NAIC Reinsurance Comparison Worksheet (Attachment Two)

Draft Pending Adoption

Draft: 3/28/24

Financial Stability (E) Task Force
Phoenix, Arizona
March 16, 2024

The Financial Stability (E) Task Force met in Phoenix, AZ, March 16, 2024. The following Task Force members participated: Justin Zimmerman, Chair (NJ); Judith L. French represented by Dale Bruggeman, Vice Chair (OH); Mark Fowler represented by Sheila Travis (AL); Alan McClain represented by Chris Erwin (AR); Barbara D. Richardson represented by David Lee (AZ); Andrew N. Mais represented by William Arfanis (CT); Karima M. Woods represented by Philip Barlow (DC); Michael Yaworsky represented by Jane Nelson (FL); Doug Ommen represented by Carrie Mears (IA); Amy L. Beard represented by Roy Eft (IN); Vicki Schmidt represented by Tish Becker (KS); Gary D. Anderson represented by John Turchi (MA); Kathleen A. Birrane (MD); Grace Arnold represented by Fred Andersen (MN); Chlora Lindley-Myers represented by John Rehagen (MO); Mike Causey represented by Jackie Obusek (NC); Jon Godfread represented by Matt Fischer (ND); Eric Dunning represented by Lindsay Crawford (NE); Adrienne A. Harris represented by Bob Kasinow (NY); Andrew R. Stolfi represented by Kirsten Anderson (OR); Michael Humphreys represented by Diana Sherman (PA); Alexander S. Adams Vega (PR); Michael Wise represented by Ryan Basnett (SC); Cassie Brown represented by Rachel Hemphill (TX); Scott A. White represented by Dan Bumpus (VA); and Nathan Houdek (WI).

1. Heard Opening Remarks

Acting Commissioner Zimmerman said materials for consideration and discussion for this meeting were emailed to Task Force members and are available on the NAIC website in the Committees section under Financial Condition (E) Committee. Materials are also available on the member SharePoint site (formerly Member Connect) and in the Event App.

2. Adopted its 2023 Fall National Meeting Minutes

Bruggeman made a motion, seconded by Eft, to adopt the Task Force's Dec. 1, 2023, minutes (*see NAIC Proceedings – Fall 2023, Financial Stability (E) Task Force*). The motion passed unanimously.

3. Received an Update from the Macroprudential (E) Working Group

Kasinow gave updates regarding the 13 private equity (PE) considerations (Attachment One). He said that there was not enough time to provide an update on each consideration, but the materials given to the Task Force provided a complete list of updates on the considerations.

Regarding reinsurance, Kasinow said the Macroprudential (E) Working Group met Jan. 31 in joint session with the Reinsurance (E) Task Force in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to discuss regulators' experience and implementation of the reinsurance worksheet. Several suggested enhancements were raised by regulators and incorporated into the worksheet. The updated version (Attachment Two) has been posted to the Working Group's website. Kasinow also said the Working Group is working on its cross-border reinsurance initiative through ongoing dialogue with the Bermuda Monetary Authority (BMA). The BMA provided the Working Group with an overview of its *Supervision and Regulation of PE Insurers in Bermuda* paper, which was released in December 2023.

Kasinow also spoke about the Working Group meeting on Feb. 29 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to have NAIC staff walk through the International Association of Insurance Supervisors' (IAIS') Global Insurance Market

Draft Pending Adoption

Report (GIMAR), which was released in December 2023. The report outlines key risks identified by supervisors, supervisory measures taken in response to those risks, challenges faced by supervisors, and measures taken by insurers.

Kasinow said the liquidity stress testing (LST) for the 2023 LST Framework with lead state guidance has been finalized and posted to the Financial Stability (E) Task Force's website under key documents. It was delayed this year due to Moody's delayed publishing of its default tables which are included as annexes in the Framework. Kasinow spoke about how the LST Study Group is in the process of considering if and how to address potential separate account asset sales in a stress scenario. The Study Group conducted a data call for lead states to require their participant life insurance groups to provide some context around the dollar amount of specific asset types included in separate accounts. The Working Group met Feb. 1 in regulator-to-regulator session, pursuant to paragraph 3 (specific companies, entities, or individuals) of the NAIC Policy Statement on Open Meetings, to debrief on the data call results. Once the Working Group has analyzed the results of these follow-up clarifications, regulators will be in a better position to consider the potential impact of this universe of assets. Working Group members will then determine a clear path forward.

Kasinow then spoke on the ongoing counterparty project. As a result of this project, the Working Group can identify exposures faster and have more accurate breakdowns of exposures. There is a plan going forward to provide the counterparty data in Tableau, on StateNet, or another automated access tool for state regulators to use. Additionally, there have been steps taken to quantify credit risk by utilizing counterparty nationally recognized statistical rating organization (NRSRO) ratings, as well as probability of default and loss given default tables.

Kasinow said the climate risk dashboard was presented to the Climate and Resiliency (EX) Task Force. However, the Working Group will be charged with its development. The Working Group plans to meet in April to develop and allow for input into the dashboard by Working Group members. The Working Group will also be updating the Macroprudential Risk Assessment dashboard, including incorporating the additional climate risk metrics.

4. Received an Update from the Valuation Analysis (E) Working Group

Andersen spoke on *Actuarial Guideline LIII—Application of the Valuation Manual for Testing the Adequacy of Life Insurer Reserves* (AG 53), which was adopted in 2022. The main purpose of AG 53 is to help ensure claims-paying ability even if complex assets do not perform as expected. This gives companies an opportunity to tell their stories regarding their complex assets and associated risks and how their cash-flow testing models address those risks. The first submissions were received in 2023. Andersen said there were nearly 250 filings, and the Working Group prioritized companies that are reliant on assets and are earning very high net yields. The Working Group is trying to lessen reliance on high net yields to pay claims. A small review group consisting of state regulators and Valuation Analysis Working Group support staff also categorized companies that were formally identified as being outliers.

Andersen discussed companies that are relying on assets that are earning high net yields to pay claims. These targeted companies interacted with the Working Group and regulators to add a level of conservatism to those assumptions. These outlier companies were grouped according to their degree of acceptance of the recommended conservatism. In most cases, the companies will add the recommended conservatism and will be removed from the outlier list. In several other cases, companies will significantly increase their conservatism, which is okay for 2023, but will be addressed for year-end 2024. There were a few exceptions, e.g., financial exams currently in place, and there will be a follow-up on these cases.

Andersen then reviewed the upcoming activities for AG 53. Companies with non-outlier net yield assumptions are not necessarily out of the woods, as these companies may not be in line with moderately adverse conditions, and there are plans to address this in 2024. Even if they are not on the outlier list, some companies may be assuming levels of net yields that many regulators are not comfortable with. For filings due in a few weeks, there will be

Draft Pending Adoption

more granular data provided regarding their assets, including the tranche level and the associated assumed net yields. Andersen said that there were also recommendations made to Life Actuarial (A) Task Force, which included a proposal to increase the justification needed regarding assumed equity net yields and a proposal to require more analysis be provided to regulators in certain cases where the life insurer cedes business through reinsurance.

5. Heard an International Update

Tim Nauheimer (NAIC) reported that the IAIS has launched the data collection portion of its annual Global Monitoring Exercise (GME), which includes individual insurer monitoring (IIM) and sector-wide monitoring (SWM). The SWM includes climate and reinsurance data collection components and the qualitative Global Reinsurance Market Survey. The deadline for insurers to submit IIM data to the IAIS is May 10. The main SWM data collection is due June 30. The IAIS GIMAR topic was recently agreed upon by members to be natural catastrophe protection gaps. The IAIS Macroprudential Supervision Working Group is focused on two issues: 1) alternative assets; and 2) intensive reinsurance. Further analysis will also be conducted on level 3 assets. The IAIS is also in the process of reviewing public consultation comments on its application paper, which considers climate-related scenario analysis in the context of Insurance Core Principle (ICP) 16 (Enterprise Risk Management) and ICP 24 (Macroprudential Supervision).

Having no further business, the Financial Stability (E) Task Force adjourned.

Significant progress, a few open items to be addressed
Consideration is open-progress has been made, but work continues.

Tracking for the List of 13 MWG Considerations – PE Related and Other

Original exposure of 13 considerations: March 16, 2022

Consideration	Update Date	Update Date	Update Date	Update Date	Update Date	Update Date	Most Recent Update
1. Holding Company Structures: Regulators may not be obtaining clear pictures of risk due to holding companies structuring contractual agreements in a manner to avoid regulatory disclosures and requirements. Additionally, affiliated/related party agreements impacting the insurer's risks may be structured to avoid disclosure (for example, by not including the insurer as a party to the agreement).	8/4/2022 Sent a referral for new work to the Group Solvency Issues (E) Working Group.	3/22/2023 <i>GSIWG Update: The GSIWG plans to discuss this issue at its Dec. 14 meeting to determine next steps in addressing the referral.</i>	3/22/2023	6/15/2023 <i>GSIWG Update: The GSIWG formed a drafting group to develop best practices for regulatory review in this area. The drafting group has met multiple times and continues to work on the development of written best practices. After the best practices are developed, the drafting group will consider whether any should be proposed for inclusion in NAIC Handbooks or other action should be considered.</i>	7/12/2023	12/11/2023 <i>GSIWG Update: In November 2023, the GSIWG adopted regulator-only sound practice guidance for use in reviewing complex ownership structures of insurers (see attached PDF). The Sound Practices document has been posted to StateNet for regulator review and use. In addition, the GSIWG referred proposed additions to the NAIC's Financial Analysis Handbook to the Financial Analysis Solvency Tools (E) Working Group for further consideration in 2024. These edits include additional Form A (Change of Control) review procedures, as well as new guidance for use by regulators in evaluating Disclaimer of Control/Affiliation filings. See the attached Word docs for the referral to FASTWG, as well as the proposed Handbook edits. These documents will be exposed for public comment by FASTWG in 2024 and then adopted for inclusion in the 2025 FAH. Finally, the Risk-Focused Surveillance (E) Working Group has formed an Affiliated IMA Drafting Group to discuss the development of additional guidance related to regulator review of affiliated investment management agreements and related services. The Drafting Group is currently developing a Manual Guidance for...</i>	RFSWG Update: 1-29-24 The RFSWG finalized updated guidance on regulator review and monitoring of affiliated services at the NAIC's 2023 Summer National Meeting. This guidance was subsequently adopted for inclusion in the 2024 publications of the NAIC's Financial Analysis Handbook and Financial Condition Examiners Handbook. At that same meeting, the RFSWG formed an Affiliated Investment Management Agreement drafting group to develop more specific guidance for use in reviewing investment advisory services provided by an affiliate. The Drafting Group plans to present proposed handbook guidance to the RFSWG for review at the NAIC's Spring 2024 National Meeting.
2. Ownership and Control: Control is presumed to exist where ownership is >=10%, but control and conflict of interest considerations may exist with less than 10% ownership. For example, a party may exercise a controlling influence over an insurer through Board and management representation or contractual arrangements, including non-customary minority shareholder rights or covenants, investment management agreement (IMA) provisions such as onerous or costly IMA termination provisions, or excessive control or discretion given over the investment strategy and its implementation. Asset-management services may need to be distinguished from ownership when assessing and considering controls and conflicts.	Sent a referral for new work to the Group Solvency Issues (E) Working Group.	<i>GSIWG Update: The GSIWG plans to discuss this issue at its Dec. 14 meeting to determine next steps in addressing the referral.</i>		<i>GSIWG Update: The GSIWG formed a drafting group to develop best practices for regulatory review in this area. The drafting group has met multiple times and continues to work on the development of written best practices. After the best practices are developed, the drafting group will consider whether any should be proposed for inclusion in NAIC Handbooks or other action should be considered.</i>		See update above that covers this topic as well.	See update on #1 above that covers this topic as well.
3. Investment Management Agreements (IMAs): The material terms of the IMA and whether they are arm's length or include conflicts of interest—including the amount and types of investment management fees paid by the insurer, the termination provisions (how difficult or costly it would be for the insurer to terminate the IMA) and the degree of discretion or control of the investment manager over investment guidelines, allocation, and decisions.	Sent a referral to the Risk-Focused Surveillance (E) Working Group to add this consideration to existing work involving affiliated agreements and Form D filings. Also sent a referral to the Valuation of Securities (E) Task Force (VOSTF) to highlight the regulatory discussion involving topics it administers.	<i>RFSWG Update: The RFSWG received and discussed this referral during its Nov. 1 interim meeting. During the meeting, the RFSWG agreed to defer further work on this issue until its ongoing project to update general guidance in NAIC handbooks related to affiliated service agreements is completed in early 2023. VOSTF: discussed the referral and decided RFSWG was in the best position to address this concern.</i>		<i>RFSWG Update: The RFSWG is nearing the completion of its project to update general guidance in NAIC handbooks related to affiliated service agreements, which is expected to be completed by the 2023 Summer National Meeting. After the general guidance is completed, the Working Group plans to begin work on more targeted guidance related to affiliated investment management agreements.</i>			RFSWG Update: 1-29-24 The RFSWG formed an Affiliated Investment Management Agreement drafting group to develop more specific guidance for use in reviewing investment advisory services provided by an affiliate. The Drafting Group plans to present proposed handbook guidance to the RFSWG for review at the NAIC's Spring 2024 National Meeting.
4. Owners of Insurers with Short-Term Focus and/or Unwilling to Support a Troubled Insurer: Owners of insurers, regardless of type and structure, may be focused on short-term results which may not be in alignment with the long-term nature of liabilities in life products. For example, investment management fees, when not fair and reasonable, paid to an affiliate of the owner of an insurer may effectively act as a form of unauthorized dividend in addition to reducing the insurer's overall investment returns. Similarly, owners of insurers may not be willing to transfer capital to a troubled insurer.	Sent a referral to the Risk-Focused Surveillance (E) Working Group to add this consideration to existing work involving affiliated agreements and fees. Also sent a referral to the Actuarial (A) Task Force recognizing its existing work to ensure the long-term life liabilities (reserves) and future fees to be paid out of the insurer are supported by appropriately modeled assets.	<i>RFSWG Update: The RFSWG received and discussed this referral during its Nov. 1 interim meeting. During the meeting, the RFSWG agreed to defer further work on this issue until its ongoing project to update general guidance in NAIC handbooks related to affiliated service agreements is completed in early 2023.</i>	<i>LATF Update: Asset adequacy analysis requirements in NAIC Model #820 and VM-30 require that company Appointed Actuaries perform testing to ensure that the reserves held for the company's liabilities are adequate in light of the assets supporting the business. Regulators review associated company Statements of Actuarial Opinion periodically.</i>	<i>LATF Update 6/23: Actuarial Guideline 53 – Application of the Valuation Manual for Testing the Adequacy of Life Insurer Reserves (AG 53) became effective for year-end 2022. AG 53 requires additional disclosures related to life insurance and annuity company investment return assumptions for complex and high yielding assets. Regulators are conducting targeted reviews of the AG 53 disclosures to ensure that company investment returns for complex</i>			RFSWG Update: 1-29-24 The RFSWG formed an Affiliated Investment Management Agreement drafting group to develop guidance related to the reasonableness of investment management fees. Proposed guidance on this topic is expected to be discussed at the Spring 2024 National Meeting. In addition, the RFSWG referred the considerations related to capital maintenance agreements over to the Financial Analysis Solvency Tools Working Group.

				and high-yielding assets are not overly optimistic.				LATF/VAWG Update: 12-1-23 AG 53 reviews are in progress and focus on 4 areas related to this consideration of a potential conflict of interest of ST owners and an insurance co. The 4 areas are: -high net yield assumptions -attribution analysis of net yield assumptions -investment expense assumptions -reinsurance collectability
5. Operational, Governance and Market Conduct Practices:	Operational, governance and market conduct practices being impacted by the different priorities and level of insurance experience possessed by entrants into the insurance market without prior insurance experience, including, but not limited to, PE owners. For example, a reliance on TPAs due to the acquiring firm's lack of expertise may not be sufficient to administer the business. Such practices could lead to lapse, early surrender, and/or exchanges of contracts with in-the-money guarantees and other important policyholder coverage and benefits.	The MWG will keep developing more specific suggestions before likely referring this consideration to the Risk-Focused Surveillance (E) Working Group.	MWG Update: No new action has occurred for this consideration as the regulators have focused on the reinsurance consideration.		MWG Update: No new action has occurred for this consideration as the regulators have focused on the reinsurance consideration.			MWG Update: No new action has occurred for this consideration as the regulators have focused on the reinsurance consideration.
6. Definition of Private Equity (PE):	No uniform or widely accepted definition of PE and challenges in maintaining a complete list of insurers' material relationships with PE firms. (UCAA (National Treatment WG) dealt with some items related to PE.) This definition may not be required as the considerations included in this document are applicable across insurance ownership types.	The MWG determined it was not feasible to determine a definition. Therefore, no further work on this consolidation shall be conducted and is considered closed or resolved.						Closed-item considered and addressed.
7. Identifying Related Party-Originated Investments (Including Structured Securities):	The lack of identification of related party-originated investments (including structured securities). This may create potential conflicts of interests and excessive and/or hidden fees in the portfolio structure, as assets created and managed by affiliates may include fees at different levels of the value chain. For example, a CLO which is managed or structured by a related party. (An agenda item and blanks proposal are being developed by SAPWG.)	Sent a referral to the Statutory Accounting Principles (E) Working Group (SAPWG) Group recognizing its existing work regarding disclosures for related-party issuance/acquisition. Once MWG regulators work with these SAPWG disclosures and regulatory enhancements from referrals to other groups, further regulatory guidance may be considered as needed.	SAPWG Completed Actions: Ref #2021-21 included revisions that clarified guidance for related parties and developed a blanks proposal which provided new investment schedule column with reporting codes to identify investments that involve related parties. (Adopted May 2022) Ref #2021-22BWG added six related party reporting codes effective for year-end 2022. The investment schedule disclosures include codes that identify the role of the related party in the investment, e.g., a code to identify direct credit exposure as well as codes for relationships in securitizations or similar investments. (Adopted May 2022)			SAPWG Completed Actions: Ref #2022-15, included revisions to clarify that any invested asset held by a reporting entity which is issued by an affiliated entity, or which includes the obligations of an affiliated entity, is an affiliated investment. (Adopted March 2023)		SAPWG Update: Closed No further work deemed necessary. Previous initiatives have addressed the PE concern, the referral objective and are complete.
8. Identifying Underlying Affiliated/Related Party Investments and/or Collateral in Structured Securities:	Though the blanks include affiliated investment disclosures, it is not easy to identify underlying affiliated investments and/or collateral within structured security investments. Additionally, transactions may be excluded from affiliated reporting due to nuanced technicalities. Regulatory disclosures may be required to identify underlying related party investments and/or collateral within structured security investments. This would include, for example, loans in a CLO issued by a corporation owned by a related party. (An agenda item and blanks proposal are being developed by SAPWG.)	Sent a referral to the Statutory Accounting Principles (E) Working Group in recognition of existing work to develop disclosures to identify the role of the related party in the investment and codes for relationships in securitizations or similar investment. Also sent a referral for new work to the Examination Oversight (E) Task Force for the CLO/structured security considerations.	SAPWG Completed Actions: See above descriptions (Ref #2021-21 and Ref #2021-22 BWG) on investment reporting codes for year end 2022 reporting. Ref #2019-34 included revisions that clarify: 1) identification of related parties; 2) a non-controlling ownership over 10% results in a related party classification regardless of any disclaimer of control or affiliation; 3) a disclaimer of control or affiliation does not eliminate the classification as a "related party" and the disclosure of material transactions. This agenda item also resulted in the creation of a new Schedule Y Part 3, which was effective for year-end 2021. This schedule identifies all entities with greater than 10% ownership – regardless of any disclaimer of affiliation – and whether there is a disclaimer of control/disclaimer of affiliation and identifies the ultimate controlling party. (Ref #2019-34 and Ref #2020-37BWG, both adopted March 2021)	EOTF/VAWG Update: The EOTF delegated work on this referral to its Financial Analysis Solvency Tools (E) Working Group and its Financial Examiners Handbook (E) Technical Group. Both groups developed new guidance for inclusion in 2023 NAIC handbooks related to the new related party investment disclosures developed by SAPWG and the AG 53 standards developed by LATF that will be in place for 12/31/22 reporting. The groups may develop additional guidance for NAIC handbooks, as well as supporting regulatory reports and tools, as work proceeds in this area.		SAPWG Completed Actions: See above descriptions (Ref #2021-21, Ref #2022-15 and Ref #2021-22 BWG)		SAPWG Update: Closed No further work deemed necessary. Previous initiatives have addressed the PE concern, the referral objective and are complete. EOTF/VAWG Update: 12-1-23 AG 53 Guidance Document – more refined information to be attained for year-end 2023, e.g., structured asset information by tranche
9. Asset Manager Affiliates and Disclaimers of Affiliation:								

<p>Broader considerations exist around asset manager affiliates (not just PE owners) and disclaimers of affiliation avoiding current affiliate investment disclosures. (A new Sec Y, Pt 3, has been adopted and will be in effect for year-end 2021. This schedule will identify all entities with greater than 10% ownership – regardless of any disclaimer of affiliation - and whether there is a disclaimer of control/disclaimer of affiliation. It will also identify the ultimate controlling party. Additionally, SAPWG is developing a proposal to revamp Schedule D reporting, with primary concepts to determine what reflects a qualifying bond and to identify different types of investments more clearly, including asset-backed securities.)</p>	<p>MWG regulators are comfortable waiting to realize the benefits of the recently implemented Schedule Y, Part 3, along with the changes other NAIC committee groups will make for several of the previously listed referrals, before determining if additional work is needed. Also, a referral was sent to the Statutory Accounting Principles (E) Working Group recognizing its existing work to revamp Schedule D and the SAPWG Schedule D revamp project. MWG regulators will assist with this consideration.</p>	<p>SAPWG Completed Actions: See above descriptions of Schedule Y Part 3. (Ref #2019-34 and Ref #2020-37BWG).</p>	<p>SAPWG Ongoing Work: Ref #2022-15, which clarifies affiliated investment reporting, is planned for adoption consideration at the 2023 Spring National Meeting. It adds guidance on reporting of affiliated investments. As part of a project known as the bond project, the SAPWG is developing a proposal to revise Schedule D reporting, which intends to determine what is considered a qualifying bond and to identify different types of investments more clearly. For example, the current bond proposal would divide Schedule D-1 into a Schedule D-1-1 for issuer credit obligations and a Schedule D-1-2 for asset-backed securities. The proposal includes more detailed reporting lines to provide more granularity on the actual types of investments held. The effective date of the bond proposal, and the reporting changes, is anticipated for January 1, 2025. Reporting changes to reflect the Schedule D-1 proposed changes were exposed by the Blanks (E) Working Group on March 7, 2023. Updated revisions to the statutory accounting guidance are planned for exposure by the Statutory Accounting Principles (E) Working Group at the 2023 Spring National Meeting. Ref #2022-17, which clarifies interest income disclosures, is planned for adoption consideration at the 2023 Spring National Meeting.</p>		<p>SAPWG Completed Actions: See above descriptions Ref # 2021-21, Ref #2022-15 and Ref #2021-22 BWG; Ref #2022-17, incorporated revisions to data-capture interest income disclosures, and established new disclosures for aggregate paid-in-kind interest and deferred interest. (Adopted March 2023). SAPWG Ongoing Work: Reporting changes to reflect the Schedule D-1 proposed changes were exposed by the Blanks (E) Working Group on March 7, 2023, and updated revisions are anticipated for exposure shortly after the 2023 Summer National Meeting. The statutory accounting revisions to incorporate a new principles-based bond definition in SSAP No. 26R—Bonds and SSAP No. 43R—Asset Backed Securities will be presented for adoption at the 2023 Summer National Meeting.</p>	<p>SAPWG Update: Closed No further work deemed necessary. Previous initiatives have addressed the PE concern, the referral objective and are complete. The bond proposal and the reporting changes have been approved and will become effective January 1, 2025.</p>
<p>10. Privately Structured Securities: The material increases in privately structured securities (both by affiliated and non-affiliated asset managers), which introduce other sources of risk or increase traditional credit risk, such as complexity risk and illiquidity risk, and involve a lack of transparency. (The NAIC Capital Markets Bureau continues to monitor this and issue regular reports, but much of the work is complex and time-intensive with a lot of manual research required. The NAIC Securities Valuation Office will begin receiving private rating rationale reports in 2022; these will offer some transparency into these private securities.)</p>	<p>Sent a referral to the Life Actuarial (A) Task Force recognizing its existing work on an Actuarial Guideline including disclosure requirements for the risks of privately structured securities and how the insurer is modeling the risks. Sent a referral to the VOSTF highlighting the MWG regulators' support for the blanks proposal to add market data fields for private securities being considered by the Valuation of Securities (E) Task Force (VOSTF). MWG regulators will wait on any further work or referrals until they have an opportunity to work with the results of the VOSTF proposal and the SAPWG Schedule D revamp project. Sent a referral for new work to the RBC Investment Risk and Evaluation (E) Working Group to address the tail risk concerns not captured by reserves.</p>	<p>LATF Update: Actuarial Guideline 53 (AG 53) has been adopted by the NAIC's Executive (EX) Committee and Plenary and was effective for year-end 2022 reporting. Starting in Spring 2023, regulators on the Valuation Analysis (E) Working Group will be conducting AG 53 reviews. This will involve a targeted review of asset adequacy analysis related to modeling of business supported with projected high net yield assets.</p>	<p>VOSTF Update: The VOSTF sent referrals to the Financial Condition (E) Committee, Financial Stability (E) Task Force, Macropendental (E) Working Group, Capital Adequacy (E) Task Force, Risk-Based Capital Investment Risk and Evaluation (E) Working Group, Life Actuarial (A) Task Force, Financial Analysis (E) Working Group, Statutory Accounting Principles (E) Working Group and Valuation Analysis (E) Working Group requesting feedback on a proposal to have the NAIC's SVO develop the analytical capability to produce risk metrics for bond investments, and model measures of interest rate sensitivity and project investment cash flows and estimated losses for any given interest rate or economic scenario for regulator use. These groups were asked if they support the proposal and to describe different ways they envision being able to take advantage of such a capability within the NAIC.</p>	<p>RBCIREWG Update: The Risk-Based Capital Investment Risk and Evaluation (E) Working Group added this item to its working agenda. While not specifically addressing privately structured securities, the Working Group's current work on collateralized loan obligations may contribute to addressing this item.</p>	<p>SAPWG Ongoing Work: • As discussed above, the Schedule D bond proposal is planned for 2025 reporting.</p>	<p>RBCIREWG Update: 1-30-24 The Academy finalized their principles for structured securities with input from the working group at the 2023 Fall NMI. As previously indicated, this work may inform the work the Working Group does on the MWG item but it is still pending discussion by the group. VOSTF Update: 2-6-24 In 2023 the Securities Valuation Office (SVO) proposed an amendment to the Purposes and Procedures Manual of the NAIC Investment Analysis Office (the P&P Manual) to make all Structured Equity and Funds, which captures a subset of the privately structured securities market, ineligible for filing exemption. The Task Force deferred action on that proposal and instructed the SVO to instead draft a new proposal that was more limited in scope and which would enable the targeting of individual securities with material risk assessment differences. Privately structured securities with material differences in assessment between Credit Rating Providers and the SVO would be captured in the discussion on Reliance on Rating Agencies in 11, below. The proposal for the SVO to develop the analytic capability to collect and analyze risk metrics is currently on hold.</p> <p>SAPWG Update: No further work deemed necessary. Previous initiatives have addressed the PE concern and the referral objective is complete. The bond proposal and the reporting changes have been approved and will become effective January 1, 2025.</p>
<p>11. Reliance on Rating Agencies: The level of reliance on rating agency ratings and their appropriateness for regulatory purposes (e.g., accuracy, consistency, comparability, applicability, interchangeability, and transparency). (VOSTF has previously addressed and will continue to address this issue.)</p>	<p>Sent a referral to the VOSTF indicating the MWG regulators' agreement to monitor the work of its ad hoc group addressing various rating agency considerations.</p>	<p>VOSTF Update: • The Task Force adopted an amendment at its Feb. 21 meeting that effective Jan. 1, 2024, financially modeled collateralized loan obligations (CLO) will not be eligible to use credit rating provider ratings to determine an NAIC Designation. • The Task Force has drafted a list of questions to discuss with each rating agency in future regulatory-only meetings. The questions are in the materials for the Spring National Meeting and will likely be exposed for public comment.</p>			<p>VOSTF received referral responses from the Financial Condition (E) Committee, the Life Actuarial (A) Task Force, the Financial Analysis (E) Working Group and the Valuation Analysis (E) Working Group. The Life Actuarial Task Force and Valuation Analysis Working Group supported the proposal and provided examples of risk metrics which would be useful to their groups. The Financial Analysis Working Group supported the VOSTF investigating various products because it said the risk metrics could be more effective in helping financial analysts and examiners to fully evaluate and assess investment risks. The</p>	<p>VOSTF has drafted a list of questions to discuss with each rating agency in future regulator-only meetings. The SVO has received comments from certain rating agencies and is incorporating those comments into a final list of questions to be agreed to by the Task Force. At the 2023 Spring National, during the discussion of the proposed amendment on Structured Equity and Funds, the Task Force deferred action on the Structured Equity and Funds amendment and directed the SVO staff to draft a distinct process on how it would recommend challenging an NAIC Designation assigned from a credit rating</p> <p>VOSTF Update: 2-6-24 The Securities Valuation Office (SVO) has proposed an amendment to the Purposes and Procedures Manual of the NAIC Investment Analysis Office (the P&P Manual) to authorize procedures for the SVO's discretion over NAIC Designations assigned through the Filing Exemption (FE) process. The amendment would grant the SVO staff some level of discretion over the FE process to address the NAIC's current blind reliance on credit ratings. It also addresses the Financial Condition (E) Committee's charge to the Task Force to: Establish criteria to permit staff's discretion over the assignment of NAIC designations for securities subject to the FE process (the use of CRP ratings to determine an NAIC designation) to ensure greater consistency.</p>

		<ul style="list-style-type: none"> The Securities Valuation Office (SVO) has proposed an amendment to remove Structured Equity and Funds transactions from being eligible to use credit rating provider (CRP) ratings to assign an NAIC Designation. The SVO has proposed defining Structured Equity and Funds investments as investments which, through the insertion of an intervening entity such as a special purpose vehicle (SPV) or limited partnership, enable underlying assets that may not qualify as 'bonds' or be eligible to receive an NAIC Designation under the current regulatory guidance, to be reported as 'bonds' because the intervening entity issues notes and those notes receive a credit rating provider rating. The SVO identified multiple regulatory reporting arbitrage opportunities with these investments that circumvent regulatory guidance using a CRP rating to accomplish that result. The Task Force adopted a new charge for 2023 to establish criteria to permit staff's discretion over the assignment of NAIC designations for securities subject to the FE process (the use of CRP ratings to determine an NAIC designation) to ensure greater consistency, uniformity, and appropriateness to achieve the NAIC's financial solvency objectives. The criteria have not yet been proposed. 			<p>Financial Condition Committee said it was worthwhile for the VOSTF to continue to investigate the various products which could be made available to the SVO staff and state regulators that provide some of the alternative investment risk measures as they could obviate the need for the NAIC to collect that information from NAIC Annual Statements. However, the FE Committee said that before it could sponsor the proposal it would need more information to fully understand the costs and benefits of such products. This is an ongoing initiative.</p>	<p>provider ("CRP") rating pursuant to the Filing Exemption ("FE") process which the SVO thinks is not a reasonable assessment of risk for regulatory purposes. The SVO subsequently proposed an amendment which would grant the SVO staff a limited amount of discretion over the FE process to address the NAIC's current blind reliance on credit ratings. The amendment would establish strict due process requirements before the SVO could over-ride a CRP rating including a materiality threshold of a 3-notch difference in order to flag a CRP rating and sufficient notice to insurers to provide time for insurers to appeal SVO assessments. This amendment will continue to be discussed by the Task Force and interested parties.</p>	<p>uniformity, and appropriateness to achieve the NAIC's financial solvency objectives. The proposed process would include:</p> <ul style="list-style-type: none"> Establishment of a materiality threshold required to flag a CRP rating. In order to limit the SVO's use of this process to only what would be considered truly material differences of opinion, the SVO would only be able to change a Designation assigned through the FE process if it were 3 or more notches different than the SVO's assessment. Inclusion of a subgroup of the Task Force in the review process before any rating would be removed. Procedural steps to ensure insurers are given due process: ample notification to insurer, an opportunity for the insurer to provide full documentation to the SVO and explain its analysis of the investment, an opportunity to get an alternate CRP rating, and sufficient time to file the security, if needed. <p>VOSTF is currently reviewing comments from interested parties and discussion is ongoing.</p>
<p>12. Pension Risk Transfer (PRT) Business Supported by Complex Investments.</p> <p>The trend of life insurers in pension risk transfer (PRT) business and supporting such business with the more complex investments outlined above (LATF has exposed questions aimed at determining if an Actuarial Guideline is needed to achieve a primary goal of ensuring claims-paying ability even if the complex assets (often private equity-related) did not perform as the company expects, and a secondary goal to require stress testing and best practices related to valuation of non-publicly traded assets (note – LATF's considerations are not limited to PRT). Additionally, enhanced reporting in 2021 Separate Accounts blank will specifically identify assets backing PRT liabilities.) Considerations have also been raised regarding the RBC treatment of PRT business, a Review applicability of Department of Labor protections resulting for pension beneficiaries in a PRT transaction.</p> <p>a. Review state guaranty associations' coverage for group annuity certificate holders (pension beneficiaries) in receivership compared to Pension Benefit Guaranty Corporation (PBGC) protection.</p>	<p>LATF's Actuarial Guideline Sent a referral to the LATF recognizing its work on an Actuarial Guideline which should address the reserve considerations of pension risk transfer (PRT) business. Sent a referral to the SAPWG to address the related disclosure considerations as the goal was to have them in the Notes to Financial Statements.</p>	<p>LATF Update: The PRT Drafting Group of the VM-22 SG is considering the development of PRT/longevity risk mortality factors. The LAG hopes to share data with the Longevity Risk Subgroup of LATF that the Subgroup could consider for C-2 RBC for PRT products and longevity risk transactions.</p>	<p>SAPWG Completed Actions: Ref #2020-37: Separate Account – Product Identifiers and Ref #2020-38: Pension Risk Transfer - Separate Account Disclosure, which did not result in statutory accounting revisions but instead resulted in modifications to the reporting of PRT transactions in the annual financial statements, was adopted by the SAPWG May 2021. Ref #2021-03BWG was adopted by Blanks (E) Working Group in 2021. Comment – The 2022 review of the initial 2021 disclosures noted that although the instructions were clarified to require by product reporting including the use of a distinct disaggregated product identifier for each product represented; most entities are still broadly grouping PRT activity in the disclosures. Review of 2022 data is planned to be completed in the first half of 2023.</p>	<p>LATF Update: The VM-22 Subgroup of LATF is currently developing a new reserving framework for non-variable annuities. As part of this effort, there is a distinct methodology being developed for longevity reinsurance/PRT. This has been the most controversial aspect of the VM-22 project. VM-22 is expected to go live no sooner than 2026.</p> <p>There is also a separate Longevity Risk (E/A) Subgroup of LATF that will work to develop a longevity reinsurance/PRT related capital charge. This work is on hiatus until the VM-22 reserving framework is adopted</p>	<p>LATF Update: The PRT drafting group hasn't met since January 2023, and the Longevity Risk Subgroup is holding off on meeting until the VM-22 Subgroup finalizes the VM-22 methodology</p>	<p>SAPWG Update: 1-30-24 Review of 2022 data was completed by NAIC staff in 2023 and continued data and reporting issues were identified. Review of 2023 YE data will be completed in the second quarter of 2024. This will allow for regulator review and input in determining if additional instruction or other follow-up is needed.</p> <p>LATF Update: 2-5-24 Confirmed no change in status since July 12, 2023 due to the VM-22 methodology not being final.</p>	
<p>b. Department of Labor Protections:</p>	<p>MWG Update: NAIC staff are continuing to hold discussions with Department of Labor representatives.</p>				<p>MWG Update: Discussions with DoL continue. DoL is in the process of updating their fiduciary requirements under 95-1, which require due diligence in assessing an insurer prior to a PRT transaction.</p>	<p>MWG update: Closed DoL revised their fiduciary standards (95-1) and dates to evaluate an insurance company prior to approving a PRT.</p>	
<p>c. State Guaranty Funds Compared to PBGC Protection – NOLHGA 2016 Study:</p>	<p>No further action was deemed necessary MWG Update: However, NAIC staff have contacted PBGC representatives to inquire if they have any items they wish to address with the MWG.</p>					<p>Closed It appears state guaranty funds provide adequate protections for PRT business according to NOLHGA study and other research. No further action was deemed necessary.</p>	
<p>d. RBC Treatment of PRT Business:</p>	<p>Sent a referral to the Longevity Risk (E/A) Subgroup recognizing its work will also address PRT business and indicating the MWG regulators will monitor this work.</p>	<p>LATF Update: The Longevity Risk (E/A) Subgroup will review the currently exposed VM-22 PBR methodology once it is finalized and adopted. The Subgroup will consider whether to develop and recommend longevity risk factor(s) for the product(s) that were excluded from the application of the current longevity risk factors.</p>			<p>LATF Update: No change in this item as the VM-22 framework is not final yet.</p>	<p>LATF Update: 1-30-24 The VM-22 Subgroup is still working on assumptions and other aspects, so the work on the framework continues. With that, the work of the Longevity Risk (E/A) Subgroup is pending this outcome</p>	
<p>13. Offshore/Complex Reinsurance:</p> <p>Insurers' use of offshore reinsurers (including captives) and complex affiliated sidacar vehicles to maximize capital efficiency, reduce reserves, increase investment risk, and introduce complexities into the group structure.</p>	<p>MWG Update: MWG regulators are wrapping up the confidential discussions with industry participants and other jurisdictions regarding the use of offshore reinsurers and complex affiliated reinsurance vehicles. They are continuing discussions to identify the best mechanism to ensure reviewing/approving regulators can identify the true economic impacts of the reinsurance transaction. MWG regulators will consider further work and/or referrals once they have concluded these discussions.</p>	<p>At the Spring NM 2023 The Working Group released for comment the reinsurance comparison worksheet designed for regulators to assess cross-border reinsurance treaties where there are different regulatory systems involved. We believe the cross-border reinsurance worksheet will enhance state insurance regulators' ability to monitor these transactions. The comment period ended Apr 28 and the MWG is in the process of addressing comments received.</p>			<p>July 11, 2023</p> <p>MWG Update: The Reinsurance Worksheet was adopted on a joint FSFF/MWG virtual meeting on June 20, 2023.</p>	<p>MWG Update: Continue to monitor offshore reinsurance market, meet with BMA and enhance ReWS. Monitor and assess ceded reserves offshore by transaction type, i.e., MedCo, Coinsurance, Funds WH and asset intensive reinsurance.</p> <p>LATF Update: 2-8-24 Proposal being considered to require Asset Adequacy Testing for Reinsurance transactions.</p>	

Clarifications for the MWG Reinsurance Worksheet

1. **OPTIONAL TOOL:** This worksheet is designed as an **OPTIONAL** tool to assist lead state/domiciliary regulators when reviewing reinsurance transactions to allow them to obtain the information necessary to understand the economic impacts, typically upon initial review of the proposed transaction but also potentially when the lead state/domiciliary regulator is performing a historical review of the transaction for some specific purpose.
2. **NOT AN ONGOING FILING:** This worksheet is **NOT** for use as an ongoing filing with the NAIC and/or the lead/domiciliary state. It is an **EDUCATIONAL** tool for lead state/domiciliary regulators to use on an ad hoc basis as needed.
3. **ONLY USED IF NEEDED:** The worksheet is **NOT** designed to be used with **EVERY** reinsurance transaction. It is designed as a consistent tool for lead state/domiciliary regulators to use when reviewing reinsurance transactions for which they need to determine the economic impacts of said reinsurance transactions. If a reinsurance transaction is easily understood without the use of this worksheet, then a worksheet would not be used by the lead state/domiciliary regulator.
4. **NOT A FIXED TEMPLATE:** The worksheet is **NOT** a fixed template which **MUST** be used to answer the lead state/domiciliary regulators' information needs. If an insurer has materials used in its own assessment of the reinsurance transaction which answer the information needs of the lead state/domiciliary regulator expressed in the worksheet, then those materials may be accepted by the lead state/domiciliary regulator rather than requiring the insurer to use the worksheet format. Every effort should be made to **avoid duplicate requests** for information.
5. **OPEN TO REINSURANCE TYPE:** The worksheet **was designed with life reinsurance transactions** as the initial focus, but there is **no reason to limit this tool to life reinsurance transactions**. If the lead state/domiciliary regulator has a P/C reinsurance transaction for which they are struggling to understand the economic impact (despite any existing notes, interrogatories, and Schedule F disclosures for already approved transactions), the lead state/domiciliary regulator would be able to use the worksheet to request the needed information, with appropriate edits. Again, this worksheet should not be used if the lead state/domiciliary regulator has a clear understanding of the transaction from data already provided.
 - a. Similarly, the worksheet was designed with affiliated transactions as the initial focus, but a lead state/domiciliary regulator should use the template for unaffiliated transactions if existing information does not provide a clear understanding of the transaction.
6. **NOT REINSURANCE POLICY:** The Macroprudential (E) Working Group is working in coordination with the Reinsurance (E) Task Force. This optional, informational tool is **not intended to impact any of its reinsurance policies or procedures**, such as the qualified/reciprocal jurisdiction evaluation process or the U.S. Covered Agreement.
7. **ONLY REFERENCED IN HANDBOOKS:** The worksheet is **not included in the Financial Analysis Handbook or the Examination Handbook**, although it may be referenced there as an optional tool. The worksheet will be available on StateNet.
8. **CONFIDENTIALITY:** The worksheet would be confidential under a lead/domiciliary state's existing confidentiality laws and regulations in place to allow the regulator to assess such transactions.
9. **BALANCE SHEET:** users can complete one of three balance sheet formats. The state regulator should direct the preparer as to which format they want completed.
 - i. Balance Sheet 1 tab-accounts for pre transaction and 1 year of Post Transaction Stat for US.
 - ii. The Balance Sheet 2 tab-accounts for 3 years of Post Transaction Stat for US.
 - iii. The third format includes a Balance Sheet (Balance sheet 3 tab), P&L statement, and Cash Flow statement projections for 3 years. These financial statements are the same ones used in UCAA filings.
10. **Asset Listing:** For any level 3 assets as defined in SSAP 101 reported on the assets page, please provide the source or methodology for valuation.
