

ACLI: We also recommend question 60 be amended to accommodate a wider range of deadlines to send communications prior to a rate increase because states’ time frames can differ quite a bit.

ACLI: Lastly, the language in question 61, “Does the communication disclose that not all reduction options are equal in value?” is problematic. The same reasons we give for changing question 54 apply here. The concept of value is too subjective to be a guideline. Further, the entire communication, in addition to any supplemental information the insurer may direct the policyholder to consider, will demonstrate the differences between, and consequences of choosing, each RBO. For these reasons we advise deleting question 61.
Issues related to LTC wellness benefits

First draft, work in progress – 7/22/2021

Background:

Stand-alone long-term care insurance is a unique industry, in that higher-than-expected claims’ costs have resulted in substantial rate increases for consumers and financial losses and in some cases solvency concerns for insurance companies.

Technology firms are developing approaches that could be used by insurance companies to potentially prevent or lower the severity of LTC claims and improve health outcomes in a space called “LTC wellness”. Examples of these early interventions include:

- Fall prevention programs;
- Home modification consultations, analysis and implementation to facilitate aging in place;
- Caregiver support programs for both formal and informal caregivers;
- Next generation care coordination services;
- Technological solutions aimed at improvements in cognitive impairment prevention and early diagnosis.

In light of systemic, LTC-related financial challenges, insurance companies, insurance regulators, and tech firms are interested in working together to explore some of these claim cost-reducing innovations. Here are some potential barriers to increased adoption of these new approaches and how those barriers could potentially be addressed, with details provided below the list:

1. Analysis of effectiveness
2. Unfair discrimination
3. Consumer confusion
4. Rebating
5. Tax considerations
6. Regulatory role in approving or evaluating LTC wellness approaches
7. Actuarial considerations
8. Data privacy
9. Other considerations
Details:

1. Analysis of effectiveness
   a. Issue: in light of the lag time between policyholder age during LTC wellness efforts and policyholder age when claim incidence becomes more common, what issues arise from insurers' lack of knowledge of effectiveness of LTC wellness programs in reducing claim costs, and how can those issues be addressed?
      i. The cost of innovation efforts, with no guarantee of any returns, may dissuade some insurance companies from pursuing these programs.
         1. Expenses are typically upfront and significant.
         2. The financial impact on claims cost is typically unknown and down the road.
      ii. Designing pilot programs is difficult because there is such a variety of programs available, and each block of LTC insurance policies has unique characteristics that might influence the effectiveness of a given program.
      iii. Some companies are concerned about regulatory reaction to these changes.
   b. Current observations
      i. Industry representatives described some current or likely upcoming LTC wellness efforts at the May 4, 2021 NAIC Reduced Benefit Option Subgroup meeting. A theme was that there is great supply and demand for LTC wellness innovation efforts.
      ii. Some insurance companies are exploring or implementing pilot programs. Very early signs on the effectiveness of interventions on impact on policyholder health and claim costs are promising, but data development is slow and it is difficult to implement control trials.
         1. Insurance companies are eager for data and for ways to effectively share data within the legal and regulatory framework so that the industry can effectively respond to positive policyholder experiences and discontinue any programs that fail to make an impact.
      iii. Because there is little competition in the stand-alone LTC insurance market, due to the financial losses accumulated and many insurance companies exiting the actively selling market, sharing of ideas between companies on management of active policies may be possible, although care should be taken regarding anti-trust issues.
   c. Addressing of Issues
      i. Lack of data: With most LTC wellness programs being under-developed or being implemented recently, data is lacking on the extent to which resulting claim cost decreases offset the costs of the programs.
      ii. How to measure health impact: Whether an LTC wellness program effectively reduces claim costs or not, will there be approaches established to measure health benefits to policyholders?
iii. Data sharing: Facilitating the sharing of data, between vendors and insurance companies, and perhaps involving public programs such as Medicaid, is a key element of analyzing effectiveness.

d. Next steps
i. Regulators engage with insurance companies to learn of recent developments.
ii. Research public programs’ data on effectiveness of LTC wellness programs to see if Medicare Advantage, Med Supp, or Medicaid / PACE data is available, relevant, and used.
iii. Determine an approach to monitor success of programs. For example, if 3 to 4 companies are applying 3 to 4 pilot programs and finding success, it would be good news regarding broader, future efforts.
   1. Facilitate the sharing of general results (i.e., not individual policyholder data) among those insurance companies in a way that is within the legal and regulatory boundaries.
iv. Regulators ensure capital supporting LTC liabilities is adequate under a range of scenarios, including one where claims costs continue to increase.

2. Prevention of unfair discrimination related to extra-contractual benefits and costs
   a. Issue: how does an insurer offer a wellness initiative that is not unfairly discriminatory to discrete populations within the broader group of policyholders?
   b. Current observations
      i. There may be state anti-discrimination and bias-related legal issues to address if certain policyholders are targeted, including through Big Data, to receive extra benefits.
         1. For instance, if older policyholders have less of an online footprint than younger policyholders, how would this impact the accuracy of the targeting of LTC wellness benefits or otherwise introduce bias?
         2. [Birny Birnbaum May 4 comment]: If wellness or other efforts to address specific conditions are based on age or the health of the policyholder, this seems like normal value-added products and services for loss prevention and not an example of unfair discrimination.
   a. Issues to address are likely related to creating a clear framework for compliance related to the use of data analytics and artificial intelligence.
   c. Addressing of issues
      i. Equality: How policyholders are offered wellness initiatives could be unfairly discriminatory.
         1. Policyholders of “the same class and of essentially the same hazard” must be treated equally. See NAIC Model Unfair Trade Practices Act (#880) (“Model Law”).
2. How may an insurer “classify” policyholders post underwriting?
   a. What is fair? The insurers will need to provide justification.
      i. For example, under the Model Law the availability of the value-added product or service must be based on documented objective criteria and offered in a manner that is not unfairly discriminatory.
   b. May classification be made by jurisdiction? Does that impact the LTC Multi-State Actuarial Rate Review (MSA) program’s overarching goals?
   c. May classification be made by product form?

ii. Selection: How policyholders are selected for wellness initiatives could be unfairly discriminatory.
   1. Wellness initiatives may be costly to the insurer. How can an insurer test it to validate the benefits before rolling it out more broadly?
      a. Under the Model Act, the insurer may provide the product or service in a manner that is not unfairly discriminatory as part of a pilot or testing program for no more than one year.
   2. Would a random selection of policyholders be unfair?
   3. Should policyholders be given the option to participate in a wellness initiative?
      a. Must all policyholders be given the option to participate?
   4. How much time/data is needed to prove the initiative is valuable?
   5. Prior to offering a wellness program, an insurer should have a logical hypothesis of what benefits could be derived from the program.

iii. Accessibility: How a wellness initiative operates could be unfairly discriminatory.
   1. Does it limit who can participate based on the medium? For example:
      a. Does it require access to a computer or internet for online participation?
      b. Does it require access to a smart phone, texting minutes, etc., to use an app?
      c. Does it require access to roads, pools, sidewalks?
   2. Does any such limitation require alternatives for those unable to participate in the initiative?

iv. Uniformity: If guidance is issued on wellness initiatives, how would states adopt the guidance, especially if states have different standards for allowing wellness programs in LTC insurance?
   1. Have all states adopted the Model Law? If not, what have hurdles been for states that have not adopted the model? Will states adopt updates to the Model Law?
   2. Standards for unfair discrimination, including in the specific context of wellness initiatives, may vary by state requiring insurers and regulators to be aware of the specific requirements of the jurisdiction in question.
a. For example, Alaska permits rewards under wellness programs but requires that the reward be available for “all similarly situated individuals.” See AK Stat § 21.36.110.

3. If some states allowed wellness initiatives and not others, would this conflict with other initiatives, such as the MSA?

d. Dependencies
i. Unfair discrimination guidance needs to consider other wellness initiative issues that include:
1. Analyzing Effectiveness
2. Actuarial Impacts
3. Rebate Standards and Limitations
4. Regulatory Evaluation

e. Next steps
i. Regulators and interested parties discuss the issues noted above, including whether the use of Big Data to predict risks (of e.g., falls or dementia) and offering benefits and services only to those targeted as high risk would cause concerns regarding discrimination.

3. Consumer confusion
a. Issue: potential consumer confusion concerning LTC wellness programs will be highly variable dependent upon factors such as the nature of the program, the consumers involved, and the complexity of regulatory issues.

b. Addressing of issues:
1. Wellness programs with simple to understand direct connections to prevention of common medical issues (e.g., installing a grab bar) will provoke far less confusion than more esoteric programs based on new technological services (e.g., data collection/monitoring of insured activities) with not yet proven results. Simpler programs may also trigger fewer and less complex regulatory/statutory requirements related to privacy, consent, disclosure, etc. resulting in programs that will be more easily understood and documented. Programs with newer technology, more data collection and manipulation, and which are connected to more complex care issues will be more confusing and will trigger more complicated regulatory/statutory requirements.
   1. In these scenarios, there may be a need to first educate consumers on the technology and the data collection/usage and then the program and its potential benefits before disclosure and informed consent can occur. The ability to prevent confusion and achieve adequate education and understanding may be further impacted by the level of technological sophistication and mental acuity of the consumer, factors which often decline with age.
ii. Designing effective communication regarding insurer LTC wellness programs will require in-depth engagement with LTC consumers, policyholders, family members, eldercare subject matter experts, and NAIC consumer representatives. When the vetting group engages with Medicaid programs, PACE, etc. to learn about best practices in wellness programming, the vetting group should take the opportunity to learn about the successes and failures in communication used in implementing these programs, including any relevant focus group data available.

iii. In addition to engaging with Medicaid and PACE, the following organizations may have valuable insights: National Council on Aging (www.ncoa.org), AARP (www.aarp.org), and the National Institute on Aging (www.nia.nih.gov). In addition to engaging with NAIC representatives and these national organizations, the Vermont team would also propose to reach out to Vermont’s sister agencies in state government (The Agency of Disabilities, Aging, and Independent Living (DAIL), and the Agency of Human Services, (AHS)). Lastly, Emily Brown serves on the board of directors for Central Vermont Home Health and Hospice. Engagement with this local group may provide rural eldercare perspectives missing at the national level.

iv. Focus groups designed to elicit feedback on communication style are most helpful when the programming has been determined. In the alternative, guidelines for communication and disclosure designed to minimize confusion and maximize understanding would need to be developed along a spectrum of wellness programs of increasing complexity. The results of vetting group work around rebating, program effectiveness, data privacy, loss of tax-preferred status, and discrimination concerns will determine components of what needs to be tested in focus groups. For instance, if the loss of tax-preferred status is something the vetting group can address at the federal level, it will not need to be considered when determining barriers to effective communication.

v. Building consensus around terminology and building trust are essential to effective communication. In a Medicaid setting, the PACE program (Programs for All Inclusive Care for the Elderly), wellness efforts include a multidisciplinary team of health professionals coordinating care and no cost share on services. (Source: https://www.medicaid.gov/medicaid/long-term-services-supports/pace/programs-all-inclusive-care-elderly-benefits/index.html) This builds trust through human contact with medical professionals.

1. This type of communication is vastly different than the communication between an insurer and a long-term care policyholder facing a rate
increase, where participation may have some impact on the premium rate increase the consumer must pay. As a result, extra care will need to be taken to ensure policyholders truly understand the offer and the level of participation required and that they do not acquiesce based on confusion or because they feel they have no other choice.

vi. As the wellness vetting subgroup works through the issues (program effectiveness, discrimination, data privacy, and tax considerations), the Vermont team hopes to build on the conversations planned with subject matter experts in eldercare programming. The vetting group should plan to add time at the end of the process to explore and understand the vetted programs with consumers via focus group(s) to best anticipate and mitigate consumer confusion.

4. Rebating
   a. Issue: whether some long-term care wellness benefits for policyholders run afoul of the NAIC Model anti-rebating laws or are otherwise prohibited. Those wellness plans may be designed to prevent or lower the severity of LTC insurance claims or to improve health outcomes (“Wellness Initiative”).
   
   b. Addressing issues:
      i. **NAIC Model Law.** The recently amended version of the NAIC Model Unfair Trade Practices Act (#880) ("Model Law") explicitly exempts the type of Wellness Initiatives currently being considered from the prohibition on rebates as an unfair trade practice. Specifically, § 4 (H)(2)(e) of the Model Law excludes from “the definition of discrimination or rebates . . . [t]he offer or provision . . . of value-added products or services at no or reduced cost,” even “when such products or services are not specified in the policy of insurance,” if the product or service meets certain requirements. Amongst procedural requirements, the Model Law requires that the product or service (a) relate to the insurance coverage, (b) be “primarily designed to satisfy” one of nine functions, including providing loss mitigation, reducing claim costs, enhancing health, and incentivizing behavioral changes, and (c) cost a reasonable amount in comparison to premiums or coverage. As the Wellness Initiatives in question would be designed to prevent or lower the severity of LTC insurance claims and improve health outcomes, as long as their cost is reasonably related to the premiums or coverage, then they should not be considered rebates under the recently amended Unfair Trade Practice Act.
      
      ii. **Variations in State Law.** The above cited language from the Unfair Trade Practices Act, § 4 (H)(2)(e), however, is a recent December 2020 addition to the Model Law. As such, most states have yet to specifically address that update and have only
enacted a prior version of the Unfair Trade Practices Act. Unfortunately, the old language of the Model Law was less flexible on this point, which led a number of states to carve out exceptions by individual amendments, regulations, bulletins or desk drawer rules. And the Unfair Trade Practices Act is not the only model law with language prohibiting rebates in the business of insurance. As such, it is much less certain whether the Wellness Initiatives at issue would trigger the law’s anti-rebating provision. And the many state initiatives in this area do not permit a uniform analysis of rebating in each adopting jurisdiction as the precise language, interpretation, and application of the law varies by state.

1. As a result, whether Wellness Initiatives could arguably be considered a rebate remains a question subject to the specifics of each individual state’s rebating law and how each jurisdiction has interpreted and applied that law. To provide a few examples of the variations in state law, even amongst states that have adopted the prior Model Law:
   a. **Alaska**: Statutorily excludes “a reward under a wellness program established under a health care plan that favors an individual” from the definition of rebates so long as seven requirements, including the program being designed to promote health or prevent disease, are met. See AK Stat § 21.36.110.
   b. **Maine**: Statutorily permits provision of a value-added service that is related to the coverage provided by an insurance contract, without fee or at a reduced fee, if it is (a) included within the insurance contract, (b) directly related to the servicing of the insurance contract, or (c) offered to provide risk control for the benefit of a client. See Me. Stat. tit. 24-A, § 2163-A.

2. Thus, under the current legal landscape, those seeking to introduce Wellness Initiatives would need to confirm whether such an initiative would be permissible under each relevant jurisdiction’s rebating law and if there are any state specific requirements for offering such an initiative.

iii. **Trends in State Law.** Notwithstanding the variation in individual state’s laws and if and how they have been amended or interpreted, there does appear to be a general trend that “services are not prohibited if they are directly related to the insurance product sold, are intended to reduce claims, and are provided in a fair and nondiscriminatory manner.” J. Parson, D. Marlett, S. Powell, *Time to Dust Off the Anti-Rebate Laws*, 36 J. Ins. Reg. 7, at 8 (2017). Under this general approach, which aligns with the substantive result of the language in the current Model Law, a Wellness Initiative should not be prohibited as impermissible rebating.
iv. Policy Considerations. The exemptions in the current Model Law and the trend amongst states to permit certain services even if they are not contained within the insurance contract appear to be logical limitations on the scope of anti-rebating statutes. In short, Wellness Initiatives are not the type of conduct that anti-rebating statutes were originally designed to protect consumers against. This is particularly true in the context of LTC insurance where consideration of these initiatives only began significantly after the policies were initially sold, and moreover where the policies have proven to be unprofitable for the insurers. In other words, it is fair to assume that Wellness Initiatives in this context are not being used to either induce the policyholder to enter into the insurance contract, nor to expand the insurer’s share of the LTC insurance market. Rather, they are targeted at improving policyholder health and reducing the frequency and severity of claims.

v. Conclusion. Given the current legal landscape with respect to rebating, to facilitate the success of Wellness Initiatives jurisdictions could either (a) adopt the recently added rebating exemptions found in the current version of the Model Law, which would explicitly permit such initiatives, or (b) take action to interpret and apply their existing laws in a manner that would allow the provision of products or services that are directly related to the insurance policy in question and designed to reduce claims or improve health. Absent adoption of the current version of the Model Law, however, insurers would need to conduct a state-by-state evaluation of rebating laws in all relevant jurisdictions before implementing a Wellness Initiative.

5. Tax considerations
   a. Issue: will non-ADL / non-cognitive benefits cause tax issues for policyholders?
   b. Current observations
      i. There may be tax consequences for consumers if benefits outside the federal definition of LTC benefits are provided, but this may depend on whether initial investment in programs is paid for out of general company expenses or from the benefit pool.
   c. Addressing issues: [section to be drafted]
   d. Next steps:
      i. Engage with the federal government and insurance industry tax experts to work out potential IRS/tax issues.

6. Regulatory role in approving or evaluating LTC wellness approaches
   a. Issue: there is question as to whether LTC wellness approaches need to be approved by regulators or will be implemented by companies and later evaluated by regulators.
b. Current observations:
   i. There is little regulatory clarity or uniformity regarding LTC wellness programs.
c. Addressing issues [section to be drafted]
d. Next steps
   i. Analyze flexibility in existing laws that would allow for innovation that could potentially result in better health for policyholders and lower claims costs for insurance companies.
   ii. Because LTC insurance is in a desperate situation in some cases regarding solvency and rate increases, explore a regulatory sandbox approach regarding LTC wellness innovations.
   iii. Explore whether a company’s commitment towards innovation efforts could be a contingency to receiving a fully actuarially justified rate increase.

7. Actuarial considerations
   a. Issue: how are actuarial issues such as valuation, rate increase reviews, and reasonable value of benefits and options impacted by LTC wellness benefits?
   b. Current observations
      i. Although health outcomes can be expected to improve, to some extent, with LTC wellness programs, it is unclear how future claim costs will be impacted in comparison to the investment in the programs.
      ii. As data emerges, actuarial issues related to the impact of LTC wellness benefits on future claim incidence and severity, could impact rate increases and reserves.
   c. Addressing of Issues
      i. Valuation: Under moderately adverse conditions, as data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into reserve adequacy testing, including Actuarial Guideline 51 stand-alone long-term care analysis, per actuarial standards of practice.
      ii. Rates: As data emerges, future cash flows associated with LTC wellness programs and potential claim cost reductions resulting from the programs may be incorporated into lifetime loss ratio projections associated with rate-increase filings, per actuarial standards of practice.
      iii. The NAIC Guidance Manual for Rating Aspect of the Long-Term Care Insurance Model Regulation and NAIC Health Actuarial Task Force-adopted Consolidated, Most Commonly Asked Questions - States’ LTC Rate Increase Reviews document suggest that consistency between rate increase assumptions and reserve adequacy assumptions (noting reserve adequacy assumptions may include a margin to account for moderately adverse conditions) may be expected by some regulators.
iv. Reasonable value: The Long-term Care (EX) Task Force has tentatively established guidance that reduced benefit options in lieu of rate increases should provide reasonable value in comparison to the economic value of maintaining benefits and paying the increased premium. To the extent that LTC wellness benefits are tied into reduced benefit options, the holistic concept of reasonable value will likely be a consideration.

d. Next steps
   i. Determine the NAIC venue to work through LTC wellness actuarial issues.

8. Data privacy
   a. Issue: utilization of consumers’ data for wellness initiatives can be used to develop the marketing strategy and a specific wellness initiative, as well as to analyze the impact or effects of a wellness initiative. The use of data to develop the target demographic for new sales, the selection of the existing consumers for wellness initiatives, or to determine the results of the initiative, could result in an insurer or third party data vendor using the data in a way that could be unethical, discriminatory, confusing, or otherwise problematic.
      i. With many of the tech advancements, data on the policyholder would be accessed to, e.g., help identify warning signs of risks such as falls and early-stage dementia.
   b. Current observations
      i. The standards applied by insurance companies and tech firm vendors to ensure certain levels of privacy are generally unknown.
      ii. There are lessons from other types of insurance on the types of privacy-related issues that may develop.
      iii. There are cases, and perhaps a trend, of programs/interventions being implemented without utilizing significant amounts of policyholder personally identifiable information.
   c. Addressing of issues
      i. Data Use to Identify Wellness Initiatives:
         1. Policyholders considerations:
            a. Confusion about why they are being solicited for the initiative.
            b. Suspicion about the motivation of the insurer.
            c. General lack of awareness that data is being collected, and what data is being collected.
            d. General lack the awareness or understanding on how data is collected and used.
            e. Will they know if their data was used to determine a specific wellness initiative for them versus being selected as part of a class of policyholders?
            f. Will the policyholder know what data is going to be used prior to participation?
g. Should the policyholder have the option to “opt in/out” of their data being used internally for other initiatives or for external sale or use?

2. Insurer considerations:
   a. Should insurer communications include why a wellness initiative is being offered; including what data is being used?
   b. Should insurers purchase data regarding their policyholders (e.g. data that shows specific policyholders may have a near term claim - purchasing canes, grab bars, electronic fall detectors, etc.)?
   c. How should wellness initiatives be marketed to a policyholder? Insurers may need to limit what is advertised on the envelope, postcard, etc. due to HIPAA concerns.
   d. Should insurers partner with vendors or service providers to supply specific policyholder data to the wellness company? What data should be sent? How will the data be transferred?
   e. Should insurers focus their data on policyholder specific needs and only offer services relevant to the ongoing needs?
   f. How are opt in/out options, disclosures, etc. being shared with the consumer? Email, letter, text, etc. Is it appropriate to the policyholder’s needs or preferences?
   g. When using third party data providers, what screening or data protection programs are in place?

ii. Data Use During Wellness Initiative Development:
   1. Should insurers purchase policyholder specific information from third party data sources?
      a. Data collected during purchases, search history, television programming, etc.
      b. Should it always be headless, anonymized, or deidentified?
   2. When considering big data, are there unacceptable “correlations”? How will insurers recognize relevant correlations vs irrelevant statistically significant correlations?
   3. Are there data use standards, controls, definitions of personal data, or a data privacy review body in place to ensure the data is used, stored, or shared ethically?
   4. When evaluating the data for wellness initiatives, will it focus on policyholder specific information – for example, will the policyholder’s claims detail or demographic factors determine the type of wellness initiative offered to that policyholder?
   5. Will the risk of a data breach be assessed and protected against by the insurer as well as all vendors or third-party data suppliers?
6. Does the insurer have procedures in place to notify the policyholders of a potential breach?

iii. Wellness Results Data Use:
1. Should the results be sold? Aggregate vs specific demographic information?
2. Should insurers use the results internally for cross marketing other wellness initiatives?
3. Should the policyholder be notified and have the option to “opt in/out” of letting the insurer use the data?
4. Should the results be shared with the policyholder, POA, third party notifier? What guardrails should be in place relative to that sharing?
5. How should the data be shared, if at all, with other vendors or service providers?
6. How long will the data be retained? Will the data be destroyed or disposed?

d. Dependencies
   i. Unfair Discrimination

e. Next steps:
   i. Reach out to experts in the health insurance and Medicare Advantage, Medicare Supplement, or Medicaid / PACE areas to learn from their experiences.
   ii. Identify applicable state privacy laws and HIPAA anti-marketing restrictions.
   iii. Require insurance companies to provide information on privacy protection matters when claims management processes are established.
   iv. Determine if policyholder approval of use of expanded data can be established at certain points in time:
      1. At times of options in lieu of rate increases, can insurance companies get agreement to attain more policyholder data?
   v. Can new contracts be written with evergreen access to some private data?

9. Other considerations
   a. Issue: other legal or market and administrative issues may come into play as LTC wellness programs are established.
   b. Current observations
      i. There are dozens or hundreds of cutting-edge technological advancements being developed to help with aspects of LTC claims management.
         1. It is difficult for insurance companies and regulators to determine which tech advancements are most promising in terms of likelihood of success and degree of impact on consumer health and reducing claims cost.
ii. TPAs or reinsurers used by direct-writing insurance companies may be resistant to administering these additional activities or may be concerned about potential legal ramifications that could impact their firms.

iii. Insurers could potentially be subject to requirements if a policyholder, e.g., is identified as having cognitive impairment and therefore be a risk related to driving or finances.

c. **Addressing issues [section to be drafted]**

d. **Next steps**

i. Determine if there is objection to an insurance company offering an extra-contractual wellness benefit that is not tied to loss ratio / benefits / contracted obligations, i.e., out of expenses?

ii. Determine if benefits offered outside the contract could be considered in a similar category as because a reduced benefit option in lieu of a rate increase, which is essentially a mutually-agreed-to restructuring of the insurance contract.

iii. Either identify or ensure industry members are identifying requirements related to disclosing, e.g., when a policyholder has cognitive impairment and may be a high-risk driver.

iv. Regulatory guidance may help innovators engage in this space.
Executive Summary – Key Takeaways

1. LTC rate increase approval disparities exist between states.

2. Premium inconsistencies exist among states as premium per policy varies greatly. Average premium ranges from $1,755 - $3,656, despite similar benefit distributions.

3. The cost of long-term care services does not appear to be the primary predictor of a state’s LTC claim experience.

LTC Data Call Agenda

Purpose Of Documentation

- This report summarizes and analyzes the data collected from all carriers for their most rate increased blocks. Data for carrier’s largest blocks was collected and reviewed, but not used in the analysis herein.
- State specific experience is compared against nationwide averages for the following:
  - Number of rate increase approvals
  - Cumulative approved rate increase amount
  - Lifetime loss ratios
  - Cashflows including impact of rate increases on lifetime earned premium
  - Cost of Care

Project Scope

- Assist the NAIC Long-Term Care Insurance Task Force and with the help of and under the authority of the Virginia Bureau of Insurance, with facilitating a Long-Term Care Information Data Call with respect to a designated group of long-term care insurers in order to accumulate, analyze and describe to Commissioners the current level of rate differences among state policyholders.

Summary of data collected as well as inforce statistics on both the largest blocks and most rate increased blocks of business as collected in this Data Call.
19 Insurers have submitted data for their most rate increased blocks as well as largest blocks, if different. Data collected includes 27 LTC blocks of business. 
- Over 2.5 million inforce policies provided (about 1/3 of industry). 
- Over 3,500 approved rate increases. 
- Approximately $50 billion of active life reserves. 

The information and analysis contained in this report are based on this collected information. No external information was used to support this analysis with the exception of the 2019 Genworth Cost of Care Survey.

- Analysis
- Summary of state specific cumulative rate increase amounts as well as average approved number of rounds compared to nationwide averages.

### Annualized Premium Inforce by State

- Average nationwide annualized premium inforce is $2,903.
- The average annualized premium inforce varies from $1,705 - $3,656 on the most rate increased blocks of business across all states. In general, the average annualized premium varies pretty significantly for states with similar distributions of policy characteristics implying policyholders in some states are paying more than policyholders in other states for generally the same benefits.
- For 45 states over 60% of all inforce policies have an inflation rider.
- For 34 states over 30% of all inforce policies have a lifetime benefit period. For those states, the average annualized/premium inforce varies from $2,042 - $3,315.

© 2021 National Association of Insurance Commissioners
Analysis: Cumulative Approved Rate Increase

- States are bucketed into 5 groups by rate increase patterns:
  - Group 1 includes states with highest inforce
  - Group 5 includes states with lowest inforce

- States with lower cumulative amounts:
  - Group 5

- States with higher cumulative amounts:
  - Group 1

This does not consider timing of approvals.

Number of approvals not only driver for states with higher cumulative amounts.

Summary of state specific rate increase approvals and policy lifetime impact of rate increase approval amounts relative to original rates.
Lifetime Premium Impact

- States bucketed into 5 groups by size
- States ranked by inforce and policy lifetime impact of rate increase approval amounts relative to original rates.
- Example, premium paid by State X policyholders over the life of policies (past and future) will be 30.0% higher than original levels.
- Average impact of rate increase on nationwide lifetime premium is 20.2%.
- This does not consider timing of approvals. Early approvals have bigger impact.

Average Number of Requested and Approved Rate Increases

- The number of requested and approved rate increases by state.
- Average Nationwide number of requested increases is 61.
- Average Nationwide number of approved rate increases is 33.

Average Single % Requested and Approved Rate Increases

- Average % of requested and approved rate increases by state.
- Average single Nationwide requested rate increase amount is 19%.
- Average single Nationwde approved rate increase amount is 37%.
- Average cumulative Nationwide approved rate increase is 72%.

LTC Data Call Agenda

- Executive Summary
- Scope
- Data Collection
- Analysis
- Cumulative Approved Rate Increase
- Rate Increase Approvals
- Cost of Care

Summary of cost of care by state based on the most recent Genworth Cost of Care Report. Compare cost of care with state specific loss ratios, average annualized premium, and cumulative approved rate increase amounts.
### Analysis: Cost Of Care By State

- We reviewed the annual median cost of care rates from the 2019 Genworth Cost of Care Survey for the following:
  - Semiprivate room in a nursing home
  - Adult day care
  - Home health aide
- For each site of care and by state, we compared the annual median cost of care rates to lifetime loss ratios, annualized premium inforce, and cumulative approved rate increase amount.
- In every scenario we did not see a clear correlation between state specific experience and state specific annual median cost of care rates

### Additional Observations

- The annual median cost of a semi-private room in a nursing home for 5/10 top states by inforce volume were lower than the nationwide average.
- The annual median cost for an adult day care for 7/10 top states by inforce volume were lower than the nationwide average.
- The annual median cost of homecare services for 5/10 top states by inforce volume were lower than the nationwide average.
- Over 5/10 top states by inforce volume had lower 5 year annual growth rates for cost of care when compared to nationwide averages. This includes nursing home, adult day care, and homecare services.

### Reliance and Limitations

- The analysis provided in this document are based on work developed by Long Term Care Group, Inc. (LTCC) from data collected from insurers in response to the NAIC Data Call Workstream #6. The document has been prepared in accordance with a statement of work dated March 5, 2020 between the National Association of Insurance Commissioners (NAIC) and LTCC. They may not be referenced or distributed to any other party without the prior written consent of LTCC. Matthew Morton, FSA, MAAA and Kirill Grin, ASA, MAAA are the actuaries responsible for the findings contained in this document. They are members of the American Academy of Actuaries and meet its Qualification Standards for issuing such findings.
- In developing these results, LTCC relied on information that was supplied by the NAIC and the contributing companies. LTCC staff reviewed the information being relied upon for reasonableness but performed no audits or independent verification of such information. To the extent that there are material errors in the information provided, the results of the analysis will be affected as well.
July 26, 2021

Commissioner Scott A. White, Chair
Commissioner Michael Conway, Vice Chair
Long-Term Care Insurance (EX) Task Force
National Association of Insurance Commissioners (NAIC)

Attn: Jane Koenigsman, Senior Manager, Life and Health Financial Analysis

Re: Exposure Draft: Long-Term Care Insurance (LTCI) Multistate Rate Review Framework

Dear Commissioners White and Conway:

The American Academy of Actuaries\(^1\) Long-Term Care Reform Subcommittee appreciates the opportunity to offer comments on the actuarial sections of the exposure draft \textit{Long-Term Care Insurance Multi-State Rate Review Framework} (Framework) released June 10, 2021.

We previously provided comments on the operational aspects of the Framework in our letter dated May 24, 2021. We appreciate the NAIC LTC Insurance (EX) Task Force’s consideration of our previous comments and the opportunity to discuss them with the LTCI Multistate Rate Review (EX) Subgroup during its June 22, 2021, meeting.

This letter provides our comments on the actuarial aspects of the Framework, grouped into four themes, plus some additional comments at the end. We welcome the opportunity to discuss the comments provided in this letter during any future meetings of the task force or subgroup.

\textbf{Actuarial Judgment}

The actuarial review sections of the Framework address the necessary application of judgement in reviewing rate increase requests. The term is variously modified in the draft document as “regulatory actuarial judgment” or “regulatory judgment.” Qualified actuaries performing an MSA Review would use their professional judgment as defined in Actuarial Standard of Practice (ASOP) No.1:\(^2\)

---

\(^1\) The American Academy of Actuaries is a 19,500-member professional association whose mission is to serve the public and the U.S. actuarial profession. For more than 50 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.

\(^2\) Actuarial Standards Board; Actuarial Standard of Practice No. 1, \textit{Introductory Actuarial Standard of Practice}; March 2013.
2.9 PROFESSIONAL JUDGMENT

Actuaries bring to their assignments not only highly specialized training, but also the broader knowledge and understanding that come from experience. For example, the ASOPs frequently call upon actuaries to apply both training and experience to their professional assignments, recognizing that reasonable differences may arise when actuaries project the effect of uncertain events.

We suggest that the Framework consistently adopt the term “professional judgment” when referring to the actuarial work of the MSA Review Team. The actuaries on the MSA Review Team may be guided by ASOP No.41 regarding appropriate communications and disclosures when issuing an actuarial opinion in an MSA Advisory Report. Specifically, disclosures may be necessary where material assumptions or methods are specified by applicable law (statutes, regulations, and other legally binding authority) or selected by another party.

Decision-making Process of the Multi-State Actuarial (MSA) Team

The Framework outlines three main approaches to calculating a justified rate increase: 1) loss ratio approach (including the 58%/85% standard for rate-stabilized business); 2) Minnesota approach; and 3) Texas approach. Other than a statement that the 58%/85% standard would produce the maximum allowable increase for relevant blocks (which is consistent with rate stability regulation), it is unclear how the results from the different approaches will generate the rate recommendation of the MSA Review Team. We suggest that additional information be provided regarding the decision-making process of the MSA Review Team. Some questions and considerations that currently exist are:

- What happens if the Minnesota and Texas approaches are in conflict whether a rate increase is justified or if the approaches produce materially different results? The two approaches differ in their structures, with the Minnesota approach looking at past and future impacts and including non-actuarial provisions through cost-sharing, while the Texas approach is geared toward ensuring only future impacts are captured.

- The discussion of the Texas approach does not explicitly discuss the “catch-up” and “transition” provisions outlined as part of the Prospective Present Value approach in the NAIC LTC Pricing Subgroup document Long-term Care Insurance Approaches to Reviewing Premium Rate Increases, approved by the Long-Term Care Actuarial (B) Working Group in 2018. Was the omission of these provisions (outside of the last paragraph in Appendix C) intentional?

- In both the Minnesota and Texas approaches as specified, it is not clear how a company would account for a prior rate increase which was reduced and/or delayed due to lack of credible experience or for another reason. It can be very difficult in future filings to achieve a requested rate increase after a regulatory reduction in prior years.

---

3 Actuarial Standards Board; Actuarial Standard of Practice No. 41, *Actuarial Communications*; December 2010.
• How are past rate increase approvals considered across states? Is the time value of money considered where two states may be at the same current rate level, but one approved prior increases many years earlier than the other state?

• If the MSA Review provides a recommended rate increase (e.g., 40%) and a participating state approves a significantly lower increase (e.g., 10%), for how long may a company and/or a state regulator rely on the original MSA recommendation when submitting or reviewing a follow-up filing to achieve the recommended rate level? What is the process for the company to submit a follow-up filing for the remaining rate increase? Does the follow-up rate increase request go through the MSA Review again? Would the time value of money be considered in the review of the follow-up request?

The subcommittee appreciates the detail provided in the Framework to date and recognizes the significant effort in documenting this information. However, the answers to some of the questions above may be crucial to ensuring that companies and actuaries submitting LTC rate increase filings have the knowledge needed about the MSA Review process to be comfortable using the option.

Industry Standards and Benchmarking

Section V.A indicates that assumptions in a rate increase filing may be “deemed unreasonable or unsupported” by the MSA Review Team. We suggest that the MSA Review Team contact the filing actuary to provide additional support for his or her actuarial assumptions, if necessary, prior to deeming them “unreasonable.” If an actuarial assumption is deemed unreasonable or unsupported, it may have implications for the use of a similar assumption in a company’s asset adequacy testing and/or Actuarial Guideline LI analysis. We note that “Fair and reasonableness considerations” is listed in Section V.F (Non-Actuarial Considerations). This is a broad and not-well-defined category allowing wide latitude in regulatory decision-making regarding the results of an analysis, distinct from the justification of actuarial assumptions.

Section V.C.1(c) cites “concepts discussed in public NAIC LTC pricing subgroup calls from 2015 to 2019,” which provides inadequate documentation to include in a regulatory procedure document. Rate filing actuaries may not be aware of the content of past calls. We suggest citation to particular documents, such as adopted summaries or minutes of the referenced calls, if available.

Section V.C.5(a) refers to “industry-average assumptions at the time of original pricing” for LTC products. Where are these averages reliably to be found? How are variations in product, carrier, distribution channel, and other factors taken into account? What level of deviation from these averages (in one or more assumptions) would be considered “out of line” and trigger the use of “benchmark premium,” rather than actual original premium, in the MSA Review Team’s review process? Recognizing that regulators who approved a company’s original product and rate filings had the opportunity to review all relevant assumptions at the time of filing, and may not have enforced or suggested the use of industry averages at that time, it may not be appropriate to determine benchmark premiums with 20/20 hindsight uniformly for all product filings and company characteristics.
For rate-stabilized business, the draft states that the 58/85 test “would produce the recommended rate increase” if lower than the Minnesota and Texas approaches. Why would these approaches potentially override and reduce the recommended rate increase, when the rate stability model was already intended to address the issues with loss ratio regulation described in the preceding paragraph of the Framework?

Non-Actuarial Considerations

The Framework contains various non-actuarial considerations that may be contemplated as part of the rate recommendation. We believe it is important to recognize that many of these considerations, while listed as non-actuarial, have actuarial aspects or implications.

For example, the phase-in of a rate change over a period of years necessitates a higher cumulative rate increase to have the same financial impact as a single rate increase. Similarly, if limitations are imposed on when a company can file a future rate increase, such as a rate guarantee period, a future request may need to be higher due to the cost of waiting.

Caps or limits on rate increase approvals that are not based on actuarial considerations likewise increase the size of future rate increases. In this situation, where necessary premium rate increases are delayed, policyholders pay higher premiums, and the ultimate necessary premium level increases due to the delays in approvals.

It should also be noted that the Minnesota and Texas approaches, while primarily actuarial in presentation, already include decisions based on non-actuarial considerations, such as specific cost-sharing provisions and disallowing interest rate deviations as a reason for a rate increase.

Finally, we believe that the MSA Review process may ultimately add little value if its actuarial conclusions are frequently overridden at the state level by non-actuarial considerations. The task force may wish to consider the degree of commitment demonstrated by Participating States when evaluating the success of the MSA Review program in meeting the NAIC’s objective of “developing a consistent national approach for reviewing current LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner.”

Additional Items

There is a potential interaction between the NAIC’s Reduced Benefit Options workstream and the MSA Review. Appendix E, “Guiding Principles on LTCI Reduced Benefit Options Presented in Policyholder Notification Materials,” suggests that insurers should consider “disclosing all associated future planned rate increases approved by regulators” in their rate increase notification letters. Will the existence of an MSA Review report with a recommended cumulative rate level impose any obligation on an insurer to disclose the likelihood of future rate increases to reach this level? How would any such disclosure apply to Participating and/or non-Participating states?

The tone of several sections of the document seems to unnecessarily impute suspect motivations to companies who sold and/or currently sell LTC insurance:

- Section V.B.4(b) states that the loss ratio method results in “low incentive for responsible pricing.” Practicing LTC pricing actuaries are responsible for compliance
with all relevant actuarial standards of practice, and a company has incentives to price appropriately. Most companies would prefer to receive premium sooner rather than later. Additionally, there are the costs associated with filing and implementing a rate increase and the impact on policyholders of premium adjustments.

- Section V.C.2(a) refers to “a direction that could be seen as misleading.” Subparagraph (a) could be deleted entirely without affecting the definition of the Minnesota approach.
- Section V.C.5, “anti-bait and switch adjustment,” where we suggest a less pejorative term could be used. In the context of a rate increase review, see our comments above regarding industry standards and benchmarking. The concern regarding potential deliberate underpricing to boost market share, expressed in subparagraph 5(a)(iii), is best addressed in the context of an initial rate review by regulators.

In our May 24 comment letter, the subcommittee reserved comment on Appendix B of the April 9 Framework draft until its information requirements could be considered in context with exposure drafts of the Actuarial Review section. We now offer the following comments:

- Item A.1. should provide clarification for the desired issue state for group products (i.e., master group policy issue state or certificate issue state).
- Some items from subsections A and B are at least partially duplicative. Specifically, items regarding attribution of rate increase, waiver of premium handling, and assumption comparisons to asset adequacy testing are repeated in both locations.
- We encourage Participating States to agree that the listing of information for an MSA Review (as outlined in Appendix B) is exhaustive. If no further requests for information are needed as part of a specific state review, the filing process could be streamlined for both filers and reviewers.

**Conclusion**

Thank you for the opportunity to provide input on the development of the actuarial aspects of the MSA Review process. The subcommittee thanks members who participated in the drafting of this comment letter, including J. Patrick Kinney, MAAA, FSA; Mike Bergerson, MAAA, FSA; Greg Gurlik, MAAA, FSA; Aaron Wright, MAAA, FSA; Ali Zaker-Shahrak, MAAA, FSA; Sisi Wu, MAAA, FSA; P.J. Beltramini, MAAA, FSA; Gordon Trapnell, MAAA, FSA; Jim Glickman, MAAA, FSA, FCA; Zenaida Samaniego, MAAA, FSA; and Perry Kupferman, MAAA, FSA.
We would welcome the opportunity to speak with you in more detail and answer any questions you have regarding these comments or on other topics. If you have any questions or would like to discuss further, please contact Matthew Williams, the Academy’s senior health policy analyst, at williams@actuary.org.

Sincerely,

Andrew H. Dalton, MAAA, FSA
Vice Chairperson, LTC Reform Subcommittee
American Academy of Actuaries

CC: Eric King, Health Actuary, NAIC
July 26, 2021

Commissioner Michael Conway  
Chairman, NAIC LTCI Multi-State Rate Review (EX) Subgroup  
Colorado Insurance Department

Dear Commissioner Conway and Subgroup Members,

The American Council of Life Insurers1 (ACLI) and the American Association of Health Insurance Plans2 (AHIP) strongly support the work of the NAIC Long-Term Care (EX) Task Force in achieving its charge of developing a consistent national approach for reviewing long-term care (LTC) rates and identifying options for consumers to modify benefits when faced with a premium increase on their LTC policy. As stated in our May 24th comment letter on the Operational Section of the LTC Multi-State Rate Review Framework (Framework) document, we recognize the commitment of state insurance commissioners and LTC subject matter experts from state insurance departments and appreciate the time and effort afforded to this critically important work.

The Actuarial Section is the core of the Framework document and worthy of a comprehensive review and robust discussions with all stakeholders to achieve the best possible result. While we are making good progress, we believe that several rounds of exposure, review and discussions will be required to finalize a document that is consistent with the Task Force charge. We have offered only high-level comments on this exposure and anticipate that we will share more detailed comments once our initial questions have been addressed.

Executive Summary
Our comments to this first exposure of the Actuarial Section of the MSSR Framework focus on transparency with respect to the methodologies used by the MSA Team.

It is important to remember that not only will the MSRR process be used to recommend actuarially justified rate increases on existing legacy blocks of business; it will be applied to business that is being sold today.

---

1 The American Council of Life Insurers advocates on behalf of 280 member companies dedicated to providing products and services that promote consumers’ financial and retirement security. Ninety million American families depend on our members for life insurance, annuities, retirement plans, long-term care (LTC) insurance, disability income insurance, reinsurance, dental, vision, and other supplemental benefits. ACLI represents member companies in state, federal and international forums for public policy that supports the industry marketplace and the families that rely on life insurers’ products for peace of mind. ACLI members represent 95 percent of industry assets in the United States.

2 AHIP is the national association whose members provide coverage for health care and related services to hundreds of millions of Americans every day. Through these offerings, we improve and protect the health and financial security of consumers, families, businesses, communities and the nation. We are committed to market-based solutions and public-private partnerships that improve affordability, value, access, and well-being for consumers.
Insurers best protect their policyholders by fulfilling the obligations they made to them. This is accomplished when insurers have some level of predictability in their ability to manage their LTC business over time. At its core, this level of predictability can only be achieved through transparency and consistency within the MSA Review Process, specifically regarding the methodology used to calculate the increase recommended by the MSA Team. When insurers understand the methodology the MSA Team will use to calculate rate increases, they can make informed decisions about their business now that will ensure they can fulfill their obligations to policyholders years into the future.

Our comments are focused on Section V. - Actuarial Review and Appendix C – Actuarial Approach Detail. We have also provided a general comment with respect to Appendix E – Guiding Principles on LTCI RBOs Presented in Policyholder Notification Materials.

Section V Actuarial Review and Appendix C – Actuarial Approach Detail

Our comments to this section of the Framework are guided by the Task Force charge to:

Develop a consistent national approach for reviewing LTCI rates that results in actuarially appropriate increases being granted by the states in a timely manner and eliminates cross-state rate subsidization.

Insurers need a clear understanding of how their businesses will be regulated – today and into the future. The Framework must be evaluated based on its impact both on legacy blocks of business and new business that will be developed and sold in the future. The Framework does not currently contain the rationale or criteria that will determine which method the MSA Team will apply to a particular filing. As a result, we request clarification on the following fundamental questions and issues:

1. Will the MSA Team apply just one method based on the characteristics of the block or will all methods be used in the calculation of a rate increase? If all methods will be used, will the MSA Team recommend a blend of the results? Or will they recommend the lowest percentage?

2. What public policy issue is each methodology designed to address (e.g. certain issues with aging or shrinking blocks)?

3. How will each methodology address the inequity between policyholders in states that have routinely capped or delayed increases and those that have not? The MSA’s Actuarial Review standards/recommendations for participating states should include an acknowledgment that the recommendations for rate approvals do not reflect lifetime rate inequalities resulting from inconsistencies in the amount and/or timing of historical rate approvals between states, even on policies that offer identical coverage. We believe that the standards should encourage states to work
with filing companies to address these inequities and that the MSA Team should continue to assess this issue to determine if more specific guidance is appropriate.

4. Will the MSA Team apply their “regulatory actuarial judgement” to recommend an increase percentage that is different (higher or lower) than that produced by the Minnesota or Texas approaches?

5. In the example proposed (where there’s less-than-credible older-age morbidity) what actions would the MSA Team take?

6. The description of the Minnesota methodology includes a focus on underlying assumptions and indicates that the reviews are benchmarking to industry-average assumptions. How are those assumptions calculated? Will they be provided to companies? Similarly, what is the “average corporate yield bond” index that will be used under the Minnesota method?

7. The “anti-bait and switch adjustment” under the Minnesota method appears to suggest the insurers intentionally underpriced LTC products. How would the MSA Team make this determination? How are the “industry-average assumptions at the time of original pricing” determined? Are product and underwriting differences accounted for? How far from the industry average is considered reasonable? Wouldn’t such assumptions only be considered unreasonable in hindsight considering the product was originally approved by the state insurance department?

8. The Minnesota Approach accounts for changes in interest rates; the Texas Approach explicitly does not. How do these conflicting approaches achieve similar results? The same is true in cases of solvency concern – the document states that the cost-sharing formula in the Minnesota Approach can be adjusted. How will the cost-sharing formula be adjusted? How is solvency accounted for in the Texas Approach?

9. Will the MSA Team recommendation reflect any non-actuarial considerations or is the document simply acknowledging their existence?

10. A clear distinction needs to be made between non-actuarial considerations that should inform the MSA Team’s recommendations (like company solvency) and non-actuarial considerations that states might apply to the MSA Team’s recommendation (rate caps, phasing, age limits). The former should be a factor in the MSA Team’s regulatory actuary judgment. To achieve The Task Force’s goal of a consistent national approach to rate actions, the MSA Team should seek to discourage the latter (unless required by a clear state statutory mandate).
11. A primary goal of MSA Review Process is to achieve an adequate rate level for policyholders in all states. As proposed, the process gives states the discretion to continue to apply state-specific non-actuarial restrictions and caps on rate increase amounts. While we recognize the independence of each state’s authority, we note that allowing states to impose artificial rate caps on what the MSA Team has determined to be an actuarially justified rate likely will perpetuate the historical discrepancies between states, which will not address cross-state inequities. It will also undermine the Task Force’s charge to develop “a consistent national approach” to achieve “actuarially appropriate increases.”

12. The Framework states that the MSA Team’s review of rate proposals will resemble a state-specific rate review process utilizing consistent actuarial standards and methodologies. In addition, the MSA Team will apply the Minnesota (Blended If-Knew/Make-Up) and Texas (Prospective Present Value) approaches, as described in the 2018 NAIC LTC Pricing Subgroup’s paper – *Long-term Care Insurance Approaches to Reviewing Premium Rate Increases* (“NAIC Pricing Subgroup’s Paper”), to calculate recommended, approvable rate increases. In reviewing the methodologies, we noticed that specific components of the Texas method are not clearly included. In addition, there were changes or additions to adjustments made to the Minnesota method. The NAIC LTC Pricing Subgroup’s paper was the result of a deliberate and collaborative effort on the part of regulators and industry in 2018, during which each method was fully vetted. We believe that any kind of change to the methods outlined in that document should occur only after the same robust discussion and review. For example:

   a. Under the Texas method, the catch-up and transitional provisions are not clearly included. As outlined in the NAIC LTC Pricing Subgroup’s Paper, we believe these are valid and important adjustments that should be considered when applying the Texas method. The catch-up provision is intended to account for necessary additional premiums in a new rate increase related to assumptions provided to the department at the time of a previous rate increase request that were not approved in conjunction with the prior filing(s). Likewise, the transition provision, for pre-rate stability products and other products where the last rate increase request was voluntarily reduced by the company, provides the ability to make a single filing to provide the full amount of premium necessary to meet the actuarial certification.

   b. With respect to the “anti-bait and switch adjustment” under the Minnesota method, we strongly disagree with the inclusion of this adjustment. We believe the name itself draws a legal conclusion and submit that any reference to this type of adjustment should be categorized as an “original assumption adjustment”.
13. Finally, as mentioned in our previous comment letter, we encourage the subgroup to include a formal trigger to review and amend the Framework annually.

Appendix E – Guiding Principles on LTCI RBOs Presented in Policyholder Notification Materials

We appreciate the subgroup’s acceptance of many of our recommended changes now reflected into Appendix E. However, there are a few suggestions made in our May 24th letter that were not accepted by the subgroup. We welcome the opportunity to discuss further refinements to this document as the work evolves.

CONCLUSION

We share your fundamental objective of ensuring that policyholders receive the benefit of their insurance policies when they need it. Maintaining a guaranteed renewable product, with limited or no rate adjustment flexibility, is not sustainable, so we appreciate the MSRR subgroup’s hard work and analysis to identify and develop key parameters for a process to assess and approve actuarially justified rate increases. Success of this initiative would help to ensure market stability, which will support the willingness of current LTC carriers to stay, and hopefully will motivate others either to return or to join.

Thank you for the opportunity to provide these comments. We will submit more detailed comments once the Framework document is exposed in its entirety.

ACLI/AHIP welcomes the opportunity to discuss our comments with you and would be pleased to participate in additional discussions regarding the issues and perspectives included in this letter.

Sincerely,

Jan M. Graeber
Senior Actuary, ACLI

“Any business built on non-disclosure of information vital to its customers will not survive - and will not deserve to survive over the long term” -- Joe Belth, The Insurance Forum
Introduction

FinancialMedic, LLC has chosen to respond to NAIC’s LTCI MSA Framework document dated June 10th, 2021. The firm is noted for its work product in the FIRE (Financial Independence Retire Early) field. We develop intellectual property for a holistic, integrated financial planning (FP) systems that includes substantive mathematical modeling over a wide range of personal financial domains.

The firm recognizes Long Term Care (LTC) as a valid risk in FIRE planning and have conducted extensive research in LTC and LTC Insurance (LTCI). The outcome of this research is embedded within our operational FP system. As part of this consumer driven effort, our firm published LTCI Rate Adjudication & Neutrality © Oct 2019, a treatise on LTCI industry pricing practices. This publication along with two years of data mining form the basis of the response within.

Our LTCI knowledge and experience represented here are a thumbnail of our complete industry coverage and only confines itself to subject matter of the Actuarial Review.

Overview

Considering that the LTCI Industry is 3 decades old, one should be shocked to learn of a Draft paper of the industry methods of rate adjudication. What is shocking is to also witness this debate in 2018, a paper from the American Academy of Actuaries (AAA)¹ with no resolution since or sense of urgency. Meanwhile, affected stakeholders² are shocked & angry by the parabolic scaling of rate increases over the past 3 years particularly in certain state jurisdictions. There are spurious claims of industry insolvency without evidence except for isolated cases.

Our firm is very familiar with the Loss Ratio Approach (LRA) discussed in Section V, Actuarial Review. For a client who has legacy LTCI, we are called upon to project its contractual performance within the confines of our FIRE application. Our LTCI Individual Case Basis (ICB) modeling must necessarily include similar logic pieces of morbidity incidence, duration, and situs modeling. A technical paper describes data and methods to the level of programmatic repeatability enabling an ICB decision support system. We believe we are the only firm capable of such analysis.

Historically, our clients have been concerned about premium projections as increases are perceived to know no bounds. Right out of the research gate in June 2019 we noted legacy LTCI’s premium projection toxicity using LRA, such that one could debate whether this product falls within the definition of insurance as a risk hedge. On the contrary, LTCI ownership has become a financial risk to the many seniors on fixed income due to its unfair pricing. We use the term Fair Pricing to mean Repricing In Accordance with Level Premium Precepts, the basis on which this product was sold. The technical definition and methodology is described in the earlier cited paper.

¹ Considerations for Treatment of Past Losses, American Academy of Actuaries, Oct 2018
² We consider primary affected stakeholders are policyholders, state government (Medicaid), federal government (Medicaid), and the Long-Term Support Services (LTSS) sector.
Loss Ratio Approach, the main culprit

Addressing Actuarial Review, Loss Ratio Approach, Section B, point 4, quoting:

“The loss ratio approach, one of the minimum standards in many states’ statutes, is evaluated by the MSA team. However, there is general recognition that this approach produces rate increases that are too high and do not recognize other typical statutory standards such as fair and reasonable rates.

a. The loss ratio approach also does not recognize actuarial considerations such as the shrinking block issue, where past losses being absorbed by a shrinking number of remaining policyholders would lead to unreasonably high-rate increases. This concern was the main driver of the Minnesota, Texas, and other approaches”.

b. The loss ratio approach shifts all the risk to the policyholders. If the company is allowed always to return to the 60% loss ratio, there is low incentive for responsible pricing.

The admission that past losses, known as premiums that were insufficient since inception, confirms our independent findings. We find evidence that some regulators reject the past loss theory without foundation of data science and accounting practices. We add that it is not merely the principal of past underpricing that is subject to recapture. The LRA is based on present value (PV) calculations, thus the shrinking number of policyholders (SNOP) are also charged interest based on the carrier’s discount rates, as though signing an LTCI contract involved a hidden lending arrangement.

Typical example (2021): A recent rate increase for a large carrier expands SNOP premiums to 4.02x original premium though the book remains considerably under-priced using LRA (at an LLR of 111%). Through standard accounting procedures, the new premium is calculable and allocatable to 3 distinct components.

![Rate by Components Illustrating Past Loss Recovery](image)

We do not see recovery of principal and its interest being reported in narratives or financial statements from LTCI actuaries in carrier filings or regulatory final dispositions. This non-disclosure misleads all LTCI stakeholders. We note that the expanding pie in premium growth in rate filings 2020+ are mainly due to the two recovery components while Fair Pricing remains static.
The Texas Approach

Our firm agrees with what the Texas Approach is designed to address, Section D, points 1 and 2, quoting:

1. Past losses are assumed by the company and not by existing policyholders. An approach that considers past claims in the calculation of the rate increase, such as a lifetime loss ratio approach, permits to some extent, the recoupment of past losses.

2. Calculates the rate increase needed to fund the prospective premium deficiency for active, premium-paying policyholders based on an actuarially supported change in assumption(s). This ensures that active policyholders do not pay for the past claims of policyholders who no longer pay premium.

Point 3 describes a general methodology of looking at forward “deltas” (both present value premiums & claims, along with rate history) as the primary drivers of rate changes. Appendix C, Section B provides a formula that allowed our firm to back test with a small code snippet to our LTCI processing subsystem that already had a forensic analysis capability.

We encountered cases where the future claim “delta” was small relative to future premium “delta” such that a premium reduction would be called for. The Texas approach provides a useful filtering mechanism. See example below. The claim “delta” was exactly zero, a perfect overlap, yet the regulatory agency granted a 40% increase. The stock language of the actuarial narrative based the increase on an expected deterioration of future claims. Accounting procedures refute the actuarial narrative but a simple picture tells the story even better absent professional formalities.
The Texas proposal acknowledges that the methodology would not work for a first time increase as no “deltas” exist. Moreover, we discovered the formula by itself is not a complete specification. For example, when measuring future “deltas” from one filing to the next, the specification does not clarify the source of PVs to be used for the baseline (old) filing. In our experience, many rate requests are not granted in full thus a baseline filing would not be a good source of information unless there were a recalculation of PV futures as adjusted by the actual rate increase.

A general concern is that the Texas Approach, being a mere draft or conceptualization, would have to be vetted to fit into the current environment. It is a dramatic change and one that would cause stakeholders to question why is being implemented, after significant economic harm. Our firm has received questions from clients, who: (1) have lapsed, (2) paid more in premiums than they thought they should have, or (3) exercised an RBO – “have we been injured by the Loss Ratio Approach”? Answer is a resounding “yes”!

Summary

The views presented here have already been presented to parties who have a need to know. To date, our work has been well-distributed and has not been refuted.

We ask how the industry came about the LRA method and not Repriced in Accordance with Level Premium Precepts (Fair Pricing) as the product was originally intended and sold to clients.

The Actuarial Review raises fundamental questions as to the technical purity of rate adjudication methods yet the industry appears to be unduly focused on RBO. This is cart before the horse logic in our professional opinion.

Respectfully submitted,

LTC (EX) Multi-state Actuarial Rate Review Framework

On p. 14, in appendix D, Principles for Reduced Benefit Options (RBO) Associated with LTCI Rate Increases, it reads:

*Exploration of innovation, particularly where an outcome of improved health and lower claim costs are possible:*

- *Regulators and interested parties should continue to study the idea of offerings being made by insurers including potentially being tied to rate increases, e.g., providing hand railings for fall prevention in high-risk homes, and identifying the pros and cons of such an approach.*

Rate increases for long-term care policies typically add thousands of dollars to the annual premium paid for the policy. These types of rate increases are significant and may be a hardship to elderly consumers on fixed incomes. Consumers may not be able to consider their own best interest in the face of a significant change to annual expenses. Any offer associated with a rate action, and which involves the collection of data through artificial intelligence should clearly explain how information will be collected and used to avoid profiting and potential discriminator actions on behalf of the insurer. Also, any offer to an insured tied to rate increases should be supported with data showing why and how the rate impact is directly correlated to the offer.

Consider this example:

- A consumer on a fixed income receives notice that long-term care premiums will increase by $3,000 annually.
- That consumer now faces $3,000 of new expenses.
- If the consumer checks a box, they will receive a smart device that will collect data from their home and computer.
- If they select this option, they will not have to pay any rate increase.

The consumer may not be in the position to act in their own best interest and may not be able to consider these options carefully for several reasons. First, the consumer may not fully understand the technology proposed, the data to be collected, and the privacy implications. Second, the consumer may not realize that there may be several other options to modify their policy and reduce premiums besides accepting the new technology option. The technology option may seem like the only choice available.

The MSA subgroup should consider keeping the wellness program offers separate from implementation of large rate increases (greater than 10%). Then, there would be no question that the consumer was coerced, rather than persuaded, to take part in any wellness program.

Ms. Jane Koenigsman, Sr. Manager – L/H Financial Analysis  
National Association of Insurance Commissioners  
1100 Walnut St., Suite 1500  
Kansas City, MO 64106-2197  
Email: jkoenigsman@naic.org

RE: Exposure Draft: LTCI MSA Framework Comments

Dear Ms. Koenigsman,

Thank you for the opportunity to provide comments on the Long-Term Care Insurance (LTCI) Multi-State Actuarial (MSA) Rate Review Framework. We strongly support the goal of consistent rate review across all states for LTCI products.

We support a more consistent rate review approach to minimize the differences across states in their application of actuarial and nonactuarial considerations in rate review criteria for LTCI rate filings. While we think there are benefits for states to participate MSA rate review, a few key criteria and issues need to be addressed in order to achieve a maximum value from MSA rate review.

- **Is this binding? If not, limited participation might impact goal of nationwide uniformity and defeat the purposes of MSA rate review.**
  
  Several states have made it clear that they are not willing to participate in or accept the results of the MSA rate review, thus hampering the ability of MSA rate review to achieve its stated goal of nationwide uniformity. In order to achieve a more consistent rate review approach and minimize the differences across states, most states (if not all) need to participate in the MSA rate review program and make use of the final results mandatory.

  If the MSA rate review is not binding on participating states and is instead treated as a recommendation, state actuarial reviewers will use their own actuarial judgement to evaluate the MSA rate review and then apply state-specific laws and rules. The results will be different and therefore inconsistent. Enough state must bind themselves to the MSA rate review results in order for this approach to be effective.

  The current status of LTCI rate review at the Interstate Insurance Product Regulation Compact (IIPRC) informs this concern. At least a half dozen of the IIPRC states have opted out of IIPRC LTC review standards. This lack of uniformity is exacerbated by the IIPRC only being allowed to consider rate increases for policies that the IIPRC originally approved, and only for increases up to 15%. These challenges for the IIPRC suggest similar challenges may exist for MSA rate review.
OFFICE OF THE INSURANCE COMMISSIONER

Ms. Jane Koenigsman
National Association of Insurance Commissioners
RE: Exposure Draft: LTCI MSA Framework Comments
July 21, 2021
Page 2

- Can the rate changes recommended by the MSA team be implemented by all states and meet existing state laws and rules? If not, does this invalidate the actuarial work of the MSA team?
  Some states have capped an LTCI rate increase regardless of actuarial justification. If the MSA team recommends a higher rate increase than a particular state’s capped rate increase, the actuarial assumptions may no longer be valid. Also, those states without a rate cap will be continuing to subsidize the states with a rate cap.

- Can the MSA Team review meet the proprietary or confidentiality requirements of the participating States?
  MSA rate reviews will be done by drawing on staff support from various state insurance departments. Can the MSA Team effectively maintain confidentiality and meet individual state’s proprietary information law?

Comments Specific to MSA Actuarial considerations:

- MSA (Advisory) Report: The actuarial requirements in the report should not conflict with various state’s laws, rules, and procedures. The report’s wording will also need to be edited carefully whether it is just a recommendation or if there are conflicts with state regulations. The report should also address that actuarial standards and expectations still apply, since the team members are expected to contribute their actuarial expertise.

- The NAIC should conduct a study to determine whether the “Minnesota” and “Texas” approaches mentioned in the MSA framework are consistent with the state laws and rules. Take our state as an example: we do not automatically calculate and discuss the “Minnesota” or “Texas” rate increase calculations. The proposed MSA rate review procedures are somewhat different from our current rate review, rules, and methodology. In our review, we also require carriers to clearly designate when policies were issued and whether the block is closed or still being sold. Carriers are also required to clearly demonstrate how the policies look in terms of rate stability requirements (e.g., the 58%/85% analysis) and the loss ratio requirements.

Sincerely,

Lichiou Lee

SPECIAL (EX) COMMITTEE ON RACE AND INSURANCE

Special (EX) Committee on Race and Insurance Aug. 15, 2021, Minutes ................................................................. 4-167
  Special (EX) Committee on Race and Insurance July 21, 2021, Minutes (Attachment One) ........................................4-178
  Special (EX) Committee on Race and Insurance 2021/2022 Proposed Charges (Attachment One-A) .................4-179
  Special (EX) Committee on Race and Insurance July 1, 2021, Minutes (Attachment Two) .................................4-181
The Special (EX) Committee on Race and Insurance met in Columbus, OH, Aug. 15, 2021. The following members participated: David Altmaier, Co-Chair (FL); Dean L. Cameron, Co-Chair (ID); Raymond G. Farmer, Chair Emeritus (SC); Andrew N. Mais, Co-Vice Chair (CT); Chlora Lindley-Myers, Co-Vice Chair (MO); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Alan McClain (AR); Peni Itula Sapini Teo (AS); Ricardo Lara (CA); Karina M. Woods (DC); Trinidad Navarro (DE); Colin M. Hayashida (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon (LA); Gary D. Anderson (MA); Kathleen A. Birrane (MD); Eric A. Cioppa (ME); Anita G. Fox (MI); Grace Arnold (MN); Mike Chaney (MS); Mike Causey (NC); Jon Godfread (ND); Eric Dunning (NE); Marlene Caride (NJ); Barbara D. Richardson (NV); Linda A. Lacewell and My Chi To (NY); Judith L. French (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry D. Deiter (SD); Doug Slape (TX); Jonathan T. Pike (UT); Scott A. White (VA); Michael S. Pieciak (VT); Mike Kreidler (WA); Mark Afable (WI); James A. Dodrill (WV); and Jeff Rude (WY).

1. **Adopted its July 21, July 1, and Spring National Meeting Minutes**

The Special Committee met July 21 and July 1. During these meetings, the Special Committee took the following action: 1) heard comments on its 2021/2022 proposed charges; and 2) adopted its 2021/2022 proposed charges.

Commissioner Altman made a motion, seconded by Director Lindley-Myers, to adopt the Special (EX) Committee’s July 21 (Attachment One), July 1 (Attachment Two), and April 12 (see NAIC Proceedings – Spring 2021, Special (EX) Committee on Race and Insurance) minutes. The motion passed.

2. **Received a Status Report on Workstream One**

Executive Deputy Superintendent of Insurance To reported that Workstream One’s initial recommendations were incorporated into the Special Committee’s charges and that the Workstream will move forward with the next phase of its work.

In terms of next steps, Workstream One will reconvene in September to move forward with additional engagement with stakeholders to understand the efficacy of diversity-related programs, how companies measure their progress, and what state insurance regulators can do to support these efforts.

Workstream One will also continue collecting input on any existing gaps in available industry diversity-related data.

Workstream One will continue to do research and analysis to identify issues and develop specific recommendations on action steps state insurance regulators and companies can take to improve the level of diversity and inclusion in the industry.

3. **Received a Status Report on Workstream Two**

Commissioner Clark reported that Workstream Two has been charged with researching and analyzing the level of diversity and inclusion efforts of the NAIC and state insurance departments.

The Workstream recently emailed to commissioners a Best Practices Survey intended to examine, at the zone level, best practices and initiatives state insurance departments can consider promoting diversity, equity, and inclusion (DE&I) in their offices. Once responses have been gathered, the Workstream will meet to discuss and develop a method and forum to share diversity and inclusion information among state insurance regulators.

The NAIC has asked commissioners to share their departments’ diversity contact with Evelyn Boswell, NAIC Director of Diversity and Inclusion, for sharing DE&I information and training. The NAIC has also begun the process of developing a diversity training program for state insurance regulators and will get input from the NAIC membership as it moves forward, likely through Workstream Two.

Birny Birnbaum (Center for Economic Justice—CEJ) asked a question of Workstream Two regarding what metrics, if any, the NAIC is using to evaluate DE&I efforts and if the metrics include DE&I within regulatory processes. Mr. Birnbaum noted he...
asked the question based on the presentation made during the NAIC/Consumer Liaison Committee meeting based on the survey of consumer organizations and their difficulty navigating regulatory processes. Kay Noonan (NAIC) said Workstream Two was not specifically charged with looking at diversity within regulatory processes but was charged with looking at DE&I within state insurance departments. When the Workstream meets again, the NAIC will make sure it receives a copy of the presentation, and the Workstream can talk about whether there is a need to expand that charge. Ms. Boswell described what metrics the NAIC is using for internal DE&I efforts, goals, benchmarks, and implementation. She noted it is a three-year strategy and that going into 2022, the NAIC DE&I Council work will ensure there is continued momentum and progress.

4. **Received a Status Report on Workstream Three**

Commissioner Schmidt reported that Workstream Three recommendations from the initial report were incorporated into the 2021/2022 adopted charges and that the Workstream will move forward with the next phase of its work.

The American Academy of Actuaries (Academy) and the (Casualty Actuarial Society—CAS) have created working groups looking at these issues, and both groups have reached out to the NAIC offering input. The Special Committee will engage with the Academy and the CAS early in the process to see what their research has shown and how it can inform the Special Committee’s next steps.

In terms of next steps, the Workstream will reconvene in September to formulate a work plan and develop priorities and timelines.

Commissioner Mais stated that when looking at the charges related to Workstream Three, the Workstream believes Charge F. will garner immediate attention. Charge F. spreads across the workstreams and calls for continuing research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact.

A subset of Charge F. is Charge F.2, which is specific to Workstream Three and calls for the development of analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance.

Workstream Three will work closely with the Special Committee in determining who works on the research and analysis part of insurance, legal, and regulatory approaches. It seems likely that the Workstream may want to take on that part first, with a focus on defining the terms, before the Workstream turns to developing analytical and regulatory tools. Workstream Three will be a key part of creating those definitions, and Workstream members will see that as a high priority within the work plan.

Workstream Three’s other charges have to do with data collection, affordability issues, and nonstandard markets. The Workstream will prioritize those alongside the unfair discrimination charge. The charge in regard to producer issues has been received by the Center for Insurance Policy and Research (CIPR), and the Workstream will oversee that work.

5. **Received a Status Report on Workstream Four**

Commissioner Afable reported that Workstream Four has not met since adopting the Workstream’s initial report and recommendations. Now that the Special Committee has adopted its charges, the Workstream is eager to start meeting and do a deeper dive into the practices and barriers that potentially disadvantage minority and underserved populations in the life insurance and annuity lines of business.

The Workstream plans to meet in September to develop a work plan with concrete deliverables and looks forward to making a positive contribution to an issue that continues to be a critical for all.

6. **Received a Status Report on Workstream Five**

Commissioner Altman reported that Workstream Five met July 8 and June 10. During its July 8 meeting, the Workstream focused on issues related to provider networks, provider directories, and cultural competency. The Workstream asked panelists representing consumers, industry, and providers to respond to several key questions related to these issues, including: 1) Are there ways state insurance regulators can incentivize more diverse, inclusive, and culturally competent provider networks? and 2) How can provider directories be used as a tool to connect patients to culturally competent providers and care? The Workstream also asked if there were specific deliverables the NAIC should work towards to address these issues.
During its June 10 meeting, the Workstream heard responses from a panel of industry representatives and a panel of consumer representatives on several key questions related to demographic data collection. Those questions asked about the benefits of insurer collection of disaggregated demographic data, the risks of collecting such data, and regulatory barriers to the collection of such data. The panelists also were asked what role state insurance regulators should have in collecting this type of data and whether there was a specific deliverable the NAIC should work towards in considering this issue.

Commissioner Altman noted that also during its June 10 meeting, the Workstream prepared and exposed a draft data collection best practices document reflecting the discussion for a public comment period ending Aug. 19. The Workstream anticipates beginning to discuss the comments received on this document during its meeting on Aug. 26.

Commissioner Altman also noted that Workstream Five plans to continue meeting at least once a month to: 1) work on the data collection best practices document; 2) work on a future network/directory document; and 3) collect additional information on issues the Workstream identified in its report to the Special Committee.

Workstream Five will consider the following topics and actions in the remaining meetings in 2021: 1) during its September meeting, the Workstream plans on receiving consumer presentations, as well as further consideration of the data best practices document; 2) during its October meeting, the Workstream plans on receiving additional presentations regarding equity issues in provider networks and provider directories, as well as discussion of next steps in framing a policy document for networks and directories. Also, if time permits, the Workstream will further discuss the data best practices document; and 3) during its November meetings, the Workstream proposes to receive presentations regarding the equity lessons of the COVID-19 pandemic, approve the data best practices document, and release a network/directories equity issues policy document for stakeholder comment.

7. Heard a Presentation on the Availability and Affordability of Insurance for Minority Consumers from Robert W. Klein and Associates

Robert W. Klein (Robert W. Klein and Associates) reported on the availability and affordability of insurance for minority consumers. He noted that empirical research indicates that some consumers (e.g., African Americans, low-income households) tend to pay higher premiums and may have less adequate coverage. He asked: Is this due to unfair discrimination or other factors or a combination of both?

Mr. Klein said as an economist specializing in insurance, unfair discrimination could be explicit or implicit. Insurers may not intend to treat certain consumers unfairly, but certain rating factors (e.g., credit scores) could have a “disparate impact” on these consumers.

What constitutes “unfair” discrimination depends on the standard for “fair” discrimination. There is the actuarial standard, which is embodied in most, if not all, state rating laws. Pricing/underwriting are “fair” if factors used are commensurate with an insured’s risk. There are other standards that may be applied, such as insurance prices should be the same for all insureds or based on an insured’s ability to pay.

Mr. Klein discussed the issue of “disparate impact,” which refers to practices that have adverse effects on certain protected groups that do not appear discriminatory on their face but are discriminatory in their application or effects. He said there is this “business necessity” defense in which the challenged practice serves a legitimate purpose that cannot be served by an alternative practice with a less discriminatory effect. This is something that a company or firm that is accused of disparate impact might offer in defense of what it is doing.

Mr. Klein noted that he continues to be involved in insurance issues and follows activities regarding unfair discrimination and other aspects of insurance. He said he recognizes the concerns and is sympathetic to availability and affordability problems. He said he believes allegations of unfair discrimination warrant careful and rigorous investigation and public policies that improve market efficiency and equity. Regardless of whether insurers engage an unfair discrimination, there are measures that could improve the availability and affordability of insurance for minority and low-income consumers. He said good policy should be based on sound research and careful consideration of the trade-offs associated with different measures.

Mr. Klein next briefed the Special Committee on economic principles. There are three conditions for economic price discrimination: 1) the seller must have some control over prices; 2) the price discriminator must be able to segregate consumers into groups with different elasticities of demand or reservation prices; and 3) there is no opportunity for arbitrage—resale by low-price to high-price consumers, which really does not apply to insurance. He said an economist named Gary Becker in 1993...
proposed that economic price discrimination should seek to determine whether firms’ profits on minority consumers are higher than they are for non-minority consumers.

For actuarially unfair discrimination to occur, there needs to be some form of market failure that enables insurers to acquire market power or that otherwise impairs efficient market functioning. Also, insurers would need to be able to segregate low-income/minority consumers and charge them higher premiums. While most economists believe that auto and home insurance markets generally meet the conditions for workable competition, there are problems, and Mr. Klein said the most significant problem is in auto and home insurance. Both insurers and consumers have imperfect information. Many consumers have a poor understanding of insurance, and some may find it difficult to shop for it.

Mr. Klein asked what the literature says. He said studies by consumer groups conclude that insurers engage in unfair discrimination, whether it is explicit or implicit against minority and low-income consumers. The most rigorous studies by insurance economists have not found evidence of unfair discrimination in pricing in auto and home insurance. He said that does not mean it does not exist and said that these studies, for the most part, are about 20 years old. These economists are more guarded in their conclusions regarding the effects of insurers’ underwriting/marketing practices on availability of coverage for minority/low-income consumers. The economists have not been able to rule out the possibility that these underwriting and marketing practices may have effects on availability and may result in certain consumers having less than adequate coverage. Findings of studies by state insurance regulators tend to be consistent with academic studies, such as a study performed by the Missouri Department of Insurance (DOI) in 2018. There are some exceptions. For example, some older studies by the Texas Insurance Department found evidence of unfair discrimination. Differences in findings appear to be due to different methodologies used by different researchers.

Mr. Klein formed a study commissioned by the National Association of Mutual Insurance Companies (NAMIC) earlier this year that analyzed data published in the NAIC’s 2020 Private Passenger Auto Study. This report contained tables/figures showing average premiums, pure premiums, and loss ratios by income quartile for each state. Underlying data was at a ZIP code level. Mr. Klein’s principal objective was to determine how these insurance metrics varied with income. He found that average premiums, pure premiums (average loss costs), and loss ratios tend to be higher in low-income areas, but this pattern was not consistent across all states.

Mr. Klein’s study indicates that loss ratios tend to be higher in low-income areas, but this pattern is not consistent across all states. Where loss ratios are higher or the same in low-income areas, this suggests (but does not prove) that insurers are not charging low-income drivers “excessive” rates. Then there are a number of states where there is the opposite case, so it does suggest that drivers in those states are being charged excessive rates.

Mr. Klein said his analysis was at a high level and not rigorous. He could not access nor analyze data at a ZIP code level. While income may serve as a proxy for race/ethnicity, it is not the same thing. He was unable to analyze how premiums, claims, and loss ratios varied with race/ethnicity and other variables that could affect or be associated with insurance premiums and availability.

Mr. Klein said there is a need for more rigorous research that would provide a much better understanding of what minority and low-income consumers face with respect to the price and availability of auto and home insurance and what factors drive their experience. This research could take various forms, such as: 1) analysis of ZIP code-level data coupled with economic and demographic data; 2) surveys of consumers; and 3) examination of insurers’ rating models, underwriting guidelines, marketing, etc. Mr. Klein said he is interested in whether certain consumers are at a disadvantage with respect to their ability to shop for insurance. He said this definitely could have an effect on what consumers pay for insurance and the quality of coverage consumers receive.

Mr. Klein noted that good ZIP code-level data for auto insurance is available for every state to the NAIC Tableau application. The statistical agents and advisory organizations (e.g., the Insurance Services Office [ISO] and Verisk Analytics) have even better data at a transaction level. J.D. Power has good survey data, but it is reluctant to share it for this kind of research. He said academic researchers need data as well as financial support to conduct this kind of research.

Mr. Klein noted that good policy requires good research. These are not simple problems with simple explanations that are easy to solve. Banning certain rating factors (e.g., credit scores) may seem like a good idea, but it could backfire. He said if the nature, extent, and causes of availability and affordability problems could be understood, then appropriate welfare-enhancing “solutions” could be designed. They could involve restrictions on certain insurer practices, reducing risk and claim costs for minority consumers, improving consumer information and the ability to shop for insurance, and other measures (e.g., taxpayer-funded subsidies).
Commissioner Ridling asked how the quartiles are identified. He asked if it is IRS data or housing data. Mr. Klein responded he believes the NAIC used census data to divide ZIP codes into these income quartiles. So, it was linking the census data to identify the ZIP codes, and then the NAIC, with the help of the statistical agents, have the insurance data for those ZIP codes. There were some ZIP codes for which income data was not available, so that creates that fifth category.

Commissioner Ridling asked if it was basic income data from the IRS. Mr. Klein said it was not the IRS. He said it was basically the U.S. Census Bureau and not necessarily the 10-year census. There are also other surveys the Census Bureau does every one or two years. He said he believes that was a source of the income data for those ZIP codes, but the NAIC just used either a mean or median income for a ZIP code to determine where they fit within which quartile.

Eric Ellsworth (Consumers Checkbook) asked Mr. Klein his thoughts on the impact of difficulty in shopping for consumers in terms of potentially increased premiums. Mr. Klein replied it is a great concern and said he is not aware of any research. His concern stems from the fact that it is generally known that if consumers shop for insurance and they are well informed about it, they often can get a better price and a better-quality coverage for what they pay. The concern is there might be low-income groups and, to the extent that minorities tend to have lower incomes or live-in certain areas, they are not able to shop as well. It may have more to do with access to the Internet or access to insurance agents. All these issues have been raised in the past, but Mr. Klein said he is not aware that anyone has really studied this.

8. Heard a Presentation on Testing for Racial Bias in Insurance from the CEJ

Mr. Birnbaum discussed testing for racial bias in insurance. He noted that provisions regarding fair and unfair discrimination are generally found in two parts of insurance statutes. Unfair discrimination is generally defined in two ways: 1) actuarial. There must be an actuarial basis for distinction among groups of consumers; and 2) protected classes. Distinctions among groups defined by certain characteristics—race, religion, national origin—is prohibited regardless of actuarial basis.

Mr. Birnbaum asked why race is a prohibited factor for underwriting or pricing. He said for some lines of insurance, race is predictive of insured loss, so he asked why life insurers are prohibited from using race as an underwriting pricing factor. He asked if race were predictive of auto insurance claims, then why should insurers be unable to use that or any other factor that is predictive of claims. He said Mr. Klein’s report suggests it should be.

Mr. Birnbaum said one reason race is prohibited could be that people have no control over their race; they are born with it. However, he said there are plenty of pricing factors based on characteristics that consumers have little or no control over like age or gender. Religion is a prohibited factor, but consumers can change their religion. Mr. Birnbaum asked again why state and federal laws declare that racial discrimination is unfair discrimination in insurance.

Mr. Birnbaum said he suggests the reason race and protected class characteristics are carved out regardless of actuarial fairness is there is a history of discrimination that, at best, has left a legacy of outcomes that are embedded in the data used for actuarial analysis and, at worst, continues today with racist practices, whether intentional or unintentional, that are unrelated to risk or cost of insurance. Unfair discrimination in insurance regulation recognizes that historic discrimination has long-lasting effects that disadvantage these groups. The shorter life expectancy of Black Americans is not caused by their skin color, but by the historic and ongoing discrimination in housing, health care, and policing. Mr. Birnbaum said this is why U.S. federal civil rights and anti-discrimination laws on employment, credit, housing, and insurance have always been understood to prohibit not just intentional discrimination, but practices, intentional or unintentional, that result in disparate outcomes. Federal laws and every court that has opined on the issue recognize both disparate treatment and disparate effect as unfair discrimination.

Mr. Birnbaum noted that systemic racism refers to policies, practices, or directives that result in advantages or disadvantages to individuals or communities based on race, including harm caused by infrastructures that determine access and quality of resources and services.

Mr. Birnbaum went on to identify three ways systemic racism can manifest in any aspect of the insurance lifecycle—whether for marketing, pricing, or claims settlement. One would be disparate intent, which is the intentional use of race. Mr. Birnbaum said for this presentation, he will focus on two types of unintentional forms of racial bias: 1) proxy discrimination, a factor predicting race and not the intended outcome. This is the use of non-prohibited factors that, due in whole or in part to a significant correlation with a prohibited class characteristic, causes unnecessary, disproportionate outcomes on the basis of prohibited class membership. The result is unnecessary racial bias because the predictive factor is not in fact predicting the outcome. For example, he said to consider the use of criminal history information in Ferguson, MO. Using criminal history as a predictive variable would simply be a proxy for racist policing practices; and 2) disparate impact, which means disproportionate outcomes tied to historic discrimination embedded in insurance outcomes. Mr. Birnbaum said it is important
to distinguish between proxy discrimination and disparate impact. With proxy discrimination, insurers have or should have interest in stopping this unnecessary discrimination.

Disparate impact, however, requires a policy decision based on equity considerations—specifically, prohibiting the use of a particular data source or consumer characteristic that compromises the cost-based and risk-based foundation of insurance. Equity-based decisions have been made, and that is why intentional use of race is prohibited. In the big data/artificial intelligence (AI) era, it is essential for insurers to test their algorithms and for state insurance regulators to test actual consumer market outcomes for proxy discrimination and disparate impact. While there is an important distinction between disparate impact and proxy discrimination, there is a common methodology to test for both consistent with predictive analytic methods that insurers use.

Mr. Birnbaum said to explain how current analytic methods in insurance can be used to test for racial bias, he will explain the difference between analyzing one variable at a time and analyzing multiple variables simultaneously. He noted that in the past 30 years, insurers have moved away from univariate analysis to multivariate analysis—from analyzing the effects of one risk characteristic at time to simultaneous analysis of many risk characteristics.

Mr. Birnbaum explained the problem with univariate analysis. He said if the relationship of age, gender, and credit score is analyzed—each individually—to the likelihood of a claim, the individual results for each risk characteristic are likely capturing some of the effects of the other risk characteristics. This is because age, gender, and credit score (or other risk classifications) may be correlated to each other as well as to the outcome variable.

To address this problem, insurers have developed multivariate analysis techniques, which simply means that several predictive factors are analyzed simultaneously. By analyzing these predictive variables simultaneously, the model removes the correlation among the predictive variables. If another predictive variable or a control factor were added, such as geographic location, then it would be possible to identify whether age, gender, or credit score were correlated with location and better identify the unique contributions of age, gender, and credit score to predicting the outcome.

Mr. Birnbaum reviewed a number of slides showing disparate impact as both a standard and methodology. Using a multivariate model and race as a control variable, he noted that “the impact of race can be seen on both the outcome—is the algorithm itself racially biased—and the impact on the predicted variables themselves because adding race removes the correlation between race and the other predictive variables.” Mr. Birnbaum noted this is one common method of testing for racial bias, but there are a variety of methods that generally seek to do the same thing: identify the correlations between predictive variables and race (or other protected class factors) and evaluate the impact of that correlation on the predictive capability of the model. After reviewing a number of examples, Mr. Birnbaum said the one key takeaway is that disparate impact analysis improves cost-based pricing and is entirely consistent with the cost base foundation of insurance.

Mr. Birnbaum said a regulatory regime requiring testing and related actions by insurers is a holistic approach to identifying and addressing systemic racism in insurance and avoids historical debates over banning selected rating factors. By testing their algorithms, insurers test not just individual predictive variables, but the algorithm as whole. The holistic testing approach avoids three key issues with efforts to ban selected factors because those selected factors are considered proxies for race: 1) testing confirms and distinguishes between proxy discrimination and disparate impact; 2) avoids shifting proxy discrimination and disparate impact from a now-prohibited factor to a remaining permitted factor; and 3) identifies problematic factors previously unknown to the state insurance regulator and the public.

Mr. Birnbaum next discussed insurer testing of algorithms and state insurance regulator testing of market outcomes. He said the least insurers can do to address systemic racism in insurance is to test their practices for and seek to remove racial bias. Mr. Birnbaum noted that state insurance regulator testing of actual consumer market outcomes should accompany insurer testing of their algorithms. State insurance regulators must collect and analyze granular consumer market outcome data for racial bias for several reasons: 1) algorithms do not always work as intended. An insurer’s good intentions are not a guaranty of intended consumer market outcomes; 2) even if individual insurers’ algorithms work generally as expected, industry aggregate consumer outcomes may produce racial bias; 3) it enables regulators to evaluate claim settlement, anti-fraud, and marketing practices—parts of the insurance product cycle for which algorithms are not filed and reviewed by state insurance regulators; and 4) it is a more efficient and effective use of regulatory resources compared to upfront review of insurers algorithms. The market outcome review represents an independent review of objective data. With today’s complex insurer algorithms, upfront review relies on insurer representations.
Director Cameron said he understands Mr. Birnbaum is asking for the NAIC and insurers to do testing on algorithms if an insurer or its algorithm had data on race, ethnicity, sex, or sexual orientation. He asked Mr. Birnbaum if he considers that to be discriminatory or some sort of proxy discrimination on its face.

Mr. Birnbaum responded no, but he said insurers cannot measure racial bias without considering race. Insurers have to include consideration of sensitive characteristics in order to evaluate whether the algorithm is biased towards those characteristics. Racial bias in lending has been tested for four decades by specifically including consideration of race in those tests. The fact that insurers collect data on race and use it for testing for racial bias does not mean they are required to use it in their algorithms that they actually deploy in the marketplace. Mr. Birnbaum said he pointed out in his comments the use of race is simply to make their algorithms more accurate and devoid of racial bias, not to use race in the marketplace.

Director Cameron asked if an insurer did not have that data, would that not lead Mr. Birnbaum to believe that the insurer was not using that sort of data for any sort of racial discrimination. Mr. Birnbaum responded by saying the theory behind that question is that if insurers do not consider race in their algorithms, then they cannot possibly be discriminating on the basis of race. He said every data scientist knows that is not true, and the reason is that because of systemic racism, racial bias is baked into almost all of the data that is used. Mr. Birnbaum said the other aspect is that there are many sources of data on race that insurers could use to append to their existing data sets in order to do the kinds of testing that he mentioned.

Mr. Birnbaum said there is no reason to stop insurers from collecting data on race with clear consumer protections. He said that even if they are not collecting data on race, which Mr. Birnbaum said he assumes they are not, there are tools and methods in which insurers can get information that serves as a proxy for race that they can append to their individual consumer transaction data in order to do the types of analysis. Mr. Birnbaum said that what he is suggesting is not new or novel; these are techniques that have been in place and used for decades.

Commissioner Mais asked the difference between what Mr. Birnbaum proposed and what the federal government requires mortgage bankers to do when collecting race information to the best of their ability and making decisions if that information is not provided, even though they cannot use it, but it has to be used in order to analyze whether there is discriminatory impact. He asked if there is a difference between that and what Mr. Birnbaum is suggesting.

Mr. Birnbaum replied that lenders test for racial bias from the ground up because they know that federal laws prohibit discrimination on the basis of race. Mr. Birnbaum said he can point to text for developing lender models that show exactly the type of methodology he presented. The federal government says here are the laws and regulations about racial bias and that it is also going to collect granular data. So, the federal Home Mortgage Disclosure Act (HMDA) has been recorded for 40 years for all types of lending, which not only gets information on loans that were given but on applications. To do that, lenders ask the consumers if they are willing to identify their race and, if the consumers willing, they collect it.

Mr. Birnbaum said what he is sharing is a practice that has been in place for decades in the U.S., but it is also the type of testing that is done in Europe now because gender is a prohibited factor in Europe in insurance.

Commissioner Conway noted Colorado passed a law in the last legislative session doing in part what Mr. Birnbaum was talking about, asking the insurance companies to step up and test their algorithms for unfair proxy discrimination. He said Colorado had lots of conversations about the data component and whether it was requiring insurance companies to collect data on race or other protected classes that it may not be otherwise collecting. The companies and their trades tried to make the argument that because they may not have the data, they could not test for it. Commissioner Conway said while that might be true with some protected class information, it is certainly not true with race.

Commissioner Conway reiterated the point Mr. Birnbaum made about how the tools that are out there have been out there for a long time, they are well known, and they have been tested. Commissioner Conway continued saying that he thinks state insurance regulators are in good stead to start doing that work and requiring the carriers to actually test their algorithms and test their machine learning systems to make sure they are not having unintended consequences.

Commissioner Conway said he wants to extrapolate or compare and contrast Mr. Birnbaum’s presentation with Mr. Klein’s presentation. He said Mr. Klein made the argument that if just pure income is looked at, there may not be an issue in play. Commissioner Conway pointed to a comment in the chat, which he said is a good one, that incomes may not be a good proxy for race at all. Commissioner Conway continued by saying that Mr. Birnbaum’s presentation makes it clear that a complete look at the algorithms and testing is needed in order to really see if there is unfair discrimination and that trying to do it just based on one simple proxy is probably not going to work. Commissioner Conway asked for Mr. Birnbaum’s thoughts on if testing for proxy discrimination by looking at just one simple factor like income can be done.
Mr. Birnbaum said it cannot be done using the methodology that the Mr. Klein used in this report on behalf of NAMIC. He said that while Mr. Klein’s report is interesting, it does not really have any relevance for the work of this Special Committee because NAMIC and Mr. Klein simply assume structural racism has no impact on insurance and that race has no impact, intentional or unintentional, on insurance outcomes. The logical extension of the conclusions in Mr. Klein’s report is that insurers should be permitted to use race because it could be predictive of insurance claims and stopping insurers from using any predictive characteristic will destroy risk-based pricing.

Mr. Klein responded that he made it clear what his study indicated and what it did not show. He said he fully indicated the limitations of the study. The study by itself should not be interpreted as a finding that insurers do not engage in unfair discrimination or that everything is fine. He said he worked with the data he had, which was limited and at a high level. He said the best studies have been done by him and others 20 years ago, which used much more granular data and much more rigorous analysis. He said even those studies were subject to limitations. Mr. Klein said he does not agree that his report or presentation shows or proves that insurers’ practices are perfectly fine or there are not problems with availability/affordability for minority consumers.

9. Heard a Presentation on the ACLI’s Racial Equity Initiative

Bruce Ferguson (American Council of Life Insurers—ACLI) commented on the ACLI’s economic empowerment and racial equity initiative and the commitment of its board of directors to make DE&I, financial security, and investing in improving the upward mobility of underserved communities a long-standing priority for the ACLI.

He noted the Special Committee put in motion a significant effort on the part of the NAIC. The ACLI’s board of directors approved that economic empowerment and racial equity initiatives align between what the ACLI is working on and the NAIC workstreams.

Mr. Ferguson noted three things that are the ACLI’s priorities: 1) corporate governance and diversity; 2) financial inclusion, which also includes algorithmic accountability and the barriers to licensure and employment in the insurance industry; and 3) racial equity impact investment, which is where the industry is looking at ways to aggregate to move the needle further and faster.

Mr. Ferguson also reported that ACLI board members have all signed the CEO action pledge. It is something that brings to the forefront ways in which corporate diversity happens in the corporate level. One of the key elements of that CEO action pledge is finding a way for the CEO leadership to report to the corporate board of directors a diversity plan. About two-thirds of the NAIC commissioners have adopted the NAIC Corporate Governance Annual Disclosure Model Regulation (#306) and in it requires the CEO to report the corporate diversity applied to its board of directors. That confidential information allows all state insurance regulators to ask the progress that is being made by the corporation with respect to diversity within the corporation.

Mr. Ferguson said the next issue is financial inclusion. He said life insurers are committed to digital financial inclusion that provides a gateway for all companies to be able to protect their family's financial future no matter their gender, race, or economic status.

Mr. Ferguson thanked Commissioner Godfread for the work that he has done to advance the AI principles that were adopted last summer. Mr. Ferguson said the ACLI supported and adopted a road map for taking advantage of new and innovative ways to reach a broader segment and close the racial wealth gap within the industry.

Mr. Ferguson noted that regarding the discussion of what an overall framework should look like, the ACLI had a cadre of member company data scientists, actuaries, lawyers, and a lot of groups daily, if not weekly, for the past year looking at recommendations that the ACLI might be able to make as to how to test algorithmic data to implement measures avoiding unintentional racial bias. Not every company is the same, and the ACLI has adopted and has some initial ideas about how it might share that with state insurance regulators going forward.

Mr. Ferguson said he listened to Mr. Birnbaum and has talked to him in the past about some of the CEJ’s ideas about correlation versus causation. Mr. Ferguson said none of that is easy to figure out it, and it all certainly depends on what this group will be looking at going forward.

Mr. Ferguson thanked Commissioner Mais for his work at how he will address the issue going forward. He said it is looking at what companies are doing now so that further discussion can be based on what additional action might be needed.
Mr. Ferguson also thanked Commissioner Conway for his work over the past few months on legislative session.

10. Heard a Presentation on Fairness in Auto Insurance from Root Insurance

Alex Timm (Root Insurance) stated that insurance has never really been about data sets; it has always been about people and the obligation owed to each other. It is recognition that at some point, everyone falls down and needs help picking themselves up. At a basic level, fair insurance underwrites a fair society. He said that is why many of us are passionate about this industry today.

Mr. Timm noted if success is measured by the distance between ideals and reality, unfortunately, industry has a big problem. He said years in the industry have made it clear to him that fairness is not always considered a virtue. Fairness and profitability are often seen as mutually exclusive at best, and irreconcilable at worst. It does not have to be that way. He said he started Root six years ago based on the idea that insurance can be fairer. He said Root’s goal is to make insurance fair and more equitable by harnessing modern technology and data science, enabling providers to offer personalized policies. To accomplish this, industry needs to transition away from premium price based on demographics.

Mr. Timm said leading among these unfair demographic-based systems is credit-based scoring in auto insurance. Credit-based scoring is currently used by every major auto insurer in the country as the main factor to price policies. Under the system, those with lower credit scores are often forced to pay more, even if they are the safest drivers on the road.

Mr. Timm said more than anything else, credit scores entrench bias into pricing, and its effects are not felt equally. For those who are not wealthy or have a thin file, the system means paying more because of who they are rather than how they drive, which is a controllable factor. An unfair system becomes more unfair when race becomes a factor. According to the urban institute, 50% of white households have FICO credit scores above 700, while only 21% of Black households do. He said he does not know how industry can have a system with those kinds of basic facts that does not in some way perpetuate racial injustice.

Mr. Timm said those who did not happen to grow up in the right place or those who are young and do not have a credit history are negatively affected by the use of credit score in insurance pricing.

As an entrepreneur, Mr. Timm said America can still offer the reality that people can build the dream and build their life, but it is hard to do that when there are limits to the possibilities of that dream, limits that are well outside of an individual's control. As an example, Mr. Timm cited Pedro Montenegro, who has a phenomenal driving record. He has never been in a car accident, nor has he been issued a ticket for a moving violation. He also never in his adult life qualified for affordable car insurance. He is a 30-year-old Guatemalan American living in Washington, DC, and he has suffered at the hands of the credit system. He is saddled with student loans, and he had some irresponsible spending in his younger years, so his credit score is in the low 500s. His auto insurance premiums and the quotes he is eligible for are $350 a month, and this is for a government-mandated purchase product. The only ticket he has ever had was for a broken taillight. His rates should not be that high.

Mr. Timm said the difference between cause in correlation is everything, and the truth is that credit is a proxy for race and income, not risk. He said this was supported by the evidence from Mr. Klein’s study that showed loss ratios essentially being flat by income group, which effectively means insurers are using income to price.

Mr. Timm said industry needs to build a better system of auto insurance now, but it will not happen on its own. He said the good news is that viable alternatives are already readily available. He said Root has seen what this can look like. He said Root has never used occupation and has never used education level to determine rates. When drivers have control of what affects their premium, that is when insurance becomes fair. He said Root does this by measuring real driving behavior through telematics. Based on this data, Root calculates a rate that more accurately reflects how someone drives rather than how likely they are to file a claim.

Mr. Timm said he rejects the notion that reform is a zero-sum game and said that Root is proof that inequality can be combatted. By making risk assessment fairer, Root can make car insurance more accessible and encourage the nearly 13% of uninsured U.S. motorists to enter the market, creating benefits for drivers and auto insurance alike. He said he knows industry can create a fairer world, one where insurance protects and supports rather than burdens and suppresses.

Mr. Timm said he has worked in the industry and has seen firsthand how comfortable many of the players are with how things currently work even as they know that there is better and more fair way. He said he would like to see a world where industry
does not use demographic factors that are beyond a driver’s control to set their car insurance rate. He said he would like to see drivers priced individually on their behavior and risk, not as part of a group because of where they work or their education level.

Mr. Timm said the work the Special Committee is doing to investigate the source of bias in insurance is essential and that he supports what it is doing. He urged the Special Committee to not settle with the way things are but rather focus on the way things should be. He said his hope for the Special Committee is that its research and its tough conversations will result in the creation of a model law that can guide commissioners and legislators to bridge the gap between today’s unfair reality and the fairer ideal that industry is so close to. By opening a dedicated investigation into the role that credit-based scoring plays and perpetuating inequality, Mr. Timm said the NAIC can further its goals of creating “fair competitive in healthy insurance markets to protect consumers.” He said industry should take this opportunity to do things the right way and drop the credit score.

Commissioner Donelon asked one question relative to adverse selection. He said in Louisiana about five or six years ago, an insurer failed in large part because it failed to use credit and the rest of the industry was using it. He asked how Root addressed that problem relative to competition with the rest of the national carriers.

Mr. Timm stated there are multiple states in the country where insurers are profitably writing today where credit score is not allowed. When the state insurance regulators move, he said industry has lots of examples of companies that can certainly become profitable and make it work. The second is using modern techniques like driving behavior and measuring the causal effects of why someone gets into an accident. Mr. Timm said Root has proven through its data—which has been validated by Milliman and is now in the public light—that it is far more predictive than really any of those other variables. He said Root believes that through the advent of machine learning and technology, it can actually build a system that puts control back into the consumers hands and rewards them for doing the right things. By doing so, he said Root will not have the level of adverse selection that Commissioner Donelon is referring to. But most importantly, Mr. Timm said Root believes that it is most important for state insurance regulators to act to entirely eliminate it in markets, which has been done. He said in those markets, there are profitable, healthy, and competitive insurance environments.

Commissioner Donelon said Louisiana has been debating this issue back to his time in the ‘90s, as chair of the House Committee on Insurance. He said his understanding is only five states now—California, Colorado, Maryland, Massachusetts, and Washington—ban the use of credit, and two of those are just recently added to the original three. So, he said it is still quite uncommon. He said Louisiana has seen the result of adverse selection on a local company that has a good business along the lines of what Root does.

11. Heard Remarks from the APCIA

Phillip L. Carson (American Property Casualty Insurance Association—APCIA) commented that it is important to get more involved with this Special Committee’s work as it moves forward on its financial charges. He said that he would like to think that industry and state insurance regulators can work together to find policy options that improve diversity and inclusion within the insurance industry while also addressing, to the extent it can, some of the most intransient problems that continue to disadvantage minority communities. As a core foundation, he said insurance is built on risk-based pricing, meaning that insurance is priced according to the risk of loss based on past loss experience and other objective factors of loss potential. The risk-based pricing framework also encourages risk mitigation and safety, which in turn can lower the cost of insurance.

Mr. Carson said risk-based pricing is just the beginning of a conversation. He said the APCIA has been listening closely to the Special Committee and is not tone deaf to its concerns about addressing the disproportionate impact of the cost of insurance, specifically auto and homeowners’ insurance. Mr. Carson said to state for the record, the APCIA is committed to working with this Special Committee on next steps. The APCIA is committed to expanding availability and affordability of insurance for treating all consumers fairly. He also said the APCIA is committed to maintaining a healthy and competitive insurance market, and its members are committed to always being there for all policyholders when worst events happen. Mr. Carson said the APCIA and its members have been working on analyzing and understanding various concerns such as affordability, explain ability, and fairness, as well as issues associated with intentional or unintentional discrimination.

Mr. Carson continued by summarizing the internal discussion that the APCIA has been having on framing these concerns and identifying potential solutions to those concerns. He began with intentional discrimination. This area of concern ought not to be an industry problem. Offering insurance with the intent to discriminate against protected class is illegal.

Mr. Carson said proxy discrimination is another form of intentional discrimination and, therefore, also requires more scrutiny. Evidence of intentional discrimination is more appropriately addressed to the regulatory apparatus. Understanding and
addressing unintentional discrimination, however, is more problematic. Identifying intentional discrimination requires a deeper loss analysis. There have been studies, including some done by the NAIC, that found that loss ratios for various income groups and groups living in primarily minority areas are not on average significantly lower than other groups. He said, however, if a protected class does appear to be charged a rate disproportionately higher than the expected cost for other groups, then unintentional discrimination may be present. Further analysis would be warranted about the causes and impacts that create that disconnect so that appropriate remedies can be provided.

With respect to concerns about affordability, Mr. Carson said the APCIA has been discussing alternatives to reduce the cost burden placed on low-income communities. These alternatives could include low-cost auto programs, potential subsidies, and initiatives to improve inadequate infrastructure investments that create adverse cost drivers. Regarding “explain ability”, he said the APCIA knows that the mechanics of insurance rating and underwriting are complex, so the challenge for industry and policymakers is to create plain language mechanisms to help consumers better understand the use of risk factors. People sometimes ask why auto insurers use non-driving rating factors. Auto insurance is not only about was an individual’s driving efficiency; it also involves factors such as bad weather conditions, bad roads, or poor maintenance of a car. Therefore, all those types of factors should be considered in the writing process.

Mr. Carson said industry may need to do a better job of explaining rating factors to consumers so they can make more informed choices about their insurance needs and about which insurers best meet those needs.

Mr. Carson said the issue of fairness is often raised, but it is rarely well-defined. For regulatory purposes, unfair discrimination means charging different rates for the same risk. Some outcomes may still appear to be unjust or may appear to contribute or perpetuate historic social inequities. Addressing that current disparity will be difficult. Nevertheless, he said the APCIA hopes policymakers and industry participants can agree on specific outcomes for achieving fairness. Getting to fairness would necessarily involve uncomfortable conversations as they must deal with sensitive issue about race, ethnicity, life experiences, and wealth, or, more appropriately, a lack of wealth.

If the underlying concern of this Special Committee is that certain insurance risk factors are inaccurate, then Mr. Carson said industry needs to work together to find other inputs with less adverse effects. If the risk factors are accurate, but industry does not like the inequitable outcome, it may be necessary to work outside of risk-based pricing to reduce unfair cost drivers. Coming out with fairness solutions will be an incredibly complex undertaking. He said that means industry must be willing to have the difficult conversation about prioritizing what needs to be changed.

In closing, Mr. Carson provided a quick summary of some issues that the APCIA and its members have been discussing and will continue to discuss. The APCIA will continue its evaluation of its concerns with its board working group on social equity and inclusion. In the meantime, he said the APCIA welcomes constructive suggestions from the regulatory community. The insurance industry cannot solve all the problems by itself, and the APCIA knows that it must be part of this solution. He said the APCIA wants to collaborate with state insurance regulators and the rest of industry to address unintentional discrimination and develop potential solutions.

Mr. Carson said the APCIA believes it is possible to develop policy options that address unintentional disparities without compromising the risk-based foundation of its business. He said he will continue to be involved in the work of the Special Committee and that he hopes it will reach out to him and the APCIA with its concerns, questions, and suggestions.

Having no further business, the Special (EX) Committee on Race and Insurance adjourned.
The Special (EX) Committee on Race and Insurance met July 21, 2021. The following members participated: David Altmaier, Co-Chair (FL); Dean L. Cameron, Co-Chair (ID); Raymond G. Farmer, Chair Emeritus (SC); Andrew N. Mais, Co-Vice Chair (CT); Chlora Lindley-Myers, Co-Vice Chair (MO); Lori K. Wing-Heier (AK); Jim L. Ridling (AL); Alan McClain (AR); Ricardo Lara represented by Bruce Hinze (CA); Michael Conway (CO); Karima M. Woods (DC); Colin M. Hayashida (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard represented by Claire Szpara (IN); Vicki Schmidt (KS); Sharon P. Clark represented by Rob Roberts (KY); James J. Donelon represented by Tom Travis (LA); Gary D. Anderson (MA); Eric A. Cioppa (ME); Kathleen A. Birrane (MD); Anita G. Fox represented by Karin Gyger (MI); Grace Arnold represented by Galen Benshoof (MN); Mike Chaney (MS); Mike Causey represented by Jackie Obusek (NC); Jon Godfred (ND); Eric Dunning (NE); Marlene Caride (NJ); Barbara D. Richardson (NV); Linda A. Lacewell represented by My Chi To (NY); Judith L. French represented by Tynesia Dorsey (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer represented by Matt Gendron (RI); Doug Slape (TX); Jonathan T. Pike represented by Tanji J. Northrup (UT); Scott A. White (VA); Michael S. Pieciak (VT); Mike Kreidler (WA); Mark Afable represented by Sarah Smith (WI); James A. Dodrill (WV); and Jeff Rude (WY).

1. **Adopted its 2021/2022 Proposed Charges**

Commissioner Altmaier reported that the Special Committee met July 1 and April 12 to discuss its charges and received two sets of written comments from a broad range of stakeholders. He said the Special Committee appreciates the interest in its work and that it hopes for a shared commitment to addressing any inequities in the marketplace and market practices.

Commissioner Altmaier also reported that the Special Committee made several changes based on the commentary received, as well as for clarity and consistency. He said the Special Committee also proposed that this set of charges carry over through 2022, as well as the remainder of 2021. Commissioner Altmaier explained that with all charges, these can be amended during that period as work is completed or as other priorities arise. He said these charges also anticipate that the existing established workstreams will continue their work as described in the charges in addition to the tasks assigned at the Special Committee level.

Director Farmer made a motion, seconded by Director Lindley-Myers, to adopt the Special Committee’s 2021/2022 proposed charges (Attachment One-A). The motion passed unanimously.

Having no further business, the Special (EX) Committee on Race and Insurance adjourned.
The mission of the Special (EX) Committee on Race and Insurance is to serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.

Ongoing Support of NAIC Programs, Products or Services

1. The Special (EX) Committee on Race and Insurance will:
   A. Serve as the NAIC’s coordinating body on identifying issues related to: 1) race, diversity, and inclusion within the insurance sector; 2) race, diversity, and inclusion in access to the insurance sector and insurance products; and 3) practices within the insurance sector that potentially disadvantage people of color and/or historically underrepresented groups.
   B. Coordinate with existing groups such as the Big Data and Artificial Intelligence (EX) Working Group and the Casualty Actuarial and Statistical (C) Task Force and encourage those groups to continue their work on issues affecting people of color and/or historically underrepresented groups, particularly in predictive modeling, price algorithms, and artificial intelligence (AI).
   C. (Workstream One) Continue research and analysis to identify issues and develop specific recommendations on action steps state insurance regulators and companies can take to improve the level of diversity and inclusion in the industry, including:
      1. Seek additional engagement from stakeholders to understand the efficacy of diversity-related programs, how companies measure their progress, and what state insurance regulators can do to support these efforts.
      2. Collect input on any existing gaps in available industry diversity-related data.
   D. (Workstream Two) In coordination with the Executive (EX) Committee, receive reports on NAIC diversity, equity, and inclusion (DE&I) efforts. Serve as the coordinating body for state requests for assistance from the NAIC related to DE&I efforts.
   E. (Workstream Two) Research best practices among state insurance departments on DE&I efforts and develop forums for sharing relevant information among states and with stakeholders, as appropriate.
   F. Continue research and analysis of insurance, legal, and regulatory approaches to addressing unfair discrimination, disparate treatment, proxy discrimination, and disparate impact. Make recommendations for statutory or regulatory changes and additional steps, including:
      1. (Workstream Four) The impact of traditional life insurance underwriting on traditionally underserved populations, considering the relationship between mortality risk and disparate impact.
      2. (Workstream Three) Developing analytical and regulatory tools to assist state insurance regulators in defining, identifying, and addressing unfair discrimination in property/casualty (P/C) insurance, including issues related to:
         a. Rating and underwriting variables, such as socioeconomic variables and criminal history, including:
            1. Identifying proxy variables for race.
            2. Correlation versus causation, including discussion of spurious correlation and rational explanation.
            3. Potential bias in underlying data.
            4. Proper use of third-party data.
         b. Disparate impact considerations.
      G. (Workstreams Three, Four, and Five) Consider enhanced data reporting and record-keeping requirements across product lines to identify race and other sociodemographic factors of insureds, including consideration of legal and privacy concerns. Consider a data call to identify insurance producer resources available and products sold in specific ZIP codes to identify barriers to access.
   H. Continue research and analysis related to insurance access and affordability issues, including:
      1. (Workstream Four) The marketing, distribution, and access to life insurance products in minority communities, including the role that financial literacy plays.
2. (Workstream Four) Disparities in the number of cancellations/rescissions among minority policyholders.
3. (Workstream Five) Measures to advance equity through lowering the cost of health care and promoting access to care and coverage, with a specific focus on measures to remedy impacts on people of color, low income and rural populations, and historically marginalized groups, such as the LGBTQ+ community, individuals with disabilities, and Alaska Native and other Native and Indigenous people.
4. (Workstream Five) Examination of the use of network adequacy and provider directory measures (e.g., provider diversity, language, and cultural competence) to promote equitable access to culturally competent care.
5. (Workstream Five) Conduct additional outreach to educate consumers and collect information on health and health care complaints related to discrimination and inequities in accessing care.
6. (Workstream Three) Whether steps need to be taken to mitigate the impact of residual markets, premium financing, and nonstandard markets on historically underrepresented groups.
7. Make referrals for the development of consumer education and outreach materials, as appropriate.

I. Direct NAIC and Center for Insurance Policy & Research (CIPR) staff to conduct necessary research and analysis, including:
   1. (Workstream Three) The status of studies concerning the affordability of auto and homeowners insurance, including a gap analysis of what has not been studied.
   2. (Workstream Three) The availability of producer licensing exams in foreign languages, steps exam vendors have taken to mitigate cultural bias, and the number and locations of producers by company compared to demographics in the same area.
   3. (Workstream Five) Aggregation of existing research on health care disparities and the collection of insurance responses to the COVID-19 pandemic and its impact across demographic populations.

LIFE INSURANCE AND ANNUITIES (A) COMMITTEE – NEW CHARGES

The Accelerated Underwriting (A) Working Group, as part of its ongoing work to consider the use of external data and data analytics in accelerated life underwriting, will include an assessment of and recommendations, as necessary, regarding the impact of accelerated underwriting on minority populations.

HEALTH INSURANCE AND MANAGED CARE (B) COMMITTEE – NEW CHARGES

1. The Health Insurance and Managed Care (B) Committee will:
   A. Respond to inquiries from the U.S. Congress (Congress), the White House, and federal agencies; analyze policy implications and the effect on the states of proposed and enacted federal legislation and regulations, including, where appropriate, an emphasis on equity considerations and the differential impact on underserved populations; and communicate the NAIC’s position through letters and testimony, when requested.

The Mental Health Parity and Addiction Equity Act (MHPAEA) (B) Working Group of the Regulatory Framework (B) Task Force will develop model educational material for state departments of insurance (DOIs) and research disparities in and interplay between mental health parity and access to culturally competent care for people of color and/or historically underrepresented groups.

The Health Innovations (B) Working Group will evaluate mechanisms to resolve disparities through improving access to care, including the efficacy of telehealth as a mechanism for addressing access issues; the use of alternative payment models and value-based payments and their impact on exacerbating or ameliorating disparities and social determinants of health; and programs to improve access to historically underserved communities.

MARKET REGULATION AND CONSUMER AFFAIRS (D) COMMITTEE – NEW CHARGES

The Producer Licensing (D) Task Force will receive a report on the availability of producer licensing exams in foreign languages, the steps exam vendors have taken to mitigate cultural bias, and the number and location of producers by company compared to demographics in the area.

NAIC Support Staff: Andrew J. Beal/Michael F. Consedine

W:\National Meetings\2021\Summer\Cmte\RaceInsurance\Att 1-A 2021-2022 Proposed Charges.docx
The Special (EX) Committee on Race and Insurance met July 1, 2021. The following members participated: David Altmaier, Co-Chair (FL); Dean L. Cameron, Co-Chair (ID); Raymond G. Farmer, Chair Emeritus represented by Michelle Proctor (SC); Chlora Lindley-Myers, Co-Vice Chair (MO); Andrew N. Mais, Co-Vice Chair (CT); Jim L. Ridling represented by Yada Horace (AL); Alan McClain (AR); Evan G. Daniels (AZ); Ricardo Lara represented by Bruce Hinze (CA); Michael Conway represented by Peg Brown (CO); Karima M. Woods (DC); Trinidad Navarro (DE); Colin M. Hayashida (HI); Doug Ommen (IA); Dana Popish Severinghaus (IL); Amy L. Beard (IN); Vicki Schmidt (KS); Sharon P. Clark (KY); James J. Donelon (LA); Gary D. Anderson (MA); Eric A. Cioppa (ME); Kathleen A. Birrane (MD); Anita G. Fox (MI); Grace Arnold (MN); Mike Chaney (MS); Mike Causey represented by Jackie Obusek (NC); Jon Godfrey (ND); Eric Dunning (NE); Marlene Caride (NJ); Barbara D. Richardson (NV); Linda A. Lacewell represented My Chi To (NY); Judith L. French represented by Tynesia Dorsey (OH); Glen Mulready (OK); Andrew R. Stolfi (OR); Jessica K. Altman (PA); Elizabeth Kelleher Dwyer (RI); Larry D. Deiter (SD); Doug Slape (TX); Jonathan T. Pike (UT); Scott A. White represented by Don Beatty (VA); Tregenza A. Roach (VI); Michael S. Pieciak represented by Kevin Gaffney (VT); Mike Kreidler (WA); Mark Afable (WI); and Jeff Rude (WY).

1. Discussed its 2021/2022 Proposed Charges and Heard Comments from Interested Parties

Commissioner Altmaier introduced the interested parties who submitted comments and requested to comments on the 2021/2022 proposed charges of the Special Committee (Attachment One-A).

A. Academy

Laura Hanson (American Academy of Actuaries—Academy) noted that the Academy continues to support the Special (EX) Committee’s efforts pertaining to diversity and inclusion concerns in insurance coverages and in particular to identify and address unfair discrimination. The Academy submitted two comment letters to the Special (EX) Committee in recent months. The first letter underscored the Academy’s commitment to supporting the work of the Special (EX) Committee and provided information about the Academy’s current efforts related to diversity, equity and inclusion (DE&I). The second letter provided comments on the draft charges.

Ms. Hanson noted that the research and analysis described in charge F.2 and charge I.2 for the casualty practice area would be equally relevant research and analysis for the life practice area. Second, she said the Academy noted that the research and analysis relating to disparities among minority policyholders described in charge H.2 may be difficult to accomplish until the Special (EX) Committee has considered enhanced data reporting and record-keeping requirements as described in charge G.

Next, Lauren Cavanaugh (Academy) reported that with respect to the property/casualty (P/C) matters, the Academy was pleased to see many of the comments provided in its Nov. 12, 2020, letter to Workstream Three were included in the charges. In its May 14, 2021, letter, the Academy focused on charge F and charge G. For charge F, it recommended that the NAIC define all important terms, including “disparate treatment,” and that the NAIC develop methods of identifying unfair discrimination prior to developing methods to address it.

With respect to charge F.2, Ms. Cavanaugh said the Academy suggests that any tools developed to focus on unfair discrimination should consider the inputs, such as a rating and underwriting variables, separate from the outputs, such as disparate impact. With respect to those underwriting and rating variables, the Academy recommends including concepts of spurious correlation and the term “rational explanation” in the sub-bullet on correlation versus causation. “Rational explanation” is the term used in the Casualty Actuarial and Statistical (C) Task Force’s Regulatory Review of Predictive Models white paper.

Finally, Ms. Cavanaugh said the Academy thinks it is important to add the principles of cost-based pricing as a consideration in addressing unfair discrimination as these principles are fundamental to P/C rate making. With respect to charge G, related to enhanced data reporting and record keeping, she said the Academy suggests the Special (EX) Committee define the term “resources” and create a governance structure for any data collection effort to protect privacy and prevent misuse.
Director Altmaier noted that a number of commenters from industry and consumers recommended that the Special (EX) Committee consider deleting the discussion of causation versus correlation and asked for the Academy’s thoughts on that recommendation.

Ms. Cavanagh stated that correlation and causation continue to come up in these discussions, and it is important to consider them. The reason the Academy suggests the concepts of spurious correlation and rational explanation be included is to address the notion that this is not a binary either/or, accept all variables that are correlated or only accept variables that can be established to have a causal relationship. She said a successful plan has to consider a more broad spectrum of rating variables and how those concepts apply.

B. ACLI

Brian Bayerle (American Council of Life Insurers—ACLI) thanked the NAIC for its leadership on the effort to address systemic inequalities. The ACLI is aligned with the goal to help address systemic inequalities and is encouraged by the discussions taking place at the NAIC to address this critical societal issue. The ACLI is committed to working with the NAIC at all levels to address concerns of fairness and improve accessibility of insurance products to all communities.

Regarding the specific charges, Mr. Bayerle said the ACLI supports the spirit of the proposed charges. Thinking about the direction over the next year, the ACLI believes the Special (EX) Committee should maintain as much centralized control over the efforts as possible while bringing in technical expertise as deemed appropriate. The ACLI believes a centralized approach will help maintain the big-picture view of this critical issue and address any fragmentation that may exist in this process if various subgroups come up with conflicting recommendations moving forward.

Mr. Bayerle said the ACLI recommends the inclusion of charges to the Life Actuarial (A) Task Force and the Health Actuarial (B) Task Force that would ensure both Task Forces are involved in actuarial and risk classification issues emanating from any Special (EX) Committee workstreams related to life insurance and health insurance, respectively.

C. AITC

J.P. Wieske (Horizon Government Affairs on behalf of American InsurTech Council—AITC) stated that the AITC is the independent voice of InsurTechs in support of the development of technology-based innovation in insurance. The AITC supports the proposed charges and noted this work is vital to ensuring regulation of these issues by the states. Furthermore, the proposed charges strike the right balance, ensuring consumer access and thoughtful regulation without overburdening the industry. He said the AITC believes the proposed charges will set the table for state insurance regulators and the insurance industry to promote innovation and provide measured and appropriate growth of InsurTechs by setting new regulatory standards.

D. APCIA

Angela Gleason (American Property Casualty Insurance Association—APCIA) reemphasized APCIA’s commitment to being collaborative partners.

Ms. Gleason noted that APCIA understands the state insurance regulators’ concerns with unintentional discrimination, explainability, and transparency. APCIA is willing to work with the NAIC to think through these issues and concerns, but it strongly suggests building a foundation of common understanding from which productive and action-driven conversation can emerge. For instance, the charges blur distinctions between the definitions of well-established legal terms, like “proxy discrimination” and “unintentional discrimination.” These terms have different measurements and potential remedies. State insurance regulator concerns can be addressed with new and distinct terms that do not confuse existing law and protected classes. APCIA recommends the charges establish a framework for conversation that identifies the current state of the law and articulates the specific gaps to be addressed so everyone is speaking from the same page and same dialogue and that dialogue can begin to center on solutions. With a common foundational understanding, the conversation can more readily develop consensus solutions.

Ms. Gleason said APCIA noted at least four different issues state insurance regulators and policymakers have raised, and APCIA has been developing solutions to address or explain each separate concern. The concerns APCIA has heard include: 1) intentional discrimination, which includes proxy discrimination; and 2) unintentional discrimination, which includes disparate
impact, and reducing disparate outcomes and explainability. APCIA would like to hear from commissioners if the identified issues are incorrect as APCIA wants to work collaboratively to address these issues.

Ms. Gleason said the importance of identifying and articulating the distinct concerns and not conflating solutions into a single existing term that upends well-established case law cannot be understated. APCIA believes taking this deliberate and methodical approach leverages the expertise of the NAIC, staff, state insurance regulators, industry, and consumer advocates. This approach does not slow down or delay the process, but rather it ensures that together meaningful solutions are developed.

Ms. Gleason noted that most of edits submitted in APCIA’s comment letter are intended to focus on defining the category of problems state insurance regulators want to address and then creating a framework within which to consider those issues and potential solutions separately.

Ms. Gleason said in addition to outlining a framework for discussion, APCIA’s markup of the proposed charges also identifies two new charges that address important considerations. The first identifies opportunities to develop materials, partnerships, and programs that promote economic empowerment. This has been a topic and objective of many presentations to the Special (EX) Committee, and APCIA believes it is an important area of exploration. The second identifies opportunities to address the underlying causes of intentional disparities that are due to circumstances unrelated to insurance, which APCIA says is a holistic approach not different from how state insurance regulators think about other issues like natural catastrophes.

Ms. Gleason said advancing DE&I within the insurance community is a shared objective, and there has been a lot of great work from state insurance regulators and industry. APCIA suggests the charge for Workstream Two, sharing best practices among state insurance regulators, be expanded to include sharing those best practices with industry to emphasize that the exchange of ideas on DE&I are important and can benefit all.

Commissioner Altmaier noted that APCIA’s comments focused on the existing legal and regulatory framework for unfair discrimination and asked if APCIA and its members are open to discussions about those existing frameworks and the need to possibly change those if that is where the analysis and data leads us.

Ms. Gleason stated that APCIA is open to all those conversations and needs to understand and come to agreement on what it is and find those gaps.

Director Cameron asked Ms. Gleason to reiterate on charge B; APCIA seems to be taking out work on predictive modeling and prior algorithms. Director Cameron asked what is APCIA’s concern with the Special (EX) Committee continuing to work in that space.

Ms. Gleason stated that it is not a concern but adding clarity. Ms. Gleason stated that these issues are not the only ones those groups are working on, so the suggested change was clarification about not preventing other work from moving forward.

Commissioner Altman commented on a particular objection to the proposed deletion, from APCIA and as a preview of the National Association of Mutual Insurance Companies (NAMIC) as well, of the charge to consider collection of demographic information. Commissioner Altman noted the charge has the word “consider” in it and said the charge is to have a conversation about whether that is the thing we should or should not do and is not meant to negate a conversation about barriers or concerns about what that means. She said Pennsylvania has a particular interest in this question, Workstream Five has had some really robust initial conversations about this, and the health insurance industry has had some important organic conversations talking about equity and disparities in the health insurance space. Commissioner Altman said she wants to make sure to note that Pennsylvania and members of Workstream Five feel quite strongly about keeping that reference in the charges. California, Colorado, Connecticut, District of Columbia, and Maryland indicated agreement with Commissioner Altman’s comments.

E. **BCBSA**

Randi Chapman (Blue Cross and Blue Shield Association—BCBSA) stated that BCBSA is committed to a sustained effort to reduce racial health disparities in America and to addressing health and equity in a thorough comprehensive way. She said BCBSA appreciates the work that the NAIC is doing and developing these proposed charges. Ms. Chapman noted that BCBSA has established a national health equity strategy in addition to developing health equity policy recommendations outlined in the BCBSA Issue Brief, *Addressing Health Disparities and Inequities in Communities of Color*, which align with the Special (EX) Committee’s proposed 2021 charges and efforts to promote improved access to quality, affordable coverage, and culturally competent care.
Ms. Chapman said BCBSA is committed to being a supportive and collaborative partner to the NAIC and appreciates the collaborative spirit in which this work has been approached. She encouraged commissioners to see BCBSA as a resource and collaborative partner as the Special (EX) Committee develops recommendations and considers these charges.

Ms. Chapman commented on the proposed charges from BCBSA’s April and May comment letters. With respect to data in charge G, BCBSA understands and agrees that accuracy in demographic data is key to improving health equity outcomes in all communities across the country. BCBSA understands that there are many overlapping and complex state and federal laws that govern collection of demographic data in the health sector and suggests the NAIC, when considering how to address data, know there are a number of laws that address these issues and a degree of inconsistency in how data is collected and used. BCBSA will continue to work closely with the NAIC to meet that mutual goal of ensuring the industry and state insurance regulators are best positioned to address the need for better data that will ultimately improve health equity outcomes.

Ms. Chapman stated that with regard to provider diversity and culturally competent care in charge H.4, BCBSA shares the Special (EX) Committee’s goal of promoting equitable access to high-quality care through improving the racial and ethnic diversity of providers in addition to addressing the language diversity needs and cultural competency challenges.

Ms. Chapman said to meaningfully address existing barriers in access to diverse providers and providers offering linguistically and culturally competent care, BCBSA believes the focus needs to be on the root causes: a lack of diversity within the health care system and health education pipelines; limited availability of providers in areas that are predominantly communities of color, communities where English is not the primary language spoken, and rural communities; and the critical need to promote cross-cultural and implicit bias training within health professions.

Director Cameron noted that BCBSA comments mentioned the lack of nationwide standards and that there are conflicting state and federal standards. Director Cameron asked Ms. Chapman to elaborate on where those conflicts are and also to elaborate as to BCBSA discussing or working on nationwide standards and what the state insurance regulators’ role would be in developing those standards.

Ms. Chapman said that BCBSA and industry are working on addressing these barriers and conflicts they see in existing state and federal laws, thinking through recommendations on how to enable the industry to collect the data they need, and using that data in a way that is sensitive and appropriate to the needs of their members. Ms. Chapman said the federal Affordable Care Act (ACA) includes language that suggests there is an ability to collect race and ethnicity data using Office of Management and Budget (OMB) and U.S. Department of Health and Human Services (HHS) standards, but it is subject to discrimination laws in the federal Civil Rights Act. There are a lot of state laws that pertain to data collection on health insurance applications, and there are some states that require a strict use purpose for data collection. Ms. Chapman said the bottom line is this is an area that needs to be delved into a bit more deeply so it is clear what the laws are saying, what the laws allow and what the laws prevent. She said once there is an understanding, work can move forward determining what the best ways are to collect and use data in a way that is sensitive to members’ needs and make sure insurers are respecting privacy so they are not in a position where they are collecting data and their members are wondering and questioning how that data is being used.

Ms. Chapman noted that state insurance regulators are in a great position to get a better picture of what the landscape looks like in terms of the legal parameters regarding demographic data collection and also to get a sense of what can be communicated with industry and consumer partners.

Commissioner Mais raised a question in terms of the comments that Ms. Chapman had focusing on network care standards and communities that are underserved with provider shortages. He said BCBSA suggested that focusing on that issue would not necessarily help improve access to care. Commissioner Mais said there are some longer-term solutions BCBSA suggested, but BCBSA also said the NAIC should consider opportunities to inform patients of currently available providers. Commissioner Mais asked Ms. Chapman to expand how that would work within the current system.

Naomi Senkeeto (BCBSA) noted that BCBSA recognizes there are pipeline issues and diversity issues within the system. She said BCBSA is undertaking efforts to think through what the role is for health insurers and as the NAIC continues to work through recommendations in this space, BCBSA wants to partner on that work. BCBSA provided high-level recommendations in the Addressing Health Disparities and Inequities in Communities of Color issue brief regarding providing access to linguistically and culturally competent care. Ms. Senkeeto said BCBSA recognizes that there is a concern around network adequacy, but at its core, she thinks the foundational question is more on the access and the availability of providers both from a diversity perspective and from the perspective of traditionally underserved areas and workforce pipelines. She said BCBSA
is committed to an ongoing conversation and a concerted effort to move forward. She said BCBSA wants to partner with the NAIC in this effort.

F. CEJ

Birny Birnbaum (Center for Economic Justice—CEJ) continues to urge the Special (EX) Committee to develop a more systematic approach to examining issues of race and insurance by first setting the foundation defining what is fair and what is unfair discrimination. The CEJ says without this foundation, the workstreams have no guidance or principals against which to evaluate the variety of issues that are raised. Therefore, a solid definition of unfair discrimination that articulates principles of discrimination and disparate impact is essential to meaningfully consider the issues raised in charge 2.F.

Mr. Birnbaum said the CEJ wants to stress the urgency of this first step. The NAIC adopted its principles for artificial intelligence (AI) more than a year ago. These principles included responsibility of insurers to avoid proxy discrimination yet there has been no action of the NAIC to develop the guidance for insurers to implement those principles.

In contrast, the National Council of Insurance Legislators (NCOIL) quickly discussed and adopted the definition, at the urging of industry, of “proxy discrimination” that would not only stop any meaningful efforts to address systemic racism and insurance, but also would limit state insurance regulators’ current authority to even examine practices that raise concern about racial bias. Mr. Birnbaum said the NAIC should consider it a top priority to move quickly to develop meaningful definitions of “proxy discrimination” and “disparate impact” in insurance to counter the NCOIL action.

Mr. Birnbaum said the second step is for insurers to test their algorithms and practices for proxy discrimination and disparate impact. Eliminate proxy discrimination and minimize disparate impact; the problem cannot be fixed if it cannot be measured. Establishing a regulatory framework for insurers to test their processes, whether for marketing, pricing, claim settlement, or antifraud requires a collaborative approach between state insurance regulators, insurers, and stakeholders.

Mr. Birnbaum said the testing paradigm overcomes the current impasse the CEJ sees in states that have tried to address systemic racism by prohibiting the use of certain factors. Those efforts have failed because they evolved into a debate of pricing accuracy versus racial justice. The testing approach overcomes this either/or choice by looking at a holistic review by insurers of racial impact of their practices within the cost-based framework of insurance. Testing for proxy discrimination and disparate impact improves risk and cost-based practices by eliminating spurious correlations in which the factors are predicting race and not the outcome.

Mr. Birnbaum noted that the testing approach is holistic. This means that by analyzing the racial impact of an algorithm, the problems created when prohibiting one factor, only to find that racial bias has shifted to some other existing or new data source, are avoided. Mr. Birnbaum said related to a requirement for insurers to test for racial bias in their marketing, pricing, claim settlement, and antifraud efforts is developing regulatory guidance to: specify what type of testing is acceptable; assist in identifying sources of information on protected class characteristics; specify the actions insurers must take on certain testing outcomes; specify reporting of test results and related actions; and provide a safe harbor for insurers that follow regulatory guidance.

Mr. Birnbaum said the CEJ’s third step to a more systematic approach is in developing a more robust and comprehensive data collection system for state insurance regulators and the public to evaluate actual consumer outcomes, including the outcomes of communities of color. Auditing an algorithm is not a sufficient consumer protection for at least two reasons. First, an algorithm may not produce the intended results. Second, state insurance regulators are seriously overmatched by insurers when it comes to the technical expertise involved in designing and auditing big data/AI models. Mr. Birnbaum said it is only by collecting and analyzing actual consumer market outcomes at a granular level that state insurance regulators and the public can measure progress in the fight against systemic racism.

At a recent hearing of Workstream Five, there was no disagreement over the need to collect this aggregated, granular data on consumer outcomes to help assess racial disparities. Mr. Birnbaum said if the property/casualty (P/C) trades continue their historical opposition to such data collection, it will obstruct the Special (EX) Committees’ efforts. There should be a systematic approach to examining regulatory and public policies that reflect and perpetuate systemic racism. There are practices that clearly fall under commissioners’ current statutory authority, but there are also public policies regarding insurance that reflect and perpetuate historic discrimination outside of your authority, but not outside of your influence.

© 2021 National Association of Insurance Commissioners
Mr. Birnbaum urged the Special (EX) Committee to pick up the pace, saying concrete actions are needed to address the structural biases and disadvantages of communities of color. Mr. Birnbaum urged the Special (EX) Committee to adopt some charges and put as much energy into these issues as state insurance regulators did into changing the anti-rebating law, updating the annuity suitability model, and developing the group capital calculation (GCC). It is only by this type of energy that communities of color will see the concrete steps that improve their lives.

Director Fox asked Mr. Birnbaum to expand on the safe harbor idea. She said she understands the need for some kind of certainty, but putting the regulatory imprint on what the insurer has developed has consequences, obviously.

Mr. Birnbaum noted that the safe harbor is related to any kind of liability the insurer would face for unfair discrimination based on proxy discrimination or disparate impact. If the insurer has followed the regulatory guidance to test for or to eliminate proxy discrimination and minimize disparate impact, then if it turns out that there is still some disparate impact or proxy discrimination, that insurer should have a safe harbor in the CEJ’s view. Any follow-up should be limited to repairing the problem and providing restitution for consumers. Additionally, there should not be penalties involved with unintentional consequences, despite following the best regulatory guidance.

Director Fox noted the information in the regulatory system would only be as good as the information going in and the regulators’ ability to understand whether those things were really done to the certain standards. Director Fox wondered if it is workable to have a safe harbor where the guidance is detailed enough, company-specific enough and deep-dive enough to allow a safe harbor. She asked if that is a necessary component to get compliance.

Mr. Birnbaum said whether it is necessary is going to be up to the NAIC. The CEJ certainly suggests that it is worthy of discussion. He said the CEJ wants insurers to be forthcoming with state insurance regulators and for insurers to test their practices with conscious effort to root out the impact of systemic racism. If insurers need some certainty in terms of liability for doing that, then the CEJ thinks that it is a fair trade-off to get that type of honest appraisal.

**G. NPFA**

Jeffrey M. Klein (McIntyre & Lemon on behalf of the National Premium Finance Association—NPFA) stated that the NPFA is a national trade association representing premium finance companies. The association is supportive of the NAIC’s efforts to research, review, and develop solutions regarding DE&I, as well as issues surrounding access and affordability of insurance to disadvantaged individuals and underserved communities.

Mr. Klein commented on charge H.6. with regard to premium financing. Premium finance loans provide short-term financing to help businesses and consumers purchase insurance for property, casualty, and liability risk. Many small businesses, sole proprietors, and individuals cannot afford the upfront premium expense, lack access to traditional sources of credit, and therefore, need access to insurance premium financing in order to obtain adequate coverage.

Mr. Klein also noted that while the NPFA has no specific comment on the language of the charge itself, the NPFA wants the Special (EX) Committee to be aware of its status and interest. The NPFA stands ready to provide insight, relevant input, and assistance at the appropriate time, through testimony and/or submission of materials, with regard to the premium finance mechanism and the services provided by the premium finance companies.

**H. NAIC Consumer Representatives**

Katie Keith (NAIC Consumer Representative) stated that the NAIC consumer representatives are supportive of the work of the Special (EX) Committee. The Special (EX) Committee has served as a powerful forum that needs continued executive-level commitment and support to help keep state insurance regulators and industry focused on addressing systemic racism, bias, and discrimination, and increasing diversity and inclusion in the insurance sector. The Special (EX) Committee should continue to play this role going forward in addition to ensuring that the NAIC takes concrete actions and adopts meaningful changes. An executive-level committee will remain crucial to ensuring that state insurance departments and the NAIC develop and adopt consistent policies throughout the organization.

Ms. Keith noted the NAIC consumer representatives’ comments primarily focus on Workstream Five and on health care in particular. Among the proposed charges, she said the consumer representatives urge the Workstream to prioritize: 1) enhanced data reporting and record-keeping requirements for demographic data based on race, ethnicity, language, sexual orientation, gender identity, and disability status; and 2) the use of plan network standards to advance health equity. As a starting point, she
said they urge the NAIC to develop white papers on these topics that summarize the existing literature, identify best practices, and discuss the need for consumer guardrails (such as privacy protections and training requirements). The exercise of developing white papers on these two issues will help inform stakeholder approaches, provide guidance to industry, and serve as an evergreen NAIC resource upon which to build a strong foundation.

In response to the question Commissioner Mais raised about provider adequacy, Ms. Keith said that pipeline issues and provider shortages are all known challenges that need to be overcome, but the NAIC consumer representatives also think there are tools insurance companies are underutilizing like access to essential community providers and other ways to extend care to people of color, people with disabilities, and LGBTQ people.

Ms. Keith said there is incredible urgency for the work of the Special (EX) Committee. She said the Special (EX) Committee has started a much-needed dialogue, but that is not enough to address the generations of mistreatment people of color and other historically underserved populations have faced by the insurance industry. Ms. Keith encouraged the Special (EX) Committee to focus on what the legacy of the Committee’s could be and what results actually came of the work.

I. **NAIFA**

Winona S. Havir (National Association of Insurance and Financial Advisors—NAIFA) represents the Horace Mann Companies, which is a company that was founded by educators for educators. A key component of NAIFA’s mission is to serve as an industry expert on DE&I by attracting and nurturing members from diverse backgrounds. NAIFA remains committed to this mission and has recently undertaken several leading DE&I initiatives.

With respect to charge H.1, Ms. Havir said there are opportunities to address these issues by removing the barriers that stand in the way for minorities to enter the producer workforce. She said the insurance industry must work with managers, recruiters, and executives to hire, develop, and promote candidates from all backgrounds. The insurance industry should look like the marketplace it represents, which is a diverse one. She said that underserviced communities are more receptive to agents and advisors who come from similar backgrounds and can relate to and understand their life circumstances.

With respect to charge H.7, Ms. Havir said NAIFA strongly supports the notion of financial security for all and understands that the expansion of financial education and literacy are critical. Insurance agents and producers play an enormous role in educating consumers. NAIFA is developing tools to encourage its members to take into their communities and help connect the importance of insurance and financial security. She said NAIFA looks forward to contributing our insights and expertise to this effort.

With respect to charge I.2, Ms. Havir said NAIFA has recommended expanding on this charge by addressing the need for access to producer licensing education and exams in languages other than English. She said NAIFA thinks this is an important component to increasing diversity among producers and encouraging a workforce to serve diverse consumers and communities.

J. **NAMIC**

Tony Cotto (NAMIC) noted that NAMIC remains engaged, ready and willing to discuss work on any and all proposals as they are developed.

Mr. Cotto said for the purposes of this meeting, he will start with a broad comment about the charges. The issues the Special (EX) Committee wishes to address should be specifically identified prior to coordinating and responding to alleged or perceived problems. The Special (EX) Committee and other bodies around the NAIC first needs to establish whether issues exist rather than starting with assumptions or broad mandates about potential problems or potential harms, particularly in the absence of concrete data or facts. NAMIC believes such an approach will improve and better focus the Special (EX) Committee’s work today and into the future. Mr. Cotto said as several committee members have noted, this will not be a short or easy process. Additionally, the failure to develop such foundational building blocks and establish the answers to threshold questions will undermine the credibility of any future work by the Special (EX) Committee and the NAIC.

Mr. Cotto noted a couple of specifics regarding the proposed charges and said first that NAMIC wants to commend the Special (EX) Committee’s charges related to enhancing the insurance talent pipeline. He said NAMIC continues to believe this is the most valuable area for the Special (EX) Committee’s focus and efforts. The looming retirement cliff and accompanying talent crisis in insurance is an existential problem for the industry and for state insurance regulators. Mr. Cotto said the insurance industry must work together on charge C, charge D and charge E to identify smart ways to invest in future insurance
professionals by cultivating the talent pool with an appropriate focus on students and other professionals from diverse backgrounds. He said that in addition to being more attractive employers, diverse companies are more innovative, more profitable and have better retention rates.

Mr. Cotto said second, NAMIC feels obligated to continue raising questions about proposed charges that seem to embrace outcome-oriented analysis rather than the bedrock insurance principle of risk-based pricing, the effort to match rate to risk. He said that charge F and charge G, regarding research and analytical tools to address alleged unfair discrimination and enhance data collection, appear focused on unsubstantiated notions of ongoing, unfair discrimination and the potential collection of socioeconomic and sociodemographic data that insurers do not collect, are not interested in collecting, and consumers do not want to provide. Mr. Cotto said that it is impractical, invasive, and immaterial to how P/C rates are determined and that current laws already prohibit discrimination against protected classes. Mr. Cotto noted the perspective pushed by the charges ignores the fundamental truth about fairness and economic efficiency. They are achieved best when the prices charged to individuals are irrespective of race, national origin, income, or religion and are matched as close to risk as can be made possible.

Mr. Cotto said that NAMIC recommends the Special (EX) Committee expand the dialogue to include consideration of its recently commissioned study, Matching Rate to Risk: Analysis of the Availability and Affordability of Private Passenger Automobile Insurance, conducted by Dr. Robert Klein, Senior Research Fellow with Temple University (Philadelphia, PA) Emeritus Professor of Risk Management and Insurance at Georgia State University (Atlanta, GA), and the NAIC’s former Director of Research. This study made use of the data collected by the Property and Casualty Insurance (C) Committee and Market Regulation and Consumer Affairs (D) Committee over an eight-year period and published in the NAIC’s 2020 Private Passenger Automobile Insurance Study. Dr. Klein’s analysis found, among other things, that insurers have no incentive to engage in unfair discrimination and that the NAIC’s own data does not support allegations that insurers are discriminating unfairly again low-income drivers or the areas where they live. NAMIC encourages the Special (EX) Committee to invite Dr. Klein to discuss his findings at its next meeting.

Mr. Cotto commented that Dr. Klein’s study makes clear that rather than a sole focus on the risk-based pricing structure of insurance, there are other avenues that should be studied and can contribute meaningfully to the important work of this Special (EX) Committee, and NAMIC recommends exploring them. For example, to the extent the Special (EX) Committee finds gaps in the availability or affordability of insurance and develops proposals for addressing them, NAMIC recommends that state insurance regulators consider ideas like consumer subsidies, re-distribution of premium taxes for identified communities, systematic review of historical loss ratios, and third-party vendor and algorithm transparency requirements. NAMIC is committed to substantive and meaningful action on these salient issues.

Director Fox asked if NAMIC was suggesting the Special (EX) Committee not focus at all on disparate impact and only look to intentional discrimination in rate setting? Is NAMIC suggesting that as long as it is risk-based, it does not matter if there is disparate impact?

Mr. Cotto noted that disparate impact is a very specific legal framework set up outside of the insurance mechanism and to the extent it is imported into the insurance mechanism, that is a conversation that needs to involve legislators. There has to be an acknowledgment that it would upend the entire framework of underwriting and rate-making.

Director Lindley-Myers noted that she feels an obligation to hold many of the CEOs’ to the commitment that companies need to do more and reevaluate longstanding practices that affect protected classes. In addition, regarding Mr. Birnbaum’s comments, she asked that Mr. Birnbaum please submit to the Special (EX) Committee any real-world use of the methodology he proposed insurers use to examine and identify proxy discrimination and disparate impact.

Commissioner Altmaier asked NAIC staff to revise the draft charges based on the comments heard today.

Commissioner Altman commented that she is most interested in moving forward on adopted charges so work can start on deliverables for the workstreams and the Special (EX) Committee. She urged the Special (EX) Committee to keep the process moving and adopt charges during the Special (EX) Committee’s next meeting.

Having no further business, the Special (EX) Committee on Race and Insurance adjourned.
The Information Systems (EX1) Task Force met July 27, 2021. The following Task Force members participated: Ricardo Lara, Chair, represented by David Noronha (CA); Kathleen A. Birrane, Vice Chair, represented by Paula Keen (MD); Lori K. Wing-Heier represented by Anna Latham and Alida Bus (AK); Michael Conway represented by Damion Hughes and Rolf Kaumann (CO); Trinidad Navarro represented by Tim Li (DE); Colin M. Hayashida represented by Kathleen Nakasone (HI); Grace Arnold represented by Matthew Vatter (MN); Chlora Lindley-Myers, Cynthia Amann, and Jo LeDuc (MO); Russell Toal (NM); Barbara D. Richardson (NV); Judith L. French represented by Tynesia Dorsey (OH); Glen Mulready represented by Diane Carter (OK); Doug Slape represented by Nancy Clark (TX); and Scott A. White represented by Vicki Ayers and Trish Todd (VA). Also participating were: Bud Leiner and John Kittelsrud (AZ); Rebecca Smid (FL); Tate Flott (KS); Chandra Thames (MS); Charlie Mudrick (OR); and Scott Kast (PA).

1. **Adopted its March 24 Minutes**

Ms. Keen made a motion, seconded by Mr. Toal, to adopt the Task Force’s March 24 minutes (see NAIC Proceedings – Spring 2021, Information Systems (EX1) Task Force). The motion passed unanimously.

2. **Adopted its 2022 Proposed Charges**

Ms. Ayers made a motion, seconded by Ms. Nakasone, to adopt the Task Force’s 2022 proposed charges, which remain unchanged from its 2021 charges (Attachment One). The motion passed unanimously.

3. **Received an IT Operational Summary Report**

Scott Morris (NAIC) highlighted several sections included in the Information Technology (IT) Operational Report received by the Task Force members. The report provides updates on technology initiatives at the NAIC, upcoming improvements, impacts to state technology, new offerings from the NAIC, and general updates on the activities of the NAIC technology team.

   a. **Product Highlights**

The State Based Systems (SBS) team is focusing on new state implementations. Five states are currently licensed for SBS implementation, with four currently active: 1) Vermont (August 2021); 2) Connecticut (November 2021); 3) Kansas (January 2022); and 4) Massachusetts (February 2022). Hawaii is a future implementation (third-quarter 2022).

Other key product highlights include:

- The first phase of the System for Electronic Rate and Form Filing (SERFF) Modernization project is underway. This phase is an assessment of needs and tools that can be integrated to SERFF to provide the functionality needed by state insurance regulators, such as a document management solution and a rules engine. Many states have provided input on current and future needs. Key outputs of this phase include a future state architectural diagram and an implementation plan. This phase is expected to finish by year-end.

- The Online Premium Tax for Insurance (OPTins) development team focused on improvements to Entity Management. The team implemented changes to prevent all user types from creating duplicate entities on OPTins accounts and deactivated 17,594 duplicate entity entries through database cleanup.

   b. **Innovation and Technology**

Filing Solutions and Operations helped the Interstate Insurance Product Regulation Commission (Compact) reviewers manage and have visibility of their pre-submission work. The teams decided JIRA best met the needs of the Compact reviewers, allowing workflow, communication, transparency, and reporting to occur within the same tool. After minimal training, the Compact reviewers were able to use this new tool to help organize and view their work.
NAIC teams continue the important work to migrate system applications and databases from the NAIC’s data center to Amazon Web Services (AWS) Cloud and Oracle Infrastructure Cloud (OCI). Cloud migrations are complete for two of the five environments and are operating fully in the cloud. The remaining migrations are targeted later this year.

The IT Operations team has been rolling out the Microsoft 365 services, which enable NAIC staff and external state insurance regulators to share files and collaborate in more ways than ever before. The team is working on SharePoint team sites for internal staff and has set up several external sharing sites, including Property/Casualty (P/C) Model Database, Consumer Rep Applications, SERFF Modernization, Market Regulation Collaboration, and Center for Insurance Policy and Research (CIPR) Collaboration. Additionally, 142 sites have been created and as teams complete their migration to SharePoint, more external collaboration sites will be developed.

The NAIC recently completed the 2021 Service Organization Control (SOC) 1 and SOC 2 audits for on-premises with good results. A few exceptions were found, and the team is working to correct them. The cloud SOC 2 audit is currently in progress for a shortened review period. The auditors are currently reviewing evidence and will determine if any follow-up is needed.

4. Received a Portfolio Update and Project Status Reports

Sherry Stevens (NAIC) reported on the project portfolio. As of July, the NAIC’s technical project portfolio includes 23 active technical projects. One project completed since the last report.

Having no further business, the Information Systems (EX1) Task Force adjourned into regulator-to-regulator session, pursuant to paragraph 4 (internal or administrative matters of the NAIC or any NAIC member) of the NAIC Policy Statement on Open Meetings.
2022 Proposed Charges

INFORMATION SYSTEMS (EX1) TASK FORCE

The mission of the Information Systems (EX1) Task Force is to: 1) provide regulator-based technology expertise to the Internal Administration (EX1) Subcommittee; and 2) support committee activities and objectives by monitoring projects that provide technical services or systems for state-based insurance regulation, as prioritized by the Executive (EX) Committee.

Ongoing Support of NAIC Programs, Products or Services

1. The Information Systems (EX1) Task Force will:
   A. Serve as the Internal Administration (EX1) Subcommittee’s project-independent technology monitor and consultant. This involves monitoring the development, deployment and operation of NAIC information technology (IT) systems and services for state insurance regulators and, based on this effort, providing reports and recommendations to the Subcommittee, as appropriate. To achieve this, the Task Force will receive regular portfolio and technical operational reports.
   B. Provide consultation to NAIC technology staff, as well as the interpretation of intent and specific technology direction, where needed. For example, from time to time, NAIC technology staff may request approval of a specific technology approach, such as a proposal to drop support for a particular version of software. The Task Force will provide direction in such matters, either directly or through a working group. Task Force members will also communicate current and future state technology changes planned for their state to alert NAIC technology staff of potential impacts and requirements for NAIC systems and services used by state insurance regulators.
   C. Review, with technical recommendations for the Subcommittee: 1) Fiscal Impact Statements Appendix A for all State Ahead projects, as well as others involving a technology component exceeding $100,000 or 1,150 hours of technology staff development and which is not limited to the support of the internal operations; and 2) project requests that involve technology being submitted to the Subcommittee or directly to the Executive (EX) Committee.

Life Insurance and Annuities (A) Committee
Columbus, Ohio
August 16, 2021

The Life Insurance and Annuities (A) Committee met in Columbus, OH, Aug. 16, 2021. The following Committee members participated: Marlene Caride, Chair (NJ); Glen Mulready, Vice Chair (OK); Jim L. Ridling and Mark Fowler (AL); Karima M. Woods represented by Philip Barlow (DC); Doug Ommen (IA); Dean L. Cameron (ID); Vicki Schmidt (KS); James J. Donelon (LA); Barbara D. Richardson (NV); Linda A. Lacewell represented by Mark McLeod (NY); Judith L. French represented by Jana K. Jarret (RI); Elizabeth Kelleher Dwyer (RI); Carter Lawrence and Toby Compton (TN); and Mark Afable and Richard Wicka (WI).

1. **Adopted its July 19 Minutes**

Commissioner Schmidt made a motion, seconded by Commissioner Mulready, to adopt the Committee’s July 19 minutes (Attachment One). The motion passed unanimously.

2. **Adopted the Reports of its Working Group and Task Force**

Commissioner Mulready made a motion, seconded by Director Cameron, to adopt the following reports: the Accelerated Underwriting (A) Working Group, including its July 29 minutes (Attachment Two); and the Life Actuarial (A) Task Force. The motion passed unanimously.

3. **Discussed Guidance for the Life Insurance Illustration Issues (A) Working Group**

Mr. Wicka explained the history of the Life Insurance Illustration Issues (A) Working Group. He explained that the Working Group was given its charge back in 2016 to “[e]xplore how the narrative summary required by Section 7B of the Life Insurance Illustrations Model Regulation (#582) and the policy summary required by Section 5A(2) of the Life Insurance Disclosure Model Regulation (#580) can be enhanced to promote consumer readability and understandability of these life insurance summaries, including how they are designed, formatted and accessed by consumers.”

Mr. Wicka explained that early on in the process, the Working Group agreed to work on a one- to two-page consumer-oriented policy overview document to achieve its charge of improving the understandability of the life insurance policy summaries already required in Section 7B of Model #582 and Section 5A(2) of Model #580.

Mr. Wicka said the Working Group’s progress has been slow, and in 2019, it became clear that there was disagreement within the Working Group and among interested parties about the timing of the delivery of the policy overview document. At the suggestion of the then-chair of the Committee, the Working Group developed two alternate versions of revisions to Model #580 and two corresponding sample policy overviews for term life insurance policies. Mr. Wicka said one version keeps the delivery timing requirements currently in the model for delivery of the life insurance buyer’s guide; i.e., at the time of application or at the time of policy delivery if there is a free look period. He said a second version mirrors the buyer’s guide delivery timing requirements in the Annuity Disclosure Model Regulation (#245); i.e., delivery at or before the time of application.

On April 30, the Working Group voted to send to the Committee these two alternate versions of revisions to Model #580 and the sample policy overviews and ask the Committee for guidance on how to proceed (Attachment Three).

Mr. Wicka said a request for comments by Aug. 11 was emailed to Committee members, interested state insurance regulators, and interested parties. The request for comments, comments received, and a comment chart summarizing feedback were included in the materials. Mr. Wicka said the email requested comments on two issues: 1) whether the Working Group should continue working on a policy overview document to achieve its charge; and 2) what the timing for delivery of the policy overview should be if the answer to 1) is yes. He said the comments that had been received were included in the meeting materials and showed that there were state insurance regulators and interested parties that supported continuing with the model revisions and state insurance regulators and interested parties that said the Working Group had completed its charge and should disband.

© 2021 National Association of Insurance Commissioners
Superintendent Dwyer said it is her understanding that: 1) there is not consensus on the work product within the Working Group, and there is not likely to be consensus at the Committee level; and 2) there is a preliminary work product that had been developed by the Working Group for term life products that a state could use if it wanted to. She said these two issues lead her to question whether the Working Group should continue.

Commissioner Afable said it appears that this project has lost steam. He said the Committee needs to be practical and recognize how difficult it would be to pass model revisions out of the Executive (EX) Committee and Plenary that do not have the support of all the states or the industry that will be charged with implementing it. He said while he believes simplified disclosures could benefit consumers, he is hesitant to ask Mr. Wicka or any other state insurance regulator to spend what could be another five years on a task that may not ultimately lead to an adopted model.

Commissioner Afable suggested that Mr. Wicka should draft a “chair report” for the Committee for the Fall National Meeting, and the Committee agreed. The report will outline the work that the Working Group has accomplished and how the comments it has received over the years have been addressed. Commissioner Afable said the report will provide the information the Committee needs to decide if it should continue to pursue revisions to the model, and if not, the work product that the Working Group has accomplished so far will be part of the report and readily available for states that would like to pursue the revisions and policy overview.

Commissioner Oommen asked Mr. Wicka about the lack of consensus in the Working Group, recognizing that there has likely been membership turnover. Mr. Wicka said the Working Group has been divided on the delivery requirements, but there has not been opposition by state insurance regulators to the concept of developing a policy overview to achieve its charge. He said the comments submitted by the Aug. 11 deadline expressed sentiments that had not been raised at the Working Group level previously.

Birny Birnbaum (Center for Economic Justice—CEJ) said it does not make sense for the Working Group to abandon its task. He said there are only a few states participating on the Working Group, and to reach the conclusion that the project is not sufficiently supported does not make sense. He said the Committee is supposed to balance disparate interests and should provide the necessary support for the project and not stop work just because the industry is not supportive. He said the Committee has revisited the issue of what the Working Group’s charge should be several times and affirmed its charge. He said the CEJ supports this project, which is a modest, yet necessary, response to life insurance disclosures that were complicated. He said this is the only effort that remains at the NAIC that is seeking to improve life insurance disclosures for consumers.

Commissioner Mulready confirmed that no motion is needed to ask Mr. Wicka to develop a chair report. Director French also expressed support for this approach. No one opposed the idea. Commissioner Caride confirmed that the Committee will plan to review Mr. Wicka’s report and reach a final decision at the Fall National Meeting.

4. Received an Update on the Special (EX) Committee on Race and Insurance Workstream Four’s Work

Commissioner Afable, co-chair of the Special (EX) Committee on Race and Insurance Workstream Four, provided an update to the Committee. He explained that the Special Committee met Aug. 15 and took the following action: 1) received oral reports from its workstreams; and 2) heard a few presentations. He explained that the Special Committee charges will be officially adopted by the NAIC during the Executive (EX) Committee meeting on Aug. 17.

Commissioner Afable said Workstream Four plans to start meeting within the next month and develop a work plan to achieve its charges. He said Workstream Four is eager to start meeting in earnest to delve into the practices and barriers that potentially disadvantage minority and underserved populations in the life insurance and annuity lines of business.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.
The Life Insurance and Annuities (A) Committee met July 19, 2021. The following Committee members participated: Marlene Caride, Chair (NJ); Glen Mulready, Vice Chair, represented by Andrew Schallhorn (OK); Karima M. Woods represented by Philip Barlow (DC); Doug Ommen (IA); Dean L. Cameron represented by Michele Mackenzie (ID); Vicki Schmidt (KS); James J. Donelon represented by Tom Travis (LA); Barbara D. Richardson (NV); Linda A. Lacewell represented by Bill Carmello (NY); Judith L. French, Tynesia Dorsey, and Michelle Brugh Rafeld (OH); Elizabeth Kelleher Dwyer represented by Matt Gendron (RI); Carter Lawrence represented by Brian Hoffmeister (TN); and Mark Afable (WI). Also participating was: Mike Boerner (TX).

1. **Adopted its June 30 and Spring National Meeting Minutes**

Mr. Travis made a motion, seconded by Commissioner Afable, to adopt the Committee’s June 30 (Attachment One-A) and April 12 (see NAIC Proceedings – Spring 2021, Life Insurance and Annuities (A) Committee) minutes. The motion passed unanimously.

2. **Adopted a FAQ Guidance Document on the Best Interest Revisions to Model #275**

Commissioner Ommen explained that late last year, the Annuity Suitability (A) Working Group began development of a frequently asked questions (FAQ) guidance document to assist the states as they move forward with adopting the revisions to the Suitability in Annuity Transactions Model Regulation (#275), which added a best interest standard of conduct for insurers and producers.

Commissioner Ommen said the FAQ guidance document is part of the work the Working Group plans to do this year to complete the second part of its charge to “[c]onsider how to promote greater uniformity across NAIC-member jurisdictions.” He explained that the Working Group has been meeting since the 2020 Fall National Meeting to discuss the draft FAQ guidance document and consider revisions to the document.

During these meetings, the Working Group had robust discussions among all the stakeholders on the proposed FAQ questions and answers, particularly on those FAQ concerning the revised model’s producer training provisions. He said although the Working Group anticipates resuming its work on the FAQ guidance document sometime this fall to add additional questions related to the model’s safe harbor provision, the Working Group met May 10 (Attachment One-B) and adopted the FAQ guidance document so that it would be available to the states as soon as possible. He said 15 states have adopted the revisions to Model #275, and an additional four states are considering the revisions.

Commissioner Ommen made a motion, seconded by Mr. Gendron, to adopt the FAQ guidance document. (Attachment One-C) The motion passed unanimously.

Ms. Rafeld suggested that the FAQ be shared with the Producer Licensing (D) Task Force. Commissioner Ommen said the Working Group had discussed sharing the FAQ with the Task Force, and he agreed that this is a good idea. Commissioner Richardson asked how the guidance might apply to states that have not yet adopted the revisions. Ms. Rafeld explained that states had questions about how producer training is intended to operate under the revisions, and the FAQ guidance document is helpful to provide that uniform interpretation as states move forward. Jolie H. Matthews (NAIC) and Jennifer R. Cook (NAIC) offered to reach out to the Task Force and follow up with Ms. Rafeld and Commissioner Richardson regarding how best to share the FAQ guidance document.

3. **Adopted Valuation Manual Amendments**

Commissioner Caride said a package of 15 Valuation Manual amendments was included in the materials for the Committee’s consideration. These amendments have all been adopted by the Life Actuarial (A) Task Force. Mr. Carmello said New York objects to the mortality improvement amendment, and as a result, it will not be voting for adoption of the package.
Commissioner Afable made a motion, seconded by Commissioner Ommen, to adopt the *Valuation Manual* amendments (see *NAIC Proceedings – Summer 2021, Executive (EX) Committee and Plenary, Attachment Two*). The motion passed with New York dissenting.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.
Life Insurance and Annuities (A) Committee
E-Vote
June 30, 2021

The Life Insurance and Annuities (A) Committee conducted an e-vote that concluded June 30, 2021. The following Committee members participated: Marlene Caride, Chair (NJ); Glen Mulready, Vice Chair (OK); Jim L. Ridling (AL); Karima M. Woods (DC); Trinidad Navarro (DE); Doug Ommen (IA); Vicki Schmidt (KS); James J. Donelon (LA); Barbara D. Richardson (NV); Linda A. Lacewell (NY); Judith L. French (OH); Elizabeth Kelleher Dwyer (RI); Carter Lawrence (TN); and Mark Afable (WI).

1. Appointed the Index-Linked Variable Annuity (A) Subgroup

The following proposed charge, adopted by the Life Actuarial (A) Task Force on June 17, was emailed on June 22 to the Life Insurance and Annuities (A) Committee for adoption via e-vote:

The **Index-Linked Variable Annuity (A) Subgroup** will:

1. Provide recommendations and changes, as appropriate, to nonforfeiture or interim value requirements related to index-linked variable annuities.

An explanation for the new charge was attached to the e-vote request. The explanation provided that a design of an annuity product has emerged over the past several years that does not fall neatly into existing regulations. They are commonly referred to as index-linked variable annuities (ILVAs) or registered index-linked annuities (RILAs). These products are exclusively filed in the states as variable annuities and are funded through non-unitized separate accounts. The Life Actuarial Task Force has discussed developing a draft standard for minimum interim values for these products and providing direction for implementing the standard.

The Life Actuarial Task Force proposed the establishment of a new Indexed-Linked Variable Annuity (A) Subgroup and provided an accompanying charge to develop the interim value standard. The Committee is asked to consider approval of the Subgroup and the adoption of its proposed charge.

The following states voted to adopt the proposed charge: Alabama, Delaware, District of Columbia, Iowa, Kansas, Louisiana, Nevada, New York, Ohio, Rhode Island, Tennessee, and Wisconsin. The motion passed.

Having no further business, the Life Insurance and Annuities (A) Committee adjourned.
The Annuity Suitability (A) Working Group of the Life Insurance and Annuities (A) Committee met May 10, 2021. The following Working Group members participated: Doug Ommen, Chair (IA); Amanda Baird, Vice Chair, and Michelle Brugh Rafeld (OH); Jodi Lerner (CA); Fleur McKendell (DE); Dean L. Cameron (ID); Tatt Flott and Shannon Lloyd (KS); Renee Campbell (MI); Martin Swanson and Tom Green (NE); Keith Nyhan (NH); Andrew Schallhorn (OK); Elizabeth Kelleher Dwyer and Matt Gendron (RI); Brian Hoffmeister (TN); and Richard Wicka (WI).

1. **Adopted an FAQ Guidance Document**

Commissioner Ommen said during its March 25 meeting, the Working Group asked a small drafting group to work on a frequently asked questions (FAQ) guidance document on the producer training requirements in the revised Suitability in Annuity Transactions Model Regulation (#275), which added a best interest standard of conduct for insurers and producers. The Working Group is developing an FAQ guidance document to assist the states as they move forward with adopting the revised model as one way for it to complete its work on the second part of its 2021 charge to “[c]onsider how to promote greater uniformity across NAIC member jurisdictions.” Commissioner Ommen directed the Working Group’s attention to the small drafting group’s proposed producer FAQ (Attachment One-B1).

Ms. Rafeld said herself, Mr. Gendron, Birny Birnbaum (Center for Economic Justice—CEJ), Jason Berkowitz (Insured Retirement Institute—IRI), Kim O’Brien (Federation of Americans for Consumer Choice—FACC), Maegan Gale (National Association of Insurance and Financial Advisors—NAIFA) and Wes Bissett (Independent Insurance Agents & Brokers of America—IIABA) developed 12 proposed producer FAQ based on the Working Group’s discussion during its March 25 meeting. She explained and touched on the key points in the proposed producer FAQ. The Working Group discussed the proposed producer FAQ. The Working Group also discussed Mr. Berkowitz’s suggestion to uniformly refer to the 2020 revisions to Model #275 as the “2020 version” throughout the FAQ document. After discussion, the Working Group directed NAIC staff to revise the FAQ document to consistently refer to the 2020 revisions to Model #275 as the “2020 version.” The Working Group also agreed without any objections to add the small drafting group’s proposed producer FAQ to the FAQ document.

The Working Group next discussed the proposed new FAQ on conflict of interest explaining why cash and non-cash compensation is not considered a material conflict of interest. Commissioner Ommen noted the discussion of this proposed new FAQ during the Working Group’s March 25 meeting. He explained that since that meeting, a couple Working Group members—Ohio and Rhode Island—had reviewed Mr. Birnbaum’s suggested language and decided to offer their own suggested language, which NAIC staff distributed prior to the Working Group meeting (Attachment One-B2). Ms. Rafeld said the proposed language for this new FAQ is aimed at trying to make it clearer and more concise. She said the other consideration in developing this new language is to make it more understandable to the average layperson. The Working Group discussed the proposed language.

Mr. Bissett suggested deleting the first sentence in the proposed answer to the FAQ because he believes the first sentence could be interpreted to impose a general obligation to act in a consumer’s best interest. He said FAQ Question 4 explains that there is no general obligation to act in one’s best interest, and the revised model requires the core four obligations to be satisfied. Given this, the first sentence does not add anything substantively and can be deleted. Mr. Birnbaum said he believes the language in his version of the FAQ, which includes a description of the definition of “material conflict of interest,” is important information to be included in the FAQ because it clearly explains what a “material conflict of interest” is. He said such a description provides important context to the FAQ and why “cash” and “non-cash” compensation are not considered material conflicts of interest. He said having that definition from the revised model frames the issue of why cash and non-cash compensation are excluded from something that would influence the impartiality of the recommendation. He also suggested deleting the first sentence because the fact that someone is required to act in the best interest is a non-sequitur when it comes to a material conflict of interest because if all that is needed is a requirement for an individual to act in the best interest, then there would be no need for a “material conflict of interest” definition or the inclusion of provisions in the revised model on “material conflict of interest.” He said the proposed FAQ also does not explain why cash and non-cash compensation is excluded from the definition of “material conflict of interest” and suggests that disclosures address any issues related to compensation and potential “material conflicts of interest.” The Working Group discussed Mr. Birnbaum’s and Mr. Bissett’s
comments, particularly whether the first sentence in the proposed answer to the FAQ should be deleted. After additional discussion, the Working Group decided to include Ohio’s and Rhode Island’s proposed language for the new FAQ.

The Working Group next discussed whether it should include additional FAQ on the revised model’s safe harbor provisions. Mr. Berkowitz said the Joint Trades—the American Council of Life Insurers (ACLI), the Committee of Annuity Insurers (CAI), the Financial Services Institute (FSI), the Indexed Annuity Leadership Council (IALC), the IRI, and the National Association for Fixed Annuities (NAFA)—had submitted suggested FAQ on the safe harbor provisions, which the Working Group discussed, but it deferred making a decision to include the suggested language. After additional discussion, the Working Group agreed that it would be important to include such FAQs; however, it decided to defer discussion of specific language to include in the FAQ on the safe harbor provisions until a later date in order to have the FAQ document available to the states as soon as possible as they move forward with adoption and implementation of the revised model.

Ms. Baird made a motion, seconded by Mr. Nyhan, to adopt the FAQ guidance document (see NAIC Proceedings – Summer 2021, Life Insurance and Annuities (A) Committee, Attachment One-C) and forward it to the Life Insurance and Annuities (A) Committee for its consideration. The motion passed unanimously. The Working Group also committed to continue its work and review and discuss potential FAQ on the safe harbor provisions to include in the FAQ document following the Life Insurance and Annuities (A) Committee’s adoption of this current version of the FAQ document.

Having no further business, the Annuity Suitability (A) Working Group adjourned.
SMALL DRAFTING GROUP PRODUCER TRAINING FAQs (FINAL)

Q: Are there new producer training obligations under the revised model?
A: Yes, all producers must complete a one-time training course that covers general annuity principles – including the types and uses of annuities, how annuity contract features affect consumers, and tax implications – as well as information about the new standard of conduct and the other requirements of the revised model. The specific training required depends on what prior training the producer has completed.

Q: How can a producer satisfy the training requirements in the revised model?
A: A producer who has completed the annuity training requirements under the prior version of the model must complete either a new four-credit training course that meets the requirements of the revised model or the one-credit training course that focuses on the new sales practices, replacement and disclosure requirements established by the revised model. Courses must be approved by the insurance department.

A producer who has NOT completed the annuity training requirements under the prior version of the model must complete the four-credit training course that meets the requirements of the revised model. Producers who have not completed the annuity training requirements under the prior version of the model may not satisfy the training requirement by taking only the one-credit training course.

Q: Does the training requirement apply to producers who are registered with FINRA?
A: Yes, all producers who engage in the sale of annuities, including those registered with FINRA, must complete the training required by the revised model.

Q: When must producers complete the training requirements in the revised model?
A: A producer who has completed the annuity training requirements under the prior version of the model has six months to take the required training. Such producers may continue to recommend and sell annuities during the six-month grace period.

A producer who has NOT completed the annuity training requirements under the prior version of the model must complete the required training before engaging in the sale of annuities.

Q: What are the consequences of failing to satisfy the training requirements of the revised model?
A: A producer who fails to satisfy the training requirements is not permitted to recommend or sell annuities. A producer who recommends or sells annuities without completing the required training may face enforcement action by the insurance department.

Q: Can a producer requalify to recommend and sell annuities after failing to satisfy the training requirements of the revised model within the six-month grace period?
A: Yes, a producer who has completed the training required under the prior version of the model can requalify to recommend and sell annuities by completing the new four-credit training course prior to recommending or selling annuities.

Q: If a producer already completed the new training in another state, will they have to retake the training in every state where they may recommend or sell annuities?
A: No, completion of substantially similar training in one state satisfies the training requirement in other states. Producers are not required to take the new training multiple times.
Q. Do producers have to wait for the revised model to take effect in a particular state before taking the new required training?

A. No, a producer can take the training at any time as long as the course they take has been approved by the insurance department in a state where the producer is licensed.

Q. Will a producer get CE credit for taking the new training?

A. A producer who completes the required training will receive CE credit only if the course was approved by their resident state prior to the date the course was taken and the course provider submits a roster and all applicable fees to the insurance department in the producer’s resident state.

Q. Can a producer satisfy the training requirements by taking a longer course that covers the required training plus additional content?

A. Yes, the revised model states that a producer can also satisfy the training requirement by completing any course that is approved by the insurance department and includes components that are substantially similar to the one-credit or four-credit training course.

Q. Will completion of a course that meets the requirements of the revised model also satisfy the training requirement under the prior version of the model in a state which has not yet adopted the revised model?

A. Yes, completion of the new four-credit training course (but not the one-credit training course) will satisfy the training requirements under the prior version of the model. The new course includes all of the topics that were required to be covered under the prior version of the model (with information on the new requirements established by the revised model). A producer who has completed this course is not required to also complete a course that satisfies the prior version of the model in states that have not yet adopted the revised model.
**SEVERAL STATES PROPOSED FAQ QUESTION 9 LANGUAGE**

**Question 9:** Why did the NAIC determine that "cash and non-cash compensation" is not a material conflict of interest (as defined in Section 5I(2))? 

**Answer:** Under the revised model, a producer is required to act in the best interest of the consumer without placing their or the insurer’s financial interest ahead of the consumer’s interest. In addition, the revised model now contains a disclosure requirement in which producers must prominently disclose to a consumer, using a disclosure form (similar to Appendix A), their relationship with the consumer, the role they will play in the transaction and a description of the cash and non-cash compensation they will receive. In light of these robust disclosures, and the fact most consumers recognize producers will be compensated for their work, the NAIC determined that compensation is not a material conflict of interest.

The NAIC also determined that general incentives regarding production levels with no emphasis on any particular product do not create an unanticipated conflict of interest. However, the NAIC did conclude that sales contests, sales quotas, bonuses and non-cash compensation based on sales of specific annuities within a limited time frame should be avoided. Accordingly, the revised model requires insurers to identify and eliminate these arrangements.
This Frequently Asked Questions (FAQ) document is intended to specifically address those questions that are likely to arise as the states work to adopt the revised Suitability in Annuity Transactions Model Regulation (#275) and to assist in the uniform implementation and enforcement of its provisions across all NAIC member jurisdictions. No provision of this FAQ document is intended to supersede the specific language in Model #275.

This FAQ document is offered to any state that chooses to use it. It is not intended to expand the content of the model regulation but provides interpretive guidance regarding certain aspects of its provisions.

For purposes of this FAQ document, references to “revised model” refer to the 2020 version of Model #275.

GENERAL

Q1. Why did the NAIC decide to revise the model to include a best interest standard of conduct?

A1. The revised model was developed, in part, in response to the U.S. Department of Labor’s (DOL) fiduciary rule, which was finalized in April 2016 but vacated in its entirety in March 2018. The DOL fiduciary rule would have expanded the scope of who is considered a fiduciary to federal Employee Retirement Income Security Act of 1974 (ERISA) retirement plans and individual retirement accounts (IRAs) to include a broader set of insurance agents, insurance brokers and insurers. Separately, the U.S. Securities and Exchange Commission (SEC) released a proposed rule package in May 2018, which included Regulation Best Interest (Reg BI). The SEC finalized Reg BI in June 2019. The final Reg BI establishes a best interest standard of conduct for broker-dealers beyond the existing suitability obligation that applies to federally registered variable annuities. Recognizing the SEC’s and the DOL’s role in the regulatory landscape and believing that consumers are better protected when, to the extent possible, there is compatibility with the regulations enforced by the states, the SEC and the DOL, the NAIC revised the model to establish a framework for an enhanced standard of conduct that is more than the model’s current suitability standard but not a fiduciary standard.

Q2. How does the Harkin amendment, Section 989J of the Dodd-Frank Act apply to the revised model?

A2. Section 989J confirms state authority to regulate the sale of fixed and fixed indexed annuities and provides an exemption for such annuities from federal securities regulation when certain conditions are met, including when the state in which the contract is issued or the state in which the insurer issuing the contract is domiciled: 1) has adopted requirements that “substantially meet or exceed the minimum requirements” established by the 2010 version of the NAIC’s Suitability in Annuity Transactions Model Regulation (#275); and 2) “adopts rules that substantially meet or exceed the minimum requirements of any successor modifications to the model regulation[]” within 5 years of the adoption by the NAIC. The only exception to this requirement is if the product is issued by an insurance company that adopts and implements practices on a nationwide basis that meet or exceed the minimum requirements established by the NAIC’s Model #275, “and any successor thereto,” and is therefore subject to examination by the State of domicile or by any other State where the insurance company conducts sales of such products.

The NAIC considers the 2020 version to be a successor modification to the model that exceeds the requirements of the 2010 version, which is reflected in a drafting note to Section 1—Purpose:

“Section 989J of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank Act”) specifically refers to this model regulation as the “Suitability in Annuity Transactions Model Regulation.” Section 989J of the Dodd-Frank
Act confirmed this exemption of certain annuities from the Securities Act of 1933 and confirmed state regulatory authority. This regulation is a successor regulation that exceeds the requirements of the 2010 model regulation.”

As such, states need to work toward adopting the 2020 version within 5 years after its adoption by the full NAIC membership in February 2020, which, in this case, would require state adoption of the 2020 version by February 2025, to maintain the status of fixed and fixed indexed annuities meeting the requirements of Section 989J as outside the scope of federal securities regulation.

EXEMPTIONS

Q3. What is the intent of the exemption to the revised model’s provisions under Section 4A to allow a consumer in response to a direct response solicitation to purchase an annuity product where no recommendation is made based on information collected from the consumer?

A3. This exception from the rule was in the 2010 version and was not changed in the 2020 version. A direct-response solicitation is a solicitation through a sponsoring or endorsing entity solely through mails, the Internet, or other mass communication media that does not involve a communication directed to a specific individual.

BEST INTEREST STANDARD OF CONDUCT

Q4. What is the best interest standard of conduct and how would a producer or insurer satisfy it?

A4. To satisfy the best interest obligation, a producer or an insurer must satisfy four obligations: 1) care; 2) disclosure; 3) conflict of interest; and 4) documentation.

To satisfy the four obligations, when making a recommendation, producers must:
- Know the consumer’s financial situation, insurance needs and financial objectives;
- Understand the available recommendation options;
- Have a reasonable basis to believe the recommended option effectively addresses the consumer’s financial situation, insurance needs and financial objectives;
- Communicate the basis of the recommendation to the consumer;
- Disclose their role in the transaction, their compensation, and any material conflicts of interest; and
- Document, in writing, any recommendation and the justification for such recommendation.

Q5. What types of recommendations fall under the best interest standard of conduct?

A5. All recommendations made by a producer or insurer to purchase, exchange or replace an annuity product must comply with the best interest standard of conduct. Specifically, as defined in Section 5M, a “recommendation” is advice provided by a producer to an individual consumer that was intended to result or does result in a purchase, an exchange or a replacement of an annuity in accordance with that advice. A recommendation does not include general communication to the public, generalized customer services assistance or administrative support, general educational information and tools, prospectuses, or other product and sales material.

Q6. Does the best interest standard of conduct apply to a producer who never meets the client, but assists a producer in making a recommendation to the client?

A6. Yes, the standard can apply, if under Section 6A(5), a producer who has exercised material control or influence in the making of a recommendation and has received direct compensation as a result of the recommendation or sale, regardless of whether the producer has had any direct contact with the consumer. Activities such as providing or delivering marketing or educational materials, product wholesaling or other back office product support, and general supervision of a producer do not, in and of themselves, constitute material control or influence.
CARE OBLIGATION

Q7. What is the intent of language in Section 6A(1)(c), which states “Producers shall be held to standards applicable to producers with similar authority and licensure?”

A7. The intent of this language is to help to ensure that in any compliance or enforcement action, a producer’s recommendation is compared only to other producers as opposed to being compared to investment advisers or possibly higher-level fiduciaries, such as trust officers or plan sponsors under the federal Employee Retirement Income Security Act of 1974 (ERISA) for compliance and enforcement purposes.

DISCLOSURE OBLIGATION

Q8. To satisfy the disclosure obligation, Section 6A(2)(a) requires a producer to provide the completed “Insurance Agent (Producer) Disclosure for Annuities” form in Appendix A prior to a recommendation or sale of an annuity. Can a producer provide the form at the initial client meeting?

A8. Yes, a producer can satisfy the disclosure obligation by providing a completed form during the initial client meeting.

Q9. Is the producer required to update the “Insurance Agent (Producer) Disclosure for Annuities” form in Appendix A and provide it again or can the producer provide it once and satisfy this obligation?

A9. Yes, if, after the completed form is provided to the client, the information on the completed form becomes out-of-date prior to a recommendation or sale, the producer is expected to provide the consumer with an updated form.

CONFLICT OF INTEREST OBLIGATION

Q10. Why did the NAIC determine that "cash and non-cash compensation" is not a material conflict of interest (as defined in Section 5I(2))?

A10. Under the revised model, a producer is required to act in the best interest of the consumer without placing their or the insurer’s financial interest ahead of the consumer’s interest. The revised model contains a disclosure requirement in which producers must prominently disclose to a consumer, using a disclosure form (similar to Appendix A), their relationship with the consumer, the role they will play in the transaction and a description of the cash and non-cash compensation they will receive. In light of these robust disclosures, and the fact most consumers recognize producers will be compensated for their work, the NAIC determined that compensation is not a material conflict of interest.

The NAIC also determined that general incentives regarding production levels with no emphasis on any particular product do not create an unanticipated conflict of interest.

However, the NAIC did conclude that sales contests, sales quotas, bonuses and non-cash compensation based on sales of specific annuities within a limited time frame should be avoided. Accordingly, the revised model requires insurers to identify and eliminate these arrangements.

Q11. As defined in Section 5I(2), a material conflict of interest does not include cash compensation or non-cash compensation. What other type of financial interest would be considered a material conflict of interest? Is it only an ownership interest as referenced in Section 6A(3)?

A11. The revised model defines material conflict of interest as “a financial interest of the producer in the sale of an annuity that a reasonable person would expect to influence the impartiality of a recommendation.” Cash and non-cash compensation are not considered to be material conflicts of interest, though the revised model does require disclosure about producer compensation and impose restrictions on certain types of non-cash compensation, as described in Q14/A14 below. An ownership interest (such as where a producer has a material ownership interest in an insurance company whose products the producer is authorized to recommend) is one example of a material conflict of interest that would be subject to the revised model’s conflict of interest obligation. Depending on the particular facts and circumstances, a producer could also be deemed to have a material conflict of interest if, for example, he or she borrowed funds directly from a certain insurer (except for loans taken by a producer under his or her own personal insurance policy or contract) or has a spouse, partner or a close relative who works as a senior executive for a particular insurer.
Q12. Under Section 6A(3), to satisfy the conflict of interest obligation, what must a producer do to identify and avoid or reasonably manage and disclose a material conflict of interest? Examples?

A12. The appropriate steps to satisfy the obligation to identify and avoid or reasonably manage and disclose material conflicts of interest will depend on the specific facts and circumstances. In some cases, material conflicts of interest can be effectively managed by a producer by informing his or her client of the conflict and answering any questions the client may have regarding the conflict and confirming that the client is willing to continue working with the producer. In other instances, informed disclosure alone may be insufficient and is not in the client’s best interest or that puts the producer’s own financial interests ahead of the client’s interest. In such instances, a producer could, for example, consult with his or her manager, supervisor or agency principal to assess whether a conflict is inappropriately influencing the impartiality of the producer’s recommendations. Finally, there may be material conflicts of interest that cannot be effectively mitigated through informed disclosure and additional measures. In those situations, the producer would have to avoid engaging in the activity or relationship that would give rise to the conflict, or, alternatively, abstain from making the recommendation. In all cases, the producer must ultimately and before making a recommendation have a reasonable basis to believe the producer's professional relationship or capacity along with any related annuity recommendation effectively addresses the consumer's financial situation, insurance needs and financial objectives.

SUPERVISION SYSTEM

Q13. Does the revised model require insurers to set up new supervision systems to ensure producer compliance with this new standard of conduct?

A13. No, but the revised model does add additional insurer supervision requirements by requiring insurers to establish and maintain reasonable procedures in three additional areas:

- To assess whether a producer has provided to the consumer the information required by the revised model.
- To identify and address suspicious consumer refusals to provide consumer profile information.
- To identify and eliminate any sales contests, sales quotas, bonuses, and non-cash compensation that are based on the sales of specific annuities within a limited period of time.

Q14. Section 6C(2)(h) requires an insurer as part of its supervision system to identify and eliminate sales contests, quotas, bonuses, and non-cash compensation based on the sale of specific annuities within a limited period of time. What type of business practices is provision intended to address?

A14. As the provision states, insurer business practices involving sales contests, quotas, bonuses and non-cash compensation based on the sale of a specific annuity or annuities within a specified or limited period of time are prohibited and should be identified and eliminated. For example, this provision would apply where a producer’s eligibility for a particular bonus is tied to his or her sales of a particular annuity product during a particular month. However, the requirements of Section 6C(2)(h) are not intended to prohibit general incentives regarding sales of an insurance company’s products where there is no emphasis on the sale of specific annuities within a limited period of time. Section 6C(2)(h) reflects the efforts for these revisions to be compatible with other financial service rule updates, such as the recent prohibition on most sales contests, quotas and bonuses tied to the sales of particular offerings that the SEC and FINRA have implemented. See Reg. BI and FINRA Rules, including Rules 2111, 2320, 2341 and 5110.

PRODUCER TRAINING

Q15. Are there new producer training obligations under the revised model?

A15. Yes, all producers must complete a one-time training course that covers general annuity principles – including the types and uses of annuities, how annuity contract features affect consumers, and tax implications – as well as information about the new standard of conduct and the other requirements of the revised model. The specific training required depends on what prior training the producer has completed.
Q16. **How can a producer satisfy the training requirements in the revised model?**

A16. A producer who has completed the annuity training requirements under the prior version of the model must complete either a new four-credit training course that meets the requirements of the revised model or the one-credit training course that focuses on the new sales practices, replacement and disclosure requirements established by the revised model. Courses must be approved by the insurance department.

A producer who has NOT completed the annuity training requirements under the prior version of the model must complete the four-credit training course that meets the requirements of the revised model. Producers who have not completed the annuity training requirements under the prior version of the model **may not** satisfy the training requirement by taking only the one-credit training course.

Q17. **Does the training requirement apply to producers who are registered with FINRA?**

A17. Yes, all producers who engage in the sale of annuities, including those registered with FINRA, must complete the training required by the revised model.

Q18. **When must producers complete the training requirements in the revised model?**

A18. A producer who has completed the annuity training requirements under the prior version of the model has six months to take the required training. Such producers may continue to recommend and sell annuities during the six-month grace period.

A producer who has NOT completed the annuity training requirements under the prior version of the model must complete the required training before engaging in the sale of annuities.

Q19. **What are the consequences of failing to satisfy the training requirements of the revised model?**

A19. A producer who fails to satisfy the training requirements is not permitted to recommend or sell annuities. A producer who recommends or sells annuities without completing the required training may face enforcement action by the insurance department.

Q20. **Can a producer requalify to recommend and sell annuities after failing to satisfy the training requirements of the revised model within the six-month grace period?**

A20. Yes, a producer who has completed the training required under the prior version of the model can requalify to recommend and sell annuities by completing the new four-credit training course prior to recommending or selling annuities.

Q21. **If a producer already completed the new training in another state, will they have to retake the training in every state where they may recommend or sell annuities?**

A21. No, completion of substantially similar training in one state satisfies the training requirement in other states. Producers are not required to take the new training multiple times.

Q22. **Do producers have to wait for the revised model to take effect in a particular state before taking the new required training?**

A22. No, a producer can take the training at any time as long as the course they take has been approved by the insurance department in a state where the producer is licensed.
Q23. Will a producer get CE credit for taking the new training?

A23. A producer who completes the required training will receive CE credit only if the course was approved by their resident state prior to the date the course was taken, and the course provider submits a roster and all applicable fees to the insurance department in the producer’s resident state.

Q24. Can a producer satisfy the training requirements by taking a longer course that covers the required training plus additional content?

A24. Yes, the revised model states that a producer can also satisfy the training requirement by completing any course that is approved by the insurance department and includes components that are substantially similar to the one-credit or four-credit training course.

Q25. Will completion of a course that meets the requirements of the revised model also satisfy the training requirement under the prior version of the model in a state which has not yet adopted the revised model?

A25. Yes, completion of the new four-credit training course (but not the one-credit training course) will satisfy the training requirements under the prior version of the model. The new course includes all of the topics that were required to be covered under the prior version of the model (with information on the new requirements established by the revised model). A producer who has completed this course is not required to also complete a course that satisfies the prior version of the model in states that have not yet adopted the revised model.
Accelerated Underwriting (A) Working Group
Virtual Meeting (in lieu of meeting at the 2021 Summer National Meeting)
July 29, 2021

The Accelerated Underwriting (A) Working Group met July 29, 2021. The following Working Group members participated: Mark Afable, Chair (WI); Grace Arnold, Vice Chair (MN); Jason Lapham (CO); Russ Gibson (IA); Cynthia Amann (MO); Chris Aufenthie (ND); Laura Arp (NE); Lori Barron (OH); and Lichou Lee (WA).

1. Discussed the Latest Draft of the Accelerated Underwriting Educational Report

Commissioner Afable explained that the purpose of the meeting was to discuss the latest draft accelerated underwriting educational report dated July 8 (Attachment Two-A). He said the Working Group exposed the report on July 9 for a 21-day public comment period ending July 30. He added that the report is available on the Working Group’s web page.

Commissioner Arnold gave some procedural background on the draft and provided a few highlights on the substance of the draft. She said that a small regulator-only drafting group has been meeting on a weekly basis to develop a draft report. So far, two parts of what is intended to be a five-part paper have been exposed for comment. She explained that this is an iterative process and that comments are invited on the entire draft with every release of a new part. She explained that the group intends to collect and review comments throughout the process and that there will be an opportunity to revise earlier sections as new sections are developed.

Commissioner Arnold made a few comments about the content of the paper. She said that after the release of the first part of the paper, there had been quite a few comments submitted on the definition of accelerated underwriting. She explained that the drafting group had spent a lot of time on the definition and considering definitions from a number of sources, in addition to the comments. She said that the drafting group concluded that the existing definition was largely in the middle of all the options offered and decided to hold off making any changes at this point. She said the drafting group acknowledges that once the rest of the paper is drafted, there may be a need to reconsider the definition.

Commissioner Arnold explained that the drafting group tried to keep the tone of the paper neutral. She said that the presentations the Working Group heard said a lot about the advantages and disadvantages of accelerated underwriting, but the drafting group tried to stay away from that in the report. She said the focus on the report is on what accelerated underwriting is, what accelerated underwriting does, and what the regulatory structure is or should be in the context of current laws.

Commissioner Arnold said they received several suggestions to create a glossary. She explained that the drafting groups decided not to develop a glossary at this point for a few reasons, but largely because some terms are defined differently in different contexts and in different states. She said the drafting group would prefer to have clarity directly in the report and that any suggestions on how to achieve that are welcome.

Commissioner Arnold also said that there were a number of comments suggesting that the report build on other, existing documents. She said that the drafting group agrees and has made an effort to use terminology that builds on and is consistent with the Artificial Intelligence (AI) Principles and the Casualty Actuarial and Statistical (C) Task Force white paper, in particular. She said she welcomes comments on places where there could be additional consistency.

Commissioner Arnold said the drafting group is specifically requesting comments on the parts of the paper addressing, from a legal and practical perspective, the data used in accelerated underwriting programs. Feedback on the kinds of data being used—whether data sources or the scores that come from the sources, feedback on what those terms mean, what kinds of obligations flow from them, and what a consumer sees or should see—would all be welcome. She explained that the drafting group did its best, but feedback to improve the clarity of this section regarding the distinctions between the types of data and what that means for state insurance regulators, companies, and consumers will be key.

Birny Birnbaum (Center for Economic Justice—CEJ) said he plans to submit written comments, but he wanted to get a sense of where the drafting group’s thinking was on a few issues. He wondered why the report seems to conclude that state insurance regulators have all the tools they need to regulate accelerated underwriting and address consumer protection concerns when accelerated underwriting uses new third-party sources, AI and predictive modelling not used in traditional underwriting. He said the AI Principles were specifically created to address new insurer practices like accelerated underwriting, so he asked why
the paper does not include implementation of the principles in life insurance. Commissioner Arnold explained that the report has not reached the conclusion section yet, and specific recommendations have not been formulated. She said some of the preliminary recommendations do incorporate the AI Principles and specifically use language from the AI Principles document, especially with respect to transparency.

Mr. Birnbaum asked specifically how the report incorporates the AI Principle “to avoid proxy discrimination against protected classes.” Commissioner Arnold encouraged specific suggestions regarding things that might be missing. She said this is the kind of feedback they are looking for as they continue to add sections to the paper and move towards the development of more specific recommendations in the report.

Mr. Birnbaum said that the paper talks about the consumer protections afforded under the Fair Credit Reporting Act (FCRA), and he wondered why the report did not recommend the extension of those protections to non-FCRA data. He said many states have laws that regulate the use of consumer credit information and require the filing of models with the insurance commissioner. Commissioner Afable reminded the Working Group that Commissioner Arnold had identified this section, which discusses the different sources of data used in accelerated underwriting, as an area where the drafting group was hoping to receive feedback from interested parties with expertise in data subject to the FCRA. He suggested that Mr. Birnbaum include this issue in his comment letter. Commissioner Arnold said that the drafting group spent a lot of time discussing what kind of data is subject to the FCRA and how that translates to credit scores or insurance scores developed using certain data. She said additional feedback in this area will help the drafting group figure out how to make recommendations that are in line with federal and state law and the AI Principles.

Matthew Wulf (Swiss Re) said he appreciates the overview from Commissioner Arnold and that the drafting group is taking a broad approach to developing the report. He said Swiss Re plans to submit written comments. He said one of the things that Swiss Re identified Commissioner Arnold already mentioned, which is consistency throughout the paper and among the different NAIC work products and workstreams. He said one example is the accelerated underwriting definition. He said the definition of accelerated underwriting acknowledges that not all accelerated underwriting programs use advanced algorithms or machine learning, but subsequent sections seem to assume that they do. He said that Swiss Re comments will point out some of these issues, but he added that he now understands the process and that the drafting group contemplates some reconciliation of these kinds of issues once the paper is complete.

Mr. Wulf also said that the Swiss Re comments will touch on the data sources versus data sets issue that Commissioner Arnold touched on. He said the distinction between data sources and data sets, especially when it comes to identifying the origin of unfair bias, is especially critical. He said another issue Swiss Re plans to focus its comments on is the issue of causation versus correlation. He said this is another area where clarity is critical.

Having no further business, the Accelerated Underwriting (A) Working Group adjourned.

W:\National Meetings\2021\Summer\Cmte\A\AUWG\7-29-21 AUWGmin.docx
TABLE OF CONTENTS

I. Introduction

II. Procedural background of the Working Group and its Charge – Address presentations we received about current accelerated underwriting practices in life insurance.

III. What is accelerated underwriting and put it in context of traditional underwriting
   A. What is traditional underwriting
   B. How is accelerated underwriting similar and different from traditional underwriting and simplified underwriting
   C. What is an algorithm / artificial intelligence / machine learning
   D. How prevalent is accelerated underwriting
   E. Trends for the future

IV. Discussion of issues and recommendations
   A. Input data
      1. Traditional data
      2. Fair Credit Reporting Data (FCRA) data
      3. Nontraditional data
      4. Discussion of bias in input data
      5. Recommendations
   B. Algorithms/ machine learning in accelerated underwriting in life insurance
      1. What are they designed to do
      2. Evolving / machine learning – pros and cons
      3. Testing conclusions/ Back testing/ random holdouts/ algorithm assurance
      4. Testing conclusions for unfair bias & mitigation
      5. Recommendations
   C. Transparency and Privacy
      1. Description of issue
      2. Existing practices/ state and federal laws
      3. Recommendations

V. Conclusion

New York Circular No. 1
Abbreviated Summary of Presentations
Introduction

In 2019, the NAIC established an accelerated underwriting working group to consider the use of external data and data analytics in accelerated life insurance underwriting, including consideration of the ongoing work of the Life Actuarial (A) Task Force on the issue and, if appropriate, draft guidance for the states. A more detailed procedural background can be found in the appendix. This paper is the output of over a year’s work by regulators to understand the current state of the industry and its use of accelerated underwriting. It summarizes what has been learned over the past year, contextualizes that learning and the topic of accelerated underwriting within other NAIC work and standard regulatory product evaluation processes, and makes recommendations for regulators and insurers when evaluating accelerated underwriting.

Accelerated underwriting in life insurance may provide potential benefits to both consumers and insurers if applied in a fair and non-discriminatory manner. In order to fairly deliver the benefits of more convenient and cost-effective processes, regulators and insurers should be guided by current law related to fair trade practices and unfair discrimination.

What is Accelerated Underwriting?

Throughout this paper, we use the term accelerated underwriting in life insurance. We propose the following as a definition:

Accelerated underwriting in life insurance is a process to replace traditional underwriting and allow some applications to have certain medical requirements (such as paramedical exams and fluid collection) waived. The process generally uses predictive models or machine learning algorithms to analyze data pertaining to the applicant, which includes both traditional and non-traditional underwriting data that comes from both the applicant and external sources.

To understand accelerated underwriting in life insurance, it helps to understand underwriting in general and how it functions. Life insurance underwriting is the process of determining eligibility and classifying applicants into risk categories to determine the appropriate rate to charge for transferring the financial risk associated with insuring the applicant. Traditional life insurance underwriting involves assessing the applicant’s physical health, usually through answers to questions on an application, blood work, urine analysis, doctor’s notes, medical records and a physical exam. Once this information is collected, an underwriter determines whether an applicant is eligible for coverage and the risk class to which that individual belongs. In addition to traditional underwriting and accelerated underwriting, there is also a process called simplified underwriting, or simplified issue. Simplified underwriting relies on very limited information (typically the applicant’s sex and age) and little, if any, additional information. Generally, there is no risk classification beyond age, gender, and possibly smoker status. Due to the limited
information collected about an applicant with simplified underwriting, the expected mortality is higher than with traditional or accelerated underwriting, and the price reflects that mortality.¹

In addition to collecting an applicant’s medical history, the types of data typically collected for use in accelerated underwriting rely upon multiple variables that are components or data points in predicative models or machine learning algorithms. Examples of the variables used by some accelerated underwriting models include: credit data, medical information bureau (MIB) data, public records, motor vehicle reports, smart phone apps, consumer activity wearables, claim acceleration tools, individual consumer risk development systems, purchasing history, behavior learned through cell phone usage and social media. An insurer may, or may not collect all this data from an applicant.

Accelerated underwriting may be limited to certain applicants applying for certain life insurance products. The exact parameters of the application of accelerated underwriting varies by insurer.

Presentations made to the Working Group indicated that life insurers use accelerated underwriting in two primary ways: 1) Accelerated underwriting is used to “triage” applicants, where unsuccessful applicants are re-routed to traditional underwriting, and successful ones continue through the accelerated underwriting process; or 2) Accelerated underwriting is used to create a score for an applicant to then be put into different risk categories. Accelerated underwriting employs a predictive model or machine learning algorithm, which is tested and modified via back-testing. The program learns from its mistakes to improve itself, using an underwriter’s feedback. It evolves over time. In fact, most accelerated underwriting algorithms used in life insurance are in their second or third generation. The COVID-19 pandemic sped up the adoption of accelerated underwriting in the industry as both consumers and insurers looked for options to purchase and write policies that relied more on technology and involved less in-person contact.

Presentations made to the Working Group indicated that adverse underwriting decisions would be reviewed by human underwriters. While some accelerated underwriting programs would issue policies based solely on the accelerated underwriting recommendation.

Companies presenting to the Working Group stated that the accelerated underwriting process is less cumbersome and costs less than traditional underwriting. By improving the underwriting experience for consumers, life insurers also benefit from quicker policy issue times with higher policy acceptance rates. ²

**General Discussion of Issues and Recommendations**

Accelerated underwriting is using multiple variables that are components or data points in an advanced algorithm. This increasing automation of life insurance underwriting presents new regulatory challenges. As is typical, the technology has moved ahead of state regulation. While differences in process have evolved, the concern the regulators have is the same as with all underwriting -- whether or not the process is **fair, transparent and secure**. With regard to accelerated underwriting in life insurance, this pertains to input data, output data, the algorithm and the results of the process.

Insurers’ increasing use of consumer data in accelerated underwriting presents regulatory challenges. One particular challenge is the potential for unfair discrimination. Some companies believe a person’s behavior has a strong correlation with mortality risk. This behavioral data includes gym membership, one’s profession, marital status, family size, grocery shopping habits, wearable technology and credit scores. Although medical data may have scientific linkage with mortality, behavioral data may lead to questionable conclusions as correlation may be confused with causation.

For example, a high-income individual may statistically be likely to receive excellent medical care. However, a high-income individual may also have the resources for illegal drug use or other dangerous habits or hobbies. A healthy young couple, on the other hand, may not have the disposable income to join a gym, however, they may exercise on their own. In either case, the lack of a gym membership or lower income may not indicate an increased mortality risk.

Recommendations

Consistent with the artificial intelligence principles approved by the NAIC in 2020, the use of accelerated underwriting in life insurance should be fair and transparent, companies should be accountable for operating in compliance with applicable laws, and the process and data used needs to be secure. To accomplish these objectives, regulators should dialogue with life insurers and third-party vendors to determine if consumer data is being used in problematic or unfair ways, or generating unfair outcomes, as is currently prohibited under most state laws.

Insurers and other parties involved in accelerated underwriting in life insurance should:

- Take steps to ensure data inputs are transparent, accurate and reliable.
- Ensure that the external data sources, algorithms or predictive models are based on sound actuarial principles with a valid explanation or rationale for any claimed correlation and causal connection.
- Be able to provide the reason(s) for any adverse underwriting decision to the consumer and all information upon which the insurer based its adverse underwriting decision.
- Take steps to protect consumer privacy and ensure consumer data is secure.
- Have a mechanism in place to correct mistakes if found.
- Produce information upon request as part of regular rate and policy reviews or market conduct examinations.

The remainder of this paper delves into some specific topics and provides more detailed recommendations about those topics.

Input data

Data typically collected for use in accelerated underwriting rely upon multiple variables that are components or data points in predicative models or machine learning algorithms. Examples of the variables used by some accelerated underwriting models include: credit data, medical information bureau data, public records, motor vehicle reports, smart phone apps, consumer activity wearables, claim acceleration tools, individual consumer risk development systems, purchasing history, behavior learned through cell phone usage and social media. A life insurer may, or may not, collect all this data from an applicant. The use of this data may have the potential for disparate impact. This section categorizes data used in accelerated underwriting programs into three buckets: traditional data, Fair Credit Reporting Act (FCRA) data, and non-traditional data. We use these buckets to articulate considerations when each type of data is used in an accelerated underwriting program. Presentations made to
the Working Group indicated that accelerated underwriting programs may use information from each of these buckets in their predictive modelling.

**Drafting Note:** The Ad Hoc Drafting Group had lengthy discussions about how best to describe the distinctions between data collected by credit bureaus, the credit scores produced by those credit bureaus, insurance scores and data used in accelerated underwriting models. We seek comment on how to accurately describe these concepts and the application of the Fair Credit Reporting Act (FCRA) to this data.

### Traditional Data

Traditional data used in life insurance underwriting includes data collected through a traditional “full”, as opposed to “simplified”, underwriting process. This data may include the following:

- Application data (e.g., medical records, prescription questions, vocation questions, financial profile).
- Tele-interview.
- Data from the Medical Information Bureau (MIB).[^3]
- Data from Motor Vehicle Records.
- Prescription drug history.
- Paramedical or medical exam, including EKG’s in some instances.
- Fluids (blood, urine, swab/spit test to determine tobacco usage).
- Financial and tax information.

### Considerations for use of Traditional Data

- Traditional data has a long and established history in the life insurance industry. Carriers, producers, and consumers are generally familiar with the process.
- Traditional data has a history of usage by insurance carriers. Trained underwriters and producers have years of experience and often understand the process well.
- The relationship of the traditional data elements to the risk seems reasonable, the consumer understands how the element impacts their risk classification or premium charged.
- State statutes and case law were developed based on the use of traditional data and so contain consumer protections created under the assumption that this was the type of data collected or reviewed during an underwriting process.
- Presentations made to the Working Group represented that time and costs associated with obtaining and reviewing traditional data are significant.

### FCRA Data

Data is subject to the federal Fair Credit Reporting Act (FCRA), which means applicants:

1. Should have a right to be told if this information is used to deny insurance, and
2. Have the ability to request the data a consumer reporting agency is providing to an insurer.

### Considerations for use of FCRA Data

- FCRA data is readily available.
- FCRA data is updated regularly.
- FCRA data is already used in property/casualty lines of business.

[^3]: This data is subject to the Fair Credit Reporting Act (FCRA).

© 2021 National Association of Insurance Commissioners
There is existing regulation and oversight by FCRA and Consumer Financial Protection Bureau (CFPB).
Not all FCRA data is useful/relevant to life insurance underwriting.
If there is a dispute about findings, a consumer will have to obtain additional information and formally dispute these findings.
FCRA data is extensive and accessing such data may result in access to non-usable credit attributes. In other words, significantly more data than is needed to determine risk may be collected.
As additional rating factors are introduced via insurance scores or with specific data elements, disparate impact may be introduced or amplified.
FCRA data may be used to predict mortality, but there may not be a reasonable explanation for that correlation.

Nontraditional Data

Nontraditional data used in life insurance underwriting may include the following:
- Public records (e.g., assessor data, genealogy records, criminal records, court filings, voter information).
- Property/casualty data from adjacent carrier(s).
- Marketing and social data (e.g., shopping habits, mortgage amount/lender, occupation and education, and social media, etc.).
- Professional licenses.
- Voice recognition used to determine smoking status.
- Facial recognition.
- Wearable devices.

Considerations for use of Nontraditional Data
- Nontraditional data may be used to predict mortality, but there may not be a reasonable explanation for that correlation.
- As additional rating factors are introduced via insurance scores or with specific data elements, disparate impact may be introduced or amplified.
- Nontraditional data does not have the same consumer protections as FCRA and traditional data. For example:
  - There may not be a clear path for consumers to know how data affected their application and may be corrected.
  - The type and purpose of data accessed is not required to be disclosed to the consumer.
  - There may be privacy concerns about the extent of the use of nontraditional data.

Recommendations

For Regulators
As stated above, general insurance law applies to accelerated underwriting programs in the same way it does traditional underwriting programs. State Departments of Insurance (DOIs) have broad regulatory authority to make inquiries into the processes and procedures of life insurers in order to investigate potential unfair trade practices. Complaints about underwriting practices are opportunities for DOIs to review a life insurer’s use of accelerated underwriting and data collection methods. Additional DOI actions may include market conduct and on-site examinations as appropriate under existing authorities.
• Specifically, examiners may: Review the life insurer’s underwriting practices and underwriting guidelines during an examination or upon initial submission of the policy rates and forms and confirm the proper use of the data elements.
• Request that explanation provided to the consumer for any negative action taken by the life insurer is succinct and adequately informs the consumer as to why a particular action was taken without the consumer having to make additional inquiries.
• Request information about source data regardless of whether the data or score is provided by a third party.

Form and rate reviewers may:
• Request that the life insurer provide information about how a model or algorithm will be used.
• Regulators may consider requiring filing of models used to analyze data.
• Regulators may consider questioning the extent to which data elements correlate to applicant risk.
• Request information about source data regardless of whether the data or score is provided by a third party.

For Industry
Life insurers have a responsibility to know and to understand the data they are using. To accomplish this, life insurers may choose to use tools such as post-issue audits and data analysis. For example, analyses such as evaluating claims and lapse rates may be helpful. Life insurers and third-party vendors should also take steps to ensure data inputs are accurate and reliable.

Life insurers and third-party vendors should ensure that the external data sources, algorithms or predictive models are developed with sufficient internal controls and oversight and based on sound actuarial principles with a valid explanation or rationale for any claimed correlation and causal connection.
Appendix: Additional Procedural Background
At the 2019 NAIC Summer National Meeting, the Life Insurance and Annuities (A) Committee discussed a referral it had received from the Big Data (EX) Working Group. The Big Data Working Group had discussed the use of predictive models in accelerated underwriting in life insurance, instead of medical examinations and the collection of fluids. The Big Data Working Group agreed that the issue would be most appropriately addressed by the life insurance subject matter experts and voted to refer the issue of the use of external data and data analytics in accelerated underwriting in life insurance to the Life Insurance and Annuities (A) Committee (Committee).4

The Committee discussed the referral and acknowledged that there are a multitude of issues surrounding insurers use of data models and data analytics; issues that extend into many areas of insurance and overlap with the work of several groups at the NAIC. In addition to the Big Data (EX) Working Group, there is the Innovation and Technology (EX) Task Force, the Artificial Intelligence (EX) Working Group, the Casualty Actuarial and Statistical (C) Task Force and the Privacy Protections (D) Working Group. The Life Actuarial Task Force was also looking at the use of accelerated underwriting in life insurance from an actuarial perspective, including looking at any potential impact on insurer solvency.

The Committee agreed that an effort to delve into accelerated underwriting in life insurance would need to be narrowly focused, while taking into account the work of these other NAIC groups touching on the same topic.

Robert Muriel (IL) chaired the Working Group and Grace Arnold (MN) was the vice chair. The following were Working Group members: Jason Lapham (CO); Russ Gibson (IA); Rich Piazza (LA); Cynthia Amann (MO); Rhonda Ahrens and Laura Arp (NE); Ross Hartley and Chris Auffenthe (ND); Lori Barron (OH); Elizabeth Kelleher Dwyer (RI); Lichiou Lee (WA); Mark Afable (WI). In January 2021, Commissioner Afable became chair of the Working Group and the rest of the membership remained the same.

The Working Group met for the first time on Oct 2, 2019 and developed a work plan to accomplish its charge. The work plan contemplated the Accelerated Underwriting (A) Working Group progressing through three phases with the goal of completing its charge by the 2020 Fall National Meeting. The first phase was focused on information-gathering. The second phase focused on identifying the issues and deciding on a work product, with the final phase devoted to drafting.

During the information gathering phase the Working Group heard 15 presentations from varying stakeholders, including an academic (Professor Patrick Brocket5), insurance companies, consulting firms (Deloitte and Milliman), a consumer advocate (Birny Birnbaum—CEJ), the American Academy of Actuaries, lawyers from 2 Illinois law firms (Foley & Lardner and Edelson), a machine learning assurance company (Monitaur), and a data analytics company (Verisk). Several of the presentations were held in regulator-only meetings when requested by presenters in order to share proprietary and confidential company-specific information.

Regulators from the Working Group volunteered to participate in two ad hoc groups to tackle the second and third phases of its work plan: There was an ad hoc NAIC liaison group to ensure awareness of and coordination with any work, including guidelines or protocols, developed by other NAIC groups, past and present, that related to the Working Group. There was also an ad hoc drafting group that agreed to take the information gathered, identify issues, recommend and draft a work product for review and approval by the Working Group.

---

4 See NAIC Proceedings – Spring 2019, Innovation and Technology (EX) Task Force, Attachment Two.
5 Gus Wortham Chair in Risk Management and Insurance at the University of Texas at Austin and Editor, North American Actuarial Journal.
In November 2020, the ad hoc drafting group shared with the Accelerated Underwriting (A) Working Group, a proposed draft outline for an educational report exploring accelerated underwriting in life insurance to provide guidance to regulators, industry, and consumer advocates and other stakeholders. In February 2021, the ad hoc groups merged.
The Life Insurance Illustration Issues (A) Working Group of the Life Insurance and Annuities (A) Committee met April 30, 2021. The following Working Group members participated: Richard Wicka, Chair (WI); Jodi Lerner (CA); Chris Struk (FL); Teresa Winer (GA); Mike Yanacheak (IA); Jana Jarrett (OH); Brian Hoffmeister (TN); and John Carter (TX). Also participating were: Denise Lamy (NH); Sarah Neil (RI); John Carter (TX); James Young (VA); and David Hippen (WA).

1. Referred Policy Overview Revisions to the Life Insurance and Annuities (A) Committee for Feedback on the Timing Issue

Mr. Wicka reminded the Working Group that that the issue of timing for the delivery of the policy overview is an issue that the Working Group had not resolved and that two alternate versions for term life insurance policies have been developed and revised by the Working Group during its two previous meetings. He said that the purpose of this meeting is to consider sending draft alternate versions of revisions for term life insurance policies to the Life Insurance Disclosure Model Regulation (#580) (Attachment Three-A and Attachment Three-B), as well as sample policy overview documents reflecting the different timing for delivery (Attachment Three-C and Attachment Three-D), to the Life Insurance and Annuities (A) Committee. He said that having alternate versions showing how the model and sample policy overview would look if delivery was required pre-underwriting and post-underwriting will enable the Committee to provide guidance to the Working Group on how to proceed with revising Model #580 and developing sample policy overviews for whole life and universal life insurance policies.

Mr. Wicka reiterated that there would still be an opportunity to revise Model #580 and the policy overview as it pertains to term life insurance policies after guidance comes back from the Committee. He explained that the Working Group is not actually adopting these versions, but rather it is voting on whether to refer them to the Committee. He explained that the alternate versions will provide the Committee with context as it considers whether the policy overview should follow the timing requirements currently in the model for the Life Insurance Buyer’s Guide (delivery at the time of application or at the time of policy delivery if there is a free look period) or delivery at the time of application.

Birny Birnbaum (Center for Economic Justice—CEJ) said he is comfortable with sending the sample policy overviews to the Committee, but he said he does not want to send the draft revisions to Model #580. He said he is concerned that the Model #580 revisions do not track what is in the sample policy overview documents and that including them may confuse the timing issue about which the Working Group is requesting guidance. Mr. Birnbaum said that Model #580 talks about what needs to be included in the policy overview in general terms, like an explanation or a summary of certain topics, while the sample policy overview includes specific sample language that has been thoroughly discussed and refined. As a result, the Model #580 language needs to be revised to more closely mirror what the Working Group has spent time discussing and revising—which is the language in the sample policy overview. Mr. Wicka said that there is a balance between the directions in Model #580 and the sample, which is an example of one way that the requirements in the model could be displayed. He said after the Working Group receives direction from the Committee on the timing, the Working Group will need to discuss the issues of language and layout and how specific the directions in Model #580 should be.

Patrick Reeder (American Council of Life Insurers—ACLI) said that the ACLI and its members share the goal of the Working Group—to protect consumers. He said that life insurers have great insights into how consumers think and react and added that the ACLI and its members want to continue to partner with the Working Group as it finishes up this important project.

Mr. Yanacheak made a motion, seconded by Ms. Winer, to send to the Life Insurance and Annuities (A) Committee, alternate versions of revisions to Model #580 and the sample policy overview for term life insurance policies for the purpose of obtaining direction for the Working Group on timing for delivery of the policy overview. The motion passed unanimously.

Having no further business, the Life Insurance Illustration Issues (A) Working Group adjourned.
LIFE INSURANCE DISCLOSURE MODEL REGULATION

Table of Contents
Section 1. Authority
Section 2. Purpose
Section 3. Scope
Section 4. Definitions
Section 5. Duties of Insurers
Section 6. Preneed Funeral Contracts or Prearrangements
Section 7. General Rules
Section 8. Failure to Comply
Section 9. Separability
Section 10. Effective Date

Section 1. Authority

This rule is adopted and promulgated by the commissioner of insurance pursuant to [insert state equivalent to Section 4A(1) of the Unfair Trade Practices Act] of the Insurance Code.

Drafting Note: Insert title of chief insurance regulatory official wherever the term “commissioner” appears.

Section 2. Purpose

A. The purpose of this regulation is to require insurers to deliver to purchasers of life insurance information that will improve the buyer’s ability to select the most appropriate plan of life insurance for the buyer’s needs and improve the buyer’s understanding of the basic features of the policy that has been purchased or is under consideration.

B. This regulation does not prohibit the use of additional material that is not a violation of this regulation or any other [state] statute or regulation.

Section 3. Scope

A. Except for the exemptions specified in Section 3B, this regulation shall apply to any solicitation, negotiation or procurement of life insurance occurring within this state. Section 5B shall apply only to an existing nonexempt policy held by a policyowner residing in this state. This regulation shall apply to any issuer of life insurance contracts including fraternal benefit societies.

B. This regulation shall not apply to:

(1) Individual and group annuity contracts;

(2) Credit life insurance;

(3) Group life insurance (except for disclosures relating to preneed funeral contracts or prearrangements; these disclosure requirements shall extend to the issuance or delivery of certificates as well as to the master policy);

(4) Life insurance policies issued in connection with pension and welfare plans as defined by and which are subject to the federal Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. Section 1001 et seq. as amended; or
Variable life insurance under which the amount or duration of the life insurance varies according to the investment experience of a separate account.

Section 4. Definitions

For the purposes of this regulation, the following definitions shall apply:

A. “Buyer’s Guide” means the current Life Insurance Buyer’s Guide adopted by the National Association of Insurance Commissioners (NAIC) or language approved by the commissioner.

B. “Current scale of nonguaranteed elements” means a formula or other mechanism that produces values for an illustration as if there is no change in the basis of those values after the time of illustration.

C. “Generic name” means a short title that is descriptive of the premium and benefit patterns of a policy or a rider.

D. “Illustration” means a presentation or depiction that includes non-guaranteed elements of a policy of life insurance over a period of years that is subject to [insert state equivalent to Life Insurance Illustrations Model Regulation (#582)].

E. “Nonguaranteed elements” means the premiums, credited interest rates (including any bonus), benefits, values, non-interest based credits, charges or elements of formulas used to determine any of these, that are subject to company discretion and are not guaranteed at issue. An element is considered non-guaranteed if any of the underlying non-guaranteed elements are used in its calculation.

F. “Policy data” means a display or schedule of numerical values, both guaranteed and nonguaranteed for each policy year or a series of designated policy years of the following information: illustrated annual, other periodic, and terminal dividends; premiums; death benefits; cash surrender values and endowment benefits.

G. “Policy summary Overview” means a written statement describing the elements of the policy, including, but not limited to brief summary of the policy prepared in accordance with this regulation and an example may be found in Appendix A.

G. “Guaranteed Premium and Benefit Patterns Summary” is a separate document that accompanies the Policy Overview where the insurer has identified the policy as one that will not be marketed with an illustration.

G. “Preneed funeral contract or prearrangement” means an agreement by or for an individual before that individual’s death relating to the purchase or provision of specific funeral or cemetery merchandise or services.

Section 5. Duties of Insurers

A. Requirements Applicable Generally

(1) The insurer shall provide a Buyer’s Guide to all prospective purchasers, prior to accepting the applicant’s initial premium or premium deposit. However, if the policy for which application is made contains an unconditional refund provision of at least ten (10) days, the Buyer’s Guide may be delivered with the policy or prior to delivery of the policy.

(2) The insurer shall provide a Policy Overview to all prospective purchasers. Delivery of the Policy Overview shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). Insurers should endeavor to limit the length of the Policy Overview to the minimum length necessary to reasonably inform consumers of the information required to be included in the Policy Overview. The Policy Overview is not required to be in a specific format beyond the requirements of this Section. The Policy Overview must be prepared in language and in a format...
that would be understood by a typical person within the segment of the public to which the policy is directed. A sample Policy Overview that meets the requirements of this Section is provided in Appendix A. A Policy Overview shall include the following topics with appropriate headings:

(a) An introductory section containing the following language: “This document lists this product’s key features, and benefits and costs. You can get a similar summary of key product features from other insurance companies to help you compare similar product policies. If you have questions about life insurance generally or other types of policies, the National Association of Insurance Commissioners has useful information at https://content.naic.org/consumer/life-insurance.htm/. If you have questions about this particular life insurance policy, ask the agent, broker, advisor, or a company representative offering this product for clarification. If you have questions about life insurance products generally or about company or agent licensing, contact [insert reference to state department of insurance].”

(b) “Company [and Agent Information]” which shall contain the name, address, email address and phone contact information of the insurance company and insurance agent, if an agent is involved and the name of the insured for whom the Policy Overview was prepared and the email and phone contact information of the insurer and insurance agent.

(c) “Information We Use to Determine Your Premium” which shall include the following information about the policy owner and insured, as applicable:

   (i) A brief description of the data elements that the insurer collects from the applicant and other sources that are used to determine an applicant’s premium;

   (ii) A brief description of the policy features that will affect the amount of premium such as the amount of the death benefit and optional riders;

   (iii) How Risk class or the estimated risk class is assessed used to generate the quote, if applicable;

(d) “Cost Information” which shall include the following information, as applicable:

   (i) An explanation of how much the life insurance policy costs or is estimated to cost at the time of application, including initial premium or the estimated premium quoted at the time of application and an explanation of differences in costs based on premium mode selected;

   (ii) A brief description summary of the available options for funding the policy and the minimum funding needed to maintain the policy in force;

   (iii) An yes or no indication explanation of whether the premium can vary and, if so, a brief explanation as to how the premium will be determined;

   (iv) An yes or no indication explanation of whether there are surrender charges and any costs associated with cancelling the policy (i.e. surrender charges) and, if yes, the period of time the charges apply or, if no, whether any money is eligible to be returned;

   (v) A yes or no indication of whether there is an option to lower benefits to reduce premium;

   (vi) If applicable, a narrative description of fees other than premium;
(vii) If applicable, a narrative explanation of the cost of insurance fee, how the cost of insurance fee changes with age, a narrative explanation of the net amount of risk to which the fee will apply, and the maximum allowable cost of insurance fee allowed under the policy.

(e) “Policy Information” which shall include the following information, as applicable:

(i) Product Policy type (Including single or joint policy);

(ii) Product Policy name;

(iii) State of issue;

(iv) An indication of whether the policy is term or permanent life insurance, and if it is term insurance, the length of the initial term, including whether and how the term may be extended;

(v) If the Policy Overview is provided prior to underwriting, a general description of what the policyholder needs to do to obtain the policy

(vi) If the Policy Overview is provided prior to underwriting, the following statement: “In the course of considering an insured’s application, an insurer may request or collect health information about the insured in variety of ways.” The statement shall indicate whether a physical examination or questionnaire will be required.

(vii) Death benefit or the death benefit as applied for;

(viii) A yes or no indication of whether the death benefit can change, and if yes, a brief summary of the reasons and timing for a change in the death benefit;

(v) State of issue;

(vi) Policy loan options and applicable charges, if applicable;

(f) “Additional Policy Benefits” which shall include the following information, as applicable:

(i) A yes or no indication of whether a waiver of premium or deductions option is available, and if yes, a description summary of the options available;

(ii) A yes or no indication of whether policy conversion options exist and, if yes, a brief summary of conversion options available;

(iii) If the policy has a term, a yes or no indication of whether there are options to extend the term of the coverage;

(iv) A yes or no indication of the availability of optional riders and, if yes, a brief description summary of how the insured may obtain additional information regarding the availability and costs of optional riders;

(vi) A yes or no indication of any living benefit option(s), and if yes, a description summary of the option(s);

(vii) A yes or no indication of whether the policy can accumulate cash value, and if yes, a description summary of the benefit;
(viii) A yes or no indication of whether there are guaranteed interest rates on fixed accounts and, if yes, the amount of the guaranteed interest rate, if applicable;

(ix) A yes or no indication of whether there are indexed account options and if yes, a brief description summary of how the insured may obtain additional information regarding indexed account options, if applicable.

(2)(3) The insurer shall provide a policy summary Guaranteed Premium and Benefits Patterns Summary to prospective purchasers where the insurer identified the policy form as one that will not be marketed with an illustration. Delivery of the Guaranteed Premium and Benefits Patterns Summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The policy summary Guaranteed Premium and Benefits Pattern Summary shall show guarantees only. It shall consist of a separate document with and include all required information set out in a manner that does not minimize or render any portion of the summary obscure. Any amounts that remain level for two (2) or more years of the policy may be represented by a single number if it is clearly indicated what amounts are applicable for each policy year. Amounts in Section 4F(5) shall be listed in total, not on a per thousand or per unit basis. If more than one insured is covered under one policy or rider, death benefits shall be displayed separately for each insured or for each class of insureds if death benefits do not differ within the class. Zero amounts shall be displayed as a blank space. Delivery of the policy summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The following amounts, where applicable, for the first five (5) policy years and representative policy years thereafter sufficient to clearly illustrate the premium and benefit patterns; including at least one age from sixty (60) through sixty-five (65) and policy maturity:

(a) The annual premium for the basic policy;

(b) The annual premium for each optional rider;

(c) The amount payable upon death at the beginning of the policy year regardless of the cause of death, other than suicide or other specifically enumerated exclusions, that is provided by the basic policy and each optional rider; with benefits provided under the basic policy and each rider shown separately;

(d) The total guaranteed cash surrender values at the end of the year with values shown separately for the basic policy and each rider;

(e) Any endowment amounts payable under the policy that are not included under cash surrender values above;

(f) The effective policy loan annual percentage interest rate, if the policy contains this provision, specifying whether this rate is applied in advance or in arrears. If the policy loan interest rate is adjustable, the Guaranteed Premium and Benefits Patterns Summary shall also indicate that the annual percentage rate will be determined by the company in accordance with the provisions of the policy and the applicable law.

B. Requirements Applicable to Existing Policies.

(1) Upon request by the policyowner, the insurer shall furnish either policy data or an in force illustration as follows:

(a) For policies issued prior to the effective date of [insert state equivalent to Life Insurance Illustrations Model Regulation], the insurer shall furnish policy data, or, at its option, an in force illustration meeting the requirements of [insert state equivalent to Life Insurance Illustrations Model Regulation].
(b) For policies issued after the effective date of the illustration regulation that were declared not to be used with an illustration, the insurer shall furnish policy data, limited to guaranteed values, if it has chosen not to furnish an in force illustration meeting the requirements of the regulation.

(c) If the policy was issued after the effective date of the illustration regulation and declared to be used with an illustration, an in force illustration shall be provided.

(d) Unless otherwise requested, the policy data shall be provided for twenty (20) consecutive years beginning with the previous policy anniversary. The statement of policy data shall include nonguaranteed elements according to the current scale, the amount of outstanding policy loans, and the current policy loan interest rate. Policy values shown shall be based on the current application of nonguaranteed elements in effect at the time of the request. The insurer may charge a reasonable fee, not to exceed $[insert amount], for the preparation of the statement.

(2) If a life insurance company changes its method of determining scales of nonguaranteed elements on existing policies; it shall, no later than when the first payment is made on the new basis, advise each affected policy owner residing in this state of this change and of its implication on affected policies. This requirement shall not apply to policies for which the amount payable upon death under the basic policy as of the date when advice would otherwise be required does not exceed $5,000.

(3) If the insurer makes a material revision in the terms and conditions under which it will limit its right to change any nonguaranteed factor; it shall, no later than the first policy anniversary following the revision, advise each affected policy owner residing in this state.

Section 6. Preneed Funeral Contracts or Prearrangements

The following information shall be adequately disclosed at the time an application is made, prior to accepting the applicant’s initial premium or deposit; for a preneed funeral contract or prearrangement that is funded or to be funded by a life insurance policy:

A. The fact that a life insurance policy is involved or being used to fund a prearrangement;

B. The nature of the relationship among the soliciting agent or agents, the provider of the funeral or cemetery merchandise or services, the administrator and any other person;

C. The relationship of the life insurance policy to the funding of the prearrangement and the nature and existence of any guarantees relating to the prearrangement;

D. The impact on the prearrangement:

(1) Of any changes in the life insurance policy including but not limited to, changes in the assignment, beneficiary designation or use of the proceeds;

(2) Of any penalties to be incurred by the policyholder as a result of failure to make premium payments;

(3) Of any penalties to be incurred or monies to be received as a result of cancellation or surrender of the life insurance policy;

E. A list of the merchandise and services which are applied or contracted for in the prearrangement and all relevant information concerning the price of the funeral services, including an indication that the purchase price is either guaranteed at the time of purchase or to be determined at the time of need;
F. All relevant information concerning what occurs and whether any entitlements or obligations arise if there is a difference between the proceeds of the life insurance policy and the amount actually needed to fund the prearrangement;

G. Any penalties or restrictions, including but not limited to geographic restrictions or the inability of the provider to perform, on the delivery of merchandise, services or the prearrangement guarantee; and

Drafting Note: States should consider whether the insurance regulator has the authority to enforce the provisions of Subsections E, F and G.

H. If so, the fact that a sales commission or other form of compensation is being paid and the identity of the individuals or entities to whom it is paid.
Section 7. General Rules

A. Each insurer shall maintain, at its home office or principal office, a complete file containing one copy of each document authorized and used by the insurer pursuant to this regulation. The file shall contain one copy of each authorized form for a period of three (3) years following the date of its last authorized use unless otherwise provided by this regulation.

B. An agent shall inform the prospective purchaser, prior to commencing a life insurance sales presentation, that he or she is acting as a life insurance agent and inform the prospective purchaser of the full name of the insurance company which the agent is representing to the buyer. In sales situations in which an agent is not involved, the insurer shall identify its full name.

C. An insurance producer shall not use terms such as “financial planner,” “investment advisor,” “financial consultant,” or “financial counseling” in such a way as to imply that he or she is primarily engaged in an advisory business in which compensation is unrelated to sales unless that is actually the case. This provision is not intended to preclude persons who hold some form of formal recognized financial planning or consultant designation from using this designation even when they are only selling insurance. This provision also is not intended to preclude persons who are members of a recognized trade or professional association having such terms as part of its name from citing membership, providing that a person citing membership, if authorized only to sell insurance products, shall disclose that fact. This provision does not permit persons to charge an additional fee for services that are customarily associated with the solicitation, negotiation or servicing of policies.

D. Any reference to nonguaranteed elements shall include a statement that the item is not guaranteed and is based on the company’s current scale of nonguaranteed elements (use appropriate special term such as “current dividend” or “current rate” scale.) If a nonguaranteed element would be reduced by the existence of a policy loan, a statement to that effect shall be included in any reference to nonguaranteed elements. A presentation or depiction of a policy issued after the effective date of the [insert citation to state equivalent to Life Insurance Illustrations Model Regulation] that includes nonguaranteed elements over a period of years shall be governed by that regulation.

Section 8. Failure to Comply

Failure of an insurer to provide or deliver a Buyer’s Guide, an in force illustration, a policy summary or policy data as provided in Section 5 shall constitute an omission that misrepresents the benefits, advantages, conditions or terms of an insurance policy.

Section 9. Separability

If any provisions of this rule be held invalid, the remainder shall not be affected.

Section 10. Effective Date

This rule shall become effective [insert a date at least 6 months following adoption by the regulatory authority].
LIFE INSURANCE DISCLOSURE MODEL REGULATION

Table of Contents
- Section 1. Authority
- Section 2. Purpose
- Section 3. Scope
- Section 4. Definitions
- Section 5. Duties of Insurers
- Section 6. Preneed Funeral Contracts or Prearrangements
- Section 7. General Rules
- Section 8. Failure to Comply
- Section 9. Separability
- Section 10. Effective Date

Section 1. Authority

This rule is adopted and promulgated by the commissioner of insurance pursuant to [insert state equivalent to Section 4A(1) of the Unfair Trade Practices Act] of the Insurance Code.

Drafting Note: Insert title of chief insurance regulatory official wherever the term "commissioner" appears.

Section 2. Purpose

A. The purpose of this regulation is to require insurers to deliver to purchasers of life insurance information that will improve the buyer’s ability to select the most appropriate plan of life insurance for the buyer’s needs and improve the buyer’s understanding of the basic features of the policy that has been purchased or is under consideration.

B. This regulation does not prohibit the use of additional material that is not a violation of this regulation or any other [state] statute or regulation.

Section 3. Scope

A. Except for the exemptions specified in Section 3B, this regulation shall apply to any solicitation, negotiation or procurement of life insurance occurring within this state. Section 5B shall apply only to an existing nonexempt policy held by a policyowner residing in this state. This regulation shall apply to any issuer of life insurance contracts including fraternal benefit societies.

B. This regulation shall not apply to:

1. Individual and group annuity contracts;
2. Credit life insurance;
3. Group life insurance (except for disclosures relating to preneed funeral contracts or prearrangements; these disclosure requirements shall extend to the issuance or delivery of certificates as well as to the master policy);
4. Life insurance policies issued in connection with pension and welfare plans as defined by and which are subject to the federal Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. Section 1001 et seq. as amended; or
Variable life insurance under which the amount or duration of the life insurance varies according to the investment experience of a separate account.

Section 4. Definitions

For the purposes of this regulation, the following definitions shall apply:

A. “Buyer’s Guide” means the current Life Insurance Buyer’s Guide adopted by the National Association of Insurance Commissioners (NAIC) or language approved by the commissioner.

B. “Current scale of nonguaranteed elements” means a formula or other mechanism that produces values for an illustration as if there is no change in the basis of those values after the time of illustration.

C. “Generic name” means a short title that is descriptive of the premium and benefit patterns of a policy or a rider.

C. “Illustration” means a presentation or depiction that includes non-guaranteed elements of a policy of life insurance over a period of years that is subject to [insert state equivalent to Life Insurance Illustrations Model Regulation (#582)].

D. “Nonguaranteed elements” means the premiums, credited interest rates (including any bonus), benefits, values, non-interest based credits, charges or elements of formulas used to determine any of these, that are subject to company discretion and are not guaranteed at issue. An element is considered non-guaranteed if any of the underlying non-guaranteed elements are used in its calculation.

E. “Policy data” means a display or schedule of numerical values, both guaranteed and nonguaranteed for each policy year or a series of designated policy years of the following information: illustrated annual, other periodic, and terminal dividends; premiums; death benefits; cash surrender values and endowment benefits.

F. “Policy summary Overview” means a written statement describing the elements of the policy, including, but not limited to a brief summary of the policy prepared in accordance with this regulation and an example may be found in Appendix A.

G. “Guaranteed Premium and Benefit Patterns Summary” is a separate document that accompanies the Policy Overview where the insurer has identified the policy as one that will not be marketed with an illustration.

G. “Preneed funeral contract or prearrangement” means an agreement by or for an individual before that individual’s death relating to the purchase or provision of specific funeral or cemetery merchandise or services.

Section 5. Duties of Insurers

A. Requirements Applicable Generally

(1) The insurer shall provide a Buyer’s Guide to all prospective purchasers, prior to accepting the applicant’s initial premium or premium deposit. However, if the policy for which application is made contains an unconditional refund provision of at least ten (10) days, the Buyer’s Guide may be delivered with the policy or prior to delivery of the policy.

(2) The insurer shall provide a Policy Overview to all prospective purchasers. Where the application for a life insurance policy is taken at a face-to-face meeting, the applicant at or before the time of application shall be given the Policy Overview. Where the application for a life insurance policy is taken by means other than in a face-to-face meeting, the applicant shall be sent the Policy Overview not later than five business days after the receipt of the application. The Policy Overview is a summary of the high level features and terms of the policy. Insurers should endeavor to limit the
length of the Policy Overview to the minimum length necessary to reasonably inform consumers of the information required to be included in the Policy Overview. The Policy Overview is not required to be in a specific format beyond the requirements of this Section. The Policy Overview must be prepared in language and in a format that would be understood by a typical person within the segment of the public to which the policy is directed. A sample Policy Overview that meets the requirements of this Section is provided in Appendix A. A Policy Overview shall include the following topics with appropriate headings:

(a) An introductory section containing the following language: “This document lists this product insurance policy’s key features and benefits. You can get a similar summary of key product policy features from other insurance companies to help you compare similar product policies. If you have questions about life insurance generally or other types of policies, the National Association of Insurance Commissioners has useful information at [insert reference to website]. If you have questions about this particular life insurance policy, ask the agent, broker, advisor, or a company representative offering this product for clarification. If you have questions about life insurance products generally or about company or agent licensing, contact [insert reference to state department of insurance].”

(b) “Company [and Agent] Information” which shall contain the name, address, email address and phone contact information of the insurance company and insurance agent, if an agent is involved, and the name of the insured for whom the Policy Overview was prepared and the email and phone contact information of the insurer and insurance agent.

(c) “Information We Use to Determine Your Premium” which shall include the following information about the policy owner and insured, as applicable:

(i) A brief description of the data elements that the insurer collects from the applicant and other sources that are used to determine an applicant’s premium;

(ii) A brief description of the policy features that will affect the amount of premium such as the amount of the death benefit and optional riders;

(iii) Estimated risk class used is assessed to generate the quote, if applicable;

(d) “Cost Information” which shall include the following information, as applicable:

(i) An explanation of how much the life insurance policy costs to cost at the time of application, including the estimated premium and an explanation of the differences in cost based on premium mode selected, if applicable;

(ii) A brief description summary of the available options for funding the policy and the minimum funding needed to maintain the policy in force;

(iii) An yes or no indication of whether the premium can vary and, if so, a brief explanation as to how the premium will be determined;

(iv) An yes or no indication of whether there are any costs associated with cancelling the policy (i.e. surrender charges) and, if yes, the period of time the charges apply or, if no, whether any money is eligible to be returned;
(iv) A yes or no indication of whether there is an option to lower benefits to reduce premium;

(iv) If applicable, a narrative description of fees other than premium;

(vi) If applicable, a narrative explanation of the cost of insurance fee, how the cost of insurance fee changes with age, a narrative explanation of the net amount of risk to which the fee will apply, and the maximum allowable cost of insurance fee allowed under the policy

(d) “Policy Information” which shall include the following information, as applicable:

(i) Product Policy type (Including single or joint policy);

(ii) Product Policy name;

(iii) State of issue;

(iiiy) An indication of whether the policy is term or permanent life insurance, and if it is term insurance, the length of the initial term, including whether and how the term may be extended;

(v) A general description of what the policyholder needs to do to obtain the policy

(vi) The following statement: “In the course of considering an insured’s application, an insurer may request or collect health information about the insured in variety of ways.” The statement shall indicate whether a physical examination or questionnaire will be required;

(vii) Death benefit that is available or the death benefit as applied for;

(vi) A yes or no indication of whether the death benefit can change, and if yes, a brief summary of the reasons and timing for a changes in the death benefit;

(vii) State of issue;

(viii) Policy loan options and applicable charges, if applicable;

(f) “Additional Policy Benefits” which shall include the following information, as applicable:

(i) A yes or no indication of whether a waiver of premium or deductions option is available, and if yes, a summary of the options available;

(ii) A yes or no indication of whether policy conversion options exist and, if yes, a summary of conversion options available;

(iii) If the policy has a term, options to extend the term of the coverage;

(iviii) A yes or no indication of the availability of optional riders and, if yes, a brief description summary of how the insured may obtain additional information regarding the availability and costs of optional riders;

(xiv) A yes or no indication of any living benefit option(s), and if yes, a summary of the option(s);
(vii) A yes or no indication of whether the policy can accumulate cash value, and if yes, a summary of the benefit;

(viii) A yes or no indication of whether there are guaranteed interest rates on fixed accounts and, if yes, the amount of the guaranteed interest rate;

(ixvii) A yes or no indication of whether there are indexed account options and if yes, a brief description summary of how the insured may obtain additional information regarding indexed account options.

(2)(3) The insurer shall provide a policy summary Guaranteed Premium and Benefits Patterns Summary to prospective purchasers where the insurer identified the policy form as one that will not be marketed with an illustration. Delivery of the Guaranteed Premium and Benefits Patterns Summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The policy summary Guaranteed Premium and Benefits Pattern Summary shall show guarantees only. It shall consist of a separate document with and include all required information set out in a manner that does not minimize or render any portion of the summary obscure. Any amounts that remain level for two (2) or more years of the policy may be represented by a single number if it is clearly indicated what amounts are applicable for each policy year. Amounts in Section 4F(5) shall be listed in total, not on a per thousand or per unit basis. If more than one insured is covered under one policy or rider, death benefits shall be displayed separately for each insured or for each class of insureds if death benefits do not differ within the class. Zero amounts shall be displayed as a blank space. Delivery of the policy summary shall be consistent with the time for delivery of the Buyer’s Guide as specified in Paragraph (1). The following amounts, where applicable, for the first five (5) policy years and representative policy years thereafter sufficient to clearly illustrate the premium and benefit patterns; including at least one age from sixty (60) through sixty-five (65) and policy maturity:

(a) The annual premium for the basic policy;

(b) The annual premium for each optional rider;

(c) The amount payable upon death at the beginning of the policy year regardless of the cause of death, other than suicide or other specifically enumerated exclusions, that is provided by the basic policy and each optional rider; with benefits provided under the basic policy and each rider shown separately;

(d) The total guaranteed cash surrender values at the end of the year with values shown separately for the basic policy and each rider;

(e) Any endowment amounts payable under the policy that are not included under cash surrender values above;

(f) The effective policy loan annual percentage interest rate, if the policy contains this provision, specifying whether this rate is applied in advance or in arrears. If the policy loan interest rate is adjustable, the Guaranteed Premium and Benefits Patterns Summary shall also indicate that the annual percentage rate will be determined by the company in accordance with the provisions of the policy and the applicable law.

B. Requirements Applicable to Existing Policies.

(1) Upon request by the policyowner, the insurer shall furnish either policy data or an in force illustration as follows:
(a) For policies issued prior to the effective date of [insert state equivalent to Life Insurance Illustrations Model Regulation], the insurer shall furnish policy data, or, at its option, an in force illustration meeting the requirements of [insert state equivalent to Life Insurance Illustrations Model Regulation].

(b) For policies issued after the effective date of the illustration regulation that were declared not to be used with an illustration, the insurer shall furnish policy data, limited to guaranteed values, if it has chosen not to furnish an in force illustration meeting the requirements of the regulation.

(c) If the policy was issued after the effective date of the illustration regulation and declared to be used with an illustration, an in force illustration shall be provided.

(d) Unless otherwise requested, the policy data shall be provided for twenty (20) consecutive years beginning with the previous policy anniversary. The statement of policy data shall include nonguaranteed elements according to the current scale, the amount of outstanding policy loans, and the current policy loan interest rate. Policy values shown shall be based on the current application of nonguaranteed elements in effect at the time of the request. The insurer may charge a reasonable fee, not to exceed $[insert amount], for the preparation of the statement.

(2) If a life insurance company changes its method of determining scales of nonguaranteed elements on existing policies; it shall, no later than when the first payment is made on the new basis, advise each affected policy owner residing in this state of this change and of its implication on affected policies. This requirement shall not apply to policies for which the amount payable upon death under the basic policy as of the date when advice would otherwise be required does not exceed $5,000.

(3) If the insurer makes a material revision in the terms and conditions under which it will limit its right to change any nonguaranteed factor; it shall, no later than the first policy anniversary following the revision, advise each affected policy owner residing in this state.

Section 6. Preneed Funeral Contracts or Prearrangements

The following information shall be adequately disclosed at the time an application is made, prior to accepting the applicant’s initial premium or deposit; for a preneed funeral contract or prearrangement that is funded or to be funded by a life insurance policy:

A. The fact that a life insurance policy is involved or being used to fund a prearrangement;

B. The nature of the relationship among the soliciting agent or agents, the provider of the funeral or cemetery merchandise or services, the administrator and any other person;

C. The relationship of the life insurance policy to the funding of the prearrangement and the nature and existence of any guarantees relating to the prearrangement;

D. The impact on the prearrangement:

   (1) Of any changes in the life insurance policy including but not limited to, changes in the assignment, beneficiary designation or use of the proceeds;

   (2) Of any penalties to be incurred by the policyholder as a result of failure to make premium payments;

   (3) Of any penalties to be incurred or monies to be received as a result of cancellation or surrender of the life insurance policy;
E. A list of the merchandise and services which are applied or contracted for in the prearrangement and all relevant information concerning the price of the funeral services, including an indication that the purchase price is either guaranteed at the time of purchase or to be determined at the time of need;

F. All relevant information concerning what occurs and whether any entitlements or obligations arise if there is a difference between the proceeds of the life insurance policy and the amount actually needed to fund the prearrangement;

G. Any penalties or restrictions, including but not limited to geographic restrictions or the inability of the provider to perform, on the delivery of merchandise, services or the prearrangement guarantee; and

Drafting Note: States should consider whether the insurance regulator has the authority to enforce the provisions of Subsections E, F and G.

H. If so, the fact that a sales commission or other form of compensation is being paid and the identity of the individuals or entities to whom it is paid.

Section 7. General Rules

A. Each insurer shall maintain, at its home office or principal office, a complete file containing one copy of each document authorized and used by the insurer pursuant to this regulation. The file shall contain one copy of each authorized form for a period of three (3) years following the date of its last authorized use unless otherwise provided by this regulation.

B. An agent shall inform the prospective purchaser, prior to commencing a life insurance sales presentation, that he or she is acting as a life insurance agent and inform the prospective purchaser of the full name of the insurance company which the agent is representing to the buyer. In sales situations in which an agent is not involved, the insurer shall identify its full name.

C. An insurance producer shall not use terms such as “financial planner,” “investment advisor,” “financial consultant,” or “financial counseling” in such a way as to imply that he or she is primarily engaged in an advisory business in which compensation is unrelated to sales unless that is actually the case. This provision is not intended to preclude persons who hold some form of formal recognized financial planning or consultant designation from using this designation even when they are only selling insurance. This provision also is not intended to preclude persons who are members of a recognized trade or professional association having such terms as part of its name from citing membership, providing that a person citing membership, if authorized only to sell insurance products, shall disclose that fact. This provision does not permit persons to charge an additional fee for services that are customarily associated with the solicitation, negotiation or servicing of policies.

D. Any reference to nonguaranteed elements shall include a statement that the item is not guaranteed and is based on the company’s current scale of nonguaranteed elements (use appropriate special term such as “current dividend” or “current rate” scale.) If a nonguaranteed element would be reduced by the existence of a policy loan, a statement to that effect shall be included in any reference to nonguaranteed elements. A presentation or depiction of a policy issued after the effective date of the [insert citation to state equivalent to Life Insurance Illustrations Model Regulation] that includes nonguaranteed elements over a period of years shall be governed by that regulation.

Section 8. Failure to Comply

Failure of an insurer to provide or deliver a Buyer’s Guide, an in force illustration, a policy summary or policy data as provided in Section 5 shall constitute an omission that misrepresents the benefits, advantages, conditions or terms of an insurance policy.

Section 9. Separability

If any provisions of this rule be held invalid, the remainder shall not be affected.
Section 10. Effective Date

This rule shall become effective [insert a date at least 6 months following adoption by the regulatory authority].

**Information We Use to Determine Your Premium**

**Policy Owner and Insured**
This overview is prepared for John Smith for insurance on the life of John Smith.

**Information We Obtain From You**

Age
Sex
Family History
Tobacco Use
Occupation
Hobbies

**Information We Obtain From Other Sources**

Credit Reports
Motor Vehicle Registration
Auto, Home and other Insurance Claims
Driving Records
Medical Prescriptions
Criminal History

**Policy Features that will Affect the Premium**

Amount of the Death Benefit
Optional Riders

**How We Assess Your Risk**
We have X rate levels for (smokers/non smokers). John Smith’s premium will be based on the Y best of the X levels.
**Cost Information**

**What Does this Life Insurance Policy Cost?**

The premium is $AAA annually or $BBB quarterly or $CCC monthly. You may pay the premium monthly, quarterly or semi-annually or annually. If you pay premiums monthly, quarterly or semi-annually the total premium you pay will be more than if you pay annually.

**Will my premium ever change?**

The premium will stay the same for the initial term of the policy. After that term ends, the premium will increase each year if you chose to renew the policy.

**Are there any costs if I decide to cancel the policy? Do I get any money back if I cancel the policy?**

No, there are no costs to cancel this policy. However, if you do cancel this policy, you won’t get any money back.

**Policy Information**

**What is the name of this policy?**

This is a policy to be issued in Wisconsin called Guaranteed Level Term.

**Does the policy ever end? If so, what is the term of the policy**

Yes. The policy ends when the term you choose (20 years) ends but you can choose to renew this policy each year until you are age 95. The premium will increase each year you renew the policy.

**What is the death benefit?**

The death benefit is $500,000.

**Can the death benefit change?**

No, the death benefit will stay the same unless you ask, and the company agrees to increase it.

**Can I take a loan from my policy?**

No. You can’t borrow money from this policy.

**Additional Policy Benefits**

**Does the policy have a waiver of premium option?**

Yes, you can buy a waiver of premium rider for an extra cost. A waiver of premium rider for this policy means you won’t have to pay premiums after you’ve been totally disabled for at least 4 months.

**Can I convert this policy to another type of life insurance?**

Yes, you can convert this policy to a whole life insurance policy before the policy term ends, as long as you’re younger than age 70.

**Are there other policy enhancements or optional riders available for this policy?**

Yes, there are other policy enhancements – known as riders. Ask the agent, broker, advisor, or a company representative offering this product about them.
**Is there a policy option that allows me to access my death benefit while I’m alive?**

Yes, for additional premium, you can get part of your death benefit before you die if you are terminally ill.

**Does this policy accumulate cash value?**

No. This policy provides no cash benefits other than the death benefit.

**Does the policy ever end? If so, what is the term of the policy?**

Yes. The policy ends when the term you choose (20 years) ends, but you can choose to renew this policy each year until you are age 95.

**Can I extend the term of coverage?**

Yes. After the initial term ends, you can renew this policy until you are age 95. The premium will increase each year you renew the policy.

**What is the death benefit?**

You have selected a death benefit of $500,000 to generate this quote. You may select a death benefit between $250,000 and $2 million subject to underwriting approval.

**Can I take a loan from my policy?**

No. You can’t borrow money from this policy.

**What do I need to do to buy this policy?**

You’ll need to fill out an application. You also must go through an underwriting process. Underwriters review your application and decide if you’re eligible to buy this policy, and, if you are, what your premium would be and how much coverage you could buy.

In the course of considering your application, an insurer may request or collect health information about you in a variety of ways. You might be approved to buy a policy without any information about your health. If you aren’t, you may still be eligible for this policy, but you’ll be required to fill out a health questionnaire and undergo a physical examination.
Additional Policy Benefits

Does the policy have a waiver of premium option?
Yes, you can buy a waiver of premium rider for an extra cost. A waiver of premium rider for this policy means that you won’t have to pay premiums after you’ve been totally disabled for at least 4 months.

Can I convert this policy to another type of life insurance?
Yes, you can convert this policy to a whole life insurance policy before the policy term ends, as long as you’re younger than age 70.

Are there other policy enhancements or optional riders available for this policy?
Yes, there are other policy enhancements – known as riders. agent, broker, advisor or a company representative offering this product about them.

Is there a policy option that allows me to access my death benefit while I’m alive?
Yes, for additional premium, you can get part of your death benefit before you die if you are terminally ill.

Does this policy accumulate cash value?
No. This policy provides no cash benefits other than the death benefit.

The Life Actuarial (A) Task Force met Aug. 12, 2021. The following Task Force members participated: Doug Slape, Chair, represented by Mike Boerner and Rachel Hemphill (TX); Judith L. French, Vice Chair, represented by Peter Weber (OH); Lori K. Wing-Heier represented by Sharon Comstock (AK); Jim L. Ridling represented by Jennifer Li (AL); Ricardo Lara represented by Perry Kupferman, Thomas Reedy, and Ted Chang (CA); Michael Conway represented by Eric Unger (CO); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Bruce Sartain and Vincent Tsang (IL); Amy L. Beard represented by Steven Chamblee (IN); Vicki Schmidt represented by Nicole Boyd (KS); Grace Arnold represented by Fred Andersen and John Robinson (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Rhonda Ahrens (NE); Marlene Caride represented by Seong-min Eom (NJ); Linda A. Lacewell represented by Bill Carnello and Amanda Fenwick (NY); Glen Mulready represented by Andrew Schallhorn (OK); Jonathan T. Pike represented by Tomasz Serbinowski (UT); and Scott A. White represented by Craig Chupp (VA).

1. **Adopted its July 1, June 24, June 17, June 10, May 27, May 20, May 13, May 6, April 29, and April 22 Minutes**

The Task Force met July 1, June 24, June 17, June 10, May 27, May 20, May 13, May 6, April 29, and April 22. During these meetings, the Task Force took the following action: 1) adopted its April 8 minutes (see NAIC Proceedings – Spring 2021, Life Actuarial (A) Task Force); 2) adopted amendment proposal 2019-33, which clarifies the definition of individually underwritten life insurance and the applicability of principle-based reserving (PBR) requirements for group contracts with individual risk selection issued under insurance certificates; 3) adopted amendment proposal 2020-10, which allows the use of a prudent level of mortality improvement beyond the valuation date; 4) adopted amendment proposal 2021-03, which updates the reference to required minimum distribution age; 5) adopted amendment proposal 2021-05, which changes the term in VM-31, PBR Actuarial Report Requirements for Business Subject to a Principle-Based Valuation, from “model investment strategy” to “modeled company investment strategy” and clarifies the comparison to the alternative investment strategy; 6) adopted amendment proposal 2021-06, which allows for third-party submission of experience data; 7) adopted amendment proposal 2021-07, which clarifies the universal life with secondary guarantees (ULSG) net premium reserve (NPR) calculation requirements; and 8) adopted amendment proposal 2021-09, which updates the materiality language in Section 3.E.1 of VM-31 to be consistent with VM-21, Requirements for Principle-Based Reserves for Variable Annuities.

Mr. Yanacheak made a motion, seconded by Mr. Schallhorn, to adopt the Task Force’s July 1 (Attachment One), June 24 (Attachment Two), June 17 (Attachment Three), June 10 (Attachment Four), May 27 (Attachment Five), May 20 (Attachment Six), May 13 (Attachment Seven), May 6 (Attachment Eight), April 29 (Attachment Nine), and April 22 (Attachment Ten) minutes. The motion passed unanimously.

2. **Adopted the Report of the Index-Linked Variable Annuity (A) Subgroup**

Mr. Weber made a motion, seconded by Ms. Ahrens, to adopt the report of the Index-Linked Variable Annuity (A) Subgroup (Attachment Eleven), including its July 15 minutes (Attachment Twelve). The motion passed unanimously.

3. **Adopted the Report of the Longevity Risk (E/A) Subgroup**

Mr. Weber made a motion, seconded by Ms. Ahrens, to adopt the report of the Longevity Risk (E/A) Subgroup (Attachment Thirteen). The motion passed unanimously.

4. **Adopted the Report of the GI Life Valuation (A) Subgroup**

Mr. Weber made a motion, seconded by Ms. Ahrens, to adopt the report of the Guaranteed Issue (GI) Life Valuation (A) Subgroup (Attachment Fourteen). The motion passed unanimously.

5. **Adopted the Report of the Experience Reporting (A) Subgroup**

Mr. Weber made a motion, seconded by Ms. Ahrens, to adopt the report of the Experience Reporting (A) Subgroup (Attachment Fifteen). The motion passed unanimously.
6. **Adopted the Report of the IUL Illustration (A) Subgroup**

Mr. Weber made a motion, seconded by Ms. Ahrens, to adopt the report of the Indexed Universal Life (IUL) Illustration (A) Subgroup (Attachment Sixteen). The motion passed unanimously.

7. **Adopted the Report of the VM-22 (A) Subgroup**

Mr. Sartain said the Valuation Manual (VM)-22 (A) Subgroup completed discussions of the American Academy of Actuaries’ (Academy’s) Annuity Reserves and Capital Work Group (ARCWG) preliminary framework. He said the most important discussions were focused on aggregation. He said liability elements, hedging issues, and field test plans were also discussed. He noted that field testing is scheduled for the first half of 2022. He noted that the ARCWG framework is exposed for a 90-day public comment period ending Oct. 19.

Mr. Sartain said the Subgroup initially settled on two reserve categories for aggregation; i.e., one for payout annuities and another for deferred annuities. The Subgroup later decided against using the payout and deferred annuity categories. They revised the categories to refer to a principled-based approach and a prescriptive approach. The Subgroup asked for feedback on the principle-based and prescriptive approaches as part of the framework exposure.

Mr. Sartain said the Subgroup has separate drafting groups focused on developing a standard projection amount (SPA) and studying mortality underlying pension risk transfer (PRT) business. He said the SPA drafting group has not met recently. He said the PRT drafting group meets regularly and is reviewing information solicited from a small group of companies with PRT business. He said the Subgroup hopes to use the formula based or asset adequacy information from those companies in the development of the principle-based aggregation approach.

Mr. Sartain made a motion, seconded by Mr. Yanacheak, to adopt the report of the VM-22 (A) Subgroup, including its July 21 (Attachment Seventeen), July 7 (Attachment Eighteen), June 30 (Attachment Nineteen), June 16 (Attachment Twenty), May 26 (Attachment Twenty-One), May 12 (Attachment Twenty-Two), May 5 (Attachment Twenty-Three), April 28 (Attachment Twenty-Four), and April 21 (Attachment Twenty-Five) minutes. The motion passed unanimously.

8. **Heard an Update on Future Mortality Improvement**

Marianne Purushotham (Academy Mortality Improvements Life Working Group [MILWG] and Society of Actuaries [SOA] Preferred Mortality Project Oversight Group [Joint Committee]) presented a recommendation (Attachment Twenty-Six) for the methodology for developing mortality improvement rates applicable to the VM-20, Requirements for Principle-Based Reserves for Life Products, reserve valuation. The rates will be reviewed annually in a manner similar to the process used for the valuation basic table (VBT) scales. Ms. Purushotham noted that the scale will be subject to a threshold of materiality. A best estimate scale and a loaded scale will be developed. The scales will vary by gender and attained age, and they will be applicable for a 20-year period.

Ms. Purushotham said the scale will be initially based on the best estimate of recent historical mortality improvement. The rates will linearly grade to the long-term mortality improvement rates (LTMIRs), defined as the average of projection years 10–15 from the U.S. Social Security Administration (SSA) intermediate projection, over the first 10 years. The mortality improvement rates will then remain level for five years and linearly grade to no improvement at year 20. She noted that the mortality improvement will not be zero at year 20, it will remain at the level of accumulated mortality improvement for the 20-year period. The mortality improvement factors are expected to be available for 2022 valuations and will factor in COVID-19 impacts.

Scott O’Neal (NAIC) discussed model office results showing the impact on ULSG reserves from the application of the mortality improvement rates, including two levels of margin. He noted that instead of the reserve calculation using historical mortality improvement up to the valuation date and future mortality improvement rates beyond the valuation date, the future mortality improvement rates were used for both historical and future rates as a means of simplification. Historical mortality improvement is not applied prior to 2021. Mr. O’Neal said the model office demonstrates that the use of mortality improvement rates beyond the valuation date results in reductions of 14%, 10%, and 8% for the best estimate, best estimate with 25% margin, and best estimate with 35% margin, respectively. He said the NPR floor is not considered in the analysis but could be reflected at the request of state insurance regulators. He noted that Section 3.D.11.c of VM-31 provides an opportunity for companies to identify and quantify the impact of any perceived implicit margins present in the VM-20 methodology in their PBR Actuarial Reports. Several companies have highlighted VM-20’s prohibition of future mortality improvement as a source of implicit margin in VM-20 and provided a quantification of the impact. He said a review of 2020 PBR Actuarial Reports for a sample...
of large life insurance companies revealed that companies reported between a 9% and 80% reduction to their deterministic reserves for ULSG products with the inclusion of a future mortality improvement assumption.

Ms. Purushotham said the recommendation is to use the best estimate with a 25% margin. She pointed out the 25% reduction is a material cushion to the reserve impact. She noted that the mortality improvement rates are not locked in. The scale is subject to change on an annual basis to reflect any new trends. She said there are several issues that will be considered when setting the rates, including the short-term and long-term impacts of COVID-19, the impact of opioid addiction, the threshold for materiality and the socioeconomic-based mortality differences between the general and insured populations. Mr. Carmello asked if the impacts of COVID-19 will be carved out. Ms. Purushotham said that is being considered, but a final decision is yet to be made. Mr. Carmello suggested delaying implementation of the future mortality improvement for a few years. He asked if the margin will be applied if the mortality improvement is negative. Ms. Purushotham responded that the margin will be applied as a further reduction to the negative mortality improvement. She said a zero mortality rate will receive a flat 25 basis point margin. Mr. Carmello suggested that if the mortality improvement rates are between +1 and -1, they should have a flat margin.

Mr. Yanacheak voiced concern that the SOA determination of materiality threshold would take some decision making out of the hands of the Task Force. Ms. Purushotham said the intent is to fully provide the data to the Task Force. If the SOA recommendation is to forgo changes to the mortality improvement rates, the final decision will reside with the Task Force.

9. **Heard an Update on the ESG**

Mr. O’Neal presented a slide deck (Attachment Twenty-Seven) on the status of the economic scenario generator (ESG). He said the ESG Drafting Group comprises selected Task Force members, NAIC staff, Conning Inc. staff, and industry subject matter experts (SMEs). He said the drafting group is focused on developing a set of recommendations for the GEMS Treasury model and a set of associated scenarios for consideration by the Task Force and the Life Risk-Based Capital (E) Working Group. He listed the key calibration goals. Once the key calibration goals are met and scenarios are created, a field test will be conducted. Mr. O’Neal stressed that the process of meeting the goals and setting the scenarios is iterative. He noted that technical discussions and questions are posted on SharePoint. Dan Finn (Conning Inc.) discussed the calibration targets and the tradeoffs that may be encountered when attempting to meet the calibration targets.

10. **Exposed the 2022 GRET**

Tony Phipps (SOA) discussed the 2022 Generally Recognized Expense Table (GRET) presentation (Attachment Twenty-Eight). He noted that the SOA has also supplied a letter (Attachment Twenty-Nine), which provides a deeper view of the methodology. He said there are no material changes in the process as compared to past years. He said the methodology limits percentage changes to in expense factors to 10% to minimize large jumps from one year to the next. He noted that the number of companies in the study increased from 292 to 375. He attributed the increase to fewer companies falling outside the exclusion criteria.

Mr. Chou made a motion, seconded by Mr. Leung, to expose the 2022 GRET for a 21-day public comment period ending Sept. 7. The motion passed unanimously.

11. **Heard an Update on the LIBOR Transition**

Pat Allison (NAIC) presented an update (Attachment Thirty) on the transition away from the London Interbank Offered Rate (LIBOR). She said the currently recommended replacement for LIBOR is the Secured Overnight Financing Rate (SOFR). On July 29, the Alternative Reference Rates Committee (ARRC) recommended the Chicago Mercantile Exchange’s (CME Group’s) forward-looking SOFR term rates, which are now published daily for one-month, three-month, and six-month tenors. As of July 2023, LIBOR tenors will no longer be published. The NAIC has identified the actions companies must take prior to that date.

Ms. Allison discussed the *Valuation Manual* language related to setting the asset spreads used in cashflow modeling. She said the language makes it clear that the three-month and six-month market observable values referenced are based on LIBOR, which requires that they be replaced. She pointed to the language that supports the move from LIBOR to its replacement. She noted that it does not name a specific replacement, such as the SOFR. She said several competing alternatives, other than the SOFR, have surfaced. She said NAIC staff are conducting research to determine if long-term benchmark spreads might also need to be replaced as part of the LIBOR transition.
Brian Bayerle (American Council of Life Insurers—ACLI) said an industry working group has been set up to assist in the transition effort. He said the working group is monitoring the alternatives, but he believes efforts should be focused on the SOFR as the LIBOR replacement. He noted that it is important for companies to fully understand how they are currently using LIBOR to determine where a replacement may be necessary.

12. Discussed the Mortality Data Collection Project

Ms. Allison gave a presentation (Attachment Thirty-One) on the mortality experience data collection. She said NAIC staff provided training webinars through May 27. She said data for observation years 2018 and 2019 will be collected from 115 companies. The data must be submitted through the NAIC Regulatory Data Collection (RDC) by the end of September. Ms. Allison said the company will receive feedback from the RDC when the data is initially submitted. After the company data meets the RDC critical criteria, the data will undergo further analysis from NAIC staff. NAIC staff will provide feedback within 30 days of receiving the submission. The company must correct any errors discovered by NAIC staff before resubmitting the file. There is no limit on the number of resubmissions a company can make, but the final corrected data file must be submitted on or before Dec. 31. The NAIC has committed to provide the aggregate experience data to the SOA by May 31, 2022. To date, four companies have submitted mortality experience data; only three of the four submissions are complete. Submissions must include data for the 2018 and 2019 observation years; VM-51, Experience Reporting Formats, questionnaires; control totals; and a reconciliation to be considered complete. Five companies have loaded data into the RDC but have not yet submitted the data. The presentation included a list of resources available to participating companies.

13. Heard an Update on SOA Research and Education

Dale Hall (SOA) gave a presentation (Attachment Thirty-Two) on group and individual life COVID-19 mortality experience for various demographic categories and geographic regions by quarter from April 2020 through March 2021. He noted that after seeing general population mortality continue to decline in 2019, the 2020 results were 16% higher than the 2019 mortality rates. He noted that excluding deaths from COVID-19, the 2020 mortality rates were 4.4% higher than the 2019 results. He said the highest actual to expected ratios occurred in the age range from 35 to 54.

14. Heard an Update on the Recent Activities of the Academy LPC

Laura Hanson (Academy Life Practice Council—LPC) gave a presentation (Attachment Thirty-Three) on the LPC’s recent activities. She highlighted that the Academy is providing input to the ESG Drafting Group. She also noted the ARCWG work on VM-22, Statutory Maximum Valuation Interest Rates for Income Annuities, and discussed the Academy webinars and boot camps planned for the remainder of 2021. She listed a few of the Academy efforts supporting its promotion of diversity and inclusion within the actuarial profession and in the broader insurance industry.

Having no further business, the Life Actuarial (A) Task Force adjourned.
The Life Actuarial (A) Task Force met July 1, 2021. The following Task Force members participated: Doug Slape, Chair, represented by Mike Boerner, Rachel Hemphill, and Karen Jiang (TX); Judith L. French, Vice Chair, represented by Jason Wade (OH); Lori K. Wing-Heier represented by Sharon Comstock (AK); Jim L. Ridling represented by Jennifer Li and Steve Ostlund (AL); Ricardo Lara represented by Thomas Reedy and Ben Bock (CA); Michael Conway represented by Eric Unger (CO); Andrew N. Mais represented by Wanchin Chou (CT); Doug Ommen represented by Mike Yanacheak (IA); Dana Popish Severinghaus represented by Bruce Sartain and Vincent Tsang (IL); Amy L. Beard represented by Stephen Chamblee (IN); Vicki Schmidt represented by Nicole Boyd (KS); Grace Arnold represented by Fred Andersen and John Robinson (MN); Chlora Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Rhonda Ahrens (NE); Marlene Caride represented by Kevin Clarkson (NJ); Linda A. Lacewell represented by Bill Carmello and Amanda Fenwick (NY); Jonathan T. Pike represented by Tomasz Serbinowski (UT); Scott A. White represented by Craig Chupp (VA); and James A. Dodrill represented by Joylynn Fix (WV).

1. **Adopted Amendment Proposal 2019-33**

Ms. Hemphill noted that the term “and certificates” was added to the Life Principle-Based Reserving (PBR) Exemption section of amendment proposal 2019-33. She identified several other places in that section where the terms “and certificates” or “or certificates” should be added. NAIC staff agreed to edit the amendment proposal to incorporate those terms.

Mr. Leung made a motion, seconded by Mr. Robinson, to adopt amendment proposal 2019-33 (Attachment One-A), including the edits by NAIC staff. The motion passed unanimously.

2. **Adopted Amendment Proposal 2021-09**

Ms. Hemphill said the first question on the American Council of Life Insurers (ACLI) comment letter (Attachment One-B) asks why VM-21, Requirements for Principle-Based Reserves for Variable Annuities, Section 1.E refers to both the reserve and the Total Asset Requirement (TAR), while VM-21, Section 3.H references only the TAR. She said the two sections are related, but they are not the same. She said Section 3.H follows the precedent in VM-21 that allows simplifications if they have no significant impact or bias on TAR.

Ms. Hemphill said the second and fourth questions on the ACLI comment letter discuss the alternative method and the existing hedging requirements. She said neither are considered simplifications, approximations, or modeling efficiency techniques relative to the benchmark VM-21 requirements; therefore, no adjustment to the amendment proposal is necessary. She said the third question asks whether both the criteria in VM-21 Section 3.F.2.e—the first criteria being that simplifications and approximations cannot materially understate TAR and the second criteria being that simplifications and approximations cannot have a downward bias on TAR—are necessary. She responded that both criteria are necessary to capture both the accuracy and precision of the simplification or approximation. Brian Bayerle (ACLI) said the ACLI concerns were adequately addressed by Ms. Hemphill’s responses.

Ms. Ahrens made a motion, seconded by Mr. Weber, to adopt amendment proposal 2021-09 (Attachment Once-C). The motion passed unanimously.

3. **Discussed Amendment Proposal 2020-12**

Ms. Hemphill said while there is some comfort with the ideas presented in amendment proposal 2020-12 (Attachment One-D), there are enough industry member questions on the scope of the amendment to warrant establishing a state insurance regulator drafting group to initiate a series of one-on-one discussions with companies to better understand the underlying issues. Mr. Clarkson, Mr. Reedy, and Mr. Chou volunteered to join the drafting group.
4. **Re-Exposed Amendment Proposal 2019-34**

Leonard Mangini (American Academy of Actuaries—Academy) said the Academy comment letter (Attachment One-E) asserts that the amendment proposal duplicates the regulatory authority provided by the *Valuation Manual* and is therefore unnecessary. Mr. Bayerle said the ACLI comment letter (Attachment One-F) notes that the requirements created by the amendment proposal are onerous and may produce unreliable results. He said the letter also identifies existing sources of guidance that address the issues the amendment proposal purports to correct. He said the ACLI is willing to present examples to inform state insurance regulators of some of the challenges that could surface if the amendment proposal is adopted. Mr. Chupp said his comment letter (Attachment One-G) aligns with the Academy and ACLI comments, and he advises that the amendment proposal is unnecessary.

Mr. Robinson said one of the goals of the amendment proposal is to provide a national standard for circumstances where an actuary determines the reserves for a block of business, but it does not complete asset adequacy testing on the business. He said the proposal is applicable to all business, but how it will be practically applied to modified coinsurance and coinsurance funds withheld business is still in question.

Mr. Robinson made a motion, seconded by Mr. Leung, to re-expose amendment proposal 2019-34 (Attachment One-H) for a public comment period ending July 20. The motion passed, with Mr. Unger, Mr. Sartain, Mr. Clarkson, Mr. Carmello, and Mr. Serbinowski dissenting.

Having no further business, the Life Actuarial (A) Task Force adjourned.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

American Academy of Actuaries, Life Reserves Work Group

Addition of language to clarify the definition of individually underwritten life insurance and the applicability of Principle-Based Reserve (PBR) requirements for group insurance contracts with individual risk selection issued under insurance certificates.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2021, version of the Valuation Manual with the revisions to APF 2020-11 (adopted by LATF on 2/11/21) shown in blue text.

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See Appendix

All proposed changes specific to this amendment proposal are shown in red text.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Individual insurance certificates issued under a group contract which utilize an individual risk selection process, pricing, premium rate structures and product features are similar to individual life insurance policies. They are currently excluded from VM-20 because they are filed under a group contract, but they should be subject to VM-20 due to this similarity. See Appendix.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

Notes: APF 2019-33
Appendix

Issue

Certain contracts issued under a master group contract require individual risk selection in order to qualify for issuance of the group insurance certificate; the certificates have similar acquisition approaches, provisions, certificate-holder rights, pricing, and risk classification; and they are managed in a similar manner as individual ordinary life insurance contracts. These individual certificates should follow the same reserve requirements as other individual life contracts of the same product type. Therefore, a change is needed within the *Valuation Manual* to bring these individual certificates into scope of VM-20.

Six changes are recommended:

1) Within the Reserve Requirements section (Section II), change the minimum reserve requirements to also apply to group life contracts which, other than the difference between issuing a policy and issuing a group certificate, have the same or mostly similar contract provisions, risk selection process, and underwriting as individual ordinary life contracts (Section II, subsection 1.D);

2) Within the Reserve Requirements section (Section II), add a transition period for individual group certificates issued on or before 1/1/2024 (Section II, subsections 1.F.1 and 1.F.2);

3) Within the Reserve Requirements section (Section II), add language and guidance note to subsection 1.G and the corresponding footnote to include premiums from group life contracts which have individual certificates that were issued using individual risk selection processes (Section II, subsection 1.G.1, footnote, and guidance note) and to clarify the Calculation for Exemption (Section II, subsection 1.G.2). Comment notes need to refer to NAIC Blanks (E) Working Group to update the PBR Supplement;

4) Add new paragraph, VM-20 Section 1.B (and reformat to make current paragraph Section 1.A) to clarify group life certificates issued using individual risk selection processes, including a definition and requirements to be met, are subject to the requirements of VM-20;

5) Add guidance note after first sentence in VM-20 Section 2.A.1 that group life certificates that meet the definition for individual risk selection process use the same VM-20 Reserving Categories as defined in Section 2;

6) Draft referral to the NAIC Blanks (E) Working Group to revise the VM-20 Reserves Supplement, Part 2 to report premiums for total Group Life and Group Life with certificates subjected to an individual risk selection process and which meet all of the conditions as defined in VM-20 Section 1.B separately.
VM Changes 1, 2 and 3 – II. Reserve Requirements

II. Reserve Requirements

This section provides the minimum reserve requirements by type of product, as set forth in the seven subsections below, as follows:

1. Life Insurance Products
2. Annuity Products
3. Deposit-Type Contracts
4. Health Insurance Products
5. Credit Life and Disability Products
6. Riders and Supplemental Benefits
7. Claim Reserves

All reserve requirements provided by this section relate to business issued on or after the operative date of the Valuation Manual. All reserves must be developed in a manner consistent with the requirements and concepts stated in the Overview of Reserve Concepts in Section I of the Valuation Manual.

Guidance Note: The terms “policies” and “contracts” are used interchangeably.

Subsection 1: Life Insurance Products

A. This subsection establishes reserve requirements for all contracts issued on and after the operative date of the Valuation Manual that are classified as life contracts as defined in SSAP No. 50 in the AP&P Manual, with the exception of annuity contracts and credit life contracts. Minimum reserve requirements for annuity contracts and credit life contracts are provided below in subsection 2 and subsection 5, respectively.

B. Minimum reserve requirements for variable and nonvariable individual life contracts—excluding guaranteed issue life contracts, preneed life contracts, industrial life contracts, and policies of companies exempt pursuant to the life PBR exemption in paragraph D below—subsection 1.G are provided by VM-20, Requirements for Principle-Based Reserves for Life Products, except for election of the transition period in paragraph C below subsection 1.F.2 below. For this purpose, joint life policies are considered individual life.

C. Minimum reserve requirements of VM-20 are considered principle-based valuation requirements for purposes of the Valuation Manual.

D. Minimum reserve requirements for individual certificates under group life contracts (regardless of the issue date of the master group life contract) which meet all the requirements in VM-20 Section 1.B are provided by VM-20, except for election of the transition period in subsection 1.F.1 below.

E. Minimum reserve requirements for life contracts not subject to VM-20 are those pursuant to applicable requirements in VM-A and VM-C. For guaranteed issue life contracts issued after Dec. 31, 2018, mortality tables are defined in VM Appendix M, Mortality Tables (VM-M), and the same table shall be used for reserve requirements as is used for minimum nonforfeiture requirements as defined in VM-02, Minimum Nonforfeiture Mortality and Interest.
F. A company may elect to establish minimum reserves pursuant to applicable requirements in VM-A and VM-C for:

1. Business described in subsection 1.D above and issued on or after the operative date of the Valuation Manual and prior to 1/1/2024.

2. Business not described in subsection 1.D otherwise subject to VM-20 requirements and issued during the first three years following the operative date of the Valuation Manual.

A company electing to establish reserves using the requirements of VM-A and VM-C may elect to use the 2017 Commissioners’ Standard Ordinary (CSO) Tables as the mortality standard following the conditions outlined in VM-20 Section 3. If a company during the three years elects to apply VM-20 to a block of such business, then a company must continue to apply the requirements of VM-20 for future issues of this business.

G. Life PBR Exemption

1. A company meeting the at least one of the conditions in D. subsection 1.G.2 below may file a statement of exemption for individual ordinary life insurance policies or certificates, except for policies or certificates in subsection 1.G.3 below, issued directly or assumed during the current calendar year, that would otherwise be subject to VM-20. If a company has no business issued directly or assumed during the current calendar year that would otherwise be subject to VM-20, a statement of exemption is not required. For a filed statement of exemption, the statement must be filed with the domiciliary commissioner prior to July 1 of that year certifying that at least one of the two conditions in D. subsection 1.G.2 was met and the statement of exemption must also be included with the NAIC filing for the second quarter of that year.

The domiciliary commissioner may reject such statement prior to September 1 and require the company to follow the requirements of VM-20 for the ordinary life policies or certificates covered by the statement.

If a filed statement of exemption is not rejected by the domiciliary commissioner, the filing of subsequent statements of exemption is not required as long as the company continues to qualify for the exemption; rather, ongoing statements of exemption for each new calendar year will be deemed to not be rejected, unless: 1) the company does not meet either condition in D. subsection 1.G.2 below, 2) the policies or certificates contain those in D. subsection 1.G.3 below, or 3) the domiciliary commissioner contacts the company prior to Sept. 1 and notifies them that the statement of exemption is rejected. If any of these three events occur, then the statement of exemption for the current calendar year is rejected and not not rejected in order for the company to exempt additional policies or certificates. In the case of an ongoing statement of exemption, rather than include a statement of exemption with the NAIC filing for the second quarter of that year, the company should enter “SEE EXPLANATION” in response to the Life PBR Exemption supplemental interrogatory and provide as an explanation that the company is utilizing an ongoing statement of exemption.

2. Condition for Exemption:

a. The company has less than $300 million of ordinary life exemption premiums, and if the company is a member of an NAIC group which includes other life insurance companies, the group has combined ordinary life exemption premiums of less than $600 million or

The only new policies or certificates that would otherwise be subject to VM-20 being issued or assumed by the company are due to election of policy benefits or features from existing policies or certificates valued under VM-A and VM-C and the company was exempted from, or otherwise not subject to, the requirements of VM-20 in the prior year.

Exemption premium is determined as follows:
a. The amount reported in the prior calendar year life/health annual statement, Exhibit 1, Part 1, Column 3 (“Ordinary Life Insurance”), line 20.1; plus

b. The portion of the amount in the prior calendar year life/health annual statement, Exhibit 1, Part 1, Column 3 (“Ordinary Life Insurance”), line 20.2 assumed from unaffiliated companies; minus

c. Amounts included in either (a) or (b) that are associated with guaranteed issue insurance policies and/or preneed life insurance policies; minus

d. Amounts included in either (a) or (b) that represent transfers of reserves in force as of the effective date of a reinsurance assumed transaction; plus

e. Amounts of premium for individual life certificates issued under a group life certificate which meet the conditions defined in VM-20, Section 1.B, and that are not included in either (a) or (b).

Guidance Note:
(i) Definitions of preneed and guaranteed issue insurance policy are in VM-01.
(ii) For statements of exemption filed for calendar year 2022 and beyond, the amount in subsection 2.e was reported in the prior calendar year life/health annual statement, VM-20 Reserve Supplement, Part 2, if applicable.

3. Policies and Certificates Excluded from the Life PBR Exemption:

a. Universal life with secondary guarantee (ULSG) policies or certificates, or policies or certificates – other than ULSG – that contain a rider with a secondary guarantee, in which the secondary guarantee does not meet the VM-01 definition of a “non-material secondary guarantee.”

4. Each exemption, or lack of an exemption, outlined in D. subsection 1.G.1 – D. subsection 1.G.3 above applies only to policies or certificates issued or assumed in the current year, and it applies to all future valuation dates for those policies or certificates. However, if policies or certificates did not qualify for the Life PBR Exemption during the year of issue but would have qualified for the Life PBR Exemption if the current Valuation Manual requirements had been in effect during the year of issue, then the domiciliary commissioner may allow an exemption for such policies or certificates. The minimum reserve requirements for the ordinary life policies, including individual certificates under group life contracts which meet all the requirements in VM-20 Section 1.B, subject to the exemption are those pursuant to applicable methods required in VM-A and VM-C using the mortality as defined in VM-20 Section 3.C.1 and VM-M Section 1.H.

VM Change 4 – VM-20: Requirements for Principle-Based Reserves for Life Products

VM-20: Requirements for Principles-Based Reserves for Life Products

Section 1: Purpose

A. These requirements establish the minimum reserve valuation standard for individual life insurance policies issued on or after the operative date of the Valuation Manual and subject to a principle-based valuation with an NPR floor under Model #820. These requirements constitute the Commissioners Reserve Valuation Method (CRVM) for policies of individual life insurance.
B. Individual life certificates under a group life contract shall be subject to the requirements of VM-20 if all of the following are met. These requirements constitute the Commissioners Reserve Valuation Method (CRVM) for such certificates.

1. An individual risk selection process, defined as follows, is used to obtain group life insurance coverage;

An individual risk selection process is one that is based on characteristics of the insured(s) beyond sex, gender, age, tobacco usage, and membership in a particular group. This may include, but is not limited to, completion of an application (beyond acknowledgement of membership to the group, sex, gender and age), questionnaire(s), online health history or tele-interview to obtain non-medical and medical or health history information, prescription history information, avocations, usage of tobacco, family history, or submission of fluids such as blood, Home Office Specimens (HOS), or oral fluid. The resulting risk classification is determined based on the characteristics of the individual insured(s) rather than the group, if any, of which it is a member (e.g., employer, affinity, etc.). The individual certificate holder is charged a premium rate based solely on the individual risk selection process and not on membership in a specific group.

**Guidance Note:** The use of evidence of insurability does not by itself constitute an individual risk selection process. Use of information obtained from a census or question(s) regarding gender, occupation, age, income and/or tobacco usage solely for purposes of determining a rate classification does not by itself qualify a group as having used an individual risk selection process. Group insurance where the underwriting based on the characteristics of the group and census data but where some individuals are subjected to individual risk selection as a result of compensation level, age, an existing medical condition or impairment, late entry into the group, failure of the group to meet minimum participation requirements or voluntary buy-up of increased coverage does not meet the definition of an individual risk selection process.

2. The individual certificates utilize premiums or cost of insurance schedules and charges based on the individual applicant’s issue age, duration from underwriting, coverage amount and risk classification and there is a stated or implied schedule of maximum gross premiums or net cash surrender value required in order to continue coverage in force for a period in excess of one year;

**Guidance Note:** Coverage amount does not imply a requirement for banding of premiums or charges but rather rates or charges that are multiplied by number of units of coverage of face amount (or net amount at risk) per $1,000 to obtain the actual premium or charge.

3. The group master contract is designed, priced, solicited, and managed similar to individual ordinary life insurance policies rather than specific to the group as a whole;

4. The individual certificates have similar acquisition approaches, provisions, certificate-holder rights, pricing, and risk classification to individual ordinary life insurance contracts.

5. The individual certificates are issued on or after the operative date of the Valuation Manual except election of the transition period in Section 2, subsection 1.F.1.
Section 2: Minimum Reserve

A. All policies subject to these requirements shall be included in one of the VM-20 Reserving Categories, as specified in Section 2.A.1, Section 2.A.2 and Section 2.A.3 below.

Guidance Note: Since group insurance subject to an individual risk selection process and meeting all the requirements in Section 1.B is subject to VM-20 requirements, Section 2.A shall apply—meaning that any such contracts will be included in one of the VM-20 Reserving Categories defined by Section 2.A.1, Section 2.A.2, and 2.A.3. All requirements in VM-31 which apply to a VM-20 Reserving Category shall apply to any group insurance subject to individual risk selection that has been included in that VM-20 Reserving Category.

The company may elect to exclude one or more groups of policies from the stochastic reserve calculation and/or the deterministic reserve calculation. When excluding a group of policies from a reserve calculation, the company must document that the applicable exclusion test defined in Section 6 is passed for that group of policies. The minimum reserve for each VM-20 Reserving Category is defined by Section 2.A.1, Section 2.A.2 and Section 2.A.3, and the total minimum reserve equals the sum of the Section 2.A.1, Section 2.A.2 and Section 2.A.3 results below, defined as:
VM Change 6 – VM-20 Reserves Supplement, Part 2: Life PBR Exemption

Refer to NAIC Blanks (E) Working Group, request for modification to the supplemental report for the Life PBR Exemption, to show the premiums for group life that utilized an individual risk selection process and meets all of the requirements in VM-20 Section 1.B. as these premiums are currently grouped together with other group insurance in Exhibit 1. As there are other instances where the ordinary life premiums are not included in the determination of the Life PBR Exemption (e.g., for guaranteed issue policies), it may be useful to request addition of the breakdown of premiums used to determine the exemption.

Possible insertion between questions 1 and 2 for disclosure of premiums used in the determination of eligibility for the Life PBR exemption, split by ordinary life and group subject to an individual risk selection process and meeting all of the requirements in VM-20 Section 1.B.

Senior Actuary  

June 16, 2021  

Mr. Mike Boerner  
Chair, NAIC Life Actuarial (A) Task Force (LATF)  

Re: ACLI Comments on APF 2021-09  

Dear Mr. Boerner:  

The American Council of Life Insurers (ACLI) appreciates the opportunity to provide comments on APF 2021-09.  

We have the following technical comments regarding the APF:  

1) Consistency of Reserve vs TAR  

There appears to be an inconsistency between where the APF mentions reserve versus TAR in the threshold to ensure there is no understatement; it was unclear if this was done intentionally or due to porting language from VM-20:  

- In the added VM-21 Section 1.E, it states that the materiality standard should be established “containing the criteria for determining whether an assumption, risk factor or other element… has a material impact on the size of the reserve or TAR”  
- In the added VM-21 Section 3.H, it states that a company can use simplifications, approximations, and modeling efficiency techniques if “the use of such techniques does not understate TAR by a material amount.” Only TAR is used throughout Section 3.H. This language is also used in VM-31 Section 3.F.2.e of the APF.

2) Application to Alternative Method  

It was unclear if the APF intended to apply these requirements regarding approximations, simplifications, etc. to the Alternative Method calculations. The APF specifically mentions the stochastic reserves and the additionally projection amount but did not mention the Alternative Method amount. VM-20, applies requirements regarding simplifications to the NPR, so we request clarification in the text or a guidance note.  

3) Multiple criteria in Section 3.F.2.e  

© 2021 National Association of Insurance Commissioners
Section 3.F.2.e provides for two criteria related to the TAR:
1) the use of each approximation, simplification, or modeling efficiency technique does not understate TAR by a material amount; and
2) the expected value of TAR is not less than the expected value of TAR calculated without using the approximation, simplification, or modeling efficiency technique.

As both approaches would result in a higher TAR, it is not clear how these conditions are significantly different. We would request an example of how these criteria might apply in different cases.

4) Additional allowable demonstrations in Guidance Note

The guidance note discusses various ways to provide the required demonstrations. ACLJ would suggest adding an additional bullet that states that backtesting and E-factor documentation are acceptable demonstrations for hedging modeling simplifications covered by those requirements.

We look forward to a discussion of this amendment on a future call. We appreciate the consideration of our comments.

Sincerely,

cc: Reggie Mazyck, NAIC
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
PBR Staff of Texas Department of Insurance

Title of the Issue:
1. Address determination of materiality. VM-21 often refers to materiality but is missing a discussion on how materiality is determined.
2. Address use of approximations and simplifications in VM-21.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

VM-21 Section 1.E (new), VM-21 Section 3.H (new), VM-31 Section 3.E.1, VM-31 Section 3.F.2.e

January 1, 2021 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

1. VM-21 often refers to materiality but is missing a discussion on how materiality is determined (a materiality standard), as VM-20 has in VM-20 Section 2.H. Moreover, the current language of Materiality in the VA Summary in VM-31 Section 3.E.1 (2021 edition) is based on the Life PBR Summary in VM-31 (2019 edition). The language of Materiality in the VA Summary in Section 3.E.1 of VM-31 should be updated, consistent with adding a new section to VM-21 to address materiality.

For reference, here are the relevant VM-20 passages:

VM-20 Section 2.H
The company shall establish, for the DR and SR, a standard containing the criteria for determining whether an assumption, risk factor or other element of the principle-based valuation has a material impact on the size of the reserve. This standard shall be applied when identifying material risks. Such a standard shall also apply to the NPR with respect to VM-20 Section 2.G.
VM-31 Section 3.C.1

Life Summary – The PBR Actuarial Report shall contain a Life Summary of the critical elements of all sub-reports of the Life Report as detailed in Section 3.D. In particular, this Life Summary shall include:

1. VM-20 Materiality – The standard established by the company pursuant to VM-20 Section 2.H.

2. While it is common for companies to use a significant number of approximations, simplifications, and modeling efficiency techniques for their VM-21 valuation, VM-21 is missing an explicit allowance of approximations, simplifications, or modeling efficiency techniques. To understand the impact of the large number of approximations, simplifications, and modeling efficiency techniques, they should be covered in one location in the PBR reporting for VA, in contrast to the current reporting where they are scattered throughout the PBR Report. VM-20 Section 2.G does not allow simplifications to bias the reserve downward. This addresses the concern that a large number of immaterial simplifications could add up to a material understatement. VM-21 needs an assurance that simplifications do not compound one another to become material even more than VM-20, due to the very larger number of simplifications commonly used.

VM-21 Section 1.E (new)

Materiality

The company shall establish a standard containing the criteria for determining whether an assumption, risk factor or other element of the principle-based valuation has a material impact on the size of the reserve or TAR. This standard shall be applied when identifying material risks.

VM-21 Section 3.H (new)

H. A company may use simplifications, approximations and modeling efficiency techniques to calculate the stochastic reserve and/or the additional standard projection amount required by this section if the company can demonstrate that the use of such techniques does not understate TAR by a material amount, and the expected value of TAR calculated using simplifications, approximations and modeling efficiency techniques is not less than the expected value of TAR calculated that does not use them.

Guidance Note:

Examples of modeling efficiency techniques include, but are not limited to:

1. Choosing a reduced set of scenarios from a larger set consistent with prescribed models and parameters.
2. Generating a smaller liability or asset model to represent the full seriatim model using grouping compression techniques or other similar simplifications.

There are multiple ways of providing the demonstration required by Section 3.H. The complexity of the demonstration depends upon the simplifications, approximations or modeling efficiency techniques used. Examples include, but are not limited to:

1. Rounding at a transactional level in a direction that is clearly and consistently conservative or is clearly and consistently unbiased with an obviously immaterial impact on the result (e.g., rounding to the nearest dollar) would satisfy 3.H without needing a demonstration. However,
rounding to too few significant digits relative to the quantity being rounded, even in an unbiased way, may be material and in that event, the company may need to provide a demonstration that the rounding would not produce a material understatement of TAR.

2. A brute force demonstration involves calculating the minimum reserve both with and without the simplification, approximation or modeling efficiency technique, and making a direct comparison between the resulting TAR. Regardless of the specific simplification, approximation or modeling efficiency technique used, brute force demonstrations always satisfy the requirements of Section 3.H.

3. Choosing a reduced set of scenarios from a larger set consistent with prescribed models and parameters and providing a detailed demonstration of why it did not understate TAR by a material amount and the expected value of TAR would not be less than the expected value of TAR that would otherwise be calculated. This demonstration may be a theoretical, statistical or mathematical argument establishing, to the satisfaction of the insurance commissioner, general bounds on the potential deviation in the TAR estimate rather than a brute force demonstration.

4. Justify the use of randomly sampling withdrawal ages for each contract instead of following the exact prescribed WDCM method by demonstrating that the random sampling method is materially equivalent to the exact prescribed approach, and the simplification does not materially reduce the Additional Standard Projection Amount and the final reported TAR. In particular, the company should demonstrate that the statistical variability of the results based on the random sampling approach is immaterial by testing different random sets, e.g., if randomly selecting a withdrawal age for each contract, the probability distribution of the withdrawal age should be stable and not vary significantly when using different random number sets.

VM-31 Section 3.F.1

VA Summary – The PBR Actuarial Report shall contain a VA Summary of the critical elements of all sub-reports of the VA Report as detailed in Section 3.F. In particular, this VA Summary shall include:

1. Materiality – The Standard established by the company pursuant to VM-21 Section 1.E.

VM-31 Section 3.F.2.e

e. Approximations, Simplifications, and Modeling Efficiency Techniques – A description of each approximation, simplification or modeling efficiency technique used in reserve or TAR calculations, and a statement that the required VM-21 Section 3.H demonstration is available upon request and shows that: 1) the use of each approximation, simplification, or modeling efficiency technique does not understate TAR by a material amount; and 2) the expected value of TAR is not less than the expected value of TAR calculated without using the approximation, simplification, or modeling efficiency technique. 

Deleted: A description of the rationale for determining whether a decision, information, assumption, risk or other element of a principle-based valuation under VM-21 has a material impact on the modeled reserve. Such rationale could include criteria such as a percentage of reserves, a percentage of surplus, and/or a specific monetary value, as appropriate.

Deleted: Approximations and Simplifications – Description of any approximations and simplifications used in cash flow projection calculations and not described in a different section of this report, including documentation that these did not materially reduce the resulting reserve.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Identification:
Rachel Hemphill and Karen Jiang, Texas Department of Insurance

Title of the Issue:
Create consistency between CDHS determination in VM-20 and VM-21. Revise hedge modeling to only require CDHS if modeling future hedging reduces the reserves under VM-20 or TAR under VM-21.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2021 NAIC Valuation Manual

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See attached.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

6/17/2021 Notes:
We have made notes (highlighted in yellow) in the below summary of the 4/2/2021 and 5/17/2021 updates to emphasize the treatment of macro hedging (excluded from the scope of this APF), hedging strategies that are still in the formative stages (excluded from the scope of this APF), and conservative simplifications (allowed, as always, with documentation). We also addressed the concern that SHS could be perceived as one-sided. See below for full context/intent.

Summary of 5/17/2021 Editorial Changes and Clarifications:

1. Editorial changes were made in response to the comment by John Robinson of MN:
   a. Replace “hedge” with “hedging” when used as an adjective.
   b. Clarify that the Principles apply to the modeling of a CDHS or SHS.
   c. Add references to “one or more” CDHS or SHS, to reflect that a company may have multiple CDHS or SHS.
d. Add reference to a CDHS that the company is following.

2. Clarifying edits were made in response to the comment ACLI:
   a. Clarify that PBR reflecting a company’s investment policy and risk management strategies supporting the policies or contracts does not target, deem illegitimate, or otherwise reflect a negative view on the company’s investment policy and risk management strategies supporting the policies or contracts. In fact, the opposite is true. Note that this is consistent with VM-20 Section 7.K.1’s treatment of non-hedging derivative use.
   b. Clarify even further that the CDHS requirements are documentation requirements (i.e., documentation clearly defining the hedging strategy) and may always be satisfied at the company’s option. (6/17/2021 Added Emphasis: There has been the suggestion that SHS is one-sided. But we can see that that is not true, when we see that the consideration of SHS and CDHS are each necessary and complementary pieces of a complete PBR treatment of hedging, the result of the two pieces together being “model your hedging, but only reflect a benefit from hedging if you have provided adequate documentation of your hedging program so that regulators can rely on its projected performance.”)
   c. Clarify that SHS “are normally modeled as part of any of the company’s risk assessment and evaluation processes” (emphasis added).

3. Materiality was explicitly addressed. (6/17/2021 Added Emphasis: A company may continue doing conservative simplifications, such as not modeling hedging that would have been a benefit for them to model. In these cases, the intent is for there to be transparency, documentation, and support of the simplification in the PBR Report. As with all simplifications, the support can range from a robust analysis to a qualitative analysis, depending on the individual company situation.)

Summary of 4/2/2021 Updates:

1. Revisions were made to VM-20 Section 7.K.4 (add “supporting the policies”) and VM-21 Section 9.A.6 (add “supporting the contracts”) in response to Nationwide’s comments. (6/17/2021 Added Emphasis: These edits were to clarify that macro hedging was not in scope.)
2. We added a definition for “hedging transactions,” taken from the APPM but modified slightly to be consistent with Valuation Manual terminology in response to Will Wilton’s comments.
3. We have updated the list of CDHS criteria in response to Will Wilton’s comments where we agreed:
   a. Added “significant” before risks in item (c) of the CDHS definition.
   b. Combined items (f) – (h) in the CDHS definition.
   c. Change “person or persons” to “group or area, including whether internal or external,” in item (i) of the CDHS definition.
   d. We did not remove items (k) or (l) as suggested by Will Wilton, as we find this information useful to regulators. Given that these are retained, and because we were uncertain what else would be included in the new “primary risks” item suggested by Will Wilton, we have not added it. If we can be provided additional information on the risks to be reflected under this new item, an edit could be made.
4. We modified the definition of a SHS to clarify “normally modelled” in response to the ACLI comment and clarify what may be a SHS in response to Will Wilton’s comment (e.g., a single bond would not be a SHS). (6/17/2021 Added Emphasis: We would not consider a hedging strategy that is in the formative stages to be “normally modelled” just because of some sensitivity testing or other analysis as the hedging approach is formed. However, the determination of “normally modelled” appropriately requires judgment and is intended to encourage robust discussions with domestic regulators.)
We propose having consistent requirements for a CDHS in VM-20 and VM-21, as well as any future work on VM-22, and consolidating these requirements in the VM-01 definition of a CDHS. This involves adding two criteria to VM-21’s definition of CDHS that currently exist for VM-20:

- Areas where basis, gap or assumption risk related to the hedging strategy have been identified.
- The circumstances under which hedging strategy will not be effective in hedging the risks.

These criteria are both reasonable and apply in principle to VM-21, and to any future work on VM-22, as well as VM-20.

Further, we propose revising the requirement for hedging to be a CDHS in order for future hedging to be modeled under VM-20, VM-21, and LR027’s C-3 RBC Amount calculation to only apply when modeling such hedging reduces the life reserve level or variable annuity Total Asset Requirement (TAR) level.

The current regulatory requirements for hedging to be a CDHS in order for future hedging to be modeled under VM-20, modeled under VM-21, modeled for the C-3 RBC Amount calculation for variable annuities, and to be eligible for SSAP 108 treatment are all logical requirements when one considers whether hedging should be allowed to reduce the life reserve level or variable annuity TAR level, or whether any mismatch between movements in hedge assets and movements in the corresponding reserve levels should be allowed to be amortized over time.

However, this same requirement has led to a situation of there being unintended optionality in whether a hedging strategy that is like a CDHS is modeled or is not modeled, since a company may choose to satisfy or not satisfy certain of the criteria. This has been especially relevant for cases where modeling a company’s hedging strategy would increase reserves or variable annuity TAR.

As noted in the current guidance note in VM-20 Section 7.K.1 in the 2021 Valuation Manual:

“The prohibition in these modeled reserve requirements against projecting future hedging transactions other than those associated with a clearly defined hedging strategy is intended to address initial concerns expressed by various parties that reserves could be unduly reduced by reflection of programs whose future execution and performance may have greater uncertainty. The prohibition appears, however, to be in conflict with Principle 2 listed in VM-21. Companies may actually execute and reflect in their risk assessment and evaluation processes hedging strategies similar in many ways to clearly defined hedging strategies but lack sufficient clarity in one or more of the qualification criteria. By excluding the associated derivative instruments, the investment strategy that is modeled may also not reflect the investment strategy the company actually uses. Further, because the future hedging transactions may be a net cost to the company in some scenarios and a net benefit in other scenarios, the exclusion of such transactions can result in a modeled reserve that is either lower or higher than it would have been if the transactions were not excluded. The direction of such impact on the reserves could also change from period to period as the actual and projected paths of economic conditions change. A more graded approach to recognition of non-qualifying hedging strategies may be more theoretically consistent with Principle 2. It is recommended that as greater experience is gained by actuaries and state insurance regulators with the principle-based approach and as industry hedging programs mature, the various requirements of this section be reviewed.”

We propose to continue addressing the regulatory concern that reserves could be unduly reduced by reflection of programs whose future execution and performance may have greater uncertainty, by continuing to only allowing hedging strategies that qualify as a CDHS to reduce life reserves and variable annuity TAR. However, we propose that the treatment of CDHS be made more principles-based and less subject to manipulation. To accomplish this, the proposal requires that any hedging strategy that is a part
of the investment strategy supporting the policies and is normally modeled as part of the company’s risk assessment and evaluation processes be modeled as if it were a CDHS if doing so results in an increase in life reserves or variable annuity TAR.

That is, CDHS becomes a requirement solely for hedging strategies that reduce life reserves or variable annuity TAR, and so becomes a more clear regulatory guardrail requiring that hedging strategies that reduce life reserves or variable annuity TAR must be clearly defined.

We continue to need the concept of a CDHS. A CDHS simply formally documents items that a company should be able to document for a robust, well-defined hedging strategy. It requires that the following be identified:

- The specific risks being hedged (e.g., cash flow, policy interest credits, delta, rho, vega, etc.).
- The hedge objectives.
- The risks that are not hedged (e.g., variation from expected mortality, withdrawal, and other utilization or decrement rates assumed in the hedging strategy, etc.).
- The financial instruments used to hedge the risks.
- The hedge trading rules, including the permitted tolerances from hedging objectives.
- The metrics for measuring hedging effectiveness.
- The frequency of measuring hedging effectiveness.
- The conditions under which hedging will not take place.
- The person or persons responsible for implementing the hedging strategy.
- Areas where basis, gap or assumption risk related to the hedging strategy have been identified.
- The circumstances under which hedging strategy will not be effective in hedging the risks.

While the last two criteria have historically applied for life but not variable annuities, these are all reasonable documentation items that for a robust, well-defined hedging strategy regardless of whether the product is life or variable annuity.

The concept of a CDHS is used for accounting in SSAP 108. SSAP 108 allows companies to set up a deferred asset or liability to amortize the mismatch between changes in the value of the liability and changes in the value of the hedging instruments attributable to the hedged risk underlying a highly effective CDHS modeled for VM-21. Allowing this treatment encourages companies to reduce risk through robust, well-defined and highly effective hedging. Without having the hedging strategy be well-defined, regulators could not rely on past effectiveness being indicative of future effectiveness, and so could not offer companies the benefit of SSAP 108 treatment. Once we recognize the need for a concept of a well-defined hedging strategy, the only question is what criteria would need to be met to be considered well-defined—that is, what criteria should be required to be considered a CDHS. This is a distinct question from whether the concept of a CDHS is needed. We have not heard critiques of individual criteria in the CDHS definition, but consideration of the criteria is appropriate as we go forward to make the definitions in VM-20 and VM-21 consistent. Similarly, in reserve and capital calculations, we rely on the concept of historical effectiveness to determine an error factor. If modeling hedging reduces the reserve or capital amount, the error factor determines the magnitude to which this is reflected. However, this use of the historical effectiveness relies on the hedging strategy being well-documented and comparable between historical hedging and planned future hedging. So, again, a need for hedging strategies to be well-defined presents itself—a CDHS concept is needed.

Finally, edits to VM-31 are needed to reflect these updates and bring VM-20 and VM-21 reporting requirements more in line with one another where appropriate.
**Note on Coordination with RBC and APPM:** We have reviewed, and with these edits there are no corresponding edits necessary for LR027 for RBC but corresponding edits are necessary for SSAP 108. A referral to SAPWG is to be concurrently considered with this APF.

---

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**NAIC Staff Comments:**
The term “clearly defined hedging strategy” (CDHS) means a strategy undertaken by a company to manage risks through the future purchase or sale of hedging instruments and the opening and closing of hedging positions. A CDHS must identify:

- The specific risks being hedged (e.g., cash flow, policy interest credits, delta, rho, vega, etc.).
- The hedging objectives.
- The significant risks that are not hedged (e.g., variation from expected mortality, withdrawal, and other utilization or decrement rates assumed in the hedging strategy, etc.).
- The financial instruments used to hedge the risks.
- The metrics, criteria, and frequency for measuring hedging effectiveness.
- The conditions under which hedging will not take place.
- The group or area, including whether internal or external, responsible for implementing the hedging strategy.
- Areas where basis, gap or assumption risk related to the hedging strategy have been identified.
- The circumstances under which hedging strategy will not be effective in hedging the risks.

The hedging strategy may be dynamic, static or a combination thereof. A strategy involving the offsetting of the risks associated with products falling under the scope of different requirements within the Valuation Manual (e.g., VM-20, VM-21, or VM-22) does not qualify as CDHS.

Guidance Note: All of the principles outlined in VM-21 Section 1.B (particularly Principle 5) apply to the modeling of a CDHS.

The term “hedging transaction” means a derivative(s) transaction which is entered into and maintained to reduce:

- The risk of a change in the fair value or cash flow of assets and liabilities which the company has acquired or incurred or has a firm commitment to acquire or incur or for which the company has a forecasted acquisition or incurrence; or
- The currency exchange rate risk or the degree of foreign currency exposure in assets and liabilities which the company has acquired or incurred or has a firm commitment to acquire or incur or for which the company has forecasted acquisition or incurrence.

The term “Seasoned Hedging Strategy” (SHS) means a hedging strategy that is part of the company’s investment strategy and for which future hedging transactions are normally modeled as part of any of the company’s risk assessment and evaluation processes. A SHS may or may not be a CDHS.

The hedging strategy may be dynamic, static, or a combination thereof. A strategy involving the offsetting of the risks associated with products falling under the scope of different requirements within the Valuation Manual (e.g., VM-20, VM-21, or VM-22) does not qualify as SHS.

Guidance Note: All of the principles outlined in VM-21 Section 1.B (particularly Principle 5) apply to the modeling of a SHS.
VM-20 Section 6.A.1.b

A company may not exclude a group of policies for which there is one or more CDHS or one or more SHS required to be modeled pursuant to Section 7.K.4 from stochastic reserve requirements, except in the case where all CDHS and all SHS required to be modeled pursuant to Section 7.K.4 are solely associated with product features that are determined to not be material under Section 7.B.1 due to low utilization.

VM-20 Section 7.E.1.g

Notwithstanding the above requirements, the modeled reserve shall be the higher of that produced by the model investment strategy and that produced by substituting an alternative investment strategy in which the fixed income reinvestment assets have the same weighted average life (WAL) as the reinvestment assets in the model investment strategy and are all public non-callable corporate bonds with gross asset spreads, asset default costs and investment expenses by projection year that are consistent with a credit quality blend of 50% PBR credit rating 6 (A2/A) and 50% PBR credit rating 3 (Aa2/AA).

Policy loans, equities and derivative instruments associated with the execution of a CDHS (in compliance with the definition of CDHS in VM-01) or a SHS that is required to be modeled pursuant to Section 7.K.4 are not affected by this requirement.

VM-20 Section 7.K

K. Modeling of Derivative Programs

1. When determining the deterministic reserve and the stochastic reserve, the company shall include in the projections the appropriate costs and benefits of derivative instruments that are currently held by the company in support of the policies subject to these requirements. The company shall also include the appropriate costs and benefits of anticipated future derivative instrument transactions associated with the execution of a CDHS or a SHS that is required to be modeled pursuant to Section 7.K.4, as well as the appropriate costs and benefits of anticipated future derivative instrument transactions associated with non-hedging derivative programs (e.g., replication, income generation) undertaken as part of the investment strategy supporting the policies, provided they are normally modeled as part of the company’s risk assessment and evaluation processes.

2. For each derivative program that is modeled, the company shall reflect the company’s established investment policy and procedures for that program; project expected program performance along each scenario; and recognize all benefits, residual risks and associated frictional costs. The residual risks include, but are not limited to: basis, gap, price, parameter estimation and variation in assumptions (mortality, persistency, withdrawal, etc.). Frictional costs include, but are not limited to: transaction, margin (opportunity costs associated with margin requirements) and administration. For CDHS or SHS required to be modeled pursuant to Section 7.K.4, the company may not assume that residual risks and frictional costs have a value of zero, unless the company demonstrates in the PBR Actuarial Report that “zero” is an appropriate expectation.

1. In circumstances where one or more material risk factors related to a derivative program are not fully captured within the cash-flow model used to calculate CTE 70, the company shall reflect such risk factors by increasing the stochastic reserve as described in Section 8.E.
4. If a SHS supporting the policies is not a CDHS but modeling it would result in a material increase to the company’s minimum reserve, then the company shall model the SHS as if it were a CDHS when calculating reserves under VM-20. In addition, if modeling the SHS as if it were a CDHS would result in a decrease in the company’s minimum reserve, the company may provide the documentation required for the SHS to be a CDHS as defined in VM-01 and then model the SHS as a CDHS.

**Guidance Note:** The intent of reflecting SHS is not to penalize any hedging strategies, but rather to reflect the company’s investment strategy and risk management strategies, including all material established hedging strategies supporting the policies, while requiring CDHS documentation for any such hedging strategies that reduce the minimum reserve.

**VM-20 Section 7.L (Remove entire Section 7.L)**

**Guidance Note:** For purposes of the above criteria, “effectiveness” need not be measured in a manner as defined in SSAP No. 86—Derivatives in the AP&P Manual.
VM-21 Section 1.D.2 (Delete entire definition and renumber subsequent sections VM-21 Section 1.D.3 and VM-21 Section 1.D.4)

VM-21 Section 4.A.4

Modeling of Hedges

a. For a company that does not have a CDHS or a SHS that is required to be modeled pursuant to Section 9.A.6:
   i. The company shall not consider the cash flows from any future hedge purchases or any rebalancing of existing hedge assets in its modeling.
   ii. Existing hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the starting assets. The hedge assets may then be considered in one of two ways:
      a) Include the asset cash flows from any contractual payments and maturity values in the projection model; or
      b) No hedge positions – in which case the hedge positions held on the valuation date are replaced with cash and/or other general account assets in an amount equal to the aggregate market value of these hedge positions.

Guidance Note: If the hedge positions held on the valuation date are replaced with cash, then as with any other cash, such amounts may then be invested following the company’s investment strategy.

A company may switch from method a) to method b) at any time, but it may only change from b) to a) with the approval of the domiciliary commissioner.

b. For a company following one or more CDHS or one or more SHS that are required to be modeled pursuant to Section 9.A.6, the detailed requirements for the modeling of hedges are defined in Section 9. The following paragraphs are a high-level summary and do not supersede the detailed requirements.
   i. The appropriate costs and benefits of hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the projections used in the determination of the stochastic reserve.
   ii. The projections shall take into account the appropriate costs and benefits of hedge positions expected to be held in the future through the execution of a CDHS or a SHS that is required to be modeled pursuant to Section 9.A.6. Because models do not always accurately portray the results of hedge programs, the company shall, through back-testing and other means, assess the accuracy of the hedge modeling. The company shall determine a stochastic reserve as the weighted average of two CTE values; first, a CTE70 (“best efforts”) representing the company’s projection of all of the hedge cash flows, including future hedge purchases, and a second CTE70 (“adjusted”) which shall use only hedge assets held by the company on the valuation date and no future hedge purchases. These are discussed in greater detail in Section 9. The stochastic reserve shall be the weighted average of the two CTE70 values, where the weights reflect the error factor (E) determined following the guidance of Section 9.C.4.
iii. The company is responsible for verifying compliance with CDHS requirements, or SHS requirements if required to be modeled pursuant to Section 9.A.6, and any other requirements in Section 9 for all hedging instruments included in the projections.

iv. The use of products not falling under the scope of these requirements (e.g., equity-indexed annuities) as a hedge shall not be recognized in the determination of accumulated deficiencies.

VM-21 Section 4.D.4.b

Notwithstanding the above requirements, the model investment strategy and any non-prescribed asset spreads shall be adjusted as necessary so that the aggregate reserve is not less than that which would be obtained by substituting an alternative investment strategy in which all fixed income reinvestment assets are public non-callable corporate bonds with gross asset spreads, asset default costs, and investment expenses by projection year that are consistent with a credit quality blend of 50% PBR credit rating 6 (A2/A) and 50% PBR credit rating 3 (Aa2/AA).

Policy loans, equities and derivative instruments associated with the execution of a CDHS (in compliance with the definition of CDHS in VM-01) or a SHS that is required to be modeled pursuant to Section 9.A.6 are not affected by this requirement.

VM-21 Section 6.B.3.a.ii – Footnote (Footnote at Bottom of Page 21-22)

Throughout this Section 6, references to CTE70 (adjusted) shall also mean the Stochastic Reserve for a company that does not have a CDHS or a SHS that is required to be modeled pursuant to Section 9.A.6 as discussed in Section 4.A.4.a.

VM-21 Section 6.B.3.b.ii

Calculate the Prescribed Projections Amount as the CTE70 (adjusted) using the same method as that outlined in Section 9.C (which is the same as the stochastic reserves following Section 4.A.4.a for a company that does not have a CDHS or a SHS that is required to be modeled pursuant to Section 9.A.6) but substituting the assumptions prescribed by Section 6.C. The calculation of this Prescribed Projections Amount also requires that the scenario reserve for any given scenario be equal to or in excess of the cash surrender value in aggregate on the valuation date for the group of contracts modeled in the projection.

VM-21 Section 6.B.5

Cash flows associated with hedging shall be projected in the same manner as that used in the calculation of the CTE70 (adjusted) as discussed in Section 9.C or Section 4.A.4.a for a company without a CDHS or a SHS that is required to be modeled pursuant to Section 9.A.6.

VM-21 Section 9

Section 9: Modeling of Hedges under a CDHS
A. Initial Considerations

1. Subject to Section 9.C.2, the appropriate costs and benefits of hedging instruments that are currently held by the company in support of the contracts falling under the scope of these requirements shall be included in the calculation of the stochastic reserve, determined in accordance with Section 3.D and Section 4.D.

2. If the company is following one or more CDHS, in accordance with an investment policy adopted by the board of directors, or a committee of board members, the company shall take into account the costs and benefits of hedge positions expected to be held by the company in the future along each scenario based on the execution of the hedging strategy, and it is eligible to reduce the amount of the stochastic reserve using projections otherwise calculated. The investment policy must clearly articulate the company’s hedging objectives, including the metrics that drive rebalancing/trading. This specification could include maximum tolerable values for investment losses, earnings, volatility, exposure, etc. in either absolute or relative terms over one or more investment horizons vis-à-vis the chance of occurrence. Company management is responsible for developing, documenting, executing and evaluating the investment strategy, including the hedging strategy, used to implement the investment policy.

3. For this purpose, the investment assets refer to all the assets, including derivatives supporting covered products and guarantees. This also is referred to as the investment portfolio. The investment strategy is the set of all asset holdings at all points in time in all scenarios. The hedging portfolio, which also is referred to as the hedging assets, is a subset of the investment assets. The hedging strategy is the hedging asset holdings at all points in time in all scenarios. There is no attempt to distinguish what is the hedging portfolio and what is the investment portfolio in this section. Nor is the distinction between investment strategy and hedging strategy formally made here. Where necessary to give effect to the intent of this section, the requirements applicable to the hedging portfolio or the hedging strategy are to apply to the overall investment portfolio and investment strategy.

4. This particularly applies to restrictions on the reasonableness or acceptability of the models that make up the stochastic cash-flow model used to perform the projections, since these restrictions are inherently restrictions on the joint modeling of the hedging and non-hedging portfolio. To give effect to these requirements, they must apply to the overall investment strategy and investment portfolio.

5. Before either a new or revised hedging strategy can be used to reduce the amount of the stochastic reserve otherwise calculated, the hedging strategy should be in place (i.e., effectively implemented by the company) for at least three months. The company may meet the time requirement by having evaluated the effective implementation of the hedging strategy for at least three months without actually having executed the trades indicated by the hedging strategy (e.g., mock testing or by having effectively implemented the strategy with similar annuity products for at least three months).

6. If a SHS supporting the contracts is not a CDHS but modeling it as if it were a CDHS would result in a material increase in the company’s TAR, then the company shall model the SHS as a CDHS when calculating reserves under AG43 and/or VM-21 and when calculating the C-3 RBC Amount under LR027. In addition, if modeling the SHS as if it were a CDHS would result in a decrease in the company’s TAR, the company may provide the documentation required for the SHS to be a CDHS as defined in VM-01 and then model the SHS as a CDHS when calculating reserves under AG43 and/or VM-21 and when calculating the C-3 RBC Amount under LR027. The company shall not treat a SHS as a CDHS for purposes of SSAP 108 without providing the documentation required for the SHS to be a CDHS as defined in VM-01.

Guidance Note: The intent of reflecting SHS is not to penalize any hedging strategies, but rather to reflect the company’s investment strategy and risk management strategies, including all material established...
B. Modeling Approaches

1. The analysis of the impact of the hedging strategy on cash flows is typically performed using either one of two types of methods as described below. Although a hedging strategy normally would be expected to reduce risk provisions, the nature of the hedging strategy and the costs to implement the strategy may result in an increase in the amount of the stochastic reserve otherwise calculated.

2. The fundamental characteristic of the first type of method, referred to as the “explicit method,” is that hedging positions and their resulting cash flows are included in the stochastic cash-flow model used to determine the scenario reserve, as discussed in Section 3.D, for each scenario.

3. The fundamental characteristic of the second type of method, referred to as the “implicit method,” is that the effectiveness of the current hedging strategy on future cash flows is evaluated, in part or in whole, outside of the stochastic cash-flow model. There are multiple ways that this type of modeling can be implemented. In this case, the reduction to the stochastic reserve otherwise calculated should be commensurate with the degree of effectiveness of the hedging strategy in reducing accumulated deficiencies otherwise calculated.

4. Regardless of the methodology used by the company, the ultimate effect of the current hedging strategy (including currently held hedge positions) on the stochastic reserve needs to recognize all risks, associated costs, imperfections in the hedges and hedging mismatch tolerances associated with the hedging strategy. The risks include, but are not limited to: basis, gap, price, parameter estimation and variation in assumptions (mortality, persistency, withdrawal, annuitization, etc.). Costs include, but are not limited to: transaction, margin (opportunity costs associated with margin requirements) and administration. In addition, the reduction to the stochastic reserve attributable to the hedging strategy may need to be limited due to the uncertainty associated with the company’s ability to implement the hedging strategy in a timely and effective manner. The level of operational uncertainty varies indirectly with the amount of time that the new or revised strategy has been in effect or mock tested.

Guidance Note: No hedging strategy is perfect. A given hedging strategy may eliminate or reduce some but not all risks, transform some risks into others, introduce new risks, or have other imperfections. For example, a delta-only hedging strategy does not adequately hedge the risks measured by the “Greeks” other than delta. Another example is that financial indices underlying typical hedging instruments typically do not perform exactly like the separate account funds, and hence the use of hedging instruments has the potential for introducing basis risk.

5. A safe harbor approach is permitted for CDHS reflection for those companies whose modeled hedge assets comprise only linear instruments not sensitive to implied volatility. For companies with option-based hedge strategies, electing this approach would require representing the option-based portion of the strategy as a delta-rho two-Greek hedge program. The normally modeled option portfolio would be replaced with a set of linear instruments that have the same first-order Greeks as the original option portfolio.

C. Calculation of Stochastic Reserve (Reported)

1. The company shall calculate CTE70 (best efforts)—the results obtained when the CTE70 is based on incorporating the CDHS (including both currently held and future hedge positions) into the stochastic cash-flow model on a best efforts basis, including all of the factors and assumptions needed to execute the CDHS...
(e.g., stochastic implied volatility). The determination of CTE70 (best efforts) may utilize either explicit or implicit modeling techniques.

2. The company shall calculate a CTE70 (adjusted) by recalculating the CTE70 assuming the company has no CDHS, therefore following the requirements of Section 4.A.4.a.

3. Because most models will include at least some approximations or idealistic assumptions, CTE70 (best efforts) may overstate the impact of the hedging strategy. To compensate for potential overstatement of the impact of the hedging strategy, the value for the stochastic reserve is given by:

\[ \text{Stochastic reserve} = \text{CTE70 (best efforts)} + E \times \max[0, \text{CTE70 (adjusted)} - \text{CTE70 (best efforts)}] \]

4. The company shall specify a value for \( E \) (the “error factor”) in the range from 5% to 100% to reflect the company’s view of the potential error resulting from the level of sophistication of the stochastic cash-flow model and its ability to properly reflect the parameters of the hedging strategy (i.e., the Greeks being covered by the strategy), as well as the associated costs, risks and benefits. The greater the ability of the stochastic model to capture all risks and uncertainties, the lower the value of \( E \). The value of \( E \) may be as low as 5% only if the model used to determine the CTE70 (best efforts) effectively reflects all of the parameters used in the hedging strategy. If certain economic risks are not hedged, yet the model does not generate scenarios that sufficiently capture those risks, \( E \) must be in the higher end of the range, reflecting the greater likelihood of error. Likewise, simplistic hedge cash-flow models shall assume a higher likelihood of error.

5. The company shall conduct a formal back-test, based on an analysis of at least the most recent 12 months, to assess how well the model is able to replicate the hedging strategy in a way that supports the determination of the value used for \( E \).

6. Such a back-test shall involve one of the following analyses:

a. For companies that model hedge cash flows directly (“explicit method”), replace the stochastic scenarios used in calculating the CTE70 (best efforts) with a single scenario that represents the market path that actually manifested over the selected back-testing period and compare the projected hedge asset gains and losses against the actual hedge asset gains and losses – both realized and unrealized – observed over the same time period. For this calculation, the model assumptions may be replaced with parameters that reflect actual experience during the back-testing period. In order to isolate the comparison between the modeled hedge strategy and actual hedge results for this calculation, the projected liabilities should accurately reflect the actual liabilities throughout the back-testing period; therefore, adjustments that facilitate this accuracy (e.g. reflecting actual experience instead of model assumptions, including new business, etc.) are permissible.

To support the choice of a low value of \( E \), the company should ascertain that the projected hedge asset gains and losses are within close range of 100% (e.g., 80–125%) of the actual hedge asset gains and losses. The company may also support the choice of a low value of \( E \) by achieving a high R-squared (e.g., 0.80 or higher) when using a regression analysis technique.

b. For companies that model hedge cash flows implicitly by quantifying the cost and benefit of hedging using the fair value of the hedged item (an “implicit method” or “cost of reinsurance method”), calculate the delta, rho and vega coverage ratios in each month over the selected back-testing period in the following manner:

i. Determine the hedge asset gains and losses—both realized and unrealized—incurred over the month attributable to equity, interest rate, and implied volatility movements.
ii. Determine the change in the fair value of the hedged item over the month attributable to equity, interest rate, and implied volatility movements. The hedged item should be defined in a manner that reflects the proportion of risks hedged (e.g., if a company elects to hedge 50% of a contract’s market risks, it should quantify the fair value of the hedged item as 50% of the fair value of the contract).

iii. Calculate the delta coverage ratio as the ratio between (i) and (ii) attributable to equity movements.

iv. Calculate the rho coverage ratio as the ratio between (i) and (ii) attributable to interest rate movements.

v. Calculate the vega coverage ratio as the ratio between (i) and (ii) attributable to implied volatility movements.

vi. To support the company’s choice of a low value of E, the company should be able to demonstrate that the delta and rho coverage ratios are both within close range of 100% (e.g., 80–125%) consistently across the back-testing period.

vii. In addition, the company should be able to demonstrate that the vega coverage ratio is within close range of 100% in order to use the prevailing implied volatility levels as of the valuation date in quantifying the fair value of the hedged item for the purpose of calculating CTE70 (best efforts). Otherwise, the company shall quantify the fair value of the hedged item for the purpose of calculating CTE70 (best efforts) in a manner consistent with the realized volatility of the scenarios captured in the CTE (best efforts).

c. Companies that do not model hedge cash flows explicitly, but that also do not use the implicit method as outlined in Section 9.C.6.b above, shall conduct the formal back-test in a manner that allows the company to clearly illustrate the appropriateness of the selected method for reflecting the cost and benefit of hedging, as well as the value used for E.

7. A company that does not have 12 months of experience to date shall set E to a value that reflects the amount of experience available, and the degree and nature of any change to the hedge program. For a material change in strategy, with no history, E should be at least 0.50. However, E may be lower than 0.50 if some reliable experience is available and/or if the change in strategy is a refinement rather than a substantial change in strategy.

Guidance Note: The following examples are provided as guidance for determining the E factor when there has been a change to the hedge program:

- The error factor should be temporarily large (e.g., ≥ 50%) for substantial changes in hedge methodology (e.g., moving from a fair-value based strategy to a stop-loss strategy) where the company has not been able to provide a meaningful simulation of hedge performance based on the new strategy.
- A temporary moderate increase (e.g., 15–30%) in error factor should be used for substantial modifications to hedge programs or CDHS modeling where meaningful simulation has not been created (e.g., adding second-order hedging, such as gamma or rate convexity).
- No increase in the error factor may be used for incremental modifications to the hedge strategy (e.g., adding death benefits to a program that previously covered only living benefits, or moving from swaps to Treasury Department futures).

D. Additional Considerations for CTE70 (best efforts)

If the company is following a CDHS, the fair value of the portfolio of contracts falling within the scope of these requirements shall be computed and compared to the CTE70 (best efforts) and CTE70 (adjusted). If the CTE70 (best efforts) is below both the fair value and CTE70 (adjusted), the company should be prepared to explain why that result is reasonable.
For the purposes of this analysis, the stochastic reserve and fair value calculations shall be done without requiring the scenario reserve for any given scenario to be equal to or in excess of the cash surrender value in aggregate for the group of contracts modeled in the projection.

E. Specific Considerations and Requirements

1. As part of the process of choosing a methodology and assumptions for estimating the future effectiveness of the current hedging strategy (including currently held hedge positions) for purposes of reducing the stochastic reserve, the company should review actual historical hedging effectiveness. The company shall evaluate the appropriateness of the assumptions on future trading, transaction costs, other elements of the model, the strategy, the mix of business and other items that are likely to result in materially adverse results. This includes an analysis of model assumptions that, when combined with the reliance on the hedging strategy, are likely to result in adverse results relative to those modeled. The parameters and assumptions shall be adjusted (based on testing contingent on the strategy used and other assumptions) to levels that fully reflect the risk based on historical ranges and foreseeable future ranges of the assumptions and parameters. If this is not possible by parameter adjustment, the model shall be modified to reflect them at either anticipated experience or adverse estimates of the parameters.

2. A discontinuous hedging strategy is a hedging strategy where the relationships between the sensitivities to equity markets and interest rates (commonly referred to as the Greeks) associated with the guaranteed contract holder options embedded in the variable annuities and other in-scope products and these same sensitivities associated with the hedging assets are subject to material discontinuities. This includes, but is not limited to, a hedging strategy where material hedging assets will be obtained when the variable annuity account balances reach a predetermined level in relationship to the guarantees. Any hedging strategy, including a delta hedging strategy, can be a discontinuous hedging strategy if implementation of the strategy permits material discontinuities between the sensitivities to equity markets and interest rates associated with the guaranteed contract holder options embedded in the variable annuities and other in-scope products and these same sensitivities associated with the hedging assets. There may be scenarios that are particularly costly to discontinuous hedging strategies, especially where those result in large discontinuous changes in sensitivities (Greeks) associated with the hedging assets. Where discontinuous hedging strategies contribute materially to a reduction in the stochastic reserve, the company must evaluate the interaction of future trigger definitions and the discontinuous hedging strategy, in addition to the items mentioned in the previous paragraph. This includes an analysis of model assumptions that, when combined with the reliance on the discontinuous hedging strategy, may result in adverse results relative to those modeled.

3. A strategy that has a strong dependence on acquiring hedging assets at specific times that depend on specific values of an index or other market indicators may not be implemented as precisely as planned.

4. The combination of elements of the stochastic cash-flow model—including the initial actual market asset prices, prices for trading at future dates, transaction costs and other assumptions—should be analyzed by the company as to whether the stochastic cash-flow model permits hedging strategies that make money in some scenarios without losing a reasonable amount in some other scenarios. This includes, but is not limited to:
   a. Hedging strategies with no initial investment that never lose money in any scenario and in some scenarios make money.
   b. Hedging strategies that, with a given amount of initial money, never make less than accumulation at the one-period risk-free rates in any scenario but make more than this in one or more scenarios.

5. If the stochastic cash-flow model allows for such situations, the company should be satisfied that the results do not materially rely directly or indirectly on the use of such strategies. If the results do materially rely directly or indirectly on the use of such strategies, the strategies may not be used to reduce the stochastic reserve otherwise calculated.
6. In addition to the above, the method used to determine prices of financial instruments for trading in scenarios should be compared to actual initial market prices. In addition to comparisons to initial market prices, there should be testing of the pricing models that are used to determine subsequent prices when scenarios involve trading financial instruments. This testing should consider historical relationships. For example, if a method is used where recent volatility in the scenario is one of the determinants of prices for trading in that scenario, then that model should approximate actual historic prices in similar circumstances in history.

VM-31 Section 3.C.5

**Assets and Risk Management** – A brief description of the asset portfolio, and the approach used to model risk management strategies, such as hedging, and other derivative programs, including a description of any CDHS and any SHS that is required to be modeled pursuant to VM-20 Section 7.K.4.

VM-31 Section 3.D.6.f

**Risk Management** – Detailed description of model risk management strategies, such as hedging and other derivative programs specific to the groups of policies covered in this sub-report and not discussed in the Life Summary Section 3.C.5. This should include documentation for any hedging strategy that meets the requirements to be a CDHS. It should also include, for any SHS that is not a CDHS, documentation of any CDHS criteria met, listing of CDHS criteria not met, and documentation of the impact on minimum reserves of the SHS being modeled as if it were a CDHS. In particular, such documentation should address the directional impact on minimum reserves and whether the impact is material.

a. **Investment Officer on Investments** – A certification from a duly authorized investment officer that the modeled company investment strategy, including any CDHS and any SHS that is required to be modeled pursuant to VM-20 Section 7.K.4, is representative of and consistent with the company’s investment policy.

b. **Qualified Actuary on Investments** – A certification by a qualified actuary, not necessarily the same qualified actuary that has been assigned responsibility for the PBR Actuarial Report or this sub-report, that the modeling of any CDHS and any SHS that is required to be modeled pursuant to VM-20 Section 7.K.4 was performed in accordance with VM-20 and in compliance with all applicable ASOPs, and the alternative investment strategy as defined in VM-20 Section 7.E.1.g reflects the prescribed mix of assets with the same WAL as the reinvestment assets in the company investment strategy.

VM-31 Section 3.E.5

**Assets and Risk Management** – A brief description of the general account asset portfolio, and the approach used to model risk management strategies, such as hedging and other derivative programs, including a description of any CDHS or any SHS that is required to be modeled pursuant to VM-21 Section 9.A.5, and any material changes to the hedging strategy from the prior year.
VM-31 Section 3.F.8

Hedging and Risk Management – The following information regarding the hedging and risk management assumptions used by the company in performing a principle-based valuation under VM-21:

a. Strategies – Detailed description of risk management strategies, such as hedging and other derivative programs, including any CDHS or any SHS that is required to be modeled pursuant to VM-21 Section 9.A.6, specific to the groups of contracts covered in this sub-report.
   i. Descriptions of basis risk, gap risk, price risk and assumption risk.
   ii. Methods and criteria for estimating the a priori effectiveness of the strategy.
   iii. Results of any reviews of actual historical hedging effectiveness.

b. CDHS – Documentation for any hedging strategy that meets the requirements to be a CDHS.

c. Other Modeled Hedging Strategies – Documentation for any SHS that is not a CDHS, including documentation of any CDHS criteria met, listing of CDHS criteria not met, and documentation of the impact on TAR of the SHS being modeled as if it were a CDHS. In particular, such documentation should address the directional impact on TAR and whether the impact is material.

d. Strategy Changes – Discussion of any changes to the hedging strategy during the past 12 months, including identification of the change, reasons for the change, and the implementation date of the change.

e. Hedge Modeling – Description of how the hedge strategy was incorporated into modeling, including:
   i. Differences in timing between model and actual strategy implementation.
   ii. For a company that does not have a CDHS or a SHS that is required to be modeled pursuant to VM-21 Section 9.A.6, disclosure of the method used to consider hedge assets included in the starting assets, either (1) including the asset cash flows in the projection model; or (2) replacing the hedge positions with cash and/or other general account assets in an amount equal to the market value of the hedge positions, as discussed in VM-21 Section 4.A.4.a.
   iii. Evaluations of the appropriateness of the assumptions on future trading, transaction costs, other elements of the model, the strategy, and other items that are likely to result in materially adverse results.
   iv. If residual risks and frictional costs are assumed to have a value of zero, a demonstration that a value of zero is an appropriate expectation.
   v. Any discontinuous hedging strategies modeled, and where such discontinuous hedging strategies contribute materially to a reduction in the stochastic reserve, any evaluations of the interaction of future trigger definitions and the discontinuous hedging strategy, including any analyses of model assumptions that, when combined with the reliance on the discontinuous hedging strategy, may result in adverse results relative to those modeled.
   vi. Disclosure of any situations where the modeled hedging strategies make money in some scenarios without losing a reasonable amount in some other scenarios, and an explanation of why the situations are not material for determining the CTE 70 (best efforts).
   vii. Results of any testing of the method used to determine prices of financial instruments for trading in scenarios against actual initial market prices, including how the testing considered historical relationships. If there are substantial discrepancies, disclosure of the substantial discrepancies and documentation as to why the model-based prices are appropriate for determining the stochastic reserve.
   viii. Any model adjustments made when calculating CTE 70 (adjusted), in particular, any liquidation or substitution of assets for currently held hedges.

e. Error Factor (E) and Back-Testing – Description of E, the error factor, and formal back-tests performed, including:
i. The value of \( E \), and the approach and rationale for the value of \( E \) used in the reserve calculation.

ii. For companies that model hedge cash flows using the explicit method, as described in VM-21 Section 9.C.6.a, and have 12 months of experience, an analysis of at least the most recent 12 months of experience and the results of a back-test showing that the model is able to replicate the hedging results experienced in a way that justifies the value used for \( E \). Include at least a ratio of the actual change in market value of the hedges to the modeled change in market value of the hedges at least quarterly.

iii. For companies that model hedge cash flows using the implicit method, and have 12 months of experience, as described in VM-21 Section 9.C.6.b, the results of a back-test in which (a) actual hedge asset gains and losses are compared against (b) proportional fair value movements in hedged liability, including:
   a) Delta, rho and vega coverage ratios in each month over the back-testing period, which may be presented in a chart or graph.
   b) The implied volatility level used to quantify the fair value of the hedged item, as well as the methodology undertaken to determine the appropriate level used.

iv. For companies that do not model hedge cash flows using either the explicit method or the implicit method, as described in VM-21 Section 9.C.6.c, and have 12 months of experience, the results of the formal back-test conducted to validate the appropriateness of the selected method and value used for \( E \).

v. For companies that do not have 12 months of experience, the basis for the value of \( E \) is chosen based on the guidance provided in VM-21 Section 9.C.7, considering the actual history available and the degree and nature of any changes made to the hedge strategy.

f. Safe Harbor for CDHS – If electing the safe harbor approach for CDHS, as discussed in VM-21 Section 9.C.8, a description of the linear instruments used to model the option portfolio.

g. Hedge Model Results – Disclosure of whether the calculated CTE 70 (best efforts) is below both the fair value and CTE 70 (adjusted), and if so, justification for why that result is reasonable, as discussed in VM-21 Section 9.D.

VM-31 Section 3.F.12.c

CTEPA – If using the CTEPA method, a summary including:

i. Disclosure (in tabular form) of the scenario reserves using the same method and assumptions as those used by the company to calculate CTE 70 (adjusted) as outlined in VM-21 Section 9.C (or the stochastic reserves following VM-21 Section 4.A.4.a for a company that does not have a CDHS or a SHS that is required to be modeled pursuant to VM-21 Section 9.A.6), as well as the corresponding scenarios reserves substituting the assumptions prescribed by VM-21 Section 6.C.

ii. Summary of results from a cumulative decrement projection along the scenario whose reserve value is closest to the CTE 70 (adjusted), as outlined in VM-21 Section 9.C (or the stochastic reserves following VM-21 Section 4.A.4.a for a company that does not have a CDHS or a SHS that is required to be modeled pursuant to VM-21 Section 9.A.6), under the assumptions outlined in VM-21 Section 6.C. Such a cumulative decrement projection shall include, at the end of each projection year, the projected proportion (expressed as a percent of the total projected account value) of persisting contracts as well as the allocation of projected decrements across death, full surrender, account value depletion, elective annuitization, and other benefit election.
iii. Summary of results from a cumulative decrement projection, identical to (ii) above, but replacing all assumptions outlined in VM-21 Section 6.C with the corresponding assumptions used in calculating the stochastic reserve.

VM-31 Section 3.F.16.a and Section 3.F.16.b

a. Investment Officer on Investments – A certification from a duly authorized investment officer that the modeled asset investment strategy, including any CDHS and any SHS that is required to be modeled pursuant to VM-21 Section 9.A.6, is consistent with the company’s current investment strategy except where the modeled reinvestment strategy may have been substituted with the alternative investment strategy, and also any CDHS meets the requirements of a CDHS.

b. Qualified Actuary on Investments – A certification by a qualified actuary, not necessarily the same qualified actuary, that has been assigned responsibility for the PBR Actuarial Report or this sub-report, that the modeling of any CDHS and any SHS that is required to be modeled pursuant to VM-21 Section 9.A.6 was performed in accordance with VM-21 and in compliance with all applicable ASOPs.
June 14, 2021

Mr. Mike Boerner
Chair, Life Actuarial (A) Task Force
National Association of Insurance Commissioners

Re: APF 2019-34

Dear Mr. Boerner,

The Life Reserves Work Group (LRWG) of the American Academy of Actuaries\(^1\) is pleased to have the opportunity to submit the following comments regarding exposed amendment proposal form (APF) 2019-34. This APF, as written, would require that the Appointed Actuary for a ceding insurer subject to the Standard Valuation Law (SVL) either perform Asset Adequacy Analysis Testing (AAT) on amounts ceded under reinsurance or provide results of AAT performed by the company’s reinsurer for the subject reinsured business.

APF 2019-34 explicitly notes that it is not sufficient to merely rely on an actuarial opinion of the reinsurer’s actuary that ceded reserves are adequate. It implicitly addresses situations where the regulatory jurisdiction of the reinsurer is one where AAT may not be required. The APF also states that a zero net reported reserve by the ceding company is not sufficient to “foreclose the need” for AAT on such reinsured business.

The LRWG agrees that it is appropriate for the actuary to consider the amounts ceded under reinsurance when forming an opinion on the adequacy of the net reserves being reported. However, we are concerned with LATF adopting the APF because we have the following concerns that have technical, regulatory, and practical implications:

1. We believe the Valuation Manual already provides the regulator with the authority under VM-30 Section 1.A.3 to require support for the reserve adequacy opinion.

“The AOM requirements shall be applied in a manner that allows the appointed actuary to use his or her professional judgment in performing the actuarial analysis and developing the actuarial opinion and supporting actuarial memoranda, conforming to relevant ASOPs. However, a state commissioner has the authority to specify methods of analysis and assumptions when, in the commissioner’s judgment, these specifications are necessary for the actuary to render an acceptable opinion relative to the adequacy of reserves and related actuarial items.”

\(^{1}\) The American Academy of Actuaries is a 19,500-member professional association whose mission is to serve the public and the U.S. actuarial profession. For more than 50 years, the Academy has assisted public policymakers on all levels by providing leadership, objective expertise, and actuarial advice on risk and financial security issues. The Academy also sets qualification, practice, and professionalism standards for actuaries in the United States.
2. If ceding company actuaries provide results of AAT performed by one or more of the company’s reinsurer(s) for the reinsured business, we question whether this additional documentation would provide the regulator with comfort that the ceded reserves are adequate. There could be diversity in local regulations, accounting regimes, and applicable actuarial standards of practice (ASOPs), between a US domiciled cedant and a non-US domiciled reinsurer. Regardless of jurisdiction, there is likely to be diversity in the mix of business on the counterparties’ respective balance sheets potentially resulting in different AAT conclusions. There could also be potential diversity in actuarial assumptions. For example, the challenge in establishing similar assumptions among different actuaries on a block of reinsured business has already been recognized, which led to the yearly renewable term (YRT) field test.

3. It may be possible for ceding company actuaries to perform AAT “gross of reinsurance” without speculative assumption setting for some modified coinsurance and funds withheld coinsurance business, because the reinsurance agreement could specify the assumptions used for valuing the business. Otherwise, performing AAT “gross of reinsurance” might involve speculative assumption setting for “hypothetical assets,” policyholder behavior, or other assumptions assuming a hypothetical recapture of reinsurance.

4. ASOPs Nos. 7, 22, 28, and 41; the current version of ASOP No. 11; the revised ASOP No. 11 (effective December 1, 2022) and others require the actuary to consider and document how these elements were considered.

5. Finally, the proposed APF appears to require AAT regardless of the materiality of the impact of the ceded reserves on the cedent.

In summary, the LRWG believes that there would be technical challenges associated with the implementation of the APF. In addition, the ASOPs already require the actuary to consider and document elements that could impact the adequacy of the net reserves reported, and VM-30 already provides the regulators with the authority to require additional information to gain comfort with the adequacy of the net reserves being reported. Therefore, the LRWG has concern with the adoption of this APF.

Thank you for your consideration. Please contact Academy life policy analyst Khloe Greenwood (greenwood@actuary.org) with any questions.

Senior Actuary  

June 14, 2021  

Mr. Mike Boerner  
Chair, NAIC Life Actuarial (A) Task Force (LATF)  

Re: ACLI Comments on APF 2019-34  

Dear Mr. Boerner:  

The American Council of Life Insurers (ACLI) appreciates the opportunity to provide comments on APF 2019-34.  

Our understanding is that the APF is intended to address situations in which the appointed actuary does not appear to consider all material aspects of their reinsured business (both ceded and assumed) when providing their Statement of Actuarial Opinion (SAO). While we support clarification on the role of the appointed actuary in these circumstances, we do not support this APF because it seemingly creates onerous requirements for appointed actuaries and will produce unreliable results for regulators.  

While actuaries are currently subject to existing requirements and guidance in the performance of asset adequacy analysis and the preparation of the SAO, industry supports enhancements which enable the appointed actuary and regulator to reliably analyze and mitigate risks. Thus, ACLI supports a further discussion of the specific risks that regulators are seeking to mitigate, and how the APF could be worded to address these risks, increase transparency, and affirm appropriate risk mitigation actions.  

Principles around SAO responsibilities  

The Standard Valuation Law imposes certain responsibilities on the appointed actuaries of both the assuming and ceding ends of a reinsurance arrangement. In either case, the appointed actuary needs to consider its reinsurance arrangements when preparing the SAO. Such consideration may vary in its complexity and should be appropriate for the types of risks the reinsured business presents to the company and the materiality of those risks.  

The following sources provide additional guidance:  

- Valuation Manual (VM-30)
The Opinion must consider the “contractual obligations” of the company. This includes reinsurance contracts/treaties.

The Actuarial Memorandum requires disclosure of “the method of treating reinsurance in the asset adequacy analysis”.

The Regulatory Asset Adequacy Issues Summary includes a section on “The methods used by the actuary to recognize the impact of reinsurance on the company’s cash flows, including both assets and liabilities, under each of the scenarios tested.”

- Actuarial Standards of Practice (ASOPs)
  - ASOP No. 7, Analysis of Life, Health, or Property/Casualty Insurer Cash Flows, contains the following guidance on reinsurance:
    
    **3.8 REINSURANCE**
    The actuary should consider whether reinsurance receivables will be collectible when due, and any terms, conditions, or other aspects that may be reasonably expected to have a material impact on the cash flow analysis.
    
    **4.3 DOCUMENTATION**
    g.8. the characteristics of any reinsurance agreements, and how these were reflected in the analysis;

  - ASOP No. 11, Treatment of Reinsurance or Similar Risk Transfer Programs Involving Life Insurance, Annuities, or Health Benefit Plans in Financial Reports (Effective December 1, 2022), provides a wealth of guidance on the treatment of reinsurance in financial reports (which includes asset adequacy analysis reports), including:
    
    **3.1 REINSURANCE PROGRAM FEATURES**
    When preparing financial reports, the actuary should take into account aspects of relevant reinsurance program(s), including [...] the risks transferred in the reinsurance agreement [and] the structure of the reinsurance agreement.
    
    **3.6 ASSESSING AND ANALYZING THE RISKS BEING TRANSFERRED IN A REINSURANCE PROGRAM**
    When preparing a financial report to assess and analyze the risks being transferred in a reinsurance program, the actuary should take into account the terms and conditions of the reinsurance program.
    
    **3.9 ADDITIONAL LIABILITIES, RESERVES, OR ALLOCATION OF CAPITAL**
    The actuary should consider establishing additional liabilities, reserves, or allocation of capital based upon the terms and conditions of the reinsurance program. When considering this issue, the actuary should use assumptions consistent with the purpose of the financial report.

  - The second exposure draft of ASOP No. 22, Statements of Actuarial Opinion Based on Asset Adequacy Analysis for Life Insurance, Annuity, or Health Insurance Reserves and Other Liabilities, contains the following guidance on reinsurance:
    
    **3.1.3 REINSURANCE CEDED**
    The actuary should consider reflecting reinsurance ceded cash flows in the asset adequacy analysis regardless of whether the analysis is performed for a direct writing company or a reinsurer. In deciding whether and how to reflect the reinsurance ceded cash flows, the actuary should solicit information from
management regarding the extent of reinsurance, the associated cash flows, their collectability, any disputes with reinsurers, and practices regarding provisions for reinsurance ceded. The actuary’s consideration of reinsurance ceded does not imply an opinion on the financial condition of any reinsurer.

4.1 REQUIRED DISCLOSURES IN AN ACTUARIAL REPORT

h. whether and how reinsurance ceded cash flows were reflected in the asset adequacy analysis (see section 3.1.3).

- 2017 Practice Note on Asset Adequacy Analysis
  - Q31 discusses treatment of modified coinsurance in asset adequacy analyses.

We believe this guidance addresses many of the concerns identified in the APF without being overly prescriptive.

Additional Comments

Regarding the specific text of the APF, we have the following comments by section:

Section 4.1:
The existing SAO requirements, as noted above, already necessitate consideration of all contracts, both obligations to policyholders and requirements under reinsurance arrangements. Therefore, we suggest removing this section.

Section 4.2:
Current requirements recognize that asset adequacy analysis may not always be appropriate or required. Accordingly, these requirements allow the appointed actuary to apply judgement in selecting a method of analysis to support the SAO. Sections 1 and 2 lead us to believe this APF would impose an asset adequacy analysis requirement for each reinsured block on a standalone basis, because results need to be reportable back to the ceding company. This requirement eliminates any ability for the appointed actuary to apply professional judgement which is permitted in the current requirements. In addition, an asset adequacy analysis requirement would potentially:

- Introduce requirements for the appointed actuary to test business which it has divested by ceding the risk to a qualified and credit worthy counterparty. In such cases, the ceding company may not have retained the assumption setting, modeling capabilities, or expertise to support asset adequacy analysis.
- Introduce requirements for the appointed actuary to perform asset adequacy analysis for business where there is limited or no information related to assets supporting the ceded liabilities.
- Impose a significant new requirement and operational burden for companies that would need to perform asset adequacy analysis on different reinsured blocks if such analysis is to be performed separately. Such a standalone requirement would deviate from the current guidance that requires additional asset adequacy reserves, if any, to be determined in the aggregate. Further, as many blocks are managed collectively, the result of this standalone testing would produce results that may not appropriately reflect the true economics had the ceding company retained the block.

Section 4.3:
We agree that materiality should be a consideration in the assessment. We note that ASOP 22 allows certain blocks to not be tested due to immateriality. Further, this section does not actually tie back to reinsurance. We suggest removing this section.

Section 4.4/Guidance Note: We believe the requirements of Section 4.4 are generally already covered by the existing requirements, and thus are redundant. We suggest removing this section.

We look forward to a discussion of this amendment on a future call. We appreciate the consideration of our comments.

Sincerely,

[Signature]

Virginia is submitting comments regarding the following exposure:

**APF 2019-34 (Clarify Responsibilities for Reinsurance)**

**Comments:**

1. There have been reports of companies neglecting to perform proper asset adequacy analysis of reported reserves for various reinsurance treaties, however, I believe the current requirements of Model 820, ASOP #22, and VM-30 are sufficient and adequate to handle these situations and APF 2019-34 should not be necessary. However, if it is really felt that additional guidance in VM-30 is necessary, then please consider the following comments 2-5 below.

2. The numbering is not consistent with VM-30. The subsections should not be numbered 1-4, but rather should be numbered A-D. Also, the subsections under Section 4.4 should be re-numbered 1. and 2., rather than (a) and (b). The paragraphs in the Guidance Note should follow a different numbering scheme as used in Section 4.4, so as to avoid confusion.

3. In Section 4 heading, I would suggest removing the words “treaties of” and just have “Section 4: Asset Adequacy Analysis for Reinsurance”

4. In Section 4.1, the phrase “currently in force” should be replaced with “in force as of the annual statement date” to be more consistent with the rest of VM-30. It is possible that appointed actuary may be performing analysis as of a date other than annual statement date (e.g., as of September 30), so in order to capture new treaties which may have been entered into during the 4th quarter, it is necessary to make this change. Note there are two places in Section 4.1 where this change needs to be made.

5. In the Guidance Note at the bottom of Section 4.4, the last sentence conflicts with Section 3.A.6 of VM-30, as well as Section 4.4 of ASOP #22. The last sentence reads as follows: “In relying on the work of another appointed actuary, an appointed actuary may not rely solely on the other actuary’s statement of actuarial opinion.” There are a couple of issues with this sentence. First, the appointed actuary does not have to rely on the work of another *appointed actuary*. The appointed actuary may rely on the work of an actuary who is not the appointed actuary or even a non-actuary. The sentence appears to imply that the appointed actuary is relying on the work of the appointed actuary of the reinsurance counterparty. The preceding sentence gives this as an example, that the appointed actuary may be relying on the appointed actuary of the
reinsurance counterparty, but this may not be true in all instances. Therefore, I believe it is better that the first occurrence of the word “appointed” be removed. Second, by use of the word “solely” the wording implies that the appointed actuary may rely on the opinion of another actuary when establishing his own opinion. The implication is that the appointed actuary may rely in part on the other actuary’s statement of actuarial opinion, but not in whole. Section 3.A.6 of VM-30 is clear that in forming his opinion, the appointed actuary may rely on “other experts for data, assumptions, projections or analysis”, but there is no provision for the appointed actuary to rely on other actuaries’ opinions, in whole or in part. This is made clear in Section 4.4 of ASOP #22. In situations where more than one actuary contributes to forming an opinion, the following statement is made: “The actuary should then form an overall opinion without claiming reliance on the opinions of other actuaries.” The opinion of the appointed actuary must be solely his own opinion. Therefore, the last sentence should be removed or re-worded. If re-worded, one suggested wording would be as follows:

“When the other actuary has provided an opinion, the appointed actuary may consider the opinion of the other actuary in forming their own opinion, however, the appointed actuary shall not rely on the other actuary’s statement of actuarial opinion when forming their own overall opinion.”

Thank you for your consideration of these comments.

Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

John Robinson, Director, PBR – Valuation Actuary, MN

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

4. State the reason for the proposed amendment? (You may do this through an attachment.)

The purposes of this APF are to
(a) Clarify the responsibilities of the appointed actuaries of both the ceding and assuming companies for all forms of reinsurance, relative to both the SAO and asset adequacy analysis.
(b) Make a minor modification to the table headings in VM-30, Section 3.A.5.

Discussion of Rationale:

1. Every appointed actuary should be held accountable for ensuring that all the reserves covered by the actuary’s SAO are subjected to asset adequacy analysis. Usually, this requires the appointed actuary to perform the analysis; however, circumstances may exist where the appointed actuary can rely on work performed by the counterparty’s appointed actuary. In any event, whether relying on another actuary or not, this APF will require the appointed actuary to provide the results of the asset adequacy analysis, as evidence that the analysis was performed.

2. VM-30 Section 3.A.7.e includes the following required statement as part of the SAO:
“The reserves and related actuarial items, when considered in light of the assets held by the company with respect to such reserves and related actuarial items including, but not limited to, the investment earnings on the assets, and the considerations anticipated to be received and retained under the policies and contracts, make adequate provision, according to presently accepted ASOPs, for the anticipated cash flows required by the contractual obligations and related expenses of the company.”

In a situation where part or all of the risk is reinsured, the assets held by the company may only be in respect of the portion of the risk supported by the reserves held; however, the appointed actuary’s actuarial opinion must address all the contractual obligations. It follows that, while asset adequacy analysis can only be performed on the reserves and assets held (i.e. net of reinsurance), the appointed actuary’s responsibility may extend beyond the reserves and assets held.
3. In a recent Academy survey of appointed actuaries (“A Survey of Life Appointed Actuaries, December 4, 2020”, Question 66), most of them (50.38%) indicated that for the YE2019 AAT, “no special consideration for reinsurance recoverability will be added”.

This APF will provide guidance that should produce more clarity and uniformity on this issue.

4. The following excerpt is from ASOP 7, “Analysis of Life, Health, or Property/Casualty Insurer Cash Flows”:

3.8 Reinsurance—The actuary should consider whether reinsurance receivables will be collectible when due, and any terms, conditions, or other aspects that may be reasonably expected to have a material impact on the cash flow analysis.”

This APF will propose that similar guidance apply to the appointed actuary in meeting his/her responsibility beyond the reserves and assets held.

5. ASOP 11, Section 3.3, “Treatment of Reinsurance Ceded” states as follows: “Because the ceding entity and the assuming entity each establish and test statement liabilities and assets independently, it is possible for the value of the net statement liabilities held by the ceding entity, plus those held by the reinsurer on a reinsured contract, to be more or less than the amount that would have been held if the ceding entity had not reinsured the contract. For example, the two entities may have different investment strategies, resulting in the use of different interest rate assumptions.”

It is clear that both the ceding and assuming companies are expected to both establish and test their respective liabilities.

The proposed text is in the Appendix below.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.

**Notes:** VM Maintenance Agenda 2019-34
APPENDIX

1. It is proposed to add the following text as VM-30, Section 4:

Section 4: Asset Adequacy Analysis For Treaties Of Reinsurance

A. Each counterparty to a reinsurance treaty has established a reserve in respect of its obligations relative to the underlying policies. Furthermore, the appointed actuary’s statement of actuarial opinion covers the reserves established for all of the company’s reinsurance treaties as of the annual statement date. Consequently, a company’s appointed actuary is required to perform asset adequacy analysis on the reserves, net of reinsurance when a reinsurance reserve credit is applicable, which the company has entered into with the company which has entered into a reinsurance treaty as of the annual statement date.

B. The results of the asset adequacy analysis shall be reported in the appointed actuary’s actuarial memorandum, as required in Section 3.B.12.b.

C. Materiality considerations may influence the decision whether to perform the asset adequacy analysis. However, the size of the reserve must not be the sole materiality criterion.

D. The appointed actuary of a direct writer must perform a review of each reinsurance counterparty to assess:
   1. Whether reinsurance receivables will be collectible when due; and
   2. Any terms, conditions, or other aspects that may be reasonably expected to have a material impact on the direct writer’s ability to meet its obligations to policyholders.

Evidence of having performed such reviews shall be provided in the actuarial memorandum.

Guidance Note:
(a) Under certain circumstances, for example, when risk is ceded under a modified coinsurance agreement, a counterparty may report a reserve of 0. This alone does not foreclose on the requirement for the asset adequacy analysis to be performed.

(b) If an appointed actuary relies on the work of another actuary, such as the appointed actuary of the reinsurance counterparty, the guidance in Section 3.A.6 and Section 3.B.2 must be followed. In relying on the work of another appointed actuary, an appointed actuary may not rely solely on the other actuary’s statement of actuarial opinion.

(c) When performing a review of a counterparty per Section 4.D., and providing evidence thereof, the appointed actuary is reminded to refer to ASOP 11 for guidance.

[Underlying principles:
1. The SAO itself
2. Each counterparty has its own perspective
3. Regulatory accountability]

Questions for commenters:
2. In 4., should there be more specificity as to what evidence should be provided? If so, what should be required?

(b) It is widely believed that the counterparty that bears the risk should perform the testing. This perspective has been used by appointed actuaries as the rationale for not performing asset adequacy analysis. Please provide a reference to formal guidance that supports this point of view.

2. Revision to Section 3.A.5, Table Headings:

<table>
<thead>
<tr>
<th>Statement Item</th>
<th>Formula Reserves (1)</th>
<th>Principle-Based Reserves (2)</th>
<th>Additional Reserves (3)</th>
<th>Analysis Method (4)</th>
<th>Other Amount Not Tested (5)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Total Amount</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Total Amount = (1)+(2)+(3)+(4)+(5)</td>
</tr>
</tbody>
</table>

Response to Commenters:

1. Commenters have pointed out that there is guidance in place that covers this topic. I note that the VM states that a goal of developing the VM is “to promote uniformity among states’ valuation requirements”. In that spirit, the purpose of this APF is to establish a national standard of regulatory accountability which is currently lacking, as evidenced by the fact that actuaries are referring to the Practice Note for guidance. It is grounded in the current guidance. In particular, the intent of this guidance is not to address any particular risks.

2. This national standard pertains universally to the reserves set, and associated assets held, by the company, plus a requirement for direct writers. In particular, I hesitate to set a national standard for performing AAT on the gross reserve because I consider the value of an analysis based on hypothetical assets to be limited.

3. This guidance is meant to apply to all forms of reinsurance. However, CFW presents some interesting questions. Note that this guidance is applicable to whatever is covered by the SAO. So, the question is whether the FW liability is subject to the SAO. Currently, the conventional wisdom is that Exhs 5, 6, 7 and 8.1 are covered; however, guidance is lacking as to what must be covered.

4. Commenters have indicated that presenting the counterparty’s results may not be sufficient evidence of reserve adequacy. My response is that relying on the counterparty’s work is not required; therefore, it is up to the AA that is relying on the results to justify the use of said results. VM-30 is explicit as to the terms of reliance. The purpose of requiring that results be provided is to provide the regulator assurance that the work was performed.
5. Implementation of this APF will lead to some stand-alone analysis being required. This is a function of the aggregation restrictions. I note that aggregation is not a requirement; it is an option. However, the fact that it is stand-alone should not be a reason to not perform the analysis.
The Life Actuarial (A) Task Force met June 24, 2021. The following Task Force members participated: Doug Slape, Chair, represented by Mike Boerner, Rachel Hemphill, and Karen Jiang (TX); Judith L. French, Vice Chair, represented by Jason Wade (OH); Lori K. Wing-Heier represented by Sharon Comstock (AK); Jim L. Ridling represented by Jennifer Li and Steve Oslund (AL); Ricardo Lara represented by Thomas Reedy and Ben Bock (CA); Michael Conway represented by Eric Unger (CO); Andrew N. Mais represented by Wanchin Chou (CT); Dana Popish Severinghaus represented by Bruce Sartain and Vincent Tsang (IL); Amy L. Beard represented by Stephen Chamblee (IN); Vicki Schmidt represented by Nicole Boyd (KS); Grace Arnold represented by Fred Andersen and John Robinson (MN); Chlorinda Lindley-Myers represented by William Leung (MO); Eric Dunning represented by Rhonda Ahrens (NE); Marlene Caride represented by David Wolf (NJ); Linda A. Lacey represented by Bill Carmello and Amanda Fenwick (NY); Glen Mulready represented by Andrew Schallhorn (OK); Jonathan T. Pike represented by Tomasz Serbinowski (UT); Scott A. White represented by Craig Chupp (VA); and James A. Dodrill represented by Joylynn Fix (WV).

1. **Adopted Amendment Proposal 2021-10**

Mr. Leung made a motion, seconded by Mr. Weber, to adopt amendment proposal 2021-10 (Attachment Two-A). The motion passed unanimously.

2. **Tabled Amendment Proposal 2021-08**

Mr. Boerner said amendment proposal 2021-08 recommends reducing the experience reporting data collection lag from two years to one year and collecting experience data for the 2020 and 2021 exposure periods in 2022. He said Mary Bahna-Nolan (Society of Actuaries—SOA) and Larry Bruning (SOA) advocate reducing the lag to allow for additional experience data for the 2015 Valuation Basic Table (VBT) update. He said the American Council of Life Insurers (ACLI) comment letter supports deferring adoption of the amendment proposal until new accelerated underwriting data elements are adopted. He noted that adoption of the accelerated underwriting data elements may be a couple of years away. He said the ACLI is also concerned that the existing deadlines may not allow companies sufficient time to provide the data for the 2021 exposure year. Dan Schelp (NAIC) said the *Valuation Manual* allows the experience reporting agent to modify the reporting requirements as needed, with the approval of the Task Force. He recommended that any action taken to extend the reporting deadline be applied broadly and not on a case-by-case basis. Ms. Ahrens agreed that companies may not have sufficient resources to provide the required data. Brian Bayerle (ACLI) said the ACLI questions whether collecting two years of data in 2022 will stretch NAIC resources. He asked that adoption of the amendment proposal be deferred. Mr. Boerner said the effort to collect two years of data in 2022 is not appreciably different from the current efforts to collect data for 2018 and 2019. Philip Wunderlich (Nationwide) said having only six months between the year of the reporting year and the initial data submission date makes the reporting of deaths challenging. He said it will also affect the quality of the data submitted due to the reduction in the time available for the company’s internal data scrubbing efforts.

Ms. Ahrens made a motion, seconded by Mr. Carmello, to table amendment proposal 2021-08 (Attachment Two-B). The motion passed unanimously.

3. **Re-Exposed Amendment Proposal 2019-33**

Mr. Boerner said a non-substantive change was made to the prior version of amendment proposal 2019-33. The change clarifies that the scope of the individual certificates issued under group contracts is not limited by or dependent upon the date of the group master contract. Mr. Chupp listed some editorial changes to the prior version. Leonard Mangini (American Academy of Actuaries—Academy) said the Academy agrees with the Mr. Chupp’s editorial changes. Mr. Chupp also proposed to change the wording in VM-20, Requirements for Principles-Based Reserves for Life Products, Section 1.B.2 from “premiums or cost of insurance schedules and charges…” to “premiums or cost of insurance schedules or charges…” Ms. Bahna-Nolan said Mr. Chupp is considering banding when looking at the language. She said the term “coverage amount” refers to units per $1,000, and it was not intended to consider banding. She suggested adding a note to clarify “coverage amount” does not imply banding, instead of making the proposed change. Mr. Chupp agreed that adding a note will be sufficient. Mr. Boerner asked if the Academy would like the exposure to address the author’s note in the exposure, which questions whether the term “ordinary life...
policies” should be changed to “individual life insurance policies and certificates.” Ms. Bahna-Nolan said she would address the matter by providing a clarification of the issue raised by the author’s note for inclusion in the exposure.

Mr. Chupp made a motion, seconded by Mr. Leung, to re-expose amendment proposal 2019-33 (Attachment Two-C), including Mr. Chupp’s editorial changes and both the note on coverage amount and the clarification of the author’s note to be provided by Ms. Bahna-Nolan for a public comment period ending June 30. The motion passed unanimously.

4. Adopted Amendment Proposal 2021-07

Mr. Bock said the first four suggestions in his comment letter (Attachment Two-D) are editorial changes. He said his fifth suggestion recommends repositioning certain paragraphs of VM-20 Section 3.B.5 to improve its flow. He noted that the adoption of the fifth suggestion will alleviate the need for the editorial changes proposed in the fourth suggestion. David Neve (Actuarial Resources Corporation of GA—ARCGA) agreed with Mr. Bock’s suggested changes.

Mr. Chupp made a motion, seconded by Mr. Weber, to adopt amendment proposal 2021-07 (Attachment Two-E), including suggestions #1, #2, #3, and #5 from Mr. Bock. The motion passed unanimously.

Having no further business, the Life Actuarial (A) Task Force adjourned.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Angela McNabb & Pat Allison – NAIC staff support

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2021, version of the Valuation Manual – VM-51 Appendix 4

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

<table>
<thead>
<tr>
<th>ITEM</th>
<th>L</th>
<th>DATA ELEMENT</th>
<th>DESCRIPTION</th>

Notes: APF 2021-10
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force

Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

Society of Actuaries Valuation Basic Table Team – Chair Larry Bruning

Revisions to VM-51 to allow for the data experience reporting observation calendar year to be one year prior to the reporting calendar year.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

Section 2: Statistical Plan for Mortality

D. Process for Submitting Experience Data Under This Statistical Plan

Data for this statistical plan for mortality shall be submitted on an annual basis. Each company required to submit this data shall submit the data using the Regulatory Data Collection (RDC) online software submission application developed by the Experience Reporting Agent. For each data file submitted by a company, the Experience Reporting Agent will perform reasonability and completeness checks, as defined in Section 4 of VM-50, on the data. The Experience Reporting Agent will notify the company within 30 days following the data submission of any possible errors that need to be corrected. The Experience Reporting Agent will compile and send a report listing potential errors that need correction to the company.

Data for this statistical plan for mortality will be compiled using a calendar year method. The reporting calendar year is the calendar year that the company submits the experience data. The observation calendar year is the calendar year of the experience data that is reported. The observation calendar year will be one year prior to the reporting calendar year. For example, if the current calendar year is 2022 and that is the reporting calendar year, the company is to report the experience data that was in-force or issued in calendar year 2021, which is the observation calendar year. For the 2022 reporting calendar year, companies that are required to submit data for this statistical plan for mortality will be required to submit observation calendar years of data, namely observation calendar year 2020 and observation calendar year 2021. For reporting calendar years after 2022, companies that are required to submit data for this statistical plan for mortality will be required to submit one observation calendar year of data.

Given an observation calendar year of 20XX, the calendar year method requires reporting of experience data as follows:

i. Report policies in force during or issued during calendar year 20XX.
ii. Report terminations that were incurred in calendar year 20XX and reported before July 1, 20XX+1. However, exclude rescinded policies (e.g., 10-day free look exercises) from the data submission.

For any reporting calendar year, the data call will occur during July of that reporting calendar year, and data is to be submitted according to the requirements of the Valuation Manual in effect during that calendar year. For the 2022 reporting calendar year, the requirements of the 2022 Valuation Manual will be used for both the 2020 and 2021 observation years. Data submissions must be made by Sept. 30 of the reporting calendar year. Corrections of data submissions must be completed by Dec. 31 of the reporting calendar year.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

This APF is needed for the following reasons:

1. There is a need to shorten the time period between data observation and data collection to facilitate more timely analysis and reporting of mortality experience.

2. Under a Principle Based Reserving methodology, valuation basic tables should reflect recent and current mortality experience.
Life Actuarial (A) Task Force/ Health Actuarial (B) Task Force
Amendment Proposal Form*

1. Identify yourself, your affiliation and a very brief description (title) of the issue.

American Academy of Actuaries, Life Reserves Work Group

Addition of language to clarify the definition of individually underwritten life insurance and the applicability of Principle-Based Reserve (PBR) requirements for group insurance contracts with individual risk selection issued under insurance certificates.

2. Identify the document, including the date if the document is “released for comment,” and the location in the document where the amendment is proposed:

January 1, 2021, version of the Valuation Manual, with the revisions to APF 2020-11 (adopted by LATF on 2/11/21) shown in blue text.

3. Show what changes are needed by providing a red-line version of the original verbiage with deletions and identify the verbiage to be deleted, inserted or changed by providing a red-line (turn on “track changes” in Word®) version of the verbiage. (You may do this through an attachment.)

See Appendix

All proposed changes specific to this amendment proposal are shown in red text.

4. State the reason for the proposed amendment? (You may do this through an attachment.)

Individual insurance certificates issued under a group contract which utilize an individual risk selection process, pricing, premium rate structures and product features are similar to individual life insurance policies. They are currently excluded from VM-20 because they are filed under a group contract, but they should be subject to VM-20 due to this similarity. See Appendix.

* This form is not intended for minor corrections, such as formatting, grammar, cross-references or spelling. Those types of changes do not require action by the entire group and may be submitted via letter or email to the NAIC staff support person for the NAIC group where the document originated.
