

State Insurance Regulation: Key Facts and Market Trends

Data for calendar year 2024

Overview of the **New York** **Insurance Market**

NY ranks...

- **1st in domestic insurance carriers** licensed in the state.
- **2nd in total premium** written as reported on NAIC annual statement filings.
- **1st in life, accident, and health premium** as reported on NAIC annual statement filings.
- **4th in property/casualty (P/C) premium** as reported on NAIC annual statement filings.
- **2nd in workers' compensation premium** with 8.46% of the U.S. market.
- **1st in fidelity premium** with 12.43% of the U.S. market.

Facts:

Total direct premium written in-state has **increased every year since 2015**.

The cost of regulation, currently \$0.60 per \$1,000 premium, has **decreased 35% since 2015**.

NAIC Scorecard

State Insurance Regulation: Key Facts and Market Trends

The mission of the National Association of Insurance Commissioners (NAIC) is to assist state insurance regulators, individually and collectively, in serving the public interest and achieving the following fundamental insurance regulatory goals in a responsive, efficient and cost-effective manner, consistent with the desires of its members—protect the public interest; promote competitive markets; facilitate the fair and equitable treatment of insurance consumers; promote the reliability, solvency, and financial solidity of insurance institutions; and support and improve the state regulation of insurance.

As part of this mission, the NAIC compiles meaningful data on the insurance regulatory community and the insurance industry.

Number of Insurance Companies

The number of insurance companies is provided by state insurance regulators and is compiled annually by the NAIC. Depending on the type of insurance provided, companies are classified as property/casualty (P/C), life and fraternal, health, or title insurers. Insurers with primary corporate headquarters located in a particular state are called domestic insurers. The insurance regulator in the insurer's state of domicile is the primary regulator of that insurer. Foreign insurers are those that are allowed to sell insurance in a state but have a primary legal residence in another state. State rank indicates each state's standing relative to the state with the largest number of insurers.

U.S. Premiums by NAIC Financial Statement Type

The premium volume from the NAIC financial filing database is direct written premium derived from insurer annual financial statement filings provided to the NAIC. The total is comprised of aggregate premium and deposits generated without any adjustments for reinsurance. This data is grouped according to insurer financial statement filing type (i.e., P/C; life, accident and health/fraternal; health; and title). Data in one financial statement type may fit better under another line of business. For example, traditional health data may be filed by an insurer using the filing type of life, accident and health.

Depending on the regulatory requirements in the state of domicile, captives and risk retention groups (RRGs) are not always required to file with the NAIC, and, consequently, this data may not be considered complete. Not all state funds are required to file with the NAIC. State fund data contained herein is reported separately and added to the premium volume during the composition of this report. Some categories are modified to better align with the structure of NAIC financial statement filings and may not be comparable to data reported in prior years. State rank indicates each state's standing relative to the state with the largest premium volume.

Insurance Department Data

The insurance department data is provided by state insurance regulators and is compiled annually by the NAIC. Total taxes include premium, retaliatory, franchise, and income taxes paid by insurers. Total revenue includes other sources, such as licensing fees, fines, and assessments, as well as total taxes. Total budget represents the annual operating budget of the state insurance department. Total employment is the number of full-time employees in the state insurance department.

Cost of Regulation

The cost of regulation is calculated from data supplied by state insurance regulators and collected from insurers' financial filings. It is a ratio that compares the insurance department budget to total premium written in the state. For state-specific details on the figures used, please refer to the IDRR technical notes.

Property/Casualty Premium by Line of Business The premiums are from the annual financial statement information that P/C insurers file with the NAIC. P/C premium is subdivided into several categories. This data includes information on state funds reported separately and added to the premium volume during the composition of this report. The state rank reflects each state's position relative to the state with the largest premium for the respective line of business.

Insurance Industry Employment

The U.S. Bureau of Labor Statistics (BLS) produces the Quarterly Census of Employment and Wages (QCEW). The QCEW is derived from quarterly unemployment insurance tax reports submitted by employers to state workforce agencies. The reports are subject to state unemployment insurance laws and the Unemployment Compensation for Federal Employees (UCFE) program. According to the BLS, the QCEW program publishes a quarterly count of employment and wages covering 98% of U.S. jobs, available by industry in the county, metropolitan statistical area (MSA), state, and national levels. Employment is the total number of persons employed full-time or part-time in non-farm establishments during a specified payroll period. Temporary employees are included.

In general, data refer to persons who worked during, or received pay for, any part of the pay period that includes the 12th of the month, which is standard for all federal agencies collecting employment data from business establishments. Insurance carriers include employees of direct insurers from all insurance types and reinsurers. Agencies, brokerages, and other insurance-related activities include insurance agents and brokers, independent claims adjusters, third-party administrators of insurance and pension funds, and other insurance-related activities.

Consumer Complaints

Complaints include all formal complaints lodged with the insurance department.

Consumer Inquiries

Inquiries include all requests for information on insurance-related issues made via any medium, such as phone, letter, or email. Requests for brochures are included, as are incidents in which a complaint is voiced but not formally lodged.

Gross Domestic Product

The U.S. Bureau of Economic Analysis (BEA) produces the gross domestic product (GDP). The BEA defines GDP by state as the most comprehensive measure of overall economic activity in each state. Per the BEA, GDP by state is calculated as the sum of incomes earned by labor and capital and the costs incurred in the production of goods and services. It includes workers' wages and salaries; income earned by sole proprietorships, partnerships, and corporations; and business taxes (such as sales, property, and federal excise taxes) that qualify as business expenses.

State Insurance Regulation: Key Facts and Market Trends

The primary goal of state regulation is to protect insurance consumers, while recognizing that consumers as well as companies are well served by efficient, market-oriented regulation of the business of insurance.
